RFID systems in common supply operations. Are utilized to create RFID systems. Best practices for implementation of Foundations of Radio Frequency Identification Systems (RFID). The ENGR 8616 RFID SYSTEMS IN THE SUPPLY CHAIN (3 credits) Prerequisite(s)/Corequisite(s): regulations, and material selection. Container design, material handling, storage, packing and environmental conditions. ENGR 8616 RFID SYSTEMS IN THE SUPPLY CHAIN (3 credits) Foundations of Radio Frequency Identification Systems (RFID). The fundamentals of how RFID components of tab, transponder, and antennae are utilized to create RFID systems. Best practices for implementation of RFID systems in common supply operations.
