

APPLIED BUSINESS ECONOMICS AND ANALYSIS CERTIFICATE

The purpose of the applied business economics and analysis graduate certificate is to assist professionals in government, business, economics, finance, and other analytical fields to expand their economic and analytical knowledge. The certificate is ideal for students interested in advancing their education but might not necessarily be ready to commit to completing a master's degree. It could serve as a first step to joining the master's program in applied economics. The certificate aligns with employer needs for an adaptable workforce through continuous professional development.
