

DATA MANAGEMENT CERTIFICATE

Department of Information Systems and Quantitative Analysis,
College of Information Science & Technology

Vision Statement

Data management focuses on the processes and techniques to manage data as a valuable organizational and societal asset throughout the data lifecycle. The certificate will give students theoretical and practical training in database design and development, database administration, data integration, data engineering, and data governance. Students will be exposed to a variety of data types and different kind of databases such as relational database, data warehouse, and NoSQL and big data databases.

The data management graduate certificate consists of three core courses (9 credits) and two electives (6 credits) for a total of 15 credit hours. Specific course requirements for the graduate certificate are described below. There are three prerequisite courses which may be waived by the chair of the graduate program committee, based on courses already taken, applicable work experience, test out exams offered by the department, or the recommendation of faculty teaching the prerequisite courses.

Degree Requirements

Prerequisites

The following courses are prerequisites of the required courses. Elective courses may have additional prerequisites. All prerequisites must be completed with grades of "B" or better.

- One programming class such as CIST 1400 or equivalent
- One semester of undergraduate database management or equivalent, e.g.,
 - ISQA 3310 Managing the database environment
 - CSCI 4850 Database Management Systems
 - ISQA 8040 An overview of systems development

No more than two courses (6 credit hours maximum) can be used on two MIS-related certificates (Data Analytics, Information Assurance, Project Management, and Systems Analysis and Design).
