The primary goal of this course is to provide students with a solid grounding in theories, principles, and strategies of persuasion social influence as they apply to everyday contexts in which influence attempts take place. Students should gain familiarity with findings from empirical investigations on persuasion, social influence, and compliance gaining, and will learn about strategies and techniques of persuasion relating (Cross-listed with CMST 4510)

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

CMST 8526 PSYCHOLINGUISTICS (3 credits)

A discussion of the literature concerned with how such psychological variables as perception, learning, memory and development relate to the linguistic variables of sentence structure, meaning and speech sounds. (Cross-listed with CMST 4520)

Prerequisite(s)/Corequisite(s): Admission into graduate program. Not open to non-degree graduate students.

CMST 8536 INTERCULTURAL COMMUNICATION-US (3 credits)

This course will provide a foundation that leads to Intercultural Communication competence. Specifically, this course is to introduce the concepts of cross-cultural communication. Theory and research are integrated with application and necessary skills are identified and developed. (Cross-listed with CMST 4530)

CMST 8546 CONTEMPORARY SYSTEMS OF COMMUNICATION (3 credits)

An adaptation of General Systems Theory concepts to the study of human communication processes with emphasis on systems analysis of contemporary interpersonal communication perspectives. (Cross-listed with CMST 4540)

Prerequisite(s)/Corequisite(s): Graduate standing and major in communication; or permission of instructor.

CMST 8556 NONVERBAL COMMUNICATION (3 credits)

This course is designed to familiarize the student with current knowledge and research about nonverbal communication and to provide a wide variety of practical experiences through which the student can analyze and evaluate his or her own nonverbal behavior and that of others. The course, also, reviews the functions, areas and applied contexts of nonverbal communication. (Cross-listed with CMST 4550)

Prerequisite(s)/Corequisite(s): Graduate Standing. Not open to non-degree graduate students.

CMST 8566 COMMUNICATION, TEAMWORK, & FACILITATION (3 credits)

This course focuses on the communication practices, process tools, and theory associated with team problem solving, group discussion, facilitation skills, facilitative leadership, meeting management, and training in effective group interaction. (Cross-listed with CMST 4560)

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to nondegree students.

CMST 8576 INTERCULTURAL COMMUNICATION IN THE GLOBAL WORKPLACE (3 credits)

This course examines the intercultural perspective of organizational communication in a modern global world by focusing on the management of cultural differences in the global workplace. The trend towards a global economy is bringing people of different ethnic and cultural background together. Thus, the development of greater intercultural understanding has become an essential element of global workplace. After taking this course you will be more aware of cultural diversity in an organizational setting and further develop intercultural sensitivity and intercultural competence that will help you adapt to your future organizational life. (Cross-listed with CMST 4570)

CMST 8586 COMMUNICATING RACE, ETHNICITY & IDENTITY (3 credits)

This is an undergraduate/graduate course that provides students with definitional and experiential knowledge about the origin of racial concepts, theories, and practices, definitions of ethnicity and identity, and the communicative relationship between race, ethnicity, and identity. (Cross-listed with CMST 4580, BLST 4580, BLST 8586)

CMST 8606 COMMUNICATION THEORY AND APPLICATION (3 credits)

This course begins by introducing students to two broad categories of theory development - objective and interpretive. Then concepts and assumptions associated with each of these two perspectives are employed to critically evaluate several specific theories that fall within different of the sub-disciplines of the field of communication: interpersonal, group, organizational, mass, public/rhetorical, cultural, and intercultural/gender. Along with critically evaluating and comparing/contrasting different communication theories, emphasis is placed on how the theories can be effectively applied in concrete settings and circumstances. (Cross-listed with CMST 4600)

Prerequisite(s)/Corequisite(s): Graduate standing

CMST 8626 DIRECTING FORENSICS (3 credits)

To provide students planning to teach speech in high school or college with a philosophy and detailed knowledge of how to direct a forensic program. (Cross-listed with CMST 4620)

CMST 8706 INTERPERSONAL CONFLICT (3 credits)

This course provides an overview of interpersonal conflict processes. It examines perspectives on conflict, patterns of constructive and destructive conflict, conflict styles and tactics, interpersonal power, negotiation strategies, conflict assessment, and conflict skill development. (Cross-listed with CMST 4700)

Prerequisite(s)/Corequisite(s): Communication major

CMST 8806 CONFLICT MEDIATION (3 credits)

This course develops knowledge of mediation theory, research, and practice and communication skills essential to the effective mediation of disputes in various contexts. (Cross-listed with CMST 4800)

Prerequisite(s)/Corequisite(s): Graduate major in Communication or Master of Business Administration (MBA) program, or instructor permission.

JMC 8016 HISTORY OF MASS COMMUNICATION (3 credits)

This class covers development of the U.S. media from 1690 to present day, including newspapers, magazines, radio, television, the new media of the Internet, advertising and public relations. A special emphasis is placed on freedom of the press. (Cross-listed with JMC 4010).

JMC 8046 SOCIAL MEDIA MEASUREMENT AND MANAGEMENT (3 credits)

Social Media Measurement and Management explores the dynamic development of social media platforms within a journalism and media communication context. Students of journalism, broadcasting, public relations, advertising and marketing will examine theories and best practices of social media interaction and engagement. (Cross-listed with JMC 4040).

Prerequisite(s)/Corequisite(s): Good standing as a UNO graduate student.

JMC 8226 LITERARY JOURNALISM (3 credits)

Survey of the journalistic works of pertinent American writers through readings, lectures, discussions, plus creative writing assignments. (Cross-listed with JMC 4220).

Prerequisite(s)/Corequisite(s): JMC 2100 and Junior Standing

JMC 8235 PRINCIPLES OF PUBLIC RELATIONS (3 credits)

This course will focus primarily on techniques to garner and sustain public understanding, acceptance and support for an organization. This course will explain the merits of these techniques through theory and application, and will offer constant reminders of the relationship between theory and practice. Understanding theory can result in more efficient and effective use of techniques. (Cross-listed with JMC 3230).

Prerequisite(s)/Corequisite(s): JMC 2100, JMC 2104 and minimum GPA of 2.25

JMC 8246 PUBLIC RELATIONS CASE STUDIES (3 credits)

The course is designed to enable the student: 1) to integrate issue-management and decision-making theoretical models with the communication theory and research techniques presented in JMC 3230/JMC 8236 and 2) to apply professional judgment to the public relations problem-solving process through the development of structured analysis of historical cases. (Cross-listed with JMC 4240).

JMC 8266 MEDIA RELATIONS (3 credits)

This course focuses on the communication tools used in media relations, the nuances of working with reporters from press and various media, news writing, news judgment, strategic planning, and the application of communication theories in understanding the relationship between news organizations and media relations representatives for organizations and corporations. (Cross-listed with JMC 4260).

JMC 8316 MEDIA & POLITICS (3 credits)

An in-depth study of the impact of the media on political communication. This course will explore the symbiotic relationship of media and political communication, including the influence of traditional mass media, digital media, and social media on the political communication process. Students will delve into media theories and critically examine the influence of the media on the political communication process. (Cross-listed with JMC 4310).

JMC 8346 MEDIA REGULATION & FREEDOM (3 credits)

Media and Internet regulation and free expression as defined and interpreted through First Amendment rights, prior restraint and obscenity case law, advertising and public relations, broadcast and cable TV regulation and deregulation policy, new telecommunication media, and privacy. (Cross-listed with JMC 4340).

Prerequisite(s)/Corequisite(s): ENGL1160

JMC 8376 COMMUNICATION WORKSHOP (3 credits)

A workshop to explore communication theory and processes and to develop skills in their application. (Cross-listed with JMC 4370).

Prerequisite(s)/Corequisite(s): Junior Standing, Permission of instructor

JMC 8386 FILM THEORY AND CRITICISM (3 credits)

Study of major trends in film criticism and theory in (primarily) Europe and America, with concentrated analysis of selected films. (Cross-listed with JMC 4380).

JMC 8396 MEDIA ENTREPRENEURSHIP (3 credits)

4390 Media Entrepreneurship explores new and emerging media business models from local, national and global perspectives. Students learn about and work within the start-up economy and entrepreneurial approaches. The course offers professional and critical perspectives. (Cross-listed with JMC 4390, ENTR 4390).

Prerequisite(s)/Corequisite(s): Minimum cumulative GPA- 2.25; Junior standing, ENGL 1160 or equivalent, or instructor permission.

JMC 8406 MASS MEDIA ETHICS (3 credits)

The course examines ethical standards and practices of the media - print, electronic and online media, as well as advertising, public relations and entertainment media. It includes development of ethical decision-making skills. (Cross-listed with JMC 4400).

JMC 8416 COMMUNICATION LAW AND POLICY (3 credits)

Communication practitioners need to understand legal protections and constraints. This course explores legal concepts, frameworks and principles to understand constitutional, statutory, regulatory and case law and policies. The student must have a basic understanding of government, social studies and human rights principles. The First Amendment and international law provide a framework for exploring current cases and issues. (Cross-listed with JMC 4410).

JMC 8426 SPORTS WRITING (3 credits)

Students will learn all aspects of the specialized aspect of sports media communication. Areas covered will include writing, interviewing, storytelling, using multiple media platforms and the ethics of sports reporting. Various writing experiences across the media spectrum, from traditional media to the new forms of online journalism, will be addressed. (Cross-listed with JMC 4420)

Prerequisite(s)/Corequisite(s): JMC 2100 and JMC 2104; JMC 2200; JMC 2300; JMC 2370; and minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

JMC 8506 MASS COMMUNICATION AND PUBLIC OPINION (3 credits)

This class represents a study of the philosophy, process and effects of mass communication; the relationship between the mass media and public opinion and propaganda; and the nature, function and measurement of public opinion. (Cross-listed with JMC 4500).

JMC 8816 DIGITAL LITERACIES FOR TECHNICAL COMMUNICATORS (3 credits)

This course addresses emerging issues in digital literacies such as the rhetoric of technology, technological competency, technology and information ecologies, critical awareness of technology and human interactions, judicious application of technological knowledge, user-centered design, networking and online communities, ethics and technology, and culture and technology. (Cross-listed with ENGL 4810, ENGL 8816, JMC 4810).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor

JMC 8826 POLITICS AND FILM (3 credits)

This course introduces students to the analysis of politics and film, focusing on how politics is portrayed in film and the politics of film making. (Cross-listed with PSCI 4820, JMC 4820, PSCI 8826).

JMC 8836 TECHNICAL COMMUNICATION (3 credits)

Technical Communication introduces students to the field of technical communication. Students will study the development of print and electronic genres common to industry settings, the design and production of technical documents, the writing processes and work practices of professional technical communicators, and the roles of technical communicators in organizational contexts. (Cross-listed with ENGL 4830, ENGL 8836, JMC 4830).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor

JMC 8856 INFORMATION DESIGN FOR TECHNICAL COMMUNICATORS (3 credits)

This course introduces students to strategies for integrating visual and textual elements of technical documents. Instruction will focus on design theory and application through individual and collaborative projects. Students will develop the professional judgment necessary for making and implementing stylistic choices appropriate for communicating technical information to a lay audience. (Cross-listed with ENGL 4850, ENGL 8856, JMC 4850).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor

JMC 8876 TECHNICAL EDITING (3 credits)

This course introduces students to the roles and responsibilities of technical editors: the editorial decision-making processes for genre, design, style, and production of technical information; the communication with technical experts, writers, and publishers; the collaborative processes of technical editing; and the techniques technical editors use during comprehensive, developmental, copyediting, and proofreading stages. (Cross-listed with ENGL 4870, ENGL 8876, JMC 4870).

Prerequisite(s)/Corequisite(s): ENGL 1160 or permission of the instructor

JMC 8896 CAPSTONE COURSE IN TECHNICAL COMMUNICATION (3 credits)

In this capstone course, students will extend foundational skills learned in previous technical communication courses. Students will demonstrate their competency in the technical documentation process in organizational environments, the issues important to the technical communication profession, and the practices of writing and creating complex technical documents for specific purpose and audience. (Cross-listed with ENGL 4890, ENGL 8896, JMC 4890).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

JMC 8906 SEMINAR MASS COMMUNICATION (3 credits)

A senior seminar applying historical and theoretical perspective to current issues and developments in mass communications. (Cross-listed with JMC 4900)

Prerequisite(s)/Corequisite(s): Graduate standing

JMC 8926 MEDIA LITERACY (3 credits)

An advanced seminar on the study of media and information literacy through deconstruction of mass communication content, meaning construction, framing analyses and critical/cultural approaches. (Cross-listed with JMC 4920).

Communication, MA

School of Communication, College of Communication, Fine Arts & Media

Vision Statement

The School of Communication offers a Master of Arts degree emphasizing a blend of broad theoretical instruction and application of the communication discipline in all its iterations. Graduate students achieve in-depth knowledge of communication processes and effects and acquire the skills needed to discover new knowledge through research and other forms of scholarly activity and professional growth. Once coursework is complete, graduate students conduct original research for a thesis or project.

School of Communication graduate faculty offer an impressive blend of academic and professional experience. Faculty are actively involved in the discovery of new knowledge through publication in top scholarly journals. The faculty seek to cultivate students' breadth and depth of knowledge about communication, as well as foster a spirit of free investigation.

atyma@unomaha.edu

Program Website (<http://www.unomaha.edu/college-of-communication-fine-arts-and-media/communication/>)

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: March 1
- Spring: October 1
- Summer: April 15

Note: Applications will still be received and reviewed until term begins

If you are applying for a **graduate assistantship**, both admissions and assistantship application materials must be completed by **February 15** (for Fall Semester) and **October 1** (for Spring Semester).

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105

- **Statement of Purpose:** The statement should be 500 words in length and should answer the following questions:
 - Why have you chosen the UNO School of Communication master's degree program?
 - What are your areas of scholarly interest and research?
 - What are your personal or professional plans after you complete the master's degree?
- **Writing Sample:** An academic or otherwise-demonstrative writing sample (e.g., term paper, senior thesis, or research paper) that demonstrates the applicant's strengths as a writer and researcher.
- **Resume or CV:** Identify major and minor field(s) of study, overall GPA, and GPA within major, as well as all relevant experience.
- **Letters of Recommendation** - Three letters are required. A minimum of one letter from a faculty member of the applicant's undergraduate program should be included if at all possible. Other letters should address an applicant's ability to do advanced-level academic work.
- **Optional:** the GRE exam are not required, but will be reviewed as part of the overall application if provided.

Admission Status

- **Unconditional Admission** may be granted to a student whose record includes at least the following:
 - Certification of a bachelor's degree from a regionally accredited institution
 - Documentation through official transcripts using a 4.0 grade point scale of having earned at least:
 - A 3.25 in communication or undergraduate major work.
 - Either a 3.0 overall undergraduate average GPA or a 3.25 average GPA in the last half of undergraduate credit hours, and
 - Inclusion of nine (9) to 15 undergraduate (junior or senior level) theory and/or research courses in communication (e.g., communication studies, speech communication, broadcasting, journalism, mass communication, media communication or studies, rhetoric) or a related field as approved by the graduate program chair (GPC) and/or the graduate admissions committee.
- **Provisional Admission** may be granted for reasons of experience, maturity or other circumstances to a student who does not meet the unconditional admission standards. A student will not be admitted who does not meet UNO Graduate College provisional admission standards (a 2.75 GPA for both undergraduate major and minor).
 - The school's graduate admission committee may require any one or any combination of the following in deciding whether or not to recommend provisional admission:
 - Completion of prescribed course(s) (not for graduate credit) with a grade of "B" (3.0/4.0) or better, with course(s) approved in advance by the GPC and/or the graduate admission committee.
 - Completion of the first 12 graduate hours of coursework with a grade of "B" (3.0/4.0) or better as a non-declared student.

Degree Requirements

Required Courses

The core courses provide basic, intensive and broad coverage of communication as a field of advanced study. The core integrates mass and speech communication theories and research methodologies from all aspects of the discipline. If a student fails to achieve an average grade of "B" (3.0/4.0) in the overall core, the student may retake each core course with a grade below "B" once, and must obtain an average grade of "B" or higher to remain in the program. The core courses must be completed within the first 18-21 credit hours of a student's program (This requirement may be waived for students entering the communication graduate program with approved graduate credits to be used in the plan of study).

Thesis Option

Code	Title	Credits
Required Core Courses		
The 12 hours of required courses listed below must be completed with an average grade of "B" or better:		
COMM 8010	COMMUNICATION RESEARCH METHODS SEMINAR: QUANTITATIVE	3
COMM 8020	COMMUNICATION RESEARCH METHODS SEMINAR: QUALITATIVE	3
COMM 8470	FOUNDATIONS SEMINAR: COMMUNICATION STUDIES	3
COMM 8570	FOUNDATIONS SEMINAR: JOURNALISM AND MEDIA COMMUNICATION	3
Graduate Only Seminar		3
Students are required to take one graduate only (8xx0/9xx0 level with no undergraduate dual-listing) three credit seminar during their program. This course may either come from the School of Communication or another graduate program in consultation and advisement with the GPC.		
Electives		
Select 12 elective hours in consultation with the graduate program chair. These will be denoted as either; COMM, CMST, or JMC. No more than 9 hours from outside the school may be counted toward degree requirements. Electives must be completed with an average grade of "B" or better to maintain GPA requirements for program and university.		12
COMM 8990	THESIS	6
Total Credits		33

All candidates should carefully review the Graduate College requirements for forming the supervisory committee, submitting the Supervisory Committee and Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of the thesis.

Project Option

Code	Title	Credits
Required Core Courses		
The 12 hours of required courses listed below must be completed with an average grade of "B" or better:		
COMM 8010	COMMUNICATION RESEARCH METHODS SEMINAR: QUANTITATIVE	3
COMM 8020	COMMUNICATION RESEARCH METHODS SEMINAR: QUALITATIVE	3
COMM 8470	FOUNDATIONS SEMINAR: COMMUNICATION STUDIES	3
COMM 8570	FOUNDATIONS SEMINAR: JOURNALISM AND MEDIA COMMUNICATION	3
Graduate Only Seminar		3
Students are required to take one graduate only (8xx0 or 9xx0 level with no undergraduate dual-listing) three credit seminar during their program. This course may either come from the School of Communication or another graduate program in consultation with and advisement with the GPC.		
Electives		
Select 15 elective hours in consultation with the graduate program chair. These will be denoted as either; COMM, CMST, or JMC. No more than 12 hours from outside the school may be counted toward degree requirements. Electives must be completed with an average grade of "B" or better to maintain GPA requirements for program and University.		15

COMM 8970	GRADUATE PROJECT	3.00
Total Credits		33

The project, in lieu of a thesis, is based on a proposal approved by the student's committee. The student must complete a project which is defended orally before his or her project committee.

Exit Requirements

Students will take either six (6) thesis credit hours or three (3) project hours during the final semester(s) of their program. These credit hours must be 1) taken either concurrently or after the student's final semester of coursework and 2) must be taken and completed in order to successfully complete the program. The thesis or project is considered the final part of the program. With this in mind, coursework will be completed before or concurrently with the thesis or project (it is strongly encouraged that coursework is completed prior to the thesis or project). Students will meet with the GPC to discuss which option consider.

Thesis Option

All candidates should carefully review the Graduate College requirements for forming a supervisory committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of a thesis. These are defended orally before the student's committee once completed.

Project Option

The project, in lieu of a thesis, is based on a proposal approved by the student's committee. The student must complete a project that is defended orally before the student's project committee.

Certificates Offered

- Communication Certificate (p. 1064)
- Human Resources and Training Certificate (p. 1065)
- Technical Communication Certificate (p. 1178)

Communication Certificate

School of Communication, College of Communication, Fine Arts & Media

Vision Statement

The communication graduate certificate program provides potential students who are not interested in a complete MA program the opportunity to expand their knowledge of the discipline or customize their learning toward a specific area of study. This can be helpful for career promotion, professional opportunities, teaching in-discipline at the community college/dual-enrollment level, personal exploration, etc.

Human Resources and Training Certificate

Department of Business Administration, College of Business Administration, School of Communication, College of Communication, Fine Arts & Media, Department of Psychology, College of Arts & Sciences

Vision Statement

The purpose of the graduate certificate in human resources and training (HRST) is to help post-baccalaureate students and working professionals expand their educational background and enhance their knowledge and skills in either human resources or training and development. The first concentration, human resources, focuses on enhancing organizational effectiveness through employee recruitment, selection, placement, performance evaluation, motivation, and retention. The second concentration, training and development, focuses on enhancing training skills and program design including developing, implementing,

assessing, and delivering training programs. The HRST certificate is useful for individuals currently employed in the human resources or training fields and for individuals who desire to enter those fields. The graduate courses required for this certificate address both theory and application from the fields of communication, psychology, and business.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Applications are accepted and reviewed on a rolling basis throughout the year.

Other Requirements

- Admission to the HRST graduate certificate program requires a baccalaureate degree with at least a 3.0 GPA, a major or a minor (or at least a 15 credit concentration) in communication studies, psychology, business, or related area, plus at least one three credit course in research methods or statistics.
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- Statement of Purpose:** A 1000 word maximum statement of purpose essay describing which concentration you wish to pursue and why.
- Resume:** A resume that includes your work history
- Letter of Recommendation:** One letter of recommendation from a current or former supervisor or professor. During your online application process, you will be asked to provide the name and email address of the person writing your recommendation letter. The online application system will send an email to your recommender containing a link for online submission of the recommendation letter.

Certificate Courses

Students must identify which area of concentration they are choosing: Human Resources or Training and Development

Courses must be completed in at least two of the three units (i.e., business administration, communication, or psychology) associated with this certificate program.

See human resources and training certificate concentrations

Exit Requirements

Portfolio

Students admitted to the HRST graduate certificate program must create a portfolio (notebook) containing at least one sample project from each course. A portfolio review will be conducted by the student's advisor before the certificate is awarded. Contact your advisor during the last semester of your program.

Total Credit Hours: 15

Other Program-Related Information

Many courses are offered online-check each semester schedule for details and availability. Students may need to obtain approval and/or a permit number to enroll in some courses. For psychology (PSYC) courses, please contact the instructor for approval; for business administration (BSAD) courses, please contact the MBA advisor at 402.554.3010, and for communication studies (CMST) courses, please contact the certificate advisor at 402.554.6079.

Human Resources and Training Certificate Concentrations

Human Resources Concentration

This concentration focuses on enhancing organizational performance through improving employee recruitment, selection, placement, performance evaluation, motivation, and retention. You will need to complete all 15 credit hours with grades of "B" or better. All classes are 3 credit hours except for BSAD 8250 which is 2 credit hours (students who complete BSAD 8250 will need to complete an additional 1 credit hour independent study in order to earn the graduate certificate).

Code	Title	Credits
Area 1 Requirement		3
BSAD 8136	HUMAN RESOURCE MANAGEMENT	
Area 2 Requirement (Select one course from the following)		3
BSAD 8166	STAFFING THE ORGANIZATION	
CACT 8530	PERSONNEL PSYCHOLOGY AND LEADERSHIP	
PSYC 8316	PSYCHOLOGICAL AND EDUCATIONAL TESTING	
PSYC 8646	PERSONNEL PSYCHOLOGY	
Area 3 Requirement (Select one course from the following)		3
BSAD 8250	ORGANIZATIONAL BEHAVIOR: ENHANCING HUMAN & ORGANIZATIONAL CAPABILITIES	
CMST 8176	ORGANIZATIONAL COMMUNICATION	
PSYC 8636	ORGANIZATIONAL PSYCHOLOGY	
PSYC 9421/ CACT 8520	POSITIVE ORGANIZATIONAL PSYCHOLOGY AND LEADERSHIP	
Area 4 Requirement (Select one course from the following)		3
BSAD 8156	TALENT DEVELOPMENT	
CMST 8156	CORPORATE TRAINING AND DEVELOPMENT	
PSYC 9620	TRAINING AND DEVELOPMENT	

Area 5 Requirement (Select one course from the following) **3**

BSAD 8096	PRINCIPLES OF COLLABORATION
BSAD 8146	TOTAL REWARDS
CMST 8186	COMMUNICATION LEADERSHIP AND POWER AND ORGANIZATIONS
CMST 8536	INTERCULTURAL COMMUNICATION-US
CMST 8566	COMMUNICATION, TEAMWORK, & FACILITATION
CMST 8576	INTERCULTURAL COMMUNICATION IN THE GLOBAL WORKPLACE
CMST 8706	INTERPERSONAL CONFLICT
CMST 8806	ADVANCED CONFLICT MEDIATION
PSYC 8656/ CACT 8506	CREATIVITY AND INNOVATION IN ORGANIZATIONS
PSYC 9610	MOTIVATION & MORALE
PSYC 9660	CRITERION DEVELOPMENT AND PERFORMANCE APPRAISAL

Total Credits **15****Training and Development Concentration**

This concentration focuses on enhancing training program design, implementation, assessment skills, and the developmental process through which organizations enhance work performance, communication, job satisfaction, and future career preparation. You will need to complete all 15 credit hours with grades of "B" or better. All classes are 3 credit hours except for BSAD 8250 which is 2 credit hours (students who complete BSAD 8250 will need to complete a 1 credit hour independent study in order to earn the certificate).

Code Title Credits

COMM 8010	COMMUNICATION RESEARCH METHODS SEMINAR: QUANTITATIVE
CMST 8166	COMMUNICATION FOR INSTRUCTIONAL SETTINGS
CMST 8186	COMMUNICATION LEADERSHIP AND POWER AND ORGANIZATIONS
PSYC 8656/ CACT 8506	CREATIVITY AND INNOVATION IN ORGANIZATIONS
PSYC 9610	MOTIVATION & MORALE

Total Credits **15**

Computer Science Degree Programs Offered

- Computer Science, MS (p. 1073)

The graduate certificate programs provide focused, short-term programs of study beyond the baccalaureate degree for individuals seeking to improve their experience, advance in position and salary, expand their education background, and complete work that may potentially be applied to a master's degree. Students who are admitted to the MS in Computer Science program may transfer credits from certificate courses to a relevant concentration in the MS program. Students currently in the MS in Computer Science may also complete certificate programs as part of their studies.

Certificates Offered

- Artificial Intelligence Certificate (p. 1077)
- Communication Networks Certificate (p. 1078)
- Software Engineering Certificate (p. 1078)
- Systems and Architecture Certificate (p. 1079)

Applicants with an undergraduate degree in Computer Science or Computer Engineering from an accredited institution are expected to have a GPA of at least 3.0. Applicants who have degrees in other fields will also be considered for admission. Students may make up their deficiencies in Computer Science by completing transition courses.

Each certificate requires completion of four graduate courses and usually involve a combination of core and elective courses. Provisional admission courses (such as undergraduate prerequisites) for the certificate must be completed with a grade of "B-" or better. Provisional courses must be completed before continuing any certificate program. Each graduate level course might have prerequisites that must be satisfied before the associated graduate course can be taken. The exit requirements are the same as the MS in Computer Science program. This includes that students must maintain at least a 3.0 GPA and can have no grade lower than a "B-". The undergraduate transition courses assigned at the time of admission must be passed following the same policy.

CSCI 8000 ADVANCED CONCEPTS IN PROGRAMMING LANGUAGES (3 credits)

Logic/Declarative programming is an important programming paradigm in which problems are described in terms of the properties they possess. As a result, in this style of programming many algorithmic elements, which explicitly must be articulated when writing programs in other programming languages, can be omitted. Core elements of logic programming play important roles in AI.

Prerequisite(s)/Corequisite(s): CSCI 3320; CSCI 3660; CSCI 4220. Not open to non-degree graduate students.

CSCI 8010 FOUNDATIONS OF COMPUTER SCIENCE (3 credits)

This is a foundational course for students enrolled in the graduate program in computer science. The objectives are to introduce students to a large body of concepts so that they are better prepared for undertaking the core courses in the graduate program. It is assumed that student would have programmed in a high-level language and have exposure to basic college level mathematical concepts such as logarithms, exponents, sequences, and counting principles.

Prerequisite(s)/Corequisite(s): Students are expected to have written programs using a high-level programming language and should understand basic mathematical concepts including exponents, logarithms, sequences, and counting principles. Not open to non-degree graduate students.

CSCI 8016 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with MATH 4010, MATH 8016, CSCI 4010).

Prerequisite(s)/Corequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

CSCI 8040 LARGE SCALE NETWORK ANALYSIS ALGORITHMS (3 credits)

The course will provide a review of the properties of large complex network systems, such as those occurring in social networks, epidemiology and biological systems. We will discuss algorithms to analyze these properties, their implementations, their stability under information fluctuation and how information spreads through networks.

Prerequisite(s)/Corequisite(s): Students should be comfortable w/ programming, have knowledge of data structures, preliminary graph algorithms, & linear algebra. Suggest Prep Courses: CSCI 4150 or CSCI 8156; CSCI 3320; MATH 4050 or Permission. Not open to non-degree graduate students.

CSCI 8050 ALGORITHMIC GRAPH THEORY (3 credits)

Review of the basic concepts of graph theory. Introduction to perfect graphs and their characterizations. Main classes of perfect graphs and their properties. Algorithms for main problems of perfect graphs. Applications of perfect graphs in several fields such as scheduling, VLSI and communication networks. (Cross-listed with MATH 8050).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and MATH 4150 or MATH 8156 or permission of instructor. Not open to non-degree graduate students.

CSCI 8060 ALGORITHMIC COMBINATORICS (3 credits)

This course includes classical combinatorial analysis graph theory, trees, network flow, matching theory, external problems, and block designs. (Cross-listed with MATH 8060).

Prerequisite(s)/Corequisite(s): MATH 3100, CSCI 3100, MATH 8105 or CSCI 8105 or instructor's permission.

CSCI 8080 DESIGN AND ANALYSIS OF ALGORITHMS (3 credits)

The course provides students an understanding of advanced topics in algorithms. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, dynamic programming, greedy algorithms, graph algorithms, and the theory of NP-Completeness. (Cross-listed with MATH 8080).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 or equivalent. Not open to non-degree graduate students.

CSCI 8100 EXPERT SYSTEMS (3 credits)

A study of the theoretical basis and practical design of expert systems. Knowledge engineering. Foundations in logic programming, the architecture of expert systems, languages (Prolog, LISP) for expert systems, expert system shells, knowledge acquisition, current issues.

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456 or equivalent. Not open to non-degree graduate students.

CSCI 8105 APPLIED COMBINATORICS (3 credits)

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Poly's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with MATH 8105, MATH 3100, CSCI 3100).

CSCI 8110 ADVANCED TOPICS IN ARTIFICIAL INTELLIGENCE (3 credits)

An in-depth study of one or more topics selected from: search techniques, knowledge representation, knowledge programming, parallel processing in Artificial Intelligence, natural language processing, image processing, current and future directions, etc. May be repeated with different topics, with permission of adviser.

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456 or equivalent.

CSCI 8150 ADVANCED COMPUTER ARCHITECTURE (3 credits)

Various parallel architectures, models of parallel computation, processor arrays, multiprocessor systems, pipelined and vector processors, dataflow computers and systolic array structures.

Prerequisite(s)/Corequisite(s): CSCI 4350, CSCI 4500 and graduate. Not open to non-degree graduate students.

CSCI 8156 GRAPH THEORY & APPLICATIONS (3 credits)

Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 4150, MATH 4150, MATH 8156).

Prerequisite(s)/Corequisite(s): MATH 2030 or permission of instructor.

CSCI 8160 INTRODUCTION TO VLSI DESIGN (3 credits)

Introduction to the principle concepts of integrated circuit layout. Presentation of the hardware foundations, algorithmic mathematical and graph theoretical foundations of circuit layout. Partitioning problems in integrated circuits. Placement and floor planning phase in layout. Routing algorithms and compaction techniques. Applications of graph theory in several steps of the design process of VLSI circuits.

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and CSCI 4350 or CSCI 8356. Not open to non-degree graduate students.

CSCI 8170 VLSI TESTING (3 credits)

This course covers topics in VLSI testing. In particular, topics covered include fault modeling, fault simulation, test generation, testability profiles, built-in tests, and binary decision diagrams.

Prerequisite(s)/Corequisite(s): Bachelors degree and permission from the Graduate Program Committee; CSCI 4350. Not open to non-degree graduate students.

CSCI 8200 INTERCONNECTION NETWORKS (3 credits)

This course is to introduce the technology of interconnection networks from topology of networks, through routing and flow control, to a discussion of hardware/software fault tolerance, and to understand parameters affecting performance.

Prerequisite(s)/Corequisite(s): Bachelors degree and permission from the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8210 ADVANCED COMMUNICATIONS NETWORKS (3 credits)

Advanced study of communication networks, analysis of communication needs, special problems encountered in different types of networks, efficiency and traffic analysis and emerging hardware software technologies. Detailed "hands-on" study of the TCP/IP networking protocols.

Prerequisite(s)/Corequisite(s): CSCI 3550 or 8555 or equivalent. Not open to non-degree graduate students.

CSCI 8256 HUMAN COMPUTER INTERACTION (3 credits)

Human computer interaction is concerned with the joint performance of tasks by humans and machines; human capabilities to use machines (including learnability of interfaces); algorithms and programming of the interface; engineering concerns that arise in designing and building interfaces; the process of specification, design, and implementation of interfaces; and design trade-offs. (Cross-listed with CSCI 4250).

CSCI 8266 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, ITIN 4260, ITIN 8266).

CSCI 8300 IMAGE PROCESSING AND COMPUTER VISION (3 credits)

This course introduces the computer system structures and programming methodologies for digital image processing and computer vision. The course will cover the mathematical models of digital image formation, image representation, image enhancement and image understanding. Techniques for edge detection, region growing, segmentation, two-dimensional and three-dimensional description of object shapes will be discussed. The course will concentrate on the study of knowledge-based approaches for computer interpretation and classification of natural and man-made scenes and objects.

Prerequisite(s)/Corequisite(s): CSCI 1620 and CSCI 3220. Not open to non-degree graduate students.

CSCI 8305 NUMERICAL METHODS (3 credits)

This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 3300, MATH 3300, MATH 8305).

Prerequisite(s)/Corequisite(s): MATH 1960 with a C- or better or permission of instructor

CSCI 8306 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, MATH 4300, MATH 8306).

Prerequisite(s)/Corequisite(s): MATH 2050 with a C- or better or permission of instructor.

CSCI 8316 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, MATH 4310, MATH 8316).

Prerequisite(s)/Corequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

CSCI 8325 DATA STRUCTURES (3 credits)

This is a core that will cover a number of data structures such as tree, hashing, priority queues and graphs as well as different algorithm design methods by examining common problem-solving techniques. (Cross-listed with CSCI 3320)

CSCI 8340 DATABASE MANAGEMENT SYSTEMS II (3 credits)

A continuation of the study of Data Base Management Systems. Extended discussion of logical data base design, normalization theory, query optimization, concurrent issues. Advanced topics including distributed data bases, deductive data bases, data base machine, and others.

Prerequisite(s)/Corequisite(s): CSCI 8856 or equivalent. Not open to non-degree graduate students.

CSCI 8350 DATA WAREHOUSING AND DATA MINING (3 credits)

Covers topics related to decision support queries. In particular, topics covered include building data warehouses, On-Line Analysis Processing (OLAP), maintenance of materialized views, indexing, various data mining techniques, and integration of OLAP and data mining.

Prerequisite(s)/Corequisite(s): CSCI 8856; bachelors degree and permission from Graduate Committee. Not open to non-degree graduate students.

CSCI 8360 MACHINE LEARNING FOR TEXT (3 credits)

This course focuses on the fundamental techniques for extraction of various insights from text data which is ubiquitous on the Web, social media sites, emails, news articles, digital libraries, and other sources. The course topics will include concepts and techniques used by search engines to crawl, index, and rank web pages on the Web, machine learning techniques for categorization of news articles into different categories, sentiment and opinion analysis of social media chats, text summarization, and information extraction.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

CSCI 8366 FOUNDATIONS OF CYBERSECURITY (3 credits)

Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 4360, CYBR 8366)

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CSCI 8390 ADVANCED TOPICS IN DATA BASE MANAGEMENT (3 credits)

An in-depth study of one or more topics in the field of Data Base Management Systems, such as logical and/or physical data base design, query optimization, distributed data bases, intelligent knowledge-based systems, emerging technologies and applications. May be repeated with different topics with permission of adviser.

Prerequisite(s)/Corequisite(s): CSCI 4850 or CSCI 8856 or equivalent. Not open to non-degree graduate students.

CSCI 8400 ADVANCED COMPUTER GRAPHICS (3 credits)

Computer graphics continues to play an important role in computer science. This course covers the mathematical foundations of three-dimensional representation and animation; ray tracing and path tracing rendering methods; using the graphical processing unit (GPU) for real time applications; and concludes with simulation of natural phenomenon.

Prerequisite(s)/Corequisite(s): Bachelors degree or permission from the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8410 DISTRIBUTED SYSTEMS AND NETWORK SECURITY (3 credits)

The course aims at understanding the issues surrounding data security, integrity, confidentiality and availability in distributed systems. Further, we will discuss various network security issues, threats that exist and strategies to mitigate them. This course will cover topics in cryptography, public key infrastructure, authentication, hashing, digital signatures, ARP protection, IP and IPSEC, IP Tables, SSL/TLS, firewalls, etc. (Cross-listed with CYBR 8410)

Prerequisite(s)/Corequisite(s): CSCI 8366 or equivalent(s). Not open to non-degree graduate students.

CSCI 8420 SOFTWARE ASSURANCE (3 credits)

Software assurance is a reasoned, auditable argument created to support the belief that the software will operate as expected. This course is an intersection of knowledge areas necessary to perform engineering activities or aspects of activities relevant for promoting software assurance. This course takes on a software development lifecycle perspective for the prevention of flaws. (Cross-listed with CYBR 8420)

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836 OR by permission of the Instructor. Not open to non-degree graduate students.

CSCI 8430 TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT (3 credits)

This course examines in detail: the principles of a security architecture, access control, policy and the threat of malicious code; the considerations of trusted system implementation to include hardware security mechanisms, security models, security kernels, and architectural alternatives; the related assurance measures associated with trusted systems to include documentation, formal specification and verification, and testing, and approaches that extend the trusted system, into applications and databases and into networks and distributed systems.

Prerequisite(s)/Corequisite(s): CSCI 8366 or equivalents, or instructor permission. Not open to non-degree graduate students.

CSCI 8440 SECURE SYSTEMS ENGINEERING (3 credits)

This course takes a global risk-based view of the process of defining, verifying, validating and continuously monitoring secure information systems. The course will investigate a number of secure system solutions, starting with the definition of the system security needs, and tracing through methods of verification and validation of security controls, as well as ways to continuously monitor the corresponding assurances. (Cross-listed with CYBR 8440)

Prerequisite(s)/Corequisite(s): CSCI 8366 or IASC 8366

CSCI 8446 INTRODUCTION TO PARALLEL COMPUTING (3 credits)

Need for higher-performance computers. Topics discussed include: classification of parallel computers; shared-memory versus message passing matchings; for ms of parallelism, measure of performance; designing parallel algorithms; parallel programming and parallel languages; synchronization constructs; and operating systems for parallel computers. (Cross-listed with CSCI 4440)

Prerequisite(s)/Corequisite(s): CSCI 4500 or CSCI 8506 (May be taken concurrently). Not open to non-degree graduate students.

CSCI 8450 ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING (3 credits)

The course will provide in depth study of the topics in natural language processing and understanding, such as syntax, lexical and computational semantics, natural language ambiguities and their disambiguation, logical form construction and inference. The course will survey state-of-the-art natural language processing toolkits and knowledge bases that boost the development of modern language processing and understanding applications.

Prerequisite(s)/Corequisite(s): CSCI 3320 OR CSCI 3660 OR CSCI 4450. Not open to non-degree graduate students.

CSCI 8456 INTRODUCTION TO ARTIFICIAL INTELLIGENCE (3 credits)

An introduction to artificial intelligence. The course will cover topics such as machine problem solving, uninformed and informed searching, propositional logic, first order logic, approximate reasoning using Bayesian networks, temporal reasoning, planning under uncertainty and machine learning. (Cross-listed with CSCI 4450).

CSCI 8476 PATTERN RECOGNITION (3 credits)

Structures and problems of pattern recognition. Mathematics model of statistical pattern recognition, multivariate probability, Bay's decision theory, maximum likelihood estimation, whitening transformations. Parametric and non-parametric techniques, linear discriminant function, gradient-descent procedure, clustering and unsupervised learning, and feature selection algorithms. (Cross-listed with CSCI 4470)

Prerequisite(s)/Corequisite(s): CSCI 1620 with C- or better, and MATH 2050. Recommended: MATH 4740/8746 or STAT 3800/8805.

CSCI 8480 MULTI-AGENT SYSTEMS AND GAME THEORY (3 credits)

This course covers advanced topics in the area of coordination of distributed agent-based systems with a focus on computational aspects of game theory. The main topics covered in this course include distributed constraint satisfaction, distributed constraint optimization, and competitive and cooperative game theory. (Cross-listed with MATH 8480)

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456. Suggested background courses: CSCI 4480 or CSCI 8486; CSCI 8080. Not open to non-degree graduate students.

CSCI 8486 ALGORITHMS FOR ROBOTICS (3 credits)

This course provides an introduction to software techniques and algorithms for autonomously controlling robots using software programs called controllers. Students will be taught how to program and use software controllers on simulated as well as physical robots. (Cross-listed with CSCI 4480).

Prerequisite(s)/Corequisite(s): CSCI 3320 with C- or better. CSCI 4450/8456 is a recommended but not essential pre-requisite.

CSCI 8500 NUMERICAL LINEAR ALGEBRA (3 credits)

Topics covered in this course include error propagation, solutions of nonlinear equations, solutions of linear and nonlinear systems by various schemes, matrix norms and conditioning, and computation of eigenvalues and eigenvectors. (Cross-listed with MATH 8500).

Prerequisite(s)/Corequisite(s): MATH 1960 and MATH 2050, or permission of instructor. Familiarity with computer programming is assumed.

CSCI 8506 OPERATING SYSTEMS (3 credits)

Operating system principles. The operating system as a resource manager; I/O programming, interrupt programming and machine architecture as it relates to resource management; memory management techniques for uni-multiprogrammed systems; process description and implementation; processor management (scheduling); I/O device, controller, and channel management; file systems. Operating system implementation for large and small machines. (Cross-listed with CSCI 4500).

Prerequisite(s)/Corequisite(s): CSCI 3710, CSCI 3320/8325, MATH 1950, and CSCI 4350/8356 with C- or better.

CSCI 8510 NUMERICAL DIFFERENTIAL EQUATIONS (3 credits)

Topics covered in this course include interpolation and approximations, numerical differentiation, numerical integration, and numerical solutions of ordinary and partial differential equations. (Cross-listed with MATH 8510).

Prerequisite(s)/Corequisite(s): MATH 1970, MATH 2350, or permission of instructor. Familiarity with computer programming is assumed.

CSCI 8520 ADVANCED TOPICS IN OPERATIONS RESEARCH (3 credits)

Advanced treatment of a specific topic in the area of operations research not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with MATH 8520).

Prerequisite(s)/Corequisite(s): MATH 4300 or MATH 8306 or CSCI 4300 or CSCI 8306 or permission of the instructor.

CSCI 8530 ADVANCED OPERATING SYSTEMS (3 credits)

State of the art techniques for operating system structuring and implementation. Special purpose operating systems. Pragmatic aspects of operating system design, implementation, and use.

Prerequisite(s)/Corequisite(s): CSCI 4500/8506. Not open to nondegree students.

CSCI 8555 COMMUNICATION NETWORKS (3 credits)

This course is designed to bring students up to the state of the art in networking technologies with a focus on Internet. It will cover the principles of networking with an emphasis on protocols, implementations and design issues. (Cross-listed with CSCI 3550)

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 with C- or better. Data structures and algorithms. C or C++ programming.

CSCI 8566 NUMBER THEORY & CRYPTOGRAPHY (3 credits)

An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 4560, MATH 4560, MATH 8566).

Prerequisite(s)/Corequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

CSCI 8590 FUNDAMENTALS OF DEEP LEARNING (3 credits)

This course is an introduction to deep learning, a branch of machine learning concerned with the development and application of neural networks. Deep learning trains the machine to learn patterns that it is presented with rather than requiring the human operator to define the patterns that the machine should look for. Deep learning is behind many recent advances in artificial intelligence, such as face recognition, speech recognition and autonomous driving. This course will cover the foundations of deep learning, learning theory, basic/advanced neural networks and problem domains of many selected applications.

Prerequisite(s)/Corequisite(s): CSCI 3320 or instructor permission

CSCI 8610 FAULT TOLERANT DISTRIBUTED SYSTEMS (3 credits)

This course is to study the theory and practice of designing computer systems in the presence of faulty components. Emphasizes the basics of how faults can affect systems and what is required to mask or compensate for their efforts.

Prerequisite(s)/Corequisite(s): CSCI 4500 and CSCI 4350. Not open to non-degree graduate students.

CSCI 8620 MOBILE COMPUTING AND WIRELESS NETWORKS (3 credits)

Contemporary issues in mobile computing and wireless networks, including the differences between mobile computing and the traditional distributed computing paradigm, impediments of the mobile and wireless environments, problems and limitations due to such impediments, using the spectrum, wireless data networks, various network layers solutions, location management techniques, mobile IP, wireless LANs, wireless TCP, ad hoc networks, performance issues, security issues.

Prerequisite(s)/Corequisite(s): CSCI 3550 or CSCI 8555. Not open to non-degree graduate students.

CSCI 8626 COMPUTER GRAPHICS (3 credits)

An introduction to the acquisition, manipulation and display of graphical information using digital techniques. Topics include discussion of the various hardware devices used for input and output, the classical algorithms and data structures used in manipulation of graphical objects, the user interface to the graphics system, and applicable standards. (Cross-listed with CSCI 4620).

Prerequisite(s)/Corequisite(s): ISQA 3300 or CSCI 3320.

CSCI 8666 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)

This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, MATH 4660, MATH 8666).

Prerequisite(s)/Corequisite(s): MATH 2030. Recommended: CSCI 3320/ CSCI 8325.

CSCI 8700 SOFTWARE SPECIFICATIONS AND DESIGN (3 credits)

A continuation of the study of software engineering with an emphasis on early phases of software development, namely requirements engineering/ specification and architectural design. Includes an in-depth study of practices for effective software requirements specification and architectural design, as well as formal specifications of software systems. Related topics such as metrics and support tools are also covered.

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8706 COMPILER CONSTRUCTION (3 credits)

Assemblers, interpreters and compilers. Compilation of simple expressions and statements. Analysis of regular expressions. Organization of a compiler, including compile-time and run-time symbol tables, lexical scan, syntax scan, object code generation and error diagnostics. (Cross-listed with CSCI 4700).

CSCI 8710 MODERN SOFTWARE DEVELOPMENT METHODOLOGIES (3 credits)

Designed to introduce students to advanced object technology and other modern methodologies for developing software systems. Intended for graduate students who have mastered the basic concepts and issues of software engineering. Course covers advanced object-oriented software development. The course also covers several offshoots of object technology, including: component-based software engineering, aspect-oriented software development, software product line engineering, service-oriented computing, etc.

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836.

CSCI 8760 FORMAL METHODS IN SOFTWARE ENGINEERING (3 credits)

In the high consequence system domain, a primary objective of any construction technique employed is to provide sufficiently convincing evidence that the system, if put into operation, will not experience a high consequence failure or that the likelihood of such a failure falls within acceptable probabilistically defined limits. Systems for which such evidence can be provided are called high assurance systems. The objective of this course is to examine software-engineering techniques across the development life cycle that are appropriate for high assurance systems. The course will analyze the nature of the evidence provided by various techniques (e.g., does a given technique provide sufficiently strong evidence in a given setting).

Prerequisite(s)/Corequisite(s): CSCI 8000 and CSCI 8836 or CSCI 4830

CSCI 8766 TOPICS IN MODELING (3 credits)

Selection of such topics as formulation and analysis of various models involving Markov chains, Markov processes (including birth and death processes), queues, cellular automata, difference and differential equations, chaotic systems and fractal geometries. (Cross-listed with CSCI 4760).

Prerequisite(s)/Corequisite(s): MATH 2350 and MATH 4740 or MATH 8746.

CSCI 8790 ADVANCED TOPICS IN SOFTWARE ENGINEERING (3 credits)

An in-depth study of one or more topics in the field of software engineering such as human factors in software engineering, software specifications and modeling, reuse and design recovery, software valuations, software management, emerging technology and applications.

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8836 INTRODUCTION SOFTWARE ENGINEERING (3 credits)

Basic concepts and major issues of software engineering, current tools and techniques providing a basis for analyzing, designing, developing, maintaining and evaluating the system. Technical, administrative and operating issues. Privacy, security and legal issues. (Cross-listed with CSCI 4830).

CSCI 8856 DATABASE MANAGEMENT SYSTEMS (3 credits)

Basic concepts of data base management systems (DBMSs). The relational, hierarchical and network models and DBMSs which use them. Introduction to data base design. (Cross-listed with CSCI 4850).

CSCI 8876 DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS (3 credits)

This required course for undergraduate bioinformatics majors provides foundational knowledge on database aspects used in the field and an overview of their applications in bioinformatics, biomedical informatics, and health/clinical informatics. The course begins with a brief review of key concepts in computational molecular biology related to database search/development, database management systems, the difference between primary and secondary databases, and bioinformatics-related aspects of modeling and theory in computer science. The major focus is on the multiple challenges and aspects of bio-database development, search, and pattern discovery. The course uses problem-based learning to help students develop database management skills as they apply to high throughput "-omics." data, the basics of data management, data provenance and governance, standards, and analysis through KDD-based workflows. This course will also consider the fundamentals of artificial intelligence and machine learning as they pertain to bioinformatics, from the perspective of database storage, I/O, and analysis. (Cross-listed with BIOI 4870)

Prerequisite(s)/Corequisite(s): CSCI 3320 and BIOI 3500, or permission of instructor; BIOI 3500 can be taken concurrently. Prior completion of CSCI 4850 is strongly recommended but not required. Not open to non-degree graduate students.

CSCI 8910 MASTER OF SCIENCE CAPSTONE (3 credits)

The capstone course is to integrate coursework, knowledge, skills and experimental learning to enable the student to demonstrate a broad mastery of knowledge, skills, and techniques across the Master degree curriculum of Computer Science for a promise of initial employability and further career advancement. The course is designed to be in a student-centered and student-directed manner which requires the command, analysis and synthesis of knowledge and skills. Students may apply their knowledge and skill to a project which serves as an instrument of evaluation. Students are encouraged to foster an interdisciplinary research and cultivate industry alliances and cooperation in this course. This capstone course should be taken only after students have completed at least 3/4 of course requirements for the major.

Prerequisite(s)/Corequisite(s): Master's degree of Computer Science with course-only option (program III). Not open to nondegree students.

CSCI 8920 ADVANCED TOPICS COMPUTER SCIENCE (3 credits)

An in-depth study, at the graduate level, of one or more topics that are not treated in other courses. May be repeated with different topics with permission of adviser.

Prerequisite(s)/Corequisite(s): Permission of instructor; will vary with offering. Not open to non-degree graduate students.

CSCI 8950 GRADUATE INTERNSHIP IN COMPUTER SCIENCE (1-3 credits)

The purpose of this course is to provide students with opportunities to apply their academic studies in environments such as those found in business, industry, and other non-academic organizations. The student interns will sharpen their academic focus and develop better understanding of non-academic application areas.

Prerequisite(s)/Corequisite(s): Permission of the graduate program chairperson and a minimum grade point average of 3.0 (B), with at most one grade below B, but not lower than C+ for all CS graduate classes. Not open to non-degree graduate students.

CSCI 8960 THESIS EQUIVALENT PROJECT IN COMPUTER SCIENCE (1-6 credits)

This course allows a graduate student to conduct a research project in computer science or a related area. The project is expected to place an emphasis on applied, implementations-based, or experimental research. The process for development and approval of the project must include: appointment of supervisory committee (chaired by project adviser), a proposal approved by the supervisory committee, monitoring of the project by the supervisory committee, an oral examination over the completed written product conducted by the supervisory committee, and final approval by the supervisory committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines.

Prerequisite(s)/Corequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 8970 INDEPENDENT STUDY (1-3 credits)

Under this number a graduate student may pursue studies in an area that is not normally available in a formal course. The topics to be studied will be in a graduate area of computer science to be determined by the instructor.

Prerequisite(s)/Corequisite(s): Permission of the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8980 GRADUATE SEMINAR (1-3 credits)

This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques and methodologies, and/or the current research results in the fundamental areas of computer science. Topics to be covered by the course will vary in different semesters.

Prerequisite(s)/Corequisite(s): Permission of the Instructor. Not open to non-degree graduate students.

CSCI 8986 TOPICS IN COMPUTER SCIENCE (1-3 credits)

A variable topic course in computer science at the senior/graduate level. Topics not normally covered in the computer science degree program, but suitable for senior/graduate-level students. (Cross-listed with CSCI 4980).

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

CSCI 8990 THESIS (1-6 credits)

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.

Prerequisite(s)/Corequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 9210 TYPE SYSTEMS BEHIND PROGRAMMING LANGUAGES (3 credits)

Empirical evidence suggests that a large number of errors made when writing software can be detected by analyzing the behavior of the program from the perspective of type. This course provides an in-depth exploration of various type systems for programming languages.

Prerequisite(s)/Corequisite(s): CSCI 8000. Not open to non-degree graduate students.

CSCI 9220 REWRITING AND PROGRAM TRANSFORMATION (3 credits)

This course begins by exploring the foundations of term rewriting. Topics such as unification, confluence, completion and termination are covered. Then a strategic framework is considered in which the application of rewrite rules can be controlled.

Prerequisite(s)/Corequisite(s): CSCI 8000. Not open to non-degree graduate students.

CSCI 9350 MATHEMATICAL AND LOGICAL FOUNDATIONS OF DATA MINING (3 credits)

With the maturity of data mining techniques, it is extremely important to examine the foundations of data mining. Instead of providing coverage of basic data mining methods, the course will focus on methodology employed in data mining, logical and mathematical foundations of data mining, as well as other issues related to the intrinsic nature of data mining.

Prerequisite(s)/Corequisite(s): CSCI 8456, CSCI 8856, and CSCI 8390. Not open to non-degree graduate students.

CSCI 9410 ADVANCED TOPICS IN LOGIC PROGRAMMING (3 credits)

This course will examine some advanced topics in logic programming, in particular logic programming under stable model (or answer set) semantics. Answer set programming is a common name of the field. Formal syntax, semantics, and proofs of correctness for logic programs will be considered. Elements of inductive and Prolog programming will also be introduced. Each advanced topic will be followed by how it has been applied in practice. Advanced applications of logic programming will be covered in detail.

Prerequisite(s)/Corequisite(s): CSCI 8000 and doctoral student standing in Information Technology or the permission of the instructor.

CSCI 9420 INTELLIGENT AGENT SYSTEMS (3 credits)

This course covers the principles of interaction between agents in multi-agent systems using game theory. Relevant topics studied in this course include competitive games, statistical Bayesian games, cooperative games, and mechanism design. Students will have to implement projects related to the material studied in the course.

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and CSCI 4450 or CSCI 8456. Not open to non-degree graduate students.

CSCI 9710 METHODS IN SOFTWARE ENGINEERING RESEARCH (3 credits)

This course provides guidelines on how to conduct research in the field of software engineering by presenting the research methods, classic readings, and development of theories and their application to real life problems. The main emphasis of the course is to provide opportunity for in-depth study of topics such as contemporary methods for software development.

Prerequisite(s)/Corequisite(s): CSCI 8836 or equivalent course and doctoral student standing in Information Technology or permission of the instructor. Not open to non-degree graduate students.

CSCI 9810 RESEARCH FOUNDATIONS IN THEORETICAL COMPUTING (3 credits)

This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques, and methodologies, and/or the current research results in the fundamental areas of theoretic computing. The course will examine advanced research topics in computer science and engineering, including foundations of automata theory, computability, complexity analysis, computational logics and algorithmic analysis, hybrid dynamic systems theory, number theory, adaptation and learning theory, concepts and principles in computational geometry, stochastic processes, and random optimization. Each topic will be discussed with a perspective of research issues and directions. Active student participation in investigation of the research topics, survey of the current state-of-art, and identifying the future research insights is required. Students will take turn presenting their research results on specific topics. Topics to be covered by the course will vary in different semesters.

Prerequisite(s)/Corequisite(s): The prerequisites of this course vary depending on the areas to be covered in the semester the course is offered. Good standing in Ph.D. program is required. Permission of the instructor may be required. Not open to non-degree graduate students.

Computer Science, MS

Department of Computer Science, College of Information Science & Technology

Vision Statement

The vision of the department is to create and support dynamic research and teaching environments that promote a computationally empowered

society ready to tackle complex problems in rapidly changing technological landscapes.

Other Program Related Information

Fast Track

The College of Information Science & Technology (CIST) has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 (nine) graduate credit hours towards the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate CIST area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any CIST undergraduate degree (computer science, management information systems, bioinformatics, cybersecurity, IT innovation) desiring to pursue an MS in either the same or a related CIST program.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0, with the exception of computer science, which requires a minimum undergraduate GPA of 3.5.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted to undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived, and the applicant must contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - For all CIST degrees, if a student successfully completes their undergraduate BS degree with a cumulative GPA of 3.0 (3.5 for computer science) and all graduate courses with a 3.0 or better, you may be recommended for admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Graduate Assistantships

Applications will be solicited before the fall semester begins with the limited number of available assistantships. These positions are highly competitive and evaluated based on qualifications and computer science faculty research needs. Students in the integrated program who have

not yet completed their bachelor's degree are not eligible for graduate assistantships.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

Applicants are strongly encouraged to apply as early as possible, especially if applying for assistantships or scholarships. Some scholarships may have earlier deadlines or run out of funding.

- **Fall Admission:**
 - May 1 for international applicants who are required to secure a new student visa
 - July 1 for all other applicants
- **Spring Admission:**
 - October 1 for international applicants who are required to secure a new student visa
 - November 1 for all other applicants
- **Summer Admission:**
 - March 1 for international applicants who are required to secure a new student visa
 - March 15 for all other applicants

Other Requirements

- The minimum undergraduate grade point average (GPA) requirement for the MS in computer science program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a four-year undergraduate degree.
- **Entrance Exam:** The Graduate Record Exam (GRE) is required. Submit GRE results not older than five years. Successful applicants have typically had GRE scores of 150 verbal and 160 quantitative or better.
 - GRE is waived for applicants with a bachelor of science in computer science or computer engineering from a regionally accredited institution in the United States.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Resume:** Submit a detailed resume indicating your work experience and background.
- **Letters of Recommendation:** Two letters from references who can evaluate your work and/or academic achievements are required.
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or

concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.

- *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.
- **OPTIONAL:** Application for Graduate Assistant Position
 - If interested in applying for Graduate Assistant (GA) positions, please submit a letter stating your research area interests and why you feel you would make a good GA. Please note that GA positions will be considered after admission and program admission is not a guarantee of receiving a GA position.

Degree Requirements

Undergraduate Deficiencies

The curriculum for the MS in computer science requires a basic knowledge of computer fundamentals including mathematics, programming, data structures, computer architecture and operating systems. Successful completion of these courses with a "B-" or better in each course is required to become an unconditionally admitted student.

Code	Title	Credits
CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I	3
CSCI 1620	INTRODUCTION TO COMPUTER SCIENCE II	3
CSCI 2030	MATHEMATICAL FOUNDATIONS OF COMPUTER SCIENCE	3
CSCI 3320	DATA STRUCTURES	3
CSCI 3660	THEORY OF COMPUTATION	3
CSCI 3710	INTRODUCTION TO DIGITAL DESIGN AND COMPUTER ORGANIZATION	3

Core Courses

The five courses listed below provide an overall breadth in the areas of languages, algorithms, architecture, operating systems, and software engineering. Refer to the UNO Graduate College Quality of Work Standards for additional grade requirements.

Students selecting the thesis/project option or declaring a concentration area as part of their program are required to take three core courses; students selecting coursework option with no area of concentration must take all five core courses (note that some core courses are needed as prerequisites for certain areas of concentration).

Coursework Option

Code	Title	Credits
Core Courses		
CSCI 8000	ADVANCED CONCEPTS IN PROGRAMMING LANGUAGES	3
CSCI/MATH 8080	DESIGN AND ANALYSIS OF ALGORITHMS	3
CSCI 8150	ADVANCED COMPUTER ARCHITECTURE	3
CSCI 8530	ADVANCED OPERATING SYSTEMS	3
CSCI 8700	SOFTWARE SPECIFICATIONS AND DESIGN	3

Electives

Select either three or five elective courses depending on whether a computer science area of concentration is declared.

Concentrations

All areas of concentration require four classes selected according to the requirements of each concentration. See Computer Science Concentrations.

CSCI 8910	MASTER OF SCIENCE CAPSTONE ¹	3
TOTAL		33

¹ The Capstone course should be taken only after students have completed **at least 75%** of course requirements for the major, this includes all core classes. Students with insufficient progress toward degree completion are prohibited from enrolling. Students must have an overall GPA of at least a 3.0 to register for the Capstone Course.

Thesis Option

Code	Title	Credits

Project Option: 30 hours

Coursework Option: 33 hours

Artificial Intelligence

The concentration in artificial intelligence provides students with an in-depth understanding of the principles and technologies used to embody machines with human-like intelligent capabilities. Students taking this concentration will have an opportunity to learn, as well as perform hands-on experiments in different areas of artificial intelligence such as software agents, multi-agent and multi-robot systems, machine vision and image processing technologies, neural network based adaptive software systems, heuristics and stochastic optimization techniques for critical decision making, machine learning and knowledge engineering techniques for embedding intelligence in computers and information systems.

Students must take any three (3) of the five (5) core courses listed under the Requirements tab (9 hours).

Code	Title	Credits
Required Courses		
CSCI 8456	INTRODUCTION TO ARTIFICIAL INTELLIGENCE	3
Elective Courses		
Select three of the following:		9
CSCI 8110	ADVANCED TOPICS IN ARTIFICIAL INTELLIGENCE

CSCI 8450	ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING	
CSCI 8476	PATTERN RECOGNITION	
CSCI/MATH 8480	MULTI-AGENT SYSTEMS AND GAME THEORY	
CSCI 8486	ALGORITHMS FOR ROBOTICS	
Total Credits		12

Database and Knowledge Engineering

The database and knowledge engineering concentration is designed to introduce students to preliminary as well as advanced concepts in data and knowledge management.

Students must take any three (3) of the five (5) core courses listed under the Requirements tab (9 hours).

Code	Title	Credits
Required Courses		
CSCI 8856	DATABASE MANAGEMENT SYSTEMS	3
CSCI 8340	DATABASE MANAGEMENT SYSTEMS II	3
CSCI 8360	MACHINE LEARNING FOR TEXT	3
Elective Courses		
Select one of the following:		3
CSCI 8040	LARGE SCALE NETWORK ANALYSIS ALGORITHMS	
CSCI 8350	DATA WAREHOUSING AND DATA MINING	
CSCI 8390	ADVANCED TOPICS IN DATA BASE MANAGEMENT	
CSCI 8876	DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS	
Total Credits		12

Dependable Computing Systems

The objective of the Dependable Computing Systems (DCS) concentration is to provide the students with a broad introduction to the design and evaluation of secure and dependable distributed computing systems. The concentration focuses on the theory, development, performance evaluation,

and testing of systems to cope with the today's complex challenges such as failures, malicious adversaries, integrity, safety, and availability. The general domains include network security, software assurance, and fault tolerance. Students will be exposed to both software and hardware aspects for building such systems.

Students must take any three (3) of the five (5) core courses listed under the Requirement tab (9 hours).

Code	Title	Credits
Required Courses		
CSCI/CYBR 8410	CRYPTOGRAPHY AND NETWORK SECURITY	3
CSCI 8430	TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT	3
Elective Courses		
Select two of the following:		6
CSCI 8420	SOFTWARE ASSURANCE	
CYBR 8436	QUANTUM COMPUTING AND CRYPTOGRAPHY	
CSCI/CYBR 8440	SECURE SYSTEMS ENGINEERING	
CSCI 8450	ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING	
CSCI 8610	FAULT TOLERANT DISTRIBUTED SYSTEMS	
CSCI 8760	FORMAL METHODS IN SOFTWARE ENGINEERING	
Total Credits		12

Network Technologies

The concentration in network technologies will equip students to design, build, manage and leverage today's complex communication networks. This program covers not only a blend of theoretical topics and practical examples, but also state of the art network technologies such as mobile computing, distributed systems, wireless technologies, and network security.

Students must take any three (3) of the five (5) core courses listed under the Requirements tab (9 hours).

Code	Title	Credits
Required Course		
CSCI 8210	ADVANCED COMMUNICATIONS NETWORKS	3
Elective Courses		
Select three of the following:		9
CSCI 8040	LARGE SCALE NETWORK ANALYSIS ALGORITHMS

CSCI/CYBR 8410	CRYPTOGRAPHY AND NETWORK SECURITY	
CSCI 8610	FAULT TOLERANT DISTRIBUTED SYSTEMS	
CSCI 8620	MOBILE COMPUTING AND WIRELESS NETWORKS	
Total Credits		12

Software Engineering

The concentration in software engineering is designed to address the growing market demand for software engineers. The concentration covers fundamental and advanced principles in all aspects of software development, equipping students with the necessary technical background to quickly adapt to rapidly changing software engineering practices and technologies.

Students must take CSCI 8700 as one of the three (3) core courses chosen from the Requirements tab (9 hours).

Code	Title	Credits
Elective Courses		
Select 4 of the following:		12
CSCI 8256	HUMAN COMPUTER INTERACTION	
CSCI 8266	USER EXPERIENCE DESIGN

CSCI 8430	TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT	
CSCI 8710	MODERN SOFTWARE DEVELOPMENT METHODOLOGIES	
CSCI 8760	FORMAL METHODS IN SOFTWARE ENGINEERING	
CSCI 8790	ADVANCED TOPICS IN SOFTWARE ENGINEERING	
Total Credits		12

Systems

The systems concentration pertains to the advances in ubiquitous and emerging technologies that span over the complex cores of computing systems such as network communication, distributed computing, operating systems, and computer architecture. Recent advances in computing systems include cloud computing, social computing, Internet of Things, and cyber-physical-systems. The concentration provides the students with the fundamentals of computing systems that can be pursued in hardware, software or a combination of both.

Students must take CSCI 8150 and CSCI 8530 as two of the three (3) core courses chosen from the Requirements tab (9 hours).

Quality of Work Standards

The Graduate College Quality of Work Standards shall be applied to foundation courses (deficiency courses) as well as courses taken as part of the degree program. In particular, the GPC will recommend to the Graduate College that any

1. Student receiving a grade of "C-" or below in any graduate course or undergraduate foundation course will be dismissed from the program or, in the case of unclassified or non-degree students, be automatically denied admission.
2. Student receiving a grade of "C+" or "C" in any undergraduate foundation course or graduate course will be placed on probation or dismissed from the program. Graduate courses may be repeated once with GPC approval. Undergraduate foundation courses will follow the repeat policy for IS&T undergraduate courses.
3. At most two graduate courses ending in 6 (8x6) will be counted toward the degree requirements. Graduate courses with an undergraduate component (listed under Undergraduate Deficiencies) are not eligible as elective courses.
4. Student must have a minimum grade point average (GPA) of 3.0 ("B"), with no grades lower than a "B-".

Artificial Intelligence Certificate

Department of Computer Science, College of Information Science & Technology

Vision Statement

The objective of the certificate in artificial intelligence is to expose students to the principles and technologies used to embody machines with human-like intelligent capabilities and to enable the machines to assist humans in performing complex and hazardous tasks. Students completing this certificate program have an opportunity to learn as well as perform hands-on experiments in different areas of artificial intelligence, including automated software systems such as software agents, multi-agent and multi-robot systems, machine vision and image processing technologies, neural network-based adaptive software systems, heuristics and stochastic optimization techniques for critical decision making, and machine learning and knowledge engineering techniques that embed intelligence in computers and information systems.

Communication Networks Certificate

Department of Computer Science, College of Information Science & Technology

Vision Statement

The communication network certificate program is a career program designed to meet the growing industry demand for qualified, highly trained individuals in the field of computer network systems. The certificate is designed to give the working professional both a conceptual view and an in-depth understanding of the latest technologies. The program includes courses ranging from basic concepts such as local area networks to advanced networking concepts such as mobile wireless communication systems and networks.

Program Contact Information

Jon Youn, PhD, Graduate Program Chair (GPC)
280D Peter Kiewit Institute (PKI)
402.554.4911
jyoun@unomaha.edu

Program Website (<https://www.unomaha.edu/college-of-information-science-and-technology/academics/degrees-programs.php>)

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: July 1
- Spring: November 1
- Summer: March 1

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Resume:** Submit a resume detailing your work experience and background (if applicable).
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of the transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant

will be notified by the individual program if an external course-by-course evaluation is required.

- *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

Degree Requirements

Provisional Admission

Students who have not taken an undergraduate data structures course or an introductory communication networks course with a grade of "B-" or better in each course must do so before they will be allowed to continue in the program.

Code	Title	Credits
CSCI 3320/8325	DATA STRUCTURES (or equivalent)	3
CSCI 3550/8555	COMMUNICATION NETWORKS (or equivalent)	3

Code	Title	Credits
------	-------	---------

Required Courses

If a required course is waived, it must be replaced with another course from the electives listed below.

CSCI 8210	ADVANCED COMMUNICATIONS NETWORKS	3
CSCI 8620	MOBILE COMPUTING AND WIRELESS NETWORKS	3

Electives

Select two of the following:		6
CSCI 8040	LARGE SCALE NETWORK ANALYSIS ALGORITHMS	
CSCI 8156	GRAPH THEORY & APPLICATIONS	
CSCI 8200	INTERCONNECTION NETWORKS	
CSCI/CYBR 8410	CRYPTOGRAPHY AND NETWORK SECURITY	
CSCI 8610	FAULT TOLERANT DISTRIBUTED SYSTEMS	

Total Credits **12**

Software Engineering Certificate

Department of Computer Science, College of Information Science & Technology

Vision Statement

Software engineering is the systematic application of engineering and computer science principles to the development, maintenance and analysis of complex software systems. The demand for software engineers is very high, and is expected to continue for many years to come. The certificate in software engineering will provide students with technical knowledge and skills to apply modern software engineering processes, methods, and tools to tackle real-world requirements, equipping them for career advancement as software professionals.

Systems and Architecture Certificate

Department of Computer Science, College of Information Science & Technology

Vision Statement

This certificate provides students with knowledge in the underlying architecture of computers. Students may choose either the hardware track or the software track. In the hardware track, students gain more in-depth knowledge of the field. Students in this track will develop skills to perform system and component design, quality assurance, and testing. In the software track, knowledge in the underlying architecture helps in generating and understanding optimized software. Students in this track will develop skills that will help them perform systems programming, language processing, and system administration.

Computer Science Education Degree Programs Offered

- Computer Science Education, MS (p. 1081)
- Computer Science Education Certificate (p. 1082)

CSTE 8020 EXPLORING COMPUTER SCIENCE FOR TEACHERS (3 credits)

This course provides a breadth first introduction to computer science for pre-service and in-service teachers. The Exploring Computer Science curriculum (<http://www.exploringcs.org>) serves as a guiding framework for this course, which introduces domain knowledge and appropriate teaching techniques related to teaching human computer interaction, computational problem solving, web design, programming, data analysis, and artificial intelligence in school environments. The course also covers ethical and social issues in computing along with an overview of computing careers.

CSTE 8030 COMPUTER SCIENCE PRINCIPLES FOR TEACHERS (3 credits)

This course introduces pre-service and in-service teachers to the foundational principles of computer science. It aims to help them learn the essential thought processes used by computer scientists to solve problems, expressing those solutions as computer programs. It prepares them to teach the AP CS Principles course (<https://apcentral.collegeboard.org/courses/ap-computer-science-principles>) as defined by the College Board. Students explore several different curricula available through College Board endorsed providers.

Prerequisite(s)/Corequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or equivalent with C- or better.

CSTE 8040 OBJECT ORIENTED PROGRAMMING FOR TEACHERS (3 credits)

This course provides an in-depth treatment of the fundamentals of object-oriented programming (OOP) in Java programming language environment. Topics include data types and information representation, control structures, classes and objects, methods, encapsulation, and use of introductory data structures to solve real-world problems. Additionally, this course interleaves coverage of OOP content with discussion of common learner misconceptions and teaching strategies/tools that can be employed to aid learners' mastery of this material. This course prepares students to implement the Advanced Placement Computer Science A curriculum in a secondary school setting.

Prerequisite(s)/Corequisite(s): CSTE 8020 or CSTE 8030.

CSTE 8910 CAPSTONE IN CS EDUCATION (3 credits)

This course will allow graduate students, as an individual or as part of a group, to study and analyze specific problems related to teaching computing in schools. Projects will be concerned with the curriculum and/or instruction of computing and should address a broad scope of application rather than a specific level. (Cross-listed with STEM 8910).

Prerequisite(s)/Corequisite(s): The student must have completed at least 21 credit hours in the Masters of CS Education program.

CSTE 8920 SEMINAR IN CS EDUCATION: SPECIAL TOPICS (1-3 credits)

This course will cover variable content focusing on CS education topics relevant to PK-12 teachers and based on current research trends. New curricula, tools, assessments, programming languages, or related standards may be covered.

Prerequisite(s)/Corequisite(s): Advisor and/or instructor approval.

CSTE 8960 THESIS EQUIVALENT PROJECT IN CS EDUCATION (1-6 credits)

This course allows a graduate student to conduct a research project in computing education. The process for development and approval of the project must include: appointment of supervisory committee (chaired by project adviser), a proposal approved by the supervisory committee, monitoring of the project by the supervisory committee, an oral examination over the completed written product conducted by the supervisory committee, & final approval by the supervisory committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines. Project credits must be completed over two or more academic terms.

Prerequisite(s)/Corequisite(s): Completion of required Core courses and approval of advisor.

CSTE 8970 CS ED INDEPENDENT STUDY (1-3 credits)

This is a specially designed course taken under the supervision of a graduate faculty member to accommodate the student who has identified a focus of study not currently available in the departmental offerings and who has demonstrated capability for working independently.

Prerequisite(s)/Corequisite(s): Permission of the department and graduate faculty member.

CSTE 8990 THESIS (1-6 credits)

This course is an independent research project completed under the direction of a thesis advisor and required of all candidates pursuing a Master of Science with Thesis option. Thesis credits must be completed over two or more academic terms.

Prerequisite(s)/Corequisite(s): Completion of Required Core Courses and approval of advisor. Not open to non-degree graduate students.

Computer Science Education, MS

Department of Computer Science, College of Information Science & Technology; Department of Teacher Education, College of Education, Health, and Human Sciences

Vision Statement

This degree program is intended for those with a passion for the teaching and learning of computational thinking, computer science, and information technology skills. By developing both content knowledge and pedagogical skills related to the computing disciplines, this program is ideal for educators looking to empower young people to become the creators of next generation technologies.

In completing program coursework, certified Nebraska teachers will also meet requirements for the IT supplemental endorsement. Teachers from other states should consult with their corresponding state officials to consider local credentialing applicability.

Program Contact Information

Brian Dorn, PhD, Graduate Program Chair
174E Peter Kiewit Institute (PKI)
402.554.4905
bdorn@unomaha.edu

Program Website (<http://www.unomaha.edu/college-of-information-science-and-technology/computer-science-education/graduate/ms-csed.php>)

Other Program Related Information

Students who hold current Nebraska teaching certification are eligible for the IT Supplemental Endorsement upon successfully completing the 15 hour core courses.

Grades of 'C' or lower cannot be used when applying for the State of Nebraska IT Supplemental Endorsement.

Student Learning Outcomes

Upon completion of the MS in Computer Science Education, students will be able to:

- Demonstrate the ability to create basic computational artifacts.
- Demonstrate practical knowledge and skills with computing systems.
- Explain how computing permeates today's society, including security, privacy, and ethical considerations.
- Apply appropriate pedagogical content knowledge in the teaching of computing topics.
- Describe relevant and recent research findings in computer science education including how they might be applied in the classroom.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: July 1
- Spring: December 1
- Summer: April 1

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet minimum language proficiency score requirement in order to be considered for graduate admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose** addressing the following:
 - Describe your academic and professional journey. Discuss your background personal and professional experiences, and your current educational context. Be sure to explain your motivation for pursuing this program at this point in your career.
 - In order to advise you on initial coursework, please describe any prior formal or informal training you have completed in computing, computer science, and information technology. This includes, but is not limited to programming/coding, web design, systems administration, computing networking, databases, and computer applications.
 - Discuss your post-master's degree plans. How will the MS in computer science education contribute to your future endeavors related to P-12 students, educators, administrators or other community stakeholders.
- **Resume:** Professional resume or curriculum vitae

- UNO College of Education's Personal and Professional Fitness Form
- Copy of your current teacher certification (if applicable)
- International students who do not intend to teach in the United States may be eligible for admission.
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of the transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
 - *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

Counseling, MS

Department of Counseling, College of Education, Health, and Human Sciences

Vision Statement

The purpose of the Department of Counseling is to prepare a diverse student population at the master's degree level for professional service as school counselors, clinical mental health counselors, student affairs professionals, and/or for advanced study. Graduates of the program are prepared to function professionally within their area(s) of concentration.

As dedicated practitioners, reflective scholars, and responsible citizens, our graduates are prepared to fill the need for highly trained professionals. Graduates are trained to support the broad range of counseling needs of the metropolitan community including: individual, couples, family and group counseling.

Program Contact Information

Christine (Tina) Chasek, PhD, Graduate Program Chair (GPC)
107 Roskens Hall (RH)
402.554.3559
christinechasek@unomaha.edu

Program Website (<http://www.unomaha.edu/college-of-education/counseling/>)

Other Program Related Information

- Earning a graduate degree in clinical mental health counseling or school counseling satisfies only the academic requirements for licensure and/or certification in the state of Nebraska. Students should consult the appropriate state agency/department for guidance on gaining state licensure and/or certification.
- Students should be aware that licensure and/or certification requirements often vary by state. Students interested in gaining professional licensure and/or certification outside of Nebraska should consult their intended state's licensing/certification office/department for appropriate guidelines and timelines.
- An alternative counseling endorsement is available for students in the school counseling concentration who do not hold degrees in education. This endorsement eliminates the two-year teaching requirement and includes an additional 12 credit hours. Students choosing the alternative endorsement route will complete a 60 credit school counseling curriculum instead of the 48 credit school counseling curriculum.

- Successful completion of all courses and a comprehensive exam in the student's respective concentration are requirements for graduation.
- Graduates are recommended only for positions consistent with the concentration they completed.
- Professional background checks are required for all students following admission to the program and again prior to beginning their practicum experience.
- Candidates are admitted and permitted to continue programs in counseling on the basis of their potential for successful training and professional practice. Candidates are evaluated on an ongoing basis while enrolled with respect to their suitability for continuation in the program prior to taking the Counseling Practicum or Internship courses. Specific course and grade requirements to take Practicum courses are available in the Department of Counseling.
- The P-12 School Counseling and Clinical Mental Health Counseling concentrations are accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP; 2009), the national accrediting agency for Counselor Education programs.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: March 1
- Spring: October 1
- Summer: March 1
 - Student Affairs in Higher Education (SAHE) admits fall semester only
 - Clinical Mental Health Counseling and School Counseling concentrations admits during fall, spring, and summer semesters.

Other Requirements

- Bachelor's degree
- Nine credit hours of courses in behavioral sciences or closely related field for both areas of concentration in Clinical Mental Health Counseling and Student Affairs Practice in Higher Education applicants.
- Abnormal psychology is a requirement for licensure as a mental health practitioner in Nebraska, but is not a required course within any Department of Counseling curriculum. However, abnormal psychology must be taken prior to COUN 8920. Abnormal psychology may be taken at the undergraduate or graduate level but graduate level is recommended.
- **Entrance Exam:** Graduate Record Exam (GRE) or Miller Analogy Test (MAT)
 - This requirement may be waived if an advanced degree has been completed
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>) must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** 2-3 pages in length addressing the following information:
 - Reason(s) for pursuing the counseling profession,
 - Relevant experience,

- Personal career goals,
- Reason(s) for choosing UNO's Counseling program.

• **Resume or curriculum vitae**

- **Letters of Recommendation:** Three letters of recommendation are required and should be from persons who can speak to the applicant's professional competence and/or academic ability.
- A minimum of nine hours of behavioral sciences or human services related course is required. Applicants without these courses may be provisionally admitted with the expectation that these nine hours will be completed within the first year of their program of study. Questions regarding the appropriateness of courses for this requirement should be submitted to the department chair via email (dkissinger@unomaha.edu). A response will be provided following a faculty review of the selected course(s).

- Group admissions interview (required for admission).

Degree Requirements

Code	Title	Credits
Concentrations		
Select an area of concentration: (Enrollment in over 12 credits per semester requires department consent)		
	Clinical Mental Health Counseling	60-66
	P-12 School Counseling ¹	48-54
	Student Affairs Practice in Higher Education	38-44

¹ Alternative endorsement for school counseling students without education degrees (60 hours). Contact your advisor for more information.

Exit Requirements:

- Comprehensive Examination for concentration area.
- Completion of the MS with Thesis option requires six additional hours of COUN 8990. All candidates should carefully review the Graduate College requirements for forming a supervisory committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of a thesis.
- Students in the Clinical Mental Health Counseling and P-12 School Counseling concentrations must complete a 10-hour "Group Experience" as a graduation requirement
- Students in the Clinical Mental Health Counseling concentration must have completed an abnormal psychology course (3 hours), either at the graduate or the undergraduate level prior to graduation. Licensure laws may vary between states. Please note that this course does NOT count as part of the 60-66 hour degree program requirement.

TED 8010 or EDL 8010	INTRODUCTION TO RESEARCH INTRODUCTORY RESEARCH METHODS	3

Ethical Conduct: It should be understood that academic performance is not the only criterion for continuation in the program or for graduation. Candidates are expected to maintain the highest standards of ethical conduct pertaining to academic course work, professional practice and research activity. Any breach in ethical conduct shall be subject to disciplinary action, regardless of the candidate's prior or current academic performance. See the "American Counseling Association Code of Ethics" for specific guidelines.

COUN 8006 SPECIAL STUDIES IN COUNSELING (1-6 credits)

This course is designed to allow candidates to pursue independent study of a topic under the direction and guidance of a faculty member. Topics studied and the nature of the learning activities are mutually agreed upon by the candidate and instructor. This course will prepare graduate (or undergraduate) candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. (Cross-listed with COUN 4000).

Prerequisite(s)/Corequisite(s): Permission by the Department. Must be admitted to the Counseling Program. Not open to non-degree graduate students.

COUN 8010 INTRODUCTION TO COUNSELING (3 credits)

This is an exploratory course for students entering, or considering entering, the field of professional counseling. The focus is on: 1) the development of the profession of counseling, 2) your own professional and personal development as well as your understanding of what contributes to your development as an effective counselor, and 3) a general overview of specific requirements for successful completion of a master's degree in Counseling at UNO.

Prerequisite(s)/Corequisite(s): Undergraduate Degree. Department permit required for non-degree seeking students (based on availability)

COUN 8016 MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS (3 credits)

This course explores the role that educators and school mental health professionals play in identifying the risk factors and warning signs of children and youth with mental health concerns. Students will understand the risk and protective factors at the individual, family, school, and community level as related to children and youth's mental health. The course will provide an overview of externalizing and internalizing disorders as well as school-based and community-based treatments and interventions. (Cross-listed with COUN 4010, SPED 4010, SPED 8016).
Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

COUN 8030 COUNSELING PRACTICES (3 credits)

The major purpose of Counseling 8030 is to assist students in skill development as noted in Ivey's Intentional Interviewing and Counseling Model. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism. Candidates will continue to develop counseling skills through additional coursework leading to practicum and internship experiences.

Prerequisite(s)/Corequisite(s): Open only to students admitted to the UNO Counseling Program; Department permission is required for students with non-degree status; and is based on availability.

COUN 8040 ETHICAL ISSUES FOR PROFESSIONAL COUNSELORS (3 credits)

This course examines the ethical, professional, and legal aspects of individual, couple and family counseling including liabilities incurred by the professional. The course addresses the appropriate ethical guidelines as stated by the American Counseling Association (ACA) code of ethics in a participatory format.

Prerequisite(s)/Corequisite(s): Open only to students admitted to the UNO Counseling Program; Department permission is required for students with non-degree status; and is based on availability.

COUN 8050 INTRODUCTION TO PROFESSIONAL SCHOOL COUNSELING (1 credit)

This is an exploratory course for candidates considering entering the field of professional school counseling. This introductory course is required for candidates majoring in counseling, with a concentration in school counseling. Selected issues underlying the school counseling profession are studied.

Prerequisite(s)/Corequisite(s): Admission to the Graduate College and/or the Counseling Department.

COUN 8100 RESEARCH PROJECT IN COUNSELING (1-3 credits)

Individual or group study and analysis of specific problems/issues in the field.

Prerequisite(s)/Corequisite(s): Admission to Counseling program and permission of instructor. Not open to non-degree students.

COUN 8110 HUMAN DEVELOPMENT AND PSYCHO-SOCIAL INTERVENTION STRATEGIES (3 credits)

This course is designed to examine theories of human development covering the lifespan of the individual and the psychosocial interventions appropriate to various phases of the lifespan. The course will emphasize human development as an interactive process involving individuals in a number of contexts; hence human diversity factors (racial ethnic groups, gender, sexual orientation) also will be considered.

Prerequisite(s)/Corequisite(s): Open only to students admitted to the UNO Counseling Program; Department permission is required for students with non-degree status; and is based on availability.

COUN 8150 STUDENT AND STUDENT PERSONNEL WORK IN HIGHER EDUCATION (3 credits)

An overview of the characteristics of college students and their interaction with campus environmental influences. The impact of student personnel work is considered as it affects personality growth, social development and career planning by college students.

Prerequisite(s)/Corequisite(s): Admission to Counseling program. Not open to non-degree graduate students.

COUN 8200 COUNSELING THEORIES (3 credits)

This course is designed to examine counseling theories and the historical and geographic influence on counseling theory development.

Prerequisite(s)/Corequisite(s): Open only to students admitted to the UNO Counseling Program. Not open to non-degree graduate students.

COUN 8210 ORGANIZATION & ADMINISTRATION OF SCHOOL COUNSELING PROGRAMS (3 credits)

The course introduces graduate candidates to an administrative systems approach to organizing comprehensive and developmental school counseling programs for all k-12 students. The American School Counselor Association's (ASCA) National Model for School Counseling Programs provides the foundation for content. Topics include, but are not limited to, school counseling programs: Foundation, Delivery System, Management System, and Accountability domains. Special focus is also placed on developing educational leadership skills, advocacy for k-12 students, and bringing about positive systemic change. Teaching counselor candidates to effectively manage school counseling programs is an important part of our effort to prepare educational leaders.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling Dept. Not open to non-degree graduate students.

COUN 8220 COUNSELING PRACTICUM (3 credits)

This course is the first of the clinical application courses of counseling knowledge, techniques, and specialty areas in clinical mental health settings. Candidates practice, develop and improve counseling skills in an environment of professional constructive criticism.

Prerequisite(s)/Corequisite(s): Pre-Reqs: COUN 8010, COUN 8030, COUN 8040, COUN 8200, COUN 8280, COUN 8400, COUN 8516, COUN 8520, COUN 8920 Co-Reqs: COUN 8360, COUN 8610, COUN 8800 Registration Reqs: Attend Practicum Orientation; Dept Consent. Not open to non-degree graduate students.

COUN 8226 CAREER DEVELOPMENT AND LIFESTYLE (3 credits)

This course will serve as an introduction to the topics of career counseling and career development.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling as degree seeking student; Department permit for non-degree seeking student (based on availability)

COUN 8230 APPRAISAL TECHNIQUES IN COUNSELING (3 credits)

Appraisal Techniques in Counseling includes the history of individual appraisal, the major technical considerations governing assessments, and a survey of measurement devices in the cognitive and affective domains. The course will include uses and implications of standardized and non-standardized assessment devices. Additionally, this course will cover the responsible use and interpretation of ability, aptitude, interest, personality, and career development assessment tools. Whenever it is applicable, a strengths-based, positive psychology approach will be integrated and utilized throughout this course.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling Department as degree seeking student; Department permission for non-counseling/degree seeking student in UNO allied mental health discipline only (based on availability)

COUN 8250 INTERNSHIP: CLINICAL MENTAL HEALTH COUNSELING (3 credits)

This course is the first of the clinical applications of knowledge, techniques, and specialty areas in community settings. Students practice, develop and improve counseling skills in an environment of professional constructive criticism. This course is required for all graduate students in counseling who meet the prerequisites.

Prerequisite(s)/Corequisite(s): COUN 8220 with grade of B or better; Department Permission. Not open to non-degree graduate students.

COUN 8260 ADVANCED INTERNSHIP: CLINICAL MENTAL HEALTH COUNSELING (3 credits)

Field experience in an approved agency program under the supervision of a licensed counselor and university instructor.

Prerequisite(s)/Corequisite(s): Completion of COUN 8250 with grade of B or higher. Not open to non-degree graduate students.

COUN 8270 GROUP TECHNIQUES (1 credit)

This course is intended to prepare students to effectively incorporate group principles appropriate to various counseling settings including schools, treatment centers, and agencies. This class includes a group experience.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Counseling or permission of instructor. Not open to non-degree graduate students.

COUN 8280 CRISIS INTERVENTION STRATEGIES AND TECHNIQUES (3 credits)

This course will present approaches to crisis intervention which include definitions and characteristics of a crisis, a brief history of crisis intervention and associated theories/models and a practice of skills for intervention and crisis case management. Topics will include applied therapeutic counseling strategies in general casework and in crisis intervention cases, in particular, which describe actual techniques to alleviate the crisis.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling as degree seeking student; COUN 8030, COUN 8200, COUN 8040; Dept permission/graduate status as degree seeking student in allied mental/behavioral health (based on availability). Not open to non-degree graduate students.

COUN 8306 COUNSELING TECHNIQUES I (1 credit)

This course will present the counseling process, knowledge of beginning skills development and application of techniques related to a specific approach. Topics may include Adlerian counseling (specified in this syllabus), anger management, play therapy, solution focused, cognition, and other topics as needed. (Cross-listed with COUN 4300).

Prerequisite(s)/Corequisite(s): Admission to Counseling program. Not open to non-degree students; must take prior to practicum.

COUN 8316 COUNSELING TECHNIQUES II (1 credit)

This course will present the counseling process, knowledge of beginning skills development and application of techniques related to a specific approach. Topics may include Rational Emotive Behavior Therapy (REBT) (specified in the syllabus), anger management, play therapy, solution focused, cognition, and other topics as needed.. (Cross-listed with COUN 4310)

Prerequisite(s)/Corequisite(s): Admission to Counseling program; must take prior to practicum. Not open to non-degree students.

COUN 8330 PRACTICUM FOR SCHOOL COUNSELORS (3 credits)

This course is the first of the clinical applications to provide the prospective school counselor with supervision in a school counseling setting. Candidates will continue to develop counseling skills and will become immersed in the work of a professional school counselor. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism.

Prerequisite(s)/Corequisite(s): Instructor Consent; COUN 8030; COUN 8040; COUN 8200; COUN 8210; COUN 8280; COUN 8630; COUN 8650; COUN 8670; COUN 8700; COUN 8740; Grade of B or better in COUN 8030 and COUN 8040. Not open to non-degree graduate students.

COUN 8360 GROUP THEORY & TECHNIQUES (3 credits)

This course is intended to prepare students to effectively incorporate group principles appropriate to various counseling settings including schools, clinical mental health treatment facilities, and agencies. This class includes a group experience.

Prerequisite(s)/Corequisite(s): Admission as degree seeking student in UNO Counseling Dept; Pre-Reqs: COUN 8030, COUN 8040; Completion of Group Experience and Department permission. Not open to non-degree graduate students.

COUN 8400 ADVANCED THEORY AND TECHNIQUES IN COUNSELING (3 credits)

This course introduces students to the basic knowledge and skills necessary to understand and apply counseling techniques related to differential approaches to treatment. Topics may include Solution-Focused, Adlerian, Cognitive-Behavioral (CBT), Dialectical Behavioral (DBT), Motivational Interviewing, and other techniques as deemed to be relevant/appropriate.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling program; Pre-Reqs: COUN 8030; COUN 8200

COUN 8406 COUNSELING TECHNIQUES III (1 credit)

This course will assist candidates in developing more systematic integration of previously learned information and skills and the application to specific counseling situations related to various approaches. Topics may include Solution Focused Counseling - SFC (specified in the syllabus), Dialectical Behavioral Therapy, anger management, art therapy, play therapy, solution focused, cognition, and other topics as needed. (Cross-listed with COUN 4400)

Prerequisite(s)/Corequisite(s): Admission to Counseling program. Not open to non-degree students.

COUN 8430 INTERNSHIP IN SCHOOL COUNSELING (3 credits)

This course is the second of the clinical applications to provide the prospective school counselor with supervision in a school counseling setting. Candidates will continue to develop counseling skills and will become immersed in the work of a professional school counselor. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism.

Prerequisite(s)/Corequisite(s): Pre-req: COUN 8330. Not open to non-degree graduate students.

COUN 8450 COLLEGE STUDENT PERSONNEL INTERNSHIP (1-6 credits)

This course is designed to provide practical work experience under supervision in various areas within student personnel services.

Prerequisite(s)/Corequisite(s): COUN 8030, COUN 8040, COUN 8006, COUN 8150, COUN 8360, COUN 8520

COUN 8460 ADVANCED INTERNSHIP IN SCHOOL COUNSELING (3-6 credits)

This course is the third of the clinical applications to provide the prospective school counselor with supervision in a school counseling setting. Candidates will continue to develop counseling skills and will become immersed in the work of a professional school counselor. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism.

Prerequisite(s)/Corequisite(s): COUN 8330. Not open to non-degree graduate students.

COUN 8500 CONSULTATION IN PROFESSIONAL COUNSELING (2 credits)

Instruction in this course is founded upon commitment to the beliefs that individuals are valuable, responsible and capable, and that all human service professionals should work to create the conditions in which people value themselves as human beings and behave accordingly. As reflective decision-makers, such professionals value human potential and purposefully design policies, processes and programs that facilitate the realization of that potential. The counselor learns that consultation and collaboration are first and foremost helping relationships that have as their foundation the dignity and respect of individuals/groups involved. Consultation and collaboration are characterized as problem-solving processes that involve a variety of key decision points. A generic model is provided for students as a "cognitive map" upon which they can reflect when attempting to determine effective practice.

Prerequisite(s)/Corequisite(s): Admission to the Counseling Program. Not open to non-degree graduate students

COUN 8516 TREATMENT ISSUES IN CHEMICAL DEPENDENCY (3 credits)

This course addresses chemical dependency treatment issues including denial, minimization, relapse and its prevention, resistance, family dynamics, poly-substance abuse, co-occurring disorders, spirituality and the influence of self-help groups. The education will include the clinical treatment needs of individuals suffering from chemical dependency, taking into consideration diversity, gender, culture and lifestyle. (Cross-listed with COUN 4510, SOWK 4510, SOWK 8516).

Prerequisite(s)/Corequisite(s): Admission to counseling program or social work programs or permission of instructor. Not open to non-degree graduate students.

COUN 8520 COUNSELING MULTICULTURAL AND DIVERSE POPULATIONS (3 credits)

This course will make candidates more aware of the societal context in which counseling takes place and to help prepare candidates for work with persons who are members of populations which require special knowledge and skills of the counselor. Certain special populations will be considered in comparative detail as well as a general information which will emphasize acquiring broader understandings transferable to counseling with any special population.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

COUN 8610 INTRODUCTION TO MARITAL AND FAMILY THERAPY (3 credits)

This course is the first of the clinical mental health applications to provide the prospective mental health counselor with instruction in marital and family therapy. Students will continue to develop counseling skills and will become immersed in the work of a professional counselor. Students practice, develop and improve marital and family counseling skills in an environment of professional and constructive peer feedback.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling program; COUN 8030, COUN 8200, COUN 8040. Not open to non-degree graduate students.

COUN 8620 SURVEY OF ISSUES IN SCHOOL COUNSELING (2 credits)

This course is designed to provide school counselors with information on topics that are current and relevant to secondary school settings. It will allow candidates and practicing counselors the opportunity to study and evaluate what activities school counselors are currently engaged in and consideration of strategies to deal with students and families.

Prerequisite(s)/Corequisite(s): Admission to counseling program. Not open to non-degree graduate students.

COUN 8630 FOUNDATIONS AND ISSUES IN SECONDARY COUNSELING (3 credits)

This course is designed to introduce the history, current ASCA (American School Counselor Association) model, and the role of a professional school counselor; and to provide information on and practice with topics that are current and relevant to secondary school settings.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling Dept. Not open to non-degree graduate students.

COUN 8650 ISSUES IN ELEMENTARY AND MIDDLE SCHOOL COUNSELING (3 credits)

This course is intended to prepare students to effectively implement an elementary and/or middle school counseling program. Candidates will develop awareness and skill sets through an overview of the unique issues, approaches, systems and practice of elementary and middle school counseling.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling Dept. Not open to non-degree graduate students.

COUN 8656 TRANSITION PLANNING (3 credits)

Curriculum oriented for teachers and related professionals to work with the career development and transition of individuals with disabilities within a multicultural and global society. Includes information for elementary through adulthood with emphasis on transition from high school to community living.

Prerequisite(s)/Corequisite(s): EDUC 2510 or SPED 1500. Not open to non-degree graduate students.

COUN 8670 CAREER DEVELOPMENT POST-SECONDARY TRANSITIONS (3 credits)

This course is an introduction to career counseling and career development and post-secondary planning in P-12 schools. This course is required for all graduate students seeking a masters degree in counseling with a concentration in school counseling.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling Dept

COUN 8686 MEDICAL AND PSYCHOSOCIAL ASPECTS OF ALCOHOL/ DRUG USE AND ADDICTION (3 credits)

This course introduces students to substance abuse disorders and their impact on the individual, family, and society. It covers psychopharmacology, alcohol and drug interactions, drug classifications, theories of chemical dependency, various models of treatment, vulnerable populations, and ethical and legal issues. (Cross-listed with SOWK 4680, SOWK 8686, COUN 4680).

Prerequisite(s)/Corequisite(s): Admission to counseling program or social work program or permission of instructor.

COUN 8696 ASSESSMENT AND CASE MANAGEMENT IN SUBSTANCE ABUSE (3 credits)

This course focuses on assessment of clients and their environment, and diagnosis and referral for substance abuse treatment. Emphasis is given to assessment instruments, treatment levels, treatment planning, case management, and social justice. (Cross-listed with COUN 4690, SOWK 4690, SOWK 8696).

Prerequisite(s)/Corequisite(s): Admission to counseling program or social work program or permission of instructor.

COUN 8700 CHILD AND ADOLESCENT COUNSELING (3 credits)

This course is an introduction to counseling children and adolescents and will examine the theories, techniques, professional settings, cultural, and ethical/legal issues associated with counseling children and adolescents in a diverse society. Although diagnosis of mental disorders will be discussed, the course is designed to build competencies in counseling children and adolescents, with specific attention to social, developmental, and behavioral issues across professional settings.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling Department; COUN 8030 or Department Permission. Not open to non-degree graduate students.

COUN 8740 SCHOOL COUNSELING GROUPS (3 credits)

This course is designed to provide the school counselor candidate with a focused study of small group counseling and enrichment programs in schools.

Prerequisite(s)/Corequisite(s): Instructor Consent; Documented completion of group experience. Not open to non-degree graduate students.

COUN 8750 SCHOOL COUNSELING GROUPS & ENRICHMENT PROGRAMS (2 credits)

This course is intended to prepare students to effectively incorporate small group design, implementation, and assessment as part of a school counseling program. Candidates will develop small group counseling skills and strategies for enrichment program development and delivery.

Prerequisite(s)/Corequisite(s): Counseling Major. COUN 8030 and COUN 8270 and COUN 8406 or permission. Not open to non-degree graduate students.

COUN 8756 MID-LIFE, CAREER CHANGE, PRERETIREMENT PLANNING (3 credits)

This course is designed to involve candidates in the exploration of the developmental tasks of mid-life, myths and realities related to career change as well as the implication of preretirement planning. Factual information, as well as model examination and evaluation are presented to aid the candidate in becoming better equipped to understand some of the forces which affect the well-being of middle aged persons as they prepare for the later years. (Cross-listed with GERO 4750 and GERO 8756)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

COUN 8800 CLINICAL MENTAL HEALTH COUNSELING (3 credits)

This course is an introduction to the specialization of clinical mental health counseling. The course content examines the historical, philosophical, educational, ethical, and psychological concepts and foundations of clinical mental health counseling. Additionally, the course will explore key public and private professional settings and programs within the clinical mental health paradigm, professional advocacy and leadership, and the personal and professional skills and traits expected of professional counselors.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

COUN 8810 LAW AND ETHICS IN HIGHER EDUCATION AND STUDENT AFFAIRS (3 credits)

This introductory course is designed to ground future student affairs practitioners in the guiding ethical and legal standards and principles of higher education administrators and student affairs professionals. The course will examine ethical and legal principles through evidence-based readings, discussion/lecture, case studies, exams, and projects. The course will also challenge students to examine their personal values and beliefs and their potential influence on future decision making responses as a student affairs professional.

Prerequisite(s)/Corequisite(s): Admission to the UNO Counseling Department or department permission.

COUN 8820 CRISIS AND EMERGENCY MANAGEMENT IN HIGHER EDUCATION (3 credits)

This course is designed to provide future student affairs professionals with an understanding of the role of higher education institutions respond and adapt to crises that affect institutional well-being and the well-being of faculty, staff, and students. The course will feature content on crisis and emergency management theory and policy-as well as their implications on the well-being of the institution and key stakeholders (i.e., administrators, faculty, staff, students, community, alumni). Specific focus will be given to examining the specific role of the student affairs professional in the design, implementation, and assessment of crisis and emergency management policy and procedures.

Prerequisite(s)/Corequisite(s): Admission to the UNO Department of Counseling and/or department permission

COUN 8830 CURRENT ISSUES IN HIGHER EDUCATION AND STUDENT AFFAIRS (1 credit)

This course involves a detailed exploration of current events and issues related to Student Affairs and Higher Education. The higher education ecological environment will be explored and issues pertaining to students will be investigated within the context of the current higher educational landscape. Finally, the college campus's social, political, and physical landscapes will be discussed and current events facing student affairs and higher education professionals will be examined in order to provide students with information on conflicting perspectives related to relevant issues across academia and higher education as a whole.

Prerequisite(s)/Corequisite(s): Admission to the UNO Counseling Department and/or department permission

COUN 8850 THE COLLEGE STUDENT EXPERIENCE (3 credits)

This course will examine the personal, academic, and psychosocial, and institutional variables common to the experience of students in public and private institutions of higher education in the United States.

Prerequisite(s)/Corequisite(s): Full admission to the UNO Counseling Department and/or permission from the Counseling Department Chair.

COUN 8920 TREATMENT PLANNING AND THE DSM (3 credits)

This course is designed to orient students to the stages of treatment planning and use of the DSM-5 as a part of the treatment process in mental health settings. The course will examine the stages of treatment planning and offer opportunities to integrate counseling theories into practice. Factors such as psychopathology/pharmacology, ethics, and human diversity will be considered.

Prerequisite(s)/Corequisite(s): Department Consent. Not open to non-degree graduate students.

COUN 8930 HISTORY OF HIGHER EDUCATION AND STUDENT AFFAIRS (3 credits)

This course will examine a range of topics relevant to understanding and working in higher education institutions. Specific topics will include the purpose of higher education, accessibility and student diversity issues, financial and legal factors, extracurricular activities, and issues related to faculty and staff experiences.

Prerequisite(s)/Corequisite(s): Full admission to the UNO graduate program in Student Affairs in Higher Education or permission from Counseling Department Chair

COUN 8940 DIVERSITY AND WELLNESS ISSUES IN HIGHER EDUCATION (3 credits)

This course is an exploration of holistic wellness and of power, privilege, social identities, social justice theories and multicultural issues and practices within the context of higher education. We begin by offering foundational definitions of terminology used throughout the course and delve into understanding systems of oppression, privilege, power, and activism through a holistic wellness lens. We then explore and discuss specific social identities, returning again to think about identity through a social justice lens.

Prerequisite(s)/Corequisite(s): Full admission to the UNO Counseling Department and/or permission from the Counseling Department Chair. Not open to non-degree graduate students.

COUN 8950 ORGANIZATION, ADMINISTRATION, AND LEADERSHIP IN HIGHER EDUCATION (3 credits)

This course will provide an analysis of leadership, management, and organizational theory and practice in US higher education with particular emphasis on student affairs/student development. An examination of current practices of management will include human, fiscal, and physical resource management. This course is required for all students who are seeking a master's degree (M.S.) in Student Affairs in Higher Education.

Prerequisite(s)/Corequisite(s): Full admission to the UNO Counseling Department and/or permission from the Counseling Department Chair.

COUN 8980 DIGITAL LEARNING: POLICY, PROGRAMMING, & SYSTEMS (3 credits)

This course is an exploration of digital learning organizational structures within the context of higher education. We begin by offering foundational definitions of terminology used throughout the course and delve into understanding how digital learning fits within the broader context of college and university operations. We then explore and discuss strategies for understanding relevant policies, technology systems and wrap-around support services to ultimately engage and retain digital learners in pursuit of post-secondary education.

Prerequisite(s)/Corequisite(s): Admission to UNO Department of Counseling and/or department permission.

COUN 8986 COUNSELING SKILLS IN GERONTOLOGY (3 credits)

This course is intended to help develop basic counseling skills for application in gerontology. (Cross-listed with GERO 4980, GERO 8986).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

COUN 8990 THESIS (1-6 credits)

To develop the candidate's ability to carry out accepted procedures associated with the research process.

Prerequisite(s)/Corequisite(s): Approval of the Thesis Review Committee and permission of student's thesis chairperson. Not open to non-degree graduate students.

Criminology and Criminal Justice

Degree Programs Offered

- Criminology and Criminal Justice, MA (p. 1093)
- Criminology and Criminal Justice, MS (p. 1094)
- Criminology and Criminal Justice, PhD (p. 1097)
- Master of Social Work, MSW-Criminology and Criminal Justice, MS (MSW/CRCJ) (p. 1099)

Certificates Offered

- Managing Juvenile and Adult Populations Certificate (p. 1101)

CRCJ 8010 NATURE OF CRIME (3 credits)

This course provides an overview of the major dimensions of crime in the U.S. Content areas included are the epidemiology of crime, the costs of crime and typologies of crime and criminals.

Prerequisite(s)/Corequisite(s): Admission to UNO Graduate College.

CRCJ 8020 SEMINAR IN ADMINISTRATION OF JUSTICE (3 credits)

This course is designed to provide students with a critical understanding of responses to crime. Particular emphasis is placed on theory and research bearing upon the effectiveness of the policies and strategies of the principal institutions of the criminal justice system - the police, courts and corrections. Additionally, philosophical and practical matters pertaining to "justice" and "fairness" in the administration of the criminal law are explored.

Prerequisite(s)/Corequisite(s): Admission to UNO Graduate College.

CRCJ 8030 CRIMINAL JUSTICE RESEARCH THEORY AND METHODOLOGY (3 credits)

Research theory and methodology in the social sciences as applicable to criminal justice; preparation of research designs, conceptual models; sampling procedures; and development of individual research papers.

Prerequisite(s)/Corequisite(s): Admission to UNO Graduate College.

CRCJ 8040 SEMINAR IN POLICE AND SOCIETY (3 credits)

This course is designed to explore the role of the police in American society. Attention is given to the origins of policing, the nature of police organizations and police work, and patterns of relations between the police and the public. The values of a democratic society as they affect the law enforcement role are discussed.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in Criminology and Criminal Justice; or admission to the UNO graduate program and permission of instructor.

CRCJ 8050 SEMINAR IN CORRECTIONS (3 credits)

This course is designed to give an analytical perspective to the history, development, implementation and future of critical issues in the field of corrections. Primary focus will be directed toward an exploration of the various theoretical approaches to corrections and the research intended to support or refute these perspectives.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8060 SEMINAR IN THE CRIMINAL COURT SYSTEM (3 credits)

This course is designed to provide a social science perspective on the role of the courts in the criminal justice system. The ideals of the system will be compared with actual functioning, and court reform programs and proposals will be critically examined.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8070 SEMINAR IN CRIMINAL LAW AND PROCEDURE (3 credits)

This course is designed to examine substantive criminal law as the basis of social control in our country. Contemporary issues such as the insanity defense, decriminalization of so-called victimless crimes, sexual assault and abortion, and current proposals to assist victims of crimes will be among the topics explored. In addition, current criminal procedure problems relating to right to counsel, search and seizure and interrogation will be examined.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8080 SEMINAR IN JUVENILE JUSTICE (3 credits)

An inquiry in the social ramifications of the entire juvenile delinquency process including labeling, detention, incarceration and tolerance. Pre- and post-adjudicatory issues are dealt with as well as a realistic perspective given to delinquency prevention strategies.

Prerequisite(s)/Corequisite(s): Admission to UNO graduate program.

CRCJ 8090 SEMINAR IN THEORETICAL CRIMINOLOGY (3 credits)

A study of the etiology of crime as a social phenomenon and an objective analysis of the historical influences and thought which molded its development into an accepted contemporary science.

Prerequisite(s)/Corequisite(s): Admission to graduate program in criminology and criminal justice; or admission to UNO graduate program and instructor permission.

CRCJ 8100 CRIMINAL JUSTICE ORGANIZATION, ADMINISTRATION AND MANAGEMENT (3 credits)

This course will deal with issues in the organization and administration of modern justice agencies. The students will be exposed to theories, concepts, and issues relating to the administration and organization of justice agencies.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8110 VICTIMOLOGY (3 credits)

The Victimology seminar provides an overview of key research areas on prevalence, predictors, and consequences of various forms of victimization. By the end of the course, students will develop a critical understanding and appreciation of the development and current state of theories of victimology, measurement of different types of victimization, and quantitative and qualitative results that have been used to inform research in the field. Furthermore, students will learn how to critically analyze and interpret primary research regarding victimization.

Prerequisite(s)/Corequisite(s): Admission to UNO graduate program.

CRCJ 8130 SEMINAR IN WOMEN AND CRIMINAL JUSTICE (3 credits)

This course focuses on the experiences of women in the criminal justice system. It will cover the history of criminological theory on women, application of mainstream criminological theory to women, and women as offenders, victims, and professionals in the criminal justice system.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8136 SOCIOLOGY OF DEVIANT BEHAVIOR (3 credits)

This course is designed to investigate the etiology of many forms of norm-violating conduct. Emphasis will be placed on rule-breaking behavior as defined in the criminal statutes. (Cross-listed with CRCJ 4130).

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8180 CRIMINAL JUSTICE INTERNSHIP (3 credits)

This course is designed to provide supervised individualized learning experiences in a selected criminal justice agency. The principal objective of the internship is to provide students with the opportunity to apply theoretical and methodological principles acquired in graduate courses to the analysis of problems in local criminal justice agencies.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Criminology and Criminal Justice, successful completion of 15 hours of graduate work, and permission of instructor. Not open to non-degree graduate students.

CRCJ 8190 INDEPENDENT STUDY (1-3 credits)

Individual projects in research, literature review or creative production which may or may not be an extension of course work. The work will be supervised and evaluated by departmental graduate faculty members.

Prerequisite(s)/Corequisite(s): Admission to graduate program at UNO, and permission of instructor.

CRCJ 8210 PROGRAM EVALUATION AND POLICY ANALYSIS (3 credits)

This course is a survey of program evaluation and policy analysis techniques. The focus is on theoretical foundations of the Criminal Justice policy process, program development and implementation, research designs specific to program evaluation and policy research, and methodological techniques commonly used to evaluate criminal justice programs and policies

Prerequisite(s)/Corequisite(s): Admission to doctoral program in Criminology and Criminal Justice; or admission to graduate program at UNO and CRCJ 8030; or instructor permission.

CRCJ 8230 TERRORISM (3 credits)

A course devoted to an exploration and analysis of contemporary special problems in the broad spectrum of law enforcement and corrections.

CRCJ 8356 COMMUNITY-BASED CORRECTIONS (3 credits)

This course is intended for advanced students with a special interest in the correctional process as applied in a community setting. It is designed to focus on innovative community-based strategies for dealing with the offender as well as the traditional processes of probation and parole.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8516 VIOLENCE (3 credits)

This course is a survey of the nature and extent of violence. The focus is on patterns of violence across social groups, the causes and correlates of violence and violent behavior, and programs/policies geared toward violence prevention and reduction. Also of interest is the relationship between theory and violence research.

Prerequisite(s)/Corequisite(s): Upper-division CRCJ major; CRCJ minor; or CRCJ 1010 and jr/sr standing.

CRCJ 8800 SPECIAL PROBLEMS IN CRIMINAL JUSTICE (3 credits)

A course devoted to an exploration and analysis of contemporary special problems in the broad spectrum of criminal justice philosophy. This course looks at philosophical issues related to social control. The purpose of this course is to foster a deeper understanding of the reasons, justifications, and problems related to societal approaches to the control of its citizens.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or UNO graduate student and permission of instructor.

CRCJ 8850 RISK/NEEDS ASSESSMENT INSTRUMENTS (3 credits)

This course is designed to provide students with advanced knowledge and understanding in the area of risk/needs assessment tools used in the juvenile and adult justice system.

Prerequisite(s)/Corequisite(s): Admission to graduate program in criminology and criminal justice; or, instructor permission.

CRCJ 8950 STATISTICAL APPLICATIONS IN CRIMINAL JUSTICE & PUBLIC ADMIN (3 credits)

This is a required course which provides a foundation for the use of statistical methods in criminal justice and public affairs research. It will review fundamentals of research, showing the interplay between the theory, the research, the statistical method, and the interpretation.

Prerequisite(s)/Corequisite(s): Admission to UNO Graduate college.

CRCJ 8970 CAPSTONE PROJECT IN CRIMINOLOGY AND CRIMINAL JUSTICE (3 credits)

The Capstone Project offers each student the opportunity to demonstrate mastery of the theory and practice of Criminology and Criminal Justice by applying the knowledge and skills gained in the Master of Science program to a project of the student's choice. This involves completing a project report reflecting the cumulative knowledge gained from these experiences. This class is intended only for students who are completing their Master of Science degree in Criminology and Criminal Justice.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice MS program, and completion of a minimum of 24 credit hours; or permission of Masters Program Coordinator. Not open to non-degree graduate students.

CRCJ 8990 MASTERS THESIS (1-6 credits)

The thesis is required for all students in the MA program. It provides students with an opportunity to integrate theories, concepts, and aspects of the criminology and criminal justice literature with methods and techniques for conducting research, through the completion of an original research project. The thesis project should constitute original research and is conducted under the supervision of a Masters Thesis Committee.

Prerequisite(s)/Corequisite(s): Admission to the MA program in Criminology and Criminal Justice; and, CRCJ 8010, CRCJ 8020, CRCJ 8030, CRCJ 8950 and 6 other 8000+ CRCJ courses. Not open to non-degree graduate students.

CRCJ 9010 SEMINAR ON LAW & SOCIAL CONTROL (3 credits)

This is a required course which will examine the relationships between the state, the law, and the citizen in a democratic society. It will also examine the relationship between social control, law and social change.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Criminology and Criminal Justice; or UNO graduate student and permission of instructor.

CRCJ 9020 SEMINAR ON THEORIES OF CRIME (3 credits)

This is a required course which emphasizes conceptual and theoretical issues in contemporary criminological theory. It also provides students with a working knowledge of theory construction.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice MA or PhD graduate programs; or admission to UNO graduate program and instructor permission.

CRCJ 9030 SEMINAR ON RACE, ETHNICITY, AND CRIMINAL JUSTICE (3 credits)

This is a required course which introduces students to current empirical research and theory on racial minorities and the criminal justice system. It focuses on racial minorities as victims of crime, as offenders, and as criminal justice professionals.

Prerequisite(s)/Corequisite(s): Admission to UNO graduate program.

CRCJ 9040 COMPARATIVE CRIMINOLOGY AND CRIMINAL JUSTICE SYSTEMS (3 credits)

This course provides a cross-national examination of the dynamics of criminality and the social response to crime. It also describes the extent and nature of crime in different countries.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and instructor permission.

CRCJ 9050 ACADEMIC WRITING (3 credits)

This course is designed to familiarize students with academic and professional writing with the goal of promoting the development of formal writing and organizational skills. Students will learn how to construct and organize scholarly papers to better prepare them for the comprehensive examination, the doctoral dissertation, the development of scholarly journal articles and monographs, and the development of funded project proposals.

Prerequisite(s)/Corequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and permission of instructor.

CRCJ 9080 ADVANCED STATISTICAL APPLICATIONS (3 credits)

This is a required course which will provide the student with fundamentals of modern statistical techniques used in criminal justice and public affairs research. (Cross-listed with PA 9080.)

Prerequisite(s)/Corequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and CRCJ 8950 or PA 8950 and instructor permission.

CRCJ 9090 SPECIAL PROBLEMS IN RESEARCH METHODS (3 credits)

This course will explore specialized topics in research methodology. The course assumes that participants have a firm understanding of the basic principles of research methods and statistics.

Prerequisite(s)/Corequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9100 SPECIAL PROBLEMS IN STATISTICAL ANALYSIS (3 credits)

This course will explore advanced techniques of statistical analysis within the field of criminal justice. It assumes that participants have taken courses in basic descriptive and inferential statistics and advanced multivariate analysis of variance and regression.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in Criminology and Criminal Justice and CRCJ 9080; or admission to UNO graduate program, CRCJ 9080, and permission of the instructor.

CRCJ 9130 ADVANCED RESEARCH ON POLICING (3 credits)

This course will explore critical research issues in American policing. The focus of the course may vary and cover topics such as police discretion, police use of force, labor unions in law enforcement, gender differences in policing, and police organization management.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and permission of the instructor.

CRCJ 9150 SPECIAL TOPICS IN CRIMINAL JUSTICE RESEARCH (3 credits)

This course will focus on specialized topics in criminology & criminal justice research. The purpose of the course is to provide students with an opportunity to read and critique current research on topics such as the history of the criminal justice system, civilian review of the police, sentencing, or the application of the death penalty.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9160 SEMINAR IN COMMUNITY-BASED CORRECTIONS (3 credits)

This course will deal with strategies of correctional reform and with models and practices of community-based corrections. Recent innovations in community-based corrections will be examined to demonstrate how they fit into an overall correctional strategy.

Prerequisite(s)/Corequisite(s): Admission to UNO graduate program.

CRCJ 9170 SEMINAR ON INSTITUTIONAL CORRECTIONS (3 credits)

This course will examine the role of correctional institutions in the criminal justice system. The student will be exposed to the historical, current, and projected role of these institutions.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 9180 SEMINAR ON THE CRIMINAL COURT SYSTEM (3 credits)

This course will focus on the structure, organization, and operation of the state and federal court systems in the United States. The purpose of the course is to survey recent research on the dynamics of courthouse justice—charging, plea bargaining, bail decision making, jury decision making, and sentencing.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 9200 SEMINAR ON VIOLENT CRIME AND CRIMINAL BEHAVIOR (3 credits)

This course exposes students to the leading theories and research in the area of violent criminal behavior. It addresses major violent crimes including rape, homicide, and child sexual physical abuse.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 9220 ADVANCED CRIMINOLOGICAL THEORY AND THEORY CONSTRUCTION (3 credits)

This course is designed to extend students' knowledge of theory and theory construction beyond the basics of the elements and propositions of particular criminological theories. Students will have an opportunity to examine in depth topics such as theory construction, theory integration, theory compatibility and synthesis, and new directions in criminological theory.

Prerequisite(s)/Corequisite(s): CRCJ 8090 or CRCJ 9020 and admission to graduate program in Criminology and Criminal Justice; or permission of instructor.

CRCJ 9250 SEMINAR ON VICTIMIZATION ACROSS THE LIFE-COURSE (3 credits)

The Seminar on Victimization across the Life-course provides graduate students a survey of the primary topics regarding the predictors and consequences of victimization at various points in life. This an elective course for graduate students in Criminology and Criminal Justice. By the end of the course, students will understand major theories, research methods, and seminal research studies in the victimology field. Furthermore, students will learn how to critically analyze and interpret primary research regarding victimization.

Prerequisite(s)/Corequisite(s): Admission to UNO graduate program. Not open to non-degree graduate students.

CRCJ 9700 TEACHING CRIMINAL JUSTICE AT THE COLLEGE/ UNIVERSITY LEVEL (3 credits)

This seminar is a required course for doctoral students in criminal justice. The purpose of the course is to provide students with the knowledge and skills that will enable them to become informed, effective, and stimulating teachers. A variety of pedagogical issues will be covered during the course of the semester; theories of learning and student motivation; constructing a course syllabus; designing effective writing assignments and in-class exercises; leading class discussions; testing and grading; and managing the classroom.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice PhD graduate program; or admission to Criminology and Criminal Justice MA or MS graduate program and instructor permission. Not open to nondegree students.

CRCJ 9800 ADVANCED RESEARCH DESIGN (3 credits)

This is a required course which will expose students to advanced topics in research methods in preparation for writing their doctoral dissertation. It will also apply advanced methodological techniques to problems in the field.

Prerequisite(s)/Corequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9980 DIRECTED READINGS IN CRIMINOLOGY & CRIMINAL JUSTICE (1-6 credits)

This course is designed to provide the advanced graduate student with the opportunity to do extended readings on a specialized criminology or criminal justice topic.

Prerequisite(s)/Corequisite(s): Admission to graduate program in criminology and criminal justice or UNO graduate program, and permission of instructor.

CRCJ 9990 DISSERTATION (1-20 credits)

The dissertation is an original research project conducted and written under the direction of a faculty dissertation committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge on crime and criminal justice.

Prerequisite(s)/Corequisite(s): Completion of all coursework, completion of the comprehensive examination, and permission of Supervisory Committee Chair. Not open to non-degree graduate students.

Criminology and Criminal Justice, MA

School of Criminology & Criminal Justice, College of Public Affairs & Community Service

Vision Statement

The Master of Arts (MA) degree is a 30-hour non-terminal degree designed to emphasize research activity and independent inquiry. This degree is recommended for those students seeking an interim degree prior to pursuing a doctoral degree. To complete the MA degree, students must write and orally defend a thesis. The thesis is an independent research project and an academic exercise that is written to the standards of the faculty members on the thesis committee. A thesis requires a committee of three faculty members and typically takes two semesters to complete.

Other Program Related Information

Fast Track

The School of Criminology and Criminal Justice has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BS in Criminology and Criminal Justice desiring to pursue either an MA or MS in Criminology and Criminal Justice.
- Students must have completed no less than 90 undergraduate credit hours
- Students must have a minimum undergraduate GPA of 3.5
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their academic advisor to register for the graduate courses
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program but successful completion of the graduate courses will be a significant consideration in admission to the MA or MS in Criminology and Criminal Justice program.
 - The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework. For those interested being considered for a graduate research assistantship, an April 1 deadline for fall admission is recommended.

Other Requirements

- **Entrance Exam:** Graduate Record Exam (GRE), a score of 300 or higher is typically required for admission to the MA program, or to be considered for a research assistantship
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country

on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.

- Paper-based TOEFL: not accepted, Internet-based TOEFL: 95 with a minimum of 21 in each of the four areas, IELTS: 7.5 (8.0+ preferred), Duolingo: 115
- All ESL students are required to take a proficiency assessment examination at UNO upon admission, which will be used to determine whether further assistance is required.
- **Statement of Purpose:** One page discussing reasons for pursuing a graduate degree, research interests, and career goals for the future
- **Letters of Recommendation:** Two letters of recommendation are required, preferably from faculty or instructors familiar with your academic ability
- **Unconditional Admission:**
 - Possession of a bachelor's degree from a regionally accredited institution
 - Student has a 3.00 GPA (average of "B") overall in undergraduate work
 - At least 12 credit hours of criminal justice courses or related courses that meet the requirements of the current school undergraduate curriculum, including a basic statistics course, a research methods course, an introductory criminal justice course, and a criminology course.
- **Provisional Admission:**
 - Student has not completed all of the undergraduate prerequisite course requirements for unconditional admission to graduate study
 - Student has no less than a 2.75 overall GPA for the last two years of undergraduate work and not less than a 2.75 GPA in the undergraduate major

All candidates should carefully review the Graduate College requirements for forming a Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of a thesis.

Criminology and Criminal Justice, MS

School of Criminology & Criminal Justice, College of Public Affairs & Community Service

Vision Statement

The Master of Science degree in criminology and criminal justice is a 36 hour program (11 classes and a capstone course) designed to meet the needs of professionals who are dedicated to a career in criminal justice. This educational opportunity is offered in a *flexible online format*, or alternatively through on-campus evening classes. Full-time students can complete the degree in 18 months; part-time students may choose to pursue the degree at a slower pace.

Criminology and Criminal Justice Specializations

Students may either choose to pursue one of the two following specializations or select a minor. A minor generally requires nine hours and the permission of the minor department/school. If all 9 or 12 credit hours cannot be timely attained in the specialization, students are free to take additional CRCJ elective classes.

CRCJ 8970	CAPSTONE PROJECT IN CRIMINOLOGY AND CRIMINAL JUSTICE	3

Capstone course is offered in the fall and spring semesters. Once all required coursework has been completed, the student can register to take the capstone course. In this course, students will make arrangements with the instructor to conduct a research project. The course will end with a research report detailing results and written in a way consistent with agency and/or criminal justice organizational standards.

Criminology and Criminal Justice, PhD

School of Criminology & Criminal Justice, College of Public Affairs & Community Service

Vision Statement

The vision of the School of Criminology and Criminal Justice is to be a program that is recognized nationally for its quality and impact on research and instruction. In terms of doctoral education, the aim is to foster a learning environment in which graduate students may gain the necessary knowledge, skills, and competencies to prepare them for careers in academia or in the public or private sectors. The curriculum emphasizes written and verbal communication skills, methodological competency, a strong statistical foundation, and hands-on research experience. Doctoral students will actively engage in research under the supervision of faculty, the Director of the School's Nebraska Center for Justice Research, and/or the Director of the Juvenile Justice Institute.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadline (Spring 2022, Summer 2022, and Fall 2022)

- Application deadline for admission with graduate assistantship funding consideration: January 14
- Application deadline for admission with no graduate assistantship funding: June 1

Other Requirements

The School of Criminology and Criminal Justice uses a holistic approach when evaluating application materials including the extent to which the applicant's interests align with faculty research areas and an interest in attracting a diverse student body with varying lived experiences. Admissions decisions are competitive with a limited number of qualified students admitted each fall semester. Applicants are typically notified of decision by mid-spring.

- Official transcripts documenting completion of a master's degree. Degree may be in process at time of application.
 - A Master of Arts or Master of Science degree in criminology or criminal justice from an accredited institution is required for unconditional admission into the program.
 - Applicants holding a master's degree in a related social science field (e.g., psychology, sociology, political science, public administration, etc.), but lacking substantive coursework in criminology and criminal justice may be granted provisional admission. Unconditional admission status will be granted upon successful completion of 18 hours of criminology and criminal justice core curriculum coursework.
- **English Language Proficiency:** Applicants must have a command of oral and written English. Applicants who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 95 with a minimum score of 21 in each of the four areas (the paper TOEFL will NOT be accepted), IELTS: 7.5 (8.0+ is preferred), PTE: 76, Duolingo: 115
 - **NOTE:** All English as second language students will be required to complete a proficiency assessment examination upon admission. This assessment will be used to determine if further assistance is required.
- **Entrance Exam:** Graduate Record Examination (GRE) scores are required.
 - A GRE score above 300 (combined verbal and quantitative portions) and writing score at or above 4.0 and above is preferred. Students not meeting this threshold but demonstrate their exceptional academic potential through other aspects of their application materials may also be considered.
- **Statement of Purpose/Statement of Research Interests:** (max. 5 pages)
 - A statement of purpose should describe the applicant's prior education experience, research interests, any relevant professional experience, and long term career goals. Applicants may note their interests in working with specific faculty members with whom their research interests align.
- **Writing Sample:** This may be a chapter from a master's thesis, a published article, or a term paper or manuscript written in a scholarly style.
- **Resume**
- **Letters of Recommendation:** Three letters are required with at least two of the three letters must be submitted by professors who can attest to the applicant's academic strengths through experiences such as having the applicant as a student in their class and/or working under their direct supervision on research projects.

CRCJ 9990	DISSERTATION (see details below)	20
Total Credits		62

¹ This course may be substituted with a course from another department. Permission for course substitution must be granted by a student's supervisory committee and doctoral program chair.

Both 8000- and 9000-level elective courses are available to doctoral students.

There is a series of 9000-level courses that are required for doctoral students.

A maximum of six (6) hours of dual-level courses (4—/8—6 course number) can be included in the program of study.

A maximum of three (3) hours of directed readings (CRCJ 9980) may be included in the program of study; these three (3) hours must be used in preparation for the comprehensive examination. All coursework, excluding coursework in the form of directed readings related to the comprehensive examination, must be completed within two and half (2.5) years from the time a student's program of study is approved by the Dean for Graduate Studies. Three (3) hours for directed readings are to be used for the comprehensive examination in the fall semester of the student's third year in the program. All students will be required to complete all courses listed as required courses. Students also must take elective courses in criminal justice or related fields.

Students are expected to complete 36 hours of coursework within two years. Except in extraordinary circumstances. Some of these hours may be taken during summer semesters.

Comprehensive Examination and Admission to Candidacy

After completion of 36 hours of coursework, doctoral students will be required to pass a comprehensive examination. The examination has two parts—criminological theory and criminal justice systems. Students are expected to take both comprehensive examinations during the fall and spring semesters of their third year in the program. It is expected that a doctoral student will complete 42 hours of coursework by the end of the fall semester of their third year.

Dissertation

Students may register for dissertation credits after successful completion of one comprehensive examination. The dissertation must reflect original scholarship and contribute to the body of knowledge on criminology and criminal justice. The dissertation topic must be approved by the student's dissertation committee, which consists of a chair and three other members. One committee member must be a faculty member from outside the School of Criminology and Criminal Justice. The dissertation topic, prospectus, and the dissertation all require the approval of the dissertation committee. A doctoral student will be required to take at least one hour of CRCJ 9990 each fall and spring semester while working toward the completion of the dissertation. A minimum of 20 credit hours of CRCJ 9990 is required for all doctoral students.

Total Credit Hours

A minimum of **92 graduate hours** beyond the baccalaureate degree. This includes up to 30 hours earned in a master's degree. Satisfactory completion of a teaching practicum is also required.

Social Work, MSW and Criminology and Criminal Justice, MS (MSW/CRCJ)

Grace Abbott School of Social Work, School of Criminology & Criminal Justice, College of Public Affairs & Community Service

Vision Statement

The MSW/MSRCJ dual degree program is a collaborative effort between the University of Nebraska at Omaha, Grace Abbott School of Social Work and the School of Criminology and Criminal Justice. The MSW/MSRCJ offers interdisciplinary preparation in the fields of social work and criminal justice leading to the master of social work and the master of criminal justice degrees, with fewer required credit hours than it would take to obtain these degrees independently.

This dual degree program prepares students to provide a range of advanced social work services and assume leadership in the field of criminal justice and social work. Graduates with a dual MSW/MSRCJ are prepared to respond to the needs of the community by working with delinquent and criminal populations and the systems that impact these populations.

Students beginning the MSW/MSRCJ program at the MSW Foundation level must complete 81 credit hours total. Students beginning the MSW/MSRCJ program at the Advanced Standing level, must complete 57 credit hours total.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Fall 2022)

- Fall: January 15

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** The statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both

content and writing skills. In your statement of purpose, please address each of the items listed below, in no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.

- If you have a compelling autobiographical story relevant to your application, but that falls outside of the items addressed within the statement, you may add a letter to the Admissions Committee. Your letter will be considered, but will not be scored.
- What type of work are you planning to engage with once you attain your MSW degree? Specifically, what are the issues, populations, and levels of practice you hope to work with after graduate school?
- The social work profession is rooted in social justice. Social workers adopt a stance of cultural humility and strive towards cultural awareness. Discuss a time when you realized that one of your personal or cultural identities influenced your reaction to a social situation. Reflecting on that experience, how might it influence your future social work practice?
- Social workers are self-reflective, strengths-based, and growth-oriented. Identify a strength that you possess and an area for growth. Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.
- Social work is a values-based profession dedicated to mitigating inequality and enhancing human wellbeing, especially for vulnerable, marginalized, and oppressed populations. From the core values and ethical principles identified in the NASW Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>), identify and discuss one that resonates with you and one that may challenge you.
- Why have you chosen social work? Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.
- **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:
 - Educational experiences since high school
 - List start and end dates with month and year
 - Identify whether the position is part or full-time
 - Identify whether the position is paid or volunteer
 - Field placements, internships or practicums
 - Honors or distinctions received
 - Professional experiences, especially in human services
- **Letters of Recommendation:** Three letters of recommendation are required, the recommendation requests are generated from your online application. These recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past two years, it is suggested that at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.
- The MS application for criminology and criminal justice is completed online adhering to the same admission criteria for the MSW degree. The personal statement and letters of recommendation for admission to the

MSW degree will be used by the School of Criminology and Criminal Justice to admit students.

The MSW/CRCJ **Foundation Program** is a 81 credit hour program available to applicants who do **not** hold a BSSW degree from an accredited school of social work within the last 10 years.

The MSW/CRCJ **Advanced Standing Program** is a 57 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work within the last 10 years.

Note: This certificate can be obtained entirely online. All courses for the certificate will be offered online in a two-year rotation. Elective courses in criminology and criminal justice are also offered in the spring, summer and fall semesters.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- GPA of 2.75 or higher
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 588, Internet-based TOEFL: 95 with a minimum of 21 in each of the four areas, IELTS: 7.5 (8.0 preferred), PTE: 76, Duolingo: 115
 - All ESL students are required to take a proficiency assessment examination at UNO upon admission, which will be used to determine if further assistance is required.
- Statement of Purpose:** The statement should include how the certificate will help you achieve your professional goals.

Critical and Creative Thinking, MA

College of Arts and Sciences

Vision Statement

The Master of Arts in Critical and Creative Thinking (MA CCT) embodies the College of Arts and Sciences' ongoing commitment to personal enrichment as well as to the practical application of analytical skills and knowledge in a diverse array of both for-profit and nonprofit professional environments. This interdisciplinary degree provides a unique opportunity to pursue both breadth and depth within the rich and diverse landscape of the liberal arts and sciences. Students pursuing this degree will enhance their career potential by developing advanced skills and abilities necessary for critical thinking, creativity, and leadership.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: July 15
- Spring: November 1
- Summer: March 1

Other Requirements

- All applicants must have the equivalent of a four-year undergraduate degree from a regionally accredited four-year institution of higher learning or the equivalent international institution with a minimum GPA of at least 3.0 in undergraduate courses related to major.
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 600, Internet-based TOEFL: 100, IELTS: 7.5, PTE: 76, Duolingo: 120

Degree Requirements

Code	Title	Credits
Required Course		
CACT 8000	INTRODUCTION TO CRITICAL AND CREATIVE THINKING ¹	3

Concentrations

Select one area of concentration. 12

Elective Courses

Select 12 hours of elective courses; of those 9 hours maybe outside the CACT program. 12

Exit Requirement

CACT 8090 CRITICAL AND CREATIVE THINKING GRADUATE PROJECT² 3

Total Credits 30

¹ This course must be completed within your first nine (9) hours of study.

² This course can be completed in your second or last semester of study.

At least 15 hours of the MA CACT program must be done at the seminar level (courses ending in zero). Students can apply up to nine (9) hours of coursework outside of the MA CACT to their program of study with the permission of the administrative coordinator. Other course substitutions may be made with the permission of the administrative coordinator.

Concentrations

Cultural and Global Analysis

Code	Title	Credits
Required Courses		
CACT 8106/ PSYC 8536	CULTURAL PSYCHOLOGY	3
CACT 8100	GLOBAL CINEMA	3
CACT 8116/ GEOG 8556	GEOGRAPHY OF ECONOMIC GLOBALIZATION	3
CACT/BLST 8110	GLOBAL-LOCAL: OPPORTUNITIES, BARRIERS, ENGAGEMENT	3
CACT 8420	MEXICO AND THE U.S. BORDERLANDS: TWO HISTORIES, ONE DESTINY	3
Total Credits		12

Ethics and Values

Code	Title	Credits
Required Courses		
CACT/RELI 8206	COMPARATIVE RELIGIOUS ETHICS	3
CACT 8200/ PSCI 8300	SEMINAR IN POLITICAL THEORY	3
CACT 8215	VALUES AND VIRTUES	3
CACT/RELI 8226	VIOLENT CONFLICTS, PEACEBUILDING, AND THE ETHICS OF INTERVENTION	3
CACT 8650	WRITING ACROSS DIFFERENCES: RHETORICAL THEORY FOR PERSUASION AND PUBLIC ADVOCACY	3
Total Credits		12

Health and the Environment

Code	Title	Credits
Required Courses		
CACT 8306/ PSCI 8296	INTERNATIONAL DEVELOPMENT & SUSTAINABILITY	3
CACT/ENVN 8316	OUR ENERGY FUTURE: SOCIETY, THE ENVIRONMENT AND SUSTAINABILITY	3
CACT/ENGL 8310	ECOLOGICAL WRITING AND ANALYSIS	3
CACT 8326	ECOLOGICAL SUSTAINABILITY AND HUMAN HEALTH	3
Total Credits		12

International Migration, Development and Citizenship

Code	Title	Credits
Required Courses		
CACT 8416/ SPAN 8156	LITERATURE/CULTURE: CENTRAL AMERICA AND THE CARIBBEAN 1898-2000	3
CACT 8400	A HISTORY OF AMERICAN IMMIGRATION POLICIES AND LAWS	3
CACT/ENGL 8410	IMMIGRATION, MIGRATION, AND DIASPORA: CRITICAL APPROACHES AND THEORIES OF MOVEMENT IN LITERATURE	3
CACT 8430	INTERNATIONAL MIGRATION, DEVELOPMENT AND CITIZENSHIP	3
CACT 8420	MEXICO AND THE U.S. BORDERLANDS: TWO HISTORIES, ONE DESTINY	3
Total Credits		12

Organizational Science and Leadership

Code	Title	Credits
Required Courses		
CACT/SOC 8500	COMPLEX ORGANIZATIONS	3
CACT 8506/ PSYC 8656	CREATIVITY AND INNOVATION IN ORGANIZATIONS	3
CACT 8510/ PSCI 8120	SEMINAR IN LEADERSHIP	3
CACT 8520/ PSYC 9421	POSITIVE ORGANIZATIONAL PSYCHOLOGY AND LEADERSHIP	3
CACT 8530	PERSONNEL PSYCHOLOGY AND LEADERSHIP	3
Total Credits		12

Writing and Critical Reflection

Code	Title	Credits
Required Courses		
CACT/ENGL 8310	ECOLOGICAL WRITING AND ANALYSIS	3
CACT/ENGL 8610	PROFESSIONAL AND TECHNICAL WRITING	3
CACT/ENGL 8630	DIGITAL RHETORIC	3
CACT/ENGL 8640	CREATIVE NONFICTION IN DIGITAL ENVIRONMENTS	3
CACT/ENGL 8650	WRITING ACROSS DIFFERENCES: RHETORICAL THEORY FOR PERSUASION AND PUBLIC ADVOCACY	3
Total Credits		12

CACT 8000 INTRODUCTION TO CRITICAL AND CREATIVE THINKING (3 credits)

This course is the foundational introductory course for the Master of Arts in Critical and Creative Thinking program (MA CCT). It focuses on the development of students' skills as critical thinkers and creative problem solvers as well as the cultivation of students' capacity to recognize and leverage tools, resources, and ideas towards finding innovative solutions to everyday problems.

Prerequisite(s)/Corequisite(s): Graduate status and acceptance into MA CACT program or permission of instructor.CACT8000

CACT 8060 TOPICS IN CRITICAL AND CREATIVE THINKING (3 credits)

This is a course on selected topics offered on a one-time or occasional basis. The course may be repeated as long as the topic is different each time. May be cross listed with other departments when topics are appropriate to other departments. A complete topics syllabus will be available on file in the Office of the Master of Arts in Critical and Creative Thinking program.

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8080 INDEPENDENT STUDY (1-3 credits)

This course is designed for those students who are independently pursuing an area of study that is not covered under the existing curriculum. The student will be supervised by a member of the faculty of the MA in Critical and Creative Thinking program. All course assignments, readings, requirements, and expectations will be clearly communicated to the student in advance. May be repeated for credit for a total of six credit hours.

Prerequisite(s)/Corequisite(s): Admission into the MA CCT program, successful completion of 6 hours of CACT coursework, including CACT 8000, and permission of faculty member. Not open to non-degree graduate students.

CACT 8090 CRITICAL AND CREATIVE THINKING GRADUATE PROJECT (3 credits)

The Graduate Project is an applied student project under the direction of a faculty advisor. In the project, the student will apply interdisciplinary knowledge and skills gained within the program to address a problem or to expand knowledge within or across disciplines. The product or artifact produced by the student may take a variety of forms.

Prerequisite(s)/Corequisite(s): Permission of faculty advisor and Graduate Program Committee Leadership (or its designee). Not open to non-degree graduate students.

CACT 8100 GLOBAL CINEMA (3 credits)

A critical and analytic study of foreign films focusing on overlapping global issues. This course supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking.

CACT 8106 CULTURAL PSYCHOLOGY (3 credits)

This course will provide an overview of the cultural, community and ecological factors that play a role in how people perceive their environments. The goal is to investigate the ways in which culture affects individual behaviors, attitudes and cognitions. It may be easy to tell that two cultures are different, but identifying exactly what is meant - and all that is encompassed - when speaking about "culture" can be much more difficult. Culture can include everything from gender constructs and race/ethnicity to the effects of new technologies. All of these aspects of culture affect individuals' psychological make-up and behavior. Although psychology has largely developed from a Western tradition, attention to research from non-Western perspectives will also be emphasized. This course supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 4530, PSYC 8536).

Prerequisite(s)/Corequisite(s): Enrollment in MA in Critical & Creative Thinking program or by permission of the instructor.

CACT 8110 GLOBAL-LOCAL: OPPORTUNITIES, BARRIERS, ENGAGEMENT (3 credits)

This course focuses on global cultural and social forces and how they interact to form nexuses of both opportunity and obstacle to constructive human engagement on a wide array of social issues. An overview of topics covered in the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. This course will provide students with the analytical tools, collaborative engagement skills, and applied problem-solving techniques that will help students succeed in this concentration and program. (Cross-listed with BLST 8110)

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8116 GEOGRAPHY OF ECONOMIC GLOBALIZATION (3 credits)

A study of the geography of economic globalization and the geography of the world economy. The major topics include the historical development of the world economy and globalization from the geographical perspective, trends in geography of global production, trade and investment, the most important factors and actors in the globalization processes and its geographic effects, geography of transnational corporations, case studies of economic geography of selected industries and service activities, effects of globalization on the developed and developing countries. This course also supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with GEOG 4550, GEOG 8556)

Prerequisite(s)/Corequisite(s): Graduate status.

CACT 8200 SEMINAR IN POLITICAL THEORY (3 credits)

This course introduces students to the history of political theory, from its origins in ancient Greece to its manifestations in contemporary thought. (Cross-listed with PSCI 8300)

Prerequisite(s)/Corequisite(s): Permission of graduate advisor.

CACT 8206 COMPARATIVE RELIGIOUS ETHICS (3 credits)

An introduction to historical and contemporary approaches to comparative religious ethics, with special focus on specific case studies as encountered in societies and religious communities across the globe. In addition to reading authors from a variety of perspectives (Aristotelians, natural law theorists, philosophers of law, pragmatists, theologians, and historians of religion), students will be introduced to special topics in the field, e.g., religion and public life, religion and law, syncretism, the secular/non-secular divide, etc. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 4200, RELI 8206)

CACT 8215 VALUES AND VIRTUES (3 credits)

This course explores advanced topics in ethics with particular emphasis on value theory and virtue ethics. Topics to be considered include the meaning and status of value claims, sources of value, intrinsic goods, agent-relative goods, practical reason, moral development, happiness, moral ambiguity, moral luck, the identification of virtues, and relationships of care, trust, and responsibility. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PHIL 3060)

CACT 8226 VIOLENT CONFLICTS, PEACEBUILDING, AND THE ETHICS OF INTERVENTION (3 credits)

This course is designed to familiarize the student with the nature of violent conflict, including terrorism, and a variety of the mechanisms for peacebuilding. The course will also explore human rights and the ethics of intervention. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 4220, RELI 8226)

CACT 8306 INTERNATIONAL DEVELOPMENT & SUSTAINABILITY (3 credits)

This course introduces students to different concepts of international development through the lens of sustainability. The course explores a broad range of activities related to international development, including international aid, trade, philanthropy, interventions in conflict, peacebuilding, public health, human rights, social justice, and the environment. (Cross-listed with PSCI 4290, PSCI 8296)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

CACT 8310 ECOLOGICAL WRITING AND ANALYSIS (3 credits)

This course provides students with the opportunity to develop expertise in a wide range of foundational works and key techniques of ecological writing and theory in English. By engaging mindfully with these works and techniques, students will develop advanced skills in ecologically oriented critical analysis and creative thinking. This course supports the Writing and Critical Reflection and the Health and the Environment concentrations in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENGL 8310)

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8316 OUR ENERGY FUTURE: SOCIETY, THE ENVIRONMENT AND SUSTAINABILITY (3 credits)

In this course, students will analyze our energy options including the environmental, economic, and ethical connections with a particular emphasis on electrical energy. The course doesn't prescribe a particular energy future but rather emphasizes development of the knowledge and skills to more effectively contribute to the conversation. To understand our future, the course begins with the present energy landscape and its historical underpinnings, then focuses on developing a student's ability to critically assess energy options by examining the associated implications, consequences, intent, origins, and bias. Students' own work, life, and academic experience are used in the course to underscore the individual relevance of these energy choices. The course includes the necessary science, but the greater emphasis is on the associated critical and creative thinking so that ultimately students can make informed, creative, sustainable energy choices. (Cross-listed with ENVN 4310, ENVN 8316)

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8326 ECOLOGICAL SUSTAINABILITY AND HUMAN HEALTH (3 credits)

The course will explore and develop the complex context of the systemic links among ecosystems and human health (and more broadly human well-being) using case studies including climate change, water quality, infectious diseases and agricultural production. Students will develop skills in critical thinking and applied research by studying biological connections between humans and ecosystems and how social, economic and cultural processes and practices mediate these connections. This course supports the Health and the Environment concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENVN 4320)

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8400 A HISTORY OF AMERICAN IMMIGRATION POLICIES AND LAWS (3 credits)

This seminar will examine the evolution of American immigration policies and laws from the colonial period to the present day. Where appropriate, the course will examine American immigration laws in a comparative context. It will pay particular attention to how state policies create and/or sustain inclusionary or exclusionary practices for members of different racial, ethnic, religious, or gender groups in American society.

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8410 IMMIGRATION, MIGRATION, AND DIASPORA: CRITICAL APPROACHES AND THEORIES OF MOVEMENT IN LITERATURE (3 credits)

This seminar in literature and some film analyzes the depictions in non-fiction and fiction of displacement as a result of immigration, migration, refugee status, or any other considered movement, intentional or imposed. It will focus largely on the U.S. experiences of those displaced from all locales. (Cross-listed with ENGL 8410)

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8416 LITERATURE/CULTURE: CENTRAL AMERICA AND THE CARIBBEAN 1898-2000 (3 credits)

"Literature/ Culture: Central America and the Caribbean 1898- 2000" studies major historical and socio-cultural events in Latin American history in the 20th century, through their articulation in literary texts, film, and other cultural expressions from Central America and the Hispanic Caribbean. (Cross-listed with SPAN 4150, SPAN 8156)

CACT 8420 MEXICO AND THE U.S. BORDERLANDS: TWO HISTORIES, ONE DESTINY (3 credits)

Exploration of U.S.-Mexico Borderlands history and its pathways to current developments. It reviews borderland encounters, miscegenation, and wars between Indigenous groups, Europeans, North Americans, and Mexicans. It looks at the history of the drafting of the imaginary U.S.-Mexico borderline and follows its development until the construction of a wall to separate an undividable socio-cultural space. The course integrates a comparative conceptual approach to empires, nation-building, territorial expansion, identity formation, code-mixed English-Spanish uses, and state sovereignty.

CACT 8430 INTERNATIONAL MIGRATION, DEVELOPMENT AND CITIZENSHIP (3 credits)

The course allows students to gain an understanding of the forces driving contemporary world migration, the policies and practices of development expelling or attracting migrants from and to different parts of the world, and migrants' relative success in their quest for belonging and citizenship in their host communities. This course supports the International Migration, Development and Citizenship concentration in the Master of Arts in Critical and Creative Thinking.

CACT 8500 COMPLEX ORGANIZATIONS (3 credits)

This graduate seminar provides an overview focused on the understanding and analysis of intricate internal and external organizational forces such as organizational bureaucracy, organizational culture, autonomy and control systems, which affect performance of organizational members as well as influence organizational survival. (Cross-listed with SOC 8500)

Prerequisite(s)/Corequisite(s): Graduate enrollment or permission of class instructor.

CACT 8506 CREATIVITY AND INNOVATION IN ORGANIZATIONS (3 credits)

To provide a discussion of the antecedents of individual and organizational creativity, including measurement, models, characteristics of the individual and the environment that facilitate creativity and innovation in an organizational setting. Students in this course will be able to understand the research literature related to creativity and innovation and apply the findings to improve critical and creative thinking, implementation of creative ideas, and development of creative teams and organizations. This course supports the Organizational Science and Leadership concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 4650, PSYC 8656)

CACT 8510 SEMINAR IN LEADERSHIP (3 credits)

This course introduces students to classical and contemporary scholarship on leadership theory, research, and application. Students gain a foundation in models of leadership, assess their own leadership styles, and learn to integrate what they learn in corporate, governmental, non-profit, or community organizations. (Cross-listed with PSCI 8120)

Prerequisite(s)/Corequisite(s): Permission of graduate adviser.

CACT 8520 POSITIVE ORGANIZATIONAL PSYCHOLOGY AND LEADERSHIP (3 credits)

This course is a graduate seminar on organizational psychology and leadership that focuses on the understanding and critical analysis of theory and practice pertaining to individual functioning at work. Positive organizational psychology theories and practices will provide the overarching framework in understanding potential solutions to challenges and problems facing leaders and their employees. (Cross-listed with PSYC 9421).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

CACT 8530 PERSONNEL PSYCHOLOGY AND LEADERSHIP (3 credits)

This course provides an overview of personnel psychology from a leadership perspective. Topics include methodology, employee selection, performance appraisal, organizational attitudes and behavior, motivation, and leadership style.

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor

CACT 8610 PROFESSIONAL AND TECHNICAL WRITING (3 credits)

This course will introduce students to the theory, research, and practices of professional and technical writing. Through readings, discussions, and assignments, students will gain an understanding of the types and circumstances of communication challenges encountered in the workplace. The course will also consider the roles of persuasion and ethics in written communication. (Cross-listed with ENGL 8610)

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8630 DIGITAL RHETORIC (3 credits)

This course provides students with the opportunity to develop expertise in the theory and practice of digital rhetoric by considering technology's deep impact on how we define and engage in writing. Students examine contemporary writing practices as part of a rich rhetorical tradition while they design and create effective multimodal compositions and analyze foundational works in digital rhetoric. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENGL 8630)

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8640 CREATIVE NONFICTION IN DIGITAL ENVIRONMENTS (3 credits)

Students in this course will study creative nonfiction in digital environments, analyze rhetorical situations created in digital environments, and create individual creative nonfiction blogs-which might include, in addition to other modalities, sounds, animations, and hypertext. The course will also focus on the study and analysis of craft-elements of creative nonfiction: narrative persona, tone, rhythm and style, scenic construction, among others. Students taking this course will learn to read with interpretative and analytical proficiency a broad range of creative nonfiction in digital environments. (Cross-listed with ENGL 8640).

Prerequisite(s)/Corequisite(s): Graduate standing

CACT 8650 WRITING ACROSS DIFFERENCES: RHETORICAL THEORY FOR PERSUASION AND PUBLIC ADVOCACY (3 credits)

This course provides students a theoretical foundation for understanding how language is used in various types of discourses and texts as a means of convincing others of a given viewpoint or idea. Students will apply this theory to real-world writing scenarios in their scholarly areas of interest, to advocacy and social issues movements, or to address workplace needs and goals. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENGL 8650)

Prerequisite(s)/Corequisite(s): Graduate standing.

Cybersecurity

Degree Programs Offered

- Cybersecurity, MS (p. 1108)

Certificates Offered

- Cybersecurity Certificate (p. 1110)

CYBR 8000 CENTER OF ACADEMIC EXCELLENCE-CYBER OPERATIONS COMPLETION CERTIFICATE (0 credits)

This course is utilized to provide a specific designation for students that have completed the Center of Academic Excellence - Cyber Operations coursework. It is a zero credit hour class used to designate the completion of this focus area in the cybersecurity curriculum.

Prerequisite(s)/Corequisite(s): Instructor Permission. The program committee will work with the UG advisors to ascertain that the student has fulfilled all requirements for this designation-if he/she has or will within the last semester, they will be allowed to register for this class.

CYBR 8080 SPECIAL TOPICS IN INFORMATION ASSURANCE (1-6 credits)

The course provides a format for exploring advanced research areas for graduate students in Information Assurance and related fields. Specific topics vary, in keeping with research interests of faculty and students. Examples include applied data mining, mobile security, web services and applications, vulnerability assessments, cloud computing security, and other issues in Information Assurance research.

Prerequisite(s)/Corequisite(s): Instructor Permission.

CYBR 8366 FOUNDATIONS OF CYBERSECURITY (3 credits)

Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 4360, CSCI 8366)

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CYBR 8386 COMPUTER AND NETWORK FORENSICS (3 credits)

Computer forensics involves the preservation, identification, extraction and documentation of computer evidence stored on a computer. This course takes a technical, legal, and practical approach to the study and practice of incident response, computer forensics, and network forensics. Topics include legal and ethical implications, duplication and data recovery, steganography, network forensics, and tools and techniques for investigating computer intrusions. This course is intended as a second course in information assurance for undergraduate students as well as other qualified students. It is also intended as a foundation course for graduate digital forensics studies.

Prerequisite(s)/Corequisite(s): CYBR 1100, CIST 3600, CSCI 3500 or ISQA 3400, CYBR 3350 or CYBR 3370; or instructor permission.

CYBR 8396 MOBILE DEVICE FORENSICS (3 credits)

Mobile device forensics is the science of recovering digital evidence from a mobile device under forensically sound conditions using accepted methods. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a mobile device forensics investigation. Topics include: an introduction to digital and mobile device forensics, mobile forensics standards, acquisition methods (manual, logical, physical and provider-side), Android and iOS filesystem analysis, decoding approaches, application data analysis, and report writing. Students will be required to perform several investigations in a controlled lab environment, including acquiring forensically sound evidence and analyzing these using industry standard tools. (Cross-listed with CYBR 4390).

CYBR 8410 DISTRIBUTED SYSTEMS AND NETWORK SECURITY (3 credits)

The course aims at understanding the issues surrounding data security, integrity, confidentiality and availability in distributed systems. Further, we will discuss various network security issues, threats that exist and strategies to mitigate them. This course will cover topics in cryptography, public key infrastructure, authentication, hashing, digital signatures, ARP protection, IP and IPSEC, IP Tables, SSL/TLS, firewalls, etc. (Cross-listed with CSCI 8410)

Prerequisite(s)/Corequisite(s): IASC 8366 or equivalent(s); or instructor permission. Not open to non-degree graduate students.

CYBR 8420 SOFTWARE ASSURANCE (3 credits)

Software assurance is a reasoned, auditable argument created to support the belief that the software will operate as expected. This course is an intersection of knowledge areas necessary to perform engineering activities or aspects of activities relevant for promoting software assurance. This course takes on a software development lifecycle perspective for the prevention of flaws. (Cross-listed with CSCI 8420)

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836 OR by permission of the Instructor. Not open to non-degree graduate students.

CYBR 8436 QUANTUM COMPUTING AND CRYPTOGRAPHY (3 credits)

The course builds an understanding of exciting concepts behind quantum computing and quantum cryptography. In doing so it will introduce the principles of qubits, superposition, entanglement, teleportation, measurement, quantum error correction, quantum algorithms such as quantum Fourier transformation, Shor's algorithm and Grover's algorithm, quantum key exchange, quantum encryption, and secure quantum channels that are built using these principles. It will also discuss advantages of quantum computing and cryptography over classical computing and cryptography and limitations thereof. The students will come out with a working understanding of the field of quantum computing and quantum cryptography. During the course, students will also implement several of the quantum algorithms. (Cross-listed with CYBR 4430, CSCI 4430).

CYBR 8440 SECURE SYSTEMS ENGINEERING (3 credits)

This course takes a global risk-based view of the process of defining, verifying, validating and continuously monitoring secure information systems. The course will investigate a number of secure system solutions, starting with the definition of the system security needs, and tracing through methods of verification and validation of security controls, as well as ways to continuously monitor the corresponding assurances. (Cross-listed with CSCI 8440)

Prerequisite(s)/Corequisite(s): CSCI 8366 or IASC 8366.

CYBR 8446 INDUSTRIAL CONTROL SYSTEM SECURITY (3 credits)

The objective of this course is to research vulnerabilities into, and provide guidance for securing, industrial control systems (ICS). ICS is a general term that encompasses several types of control systems, including supervisory control and data acquisition (SCADA) systems, distributed control systems (DCS), and other control system items such as Programmable Logic Controllers (PLC). The student will learn to identify network and device vulnerabilities and potential countermeasures to these weaknesses. (Cross-listed with CYBR 4440)

Prerequisite(s)/Corequisite(s): CSCI 3550.

CYBR 8450 APPLIED CRYPTOGRAPHY (3 credits)

In this course we will implement stream and block ciphers in different modes, public key algorithms, hash functions, message authentication codes, random number generators, etc. Along the way we will also explore weaknesses of these algorithms and implement well-known attacks on them. We will also solve crypto challenges and puzzles. This is a hand-on course and will require programming proficiency. The preferred language will be Python; you can, however, use other object oriented languages.

Prerequisite(s)/Corequisite(s): CSCI 8410 or CYBR 8410

CYBR 8456 HOST-BASED VULNERABILITY DISCOVERY (3 credits)

The class will cover security issues at an implementation and hardware level. The students will learn assembly language and the use of a reverse assembler and debugger. This will allow the student to analyze various "packing" algorithms for computer viruses, the viruses themselves, operating system "hooking", "fuzzing", and other machine code, host-based exploits. The class will be using both Windows and Linux as operating systems. (Cross-listed with CYBR 4450.)

Prerequisite(s)/Corequisite(s): CSCI 3710 and CYBR 2250.

CYBR 8466 NETWORK-BASED VULNERABILITY DISCOVERY (3 credits)

The course is an advanced class in which the students learn various techniques for testing for and identifying security flaws in network software and web applications. Internet technologies such as HTTP, DNS, DHCP, and others are examined in the context of cyber security. Students are expected to participate in numerous hands-on experiments related to Information Assurance with respect to web technologies. (Cross-listed with CYBR 4460)

Prerequisite(s)/Corequisite(s): CSCI 3550

CYBR 8470 SECURE WEB APPLICATION DEVELOPMENT (3 credits)

Web applications are pervasive fixtures of 21st century culture. Web application security is an inclusive, amorphous, term that spans application level security, i.e. ensuring high level code cannot be exploited, server level security, i.e. ensuring server resources such as databases and file systems cannot be exploited, and network security, i.e. ensuring unauthorized parties cannot access a server or tamper with user sessions. This course cross-cuts the web application security concepts across the different categories above and takes a heavily hands-on approach to introduce students to the world of secure web app. design and development.

Prerequisite(s)/Corequisite(s): Instructor Permission

CYBR 8480 SECURE MOBILE DEVELOPMENT (3 credits)

Mobile devices are already pervasive fixtures of 21st century culture and increasingly the internet of things (IoT) and wearables are proliferating throughout the world. As this proliferation occurs, numerous vendor-centric and third-party mobile, wearable, and internet of things apps are being created by developers and downloaded by end-users with little to no thought about the security and privacy of the information used and collected by the apps. This course examines this issue from a development point of view to a) introduce mobile/wearable/IoT architectures and technologies, b) increase student application development competencies with these technologies, and c) integrate secure design principles into the ideation, design, and testing phases during development.

Prerequisite(s)/Corequisite(s): CYBR 8470 or Instructor Permission

CYBR 8546 COMPUTER SECURITY MANAGEMENT (3 credits)

The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST 4540, CYBR 4540, ISQA 8546)

Prerequisite(s)/Corequisite(s): IASC 4360 or permission of the instructor.

CYBR 8570 INFORMATION SECURITY POLICY AND ETHICS (3 credits)

The course will cover the development and need for information security policies, issues regarding privacy, and the application of computer ethics. (Cross-listed with ISQA 8570)

Prerequisite(s)/Corequisite(s): CIST 2100 or BSAD 8030, or permission of instructor.

CYBR 8900 INDEPENDENT STUDY IN INFORMATION ASSURANCE (1-3 credits)

The course provides a format for exploring advanced research areas for graduate students in Information Assurance and related fields. The class is designed for students that would like to explore specific Information Assurance topics at a greater depth, or topics that are not currently a part of the IA curriculum. The class is proposed and organized by the student, with participating faculty mentoring.

Prerequisite(s)/Corequisite(s): Instructor Permission

CYBR 8910 INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the MS in CyberSecurity (CYBR) program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s)/Corequisite(s): Students must have completed a minimum of 12 credit hours towards the MS in CYBR program. Instructor permission is required to register. Not open to non-degree graduate students.

CYBR 8950 GRADUATE CAPSTONE IN INFORMATION ASSURANCE (3 credits)

This is the graduate capstone course where students extend and apply their knowledge in defining, implementing, and assessing secure information systems. Students will demonstrate their ability to specify, apply, and assess different types of countermeasures at different points in the enterprise with a special focus on system boundaries. Students will complete and defend a Certification and Accreditation package. This course is intended for graduate students in the MS in IA degree program, coursework option, that are close to graduation (see prerequisites). This course replaces the MS in IA comprehensive examination requirement.

Prerequisite(s)/Corequisite(s): CYBR 8366, CYBR 8410, and CYBR 8456 and concentration area (systems or management and policy). Students must have 6 credit hours or less left in the program.

CYBR 8986 SPECIAL TOPICS IN INFORMATION ASSURANCE (1-3 credits)

The course provides a format for exploring advanced research areas for undergraduate students in Information Assurance and related fields. Specific topics vary, in keeping with research interests of faculty and students. Examples include applied data mining, mobile security, web services and applications, vulnerability assessments, cloud computing security, and other issues in Information Assurance research. (Cross-listed with CYBR 4980)

Prerequisite(s)/Corequisite(s): Instructor Permission.

CYBR 8990 THESIS IN INFORMATION ASSURANCE (1-6 credits)

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.

Prerequisite(s)/Corequisite(s): Instructor Permission.

CYBR 9460 SECURITY OF EMBEDDED SYSTEMS (3 credits)

An embedded system is some combination of computer hardware and software, either fixed in capability or programmable, which is specifically designed for a particular function. Industrial machines, automobile electronic systems, medical equipment, cameras, household appliances, airplanes, and vending machines, are among the myriad possible hosts of an embedded system. This course covers forward-looking topics in the security of embedded systems, including topics such as logic circuit obfuscation, hardware security methods, network setup exploits, and other "lower level" computer architecture subjects with respect to cybersecurity.

Prerequisite(s)/Corequisite(s): CYBR 8366 - Foundations of Information Assurance

Cybersecurity, MS

School of Interdisciplinary Informatics, College of Information, Science & Technology

Vision Statement

The School of Interdisciplinary Informatics (Si2) is the academic home of the Master of Science (MS) in cybersecurity (previously information assurance). Cybersecurity is a rapidly expanding, multi-faceted science that integrates a diverse set of disciplines to address fundamental problems in the design, development, implementation and support of secure information systems. The Master of Science is a full graduate degree program balancing theory with practice in order to provide students with the knowledge and skills necessary to protect information systems. Because of the wide variety of subject areas to which cybersecurity can be applied, this degree program has two paths; cyber operations, a concentration with highly technical content, and interdisciplinary, with the opportunity for the students to tailor the degree to specific management goals. Students may also choose between a thesis or capstone exit option based on their individual interests.

Other Program Related Information

Fast Track

The College of Information Science & Technology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 (nine) graduate credit hours toward the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate CIST area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0, with the exception of Computer Science, which requires a minimum undergraduate GPA of 3.5.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 in the graduate coursework is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived, and the applicant must contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - For all CIST degrees, if a student successfully completes their undergraduate BS degree with a cumulative GPA of 3.0 (3.5 for computer science) and all graduate courses with a 3.0 or better, you may be recommended for admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: July 1
- Spring: December 1
- Summer: April 1

Other Requirements

- The minimum undergraduate grade point average (GPA) requirement for the MS in Cybersecurity program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a four-year undergraduate degree.
- **Entrance Exam:** International applicants without a baccalaureate or equivalent degree from the United States are required to submit GRE scores. There is no minimum GRE requirement, but for international applicants the score will be one factor used in evaluating the student's portfolio.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission. Minimum acceptable scores are:
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** a two-page, double-spaced, word-processed essay that addresses the following two topics:
 - Discussion of two accomplishments that demonstrate your potential for success in the graduate program
 - Discussion of your unique personal qualities and life experiences that distinguish you from other applicants to this graduate program
- **Resume:** Submit a detailed resume indicating your work experience and background.
- **Letters of Recommendation:** At least one but no more than three letters of recommendation from references who can evaluate your work and/or academic achievements.
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
 - *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required
- Interview (optional): Although not required, the graduate program committee may ask to conduct a telephone interview to further assess the experiences of the applicant.

Requirements

Foundation Courses

Foundation courses ensure that all students in the degree have a solid groundwork upon which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for other courses in the program, but they also contain a distinct body of knowledge that is an important part of the cybersecurity professional's education. All foundation courses are required for all students, however, students who have obtained an undergraduate degree in a related field may already have this foundation. In such a case, most, if not all, foundation courses are waived. Students with undergraduate degrees in other disciplines, including computer science, management information systems, or engineering, will usually require one or more foundation courses. Occasionally, a student's work experience may be sufficient to waive one or more of the foundation courses.

Waivers for foundation courses are potentially granted by the graduate program committee upon the recommendation of the faculty member who is responsible for an individual course. Students requesting a waiver for a particular course should be prepared to meet with a faculty member and answer questions in the area of the course. They should bring to the meeting any relevant transcripts, course syllabi, course material, or evidence of practical experience. Some foundation courses may have an option for testing out.

Foundation courses cannot be used to satisfy the 33 semester hours required for the MS in Cybersecurity (CYBR) degree. Students who have not completed all the foundation course requirements may be admitted on a provisional status until those requirements have been completed. All foundation courses must be completed prior to or concurrent with the first six (6) hours of MS in CYBR graduate coursework.

Foundation Requirements

(Nine hours if not waived)

Quality of Work Standards

The Graduate College's Quality of Work Standards shall be applied to foundation courses as well as courses taken as part of the degree program. In particular, the GPC will recommend to the Graduate College that any

1. Student receiving a grade of "C-" or below on any foundation course will be dismissed from the program or, in the case of unclassified or non-degree students, be automatically denied admission.
2. Student receiving a grade of "C+" or "C" in any foundation course will be placed on probation or dismissed from the program.
3. Student not maintaining a "B" (3.0 on a 4.0 scale) average in foundation courses will be placed on probation or dismissed from the program.

Cybersecurity Certificate

School of Interdisciplinary Informatics, College of Information, Science & Technology

Vision Statement

Cybersecurity is the practice of managing information related risks by ensuring confidentiality, integrity, authentication, availability, and non-repudiation of data. In addition to the national interest in cybersecurity, local businesses are increasingly reliant on secure computer infrastructures for their daily operations. A graduate-level certificate is a logical step to

enhance the skill set of local and at-a-distance cybersecurity professionals. Additionally, the certificate program can serve as a feeder into the MS in cybersecurity degree should the students in the certificate choose to continue their graduate education.

Incoming certificate students that do not have a cybersecurity background may also require foundation courses as needed prerequisites, depending on which core courses are selected and depending on the background of the student.

Data Science, MS

College of Arts and Sciences, Business Administration, and Information Science & Technology

Vision Statement

The vision of the Master of Science in data science program is to provide flexible, innovative, and technologically current education to rising data professionals who want to prepare for corporate leadership positions through their functional expertise. The interdisciplinary data science program brings together thought leaders in the fields of business, information technology, mathematics, and other units at UNO, including international university partners and local businesses.

This interdisciplinary graduate program is designed to be completed in 24 months. The curriculum includes course modules on topics that address the following major themes: data organization, manipulation, cleaning, and visualization; data analytics; working with massive amounts of data; dealing with missing and messy data; understanding the value of data and creating data products.

Program-Specific Requirements

Application Deadlines (Spring 2022, and Fall 2022)

- Spring: December 15
- Fall: July 1

Other Requirements

- Minimum GPA of at least 3.0 in undergraduate degree.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or advanced degree from a pre-determined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Resume:** An up-to-date resume with details about all relevant IT experience and skills.
- **Letters of Recommendation:** Three letters of recommendation are required
- **Interview:** A personal, telephone or Skype interview is encouraged, but is optional.
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of the transcript(s).

- UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
- *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

Foundation Courses

Students must have completed basic courses in the following areas, either as an undergraduate student or prior to enrolling in the first data science course.

- Introduction to Programming: one semester of Java, Python, C++, or other approved programming course
- Statistics: one semester of undergraduate statistics

Foundation courses do not count towards the plan of study/degree requirements.

BIOI 8850 SPECIAL TOPICS IN BIOINFORMATICS (3 credits)

This course is intended to provide a mechanism for offering instruction in subject areas that are not covered in other regularly scheduled courses. In general, courses offered under the BIOI 8850 designation will focus on evolving subject areas in bioinformatics.

Prerequisite(s)/Corequisite(s): Course prerequisites of a specific offering of BIOI 8850 will be determined by the supervising faculty member and will be identified in the course proposal. It is anticipated that permission of the faculty member teaching the course will be required.

BMI 8000 ADVANCES IN BIOMEDICAL INFORMATICS (0 credits)

BMI 8000 provides a regular forum for BMI graduate students, where the latest developments in the field of Biomedical Informatics are introduced and discussed. The course also functions as a central communication and collaboration hub for graduate students in BMI. Participation is required.

Prerequisite(s)/Corequisite(s): Students in the MS in BMI and PhD in BMI program may register. Not open to non-degree graduate students.

BMI 8020 ADVANCED COURSE IN BIOINFORMATICS (3 credits)

This is a special topics course designed to explore the research interests of faculty and students. Therefore, topics may include, but are not limited to, such areas of study as next-generational sequencing, biological networks, proteomics, metabolomics, and biomedical informatics.

Prerequisite(s)/Corequisite(s): Admission to the MS/PhD Program in the College of Information Science and Technology, or permission of the instructor. Not open to non-degree graduate students.

BMI 8080 SEMINAR IN BIOMEDICAL INFORMATICS (1-3 credits)

This is a variable-content course that engages students in current research in Biomedical Informatics and develops skills in the oral and written presentation of scientific research.

Prerequisite(s)/Corequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular course offerings.

BMI 8100 INTRODUCTION TO BIOMEDICAL INFORMATICS (3 credits)

This course offers students an overview of the field of biomedical informatics, combining perspectives from computing, biosciences and medicine. The historical development of the field and its influence on biological, clinical, and translational research will be discussed. Issues related to bioinformatics, clinical, bioimaging and public health/population informatics will be explored.

Prerequisite(s)/Corequisite(s): Class standing of senior or above.

BMI 8300 PUBLIC HEALTH GENOMICS (3 credits)

This course will address the biopsychosocial issues that bridge genomics and public health, which are generally considered two vastly different disciplines. The focus will center on understanding how genomics may be incorporated into health promotion and disease prevention efforts for individuals and population.

Prerequisite(s)/Corequisite(s): Class standing of senior or above.

BMI 8400 LINEAR ALGEBRA FOR ADVANCED COMPUTING AND AI (3 credits)

Matrix Analysis and Linear Algebra are at the core of several important algorithms and techniques that are widely used in machine learning for data analytics, imaging informatics, and bioinformatics. The course will explore fundamental concepts of matrix analysis and linear algebra as they apply to machine learning, emphasizing applications over proofs. Students will have an opportunity to perform "pencil and paper" calculations as well as more sophisticated numerical computations using a programming language/statistical environment of their choice. Applications of linear algebra to machine learning in the context of imaging informatics and biomedicine will be covered in depth.

Prerequisite(s)/Corequisite(s): Proficiency in programming and knowledge of calculus are required. Familiarity with concepts from biology is beneficial but not required.

BMI 8540 FOUNDATIONS IN PROGRAMMING FOR BIOMEDICAL INFORMATICS (3 credits)

Foundations in programming, software development, pipeline management, and version control are critical for developing a capable biomedical informatics workforce. This course will provide foundations in programming skills necessary for students with a limited computer science background to develop fluency and basic skills in the concepts of software development for biomedical informatics. Specific topics covered will include Unix/Linux shell programming, Python, databases, Applications Programming Interface (APIs), software versioning, and data management.

Prerequisite(s)/Corequisite(s): Experience with programming in a scripting, database management, or object-oriented programming language is strongly recommended but not required.

BMI 8850 BIOMEDICINE FOR THE NONMEDICAL PROFESSIONAL (3 credits)

This course will cover the basic principles of molecular and cellular biology, human anatomy, physiology, and pathology that are essential to an informed use of biomedical data. The biomedical topics will be interspersed and complemented with discussions about relevant data sources and datasets, emphasizing their strengths and weaknesses, and the lectures will be enriched with virtual anatomical dissections. Reading assignments from the primary literature and multimedia materials will supplement the textbook.

Prerequisite(s)/Corequisite(s): Class standing of senior or above

BMI 8866 BIOINFORMATICS ALGORITHMS (3 credits)

The main objective of this course is to provide an organized forum for students to learn recent developments in Bioinformatics, particularly, from the algorithmic standpoint. The course will present basic algorithmic concepts in Bioinformatics and show how they are connected to molecular biology and biotechnology. Standard topics in the field such as restriction mapping, motif finding, sequence comparison, and database search will be covered. The course will also address problems related to Bioinformatics like next generation sequencing, DNA arrays, genome rearrangements and biological networks. (Cross-listed with BIOI 4860).

Prerequisite(s)/Corequisite(s): CSCI 3320 and BIOL 1450; Or permission of instructor.

BMI 8896 GENETIC SEQUENCE ANALYSIS (3 credits)

The goal of this course is to introduce students to major topics in computerized analysis of genetic sequences. In particular the course will allow students to become familiar with the computational tools and software that aid in the modern molecular biology experiments and analysis of experimental results. Following the completion of this course, it is expected that the students will have a basic understanding of the theoretical foundations of the sequence analysis tools and develop competence in evaluating the output from these tools in a biological context. This course will emphasize hands-on experience with the programs for nucleotide and amino acid sequence analysis and molecular phylogeny.

Prerequisite(s)/Corequisite(s): Permission from the instructor.

BMI 8900 INDEPENDENT RESEARCH IN BIOMEDICAL INFORMATICS (1-3 credits)

The content of the course will vary, however both the student and the faculty member must sign an Independent Research Agreement and file it with the Biomedical Informatics Graduate Program Committee before registration for the course. This agreement will detail the project, the schedule for its completion, the form of the output, the method of evaluation and other relevant information pertaining to the project.

Prerequisite(s)/Corequisite(s): Permission of instructor, and at least 12 hours of course work toward the MS BMI program should be completed.

BMI 8910 INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the Biomedical Informatics graduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s)/Corequisite(s): Students must have completed a minimum of 12 credit hours towards the MS in BMI program. Not open to non-degree graduate students.

BMI 8970 INDEPENDENT STUDY IN BIOINFORMATICS (1-3 credits)

This is a variable-credit course designed for graduate students in bioinformatics who would benefit from independent reading assignments and research-type problems. Independent study enables coverage of topics not taught in scheduled course offerings.

Prerequisite(s)/Corequisite(s): Permission of a supervising faculty member and approval of the Bioinformatics Program Committee Chair. A formal description of the problem area to be investigated, the resources to be used, and the results to be produced must be prepared.

BMI 8990 THESIS IN BIOMEDICAL INFORMATICS (1-6 credits)

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.

Prerequisite(s)/Corequisite(s): Graduate major in BMI and approval of the Thesis Advisory Committee. Not open to non-degree graduate students.

BMI 9900 ADVANCED RESEARCH IN BIOMEDICAL INFORMATICS (1-3 credits)

This course provides a format for exploring advanced research areas for doctoral students in Biomedical Informatics and related fields. Specific topics will vary in keeping with research interest of faculty and students.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Biomedical Informatics. Not open to non-degree graduate students.

BMI 9980 INDEPENDENT RESEARCH IN BIOMEDICAL INFORMATICS (1-3 credits)

This course allows students to research a topic of their interest that is not available in a formal course. The topic to be studied must be agreed upon by the student and the instructor.

Prerequisite(s)/Corequisite(s): Admission to Ph.D. program in Biomedical Informatics and permission of instructor. Not open to non-degree graduate students.

BMI 9990 DISSERTATION (1-12 credits)

The dissertation is an original research project conducted and written under the direction of a faculty dissertation committee supervisory committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge in health or bioinformatics and demonstrate technical mastery of the discipline.

Prerequisite(s)/Corequisite(s): Admission to the Ph.D. program in Biomedical Informatics and candidacy for the Ph.D. degree. Prior to enrolling for dissertation hours, the students must have permission of the supervisory committee. Not open to non-degree graduate students.

BSAD 8000 BUSINESS ETHICS: ACHIEVING SOCIAL RESPONSIBILITY (2 credits)

This core MBA course will explore the relationship between law and ethics, will examine the generally-accepted theoretical principles associated with doing business ethically, and will examine practical ethical issues associated with various facets of business.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent) or admission to the MAcc program. Students with an undergraduate major or a graduate degree in Law may not include this course in a plan of study for the MBA degree. Not open to non-degree students

BSAD 8010 LEGAL, SOCIAL AND ETHICAL ENVIRONMENT (3 credits)

Focus upon law and ethics. Business law, legal processes, and regulation will be the subject matter focus. Business ethics will be a recurring focus of analysis. Analysis of the social environment will include public policy. Both subject matter and analysis will be integrated to build the student's critical thinking skills.

Prerequisite(s)/Corequisite(s): Completion of MBA foundation requirements and BSAD 8060 (BSAD 8060 prior to or concurrent); or admission to the MAcc program. Not open to nondegree students.

BSAD 8020 ENVIRONMENTAL ECONOMICS AND MANAGEMENT (3 credits)

This course covers topics related to environmental economics and policy, with an emphasis on comparative policy analysis and business strategies towards the environment. (Cross-listed with ECON 8020)

Prerequisite(s)/Corequisite(s): Principles of Microeconomics (ECON 2200) and Principles of Macroeconomics (ECON 2220), or Analytical Foundations of Economics (BSAD 8180), or permission of the instructor. Not open to non-degree graduate students.

BSAD 8026 RESEARCH METHODS IN ECONOMICS AND BUSINESS (3 credits)

Covers the methodology of economics: choosing a research topic, literature search tools, data source identification, data summary techniques, basic statistical data analysis using statistical packages, and clear economics writing. The student will become familiar with these techniques through text materials, journal studies, and completion of an empirical economics paper. (Cross-listed with ECON8296.)

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to nondegree students.

BSAD 8030 INFORMATION TECHNOLOGY IN BUSINESS (3 credits)

The premise of this course is that today's managers must learn to use information technology to create competitive firms, manage global corporations and provide useful products and services to customers. Accordingly, the content of this course is focused on use of information technology for competitive advantage. Students will develop case studies of firms who have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application.

Prerequisite(s)/Corequisite(s): Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent). Not open to nondegree students.

BSAD 8040 BUSINESS AND INFORMATION TECHNOLOGY: CONNECTING PEOPLE AND INFORMATION (2 credits)

The premise of this course is that today's managers must learn to use information technology to create competitive firms, manage global corporations and provide useful products and services to customers. Accordingly, the content of this course is focused on use of information technology for competitive advantage. Students will develop case studies of firms who have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in management information systems may not include this course in a plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8050 BUSINESS CONDITIONS ANALYSIS (3 credits)

This course is concerned with the statistical measurement and evaluation of general business conditions, and the adaptation of business policies to changing business conditions. Emphasis is placed upon the practical application of the statistical techniques of analysis to the business situation, within the framework of the aggregate economy.

Prerequisite(s)/Corequisite(s): ECON 2200 or BSAD 8180. Not open to nondegree students.

BSAD 8060 PEOPLE: CULTIVATING SKILLS FOR LEADERSHIP (2 credits)

This course will prepare students with the skills to effectively enact the critical leadership skills of listening, employee feedback and coaching, goal-setting, empowerment/delegation, influencing, interviewing, conflict, negotiation, intercultural awareness, team/group discussions, and business etiquette.

Prerequisite(s)/Corequisite(s): Admission to the MBA program. Not open to non-degree graduate students.

BSAD 8066 HEALTHCARE ANALYTICS FOR BUSINESS (3 credits)

This course will focus on the use of analytics to develop key performance indicators that integrate and evaluate clinical, administrative, and financial performance. Key concepts in this course will include information management, performance metrics, data visualization, and communication of results across the healthcare ecosystem. Specific topics will include health outcomes analysis, financial performance, developing an analytics strategy, data quality and governance, and the four stages of actionable intelligence. (Cross-listed with MGMT 4060, SCMT 4060).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8070 EXECUTIVE COMMUNICATION (1 credit)

This course emphasizes both strategic and practical approaches to business communication from an executive perspective and provides students with tools to improve their business communication skills. This course will focus on composing effective executive/business documents business reports, and briefings.

Prerequisite(s)/Corequisite(s): Enrollment in Executive MBA Program. Not open to non-degree graduate students.

BSAD 8076 INTERNATIONAL LOGISTICS MANAGEMENT (3 credits)

This course will focus on the logistics of international trade and how managers facilitate the flow of goods and services in import and export environments. Students will learn about infrastructure and business practices needed to manage international transportation, communications, services, and regulatory requirements. Students will develop an understanding of international terms of trade, transaction risk management, and location decisions for placement of warehouses and distribution centers. (Cross-listed with SCMT 4070).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8080 BUSINESS FORECASTING (3 credits)

The course will cover forecasting tools and applications applied to business settings. We will cover traditional Econometric forecasting methods in the first half of the class. In the second half of the course, we will focus on models in predictive analytics and machine learning, since these models are quickly becoming critical tools for forecasters in many settings. The course will include lecture and lab time, and labs will be focused on teaching students how to implement the models discussed in lectures. (Cross-listed with ECON 8310).

Prerequisite(s)/Corequisite(s): ECON 8320 (or equivalent programming experience) AND ECON 8300 (or equivalent multivariate regression analysis coursework) or permission of instructor. Not open to non-degree graduate students.

BSAD 8090 ESSENTIAL LEADERSHIP SKILLS (3 credits)

This course will teach students the interpersonal skills necessary to effectively manage others. Second, this course will serve as a vehicle to assess the business content knowledge and computer literacy of incoming MBA students in order to provide customized remediation recommendations for each student. Third, the course will collect information that will be used for assessment and accreditation purposes to evaluate the effectiveness of the MBA program. This course will address the following MBA program themes: communication, change agent, teamwork, information technology, critical thinking and information gathering and analysis.

Prerequisite(s)/Corequisite(s): Admission to the MBA program and completion of MBA foundation courses (or equivalent) or may be taken concurrently with the final foundation course. Not open to nondegree students.

BSAD 8096 PRINCIPLES OF COLLABORATION (3 credits)

Students will work with techniques for team leadership, interpersonal collaboration, consensus-building, creative problem solving, negotiation, facilitation, group process design, collaborative workspace design, and collaboration engineering. Students will gain hands-on experience with collaboration technologies. (Cross-listed with MGMT 4090, ITIN 4090)

Prerequisite(s)/Corequisite(s): Admission to a graduate program at UNO or the STRATCOM Leader Fellow Program. Not open to non-degree students.

BSAD 8100 MANAGERIAL ECONOMICS (3 credits)

The course will offer students tools of analysis drawn from consumer theory and the theory of the firm in order to improve the understanding of human behavior as it is constrained in the context of business decision-making. This course is intended for students who are seeking the degree of Master of Science in Economics or the degree of Master of Business Administration. (Cross-listed with ECON 8210).

Prerequisite(s)/Corequisite(s): ECON 2200 and 2220 or BSAD 8180 and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to nondegree students.

BSAD 8110 ACCOUNTING AND FINANCIAL FUNDAMENTALS (3 credits)

The course is designed to give incoming graduate students the foundation in accounting that is necessary for subsequent graduate courses. Emphasis is on introducing the students to as many accounting concepts as possible.

Prerequisite(s)/Corequisite(s): Graduate admission or permission of the appropriate graduate advisor. This course cannot be used in a plan of study for any graduate program at UNO. Not open to non-degree graduate students.

BSAD 8136 HUMAN RESOURCE MANAGEMENT (3 credits)

This course is a comprehensive review of human resource management concepts and practices. The course is designed to educate future managers and leaders on the importance of utilizing effective human resource methods that comply with federal laws and provide the organization with high-quality talent that provides a competitive advantage. (Cross-listed with MGMT 4030).

BSAD 8146 TOTAL REWARDS (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee compensation and benefit programs. The course is designed to enable future managers and human resource professionals to utilize effective strategies for managing the single largest controllable expense for organizations; employee pay and benefits. (Cross-listed with MGMT 4010).

Prerequisite(s)/Corequisite(s): BSAD 8136 or permission of instructor

BSAD 8150 ECONOMICS: ESSENTIAL CONCEPTS FOR MANAGERS (2 credits)

This course exposes MBA students to fundamental economic concepts necessary for successful business planning and financial success. Topics include: Comparative advantage and international trade, market dynamics, the role that the competitive landscape plays in company decision-making, macroeconomic growth and development, and monetary and fiscal policy and their impact on business activity.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in economics may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8156 TALENT DEVELOPMENT (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee training and development programs to optimize human capital effectiveness in modern organizations. The course is designed to enable future managers and human resource professionals to utilize effective strategies for assessing employee training needs and developing appropriate solutions to maximize talent utilization. (Cross-listed with MGMT 4120).

Prerequisite(s)/Corequisite(s): BSAD 8136 or permission of instructor.

BSAD 8166 STAFFING THE ORGANIZATION (3 credits)

This course is a comprehensive review of issues and techniques related to the acquisition of high-quality human resources for optimal organizational effectiveness. The course is designed to enable future managers and human resource professionals to utilize effective strategies for recruiting, selecting, placing, and integrating new employees into the organization's workforce. (Cross-listed with MGMT 4110).

Prerequisite(s)/Corequisite(s): BSAD 8136 or permission of instructor.

BSAD 8176 EMERGING TRENDS IN SUPPLY CHAIN MANAGEMENT (3 credits)

This course will focus on megatrends influencing supply chain management and design in the 21st century. Key concepts in this course will include contemporary opportunities and challenges in creating customer value via the supply chain with a focus on globalization, sustainability, and risk management. Specific topics will include the influence of the empowered customer on supply chain design, global supply chain trends, and the need for integration of technology and talent to create a competitive advantage. (Cross-listed with SCMT 4170).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8180 ANALYTICAL FOUNDATIONS OF ECONOMICS (3 credits)

To familiarize students with the basic economic theory and policy analysis (principles level) required to analyze economic problems and to understand and evaluate recommendations designed to solve those problems. This is a course for students and professionals seeking a degree of Master of Business Administration with little or no formal background in economics.

Prerequisite(s)/Corequisite(s): Graduate. This course cannot be used in a plan of study for any graduate program at UNO. Not open to non-degree graduate students.

BSAD 8200 MANAGERIAL ACCOUNTING (3 credits)

A study of concepts, analysis and procedures of accounting utilizing internal financial and non-financial data which provides management with information for planning and controlling routine operations, for non-routine decisions, policy-making and long-range planning; and for external reporting to stockholders, governments and interested parties.

Prerequisite(s)/Corequisite(s): ACCT 2010 and 2020 or BSAD 8110, and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to nondegree students.

BSAD 8206 CONSULTATIVE SELLING PRINCIPLES (3 credits)

The primary focus of the Consultative Selling Principles course is to develop the behaviors, methodologies, principles, and processes required to successfully lead and manage complex selling initiatives to a win-win close. The course examines and applies, through role playing and other activities, the critical relationship building, critical thinking, problem solving, listening and negotiating capabilities which are the foundation skills underlying consultative selling. (Cross-listed with MKT 4200)

Prerequisite(s)/Corequisite(s): MKT 3310 with 'C+' or better; MKT 3100 with C+ or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8210 ACCOUNTING: DECISIONS & CONSEQUENCES (2 credits)

Managers and administrators must be able to understand, analyze, and use accounting information to make operational and strategic business decisions. In this course, we will study practical uses of accounting information to address the problems and decisions managers face in business. Emphasis is placed on the user of accounting information rather than the preparer. Upon completion of this course, a student should be able to use accounting information to make management decisions, understand how accounting rules inform those decisions, and consequently, how those decisions affect a company's financial reports.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or graduate degree in accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8216 SELLING FINANCIAL SERVICES (3 credits)

Selling Financial Services concentrates on methods to effectively sell services and products in the financial services industry, including the banking, brokerage and insurance sectors. Targeting, initiating, and acquiring client relationships, expanding business opportunities, and maintaining long-term client relationships are the course's focal points. This integrative course is designed to provide students with a basic understanding of the selling profession and sales culture within the financial services industry. (Cross-listed with MKT 4210, FNBK 4210).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

BSAD 8226 GLOBAL STRATEGIC ACCOUNT MANAGEMENT (3 credits)

Throughout this course, the management of strategic account programs at national, multi-country, and global levels will be addressed. The primary focus of the curriculum is on the critical success factors for driving revenue, sustainable long term-growth and profitability with a base of core strategic buyers.

Prerequisite(s)/Corequisite(s): Senior or graduate student standing and permission of the instructor. Not open to non-degree graduate students.

BSAD 8230 CHANGE MANAGEMENT (2 credits)

This course provides a theoretical as well as pragmatic approach to change management for executive and senior level leaders in all types of organizations. Focus is given to organizational structure, managing culture, and critical components of senior level management effectiveness in leading change.

Prerequisite(s)/Corequisite(s): Enrollment in the Executive MBA program. Not open to non-degree graduate students.

BSAD 8240 EXECUTIVE LEADERSHIP DEVELOPMENT (2 credits)

This course aims to enhance the leadership effectiveness of students by developing executive competencies in problem solving, collaborative behaviors, teamwork, and conflict resolution. Students will gain crucial experience in using effective leadership tools to become leaders who act with a deeper understanding of themselves, their organizations, and their communities, and contribute positively to the growth of each.

Prerequisite(s)/Corequisite(s): Enrollment in UNO's Executive MBA program. Not open to non-degree graduate students.

BSAD 8250 ORGANIZATIONAL BEHAVIOR: ENHANCING HUMAN & ORGANIZATIONAL CAPABILITIES (2 credits)

This course will prepare students with the knowledge necessary to manage and lead organizations effectively. Students will learn management theories, understand important research findings in organizational behavior, and apply both theory and research results to real organizational situations, thus giving them the capacity to use OB theories to enhance organizational effectiveness.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in management may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8260 ACCOUNTING THEORY & PRACTICE (2 credits)

This course is designed to enhance students' understanding of financial statements and how executive decisions can influence these statements. Financial statements, including footnotes and explanatory material, are the primary instruments utilized by parties external to the enterprise in making judgments about the enterprise. By understanding how management decisions are reflected in the financial statements, managers will understand how they can influence their judgment.

Prerequisite(s)/Corequisite(s): Enrollment in UNO's Executive MBA program. Not open to non-degree graduate students.

BSAD 8280 STEWARDSHIP OF THE FIRM'S RESOURCES: HUMAN RESOURCE MANAGEMENT (2 credits)

This course provides a comprehensive review of effective human resource theory and practice with an emphasis on managerial influence on attracting, retaining, developing, and rewarding employees.

Prerequisite(s)/Corequisite(s): Admittance to the Executive MBA Program. Not open to nondegree students.

BSAD 8300 ORGANIZATION THEORY & DESIGN (3 credits)

A study of theories and guidelines for enhancing organizational effectiveness by matching an organization's structure to its environment, strategy, technology and size.

Prerequisite(s)/Corequisite(s): Graduate. Not open to nondegree students.

BSAD 8310 MANAGING PERFORMANCE IN ORGANIZATIONS (3 credits)

A human behavior course emphasizing the areas of individual behavior, interpersonal behavior, group behavior and the interplay of human and non-human factors.

Prerequisite(s)/Corequisite(s): Essential Leadership Skills (BSAD 8060) or admission to the MAcc program. Not open to nondegree students.

BSAD 8326 SALES MANAGEMENT (3 credits)

The student will be exposed to current research findings in sales management and to business cases and simulations where sales management theories and concepts will be applied. This course will prepare students to develop and implement specific compensation, motivation, and evaluation strategies for managing sales professionals across a wide variety of organizations. (Cross-listed with MKT 4320.)

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8330 STRATEGIC COLLABORATION: LEADING HIGH IMPACT TEAMS (1 credit)

This course is designed to enhance students' understanding of collaboration principles, practices and processes. In this interactive course, students will learn how to utilize collaboration tools and techniques and creative problem solving methods to enhance strategic decision making. Other concepts that will be introduced include building and assessing high-performing teams, managing and leading teams, identifying and resolving team dysfunctions, and team decision making approaches. Ultimately, students will learn how to be more influential and improve interactions so people and organizations can work together more efficiently.

Prerequisite(s)/Corequisite(s): Enrollment in Executive MBA Program. Not open to non-degree graduate students.

BSAD 8336 PROJECT MANAGEMENT (3 credits)

This course will focus on the planning and execution of complex projects within an organization. Students will learn how to conduct stakeholder analysis, plan the scope of a project, develop a project budget, lead a project team, and define the steps necessary to bring a complex project to a successful conclusion. Students will recognize how the strategy, structure, and culture of an organization can be used to identify and prioritize complex projects. (Cross-listed with MGMT 4330, SCMT 4330)

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program; or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8340 INTERNATIONAL BUSINESS STUDY ABROAD (3 credits)

This course provides students with an international business and cultural experience through a study tour in a selected international location. Students will develop an understanding of the factors that affect international business decisions by visiting American companies operating abroad and foreign companies that export goods and services to the U.S. Typically, travel is conducted during Spring Break.

Prerequisite(s)/Corequisite(s): Instructor Permission. Not open to non-degree graduate students.

BSAD 8345 CONSUMER BEHAVIOR (3 credits)

Consumers purchase, use, experience, and dispose of products and services as part of their consumption process. How and why consumers choose various brand options, form judgments about these brands, and decide which options to buy and/or re-buy are essential knowledge for marketing professionals. The course covers the psychological and social issues that guide consumption decisions. (Cross-listed with MKT 3320).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8350 SEMINAR IN MANAGEMENT (3 credits)

A student participation course emphasizing current issues and problems in the areas of management theory and operation.

Prerequisite(s)/Corequisite(s): Graduate. Not open to non-degree students.

BSAD 8356 GLOBAL SOURCING AND INNOVATION (3 credits)

This course focuses on global suppliers as partners in the development and commercialization of new products. Students will learn about open innovation and the integration of internal and external business systems in new product innovation. Students will develop an understanding of regulatory policies related to information sharing and the intellectual property rights of buyers and suppliers. (Cross-listed with SCMT 4350).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8360 FINANCIAL MANAGEMENT FOR EXECUTIVES (3 credits)

Students will develop strategic decision making skills by using financial concepts including time value of money, capital budgeting processes, cash flow forecasting and project risk analysis. Topics covered include: capital budgeting, financial statement analysis, capital structure, financial risk analysis and others..

Prerequisite(s)/Corequisite(s): Enrollment in the Executive MBA program. Not open to non-degree graduate students.

BSAD 8366 E-MARKETING (3 credits)

This course focuses on utilizing the Internet as a marketing platform. Course content includes discussion of how the Internet is used by businesses for designing products, pricing, promotions, distribution, positioning, gathering information, and cultivating relationships with stakeholders. The discussion about the rise of social media, sharing economy, virtual reality devices, and other relevant trends will also be part of the course. (Cross-listed with MKT 4360).

Prerequisite(s)/Corequisite(s): BSAD 8400 with a grade of 'B' or above. Not open to non-degree graduate students.

BSAD 8370 BUSINESS LAW AND ETHICS (2 credits)

Only students who have been admitted to the Executive MBA program may take this course. A comprehensive examination of the existing structure and mechanisms used to resolve disputes in the United States, which allows the student to understand the strengths and weaknesses of this system. It will specifically examine the body of substantive law that affects management, including court decisions, statutes (federal and state), traditional ethical theories as they relate to the law, and international problems that exist in the legal environment.

Prerequisite(s)/Corequisite(s): Enrollment in Executive MBA Program. Not open to non-degree graduate students.

BSAD 8376 SUPPLY CHAIN ANALYTICS (3 credits)

This course focuses on integrating supply chain management through the use of key performance indicators. Key concepts in this course include data visualization, supplier performance metrics, service-dominant logic, and the supply chain for data. Specific topics include the influence of the empowered customer on supply chain metrics, using metrics to develop a competitive advantage, data-driven decision making, and the four stages of actionable intelligence. (Cross-listed with SCMT 4370).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8380 STRATEGIC OPERATIONS MANAGEMENT (2 credits)

Students will learn how effective decision-making skills can be used to create a long-term competitive advantage for an organization through operational excellence. Key concepts in this course will include operations management, quality management, and data analytics. Specific topics will include process improvement, quality assurance, supply chain management, project management, and performance assessment.

Prerequisite(s)/Corequisite(s): Enrollment in UNO's Executive MBA program. Not open to non-degree graduate students.

BSAD 8386 INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT (3 credits)

This course will focus on the strategic procurement of products and services in order to gain a competitive advantage through integrated supply management. Students will learn about strategic supply management, contract negotiation, and supplier quality management. Students will develop an understanding of supplier performance management through the use of supply chain information systems. (Cross-listed with MKT 4380, SCMT 4380)

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8396 MARKETING ANALYTICS (3 credits)

This course focuses on the application of data analytics in marketing decision making (e.g., segmentation, sales forecasting, and resource allocation). Students will learn to apply statistics and econometrics to solve marketing problems. Key topics in this course include marketing data visualization, marketing metrics, descriptive and predictive analytics, and digital marketing analytics. This course takes a very hands-on approach with real-world databases and equips students with tools that can be used immediately on the job. (Cross-listed with MKT 4370).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8400 MARKETING POLICIES (3 credits)

This course provides an introduction to the fundamental concepts of marketing, including a customer orientation, matched with attention to competition and core strengths. The course will illustrate strategies and principles that will help you understand how marketing managers, product managers or service managers must think through their situations, determine their goals and lay a course to achieve those goals.

Prerequisite(s)/Corequisite(s): Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent); or admission to MAcc program. Not open to nondegree students.

BSAD 8420 MARKETING: UNDERSTANDING CONSUMERS AND MARKETS (2 credits)

This course exposes MBA students to the fundamental concepts, practices and issues of marketing. A wide range of marketing practices and structures will be explored including product and service firms, consumer and business markets, profit and not-for-profit organizations, domestic and global companies, and small and large businesses.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in marketing may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8426 BUSINESS DEMOGRAPHICS (3 credits)

The goal of this course is to develop a demographic perspective in order to assist in understanding the business environment and business policy. How population change impacts consumer markets and all of the functions (for example, accounting, finance and management) that must exist for these markets to perform. Includes a history of population change and policy as well as a view toward international population considerations. (Cross-listed with MKT 4420).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8430 STRATEGIC BRAND MANAGEMENT (3 credits)

An exploration of the characteristics, meanings, and management of brands in the business world. The course examines brands as a strategic asset, and draws on managerial, consumer, and cultural perspectives.

Prerequisite(s)/Corequisite(s): BSAD 8420 or permission of instructor. Not open to nondegree students.

BSAD 8440 DECISION ANALYTICS (2 credits)

Students will learn to use statistical and decision making tools to interpret data to solve practical management problems and gain desired results. Areas of focus will include market research, decision analysis, data analytics, and business forecasting.

Prerequisite(s)/Corequisite(s): Enrollment in Executive MBA Program. Not open to non-degree graduate students.

BSAD 8450 SEMINAR IN MARKETING (3 credits)

Exploration, study and critical analysis of contemporary marketing problems, trends, methods and approaches for seminar discussion and written report.

Prerequisite(s)/Corequisite(s): Graduate. Not open to nondegree students.

BSAD 8456 MANAGERIAL NEGOTIATION STRATEGIES (3 credits)

This course introduces students to the theory and practice of negotiation. The ability to negotiate successfully rests on a combination of analytical and interpersonal skills. In this course we will develop a set of conceptual frameworks that should help students better analyze negotiations in general and prepare more effectively for future negotiations in which they may be involved. This course is designed to help students better understand the theories, processes, and practices of negotiation, as well as conflict resolution and relationship management so that students can be more effective negotiators in a wide variety of situations. (Cross-listed with MGMT 4450, SCMT 4450).

BSAD 8466 SUPPLY CHAIN INTEGRATION (3 credits)

This course will focus on the integration of internal and external systems designed to maximize the efficiency and effectiveness of supply chain networks developed by industrial organizations, government agencies, and not-for-profit organizations. Key concepts will include supply chain design, trends in technology, and cross-functional collaboration, coordination, and communication along the value chain. Specific topics will include the influence of empowered customers on supply chain integration, global supply chain trends, closed-loop supply chains, and the challenges and benefits of integrating technology and talent in the workplace. (Cross-listed with SCMT 4460).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8480 APPLICATIONS IN ECONOMICS (2 credits)

Students will learn how to apply micro-economic concepts to corporate strategy. Topics covered include demand analysis and consumer behavior, cost efficiencies such as economies of scale and scope, market structure and strategic pricing, applications of game theory to strategy, and others. The course will also cover macroeconomic conditions and concepts that affect business decisions such as the detection, measurement, and determinants of business cycles and the resulting impact of macroeconomic policy.

Prerequisite(s)/Corequisite(s): Admittance to the Executive MBA Program. Not open to nondegree students.

BSAD 8510 SECURITY ANALYSIS (3 credits)

Study of the efficient market, fundamental and technical analysis approaches for the valuation of marketable securities. Methods of analysis are considered for the economy, industry groups and individual corporations.

Prerequisite(s)/Corequisite(s): BSAD 8500. Not open to nondegree students.

BSAD 8520 SEMINAR INVESTMENT MANAGEMENT (3 credits)

This course focuses upon the modern portfolio theory of investment management and its application in formulation of policies for individuals and institutional investors. Topics addressed will include qualitative and quantitative analysis of the risks and returns of portfolio management using efficient market, fundamental analysis, and technical analysis approaches.

Prerequisite(s)/Corequisite(s): BSAD 8510. Not open to nondegree students.

BSAD 8530 BANK & FINANCIAL MARKETS (3 credits)

This course focuses on the theory and practice in managing commercial banks. Topics covered include but not limited to: bank regulations, bank performance analysis, asset liability management, credit analysis and consumer loans. The course emphasizes the link between theory and practice through assigned course related readings, guest lecturers from industry experts, and a comprehensive bank research project on a local bank of your choice. At the end of the course, students should have a good understanding of basic banking theories as well as banking practices, and current issues and challenges facing the banking industry.

Prerequisite(s)/Corequisite(s): BSAD 8500. Not open to non-degree graduate students.

BSAD 8540 MULTINATIONAL FINANCIAL MANAGEMENT (3 credits)

The focus of this course is on multinational financial management as viewed and practiced by the multinational firm and on current developments in international financial markets, including global banking. Familiarity with certain areas of the firm's environment, such as the international monetary system, the European Monetary System, and determination of exchange rates under alternative regimes, is essential to the international financial manager.

Prerequisite(s)/Corequisite(s): BSAD 8500. Not open to nondegree students.

BSAD 8550 SEMINAR IN FINANCE (1-3 credits)

Selected topics from areas of business finance.

Prerequisite(s)/Corequisite(s): BSAD 8500. Not open to nondegree students.

BSAD 8560 MARKETING STRATEGIES (3 credits)

Marketing is the core of an operating business. Marketing is the art and science of creating customer value and market place exchanges that benefit the organization and its stakeholders. It is an organizational philosophy and a set of guiding principles for interfacing with customers, competitors, collaborators, and the environment. Students will learn how successful businesses match their objectives and resources with opportunities in the marketplace by identifying and measuring consumer needs, determining target markets and deciding which products and services to offer. Strategies for pricing, promoting and distributing the firm's products and services to create competitive advantage in domestic and international markets are covered.

Prerequisite(s)/Corequisite(s): Enrollment in UNO's Executive MBA program. Not open to non-degree graduate students.

BSAD 8570 STRATEGIC MANAGEMENT (3 credits)

This course centers around the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. Students will develop the strategic thinking skills needed to formulate and execute successful strategies for firms/organizations in a variety of industries and dynamic environments. Emphasis is given to the contributions of several business disciplines of study, such as marketing, finance and management, to understanding both the internal operations of the organization and the influences of the external environment. This course is integrative and introduces both the theory and practice that enables that integrative process.

Prerequisite(s)/Corequisite(s): Enrollment in UNO's Executive MBA program. Not open to non-degree graduate students.

BSAD 8576 INVESTMENT MANAGEMENT FOR FINANCIAL ANALYSTS (3 credits)

This course provides critical knowledge needed for students pursuing a career in investment management. The topic areas bridge academic theory, current industry practice, and ethical and professional standards and comprehensively address the areas assessed in the Chartered Financial Analyst examinations. (Cross-listed with FNBK 4570)

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

BSAD 8590 SEMINAR IN BUSINESS ADMINISTRATION (3 credits)

This course hosts the international business consulting project. Both a theory and a practical course, it examines opportunities and challenges for a domestic U.S. firm or industry attempting to enter or expand its presence in an international market. Emphasis is placed on developing focused and appropriate research objectives, the collection and analysis of data for decision-making, development and evaluation of strategy alternatives, and on the production and presentation of a professional, prescriptive consulting report.

Prerequisite(s)/Corequisite(s): Admittance to the Executive MBA Program. Not open to nondegree students.

BSAD 8596 RISK MANAGEMENT FOR BUSINESS MANAGERS (3 credits)

An analysis of risk management techniques for handling the risk exposures most businesses face, including insurance, self insurance, risk control, and risk avoidance, among others. (Cross-listed with FNBK 4590.)

BSAD 8600 REAL ESTATE FINANCE THEORY AND APPLICATIONS (3 credits)

This course explores advanced financial analysis tools and methodologies used to quantify complex factors surrounding real estate productivity, value, investment, and project feasibility. Specific course topics will coincide with student interest in one of three focus areas: Investment, Development, or Commercial Finance.

Prerequisite(s)/Corequisite(s): RELU 3410 and BSAD 8630, or permission of Real Estate Program Director.

BSAD 8605 REAL ESTATE CONCEPTS AND APPLICATIONS (3 credits)

Upper-level survey course in real estate principles, concepts, and their applications. The course will familiarize students with industry terminology, current practices, and cover the following topics: Licensure, property rights, legal descriptions, real estate law and contracts, appraisal, financing, investments, Fair Housing, and related topic areas. NOTE: Students cannot receive credit for both RELU 2410 and RELU 3410. (Cross-listed with RELU 3410).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program, or permission of Real Estate Program Director.

BSAD 8606 FINANCIAL RISK MANAGEMENT (3 credits)

The course provides students with an intermediate level analysis of financial derivatives, and the use of these instruments for managing risk in financial institutions. (Cross-listed with FNBK 4600.)

Prerequisite(s)/Corequisite(s): BSAD 8500 and 8510 or their equivalent, and graduate standing. Not open to nondegree students.

BSAD 8610 REAL ESTATE APPRAISAL (3 credits)

This course addresses the fundamentals of real estate valuation and appraising, including factors affecting value, valuing land, improvements, and special classes of residential property, appraisal practice and rules, depreciation and obsolescence, and the mathematics of appraising.

Prerequisite(s)/Corequisite(s): RELU 3410 and BSAD 8630, or permission of instructor.

BSAD 8620 VALUATION OF INTELLECTUAL PROPERTY (3 credits)

Intellectual Property (IP) is critical to business success. Accounting, economics, and finance all struggle to quantify "value" of individual IP (e.g., trademark) and bundles of IP (e.g., patent pool). Value depends on the context (e.g., infringement versus depreciation versus sale). This course focuses on application of theory.

Prerequisite(s)/Corequisite(s): BSAD 8010 or BSAD 8100 or BSAD 8110 or BSAD 8500, or its equivalents. Not open to non-degree graduate students.

BSAD 8630 FINANCE: UNDERSTANDING CAPITAL AND CASH (2 credits)

As a comprehensive introduction to financial management, the course will cover various fields of finance and discuss topics including the time value of money, bond and stock valuation, capital budgeting.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070, 8150 and 8210. Students with an undergraduate major or a graduate degree in finance or accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8640 IT: STRATEGIC DEVELOPMENT AND DEPLOYMENT (1 credit)

Students will gain a strategic perspective of information technology management, including current trends and best practices, and understand how technology can be used in competitive positioning. Processes for innovation and research and development spending and new business models will be covered.

BSAD 8650 INTERNATIONAL: COMPETING IN GLOBAL MARKETS (2 credits)

This course allows students to develop an understanding of the evolution of the global political economy, challenges faced when operating in the global business environment, and how to evaluate the risks and returns of global expansion. Students will also learn how to effectively communicate in international settings, to successfully manage international conflicts, and to conduct effective cross-border business negotiations.

Prerequisite(s)/Corequisite(s): Enrollment in the Executive MBA Program. Not open to non-degree graduate students.

BSAD 8696 EMERGING TECHNOLOGY AND INNOVATION (3 credits)

This course equips entrepreneurially-minded students with a more complete range and vision of the viability of various startup opportunities (with a specific focus on innovative technologies and innovative business models). Students will become familiarized with the new and emerging technologies and innovations that define modern industries and product categories, as well as the various shifts in the way cutting-edge business gets done, regardless of industry. (Cross-listed with ENTR 4690, MGMT 4690).

Prerequisite(s)/Corequisite(s): Admission to a UNO graduate degree program or permission of instructor

BSAD 8700 BUSINESS ANALYTICS: MAKING SENSE OF DATA (2 credits)

The purpose of this course is to provide business managers with an understanding of the important role data analytics has assumed in today's organizations. Data analytics has become a key component in accomplishing strategic and operational goals. This course is designed to familiarize students with the concepts and principles of analytics. It is targeted for graduate or MBA students who have little or no background in analytics. Therefore, it focuses on breadth of coverage rather than depth in any specific area.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent); or admission to the MAcc program. Not open to non-degree graduate students.

BSAD 8710 SUPPLY CHAIN MANAGEMENT (3 credits)

This course will focus on supply chain management as a key functional area of organizational success. Students will learn about current techniques used by supply chain practitioners to make strategic and tactical decisions that support the overall strategy and day-to-day operations of an organization. Students will develop an understanding of how supply chain decisions and appropriate metrics of performance can be utilized to improve the operational efficiency and effectiveness of an organization.

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8720 STRATEGIC FINANCIAL MANAGEMENT (2 credits)

This course is intended to be advanced financial management. It will stress the theory and application of topics including, but not limited to capital budgeting, cash flow estimation, real options, capital structure, dividends and share repurchases, working capital management, budgeting, planning and forecasting, and lease management. The material covered in Strategic Financial Management will increase the student's knowledge of how to strategically manage financial resources to increase the intrinsic value of the organization.

Prerequisite(s)/Corequisite(s): For MBA students, BSAD 8630. For MAcc students, completion of all Master of Accounting (MAcc) foundation courses. Not open to non-degree graduate students.

BSAD 8726 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with ENTR 4720, ITIN 4720, ITIN 8256, MGMT 4720, MKT 4720).

Prerequisite(s)/Corequisite(s): Admission to a graduate program or by instructor permission

BSAD 8736 ECONOMICS OF ENTREPRENEURSHIP (3 credits)

This course will review economic theories of entrepreneurship with special emphasis on Schumpeter's theory of creative destruction. The main focus of the seminar will be on the "high-level" entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 4730, ECON 8436)

Prerequisite(s)/Corequisite(s): ECON 2200 or permission of the instructor for all students

BSAD 8750 TELECOMMUNICATIONS IN BUSINESS (3 credits)

This course is designed to introduce students to basic technology of modern telecommunications, including voice, data and video, as well as the contemporary issues of telecommunication policy. In addition, the course will address managerial issues of modern telecommunications in business.

Prerequisite(s)/Corequisite(s): Graduate. Not open to non-degree graduate students.

BSAD 8766 SELLING IN AN ENTREPRENEURIAL CONTEXT (3 credits)

Successful entrepreneurs are able to identify unmet needs in the marketplace and then design and sell products or services that fulfill those needs. Sales effectiveness is essential for entrepreneurs because they must be able to build sustainable sales pipelines that ensure profitable growth as other pressing issues such as financing, staffing, product development are addressed. This course will focus on consultative solution-based sales fundamentals that can be applied in the entrepreneurial selling environment. (Cross-listed with ENTR 4760, MKT 4760)

Prerequisite(s)/Corequisite(s): GPA 2.5 or better; MKT 3100 with a 2.5 grade or better; MKT 3310 with a 2.5 grade or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8776 INTRODUCTORY MAVERICK VENTURE FUND (1 credit)

This course teaches the basics of venture capital, including, the topics of term sheets, due diligence and learning the perspectives of the entrepreneur and investor. Students in this course have the opportunity to observe more advanced students making investments, ranging from 5,000 dollars to 10,000 dollars plus. This course is the first of three, one-credit courses where students gain more advanced venture funding knowledge and application at each level. (Cross-listed with ENTR 4770).

Prerequisite(s)/Corequisite(s): This course requires instructor approval. Students must apply and interview to take this course. Preference is given to students in their junior year, and must have three semesters of school left before graduating.

BSAD 8786 INTERMEDIATE MAVERICK VENTURE FUND (1 credit)

In this course, students source deals, listen to pitches, and select start-ups to be funded. Investments typically range from 5,000 dollars to 10,000 dollars plus. This course is the second in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4780).

Prerequisite(s)/Corequisite(s): This course requires instructor approval. Students must have completed BSAD 8776 with a grade of C or better.

BSAD 8796 ADVANCED MAVERICK VENTURE FUND (1 credit)

This course applies advanced concepts of venture capital. Students will learn how to monitor and assist start-ups in the scaling process. Students learn how to leverage community partners to amplify investment opportunities. This course is the third in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4790).

Prerequisite(s)/Corequisite(s): This course requires instructor approval. Students must have completed BSAD 8786 with a grade of C or better.

BSAD 8800 MBA PROJECT-FOCUSED CAPSTONE (2 credits)

In this Master's of Business Administration (MBA) required project-focused capstone course, students complete a service-learning consulting project for a non-profit or other type of organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program.

Prerequisite(s)/Corequisite(s): Students must complete this course in the final semester or within the final 9 credits of their MBA program courses. A minimum B grade required to successfully complete the course and qualify for graduation. Not open to non-degree graduate students.

BSAD 8810 APPLIED STRATEGIC LEADERSHIP (3 credits)

Applied and integrative course in the MBA program, with an emphasis on field experiences when possible.

Prerequisite(s)/Corequisite(s): Concurrent enrollment in, or completion of, BSAD 8060. Not open to nondegree students.

BSAD 8820 SUSTAINABLE BUSINESS PRACTICES (1 credit)

This course exposes students to motivations for, and implications of business engagement in, sustainable management practices. As such the course addresses why firms have increasingly been investing in energy and natural resource conservation, recycling, green products, green branding, and environmental impact mitigation. This course addresses a firm's market-based incentives to grow profits, gain market share and/or otherwise differentiate themselves from their competition through green initiatives.

Prerequisite(s)/Corequisite(s): BSAD 8150 or permission of instructor. Not open to non-degree graduate students.

BSAD 8830 STRATEGY: DEVELOPING SUSTAINABLE COMPETITIVE ADVANTAGE (2 credits)

This course centers on the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. The primary objective of this course is to sharpen the ability of students to think strategically, to diagnose situations from a strategic perspective and to develop creative solutions to enable firms to achieve a sustainable competitive advantage.

Prerequisite(s)/Corequisite(s): Students must successfully complete BSAD 8150 and BSAD 8210 before enrolling in this course. This course must be taken within the first 20 hours of the MBA program. Not open to non-degree graduate students.

BSAD 8880 ARTS AND THE EXECUTIVE (3 credits)

The course will provide the graduate student with an understanding of the organizational and managerial issues involved in an arts organization as the role of the arts in the business community.

Prerequisite(s)/Corequisite(s): Graduate. Not open to nondegree students.

BSAD 8900 INDEPENDENT STUDY (1-6 credits)

Individual research in an academic area in business administration.

Prerequisite(s)/Corequisite(s): Graduate and permission of MBA Advisor. Requires submission of completed Independent Study Contract to MBA Advisor prior to registration. Not open to non-degree graduate students.

BSAD 8910 SPECIAL TOPICS IN BUSINESS (1-3 credits)

May be repeated up to (6). A series of special courses each designed to focus on current major topics and developments in a specific area of economics or business, scheduled as a workshop or seminar according to purpose.

Prerequisite(s)/Corequisite(s): Graduate in good standing and as indicated for specific workshop or seminar. Not open to non-degree graduate students.

BSAD 8916 SPECIAL TOPICS IN ECONOMICS (1-3 credits)

(May be repeated up to 6) A series of special courses each designed to focus on current major topics and developments in a specific area of economics or business, scheduled as a workshop or seminar according to purpose. (Cross-listed with ECON 8916, ECON 4910).

Prerequisite(s)/Corequisite(s): Graduate student in good standing or advanced undergraduate student and as indicated for specific workshop or seminar.

BSAD 8990 THESIS (1-6 credits)

A research project, under the supervision of a faculty thesis adviser in the College of Business Administration, in which the student establishes his capacity to design, conduct and complete an independent, scholarly investigation of a high order of originality. The research topic and the completed project must be approved by the student's faculty thesis adviser and two other faculty members, one of whom must be from outside the program area.

Prerequisite(s)/Corequisite(s): Permission of graduate adviser. Not open to non-degree graduate students.

CSCI 8000 ADVANCED CONCEPTS IN PROGRAMMING LANGUAGES (3 credits)

Logic/Declarative programming is an important programming paradigm in which problems are described in terms of the properties they possess. As a result, in this style of programming many algorithmic elements, which explicitly must be articulated when writing programs in other programming languages, can be omitted. Core elements of logic programming play important roles in AI.

Prerequisite(s)/Corequisite(s): CSCI 3320; CSCI 3660; CSCI 4220. Not open to non-degree graduate students.

CSCI 8010 FOUNDATIONS OF COMPUTER SCIENCE (3 credits)

This is a foundational course for students enrolled in the graduate program in computer science. The objectives are to introduce students to a large body of concepts so that they are better prepared for undertaking the core courses in the graduate program. It is assumed that student would have programmed in a high-level language and have exposure to basic college level mathematical concepts such as logarithms, exponents, sequences, and counting principles.

Prerequisite(s)/Corequisite(s): Students are expected to have written programs using a high-level programming language and should understand basic mathematical concepts including exponents, logarithms, sequences, and counting principles. Not open to non-degree graduate students.

CSCI 8016 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with MATH 4010, MATH 8016, CSCI 4010).

Prerequisite(s)/Corequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

CSCI 8040 LARGE SCALE NETWORK ANALYSIS ALGORITHMS (3 credits)

The course will provide a review of the properties of large complex network systems, such as those occurring in social networks, epidemiology and biological systems. We will discuss algorithms to analyze these properties, their implementations, their stability under information fluctuation and how information spreads through networks.

Prerequisite(s)/Corequisite(s): Students should be comfortable w/ programming, have knowledge of data structures, preliminary graph algorithms, & linear algebra. Suggest Prep Courses: CSCI 4150 or CSCI 8156; CSCI 3320; MATH 4050 or Permission. Not open to non-degree graduate students.

CSCI 8050 ALGORITHMIC GRAPH THEORY (3 credits)

Review of the basic concepts of graph theory. Introduction to perfect graphs and their characterizations. Main classes of perfect graphs and their properties. Algorithms for main problems of perfect graphs. Applications of perfect graphs in several fields such as scheduling, VLSI and communication networks. (Cross-listed with MATH 8050).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and MATH 4150 or MATH 8156 or permission of instructor. Not open to non-degree graduate students.

CSCI 8060 ALGORITHMIC COMBINATORICS (3 credits)

This course includes classical combinatorial analysis graph theory, trees, network flow, matching theory, external problems, and block designs. (Cross-listed with MATH 8060).

Prerequisite(s)/Corequisite(s): MATH 3100, CSCI 3100, MATH 8105 or CSCI 8105 or instructor's permission.

CSCI 8080 DESIGN AND ANALYSIS OF ALGORITHMS (3 credits)

The course provides students an understanding of advanced topics in algorithms. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, dynamic programming, greedy algorithms, graph algorithms, and the theory of NP-Completeness. (Cross-listed with MATH 8080).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 or equivalent. Not open to non-degree graduate students.

CSCI 8100 EXPERT SYSTEMS (3 credits)

A study of the theoretical basis and practical design of expert systems. Knowledge engineering. Foundations in logic programming, the architecture of expert systems, languages (Prolog, LISP) for expert systems, expert system shells, knowledge acquisition, current issues.

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456 or equivalent. Not open to non-degree graduate students.

CSCI 8105 APPLIED COMBINATORICS (3 credits)

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with MATH 8105, MATH 3100, CSCI 3100).

CSCI 8110 ADVANCED TOPICS IN ARTIFICIAL INTELLIGENCE (3 credits)

An in-depth study of one or more topics selected from: search techniques, knowledge representation, knowledge programming, parallel processing in Artificial Intelligence, natural language processing, image processing, current and future directions, etc. May be repeated with different topics, with permission of adviser.

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456 or equivalent.

CSCI 8150 ADVANCED COMPUTER ARCHITECTURE (3 credits)

Various parallel architectures, models of parallel computation, processor arrays, multiprocessor systems, pipelined and vector processors, dataflow computers and systolic array structures.

Prerequisite(s)/Corequisite(s): CSCI 4350, CSCI 4500 and graduate. Not open to non-degree graduate students.

CSCI 8156 GRAPH THEORY & APPLICATIONS (3 credits)

Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 4150, MATH 4150, MATH 8156).

Prerequisite(s)/Corequisite(s): MATH 2030 or permission of instructor.

CSCI 8160 INTRODUCTION TO VLSI DESIGN (3 credits)

Introduction to the principle concepts of integrated circuit layout. Presentation of the hardware foundations, algorithmic mathematical and graph theoretical foundations of circuit layout. Partitioning problems in integrated circuits. Placement and floor planning phase in layout. Routing algorithms and compaction techniques. Applications of graph theory in several steps of the design process of VLSI circuits.

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and CSCI 4350 or CSCI 8356. Not open to non-degree graduate students.

CSCI 8170 VLSI TESTING (3 credits)

This course covers topics in VLSI testing. In particular, topics covered include fault modeling, fault simulation, test generation, testability profiles, built-in tests, and binary decision diagrams.

Prerequisite(s)/Corequisite(s): Bachelors degree and permission from the Graduate Program Committee; CSCI 4350. Not open to non-degree graduate students.

CSCI 8200 INTERCONNECTION NETWORKS (3 credits)

This course is to introduce the technology of interconnection networks from topology of networks, through routing and flow control, to a discussion of hardware/software fault tolerance, and to understand parameters affecting performance.

Prerequisite(s)/Corequisite(s): Bachelors degree and permission from the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8210 ADVANCED COMMUNICATIONS NETWORKS (3 credits)

Advanced study of communication networks, analysis of communication needs, special problems encountered in different types of networks, efficiency and traffic analysis and emerging hardware software technologies. Detailed "hands-on" study of the TCP/IP networking protocols.

Prerequisite(s)/Corequisite(s): CSCI 3550 or 8555 or equivalent. Not open to non-degree graduate students.

CSCI 8256 HUMAN COMPUTER INTERACTION (3 credits)

Human computer interaction is concerned with the joint performance of tasks by humans and machines; human capabilities to use machines (including learnability of interfaces); algorithms and programming of the interface; engineering concerns that arise in designing and building interfaces; the process of specification, design, and implementation of interfaces; and design trade-offs. (Cross-listed with CSCI 4250).

CSCI 8266 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, ITIN 4260, ITIN 8266).

CSCI 8300 IMAGE PROCESSING AND COMPUTER VISION (3 credits)

This course introduces the computer system structures and programming methodologies for digital image processing and computer vision. The course will cover the mathematical models of digital image formation, image representation, image enhancement and image understanding. Techniques for edge detection, region growing, segmentation, two-dimensional and three-dimensional description of object shapes will be discussed. The course will concentrate on the study of knowledge-based approaches for computer interpretation and classification of natural and man-made scenes and objects.

Prerequisite(s)/Corequisite(s): CSCI 1620 and CSCI 3220. Not open to non-degree graduate students.

CSCI 8305 NUMERICAL METHODS (3 credits)

This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 3300, MATH 3300, MATH 8305).

Prerequisite(s)/Corequisite(s): MATH 1960 with a C- or better or permission of instructor

CSCI 8306 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, MATH 4300, MATH 8306).

Prerequisite(s)/Corequisite(s): MATH 2050 with a C- or better or permission of instructor.

CSCI 8316 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, MATH 4310, MATH 8316).

Prerequisite(s)/Corequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

CSCI 8325 DATA STRUCTURES (3 credits)

This is a core that will cover a number of data structures such as tree, hashing, priority queues and graphs as well as different algorithm design methods by examining common problem-solving techniques. (Cross-listed with CSCI 3320)

CSCI 8340 DATABASE MANAGEMENT SYSTEMS II (3 credits)

A continuation of the study of Data Base Management Systems. Extended discussion of logical data base design, normalization theory, query optimization, concurrent issues. Advanced topics including distributed data bases, deductive data bases, data base machine, and others.

Prerequisite(s)/Corequisite(s): CSCI 8856 or equivalent. Not open to non-degree graduate students.

CSCI 8350 DATA WAREHOUSING AND DATA MINING (3 credits)

Covers topics related to decision support queries. In particular, topics covered include building data warehouses, On-Line Analysis Processing (OLAP), maintenance of materialized views, indexing, various data mining techniques, and integration of OLAP and data mining.

Prerequisite(s)/Corequisite(s): CSCI 8856; bachelors degree and permission from Graduate Committee. Not open to non-degree graduate students.

CSCI 8360 MACHINE LEARNING FOR TEXT (3 credits)

This course focuses on the fundamental techniques for extraction of various insights from text data which is ubiquitous on the Web, social media sites, emails, news articles, digital libraries, and other sources. The course topics will include concepts and techniques used by search engines to crawl, index, and rank web pages on the Web, machine learning techniques for categorization of news articles into different categories, sentiment and opinion analysis of social media chats, text summarization, and information extraction.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

CSCI 8366 FOUNDATIONS OF CYBERSECURITY (3 credits)

Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 4360, CYBR 8366)

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CSCI 8390 ADVANCED TOPICS IN DATA BASE MANAGEMENT (3 credits)

An in-depth study of one or more topics in the field of Data Base Management Systems, such as logical and/or physical data base design, query optimization, distributed data bases, intelligent knowledge-based systems, emerging technologies and applications. May be repeated with different topics with permission of adviser.

Prerequisite(s)/Corequisite(s): CSCI 4850 or CSCI 8856 or equivalent. Not open to non-degree graduate students.

CSCI 8400 ADVANCED COMPUTER GRAPHICS (3 credits)

Computer graphics continues to play an important role in computer science. This course covers the mathematical foundations of three-dimensional representation and animation; ray tracing and path tracing rendering methods; using the graphical processing unit (GPU) for real time applications; and concludes with simulation of natural phenomenon.

Prerequisite(s)/Corequisite(s): Bachelors degree or permission from the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8410 DISTRIBUTED SYSTEMS AND NETWORK SECURITY (3 credits)

The course aims at understanding the issues surrounding data security, integrity, confidentiality and availability in distributed systems. Further, we will discuss various network security issues, threats that exist and strategies to mitigate them. This course will cover topics in cryptography, public key infrastructure, authentication, hashing, digital signatures, ARP protection, IP and IPSEC, IP Tables, SSL/TLS, firewalls, etc. (Cross-listed with CYBR 8410)

Prerequisite(s)/Corequisite(s): CSCI 8366 or equivalent(s). Not open to non-degree graduate students.

CSCI 8420 SOFTWARE ASSURANCE (3 credits)

Software assurance is a reasoned, auditable argument created to support the belief that the software will operate as expected. This course is an intersection of knowledge areas necessary to perform engineering activities or aspects of activities relevant for promoting software assurance. This course takes on a software development lifecycle perspective for the prevention of flaws. (Cross-listed with CYBR 8420)

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836 OR by permission of the Instructor. Not open to non-degree graduate students.

CSCI 8430 TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT (3 credits)

This course examines in detail: the principles of a security architecture, access control, policy and the threat of malicious code; the considerations of trusted system implementation to include hardware security mechanisms, security models, security kernels, and architectural alternatives; the related assurance measures associated with trusted systems to include documentation, formal specification and verification, and testing, and approaches that extend the trusted system, into applications and databases and into networks and distributed systems.

Prerequisite(s)/Corequisite(s): CSCI 8366 or equivalents, or instructor permission. Not open to non-degree graduate students.

CSCI 8440 SECURE SYSTEMS ENGINEERING (3 credits)

This course takes a global risk-based view of the process of defining, verifying, validating and continuously monitoring secure information systems. The course will investigate a number of secure system solutions, starting with the definition of the system security needs, and tracing through methods of verification and validation of security controls, as well as ways to continuously monitor the corresponding assurances. (Cross-listed with CYBR 8440)

Prerequisite(s)/Corequisite(s): CSCI 8366 or IASC 8366

CSCI 8446 INTRODUCTION TO PARALLEL COMPUTING (3 credits)

Need for higher-performance computers. Topics discussed include: classification of parallel computers; shared-memory versus message passing matchings; for ms of parallelism, measure of performance; designing parallel algorithms; parallel programming and parallel languages; synchronization constructs; and operating systems for parallel computers. (Cross-listed with CSCI 4440)

Prerequisite(s)/Corequisite(s): CSCI 4500 or CSCI 8506 (May be taken concurrently). Not open to non-degree graduate students.

CSCI 8450 ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING (3 credits)

The course will provide in depth study of the topics in natural language processing and understanding, such as syntax, lexical and computational semantics, natural language ambiguities and their disambiguation, logical form construction and inference. The course will survey state-of-the-art natural language processing toolkits and knowledge bases that boost the development of modern language processing and understanding applications.

Prerequisite(s)/Corequisite(s): CSCI 3320 OR CSCI 3660 OR CSCI 4450. Not open to non-degree graduate students.

CSCI 8456 INTRODUCTION TO ARTIFICIAL INTELLIGENCE (3 credits)

An introduction to artificial intelligence. The course will cover topics such as machine problem solving, uninformed and informed searching, propositional logic, first order logic, approximate reasoning using Bayesian networks, temporal reasoning, planning under uncertainty and machine learning. (Cross-listed with CSCI 4450).

CSCI 8476 PATTERN RECOGNITION (3 credits)

Structures and problems of pattern recognition. Mathematics model of statistical pattern recognition, multivariate probability, Bay's decision theory, maximum likelihood estimation, whitening transformations. Parametric and non-parametric techniques, linear discriminant function, gradient-descent procedure, clustering and unsupervised learning, and feature selection algorithms. (Cross-listed with CSCI 4470)

Prerequisite(s)/Corequisite(s): CSCI 1620 with C- or better, and MATH 2050. Recommended: MATH 4740/8746 or STAT 3800/8805.

CSCI 8480 MULTI-AGENT SYSTEMS AND GAME THEORY (3 credits)

This course covers advanced topics in the area of coordination of distributed agent-based systems with a focus on computational aspects of game theory. The main topics covered in this course include distributed constraint satisfaction, distributed constraint optimization, and competitive and cooperative game theory. (Cross-listed with MATH 8480)

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456. Suggested background courses: CSCI 4480 or CSCI 8486; CSCI 8080. Not open to non-degree graduate students.

CSCI 8486 ALGORITHMS FOR ROBOTICS (3 credits)

This course provides an introduction to software techniques and algorithms for autonomously controlling robots using software programs called controllers. Students will be taught how to program and use software controllers on simulated as well as physical robots. (Cross-listed with CSCI 4480).

Prerequisite(s)/Corequisite(s): CSCI 3320 with C- or better. CSCI 4450/8456 is a recommended but not essential pre-requisite.

CSCI 8500 NUMERICAL LINEAR ALGEBRA (3 credits)

Topics covered in this course include error propagation, solutions of nonlinear equations, solutions of linear and nonlinear systems by various schemes, matrix norms and conditioning, and computation of eigenvalues and eigenvectors. (Cross-listed with MATH 8500).

Prerequisite(s)/Corequisite(s): MATH 1960 and MATH 2050, or permission of instructor. Familiarity with computer programming is assumed.

CSCI 8506 OPERATING SYSTEMS (3 credits)

Operating system principles. The operating system as a resource manager; I/O programming, interrupt programming and machine architecture as it relates to resource management; memory management techniques for uni-multiprogrammed systems; process description and implementation; processor management (scheduling); I/O device, controller, and channel management; file systems. Operating system implementation for large and small machines. (Cross-listed with CSCI 4500).

Prerequisite(s)/Corequisite(s): CSCI 3710, CSCI 3320/8325, MATH 1950, and CSCI 4350/8356 with C- or better.

CSCI 8510 NUMERICAL DIFFERENTIAL EQUATIONS (3 credits)

Topics covered in this course include interpolation and approximations, numerical differentiation, numerical integration, and numerical solutions of ordinary and partial differential equations. (Cross-listed with MATH 8510).

Prerequisite(s)/Corequisite(s): MATH 1970, MATH 2350, or permission of instructor. Familiarity with computer programming is assumed.

CSCI 8520 ADVANCED TOPICS IN OPERATIONS RESEARCH (3 credits)

Advanced treatment of a specific topic in the area of operations research not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with MATH 8520).

Prerequisite(s)/Corequisite(s): MATH 4300 or MATH 8306 or CSCI 4300 or CSCI 8306 or permission of the instructor.

CSCI 8530 ADVANCED OPERATING SYSTEMS (3 credits)

State of the art techniques for operating system structuring and implementation. Special purpose operating systems. Pragmatic aspects of operating system design, implementation, and use.

Prerequisite(s)/Corequisite(s): CSCI 4500/8506. Not open to nondegree students.

CSCI 8555 COMMUNICATION NETWORKS (3 credits)

This course is designed to bring students up to the state of the art in networking technologies with a focus on Internet. It will cover the principles of networking with an emphasis on protocols, implementations and design issues. (Cross-listed with CSCI 3550)

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 with C- or better. Data structures and algorithms. C or C++ programming.

CSCI 8566 NUMBER THEORY & CRYPTOGRAPHY (3 credits)

An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 4560, MATH 4560, MATH 8566).

Prerequisite(s)/Corequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

CSCI 8590 FUNDAMENTALS OF DEEP LEARNING (3 credits)

This course is an introduction to deep learning, a branch of machine learning concerned with the development and application of neural networks. Deep learning trains the machine to learn patterns that it is presented with rather than requiring the human operator to define the patterns that the machine should look for. Deep learning is behind many recent advances in artificial intelligence, such as face recognition, speech recognition and autonomous driving. This course will cover the foundations of deep learning, learning theory, basic/advanced neural networks and problem domains of many selected applications.

Prerequisite(s)/Corequisite(s): CSCI 3320 or instructor permission

CSCI 8610 FAULT TOLERANT DISTRIBUTED SYSTEMS (3 credits)

This course is to study the theory and practice of designing computer systems in the presence of faulty components. Emphasizes the basics of how faults can affect systems and what is required to mask or compensate for their efforts.

Prerequisite(s)/Corequisite(s): CSCI 4500 and CSCI 4350. Not open to non-degree graduate students.

CSCI 8620 MOBILE COMPUTING AND WIRELESS NETWORKS (3 credits)

Contemporary issues in mobile computing and wireless networks, including the differences between mobile computing and the traditional distributed computing paradigm, impediments of the mobile and wireless environments, problems and limitations due to such impediments, using the spectrum, wireless data networks, various network layers solutions, location management techniques, mobile IP, wireless LANs, wireless TCP, ad hoc networks, performance issues, security issues.

Prerequisite(s)/Corequisite(s): CSCI 3550 or CSCI 8555. Not open to non-degree graduate students.

CSCI 8626 COMPUTER GRAPHICS (3 credits)

An introduction to the acquisition, manipulation and display of graphical information using digital techniques. Topics include discussion of the various hardware devices used for input and output, the classical algorithms and data structures used in manipulation of graphical objects, the user interface to the graphics system, and applicable standards. (Cross-listed with CSCI 4620).

Prerequisite(s)/Corequisite(s): ISQA 3300 or CSCI 3320.

CSCI 8666 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)

This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, MATH 4660, MATH 8666).

Prerequisite(s)/Corequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

CSCI 8700 SOFTWARE SPECIFICATIONS AND DESIGN (3 credits)

A continuation of the study of software engineering with an emphasis on early phases of software development, namely requirements engineering/specification and architectural design. Includes an in-depth study of practices for effective software requirements specification and architectural design, as well as formal specifications of software systems. Related topics such as metrics and support tools are also covered.

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8706 COMPILER CONSTRUCTION (3 credits)

Assemblers, interpreters and compilers. Compilation of simple expressions and statements. Analysis of regular expressions. Organization of a compiler, including compile-time and run-time symbol tables, lexical scan, syntax scan, object code generation and error diagnostics. (Cross-listed with CSCI 4700).

CSCI 8710 MODERN SOFTWARE DEVELOPMENT METHODOLOGIES (3 credits)

Designed to introduce students to advanced object technology and other modern methodologies for developing software systems. Intended for graduate students who have mastered the basic concepts and issues of software engineering. Course covers advanced object-oriented software development. The course also covers several offshoots of object technology, including: component-based software engineering, aspect-oriented software development, software product line engineering, service-oriented computing, etc.

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836.

CSCI 8760 FORMAL METHODS IN SOFTWARE ENGINEERING (3 credits)

In the high consequence system domain, a primary objective of any construction technique employed is to provide sufficiently convincing evidence that the system, if put into operation, will not experience a high consequence failure or that the likelihood of such a failure falls within acceptable probabilistically defined limits. Systems for which such evidence can be provided are called high assurance systems. The objective of this course is to examine software-engineering techniques across the development life cycle that are appropriate for high assurance systems. The course will analyze the nature of the evidence provided by various techniques (e.g., does a given technique provide sufficiently strong evidence in a given setting).

Prerequisite(s)/Corequisite(s): CSCI 8000 and CSCI 8836 or CSCI 4830

CSCI 8766 TOPICS IN MODELING (3 credits)

Selection of such topics as formulation and analysis of various models involving Markov chains, Markov processes (including birth and death processes), queues, cellular automata, difference and differential equations, chaotic systems and fractal geometries. (Cross-listed with CSCI 4760).

Prerequisite(s)/Corequisite(s): MATH 2350 and MATH 4740 or MATH 8746.

CSCI 8790 ADVANCED TOPICS IN SOFTWARE ENGINEERING (3 credits)

An in-depth study of one or more topics in the field of software engineering such as human factors in software engineering, software specifications and modeling, reuse and design recovery, software valuations, software management, emerging technology and applications.

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8836 INTRODUCTION SOFTWARE ENGINEERING (3 credits)

Basic concepts and major issues of software engineering, current tools and techniques providing a basis for analyzing, designing, developing, maintaining and evaluating the system. Technical, administrative and operating issues. Privacy, security and legal issues. (Cross-listed with CSCI 4830).

CSCI 8856 DATABASE MANAGEMENT SYSTEMS (3 credits)

Basic concepts of data base management systems (DBMSs). The relational, hierarchical and network models and DBMSs which use them. Introduction to data base design. (Cross-listed with CSCI 4850).

CSCI 8876 DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS (3 credits)

This required course for undergraduate bioinformatics majors provides foundational knowledge on database aspects used in the field and an overview of their applications in bioinformatics, biomedical informatics, and health/clinical informatics. The course begins with a brief review of key concepts in computational molecular biology related to database search/development, database management systems, the difference between primary and secondary databases, and bioinformatics-related aspects of modeling and theory in computer science. The major focus is on the multiple challenges and aspects of bio-database development, search, and pattern discovery. The course uses problem-based learning to help students develop database management skills as they apply to high throughput "-omics." data, the basics of data management, data provenance and governance, standards, and analysis through KDD-based workflows. This course will also consider the fundamentals of artificial intelligence and machine learning as they pertain to bioinformatics, from the perspective of database storage, I/O, and analysis. (Cross-listed with BIOI 4870)

Prerequisite(s)/Corequisite(s): CSCI 3320 and BIOI 3500, or permission of instructor; BIOI 3500 can be taken concurrently. Prior completion of CSCI 4850 is strongly recommended but not required. Not open to non-degree graduate students.

CSCI 8910 MASTER OF SCIENCE CAPSTONE (3 credits)

The capstone course is to integrate coursework, knowledge, skills and experiential learning to enable the student to demonstrate a broad mastery of knowledge, skills, and techniques across the Master degree curriculum of Computer Science for a promise of initial employability and further career advancement. The course is designed to be in a student-centered and student-directed manner which requires the command, analysis and synthesis of knowledge and skills. Students may apply their knowledge and skill to a project which serves as an instrument of evaluation. Students are encouraged to foster an interdisciplinary research and cultivate industry alliances and cooperation in this course. This capstone course should be taken only after students have completed at least 3/4 of course requirements for the major.

Prerequisite(s)/Corequisite(s): Master's degree of Computer Science with course-only option (program III). Not open to nondegree students.

CSCI 8920 ADVANCED TOPICS COMPUTER SCIENCE (3 credits)

An in-depth study, at the graduate level, of one or more topics that are not treated in other courses. May be repeated with different topics with permission of adviser.

Prerequisite(s)/Corequisite(s): Permission of instructor; will vary with offering. Not open to non-degree graduate students.

CSCI 8950 GRADUATE INTERNSHIP IN COMPUTER SCIENCE (1-3 credits)

The purpose of this course is to provide students with opportunities to apply their academic studies in environments such as those found in business, industry, and other non-academic organizations. The student interns will sharpen their academic focus and develop better understanding of non-academic application areas.

Prerequisite(s)/Corequisite(s): Permission of the graduate program chairperson and a minimum grade point average of 3.0 (B), with at most one grade below B, but not lower than C+ for all CS graduate classes. Not open to non-degree graduate students.

CSCI 8960 THESIS EQUIVALENT PROJECT IN COMPUTER SCIENCE (1-6 credits)

This course allows a graduate student to conduct a research project in computer science or a related area. The project is expected to place an emphasis on applied, implementations-based, or experimental research. The process for development and approval of the project must include: appointment of supervisory committee (chaired by project adviser), a proposal approved by the supervisory committee, monitoring of the project by the supervisory committee, an oral examination over the completed written product conducted by the supervisory committee, and final approval by the supervisory committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines.

Prerequisite(s)/Corequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 8970 INDEPENDENT STUDY (1-3 credits)

Under this number a graduate student may pursue studies in an area that is not normally available in a formal course. The topics to be studied will be in a graduate area of computer science to be determined by the instructor.

Prerequisite(s)/Corequisite(s): Permission of the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8980 GRADUATE SEMINAR (1-3 credits)

This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques and methodologies, and/or the current research results in the fundamental areas of computer science. Topics to be covered by the course will vary in different semesters.

Prerequisite(s)/Corequisite(s): Permission of the Instructor. Not open to non-degree graduate students.

CSCI 8986 TOPICS IN COMPUTER SCIENCE (1-3 credits)

A variable topic course in computer science at the senior/graduate level. Topics not normally covered in the computer science degree program, but suitable for senior/graduate-level students. (Cross-listed with CSCI 4980).

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

CSCI 8990 THESIS (1-6 credits)

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.

Prerequisite(s)/Corequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 9210 TYPE SYSTEMS BEHIND PROGRAMMING LANGUAGES (3 credits)

Empirical evidence suggests that a large number of errors made when writing software can be detected by analyzing the behavior of the program from the perspective of type. This course provides an in-depth exploration of various type systems for programming languages.

Prerequisite(s)/Corequisite(s): CSCI 8000. Not open to non-degree graduate students.

CSCI 9220 REWRITING AND PROGRAM TRANSFORMATION (3 credits)

This course begins by exploring the foundations of term rewriting. Topics such as unification, confluence, completion and termination are covered. Then a strategic framework is considered in which the application of rewrite rules can be controlled.

Prerequisite(s)/Corequisite(s): CSCI 8000. Not open to non-degree graduate students.

CSCI 9350 MATHEMATICAL AND LOGICAL FOUNDATIONS OF DATA MINING (3 credits)

With the maturity of data mining techniques, it is extremely important to examine the foundations of data mining. Instead of providing coverage of basic data mining methods, the course will focus on methodology employed in data mining, logical and mathematical foundations of data mining, as well as other issues related to the intrinsic nature of data mining.

Prerequisite(s)/Corequisite(s): CSCI 8456, CSCI 8856, and CSCI 8390. Not open to non-degree graduate students.

CSCI 9410 ADVANCED TOPICS IN LOGIC PROGRAMMING (3 credits)

This course will examine some advanced topics in logic programming, in particular logic programming under stable model (or answer set) semantics. Answer set programming is a common name of the field. Formal syntax, semantics, and proofs of correctness for logic programs will be considered. Elements of inductive and Prolog programming will also be introduced. Each advanced topic will be followed by how it has been applied in practice. Advanced applications of logic programming will be covered in detail.

Prerequisite(s)/Corequisite(s): CSCI 8000 and doctoral student standing in Information Technology or the permission of the instructor.

CSCI 9420 INTELLIGENT AGENT SYSTEMS (3 credits)

This course covers the principles of interaction between agents in multi-agent systems using game theory. Relevant topics studied in this course include competitive games, statistical Bayesian games, cooperative games, and mechanism design. Students will have to implement projects related to the material studied in the course.

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and CSCI 4450 or CSCI 8456. Not open to non-degree graduate students.

CSCI 9710 METHODS IN SOFTWARE ENGINEERING RESEARCH (3 credits)

This course provides guidelines on how to conduct research in the field of software engineering by presenting the research methods, classic readings, and development of theories and their application to real life problems. The main emphasis of the course is to provide opportunity for in-depth study of topics such as contemporary methods for software development.

Prerequisite(s)/Corequisite(s): CSCI 8836 or equivalent course and doctoral student standing in Information Technology or permission of the instructor. Not open to non-degree graduate students.

CSCI 9810 RESEARCH FOUNDATIONS IN THEORETICAL COMPUTING (3 credits)

This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques, and methodologies, and/or the current research results in the fundamental areas of theoretic computing. The course will examine advanced research topics in computer science and engineering, including foundations of automata theory, computability, complexity analysis, computational logics and algorithmic analysis, hybrid dynamic systems theory, number theory, adaptation and learning theory, concepts and principles in computational geometry, stochastic processes, and random optimization. Each topic will be discussed with a perspective of research issues and directions. Active student participation in investigation of the research topics, survey of the current state-of-art, and identifying the future research insights is required. Students will take turn presenting their research results on specific topics. Topics to be covered by the course will vary in different semesters.

Prerequisite(s)/Corequisite(s): The prerequisites of this course vary depending on the areas to be covered in the semester the course is offered. Good standing in Ph.D. program is required. Permission of the instructor may be required. Not open to non-degree graduate students.

ECON 8010 SEMINAR IN PUBLIC FINANCE (3 credits)

This course is designed to develop the tools of applied welfare economics and to use these tools to evaluate the expenditure and tax decisions of governments. The structure, effects and reform of the U.S. individual and corporate income taxes, social security and healthcare system will be emphasized. Government debt and deficits will also be discussed.

Prerequisite(s)/Corequisite(s): ECON 3200 or ECON 8210 or BSAD 8100 or permission

ECON 8020 ENVIRONMENTAL ECONOMICS AND MANAGEMENT (3 credits)

This course covers topics related to environmental economics and policy, with an emphasis on comparative policy analysis and business strategies towards the environment. (Cross-listed with BSAD 8020).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220 or BSAD 8180, or permission of the instructor. Not open to non-degree graduate students.

ECON 8050 ECONOMIC EDUCATION (3 credits)

A study and examination of economic principles and how they can be related to the teacher's classroom presentation. This course is designed to furnish the k-12 teacher with sufficient background and understanding to aid in the recognition of economic issues and the teaching of economic concepts and principles.

Prerequisite(s)/Corequisite(s): No previous course work in economics. Not open to Economics majors.

ECON 8200 SEMINAR IN MICRO ECONOMIC THEORY (3 credits)

The course covers major topics in microeconomic theory. The major topics covered are the theory of consumer behavior, theory of production and cost, theory of the firm, pure exchange economy, general equilibrium, and welfare theory.

Prerequisite(s)/Corequisite(s): ECON 3200, ECON 3220 and ECON 8306 or permission.

ECON 8210 MANAGERIAL ECONOMICS (3 credits)

Microeconomics for graduate students of business. Economic analysis of the business firm and its environments, with emphasis on market structure, production possibilities and cost factors. Additional consideration is given to the theory of the firm under conditions of uncertainty. (Cross-listed with BSAD 8100).

Prerequisite(s)/Corequisite(s): Graduate student in economics and ECON 2200 or equivalent.

ECON 8216 INDUSTRIAL ORGANIZATION (3 credits)

In this class we will examine why firms and industries behave the way that they do. We will explore why some industries face intense competition while others enjoy large profits, why some industries offer only bundles, and why some firms buy up their supply chain when others do not. This theoretical course will illuminate un-theoretical implications to your life and future business ventures. This course will use your economic knowledge, a bit of psychology (behavioral economics) and game theory to answer questions like "Why does everyone hate the cable company?" and "Why are CEOs given so many stock options?" (Cross-listed with ECON 4210).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 8220 SEMINAR IN MACRO THEORY (3 credits)

This course traces the development of macroeconomic theory from the classical point of view to current schools of thought. Keynesian, neo-Keynesian and neo-classical models are developed.

Prerequisite(s)/Corequisite(s): ECON 3200 or ECON 8210 or BSAD 8100, ECON 3220, and ECON 8306, or permission.

ECON 8230 BUSINESS CONDITIONS ANALYSIS (3 credits)

This course is concerned with the statistical measurement and evaluation of general business conditions, as well as the adaptation of business policies to changing business conditions. Emphasis is placed upon the practical application of statistical analysis techniques to business situations within the framework of the aggregate economy.

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220.

ECON 8290 RESEARCH METHODS IN ECONOMICS AND BUSINESS (3 credits)

Covers the methodology of economics: choosing a research topic, literature search tools, data source identification, data summary techniques, basic statistical data analysis using statistical packages, and clear economics writing. The student will become familiar with these techniques through text materials, journal studies, and completion of an empirical economics paper.

Prerequisite(s)/Corequisite(s): ECON 3200, ECON 3220, or equivalents, or permission of the instructor. Not open to non-degree graduate students.

ECON 8300 ECONOMETRICS (3 credits)

The study of the underlying assumptions, techniques and applications of single and multiple equation regression analysis in economics.

Prerequisite(s)/Corequisite(s): Basic Statistics, ECON 8306/ ECON 4300, or permission. Not open to non-degree graduate students.

ECON 8306 QUANTITATIVE APPLICATIONS IN ECONOMICS AND BUSINESS (3 credits)

The study and application of modern quantitative techniques to problem-solving in economics and business. It is designed to help the student to translate verbal arguments in economics and business into their mathematical equivalents, to improve analytical skills, and to attain proficiency in marginal analysis, equilibrium analysis, static optimization, and comparative statics analysis. It covers topics such as exponential and logarithmic functions and their applications, linear algebra and its applications, derivatives and their applications, maximization of functions with one variable and multi variables, maximization with non negativity constraints, and integral calculus and its applications in economics and business. (Cross-listed with ECON 4300).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, or BSAD 8180.

ECON 8310 BUSINESS FORECASTING (3 credits)

The course will cover forecasting tools and applications applied to business settings. We will cover traditional Econometric forecasting methods in the first half of the class. In the second half of the course, we will focus on models in predictive analytics and machine learning, since these models are quickly becoming critical tools for forecasters in many settings. The course will include lecture and lab time, and labs will be focused on teaching students how to implement the models discussed in lectures. (Cross-listed with BSAD 8080).

Prerequisite(s)/Corequisite(s): ECON 8320 (or equivalent programming experience) AND ECON 8300 (or equivalent multivariate regression analysis coursework) or permission of instructor. Not open to non-degree graduate students.

ECON 8316 BUSINESS INTELLIGENCE AND REPORTING (3 credits)

The course will teach students to use state-of-the-art Business Intelligence (BI) software to generate reports and information from data. BI software is used to inform decision-making in industries from transportation to medicine, from marketing to government, and is facilitated by rapidly increasing access to data in all industries. Students will learn to employ best practices in visualization and verbal communication as they are trained to create valuable insights from data and convey those insights to stakeholders. Additionally, the course will aid students in preparing for certification in the use of state-of-the-art BI software. (Cross-listed with ECON 4350).

Prerequisite(s)/Corequisite(s): ECON 3310 OR ECON 8320 (or concurrent enrollment) AND BSAD 2130 (or equivalent) OR Instructor Approval

ECON 8320 TOOLS FOR DATA ANALYSIS (3 credits)

The course will cover basic principles of programming languages, as well as libraries useful in collecting, cleaning and analyzing data to answer research questions. The course will utilize basic Economic principles and Econometric methods as inspiration for assignments and projects throughout the duration of the course, and will do so in a way that is accessible to non-Economists. This course is intended to introduce the student to the Python programming language as a tool for conducting data analysis. While the course uses Python, the student should be able to move to other languages frequently used in data analysis using the principles taught in this course.

Prerequisite(s)/Corequisite(s): ECON 2200 or BSAD 8150 (or equivalent); BSAD 2130 or equivalent; or instructor approval.

ECON 8326 NATURAL RESOURCE ECONOMICS (3 credits)

This course introduces students to the economics and management of Earth's natural resources. We address questions such as: Are we running out of natural resources? Are we using resources in a sustainable fashion? What role do markets play in resource use? We will address issues related to fossil-based resources, minerals, fisheries, water, land, forests and other associated topics. The course covers the basic theoretical framework for understanding the optimal rate of resource use, identifies the factors that determine the actual rate of use, and considers and evaluates various public policy prescriptions. (Cross-listed with ECON 4320).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, BSAD 8150 or permission of instructor.

ECON 8330 DATA ANALYSIS FROM SCRATCH (3 credits)

Econometrics is routinely taught as an application class using a 'black box' like Stata or SAS to perform calculations. This class takes a different approach. Using the Python programming language, we build all estimators from scratch. Additionally, we introduce numerous non-parametric and simulation techniques. This approach to econometrics results in a stronger understanding of statistical assumptions and methods, a better understanding of when a method is appropriate, and stronger programming techniques. Furthermore, a deeper understanding of the underlying mechanics provides the student the ability to program custom procedures not already built into popular software packages.

Prerequisite(s)/Corequisite(s): A multivariate or regression analysis course such as ECON 8300, ISQA 9130 or STAT 8436, and a programming class such as ECON 8320 or equivalent programming experience; or instructor approval. Not open to non-degree graduate students.

ECON 8346 ECONOMICS OF TECHNOLOGY (3 credits)

The seminar discusses whether innovation is more driven by demand or supply forces, the optimal timing of adoption of new technology, whether new technology benefits workers and consumers, and whether government is successful at supporting promising new technology. (Cross-listed with ECON 4340).

Prerequisite(s)/Corequisite(s): ECON 2200 or BSAD 8180 or permission of the instructor.

ECON 8456 DOMESTIC MONETARY THEORY AND POLICY (3 credits)

The course will introduce students to topics in money and banking, financial institutions, markets, financial instruments, and monetary theory in order to enhance financial decision making and enable students to effectively analyze economic news in media such as the Wall Street Journal, The New York Times, Business Week, Barrons, The Economist, and other related business publications. This knowledge will enable students to formulate their own views about the current economic environment, government policies, and responses to economic environments. (Cross-listed with ECON 4450).

ECON 8576 ECONOMIC CONDITIONS ANALYSIS (3 credits)

This course teaches students how to conduct an economic analysis of, and produce an economic forecast for, a local economy such as a state, county, or metropolitan area. Students will learn where to find data, how to analyze that data, how to develop models with the data, and how to present the data in a clear, concise, and jargon-free manner. The final published report will be authored by the students registered in the course. All students will contribute equally to the final report. The instructor will ensure equal participation. (Cross-listed with ECON 4570).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, or Permission from the instructor

ECON 8600 HEALTH ECONOMICS (3 credits)

This course is designed to help students understand how the theories and models of economics can be applied to the study of health and health care. The examination of the markets (demand and supply) for health, health care and health insurance is stressed. In addition, the economic analytic tools such as microeconomic theories and economic evaluation methods also will be reviewed and introduced. The objective of this course is to equip students with the knowledge tools to examine and analyze the problems issues of health care from the perspective of economics.

Prerequisite(s)/Corequisite(s): ECON 2200 or equivalent.

ECON 8616 INTERNATIONAL TRADE (3 credits)

An analysis of the character of international economic relations. Subjects covered include the economic basis for international specialization and trade, the economic gains from trade, commercial policy, economic integration and economic growth. (Cross-listed with ECON 4610).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8626 INTERNATIONAL MONETARY ECONOMICS (3 credits)

An analysis of the international monetary system. Subjects covered include the balance of payments adjustment mechanism, alternative exchange rate systems, external effects of monetary and fiscal policy, foreign investments and international monetary reform. (Cross-listed with ECON 4620).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8666 INTERNATIONAL ECONOMIC DEVELOPMENT (3 credits)

This course introduces theories and application of economic development and growth, economic problems facing developing countries, analyzes domestic economic issues (e.g., per capita GDP, income distribution, population, unemployment, urbanization, education, fiscal policies, and financial policies), and international economic issues (e.g., trade, foreign investment, and foreign debt). Financial crises, debt crises, and economic recovery will be discussed. (Cross-listed with ECON 4660).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8736 ECONOMICS OF ENTREPRENEURSHIP (3 credits)

This course will review economic theories of entrepreneurship with special emphasis on Schumpeter's theory of creative destruction. The main focus of the seminar will be on the "high-level" entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 4730, BSAD 8736.)

Prerequisite(s)/Corequisite(s): ECON 2200 or permission of the instructor for all students.

ECON 8856 ECONOMICS OF URBAN AND REGIONAL DEVELOPMENT (3 credits)

This course will consider factors and trends in development at the global and national level but will focus primarily on economic development at the state, local, and regional levels in the United States. The focus of this course will be real world strategic planning for economic development. (Cross-listed with ECON 4850).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 8910 SPECIAL STUDIES IN ECONOMICS (1-3 credits)

(May be repeated up to 6) A series of special courses, each designed to focus on current major issues and developments in a specific area of economics or business, scheduled as a workshop or seminar according to purpose.

Prerequisite(s)/Corequisite(s): Graduate student in good standing and as indicated for specific workshop or seminar.

ECON 8916 SPECIAL TOPICS IN ECONOMICS (1-3 credits)

(May be repeated up to 6 hours) A series of special courses each designed to focus on current major topics and developments in a specific area of economics or business, scheduled as a workshop or seminar according to purpose. (Cross-listed with BSAD 8916, ECON 4910).

Prerequisite(s)/Corequisite(s): Graduate student in good standing or advanced undergraduate student and as indicated for specific workshop or seminar.

ECON 8920 INDEPENDENT STUDY (1-3 credits)

Guided independent study and research.

Prerequisite(s)/Corequisite(s): Graduate student in economics and permission of instructor.

ECON 8940 ECONOMIC INTERNSHIP (1-3 credits)

Guided internship in a firm or organization that makes use of, or extends, the student's skill in economics.

Prerequisite(s)/Corequisite(s): Completion of at least nine hours of graduate level economics and permission of instructor.

ECON 8990 THESIS (1-6 credits)

An independent research project, written under the supervision of a graduate adviser in the department of economics. Approval of the topic and the completed project by departmental committee is required.

Prerequisite(s)/Corequisite(s): Approval of the topic and the completed project by departmental committee is required.

ISQA 8016 BUSINESS INTELLIGENCE (3 credits)

This course intends to provide graduate students in-depth exposure to the growing field of business intelligence. Business intelligence (BI) consists of the set of concepts and techniques used to analyze business data in support of decision-making and planning. BI spans a number areas of management information systems, including Decision Support Systems (DSS), Enterprise Resource Planning (ERP), Data Warehousing, Knowledge Management, Customer Relationship Management, Data Mining, and others.

Prerequisite(s)/Corequisite(s): (ISQA 4150 or ISQA 8156) and ISQA 8040 and ISQA 8050. Not open to non-degree graduate students.

ISQA 8030 INFORMATION SYSTEMS AND ETHICS (3 credits)

This course gives you an introduction to organizations and the role that information and information systems play in supporting an organization's operations, decision-making processes, quality management, and strategic activities. The course provides an introduction to the management of information systems function, the strategic and regulatory issues of telecommunications, and ethical and legal issues related to information systems.

Prerequisite(s)/Corequisite(s): Admission into the MS in MIS program.

ISQA 8040 AN OVERVIEW OF SYSTEMS DEVELOPMENT (3 credits)

The course presents an overview of the systems development lifecycle and database development. The course will focus on theory, current tools and techniques that the system developer can use to develop and document information systems. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8050 DATA ORGANIZATION AND STORAGE (3 credits)

The course will provide concepts of data organization, data storage, and data transfer through computer networks. The performance implications of various design decisions will be explored. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8060 RESEARCH IN MIS (3 credits)

This course covers research methods and their application to the development and evaluation of management information systems. Also covered is the relationship between organization theory and IS research.

Prerequisite(s)/Corequisite(s): CIST 2500, CIST 2100, and ISQA 8040, or permission of the instructor.

ISQA 8080 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (1-5 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s)/Corequisite(s): 1) Permission of the instructor. 2) Additional prerequisite courses may be required for particular course offerings.

ISQA 8086 SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS (1-5 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ISQA 4000)

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 8106 INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION (3 credits)

This course examines the frameworks and tools used to develop an organization's information system architecture. It provides the analytical skills and conceptual frameworks with which to make recommendations and decisions regarding the integration of information technology components into an information system architecture. (Cross-listed with ISQA 4100)

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 3310

ISQA 8136 INFORMATION TECHNOLOGY FOR DEVELOPMENT (3 credits)

Information Technology for Development (ITD) is the implementation and evaluation of information technology infrastructures to stimulate economic, social and human development. In this service-learning course, students will learn and apply ITD concepts for developing and adding value through IT by working with small business entrepreneurs in Omaha or rural Nebraska. Students will evaluate micro-business technology needs, prepare business technology plans, provide training, and implement appropriate solutions, to the extent possible within a semester class. (Cross-listed with ISQA 4130)

Prerequisite(s)/Corequisite(s): Though not required, the following courses or their equivalent would provide the necessary background : CIST 1100, CIST 1300, ISQA 3210, ISQA 3310, ISQA 3400. Not open to non-degree graduate students.

ISQA 8156 ADVANCED STATISTICAL METHODS FOR IS&T (3 credits)

This course emphasizes the application and interpretation of statistical methods including design of experiments, analysis of variance, multiple regression, and nonparametric procedures and the use of statistical computer packages. The intent is to develop quantitative abilities needed for quantitatively intensive jobs and for advanced study in management information systems, computer science and information technology. (Cross-listed with ISQA 4150)

Prerequisite(s)/Corequisite(s): CIST 2500 or equivalent (at least one course in statistics)

ISQA 8160 APPLIED DISTRIBUTION FREE STATISTICS (3 credits)

The primary objective of this course is to expose students to methods of analyzing data from non-normal populations including binomial tests, contingency tables, use of ranks, Kolmogorov-Smirnov type statistics and other selected topics.

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156

ISQA 8166 INTRODUCTION TO ENTERPRISE RESOURCE PLANNING (3 credits)

Introduction to Enterprise Resource Planning (ERP) is designed to expose students to the primary enterprise application that forms the information systems (IS) infrastructure for most large organizations today. The primary purpose of this course is for students to gain an understanding of the enterprise wide, cross functional nature of ERP software. In the process of learning about ERPs, the students develop "hands on" experience with the largest and most well-known ERP application, SAP. (Cross-listed with ISQA 4160, SCMT 4160)

Prerequisite(s)/Corequisite(s): CIST 2100 or equivalent. Not open to non-degree graduate students.

ISQA 8180 ELECTRONIC COMMERCE (3 credits)

Electronic Commerce is the digital enablement of transactions between multiple parties. A multitude of technologies, tools and applications have brought about changes in business, and society that require careful consideration. Students are given an overview of electronic commerce business models and required to apply these to solve business problems or take on opportunities presented. They will cover topics such as social networking, electronic markets, and political and ethical issues associated with electronic commerce, and business plans for technology ventures. They will apply these concepts using Web 2.0 tools, mobile applications and website design assignments.

ISQA 8196 PROCESS REENGINEERING WITH INFORMATION TECHNOLOGY (3 credits)

Business process reengineering issues are examined. Reengineering concepts and methods are introduced. Additional special project(s) are required. SAP will be introduced. (Cross-listed with ISQA 4190)

Prerequisite(s)/Corequisite(s): CIST 2500; prerequisite/co-requisite ISQA 4110.

ISQA 8206 INFORMATION AND DATA QUALITY MANAGEMENT (3 credits)

The course primarily focuses on developing an in-depth understanding of Data and Information Quality (DQ and IQ) concepts and issues. On completing this course students will be able to understand and use DQ and IQ Concepts in Information Systems projects, be able to recognize various patterns of Data and Design Deficiencies in Systems and be able to suggest appropriate DQ and IQ improvement plans in light of known deficiencies in systems. (Cross-listed with ISQA 4200)

Prerequisite(s)/Corequisite(s): CIST 2500

ISQA 8210 MANAGEMENT OF SOFTWARE DEVELOPMENT (3 credits)

This course should encourage you to think critically about aspects of software development that make it difficult and strategies to mitigate these challenges. This course integrates concepts from software engineering, management science, psychology, and organizational behavior to identify, understand, and propose solutions to problems associated with software development. We examine and consider issues from various perspectives, such as the project manager, development team, senior management, and project sponsor. This course prepares students for various roles within a software development effort including leadership positions in software development. Students will practice software project management and agile methods of managing projects in a semester long team project using contemporary project and development methods.

Prerequisite(s)/Corequisite(s): ISQA 8040 or equivalent. Not open to non-degree graduate students.

ISQA 8220 ADVANCED SYSTEMS ANALYSIS AND DESIGN (3 credits)

This course is a systems analysis and design course for systems and business analysts. The course presents an overview of object-oriented system analysis and design. The course will then focus on theory, best practices, and modern methodologies that analysts can use to analyze and design information systems.

Prerequisite(s)/Corequisite(s): ISQA 8040 or (ISQA 4110 and ISQA 4120) or equivalent and ISQA 8050 or ISQA 3310 or equivalent

ISQA 8250 FACILITATION OF COLLABORATIVE PROBLEM SOLVING (3 credits)

The course focuses on the facilitation of collaborative problem solving and decision making processes. Students learn how to design and facilitate collaborative workshops, with support from both paper-based and electronic meeting tools. The course is hands-on and experiential, with students working in small teams to conduct real workshops.

ISQA 8306 DATABASE ADMINISTRATION (3 credits)

This course is designed to give students an applied, practical introduction to database administration. Students will gain an understanding of the functioning of a database management system and its relationship to the computing environment in which it runs. They will learn the concepts, principles, and techniques necessary to carry out such functions as database object creation, storage management, capacity planning, performance tuning, backup and recovery, and security management. Each semester the course will focus on one commercial database management system (DBMS), such as Oracle. (Cross-listed with ISQA 4300)

Prerequisite(s)/Corequisite(s): ISQA 8040 or ISQA 3310 or CSCI 4850. Not open to non-degree graduate students.

ISQA 8310 IT INFRASTRUCTURE & CLOUD COMPUTING (3 credits)

This course provides a graduate-level introduction to the business and technical decisions around technical infrastructure. It covers topics related to computer and systems architecture and communications networks, with a focus on the technical and business decisions around technology. Students completing the course will be able to understand and design network infrastructure, evaluate cloud computing offerings, and communicate their decisions. The course covers hardware, software, and cloud computing technologies.

ISQA 8340 APPLIED REGRESSION ANALYSIS (3 credits)

The primary objective of this course is to expose students to regression models and applications with particular emphasis on applying these concepts to IT research. Topics to be discussed include: Foundations of regression analysis using least squares procedures; model formulation, stepwise regression, transformations; graphical methods, estimation; inference; influence diagnosis; matrix formulation, multicollinearity, time series, and nonlinear models.

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156, not open to non-degree graduate students.

ISQA 8380 ENTERPRISE ARCHITECTURE AND SYSTEMS INTEGRATION (3 credits)

This course is designed to give students grounding in the concepts, issues, and tools needed to manage enterprise architecture, distributed systems & Internet-based environments. The goal of the course is to equip students to make the architecture and infrastructure-related decisions needed for successful development and use of contemporary client/server and Internet-based systems. Topics include middleware, architecture, XML, JSON, web services, service-oriented architecture, enterprise application integration, distributed computing services, Model View Controller (MVC) development frameworks.

Prerequisite(s)/Corequisite(s): ISQA 8310 and ISQA 8050 or equivalent; permit required.

ISQA 8410 DATA MANAGEMENT (3 credits)

The course provides in-depth coverage of such areas as: the relational model, SQL, data modeling, data quality management, database design, data warehousing, business intelligence, document and content management, NoSQL systems, and data governance. The course offers a mix of theoretical treatment and hands-on application. Current DBMS and data modeling software will be used.

Prerequisite(s)/Corequisite(s): ISQA 8050 or equivalent, permit only.

ISQA 8420 MANAGING THE I.S. FUNCTION (3 credits)

The course provides a focus on the business management implications of the information explosion. The course is organized around a management audit of the information services activity to help present and future managers recognize and implement effective information services management.

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8450 NOSQL AND BIG DATA TECHNOLOGIES (3 credits)

The course will cover topics in the area of NoSQL and Big Data management. The course is intended to get students familiarized with NoSQL and Big Data technologies, explore how these database technologies differ conceptually from traditional relational database technologies, understand their applications, uses, advantages, and disadvantages, and provide hands-on experience with NoSQL and Big Data databases. The course offers a mix of theoretical treatment and hands-on application of the discussed NoSQL and Big Data technologies.

Prerequisite(s)/Corequisite(s): Prior exposure to data management is expected. The prereq is: ISQA 3310, ISQA 8040, CSCI 4850, or work experience that has given you a comparable grounding in database concepts and technologies; in this case permission by the instructor is needed.

ISQA 8460 INTERNET OF THINGS (IOT), BIG DATA AND THE CLOUD (3 credits)

This course introduces the Internet of Things (IoT). It provides an overview of a number of technologies and research disciplines that enable the Internet to reach out into the real world of physical objects. In the future, the "Things" in question may have identities and virtual personalities, operating in smart spaces using intelligent interfaces to connect and communicate with the social, environmental, and user context.

Prerequisite(s)/Corequisite(s): Basic Web Development using HTML/CSS and some MVC framework. The equivalent of two semester exposure to programming.

ISQA 8510 MANAGING USABILITY FUNCTIONS IN SYSTEMS DEVELOPMENT ORGANIZATION (3 credits)

This course deals with usability of information systems, from the perspective of organizing and managing usability functions in a systems development organization. After briefly introducing the background to system usability and usability principles, the course focuses specifically on the introduction, organization, support, management and evaluation of usability functions in systems development organizations. The role of the usability professional in the organization is emphasized.

Prerequisite(s)/Corequisite(s): Two semesters of programming or demonstrable experience and ISQA 8040 or equivalent, not open to non-degree graduate students.

ISQA 8525 GRAPHICAL USER INTERFACE DESIGN (3 credits)

This course is an introduction to interaction design with a primary emphasis on designing usable and useful computer interfaces. Students will learn the principles of interface design grounded in a fundamental understanding of human cognitive processes. They will learn how end-users develop and use mental models of interaction and will apply this knowledge to the design of interfaces for real-world applications. A design project will challenge students to plan their own designs, to develop interfaces and to integrate them into a working application prototype, to test their application with real users, and to effectively communicate the overall results. (Cross-listed with ISQA 3520)

Prerequisite(s)/Corequisite(s): CIST 1300

ISQA 8530 E-COMMERCE SECURITY (3 credits)

The course will integrate concepts, principles, and technologies from business, telecommunications, and computer science to identify, understand, and propose solutions to the security threats to e-commerce.

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 8310. Not open to non-degree graduate students.

ISQA 8546 COMPUTER SECURITY MANAGEMENT (3 credits)

The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST4540, CYBR 4540, CYBR 8546)

Prerequisite(s)/Corequisite(s): IASC 4360 or permission of the instructor.

ISQA 8560 INFORMATION WARFARE AND SECURITY (3 credits)

This course will study the nature of information warfare, including computer crime and information terrorism, as it relates to international, national, economic, organizational, and personal security. Information warfare policy and ethical issues will be examined.

Prerequisite(s)/Corequisite(s): CIST 2100 or BSAD 8030 or ISQA 8030, or permission of instructor required.

ISQA 8570 INFORMATION SECURITY POLICY AND ETHICS (3 credits)

The course will cover the development and need for information security policies, issues regarding privacy, and the application of computer ethics. (Cross-listed with IASC 8570)

Prerequisite(s)/Corequisite(s): CIST 2100 or BSAD 8030, or permission of instructor.

ISQA 8580 SECURITY RISK MANAGEMENT AND ASSESSMENT (3 credits)

The purpose of this course is to prepare the student for managing information security at the organizational level. This course will combine concepts from strategic management, decision science and risk analysis to prepare the student to integrate security issues into an organizational strategic planning process.

Prerequisite(s)/Corequisite(s): CIST 2100 or ISQA 8030. Not open to non-degree graduate students.

ISQA 8596 IT AUDIT AND CONTROL (3 credits)

This course explores organizational and managerial issues relevant to planning and conducting IT audit and control activities. The course covers the following conceptual areas: business risks and the management of business risk, IT risk as a component of business risk, the need to manage IT risks, and the basic type of controls required in a business system in order to control IT risks. Issues associated with new risks created by the use of the internet for business applications and electronic business are also covered. (Cross-listed with ISQA 4590)

Prerequisite(s)/Corequisite(s): A solid understanding of business foundations such as accounting and introductory auditing and exposure to the IS discipline is essential for success in this course. Permission of instructor is required to enroll.

ISQA 8600 FROM DATA TO DECISIONS (3 credits)

This course focuses on inquiry-driven data preparation and exploratory analysis skills for audience-driven, decision-oriented data analysis. Students gain experience in data evaluation, cleaning, documentation, and exploration with basic descriptive statistics and visualizations.

ISQA 8700 DATA MINING: THEORY AND PRACTICE (3 credits)

This course provides students theoretical issues as well as practical methods for conducting data mining process, including the implementation of a warehouse. After covering the essential concepts, issues, techniques to build an effective data warehouse, this course emphasizes the various techniques of data mining, such as association, classification, clustering and prediction for on-line analyses within the framework of data warehouse architectures. This course also promotes students to conduct a real-life data analyzing project in Big Data Era.

Prerequisite(s)/Corequisite(s): ISQA 8050 and ISQA 8310 and ISQA 8040, not open to non-degree graduate students.

ISQA 8720 APPLIED STATISTICAL MACHINE LEARNING (3 credits)

This course focuses on advanced techniques in the analysis and evaluation of data, using both supervised and unsupervised methods. It covers the main types of statistical learning models needed for complex data analytics problems, as well as aspects of model development and optimization.

Topics include: Linear and Non-Linear Regression Models, Classification, Resampling Methods, Model Selection and Regularization, Decision Trees, Model Boosting and Bagging, Support Vector Machines, and Clustering methods. This is an applied, hands-on course that will use a state-of-the-art statistical tool to implement the discussed approaches in assignments and a course project and focuses on the understanding and application of the concepts.

Prerequisite(s)/Corequisite(s): ISQA 8156 (B- grade or better) and the following topics: The equivalent of two classes of statistics and/or advanced mathematics and a minimum of one semester of applying R in courses and/or projects

ISQA 8736 DECISION SUPPORT SYSTEMS (3 credits)

This course examines a set of information systems which specifically support managerial decision makers: Decision Support Systems, Group Decision Support Systems, Executive Information Systems, Data Warehouses, Expert Systems, and Neural Networks. This course explores the development, implementation, and application of these systems, how these systems can be applied to current business problems, as well as how organizational issues impact the implementation and usage of these systems. (Cross-listed with ISQA 4730)

Prerequisite(s)/Corequisite(s): CIST 2100 or equivalent.

ISQA 8750 STORYTELLING WITH DATA (3 credits)

This course provides an in-depth study of how to build a compelling story using data for business professionals to make winning arguments, it provides an overview of a number of technologies and research disciplines that enabled the power of data visualization. Data visualization is critical to managing large volumes of data, and can be defined as the science (analytical) and art (design) of manipulating and presenting data for expression and cognitive recognition. Data visualization involves using data in a way that humans can clearly understand, supporting efforts by organization to gain competitive advantage by changing operations, decision-making, and strategic initiatives.

Prerequisite(s)/Corequisite(s): CSCI 1620 or equivalent. Admission into the UNO graduate program, basic web development or work experience with comparable grounding in programming, scripting concepts & technologies and permission by the instructor is needed.

ISQA 8810 INFORMATION TECHNOLOGY PROJECT FUNDAMENTALS (3 credits)

The course will integrate concepts and techniques from management science, psychology, organizational behavior, & administration change to identify, understand & propose solutions to the problems of project management. The purpose of the course is to prepare the graduate for project participation and leadership.

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8820 PROJECT RISK MANAGEMENT (3 credits)

This course will cover project risk management, i.e., the process of measuring or assessing risk in projects and then developing strategies to manage the risk. The topics covered will include: Risk Management Planning, Risk Identification, Quantitative Risk Analysis, Qualitative Risk Analysis, Risk Response Planning, and Risk Monitoring and Control will be covered in detail. Students will learn how to apply and use the tools and techniques needed to perform these project management tasks. A collection of readings on risk management from the empirical literature coupled with risk management standards from organizations such as IEEE and the Project Management Institute (PMI) will be used to provide the student with an excellent foundation in risk management and control.

Prerequisite(s)/Corequisite(s): ISQA 8810 or permission of instructor.

ISQA 8900 INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS (1-3 credits)

The content of the course will vary. However, both the student and the faculty member must sign an Independent Research Agreement and file it with the Master of Science in Management Information Systems Graduate Program Committee before registration for the course. This agreement will detail the project, the schedule for its completion, the form of the output, the method of evaluation and other relevant information pertaining to the project.

Prerequisite(s)/Corequisite(s): Permission of instructor, and at least 12 hours of course work toward a M.S. in MIS should be completed.

ISQA 8910 INFORMATION SYSTEMS INTERNSHIP (1-3 credits)

Information Systems Internship provides students with an opportunity for practical application and further development of knowledge and skills acquired in the MS MIS degree program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s)/Corequisite(s): Permission of the instructor required. Students must have completed a minimum of 18 credit hours towards the MS MIS program. Not open to non-degree graduate students.

ISQA 8950 CAPSTONE MANAGEMENT INFORMATION SYSTEMS (3 credits)

The course consists of a student executed Information Systems design project providing an in-depth practical experience. It typically covers system conceptualization, analysis, and design. It may also involve prototyping. The project will typically not include the actual implementation of the system. This course replaces the MS in MIS comprehensive exam requirement.

Prerequisite(s)/Corequisite(s): Students must have 6 credit hours or fewer left in the program. Students must have completed all core classes. Not open to non-degree graduate students.

ISQA 8990 THESIS (1-6 credits)

This course is a research project designed and executed under supervision of a thesis supervisory committee. Student will develop skills, including the ability to design, conduct, analyze, and report results in writing (i.e., thesis) of an original, independent, scientific investigation. The student's thesis supervisory committee must approve the project plan.

Prerequisite(s)/Corequisite(s): ISQA 8060 research methods or equivalent. Graduate major in MIS and approval of the thesis supervisory committee. Not open to non-degree graduate students.

ISQA 9010 FOUNDATIONS OF INFORMATION SYSTEMS RESEARCH (3 credits)

This course covers the following areas: (1) information systems as an academic discipline including classic readings in IS and its reference disciplines, (2) theory development and evaluation, (3) research methods applicability in IS.

Prerequisite(s)/Corequisite(s): Doctoral student standing in the information systems areas or with the permission of the instructor; ISQA 8060 or equivalent. Not open to non-degree graduate students.

ISQA 9020 TECHNICAL AND PROCESS ISSUES IN INFORMATION SYSTEMS RESEARCH (3 credits)

This seminar is a survey course on the technical and process issues in information systems research. The course balances the acquisition of knowledge about the conduct of research in technical and process issues with the application of that knowledge to research on information systems. Major topics include: software engineering, programming, data base systems, decision support systems, data warehousing and mining systems, object-oriented systems, adaptive and expert systems, client-service systems, information filtering and multimedia systems, information agents, mobile computing, telecommunications, and electronic commerce.

Prerequisite(s)/Corequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 9010 is recommended. Not open to non-degree graduate students.

ISQA 9030 BEHAVIORAL AND ORGANIZATIONAL ISSUES IN INFORMATION SYSTEMS (3 credits)

This seminar is a survey course on behavioral and organizational issues in information systems research. The course balances the acquisition of knowledge about the conduct of research in behavioral and organizational issues with the application of that knowledge to research on information systems. The course is intended for doctoral students in Information Technology or related areas.

Prerequisite(s)/Corequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 9010 is recommended. Not open to non-degree graduate students.

ISQA 9120 APPLIED EXPERIMENTAL DESIGN AND ANALYSIS (3 credits)

Constructing and analyzing designs for experimental investigations; completely randomized, randomized complete block and Latin-square designs, split-plot designs, incomplete block designs, confounded factorial designs, nested designs, and treatment of missing data, comparison of designs. The course will use computer-assisted analysis and graphic techniques included in software such as Statistical Analysis Software (SAS) or Statistical Package for Social Sciences (SPSS) or R (a programming language that provides a wide variety of statistical and graphical techniques. Similar to the S language).

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156 or consent of instructor. Not open to non-degree graduate students.

ISQA 9130 APPLIED MULTIVARIATE ANALYSIS (3 credits)

The use of multivariate analysis for solving business problems. Multivariate Analysis of Variance (MANOVA), factor, cluster, and discriminant analysis techniques in IT research. The course will use computer-assisted analysis and graphic techniques included in software such as Statistical Analysis Software (SAS) or Statistical Package for Social Sciences (SPSS) or R (A programming language that provides a wide variety of statistical and graphical techniques. Similar to the S language).

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156 or consent of instructor. Not open to non-degree graduate students.

ISQA 9150 RESEARCH IN INFORMATION TECHNOLOGY (3 credits)

Research methods in Information Technology involves an overview of the research process specific to problems in IT. Students will learn about theories in IT relevant to their areas of research. They will identify key components of research problems in IT, understand different types of research processes, develop research questions, and design research projects. They will learn to construct research instruments that enable them to collect data. They will also learn about the different data collection and analysis tools and techniques. As part of this course, students will take the CITI training and achieve the research readiness they need to succeed in the PhD in IT program.

Prerequisite(s)/Corequisite(s): Permission of the instructor. Not open to non-degree graduate students.

ISQA 9900 ADVANCED RESEARCH IN INFORMATION SYSTEMS (3 credits)

This course provides a format for exploration of advanced research areas that are of interest to doctoral students in the information systems and/or information technology area. The specific research area will vary from semester to semester, in keeping with research interests of faculty and students. Examples of areas include, but are not limited to, e-business technology, mobile commerce, intelligent agents e-enabled decision support, electronic collaboration, computer-mediated communications, human-computer interaction and information assurance.

Prerequisite(s)/Corequisite(s): Admission to PhD program in Information Technology or permission of instructor

ITIN 8000 TECHNOLOGY & INNOVATION-STATE OF THE ART (3 credits)

ITIN 8000 provides a regular forum for IT Innovation graduate students, where the latest developments in the field of IT Innovation are introduced and discussed. The course also functions as a central communication and collaboration hub for graduate students in IT Innovation. Participation is required.

Prerequisite(s)/Corequisite(s): Students in the MS in IT Innovation program may register. Not open to non-degree graduate students.

ITIN 8006 SPECIAL TOPICS IN IT INNOVATION (1-6 credits)

This course is designed to acquaint students with issues which are current to the field or emerging trends in the IT Innovation area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ITIN 4000).

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ITIN 8100 INTERMEDIA (3 credits)

This is an ongoing course that brings together students of the arts and students of scientific disciplines in order to facilitate and promote the creation of intermedia art, and to further explore shared resources, joint research, and exhibition/performance opportunities.

Prerequisite(s)/Corequisite(s): Instructor permission

ITIN 8210 DESIGN SCIENCE AND THEORY DEVELOPMENT (3 credits)

The purpose of this course is to help students understand theory, theoretical contributions, and design science. Students will approach such questions as: What is a theory? What makes a good theory? Why are theories just theories and not laws? What is not a theory? Following this introduction, we explore design science as a research methodology and Information Technology design theories. Ultimately, students create their own new studies around some design concept.

Prerequisite(s)/Corequisite(s): Graduate standing / permission of the instructor

ITIN 8220 DESIGN PROCESS (3 credits)

Inter-disciplinary design teams will work together to design and innovate products of the future. The design projects in the course are developed to directly address a problem brought forward by a technology company in the Omaha area in order to provide students with a design experience that directly impacts real-world product development. Students will focus on the technological (interface), physical (ergonomics) and aesthetic quality of design, and will learn how to conduct rigorous user studies in a laboratory setting. Teams will be cross disciplinary and consider all aspects of the design, creation, testing, and fabrication of the products.

ITIN 8256 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with BSAD 8726, ENTR 4720, ITIN 4720, MGMT 4720, MKT 4720).

Prerequisite(s)/Corequisite(s): Admission to a graduate program or instructor permission.

ITIN 8266 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, CSCI 8266, ITIN 4260).

ITIN 8300 RESEARCH FOUNDATIONS (3 credits)

This course serves as an introduction to research literature and research methodology in the innovation and creativity research domain. Students are introduced to skills, methodological issues, and bibliographic resources to enhance their ability in critically evaluating and conducting research in the IT Innovation field. Through a series of readings, in-class discussions, and lectures the student will select and define a research question, explore the various types of research designs and complete a literature review.

This course is structured to make research meaningful and significant and enable students to write effectively.

Prerequisite(s)/Corequisite(s): CIST 2500 or equivalent

ITIN 8900 INDEPENDENT STUDIES (1-3 credits)

A variable credit course for the graduate student who will benefit from independent reading assignments and research type problems. Independent study makes available courses of study not available in scheduled course offerings. The student wishing to take an independent study course should find a faculty member willing to supervise the course and then submit, for approval, a written proposal (including amount of credit) to the IT Innovation Graduate Program Committee Chair at least three weeks prior to registration.

Prerequisite(s)/Corequisite(s): Written permission required

ITIN 8940 ITIN CAPSTONE I (3 credits)

The purpose of the Information Technology Innovation (ITIN) capstone courses is for ITIN majors to explore, identify, evaluate, design, construct and implement a new innovative product that leverages information technology and includes an interdisciplinary field of study. The capstone is the culmination product of the specific various disciplines a student has selected as the unique combination for his or her degree. This course serves as part one of the capstone project for the ITIN Masters degree. The two courses for the ITIN capstone project are intended to be completed in two consecutive semesters (Fall/Spring).

Prerequisite(s)/Corequisite(s): Must be pursuing ITIN MS degree and have completed: two sections of ITIN 8000, ITIN 8220, 8300, and 3 hours of upper division courses in interdisciplinary area identified in the student's course plan. Not open to non-degree graduate students.

ITIN 8950 ITIN CAPSTONE II (3 credits)

The purpose of the ITIN capstone courses is for ITIN majors to explore, identify, evaluate, design, construct and implement a new innovative product that leverages information technology and an interdisciplinary field. The capstone is the culmination product for prospective graduate and utilizes the discipline(s) a student has selected as the unique combination for his or her degree. This course serves as part two of the capstone project for the Information Technology Innovation (ITIN) program. The two courses for the ITIN capstone project are taught in two consecutive semesters.

Prerequisite(s)/Corequisite(s): Must be pursuing ITIN MS degree and have completed: three sections of ITIN 8000, ITIN 8220, 8300, 8940 and 6 hours of upper division courses in interdisciplinary area identified in the student's course plan. Not open to non-degree graduate students.

ITIN 8990 THESIS (1-6 credits)

This course is required for the Master of Science degree in the MS in IT Innovation Program. The purpose of this course is to conduct original research in IT Innovation, under supervision of a faculty member, culminating in a paper document that represents the student's competency in their chosen field, as well as scholarly contributions. With consultation from their committee, MS in IT Innovation thesis students should be prepared to independently complete the writing of their thesis and successfully defend their thesis.

Prerequisite(s)/Corequisite(s): Graduate major in ITIN and approval of the Thesis Advisory Committee.

ITIN 9300 SOCIAL COMPUTING AND ITS APPLICATIONS (3 credits)

It is indisputable that social media and the Internet more broadly reshaped information disbursement and processing. Digital participation and communication has become the 'new normal' and the dividing line between off- and online communities is increasingly blurred. This leads to specific challenges in the extraction and analysis of online social media data, and the management of new communication.

Prerequisite(s)/Corequisite(s): Open to all currently-admitted doctoral students. Students should have a technical aptitude; experience with at least one web scripting language, (e.g. PHP, rails, python etc) is helpful. Experience with JSON is advantageous but not essential.

MATH 8016 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with CSCI 4010, CSCI 8016, MATH 4010).

Prerequisite(s)/Corequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

MATH 8036 MODERN ALGEBRA (3 credits)

Algebra is the study of mathematical manipulations that preserve something (like equality - when solving equations). The areas in which Algebra finds application are quite diverse, from Ancient Greek Geometry through to Modern Information Protection and Security (error correcting codes, data compression, and cryptography). This course begins with topics that should be familiar (such as ruler-and-compass constructions, and modular arithmetic) and builds upon this foundation through polynomial rings up to finite fields and basic group theory. (Cross-listed with MATH 4030).

Prerequisite(s)/Corequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better

MATH 8050 ALGORITHMIC GRAPH THEORY (3 credits)

Review of the basic concepts of graph theory. Introduction to perfect graphs and their characterizations. Main classes of perfect graphs and their properties. Algorithms for main problems of perfect graphs. Applications of perfect graphs in several fields such as scheduling, VLSI and communication networks. (Cross-listed with CSCI 8050).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and MATH 4150 or MATH 8156 or permission of instructor. Not open to non-degree graduate students.

MATH 8056 LINEAR ALGEBRA (3 credits)

Linear algebra is extensively utilized in the mathematical modeling of many natural phenomena. Many scientific and engineering disciplines, such as data science, chemical engineering and biology, make extensive use of the theory and techniques commonly present in basic to advanced linear algebra courses. The goal of this course is to help students to grasp a solid theoretical understanding of vectors, vector spaces, inner product spaces, linear transformations, eigenvalues, canonical forms, complex vectors, matrices, and orthogonality. By going through the materials in a mathematically rigorous way, students will develop deeper and more accurate intuitions of the basic concepts in linear algebra. Consequently, the applications of linear algebra will become much more transparent. (Cross-listed with MATH 4050).

Prerequisite(s)/Corequisite(s): MATH 2050 with a grade of C- or better; MATH 2030 or MATH 2230 or equivalent with a grade of C- or better; or permission

MATH 8060 ALGORITHMIC COMBINATORICS (3 credits)

This course includes classical combinatorial analysis graph theory, trees, network flow, matching theory, external problems, and block designs. (Cross-listed with CSCI 8060).

Prerequisite(s)/Corequisite(s): MATH 3100, CSCI 3100, MATH 8105 or CSCI 8105 or instructor's permission.

MATH 8080 DESIGN AND ANALYSIS OF ALGORITHMS (3 credits)

The course provides students an understanding of advanced topics in algorithms. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, dynamic programming, greedy algorithms, graph algorithms, and the theory of NP-Completeness. (Cross-listed with CSCI 8080).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 or equivalent. Not open to non-degree graduate students.

MATH 8105 APPLIED COMBINATORICS (3 credits)

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with CSCI 3100, CSCI 8105, MATH 3100).

MATH 8116 ABSTRACT ALGEBRA I (3 credits)

An introduction to group theory. Various classes of group are studied: symmetric groups, abelian, cyclic, and permutation groups. Basic tools are developed and used: subgroups, normal subgroups, cosets, the Lagrange theorem, group homomorphisms, quotient groups, direct products, and group actions on a set. The course culminates with the Sylow theorems in finite group theory. The theory is illustrated with examples from geometry, linear algebra, number theory, crystallography, and combinatorics. (Cross-listed with MATH 4110).

Prerequisite(s)/Corequisite(s): MATH 4050/MATH 8056 with a C- or better or MATH 4560/MATH 8566 with a C- or better or permission of instructor

MATH 8126 ABSTRACT ALGEBRA II (3 credits)

An introduction to ring and field theory. Various classes of commutative rings are considered including polynomial rings, and the Gaussian integers. Examples of fields include finite fields and various extensions of the rational numbers. Concepts such as that of an ideal, integral domain, characteristic and extension field are studied. The course culminates with an introduction to Galois theory. Applications include the resolution of two classical problems: the impossibility of angle-trisection and the general insolubility of polynomial equations of degree 5 or higher. (Cross-listed with MATH 4120)

Prerequisite(s)/Corequisite(s): MATH 4110/MATH 8116 with a C- or better or permission of instructor

MATH 8156 GRAPH THEORY & APPLICATIONS (3 credits)

Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 4150, CSCI 8156, MATH 4150).

Prerequisite(s)/Corequisite(s): MATH 2030 or permission of instructor.

MATH 8235 INTRODUCTION TO ANALYSIS (3 credits)

This course provides a theoretical foundation for the concepts of elementary calculus. Topics include real number system, topology of the real line, limits, functions of one variable, continuity, differentiation. (Cross-listed with MATH 3230).

Prerequisite(s)/Corequisite(s): MATH 1960 and MATH 2230 each with a grade of C- or better.

MATH 8236 MATHEMATICAL ANALYSIS I (3 credits)

Provides a theoretical foundation for the concepts of elementary calculus. Topics include ordered fields and the real number system, basic properties of complex numbers, metric space topology, sequences and series in \mathbb{R}^k , limits and continuity in a metric space, monotonic functions. (Cross-listed with MATH 4230).

Prerequisite(s)/Corequisite(s): MATH 3230/MATH 8235 or equivalent

MATH 8246 MATHEMATICAL ANALYSIS II (3 credits)

Provides a theoretical foundation for the concepts of classical Calculus (vector calculus included). Topics include sequences and series of functions, uniform convergence, power series, Fourier series, multivariable real differential and integral calculus, the Implicit Function Theorem, integration of different forms, and the important formulas, connecting those integrals, due to: Green, Gauss, Riemann, and Ostrogradski. (Cross-listed with MATH 4240).

Prerequisite(s)/Corequisite(s): MATH 4230/MATH 8236

MATH 8250 PARTIAL DIFFERENTIAL EQUATIONS (3 credits)

Partial differential equations (PDEs) are fundamental in the application of mathematics to science and engineering. Topics to be covered will include: Linear and nonlinear first-order equations, classification of second-order linear equations, elliptic, hyperbolic and parabolic equations and boundary value problems, and Green's functions.

Prerequisite(s)/Corequisite(s): MATH 1970, MATH 2350, or instructor's permission. MATH 4330/MATH 8336 is recommended, but not required.

MATH 8276 COMPLEX ANALYSIS (3 credits)

This course is an introduction to the theory of functions of a complex variable, a fundamental area of mathematics with multiple applications to science and engineering. Topics include the field of complex numbers, complex differentiation, the complex contour integral and Cauchy's integral formula, Taylor expansions and analytic functions, conformal mapping and Riemann's conformal equivalence theorem, residue theory and Laurent series, harmonic functions, and applications. (Cross-listed with MATH 4270).

Prerequisite(s)/Corequisite(s): MATH 3230/MATH 8235 or permission of the instructor.

MATH 8305 NUMERICAL METHODS (3 credits)

This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 3300, CSCI 8305, MATH 3300).

Prerequisite(s)/Corequisite(s): MATH 1960 with a C- or better or permission of instructor.

MATH 8306 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, CSCI 8306, MATH 4300).

Prerequisite(s)/Corequisite(s): MATH 2050 with a C- or better or permission of instructor.

MATH 8316 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, CSCI 8316, MATH 4310).

Prerequisite(s)/Corequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

MATH 8326 COMPUTATIONAL OPERATIONS RESEARCH (3 credits)

Survey of computational methods used in the solution of operations research problems. Topics include scripting to guide optimization software, metaheuristics for optimization, and basic machine learning algorithms. (Cross-listed with MATH 4320).

Prerequisite(s)/Corequisite(s): MATH 3200 and MATH 4300 each with a grade of C- or better or permission of instructor.

MATH 8336 INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS (3 credits)

This course introduces the basic methods of PDEs guided by applications in physics and engineering. The main topics to be covered include The Linear First order PDEs, Transport equations, Characteristics, Classification of PDEs, Separation of variables, Heat conduction, vibrating membranes, boundary value problems, Maximum principle, Sturm-Liouville problems, Fourier series, Fourier integrals, Harmonic functions, Legendre polynomials, Distributions, Green's functions. (Cross-listed with MATH 4330).

Prerequisite(s)/Corequisite(s): MATH 1970 with a C- or better and MATH 2350 with a C- or better, or permission of instructor; MATH 2050 recommended, not required.

MATH 8356 ORDINARY DIFFERENTIAL EQUATIONS (3 credits)

This course covers the theory of initial-, boundary-, and eigenvalue problems, existence theorems, real and complex linear systems of differential equations, and stability theory. There will be a strong emphasis on methods for finding solutions of initial and boundary value problems and analyzing properties of these solutions for various ordinary differential equations. (Cross-listed with MATH 4350).

Prerequisite(s)/Corequisite(s): MATH 1970 with a C- or better, MATH 2050 with a C- or better, and MATH 2350 with a C-, or better or instructor's permission.

MATH 8400 DYNAMICAL SYSTEMS AND CHAOS (3 credits)

Review of difference equations and differential equations, stability theory, periodic orbits, Lyapunov exponents, fractals, chaos, state reconstruction from time series data.

Prerequisite(s)/Corequisite(s): Permission from Instructor

MATH 8406 THE FINITE ELEMENT METHOD (3 credits)

Introduction to finite elements methods for solving ordinary and partial differential equations. Theoretical foundations of finite element methods for boundary value problems, approximation by piecewise polynomial functions, variation formulation of partial differential equations, basic error estimates. The Rayleigh-Ritz-Galerkin method, convergence of approximations, time-dependent problems, error analysis, discretization and computer implementation, applications to problems in elasticity, heat transfer, and fluid mechanics. (Cross-listed with MATH 4400).

Prerequisite(s)/Corequisite(s): MATH 1970, MATH 2050 and MATH 2350 all with a C- or better or instructor permission. MATH 3300/MATH 8305 and MATH 4330/MATH 8336 recommended. Students should be able to use a programming language (ie MATLAB) to complete computational assignments

MATH 8410 BOOLEAN NETWORKS (3 credits)

This course is focused on introduction to discrete dynamical networks, in particular logical networks, and their applications.

Prerequisite(s)/Corequisite(s): MATH 1960 (Calculus II), MATH 2230 (proof writing skills), MATH 4740 or equivalent (basic probability theory), basic computer skills; or permission of the instructor.

MATH 8430 LINEAR PROGRAMMING (3 credits)

This course includes a complete development of theoretical and computational aspects of linear programming. Basic theoretical foundations covered include polyhedra, convexity, linear inequalities and duality. Advanced topics such as decomposition and column generation are covered. Both simplex methods and interior point methods are included.

Prerequisite(s)/Corequisite(s): MATH 4300/MATH 8306

MATH 8440 NETWORK PROGRAMMING (3 credits)

A presentation of network flow models and optimization algorithms. Topics include pure, generalized, integer, and constrained network problems, plus special cases of each, including transportation, assignment, shortest-path, transshipment, and multicommodity.

Prerequisite(s)/Corequisite(s): MATH 4300/MATH 8306

MATH 8456 INTRODUCTION TO MACHINE LEARNING AND DATA MINING (3 credits)

This is an introduction to machine learning and data mining which covers the following topics with an emphasis on mathematical and statistical analysis: linear and nonlinear regression models, model selection and regularization methods, resampling methods, classification models, tree-based models, and unsupervised learning topics. If time allows, text mining and deep learning will also be introduced in the course. Statistical software will be used. (Cross-listed with MATH 4450, STAT 4450, STAT 8456)

Prerequisite(s)/Corequisite(s): MATH 4740/8746 with a C- or better or STAT 3800/8805 with a C- or better or permission of instructor.

MATH 8460 INTEGER PROGRAMMING (3 credits)

Advanced study in mathematical programming with integer or mixed integer variables. Topics include integer programming, model creation, developing solution algorithms, and applications of integer programming.

Prerequisite(s)/Corequisite(s): MATH 2030 or MATH 2230 Not open to non-degree graduate students.

MATH 8480 MULTI-AGENT SYSTEMS AND GAME THEORY (3 credits)

This course covers advanced topics in the area of coordination of distributed agent-based systems with a focus on computational aspects of game theory. The main topics covered in this course include distributed constraint satisfaction, distributed constraint optimization, and competitive and cooperative game theory. (Cross-listed with CSCI 8480).

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456. Suggested background courses: CSCI 4480 or CSCI 8486; CSCI 8080. Not open to non-degree graduate students.

MATH 8500 NUMERICAL LINEAR ALGEBRA (3 credits)

Topics covered in this course include error propagation, solutions of nonlinear equations, solutions of linear and nonlinear systems by various schemes, matrix norms and conditioning, and computation of eigenvalues and eigenvectors. (Cross-listed with CSCI 8500).

Prerequisite(s)/Corequisite(s): MATH 1960 and MATH 2050, or permission of instructor. Familiarity with computer programming is assumed.

MATH 8510 NUMERICAL DIFFERENTIAL EQUATIONS (3 credits)

Topics covered in this course include interpolation and approximations, numerical differentiation, numerical integration, and numerical solutions of ordinary and partial differential equations. (Cross-listed with CSCI 8510).

Prerequisite(s)/Corequisite(s): MATH 1970, MATH 2350, or permission of instructor. Familiarity with computer programming is assumed.

MATH 8520 ADVANCED TOPICS IN OPERATIONS RESEARCH (3 credits)

Advanced treatment of a specific topic in the area of operations research not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with CSCI 8520).

Prerequisite(s)/Corequisite(s): MATH 4300 or MATH 8306 or CSCI 4300 or CSCI 8306 or permission of the instructor.

MATH 8566 NUMBER THEORY & CRYPTOGRAPHY (3 credits)

An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 4560, CSCI 8566, MATH 4560).

Prerequisite(s)/Corequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

MATH 8616 INTRODUCTION TO TOPOLOGY (3 credits)

This is a proof-oriented course presenting the foundations of topology. Metric spaces and general topological spaces are introduced. The course explores the properties of connectedness, compactness and completeness, and operations of Tychonoff product and hyperspace. (Cross-listed with MATH 4610).

Prerequisite(s)/Corequisite(s): MATH 3230/8235 with a C- or better or permission of instructor.

MATH 8620 GENERAL TOPOLOGY (3 credits)

General topology has roots in geometry and analysis through the study of spaces, dimensions, and transformations. Its development was influenced by the parallel development of (axiomatic) set theory. This course introduces topological spaces from the point of view of separation axioms, countability axioms, compactifications, Baire property, and other completeness properties. Basic concepts of Descriptive Set Theory are also introduced.

Prerequisite(s)/Corequisite(s): MATH 4610/8616 or permission of instructor.

MATH 8626 ITERATED FUNCTION SYSTEMS AND FRACTALS (3 credits)

This is a proof-oriented course presenting the foundations of fractal geometry. It introduces students to the beauty, magic, and applications of fractals and iterated function systems, with emphasis on the mathematics behind it all. Topics range from contractions on hyperspaces and their fixed points to fractal dimensions to Julia and Mandelbrot sets. (Cross-listed with MATH 4620).

Prerequisite(s)/Corequisite(s): MATH 8616 with a C or better or permission of instructor.

MATH 8645 MODERN GEOMETRY (3 credits)

This course will study the modern foundations of Euclidean and Non-Euclidean Geometry. Included will be a study of the principles of axiomatic systems. Euclidean Geometry will be investigated using Hilbert's axioms for Euclidean geometry (or another equivalent Euclidean geometry axiom set). Hyperbolic geometry will be encountered through the models of Klein and Poincare. Neutral geometry with Lambert and Saccheri quadrilaterals will be studied. Finite geometries and projective geometries will also be explored. (Cross-listed with MATH 3640).

Prerequisite(s)/Corequisite(s): MATH 2230 with a grade of C- or better.

MATH 8650 INTRODUCTION TO PROBABILITY MODELS (3 credits)

This is an introduction to probability modeling including Poisson Processes, Markov chains, birth-death processes, queueing models and renewal theory. Applications will be an important part of the course.

Prerequisite(s)/Corequisite(s): MATH 4740/MATH 8746 or STAT 3800/STAT 8805 or permission of instructor.

MATH 8666 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)

This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, CSCI 8666, MATH 4660).

Prerequisite(s)/Corequisite(s): MATH 2030. Recommended: CSCI 3320/ CSCI 8325.

MATH 8670 TOPICS IN PROBABILITY AND STATISTICS (3 credits)

A variable topics course in probability and or statistics. Topics covered will include one or more of the following: reliability theory and applications in engineering and science, advanced probability and statistical models, theory of parametric estimation and applications, and advanced probability theory and application.

Prerequisite(s)/Corequisite(s): MATH 4740/MATH 8740 or STAT 3800/STAT 8800 or permission from instructor

MATH 8720 RELIABILITY THEORY (3 credits)

This course covers the probabilistic and statistical aspects of reliability theory. Reliability theory is concerned with the probability that a component or system is successfully working over a given time period or at a specific time instance. (Cross-listed with STAT 8720).

MATH 8746 INTRODUCTION TO PROBABILITY AND STATISTICS I (3 credits)

A mathematical introduction to probability theory including the properties of probability; probability distributions; expected values and moments; specific discrete and continuous distributions; and transformations of random variables. (Cross-listed with MATH 4740).

Prerequisite(s)/Corequisite(s): MATH 1970 and either MATH 2230 or MATH 2030 or permission of instructor.

MATH 8756 INTRODUCTION TO PROBABILITY AND STATISTICS II (3 credits)

Theory and methods of statistical inference including sampling distributions, estimators, estimation, and statistical hypotheses. (Cross-listed with MATH 4750).

Prerequisite(s)/Corequisite(s): MATH 4740/MATH 8746

MATH 8766 TOPICS IN APPLIED MATHEMATICS (3 credits)

Selection of such topics such as dynamical systems and chaos, Boolean networks, modeling of discrete or continuous systems, matrix theory, difference equations, information theory, discrete events simulation and other approved by Upper Curriculum Committee. (Cross-listed with MATH 4760).

Prerequisite(s)/Corequisite(s): MATH 3100/CSCI 3100

MATH 8855 HISTORY OF MATHEMATICS (3 credits)

An overview of the history of mathematics and famous mathematicians via studying and solving famous mathematical problems, exploring famous mathematical theorems, and studying the biographies of famous mathematicians. (Cross-listed with MATH 3850).

Prerequisite(s)/Corequisite(s): MATH 1970 and MATH 2230

MATH 8960 MASTER'S PROJECT (1-6 credits)

An applied project, designed and executed under the supervision of both a faculty and industry advisor. In the project the student will apply their mathematical and/or statistical skills to an applied problem. The student will present their results via a written report and oral presentation. (Cross-listed with STAT 8960).

Prerequisite(s)/Corequisite(s): Permission of faculty advisor and graduate program chair. Not open to non-degree graduate students.

MATH 8970 INDEPENDENT GRADUATE STUDIES (1-3 credits)

Under this number a graduate student may pursue studies in an area that is not normally available to him/her in a formal course. The topics studied will be a graduate area in mathematics to be determined by the instructor.

Prerequisite(s)/Corequisite(s): Permission of instructor and graduate classification.

MATH 8980 GRADUATE SEMINAR (1-3 credits)

A graduate seminar in mathematics.

MATH 8990 THESIS (1-6 credits)

An independent research project, written under the supervision of a graduate adviser in the department of mathematics. Approval of the topic and the completed project by thesis committee is required.

Prerequisite(s)/Corequisite(s): Approval of the topic and the completed project by thesis committee is required.

MATH 9110 ADVANCED TOPICS IN APPLIED MATHEMATICS (3 credits)

Advanced treatment of a specific topic in the area of applied mathematics not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ.

Prerequisite(s)/Corequisite(s): Permission of instructor.

MATH 9230 THEORY OF FUNCTION OF REAL VARIABLES (3 credits)

A theoretical foundation for the concepts of measure theory and integration on a measure space as developed by Henry Leon Lebesgue (followed by others) starting the first decade of the 20th century including a comparison with Riemann's classical construction of integration theory known from classical calculus. Topics include: Real number system, convergence, continuity, bounded variation, differentiation, Lebesgue-Stieltjes integration, abstract measure theory, and the L_p spaces.

Prerequisite(s)/Corequisite(s): MATH 4230/MATH 8236 or permission of the instructor

STAT 8005 STATISTICAL METHODS I (3 credits)

An introduction to descriptive statistics, measures of central value and dispersion, probability and distributions, population and sample, simple linear regression, statistical inference: point estimation, confidence intervals, hypotheses testing, two population comparison, goodness-of-fit tests, analysis of variance. Statistical software like Minitab or Excel will be utilized in the course. (Cross-listed with STAT 3000).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220 or equivalent with a grade of C- or better.

STAT 8416 INTRODUCTION TO DATA SCIENCE (3 credits)

Topics covered in this course include Data Technology, Methods of gathering and cleaning structured or unstructured data, Exploratory data analysis & Dynamic and interactive data visualization, Modeling data for prediction, forecasting or classification. (Cross-listed with STAT 4410).

Prerequisite(s)/Corequisite(s): MATH 4740 with a C- or better or concurrent; or STAT 3800 with a C- or better or concurrent; or permission of instructor. Students should be comfortable with computer programming & have knowledge of data structures & preliminary statistical methods.

STAT 8426 EXPLORATORY DATA VISUALIZATION AND QUANTIFICATION (3 credits)

Topics covered in this course include Exploratory Data Visualization for categorical/qualitative single/multivariate data, Grammar of Graphics, Organizing Data for Visualization, Methods of Displaying Data that include dynamic and interactive visualization, Visual Diagnostics of Statistical Models and Visual Statistical Inference. Students planning to enroll in this course should be comfortable with computer programming and have knowledge of data structures and preliminary statistical methods. (Cross-listed with STAT 4420)

Prerequisite(s)/Corequisite(s): STAT 3800 or STAT 8805 or MATH 4740 or MATH 8746 with a grade of C- or better or another introductory probability/statistics course with a grade of C- or better, and MATH 3200 or CSCI 1620 with a grade of C- or better, or permission of instructor.

STAT 8436 LINEAR MODELS (3 credits)

This is an introduction to linear statistical models which will include: simple linear regression models, multiple linear regression models, ANOVA models including one way ANOVA, randomized block design, and other designs. Also, logistic regression models, Poisson regression models, bootstrapping/resampling models, survival analysis. Some necessary linear algebra and mathematical statistics ideas will be covered in the course also. If time allows, some mixed models and/or survival models. Much use of computer software will be made. (Cross-listed with STAT 4430)

Prerequisite(s)/Corequisite(s): MATH 4750 or MATH 8756 w/ a grade of C- or better or STAT 3800 or STAT 8805 w/ a C- or better or instructor permission based on students' having taken a basic statistics course w/ a grade of C- or better & having at least a basic knowledge of calculus.

STAT 8446 TIME SERIES ANALYSIS (3 credits)

The objective of this course is to learn and apply statistical methods for the analysis of data that have been observed over time. Topics covered include: Models for Stationary and Non-Stationary Time Series, Model Specification, Parameter Estimation, Model Diagnostics, Forecasting, Seasonal Models, Time Series Regression, and Spectral Analysis. Statistical software will be used. (Cross-listed with STAT 4440)

Prerequisite(s)/Corequisite(s): MATH 4750 or MATH 8756 w/ a grade of C- or better or STAT 3800 or STAT 8805 w/ a C- or better or another introductory probability/statistics course w/ a C- or better, or permission of instructor.

STAT 8456 INTRODUCTION TO MACHINE LEARNING AND DATA MINING (3 credits)

This is an introduction to machine learning and data mining which covers the following topics with an emphasis on mathematical and statistical analysis: linear and nonlinear regression models, model selection and regularization methods, resampling methods, classification models, tree-based models, and unsupervised learning topics. If time allows, text mining and deep learning will also be introduced in the course. Statistical software will be used. (Cross-listed with MATH 4450, MATH 8456, STAT 4450)

Prerequisite(s)/Corequisite(s): MATH 4740/8746 with a C- or better or STAT 3800/8805 with a C- or better or permission of instructor.

STAT 8700 BAYESIAN STATISTICS (3 credits)

The objective of this course is to introduce the Bayesian approach to statistical inference. Topics covered include: Review of probability, Bayes theorem, and Likelihood; The Bayesian methodology, prior and posterior distributions; Choices of prior distribution, conjugate and Jeffreys priors; Credible intervals and inference; Bayesian computation - Markov Chain Monte Carlo and the Gibbs Sampler; Hierarchical models; Regression models.

Prerequisite(s)/Corequisite(s): MATH 8756 or equivalent or permission of instructor.

STAT 8710 DESIGN AND ANALYSIS OF EXPERIMENTS (3 credits)

Introduction to design and analysis of controlled experiments. The goal of experimental design is to be able to construct an experiment to identify which factors most impact the response and do so in an efficient manner. Statistical software will be used. Types of designs studied include: Randomized Block Designs, Latin Square Designs, Incomplete Block Designs, Factorial Designs, and Nested Designs.

Prerequisite(s)/Corequisite(s): MATH 4750/8756 or permission of instructor.

STAT 8720 RELIABILITY THEORY (3 credits)

This course covers the probabilistic and statistical aspects of reliability theory. Reliability theory is concerned with the probability that a component or system is successfully working over a given time period or at a specific time instance. (Cross-listed with MATH 8720).

Prerequisite(s)/Corequisite(s): Either MATH 4740 or STAT 3800 or permission of the instructor. Some basics of mathematical analysis are helpful when discussing limit theorems, but not required.

STAT 8805 APPLIED ENGINEERING PROBABILITY AND STATISTICS (3 credits)

An introduction to the application of probability and statistics to engineering problems. Topics include: probability and probability distributions, mathematical expectation, distribution of random variables, binomial, Poisson, hypergeometric, gamma, normal, and t-distributions, Central Limit Theorem, confidence intervals, hypothesis testing. If time allows, some linear regression and contingency tables. Credit for both MATH 4740 and STAT 3800 will not be given. (Cross-listed with STAT 3800)

Prerequisite(s)/Corequisite(s): MATH 1970

STAT 8960 MASTER'S PROJECT (1-6 credits)

An applied project, designed and executed under the supervision of both a faculty and industry advisor. In the project the student will apply their mathematical and/or statistical skills to an applied problem. The student will present their results via a written report and oral presentation. (Cross-listed with MATH 8960).

Prerequisite(s)/Corequisite(s): Permission of faculty advisor and graduate program chair. Not open to non-degree graduate students.

Economics

Degree Programs Offered

- Economics, MA (p. 1143)
- Economics, MS (p. 1145)
- Business Administration, MBA and Economics, MS (MBA/ECON) (p. 1040)
- Economic Education Certificate (p. 1149)

ECON 8010 SEMINAR IN PUBLIC FINANCE (3 credits)

This course is designed to develop the tools of applied welfare economics and to use these tools to evaluate the expenditure and tax decisions of governments. The structure, effects and reform of the U.S. individual and corporate income taxes, social security and healthcare system will be emphasized. Government debt and deficits will also be discussed.

Prerequisite(s)/Corequisite(s): ECON 3200 or ECON 8210 or BSAD 8100 or permission

ECON 8020 ENVIRONMENTAL ECONOMICS AND MANAGEMENT (3 credits)

This course covers topics related to environmental economics and policy, with an emphasis on comparative policy analysis and business strategies towards the environment. (Cross-listed with BSAD 8020).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220 or BSAD 8180, or permission of the instructor. Not open to non-degree graduate students.

ECON 8050 ECONOMIC EDUCATION (3 credits)

A study and examination of economic principles and how they can be related to the teacher's classroom presentation. This course is designed to furnish the k-12 teacher with sufficient background and understanding to aid in the recognition of economic issues and the teaching of economic concepts and principles.

Prerequisite(s)/Corequisite(s): No previous course work in economics. Not open to Economics majors.

ECON 8200 SEMINAR IN MICRO ECONOMIC THEORY (3 credits)

The course covers major topics in microeconomic theory. The major topics covered are the theory of consumer behavior, theory of production and cost, theory of the firm, pure exchange economy, general equilibrium, and welfare theory.

Prerequisite(s)/Corequisite(s): ECON 3200, ECON 3220 and ECON 8306 or permission.

ECON 8210 MANAGERIAL ECONOMICS (3 credits)

Microeconomics for graduate students of business. Economic analysis of the business firm and its environments, with emphasis on market structure, production possibilities and cost factors. Additional consideration is given to the theory of the firm under conditions of uncertainty. (Cross-listed with BSAD 8100).

Prerequisite(s)/Corequisite(s): Graduate student in economics and ECON 2200 or equivalent.

ECON 8216 INDUSTRIAL ORGANIZATION (3 credits)

In this class we will examine why firms and industries behave the way that they do. We will explore why some industries face intense competition while others enjoy large profits, why some industries offer only bundles, and why some firms buy up their supply chain when others do not. This theoretical course will illuminate un-theoretical implications to your life and future business ventures. This course will use your economic knowledge, a bit of psychology (behavioral economics) and game theory to answer questions like "Why does everyone hate the cable company?" and "Why are CEOs given so many stock options?" (Cross-listed with ECON 4210).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 8220 SEMINAR IN MACRO THEORY (3 credits)

This course traces the development of macroeconomic theory from the classical point of view to current schools of thought. Keynesian, neo-Keynesian and neo-classical models are developed.

Prerequisite(s)/Corequisite(s): ECON 3200 or ECON 8210 or BSAD 8100, ECON 3220, and ECON 8306, or permission.

ECON 8230 BUSINESS CONDITIONS ANALYSIS (3 credits)

This course is concerned with the statistical measurement and evaluation of general business conditions, as well as the adaptation of business policies to changing business conditions. Emphasis is placed upon the practical application of statistical analysis techniques to business situations within the framework of the aggregate economy.

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220.

ECON 8290 RESEARCH METHODS IN ECONOMICS AND BUSINESS (3 credits)

Covers the methodology of economics: choosing a research topic, literature search tools, data source identification, data summary techniques, basic statistical data analysis using statistical packages, and clear economics writing. The student will become familiar with these techniques through text materials, journal studies, and completion of an empirical economics paper.

Prerequisite(s)/Corequisite(s): ECON 3200, ECON 3220, or equivalents, or permission of the instructor. Not open to non-degree graduate students.

ECON 8300 ECONOMETRICS (3 credits)

The study of the underlying assumptions, techniques and applications of single and multiple equation regression analysis in economics.

Prerequisite(s)/Corequisite(s): Basic Statistics, ECON 8306/ECON 4300, or permission. Not open to non-degree graduate students.

ECON 8306 QUANTITATIVE APPLICATIONS IN ECONOMICS AND BUSINESS (3 credits)

The study and application of modern quantitative techniques to problem-solving in economics and business. It is designed to help the student to translate verbal arguments in economics and business into their mathematical equivalents, to improve analytical skills, and to attain proficiency in marginal analysis, equilibrium analysis, static optimization, and comparative statics analysis. It covers topics such as exponential and logarithmic functions and their applications, linear algebra and its applications, derivatives and their applications, maximization of functions with one variable and multi variables, maximization with non negativity constraints, and integral calculus and its applications in economics and business. (Cross-listed with ECON 4300).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, or BSAD 8180.

ECON 8310 BUSINESS FORECASTING (3 credits)

The course will cover forecasting tools and applications applied to business settings. We will cover traditional Econometric forecasting methods in the first half of the class. In the second half of the course, we will focus on models in predictive analytics and machine learning, since these models are quickly becoming critical tools for forecasters in many settings. The course will include lecture and lab time, and labs will be focused on teaching students how to implement the models discussed in lectures. (Cross-listed with BSAD 8080).

Prerequisite(s)/Corequisite(s): ECON 8320 (or equivalent programming experience) AND ECON 8300 (or equivalent multivariate regression analysis coursework) or permission of instructor. Not open to non-degree graduate students.

ECON 8316 BUSINESS INTELLIGENCE AND REPORTING (3 credits)

The course will teach students to use state-of-the-art Business Intelligence (BI) software to generate reports and information from data. BI software is used to inform decision-making in industries from transportation to medicine, from marketing to government, and is facilitated by rapidly increasing access to data in all industries. Students will learn to employ best practices in visualization and verbal communication as they are trained to create valuable insights from data and convey those insights to stakeholders. Additionally, the course will aid students in preparing for certification in the use of state-of-the-art BI software. (Cross-listed with ECON 4350).

Prerequisite(s)/Corequisite(s): ECON 3310 OR ECON 8320 (or concurrent enrollment) AND BSAD 2130 (or equivalent) OR Instructor Approval

ECON 8320 TOOLS FOR DATA ANALYSIS (3 credits)

The course will cover basic principles of programming languages, as well as libraries useful in collecting, cleaning and analyzing data to answer research questions. The course will utilize basic Economic principles and Econometric methods as inspiration for assignments and projects throughout the duration of the course, and will do so in a way that is accessible to non-Economists. This course is intended to introduce the student to the Python programming language as a tool for conducting data analysis. While the course uses Python, the student should be able to move to other languages frequently used in data analysis using the principles taught in this course.

Prerequisite(s)/Corequisite(s): ECON 2200 or BSAD 8150 (or equivalent); BSAD 2130 or equivalent; or instructor approval.

ECON 8326 NATURAL RESOURCE ECONOMICS (3 credits)

This course introduces students to the economics and management of Earth's natural resources. We address questions such as: Are we running out of natural resources? Are we using resources in a sustainable fashion? What role do markets play in resource use? We will address issues related to fossil-based resources, minerals, fisheries, water, land, forests and other associated topics. The course covers the basic theoretical framework for understanding the optimal rate of resource use, identifies the factors that determine the actual rate of use, and considers and evaluates various public policy prescriptions. (Cross-listed with ECON 4320).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, BSAD 8150 or permission of instructor.

ECON 8330 DATA ANALYSIS FROM SCRATCH (3 credits)

Econometrics is routinely taught as an application class using a 'black box' like Stata or SAS to perform calculations. This class takes a different approach. Using the Python programming language, we build all estimators from scratch. Additionally, we introduce numerous non-parametric and simulation techniques. This approach to econometrics results in a stronger understanding of statistical assumptions and methods, a better understanding of when a method is appropriate, and stronger programming techniques. Furthermore, a deeper understanding of the underlying mechanics provides the student the ability to program custom procedures not already built into popular software packages.

Prerequisite(s)/Corequisite(s): A multivariate or regression analysis course such as ECON 8300, ISQA 9130 or STAT 8436, and a programming class such as ECON 8320 or equivalent programming experience; or instructor approval. Not open to non-degree graduate students.

ECON 8346 ECONOMICS OF TECHNOLOGY (3 credits)

The seminar discusses whether innovation is more driven by demand or supply forces, the optimal timing of adoption of new technology, whether new technology benefits workers and consumers, and whether government is successful at supporting promising new technology. (Cross-listed with ECON 4340).

Prerequisite(s)/Corequisite(s): ECON 2200 or BSAD 8180 or permission of the instructor.

ECON 8456 DOMESTIC MONETARY THEORY AND POLICY (3 credits)

The course will introduce students to topics in money and banking, financial institutions, markets, financial instruments, and monetary theory in order to enhance financial decision making and enable students to effectively analyze economic news in media such as the Wall Street Journal, The New York Times, Business Week, Barrons, The Economist, and other related business publications. This knowledge will enable students to formulate their own views about the current economic environment, government policies, and responses to economic environments. (Cross-listed with ECON 4450).

ECON 8576 ECONOMIC CONDITIONS ANALYSIS (3 credits)

This course teaches students how to conduct an economic analysis of, and produce an economic forecast for, a local economy such as a state, county, or metropolitan area. Students will learn where to find data, how to analyze that data, how to develop models with the data, and how to present the data in a clear, concise, and jargon-free manner. The final published report will be authored by the students registered in the course. All students will contribute equally to the final report. The instructor will ensure equal participation. (Cross-listed with ECON 4570).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, or Permission from the instructor

ECON 8600 HEALTH ECONOMICS (3 credits)

This course is designed to help students understand how the theories and models of economics can be applied to the study of health and health care. The examination of the markets (demand and supply) for health, health care and health insurance is stressed. In addition, the economic analytic tools such as microeconomic theories and economic evaluation methods also will be reviewed and introduced. The objective of this course is to equip students with the knowledge tools to examine and analyze the problems issues of health care from the perspective of economics.

Prerequisite(s)/Corequisite(s): ECON 2200 or equivalent.

ECON 8616 INTERNATIONAL TRADE (3 credits)

An analysis of the character of international economic relations. Subjects covered include the economic basis for international specialization and trade, the economic gains from trade, commercial policy, economic integration and economic growth. (Cross-listed with ECON 4610).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8626 INTERNATIONAL MONETARY ECONOMICS (3 credits)

An analysis of the international monetary system. Subjects covered include the balance of payments adjustment mechanism, alternative exchange rate systems, external effects of monetary and fiscal policy, foreign investments and international monetary reform. (Cross-listed with ECON 4620).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8666 INTERNATIONAL ECONOMIC DEVELOPMENT (3 credits)

This course introduces theories and application of economic development and growth, economic problems facing developing countries, analyzes domestic economic issues (e.g., per capita GDP, income distribution, population, unemployment, urbanization, education, fiscal policies, and financial policies), and international economic issues (e.g., trade, foreign investment, and foreign debt). Financial crises, debt crises, and economic recovery will be discussed. (Cross-listed with ECON 4660).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8736 ECONOMICS OF ENTREPRENEURSHIP (3 credits)

This course will review economic theories of entrepreneurship with special emphasis on Schumpeter's theory of creative destruction. The main focus of the seminar will be on the "high-level" entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 4730, BSAD 8736.)

Prerequisite(s)/Corequisite(s): ECON 2200 or permission of the instructor for all students.

ECON 8856 ECONOMICS OF URBAN AND REGIONAL DEVELOPMENT (3 credits)

This course will consider factors and trends in development at the global and national level but will focus primarily on economic development at the state, local, and regional levels in the United States. The focus of this course will be real world strategic planning for economic development. (Cross-listed with ECON 4850).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 8910 SPECIAL STUDIES IN ECONOMICS (1-3 credits)

(May be repeated up to 6) A series of special courses, each designed to focus on current major issues and developments in a specific area of economics or business, scheduled as a workshop or seminar according to purpose.

Prerequisite(s)/Corequisite(s): Graduate student in good standing and as indicated for specific workshop or seminar.

ECON 8916 SPECIAL TOPICS IN ECONOMICS (1-3 credits)

(May be repeated up to 6 hours) A series of special courses each designed to focus on current major topics and developments in a specific area of economics or business, scheduled as a workshop or seminar according to purpose. (Cross-listed with BSAD 8916, ECON 4910).

Prerequisite(s)/Corequisite(s): Graduate student in good standing or advanced undergraduate student and as indicated for specific workshop or seminar.

ECON 8920 INDEPENDENT STUDY (1-3 credits)

Guided independent study and research.

Prerequisite(s)/Corequisite(s): Graduate student in economics and permission of instructor.

ECON 8940 ECONOMIC INTERNSHIP (1-3 credits)

Guided internship in a firm or organization that makes use of, or extends, the student's skill in economics.

Prerequisite(s)/Corequisite(s): Completion of at least nine hours of graduate level economics and permission of instructor.

ECON 8990 THESIS (1-6 credits)

An independent research project, written under the supervision of a graduate adviser in the department of economics. Approval of the topic and the completed project by departmental committee is required.

Prerequisite(s)/Corequisite(s): Approval of the topic and the completed project by departmental committee is required.

Economics, MA

Department of Economics, College of Business Administration

Vision Statement

The science of economics creates a deep understanding of individual behavior, firm dynamics, markets, and some of the world's most interesting and challenging problems. Economics is a way of thinking that provides generalized tools to the practitioner to solve business, social, political, and many other issues faced by the modern organization.

The graduate program in economics is designed to provide a solid background in theory, quantitative methods and application appropriate to the needs of economists involved in the analysis of domestic and international business and economic conditions, financial analysis, policy analysis, forecasting, simulation and related work. In addition, the program prepares students for further graduate work in economics and related fields.

Program Contact Information

Admissions

Application Deadlines

NOT APPLICABLE

New economics graduate students will be admitted only to the MS economics program (non-thesis option). After completing nine (9) hours of coursework in the MS in economics program, a student may submit a written request to the economics graduate program committee to transfer from the MS program to the MA (thesis option) program. Students are strongly encouraged to seek the advice of the economics graduate program advisor prior to submitting the written request. The student's request should include a thesis proposal written in consultation with a student-identified main thesis advisor (must be a tenure-track faculty in the economics department) who will serve as the chair of the thesis committee. In addition, the student should include an unofficial graduate transcript, a writing sample, and any other relevant information in the request. The graduate program committee, based on its evaluation of the student's potential to complete a quality master's thesis, will approve or deny this request. Upon transfer to the MA program an oral defense of the proposal will be scheduled and the thesis committee members will approve the scope of work. If the graduate program committee denies the student's request to transfer to the MA program, the student may submit a second (and final) written request to transfer to the MA program with supporting materials to the graduate program committee after he/she has completed 18 credit hours of coursework in the MS in economics program.

Degree Requirements

Code	Title	Credits
Required Core Courses		
ECON 8290	RESEARCH METHODS IN ECONOMICS AND BUSINESS	3
ECON 8306	QUANTITATIVE APPLICATIONS IN ECONOMICS AND BUSINESS ¹	3
ECON 8200	SEMINAR IN MICRO ECONOMIC THEORY	3
ECON 8220	SEMINAR IN MACRO THEORY	3
ECON 8300	ECONOMETRICS	3
Electives and Concentrations		
Elective courses will be selected in consultation with the graduate program chair and advisor. Students are strongly encouraged to complete an area of concentration which requires nine hours of elective courses. Students' area(s) of concentration will appear on the transcript. Dual-level ("8-6") course(s) completed as an undergraduate cannot be repeated for graduate credit.		9-12
ECON 8010	SEMINAR IN PUBLIC FINANCE

Academic Performance

Students dismissed from the MS/MA economics program may request for reinstatement to the program by following this procedure. Write a reinstatement letter addressed to the economics graduate program committee and hand delivered to the economics graduate program advisor as soon as possible addressing the following points at the minimum:

1. Request for reinstatement;
2. Explanations for below par performance;
3. Arguments for why despite item #2 student be reinstated back into the program;
4. Describe activities student will do to ensure that performance moving forward will meet the quality of work standards set by Graduate Studies.

The economics graduate program committee will evaluate the student's request and inform the student of its decision as soon as practically possible.

Economics, MS

Department of Economics, College of Business Administration

Vision Statement

The science of economics creates a deep understanding of individual behavior, firm dynamics, markets, and some of the world's most interesting and challenging problems. Economics is a way of thinking that provides generalized tools to the practitioner to solve business, social, political, and many other issues faced by the modern organization.

The graduate program in economics is designed to provide a solid background in theory, quantitative methods and application appropriate to the needs of economists involved in the analysis of domestic and international business and economic conditions, financial analysis, policy analysis, forecasting, simulation and related work. In addition, the program

prepares students for further graduate work in economics and related fields.

Program Website (<http://www.unomaha.edu/college-of-business-administration/economics/graduate-programs/>)

Other Program Related Information

The Department of Economics has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing Bachelor of Science in Business Administration (with a concentration in Economics), Bachelor of Science in Economics, or Bachelor of Arts in Economics, desiring to pursue a Master of Science in Economics.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.5.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Students in the Fast Track program must only enroll in dual-level ECON courses (ECON 8xx6) as their graduate coursework prior to admittance to the graduate program.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

Students are strongly encouraged to apply as early as possible, especially if applying for assistantships or scholarships.

- Fall Admission:
June 1 for international applicants who are required to secure a new student visa

July 15 for all other applicants

- Spring Admission:
October 1 for international applicants who are required to secure a new student visa
December 1 for all other applicants
- Summer Admission:
March 1 for international applicants who are required to secure a new student visa
April 15 for all other applicants

Other Requirements

- Junior/senior GPA of at least 2.85 (on a 4.0 point scale)
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- Applicants must have completed courses equivalent to the following five foundation courses (UNO undergraduate courses):

Code	Title	Credits
ECON 2200	PRINCIPLES OF ECONOMICS (MICRO)	3
ECON 2220	PRINCIPLES OF ECONOMICS (MACRO)	3
ECON 3200	ECONOMIC THEORY: MICRO	3
ECON 3220	ECONOMIC THEORY: MACRO	3
BSAD 2130	PRINCIPLES OF BUSINESS STATISTICS	3

- Applicants meeting the minimum GPA and language requirement but lacking some foundation courses will be granted provisional admission status until all foundation courses are completed with grades of "B" (3.0/4.0) or above.
- New economics graduate students will be admitted only to the MS economics program (non-thesis option). After completing nine (9) hours of coursework in the MS in economics program, a student may submit a written request to the economics graduate program committee to transfer from the MS program to the MA (thesis option) program. Students are strongly encouraged to seek the advice of the economics graduate program advisor prior to submitting the written request. The student's request should include a thesis proposal written in consultation with a student-identified main thesis advisor (must be a tenure-track faculty in the economics department) who will serve as the chair of the thesis committee. In addition, the student should include an unofficial graduate transcript, a writing sample, and any other relevant information in the request. The graduate program committee, based on its evaluation of the student's potential to complete a quality master's thesis, will approve or deny this request. Upon transfer to the MA program, an oral defense of the proposal will be scheduled, and the thesis committee members will approve the scope of work. If the graduate program committee denies the student's request to transfer to the MA program, the student may submit a second (and final) written request to transfer to the MA program with supporting materials to the graduate program committee after he/she has completed 18 credit hours of coursework in the MS in economics program.

Degree Requirements

Code	Title	Credits
Required Core Courses		
ECON 8290	RESEARCH METHODS IN ECONOMICS AND BUSINESS	3

ECON 8300	ECONOMETRICS	3

Electives and Concentrations

Elective coursework will be selected in consultation with the graduate program chair and advisor. At least six hours must be graduate only courses. Students are strongly encouraged to complete an area of concentration which requires nine hours of elective courses. Students' area(s) of concentration will appear on the transcript. Dual-level ("8-6") course(s) completed as an undergraduate cannot be repeated for graduate credit.

Economic Education Certificate

Department of Economics, College of Business Administration

Vision Statement

The graduate certificate in economic education is to assist high school instructors who teach economics to obtain the 18 graduate credit hours needed to teach economics as a dual enrollment course. The Higher Learning Commission (HLC) requires that teachers must have at least 18 graduate credit hours in a given subject to teach classes that can be considered dual-enrollment. The graduate certificate is designed to expand high school teachers' economics knowledge both in theory and practice so they can deliver high quality classes at the college-level.

Educational Leadership Degree Programs Offered

- Educational Leadership, MS (p. 1153)
- Educational Administration & Supervision, EdS (p. 1154)
- Educational Administration, EdD (p. 1155)

EDL 8000 SPECIAL STUDIES IN EDUCATIONAL LEADERSHIP (3 credits)

This course will provide candidates in educational leadership with the opportunities and experiences of in-depth study of a specialized area of practice and research in school leadership.

Prerequisite(s)/Corequisite(s): Admission to Graduate Studies or permission of instructor.

EDL 8010 INTRODUCTORY RESEARCH METHODS (3 credits)

The Introductory Research Methods course will introduce graduate degree candidates to foundational topics in quantitative, qualitative, and mixed methods research. Particular attention will be given to aligning evidence based literature frameworks with research methodology and data analysis techniques. The course will also prepare graduate students to generate ethically considered research topics and formally evaluate and present research findings in written form.

Prerequisite(s)/Corequisite(s): Graduate Standing

EDL 8020 EDUCATIONAL POLICY AND LEADERSHIP (1 credit)

This course explores the expanded federal and state presence in local school districts. Historical and political factors influencing the governance of today's schools are explored, as well as current trends and policy decisions.

Prerequisite(s)/Corequisite(s): Acceptance to Graduate Studies or department permission.

EDL 8030 INTRODUCTION TO EDUCATIONAL LEADERSHIP (3 credits)

This course is designed to introduce the beginning school leadership candidate to theories and practices of organization, motivation, leadership, and change processes, in order to develop an understanding of schools as complex organizations and the nature and challenges of leadership.

Prerequisite(s)/Corequisite(s): Admission to UNO Graduate Studies or department permission.

EDL 8050 SCHOOL-COMMUNITY CONNECTIONS (3 credits)

School leaders engage the external and internal communities in their buildings and districts. This course assists candidates in developing an understanding of school-community relations, practicing the skills of positive influence with education stakeholders, and refining the dispositions of responsible citizenship by connecting to diverse community needs.

Prerequisite(s)/Corequisite(s): Admission to Graduate Studies or department permission.

EDL 8100 INDEPENDENT STUDY IN EDUCATIONAL LEADERSHIP (1-6 credits)

This course is designed to allow graduate candidates in educational leadership to pursue independent study of a topic under the direction and guidance of a faculty member. Topics studied and the nature of the learning activities are mutually agreed upon by the candidate and instructor. This course will prepare school leaders as practitioners and researchers who can meet the dynamic challenges of education.

Prerequisite(s)/Corequisite(s): Admittance to the doctoral program in educational administration/leadership, or instructor permission.

EDL 8310 ISSUES IN TECHNOLOGY FOR SCHOOL LEADERS (1 credit)

This class addresses the unique needs that those in administrative positions encounter in the constantly changing world of technology. Topics include: managing sustainability and obsolescence; ethics and policies for faculty, staff and students-including prevention of cyberbullying; technology for teaching and learning; and technology for business and accountability.

EDL 8320 ESSENTIALS OF DATA ANALYSIS AND PRESENTATION (1 credit)

This course is designed to give graduate students a foundational understanding of how information is processed, interpreted, and presented to provide school leaders with the ability to make data informed decisions. Major topics include how usable information can be extracted from tests and surveys, how probability is used to make claims from data sets, how charts and tables can be most effectively leveraged to understand the full scope of data sets, and how to publish results.

EDL 8340 ISSUES IN IDENTITY, CULTURE, AND POWER (1 credit)

This class promotes personal reflection and content awareness needed for educational leaders to promote racial equity in education. Topics include structural racism, bias, historical context of educational policy, and a call to action for racial justice in education.

EDL 8350 ISSUES IN MANAGEMENT FOR SCHOOL LEADERS (1 credit)

This class addresses the unique needs that those in educational leadership positions encounter when determining resource management of non-instructional systems. Topics include resource acquisition and management, using resources effectively, and oversight of facilities.

EDL 8400 ELEMENTARY SCHOOL INTERNSHIP IN EDUCATIONAL LEADERSHIP (3 credits)

Elementary internship is designed to provide practice in elementary and general and special education administration and supervision according to the interests and needs of the candidates. Candidates will work with practicing administrators and a university supervisor.

Prerequisite(s)/Corequisite(s): Candidates must be enrolled in the Master's and/or the Building Administration Endorsement program in Educational Leadership and be in their last year of the program or have department permission. Permit to enroll from department is required.

EDL 8410 SECONDARY SCHOOL INTERNSHIP IN EDUCATIONAL LEADERSHIP (3 credits)

Secondary school internship is designed to provide practice in 7-12 and general and special education administration and supervision according to the interests and needs of the candidates. Candidates will work with practicing administrators and a university supervisor.

Prerequisite(s)/Corequisite(s): Candidates must be enrolled in the Master's and/or the School Administration Endorsement program in Educational Leadership and be in their last year of the program or have department permission. Permit to enroll from department is required.

EDL 8470 ADMINISTRATION AND SUPERVISION IN SCHOOLS (3 credits)

This course is designed to prepare educational leaders as dedicated practitioners, reflective scholars, and responsible citizens as they relate to the administration of a school site and system. This course is specifically designed to address the problems, issues, and opportunities of building level leadership.

Prerequisite(s)/Corequisite(s): Admission to Graduate College. Not open to non-degree graduate students.

EDL 8490 INSTRUCTIONAL LEADERSHIP (3 credits)

School leaders serve as instructional leaders in their buildings and districts. This course assists candidates in developing knowledge and practicing skills necessary to lead educators and schools in the areas of instruction and curriculum.

Prerequisite(s)/Corequisite(s): Admission to the Graduate College

EDL 8550 SCHOOL BUSINESS MANAGEMENT (3 credits)

This course will analyze the functions of school business management: budgetary processes, financial accounting, auditing and reporting, management of funds, purchasing procedures, transportation, food services, insurance and inventory control.

Prerequisite(s)/Corequisite(s): EDAD8030 (previously or concurrently). Not open to non-degree graduate students.

EDL 8560 SCHOOL FINANCE (1 credit)

This course provides a study of the current sources of school financing: local, state, and federal. In addition to a review of the history of school finance, emphasis is placed on current problems in school finance, especially those related to overseeing the financial aspects of a school district.

Prerequisite(s)/Corequisite(s): EDL 8350 or permission of the instructor.

EDL 8596 FOUNDATIONS OF LEADERSHIP DEVELOPMENT (3 credits)

Leadership development is an educational outcome for college students, and at UNO, is strongly encouraged. This course will expose students to foundational leadership theories and challenge them to explore personal and social competencies associated with effective collaboration and leadership. (Cross-listed with EDL 4590).

EDL 8620 SCHOOL PLANTS AND EQUIPMENT (3 credits)

This course is designed for aspiring superintendents and central office leaders. It will prepare school leaders to be proactive in developing specifications for school buildings that will enhance educational processes. It includes planning procedures for new and remodeled buildings, soliciting support for projects, site selection, design, maintenance and operations of school buildings.

Prerequisite(s)/Corequisite(s): Admission to Graduate College

EDL 8710 INTERPERSONAL RELATIONSHIPS IN EDUCATIONAL LEADERSHIP (3 credits)

This course deals with the establishment of quality interpersonal and group relations among adults in school settings. Candidates will develop an increased awareness of their own and others' perspectives and will develop dispositions and skills that will allow them to work more productively. This course does not meet the requirements of Nebraska law LB 250 (Multi-Cultural and Interpersonal Relations).

Prerequisite(s)/Corequisite(s): Admission to the Graduate Studies and Department of Educational Leadership or department permission.

EDL 8720 MULTICULTURAL AND NON-SEXIST AWARENESS (1 credit)

This course is designed for certificated educational employees, both teachers and administrators, seeking renewal of Nebraska certification under Nebraska LB 250 (Multi-Cultural and Interpersonal Relations). This course meets the requirements of Nebraska law LB 250 (Multi-Cultural and Interpersonal Relations). The purpose of the course is to develop awareness of cultural diversity in American society and to develop skills to effectively meet the needs of students, parents, and school community members.

Prerequisite(s)/Corequisite(s): Graduate level. Permit of department required.

EDL 8730 COMMUNICATION AND CULTURE IN EDUCATIONAL HUMAN RESOURCES (1 credit)

This course focuses upon the interpersonal and professional knowledge, skills, and dispositions of human resources issues and functions for effective leadership in education.

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

EDL 8740 PROFESSIONAL DEVELOPMENT FOR SCHOOL LEADERSHIP (1 credit)

This course addresses strategies and models of planning, implementing, and evaluating adult and organizational learning for effective leadership in education.

Prerequisite(s)/Corequisite(s): Admittance to Graduate College. Not open to non-degree graduate students.

EDL 8750 FUNDAMENTALS OF HUMAN RESOURCES IN EDUCATION (1 credit)

This course examines the frameworks that schools utilize to recruit, select, place, and support faculty and staff. School leaders need human resources skills and knowledge in order to effectively implement strategies and policies related to staff management, motivation, and evaluation.

Prerequisite(s)/Corequisite(s): Admission to Graduate College. Not open to non-degree graduate students.

EDL 8780 EDUCATIONAL LEADERSHIP SUMMIT (2 credits)

The leadership summit in educational leadership synthesizes the program of school administration, supervision, and management in a manner that can be professionally presented and clearly articulated.

Prerequisite(s)/Corequisite(s): Twenty four credit hours must be completed or taken concurrently in educational leadership. Department permit to enroll is required. Not open to non-degree graduate students.

EDL 8800 SCHOOL LEADERSHIP ACADEMY (3 credits)

A leadership course designed for current and aspiring school administrators and teacher-leaders. The course content will relate administrative theory to operations of schools drawing on research, models, and various organizational structures. This course is specifically designed to bridge leadership and management theory to the practical operations of schools.

Prerequisite(s)/Corequisite(s): Advisor's approval.

EDL 8810 URBAN SCHOOL LEADERSHIP (3 credits)

This course is designed to acquaint candidates with urban concerns and issues which most significantly affect the administration of schools in and around metropolitan areas.

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

EDL 8900 SPECIAL EDUCATION LAW (3 credits)

The purpose of this course is to research and explore legal and policy issues affecting special education within our schools. Case law will be examined to ensure effective special education programs for children and youth with disabilities. (Cross-listed with SPED 8900).

Prerequisite(s)/Corequisite(s): Graduate Standing. Not open to non-degree graduate students.

EDL 9000 SEMINAR IN RESEARCH DESIGN (3 credits)

This course will provide support and assistance concerning principles of research design as related to topics in educational leadership. Instruction as to appropriate format, style, and content of educational research as well as designing methodology for dissertation proposal will be emphasized.

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

EDL 9610 or permission from instructor. Not open to non-degree students.

EDL 9010 ADVANCED SEMINAR IN EDUCATIONAL RESEARCH (3 credits)

This seminar will provide support for doctoral candidates in applying skills of educational research to the creation of a successful dissertation.

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

EDL 9000 or permission from instructor. Not open to non-degree graduate students.

EDL 9020 CONCEPTS AND CONTEXTS FOR LEADERSHIP IN SCHOOL LIBRARIES (3 credits)

Concepts and Context for School Libraries will introduce candidates to the broad landscape of school librarianship and its relationship to the greater library and information profession.

Prerequisite(s)/Corequisite(s): Admission to the University of Nebraska Doctoral Program in Educational Administration or other University of Nebraska doctoral program in education, and instructor permission. Not open to non-degree graduate students.

EDL 9110 FIELD PROJECT IN EDUCATIONAL ADMINISTRATION (1-3 credits)

Administrative practitioners will study a current or anticipated educational problem using research techniques. Candidates will review a change process to their school or district that has recently been implemented or is under consideration for future implementation as the capstone work for the Educational Specialist degree.

Prerequisite(s)/Corequisite(s): Admittance to the Ed.S. program and completion of EDL 9200. Candidates are encouraged, but not required, to utilize the project from EDL 9200 for the focus of the field project. Not open to non-degree students.

EDL 9200 ADVANCED PRACTICUM IN EDUCATIONAL ADMINISTRATION (3 credits)

This course is an independent, advanced practicum course meant to help practitioners prepare to be reflective scholars. It builds upon theory and practice of educational leadership and provides a guided experience.

Prerequisite(s)/Corequisite(s): Admittance to the Ed.S. program and completion of EDL 9200. Candidates are encouraged, but not required, to utilize the project from EDL 9200 for the focus of the field project. Not open to non-degree students.

EDL 9310 ISSUES IN STRATEGIC PLANNING FOR SCHOOL LEADERS (1 credit)

Strategic planning is critical to the health, growth and sustainability of a school district. The process provides an opportunity to prioritize goals, actions, time and resources on key initiative. This course will examine the strategic planning processes used by leaders to guide educational change and improvement.

EDL 9320 LEGAL ISSUES IN SPECIAL EDUCATION (1 credit)

School Leaders have an obligation to know the rights of students with disabilities and the laws and policies that protect those rights. This course will focus on the mandatory requirements of Individuals with Disabilities Education Improvement Act (IDEIA) of 2004; the Americans with Disabilities Act (ADA) of 1990, amended in 2008 and the Rehabilitation Act of 1973, Section 504 along with program mandates and the case law that protects these students.

EDL 9330 ISSUES IN SCHOOL OPERATIONS (1 credit)

This course addresses leadership issues that current and prospective school leaders will find applicable as they earn certification as a superintendent, principal, curriculum supervisor, or special education leader. This one-hour course will provide knowledge and skills educational leaders will need to effectively and efficiently lead a public or private school building, program, or school district. Course modules will engage candidates in developing a leadership entry/transition plan, a leadership succession plan, and a leadership succession board policy and administrative procedures.

EDL 9340 CONTEMPORARY ISSUES IN SCHOOL LAW (1 credit)

This course is concerned with the most recent legal challenges and judicial decisions that are impacting schools. Topics include the most recent decisions from all levels of the courts up to the Supreme Court. School leaders will help prevent litigation by understanding the implications of current cases for the purpose of work with students, staff, faculty and community members without infringing upon their due process rights. School leaders may use the current decisions to update student and faculty handbooks and understand the critical need for guidance by school district legal counsel.

Prerequisite(s)/Corequisite(s): School Law 9540 Legal Issues in Special Education Law 8920 or Instructor permission

EDL 9500 FRAMEWORKS OF BEST PRACTICE: LEADERSHIP IN SCHOOL LIBRARIES (3 credits)

This class will explore best practice in school libraries using the framework of current national standards for school librarianship preparation programs. Major areas for exploration include but are not limited to teaching for learning, literacy and reading, information and access, advocacy and leadership, and program management and administration.

Prerequisite(s)/Corequisite(s): Admission to the University of Nebraska Joint Doctoral Program in Educational Administration pursuing studies in educational leadership with an emphasis in school librarianship or with instructor permission. Not open to non-degree graduate students.

EDL 9510 SEMINAR IN CULTURE AND CONTEXT OF SCHOOLING (3 credits)

An advanced seminar designed to enhance understanding of the cultural and social forces, trends, and issues that influence the delivery and effectiveness of schooling.

Prerequisite(s)/Corequisite(s): Admission to the Department of Educational Administration and Supervision and the Ed.D. Program. Not open to non-degree graduate students.

EDL 9520 ACHIEVING SCHOOL EXCELLENCE (3 credits)

An advanced seminar on the pursuit of improvement in education and the role of administration in guiding positive school change through influence, persuasion, power, ethics, and research.

Prerequisite(s)/Corequisite(s): Admission to the University of Nebraska Joint Doctoral Degree program or admission to another University of Nebraska doctoral program. Not open to non-degree graduate students.

EDL 9530 PARADIGMS AND PRACTICES OF SCHOOLING (3 credits)

This is an advanced seminar to explore leadership and supervisory practices. Particular attention will be given to organizational conceptualizations (paradigms) for addressing current educational problems and issues. Candidates will be encouraged to think outside the traditional frames of education in order to improve student achievement in PK-12 schools. When a paradigm shifts, the way we view the world and what we assume to be true dramatically changes. When faced with shifting circumstances, school leaders can turn change into opportunity and opportunity into success.

Prerequisite(s)/Corequisite(s): Admittance to the UNO-UNL Joint Doctorate Program. Not open to non-degree graduate students.

EDL 9540 SCHOOL LAW (3 credits)

This course is concerned with laws related to schools. Topics include certification, contract, negligence, student rights, due process, curriculum, and discipline. Each topic is approached through study of most recent court cases.

Prerequisite(s)/Corequisite(s): Admission to Graduate Studies or instructor permission. Not open to non-degree graduate students.

EDL 9550 SYMPOSIUM ON SCHOOL LEADERSHIP (3 credits)

The purpose of this seminar is to relate research, theory, and practice in educational organizations. The course is designed to engage candidates with a systematic examination of school reform, best practices, and the implications for practitioners. The symposium will involve candidates with the changing roles and functions of educational leaders in rapidly changing metropolitan educational environments.

Prerequisite(s)/Corequisite(s): Admission to Graduate Studies or permission of instructor.

EDL 9610 STATISTICAL METHODS FOR THE BEHAVIORAL SCIENCES (3 credits)

This course is designed to help graduate students develop competence in understanding and using statistical methods for the behavioral and social sciences. The course introduces broad historically based topics in statistics such as probability theory, the Law of Large Numbers, and the Central Limit Theorem to develop conceptually based models for hypothesis testing, description of data, and statistical inference. Emphasis is placed on the evaluation of statistical methods used in published research and the development of analytic models in dissertation research.

Prerequisite(s)/Corequisite(s): Admission to the Doctor of Education (Ed.D.) program in Educational Leadership or Department/Instructor's permission.

EDL 9620 APPLIED ADVANCED STATISTICS IN EDUCATIONAL ADMINISTRATION (3 credits)

This course is designed to develop competence in using advanced-level statistics. The course includes parametric and nonparametric inferential statistics and scale development. The statistical analyses include: analyses of variance, regression analyses, factor and reliability analyses, chi-square, Mann-Whitney U, Wilcoxon Signed-Ranks, and Kruskal-Wallis.

Prerequisite(s)/Corequisite(s): EDL 9610 and must be admitted to the EdD program, or instructor's permission.

EDL 9630 QUALITATIVE RESEARCH (3 credits)

Qualitative Research develops skills and competence in designing, collecting, and analyzing data for studies in educational research.

Prerequisite(s)/Corequisite(s): EDL 9610 or equivalent. Not open to non-degree graduate students.

EDL 9650 PROGRAM EVALUATION FOR EDUCATIONAL ADMINISTRATORS (3 credits)

This course provides an introduction to program evaluation theory and practice. It will address the range of approaches within education human service program evaluation, the standards established by the profession, the "how to" of program evaluation, and the skills needed to conduct program evaluation.

Prerequisite(s)/Corequisite(s): Admission to the Graduate College or instructor's permission.

EDL 9660 STRATEGIC LEADERSHIP FOR SCHOOL LIBRARIES (3 credits)

This course will focus on the political, economic and social trends that have shaped school libraries and develop the skills and dispositions required for leaders of 21st Century school library programs.

Prerequisite(s)/Corequisite(s): Admission to the University of Nebraska Joint Doctoral Program in Educational Administration or to any other doctoral program in the University of Nebraska, or instructor permission.

Not open to non-degree graduate students.

EDL 9670 INQUIRY AND RESEARCH FOR LEADERSHIP IN SCHOOL LIBRARIES (3 credits)

Inquiry and Research for Leadership in School Librarianship will examine current research in the school library field and focus on action research based on authentic need.

Prerequisite(s)/Corequisite(s): Admission to the University of Nebraska Joint Doctoral Program in Educational Administration or to any other doctoral program in the University of Nebraska, or instructor permission.

Not open to non-degree graduate students.

EDL 9980 SUPERINTENDENT INTERNSHIP IN EDUCATIONAL ADMINISTRATION (3 credits)

This course is a guided, field-based internship for candidates seeking the school superintendent endorsement from the Nebraska Department of Education (NDE). The internship will provide candidates with experiences in the various roles and responsibilities of a superintendent.

Prerequisite(s)/Corequisite(s): Admittance to the the EdD or EdS in educational administration or departmental permission. Candidates must submit an internship application by April 1 for following fall term.

EDL 9990 DISSERTATION (1-12 credits)

The course provides doctoral candidates in Educational Administration and Supervision with a process to complete a dissertation research plan. The course learning activities will focus on the completion of a candidate's dissertation. The course is designed to allow advanced doctoral candidates to demonstrate technical mastery of the discipline and to advance knowledge by completing an investigation.

Prerequisite(s)/Corequisite(s): Admittance to the EdD in Educational Administration. Department permit to enroll required. Not open to non-degree graduate students.

Educational Leadership, MS

Department of Educational Leadership, College of Education, Health, and Human Sciences

Vision Statement

The mission of the Department of Educational Leadership is to develop effective visionary, intellectual, and moral leaders who can cause positive change in education to promote the success of all students. The department's degree and endorsement programs have a distinctive metropolitan education orientation. The Department of Educational Leadership offers a master of science degree (MS) as well as non-degree administration endorsement programs for students who have completed a master's degree.

Program Contact Information

Kay Keiser, EdD, Graduate Program Chair (GPC)
312 Roskens Hall (RH)
402.554.2721
kkeiser@unomaha.edu

Program Website (<http://www.unomaha.edu/college-of-education/educational-leadership/>)

Other Program Related Information

To be considered for financial aid students must be admitted to the MS in educational leadership. Unclassified and non-degree admission students are not eligible for financial aid consideration.

Students who have earned a previous master's degree in the education field should apply as unclassified in educational administration.

Students needing fewer than 12 credits for re-certification or professional advancement may apply as non-degree. Note that non-degree students will need to speak with the department to enroll in required classes.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission. Minimum scores for this program are:
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** 1-2 pages that addresses such topics as why you want to become a school administrator; interests; experiences; and career goals
- **Resume**
- **Letters of Recommendation:** Two letters are required
- Copy of Teaching Certificate
- Professional Fitness Statement (formally Rule 20/21)
- Evidence that the candidate has met the State of Nebraska's Special Education and Human Resources requirements. Most candidates will probably have satisfied this requirement while earning their teaching endorsements; if not, they will be required to complete relevant coursework.

Unclassified Admission: Those educators with a master's degree in education may apply as unclassified and complete the required and concentration hours needed for principal or special education director state certification. The application requirements are the same as the master's degree listed above.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements**Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)**

- Fall: June 1
- Spring: October 1
- Summer: February 1

Other Requirements

An applicant for admission to the Specialist in Education degree in the Department of Educational Leadership must have earned at least a master's degree from an accredited institution and an administrative endorsement. This is a terminal degree and if an EdD is planned at any time in the future, advising to the best degree path should take place before application.

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission. Minimum scores for this program are:
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105

- **Statement of Purpose:** A 1-2 page document describing relevant professional roles and experience as well as career goals for the EdS
- **Writing Sample:** Three samples, including one with a reference section (or thesis/specialist field project)
- **Resume**
- **Letters of Recommendation:** Three required letters; one letter must be from current supervisor confirming applicant's school administrative role.
- Administration certificate

Together with previous graduate work, the candidate's course of study must total a minimum of 69 graduate semester hours with 30 hours meeting the time limit requirement for graduate degrees. The program of study must be approved

by the department and the dean for Graduate Studies, and include a minimum of 15 semester hours after admission to the EdS program.

Elementary Education, MS

Department of Teacher Education, College of Education, Health, and Human Sciences

Vision Statement

The master's degree in elementary education will:

- Extend 21st century teaching skills and technology applications.
- Enhance the ability to design engaging, authentic instruction for today's students.
- Emphasize diversity and culturally responsive teaching.
- Expand professional connections with educators from Midwestern and metro school districts with diverse perspectives.
- Encourage engagement with the community.
- Enable graduate students to make course selections that best fit their individual learning needs in a flexible program.

Program Website (<http://www.unomaha.edu/college-of-education/teacher-education/graduate/elementary-education.php>)

Other Program-Related Information

The master's degree in elementary education does not lead to initial teacher certification.

Unclassified Students

Students who are not planning to pursue a program leading to a graduate certificate or a master's degree can be admitted to the elementary education program as unclassified students. Candidates holding a previous master's degree in education who are seeking additional teaching endorsements may wish to choose an unclassified status. Unclassified students are allowed to take courses for which they meet the prerequisite. Successful completion of graduate courses as an unclassified student does not obligate the department to accept those courses for credit toward the fulfillment of degree requirements. Formal advisement in an endorsement area is required.

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: August 1
- Spring: December 1
- Summer: June 1

Other Requirements

- A minimum undergraduate GPA of 3.0 (on a 4.0 scale)
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- A valid teaching certificate (if applicable) **or** application to a concentration that leads to certification (e.g. Accelerated Certification for Teachers concentration).
- UNO College of Education, Health, and Human Science's Personal and Professional Fitness Form.
- International students who do not intend to teach in the United States **may** be eligible for admission.

Degree Requirements

Code	Title	Credits
Required Courses ¹		9-12
Concentrations		12-21
Elementary Education, MS Concentrations ²		
Electives - As approved by advisor.		0-12

Courses to be determined in consultation with program advisor

TED 8700	ELEMENTARY EDUCATION CAPSTONE COURSE (Must receive a grade of B or better for program completion. This class is intended to be the last class in the program.)	3
----------	--	---

- A diversity course must be taken within the first 12 hours of graduate work.
- Each student will include in their plan of study an area of concentration in a special field that provides depth in an area of their interest. Courses within the concentrations will be decided upon in conference with the student's advisor. Possible concentrations include: Accelerated Certification for Teachers Concentration (EACT), Bilingual Education, Early Childhood Education, English as a Second Language (ESL), Equity and Social Justice in Education, Improvement of Instruction, Instructional Technology Leadership, School Library, Literacy, and Science, Technology, Engineering and Mathematics (STEM).

Exit Requirements:

Capstone TED 8700 The professional project completed in this course takes the place of the comprehensive exam. Registration for the course is by permission only. This course is intended to be the last course in your program. A grade of B or better must be received to show satisfactory completion of the course and for program completion.

Concentrations

Accelerated Certification for Teachers Concentration

Code	Title	Credits
Required Courses		
TED 8700	ELEMENTARY EDUCATION CAPSTONE COURSE (Exit Requirement-Must receive a grade of B or better.)	3
TED 8050	DATA-DRIVEN DECISION MAKING FOR EDUCATORS	3
TED 8210	THE PRINCIPLES OF MULTICULTURAL EDUCATION	3
TED 8540	DIGITAL CITIZENSHIP	3
Area of Concentration		
TED 8650	CHILDREN'S LITERATURE AND EDUCATION	3
TED 8310	HUMAN DEVELOPMENT - CONTEMPORARY IMPLICATIONS FOR TEACHING & LEARNING	3
Choose 6 hours from the following courses: 6		
TED 8130	LANGUAGE, CULTURE, AND POWER	
TED 8150	ANTI-RACISM EDUCATION PRINCIPLES AND PRACTICES	
TED 8160	ENGLISH AS A SECOND LANGUAGE STRATEGIES FOR PK-12 EDUCATORS	
TED 8180	CULTURALLY RESPONSIVE TEACHING	
TED 8280	INTRODUCTION TO HUMAN RIGHTS IN P-12 EDUCATION	
TED 8290	TRAUMA INFORMED EDUCATION	
TED 8800	MULTICULTURAL LITERATURE FOR CHILDREN AND YOUTH	
TED 9200	CRITICAL PEDAGOGY: TEACHING FOR SOCIAL JUSTICE	
Electives		
SPED 8030	TEACHING STUDENTS WITH EXCEPTIONALITIES	3

TED 8250	ASSESSMENT FOR CLASSROOM TEACHER	3
TED 8390	CLASSROOM MANAGEMENT IN PRACTICE	3
TED 8470	TEACHING THE LANGUAGE ARTS	3

Total Credits **36**

- A diversity course must be taken within the first 12 hours.
- TED 8700 Capstone is intended to be the last class in your program. A grade of B or better must be received to show satisfactory completion of the course and for program completion.

Bilingual Education Concentration

Code	Title	Credits
Required Courses		
TED 8700	ELEMENTARY EDUCATION CAPSTONE COURSE (Exit Requirement-Must receive a grade of B or better.)	3
TED 8050	DATA-DRIVEN DECISION MAKING FOR EDUCATORS	3
TED 8560	TECHNOLOGY FOR DIVERSE LEARNERS	3
Choose 3 hours from following courses: 3		
TED 8150	ANTI-RACISM EDUCATION PRINCIPLES AND PRACTICES	
TED 8280	INTRODUCTION TO HUMAN RIGHTS IN P-12 EDUCATION	
TED 8290	TRAUMA INFORMED EDUCATION	
TED 9200	CRITICAL PEDAGOGY: TEACHING FOR SOCIAL JUSTICE	
Area of Concentration:		
TED 8130	LANGUAGE, CULTURE, AND POWER	3
or ENGL 8676	SOCIOLINGUISTICS	
Choose 3 hours from the following courses: 3		
TED 8120	FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL)	
SPAN 8076	HISPANIC BILINGUALISM	
SPAN 8126	HISPANIC SOCIOLINGUISTICS	
SPAN 8136	SPANISH IN THE UNITED STATES	
SPAN 8226	THE STRUCTURE OF SPANISH	
SPAN 8086	INTRODUCTION TO HISPANIC LINGUISTICS	
FLNG 8030	SEMINAR: SECOND LANGUAGE ACQUISITION THEORY	
FLNG 8050	THEORY AND METHODS IN THE TEACHING OF HERITAGE LANGUAGES	
TED 8006	SPECIAL METHODS IN THE CONTENT AREA	3
TED 8480	FOUNDATIONS OF BILINGUAL EDUCATION	3
TED 8490	SPANISH LANGUAGE ARTS	3
TED 8695	LITERACY AND LEARNING	3
TED 8980	PRACTICUM: VARIOUS CONTENT AREAS	3
Choose 3 hours from the following courses: 3		
TED 8180	CULTURALLY RESPONSIVE TEACHING	
TED 8800	MULTICULTURAL LITERATURE FOR CHILDREN AND YOUTH	
TED 9110	PRINCIPLES AND PRACTICES FOR TEACHING READERS	
Total Credits 36		

- A diversity course must be taken within the first 12 hours.
- TED 8700 Capstone is intended to be the last class in your program. A grade of B or better must be received to show satisfactory completion of the course and for program completion.
- TED 8490, TED 8695, and TED 8480: These courses are taught in Spanish.
- TED 8980: (Dual Language Practicum - deadline to apply is September 15; this course is offered in Spring only).
- For an added endorsement in Bilingual Education, consult your advisor.
- The Nebraska Department of Education requires the ESL endorsement before you can apply for the Bilingual Education endorsement.
- Minimum of 12 credit hours must be current UNO credits.
- Spanish proficiency required (evaluated during first 3 hours).

Early Childhood Education Concentration

Code	Title	Credits
Required Courses		
TED 8700	ELEMENTARY EDUCATION CAPSTONE COURSE (Exit Requirement-Must receive a grade of B or better.)	3
TED 8050	DATA-DRIVEN DECISION MAKING FOR EDUCATORS	3
Choose 3 hours from the following courses: 3		
TED 8130	LANGUAGE, CULTURE, AND POWER	
TED 8150	ANTI-RACISM EDUCATION PRINCIPLES AND PRACTICES	
TED 8160	ENGLISH AS A SECOND LANGUAGE STRATEGIES FOR PK-12 EDUCATORS	
TED 8180	CULTURALLY RESPONSIVE TEACHING	
TED 8280	INTRODUCTION TO HUMAN RIGHTS IN P-12 EDUCATION	
TED 8290	TRAUMA INFORMED EDUCATION	
TED 8800	MULTICULTURAL LITERATURE FOR CHILDREN AND YOUTH	
TED 9200	CRITICAL PEDAGOGY: TEACHING FOR SOCIAL JUSTICE	
Choose 3 hours from the following courses: 3		
TED 8540	DIGITAL CITIZENSHIP	
TED 8550	TECHNOLOGY FOR CREATIVE AND CRITICAL THINKING	
TED 8560	TECHNOLOGY FOR DIVERSE LEARNERS	
TED 8580	ONLINE TEACHING AND LEARNING	
TED 8590	TEACHING AND LEARNING IN DIGITAL ENVIRONMENTS	
Area of Concentration:		
TED 8170	DEVELOPMENTAL ASSESSMENT OF THE YOUNG CHILD	3
TED 8200	SOCIAL WORLDS OF THE YOUNG CHILD	3
TED 8220	PLAY AS A LEARNING MEDIUM IN EARLY CHILDHOOD EDUCATION	3
TED 8240	FAMILY, SCHOOL, AND COMMUNITY PARTNERS	3
TED 8260	ADVANCED CURRICULUM IN EARLY CHILDHOOD	3
Choose 3 hours from the following courses: 3		
TED 8230	LITERATURE FOR THE YOUNG CHILD	
TED 8810	STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH	

Electives: As approved by advisor	6
Total Credits	36

- A diversity course must be taken within the first 12 hours.
- TED 8700 Capstone is intended to be the last class in your program. A grade of B or better must be received to show satisfactory completion of the course and for program completion.

English as a Second Language (ESL) Concentration

At least 6 credits in the concentration must have a TED prefix.

Code	Title	Credits
Required Courses		
TED 8700	ELEMENTARY EDUCATION CAPSTONE COURSE (Exit Requirement-Must receive a grade of B or better.)	3
TED 8050	DATA-DRIVEN DECISION MAKING FOR EDUCATORS	3
Choose 3 hours from the following courses: 3		
TED 8150	ANTI-RACISM EDUCATION PRINCIPLES AND PRACTICES	
TED 8280	INTRODUCTION TO HUMAN RIGHTS IN P-12 EDUCATION	
TED 8290	TRAUMA INFORMED EDUCATION	
TED 9200	CRITICAL PEDAGOGY: TEACHING FOR SOCIAL JUSTICE	
TED 8560	TECHNOLOGY FOR DIVERSE LEARNERS	3
Area of Concentration:		
TED 8120	FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL)	3
Choose 3 hours from the following courses: 3		
TED 8130	LANGUAGE, CULTURE, AND POWER	
ENGL 8676	SOCIOLINGUISTICS	
TED 8006	SPECIAL METHODS IN THE CONTENT AREA (ESL: 25 hour field experience requirement)	3
TED 8160	ENGLISH AS A SECOND LANGUAGE STRATEGIES FOR PK-12 EDUCATORS	3
Choose 3 hours from the following courses: 3		
TED 8180	CULTURALLY RESPONSIVE TEACHING	
TED 8800	MULTICULTURAL LITERATURE FOR CHILDREN AND YOUTH	
Elective Course: As approved by advisor. 9		
Total Credits		36

- A diversity course must be taken within the first 12 hours.
- TED 8700 Capstone is intended to be the last course in your program. A grade of B or better must be received to show satisfactory completion of the course and for program completion.
- For an added endorsement in ESL, consult with your advisor. You must have a valid teaching certificate in either Elementary or Secondary Education to add this endorsement.

Improvement of Instruction Concentration

Code	Title	Credits
Required Classes:		
TED 8700	ELEMENTARY EDUCATION CAPSTONE COURSE (Exit Requirement-Must receive a grade of B or better.)	3

TED 8050	DATA-DRIVEN DECISION MAKING FOR EDUCATORS	3
Choose 3 hours from the following courses:		3
TED 8130	LANGUAGE, CULTURE, AND POWER	
TED 8150	ANTI-RACISM EDUCATION PRINCIPLES AND PRACTICES	
TED 8160	ENGLISH AS A SECOND LANGUAGE STRATEGIES FOR PK-12 EDUCATORS	
TED 8280	INTRODUCTION TO HUMAN RIGHTS IN P-12 EDUCATION	
TED 8290	TRAUMA INFORMED EDUCATION	
TED 8800	MULTICULTURAL LITERATURE FOR CHILDREN AND YOUTH	
TED 9200	CRITICAL PEDAGOGY: TEACHING FOR SOCIAL JUSTICE	
Choose 3 hours from the following courses:		3
TED 8540	DIGITAL CITIZENSHIP	
TED 8550	TECHNOLOGY FOR CREATIVE AND CRITICAL THINKING	
TED 8560	TECHNOLOGY FOR DIVERSE LEARNERS	
Area of Concentration:		
TED 8180	CULTURALLY RESPONSIVE TEACHING	3
TED 8250	ASSESSMENT FOR CLASSROOM TEACHER	3
Choose 3 hours from the following courses:		3
TED 8300	EFFECTIVE TEACHING PRACTICES	
TED 8640	OPEN EDUCATIONAL RESOURCES FOR P-12 TEACHERS	
Choose 3 hours from the following courses:		3
TED 8530	INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS	
TED 9110	PRINCIPLES AND PRACTICES FOR TEACHING READERS	
Choose 3 hours from the following courses:		3
TED 8320	STRENGTHENING LEADERSHIP CAPACITY THROUGH RESEARCH AND COMMUNITY COLLABORATION	
TED 8370	DATA VISUALIZATION AND MODELING FOR EDUCATORS	
TED 8580	ONLINE TEACHING AND LEARNING	
TED 8590	TEACHING AND LEARNING IN DIGITAL ENVIRONMENTS	
TED 8720	INTRODUCTION TO INSTRUCTIONAL COACHING IN PK-12 EDUCATION	
Electives: As approved by advisor.		9
Total Credits		36

- A diversity course must be taken within the first 12 hours.
- TED 8700 Capstone is intended to be the last course in your program. A grade of B or better must be received to show satisfactory completion of the course and for program completion.

Instructional Technology Leadership Concentration

Code	Title	Credits
Required Classes:		
TED 8700	ELEMENTARY EDUCATION CAPSTONE COURSE (Exit Requirement-Must receive a grade of B or better.)	3

TED 8050	DATA-DRIVEN DECISION MAKING FOR EDUCATORS	3
Choose 3 hours from the following courses:		3
TED 8130	LANGUAGE, CULTURE, AND POWER	
TED 8160	ENGLISH AS A SECOND LANGUAGE STRATEGIES FOR PK-12 EDUCATORS	
TED 8180	CULTURALLY RESPONSIVE TEACHING	
Area of Concentration:		
TED 8370	DATA VISUALIZATION AND MODELING FOR EDUCATORS	3
TED 8540	DIGITAL CITIZENSHIP	3
TED 8550	TECHNOLOGY FOR CREATIVE AND CRITICAL THINKING	3

Electives: As approved by advisor.		9
Total Credits		36

- A diversity course must be taken within the first 12 hours.
- TED 8700 Capstone is intended to be the last course in your program. A grade of B or better must be received to show satisfactory completion of the course and for program completion.

TED 8000 SPECIAL STUDIES (1-3 credits)

A series of intensive studies especially for in-service teachers scheduled as regular seminars or classes, according to purpose.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8006 SPECIAL METHODS IN THE CONTENT AREA (3 credits)

This course is designed to develop knowledge, skills, and dispositions requisite of teachers. Course content is determined by the discipline area. For some content areas a field experience will be required. This is an in-school, guided practicum completed in conjunction with TED 4000 math, science, language arts, world languages, Business, Information Technology, ESL and social studies sections. Candidates must demonstrate competencies related to performance in 7-12 classrooms. This is the final practicum experience prior to the clinical practice semester. (Cross-listed with TED 4000).

TED 8010 INTRODUCTION TO RESEARCH (3 credits)

This course will introduce advanced degree candidates to: A) An understanding of the scientific method as applied to behavioral research B) Assessment, evaluation, descriptive, causal-comparative, experimental and historical data gathering procedures and analytical strategies C) Sampling theory, techniques, distribution and hypothesis testing D) Specific designs, methods, and tools of research E) Search and retrieval of published research, both American and international (global), in the library and over the Internet F) Critical evaluation of research studies G) Basic statistics, both descriptive and inferential, and H) Preparation of a research proposal containing three chapters: Problem, Review of Related Research and Methodology.

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8030 SEMINAR IN EDUCATION: SPECIAL TOPICS (1-3 credits)

This is a variable content course focusing on topics of current relevance to PK-12 teachers.

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8040 SEMINAR ON STUDENT TEACHING/NEW TEACHER INDUCTION (3 credits)

The seminar is designed for experienced teachers who are, or may be, serving as cooperating teachers for student teachers or as mentor teachers for beginning teachers. Participants will study the purposes, techniques, and trends involved in serving as a cooperating teacher or as a mentor.

Prerequisite(s)/Corequisite(s): Successful teaching experience is required for this course.

TED 8050 DATA-DRIVEN DECISION MAKING FOR EDUCATORS (3 credits)

This course provides graduate students with hands-on experiences that model data-driven decision making for educational success in today's classroom. Students will learn how to create valid and reliable assessments; interpret test data; use data to identify student, classroom, program, and school needs; and in general, to systematically enhance educational decision making. In addition, students will experience activities that can be integrated into student lessons to help to deepen concept learning, and to build student data literacy. The course will use real data sets, in interesting, hands on and technology-rich activities to find the "educational story" represented by the data. (Cross-listed with STEM 8050).

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8055 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)

This course is designed to enhance candidates' understanding of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs) in the U.S. context. As dedicated practitioners, reflective scholars, and responsible citizens, students will have knowledge of factors that contribute to an effective multicultural and multilingual learning environment. TED 3050 includes an in school, guided practicum. Candidates must demonstrate competencies related to teaching English Learners (ELs) in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education. (Cross-listed with TED 3050).

Prerequisite(s)/Corequisite(s): TED 2300 (EDUC 2010) OR TED 2380; and TED 2050.

TED 8060 CURRENT ISSUES AND TRENDS IN EDUCATION (3 credits)

The course is an advanced study of current issues and trends which have substantial impact on PK-12 education. The graduate candidates who take this class will read, analyze, and evaluate relevant research in order to become conversant in those issues.

Prerequisite(s)/Corequisite(s): Graduate status is required.

TED 8070 TEACHING MULTIPLE INTELLIGENCE (3 credits)

This course focuses on the utilization of the multiple intelligences (MI) theory by teachers to enhance children's understanding of various disciplines. Graduate candidates will have the opportunity to explore, evaluate, and develop various methodologies that foster understanding.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8080 STORYTELLING AND EDUCATION (3 credits)

This course is designed to consider the importance of storytelling, to provide teacher candidates with the background materials for storytelling, to study resource material for storytelling from a variety of cultures, and to develop techniques for storytelling. Actual experience in storytelling and opportunities for evaluating storytelling experiences will be provided.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8100 RESEARCH PROJECT (1-3 credits)

This course is designed for individual or group study and analysis of specific problems in schools dealing with curriculum and instruction in areas which have a broad scope of application rather than a specific level.

Prerequisite(s)/Corequisite(s): Approval of Advisor.

TED 8120 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)

TED 8120 is designed to enhance graduate candidates' knowledge of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs). As dedicated practitioners, reflective scholars, and responsible citizens, graduate candidates will learn strategies for designing and promoting effective multicultural and multilingual learning environments. This course includes an in-school, guided practicum through which graduate candidates must demonstrate competencies related to standards related to teaching ELs in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education's ESL teaching endorsement.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

TED 8130 LANGUAGE, CULTURE, AND POWER (3 credits)

This course will focus on the intersection of language, culture, and power in the schools. This seminar will research how each component impacts the students and teachers in the classroom.

TED 8150 ANTI-RACISM EDUCATION: PRINCIPLES AND PRACTICES (3 credits)

This course provides a theoretical analysis of race, racism and the implications for anti-racist education. In addition to exploring the key features of anti-racism education, the course also addresses other axes of oppression, namely, class and gender, with a critical focus on racialized power and privilege, and how such features function in the broader U.S. context as well as the schooling environment. Of equal importance is a critical interrogation of the historical, ideological, and political processes that produce and maintain racism. Course participants explore pedagogies, curriculum, and school leadership strategies as mechanisms for instituting anti-racism work in schools and community.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8160 ENGLISH AS A SECOND LANGUAGE STRATEGIES FOR PK-12 EDUCATORS (3 credits)

This course is designed to enhance graduate candidates' knowledge of PK-12 English as a Second Language (ESL) pedagogical and assessment strategies that address the needs of English Language Learners (ELs) in content area classrooms. As dedicated practitioners, reflective scholars, and responsible citizens, graduate candidates will be able to explore evidence-based pedagogical and assessment strategies to use in educational contexts serving ELs.

Prerequisite(s)/Corequisite(s): Graduate candidate status. Not open to non-degree graduate students.

TED 8170 DEVELOPMENTAL ASSESSMENT OF THE YOUNG CHILD (3 credits)

This course is designed as a survey of developmental assessment in early childhood education (ages birth to eight years). Selection of assessment tools and strategies, implementation, data collection, analysis of results, and teaching impact are addressed in context of key assessment purposes in the early childhood field.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8180 CULTURALLY RESPONSIVE TEACHING (3 credits)

This course includes an introductory analysis of the societal and institutional processes and problems which have bearing upon the education of children in urban settings. In addition, the course will focus on knowledge, skills and dispositions related to instructional strategies and classroom management needed for effective teaching in an urban environment.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8190 CONTEMPORARY ISSUES IN URBAN EDUCATION (3 credits)

This course is designed for candidates who wish to keep abreast of contemporary issues which confront the educational institution and teaching profession within the urban milieu.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8200 SOCIAL WORLDS OF THE YOUNG CHILD (3 credits)

This course will explore theoretical and cultural perspectives on the social and emotional development of young children. This course will also examine the relationship between social emotional development, guidance practices, democratic life skills, and school readiness.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8210 THE PRINCIPLES OF MULTICULTURAL EDUCATION (3 credits)

This course will develop practicing teachers' awareness of and skill in meeting the needs of P-12 students with regards to the areas of human understanding, acceptance and value. Candidates will examine existing attitudes towards various minority groups such as racial, ethnic, gender, exceptionality, etc. School materials and attitudes will also be examined in determining the effect they have on PK-12 students.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8220 PLAY AS A LEARNING MEDIUM IN EARLY CHILDHOOD EDUCATION (3 credits)

This course provides an in-depth examination of young children's play and its curricular role in the early childhood classroom. The origins, developmental outcomes, assessment, curricular implementation, and evaluation of play will be covered, with an emphasis on play as a major component of developmentally appropriate practice with young children. The focus is on teachers learning to help children become partners in the operation of the learning environment.

TED 8230 LITERATURE FOR THE YOUNG CHILD (3 credits)

Literature for the young child is examined through the lens of developmentally appropriate practice for informing educators' interactions with children and also for developing high-quality, literature-related projects of study across the early childhood (birth-through-age-eight) continuum.

Prerequisite(s)/Corequisite(s): Graduate Status.

TED 8240 FAMILY, SCHOOL, AND COMMUNITY PARTNERS (3 credits)

This course will examine the purposes and methods for developing family, school, and community partnerships. Candidates will explore characteristics of diverse families and develop the skills necessary for planning, design, implementation, and evaluation of effective partnerships in early childhood settings.

Prerequisite(s)/Corequisite(s): Graduate Status.

TED 8250 ASSESSMENT FOR CLASSROOM TEACHER (3 credits)

This course studies assessment principles, effective practices, and classroom assessment processes throughout the curriculum. The research regarding assessment for learning is studied and application is made to classroom practices.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8260 ADVANCED CURRICULUM IN EARLY CHILDHOOD (3 credits)

This course is designed to provide an in-depth examination of the processes used in selecting and implementing appropriate curricular content in programs for children ages three to eight years. Particular emphasis is on the role of the teacher as a dedicated practitioner and reflective scholar in the early learning environment.

TED 8270 TRENDS IN EARLY CHILDHOOD EDUCATION (3 credits)

This course provides a context for examining socio-political and research-based influences underlying trends in early childhood education at the local, national and international levels.

Prerequisite(s)/Corequisite(s): Graduate Status.

TED 8280 INTRODUCTION TO HUMAN RIGHTS IN P-12 EDUCATION (3 credits)

The course examines the intersection of human rights and P-12 education and prepares individuals to effectively work with and advocate for children and adolescents in educational settings. Students completing the course will be able to 1) demonstrate an increased understanding of fundamental human rights with a specific emphasis on education rights and the human rights of children and adolescents 2) create learning environments that elevate human rights in educational settings and 3) design developmentally appropriate instruction for children and adolescents on varied human rights topics.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8300 EFFECTIVE TEACHING PRACTICES (3 credits)

This course focuses on specific characteristics and behaviors of effective teachers. Course content will be derived from research on teaching and learning.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8310 HUMAN DEVELOPMENT - CONTEMPORARY IMPLICATIONS FOR TEACHING & LEARNING (3 credits)

This course examines human growth and learning from birth through late adolescence. It is designed to prepare teachers to synthesize information regarding developmental theory and subsequently apply this to lesson design and effective content-area pedagogy. Candidates will examine multiple frameworks related to the cognitive, social/emotional, and physical development of children and use those to analyze current educational practices in PK-12 schools. Cultural influences impacting human development and implications for educational practices will also be examined. The course will include field-based experiences.

Prerequisite(s)/Corequisite(s): Admission into a Teacher Education Department graduate program.

TED 8370 DATA VISUALIZATION AND MODELING FOR EDUCATORS (3 credits)

In the growing context of data informed decisions there is a need to answer "what if" questions in a variety of decision-making situations, as well as to display data both visually and interactively. This course will provide foundational skills in data visualization and modeling for educational decision making and instruction. It draws upon key fundamentals in data visualization (representing data trends visually) as well as key strategies in data modeling (interactive representations to explore possible outcomes). The course also explores the use of visualization and modeling technologies as well as assisting student learning with these tools. (Cross-listed with STEM 8370).

TED 8376 TEACHING AT THE MIDDLE LEVEL (3 credits)

This course will provide candidates with a variety of middle level teaching techniques and strategies in their classrooms that have been identified in current research literature as appropriate for the middle level. This course is designed to introduce candidates to the unique characteristics of the middle student, school, curriculum, history, and philosophy. (Cross-listed with TED 4370).

TED 8390 CLASSROOM MANAGEMENT IN PRACTICE (3 credits)

This course will provide graduate students with a survey of general classroom management methods for classrooms. Candidates will enhance their understanding of three basic components of effective pedagogy: 1) proactive classroom management, 2) high-impact instructional strategies that impact student engagement and learning, 3) behavior management techniques that incorporate practice, feedback, research, and reflection.

Prerequisite(s)/Corequisite(s): Graduate standing

TED 8410 IMPROVEMENT OF INSTRUCTION: SPECIAL TOPICS (3 credits)

This course provides an in-depth study of instructional theory, research, and methodology designed to extend teachers' professional knowledge base and enhance their pedagogical skills. When offered, a course may be limited to improvement of instruction in a selected subject area. (Cross-listed with STEM 8410).

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8420 TRENDS AND TEACHING STRATEGIES IN SCIENCE EDUCATION (3 credits)

This course is designed for the graduate candidate in the Department of Teacher Education whose study program emphasis is in the area of science education. The course will describe and analyze past and present trends in science education, including curricula, teaching-learning strategies, the laboratory and instructional materials. The course focus will be K-12 and as such is meant to serve both elementary and secondary graduate candidates. (Cross-listed with STEM 8420).

TED 8430 SCHOOL CURRICULUM PLANNING (3 credits)

This course is designed to provide advanced degree candidates with an understanding of the theory, principles, and practices utilized in curriculum planning in American schools. This course focuses on the principles and practices of effective curriculum planning and teachers' part in these processes as curriculum developers. (Cross-listed with STEM 8430).

TED 8470 TEACHING THE LANGUAGE ARTS (3 credits)

This course is designed to enhance candidates' knowledge of best practices in teaching reading, writing, listening, and speaking. Candidates will learn about research supported appropriate language arts instruction strategies and assessments. This course will inform graduate students as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

TED 8480 FOUNDATIONS OF BILINGUAL EDUCATION (3 credits)

This course is designed to give future and current teachers a thorough understanding of the theoretical, political, historical, and practical foundations of bilingual/multicultural education in the United States. As dedicated practitioners, reflective scholars, and responsible citizens, graduate students will have knowledge of factors that contribute to effective multilingual and multicultural learning environments that promote individual and societal bilingualism. Advanced Spanish language proficiency required.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8490 SPANISH LANGUAGE ARTS (3 credits)

This course is designed to reinforce first and second language acquisition theory as it relates to dual immersion settings. Best practices for developing and reinforcing bilingualism and biliteracy are presented and used for planning and delivering instruction. Spanish fluency is required for the course.

Prerequisite(s)/Corequisite(s): Graduate status required for graduate students pursuing the bilingual education endorsement and concentration (does not lead to a Nebraska Department of Education teaching endorsement). Advanced Spanish language proficiency required.

TED 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)

This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with AVN 8510, STEM 8510).

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8520 SCHOOL LIBRARY CAPSTONE (3 credits)

Candidates will gain direct experience and an understanding of the theories, concepts and activities integral to public services, technical services, and the administration in a 21st Century library and information agency at an assigned field site. Candidates will demonstrate the ability to plan, develop, and implement programming and services for patrons and diverse learners in their schools and communities.

Prerequisite(s)/Corequisite(s): There are no course prereqs for the Capstone Practicum but candidates must be in the final 2 semesters of their library media program & must complete an application for the Practicum the semester prior to their practicum. Not open to non-degree grads.

TED 8530 INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS (3 credits)

This course is designed to provide graduate candidates with the opportunity to enhance interdisciplinary instructional strategies, curricular understanding, and lesson preparation in the areas of science, technology, engineering, the arts, and mathematics (STEAM) through analysis and reflective practices in STEAM. This course provides hands-on experiences that model STEAM integration techniques, including how to effectively engage with community agencies and partners to bring STEAM into the classroom. This course emphasizes not only the technical aspects of STEAM, but also the creativity and innovation that arts integration can add to enhance STEM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. (Cross-listed with STEM 8530).

Prerequisite(s)/Corequisite(s): This course includes both teacher education and STEAM related topics and therefore fits into both TED and STEM program coursework.

TED 8540 DIGITAL CITIZENSHIP (3 credits)

The course explores key concepts of Digital Citizenship pertaining to digital law, digital ethics, digital interaction, digital literacy, and cyber-security. The course addresses an educator's role as technology leader in both policy and practice to establish a responsible and robust digital learning community in P-12 schools.

Prerequisite(s)/Corequisite(s): Graduate Standing/Status

TED 8550 TECHNOLOGY FOR CREATIVE AND CRITICAL THINKING (3 credits)

Technology for Creativity and Critical Thinking investigates the use of visual media tools in P-12 digital learning environments. This course provides candidates an opportunity to develop leadership skills and dispositions relevant to advocacy initiatives addressing policy and best practice in the use of technology in P-12 schools.

TED 8560 TECHNOLOGY FOR DIVERSE LEARNERS (3 credits)

This course will engage candidates that facilitate the use of instructional technology, pedagogy, and strategies to better meet the needs of diverse learners. Candidates will explore categories of diverse learners relevant and specific to their own organizations and learning environments to ensure candidates can effectively research and implement assistive technology, instructional technology, and applications to enhance learning opportunities for children and youth.

TED 8570 INTERNET IN THE LEARNING PROCESS (3 credits)

This course is designed to help educators actively explore instructional implementations of Internet use appropriate for use in K-12 classrooms, successful diffusion of Internet innovations in educational environments, and emerging multicultural "breaking down the walls of the classroom" concepts available to educators through Internet use.

TED 8580 ONLINE TEACHING AND LEARNING (3 credits)

Online Teaching and Learning is a course for education professionals that investigates the use of online tools for planning, preparing and assessing student learning in a digital environment. The course will prepare candidates to provide leadership for digital initiatives within learning organizations. The course encourages educators to explore methods of virtual lesson delivery and online assessment through direct instruction and online study.

Prerequisite(s)/Corequisite(s): Graduate Admissions status

TED 8590 TEACHING AND LEARNING IN DIGITAL ENVIRONMENTS (3 credits)

This course is an introduction to future-ready information and instructional technologies for use with children and youth. Course will cover a diverse array of technical literacies that serve as content and skill goals for today's children and youth in P-12 schools and other learning organizations.

TED 8610 TEACHING OF WRITING THROUGHOUT THE CURRICULUM (3 credits)

This course is designed to enhance candidates' knowledge of best practices in teaching writing. Candidates will learn about research supported appropriate writing instruction strategies and assessments. Candidates will be writing extensively throughout the course as they examine the varied ways writing genres extend throughout the curriculum. This course will inform candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8620 ADVANCED SUPPORT OF INSTRUCTIONAL TECHNOLOGY ENVIRONMENTS (3 credits)

This course is designed for P-12 educators who wish to become better advocates of technology integration or become technology coordinators or school technicians. Course enrollees will evaluate and implement advanced strategies to keep technology up to date, effectively use technology, and properly manage technology in a school setting.

TED 8650 CHILDREN'S LITERATURE AND EDUCATION (3 credits)

Candidates in this graduate course will explore story, poetry, drama, and informational materials for elementary students with an emphasis on methods for including literature in school curricula with an awareness of diverse children's lives, discourses, and understandings. Examines current issues, recent materials, and the theoretical and research base of this field to develop meaningful and creative learning, literacy, and library experiences for children.

TED 8660 YOUNG ADULT LITERATURE (3 credits)

This course extends candidates' knowledge of literature for young adults. The course addresses current trends in the genre and engages candidates in activities that support pedagogies in basic, visual, information and cultural literacies.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8695 LITERACY AND LEARNING (3 credits)

This course examines ways in which reading and writing can facilitate student learning in content areas studies (e.g., science, social studies, physical education, art, music, and math). The main focus is on teaching practices that engage students and contribute to their learning, integrating their background knowledge and cultural experiences with content area literacy. (Cross-listed with TED 3690).

TED 8700 ELEMENTARY EDUCATION CAPSTONE COURSE (3 credits)

This course is designed as a required, final capstone course for Elementary Education graduate students to be taken in the last nine hours of the Master of Science program. A grade of B or better must be received in TED 8700 to show satisfactory completion of the course and for program completion.

Prerequisite(s)/Corequisite(s): Permission of the Elementary Education Program Chair. Not open to non-degree graduate students.

TED 8710 RESEARCH AND INQUIRY (3 credits)

Candidates will demonstrate an understanding of the theories, concepts and activities integral to reference resources and services in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of effective search strategies and efficient use of both print and digital resources, design and promote information literacy instruction that is developmentally appropriate, and understand the legal and ethical responsibilities integral to positive and proactive reference services for patrons and diverse learners.

TED 8720 INTRODUCTION TO INSTRUCTIONAL COACHING IN PK-12 EDUCATION (3 credits)

This course examines the prominent coaching models used in PK-12 schools (i.e. teacher-centered coaching, student-centered coaching, cognitive coaching, transformational coaching). Candidates completing this course will be able to: develop an understanding of best practices in coaching, create a common lexicon for the role of an instructional coach, engage in the coaching cycle, and create a personal vision for their work as a coach. Candidates will engage in a field based experience to apply their learning.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8726 SPECIAL LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the major types of 21st Century special libraries and information agencies. Candidates will demonstrate an understanding of social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the special libraries and information agencies. (Cross-listed with TED 4720).

TED 8740 ORGANIZATION OF INFORMATION (3 credits)

This course addresses current theory and best practice in descriptive and subject cataloging and classification of information resources that align with school library standards and guidelines. Candidates will demonstrate the ability to integrate the legal and ethical standards of their discipline in ensuring access to information and ideas for a diverse array of learners in schools and communities.

TED 8746 ORGANIZATION OF INFORMATION (3 credits)

Candidates will demonstrate a basic understanding of the theories, concepts and activities of descriptive and subject cataloging and classification procedures of information resources in 21st Century libraries and information agencies.

TED 8760 MANAGING COLLECTIONS IN LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the theories, concepts and activities integral to proactive collection management in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of community analysis, collection analysis, and the ability to conduct critical evaluations of a diverse array of information resources.

TED 8770 INTEGRATING TECHNOLOGY INTO INSTRUCTIONAL DESIGN (3 credits)

The purpose of this course is to introduce participants to effective methods for the integration of educational media into instructional design and provides participants (1) knowledge of broad instructional design theories and models with a concentration on constructivism, (2) experience in designing instruction that effectively integrates technology into the teaching-learning process, and (3) experience in producing instructional media. The course is intended to provide fundamentals in the selection, evaluation, production, application and utilization of educational media. This course is designed for in-service library media or instructional technology specialists as well as regular classroom teachers.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8800 MULTICULTURAL LITERATURE FOR CHILDREN AND YOUTH (3 credits)

This is designed as a graduate-level course dealing with utilization of literary materials representing authors and content from multiple perspectives, particularly authors whose cultural and ethnic backgrounds differ from the mainstream.

TED 8810 STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH (3 credits)

This course will explore theoretical and foundational pedagogical strategies in early childhood education used to deliver integrative STEM education in the preK-12 setting. In order to understand the research and practice of STEM disciplines in preK-12, it is necessary to examine the social, cultural, political, and functional aspects that influence them. Candidates will investigate the nature of STEM education, Early Childhood Education (ECE) pedagogy and perspectives of learning, content knowledge and dispositions for educators of STEM topics, and issues of access and equity for STEM education through literature, discussion, and practice. This course includes a community outreach component in which candidates will use qualitative methods to observe class topics in public settings. (Cross-listed with STEM 8810)

Prerequisite(s)/Corequisite(s): Graduate status

TED 8816 PRINCIPLES AND PHILOSOPHY OF INTEGRATING CAREER AND ACADEMIC EDUCATION (3 credits)

This course presents the philosophies and principles/practices underlying how schools can better prepare students for the workplaces of the future with emphasis on the integration of career education within broader academic preparation. The roles and responsibilities of teachers, counselors, and administrators in implementing integrated approaches will be examined. (Cross-listed with TED 4810).

TED 8820 CAPSTONE IN STEM EDUCATION (3 credits)

This course will prepare graduate students for the integration, articulation, and differentiation of curriculum and instruction in and between the STEM core areas of Science, Technology, Engineering, and Mathematics. Special emphasis will be on using the STEM core content to help provide applications and context to existing science and mathematics curriculum and instruction and on providing leadership in developing curriculum for mathematics and science dependent courses in engineering and technology. **Prerequisite(s)/Corequisite(s):** The student must be enrolled in one of the following concentrations: STEM, mathematics, science, technology; and be enrolled in the last six hours of their program of study. Not open to non-degree graduate students.

TED 8830 LEADERSHIP AND MANAGEMENT IN SCHOOL LIBRARIES (3 credits)

The course explores best practice for effective leadership and management of 21st Century school libraries. Candidates will gain a comprehensive knowledge of the theories, policies and processes involved in directing a school library in support of the personal and academic success of P-12 students. Candidates will explore and employ ethical codes of conduct in their profession to ensure school libraries meet the needs of their diverse array of patrons.

TED 8840 ENGINEERING EDUCATION EXTERNSHIP (3 credits)

This graduate course will address the best practice of effective teaching and learning in Engineering Education through professional collaboration between K-12 STEM (Science, Technology, Engineering, and Mathematics) teachers and practicing engineering professionals. K-12 STEM teachers, as graduate students in the course, will learn about and address real-world applications and career opportunities in STEM education through the externship. K-12 STEM teachers will research and develop authentic, experiential learning opportunities and projects for the classroom through course supports associated with lecture, discussion, and partnerships with practicing engineering professionals. The externship will be integral to the K-12 STEM teachers' experiences and work in this course, as the course models effective professional collaboration founded on experience, knowledge, and skills to achieve a curriculum enhancement goal. (Cross-listed with STEM 8840).

Prerequisite(s)/Corequisite(s): Graduate status. Not open to non-degree graduate students.

TED 8850 PROFESSIONAL COLLABORATION (3 credits)

This course is designed to prepare candidates to work in collaboration with other professionals and parents to create a learning environment that enhances the potential for academic success and improvement of instructional practices. The focus will be on collaborative problem solving. (Cross-listed with SPED 8980).

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

TED 8856 COORDINATION TECHNIQUES IN WORK-BASED LEARNING (3 credits)

This course reviews responsibilities and techniques of coordination for the work-based learning teacher-coordinator and/or work-based learning coordinator, with special emphasis on administration of the part-time cooperative program and analysis of the laws and regulations governing this program. (Cross-listed with TED 4850).

TED 8860 INVENTION & INNOVATION IN ENGINEERING EDUCATION (3 credits)

This course will address emerging trends in STEM education for in-service K-12 STEM teachers with a focus on the use of engineering education practices in teaching and learning content. STEM teachers will receive applicable, hands-on, classroom-ready experiences through lecture, professional instruction, and projects that will emphasize product design and creation through the Engineering Design Process. The Engineering Design Process will be central to the candidates' experiences in this course and will be used by the candidates to develop curriculum utilizing emerging trends to supplement current course content and standards. Interdisciplinary planning will be central to the course. (Cross-listed with STEM 8860).

Prerequisite(s)/Corequisite(s): Graduate status is required.

TED 8880 LEADERSHIP IN EARLY CHILDHOOD EDUCATION (3 credits)

This course seeks to prepare candidates with leadership skills in the early childhood field that will empower them to initiate and implement changes in programs serving young children and families. Candidates will explore and apply frameworks of leadership and analyze policy, governance, and power structures that can impact change. Candidates will also learn effective advocacy skills to positively influence policies and practices in program and governance structures. Lastly, candidates will examine approaches for developing new leaders in early childhood education through reflective supervision and mentorship.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8900 SECONDARY EDUCATION GRADUATE CAPSTONE (3 credits)

The Secondary Education Graduate Capstone course provides candidates with an opportunity to apply the knowledge, skills, and dispositions acquired during their program to content specific synthesis activities in their respective disciplines. Candidates will demonstrate their ability to integrate information from program coursework in the design, development and presentation of a final capstone project related to teaching and learning in 21st Century educational environments.

Prerequisite(s)/Corequisite(s): 30 credit hours towards degree completion; Permission required by Program Advisor. Not open to non-degree graduate students.

TED 8970 INDEPENDENT STUDY (1-3 credits)

This is a specially designed course taken under the supervision of a graduate faculty member to accommodate the student who has identified a focus of study not currently available in the departmental offerings and who has demonstrated capability for working independently.

Prerequisite(s)/Corequisite(s): Permission of Department and Graduate Faculty member.

TED 8980 PRACTICUM: VARIOUS CONTENT AREAS (1-6 credits)

This course is designed to provide school professionals with a guided, supervised, field experience that will develop and enhance the knowledge, skills, and dispositions requisite of a successful educational practitioner.

Prerequisite(s)/Corequisite(s): Prerequisites for the course will vary, depending on the content/discipline area. See syllabus for specific discipline area.

TED 8990 THESIS (1-6 credits)

This course is an independent research project completed under the direction of a thesis advisor and required of all candidates pursuing a Master of Science with Thesis option.

Prerequisite(s)/Corequisite(s): Completion of Selective Retention and approval of advisor. Not open to non-degree graduate students.

TED 9100 THEORIES, MODELS, AND PRACTICES OF LITERACY (3 credits)

This course develops a framework about the theories, models, practices, processes, and related research associated with literacy. The content looks across grade levels and student populations, and across social and cultural contexts in an examination of factors that impact theories and processes of literacy.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 9110 PRINCIPLES AND PRACTICES FOR TEACHING READERS (3 credits)

This graduate course for both elementary and secondary teachers is open to any candidate who has graduate standing in education. The purpose of the course is to develop a broad understanding of the reading process as well as materials and instructional strategies that support students who are emerging, developing, and maturing as readers in all areas of the curriculum.

TED 9130 ASSESSMENTS AND INTERVENTIONS - ELEMENTARY (3 credits)

This course is designed for graduate candidates enrolled in the Literacy Masters or Reading Specialist endorsement program. The purpose of this course is to develop an understanding of theory and research as it relates to assessment and evaluation and instructional approaches that support reading development. This knowledge is applied through a practicum experience with elementary students in which candidates integrate knowledge and practices related to assessment and evaluation of readers' strengths and needs.

TED 9140 ASSESSMENT AND INTERVENTION - SECONDARY (3 credits)

This course is designed for graduate candidates in literacy endorsement and Master's programs. The purpose of this course is to develop an understanding of theory and research as it relates to assessment and evaluation and instructional approaches as they relate to reading difficulties among middle and high school students. Included in this course is knowledge about the role and responsibility of a literacy leader as it relates to coaching, mentoring, supervision, and evaluation of a reading program. Application of this information is demonstrated through a practicum experience with middle and high school students.

Prerequisite(s)/Corequisite(s): TED 9100; TED 9110 concurrent with, or prior to TED 9140.

TED 9180 LITERACY RESEARCH SEMINAR (3 credits)

This course will develop advanced degree candidates' understanding and ability to critically examine current literacy research through work with (1) scientific methods of quantitative and qualitative research (2) discussion of historical trends in literacy research, (3) designs, methods, and tools of research, and (4) reviewing and critically examining current research studies in literacy. These examinations will be conducted from the perspectives of knowledge about literacy processes, classroom practice, and influence of previous research results. Teacher candidates will apply these issues in an action research project they design.

TED 9190 LITERACY GRADUATE CAPSTONE (3 credits)

This course is designed to help Literacy Masters students synthesize the knowledge gained from the program in order to serve as literacy leaders within the complex organizations of classrooms, schools, and school districts. In this course students will integrate their learning across the program in order to organize their future activities in teaching, leadership, advocacy, and engagement opportunities in ways that honor the interrelationships among classroom, school, sociocultural and economic contexts. They will prepare to engage with all literacy education stakeholders in cutting edge, innovative ways that advance both the learning of PK-12 students and the literacy education field.

Prerequisite(s)/Corequisite(s): This course is designed as a capstone event. Accordingly, students must have no more than 6 additional remaining credit hours of coursework. Permit to enroll required.

TED 9200 CRITICAL PEDAGOGY: TEACHING FOR SOCIAL JUSTICE (3 credits)

This course examines ways in which ideology, power, and culture intersect in P-12 educational settings. Undemocratic, inequitable, and oppressive structures are identified. Possibilities for democratic, equitable transformations are proposed.

Prerequisite(s)/Corequisite(s): Graduate status

STEM 8030 EVOLUTION: FROM GENOMES TO ECOSYSTEMS (3 credits)

This course will prepare students to evaluate and discuss evolution as an underlying concept in all of biology. Further, it will provide a comprehensive overview of evolutionary processes related to the evolution of genomes, development, physiology, morphology, behavior, and ecosystems. (Cross-listed with BIOL 8030).

Prerequisite(s)/Corequisite(s): Courses for graduate admission or equivalent, or with permission of instructor.

STEM 8040 TOPICS IN MATHEMATICAL COMPUTING (3 credits)

This course focuses on the current state-of-the-art technology that is either designed for or is uniquely suitable for teaching mathematics. (Cross-listed with MTCH 8040)

Prerequisite(s)/Corequisite(s): MATH 2200 or equivalent or approval of instructor.

STEM 8050 DATA-DRIVEN DECISION MAKING FOR EDUCATORS (3 credits)

This course provides graduate students with hands-on experiences that model data-driven decision making for educational success in today's classroom. Students will learn how to create valid and reliable assessments; interpret test data; use data to identify student, classroom, program, and school needs; and in general, to systematically enhance educational decision making. In addition, students will experience activities that can be integrated into student lessons to help to deepen concept learning, and to build student data literacy. The course will use real data sets, in interesting, hands on and technology-rich activities to find the "educational story" represented by the data. (Cross-listed with TED 8050).

Prerequisite(s)/Corequisite(s): Graduate Standing.

STEM 8170 ECOSYSTEM ANALYSIS FOR EDUCATORS (3 credits)

This course is designed for education graduate students who wish to take a field-based biology course that uses an interdisciplinary approach to understanding the ecosystem of the tallgrass prairie. This course engages graduate students in methods reflecting multidisciplinary STEM strategies (e.g. scientific inquiry, modeling, geographic information system mapping, etc.) associated with research taking place at the Glacier Creek Preserve. Graduate students completing this course will develop advanced knowledge of ecology, restoration ecology, and monitoring of prairie habitat restoration. Graduate students will focus on the technical, biogeochemical, ecological and cultural aspects of analyzing and restoring the prairie ecosystem and its various habitats. (Cross-listed with BIOL 8170)

Prerequisite(s)/Corequisite(s): Graduate Standing or Permission from the Instructor.

STEM 8370 DATA VISUALIZATION AND MODELING FOR EDUCATORS (3 credits)

In the growing context of data informed decisions there is a need to answer "what if" questions in a variety of decision-making situations, as well as to display data both visually and interactively. This course will provide foundational skills in data visualization and modeling for educational decision making and instruction. It draws upon key fundamentals in data visualization (representing data trends visually) as well as key strategies in data modeling (interactive representations to explore possible outcomes). The course also explores the use of visualization and modeling technologies as well as assisting student learning with these tools. (Cross-listed with TED 8370).

STEM 8410 IMPROVEMENT OF INSTRUCTION: SPECIAL TOPICS (3 credits)

This course provides an in-depth study of instructional theory, research, and methodology designed to extend teachers' professional knowledge base and enhance their pedagogical skills. When offered, a course may be limited to improvement of instruction in a selected subject area. (Cross-listed with TED 8410).

STEM 8420 TRENDS AND TEACHING STRATEGIES IN SCIENCE EDUCATION (3 credits)

This course is designed for the graduate candidate in the Department of Teacher Education whose study program emphasis is in the area of science education. The course will describe and analyze past and present trends in science education, including curricula, teaching-learning strategies, the laboratory and instructional materials. The course focus will be K-12 and as such is meant to serve both elementary and secondary graduate candidates. (Cross-listed with TED 8420).

Prerequisite(s)/Corequisite(s): Graduate standing.

STEM 8430 SCHOOL CURRICULUM PLANNING (3 credits)

This course is designed to provide advanced degree candidates with an understanding of the theory, principles, and practices utilized in curriculum planning in American schools. This course focuses on the principles and practices of effective curriculum planning and teachers' part in these processes as curriculum developers. (Cross-listed with TED 8430).

STEM 8450 BIOLOGY EDUCATION RESEARCH METHODS (3 credits)

In this course, students will learn the methods of conducting pedagogical research in Biology, understand how people learn the concepts, practices, and ways of thinking in science and engineering; understand the nature and development of expertise in a discipline; help identify and measure appropriate learning objectives and instructional approaches that advance students toward those objectives; contribute to the knowledge base in a way that can guide the translation of statistical findings to classroom practice; and identify approaches to make science and engineering education broad and inclusive. Students will work with live data sets to evaluate effective pedagogical approaches in the biology classroom of various audiences (K-16).

STEM 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)

This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with TED 8510, AVN 8510)

Prerequisite(s)/Corequisite(s): Graduate standing.

STEM 8530 INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS (3 credits)

This course is designed to provide graduate candidates with the opportunity to enhance interdisciplinary instructional strategies, curricular understanding, and lesson preparation in the areas of science, technology, engineering, the arts, and mathematics (STEAM) through analysis and reflective practices in STEAM. This course provides hands-on experiences that model STEAM integration techniques, including how to effectively engage with community agencies and partners to bring STEAM into the classroom. This course emphasizes not only the technical aspects of STEAM, but also the creativity and innovation that arts integration can add to enhance STEM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. (Cross-listed with TED 8530)

Prerequisite(s)/Corequisite(s): This course includes both teacher education and STEAM related topics and therefore fits into both TED and STEM program coursework.

STEM 8810 STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH (3 credits)

This course will explore theoretical and foundational pedagogical strategies in early childhood education used to deliver integrative STEM education in the preK-12 setting. In order to understand the research and practice of STEM disciplines in preK-12, it is necessary to examine the social, cultural, political, and functional aspects that influence them. Candidates will investigate the nature of STEM education, Early Childhood Education (ECE) pedagogy and perspectives of learning, content knowledge and dispositions for educators of STEM topics, and issues of access and equity for STEM education through literature, discussion, and practice. This course includes a community outreach component in which candidates will use qualitative methods to observe class topics in public settings. (Cross-listed with TED 8810)

Prerequisite(s)/Corequisite(s): Graduate status

STEM 8840 ENGINEERING EDUCATION EXTERNSHIP (3 credits)

This graduate course will address the best practice of effective teaching and learning in Engineering Education through professional collaboration between K-12 STEM (Science, Technology, Engineering, and Mathematics) teachers and practicing engineering professionals. K-12 STEM teachers, as graduate students in the course, will learn about and address real-world applications and career opportunities in STEM education through the externship. K-12 STEM teachers will research and develop authentic, experiential learning opportunities and projects for the classroom through course supports associated with lecture, discussion, and partnerships with practicing engineering professionals. The externship will be integral to the K-12 STEM teachers' experiences and work in this course, as the course models effective professional collaboration founded on experience, knowledge, and skills to achieve a curriculum enhancement goal. (Cross-listed with TED 8840).

Prerequisite(s)/Corequisite(s): Graduate status. Not open to non-degree graduate students.

STEM 8860 INVENTION & INNOVATION IN ENGINEERING EDUCATION (3 credits)

This course will address emerging trends in STEM education for in-service K-12 STEM teachers with a focus on the use of engineering education practices in teaching and learning content. STEM teachers will receive applicable, hands-on, classroom-ready experiences through lecture, professional instruction, and projects that will emphasize product design and creation through the Engineering Design Process. The Engineering Design Process will be central to the candidates' experiences in this course and will be used by the candidates to develop curriculum utilizing emerging trends to supplement current course content and standards. Interdisciplinary planning will be central to the course. (Cross-listed with TED 8860)

Prerequisite(s)/Corequisite(s): Graduate status is required.

STEM 8910 CAPSTONE IN CS EDUCATION (3 credits)

This course will allow graduate students, as an individual or as part of a group, to study and analyze specific problems related to teaching computing in schools. Projects will be concerned with the curriculum and/or instruction of computing and should address a broad scope of application rather than a specific level. (Cross-listed with CSTE 8910).

Prerequisite(s)/Corequisite(s): Student must have completed 21 hours in the Masters of CS Education program.

English

Degree Programs Offered

- English, MA (p. 1173)

Certificates Offered

- Advanced Writing Certificate (p. 1174)
- Literature and Culture Certificate (p. 1176)
- Teaching English to Speakers of Other Languages Certificate (p. 1177)
- Technical Communication Certificate (p. 1178)

ENGL 8010 SEMINAR: TEXT-BASED RESEARCH METHODS FOR ENGLISH STUDIES (3 credits)

An overview of the theories, methods and practices for conducting text-based research in English and related disciplines; graduate students gain experience conducting textual analysis and interpretation using relevant theories and methods, and reporting findings.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in English or permission of instructor.

ENGL 8020 SEMINAR: COLLEGE WRITING INSTRUCTION (5 credits)

The seminar in college writing instruction prepares Graduate Teaching Assistants to fulfill their responsibilities as teachers of first-year composition.

Prerequisite(s)/Corequisite(s): Graduate status and a teaching assistantship. Not open to non-degree graduate students.

ENGL 8026 AMERICAN POETRY TO 1900 (3 credits)

A comprehensive survey of the American poetic tradition from the 17th to the end of the 19th century. (Cross-listed with ENGL 4020).

Prerequisite(s)/Corequisite(s): Graduate standing; ENGL 8010 or ENGL 8030 recommended.

ENGL 8030 FIELD-BASED RESEARCH METHODS IN ENGLISH STUDIES (3 credits)

An overview of resources and methods for conducting qualitative, field-based research in English and related disciplines; students gain experience collecting data and analyzing data and reporting findings.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in English or permission of instructor. Not open to non-degree graduate students.

ENGL 8036 AMERICAN POETRY SINCE 1900 (3 credits)

A survey of the American poetic tradition from the turn of the twentieth-century to the present, focusing on various "schools" such as Imagism, High Modernism, the Harlem Renaissance, Confessional, Beats, and New Formalism. (Cross-listed with ENGL 4030).

Prerequisite(s)/Corequisite(s): Graduate Standing; ENGL 8010 or ENGL 8030 recommended

ENGL 8040 WRITING FOR PUBLICATION (3 credits)

In this seminar, students will study and practice methods for transforming their scholarly research and/or creative nonfiction into publishable articles and essays, as well as conference papers and other modes of sharing that work publicly. Students will edit and revise previously drafted work with the guidance of instructor feedback, advice from faculty mentors in their fields, and peer review. They will also research the larger structures and expectations of professional publishing in their fields.

Prerequisite(s)/Corequisite(s): Graduate standing and instructor permission.

ENGL 8066 THE AMERICAN NOVEL (3 credits)

A comprehensive survey of the evolution of the American Novel from the 1780s to the present day. Special emphasis will be placed on how a broad range of authors have responded to changing cultural and historical circumstances, and on how they have expressed widely varying viewpoints depending on their own gender, race, geographic region, and/or ethnicity. (Cross-listed with ENGL 4060).

Prerequisite(s)/Corequisite(s): Graduate standing in English

ENGL 8070 SEMINAR: WALT WHITMAN AND EMILY DICKINSON (3 credits)

A comprehensive examination of the poetry of Walt Whitman and Emily Dickinson.

Prerequisite(s)/Corequisite(s): Graduate Program admission. ENGL 8010 or ENGL 8030 recommended.

ENGL 8100 SEMINAR: TOPICS IN AMERICAN LITERATURE (3 credits)

This course involves the investigation of a particular topic (genre, author or group of authors, time period, subject area) in American literature. (The course may be repeated for additional credits under different topics.) Formerly ENGL 8060.

Prerequisite(s)/Corequisite(s): Graduate standing; ENGL 8010 or 8030 recommended

ENGL 8146 AMERICAN LITERARY REALISM AND NATURALISM (3 credits)

In the late nineteenth and early twentieth century two major literary genres - Realism and Naturalism - emerged in the United States not only to challenge the primacy of Romanticism and its generally optimistic view of life but also to actively engage with the modern America created after the Civil War. This course examines a wide range of realist and naturalist works, written between 1865 and 1914, by an extremely diverse group of male and female authors from different races, ethnicities, regions, religions, and socioeconomic classes. Emphasis will be placed on how various cultural, economic, political, and social factors influenced the construction and reception of these works. (Cross-listed with ENGL 4140).

Prerequisite(s)/Corequisite(s): Graduate standing in English

ENGL 8160 SEMINAR: POSTMODERN FICTION OF THE UNITED STATES (3 credits)

A seminar in American Fiction from the second half of the twentieth century into the twenty-first century which presents and discusses some of the major trends and issues associated with postmodern culture in America.

ENGL 8166 TOPICS IN AMERICAN REGIONALISM (3 credits)

A study of major topics in American literary regionalism, with special emphasis on particular social, cultural, and geographical contexts. Focus will be determined by instructor, but may include particular historical periods, geographic regions, authors, or literary themes. (Cross-listed with ENGL 4160).

Prerequisite(s)/Corequisite(s): Graduate standing in English

ENGL 8190 BOOK-SMART: EDUCATION IN LITERATURES AND CULTURES (3 credits)

The purpose of this course is to enable a critical consideration of how education is tied inextricably to issues of class, gender, religion, culture, and politics as well as an examination of how literature responds to and represents the theme of education, often also powerfully making the case for outsiders excluded by systems of privilege.

ENGL 8236 LATINO LITERATURE (3 credits)

A study of representative works of Mexican-American, Spanish-American, and American writers, along with their cultural and historical antecedents. Formerly ENGL 4180/8186 Chicano Literature and Culture. (Cross-listed with ENGL 4230).

Prerequisite(s)/Corequisite(s): Graduate, permission.

ENGL 8246 TEACHING LATINO LITERATURE (3 credits)

This course is designed specifically for current or future teachers of high school students. It introduces pedagogical approaches of contemporary literature by Latinos/as in the United States. The course provides an overview of Mexican American, Chicano/a, and other Latino/a voices in American literature from mid-19th Century to the present and complement that with social, cultural, historical and other approaches to developing teaching strategies. (Cross-listed with ENGL 4240)

ENGL 8256 WOMEN'S STUDIES IN LITERATURE (3 credits)

A critical study of literature by and/or about women in which students learn about contributions of women to literature, ask what literature reveals about the identity and roles of women in various contexts, and evaluates standard interpretations from the perspectives of current research and individual experience. (Cross-listed with ENGL 4250, WGST 4250).

ENGL 8266 WOMEN OF COLOR WRITERS (3 credits)

Women of Color Writers is designed to introduce students to the multicultural, literary experience and contributions of women of color writers. The course will elucidate the multi-ethnic and feminist/womanist perspectives reflected in literary works by examining the themes, motifs and idioms about a womanist perspective. The course examines critically the implications and conceptual grounds of literary study which have been based almost entirely on white, male literary experiences and criteria. (Cross-listed with ENGL 4260).

Prerequisite(s)/Corequisite(s): Graduate English major or permission of instructor for 8266

ENGL 8276 WOMEN WRITERS OF THE NORTH AMERICAN WEST (3 credits)

A survey of U.S. and Canadian women writers (18th century to the present) enabling students to examine issues of gender and sexuality across a wide thematic range, including settlement, land use, cultural displacement, and survival in western territories, states, and provinces of North America. (Cross-listed with ENGL 4270, WGST 4270).

Prerequisite(s)/Corequisite(s): Graduate standing; ENGL 8010 or ENGL 8030 recommended.

ENGL 8286 QUEER AMERICAN WESTS (3 credits)

A survey of queer literatures about the American West. The course will explore a variety of genres, including poetry, short stories, plays, novels, creative nonfiction, and, depending on time, film/television. "Queer" will be construed as including any "non-normative" sexualities and sexual identities (e.g., genderqueer, winkle, two-spirit, 3rd/4th gender). Non-western writers (e.g., Walt Whitman) imagining the West queerly may also be included. (Cross-listed with ENGL 4280, WGST 3160).

Prerequisite(s)/Corequisite(s): ENGL 8010 or ENGL 8030 recommended

ENGL 8300 SEMINAR: SHAKESPEARE (3 credits)

Critical analysis of ten tragedies, ten histories, or ten comedies of Shakespeare. Formerly ENGL 9120.

ENGL 8306 ANGLO-SAXON LITERATURE (3 credits)

From the sixth to the eleventh centuries, a people known collectively as the Anglo-Saxons ruled Britain, giving it a new name and establishing the roots of the modern English language. Anglo-Saxon culture continues to haunt the modern imagination. We study the historic, artistic and intellectual environment that produced this influential literary tradition. We also place these people, their language, and their writings within the context of the broader early medieval world. Finally, we engage with some of the foremost modern scholars of this fascinating culture. (Cross-listed with ENGL 4300).

Prerequisite(s)/Corequisite(s): Graduate standing.

ENGL 8310 ECOLOGICAL WRITING AND ANALYSIS (3 credits)

This course provides students with the opportunity to develop expertise in a wide range of foundational works and key techniques of ecological writing and theory in English. By engaging mindfully with these works and techniques, students will develop advanced skills in ecologically oriented critical analysis and creative thinking. This course supports the Writing and Critical Reflection and the Health and the Environment concentrations in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8310)

ENGL 8326 CHAUCER (3 credits)

A literary, linguistic, and historical study of the works of Geoffrey Chaucer: his dream visions, Troilus and Criseyde, and the Canterbury Tales. (Cross-listed with ENGL 4320).

ENGL 8336 RENAISSANCE SATIRE (3 credits)

Satirical traditions and the literature of critique and invective as inherited from medieval and classical forms. Considerations will include satire as an aesthetic, philosophical, and political mode of expression; topicality as it relates to and portrays cultural history; and self-representation through humanist learning and response. (Cross-listed with ENGL 4330).

Prerequisite(s)/Corequisite(s): Graduate standing

ENGL 8346 SHAKESPEARE (3 credits)

A critical study of selected plays and poetry from Shakespeare's works, in the context of the historical and cultural moment of the English Renaissance and as a set of texts inherited and reinvented by modernity. (Cross-listed with ENGL 4340).

Prerequisite(s)/Corequisite(s): ENGL 1160

ENGL 8376 RESTORATION AND EIGHTEENTH CENTURY LITERATURE (3 credits)

Poetry, prose (exclusive of the novel), and drama of England in the Restoration and 18th century (1660-1800), with emphasis on Swift and Johnson. Formerly ENGL 4620/8626. (Cross-listed with ENGL 4370).

ENGL 8396 MEDIEVAL CELTIC LITERATURE (3 credits)

This course examines the literature and culture of the Celtic civilizations. The course examines the archeological record and texts about the Celts by Greek and Roman authors, as well as later medieval tales from the Irish, Welsh, and Breton traditions. All texts are in translation with guided reference to the original languages. (Cross-listed with ENGL 4390).

Prerequisite(s)/Corequisite(s): ENGL 2410 or ENGL 2420 and one ENGL course above 3299, or instructor permission; ENGL 2310 recommended. Not open to non-degree graduate students.

ENGL 8400 SEMINAR: ENGLISH RENAISSANCE (3 credits)

A seminar in a few significant literary figures of the English Renaissance. Formerly ENGL 8080.

ENGL 8410 IMMIGRATION, MIGRATION, AND DIASPORA: CRITICAL APPROACHES AND THEORIES OF MOVEMENT IN LITERATURE (3 credits)

This seminar in literature and some film analyzes the depictions in non-fiction and fiction of displacement as a result of immigration, migration, refugee status, or any other considered movement, intentional or imposed. It will focus largely on the U.S. experiences of those displaced from all locales. (Cross-listed with CACT 8410).

Prerequisite(s)/Corequisite(s): Graduate standing.

ENGL 8416 LITERATURE OF THE ROMANTIC PERIOD (3 credits)

Poetry and prose (excluding the novel) of England from 1798 to 1830. Formerly ENGL 4810/8816. (Cross-listed with ENGL 4410).

ENGL 8426 NINETEENTH-CENTURY ENGLISH AND ANGLOPHONE LITERATURES (3 credits)

English and Anglophone poetry and prose (excluding the novel) in the nineteenth century. (Cross-listed with ENGL 4420).

Prerequisite(s)/Corequisite(s): Graduate standing

ENGL 8436 THE BRITISH AND ANGLOPHONE NOVEL (19TH AND 20TH CENTURY) (3 credits)

Introduction to the British and Anglophone novel in the nineteenth and twentieth century. (Cross-listed with ENGL 4430).

Prerequisite(s)/Corequisite(s): Graduate standing

ENGL 8496 GREAT WORKS OF BRITISH LITERATURE (3 credits)

This course pursues a trans-historical approach to literary study while interrogating what makes a literary work "great" within the field of British Literature. It allows students to engage with great works of British literature from across the ages - starting with the foundations of British literary history in the medieval period and extending to the present. Attending to formal, thematic, and historical dimensions of a wide array of literary texts, we will increase our appreciation of the many ways texts make meaning while developing a deep understanding of the British literary tradition. Reading literature with a sense of purpose and comparatively across time will allow us not only to appreciate great works but also to enhance the impact they have on us. Furthermore, we will recognize how culture and politics inform what literary works become deemed "great," thereby developing a critical understanding of the process of canon formation. (Cross-listed with ENGL 4490).

Prerequisite(s)/Corequisite(s): Graduate standing in English

ENGL 8610 PROFESSIONAL AND TECHNICAL WRITING (3 credits)

This course will introduce students to the theory, research, and practices of professional and technical writing. Through readings, discussions, and assignments, students will gain an understanding of the types and circumstances of communication challenges encountered in the workplace. The course will also consider the roles of persuasion and ethics in written communication. (Cross-listed with CACT 8610).

ENGL 8615 INTRODUCTION TO LINGUISTICS (3 credits)

An introduction to the concepts and methodology of the scientific study of language; includes language description, history, theory, variation, and semantics as well as first and second language acquisition. (Cross-listed with ENGL 3610).

ENGL 8620 SEMINAR: JANE AUSTEN (3 credits)

This seminar examines Jane Austen's oeuvre from her juvenilia to her posthumous fragments, giving particular emphasis to her six great novels, *Northanger Abbey*, *Sense and Sensibility*, *Pride and Prejudice*, *Mansfield Park*, *Emma*, and *Persuasion*. Austen biography and scholarship provide the framework for studying her literary career.

ENGL 8626 HISTORY OF ENGLISH (3 credits)

A critical study of both the internal and external histories of English. Includes historical development of English phonology, morphology, graphics, syntax, diction, dialects, and semantics. (Cross-listed with ENGL 4620).

ENGL 8630 DIGITAL RHETORIC (3 credits)

This course provides students with the opportunity to develop expertise in the theory and practice of digital rhetoric by considering technology's deep impact on how we define and engage in writing. Students examine contemporary writing practices as part of a rich rhetorical tradition while they design and create effective multimodal compositions and analyze foundational works in digital rhetoric. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8630).

ENGL 8640 CREATIVE NONFICTION IN DIGITAL ENVIRONMENTS (3 credits)

Students in this course will study creative nonfiction in digital environments, analyze rhetorical situations created in digital environments, and create individual creative nonfiction blogs-which might include, in addition to other modalities, sounds, animations, and hypertext. The course will also focus on the study and analysis of craft-elements of creative nonfiction: narrative persona, tone, rhythm and style, scenic construction, among others. Students taking this course will learn to read with interpretative and analytical proficiency a broad range of creative nonfiction in digital environments. (Cross-listed with CACT 8640).

ENGL 8646 APPLIED LINGUISTICS (3 credits)

This course is designed to develop knowledge and skills for second language instructors and others interested in second language learning and instruction. Content covers relevant second language acquisition (SLA) theory and second language pedagogy. (Cross-listed with ENGL 4640)

Prerequisite(s)/Corequisite(s): ENGL 3610 and Junior standing or with permission from instructor.

ENGL 8650 WRITING ACROSS DIFFERENCES: RHETORICAL THEORY FOR PERSUASION AND PUBLIC ADVOCACY (3 credits)

This course provides students a theoretical foundation for understanding how language is used in various types of discourses and texts as a means of convincing others of a given viewpoint or idea. Students will apply this theory to real-world writing scenarios in their scholarly areas of interest, to advocacy and social issues movements, or to address workplace needs and goals. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8650).

ENGL 8656 STRUCTURE OF ENGLISH (3 credits)

A study of grammar as it has been conceived through history, including traditional prescriptive and descriptive approaches as well as transformational- generative grammar. (Cross-listed with ENGL 4650).

Prerequisite(s)/Corequisite(s): ENGL 3610 / ENGL 8615 or permission

ENGL 8676 SOCIOLINGUISTICS (3 credits)

An exploration of interconnections between language, culture, and communicative meaning, stressing interactional, situational, and social functions of language as they take place and are created within social contexts. (Cross-listed with ENGL 4670).

Prerequisite(s)/Corequisite(s): ENGL 3610/ENGL 8615, or permission.

ENGL 8696 TOPICS IN LINGUISTICS (3 credits)

Studies in a selected subfield or problem area of linguistics such as sociolinguistics, generative semantics, applied linguistics, descriptive linguistics, teaching English as a foreign language, etc. Formerly ENGL 4960/8966. (Cross-listed with ENGL 4690).

Prerequisite(s)/Corequisite(s): ENGL 4610/ENGL 8616, or permission.

ENGL 8736 RHETORIC (3 credits)

A study of contemporary theories of invention, form, and style and their application in written discourse. Formerly ENGL 4530/8536. (Cross-listed with ENGL 4730).

ENGL 8740 SEMINAR: DISCOURSE, CULTURE, AND POWER (3 credits)

A graduate-level introduction to theories and methodologies of analyzing spoken and written discourse. Students will employ various methods to collect natural language data, including field research, and analyze the data using appropriate theoretical orientations to discourse analysis.

ENGL 8750 OXBOW WRITING PROJECT (3 credits)

Oxbow Writing Project summer institute immerses K-16 educators in writing pedagogy via their own writing, presentations about writing and pedagogy, reading and discussing professional literature, designing and implementing an in-depth inquiry project, and developing leadership strengths. Oxbow is a National Writing Project Site.

Prerequisite(s)/Corequisite(s): Acceptance into Oxbow Writing Project Summer Institute

ENGL 8756 COMPOSITION THEORY & PEDAGOGY (3 credits)

This course is an overview of composition theories and pedagogies since 1968 and focuses on how historical movements in education and theoretical frameworks (rhetorical, expressivist, socio-cognitivist, collaborative, social constructionist, critical pedagogy, cultural studies, feminist, technological, and linguistic theories) both enrich and complicate the teaching of composition. (Cross-listed with ENGL 4750).

ENGL 8760 SEMINAR IN POPULAR CULTURE, MASS MEDIA AND VISUAL RHETORIC (3 credits)

This course studies how discursive meaning is made through established and emerging visual technologies and the impact visual symbol systems are having upon the field of rhetoric in general. Students will investigate how visual technologies, discourse theory, and semiotic theory has intersected with and expanded contemporary rhetorical theories, and they will apply these theories to visual texts. (Cross-listed with COMM 8200).

ENGL 8770 L2 COMPOSITION PEDAGOGY (3 credits)

This course helps prepare students to teach writing to Language Learners. Students will review principles of Second Language Acquisition Theory, study theories of teaching writing, and learn tenets of curriculum design. Students who complete the course will be able to design curricula, courses, syllabi, and lesson plans.

Prerequisite(s)/Corequisite(s): Graduate Standing

ENGL 8775 WRITING CENTER THEORY, PEDAGOGY, AND RESEARCH (3 credits)

This course is an introduction to writing center theory, pedagogy, research, and history. The course is designed for undergraduate and graduate students interested in or already working in a writing center. Throughout the course we will explore a wide range of models for writing center work and the often problematic metaphors associated with those models. The overall aim in this course will be to help students develop multiple strategies for teaching writing one-to-one, for conducting research in writing centers, and for understanding writing center administration. (Cross-listed with ENGL 3770).

ENGL 8796 ENGLISH CAREER PREPARATION (1 credit)

This course will prepare students for an internship or a career, addressing topics such as finding and applying for internships, workplace and industry, resume and cover letters, interviewing techniques, developing a professional portfolio, and statement of goals. Taking this course prior to an internship is highly recommended. (Cross-listed with ENGL 4790).

Prerequisite(s)/Corequisite(s): The course is restricted to undergraduate Majors and graduate students in English.

ENGL 8800 SEMINAR: TOPICS IN ENGLISH LANGUAGE AND LITERATURE (3 credits)

An intensive study of one or more authors, genres in literature and language not covered by regular courses.

Prerequisite(s)/Corequisite(s): Graduate standing

ENGL 8806 ENGLISH INTERNSHIP (1-3 credits)

Supervised internship in a professional setting with a local employer or nonprofit organization. Hands-on experience. Work hours, activities, and responsibilities must be specified in a written agreement between the employer and the student in consultation with the internship director. Some internships will be paid and some will not. (Cross-listed with ENGL 4800).

Prerequisite(s)/Corequisite(s): ENGL 2410 or ENGL 2420, an ENGL 4000-level writing course, and permission of internship director.

ENGL 8816 DIGITAL LITERACIES FOR TECHNICAL COMMUNICATORS (3 credits)

This course addresses emerging issues in digital literacies such as the rhetoric of technology, technological competency, technology and information ecologies, critical awareness of technology and human interactions, judicious application of technological knowledge, user-centered design, networking and online communities, ethics and technology, and culture and technology. (Cross-listed with ENGL 4810, JMC 8816, JMC 4810).

Prerequisite(s)/Corequisite(s): Graduate Standing or permission of instructor

ENGL 8826 AUTOBIOGRAPHY (3 credits)

In this creative nonfiction writing course, students will craft, workshop, and revise original works of autobiographical nonfiction. Students will read, discuss and critically analyze writing techniques found in diverse autobiographical prose by published authors and student peers. A final project will invite students to research and summarize a book-length autobiography of their own. (Cross-listed with ENGL 4820).

Prerequisite(s)/Corequisite(s): graduate standing

ENGL 8836 TECHNICAL COMMUNICATION (3 credits)

Technical Communication introduces students to the field of technical communication. Students will study the development of print and electronic genres common to industry settings, the design and production of technical documents, the writing processes and work practices of professional technical communicators, and the roles of technical communicators in organizational contexts. (Cross-listed with ENGL 4830, JMC 4830, JMC 8836).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

ENGL 8846 TRAVEL WRITING (3 credits)

Travel Writing is a course in professional writing. Although the course includes critical examinations of texts, the primary focus is on the composition of various kinds of travel essays. (Cross-listed with ENGL 4840).

Prerequisite(s)/Corequisite(s): Graduate standing

ENGL 8850 SEMINAR: SPIRITUAL NONFICTION (3 credits)

Spiritual Nonfiction is a creative nonfiction writing seminar where students study and practice various forms and styles of spiritual nonfiction. The comparative study of spirituality and religion is not the focus of this course. Writing is the focus. Discussion of the characteristics of spiritual experiences and ideas will be limited to their formalistic treatment within individual works.

Prerequisite(s)/Corequisite(s): Graduate Standing. At least one creative nonfiction writing course at 4000/8000 level.

ENGL 8856 INFORMATION DESIGN FOR TECHNICAL COMMUNICATORS (3 credits)

This course introduces students to strategies for integrating visual and textual elements of technical documents. Instruction will focus on design theory and application through individual and collaborative projects. Students will develop the professional judgment necessary for making and implementing stylistic choices appropriate for communicating technical information to a lay audience. (Cross-listed with ENGL 4850, JMC 4850, JMC 8856).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

ENGL 8866 THE MODERN FAMILIAR ESSAY (3 credits)

Students in this course will read as well as write the Modern Familiar Essay, a sub-genre of Creative Nonfiction, with an emphasis on writing the informal essay. Essays will represent a wide scope of perspectives and issues, including gender, social class, education, politics, culture, sexuality, health, race, and ethnicity, and will range from the the sixteenth century "inventor" of the modern essay to twenty-first century practitioners of the form. This course will also cover a wide range of sub-genres and stylistic forms, such as memoir, autobiography, flash, experimental, and more. (Cross-listed with ENGL 4860).

Prerequisite(s)/Corequisite(s): Graduate standing and/or admittance to the Advanced Writing program

ENGL 8870 SEMINAR: PUBLISHING NON-FICTION (3 credits)

A seminar in the process leading to publication of essays in one or more of the following genres: scholarly essay, personal essay, travel essay, pedagogical essay, autobiographical essay.

Prerequisite(s)/Corequisite(s): Graduate standing and 6 hours of graduate credit.

ENGL 8876 TECHNICAL EDITING (3 credits)

This course introduces students to the roles and responsibilities of technical editors: the editorial decision-making processes for genre, design, style, and production of technical information; the communication with technical experts, writers, and publishers; the collaborative processes of technical editing; and the techniques technical editors use during comprehensive, developmental, copyediting, and proofreading stages. (Cross-listed with ENGL 4870, JMC 4870, JMC 8876).

Prerequisite(s)/Corequisite(s): ENGL 1160 or permission of the instructor

ENGL 8880 ADVANCED PLACEMENT INSTITUTE: LANGUAGE & COMPOSITION (3 credits)

An intensive Advanced Placement Summer Institute focusing on curricular and pedagogical questions, paired with independent specialized research into various topics related to the planning, organization, implementation, and improvement of Advanced Placement English Language and Composition instruction and learning at the secondary educational level. Course may be repeated if the APSI topic is different.

Prerequisite(s)/Corequisite(s): Must register for and successfully complete the UNO Advanced Placement Summer Institute for English Language and Composition.

ENGL 8890 SEMINAR: EXPERIMENTS IN CREATIVE NONFICTION (3 credits)

This is a graduate seminar in creative nonfiction. This course explores, through an intensive engagement with long and short forms of creative nonfiction, the ways in which contemporary practitioners of the genre have experimented with form and meaning. Students will attempt their own experiments in writing.

Prerequisite(s)/Corequisite(s): Graduate Standing, Two graduate-level creative nonfiction courses from ENGL 8846, ENGL 8866, ENGL 8870, or ENGL 8800, when topic is appropriate.

ENGL 8896 CAPSTONE COURSE IN TECHNICAL COMMUNICATION (3 credits)

In this capstone course, students will extend foundational skills learned in previous technical communication courses. Students will demonstrate their competency in the technical documentation process in organizational environments, the issues important to the technical communication profession, and the practices of writing and creating complex technical documents for specific purpose and audience. (Cross-listed with ENGL 4890, JMC 8896, JMC 4890).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

ENGL 8900 INDEPENDENT STUDY (1-3 credits)

Specially planned readings in a well-defined field of literature or language, carried out under the supervision of a member of the graduate faculty. Designed primarily for the student who has need of work not currently available in the departmental offering and who has demonstrated capability of working independently.

Prerequisite(s)/Corequisite(s): Graduate, permission of instructor, and no "incompletes" outstanding.

ENGL 8910 SEMINAR: CRITICAL THEORY (3 credits)

Seminar in critical theory with readings in New Criticism, semiotics, structuralism, deconstruction, New Historicism, feminist and gender theory, cultural materialism, psychoanalytic theory, queer theory, postcolonial theory, New Formalism, and other more recent theoretical developments in literary study.

Prerequisite(s)/Corequisite(s): ENGL 8010 recommended.

ENGL 8936 NARRATIVE NONFICTION (3 credits)

Students will read, discuss, and write critical analyses of narrative nonfiction by published and student writers. They will craft, workshop, and revise original works of narrative nonfiction. (Cross-listed with ENGL 4930).

Prerequisite(s)/Corequisite(s): One creative nonfiction course or permission from the instructor

ENGL 8956 BRINGING THE WAR HOME: DEPICTIONS OF WAR VETERANS IN LITERATURE AND FILM (3 credits)

Course explores the impact of war on combatants, their families and communities as represented in literary fiction, film, historical documentation, first-person accounts, and other texts written in or translated to English. (Cross-listed with ENGL 4950, MEDH 4950).

Prerequisite(s)/Corequisite(s): Graduate standing

ENGL 8966 TOPICS IN LANGUAGE AND LITERATURE (3 credits)

This course introduces students to a specialized subject matter in the discipline of English Studies not covered in existing courses. This course may be repeated for different topics. (Cross-listed with ENGL 4960).

Prerequisite(s)/Corequisite(s): Graduate Standing

ENGL 8976 WRITING ABOUT SICKNESS AND HEALTH (3 credits)

Students will explore many themes of the human experience in healthcare through reading and discussion of selected poems, short stories, excerpts from fiction, and essays and creative nonfiction. To help students generate their own poems, stories, and essays, the class will incorporate the work of community writing programs and projects. (Cross-listed with ENGL 4970).

ENGL 8990 THESIS (3-6 credits)

Independent research or creative project written under the supervision of a director.

Prerequisite(s)/Corequisite(s): Graduate, permission of thesis director. Not open to non-degree graduate students.

English, MA

Department of English, College of Arts & Sciences

Vision Statement

The Department of English reflects the centrality of language to human endeavors and its effectiveness in achieving awareness of the human complexities that are part of us, our relationships, and our roles in the world.

Program Contact Information

Ramón Guerra, PhD, Graduate Program Chair (GPC)
192D Arts & Science Hall (ASH)

rguerra@unomaha.edu

Program Website (<https://www.unomaha.edu/college-of-arts-and-sciences/english/academics/graduate-programs/>)

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- To be admitted to graduate study in English, a student should have completed at least 18 credit hours in undergraduate English courses above the freshman level with an average grade of "B" (3.0/4.0) or higher.
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country

on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.

- Paper-based TOEFL: 600, Internet-based TOEFL: 100, IELTS: 8, PTE: 68, Duolingo: 120
- **Statement of Purpose:** The statement (of about 500-1000 words) should convey the applicant's previous study in the field of English, any relevant work or life experience, the applicant's philosophy of learning and reason for pursuing a master's degree in English, and anything else that might help convey the applicant's personality, spirit, or intellectual character.
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
 - *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

Teaching Assistantship

The application for a graduate assistantship requires the following additional materials, which should all be sent directly to Dr. Ramón Guerra, Graduate Program Chair, Department of English, ASH 192D, University of Nebraska at Omaha, 6001 Dodge St., Omaha, NE 68182-0175.

- **Application coversheet** (available online (https://www.unomaha.edu/college-of-arts-and-sciences/english/_files/engl-ta-application%202017.pdf))
- **Statement of Purpose:** 500-1000 words detailing the applicant's ambitions in the graduate program and his or her motivation for pursuing an assistantship. In addition, this statement should convey some sense of the applicant's identity and philosophy of learning.
- **Writing Sample or Samples** of academic or creative non-fiction prose by the applicant totaling 10-20 pages in length. The sample(s) should reflect the applicant's best writing, demonstrating a cohesive argument and/or sustained thematic focus and excellent control of syntax and style.
- **Three Letters of Recommendation** from past teachers or anyone else reasonably able to offer an objective assessment of the applicant's writing, critical reasoning skills, and promise as a teacher. These letters should be sent to the above address directly by the recommenders, along with waiver forms.

Degree Requirements

Option 1: Thesis

(24 hours of coursework; 6 hours of thesis)

- For this option at least 12 hours of coursework must be seminar-level.

Code	Title	Credits
Required Courses for both Thesis and Non-Thesis Options, Select Two		6

ENGL 8010	SEMINAR: TEXT-BASED RESEARCH METHODS FOR ENGLISH STUDIES	
ENGL 8030	FIELD-BASED RESEARCH METHODS IN ENGLISH STUDIES	
ENGL 8040	WRITING FOR PUBLICATION	
Electives		
Select 18 hours for the Thesis Option, 6 hours of which must be seminars (see below).		18
Thesis Requirement		
ENGL 8990	THESIS	6
Total Credits		30

Option 2: Non-Thesis

(36 hours of coursework)

- For this option at least 18 hours of coursework must be seminar-level.

Code	Title	Credits
Required Courses for both Thesis and Non-Thesis Options, Select Two		6
ENGL 8010	SEMINAR: TEXT-BASED RESEARCH METHODS FOR ENGLISH STUDIES	
ENGL 8030	FIELD-BASED RESEARCH METHODS IN ENGLISH STUDIES

Electives		
Select 30 hours for the Non-Thesis Option, 12 hours of which must be seminars. Seminars end in a zero (0) (see below).		30
Total Credits		36

Electives for Both Thesis and Non-Thesis Options

Any ENGL Graduate Course 8000 or above

Coursework Outside English

With the approval of the student's advisor and the English graduate program committee, a student may include a minor or coursework from another related discipline or disciplines as part of the plan of study. For both the thesis and non-thesis options, a minor is nine hours (3 courses). The maximum amount of coursework that may be applied from another discipline or disciplines is the same as that for a minor in both options (nine hours).

Exit Requirement

Option 1 Thesis:

- ENGL 8990 Thesis six hours
- Comprehensive Examination

Option 2 Non-Thesis:

- Comprehensive Examination

Advanced Writing Certificate

Department of English, College of Arts & Sciences

Vision Statement

The graduate certificate in advanced writing is designed for students interested in becoming more expressive, powerful writers of nonfiction prose. Students interested in securing publication of their writing are mentored in the publication process by the faculty.

The advanced writing certificate is designed for the following students:

- Writers interested in developing and publishing their creative nonfiction;
- Graduate students in English and related fields;
- Educators seeking writing-specific training and credentials;
- Working professionals who either are currently employed or will be seeking employment as experts in written communication;
- Individuals who work in community service organizations;
- Individuals dedicated to cultural activities in the community.

to complete an evaluation, or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.

- *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

¹ If registering for ENGL 8800; the topics must be related to advanced writing such as rhetoric and memory, nature writing, etc.

² If registering for ENGL 8966; the topics must be related to advanced writing such as narrative nonfiction, graphic memoir, food writing, writing women's lives, etc.

³ If registering for ENGL 8100; the topic must be Native American Nonfiction.

Exit Requirements:

Portfolio Requirement

Students will assemble a portfolio representing their achievement in the five courses (15 hours) applied toward the advanced writing certificate. The portfolio will contain at least one writing sample from each course and

will be reviewed by the student's advisor and one other graduate faculty member involved in offering courses approved for the advanced writing certificate. As part of the portfolio requirement, each student will make an oral presentation to the reviewing professors. During that discussion, special attention will be given to each student's professional goals for their writing. Please see the website (<http://www.unomaha.edu/college-of-arts-and-sciences/english/academics/graduate-programs/>) for the advanced writing graduate certificate for a more detailed description of the portfolio requirement and the deadlines for submission.

Literature and Culture Certificate

Department of English, College of Arts & Sciences

Vision Statement

The graduate certificate in literature and culture offers an education in the intersection between literature written in English—either originally or in translation—with human culture broadly considered. The certificate will give high school teachers the credential to teach preparatory coursework worthy of college credit at UNO and other universities. And it is also designed as a continuing education option for anyone wishing to study literature at a post-baccalaureate level for personal enrichment. The certificate can be earned as part of the larger MA in English at UNO, and it can also be applied toward completion of that larger program retroactively.

The certificate will teach:

- literature of every period, from ancient to modern, in a variety of thematic and historical contexts;
- cultural encounters captured imaginatively on the pages of the literary text;
- the relationship of a culture to the literature produced within it, both harmonious and discordant;
- theories of literary effects on the course of human culture and history; and
- literature as a celebrated artifact of human hope, critique, and beauty.

Although applicants need no formal training in literature to enroll, they should expect to be immersed in a professional discipline of literary study with a research component. One especially designated course required for the certificate will provide training for students in the methodology of literary research.

Teaching English to Speakers of Other Languages Certificate

Department of English, College of Arts & Sciences

Vision Statement

In the United States, the need for well-prepared language teachers is constant. Teachers are more likely than ever to have the opportunity to teach students who come from a variety of cultural and linguistic backgrounds.

The Department of English offers students the opportunity to obtain a certificate in teaching English to speakers of other languages (TESOL). This is a rigorous 12-hour/4-course graduate certificate. Normally, students are able to complete the certificate requirements within three semesters.

The graduate TESOL certificate is a rigorous academic credential that includes a focus on the structure of the English language, theories of second language learning, and approaches to classroom pedagogy. All teachers will eventually work with nonnative speakers, so all teaching concentrations—like math, history, science, and social studies—are welcome.

A TESOL certificate does not certify a graduate to teach in Nebraska public schools. Instead, it is an academic credential meant for teachers already certified in other areas, for people who plan to teach in venues other than public schools, and for anyone who works in some capacity with non-native speakers of English.

Students in teacher education or in speech/language pathology should contact the TESOL director prior to applying to this program.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- An Introduction to Linguistics course is required. Equivalent course(s) from other institutions will be considered.
- Students in the College of Education, Health, and Human Sciences should meet with the TESOL director to plan a program of study.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 600, Internet-based TOEFL: 100, IELTS: 8, PTE: 68, Duolingo: 120
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
- *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

Degree Requirements

Code	Title	Credits

Substitutions		
Under special circumstances, the TESOL certificate director may approve up to six hours of substitutions.		
Total Credits		12

¹ With a TESOL focus

Students are encouraged to take more than the minimum number of required courses and may not repeat any courses already taken at the undergraduate level. The linguistics faculty strongly recommends that all TESOL certificate students achieve an oral and written proficiency in a language other than English.

Technical Communication Certificate

Department of English, College of Arts & Sciences, and School of Communication, College of Communication, Fine Arts and Media

Vision Statement

The graduate certificate in technical communication is designed for graduate students and industry professionals seeking a foundation in the theory and practice of technical communication. This foundation provides students with the kinds of competencies expected from technical communication professionals, including writing, editing, design, and software applications.

The technical communication certificate is designed for the following students:

- Part- and full-time UNO students pursuing graduate degrees, who are seeking a cognate area outside, but relevant to, their primary program of study;

- Industry professionals seeking to develop the knowledge and skills for a career in technical communication; and
- Business or technical professionals seeking to enhance their employment opportunities through a professional development program.

Exit Requirements

Students will assemble a final portfolio representing their achievement in the five courses (15 hours). The portfolio will contain at least one writing sample/project from each course and will be reviewed by the technical communication program director and one other member of the graduate faculty from the Department of English or the School of Communication. Faculty teaching these courses will be aware of this portfolio requirement and will assign work that can be used as part of the portfolio (e.g., a report, user's manual, website, etc.).

Biomechanics and Kinesiology, PhD

School of Health and Kinesiology, Department of Biomechanics, College of Education, Health, and Human Sciences

Vision Statement

The doctoral degree in biomechanics and kinesiology at the University of Nebraska at Omaha (UNO) is a joint program between the Department of Biomechanics and the School of Health and Kinesiology. The degree is based on the physiology, biochemistry, biophysics, motor control and development, and psychology of human movement. The program is aimed at developing researchers who are working to improve movement function and physical activity using evidence-based approaches through interdisciplinary clinical and translational research. A problem-solving approach is used across the age and health spectrum for disease prevention, health enhancement, physical rehabilitation, and motivation for physical activity. The program offers four areas of concentration in biomechanics, physiology of exercise, motor development and control, and physical activity.

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework. To receive full consideration for departmental assistantships, applications must be received by January 31st.

Other Requirements

- GPA of 3.2 in master's program or in the last 30 hours of previous graduate work
- Master's degree, or minimum of 30 graduate hours in a related field, e.g., health, physical therapy
- **Entrance Exam:** Graduate Record Exam (GRE) with a total score (verbal and quantitative) of at least 297. Exam scores must have been taken within the last three (3) years.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
- Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53 with a score of at least 20 in all categories (listening, reading, writing, and speaking), Duolingo: 105
- **Statement of Purpose:** Needs to state goals and objectives for seeking the degree. Students will identify their intended area of focus and the name of the faculty advisor with whom they wish to work (maximum 500 words).
- **Writing Sample:** Provide a writing sample which could include: first-author scientific paper, thesis proposal, research paper, or similar example showcasing the student's aptitude for writing.
- **Resume/CV**
- **Letters of Recommendation:** Three are required

- Undergraduate Course Deficiencies: these courses are determined by the student's mentor in collaboration with their supervisory committee. Each student's individual deficiency courses will be approved in their program of study.
- Identification and confirmation by a faculty member willing to act as advisor and mentor to the student (see program-related information). The applicant is expected to contact a potential advisor to determine if a suitable match in interests exists. This assures that the student will be able to develop a program of study that meets the specific goals intended. Please note that assistantship funding is a separate process and should be discussed with your faculty mentor.
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluations (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of the transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. Applicants will be notified by the individual program if an external course-by-course evaluation is required.
 - Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

Degree Requirements

Code	Title	Credits
Required Courses		21
BMKI 9001 or BMKI 9031	RESEARCH IN HEALTH & KINESIOLOGY BIOSTATISTICS IN BIOMECHANICS I	
BMKI 9041 or BMKI 9040	ADVANCED STATISTICS BIOSTATISTICS IN BIOMECHANICS II	
BMKI 9000	GRANT WRITING FOR THE BIOMEDICAL SCIENCES	
BMKI 9010	PRINCIPLES AND PRACTICE OF BIOMEDICAL RESEARCH	
Take the following course for a minimum of 9 credit hours:		
BMKI 9910	DOCTORAL SEMINAR	
Concentrations		
See Biomechanics and Kinesiology, PhD Concentrations		24
BMKI 9990	DISSERTATION	15
Total Credits		60

¹ If required courses have previously been taken, additional research core courses must be taken in order to meet the 21-hour requirement.

- ² This seminar is designed to enhance success in academia and maximize the student's research experiences. The student will be required to register for at least 9 credit hours (typically 3 hours per semester following their first year in the program). In these credit hours the student will attend formal reading clubs with the advisor where he/she will be engaged in reviewing the related literature via journal articles, conducting research projects, reviews of literature, meta-analyses, etc. In addition, the student will be taught how to write successful grants and develop a successful line of research. Each semester for a graded outcome, the student will have to produce material such as a manuscript based on data acquired in the laboratory from the ideas developed in the seminar, a grant that will support the research ideas developed, or significant progress on a research-related project. Students will co-develop these graded outcomes each semester and submit them for approval to the doctoral program committee.

Exit Requirements

- Comprehensive Examination
- Dissertation

Program-Related Information

Advisor

- Preliminary contact is made with a potential advisor prior to applying to the program. Prior to being admitted, a student must confirm mentorship with an advisor based on mutual interests and willingness of the advisor to take on the student.

Program of Study (must have 45 hours remaining after approval)

- The student and his/her advisor will determine the program of study, including the required courses, deficiency courses, and general area of research for the dissertation. The program of study must be completed by the end of the first year and approved by the faculty mentor and one additional faculty member from their respective school or department (considered the program committee) as well as the Doctoral Program Committee chair. After this approval, the student will submit the program of study form with course information to the Office of Graduate. Please note, no more than six independent study/research credit hours are recommended; however, the program of study is determined by the student, faculty mentor, and an additional faculty member in the school or department.

Comprehensive Exam

- The required comprehensive exam will be taken towards the end of the student's coursework. The supervisory committee, in conjunction with the student will determine the nature of the exam; the exam could include a take-home exam followed by an oral defense, or writing an NIH-type grant followed by an oral exam. The supervisory committee will evaluate the exam. Once a student passes their comprehensive exam they are considered a doctoral candidate.

Dissertation Committee

- In the first semester of a students' third year, the student must form a dissertation committee. It should consist of at least four biomechanics and kinesiology-affiliated faculty members, three of whom must be graduate faculty within the NU system and one of whom must be from a department different than that of the dissertation advisor. The dean for Graduate Studies at UNO will appoint the committee upon recommendation of the advisor. The committee will be responsible for approving the comprehensive exam, dissertation proposal, dissertation and its oral defense. Please note that if the potential objectives of a dissertation topic changes, the dissertation committee can be altered at any time.

Dissertation Proposal Form

- Within one year of successfully completing the comprehensive exam and being admitted to candidacy, a formal research proposal for the dissertation topic should be presented to the supervisory committee. The format of the proposal is subject to approval by the advisor and the supervisory committee. The proposal could include a formal written proposal with an oral defense or oral presentation of the proposed research project.

Dissertation

- After successfully completing the comprehensive exam and being admitted to degree candidacy, the student must register for at least one credit hour of dissertation for each semester until completion of the degree. A minimum of 15 hours of dissertation credit must be completed within the course of the degree.
- It is expected that the dissertation will result in manuscript submissions in referred journals in the discipline.
- Upon completion of the dissertation, an updated CV must be submitted to the Doctoral Program Committee chair.

Residency

- The residency will be reasonably compact, continuous, and coherent, and a substantial portion done at and under close supervision of the university. Most of the students in the program will be full-time and continuously enrolled.

Concentrations

Physiology of Exercise Concentration

Code	Title	Credits

Total Credits **24**

BMCH 8000 SEMINAR IN BIOMECHANICS (0 credits)

Required non-credit course for graduate students in biomechanics. Intended to familiarize the graduate student with current ongoing biomechanical research at UNO and other institutions. The seminar will additionally include topics focusing on professional development, job and educational opportunities, and biomechanical methodologies.

Prerequisite(s)/Corequisite(s): Must be a student in BMCH graduate program. Not open to non-degree graduate students.

BMCH 8006 BIOMATERIALS (3 credits)

Students will learn the classification, properties, characterization methods, body interactions, applications, and design principles of biomaterials. (Cross-listed with BMCH 4000).

BMCH 8030 BIostatISTICS IN BIOMECHANICS I (3 credits)

The focus of the course is to prepare students to understand and apply research and biostatistical methods needed in the design and analysis of biomechanical investigations. The major topics to be covered include research design and multiple linear regression. (Cross-listed with BMKI 9031)

Prerequisite(s)/Corequisite(s): Graduate Standing in Biomechanics program or Department Permission.

BMCH 8100 NONLINEAR ANALYSIS FOR MOVEMENT STUDIES (3 credits)

This course is to introduce different nonlinear methods for the analysis of biological and movement time series. Emphasis will be given on understanding the algorithms behind each nonlinear method. (Cross-listed with BMKI 9101).

Prerequisite(s)/Corequisite(s): Instructor Permission.

BMCH 8106 BIOINSPIRED ROBOTICS (3 credits)

The goal of the course is to involve students in an interdisciplinary vision of biomechanics, biology, engineering and architecture by learning how humans and other animals function in their environment. These design principles from nature can be translated into novel devices, structures, and robots. (Cross-listed with BMCH 4100).

BMCH 8200 MATLAB FOR MOVEMENT SCIENCES (3 credits)

Introduction to Matlab software, plotting data, spectral analysis and the Fourier transform, data smoothing, and image analysis of movement related data. All topics will be implemented using Matlab. (Cross-listed with BMKI 9201).

Prerequisite(s)/Corequisite(s): Instructor permission.

BMCH 8206 METHODS IN BIOMECHANICS I (3 credits)

In this course students learn about the methods and equipment used in biomechanics as well as the analysis of data collected from those methods. Course experiences include both lecture and lab based learning. (Cross-listed with BMCH 4200).

Prerequisite(s)/Corequisite(s): Department Permission

BMCH 8216 METHODS IN BIOMECHANICS II (3 credits)

In this course students learn about advanced methods and equipment used in biomechanics, as well as the analysis of data collected from those methods. Course experiences include both lecture and lab based learning. This course builds on the experience gained in BMCH 4200/8206, Methods in Biomechanics I. (Cross-listed with BMCH 4210).

Prerequisite(s)/Corequisite(s): BMCH 8206 or Department Permission

BMCH 8400 MOTOR LEARNING I (3 credits)

Discussion and analysis of scientific principles related to the learning of motor skills; review related literature and research in motor learning. The focus of the course is on recent theories of how movements are acquired and performed, and on factors that have implications for motor learning throughout the life span. (Cross-listed with BMKI 9401).

Prerequisite(s)/Corequisite(s): Department Permission.

BMCH 8410 MOTOR CONTROL I (3 credits)

The focus of the course is to explore the study of the conditions and factors that influence the control and performance of motor skills from both neurophysiological and psychobiological perspectives. (Cross-listed with BMKI 9411).

Prerequisite(s)/Corequisite(s): Department Permission. Not open to non-degree graduate students.

BMCH 8420 MOTOR DEVELOPMENT (3 credits)

This course focuses on the study of motor development, the processes that underlie this development and the factors that influence it. Students will gain an understanding of the major theoretical perspectives of motor development across the life span with special emphasis given in child development. (Cross-listed with BMKI 9421).

Prerequisite(s)/Corequisite(s): Department Permission.

BMCH 8450 ADVANCED BIOMECHANICS (3 credits)

The course will address the biomechanical basis of human performance including mechanical analysis of human gait, fundamental movement patterns and techniques used for collecting biomechanical data. (Cross-listed with BMKI 9451).

Prerequisite(s)/Corequisite(s): BMCH 4630 (Biomechanics) [previously PE 4630] or Instructor Permission.

BMCH 8646 ORTHOPEDIC BIOMECHANICS (3 credits)

Orthopedic Biomechanics focuses on the use of biomechanical principles and scientific methods to address clinical questions that are of particular interest to professionals such as orthopedic surgeons, physical therapists, rehabilitation specialists, and others. (Cross-listed with BMCH 4640).

Prerequisite(s)/Corequisite(s): Department Permission

BMCH 8666 CLINICAL IMMERSION FOR RESEARCH AND DESIGN (3 credits)

This course will involve exposure to current clinical practices, identification of unmet clinical needs, and information regarding future career options. In this course, students will be matched with local clinical sites to provide a unique opportunity for innovative and interdisciplinary approaches to problem solving subject to practical constraints. Concepts in clinical rehabilitation, integrated assessments, regulation of medical devices in health care will be covered. This course will review the latest research efforts for rehabilitation in the context of device design and implementation. (Cross-listed with BMCH 4660).

Prerequisite(s)/Corequisite(s): Instructor Permission. Not open to non-degree graduate students.

BMCH 8676 INTRODUCTION TO MECHANICS OF BIOMATERIALS (3 credits)

In this course students will learn how to analyze the stresses and strains in different structures under complex loading conditions with extensive examples from biomaterials and materials generally used in the medical device field. (Cross-listed with BMCH 4670).

Prerequisite(s)/Corequisite(s): BMCH 3000 or Department Permission

BMCH 8686 SPORTS BIOMECHANICS (3 credits)

This course is intended to provide students with a foundational knowledge on how to analyze sport movements through biomechanical analytical methods. Students will utilize foundational biomechanical principles and apply them to a variety of sports and associated movements. (Cross-listed with BMCH 4680).

Prerequisite(s)/Corequisite(s): BMCH 4630

BMCH 8900 INDEPENDENT RESEARCH IN BIOMECHANICS (1-6 credits)

In this course individuals or groups will conduct research projects for the study and analysis of biomechanical topics.

Prerequisite(s)/Corequisite(s): Permission of the Department and approval by Faculty Advisor. Not open to non-degree graduate students.

BMCH 8910 INDEPENDENT STUDY IN BIOMECHANICS (1-6 credits)

This is a variable credit course designed for graduate students in Biomechanics who would benefit from independent reading assignments and problems. Independent study enables individual students or a small group of students to focus on topics typically not explored in other offerings or to explore topics currently offered in further depth. (Cross-listed with BMKI 9911).

Prerequisite(s)/Corequisite(s): Graduate student in BMCH and approval by Faculty Advisor. Not open to non-degree graduate students.

BMCH 8990 THESIS IN BIOMECHANICS (1-6 credits)

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's advisory committee. In this project the student will develop skills in research design, research conduct, data analysis, and reporting. The final product of this course will be an original thesis of independent scientific investigation.

Prerequisite(s)/Corequisite(s): Department Permission. Not open to non-degree graduate students.

Geography

Degree Programs Offered

- Geography, M (p. 1187)S (p. 1187)

Certificates Offered

- Geographic Information Science Certificate (p. 1189)

GEOG 8000 HISTORY AND PHILOSOPHY OF GEOGRAPHY (3 credits)

Introduction to history of geography. Emphasis on significant concepts, methodologies, and philosophies in geography from classical Greeks to the present.

Prerequisite(s)/Corequisite(s): Permission

GEOG 8016 CONSERVATION OF NATURAL RESOURCES (3 credits)

This course provides a diverse overview of the principles and contemporary issues related to ecology and management of wildlife, fisheries, forests, soil, rangeland, minerals, and water. It includes the philosophical, economic and social aspects of resource management. Current local, regional, and global issues are examined. (Cross-listed with GEOG 4010).

Prerequisite(s)/Corequisite(s): Three hours of geography

GEOG 8026 SPATIAL ANALYSIS IN GEOGRAPHY (3 credits)

An introduction to spatial analysis with a focus on spatial statistics. Emphasis will be placed on the nature of geographic data, spatial data handling, modeling logic, sampling theory, and design. Both descriptive and spatial statistics methods are covered. Students will receive hands-on experience working with statistical data sets, software, and scientific visualization of research results. (Cross-listed with GEOG 4020).

Prerequisite(s)/Corequisite(s): STAT 1530 or STAT 3000 and GEOG 4050 or permission

GEOG 8036 COMPUTER MAPPING AND VISUALIZATION (3 credits)

Computer techniques in the mapping and visualization of spatial data. Various forms of spatial data manipulation and computer graphic output techniques are examined. Particular attention is given to the the creation of maps for the internet and the incorporation of interaction and animation in their display. (Cross-listed with GEOG 4030).

Prerequisite(s)/Corequisite(s): GEOG 1090 or permission of instructor. Background in programming, particularly JavaScript, highly recommended.

GEOG 8040 SEMINAR IN EDUCATION GEOGRAPHY (3 credits)

This seminar surveys the goals, methods, and content associated with teaching geography in elementary, secondary, and in higher education. It is designed to aid current and future teachers in teaching geography.

Prerequisite(s)/Corequisite(s): Permission

GEOG 8046 GEOARCHAEOLOGY (3 credits)

An introduction to geoarchaeology: the application of methods and techniques of geography, geology and other earth sciences to solve archaeological problems and reconstruct past environments. (Cross-listed with GEOL 4040, GEOG 4040).

GEOG 8056 GEOGRAPHIC INFORMATION SYSTEMS I (4 credits)

An introduction to the concepts and principles of geographic information systems (GIS). Emphasis will be placed on geographic data inputs, manipulation, analysis, and output functions. Exercises introduce students to GIS software and applications. Usually offered Fall, Spring, Summer. (Cross-listed with GEOG 4050).

Prerequisite(s)/Corequisite(s): 3 hours in Geography or by permission

GEOG 8106 BIOGEOGRAPHY (3 credits)

This course is intended as an introduction to biogeography, the study of the distribution and evolution of organisms across space and through time. Usually offered every year. (Cross-listed with BIOL 4100, GEOL 4100, BIOL 8106, GEOL 8106, GEOG 4100).

Prerequisite(s)/Corequisite(s): BIOL 1450 and BIOL 1750 or GEOL 3100 or BIOL 3100, junior-senior

GEOG 8126 URBAN GEOGRAPHY (3 credits)

This course is designed to serve as an introduction to the complex and dynamic urban system, including the physical, economic, political, cultural, social, and environmental forces that shape the form and function of cities, as well as how individuals and groups experience urban life. We make ample use of geographic information systems (GIS) to analyze cities and better understand crucial urban concepts such as urban growth and development, patterns of urban form, segregation and neighborhood change, economic specialization and agglomeration, urban sprawl, and environmental justice. (Cross-listed with GEOG 4120).

GEOG 8130 SEMINAR IN ECONOMIC GEOGRAPHY (3 credits)

This seminar course investigates the development of current world economic systems through the elements of primary, secondary, tertiary, quaternary and quinary production on a micro and macro scale. Exchange and transactional systems, consumption linkages, resource management, economic health on global and local scales, and location decision-making are major topics.

Prerequisite(s)/Corequisite(s): Graduate in geography and permission of instructor

GEOG 8156 GEOGRAPHY, GENDER AND ENTREPRENEURSHIP (3 credits)

An advanced seminar focused on links among geography, gender and work, emphasizing leadership and entrepreneurship. The course considers theory and method in addition to empirical work. The nature of space, of gender, and of work, are examined. Topics include the gendering of work, the geography of entrepreneurship, gender and leadership. (Cross-listed with WGST 4150, GEOG 4150, ENTR 4150, ENTR 8156, WGST 8156).

Prerequisite(s)/Corequisite(s): Junior, senior, or graduate standing, or permission of instructor.

GEOG 8166 URBAN SUSTAINABILITY (3 credits)

Using sustainability as a conceptual framework, students in this course will investigate a variety of social, economic, and environmental challenges facing cities of the 21st century. Topics and issues explored include urban growth and expansion, livability, equity & gentrification, energy use & production, urban farming, poverty, automobility & transportation, water security, urban pollution, and the role of cities in climate change. (Cross-listed with GEOG 4160)

Prerequisite(s)/Corequisite(s): Graduate standing.

GEOG 8176 ADVANCED CULTURAL GEOGRAPHY (3 credits)

This course examines current theoretical debate and research practice in a select topic in Cultural Geography. Emphasis will be on readings and discussion with students engaging in original research. Specific thematic focus will vary from year to year. This course may be taken multiple times as long as topics differ. (Cross-listed with GEOG 4170).

Prerequisite(s)/Corequisite(s): Graduate standing and permission of the instructor.

GEOG 8210 SEMINAR IN CULTURAL GEOGRAPHY (3 credits)

This course explores the different theoretical, methodological and empirical approaches in cultural geography, while also addressing its development, its evolution, its competing schools of thought, and new frontiers.

Prerequisite(s)/Corequisite(s): Permission

GEOG 8236 GREAT PLAINS & NEBRASKA (3 credits)

This course is a comprehensive examination of the Great Plains region from a geographical perspective. It considers both the physical and human geography of the Plains, with particular attention to our home, Nebraska. Topics to be covered include: the Plains' unique ecosystems, its early human inhabitants, its later settlers, its evolving land-use patterns, and current issues. (Cross-listed with GEOG 4230).

GEOG 8266 PROCESS GEOMORPHOLOGY (4 credits)

A lecture and laboratory course focused on understanding Earth surface processes and the evolution of landforms across spatial and temporal scales. The course emphasizes applying unifying concepts in geomorphology, quantitative methodology and modern process-oriented geomorphology to interpret landscape evolution. (Cross-listed with GEOG 4260, GEOL 4260).

Prerequisite(s)/Corequisite(s): One of the following: GEOL 1010, GEOL 1170, GEOG 1030, GEOG 1050 or instructor permission.

GEOG 8310 GEOGRAPHY OF AGRICULTURE (3 credits)

A systematic study of the characteristics and patterns of world agriculture. Usually offered on demand.

Prerequisite(s)/Corequisite(s): Permission

GEOG 8326 CLIMATOLOGY (3 credits)

A study of climatic processes and their effect on shaping the physical landscape. Emphasis on physical and applied aspects of the field. (Cross-listed with GEOG 4320).

Prerequisite(s)/Corequisite(s): GEOG 1030, GEOG 1050, GEOG 3510, or permission of instructor.

GEOG 8336 SOIL GENESIS, MORPHOLOGY AND CLASSIFICATION (4 credits)

This course is designed to familiarize students with basic soil chemical, physical and biological properties, soil morphological characteristics, soil classification and soil forming processes. The course focuses on relationships between soils and environmental factors and how such factors alter soil forming processes. The lab will focus on developing basic field skills, including soil morphological descriptions and soil mapping, as well as common laboratory methods used to analyze soils. (Cross-listed with GEOG 4330, GEOL 4330).

Prerequisite(s)/Corequisite(s): One of the following: GEOG 1030, GEOG 1050, GEOL 1010, GEOL 1170 or instructor permission.

GEOG 8346 WATER RESOURCES (3 credits)

This course explores the applied principles of hydrology, water systems modeling, river basin development, and water management issues and practices in the United States and other parts of the world. Two local Saturday field trips will be required. (Cross-listed with GEOG 4340).

Prerequisite(s)/Corequisite(s): Six hours of Physical Geography or equivalent and graduate standing.

GEOG 8356 GLOBAL CLIMATE CHANGE (3 credits)

The primary objective of this course is for students to form a scientific, evidence-based, stance on current and future changes to the Earth's climate. To this end, this course will be based on scientific inquiry into the current state of knowledge. Particular emphases are placed on evidence and causes of change, and the associated environmental and social impacts, including: water resources, extreme weather, human health, and others of interest to the class. (Cross-listed with GEOG 4350, ENVN 8356, ENVN 4350).

Prerequisite(s)/Corequisite(s): Graduate standing

GEOG 8500 SPECIAL TOPICS IN GEOGRAPHY (1-3 credits)

This course will provide for an in-depth study of a geographical or geological subject (as specified in the course subtitle). Subjects will be offered as sections of GEOG 8500, but will be separate from one another. Students may repeat GEOG 8500 as often as they like as long as no specific subject is duplicated. Course to be offered with approval of Graduate Program Committee and Dean for Graduate Studies.

Prerequisite(s)/Corequisite(s): Variable

GEOG 8535 CARTOGRAPHY AND DATA VISUALIZATION (4 credits)

An introduction to the concepts and techniques of map construction and visual data communication. Topics include map scale, map projections, thematic cartography, history of cartography, computer mapping, and global positioning systems. Particular attention is given to designing both paper and Internet distributed maps. This course is offered in both the Fall and Spring semesters. (Cross-listed with GEOG 3530).

Prerequisite(s)/Corequisite(s): GEOG 1000 or GEOG 1020 and GEOG 1030 or GEOG 1050

GEOG 8536 HISTORICAL GEOGRAPHY OF THE UNITED STATES (3 credits)

This course examines the geography, physical and human, real, perceived, or theoretical, of the United States' historical development. It considers the ways history has and has not been affected by geography. It will also cover the field of historical geography, its theories and practices. (Cross-listed with GEOG 4530).

GEOG 8545 CARTOGRAPHY & GIS LAB (2 credits)

An introduction to the methods and techniques of map construction using both graphic design and geographic information system software. Topics include map design for both general reference and thematic maps. Particular attention is given to the processing, compilation, data classification, and symbolization of various types of spatial data. This course is the lab component of GEOG 8535.

Prerequisite(s)/Corequisite(s): Concurrent or previous registration in GEOG 8535.

GEOG 8556 GEOGRAPHY OF ECONOMIC GLOBALIZATION (3 credits)

A study of the geography of economic globalization and the geography of the world economy. The major topics include the historical development of the world economy and globalization from the geographical perspective, trends in geography of global production, trade and investment, the most important factors and actors in the globalization processes and its geographic effects, geography of transnational corporations, case studies of economic geography of selected industries and service activities, effects of globalization on the developed and developing countries. This course also supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with GEOG 4550, CACT 8116).

Prerequisite(s)/Corequisite(s): Graduate status.

GEOG 8600 INDEPENDENT RESEARCH (1-3 credits)

This is an independent research course, where students undertake and complete a focused independent project under faculty supervision, exploring an aspect of geography in greater depth.

Prerequisite(s)/Corequisite(s): Completed independent research contract between faculty and student and permission of adviser or the Graduate Studies Coordinator.

GEOG 8616 ENVIRONMENTAL MONITORING AND ASSESSMENT (3 credits)

An interdisciplinary approach to techniques for the design and implementation of environmental inventory and monitoring schemes used to evaluate natural resources. Students work as teams to synthesize information from their backgrounds in geography, geology and ecology to evaluate the impacts of human actions on environmental quality following the framework for environmental assessments provided by the National Environmental Policy Act. Course is organized to accommodate variable needs of students with different backgrounds and career choices. Usually offered every year. (Cross-listed with BIOL 4610, ENVN 4610, GEOG 4610, GEOL 4610, GEOL 8616)

Prerequisite(s)/Corequisite(s): Permission of instructor.

GEOG 8626 GEOGRAPHICAL FIELD STUDIES (3 credits)

Field experience course based on variable topics and themes. Students must attend the multiple day field trip that will require overnight stays. (Cross-listed with GEOG 4620).

Prerequisite(s)/Corequisite(s): Instructor Permission. Not open to non-degree graduate students.

GEOG 8636 ENVIRONMENTAL REMOTE SENSING (4 credits)

An introduction to remote sensing science and technology. Emphasis will be placed on multispectral data, matter/energy interactions, sensor system characteristics, photogrammetry, image interpretation, digital image processing, and environmental applications. Formal laboratory instruction will provide students with problem-solving skills and hands-on experience with remote sensing and GIS software. (Cross-listed with GEOG 4630).

Prerequisite(s)/Corequisite(s): GEOG 1060 or GEOG 1070 or GEOL 1170. Introductory statistics highly recommended.

GEOG 8640 REMOTE SENSING ADVANCED CONCEPTS AND APPLICATIONS (3 credits)

Designed for the graduate student desiring to do advanced work in remote sensing. The emphasis of the course is on non-photographic sensors and especially digital processing of multispectral satellite data. The applications are multidisciplinary in nature. Usually offered on demand.

Prerequisite(s)/Corequisite(s): GEOG 4630 / GEOG 8636

GEOG 8646 CRITICAL ZONE SCIENCE (4 credits)

This course examines the Critical Zone (CZ), Earth's permeable layer that extends from the top of vegetation to the bottom of groundwater. The CZ is a constantly evolving layer where rock, soil, water, air, and living organisms interact to regulate the landscape and natural habitats; it also determines the availability of life-sustaining resources, including our food production and water quality. CZ science is an interdisciplinary and international endeavor focused on cross-disciplinary science. In this course, we will focus on using data available from the existing National Science Foundation (NSF)-funded CZ Observatories (CZOs) along with readings, discussions and activities to explore interactions within the CZ. (Cross-listed with GEOG 4640, GEOL 4640)

Prerequisite(s)/Corequisite(s): One of the following: GEOL 1170, GEOL 1010, GEOG 1030 or GEOG 1050; one chemistry or physics course recommended; or instructor permission.

GEOG 8650 LAND USE (3 credits)

A field course designed to understand, by actual field investigation, land use patterns in urban areas through the comprehension of social, physical and economic factors which tend to shape the land use of a given place. The major emphasis will be placed upon field investigations in the urban area, with the functional region receiving the major consideration.

Prerequisite(s)/Corequisite(s): GEOG 4120/ GEOG 8126

GEOG 8666 GEOGRAPHIC INFORMATION SYSTEMS II (4 credits)

An introduction to advanced geographic information systems (GIS) topics. Emphasis will be placed on algorithms and analysis for information extraction. Topics include spatial interpolation, remote sensing GIS integration, software development, spatial analysis, GIS modeling, and future advances in GIS. Formal laboratory instruction will provide students with GIS experience to solve application problems. Usually offered in Fall. (Cross-listed with GEOG 4660).

Prerequisite(s)/Corequisite(s): GEOG 4050/ GEOG 8056

GEOG 8670 CARTOGRAPHIC METHODS (3 credits)

An applied graduate seminar in cartography and geospatial science. The course examines advanced methods for the representation of spatial data. Emphasis is placed on the design of interactive Internet-based maps. Projects will be directed toward the creation of map-based web pages.

Prerequisite(s)/Corequisite(s): A junior/senior course in cartography, GIS, computer mapping, or visualization.

GEOG 8680 SEMINAR IN GEOSPATIAL SCIENCE (3 credits)

Seminar in Geospatial Science examines the origins, development and prospects of spatial information technology to understand people, places, and processes of the earth. The overall approach is to examine the three main components of geospatial science: 1) Geographic Information Systems (GIS), the software, hardware, outputs, personnel, and practices that together facilitate the analysis and mapping of geographic entities and phenomena; 2) Remote Sensing, the use and processing of aerial photographs and satellite imagery; and 3) Cartography, the general processing and display of geographic information for both analysis and communication.

Prerequisite(s)/Corequisite(s): Graduate standing. Prior coursework in geographic information systems, remote sensing or cartography.

GEOG 8700 RESEARCH METHODS (3 credits)

The course provides students with an overview of research approaches and methods used by geographers. Students are expected to put these methods into practice by drafting a full thesis proposal by semester's end.

GEOG 8800 INTERNSHIP IN ENVIRONMENTAL/REGIONAL PLANNING (1-6 credits)

(repeatable up to six hours) Internship with local planning agencies enabling students to gain knowledge and experience in comprehensive regional or environmental planning. Usually offered Fall, Spring, and Summer.

Prerequisite(s)/Corequisite(s): Permission and 12 graduate hours in geography.

GEOG 8826 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

An introduction to environmental law and regulations intended for students pursuing careers in environmental sciences or related fields. The course emphasizes the origins, implementation, and enforcement of U.S. state and federal laws and regulations. Major federal environmental laws, covering air and water quality, solid and hazardous waste, pollution prevention and remediation, and natural resources will be discussed. Usually offered Fall semesters. (Cross-listed with ENVN 8826, ENVN 4820, BIOL 4820, GEOG 4820, PA 8826).

Prerequisite(s)/Corequisite(s): Graduate Standing or Permission from the Instructor.

GEOG 8830 SEMINAR IN URBAN STUDIES (3 credits)

This course provides an interdisciplinary overview of the forces influencing and influenced by urbanization and urbanism. (Cross-listed with UBNS 8000)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

GEOG 8840 DIRECTED RESEARCH IN URBAN STUDIES (3 credits)

The course is intended for advanced graduate students in urban studies or geography. It is especially suited for those in-career students who have had their internships waived and who might profit more by in-depth research on a problem of urban studies rather than additional classroom courses. (Cross-listed with UBNS 8940).

Prerequisite(s)/Corequisite(s): Completed 9 graduate hours in Urban Studies. Permission from the School. For Geography students, GEOG 8126 (Urban Geography) or permission from the School.

GEOG 8990 THESIS (1-6 credits)

Independent research project conducted under the supervision of an adviser and thesis committee.

Prerequisite(s)/Corequisite(s): Graduate student in geography who has successfully presented and defended their thesis proposal.

Geography, MS

Department of Geography & Geology, College of Arts & Sciences

Vision Statement

The mission of the geography graduate program is to provide quality graduate education in physical geography, human geography and spatial analysis (GIS, cartography and remote sensing). The department offers a rich learning environment for students with close interaction between faculty and students, technology-enhanced instruction, and opportunities for fieldwork. Courses enhance student's perception and appreciation of the earth's human and physical environments as well as geography's essential role in both understanding and navigating our increasingly interconnected world. The department, an active participant in its community, has ties throughout the city and state, leading to a wide variety of internship opportunities. The department is committed to providing students with the essential knowledge and skills needed to succeed, be it in professional employment or further graduate education.

Other Program Related Information

Fast Track Program

The Department of Geography/Geology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BA/BS in Geography desiring to pursue an MS in Geography.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must have a graduate faculty member in the department of Geography/Geology provide a short letter of support for their application to Fast Track as a faculty sponsor/mentor.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.

- Students will work with their undergraduate advisor to register for the graduate courses
- A minimum cumulative GPA of 3.0 for graduate coursework is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived; the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

The Department of Geography/Geology offers graduate assistantships. Applications should be directed to the department and are due April 1 for the Fall Semester and November 1 for the Spring Semester. The assistantship requires 20 hours per week of teaching or similar duties. Applications received after the deadline will be considered for the next available opening.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: July 1
- Spring: December 1
- Summer: May 1

Other Requirements

- Applicants must have a GPA in geography of at least a 3.0 on a 4.0 scale
- Present as a prerequisite a minimum of 15 undergraduate semester hours of geography including physical and human geography and cartography, plus at least three hours in spatial analysis, quantitative methods or statistics;
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose**
- **Resume**
- **Letters of Recommendation:** Two are required

Degree Requirements

Thesis Option

Code	Title	Credits
Required Courses		
GEOG 8000	HISTORY AND PHILOSOPHY OF GEOGRAPHY	3
GEOG 8700	RESEARCH METHODS	3
An approved physical geography course		3
An approved human geography course		3

An approved techniques course		3
Electives		
May be completed in consultation with the graduate program chair or an area of concentration by be selected from the options below.		9
Concentrations		
See Geography, MS Concentrations.		
GEOG 8990	THESIS	6
Total Credits		30

Non-Thesis Option

Code	Title	Credits
Required Courses		
GEOG 8000	HISTORY AND PHILOSOPHY OF GEOGRAPHY	3
GEOG 8700	RESEARCH METHODS	3
GEOG 8026	SPATIAL ANALYSIS IN GEOGRAPHY ¹	3
An approved physical geography course		3
An approved human geography course		3
Electives		
May be completed in consultation with the graduate program chair.		21
Concentrations		
See Geography, MS Concentrations.		
Total Credits		36

- ¹ GEOG 8026: or an approved graduate level statistics course from another department

Exit Requirements:

- Thesis Option- 6 hours GEOG 8990
- Non-Thesis Option - Comprehensive Examination or Professional Conference
 - As an alternative to the oral and written non-thesis exams, a student pursuing the non-thesis option can instead present a paper or a poster at a professional conference. Poster or paper must be based on the student's original research. Student must create a three-person committee and defend a research proposal first. The committee must be approved by the graduate studies coordinator. Once their research is complete, their paper and poster or Powerpoint must be reviewed and approved by their committee. Once approved, the presentation or poster must be presented to the department before the conference and the Poster/Presentation Non-Thesis Option form completed. Student must then present at the conference and write up a one-page reflection of their experience presenting, giving the form and the reflection to the graduate studies coordinator.

Geography, MS Concentrations

Select an area of concentration (9 hours)

Courses offered through GEOG 8500 and GEOG 8600 will be submitted for inclusion in a concentration accompanied by a letter from the student's advisor or from the graduate program chair with the course title and specifying the concentration to which it applies.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: July 1
- Spring: December 1
- Summer: May 1

Other Requirements

- Applicants must have a GPA in geography of at least a 3.0/4.0.
- The student must demonstrate a background in geography, statistics, and computer science.
- Prerequisites would include courses in human and physical geography, statistics, and programming such as the following:

Code	Title	Credits
GEOG 1020	INTRODUCTION TO HUMAN GEOGRAPHY	3
MATH 1530	INTRODUCTION TO APPLIED PROBABILITY AND STATISTICS	3.00

CIST 1400 INTRODUCTION TO COMPUTER SCIENCE I 3

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- Only required if not admitted to MS in Geography program
 - Two letters of recommendation
 - Statement of Purpose
 - Resume

Degree Requirements

Select 6 hours from the following:		6
GEOG 8016	CONSERVATION OF NATURAL RESOURCES	
GEOG 8036	COMPUTER MAPPING AND VISUALIZATION	
GEOG 8636	ENVIRONMENTAL REMOTE SENSING	
GEOG 8650	LAND USE	
GEOG 8800	INTERNSHIP IN ENVIRONMENTAL/ REGIONAL PLANNING	
Total Credits		18

Students may substitute advanced courses in GIS for required courses already taken. Students will be allowed a maximum of two substitutions for these required courses. Substitution must be approved by the department GIS advisor.

Gerontology

Degree Programs Offered

- Gerontology, PhD (p. 1192)
- Gerontology, MA (p. 1193)
- Gerontology Certificate (p. 1194)

GERO 8020 INTRODUCTION TO RESEARCH METHODS (3 credits)

An introduction to research methods and statistical procedures in the social and behavioral sciences.

GERO 8056 ADVANCED BIOLOGY OF AGING (3 credits)

This course covers biological aging topics at an advanced level, and is designed for undergraduate and graduate students who have some prior knowledge about biology or aging. The course will be interdisciplinary in nature and focus on topics relevant to gerontology, biology, psychology, and exercise science. Students will learn how to think critically about primary research in the biology of aging. Furthermore, they will apply their knowledge of the biology of aging field by creating a handbook of healthy aging for older adults. (Cross-listed with GERO 4050, NEUR 4050).

Prerequisite(s)/Corequisite(s): Junior or senior standing for undergraduate students or graduate level standing

GERO 8106 EDUCATIONAL GERONTOLOGY (3 credits)

An introduction to the field of education for and about the aging. The institutions and processes of education will be analyzed to determine their relationships and value to persons who are now old and those who are aging. (Cross-listed with GERO 4100).

Prerequisite(s)/Corequisite(s): Students must have a junior, senior or graduate student status.

GERO 8206 VOLUNTEER MANAGEMENT (3 credits)

The purpose of this course is to equip managers of volunteers in aging services to develop, maintain, assess impact and evaluate a sustainable volunteer program that will provide reliable and necessary services to older adults and further to be embraced as a valuable asset by professionals working in the field of aging. (Cross-listed with GERO 4200).

Prerequisite(s)/Corequisite(s): Graduate Student

GERO 8356 ISSUES IN AGING (3 credits)

This course is intended for students in gerontology and in other fields who are interested in a humanistic approach to understanding significant issues which affect the lives of older people. (Cross-listed with GERO 4350).

GERO 8426 RECREATION FOR THE AGING (3 credits)

Role of leisure services as related to understanding and working with elders. Emphasis on recreation programming as a mode of intervention. Analysis and study of the phases of aging, with reference to psychomotor, affective, and cognitive changes; introduction to the theories of aging and how they relate to the lifestyle of this population; recreational therapy intervention, activity adaptation and program design; leisure education and issues and trends. (Cross-listed with GERO 4420, RLS 4420, RLS 8426).

GERO 8466 PSYCHOLOGY OF ADULT DEVELOPMENT AND AGING (3 credits)

The focus of this course is on the major social and psychological changes that occur as a function of aging. Both normal and abnormal patterns of developmental change are examined, along with their implications for behavior. (Cross-listed with GERO 4460, PSYC 4460)

Prerequisite(s)/Corequisite(s): Junior or Senior.

GERO 8476 MENTAL HEALTH AND AGING (3 credits)

The goal of this courses is to survey the mental health needs of older adults. Consideration is given to identifying both positive mental health and pathological conditions. Treatment interventions effective with older adults and their families are also discussed. (Cross-listed with GERO 4470, PSYC 4470, PSYC 8476).

Prerequisite(s)/Corequisite(s): Junior or senior.

GERO 8486 GLOBAL AGING (3 credits)

The study of aging around the world by a comparative method in a cross-cultural and cross-national framework. An explanation of some practical experiences and developments in Europe, Asia and Africa will be examined. (Cross-listed with GERO 4480).

GERO 8500 POLITICS IN AGING (3 credits)

The purpose of this course is to provide an understanding of the role of the political process in the emergence of public policy towards older adults in the United States, particularly during the past century.

GERO 8506 LEGAL ASPECTS OF AGING (3 credits)

This course centers on the legal concerns likely to arise as people age. We will discuss the American legal system with an emphasis on underlying legal concepts and issues of special importance to older persons. Some of the topics include guardianship, finances in retirement, abuse and neglect, Social Security, and Medicare and Medicaid. Consideration of the legal concerns which are likely to arise as people age. Includes introduction to American legal system, and emphasis on underlying legal concepts and issues of special importance to older persons. (Cross-listed with GERO 4500).

GERO 8516 LONG-TERM CARE ADMINISTRATION (3 credits)

An investigation of the broad range of policy issues, theoretical concerns and practical management strategies influencing the design, organization and delivery of long-term care services. (Cross-listed with GERO 4510, PA 4510, PA 8516).

GERO 8526 SENIOR HOUSING (3 credits)

The senior housing course is designed to provide students with an in-depth understanding of the various housing options available to older adults including aging in place to hospice. At the end of the course students will have a working knowledge of the needs of older adults and how this is used in making decisions about housing. (Cross-listed with GERO 4520.)

Prerequisite(s)/Corequisite(s): Graduate student

GERO 8556 HEALTH ASPECTS OF AGING (3 credits)

This course emphasizes health promotion for older adults. Special health needs of older Americans are compared and contrasted with health needs for other age groups. Prevention or delaying of chronic diseases and disorders are emphasized. (Cross-listed with GERO 4550, PHHB 4550, PHHB 8556, WGST 4550).

GERO 8566 NUTRITION AND AGING (3 credits)

The goal of this course is to provide an understanding of the relationship between nutrition and successful or usual aging. This course will review the basics of good nutrition and relate them to the usual food intake of older adults. It will identify the impact of poor nutrition. This course will also look at the role nutrition plays in various disease processes that are associated with aging. It will provide information about support services that are available to assure good nutrition into old age for those living independently. (Cross-listed with GERO 4560).

GERO 8676 PROGRAMS AND SERVICES FOR THE ELDERLY (3 credits)

This course is provided to give the student a historical overview of programs for the elderly; examine the national policy process as it relates to the older American; and review the principles and practices relative to the existing national programs for the aged. (Cross-listed with GERO 4670, PA 8676).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

GERO 8696 WORKING WITH MINORITY ELDERLY (3 credits)

This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 4690, SOWK 4040, SOWK 8046).

GERO 8726 BABY BOOMERS AND THE 21ST CENTURY (3 credits)

Marketing decisions and strategies apply to all businesses and are influenced by the target market. The economic realities and the character of America will change due to shifting demographics of baby boomers. Businesses that understand the power of the baby boomers will succeed; failure to understand that power may lead to economic consequences. Students from many disciplines will benefit from this cross-referenced course blending the realities of gerontology with the predictions of baby boomer behavior and the resulting impact to all businesses. (Cross-listed with GERO 4720).

Prerequisite(s)/Corequisite(s): Junior, Senior and Graduate Level Standing.

GERO 8730 DYING, DEATH & GRIEVING (3 credits)

An examination of theory and research relevant to interaction with the older, terminally ill person, focusing on communication with widows and other survivors as well as the dying patient. (Cross-listed with PHHB 8730).

Prerequisite(s)/Corequisite(s): Graduate Students

GERO 8756 MID-LIFE, CAREER CHANGE, PRERETIREMENT PLANNING (3 credits)

This course is designed to involve candidates in the exploration of the developmental tasks of mid-life, myths and realities related to career change as well as the implication of preretirement planning. Factual information, as well as model examination and evaluation are presented to aid the candidate in becoming better equipped to understand some of the forces which affect the well-being of middle aged persons as they prepare for the later years. (Cross-listed with COUN 8756, GERO 4750).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

GERO 8800 GRADUATE SEMINAR IN THE AGING BRAIN (3 credits)

The Graduate Seminar in the Aging Brain is a graduate level gerontology course focused on understanding the changes to the brain due to normal aging and aging-related diseases. This is an elective course for the Gerontology graduate program at UNO. The content matter of this course also makes it a relevant fit for graduate students from disciplines such as biology, psychology, geriatric medicine, nursing, social work, and exercise science. By the end of the course, students should have a thorough understanding of the changes to the brain in healthy aging and aging-related disease that affect cognitive and emotional functioning. (Cross-listed with PSYC 8800).

Prerequisite(s)/Corequisite(s): Graduate level standing

GERO 8810 GRADUATE SEMINAR IN THE BIOLOGY OF AGING (3 credits)

This course provides an in-depth investigation of key topics in the biology of aging for graduate students. The course will be interdisciplinary in nature and focus on topics relevant to gerontology, biology, psychology, neuroscience, and exercise science. Students will learn about theory, primary research, and hypotheses within the biology of aging field. Students will be asked to think critically and apply their knowledge through assignments and class discussions.

Prerequisite(s)/Corequisite(s): graduate level standing

GERO 8856 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)

This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 4850, SOWK 4850, SOWK 8856).

GERO 8920 SPECIAL STUDIES IN GERONTOLOGY (1-3 credits)

Special studies designed around the interests and needs of the individual student in such areas as the psychology, sociology, economics, biology, or politics of aging, as well as operation of various service systems. This independent study may include a literature review or a field project in which experience is gained in the community, identifying and analyzing needs and services related to older people.

Prerequisite(s)/Corequisite(s): Instructor permission

GERO 8940 GRADUATE PRACTICUM (3 credits)

This course provides the opportunity to students to share field experiences; to obtain guidance concerning various relationships with agency, staff and clients; and to develop a broadly based perspective of the field of aging.

Prerequisite(s)/Corequisite(s): Nine hours in gerontology and permission. Students must be enrolled in the certificate or degree program (MA, PhD) as well as have a minimum GPA of 3.0. Not open to non-degree students.

GERO 8956 PALLIATIVE CARE: MENTORING A HEALTHCARE APPROACH OF PATIENT-CENTERED CARE WITH FOCUS ON WELL-BEING (3 credits)

This course provides a foundation for the recognition of the need to implement palliative medical care. Using current texts and literature, video and podcast lectures by colleagues, and review of cases and topics, a student will understand the definitions, purposes, and benefits of palliative medical care. The student will learn the avenues and ways to implement palliative care to provide care that promotes well-being. (Cross-listed with GERO 4950).

GERO 8980 LITERATURE AND AGING (3 credits)

In this course, we will examine the experience of aging and of being an older person through the world's great literature. We will study this universal experience by reading novels, short stories, poems, plays, and personal narratives from across different eras and cultures. In this way we hope to come to a better understanding of: 1) the older adults we serve as patients and clients; 2) our own aging process and those of our close family members and friends; 3) literary works and their relevance in our everyday lives.

Prerequisite(s)/Corequisite(s): Graduate students only.

GERO 8986 COUNSELING SKILLS IN GERONTOLOGY (3 credits)

This course is intended to help develop basic counseling skills for application in gerontology. (Cross-listed with COUN 8986, GERO 4980).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

GERO 8990 THESIS (1-6 credits)

Independent research project required of all students working toward the Master of Arts degree. The thesis is written under the supervision of the thesis adviser and the thesis committee.

Prerequisite(s)/Corequisite(s): Permission from adviser.

GERO 9020 GRADUATE SEMINAR IN STATISTICAL APPLICATIONS (3 credits)

Provides an introduction to statistical methods and data management used in the social, behavioral and health sciences.

GERO 9110 APPLIED SOCIAL GERONTOLOGY (3 credits)

An overview of social gerontology with an emphasis on the interplay between social, psychological and physical elements in later life. Restricted to graduate students only; required of gerontology students. (Cross-listed with SOC 9110).

Prerequisite(s)/Corequisite(s): Graduate.

GERO 9460 SEMINAR IN AGING AND HUMAN BEHAVIOR (3 credits)

This course will examine in detail age-related changes in psychological processes and explore the implications of these changes for behavior. The course is intended primarily for graduate students in psychology and gerontology. (Cross-listed with PSYC 9460).

Prerequisite(s)/Corequisite(s): Graduate standing in gerontology or psychology or permission of the instructor.

GERO 9990 DISSERTATION (1-6 credits)

This course provides doctoral students pursuing the PhD in Human Sciences with a specialization in gerontology to complete a dissertation research plan. The course learning activities will focus on the completion of an approved dissertation.

Prerequisite(s)/Corequisite(s): Admittance to the PhD in Human Sciences with a specialization in gerontology. Not open to non-degree graduate students.

Gerontology, PhD

Department of Gerontology, College of Public Affairs & Community Service

Vision Statement

Our program provides interdisciplinary training, preparing students to be leaders in the field of gerontology. Due to the multidisciplinary nature of the field, our students have much flexibility as we create individualized

programs tailored to each student's research and substantive interests to ensure that their training has enough breadth and depth. Our graduates acquire knowledge through various approaches including symposia, formal classes, directed studies, research projects and workshops. All students develop abilities to understand, analyze and evaluate the challenges and opportunities of an aging population. Finally, through training by our multidisciplinary faculty, students strengthen their research and writing skills to produce quality research suitable for peer-reviewed publication and presentation at national conferences.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Doctoral students begin in the Fall semester):

- Fall: January 15 (Priority deadline if interested in scholarship or graduate assistantship); Applications accepted through April 15

Other Requirements

- Entrance Exam: Graduate Record Exam (GRE)
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** This should describe prior education, relevant professional experience, career goals, and the specific relationship of the PhD degree to the achievement of those goals. If there are particular faculty you are interested in working with, or areas of study that you would like to pursue please include in your statement. If you are interested in a graduate assistantship, please indicated your interest and the skills you have to assist the faculty.
- **Writing Sample:** this may be a master's or honors thesis, a published article, or any similar manuscript written in a scholarly style.
- **Resume**
- **Letters of Recommendation:** Three academic letters of recommendation are required
- International applicants who have completed any undergraduate or graduate coursework at international higher education institution(s), for the purpose of having the application reviewed by the Department of Gerontology, may submit a copy of the unofficial transcripts, in addition to all other application materials. Should the department wish to make a recommendation for admission, the applicant will be required to have a course-by-course transcript evaluation completed by WES, ECE, or Educational Perspectives prior to your admission being formally reviewed and processed by the Office of Graduate Studies.

Degree Requirements

Code	Title	Credits
Required Courses		
GERO 8800	GRADUATE SEMINAR IN THE AGING BRAIN ¹	3
or GERO 8056	ADVANCED BIOLOGY OF AGING	
GERO 8500	POLITICS IN AGING	3
GERO 8730	DYING, DEATH & GRIEVING	3
GERO 9110	APPLIED SOCIAL GERONTOLOGY	3
GERO 9460	SEMINAR IN AGING AND HUMAN BEHAVIOR	3
GERO 9020	GRADUATE SEMINAR IN STATISTICAL APPLICATIONS	3
Methodology/Statistics Courses		6
Electives		46
Exit Requirements ²		20
Total Credits		90

¹ Students may take either GERO 8800 or 8056; both courses are not required.

² Students may begin work on the dissertation after successful completion of the comprehensive examination. The dissertation topic must be approved by the student's dissertation committee, which consists of a chair and three other members. One Committee member must be a faculty member from outside the Department of Gerontology. The dissertation topic, prospectus, and the dissertation all require the approval of the dissertation committee. A doctoral student will be required to take at least one hour of GERO 9990 Dissertation each fall and spring semester while working toward the completion of the dissertation. A minimum of 20 credit hours of GERO 9990 is required for all doctoral students.

Comprehensive Examination and Admission to Candidacy

When all or most of the coursework is completed on the plan of study, you must pass a written comprehensive examination. Once these exams are passed the supervisory committee will submit the necessary Application for Candidacy Form for approval by the Office of Graduate Studies.

Gerontology, MA

Department of Gerontology, College of Public Affairs & Community Service

Vision Statement

Students pursuing the MA in gerontology are seeking a formalized and in-depth understanding of the aging process by either pursuing a thesis or non-thesis option.

Program Contact Information

Lindsay Wilkinson, PhD, Graduate Program Chair (GPC)
210N College of Public Affairs & Community Service (CPACS)
402.554.6632

Program Website (<http://www.unomaha.edu/college-of-public-affairs-and-community-service/gerontology/academics/>)

Other Program Related Information

Alternative Delivery

Distance courses are available (online) for both the MA and the certificate programs.

Dual Degree in Social Gerontology and Law

Prospective students must apply to both UNO and UNL. Please refer to the Gerontology Departmental Handbook for more information. If pursuing the dual social gerontology and law degree the LSAT will be accepted in lieu of the GRE.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** The personal statement should be a minimum two-pages
- **Letters of Recommendation:** Two academic letters of recommendation are required.
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. You will be notified by the individual program if an external course-by-course evaluation is required.
- *Note: If you are admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

Gerontology Certificate

Department of Gerontology, College of Public Affairs & Community Service

Vision Statement

Students pursuing the graduate certificate in gerontology are seeking a formalized understanding of the aging process that serves to complement an existing graduate degree such as counseling, business, public administration or social work. Students also pursue the graduate certificate in gerontology to expand their knowledge beyond the undergraduate level.

ATHT 8110 ATHLETIC TRAINING TECHNIQUES (2 credits)

Overview course including basic components of the athletic training profession including the prevention, recognition, evaluation and immediate care of athletic injuries. Medical terminology, tissue healing, taping procedures, and professional considerations will be covered.
Prerequisite(s)/Corequisite(s): Admission to the Master of Arts in Athletic Training. Not open to non-degree graduate students.

ATHT 8120 EMERGENCY MANAGEMENT OF INJURY AND ILLNESS (2 credits)

The purpose of this course is to prepare students to respond to emergent conditions that affect patients involved in physical activity. Students will learn to recognize the signs and symptoms of acute injury and illness, assess patients using evidence-based methods, apply appropriate treatments, make appropriate referral decisions, and implement effective prevention strategies to reduce the risk of injury and illness.
Prerequisite(s)/Corequisite(s): Admission to the Master of Arts in Athletic Training program. Not open to non-degree graduate students.

ATHT 8130 THERAPEUTIC INTERVENTIONS I (2 credits)

This course will cover the pathophysiology of musculoskeletal injuries as well as the theory, physiology and application of physical agents used in the treatment of these injuries. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.
Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ATHT 8230 THERAPEUTIC INTERVENTIONS II (2 credits)

This course will introduce students to the use of basic theories and principles of athletic injury rehabilitation including therapeutic exercise. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.
Prerequisite(s)/Corequisite(s): ATHT 8130/HEKI 8130. Not open to non-degree graduate students.

ATHT 8240 ORTHOPEDIC ASSESSMENT I (2 credits)

The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the lower extremity. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the foot, ankle, lower leg, knee, thigh and hip. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.
Prerequisite(s)/Corequisite(s): Admission to the Master of Arts in Athletic Training Program. Not open to non-degree graduate students.

ATHT 8250 CLINICAL PRACTICUM IN ATHLETIC TRAINING I (2 credits)

Clinical Practicum in Athletic Training I is the first course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.
Prerequisite(s)/Corequisite(s): Admission to the MA in Athletic Training program, instructor permission, & compliance with published Athletic Training Program Technical Standards for Admission. Not open to non-degree graduate students.

ATHT 8330 THERAPEUTIC INTERVENTIONS III (2 credits)

This course will introduce students to the use of basic theories and principles of physical agents and manual therapies. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.
Prerequisite(s)/Corequisite(s): ATHT 8230/HEKI 8230. Not open to non-degree graduate students.

ATHT 8340 ORTHOPEDIC ASSESSMENT II (2 credits)

The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the upper extremity. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the shoulder, elbow, wrist, hand and fingers. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.
Prerequisite(s)/Corequisite(s): ATHT 8240/HEKI 8240. Not open to non-degree graduate students.

ATHT 8350 CLINICAL PRACTICUM IN ATHLETIC TRAINING II (2 credits)

Clinical Practicum in Athletic Training II is the second course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): ATHT 8250/HEKI 8250 Clinical Practicum I. Not open to non-degree graduate students.

ATHT 8360 ADVANCED ORTHOPEDIC & MEDICAL ASPECTS OF ATHLETIC TRAINING (3 credits)

This course will provide the student with knowledge and skill in the area of orthopedic and medical aspects of athletic training. Students will gain this knowledge through directed observation, experiential learning, literature review, and hands-on experience under the supervision of local medical professionals. The student will be exposed to advanced evaluation of medical conditions, systemic diseases, and other disorders; observe common surgical procedures for orthopedic conditions; and medical management of patients and physically active populations in conjunction with other healthcare providers.

Prerequisite(s)/Corequisite(s): Admission to Master of Arts in Athletic Training Program

ATHT 8410 ATHLETIC TRAINING ADMINISTRATION (2 credits)

This course will introduce students to administrative topics related to athletic training. Management strategies for financial resources, personnel, facilities, medical records, and third-party reimbursement will be covered. Additionally, legal and ethical professional practice standards will be introduced.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ATHT 8450 INTERNSHIP IN ATHLETIC TRAINING (2 credits)

This course is designed to provide an immersive athletic training clinical experience for students. The internship is a supervised, educational clinical work experience of at least 300 hours over a minimum of 4-weeks during a single semester. This experience will allow the student the opportunity to take more responsibility for the care, prevention, and rehabilitation of athletic injuries with a particular team or group of patients, as well as help plan and provide daily coverage for practices or clinical appointments.

Prerequisite(s)/Corequisite(s): Permission from the instructor or program director. Not open to non-degree graduate students.

ATHT 8530 THERAPEUTIC INTERVENTIONS IV (2 credits)

This course will introduce students to the use of basic theories and principles of athletic training related to pharmacology, nutrition and psychosocial wellness. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.

Prerequisite(s)/Corequisite(s): ATHT 8330/HEKI 8330. Not open to non-degree graduate students.

ATHT 8540 ORTHOPEDIC ASSESSMENT III (2 credits)

The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the head, face and spine. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the head, face and spine. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.

Prerequisite(s)/Corequisite(s): ATHT 8340/HEKI 8340. Not open to non-degree graduate students.

ATHT 8550 CLINICAL PRACTICUM IN ATHLETIC TRAINING III (2 credits)

Clinical Practicum in Athletic Training III is the third course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): ATHT 8350/HEKI 8350 Clinical Practicum II. Not open to non-degree graduate students.

ATHT 8650 CLINICAL PRACTICUM IN ATHLETIC TRAINING IV (2 credits)

Clinical Practicum in Athletic Training IV is the fourth course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): ATHT 8550/HEKI 8550 Clinical Practicum III

HEKI 8000 SPECIAL STUDIES (1-3 credits)

A series of intensive courses - scheduled as regular seminars or workshops according to purpose.

Prerequisite(s)/Corequisite(s): Permission of department.

HEKI 8030 RESEARCH IN HEALTH & KINESIOLOGY (3 credits)

The course introduces students to scientific writing, quantitative research design, and statistical methods. Considerable emphasis is placed on evaluation of research in scholarly publications. A research proposal in the form of a grant proposal is written as one of the course requirements. Students will develop the skills necessary to analyze study designs in existing literature and create a research proposal. (Cross-listed with BMKI 9001).

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

HEKI 8100 RESEARCH PROJECT (1-3 credits)

Individual or group study and analysis of specific problems in health, physical education or recreation.

Prerequisite(s)/Corequisite(s): Permission of instructor.

HEKI 8220 PROBLEMS & ISSUES IN HPER (3 credits)

An examination of current problems and issues in HPER that relate to the general aims and purposes of HPER.

HEKI 8300 ANALYSIS OF RESEARCH AND LITERATURE IN HUMAN MOVEMENT (3 credits)

Survey of research and literature in Human Movement for the purpose of orienting the candidate to possible areas of research and developing an understanding of and appreciation for writings in the field. The course may be offered focusing on only one specific area in HPER.

Prerequisite(s)/Corequisite(s): HPER 8030 or HEKI 8030

HEKI 8500 QUALITATIVE RESEARCH METHODS (3 credits)

An examination of qualitative research methods. Emphasis on the broad application of qualitative research in public health, education, and social sciences. Course topics include research design, data collection, data analysis, and reporting.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

HEKI 8850 EXERCISE FOR SPECIAL POPULATIONS (3 credits)

The course will examine the physiological and medical limitations imposed on people with various common chronic diseases/conditions including arthritis, osteoporosis, exercise-induced asthma, obesity, diabetes, hypertension and pregnancy. Special groups such as children and elders will be discussed. Content will emphasize the etiology and guidelines for exercise testing, prescription, and supervision. (Cross-listed with BMKI 9851).

Prerequisite(s)/Corequisite(s): PE 4940/KINS 4940 or PE 8946/KINS 8946

HEKI 8990 THESIS (1-6 credits)

The thesis experience is designed to help develop the candidate's ability to execute accepted procedures associated with the research process appropriate to the Master's degree.

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

KINS 8040 ADVANCED STATISTICS (3 credits)

This course will be a study in the statistical methods commonly used in descriptive and experimental research in physical education and exercise science. Application, particularly regarding the purpose, selection, and interpretation of statistical procedures will be emphasized. (Cross-listed with BMKI 9041).

Prerequisite(s)/Corequisite(s): HPER 8030/HEKI 8030 or BMKI 9001/HPER 9031/HEKI 9031 or equivalent

KINS 8056 EXERCISE AND SPORT NUTRITION (3 credits)

This course presents an overview of the principles of nutrition and the relationship between nutrition and health, fitness, and sports performance. It is designed to provide students with the knowledge and skills necessary to assess nutritional status, improve overall health, and enhance sports performance. (Cross-listed with KINS 4050).

KINS 8076 OPTIMIZING SPORTS PERFORMANCE (3 credits)

The course is designed for coaches, athletes and physically active people, and allied health professionals. Course content emphasizes integration of several disciplines in sports medicine aimed at preparing one for optimal sports performance. Topics include peaking, detraining, overuse injury, efficiency, special foods and nutritional requirements, genetics and trainability, and designing of multi-year training schedules. (Cross-listed with KINS 4070).

Prerequisite(s)/Corequisite(s): PE 4940/KINS 4940 with a grade of C- or better.

KINS 8086 CLINICAL EXERCISE PHYSIOLOGY (3 credits)

This course will offer students the knowledge, skills, and abilities to take the American College of Sports Medicine's health fitness instructor certification exam. This course will emphasize health risk assessment, exercise testing, and exercise prescription for healthy and clinical populations. (Cross-listed with KINS 4080).

Prerequisite(s)/Corequisite(s): PE 4940/KINS 4940 with a grade of C- or better.

KINS 8120 CURRENT TOPICS IN WEIGHT MANAGEMENT (3 credits)

This course will focus on current issues related to weight management. Students will review and apply the guidelines for physical activity and nutrition, critique current perspectives about weight management in the scientific literature and popular media (e.g., books, podcasts, news articles), and develop a best practice for weight management using what they have learned.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

KINS 8130 IMPLEMENTING PHYSICAL ACTIVITY IN DIVERSE POPULATIONS (3 credits)

This course will focus on information necessary to assess, design, implement, and evaluate the need for and effectiveness of physical activity interventions in diverse populations, races, and ethnicities. These populations will include: African American, Native American, Hispanic, Asian American, Pacific Islanders, and Caucasian. Additionally, candidates will complete a health and physical activity service learning project in which they will work with diverse populations in the community. (Cross-listed with BMKI 9131).

KINS 8140 PHYSICAL ACTIVITY ASSESSMENT AND HEALTH RELATED RESEARCH (3 credits)

This course will cover the broad scope of research on physical activity and public health. Emphasis will be placed on the application of physical activity assessment techniques. (Cross-listed with BMKI 9141).

KINS 8206 PLANNING WORKSITE WELLNESS PROGRAMS (3 credits)

This course will focus on the planning of quality worksite wellness programs utilizing standards established by the Association for Worksite Health Promotion. Steps in the planning process such as needs assessment, strategic planning, implementation, and evaluation will be taught with special application to the worksite. Critical issues involving worksite programs also will be addressed such as upper management support, program standards, corporate culture, competencies for worksite health promotion professionals, economic benefits, behavioral theories, legal issues, and the integration of worksite wellness programs and health care. (Cross-listed with KINS 4200).

Prerequisite(s)/Corequisite(s): Junior standing.

KINS 8240 SPORT IN AMERICAN CULTURE (3 credits)

Sport in American culture is a study of sport from a theoretical perspective. The relationship between sport and sub-cultures (to include disadvantaged American cultures), economics, global influences, and technology will be analyzed.

KINS 8280 CURRICULUM IN PHYSICAL EDUCATION (3 credits)

A study of the foundations for curriculum development. Special consideration is given to curriculum change, curriculum patterns and programs in physical education which will meet a culturally diverse, global society.

KINS 8316 LOWER EXTREMITY EVALUATION (3 credits)

This course is designed to provide the candidate with knowledge and skill in the area of advanced athletic injury assessment. The candidate will be exposed to current methodology in the field of orthopedic assessment, pathophysiology of orthopedic injury, and application of current research in injury evaluation. The candidate will receive practical experience in the management of athletic injuries. This course will focus on the low back, hip, and lower extremities. (Cross-listed with KINS 4310).

Prerequisite(s)/Corequisite(s): PE 8326/KINS 8326 and PE 8710/KINS 8710. Not open to non-degree graduate students.

KINS 8320 EVIDENCE-BASED PRACTICE IN SPORTS MEDICINE (3 credits)

This course is designed to provide the student with knowledge and skill in the area of developing clinical research questions, assessing research study designs, understanding statistical and epidemiological analyses, interpreting peer-reviewed manuscripts, the incorporation of research into clinical practice, understanding the role of an athletic trainer within the public health system, international classification of function, health literacy, and social determinants of health. Students in this course will learn to understand the role of evidence based /practice in clinical decision making.

KINS 8326 UPPER EXTREMITY EVALUATION (3 credits)

This course is designed to provide the candidate with knowledge and skill in the area of advanced athletic injury assessment. The candidate will be exposed to current methodology in the field of orthopedic assessment, pathophysiology of orthopedic injury, and application of current research in injury evaluation. The candidate will receive practical experience in the management of athletic injuries. This course will focus on the head, neck, thorax, and upper extremities. (Cross-listed with KINS 4320).

Prerequisite(s)/Corequisite(s): PE 8316/KINS 8316, PE 8336./KINS 8336 and PE 8720/KINS 8720. Not open to non-degree graduate students.

KINS 8336 ATHLETIC THERAPEUTIC MODALITIES (3 credits)

This course will cover the theory, physiology and application of physical agents used in the treatment of injuries and illness. Students will gain practical experience utilizing selected agents to treat injuries and illnesses. (Cross-listed with KINS 4330).

Prerequisite(s)/Corequisite(s): PE 8326/KINS 8326 and PE 8710/KINS 8710. Not open to non-degree graduate students.

KINS 8356 ORGANIZATION AND ADMINISTRATION OF ATHLETIC TRAINING (3 credits)

Administration of athletic training programs including the use of records and forms, budgets, facility design and legal concerns. (Cross-listed with KINS 4350).

Prerequisite(s)/Corequisite(s): PE 4340/KINS 4340, PE 4320/KINS 4320

KINS 8370 ANALYZING PHYSICAL EDUCATION TEACHING & SPORT INSTRUCTION (3 credits)

This course will examine the teaching and coaching in physical education and sport. It will identify assessment techniques utilized in teaching and coaching behavior research as well as typical prescriptions in an effort to improve one's performance.

Prerequisite(s)/Corequisite(s): Graduate standing

KINS 8506 BEHAVIORAL ASPECTS OF COACHING (3 credits)

This course is designed to provide the physical education teacher and athletic coach with an overview of the behavioral aspects of coaching athletes. The course will provide information which will enable the coach to enhance as well as orchestrate performance of elementary, junior high, senior high, college, and post-college athletes. (Cross-listed with KINS 4500).

KINS 8700 PSYCHOLOGY OF PHYSICAL ACTIVITY (3 credits)

The central purpose of this course is to examine the psychological antecedents and consequences of exercise and physical activity behaviors. The course will focus on traditional theories/principles of psychology as they relate to various physical activity settings. (Cross-listed with BMKI 9701).

KINS 8710 CLINICAL PRACTICUM IN ATHLETIC TRAINING I (1 credit)

Clinical Practicum in Athletic Training I is the first course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): Admission to the MA in Athletic Training program, instructor permission, & compliance with published Athletic Training Program Technical Standards for Admission. Co-requisite: PE 8326/KINS 8326. Not open to non-degree graduate students.

KINS 8720 CLINICAL PRACTICUM IN ATHLETIC TRAINING II (1 credit)

Clinical Practicum in Athletic Training II is the second course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): Admitted to MA in Athletic Training, PE 8710/KINS 8710, instructor permission, & compliance w/published Athletic Training Program Technical Standards for Admission. Co-reqs: PE 8316/KINS 8316 & PE 8336/KINS 8336. Not open to non-degree graduate students.

KINS 8730 CLINICAL PRACTICUM IN ATHLETIC TRAINING III (1 credit)

Clinical Practicum in Athletic Training III is the third course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): Admitted to MA in Athletic Training, PE 8720/KINS 8720, instructor permission, & compliance w/published Athletic Training Program Technical Standards for Admission. Co-reqs: PE 8346/KINS 8346 & PE 8356/KINS 8356. Not open to non-degree graduate students.

KINS 8740 CLINICAL PRACTICUM IN ATHLETIC TRAINING IV (1 credit)

Clinical Practicum in Athletic Training IV is the fourth course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): Admission to the MA in Athletic Training, PE 8730/KINS 8730 instructor permission, and compliance with published Athletic Training Program Technical Standards for Admission. Co-req: PE 8966/KINS 8966. Not open to non-degree graduate students.

KINS 8800 RISK MANAGEMENT FOR HEALTH FITNESS PROFESSIONALS (3 credits)

A study of risk management for health fitness professionals with a focus on minimizing liability exposures for health fitness facilities and their personnel. Principles of risk management such as the assessment of liability exposures, the development and implementation of risk management strategies, and the evaluation of these strategies will be explored as well as the law as it pertains to health fitness liability. Candidates will develop the knowledge and skill to manage high quality health fitness programs in various settings.

Prerequisite(s)/Corequisite(s): PE 4010/KINS 4010 or PE 8016/KINS 8016

KINS 8856 CARDIOVASCULAR DISEASE PREVENTION AND REHABILITATION (3 credits)

The purpose of this course is to provide candidates with an introduction to the theories and practices involved in all phases of cardiac rehabilitation. (Cross-listed with KINS 4850).

Prerequisite(s)/Corequisite(s): PE 2500/BMCH 2500 with a grade of C- or better or BIOL 2840 with a grade of C- or better, PE 4940/KINS 4940 with a grade of C- or better

KINS 8865 SCIENTIFIC ASPECTS OF STRENGTH DEVELOPMENT (3 credits)

This course is designed to explore the nature of muscular strength development, to investigate the physiological basis of physical conditioning, and to provide teachers, coaches and trainers with practical experience in designing specialized conditioning programs for a variety of sports and cultures.

KINS 8900 MANAGEMENT & LEADERSHIP SKILLS FOR FITNESS WELLNESS MANAGERS (3 credits)

This course is a study of management and leadership skills necessary for the successful management of fitness and wellness facilities and programs. Candidates will develop knowledge and practical skills in the areas of personnel and financial management, marketing, and operating policies procedures as well as develop a personal leadership philosophy based on sound principles of leaders.

Prerequisite(s)/Corequisite(s): PE 4010/KINS 4010 or PE 8016/KINS 8016 or ACSM Health Fitness Certification.

KINS 8910 INTERNSHIP IN EXERCISE SCIENCE (3 credits)

This course is an off-campus, supervised, educational work experience of at least 150 clock hours at an approved worksite offering programs and experiences in fitness development or health promotion. Candidates must have current CPR certification.

Prerequisite(s)/Corequisite(s): The prerequisites for this course include 90 hours completed, 2.5 GPA, PE 4900/KINS 4900 and permission of instructor.

KINS 8950 ADVANCED EXERCISE PHYSIOLOGY (3 credits)

A detailed analysis of selected topics including acute and chronic effects of exercise on metabolic, pulmonary, and cardiovascular function; and sports nutrition. Current research findings and methodology will be emphasized. (Cross-listed with BMKI 9951).

Prerequisite(s)/Corequisite(s): PE 4940/KINS 4940 or equivalent

KINS 8970 TOPICS IN SPORTS MEDICINE (3 credits)

This course is designed to help students synthesize and apply their knowledge of athletic training and sports medicine to current topics, unique populations, and other areas of exercise, sports medicine and health care. (Cross-listed with KINS 9971).

KINS 9300 SYSTEMATIC REVIEW AND META-ANALYSIS (3 credits)

This course is designed to introduce students to the process of completing systematic reviews and meta-analyses. The objective of the course is to provide students with a foundation of the requisite skills necessary to perform a quantitative and qualitative synthesis of the literature within their area of interest.

Prerequisite(s)/Corequisite(s): HEKI 8030 or equivalent research methods course.

KINS 9971 TOPICS IN SPORTS MEDICINE (3 credits)

This course is designed to help students synthesize and apply their knowledge of athletic training and sports medicine to current topics, unique populations, and other areas of exercise, sports medicine and health care. (Cross-listed with KINS 8970).

PHHB 8050 APPLIED RESEARCH IN PUBLIC HEALTH (3 credits)

This course will assist candidates to develop the basic skills to conduct applied research to address contemporary problems in public health. The course will emphasize proposal writing, data collection, research design, statistical analysis, computer application, and writing of research reports.

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

PHHB 8080 TOPICS IN HEALTH EDUCATION (3 credits)

This course will explore important current issues in Health Education. Candidates will explore economic, political, ethical and technological developments that affect the practice of Health Education. There is no limit to the number of times a candidate may enroll in HED 8080 as long as a different topic is offered each time.

Prerequisite(s)/Corequisite(s): Graduate.

PHHB 8206 A PUBLIC HEALTH APPROACH TO MENTAL HEALTH (3 credits)

This public health course will help students think critically about the prevention, identification, and treatment of mental illness in the United States. Students will be introduced to concepts from the disciplines of public health, psychology and sociology to understand mental health disorders and their impact on population health. Students will explore health disparities through the lens of cultural, social, behavioral, psychological, and economic factors. Students will recognize that mental health exists on a continuum and develop skills to address environmental influences on behavior. (Cross-listed with PHHB 4200).

PHHB 8250 HUMAN SEXUALITY (3 credits)

This graduate-level course is aimed at providing an overview of the current scientific knowledge concerning human sexuality. The course is designed to be interdisciplinary in nature, providing the biological, behavioral and cultural aspects of human sexuality. Priority will be given to candidates from the helping professions. Qualified candidates from other related disciplines must have permission of instructor.

Prerequisite(s)/Corequisite(s): Undergraduate Anatomy and Physiology

PHHB 8270 INTERVENTIONS IN HEALTH EDUCATION (3 credits)

This course will provide health behavior candidates with an opportunity to investigate, contrast, develop, implement and evaluate a variety of intervention activities, to be applied in different settings. Theories regarding methods to enhance behavior change and teaching strategies to meet the health needs of a diverse population will be explored.

Prerequisite(s)/Corequisite(s): Graduate status.

PHHB 8330 ALCOHOL EDUCATION (3 credits)

A study of the problems associated with alcohol use, misuse and abuse. The patterns and trends of use, theories of dependence, pharmacological aspects and health consequences are explored. Emphasis is given to the identification of people with alcohol related problems and the role of the private and public sectors in prevention, education, intervention, and referral. Methods of assessing needs, prescribing, implementing, and evaluating alcohol education programs will be explored.

PHHB 8360 COMMUNITY HEALTH (3 credits)

An in-depth examination of community health and determinants of community health issues. The epidemiology, statistical sciences, environmental health, political influences on health, and behavioral social sciences for community health are examined. Students are expected to be able to apply concepts addressed in class to contemporary health issues.

PHHB 8400 HEALTH PROMOTION PROGRAM PLANNING (3 credits)

An in-depth application of the health promotion program planning process utilizing a choice of planning models. Students develop a comprehensive plan in response to an actual grant announcement and follow appropriate guidelines.

PHHB 8450 EPIDEMIOLOGY & PREVENTION OF DISEASE (3 credits)

The course is designed for health behavior graduate students and others who are interested in public health. The causes, prevention, treatment and control of prevalent communicable and non-communicable disease in a culturally diverse and global society will be emphasized. Special emphasis will be given to diseases and health problems that can be prevented or controlled through education and advocacy. Students will apply skills to contemporary issues.

PHHB 8500 HEALTH PROGRAM DESIGN (3 credits)

This course will provide students the skills to design an education/advocacy health initiative based on health behavior theory and models. They will develop a plan that includes a detailed needs assessment, a carefully crafted set of SMART (Specific, Measurable, Achievable, Relevant, Time-Bound) objectives for all levels of program outcome, an implementation strategy using health behavior models, and a thorough and systematic evaluation framework (formative and summative).

PHHB 8556 HEALTH ASPECTS OF AGING (3 credits)

This course emphasizes health promotion for older adults. Special health needs of older Americans are compared and contrasted with health needs for other age groups. Prevention or delaying of chronic diseases and disorders are emphasized. (Cross-listed with PHHB 4550, GERO 4550, GERO 8556, WGST 4550).

PHHB 8600 HEALTH BEHAVIOR (3 credits)

The purpose of this course is to study the theoretical foundations of health behavior. Candidates will develop an understanding of the determinants of health behavior, the models and theories that provide a framework for predicting health behavior, and the strategies employed to bring about behavioral changes for health and disease prevention in individuals and groups.

PHHB 8706 WOMEN'S HEALTH AND ISSUES OF DIVERSITY (3 credits)

This course provides a critical understanding of the inter-relationship between socio-cultural, economic, and political factors and women's physical and mental health. The aim is to provide an overview of the experience with the health care system. Emphasis will be on critically examining recent scholarship from a sociological, behavioral, health policy perspective. (Cross-listed with PHHB 4700, SOC 4700, SOC 8706).

Prerequisite(s)/Corequisite(s): Graduate standing.

PHHB 8730 DYING, DEATH & GRIEVING (3 credits)

An examination of theory and research relevant to interaction with the older, terminally ill person, focusing on communication with widows and other survivors as well as the dying patient. (Cross-listed with GERO 8730).

Prerequisite(s)/Corequisite(s): Graduate Students

PHHB 8750 PROGRAM EVALUATION AND INSTRUMENTATION (3 credits)

This course will build skills for selection, development and analysis of various types of instruments and techniques for conducting process, impact, and outcome evaluations in health promotion, education, and behavior. Evaluation of health behavior change and its antecedents, changes in community services programs, and community health status will be discussed. Candidates will learn methods for developing choosing psychometric tools, choosing appropriate evaluation designs, procedures for data collection, and describing evaluation results. Emphasis will be placed on political, statistical, and theoretical aspects of instrumentation and evaluation practices.

Prerequisite(s)/Corequisite(s): HED 8270/PHHB 8270 or permission of instructor.

PHHB 8850 HEALTH ASPECTS OF STRESS MANAGEMENT (3 credits)

The health-related aspects of stress management and control will be the focus of this course. Selected techniques for self-regulating stress will be demonstrated, practiced and analyzed. Candidates will be introduced to current scientific research in human stress.

Prerequisite(s)/Corequisite(s): Graduate.

PHHB 8950 PUBLIC HEALTH LEADERSHIP AND ADVOCACY (3 credits)

This course incorporates public health leadership theory and practices that are grounded in biomedical and social science and sanctioned by public law. Also included is the politics of communities and organizations. Advocacy is emphasized as a key tool to secure funding and to help assure that local, state, and federal policy-makers will adopt, implement, and maintain important public health regulations, policies and programs.

Prerequisite(s)/Corequisite(s): Fifteen (15) health education graduate credits. Not open to non-degree graduate students.

PHHB 8980 HEALTH EDUCATION PRACTICUM (1-3 credits)

This course offers graduate candidates in health education an opportunity to gain practical, on-the-job training in health education in local schools, businesses, hospitals, clinics, voluntary health agencies or governmental health agencies.

Prerequisite(s)/Corequisite(s): Candidates must have completed 21 credit hours at the undergraduate or graduate level (3.0 GPA or above) in health education prior to enrolling in this course. Not open to non-degree graduate students.

Health and Kinesiology, MS

School of Health and Kinesiology, College of Education, Health, and Human Sciences

Vision Statement

The School of Health and Kinesiology (H&K's) graduate program prepares students for careers in health, physical education, exercise science, athletic training, and physical activity. By fostering the development of evidence-based work, we train students to be lifelong learners who can perform leadership roles as educators, practitioners and researchers.

Fast Track Public Health/Health Behavior Integrated Undergraduate/Graduate Program (IUG)

The School of Health and Kinesiology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BS in Public Health major desiring to pursue a MS in Health & Kinesiology with a Health Behavior concentration, or those pursuing a BS in Kinesiology major desiring to pursue a MS in Health & Kinesiology with an Exercise Science concentration.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Applications for this program are accepted on a rolling basis. All materials must be submitted at least one week prior to the first day of the semester in which the student has elected to begin coursework.

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency->

%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.

- Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** Please address your main areas of interest and what you plan to do with a degree in Health and Kinesiology. You may also address any issues with your application that you would like the admission committee to consider. Please limit your statement to one page double spaced.
- **Letters of Recommendation:** Two letters are required

Exit Requirements

Thesis Option: Thesis 6 hours HEKI 8990. All candidates should carefully review the Graduate College requirements for forming the supervisory committee, and submitting the Supervisory Committee and Thesis/Thesis Equivalent Proposal Approval Forms and final approval and submission of the thesis.

Non-Thesis Option: Comprehensive Examination.

Concentrations

Health Behavior Concentration

Code	Title	Credits
Required Concentration Courses		
Undergraduate deficiencies may include: an undergraduate statistics course.		
PHHB 8450	EPIDEMIOLOGY & PREVENTION OF DISEASE	3
PHHB 8500	HEALTH PROGRAM DESIGN	3
PHHB 8600	HEALTH BEHAVIOR	3
PHHB 8950	PUBLIC HEALTH LEADERSHIP AND ADVOCACY	3
Electives		9-15
Select from the following graduate course prefixes: PHHB, HEKI, KINS. (Others upon approval by advisor and GPC).		
Total Credits		21-27

Physical Education Concentration

Code	Title	Credits
Required Concentration Courses		
KINS 8040/9041	ADVANCED STATISTICS	3
PHHB 8500	HEALTH PROGRAM DESIGN	3
KINS 8240	SPORT IN AMERICAN CULTURE	3

History

Degree Programs Offered

- History, MA (p. 1205)
- History Certificate (p. 1207)

HIST 8010 RESEARCH DIRECTED READINGS PROJECT (1-3 credits)

Special research problems and or directed readings arranged individually with students on topics not explored in other graduate offerings. If students do not complete all the readings during the semester in which they enroll in the course, they must complete all the readings within one academic year of their enrollment.

Prerequisite(s)/Corequisite(s): Minimum of nine graduate hours in history completed. Permission of history Graduate Program Chair. Open only to students enrolled in the History MA program. Not open to non-degree graduate students.

HIST 8016 RELIGION IN EARLY AMERICA (3 credits)

This course examines the history and nature of religion in North America to c. 1770 with an emphasis on the British colonies. (Cross-listed with HIST 4010, RELI 4050).

Prerequisite(s)/Corequisite(s): Must be a graduate student enrolled in History MA program. Not open to non-degree graduate students.

HIST 8020 GRADUATE INTERNSHIP (1-3 credits)

The graduate student is supervised by a member of the faculty in a project involving part-time employment or service with a museum, historic site, historical society or other institution. Work hours, activities, reporting requirements, and responsibilities must be specified in written agreement between employer, student, Graduate Program Chair, and/or supervising faculty member. Normally taken for 3 hours. If a hosting institution cannot commit to a supervised workload which the departmental advisor and/or Graduate Program Chair believe to be equivalent to 3 hours, course may be taken for fewer hours. In such circumstances, student may repeat course up to a total of 3 hours.

Prerequisite(s)/Corequisite(s): Student must be enrolled in the History MA program and have completed at least 6 hours of graduate credit. Student must have approval of Graduate Program Chair (GPC) and/or supervising faculty before enrolling. Not open to non-degree graduate students.

HIST 8030 GRADUATE HISTORICAL METHODOLOGY (3 credits)

This course will examine various historical methodologies which have been employed by historians to provide structural interpretations of the past. Although exact content may vary, examples of methodologies include the Whig Interpretation, Marxism, Structuralism, Postmodernism, and the New Social History.

Prerequisite(s)/Corequisite(s): Students must be enrolled in the MA program in history. Not open to non-degree graduate students.

HIST 8046 HOMESCAPES: THE MATERIAL CULTURE OF EVERYDAY LIFE IN AMERICA, 1600-1860 (3 credits)

This course examines the culture and technologies of house forms and work landscapes in North America, 1600-1860. (Cross-listed with HIST 4040).

Prerequisite(s)/Corequisite(s): Graduate student in history, or permission of the graduate chair.

HIST 8056 HISTORY OF WOMEN IN AMERICA TO 1875 (3 credits)

This course examines the history of women in what is now the United States from the seventeenth century to 1875. Topics include law, work, sexuality and reproduction, slavery, cross-cultural encounters, religion, political activism, and the transformation of gender by the market and industrial revolutions. (Cross-listed with HIST 4050).

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

HIST 8066 HISTORY OF WOMEN IN AMERICA FROM 1875 - 1992 (3 credits)

This course examines the history of women in the United States from 1875 to 1992. Topics include law, work, sexuality and reproduction, immigration, civil rights, political participation and party politics, and changes to the American gender system, including family structure and employment. (Cross-listed with HIST 4060, WGST 4060, WGST 8066).

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

HIST 8076 SLAVERY AND RACE RELATIONS IN THE AMERICAS (3 credits)

Slavery and Race Relations in the Americas examines the historical relationship between the trans-Atlantic slave trade and American race relations, connecting the enslavement of Africans in the Americas to race relations in the Caribbean, Latin America, and the United States. (Cross-listed with HIST 4070, BLST 4650, BLST 8656, LLS 8656).

Prerequisite(s)/Corequisite(s): Graduate standing

HIST 8146 COLONIAL AMERICAN HISTORY (3 credits)

This course provides a study of the settlement and development of North America to c. 1763 with an emphasis on the British colonies. (Cross-listed with HIST 4140).

HIST 8156 THE AMERICAN REVOLUTIONARY ERA, 1763-89 (3 credits)

This course examines the period of the American Revolution beginning with the changed circumstances in the British North American colonies following the end of the French and Indian War and concluding with the ratification of the United States Constitution. The course analyses social, political, and military themes from this period. (Cross-listed with HIST 4150).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8166 THE EARLY AMERICAN REPUBLIC: FROM THE CONSTITUTION TO THE SECOND PARTY SYSTEM (3 credits)

This course covers an important period of American history beginning with the first federal government and ending with an analysis of the consolidation of the Second American Party system. Topics to be covered include the earliest debates over the nature of the federal government, foreign relations, the emergence of political parties, and the rise of the Jacksonian democracy. (Cross-listed with HIST 4160).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8176 HISTORY OF THE AMERICAN WEST (3 credits)

An examination of the unique aspects of the region of the United States known as "the west." Students will learn about the multiple peoples, cultures, and environments which combined to form this region. Content will also include an examination of how the myths of the west were created. (Cross-listed with HIST 4170).

Prerequisite(s)/Corequisite(s): Graduate standing

HIST 8186 THE AMERICAN CIVIL WAR PERIOD: FROM THE TEXAS REVOLUTION THROUGH RECONSTRUCTION (3 credits)

This course focuses on the period of the American Civil War. It will begin with the background to, and events of the Texas Revolution. It will then consider the growing national tensions over slavery, particularly as a consequence of the Mexican-American War before examining the immediate causes of the civil war. The course will then examine the war itself before concluding with analysis of Reconstruction. (Cross-listed with HIST 4180).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8246 EMERGENCE OF MODERN AMERICA (3 credits)

This course examines American history from the end of Reconstruction to the end of World War II. Among the topics covered are western expansion, industrialization, immigration, and the expanding international footprint of the United States. (Cross-listed with HIST 4240).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8336 U.S. CONSTITUTIONAL HISTORY TO 1860 (3 credits)

This course will examine the history of the United States constitution from its promulgation in 1787 through the end of the Civil War. This will include consideration of both English and colonial precedents. The course will analyze the process of writing and ratifying the document in the late 1780s and will then look at some of the key legal decisions between 1790 and 1860. (Cross-listed with HIST 4330).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8346 U.S. CONSTITUTIONAL HISTORY SINCE 1860 (3 credits)

This course examine the increasingly important role played by competing interpretations of the United States constitution since the outbreak of the Civil War. This will include the emergence of the idea of a "living constitution," the extension of constitutional guarantees to the states, and examination of critical Supreme Court cases. (Cross-listed with HIST 4340).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8366 THE U.S. IN THE COLD WAR (3 credits)

This course will examine the impact of the Cold War in modern American history on two levels. First it will seek to understand how the Cold War influenced American foreign policy decisions since the end of World War II and examine the long term consequences of those policies for both the U.S. and the world. Secondly, this course will examine how the Cold War impacted or shaped American culture, domestic politics, and social movements in the postwar period. (Cross-listed with HIST 4360).

Prerequisite(s)/Corequisite(s): Graduate student in history, or permission of the graduate chair.

HIST 8406 HISTORY OF NORTH AMERICAN INDIGENOUS CULTURES (3 credits)

A survey of traditional North American Indigenous cultures, their interaction with the environment, with one another, and with other people groups. This course covers indigenous societies to the present day. (Cross-listed with HIST 4400).

Prerequisite(s)/Corequisite(s): Graduate standing

HIST 8416 HISTORY OF NEBRASKA (3 credits)

An examination of the history of Nebraska from Native American occupation to the present, with emphasis on environmental factors that have shaped the region and its people. (Cross-listed with HIST 4410).

Prerequisite(s)/Corequisite(s): Graduate standing

HIST 8426 THE SIOUX TRIBE (3 credits)

A cultural and historical study of the Sioux tribes emphasizing the earliest historic period to the present. (Cross-listed with HIST 4420).

HIST 8456 NATIVE AMERICAN ENVIRONMENTALISM (3 credits)

This course studies North American tribal subsistence and natural resource use practices from the early historic period to the present, Native Americans as environmentalists, and modern tribal environmentalism. (Cross-listed with HIST 4450).

HIST 8466 AMERICAN IMMIGRATION HISTORY (3 credits)

A study of American immigration from the colonial era to the present. Topics covered include Old World origins of migration, the old immigrants from western Europe, the new immigrants from southern and eastern Europe, non-European immigrants, native-born American responses to immigrants, the periods of immigrant adjustment in the new physical environment, and the contemporary revival of ethnicity. (Cross-listed with HIST 4460).

Prerequisite(s)/Corequisite(s): Graduate student standing or permission of the graduate chair

HIST 8486 THE UNITED STATES IN THE 1960S (3 credits)

This course is a review of the economic, social, cultural, and political changes that marked the United States in the 1960s. (Cross-listed with HIST 4480).

HIST 8536 EUROPE: RENAISSANCE & REFORMATION (3 credits)

This course will examine European history from the fifteenth through the seventeenth centuries. Among the topics which will be covered are the Renaissance, the Protestant Reformation, the Catholic Reformation, Wars of Religion, the beginning of European overseas expansion, and the Scientific Revolution. In addition to examining the religious ideas and revolutions of the period, there will also be analysis of economic, social, and political change. (Cross-listed with HIST 4530).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8546 MEDIEVAL EUROPE (3 credits)

A dive into the history of medieval Europe through the stories of men and women, their beliefs, struggles, contradictions and achievements. (Cross-listed with HIST 4540).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8616 TUDOR AND STUART ENGLAND (3 credits)

English history from the end of the Wars of the Roses in 1485 to the death of Queen Anne in 1714. The course will examine the efforts of the Tudors and Stuarts to establish dynasties, the religious upheavals in the sixteenth and seventeenth centuries, changes in the role of Parliament, the Civil Wars, and the beginning of English overseas expansion. (Cross-listed with HIST 4610).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8656 HISTORY OF MODERN IRELAND (3 credits)

A survey of Irish history from the Act of Union of 1801 through the civil rights movement of "Troubles" of Northern Ireland in the 1970s. (Cross-listed with HIST 4650).

HIST 8726 THE HOLOCAUST (3 credits)

An interdisciplinary approach in a seminar oriented format discussing various aspects of the most notorious genocide in modern times. The course will explore the history of anti-Semitism, the rise of Nazi Germany and the road to the 'final solution.' It will further explore psychological, sociological and intellectual aspects of the dark side of humanity. (Cross-listed with HIST 4720, RELI 4160, RELI 8166).

HIST 8736 ISRAEL AND PALESTINE (3 credits)

This course will outline the history of the conflict over Palestine/Israel, examine its present status, and explore its likely unfolding in the future. It seeks to provide a broad and concise understanding of the historical events which have shaped the relations between Israelis and Palestinians, as well as a keen awareness of the challenges and prospects related to their future. (Cross-listed with HIST 4730).

HIST 8746 COMPARATIVE GENOCIDE (3 credits)

This course explores genocide and its many forms throughout history. It begins by considering the varied elements and definitions of the term. Next it looks at what makes people kill before going on to examine many different genocides throughout history. Finally, the course addresses the prosecution and prevention of genocide. (Cross-listed with HIST 4740).

Prerequisite(s)/Corequisite(s): Graduate student enrolled in History MA program. Not open to non-degree graduate students.

HIST 8806 U.S. AND THE MIDDLE EAST (3 credits)

This course focuses on the evolution of US relations with and Foreign Policy vis-a-vis the Middle East over the last six decades. It seeks to illuminate the constant features in contrast to the changes in direction, examining the agendas of varying administrations as well as the treatment by the media of this region. It follows a chronological framework with particular emphasis on key thematic topics. While emphasizing the political dimensions of international relations, the class will also explore cultural and social aspects of the ties between the US and the peoples of the Middle East. (Cross-listed with HIST 4800).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students

HIST 8826 MESOPOTAMIA AND PRE-ISLAMIC PERSIA (3 credits)

Examination of the Ancient Near East from the emergence of its earliest civilizations—Sumer, Akkad and Babylonia—through the Bronze and Iron Ages, concluding with Persia in the Common Era (CE) just before the rise of Islam. (Cross-listed with HIST 4820).

HIST 8836 ANCIENT GREEK MYTH, RELIGION & MAGIC (3 credits)

Students will examine the impact of ancient Greek myth and belief on actual religious practice: e.g., "lived" religion. Areas covered include formal civic sacrifice, wartime religion, family and personal devotions, mystery cults, oracles and seers, plus the popular pursuit of magic. (Cross-listed with HIST 4830, RELI 4830, RELI 8836).

Prerequisite(s)/Corequisite(s): Junior standing

HIST 8846 ALEXANDER THE GREAT AND THE MACEDONIAN ORIGIN (3 credits)

Examination of the conquests of Alexander the Great, as well as controversies in Alexander studies. Includes discussion of both the Macedonian culture that produced him and the career of his father, Philip II. (Cross-listed with HIST 4840).

Prerequisite(s)/Corequisite(s): Graduate standing

HIST 8856 ROME AND THE EARLY CHURCH (3 credits)

Students will cover Roman-Christian-Jewish interactions from just before the birth of Jesus of Nazareth to c. 450 CE, with an emphasis on social and political history. We catalogue Christianity's transformation from its origins as a Jewish movement and an illegal "superstition" to the dominant religion of the Roman empire. (Cross-listed with HIST 4850, RELI 4850, RELI 8856).

Prerequisite(s)/Corequisite(s): Junior standing.

HIST 8916 TOPICS IN HISTORY (3 credits)

This course introduces students to specialized subject matter not available in existing History courses. Course may be repeated as long as the topic is substantially different each time. Course may be cross-listed with other programs e.g. Native American Studies (NAMS), Women's and Gender Studies (WGST) when topics are appropriate. (Cross-listed with HIST 4910).

Prerequisite(s)/Corequisite(s): Graduate standing

HIST 8990 THESIS (1-6 credits)

Thesis research project written under supervision of an adviser.

Prerequisite(s)/Corequisite(s): Completion of twenty-four hours of history graduate work. Approval of Graduate Program Chair. Not open to non-degree graduate students.

HIST 9100 SEMINAR IN HISTORY (3 credits)

This seminar guides advanced graduate students through critical readings and practices in historical research or historiography. Topics will vary and course can be repeated under different topics.

Prerequisite(s)/Corequisite(s): Open only to History MA students who have completed HIST 3930 or equivalent. Non-History MA students may be admitted after consultation with History GPC and instructor. Not open to non-degree graduate students.

HIST 9200 COLLOQUIUM (3 credits)

The colloquium guides advanced graduate students through the historiography of a specific subject. Topics will vary and course can be repeated under different topics. Open only to students enrolled in MA program in history unless permission granted by History Department Graduate Program Chair.

Prerequisite(s)/Corequisite(s): Open only to History MA students who have completed HIST 2980, HIST 3930 or equivalent. Non-History MA students may be admitted after consultation with History GPC and instructor. Not open to non-degree graduate students.

History, MA

Department of History, College of Arts & Sciences

Vision Statement

The mission of the Master of Arts in history program is to develop in students an understanding both of history itself and of history as a profession. In so doing, students will move beyond thinking of history as simply a series of events.

Since the professionalization of history in the late nineteenth century, historians have sought to explain not only what happened but why events unfolded the way they do. In subsequent years, this has led to an increasingly sophisticated volume of materials which deepen our understanding of the past. The process has also led to the formulation, and frequently the subsequent refutation, of models of interpretation.

In order to develop a proper understanding of the past, graduate students in history need to understand not only the events of the past but how historians have interpreted those events. As such the Master of Arts history program is committed to exposing our students to the events of history, the records of history, as well as to those who have sought to explain them. In so doing, our graduate will understand history at a much deeper level than when they entered the program.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: May 15
- Spring: November 15

Other Requirements

- Complete 21 semester hours of undergraduate work in history, including a course on historical research, with a 3.0 grade point average (on a 4.0 scale).
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** Submit an essay of 250-500 words describing the applicant's interests in history and why he or she wishes to earn an MA degree in History
- **Writing Sample:** 10-12 pages in length from an upper-division history (or cognate) course, or equivalent-length history-related article published in a peer-reviewed publication
- **Letters of Recommendation:** Two letters of recommendation are required.
 - Because we seek to determine your potential as a historian, letters of recommendation should be solicited primarily from historians with whom you have worked during your academic career. If you did not major in history and therefore cannot get letters from historians, then the best remaining option is to obtain letters from professors in the field in which you majored.
- The History graduate program committee may choose, in rare cases, to admit provisionally any student who does not meet all of the above requirements, with the understanding that all conditions for unconditional admission must be met before HIST 8010 or HIST 9100 courses may be taken.
- Students who have no undergraduate course in historical research and methodology must successfully complete HIST 2980 during one of the first two semesters of their enrollment. This course, required of all undergraduate history majors at UNO, seeks to develop two skills essential to all historians: the ability to write clearly and the ability to conduct critical and thorough research. Students who lack these skills may anticipate serious problems in their studies.
 - Interpretation of this requirement rests with the History graduate program committee. Students who believe that they have taken a comparable course may be asked to submit examples of their work, which will enable the graduate program committee to assess their proficiency.
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators

(<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).

- UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
- *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

Degree Requirements

Thesis Option (36 hours)

The 36-hour thesis program includes six (6) hours of thesis credit, plus 30 credit hours in graduate coursework. This program is especially recommended for students who wish to continue work toward a PhD, but is open to any student.

Students who intend to write a thesis should bear in mind that this is a substantial undertaking and one that normally takes at least a year of focused research, background reading, writing, and revision to complete, in addition to previous coursework. An MA thesis must present original research and provide evidence of both extensive work in primary sources and engagement with the current scholarship on the subject matter in question. Students should develop some idea of a topic well before they complete their coursework and, in conjunction with the GPC, identify the department member best suited to supervise the thesis. Each faculty member of the department has complete discretion as to whether he or she will work with a particular student and whether the proposed topic is acceptable. Further discussion on thesis topics will be addressed during advising and/or new student orientation.

Code	Title	Credits
Required Courses		
Complete at least 15 hours from the following distributed between the three courses. Consult your advisor for more information.		15
HIST 8030	GRADUATE HISTORICAL METHODOLOGY	
HIST 9100	SEMINAR IN HISTORY	
HIST 9200	COLLOQUIUM	
Select no more than three hours from the following.		3
HIST 8010	RESEARCH DIRECTED READINGS PROJECT	
HIST 8020	GRADUATE INTERNSHIP	
Select the remainder hours from History or other advisor approved courses.		12
HIST 8990	THESIS	6
Total Credits		36

Students completing an MA with thesis may include no more than three (3) hours **total** from among HIST 8010 and HIST 8020.

Non-Thesis Option (36 hours)

Thirty-six (36) hours of graduate coursework in history.

The 36-hour non-thesis program consists entirely of coursework. This program is especially recommended for students who wish to pursue work in public history, archiving, secondary-school teaching, park-service work, etc. Students will receive guidance and support regarding future career paths from their comprehensive exam committee.

Code	Title	Credits
Required Courses		
Complete at least 15 hours from the following distributed between the three courses. Consult your advisor for more information.		15
HIST 8030	GRADUATE HISTORICAL METHODOLOGY	
HIST 9100	SEMINAR IN HISTORY	
HIST 9200	COLLOQUIUM	
No more than six hours from the following.		6
HIST 8010	RESEARCH DIRECTED READINGS PROJECT	
HIST 8020	GRADUATE INTERNSHIP	
Select the remaining hours of History or other advisor approved courses.		15
Total Credits		36

Students completing an MA without thesis may include no more than six (6) hours **total** from among HIST 8010 and HIST 8020.

Exit Requirements

Thesis Option

MA Thesis Contract

Any faculty member in the Department of History who agrees to chair a MA thesis committee or who agrees to be a member of an MA thesis committee, may ask the student in question to sign a MA Thesis Contract. The basic model for such a contract will be available to students on the history graduate student Canvas page. The faculty member in question may choose to modify this basic model if they think appropriate.

All candidates should carefully review the Graduate College requirements for forming a supervisory committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of a thesis.

Non-thesis Option

Comprehensive Examination

Successfully pass comprehensive exams which may only be taken after the candidate has successfully completed all other requirements for the MA. Full details on comprehensive examinations will be provided during advising and/or new student orientation.

Exams will be offered in each semester of the academic year i.e. fall, spring summer. Students generally may not take their exams until they have completed all the required coursework for their MA program. Rare expectations may be considered at the discretion of the GPC.

As comps are not a course, they are graded only as pass/fail – with a B- being the minimum grade to pass. The three questions will be graded separately – students must pass all questions in order to earn their MA.

Retaking all or part of a comprehensive exam should be scheduled within two semesters (including summer) of the original exam, except in extraordinary circumstances and with the special permission of the graduate committee. Failure of one question will require a rewrite of that question (new or revised to be determined by the committee); failure of two or more questions will require a retake of the entire exam (new or revised, again to be determined by the committee). Retakes will be limited to one attempt. Further details on comprehensive exams will be provided during advising and/or new student orientation.

As is the case with regular courses, students may appeal comprehensive exam grades **ONLY IF** they believe such grading was “prejudiced or capricious” (see Bylaws of the Board of Regents of the University of Nebraska. Details here (<http://www.unomaha.edu/policies/>)). The process of appeal will follow that provided in the Department of History Grade

Appeal outlined here (<http://www.unomaha.edu/cas/gradeappeal.php>), with the GPC standing as Instructor of Record.

Course Attendance Requirement and Withdrawal Policy

- All Department of History faculty may, at their own discretion, remove from any class any graduate student who misses three or more classes during a single semester.
- The Department of History graduate program committee may remove from the program any student who withdraws from three or more courses.

Academic Progress

- Each candidate must complete his or her MA degree within eight (8) years of starting the program. A candidate who, owing to extenuating circumstances, is unable to meet this requirement may appeal in writing to the Graduate Program Chair (GPC) and/or the Department of History graduate committee for an extension of time. Such extensions will normally be granted only in cases of serious illness or military deployment.
- In addition to conforming to all requirements for academic progress laid down by the Office of Graduate Studies, the Department of History notes the following: pursuant to the section "Automatic Dismissal," wherein is noted "Departments/Schools may have additional and more stringent criteria for evaluating a student's performance and may demand a higher level of performance than that demanded by the Graduate College," please note:
 - The Department of History at UNO will automatically dismiss from the program any student who is awarded any grade below B- in two (or more) classes, regardless of whether or not they have complied with other requirements of satisfactory progress.

History Certificate

Department of History, College of Arts & Sciences

Vision Statement

UNO's department of history offers an 18 credit hour graduate certificate in history for educators and other professionals who already have an advanced degree in another field and wish to expand their knowledge of History. This certificate is designed to help educators meet the new requirements set by the Higher Learning Commission to teach history-related courses in institutions of higher education or dual enrollment/concurrent enrollment courses in high schools. This certificate can be earned completely online.

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: July 15
- Spring: November 15
- Summer: April 15

Other Requirements

- BA or MA with an overall GPA of 3.0
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo 105
- **Writing Sample:** Academic-style writing sample of approximately 5 pages in length.
- **Letters of Recommendation:** Two letters of recommendation from a former professor (preferred), supervisor, or individual that can speak to one's academic potential in a graduate program
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
 - *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

Degree Requirements

- Information Technology, PhD (p. 1209)

Information Technology, Executive MS

College of Information Science & Technology

Vision Statement

The vision of the Executive Masters in Information Technology (EMIT) program is to provide flexible, innovative and technologically current education to rising IT professionals who want to prepare for corporate leadership positions through their functional expertise. The EMIT program brings together leaders in the IT field and world class instruction from the College of IS&T, other units at UNO, international university partners and local businesses. This accelerated graduate program is designed to be completed in 12-months in a cohort fashion using instructional modules delivered on every alternative Saturday.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Fall 2022)

- Applications for this program are accepted on a rolling basis for **fall only**. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
 - The TOEFL or IELTS scores are valid for two years. Your TOEFL or IELTS score must be valid when you submit your application.
- **Statement of Purpose:** Through your resume, we have a clear sense of your professional path to date. Please respond to the following question in a statement of purpose (maximum 500 words): What are your career goals going forward, and how will the UNO EMIT program help you achieve them?
- **Resume:** A two page (maximum) abbreviated resume highlighting the candidate's key education and IT related experience is required. This will need to be uploaded with the application.
- **Employer Sponsorship:** Applicants to the EMIT program are required — regardless of the level of financial support from their employer — to submit a signed sponsorship letter from an authorized representative of their organization, briefly stating the terms of support. Financial sponsorship is not required, but the organization must agree to keep the applicant's travel time to a minimum and completely release him or her from all job responsibilities on class days. Sponsorship letters must be uploaded into the online application system. Independent

professionals or consultants and applicants who head their own firms are eligible, though these applicants will have to write their own sponsorship letters.

• Supplemental Questions:

- **Essay 1:** UNO's Executive MS in Information Technology (EMIT) program will challenge you by offering a rigorous and innovative academic experience and the opportunity to immediately apply what you learn to your career. How will you approach balancing the demands of the program with your professional and personal life while you are in school? (Maximum 250 words)
- **Essay 2:** What is your immediate post-EMIT professional goal? (Maximum 50 characters)
 - Examples of possible responses:
 - "Work as CTO for an insurance company."
 - "Join an IT consulting firm."
 - "Launch a new technology start-up."
- **Interview:** Interviews are required for admission to the EMIT program. Once your online application is complete and under review, you may be contacted by a member of the Admissions Office and/or the Director of the EMIT Program to schedule an on-campus or Skype interview. Please keep in mind interviews are by invitation only.
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
 - *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

Degree Requirements

The EMIT curriculum includes course modules on topics that address the following major themes; globalization; data analytics & visualization; information assurance; IT leadership; distributed project management; and IT infrastructure and emerging technologies. Students will take the coursework in the same sequence and as a cohort. Classes will be offered in a variety of flexible and hybrid formats, including on the UNO campus, online via the internet, and in partner locations (when applicable).

Total Credits		30

EMIT 8000 MANAGING & LEADING IN A DIGITAL WORLD (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to the challenges and opportunities of managing and leading in a digital world within the context of a dynamic environment of technology workforce diversity, a global and emerging collaborative economy, and concern for ethics and social responsibility in the development of systems/technologies.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8050 IT LEADERSHIP (2 credits)

This course equips students with the knowledge, skills and tools to be an effective information technology (IT) leader. The primary focus of the course is on developing leadership capability and ability to contribute, both strategically and operationally, to the performance of an organization through IT.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8100 IT STRATEGY AND CHANGE MANAGEMENT (2 credits)

This course introduces students to a critical view of both strategic and tactical levels of IT management. The course also addresses the challenges of managing IT-enabled change and the complexities associated with managing people, processes, and technology.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program is required. Not open to non-degree graduate students.

EMIT 8150 BIG DATA ANALYTICS AND VIZUALIZATION (2 credits)

This course introduces students to data analytics including big data analytics, data quality, and visualization. Topics will include concepts, exercises, tools and techniques surrounding data analytics, quality, visualization, IoT and cloud computing within the context of addressing business challenges and/or to create competitive advantage.

Prerequisite(s)/Corequisite(s): This course is intended exclusively for IT professionals in the EMIT program. Not open to non-degree graduate students.

EMIT 8200 MANAGING INFORMATION TECHNOLOGY INNOVATION (2 credits)

This course introduces students to the concepts, applications and tools for facilitating IT Innovation, Creativity, Entrepreneurship and Risk Taking.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8250 MANAGING INFORMATION ASSURANCE (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to information assurance topics including areas such as managing cloud and mobile security, IT governance and policy, and information assurance planning and deployment.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8300 SYSTEMS DEVELOPMENT AND MAINTENANCE (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to the development and maintenance of software-intensive systems.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8350 ENTERPRISE COMPUTING IN THE ERA OF BIG DATA (2 credits)

This course explores design, managerial and technical issues relevant to creating big data based solutions from a holistic viewpoint. Students will develop an understanding of both the technical and business aspects by exploring a balanced view of the theoretical foundation and practical implications of Enterprise Computing in the context of Big Data and other related (emerging) technologies.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8400 LEADING TEAMS AND MANAGING VIRTUAL WORK (2 credits)

This course introduces students in the Executive Master of Science in Information Technology (EMIT) program to fundamental concepts, principles, theories, and practices related to organizational teamwork. Students will learn and practice skills to run productive & effective collaborative problem solving efforts, using modern collaboration technology.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8450 EVALUATION OF ENTERPRISE I.T. (2 credits)

This course introduces students to concepts associated with evaluation of enterprise IT investments. Topics addressed will include understanding financial statements, IT investment value vs risk tradeoffs, understanding cost of adopting IT innovations and/or emerging technologies, designing reports, designing of IT-KPIs, performance measurement systems such as balanced scorecard and more.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8500 MANAGING AND LEVERAGING EMERGING TECHNOLOGIES (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to industry models and processes to identify, track, pilot and eventually adopt business innovations and/or emerging technologies that could provide an advantage for a business. Students will also learn how IT can facilitate business process change. Concepts and exercises surrounding Lean IT will be covered to optimize the processes in the IT organization.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8700 EMERGING CHALLENGES FOR IT EXECUTIVES (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to emerging challenges that will be faced by IT executives.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8990 INTEGRATED EMIT CAPSTONE PROJECT (2-6 credits)

This course serves as the integrated capstone project for the Executive Master of Science in Information Technology (EMIT) program.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program and completion of all cohort modules prior to submission of integrated project. Concurrent enrollment with other EMIT modules will be required. Not open to non-degree graduate students.

Information Technology, PhD

College of Information, Science & Technology

Vision Statement

The PhD program in Information Technology at the University of Nebraska Omaha (UNO) is a research-intensive, multidisciplinary program focused around the core areas of computer science, management information systems and interdisciplinary informatics.

Program Contact Information

Brian Dorn, PhD, Graduate Program Chair (GPC)
174E Peter Kiewit Institute (PKI)

bdorn@unomaha.edu

Program Website (<http://phd.ist.unomaha.edu/>)

Other Program Related Information

Student Learning Outcomes

Upon completion of a PhD in Information Technology:

- Students will be able to interpret and synthesize research literature from multiple areas of the IT discipline.
- Students will be able to identify open research questions and design appropriate approaches to investigate them.
- Students will demonstrate the ability to contribute to scholarly literature.
- Students will be able to effectively engage students in learning about IT content.

Admissions

Applicants with an earned undergraduate or graduate degree in a computing discipline (e.g., computer science, management information systems, bioinformatics, cybersecurity or a closely related discipline) can apply for admission to the PhD program. Applicants whose prior degrees are outside of a computing discipline are encouraged to discuss their interests with the program director prior to application.

Admission decisions are based on a holistic review of application materials by the College of IS&T's Doctoral Program Committee (DPC). During this review process the committee is looking for candidates that demonstrate:

- **Technical Interest.** Our program is a PhD in information technology. As such, you will be expected to demonstrate an interest and aptitude in technology that fits with the nature of our program.
- **Prior Experience with Research.** A PhD is fundamentally a research degree. Highlight your involvement in existing research projects, thesis work, and/or publications. Be specific about the roles you played in various projects in your statement of purpose and seek reference letters from those who can speak to your research experience and potential.
- **Alignment with UNO Faculty Expertise.** Alignment of your research interests with the expertise of graduate faculty in the College of IS&T is an important consideration during admissions in order to ensure successful applicants will have access to appropriate research mentors from the start of the program. Review IS&T faculty profiles on the web, identify specific research areas that interest you in your statement of purpose, and explicitly mention faculty names with whom you see a good match. Feel free to reach out via email to our faculty prior to submitting your application to discuss your interest.
- **Independence and Initiative.** A PhD is largely self-motivated and self-directed work. As such, successful PhD applicants should demonstrate a history of taking the initiative to perform beyond expectations and work independently.
- **Proficiency in Written and Verbal English Communication.** The ability to read, comprehend and write scholarly papers is key to success as a doctoral student.

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022 and Fall 2022)

- Fall: January 15
- Spring: September 15

NOTE: All materials, including recommendation letters, transcripts, and applicable test scores, must be received by the application deadline. Applications which are incomplete after the published deadline will not be reviewed.

Other Requirements

- **Entrance Exam:** Graduate Record Examination (GRE) scores are required for most applicants but are only one component of a holistic admission decision. Successful applicants have typically had GRE scores of 150 verbal and 160 quantitative or better. The GRE requirement may be waived for exceptional applicants subject to the GRE waiver procedures documented below.
 - The GRE may be automatically waived for applicants holding a master's degree from an accredited US institution provided that (1) the degree is in a computing discipline and (2) that the graduate GPA for that degree is 3.3 or higher.
 - A GRE waiver may also be *requested* for candidates meeting one or more of the conditions below.
 - Those who hold a bachelor's degree in a computing discipline from an accredited US institution with a GPA of 3.6 or higher.
 - Those with a minimum of 5 years of professional experience in the IT industry in the United States.
 - Those with a history of high-quality, peer-reviewed publications in an IT field who have made significant contributions to the authorship of those papers.
 - GRE waiver requests must be submitted to the Doctoral Program Committee Chair using the form located on the program website along with supporting documentation. Requests must be received at least 1 month prior to the published application deadline for the applicable term. Note that eligibility to apply for a GRE waiver does not guarantee it will be granted, and waivers will only be approved by the DPC in cases where the candidate's record permits an evaluation of their research potential without reference to GRE scores.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 577, Internet-based TOEFL: 90, IELTS: 7.0, PTE: 61, Duolingo: 110
- **Statement of Purpose:** A written statement (not to exceed two single-spaced pages) which addresses the following:
 - How is a PhD in IT going to advance your career?
 - Why is UNO the right place for you to pursue doctoral studies?
 - In answering the questions above the statement should:
 - Describe your research interests and how they align with the work of current IS&T faculty members.
 - Describe any relevant technical knowledge/skills or professional experiences that relate to the research you hope to conduct in IT.

- Describe your prior research experiences. If you have participated in collaborative research, what was your role on those projects?
- Lastly, if you have included optional supporting materials as part of your application, explain them.
- **Current resume or CV:** In addition to listing prior academic accomplishments and professional positions, please include complete citations for all prior authored academic publications if applicable.
- **Letters of Recommendation:** Three letters of recommendation are required. The best recommendation letters are from those who can give an in-depth evaluation of your strengths and weaknesses with respect to academic work.
 - We strongly recommend that at least one letter writer be able to speak directly about your prior research experiences.
 - Letters must be submitted directly to the application system by the letter writers. The DPC reserves the right to verify the content of recommendation letters with their authors.
- **Transcripts:** Transcripts from all higher-education institutions previously attended. Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
 - *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.
- **Optional Supporting Materials:** Applicants are encouraged to include a PDF portfolio of supporting materials that may provide additional evidence of research potential. This may include:
 - Copies of academic papers, publications, theses or project reports done in an academic or industrial setting
 - Documentation of technical accomplishments like a portfolio of significant software development projects
 - Documentation of certifications or other forms of micro-credentials not otherwise reflected on transcripts
 - Other materials you would like to share with the committee

Admission Process and Timeline

Eligible students who request a GRE waiver must do so no later than one month prior to the published program application deadline for the term. These requests will be reviewed by the DPC, and applicants will be notified via email of the GRE waiver outcome prior to the admission deadline.

Following the admission deadline, the DPC will begin review of all complete applications. It is the applicant's responsibility to ensure all materials are available for review (including reference letters, transcripts, and others supporting materials) in the admission system by the deadline. Incomplete applications will not be considered by the committee.

Candidates identified for further consideration may be invited by the committee to take part in an interview with a small group of faculty to learn more. These interviews are usually conducted within 4-8 weeks following

the application deadline. Final admission decisions are usually made within 2-3 weeks following those interviews.

Degree Requirements

Coursework

The PhD in IT program requires 90 credit hours of graduate-level studies. The coursework taken by a student is entered into a plan of study that must be approved by the doctoral program committee before the beginning of the PhD student's second year of studies. The coursework consists of foundation courses, doctoral seminar and colloquia, a major field of study, and the dissertation. General rules applying to all plans of study include:

- Undergraduate course credits taken at UNO or another institution cannot be counted toward the PhD degree in IT.
- Dual-listed undergraduate courses ending in 8xx5 cannot be counted as course credits in the PhD program.
- Only three courses ending in 8xx6 are allowed outside the Foundation Course section of a plan of study.
- Graduate internship credit (CSCI 8950, ISQA 8910, CYBR 8910, or equivalent) may not be used in a doctoral plan of study.
- A maximum of three directed study type courses may be counted in the plan of study, including CIST 9970, CIST 9980, masters-level independent study courses, or other equivalents.

The different categories of credit-hour requirements for the program are outlined below.

Foundation Courses 24 credit hours

Foundation courses constitute any of the courses offered in the master's degree in an IT-related field (e.g.: computer science, management information systems, cybersecurity, IT innovation).

Credit for graduate IT-related coursework in a prior degree may only be used to satisfy foundation course hours in the plan of study. A grade of B- or better is required in all coursework from a prior degree applied to foundation requirements, and thesis, thesis-equivalent project, independent study credits, or their equivalents from a prior degree may not be counted towards foundation requirements.

Core Courses 12 credit hours

Code	Title	Credits
CIST 9080	RESEARCH DIRECTIONS IN I.T.	3
CIST 9040	COLLOQUIUM ON IT RESEARCH	1
CIST 9050	COLLOQUIUM ON IT TEACHING	1
CIST 9060	COLLOQUIUM ON IT PROFESSION AND ETHICS	1

A Graduate-Level Research Methods Course, selected from

ISQA 9150	RESEARCH IN INFORMATION TECHNOLOGY	
ITIN 9300	SOCIAL COMPUTING AND ITS APPLICATIONS	

or a concentration-designated research methods course for students in a concentration

or an alternate course with faculty advisor and DPC approval (8xx0 or 9xxx level only)

A Graduate-Level Statistics Course, selected from

ISQA 8160	APPLIED DISTRIBUTION FREE STATISTICS	3
ISQA 8340	APPLIED REGRESSION ANALYSIS	
ISQA 9130	APPLIED MULTIVARIATE ANALYSIS	

or an alternate course with faculty advisor and DPC approval
(8xx0 or 9xxx level only)

Total Credits**12****Major Field of Study 18 credit hours**

Coursework in the major field of study provides students the advanced study needed to develop an in-depth knowledge of their chosen field of research. For students who have indicated a concentration within their PhD in IT plan of study, this comprises the concentration credit hours. At least three courses (9 hours) must be in 9000-level courses. The remaining courses should include at least one 8000-level graduate-only course.

Electives 12 credit hours

Selected in consultation with your faculty advisor.

Dissertation 24 credit hours**90 Total credit hours****Comprehensive Examination & Admission to Candidacy**

Comprehensive exams will typically be scheduled around the middle of the fall and spring semester, as needed. Students intending to take comprehensive exams must apply to do so at least one semester prior to the term in which they plan to take the exam. Comprehensive exams may not be taken without an approved plan of study in place and the student has completed all core coursework in the plan. Typically, the comprehensive exam will be administered between the fourth and sixth semesters of study in the PhD program (not including summers).

Comprehensive exams consist of three parts. Parts one and two must be completed within the same week, but may be scheduled on non-consecutive days.

- **Part 1: Written Breadth Examination (one day)**
 - When applying for the comprehensive examination, the student will select two areas-of-interest on which to be tested from the list of available breadth examination areas published on the PhD in IT program website. Each area will specify a reading list of publications from which the student should prepare. Reading lists may be updated by faculty annually and must be updated after three years. Lists to be used in breadth exams the subsequent academic year will be posted online in April. Graduate faculty members responsible for each selected area of interest will prepare two essay style questions to be answered based on the published reading list.
 - Student responses to the breadth questions will be assessed by at least two graduate faculty members from each corresponding area of interest, excluding the student's direct faculty advisor.
- **Part 2: Written Depth Examination (one day)**
 - When applying for the exam, students without an approved dissertation committee must name a depth examining committee. This committee shall consist of the student's faculty advisor and at least two graduate faculty members from IS&T with relevant expertise in the student's intended area of research. For students with an approved dissertation committee on file, that committee will serve in this capacity.
 - The student and their faculty advisor will prepare a personal reading list of publications aligned with the student's intended dissertation research specialization. This reading list should be finalized no later than when the student applies to take the comprehensive exam.
 - The faculty advisor, in consultation with other depth examining committee members, will prepare a minimum of two essay questions that assess the student's depth of knowledge in their individual research trajectory.

- Responses to depth questions will be assessed by the student's depth examining committee members.

- **Part 3: Oral Examination**

- Prior to taking either part of the written exam, the student will prepare and submit a research pre-proposal about their intended dissertation focus to their depth examining committee members. Details about the structure and content of the pre-proposal can be found on the IT PhD program website.
- Within two weeks of being notified of a passing result on parts one and two of the comprehensive examination, the student will give a brief presentation (approximately 20 minutes) of their research pre-proposal to their depth examining committee members, followed by a question and answer period.
- Students receiving a failing result on either part one or two of the exam may not proceed to the oral examination.

Faculty members assessing the different components of the exams will be responsible for communicating a strictly pass/fail result to the DPC. A student may not be asked to revise any part of their examination after submission. Should the student fail one or more part of the comprehensive exam, they may be allowed to re-take it during the following academic term upon specific recommendation by the DPC. For students who fail only one area of the breadth exam, retaking only the deficient area will be required with appropriate adjustments for breadth exam time limits. However, a student may only attempt comprehensive exams a maximum of two times.

Upon successfully completing all three parts of the comprehensive examination and meeting the general residency requirements outlined in the Graduate Catalog, the student will advance to candidacy and should file the necessary paperwork with graduate studies.

Dissertation**Dissertation Committee**

Students must establish their full dissertation committee no later than the end of the semester when they complete their comprehensive examination.

Makeup of the dissertation committee is subject to general Graduate College rules governing dissertation committees. For purposes of the information technology program, all graduate faculty members in the College of Information Science & Technology are considered internal to the student's academic program.

Dissertation Credits

The dissertation of a PhD candidate is supervised by the chair or co-chairs of the student's dissertation committee in consultation with other members of the committee. While working on his or her dissertation, the candidate should take hours for the course CIST 9990. A minimum of 24 hours of this course is required for graduation. Dissertation course credits should be taken only after the PhD student has passed all elements of the comprehensive exam and advances to candidacy.

IMPORTANT NOTE: A minimum of seven months must elapse between the date of the PhD student's advancement to candidacy and the date of his or her dissertation defense.

Dissertation Proposal

Students must formally propose their dissertation to their approved dissertation committee. A written proposal should be prepared under the guidance of the dissertation committee, and a public oral defense of the proposal should be scheduled with the committee members allowing for sufficient time to review the written document. The result of the proposal defense should be recorded on the appropriate form by the dissertation committee and submitted to DPC. To ensure timely progress in the program, the proposal milestone should be completed no later than when students have accumulated 12 hours of CIST 9900.

Scheduling Dissertation Defense

When the dissertation committee deems it appropriate for the PhD candidate to defend his or her dissertation, the PhD candidate should prepare a dissertation and submit it to the dissertation committee members. While submitting the dissertation to the dissertation committee, the candidate should also submit a final oral exam form to the Office of Graduate Studies. The final oral exam form requires the signatures of the dissertation committee members and the doctoral program committee chair, and should be submitted at least four weeks before the desired date of the public dissertation defense. Dissertation committee members should sign this form after receiving the final draft of the dissertation.

IMPORTANT NOTE: Before scheduling the dissertation defense, the student should refer to the Office of Graduate Studies website and/or the current Graduate Catalog for the graduation checklist, dissertation filing deadlines and commencement dates for the semester in which they plan to graduate. Be sure to apply to graduate in MavLINK prior to the deadline.

Teaching Requirement

All PhD students are required to teach at least ONE course as the instructor of record while studying in the program. Students typically will complete this requirement in their second or third year of studies. Further information about qualifications, timing, and funding related to teaching assignments can be found on the program website.

Other elective courses may be selected with the by approval of the student's supervisory committee

Academic Performance

Progress Report

Every doctoral student (full time or part time) and must complete an annual Progress Report in consultation with their faculty advisor. These forms must be submitted for review by the Doctoral Program Committee to assess the student's progress in the program and track program level Student Learning Outcomes. Students will report on their completion of program milestones, outcomes of teaching assignments, and publications or measures of scholarly output. An electronic copy of the current form is available on the IT PhD program website.

The DPC will review progress reports and provide the student and their faculty advisor with a written assessment of progress. Any items of concern identified in this written assessment should be addressed in a timely manner by the student and their faculty advisor to ensure continued satisfactory progress in the program. If the DPC deems progress as not satisfactory, the student will be placed on probationary status and the student will be ineligible for funding as a graduate assistant. Students placed on probation must complete an additional progress report in

the next semester updating DPC of their progress. After one semester on probation, a student whose performance has not improved will be recommended for dismissal by the Graduate College.

If student progress reports are not completed by the specified deadline, an advising hold will be placed on the student record and the student will be contacted and given an opportunity to submit the progress report within five days of being notified. If no progress report is received, the student's progress will be considered unsatisfactory and they may lose their funding and be counseled out of the PhD program.

CIST 9040 COLLOQUIUM ON IT RESEARCH (1 credit)

The purpose of the course is to provide a forum for interaction among doctoral students and faculty on topics of relevance to professional success as researchers. Topics to be discussed include: nature of research in information technology; research problem selection, development, and presentation with special emphasis on the doctoral dissertation; dissertation process; development and crafting of papers for journals; collaboration on research projects; and review process for journal papers. **Prerequisite(s)/Corequisite(s):** Admission to PhD program in Information Technology or permission of instructor.

CIST 9050 COLLOQUIUM ON IT TEACHING (1 credit)

The purpose of the course is to provide a forum for interaction among doctoral student and faculty on topics of relevance to professional success as teachers/educators in university settings. Topics to be discussed include: issues and challenges of teaching; getting started in teaching; course preparation; teaching methods; assessment of students; on-going course development; diversity in the classroom; use of technology in teaching including online education; and developing and maintaining a teaching portfolio.

Prerequisite(s)/Corequisite(s): Doctoral students in Information Technology and Biomedical informatics. Students from doctoral programs across the University of Nebraska are welcome to register with permission of instructor. Not open to non-degree graduate students.

CIST 9060 COLLOQUIUM ON IT PROFESSION AND ETHICS (1 credit)

The purpose of this course is to provide a forum for interaction among doctoral students and faculty on topics of relevance to professional success as members of the academy. Some of the topics to be discussed will include: ethics and professional code of conduct; strategies for dealing with academic dishonesty/plagiarism; academic and professional organizations in the IT profession (e.g., IEEE, ACM, AIS, PMI, AITP); challenges of human subjects research; developing survival skills: balancing service, teaching and research, etc.; career development and progression; and role and nature of local, national, and international service.

Prerequisite(s)/Corequisite(s): Any IS&T PhD student is eligible to attend; other Doctoral students can attend with permission of instructor. Not open to non-degree graduate students.

CIST 9080 RESEARCH DIRECTIONS IN I.T. (3 credits)

The purpose of this course is to provide a forum for interaction among doctoral students and faculty on topics of relevance to IT research and make them familiar with current and future research directions in IT. Students will examine what constitutes a research contribution, gain hands-on experience with directed research, and explore the breadth of sub-disciplines within IT research.

Prerequisite(s)/Corequisite(s): Doctoral standing in Information Technology or permission of course coordinators. Not open to non-degree graduate students.

CIST 9100 SEMINAR ON READINGS IN IT (1 credit)

Seminar focused on IT literature within a topic area aligned with PhD in IT concentrations, providing opportunity for in-depth review and discussion of materials in the concentration reading list. Provides exposure to current topics, research methods, and professional practice for the concentration.

Prerequisite(s)/Corequisite(s): Open to all currently admitted PhD students and other graduate students by instructor permission. May be repeated up to 3 times for credit in Major Field of Study, and up to 3 times as an elective.

CIST 9900 SPECIAL TOPICS IN INFORMATION TECHNOLOGY (1-3 credits)

This course is designed to acquaint students with issues which are current to the field or emerging trends in the information technology area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s)/Corequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular topic offerings.

CIST 9970 RESEARCH OTHER THAN THESIS (1-3 credits)

This is a directed research course enabling students to pursue a research topic individually under the direction of a graduate faculty member. Research problems should help introduce students to practical research methods in the field of computing, and they should be framed in such a way to enable the student to complete the work in the course of one semester.

Prerequisite(s)/Corequisite(s): Requires instructor permission. Only open to doctoral students in the IT PhD program. Course cannot be taken for credit after candidacy nor count towards core/major field of study requirements in the IT PhD. Not open to non-degree graduate students.

CIST 9980 INDEPENDENT STUDY IN INFORMATION TECHNOLOGY (1-3 credits)

This course allows students to research a topic of their interest that is not available in a formal course. The topic to be studied must be agreed upon by the student and the instructor.

Prerequisite(s)/Corequisite(s): Permission of the instructor. Not open to non-degree graduate students.

CIST 9990 DISSERTATION (1-12 credits)

The dissertation is an original research project conducted and written under the direction of a faculty supervisory committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge in information systems and/or information technology.

Prerequisite(s)/Corequisite(s): Admission to the Ph.D. program in Information Technology. Admission to candidacy for the Ph.D. degree. Prior to enrolling for dissertation hours, the students must have permission of the supervisory committee. Not open to non-degree graduate students.

CSCI 8000 ADVANCED CONCEPTS IN PROGRAMMING LANGUAGES (3 credits)

Logic/Declarative programming is an important programming paradigm in which problems are described in terms of the properties they possess. As a result, in this style of programming many algorithmic elements, which explicitly must be articulated when writing programs in other programming languages, can be omitted. Core elements of logic programming play important roles in AI.

Prerequisite(s)/Corequisite(s): CSCI 3320; CSCI 3660; CSCI 4220. Not open to non-degree graduate students.

CSCI 8010 FOUNDATIONS OF COMPUTER SCIENCE (3 credits)

This is a foundational course for students enrolled in the graduate program in computer science. The objectives are to introduce students to a large body of concepts so that they are better prepared for undertaking the core courses in the graduate program. It is assumed that student would have programmed in a high-level language and have exposure to basic college level mathematical concepts such as logarithms, exponents, sequences, and counting principles.

Prerequisite(s)/Corequisite(s): Students are expected to have written programs using a high-level programming language and should understand basic mathematical concepts including exponents, logarithms, sequences, and counting principles. Not open to non-degree graduate students.

CSCI 8016 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with MATH 4010, MATH 8016, CSCI 4010).

Prerequisite(s)/Corequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

CSCI 8040 LARGE SCALE NETWORK ANALYSIS ALGORITHMS (3 credits)

The course will provide a review of the properties of large complex network systems, such as those occurring in social networks, epidemiology and biological systems. We will discuss algorithms to analyze these properties, their implementations, their stability under information fluctuation and how information spreads through networks.

Prerequisite(s)/Corequisite(s): Students should be comfortable w/ programming, have knowledge of data structures, preliminary graph algorithms, & linear algebra. Suggest Prep Courses: CSCI 4150 or CSCI 8156; CSCI 3320; MATH 4050 or Permission. Not open to non-degree graduate students.

CSCI 8050 ALGORITHMIC GRAPH THEORY (3 credits)

Review of the basic concepts of graph theory. Introduction to perfect graphs and their characterizations. Main classes of perfect graphs and their properties. Algorithms for main problems of perfect graphs. Applications of perfect graphs in several fields such as scheduling, VLSI and communication networks. (Cross-listed with MATH 8050).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and MATH 4150 or MATH 8156 or permission of instructor. Not open to non-degree graduate students.

CSCI 8060 ALGORITHMIC COMBINATORICS (3 credits)

This course includes classical combinatorial analysis graph theory, trees, network flow, matching theory, external problems, and block designs. (Cross-listed with MATH 8060).

Prerequisite(s)/Corequisite(s): MATH 3100, CSCI 3100, MATH 8105 or CSCI 8105 or instructor's permission.

CSCI 8080 DESIGN AND ANALYSIS OF ALGORITHMS (3 credits)

The course provides students an understanding of advanced topics in algorithms. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, dynamic programming, greedy algorithms, graph algorithms, and the theory of NP-Completeness. (Cross-listed with MATH 8080).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 or equivalent. Not open to non-degree graduate students.

CSCI 8100 EXPERT SYSTEMS (3 credits)

A study of the theoretical basis and practical design of expert systems. Knowledge engineering. Foundations in logic programming, the architecture of expert systems, languages (Prolog, LISP) for expert systems, expert system shells, knowledge acquisition, current issues.

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456 or equivalent. Not open to non-degree graduate students.

CSCI 8105 APPLIED COMBINATORICS (3 credits)

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with MATH 8105, MATH 3100, CSCI 3100).

CSCI 8110 ADVANCED TOPICS IN ARTIFICIAL INTELLIGENCE (3 credits)

An in-depth study of one or more topics selected from: search techniques, knowledge representation, knowledge programming, parallel processing in Artificial Intelligence, natural language processing, image processing, current and future directions, etc. May be repeated with different topics, with permission of adviser.

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456 or equivalent.

CSCI 8150 ADVANCED COMPUTER ARCHITECTURE (3 credits)

Various parallel architectures, models of parallel computation, processor arrays, multiprocessor systems, pipelined and vector processors, dataflow computers and systolic array structures.

Prerequisite(s)/Corequisite(s): CSCI 4350, CSCI 4500 and graduate. Not open to non-degree graduate students.

CSCI 8156 GRAPH THEORY & APPLICATIONS (3 credits)

Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 4150, MATH 4150, MATH 8156).

Prerequisite(s)/Corequisite(s): MATH 2030 or permission of instructor.

CSCI 8160 INTRODUCTION TO VLSI DESIGN (3 credits)

Introduction to the principle concepts of integrated circuit layout. Presentation of the hardware foundations, algorithmic mathematical and graph theoretical foundations of circuit layout. Partitioning problems in integrated circuits. Placement and floor planning phase in layout. Routing algorithms and compaction techniques. Applications of graph theory in several steps of the design process of VLSI circuits.

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and CSCI 4350 or CSCI 8356. Not open to non-degree graduate students.

CSCI 8170 VLSI TESTING (3 credits)

This course covers topics in VLSI testing. In particular, topics covered include fault modeling, fault simulation, test generation, testability profiles, built-in tests, and binary decision diagrams.

Prerequisite(s)/Corequisite(s): Bachelors degree and permission from the Graduate Program Committee; CSCI 4350. Not open to non-degree graduate students.

CSCI 8200 INTERCONNECTION NETWORKS (3 credits)

This course is to introduce the technology of interconnection networks from topology of networks, through routing and flow control, to a discussion of hardware/software fault tolerance, and to understand parameters affecting performance.

Prerequisite(s)/Corequisite(s): Bachelors degree and permission from the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8210 ADVANCED COMMUNICATIONS NETWORKS (3 credits)

Advanced study of communication networks, analysis of communication needs, special problems encountered in different types of networks, efficiency and traffic analysis and emerging hardware software technologies. Detailed "hands-on" study of the TCP/IP networking protocols.

Prerequisite(s)/Corequisite(s): CSCI 3550 or 8555 or equivalent. Not open to non-degree graduate students.

CSCI 8256 HUMAN COMPUTER INTERACTION (3 credits)

Human computer interaction is concerned with the joint performance of tasks by humans and machines; human capabilities to use machines (including learnability of interfaces); algorithms and programming of the interface; engineering concerns that arise in designing and building interfaces; the process of specification, design, and implementation of interfaces; and design trade-offs. (Cross-listed with CSCI 4250).

CSCI 8266 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, ITIN 4260, ITIN 8266).

CSCI 8300 IMAGE PROCESSING AND COMPUTER VISION (3 credits)

This course introduces the computer system structures and programming methodologies for digital image processing and computer vision. The course will cover the mathematical models of digital image formation, image representation, image enhancement and image understanding. Techniques for edge detection, region growing, segmentation, two-dimensional and three-dimensional description of object shapes will be discussed. The course will concentrate on the study of knowledge-based approaches for computer interpretation and classification of natural and man-made scenes and objects.

Prerequisite(s)/Corequisite(s): CSCI 1620 and CSCI 3220. Not open to non-degree graduate students.

CSCI 8305 NUMERICAL METHODS (3 credits)

This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 3300, MATH 3300, MATH 8305).

Prerequisite(s)/Corequisite(s): MATH 1960 with a C- or better or permission of instructor

CSCI 8306 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, MATH 4300, MATH 8306).

Prerequisite(s)/Corequisite(s): MATH 2050 with a C- or better or permission of instructor.

CSCI 8316 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, MATH 4310, MATH 8316).

Prerequisite(s)/Corequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

CSCI 8325 DATA STRUCTURES (3 credits)

This is a core that will cover a number of data structures such as tree, hashing, priority queues and graphs as well as different algorithm design methods by examining common problem-solving techniques. (Cross-listed with CSCI 3320)

CSCI 8340 DATABASE MANAGEMENT SYSTEMS II (3 credits)

A continuation of the study of Data Base Management Systems. Extended discussion of logical data base design, normalization theory, query optimization, concurrent issues. Advanced topics including distributed data bases, deductive data bases, data base machine, and others.

Prerequisite(s)/Corequisite(s): CSCI 8856 or equivalent. Not open to non-degree graduate students.

CSCI 8350 DATA WAREHOUSING AND DATA MINING (3 credits)

Covers topics related to decision support queries. In particular, topics covered include building data warehouses, On-Line Analysis Processing (OLAP), maintenance of materialized views, indexing, various data mining techniques, and integration of OLAP and data mining.

Prerequisite(s)/Corequisite(s): CSCI 8856; bachelors degree and permission from Graduate Committee. Not open to non-degree graduate students.

CSCI 8360 MACHINE LEARNING FOR TEXT (3 credits)

This course focuses on the fundamental techniques for extraction of various insights from text data which is ubiquitous on the Web, social media sites, emails, news articles, digital libraries, and other sources. The course topics will include concepts and techniques used by search engines to crawl, index, and rank web pages on the Web, machine learning techniques for categorization of news articles into different categories, sentiment and opinion analysis of social media chats, text summarization, and information extraction.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

CSCI 8366 FOUNDATIONS OF CYBERSECURITY (3 credits)

Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 4360, CYBR 8366)

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CSCI 8390 ADVANCED TOPICS IN DATA BASE MANAGEMENT (3 credits)

An in-depth study of one or more topics in the field of Data Base Management Systems, such as logical and/or physical data base design, query optimization, distributed data bases, intelligent knowledge-based systems, emerging technologies and applications. May be repeated with different topics with permission of adviser.

Prerequisite(s)/Corequisite(s): CSCI 4850 or CSCI 8856 or equivalent. Not open to non-degree graduate students.

CSCI 8400 ADVANCED COMPUTER GRAPHICS (3 credits)

Computer graphics continues to play an important role in computer science. This course covers the mathematical foundations of three-dimensional representation and animation; ray tracing and path tracing rendering methods; using the graphical processing unit (GPU) for real time applications; and concludes with simulation of natural phenomenon.

Prerequisite(s)/Corequisite(s): Bachelors degree or permission from the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8410 DISTRIBUTED SYSTEMS AND NETWORK SECURITY (3 credits)

The course aims at understanding the issues surrounding data security, integrity, confidentiality and availability in distributed systems. Further, we will discuss various network security issues, threats that exist and strategies to mitigate them. This course will cover topics in cryptography, public key infrastructure, authentication, hashing, digital signatures, ARP protection, IP and IPSEC, IP Tables, SSL/TLS, firewalls, etc. (Cross-listed with CYBR 8410)

Prerequisite(s)/Corequisite(s): CSCI 8366 or equivalent(s). Not open to non-degree graduate students.

CSCI 8420 SOFTWARE ASSURANCE (3 credits)

Software assurance is a reasoned, auditable argument created to support the belief that the software will operate as expected. This course is an intersection of knowledge areas necessary to perform engineering activities or aspects of activities relevant for promoting software assurance. This course takes on a software development lifecycle perspective for the prevention of flaws. (Cross-listed with CYBR 8420)

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836 OR by permission of the Instructor. Not open to non-degree graduate students.

CSCI 8430 TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT (3 credits)

This course examines in detail: the principles of a security architecture, access control, policy and the threat of malicious code; the considerations of trusted system implementation to include hardware security mechanisms, security models, security kernels, and architectural alternatives; the related assurance measures associated with trusted systems to include documentation, formal specification and verification, and testing, and approaches that extend the trusted system, into applications and databases and into networks and distributed systems.

Prerequisite(s)/Corequisite(s): CSCI 8366 or equivalents, or instructor permission. Not open to non-degree graduate students.

CSCI 8440 SECURE SYSTEMS ENGINEERING (3 credits)

This course takes a global risk-based view of the process of defining, verifying, validating and continuously monitoring secure information systems. The course will investigate a number of secure system solutions, starting with the definition of the system security needs, and tracing through methods of verification and validation of security controls, as well as ways to continuously monitor the corresponding assurances. (Cross-listed with CYBR 8440)

Prerequisite(s)/Corequisite(s): CSCI 8366 or IASC 8366

CSCI 8446 INTRODUCTION TO PARALLEL COMPUTING (3 credits)

Need for higher-performance computers. Topics discussed include: classification of parallel computers; shared-memory versus message passing matchings; for ms of parallelism, measure of performance; designing parallel algorithms; parallel programming and parallel languages; synchronization constructs; and operating systems for parallel computers. (Cross-listed with CSCI 4440)

Prerequisite(s)/Corequisite(s): CSCI 4500 or CSCI 8506 (May be taken concurrently). Not open to non-degree graduate students.

CSCI 8450 ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING (3 credits)

The course will provide in depth study of the topics in natural language processing and understanding, such as syntax, lexical and computational semantics, natural language ambiguities and their disambiguation, logical form construction and inference. The course will survey state-of-the-art natural language processing toolkits and knowledge bases that boost the development of modern language processing and understanding applications.

Prerequisite(s)/Corequisite(s): CSCI 3320 OR CSCI 3660 OR CSCI 4450. Not open to non-degree graduate students.

CSCI 8456 INTRODUCTION TO ARTIFICIAL INTELLIGENCE (3 credits)

An introduction to artificial intelligence. The course will cover topics such as machine problem solving, uninformed and informed searching, propositional logic, first order logic, approximate reasoning using Bayesian networks, temporal reasoning, planning under uncertainty and machine learning. (Cross-listed with CSCI 4450).

CSCI 8476 PATTERN RECOGNITION (3 credits)

Structures and problems of pattern recognition. Mathematics model of statistical pattern recognition, multivariate probability, Bay's decision theory, maximum likelihood estimation, whitening transformations. Parametric and non-parametric techniques, linear discriminant function, gradient-descent procedure, clustering and unsupervised learning, and feature selection algorithms. (Cross-listed with CSCI 4470)

Prerequisite(s)/Corequisite(s): CSCI 1620 with C- or better, and MATH 2050. Recommended: MATH 4740/8746 or STAT 3800/8805.

CSCI 8480 MULTI-AGENT SYSTEMS AND GAME THEORY (3 credits)

This course covers advanced topics in the area of coordination of distributed agent-based systems with a focus on computational aspects of game theory. The main topics covered in this course include distributed constraint satisfaction, distributed constraint optimization, and competitive and cooperative game theory. (Cross-listed with MATH 8480)

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456. Suggested background courses: CSCI 4480 or CSCI 8486; CSCI 8080. Not open to non-degree graduate students.

CSCI 8486 ALGORITHMS FOR ROBOTICS (3 credits)

This course provides an introduction to software techniques and algorithms for autonomously controlling robots using software programs called controllers. Students will be taught how to program and use software controllers on simulated as well as physical robots. (Cross-listed with CSCI 4480).

Prerequisite(s)/Corequisite(s): CSCI 3320 with C- or better. CSCI 4450/8456 is a recommended but not essential pre-requisite.

CSCI 8500 NUMERICAL LINEAR ALGEBRA (3 credits)

Topics covered in this course include error propagation, solutions of nonlinear equations, solutions of linear and nonlinear systems by various schemes, matrix norms and conditioning, and computation of eigenvalues and eigenvectors. (Cross-listed with MATH 8500).

Prerequisite(s)/Corequisite(s): MATH 1960 and MATH 2050, or permission of instructor. Familiarity with computer programming is assumed.

CSCI 8506 OPERATING SYSTEMS (3 credits)

Operating system principles. The operating system as a resource manager; I/O programming, interrupt programming and machine architecture as it relates to resource management; memory management techniques for uni-multiprogrammed systems; process description and implementation; processor management (scheduling); I/O device, controller, and channel management; file systems. Operating system implementation for large and small machines. (Cross-listed with CSCI 4500).

Prerequisite(s)/Corequisite(s): CSCI 3710, CSCI 3320/8325, MATH 1950, and CSCI 4350/8356 with C- or better.

CSCI 8510 NUMERICAL DIFFERENTIAL EQUATIONS (3 credits)

Topics covered in this course include interpolation and approximations, numerical differentiation, numerical integration, and numerical solutions of ordinary and partial differential equations. (Cross-listed with MATH 8510).

Prerequisite(s)/Corequisite(s): MATH 1970, MATH 2350, or permission of instructor. Familiarity with computer programming is assumed.

CSCI 8520 ADVANCED TOPICS IN OPERATIONS RESEARCH (3 credits)

Advanced treatment of a specific topic in the area of operations research not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with MATH 8520).

Prerequisite(s)/Corequisite(s): MATH 4300 or MATH 8306 or CSCI 4300 or CSCI 8306 or permission of the instructor.

CSCI 8530 ADVANCED OPERATING SYSTEMS (3 credits)

State of the art techniques for operating system structuring and implementation. Special purpose operating systems. Pragmatic aspects of operating system design, implementation, and use.

Prerequisite(s)/Corequisite(s): CSCI 4500/8506. Not open to nondegree students.

CSCI 8555 COMMUNICATION NETWORKS (3 credits)

This course is designed to bring students up to the state of the art in networking technologies with a focus on Internet. It will cover the principles of networking with an emphasis on protocols, implementations and design issues. (Cross-listed with CSCI 3550)

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 with C- or better. Data structures and algorithms. C or C++ programming.

CSCI 8566 NUMBER THEORY & CRYPTOGRAPHY (3 credits)

An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 4560, MATH 4560, MATH 8566).

Prerequisite(s)/Corequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

CSCI 8590 FUNDAMENTALS OF DEEP LEARNING (3 credits)

This course is an introduction to deep learning, a branch of machine learning concerned with the development and application of neural networks. Deep learning trains the machine to learn patterns that it is presented with rather than requiring the human operator to define the patterns that the machine should look for. Deep learning is behind many recent advances in artificial intelligence, such as face recognition, speech recognition and autonomous driving. This course will cover the foundations of deep learning, learning theory, basic/advanced neural networks and problem domains of many selected applications.

Prerequisite(s)/Corequisite(s): CSCI 3320 or instructor permission

CSCI 8610 FAULT TOLERANT DISTRIBUTED SYSTEMS (3 credits)

This course is to study the theory and practice of designing computer systems in the presence of faulty components. Emphasizes the basics of how faults can affect systems and what is required to mask or compensate for their efforts.

Prerequisite(s)/Corequisite(s): CSCI 4500 and CSCI 4350. Not open to non-degree graduate students.

CSCI 8620 MOBILE COMPUTING AND WIRELESS NETWORKS (3 credits)

Contemporary issues in mobile computing and wireless networks, including the differences between mobile computing and the traditional distributed computing paradigm, impediments of the mobile and wireless environments, problems and limitations due to such impediments, using the spectrum, wireless data networks, various network layers solutions, location management techniques, mobile IP, wireless LANs, wireless TCP, ad hoc networks, performance issues, security issues.

Prerequisite(s)/Corequisite(s): CSCI 3550 or CSCI 8555. Not open to non-degree graduate students.

CSCI 8626 COMPUTER GRAPHICS (3 credits)

An introduction to the acquisition, manipulation and display of graphical information using digital techniques. Topics include discussion of the various hardware devices used for input and output, the classical algorithms and data structures used in manipulation of graphical objects, the user interface to the graphics system, and applicable standards. (Cross-listed with CSCI 4620).

Prerequisite(s)/Corequisite(s): ISQA 3300 or CSCI 3320.

CSCI 8666 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)

This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, MATH 4660, MATH 8666).

Prerequisite(s)/Corequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

CSCI 8700 SOFTWARE SPECIFICATIONS AND DESIGN (3 credits)

A continuation of the study of software engineering with an emphasis on early phases of software development, namely requirements engineering/specification and architectural design. Includes an in-depth study of practices for effective software requirements specification and architectural design, as well as formal specifications of software systems. Related topics such as metrics and support tools are also covered.

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8706 COMPILER CONSTRUCTION (3 credits)

Assemblers, interpreters and compilers. Compilation of simple expressions and statements. Analysis of regular expressions. Organization of a compiler, including compile-time and run-time symbol tables, lexical scan, syntax scan, object code generation and error diagnostics. (Cross-listed with CSCI 4700).

CSCI 8710 MODERN SOFTWARE DEVELOPMENT METHODOLOGIES (3 credits)

Designed to introduce students to advanced object technology and other modern methodologies for developing software systems. Intended for graduate students who have mastered the basic concepts and issues of software engineering. Course covers advanced object-oriented software development. The course also covers several offshoots of object technology, including: component-based software engineering, aspect-oriented software development, software product line engineering, service-oriented computing, etc.

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836.

CSCI 8760 FORMAL METHODS IN SOFTWARE ENGINEERING (3 credits)

In the high consequence system domain, a primary objective of any construction technique employed is to provide sufficiently convincing evidence that the system, if put into operation, will not experience a high consequence failure or that the likelihood of such a failure falls within acceptable probabilistically defined limits. Systems for which such evidence can be provided are called high assurance systems. The objective of this course is to examine software-engineering techniques across the development life cycle that are appropriate for high assurance systems. The course will analyze the nature of the evidence provided by various techniques (e.g., does a given technique provide sufficiently strong evidence in a given setting).

Prerequisite(s)/Corequisite(s): CSCI 8000 and CSCI 8836 or CSCI 4830

CSCI 8766 TOPICS IN MODELING (3 credits)

Selection of such topics as formulation and analysis of various models involving Markov chains, Markov processes (including birth and death processes), queues, cellular automata, difference and differential equations, chaotic systems and fractal geometries. (Cross-listed with CSCI 4760).

Prerequisite(s)/Corequisite(s): MATH 2350 and MATH 4740 or MATH 8746.

CSCI 8790 ADVANCED TOPICS IN SOFTWARE ENGINEERING (3 credits)

An in-depth study of one or more topics in the field of software engineering such as human factors in software engineering, software specifications and modeling, reuse and design recovery, software valuations, software management, emerging technology and applications.

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8836 INTRODUCTION SOFTWARE ENGINEERING (3 credits)

Basic concepts and major issues of software engineering, current tools and techniques providing a basis for analyzing, designing, developing, maintaining and evaluating the system. Technical, administrative and operating issues. Privacy, security and legal issues. (Cross-listed with CSCI 4830).

CSCI 8856 DATABASE MANAGEMENT SYSTEMS (3 credits)

Basic concepts of data base management systems (DBMSs). The relational, hierarchical and network models and DBMSs which use them. Introduction to data base design. (Cross-listed with CSCI 4850).

CSCI 8876 DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS (3 credits)

This required course for undergraduate bioinformatics majors provides foundational knowledge on database aspects used in the field and an overview of their applications in bioinformatics, biomedical informatics, and health/clinical informatics. The course begins with a brief review of key concepts in computational molecular biology related to database search/development, database management systems, the difference between primary and secondary databases, and bioinformatics-related aspects of modeling and theory in computer science. The major focus is on the multiple challenges and aspects of bio-database development, search, and pattern discovery. The course uses problem-based learning to help students develop database management skills as they apply to high throughput "-omics." data, the basics of data management, data provenance and governance, standards, and analysis through KDD-based workflows. This course will also consider the fundamentals of artificial intelligence and machine learning as they pertain to bioinformatics, from the perspective of database storage, I/O, and analysis. (Cross-listed with BIOI 4870)

Prerequisite(s)/Corequisite(s): CSCI 3320 and BIOI 3500, or permission of instructor; BIOI 3500 can be taken concurrently. Prior completion of CSCI 4850 is strongly recommended but not required. Not open to non-degree graduate students.

CSCI 8910 MASTER OF SCIENCE CAPSTONE (3 credits)

The capstone course is to integrate coursework, knowledge, skills and experimental learning to enable the student to demonstrate a broad mastery of knowledge, skills, and techniques across the Master degree curriculum of Computer Science for a promise of initial employability and further career advancement. The course is designed to be in a student-centered and student-directed manner which requires the command, analysis and synthesis of knowledge and skills. Students may apply their knowledge and skill to a project which serves as an instrument of evaluation. Students are encouraged to foster an interdisciplinary research and cultivate industry alliances and cooperation in this course. This capstone course should be taken only after students have completed at least 3/4 of course requirements for the major.

Prerequisite(s)/Corequisite(s): Master's degree of Computer Science with course-only option (program III). Not open to nondegree students.

CSCI 8920 ADVANCED TOPICS COMPUTER SCIENCE (3 credits)

An in-depth study, at the graduate level, of one or more topics that are not treated in other courses. May be repeated with different topics with permission of adviser.

Prerequisite(s)/Corequisite(s): Permission of instructor; will vary with offering. Not open to non-degree graduate students.

CSCI 8950 GRADUATE INTERNSHIP IN COMPUTER SCIENCE (1-3 credits)

The purpose of this course is to provide students with opportunities to apply their academic studies in environments such as those found in business, industry, and other non-academic organizations. The student interns will sharpen their academic focus and develop better understanding of non-academic application areas.

Prerequisite(s)/Corequisite(s): Permission of the graduate program chairperson and a minimum grade point average of 3.0 (B), with at most one grade below B, but not lower than C+ for all CS graduate classes. Not open to non-degree graduate students.

CSCI 8960 THESIS EQUIVALENT PROJECT IN COMPUTER SCIENCE (1-6 credits)

This course allows a graduate student to conduct a research project in computer science or a related area. The project is expected to place an emphasis on applied, implementations-based, or experimental research. The process for development and approval of the project must include: appointment of supervisory committee (chaired by project adviser), a proposal approved by the supervisory committee, monitoring of the project by the supervisory committee, an oral examination over the completed written product conducted by the supervisory committee, and final approval by the supervisory committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines.

Prerequisite(s)/Corequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 8970 INDEPENDENT STUDY (1-3 credits)

Under this number a graduate student may pursue studies in an area that is not normally available in a formal course. The topics to be studied will be in a graduate area of computer science to be determined by the instructor.

Prerequisite(s)/Corequisite(s): Permission of the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8980 GRADUATE SEMINAR (1-3 credits)

This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques and methodologies, and/or the current research results in the fundamental areas of computer science. Topics to be covered by the course will vary in different semesters.

Prerequisite(s)/Corequisite(s): Permission of the Instructor. Not open to non-degree graduate students.

CSCI 8986 TOPICS IN COMPUTER SCIENCE (1-3 credits)

A variable topic course in computer science at the senior/graduate level. Topics not normally covered in the computer science degree program, but suitable for senior/graduate-level students. (Cross-listed with CSCI 4980).

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

CSCI 8990 THESIS (1-6 credits)

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.

Prerequisite(s)/Corequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 9210 TYPE SYSTEMS BEHIND PROGRAMMING LANGUAGES (3 credits)

Empirical evidence suggests that a large number of errors made when writing software can be detected by analyzing the behavior of the program from the perspective of type. This course provides an in-depth exploration of various type systems for programming languages.

Prerequisite(s)/Corequisite(s): CSCI 8000. Not open to non-degree graduate students.

CSCI 9220 REWRITING AND PROGRAM TRANSFORMATION (3 credits)

This course begins by exploring the foundations of term rewriting. Topics such as unification, confluence, completion and termination are covered. Then a strategic framework is considered in which the application of rewrite rules can be controlled.

Prerequisite(s)/Corequisite(s): CSCI 8000. Not open to non-degree graduate students.

CSCI 9350 MATHEMATICAL AND LOGICAL FOUNDATIONS OF DATA MINING (3 credits)

With the maturity of data mining techniques, it is extremely important to examine the foundations of data mining. Instead of providing coverage of basic data mining methods, the course will focus on methodology employed in data mining, logical and mathematical foundations of data mining, as well as other issues related to the intrinsic nature of data mining.

Prerequisite(s)/Corequisite(s): CSCI 8456, CSCI 8856, and CSCI 8390. Not open to non-degree graduate students.

CSCI 9410 ADVANCED TOPICS IN LOGIC PROGRAMMING (3 credits)

This course will examine some advanced topics in logic programming, in particular logic programming under stable model (or answer set) semantics. Answer set programming is a common name of the field. Formal syntax, semantics, and proofs of correctness for logic programs will be considered. Elements of inductive and Prolog programming will also be introduced. Each advanced topic will be followed by how it has been applied in practice. Advanced applications of logic programming will be covered in detail.

Prerequisite(s)/Corequisite(s): CSCI 8000 and doctoral student standing in Information Technology or the permission of the instructor.

CSCI 9420 INTELLIGENT AGENT SYSTEMS (3 credits)

This course covers the principles of interaction between agents in multi-agent systems using game theory. Relevant topics studied in this course include competitive games, statistical Bayesian games, cooperative games, and mechanism design. Students will have to implement projects related to the material studied in the course.

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and CSCI 4450 or CSCI 8456. Not open to non-degree graduate students.

CSCI 9710 METHODS IN SOFTWARE ENGINEERING RESEARCH (3 credits)

This course provides guidelines on how to conduct research in the field of software engineering by presenting the research methods, classic readings, and development of theories and their application to real life problems. The main emphasis of the course is to provide opportunity for in-depth study of topics such as contemporary methods for software development.

Prerequisite(s)/Corequisite(s): CSCI 8836 or equivalent course and doctoral student standing in Information Technology or permission of the instructor. Not open to non-degree graduate students.

CSCI 9810 RESEARCH FOUNDATIONS IN THEORETICAL COMPUTING (3 credits)

This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques, and methodologies, and/or the current research results in the fundamental areas of theoretic computing. The course will examine advanced research topics in computer science and engineering, including foundations of automata theory, computability, complexity analysis, computational logics and algorithmic analysis, hybrid dynamic systems theory, number theory, adaptation and learning theory, concepts and principles in computational geometry, stochastic processes, and random optimization. Each topic will be discussed with a perspective of research issues and directions. Active student participation in investigation of the research topics, survey of the current state-of-art, and identifying the future research insights is required. Students will take turn presenting their research results on specific topics. Topics to be covered by the course will vary in different semesters.

Prerequisite(s)/Corequisite(s): The prerequisites of this course vary depending on the areas to be covered in the semester the course is offered. Good standing in Ph.D. program is required. Permission of the instructor may be required. Not open to non-degree graduate students.

ISQA 8016 BUSINESS INTELLIGENCE (3 credits)

This course intends to provide graduate students in-depth exposure to the growing field of business intelligence. Business intelligence (BI) consists of the set of concepts and techniques used to analyze business data in support of decision-making and planning. BI spans a number of areas of management information systems, including Decision Support Systems (DSS), Enterprise Resource Planning (ERP), Data Warehousing, Knowledge Management, Customer Relationship Management, Data Mining, and others.

Prerequisite(s)/Corequisite(s): (ISQA 4150 or ISQA 8156) and ISQA 8040 and ISQA 8050. Not open to non-degree graduate students.

ISQA 8030 INFORMATION SYSTEMS AND ETHICS (3 credits)

This course gives you an introduction to organizations and the role that information and information systems play in supporting an organization's operations, decision-making processes, quality management, and strategic activities. The course provides an introduction to the management of information systems function, the strategic and regulatory issues of telecommunications, and ethical and legal issues related to information systems.

Prerequisite(s)/Corequisite(s): Admission into the MS in MIS program.

ISQA 8040 AN OVERVIEW OF SYSTEMS DEVELOPMENT (3 credits)

The course presents an overview of the systems development lifecycle and database development. The course will focus on theory, current tools and techniques that the system developer can use to develop and document information systems. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8050 DATA ORGANIZATION AND STORAGE (3 credits)

The course will provide concepts of data organization, data storage, and data transfer through computer networks. The performance implications of various design decisions will be explored. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8060 RESEARCH IN MIS (3 credits)

This course covers research methods and their application to the development and evaluation of management information systems. Also covered is the relationship between organization theory and IS research.

Prerequisite(s)/Corequisite(s): CIST 2500, CIST 2100, and ISQA 8040, or permission of the instructor.

ISQA 8080 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (1-5 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s)/Corequisite(s): 1) Permission of the instructor. 2) Additional prerequisite courses may be required for particular course offerings.

ISQA 8086 SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS (1-5 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ISQA 4000)

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 8106 INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION (3 credits)

This course examines the frameworks and tools used to develop an organization's information system architecture. It provides the analytical skills and conceptual frameworks with which to make recommendations and decisions regarding the integration of information technology components into an information system architecture. (Cross-listed with ISQA 4100)

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 3310

ISQA 8136 INFORMATION TECHNOLOGY FOR DEVELOPMENT (3 credits)

Information Technology for Development (ITD) is the implementation and evaluation of information technology infrastructures to stimulate economic, social and human development. In this service-learning course, students will learn and apply ITD concepts for developing and adding value through IT by working with small business entrepreneurs in Omaha or rural Nebraska. Students will evaluate micro-business technology needs, prepare business technology plans, provide training, and implement appropriate solutions, to the extent possible within a semester class. (Cross-listed with ISQA 4130)

Prerequisite(s)/Corequisite(s): Though not required, the following courses or their equivalent would provide the necessary background : CIST 1100, CIST 1300, ISQA 3210, ISQA 3310, ISQA 3400. Not open to non-degree graduate students.

ISQA 8156 ADVANCED STATISTICAL METHODS FOR IS&T (3 credits)

This course emphasizes the application and interpretation of statistical methods including design of experiments, analysis of variance, multiple regression, and nonparametric procedures and the use of statistical computer packages. The intent is to develop quantitative abilities needed for quantitatively intensive jobs and for advanced study in management information systems, computer science and information technology. (Cross-listed with ISQA 4150)

Prerequisite(s)/Corequisite(s): CIST 2500 or equivalent (at least one course in statistics)

ISQA 8160 APPLIED DISTRIBUTION FREE STATISTICS (3 credits)

The primary objective of this course is to expose students to methods of analyzing data from non-normal populations including binomial tests, contingency tables, use of ranks, Kolmogorov-Smirnov type statistics and other selected topics.

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156

ISQA 8166 INTRODUCTION TO ENTERPRISE RESOURCE PLANNING (3 credits)

Introduction to Enterprise Resource Planning (ERP) is designed to expose students to the primary enterprise application that forms the information systems (IS) infrastructure for most large organizations today. The primary purpose of this course is for students to gain an understanding of the enterprise wide, cross functional nature of ERP software. In the process of learning about ERPs, the students develop "hands on" experience with the largest and most well-known ERP application, SAP. (Cross-listed with ISQA 4160, SCMT 4160)

Prerequisite(s)/Corequisite(s): CIST 2100 or equivalent. Not open to non-degree graduate students.

ISQA 8180 ELECTRONIC COMMERCE (3 credits)

Electronic Commerce is the digital enablement of transactions between multiple parties. A multitude of technologies, tools and applications have brought about changes in business, and society that require careful consideration. Students are given an overview of electronic commerce business models and required to apply these to solve business problems or take on opportunities presented. They will cover topics such as social networking, electronic markets, and political and ethical issues associated with electronic commerce, and business plans for technology ventures. They will apply these concepts using Web 2.0 tools, mobile applications and website design assignments.

ISQA 8196 PROCESS REENGINEERING WITH INFORMATION TECHNOLOGY (3 credits)

Business process reengineering issues are examined. Reengineering concepts and methods are introduced. Additional special project(s) are required. SAP will be introduced. (Cross-listed with ISQA 4190)

Prerequisite(s)/Corequisite(s): CIST 2500; prerequisite/co-requisite ISQA 4110.

ISQA 8206 INFORMATION AND DATA QUALITY MANAGEMENT (3 credits)

The course primarily focuses on developing an in-depth understanding of Data and Information Quality (DQ and IQ) concepts and issues. On completing this course students will be able to understand and use DQ and IQ Concepts in Information Systems projects, be able to recognize various patterns of Data and Design Deficiencies in Systems and be able to suggest appropriate DQ and IQ improvement plans in light of known deficiencies in systems. (Cross-listed with ISQA 4200)

Prerequisite(s)/Corequisite(s): CIST 2500

ISQA 8210 MANAGEMENT OF SOFTWARE DEVELOPMENT (3 credits)

This course should encourage you to think critically about aspects of software development that make it difficult and strategies to mitigate these challenges. This course integrates concepts from software engineering, management science, psychology, and organizational behavior to identify, understand, and propose solutions to problems associated with software development. We examine and consider issues from various perspectives, such as the project manager, development team, senior management, and project sponsor. This course prepares students for various roles within a software development effort including leadership positions in software development. Students will practice software project management and agile methods of managing projects in a semester long team project using contemporary project and development methods.

Prerequisite(s)/Corequisite(s): ISQA 8040 or equivalent. Not open to non-degree graduate students.

ISQA 8220 ADVANCED SYSTEMS ANALYSIS AND DESIGN (3 credits)

This course is a systems analysis and design course for systems and business analysts. The course presents an overview of object-oriented system analysis and design. The course will then focus on theory, best practices, and modern methodologies that analysts can use to analyze and design information systems.

Prerequisite(s)/Corequisite(s): ISQA 8040 or (ISQA 4110 and ISQA 4120) or equivalent and ISQA 8050 or ISQA 3310 or equivalent

ISQA 8250 FACILITATION OF COLLABORATIVE PROBLEM SOLVING (3 credits)

The course focuses on the facilitation of collaborative problem solving and decision making processes. Students learn how to design and facilitate collaborative workshops, with support from both paper-based and electronic meeting tools. The course is hands-on and experiential, with students working in small teams to conduct real workshops.

ISQA 8306 DATABASE ADMINISTRATION (3 credits)

This course is designed to give students an applied, practical introduction to database administration. Students will gain an understanding of the functioning of a database management system and its relationship to the computing environment in which it runs. They will learn the concepts, principles, and techniques necessary to carry out such functions as database object creation, storage management, capacity planning, performance tuning, backup and recovery, and security management. Each semester the course will focus on one commercial database management system (DBMS), such as Oracle. (Cross-listed with ISQA 4300)

Prerequisite(s)/Corequisite(s): ISQA 8040 or ISQA 3310 or CSCI 4850. Not open to non-degree graduate students.

ISQA 8310 IT INFRASTRUCTURE & CLOUD COMPUTING (3 credits)

This course provides a graduate-level introduction to the business and technical decisions around technical infrastructure. It covers topics related to computer and systems architecture and communications networks, with a focus on the technical and business decisions around technology. Students completing the course will be able to understand and design network infrastructure, evaluate cloud computing offerings, and communicate their decisions. The course covers hardware, software, and cloud computing technologies.

ISQA 8340 APPLIED REGRESSION ANALYSIS (3 credits)

The primary objective of this course is to expose students to regression models and applications with particular emphasis on applying these concepts to IT research. Topics to be discussed include: Foundations of regression analysis using least squares procedures; model formulation, stepwise regression, transformations; graphical methods, estimation; inference; influence diagnosis; matrix formulation, multicollinearity, time series, and nonlinear models.

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156, not open to non-degree graduate students.

ISQA 8380 ENTERPRISE ARCHITECTURE AND SYSTEMS INTEGRATION (3 credits)

This course is designed to give students grounding in the concepts, issues, and tools needed to manage enterprise architecture, distributed systems & Internet-based environments. The goal of the course is to equip students to make the architecture and infrastructure-related decisions needed for successful development and use of contemporary client/server and Internet-based systems. Topics include middleware, architecture, XML, JSON, web services, service-oriented architecture, enterprise application integration, distributed computing services, Model View Controller (MVC) development frameworks.

Prerequisite(s)/Corequisite(s): ISQA 8310 and ISQA 8050 or equivalent; permit required.

ISQA 8410 DATA MANAGEMENT (3 credits)

The course provides in-depth coverage of such areas as: the relational model, SQL, data modeling, data quality management, database design, data warehousing, business intelligence, document and content management, NoSQL systems, and data governance. The course offers a mix of theoretical treatment and hands-on application. Current DBMS and data modeling software will be used.

Prerequisite(s)/Corequisite(s): ISQA 8050 or equivalent, permit only.

ISQA 8420 MANAGING THE I.S. FUNCTION (3 credits)

The course provides a focus on the business management implications of the information explosion. The course is organized around a management audit of the information services activity to help present and future managers recognize and implement effective information services management.

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8450 NOSQL AND BIG DATA TECHNOLOGIES (3 credits)

The course will cover topics in the area of NoSQL and Big Data management. The course is intended to get students familiarized with NoSQL and Big Data technologies, explore how these database technologies differ conceptually from traditional relational database technologies, understand their applications, uses, advantages, and disadvantages, and provide hands-on experience with NoSQL and Big Data databases. The course offers a mix of theoretical treatment and hands-on application of the discussed NoSQL and Big Data technologies.

Prerequisite(s)/Corequisite(s): Prior exposure to data management is expected. The prereq is: ISQA 3310, ISQA 8040, CSCI 4850, or work experience that has given you a comparable grounding in database concepts and technologies; in this case permission by the instructor is needed.

ISQA 8460 INTERNET OF THINGS (IOT), BIG DATA AND THE CLOUD (3 credits)

This course introduces the Internet of Things (IoT). It provides an overview of a number of technologies and research disciplines that enable the Internet to reach out into the real world of physical objects. In the future, the "Things" in question may have identities and virtual personalities, operating in smart spaces using intelligent interfaces to connect and communicate with the social, environmental, and user context.

Prerequisite(s)/Corequisite(s): Basic Web Development using HTML/CSS and some MVC framework. The equivalent of two semester exposure to programming.

ISQA 8510 MANAGING USABILITY FUNCTIONS IN SYSTEMS DEVELOPMENT ORGANIZATION (3 credits)

This course deals with usability of information systems, from the perspective of organizing and managing usability functions in a systems development organization. After briefly introducing the background to system usability and usability principles, the course focuses specifically on the introduction, organization, support, management and evaluation of usability functions in systems development organizations. The role of the usability professional in the organization is emphasized.

Prerequisite(s)/Corequisite(s): Two semesters of programming or demonstrable experience and ISQA 8040 or equivalent, not open to non-degree graduate students.

ISQA 8525 GRAPHICAL USER INTERFACE DESIGN (3 credits)

This course is an introduction to interaction design with a primary emphasis on designing usable and useful computer interfaces. Students will learn the principles of interface design grounded in a fundamental understanding of human cognitive processes. They will learn how end-users develop and use mental models of interaction and will apply this knowledge to the design of interfaces for real-world applications. A design project will challenge students to plan their own designs, to develop interfaces and to integrate them into a working application prototype, to test their application with real users, and to effectively communicate the overall results. (Cross-listed with ISQA 3520)

Prerequisite(s)/Corequisite(s): CIST 1300

ISQA 8530 E-COMMERCE SECURITY (3 credits)

The course will integrate concepts, principles, and technologies from business, telecommunications, and computer science to identify, understand, and propose solutions to the security threats to e-commerce.

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 8310. Not open to non-degree graduate students.

ISQA 8546 COMPUTER SECURITY MANAGEMENT (3 credits)

The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST4540, CYBR 4540, CYBR 8546)

Prerequisite(s)/Corequisite(s): IASC 4360 or permission of the instructor.

ISQA 8560 INFORMATION WARFARE AND SECURITY (3 credits)

This course will study the nature of information warfare, including computer crime and information terrorism, as it relates to international, national, economic, organizational, and personal security. Information warfare policy and ethical issues will be examined.

Prerequisite(s)/Corequisite(s): CIST 2100 or BSAD 8030 or ISQA 8030, or permission of instructor required.

ISQA 8570 INFORMATION SECURITY POLICY AND ETHICS (3 credits)

The course will cover the development and need for information security policies, issues regarding privacy, and the application of computer ethics. (Cross-listed with IASC 8570)

Prerequisite(s)/Corequisite(s): CIST 2100 or BSAD 8030, or permission of instructor.

ISQA 8580 SECURITY RISK MANAGEMENT AND ASSESSMENT (3 credits)

The purpose of this course is to prepare the student for managing information security at the organizational level. This course will combine concepts from strategic management, decision science and risk analysis to prepare the student to integrate security issues into an organizational strategic planning process.

Prerequisite(s)/Corequisite(s): CIST 2100 or ISQA 8030. Not open to non-degree graduate students.

ISQA 8596 IT AUDIT AND CONTROL (3 credits)

This course explores organizational and managerial issues relevant to planning and conducting IT audit and control activities. The course covers the following conceptual areas: business risks and the management of business risk, IT risk as a component of business risk, the need to manage IT risks, and the basic type of controls required in a business system in order to control IT risks. Issues associated with new risks created by the use of the internet for business applications and electronic business are also covered. (Cross-listed with ISQA 4590)

Prerequisite(s)/Corequisite(s): A solid understanding of business foundations such as accounting and introductory auditing and exposure to the IS discipline is essential for success in this course. Permission of instructor is required to enroll.

ISQA 8600 FROM DATA TO DECISIONS (3 credits)

This course focuses on inquiry-driven data preparation and exploratory analysis skills for audience-driven, decision-oriented data analysis. Students gain experience in data evaluation, cleaning, documentation, and exploration with basic descriptive statistics and visualizations.

ISQA 8700 DATA MINING: THEORY AND PRACTICE (3 credits)

This course provides students theoretical issues as well as practical methods for conducting data mining process, including the implementation of a warehouse. After covering the essential concepts, issues, techniques to build an effective data warehouse, this course emphasizes the various techniques of data mining, such as association, classification, clustering and prediction for on-line analyses within the framework of data warehouse architectures. This course also promotes students to conduct a real-life data analyzing project in Big Data Era.

Prerequisite(s)/Corequisite(s): ISQA 8050 and ISQA 8310 and ISQA 8040, not open to non-degree graduate students.

ISQA 8720 APPLIED STATISTICAL MACHINE LEARNING (3 credits)

This course focuses on advanced techniques in the analysis and evaluation of data, using both supervised and unsupervised methods. It covers the main types of statistical learning models needed for complex data analytics problems, as well as aspects of model development and optimization. Topics include: Linear and Non-Linear Regression Models, Classification, Resampling Methods, Model Selection and Regularization, Decision Trees, Model Boosting and Bagging, Support Vector Machines, and Clustering methods. This is an applied, hands-on course that will use a state-of-the-art statistical tool to implement the discussed approaches in assignments and a course project and focuses on the understanding and application of the concepts.

Prerequisite(s)/Corequisite(s): ISQA 8156 (B- grade or better) and the following topics: The equivalent of two classes of statistics and/or advanced mathematics and a minimum of one semester of applying R in courses and/or projects

ISQA 8736 DECISION SUPPORT SYSTEMS (3 credits)

This course examines a set of information systems which specifically support managerial decision makers: Decision Support Systems, Group Decision Support Systems, Executive Information Systems, Data Warehouses, Expert Systems, and Neural Networks. This course explores the development, implementation, and application of these systems, how these systems can be applied to current business problems, as well as how organizational issues impact the implementation and usage of these systems. (Cross-listed with ISQA 4730)

Prerequisite(s)/Corequisite(s): CIST 2100 or equivalent.

ISQA 8750 STORYTELLING WITH DATA (3 credits)

This course provides an in-depth study of how to build a compelling story using data for business professionals to make winning arguments, it provides an overview of a number of technologies and research disciplines that enabled the power of data visualization. Data visualization is critical to managing large volumes of data, and can be defined as the science (analytical) and art (design) of manipulating and presenting data for expression and cognitive recognition. Data visualization involves using data in a way that humans can clearly understand, supporting efforts by organization to gain competitive advantage by changing operations, decision-making, and strategic initiatives.

Prerequisite(s)/Corequisite(s): CSCI 1620 or equivalent. Admission into the UNO graduate program, basic web development or work experience with comparable grounding in programing, scripting concepts & technologies and permission by the instructor is needed.

ISQA 8810 INFORMATION TECHNOLOGY PROJECT FUNDAMENTALS (3 credits)

The course will integrate concepts and techniques from management science, psychology, organizational behavior, & administration change to identify, understand & propose solutions to the problems of project management. The purpose of the course is to prepare the graduate for project participation and leadership.

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8820 PROJECT RISK MANAGEMENT (3 credits)

This course will cover project risk management, i.e., the process of measuring or assessing risk in projects and then developing strategies to manage the risk. The topics covered will include: Risk Management Planning, Risk Identification, Quantitative Risk Analysis, Qualitative Risk Analysis, Risk Response Planning, and Risk Monitoring and Control will be covered in detail. Students will learn how to apply and use the tools and techniques needed to perform these project management tasks. A collection of readings on risk management from the empirical literature coupled with risk management standards from organizations such as IEEE and the Project Management Institute (PMI) will be used to provide the student with an excellent foundation in risk management and control.

Prerequisite(s)/Corequisite(s): ISQA 8810 or permission of instructor.

ISQA 8900 INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS (1-3 credits)

The content of the course will vary. However, both the student and the faculty member must sign an Independent Research Agreement and file it with the Master of Science in Management Information Systems Graduate Program Committee before registration for the course. This agreement will detail the project, the schedule for its completion, the form of the output, the method of evaluation and other relevant information pertaining to the project.

Prerequisite(s)/Corequisite(s): Permission of instructor, and at least 12 hours of course work toward a M.S. in MIS should be completed.

ISQA 8910 INFORMATION SYSTEMS INTERNSHIP (1-3 credits)

Information Systems Internship provides students with an opportunity for practical application and further development of knowledge and skills acquired in the MS MIS degree program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s)/Corequisite(s): Permission of the instructor required. Students must have completed a minimum of 18 credit hours towards the MS MIS program. Not open to non-degree graduate students.

ISQA 8950 CAPSTONE MANAGEMENT INFORMATION SYSTEMS (3 credits)

The course consists of a student executed Information Systems design project providing an in-depth practical experience. It typically covers system conceptualization, analysis, and design. It may also involve prototyping. The project will typically not include the actual implementation of the system. This course replaces the MS in MIS comprehensive exam requirement.

Prerequisite(s)/Corequisite(s): Students must have 6 credit hours or fewer left in the program. Students must have completed all core classes. Not open to non-degree graduate students.

ISQA 8990 THESIS (1-6 credits)

This course is a research project designed and executed under supervision of a thesis supervisory committee. Student will develop skills, including the ability to design, conduct, analyze, and report results in writing (i.e., thesis) of an original, independent, scientific investigation. The student's thesis supervisory committee must approve the project plan.

Prerequisite(s)/Corequisite(s): ISQA 8060 research methods or equivalent. Graduate major in MIS and approval of the thesis supervisory committee. Not open to non-degree graduate students.

ISQA 9010 FOUNDATIONS OF INFORMATION SYSTEMS RESEARCH (3 credits)

This course covers the following areas: (1) information systems as an academic discipline including classic readings in IS and its reference disciplines, (2) theory development and evaluation, (3) research methods applicability in IS.

Prerequisite(s)/Corequisite(s): Doctoral student standing in the information systems areas or with the permission of the instructor; ISQA 8060 or equivalent. Not open to non-degree graduate students.

ISQA 9020 TECHNICAL AND PROCESS ISSUES IN INFORMATION SYSTEMS RESEARCH (3 credits)

This seminar is a survey course on the technical and process issues in information systems research. The course balances the acquisition of knowledge about the conduct of research in technical and process issues with the application of that knowledge to research on information systems. Major topics include: software engineering, programming, data base systems, decision support systems, data warehousing and mining systems, object-oriented systems, adaptive and expert systems, client-service systems, information filtering and multimedia systems, information agents, mobile computing, telecommunications, and electronic commerce.

Prerequisite(s)/Corequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 9010 is recommended. Not open to non-degree graduate students.

ISQA 9030 BEHAVIORAL AND ORGANIZATIONAL ISSUES IN INFORMATION SYSTEMS (3 credits)

This seminar is a survey course on behavioral and organizational issues in information systems research. The course balances the acquisition of knowledge about the conduct of research in behavioral and organizational issues with the application of that knowledge to research on information systems. The course is intended for doctoral students in Information Technology or related areas.

Prerequisite(s)/Corequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 9010 is recommended. Not open to non-degree graduate students.

ISQA 9120 APPLIED EXPERIMENTAL DESIGN AND ANALYSIS (3 credits)

Constructing and analyzing designs for experimental investigations; completely randomized, randomized complete block and Latin-square designs, split-plot designs, incomplete block designs, confounded factorial designs, nested designs, and treatment of missing data, comparison of designs. The course will use computer-assisted analysis and graphic techniques included in software such as Statistical Analysis Software (SAS) or Statistical Package for Social Sciences (SPSS) or R (a programming language that provides a wide variety of statistical and graphical techniques. Similar to the S language).

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156 or consent of instructor. Not open to non-degree graduate students.

ISQA 9130 APPLIED MULTIVARIATE ANALYSIS (3 credits)

The use of multivariate analysis for solving business problems. Multivariate Analysis of Variance (MANOVA), factor, cluster, and discriminant analysis techniques in IT research. The course will use computer-assisted analysis and graphic techniques included in software such as Statistical Analysis Software (SAS) or Statistical Package for Social Sciences (SPSS) or R (A programming language that provides a wide variety of statistical and graphical techniques. Similar to the S language).

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156 or consent of instructor. Not open to non-degree graduate students.

ISQA 9150 RESEARCH IN INFORMATION TECHNOLOGY (3 credits)

Research methods in Information Technology involves an overview of the research process specific to problems in IT. Students will learn about theories in IT relevant to their areas of research. They will identify key components of research problems in IT, understand different types of research processes, develop research questions, and design research projects. They will learn to construct research instruments that enable them to collect data. They will also learn about the different data collection and analysis tools and techniques. As part of this course, students will take the CITI training and achieve the research readiness they need to succeed in the PhD in IT program.

Prerequisite(s)/Corequisite(s): Permission of the instructor. Not open to non-degree graduate students.

ISQA 9900 ADVANCED RESEARCH IN INFORMATION SYSTEMS (3 credits)

This course provides a format for exploration of advanced research areas that are of interest to doctoral students in the information systems and/or information technology area. The specific research area will vary from semester to semester, in keeping with research interests of faculty and students. Examples of areas include, but are not limited to, e-business technology, mobile commerce, intelligent agents e-enabled decision support, electronic collaboration, computer-mediated communications, human-computer interaction and information assurance.

Prerequisite(s)/Corequisite(s): Admission to PhD program in Information Technology or permission of instructor

IT Innovation, MS

School of Interdisciplinary Informatics, College of Information Science & Technology

Vision Statement

Information technology innovation (ITIN) is the interdisciplinary practice of conceptualizing, designing, prototyping, and fielding an IT-based product or service. It focuses both on the technological and entrepreneurial aspects of IT products. Being many-faceted by definition, IT innovation brings together aspects of computer science and management information systems with other disciplines that inform IT design and application such as health care, business, psychology, art, music, or public administration, among many others. It integrates and interfaces a diverse set of disciplines in addition to information technology. In addition, IT Innovation takes a more holistic and immersive approach to idea/product development: It focuses on the ideation, design, and development of an IT-based innovation, as

well as on the entrepreneurial realization of this innovation as a profitable or sustainable product or service. There is a great demand for ITIN entrepreneurs and professionals locally, regionally, and nationally, and the MS in ITIN program was created, in part, to prepare a workforce to meet those demands, in addition to satisfying the intellectual curiosity and honing the intellectual capacity of passionate creatives who work in and with technology.

Other Program Related Information

Fast Track

The College of Information Science & Technology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 (nine) graduate credit hours toward the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate CIST area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0, with the exception of Computer Science, which requires a minimum undergraduate GPA of 3.5.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 in graduate coursework is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived, and the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - For all CIST degrees, if a student successfully completes their undergraduate BS degree with a cumulative GPA of 3.0 (3.5 for computer science) and all graduate courses with a 3.0 or better, you may be recommended for admission to the graduate program.

- The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: July 1
- Spring: December 1
- Summer: April 1

Other Requirements

- The minimum undergraduate grade point average (GPA) requirement for the MS in IT Innovation program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a four-year undergraduate degree.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country on the [waiver list \(https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf\)](https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Writing Sample:** Applicants are required to submit a writing sample about the most innovative thing that you have developed. This should be a two page double-spaced word processed essay that demonstrates your potential for success in the graduate program and distinguishes you from other applicants to our graduate program.
- **Resume:** Submit a detailed resume indicating your work experience and background.
- **OPTIONAL:** One letter of recommendation from a reference who can evaluate your work and/or academic achievements.
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
 - *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

Non-Degree students interested in taking courses without admission to the MS in IT Innovation degree program may do so with permission of the graduate program committee.

Requirements

Foundation Courses

Foundation courses ensure that all students in the IT Innovation program have a strong foundation on which to build the rest of the program.

Foundation courses cannot be used to satisfy the 36 semester hours required for the MS in IT Innovation degree. Students who have not completed all the foundation course requirements may be admitted on provisional status until those requirements have satisfactorily been completed. All must be completed prior to or concurrent with the first six hours of MS in IT Innovation graduate course work.

Foundation Courses include:

- Six credit hours of programming & development courses, examples include; Java, C, C++, C#, Unity, PHP, Python, R, or comparable language.
- Three credit hours of system analysis & design courses, examples include: ITIN 4440 Agile Development, ISQA 8040 Overview Systems Analysis & Design, or ISQA 8220 Advanced Systems Analysis & Design.

Degree Requirements

Code	Title	Credits
ITIN 8000	TECHNOLOGY & INNOVATION-STATE OF THE ART	3
ITIN 8100	INTERMEDIA	3
ITIN 8210	FOUNDATIONS OF IT INNOVATION	3
ITIN 8220	DESIGN PROCESS	3
ITIN 8300	RESEARCH FOUNDATIONS	3
BSAD 8096	PRINCIPLES OF COLLABORATION	3
ITIN 8256	INNOVATION VENTURES	3
Electives		
Approved Electives: The majority of coursework in any graduate plan of study must consist of graduate-only level classes ending in 8xx0. A maximum of five 8xx6 courses is allowed, so electives should be selected with this in mind.		9
Students will select a cognate of four related electives with approval from their faculty advisor by the end of their second semester in the program.		
Select Capstone or Thesis		6
ITIN 8940	ITIN CAPSTONE I	
ITIN 8950	ITIN CAPSTONE II	
or		
ITIN 8990	THESIS	
Total Credits		36

Exit Requirements

Complete the Capstone requirement (ITIN 8940 and ITIN 8950) or the thesis option ITIN 8990.

All candidates completing the thesis option, should carefully review the Graduate College requirements for forming the supervisory committee, Thesis/Thesis Equivalent Proposal Approval forms, and final approval and submission of the thesis.

Quality of Work Standards

The Graduate College's Quality of Work standards shall be applied to foundation courses as well as courses taken as part of the degree program. In particular, the GPC will recommend to the Graduate College that any

1. Student receiving a grade of "C-" or below in any foundation courses will be automatically dismissed from the program or, in the case of unclassified or non-degree students, be automatically denied admission.
2. Student receiving a grade of "C+" or "C" in any foundation course will be placed on probation or dismissed from the program.
3. Student not maintaining a "B" (3.0 on 4.0 scale) average in foundation courses will be placed on probation or dismissed from the program.

ITIN 8000 TECHNOLOGY & INNOVATION-STATE OF THE ART (3 credits)

ITIN 8000 provides a regular forum for IT Innovation graduate students, where the latest developments in the field of IT Innovation are introduced and discussed. The course also functions as a central communication and collaboration hub for graduate students in IT Innovation. Participation is required.

Prerequisite(s)/Corequisite(s): Students in the MS in IT Innovation program may register. Not open to non-degree graduate students.

ITIN 8006 SPECIAL TOPICS IN IT INNOVATION (1-6 credits)

This course is designed to acquaint students with issues which are current to the field or emerging trends in the IT Innovation area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ITIN 4000).

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ITIN 8100 INTERMEDIA (3 credits)

This is an ongoing course that brings together students of the arts and students of scientific disciplines in order to facilitate and promote the creation of intermedia art, and to further explore shared resources, joint research, and exhibition/performance opportunities.

Prerequisite(s)/Corequisite(s): Instructor permission

ITIN 8210 DESIGN SCIENCE AND THEORY DEVELOPMENT (3 credits)

The purpose of this course is to help students understand theory, theoretical contributions, and design science. Students will approach such questions as: What is a theory? What makes a good theory? Why are theories just theories and not laws? What is not a theory? Following this introduction, we explore design science as a research methodology and Information Technology design theories. Ultimately, students create their own new studies around some design concept.

Prerequisite(s)/Corequisite(s): Graduate standing / permission of the instructor

ITIN 8220 DESIGN PROCESS (3 credits)

Inter-disciplinary design teams will work together to design and innovate products of the future. The design projects in the course are developed to directly address a problem brought forward by a technology company in the Omaha area in order to provide students with a design experience that directly impacts real-world product development. Students will focus on the technological (interface), physical (ergonomics) and aesthetic quality of design, and will learn how to conduct rigorous user studies in a laboratory setting. Teams will be cross disciplinary and consider all aspects of the design, creation, testing, and fabrication of the products.

ITIN 8256 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with BSAD 8726, ENTR 4720, ITIN 4720, MGMT 4720, MKT 4720).

Prerequisite(s)/Corequisite(s): Admission to a graduate program or instructor permission.

ITIN 8266 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, CSCI 8266, ITIN 4260).

ITIN 8300 RESEARCH FOUNDATIONS (3 credits)

This course serves as an introduction to research literature and research methodology in the innovation and creativity research domain. Students are introduced to skills, methodological issues, and bibliographic resources to enhance their ability in critically evaluating and conducting research in the IT Innovation field. Through a series of readings, in-class discussions, and lectures the student will select and define a research question, explore the various types of research designs and complete a literature review. This course is structured to make research meaningful and significant and enable students to write effectively.

Prerequisite(s)/Corequisite(s): CIST 2500 or equivalent

ITIN 8900 INDEPENDENT STUDIES (1-3 credits)

A variable credit course for the graduate student who will benefit from independent reading assignments and research type problems. Independent study makes available courses of study not available in scheduled course offerings. The student wishing to take an independent study course should find a faculty member willing to supervise the course and then submit, for approval, a written proposal (including amount of credit) to the IT Innovation Graduate Program Committee Chair at least three weeks prior to registration.

Prerequisite(s)/Corequisite(s): Written permission required

ITIN 8940 ITIN CAPSTONE I (3 credits)

The purpose of the Information Technology Innovation (ITIN) capstone courses is for ITIN majors to explore, identify, evaluate, design, construct and implement a new innovative product that leverages information technology and includes an interdisciplinary field of study. The capstone is the culmination product of the specific various disciplines a student has selected as the unique combination for his or her degree. This course serves as part one of the capstone project for the ITIN Masters degree. The two courses for the ITIN capstone project are intended to be completed in two consecutive semesters (Fall/Spring).

Prerequisite(s)/Corequisite(s): Must be pursuing ITIN MS degree and have completed: two sections of ITIN 8000, ITIN 8220, 8300, and 3 hours of upper division courses in interdisciplinary area identified in the student's course plan. Not open to non-degree graduate students.

ITIN 8950 ITIN CAPSTONE II (3 credits)

The purpose of the ITIN capstone courses is for ITIN majors to explore, identify, evaluate, design, construct and implement a new innovative product that leverages information technology and an interdisciplinary field. The capstone is the culmination product for prospective graduate and utilizes the discipline(s) a student has selected as the unique combination for his or her degree. This course serves as part two of the capstone project for the Information Technology Innovation (ITIN) program. The two courses for the ITIN capstone project are taught in two consecutive semesters.

Prerequisite(s)/Corequisite(s): Must be pursuing ITIN MS degree and have completed: three sections of ITIN 8000, ITIN 8220, 8300, 8940 and 6 hours of upper division courses in interdisciplinary area identified in the student's course plan. Not open to non-degree graduate students.

ITIN 8990 THESIS (1-6 credits)

This course is required for the Master of Science degree in the MS in IT Innovation Program. The purpose of this course is to conduct original research in IT Innovation, under supervision of a faculty member, culminating in a paper document that represents the student's competency in their chosen field, as well as scholarly contributions. With consultation from their committee, MS in IT Innovation thesis students should be prepared to independently complete the writing of their thesis and successfully defend their thesis.

Prerequisite(s)/Corequisite(s): Graduate major in ITIN and approval of the Thesis Advisory Committee.

ITIN 9300 SOCIAL COMPUTING AND ITS APPLICATIONS (3 credits)

It is indisputable that social media and the Internet more broadly reshaped information disbursement and processing. Digital participation and communication has become the 'new normal' and the dividing line between off- and online communities is increasingly blurred. This leads to specific challenges in the extraction and analysis of online social media data, and the management of new communication.

Prerequisite(s)/Corequisite(s): Open to all currently-admitted doctoral students. Students should have a technical aptitude; experience with at least one web scripting language, (e.g. PHP, rails, python etc) is helpful. Experience with JSON is advantageous but not essential.

Language Teaching

Degree Programs Offered

- Language Teaching, MA (p. 1230)

Certificate Programs Offered

- Spanish Certificate (p. 1232)

French

FREN 8036 ADVANCED FRENCH CONVERSATION (3 credits)

This course focuses on the development of oral skills in French through the use of complex and sophisticated conversational structures and nuanced lexicon. Students will be involved in expressing or presenting their ideas and opinions, interpersonal speaking activities, and a variety of activities including reading short literary and cultural texts and screening films. (Cross-listed with FREN 4030).

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

FREN 8056 SEMINAR IN THE CULTURE AND CIVILIZATION OF QUEBEC (3 credits)

An introduction to the many facets of Quebec Culture & Civilization, through readings on Quebec's history and contemporary culture and also through films and other media related to Quebec. (Cross-listed with FREN 4050).

Prerequisite(s)/Corequisite(s): FREN 2120 or departmental permission.

FREN 8156 CONTEMPORARY FRENCH NOVEL (3 credits)

Selected contemporary French novels are analyzed and discussed. The main objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the texts under consideration. In addition, students will examine the sociopolitical and cultural contexts of these literary works. (Cross-listed with FREN 4150).

Prerequisite(s)/Corequisite(s): FREN 3060 or departmental permission. Not open to non-degree graduate students.

FREN 8176 CONTEMPORARY FRENCH THEATER (3 credits)

Selected contemporary French plays are analyzed and discussed. The main objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the texts under consideration. (Cross-listed with FREN 4170).

Prerequisite(s)/Corequisite(s): FREN 3060 or permission of instructor. Not open to non-degree graduate students.

FREN 8226 THE STRUCTURE OF FRENCH (3 credits)

A survey of the linguistic structure of modern French, including phonology, morphology, and syntax. (Cross-listed with FREN 4220).

Prerequisite(s)/Corequisite(s): FREN 3040 or departmental permission. Not open to non-degree graduate students.

FREN 8440 SEMINAR: FRENCH COMPOSITION (3 credits)

This course provides opportunities for students to refine their composition skills in French through extensive writing workshops and peer editing. Computer applications to composition will be employed.

Prerequisite(s)/Corequisite(s): Admission to the Graduate College.

FREN 8866 MODERN FRENCH WOMEN AUTHORS (3 credits)

Selected contemporary French literary texts written by women are analyzed and discussed. This may include novels, short stories, poetry, and graphic novels. The primary objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the works under consideration. In addition, students will examine the sociopolitical and cultural contexts of these works. (Cross-listed with FREN 4860).

Prerequisite(s)/Corequisite(s): FREN 3060 or permission. Not open to non-degree graduate students.

FREN 8900 FRENCH INDEPENDENT STUDY (1-3 credits)

Specifically planned projects and readings in a well-defined field of French literature or linguistics carried out under the supervision of a member of the foreign languages faculty holding graduate faculty status.

FREN 8906 INDEPENDENT STUDY (1-3 credits)

Specially planned readings in a well-defined field of literature, carried out under the supervision of a member of the foreign language faculty. Designed primarily for the student who has need of work not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated for credit once. (Cross-listed with FREN 4900).

Prerequisite(s)/Corequisite(s): Permission of the instructor, junior or senior standing, and no incompletes outstanding. Not open to non-degree graduate students.

FREN 8956 PRO-SEMINAR: LITERATURE AND/OR FILM (3 credits)

This course is dedicated to the study of a narrow field of the literature and/or cinema of the Francophone world. (Cross-listed with FREN 4950).

Prerequisite(s)/Corequisite(s): Graduate student status.

FREN 8966 PRO-SEMINAR: CULTURE AND SOCIETY (3 credits)

This course will address narrow field of study of the civilization, history, film, contemporary culture, art, politics, and or cultural studies of the Francophone world. (Cross-listed with FREN 4960).

Prerequisite(s)/Corequisite(s): FREN 3030, FREN 3040, and FREN 3060

FREN 8976 PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS (3 credits)

This course will address a narrow field of study of linguistics, translation/interpretation or the professional language of the Francophone world. (Cross-listed with FREN 4970).

Prerequisite(s)/Corequisite(s): Graduate student status.

German

GERM 8046 ADVANCED GERMAN COMPOSITION AND STYLISTICS (3 credits)

Advanced grammatical principles, composition and stylistics.

GERM 8226 THE STRUCTURE OF GERMAN (3 credits)

A survey of the linguistic structure of modern German, including phonology, morphology, and syntax. (Cross-listed with GERM 4220).

Prerequisite(s)/Corequisite(s): GERM 3040 and GERM 4610, or permission.

GERM 8440 SEMINAR:GERMAN COMPOSITION (3 credits)

This course will provide opportunities for students to refine their composition skills in German through extensive writing practice, writing workshops, and peer editing. Computer applications to composition will be employed.

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

GERM 8906 INDEPENDENT STUDY (1-3 credits)

Specially planned readings in a well-defined field of literature, carried out under the supervision of a member of the foreign language faculty. Designed primarily for the student who has need of work not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated for credit once.

Prerequisite(s)/Corequisite(s): Permission of the instructor, junior or senior standing, and no incompletes outstanding.

GERM 8956 PRO-SEMINAR: LITERATURE AND/OR FILM (3 credits)

This course is dedicated to the study of a narrow field of the literature and/or cinema of the German-speaking world. (Cross-listed with GERM 4950).

Prerequisite(s)/Corequisite(s): Graduate student status.

GERM 8966 PRO-SEMINAR: SOCIETY AND CULTURE (3 credits)

This course will address a narrow field of study of the civilization, history, film, contemporary culture, art, politics, and/or cultural studies of the German-speaking world. (Cross-listed with GERM 4960).

Prerequisite(s)/Corequisite(s): GERM 3030, GERM 3040, and GERM 3060

GERM 8976 PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS (3 credits)

This course will address a narrow field of study of linguistics, translation/interpretation or the professional language of the German-speaking world. (Cross-listed with GERM 4970).

Prerequisite(s)/Corequisite(s): Graduate student status.

Spanish

SPAN 8026 LANGUAGE ENHANCEMENT THROUGH VOCABULARY LEARNING (3 credits)

This class aims to expand students' vocabulary in Spanish. This will be achieved through doing an overview of current research that investigates how vocabulary is learned; identifying effective vocabulary learning strategies; and exploring topics not commonly encountered in Spanish classes such as commerce and science. The course also includes points of contact with the Spanish-speaking community in Omaha, where students can participate in interactions that connect what has been learned in the classroom to language use in real life. (Cross-listed with SPAN 4020).

Prerequisite(s)/Corequisite(s): Graduate standing

SPAN 8036 ADVANCED SPANISH CONVERSATION (3 credits)

This course targets the development of oral skills in Spanish through the incorporation of complex and sophisticated conversational structures and nuanced lexicon. In particular, the course focuses on presentational (i.e., expressing or exposing ideas or opinions), and interpersonal speaking (i.e., engaging in conversation where learners narrate and describe in the major time frames of past, present, and future in paragraph-length discourse with control of aspect). (Cross-listed with SPAN 4030)

Prerequisite(s)/Corequisite(s): Graduate standing

SPAN 8046 ADVANCED COMPOSITION AND STYLISTICS (3 credits)

In this capstone course, required for the completion of the major, learners will explore and practice advanced grammatical structures, write compositions in a variety of genres, and familiarize themselves with advanced stylistics. (Cross-listed with SPAN 4040)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

SPAN 8066 INTRODUCTION TO TRANSLATION AND INTERPRETATION (3 credits)

This course offers an introduction to the translation and interpretation field. Course objectives include (a) understanding translation theory; (b) comprehending the role of communication in translation and interpretation; (c) targeting common grammatical and pragmatic errors; (d) increasing vocabulary knowledge in a variety of fields; and (e) gaining an increased awareness of the rigor and demands innate to the translation and interpretation fields. (Cross-listed with SPAN 4060).

Prerequisite(s)/Corequisite(s): Admission to MALT program or permission of instructor

SPAN 8076 HISPANIC BILINGUALISM (3 credits)

This course explores bilingualism among Spanish speaking populations. Topics include societal bilingualism, the history of Spanish and language policy in Spain, Latin America, and the U.S., psychological aspects of bilingualism, monolingual vs. bilingual acquisition, first vs second language acquisition, and Spanish as a heritage language in the U.S. (Cross-listed with SPAN 4070).

SPAN 8086 INTRODUCTION TO HISPANIC LINGUISTICS (3 credits)

This course introduces students to the field of linguistics by exploring the following areas: phonetics and phonology (sound systems), morphology (word formation), historical linguistics (language development over time), and sociolinguistics and pragmatics (language in society and context), among others, as framed within the study of the Spanish language. (Cross-listed with SPAN 4080).

Prerequisite(s)/Corequisite(s): SPAN 3030 and SPAN 3040 OR SPAN 3010 and SPAN 3020; Graduate standing

SPAN 8126 HISPANIC SOCIOLINGUISTICS (3 credits)

This course introduces sociolinguistics, the study of the relationship between language and society, with an emphasis on the Spanish language. Its focus will be on correlational linguistics (how social factors such as age, gender and socioeconomic status affect language) and language and society (the role language plays in human conduct and social organization). Course topics will include the concept of speech communities, sociolinguistic variables, phonological and syntactic variation as well as languages in contact, bilingualism, Spanish in the U.S., Spanish as a heritage language, and language attitudes and ideologies. (Cross-listed with SPAN 4120).

Prerequisite(s)/Corequisite(s): SPAN 8086 or instructor permission

SPAN 8136 SPANISH IN THE UNITED STATES (3 credits)

This course looks at Spanish in the U.S. from a sociolinguistic perspective. Course topics include: Dialectal/regional differences, dialect contact, Spanish- English bilingualism and code-switching, "Spanglish", language maintenance, language ideologies surrounding Spanish in the U.S., and Spanish in public spheres (e.g., TV, movies, radio, music, stand-up comedy). (Cross-listed with SPAN 4130).

Prerequisite(s)/Corequisite(s): SPAN 8086 or instructor permission

SPAN 8146 INTRODUCTION TO LATIN AMERICAN FILM (3 credits)

The course will be a thematic study of significant Latin American films emphasizing and further investigating their relationship to history, culture, society and political issues that have often given rise to social movements. Films from a variety of Spanish-speaking countries including Mexico, Argentina, Chile, Cuba, Bolivia, etc. will be studied in their socio-political context. At the 8146 level, students will be introduced to theoretical approaches such as early film theory, montage theory, feminist theory, race theory, and phenomenological film theory in order to deepen their understanding these themes. (Cross-listed with SPAN 4140, LLS 4140).

SPAN 8156 LITERATURE/CULTURE: CENTRAL AMERICA AND THE CARIBBEAN 1898-2000 (3 credits)

"Literature/ Culture: Central America and the Caribbean 1898- 2000" studies major historical and socio-cultural events in Latin American history in the 20th century, through their articulation in literary texts, film, and other cultural expressions from Central America and the Hispanic Caribbean. (Cross-listed with SPAN 4150, CACT 8156)

Prerequisite(s)/Corequisite(s): SPAN 3030, SPAN 3040 and SPAN 3060 or permission of instructor

SPAN 8176 INTRODUCTION TO LATIN AMERICAN LITERATURES (3 credits)

The course is intended as an introduction to the study of canonical and non-canonical texts in Latin American literatures, from the 16th to 21st centuries. It seeks to acquaint students with the rich literary traditions of a large region, from South America to Central America and Mexico, as well as with the historical challenges posed by the salient heterogeneity of texts included in the Latin American corpus, from the standpoint of ethnicity, gender, social class, and literary genre. The course also focuses on continuing to develop Spanish language skills, specifically reading for comprehension and interpretation of metaphorical meaning, writing, and presentational speaking skills in Spanish. (Cross-listed with SPAN 4170, LLS 4170).

Prerequisite(s)/Corequisite(s): SPAN 3030 and SPAN 3040, or SPAN 3010 and SPAN 3020; SPAN 3060

SPAN 8226 THE STRUCTURE OF SPANISH (3 credits)

This course introduces students to the structure of the Spanish language with a focus on its morphology and syntax as seen in the study of constituents of a sentence, lexical categories, content and function words, the pronominal system, the structure of simple and complex sentences, and the verbal system, among others. It reviews frequent syntactical errors in Spanish L2 and Heritage learners with the purpose of advancing their linguistic competence. (Cross-listed with SPAN 4220).

Prerequisite(s)/Corequisite(s): SPAN 3030 and 3040 or SPAN 3010 and SPAN 3020; graduate standing

SPAN 8440 SEMINAR: SPANISH COMPOSITION (3 credits)

This course provides opportunities for students to refine their composition skills in Spanish through extensive writing workshops and peer editing. Computer applications to composition will be employed.

Prerequisite(s)/Corequisite(s): Admission to the Graduate College.

SPAN 8900 SPANISH INDEPENDENT STUDY: GRADUATE ONLY (1-3 credits)

Specifically planned projects and readings in a well-defined field of literature or linguistics carried out under the supervision of a member of the foreign languages faculty holding graduate faculty status.

Prerequisite(s)/Corequisite(s): Acceptance into the Master of Arts in Language Teaching Program (MALT). Must have completed a minimum of six graduate credit hours.

SPAN 8906 INDEPENDENT STUDY (1-3 credits)

Specially planned readings in a well-defined field of literature, carried out under the supervision of a member of the foreign language faculty. Designed primarily for the student who has need of work not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated for credit once.

Prerequisite(s)/Corequisite(s): Senior status, no incompletes outstanding, and departmental permission.

SPAN 8956 PRO-SEMINAR: LITERATURE AND/OR FILM (3 credits)

This course is dedicated to the study of a narrower field of the literature and/or cinema of the Spanish-speaking world. (Cross-listed with SPAN 4950)

Prerequisite(s)/Corequisite(s): Graduate standing

SPAN 8966 PRO-SEMINAR: CULTURE AND SOCIETY (3 credits)

This course will address a narrow field of study of the civilization, history, film, contemporary culture, art, politics, and/or cultural studies of the Spanish-speaking world. (Cross-listed with SPAN 4960)

Prerequisite(s)/Corequisite(s): SPAN 3030, SPAN 3040, and SPAN 3060.

SPAN 8976 PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS (3 credits)

This course will address a narrow field of study of linguistics, translation/interpretation or the professional language of the Spanish-speaking world. (Cross-listed with SPAN 4970)

Prerequisite(s)/Corequisite(s): Graduate standing.

Language Teaching, MA

Department of Foreign Languages, College of Arts & Sciences

Vision Statement

The Master of Arts in language teaching program at the University of Nebraska at Omaha (UNO) is the only graduate program in the region that provides practicing and future teachers of Spanish, French, and English as a second or other language with a rigorous, practically oriented education founded on scholarship specifically in the pedagogy of language teaching. Students expand not only their familiarity with the latest research on applied linguistics and effective instructional techniques for L2 and heritage learners, but also the literature and culture of their language of focus. The program strives to strengthen language education in the region by equipping its students with the knowledge and skills to apply best pedagogical practices in world language and TESOL classrooms.

Other Program Related Information

Note that completion of the MALT program by itself **does not** certify you to teach in the Nebraska public school system. If you are interested in pursuing teacher certification along with your MALT degree, please contact the MALT program's GPC.

Fast Track Program

The Department of Foreign Languages and Literature has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing the BA degree with Foreign Languages & Literature major with concentrations in Spanish and/or French desiring to pursue an MA in Language Teaching
- Students must have completed no fewer than 60 undergraduate hours
- Students must have a minimum undergraduate GPA of 3.0
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their undergraduate advisor to register for the graduate courses
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good academic standing
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted to undergraduate status including financial aid
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the

applicant will need to contact the Office of Graduate Studies for a fee waiver code.

- Admission to Fast Track does NOT guarantee admission to the graduate program.
- The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: June 30
- Spring: November 15
- Summer: April 15

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 600, Internet-based TOEFL: 100, IELTS: 8, PTE: 68, Duolingo: 120
- **Statement of Purpose:** A personal statement (700-900 words, double space), written in the language of the concentration you are applying for. If applying for a double major or a minor, you should also include a personal statement in those languages. Some topics you might want to consider:
 - Interests and qualifications for graduate study
 - Description of yourself and your intellectual development
 - Strengths and weaknesses, and how you overcame them or challenges to overcoming them
 - Reasons why you want to join this program
 - Possible areas of research or deeper study
 - What you want to do after graduation
- **Letters of Recommendation:** Two letters of recommendation are required
- Applicant must have taken ENGL 3610 or SPAN 4080 or an equivalent course. Those who do not meet this requirement may be admitted provisionally.
- Applicant must schedule an oral target language interview with a MALT faculty member. This includes an interview in English for non-native speakers who apply to the TESOL concentration. Please contact the Graduate Program Chair for assistance.

Degree Requirements

Code	Title	Credits
Required Courses		12
FLNG 8960	SEMINAR:SPECIAL TOPICS	
FLNG 8020	SEMINAR:FL/TESOL RESEARCH	
or ENGL 8030	FIELD-BASED RESEARCH METHODS IN ENGLISH STUDIES	
FLNG 8030	SEMINAR: SECOND LANGUAGE ACQUISITION THEORY	
FLNG 8040	SEMINAR: ASSESSMENT & CURRICULUM DESIGN	
Select two of the following:		6

TED 9200	CRITICAL PEDAGOGY: TEACHING FOR SOCIAL JUSTICE
TED 8180	CULTURALLY RESPONSIVE TEACHING
TED 8130	LANGUAGE, CULTURE, AND POWER
TED 8300	EFFECTIVE TEACHING PRACTICES
TED 8540	DIGITAL CITIZENSHIP
TED 8006	SPECIAL METHODS IN THE CONTENT AREA

Concentration

Student must select an area of concentration. See Language Teaching, MA Concentrations

Total Credits **36**

Exit Requirements

The final requirements of the degree for all concentrations are as follows:

1. Successful completion of a written and oral comprehensive examination. The exam is administered in the student's final semester in the program.
2. Successful completion of the student's portfolio at the end of the second to the last semester in the program.
3. Successful completion of a poster presentation during the Colloquium on Language Teaching. Students should have completed at least nine credit hours in the program (or obtain special permission from their advisor) in order to give their poster presentation.

Spanish Certificate

Department of Foreign Languages, College of Arts & Sciences

Vision Statement

The graduate certificate in Spanish provides students with the opportunity to earn a certificate degree after successful completion of 18 credit hours of intensive language proficiency training in Spanish. The program includes courses in Hispanic cultures, literature, linguistics, and, for those students interested in language teaching, language teaching pedagogy.

The graduate certificate in Spanish presents a rigorous language program that seeks to serve these student populations: (a) High school faculty interested in teaching dual enrollment classes and who are required to have 18 graduate credit hours in their discipline to be eligible. (b) Bilingual instructors who support dual language and world language programs. (c) Individuals in various fields (e.g., law enforcement, social work, psychological services, healthcare) who work with Spanish-speaking individuals.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- Undergraduate grade point average of at least 3.0
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency->

[%20International.pdf](#)), must meet the minimum language proficiency score requirement in order to be considered for admission.

- Paper-based TOEFL: 600, Internet-based TOEFL: 100, IELTS: 8, PTE: 68, Duolingo: 120
- Statement of Purpose:** A statement of purpose (700-900 words, double space), written in Spanish is required. Some topics you might want to include:
 - Your interests and qualifications for graduate study
 - Description of yourself and your intellectual development
 - Strengths and weaknesses, and how you overcame them or challenges to overcoming them
 - Reasons why you want to join this program
 - Possible areas of research or deeper study
 - What you want to do after completion of the certificate
- Letters of Recommendation:** Two letters of recommendation are required.
- Competence in Spanish with at least an intermediate-high (based on ACTFL guidelines) as assessed during an oral interview and through a statement of purpose written in the language of interest

Degree Requirements

Code	Title	Credits
Required:		
SPAN 8036	ADVANCED SPANISH CONVERSATION	3
One course from the following list:		3
SPAN 8156	LITERATURE/CULTURE: CENTRAL AMERICA AND THE CARIBBEAN 1898-2000	
SPAN 8956	PRO-SEMINAR: LITERATURE AND/OR FILM	
SPAN 8146	INTRODUCTION TO LATIN AMERICAN FILM	
SPAN 8176	INTRODUCTION TO LATIN AMERICAN LITERATURES

SPAN 8440	SEMINAR:SPANISH COMPOSITION	
SPAN 8900	SPANISH INDEPENDENT STUDY: GRADUATE ONLY	

SPAN 8956	PRO-SEMINAR: LITERATURE AND/OR FILM
SPAN 8966	PRO-SEMINAR: CULTURE AND SOCIETY
SPAN 8976	PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS
Students interested in Spanish language teaching may replace up to two of the above courses with the following courses:	
FLNG 8050	THEORY AND METHODS IN THE TEACHING OF HERITAGE LANGUAGES
FLNG 8060	APPROACHES AND METHODS IN LANGUAGE TEACHING
FLNG 8020	SEMINAR:FL/TESOL RESEARCH
FLNG 8030	SEMINAR: SECOND LANGUAGE ACQUISITION THEORY
FLNG 8040	SEMINAR: ASSESSMENT & CURRICULUM DESIGN
FLNG 8900	DIRECTED READINGS
FLNG 8960	SEMINAR:SPECIAL TOPICS

Total Credits **18**

Literacy, MS

Teacher Education Department, College of Education, Health, and Human Sciences

Vision Statement

For candidates who hold a current teaching certificate, the Master of Science in literacy leads to eligibility for an added PK-12 Reading Specialist endorsement. The Nebraska Department of Education requires two years contracted teaching experience at time of endorsement and successful Praxis II.

The Master of Science in literacy focuses on literacy pedagogy. During the program candidates will expand their knowledge in the following areas:

- Ability to apply research in reading and writing to teaching
- Skills for working with struggling readers and writers in PK-12 settings
- Leadership skills to work with students and their teachers in literacy
- Understanding components of students' diversity as readers and writers
- Using various types of literature to increase students' skills as readers and writers

Program Website (<http://www.unomaha.edu/college-of-education/teacher-education/graduate/literacy.php>)

Other Program-Related Information

The master's degree in literacy does not lead to initial teacher certification.

Unclassified Students

Students who are not planning to pursue a program leading to a graduate certificate or a master's degree can be admitted to the literacy program with unclassified status. Candidates holding a previous master's degree in education who are seeking additional teaching endorsements may wish to choose an unclassified status. Unclassified students are allowed to take courses for which they meet the prerequisite. Successful completion of graduate courses as an unclassified student does not obligate the department to accept those courses for credit toward the fulfillment of degree requirements. Formal advisement in an endorsement area is required. Students admitted as unclassified are not eligible for financial aid.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: August 1
- Spring: December 1
- Summer: June 1

Other Requirements

- A minimum undergraduate GPA of 3.0 (on a 4.0 scale).
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- A valid teaching certificate.
- UNO College of Education, Health, and Human Sciences "Personal and Professional Fitness" form
- International students who do not expect to teach in the US **may** be eligible for admission.

- A diversity course must be taken within the first 12 hours.
- TED 9190 Capstone is intended to be the last course in your program. A grade of B or better must be received to show satisfactory completion of the course and for program completion.

TED 8000 SPECIAL STUDIES (1-3 credits)

A series of intensive studies especially for in-service teachers scheduled as regular seminars or classes, according to purpose.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8006 SPECIAL METHODS IN THE CONTENT AREA (3 credits)

This course is designed to develop knowledge, skills, and dispositions requisite of teachers. Course content is determined by the discipline area. For some content areas a field experience will be required. This is an in-school, guided practicum completed in conjunction with TED 4000 math, science, language arts, world languages, Business, Information Technology, ESL and social studies sections. Candidates must demonstrate competencies related to performance in 7-12 classrooms. This is the final practicum experience prior to the clinical practice semester. (Cross-listed with TED 4000).

TED 8010 INTRODUCTION TO RESEARCH (3 credits)

This course will introduce advanced degree candidates to: A) An understanding of the scientific method as applied to behavioral research B) Assessment, evaluation, descriptive, causal-comparative, experimental and historical data gathering procedures and analytical strategies C) Sampling theory, techniques, distribution and hypothesis testing D) Specific designs, methods, and tools of research E) Search and retrieval of published research, both American and international (global), in the library and over the Internet F) Critical evaluation of research studies G) Basic statistics, both descriptive and inferential, and H) Preparation of a research proposal containing three chapters: Problem, Review of Related Research and Methodology.

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8030 SEMINAR IN EDUCATION: SPECIAL TOPICS (1-3 credits)

This is a variable content course focusing on topics of current relevance to PK-12 teachers.

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8040 SEMINAR ON STUDENT TEACHING/NEW TEACHER INDUCTION (3 credits)

The seminar is designed for experienced teachers who are, or may be, serving as cooperating teachers for student teachers or as mentor teachers for beginning teachers. Participants will study the purposes, techniques, and trends involved in serving as a cooperating teacher or as a mentor.

Prerequisite(s)/Corequisite(s): Successful teaching experience is required for this course.

TED 8050 DATA-DRIVEN DECISION MAKING FOR EDUCATORS (3 credits)

This course provides graduate students with hands-on experiences that model data-driven decision making for educational success in today's classroom. Students will learn how to create valid and reliable assessments; interpret test data; use data to identify student, classroom, program, and school needs; and in general, to systematically enhance educational decision making. In addition, students will experience activities that can be integrated into student lessons to help to deepen concept learning, and to build student data literacy. The course will use real data sets, in interesting, hands on and technology-rich activities to find the "educational story" represented by the data. (Cross-listed with STEM 8050).

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8055 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)

This course is designed to enhance candidates' understanding of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs) in the U.S. context. As dedicated practitioners, reflective scholars, and responsible citizens, students will have knowledge of factors that contribute to an effective multicultural and multilingual learning environment. TED 3050 includes an in school, guided practicum. Candidates must demonstrate competencies related to teaching English Learners (ELs) in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education. (Cross-listed with TED 3050).

Prerequisite(s)/Corequisite(s): TED 2300 (EDUC 2010) OR TED 2380; and TED 2050.

TED 8060 CURRENT ISSUES AND TRENDS IN EDUCATION (3 credits)

The course is an advanced study of current issues and trends which have substantial impact on PK-12 education. The graduate candidates who take this class will read, analyze, and evaluate relevant research in order to become conversant in those issues.

Prerequisite(s)/Corequisite(s): Graduate status is required.

TED 8070 TEACHING MULTIPLE INTELLIGENCE (3 credits)

This course focuses on the utilization of the multiple intelligences (MI) theory by teachers to enhance children's understanding of various disciplines. Graduate candidates will have the opportunity to explore, evaluate, and develop various methodologies that foster understanding.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8080 STORYTELLING AND EDUCATION (3 credits)

This course is designed to consider the importance of storytelling, to provide teacher candidates with the background materials for storytelling, to study resource material for storytelling from a variety of cultures, and to develop techniques for storytelling. Actual experience in storytelling and opportunities for evaluating storytelling experiences will be provided.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8100 RESEARCH PROJECT (1-3 credits)

This course is designed for individual or group study and analysis of specific problems in schools dealing with curriculum and instruction in areas which have a broad scope of application rather than a specific level.

Prerequisite(s)/Corequisite(s): Approval of Advisor.

TED 8120 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)

TED 8120 is designed to enhance graduate candidates' knowledge of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs). As dedicated practitioners, reflective scholars, and responsible citizens, graduate candidates will learn strategies for designing and promoting effective multicultural and multilingual learning environments. This course includes an in-school, guided practicum through which graduate candidates must demonstrate competencies related to standards related to teaching ELs in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education's ESL teaching endorsement.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

TED 8130 LANGUAGE, CULTURE, AND POWER (3 credits)

This course will focus on the intersection of language, culture, and power in the schools. This seminar will research how each component impacts the students and teachers in the classroom.

TED 8150 ANTI-RACISM EDUCATION: PRINCIPLES AND PRACTICES (3 credits)

This course provides a theoretical analysis of race, racism and the implications for anti-racist education. In addition to exploring the key features of anti-racism education, the course also addresses other axes of oppression, namely, class and gender, with a critical focus on racialized power and privilege, and how such features function in the broader U.S. context as well as the schooling environment. Of equal importance is a critical interrogation of the historical, ideological, and political processes that produce and maintain racism. Course participants explore pedagogies, curriculum, and school leadership strategies as mechanisms for instituting anti-racism work in schools and community.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8160 ENGLISH AS A SECOND LANGUAGE STRATEGIES FOR PK-12 EDUCATORS (3 credits)

This course is designed to enhance graduate candidates' knowledge of PK-12 English as a Second Language (ESL) pedagogical and assessment strategies that address the needs of English Language Learners (ELs) in content area classrooms. As dedicated practitioners, reflective scholars, and responsible citizens, graduate candidates will be able to explore evidence-based pedagogical and assessment strategies to use in educational contexts serving ELs.

Prerequisite(s)/Corequisite(s): Graduate candidate status. Not open to non-degree graduate students.

TED 8170 DEVELOPMENTAL ASSESSMENT OF THE YOUNG CHILD (3 credits)

This course is designed as a survey of developmental assessment in early childhood education (ages birth to eight years). Selection of assessment tools and strategies, implementation, data collection, analysis of results, and teaching impact are addressed in context of key assessment purposes in the early childhood field.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8180 CULTURALLY RESPONSIVE TEACHING (3 credits)

This course includes an introductory analysis of the societal and institutional processes and problems which have bearing upon the education of children in urban settings. In addition, the course will focus on knowledge, skills and dispositions related to instructional strategies and classroom management needed for effective teaching in an urban environment.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8190 CONTEMPORARY ISSUES IN URBAN EDUCATION (3 credits)

This course is designed for candidates who wish to keep abreast of contemporary issues which confront the educational institution and teaching profession within the urban milieu.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8200 SOCIAL WORLDS OF THE YOUNG CHILD (3 credits)

This course will explore theoretical and cultural perspectives on the social and emotional development of young children. This course will also examine the relationship between social emotional development, guidance practices, democratic life skills, and school readiness.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8210 THE PRINCIPLES OF MULTICULTURAL EDUCATION (3 credits)

This course will develop practicing teachers' awareness of and skill in meeting the needs of P-12 students with regards to the areas of human understanding, acceptance and value. Candidates will examine existing attitudes towards various minority groups such as racial, ethnic, gender, exceptionality, etc. School materials and attitudes will also be examined in determining the effect they have on PK-12 students.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8220 PLAY AS A LEARNING MEDIUM IN EARLY CHILDHOOD EDUCATION (3 credits)

This course provides an in-depth examination of young children's play and its curricular role in the early childhood classroom. The origins, developmental outcomes, assessment, curricular implementation, and evaluation of play will be covered, with an emphasis on play as a major component of developmentally appropriate practice with young children. The focus is on teachers learning to help children become partners in the operation of the learning environment.

TED 8230 LITERATURE FOR THE YOUNG CHILD (3 credits)

Literature for the young child is examined through the lens of developmentally appropriate practice for informing educators' interactions with children and also for developing high-quality, literature-related projects of study across the early childhood (birth-through-age-eight) continuum.

Prerequisite(s)/Corequisite(s): Graduate Status.

TED 8240 FAMILY, SCHOOL, AND COMMUNITY PARTNERS (3 credits)

This course will examine the purposes and methods for developing family, school, and community partnerships. Candidates will explore characteristics of diverse families and develop the skills necessary for planning, design, implementation, and evaluation of effective partnerships in early childhood settings.

Prerequisite(s)/Corequisite(s): Graduate Status.

TED 8250 ASSESSMENT FOR CLASSROOM TEACHER (3 credits)

This course studies assessment principles, effective practices, and classroom assessment processes throughout the curriculum. The research regarding assessment for learning is studied and application is made to classroom practices.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8260 ADVANCED CURRICULUM IN EARLY CHILDHOOD (3 credits)

This course is designed to provide an in-depth examination of the processes used in selecting and implementing appropriate curricular content in programs for children ages three to eight years. Particular emphasis is on the role of the teacher as a dedicated practitioner and reflective scholar in the early learning environment.

TED 8270 TRENDS IN EARLY CHILDHOOD EDUCATION (3 credits)

This course provides a context for examining socio-political and research-based influences underlying trends in early childhood education at the local, national and international levels.

Prerequisite(s)/Corequisite(s): Graduate Status.

TED 8280 INTRODUCTION TO HUMAN RIGHTS IN P-12 EDUCATION (3 credits)

The course examines the intersection of human rights and P-12 education and prepares individuals to effectively work with and advocate for children and adolescents in educational settings. Students completing the course will be able to 1) demonstrate an increased understanding of fundamental human rights with a specific emphasis on education rights and the human rights of children and adolescents 2) create learning environments that elevate human rights in educational settings and 3) design developmentally appropriate instruction for children and adolescents on varied human rights topics.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8300 EFFECTIVE TEACHING PRACTICES (3 credits)

This course focuses on specific characteristics and behaviors of effective teachers. Course content will be derived from research on teaching and learning.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8310 HUMAN DEVELOPMENT - CONTEMPORARY IMPLICATIONS FOR TEACHING & LEARNING (3 credits)

This course examines human growth and learning from birth through late adolescence. It is designed to prepare teachers to synthesize information regarding developmental theory and subsequently apply this to lesson design and effective content-area pedagogy. Candidates will examine multiple frameworks related to the cognitive, social/emotional, and physical development of children and use those to analyze current educational practices in PK-12 schools. Cultural influences impacting human development and implications for educational practices will also be examined. The course will include field-based experiences.

Prerequisite(s)/Corequisite(s): Admission into a Teacher Education Department graduate program.

TED 8370 DATA VISUALIZATION AND MODELING FOR EDUCATORS (3 credits)

In the growing context of data informed decisions there is a need to answer "what if" questions in a variety of decision-making situations, as well as to display data both visually and interactively. This course will provide foundational skills in data visualization and modeling for educational decision making and instruction. It draws upon key fundamentals in data visualization (representing data trends visually) as well as key strategies in data modeling (interactive representations to explore possible outcomes). The course also explores the use of visualization and modeling technologies as well as assisting student learning with these tools. (Cross-listed with STEM 8370).

TED 8376 TEACHING AT THE MIDDLE LEVEL (3 credits)

This course will provide candidates with a variety of middle level teaching techniques and strategies in their classrooms that have been identified in current research literature as appropriate for the middle level. This course is designed to introduce candidates to the unique characteristics of the middle student, school, curriculum, history, and philosophy. (Cross-listed with TED 4370).

TED 8390 CLASSROOM MANAGEMENT IN PRACTICE (3 credits)

This course will provide graduate students with a survey of general classroom management methods for classrooms. Candidates will enhance their understanding of three basic components of effective pedagogy: 1) proactive classroom management, 2) high-impact instructional strategies that impact student engagement and learning, 3) behavior management techniques that incorporate practice, feedback, research, and reflection.

Prerequisite(s)/Corequisite(s): Graduate standing

TED 8410 IMPROVEMENT OF INSTRUCTION: SPECIAL TOPICS (3 credits)

This course provides an in-depth study of instructional theory, research, and methodology designed to extend teachers' professional knowledge base and enhance their pedagogical skills. When offered, a course may be limited to improvement of instruction in a selected subject area. (Cross-listed with STEM 8410).

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8420 TRENDS AND TEACHING STRATEGIES IN SCIENCE EDUCATION (3 credits)

This course is designed for the graduate candidate in the Department of Teacher Education whose study program emphasis is in the area of science education. The course will describe and analyze past and present trends in science education, including curricula, teaching-learning strategies, the laboratory and instructional materials. The course focus will be K-12 and as such is meant to serve both elementary and secondary graduate candidates. (Cross-listed with STEM 8420).

TED 8430 SCHOOL CURRICULUM PLANNING (3 credits)

This course is designed to provide advanced degree candidates with an understanding of the theory, principles, and practices utilized in curriculum planning in American schools. This course focuses on the principles and practices of effective curriculum planning and teachers' part in these processes as curriculum developers. (Cross-listed with STEM 8430).

TED 8470 TEACHING THE LANGUAGE ARTS (3 credits)

This course is designed to enhance candidates' knowledge of best practices in teaching reading, writing, listening, and speaking. Candidates will learn about research supported appropriate language arts instruction strategies and assessments. This course will inform graduate students as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

TED 8480 FOUNDATIONS OF BILINGUAL EDUCATION (3 credits)

This course is designed to give future and current teachers a thorough understanding of the theoretical, political, historical, and practical foundations of bilingual/multicultural education in the United States. As dedicated practitioners, reflective scholars, and responsible citizens, graduate students will have knowledge of factors that contribute to effective multilingual and multicultural learning environments that promote individual and societal bilingualism. Advanced Spanish language proficiency required.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8490 SPANISH LANGUAGE ARTS (3 credits)

This course is designed to reinforce first and second language acquisition theory as it relates to dual immersion settings. Best practices for developing and reinforcing bilingualism and biliteracy are presented and used for planning and delivering instruction. Spanish fluency is required for the course.

Prerequisite(s)/Corequisite(s): Graduate status required for graduate students pursuing the bilingual education endorsement and concentration (does not lead to a Nebraska Department of Education teaching endorsement). Advanced Spanish language proficiency required.

TED 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)

This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with AVN 8510, STEM 8510).

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8520 SCHOOL LIBRARY CAPSTONE (3 credits)

Candidates will gain direct experience and an understanding of the theories, concepts and activities integral to public services, technical services, and the administration in a 21st Century library and information agency at an assigned field site. Candidates will demonstrate the ability to plan, develop, and implement programming and services for patrons and diverse learners in their schools and communities.

Prerequisite(s)/Corequisite(s): There are no course prereqs for the Capstone Practicum but candidates must be in the final 2 semesters of their library media program & must complete an application for the Practicum the semester prior to their practicum. Not open to non-degree grads.

TED 8530 INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS (3 credits)

This course is designed to provide graduate candidates with the opportunity to enhance interdisciplinary instructional strategies, curricular understanding, and lesson preparation in the areas of science, technology, engineering, the arts, and mathematics (STEAM) through analysis and reflective practices in STEAM. This course provides hands-on experiences that model STEAM integration techniques, including how to effectively engage with community agencies and partners to bring STEAM into the classroom. This course emphasizes not only the technical aspects of STEM, but also the creativity and innovation that arts integration can add to enhance STEM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. (Cross-listed with STEM 8530).

Prerequisite(s)/Corequisite(s): This course includes both teacher education and STEAM related topics and therefore fits into both TED and STEM program coursework.

TED 8540 DIGITAL CITIZENSHIP (3 credits)

The course explores key concepts of Digital Citizenship pertaining to digital law, digital ethics, digital interaction, digital literacy, and cyber-security. The course addresses an educator's role as technology leader in both policy and practice to establish a responsible and robust digital learning community in P-12 schools.

Prerequisite(s)/Corequisite(s): Graduate Standing/Status

TED 8550 TECHNOLOGY FOR CREATIVE AND CRITICAL THINKING (3 credits)

Technology for Creativity and Critical Thinking investigates the use of visual media tools in P-12 digital learning environments. This course provides candidates an opportunity to develop leadership skills and dispositions relevant to advocacy initiatives addressing policy and best practice in the use of technology in P-12 schools.

TED 8560 TECHNOLOGY FOR DIVERSE LEARNERS (3 credits)

This course will engage candidates that facilitate the use of instructional technology, pedagogy, and strategies to better meet the needs of diverse learners. Candidates will explore categories of diverse learners relevant and specific to their own organizations and learning environments to ensure candidates can effectively research and implement assistive technology, instructional technology, and applications to enhance learning opportunities for children and youth.

TED 8570 INTERNET IN THE LEARNING PROCESS (3 credits)

This course is designed to help educators actively explore instructional implementations of Internet use appropriate for use in K-12 classrooms, successful diffusion of Internet innovations in educational environments, and emerging multicultural "breaking down the walls of the classroom" concepts available to educators through Internet use.

TED 8580 ONLINE TEACHING AND LEARNING (3 credits)

Online Teaching and Learning is a course for education professionals that investigates the use of online tools for planning, preparing and assessing student learning in a digital environment. The course will prepare candidates to provide leadership for digital initiatives within learning organizations. The course encourages educators to explore methods of virtual lesson delivery and online assessment through direct instruction and online study.

Prerequisite(s)/Corequisite(s): Graduate Admissions status

TED 8590 TEACHING AND LEARNING IN DIGITAL ENVIRONMENTS (3 credits)

This course is an introduction to future-ready information and instructional technologies for use with children and youth. Course will cover a diverse array of technical literacies that serve as content and skill goals for today's children and youth in P-12 schools and other learning organizations.

TED 8610 TEACHING OF WRITING THROUGHOUT THE CURRICULUM (3 credits)

This course is designed to enhance candidates' knowledge of best practices in teaching writing. Candidates will learn about research supported appropriate writing instruction strategies and assessments. Candidates will be writing extensively throughout the course as they examine the varied ways writing genres extend throughout the curriculum. This course will inform candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8620 ADVANCED SUPPORT OF INSTRUCTIONAL TECHNOLOGY ENVIRONMENTS (3 credits)

This course is designed for P-12 educators who wish to become better advocates of technology integration or become technology coordinators or school technicians. Course enrollees will evaluate and implement advanced strategies to keep technology up to date, effectively use technology, and properly manage technology in a school setting.

TED 8650 CHILDREN'S LITERATURE AND EDUCATION (3 credits)

Candidates in this graduate course will explore story, poetry, drama, and informational materials for elementary students with an emphasis on methods for including literature in school curricula with an awareness of diverse children's lives, discourses, and understandings. Examines current issues, recent materials, and the theoretical and research base of this field to develop meaningful and creative learning, literacy, and library experiences for children.

TED 8660 YOUNG ADULT LITERATURE (3 credits)

This course extends candidates' knowledge of literature for young adults. The course addresses current trends in the genre and engages candidates in activities that support pedagogies in basic, visual, information and cultural literacies.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8695 LITERACY AND LEARNING (3 credits)

This course examines ways in which reading and writing can facilitate student learning in content areas studies (e.g., science, social studies, physical education, art, music, and math). The main focus is on teaching practices that engage students and contribute to their learning, integrating their background knowledge and cultural experiences with content area literacy. (Cross-listed with TED 3690).

TED 8700 ELEMENTARY EDUCATION CAPSTONE COURSE (3 credits)

This course is designed as a required, final capstone course for Elementary Education graduate students to be taken in the last nine hours of the Master of Science program. A grade of B or better must be received in TED 8700 to show satisfactory completion of the course and for program completion.

Prerequisite(s)/Corequisite(s): Permission of the Elementary Education Program Chair. Not open to non-degree graduate students.

TED 8710 RESEARCH AND INQUIRY (3 credits)

Candidates will demonstrate an understanding of the theories, concepts and activities integral to reference resources and services in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of effective search strategies and efficient use of both print and digital resources, design and promote information literacy instruction that is developmentally appropriate, and understand the legal and ethical responsibilities integral to positive and proactive reference services for patrons and diverse learners.

TED 8720 INTRODUCTION TO INSTRUCTIONAL COACHING IN PK-12 EDUCATION (3 credits)

This course examines the prominent coaching models used in PK-12 schools (i.e. teacher-centered coaching, student-centered coaching, cognitive coaching, transformational coaching). Candidates completing this course will be able to: develop an understanding of best practices in coaching, create a common lexicon for the role of an instructional coach, engage in the coaching cycle, and create a personal vision for their work as a coach. Candidates will engage in a field based experience to apply their learning.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8726 SPECIAL LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the major types of 21st Century special libraries and information agencies. Candidates will demonstrate an understanding of social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the special libraries and information agencies. (Cross-listed with TED 4720).

TED 8740 ORGANIZATION OF INFORMATION (3 credits)

This course addresses current theory and best practice in descriptive and subject cataloging and classification of information resources that align with school library standards and guidelines. Candidates will demonstrate the ability to integrate the legal and ethical standards of their discipline in ensuring access to information and ideas for a diverse array of learners in schools and communities.

TED 8746 ORGANIZATION OF INFORMATION (3 credits)

Candidates will demonstrate a basic understanding of the theories, concepts and activities of descriptive and subject cataloging and classification procedures of information resources in 21st Century libraries and information agencies.

TED 8760 MANAGING COLLECTIONS IN LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the theories, concepts and activities integral to proactive collection management in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of community analysis, collection analysis, and the ability to conduct critical evaluations of a diverse array of information resources.

TED 8770 INTEGRATING TECHNOLOGY INTO INSTRUCTIONAL DESIGN (3 credits)

The purpose of this course is to introduce participants to effective methods for the integration of educational media into instructional design and provides participants (1) knowledge of broad instructional design theories and models with a concentration on constructivism, (2) experience in designing instruction that effectively integrates technology into the teaching-learning process, and (3) experience in producing instructional media. The course is intended to provide fundamentals in the selection, evaluation, production, application and utilization of educational media. This course is designed for in-service library media or instructional technology specialists as well as regular classroom teachers.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8800 MULTICULTURAL LITERATURE FOR CHILDREN AND YOUTH (3 credits)

This is designed as a graduate-level course dealing with utilization of literary materials representing authors and content from multiple perspectives, particularly authors whose cultural and ethnic backgrounds differ from the mainstream.

TED 8810 STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH (3 credits)

This course will explore theoretical and foundational pedagogical strategies in early childhood education used to deliver integrative STEM education in the preK-12 setting. In order to understand the research and practice of STEM disciplines in preK-12, it is necessary to examine the social, cultural, political, and functional aspects that influence them. Candidates will investigate the nature of STEM education, Early Childhood Education (ECE) pedagogy and perspectives of learning, content knowledge and dispositions for educators of STEM topics, and issues of access and equity for STEM education through literature, discussion, and practice. This course includes a community outreach component in which candidates will use qualitative methods to observe class topics in public settings. (Cross-listed with STEM 8810)

Prerequisite(s)/Corequisite(s): Graduate status

TED 8816 PRINCIPLES AND PHILOSOPHY OF INTEGRATING CAREER AND ACADEMIC EDUCATION (3 credits)

This course presents the philosophies and principles/practices underlying how schools can better prepare students for the workplaces of the future with emphasis on the integration of career education within broader academic preparation. The roles and responsibilities of teachers, counselors, and administrators in implementing integrated approaches will be examined. (Cross-listed with TED 4810).

TED 8820 CAPSTONE IN STEM EDUCATION (3 credits)

This course will prepare graduate students for the integration, articulation, and differentiation of curriculum and instruction in and between the STEM core areas of Science, Technology, Engineering, and Mathematics. Special emphasis will be on using the STEM core content to help provide applications and context to existing science and mathematics curriculum and instruction and on providing leadership in developing curriculum for mathematics and science dependent courses in engineering and technology.

Prerequisite(s)/Corequisite(s): The student must be enrolled in one of the following concentrations: STEM, mathematics, science, technology; and be enrolled in the last six hours of their program of study. Not open to non-degree graduate students.

TED 8830 LEADERSHIP AND MANAGEMENT IN SCHOOL LIBRARIES (3 credits)

The course explores best practice for effective leadership and management of 21st Century school libraries. Candidates will gain a comprehensive knowledge of the theories, policies and processes involved in directing a school library in support of the personal and academic success of P-12 students. Candidates will explore and employ ethical codes of conduct in their profession to ensure school libraries meet the needs of their diverse array of patrons.

TED 8840 ENGINEERING EDUCATION EXTERNSHIP (3 credits)

This graduate course will address the best practice of effective teaching and learning in Engineering Education through professional collaboration between K-12 STEM (Science, Technology, Engineering, and Mathematics) teachers and practicing engineering professionals. K-12 STEM teachers, as graduate students in the course, will learn about and address real-world applications and career opportunities in STEM education through the externship. K-12 STEM teachers will research and develop authentic, experiential learning opportunities and projects for the classroom through course supports associated with lecture, discussion, and partnerships with practicing engineering professionals. The externship will be integral to the K-12 STEM teachers' experiences and work in this course, as the course models effective professional collaboration founded on experience, knowledge, and skills to achieve a curriculum enhancement goal. (Cross-listed with STEM 8840).

Prerequisite(s)/Corequisite(s): Graduate status. Not open to non-degree graduate students.

TED 8850 PROFESSIONAL COLLABORATION (3 credits)

This course is designed to prepare candidates to work in collaboration with other professionals and parents to create a learning environment that enhances the potential for academic success and improvement of instructional practices. The focus will be on collaborative problem solving. (Cross-listed with SPED 8980).

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

TED 8856 COORDINATION TECHNIQUES IN WORK-BASED LEARNING (3 credits)

This course reviews responsibilities and techniques of coordination for the work-based learning teacher-coordinator and/or work-based learning coordinator, with special emphasis on administration of the part-time cooperative program and analysis of the laws and regulations governing this program. (Cross-listed with TED 4850).

TED 8860 INVENTION & INNOVATION IN ENGINEERING EDUCATION (3 credits)

This course will address emerging trends in STEM education for in-service K-12 STEM teachers with a focus on the use of engineering education practices in teaching and learning content. STEM teachers will receive applicable, hands-on, classroom-ready experiences through lecture, professional instruction, and projects that will emphasize product design and creation through the Engineering Design Process. The Engineering Design Process will be central to the candidates' experiences in this course and will be used by the candidates to develop curriculum utilizing emerging trends to supplement current course content and standards. Interdisciplinary planning will be central to the course. (Cross-listed with STEM 8860).

Prerequisite(s)/Corequisite(s): Graduate status is required.

TED 8880 LEADERSHIP IN EARLY CHILDHOOD EDUCATION (3 credits)

This course seeks to prepare candidates with leadership skills in the early childhood field that will empower them to initiate and implement changes in programs serving young children and families. Candidates will explore and apply frameworks of leadership and analyze policy, governance, and power structures that can impact change. Candidates will also learn effective advocacy skills to positively influence policies and practices in program and governance structures. Lastly, candidates will examine approaches for developing new leaders in early childhood education through reflective supervision and mentorship.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8900 SECONDARY EDUCATION GRADUATE CAPSTONE (3 credits)

The Secondary Education Graduate Capstone course provides candidates with an opportunity to apply the knowledge, skills, and dispositions acquired during their program to content specific synthesis activities in their respective disciplines. Candidates will demonstrate their ability to integrate information from program coursework in the design, development and presentation of a final capstone project related to teaching and learning in 21st Century educational environments.

Prerequisite(s)/Corequisite(s): 30 credit hours towards degree completion; Permission required by Program Advisor. Not open to non-degree graduate students.

TED 8970 INDEPENDENT STUDY (1-3 credits)

This is a specially designed course taken under the supervision of a graduate faculty member to accommodate the student who has identified a focus of study not currently available in the departmental offerings and who has demonstrated capability for working independently.

Prerequisite(s)/Corequisite(s): Permission of Department and Graduate Faculty member.

TED 8980 PRACTICUM: VARIOUS CONTENT AREAS (1-6 credits)

This course is designed to provide school professionals with a guided, supervised, field experience that will develop and enhance the knowledge, skills, and dispositions requisite of a successful educational practitioner. **Prerequisite(s)/Corequisite(s):** Prerequisites for the course will vary, depending on the content/discipline area. See syllabus for specific discipline area.

TED 8990 THESIS (1-6 credits)

This course is an independent research project completed under the direction of a thesis advisor and required of all candidates pursuing a Master of Science with Thesis option.

Prerequisite(s)/Corequisite(s): Completion of Selective Retention and approval of advisor. Not open to non-degree graduate students.

TED 9100 THEORIES, MODELS, AND PRACTICES OF LITERACY (3 credits)

This course develops a framework about the theories, models, practices, processes, and related research associated with literacy. The content looks across grade levels and student populations, and across social and cultural contexts in an examination of factors that impact theories and processes of literacy.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 9110 PRINCIPLES AND PRACTICES FOR TEACHING READERS (3 credits)

This graduate course for both elementary and secondary teachers is open to any candidate who has graduate standing in education. The purpose of the course is to develop a broad understanding of the reading process as well as materials and instructional strategies that support students who are emerging, developing, and maturing as readers in all areas of the curriculum.

TED 9130 ASSESSMENTS AND INTERVENTIONS - ELEMENTARY (3 credits)

This course is designed for graduate candidates enrolled in the Literacy Masters or Reading Specialist endorsement program. The purpose of this course is to develop an understanding of theory and research as it relates to assessment and evaluation and instructional approaches that support reading development. This knowledge is applied through a practicum experience with elementary students in which candidates integrate knowledge and practices related to assessment and evaluation of readers' strengths and needs.

TED 9140 ASSESSMENT AND INTERVENTION - SECONDARY (3 credits)

This course is designed for graduate candidates in literacy endorsement and Master's programs. The purpose of this course is to develop an understanding of theory and research as it relates to assessment and evaluation and instructional approaches as they relate to reading difficulties among middle and high school students. Included in this course is knowledge about the role and responsibility of a literacy leader as it relates to coaching, mentoring, supervision, and evaluation of a reading program. Application of this information is demonstrated through a practicum experience with middle and high school students.

Prerequisite(s)/Corequisite(s): TED 9100; TED 9110 concurrent with, or prior to TED 9140.

TED 9180 LITERACY RESEARCH SEMINAR (3 credits)

This course will develop advanced degree candidates' understanding and ability to critically examine current literacy research through work with (1) scientific methods of quantitative and qualitative research (2) discussion of historical trends in literacy research, (3) designs, methods, and tools of research, and (4) reviewing and critically examining current research studies in literacy. These examinations will be conducted from the perspectives of knowledge about literacy processes, classroom practice, and influence of previous research results. Teacher candidates will apply these issues in an action research project they design.

TED 9190 LITERACY GRADUATE CAPSTONE (3 credits)

This course is designed to help Literacy Masters students synthesize the knowledge gained from the program in order to serve as literacy leaders within the complex organizations of classrooms, schools, and school districts. In this course students will integrate their learning across the program in order to organize their future activities in teaching, leadership, advocacy, and engagement opportunities in ways that honor the interrelationships among classroom, school, sociocultural and economic contexts. They will prepare to engage with all literacy education stakeholders in cutting edge, innovative ways that advance both the learning of PK-12 students and the literacy education field.

Prerequisite(s)/Corequisite(s): This course is designed as a capstone event. Accordingly, students must have no more than 6 additional remaining credit hours of coursework. Permit to enroll required.

TED 9200 CRITICAL PEDAGOGY: TEACHING FOR SOCIAL JUSTICE (3 credits)

This course examines ways in which ideology, power, and culture intersect in P-12 educational settings. Undemocratic, inequitable, and oppressive structures are identified. Possibilities for democratic, equitable transformations are proposed.

Prerequisite(s)/Corequisite(s): Graduate status

Management Information Systems

Degree Programs Offered

- Management Information Systems, MS (p. 1244)
- Business Administration, MBA and Management Information Systems, MS (MBA/MIS (p. 1036))
- Public Administration, MPA and Management Information Systems, MS (MPA/MIS (p. 1254))

Certificates Offered

- Data Analytics Certificate (p. 1256)
- Data Management Certificate (p. 1258)
- Information Assurance Certificate (p. 1259)
- Project Management Certificate (p. 1260)
- Systems Analysis and Design Certificate (p. 1262)

ISQA 8016 BUSINESS INTELLIGENCE (3 credits)

This course intends to provide graduate students in-depth exposure to the growing field of business intelligence. Business intelligence (BI) consists of the set of concepts and techniques used to analyze business data in support of decision-making and planning. BI spans a number areas of management information systems, including Decision Support Systems (DSS), Enterprise Resource Planning (ERP), Data Warehousing, Knowledge Management, Customer Relationship Management, Data Mining, and others.

Prerequisite(s)/Corequisite(s): (ISQA 4150 or ISQA 8156) and ISQA 8040 and ISQA 8050. Not open to non-degree graduate students.

ISQA 8030 INFORMATION SYSTEMS AND ETHICS (3 credits)

This course gives you an introduction to organizations and the role that information and information systems play in supporting an organization's operations, decision-making processes, quality management, and strategic activities. The course provides an introduction to the management of information systems function, the strategic and regulatory issues of telecommunications, and ethical and legal issues related to information systems.

Prerequisite(s)/Corequisite(s): Admission into the MS in MIS program.

ISQA 8040 AN OVERVIEW OF SYSTEMS DEVELOPMENT (3 credits)

The course presents an overview of the systems development lifecycle and database development. The course will focus on theory, current tools and techniques that the system developer can use to develop and document information systems. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8050 DATA ORGANIZATION AND STORAGE (3 credits)

The course will provide concepts of data organization, data storage, and data transfer through computer networks. The performance implications of various design decisions will be explored. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8060 RESEARCH IN MIS (3 credits)

This course covers research methods and their application to the development and evaluation of management information systems. Also covered is the relationship between organization theory and IS research.

Prerequisite(s)/Corequisite(s): CIST 2500, CIST 2100, and ISQA 8040, or permission of the instructor.

ISQA 8080 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (1-5 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s)/Corequisite(s): 1) Permission of the instructor. 2) Additional prerequisite courses may be required for particular course offerings.

ISQA 8086 SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS (1-5 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ISQA 4000)

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 8106 INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION (3 credits)

This course examines the frameworks and tools used to develop an organization's information system architecture. It provides the analytical skills and conceptual frameworks with which to make recommendations and decisions regarding the integration of information technology components into an information system architecture. (Cross-listed with ISQA 4100)

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 3310

ISQA 8136 INFORMATION TECHNOLOGY FOR DEVELOPMENT (3 credits)

Information Technology for Development (ITD) is the implementation and evaluation of information technology infrastructures to stimulate economic, social and human development. In this service-learning course, students will learn and apply ITD concepts for developing and adding value through IT by working with small business entrepreneurs in Omaha or rural Nebraska. Students will evaluate micro-business technology needs, prepare business technology plans, provide training, and implement appropriate solutions, to the extent possible within a semester class. (Cross-listed with ISQA 4130)

Prerequisite(s)/Corequisite(s): Though not required, the following courses or their equivalent would provide the necessary background : CIST 1100, CIST 1300, ISQA 3210, ISQA 3310, ISQA 3400. Not open to non-degree graduate students.

ISQA 8156 ADVANCED STATISTICAL METHODS FOR IS&T (3 credits)

This course emphasizes the application and interpretation of statistical methods including design of experiments, analysis of variance, multiple regression, and nonparametric procedures and the use of statistical computer packages. The intent is to develop quantitative abilities needed for quantitatively intensive jobs and for advanced study in management information systems, computer science and information technology. (Cross-listed with ISQA 4150)

Prerequisite(s)/Corequisite(s): CIST 2500 or equivalent (at least one course in statistics)

ISQA 8160 APPLIED DISTRIBUTION FREE STATISTICS (3 credits)

The primary objective of this course is to expose students to methods of analyzing data from non-normal populations including binomial tests, contingency tables, use of ranks, Kolmogorov-Smirnov type statistics and other selected topics.

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156

ISQA 8166 INTRODUCTION TO ENTERPRISE RESOURCE PLANNING (3 credits)

Introduction to Enterprise Resource Planning (ERP) is designed to expose students to the primary enterprise application that forms the information systems (IS) infrastructure for most large organizations today. The primary purpose of this course is for students to gain an understanding of the enterprise wide, cross functional nature of ERP software. In the process of learning about ERPs, the students develop "hands on" experience with the largest and most well-known ERP application, SAP. (Cross-listed with ISQA 4160, SCMT 4160)

Prerequisite(s)/Corequisite(s): CIST 2100 or equivalent. Not open to non-degree graduate students.

ISQA 8180 ELECTRONIC COMMERCE (3 credits)

Electronic Commerce is the digital enablement of transactions between multiple parties. A multitude of technologies, tools and applications have brought about changes in business, and society that require careful consideration. Students are given an overview of electronic commerce business models and required to apply these to solve business problems or take on opportunities presented. They will cover topics such as social networking, electronic markets, and political and ethical issues associated with electronic commerce, and business plans for technology ventures. They will apply these concepts using Web 2.0 tools, mobile applications and website design assignments.

ISQA 8196 PROCESS REENGINEERING WITH INFORMATION TECHNOLOGY (3 credits)

Business process reengineering issues are examined. Reengineering concepts and methods are introduced. Additional special project(s) are required. SAP will be introduced. (Cross-listed with ISQA 4190)

Prerequisite(s)/Corequisite(s): CIST 2500; prerequisite/co-requisite ISQA 4110.

ISQA 8206 INFORMATION AND DATA QUALITY MANAGEMENT (3 credits)

The course primarily focuses on developing an in-depth understanding of Data and Information Quality (DQ and IQ) concepts and issues. On completing this course students will be able to understand and use DQ and IQ Concepts in Information Systems projects, be able to recognize various patterns of Data and Design Deficiencies in Systems and be able to suggest appropriate DQ and IQ improvement plans in light of known deficiencies in systems. (Cross-listed with ISQA 4200)

Prerequisite(s)/Corequisite(s): CIST 2500

ISQA 8210 MANAGEMENT OF SOFTWARE DEVELOPMENT (3 credits)

This course should encourage you to think critically about aspects of software development that make it difficult and strategies to mitigate these challenges. This course integrates concepts from software engineering, management science, psychology, and organizational behavior to identify, understand, and propose solutions to problems associated with software development. We examine and consider issues from various perspectives, such as the project manager, development team, senior management, and project sponsor. This course prepares students for various roles within a software development effort including leadership positions in software development. Students will practice software project management and agile methods of managing projects in a semester long team project using contemporary project and development methods.

Prerequisite(s)/Corequisite(s): ISQA 8040 or equivalent. Not open to non-degree graduate students.

ISQA 8220 ADVANCED SYSTEMS ANALYSIS AND DESIGN (3 credits)

This course is a systems analysis and design course for systems and business analysts. The course presents an overview of object-oriented system analysis and design. The course will then focus on theory, best practices, and modern methodologies that analysts can use to analyze and design information systems.

Prerequisite(s)/Corequisite(s): ISQA 8040 or (ISQA 4110 and ISQA 4120) or equivalent and ISQA 8050 or ISQA 3310 or equivalent

ISQA 8250 FACILITATION OF COLLABORATIVE PROBLEM SOLVING (3 credits)

The course focuses on the facilitation of collaborative problem solving and decision making processes. Students learn how to design and facilitate collaborative workshops, with support from both paper-based and electronic meeting tools. The course is hands-on and experiential, with students working in small teams to conduct real workshops.

ISQA 8306 DATABASE ADMINISTRATION (3 credits)

This course is designed to give students an applied, practical introduction to database administration. Students will gain an understanding of the functioning of a database management system and its relationship to the computing environment in which it runs. They will learn the concepts, principles, and techniques necessary to carry out such functions as database object creation, storage management, capacity planning, performance tuning, backup and recovery, and security management. Each semester the course will focus on one commercial database management system (DBMS), such as Oracle. (Cross-listed with ISQA 4300)

Prerequisite(s)/Corequisite(s): ISQA 8040 or ISQA 3310 or CSCI 4850. Not open to non-degree graduate students.

ISQA 8310 IT INFRASTRUCTURE & CLOUD COMPUTING (3 credits)

This course provides a graduate-level introduction to the business and technical decisions around technical infrastructure. It covers topics related to computer and systems architecture and communications networks, with a focus on the technical and business decisions around technology. Students completing the course will be able to understand and design network infrastructure, evaluate cloud computing offerings, and communicate their decisions. The course covers hardware, software, and cloud computing technologies.

ISQA 8340 APPLIED REGRESSION ANALYSIS (3 credits)

The primary objective of this course is to expose students to regression models and applications with particular emphasis on applying these concepts to IT research. Topics to be discussed include: Foundations of regression analysis using least squares procedures; model formulation, stepwise regression, transformations; graphical methods, estimation; inference; influence diagnosis; matrix formulation, multicollinearity, time series, and nonlinear models.

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156, not open to non-degree graduate students.

ISQA 8380 ENTERPRISE ARCHITECTURE AND SYSTEMS INTEGRATION (3 credits)

This course is designed to give students grounding in the concepts, issues, and tools needed to manage enterprise architecture, distributed systems & Internet-based environments. The goal of the course is to equip students to make the architecture and infrastructure-related decisions needed for successful development and use of contemporary client/server and Internet-based systems. Topics include middleware, architecture, XML, JSON, web services, service-oriented architecture, enterprise application integration, distributed computing services, Model View Controller (MVC) development frameworks.

Prerequisite(s)/Corequisite(s): ISQA 8310 and ISQA 8050 or equivalent; permit required.

ISQA 8410 DATA MANAGEMENT (3 credits)

The course provides in-depth coverage of such areas as: the relational model, SQL, data modeling, data quality management, database design, data warehousing, business intelligence, document and content management, NoSQL systems, and data governance. The course offers a mix of theoretical treatment and hands-on application. Current DBMS and data modeling software will be used.

Prerequisite(s)/Corequisite(s): ISQA 8050 or equivalent, permit only.

ISQA 8420 MANAGING THE I.S. FUNCTION (3 credits)

The course provides a focus on the business management implications of the information explosion. The course is organized around a management audit of the information services activity to help present and future managers recognize and implement effective information services management.

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8450 NOSQL AND BIG DATA TECHNOLOGIES (3 credits)

The course will cover topics in the area of NoSQL and Big Data management. The course is intended to get students familiarized with NoSQL and Big Data technologies, explore how these database technologies differ conceptually from traditional relational database technologies, understand their applications, uses, advantages, and disadvantages, and provide hands-on experience with NoSQL and Big Data databases. The course offers a mix of theoretical treatment and hands-on application of the discussed NoSQL and Big Data technologies.

Prerequisite(s)/Corequisite(s): Prior exposure to data management is expected. The prereq is: ISQA 3310, ISQA 8040, CSCI 4850, or work experience that has given you a comparable grounding in database concepts and technologies; in this case permission by the instructor is needed.

ISQA 8460 INTERNET OF THINGS (IOT), BIG DATA AND THE CLOUD (3 credits)

This course introduces the Internet of Things (IoT). It provides an overview of a number of technologies and research disciplines that enable the Internet to reach out into the real world of physical objects. In the future, the "Things" in question may have identities and virtual personalities, operating in smart spaces using intelligent interfaces to connect and communicate with the social, environmental, and user context.

Prerequisite(s)/Corequisite(s): Basic Web Development using HTML/CSS and some MVC framework. The equivalent of two semester exposure to programming.

ISQA 8510 MANAGING USABILITY FUNCTIONS IN SYSTEMS DEVELOPMENT ORGANIZATION (3 credits)

This course deals with usability of information systems, from the perspective of organizing and managing usability functions in a systems development organization. After briefly introducing the background to system usability and usability principles, the course focuses specifically on the introduction, organization, support, management and evaluation of usability functions in systems development organizations. The role of the usability professional in the organization is emphasized.

Prerequisite(s)/Corequisite(s): Two semesters of programming or demonstrable experience and ISQA 8040 or equivalent, not open to non-degree graduate students.

ISQA 8525 GRAPHICAL USER INTERFACE DESIGN (3 credits)

This course is an introduction to interaction design with a primary emphasis on designing usable and useful computer interfaces. Students will learn the principles of interface design grounded in a fundamental understanding of human cognitive processes. They will learn how end-users develop and use mental models of interaction and will apply this knowledge to the design of interfaces for real-world applications. A design project will challenge students to plan their own designs, to develop interfaces and to integrate them into a working application prototype, to test their application with real users, and to effectively communicate the overall results. (Cross-listed with ISQA 3520)

Prerequisite(s)/Corequisite(s): CIST 1300

ISQA 8530 E-COMMERCE SECURITY (3 credits)

The course will integrate concepts, principles, and technologies from business, telecommunications, and computer science to identify, understand, and propose solutions to the security threats to e-commerce. **Prerequisite(s)/Corequisite(s):** CIST 2100 and ISQA 8310. Not open to non-degree graduate students.

ISQA 8546 COMPUTER SECURITY MANAGEMENT (3 credits)

The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST4540, CYBR 4540, CYBR 8546)

Prerequisite(s)/Corequisite(s): IASC 4360 or permission of the instructor.

ISQA 8560 INFORMATION WARFARE AND SECURITY (3 credits)

This course will study the nature of information warfare, including computer crime and information terrorism, as it relates to international, national, economic, organizational, and personal security. Information warfare policy and ethical issues will be examined.

Prerequisite(s)/Corequisite(s): CIST 2100 or BSAD 8030 or ISQA 8030, or permission of instructor required.

ISQA 8570 INFORMATION SECURITY POLICY AND ETHICS (3 credits)

The course will cover the development and need for information security policies, issues regarding privacy, and the application of computer ethics. (Cross-listed with IASC 8570)

Prerequisite(s)/Corequisite(s): CIST 2100 or BSAD 8030, or permission of instructor.

ISQA 8580 SECURITY RISK MANAGEMENT AND ASSESSMENT (3 credits)

The purpose of this course is to prepare the student for managing information security at the organizational level. This course will combine concepts from strategic management, decision science and risk analysis to prepare the student to integrate security issues into an organizational strategic planning process.

Prerequisite(s)/Corequisite(s): CIST 2100 or ISQA 8030. Not open to non-degree graduate students.

ISQA 8596 IT AUDIT AND CONTROL (3 credits)

This course explores organizational and managerial issues relevant to planning and conducting IT audit and control activities. The course covers the following conceptual areas: business risks and the management of business risk, IT risk as a component of business risk, the need to manage IT risks, and the basic type of controls required in a business system in order to control IT risks. Issues associated with new risks created by the use of the internet for business applications and electronic business are also covered. (Cross-listed with ISQA 4590)

Prerequisite(s)/Corequisite(s): A solid understanding of business foundations such as accounting and introductory auditing and exposure to the IS discipline is essential for success in this course. Permission of instructor is required to enroll.

ISQA 8600 FROM DATA TO DECISIONS (3 credits)

This course focuses on inquiry-driven data preparation and exploratory analysis skills for audience-driven, decision-oriented data analysis. Students gain experience in data evaluation, cleaning, documentation, and exploration with basic descriptive statistics and visualizations.

ISQA 8700 DATA MINING: THEORY AND PRACTICE (3 credits)

This course provides students theoretical issues as well as practical methods for conducting data mining process, including the implementation of a warehouse. After covering the essential concepts, issues, techniques to build an effective data warehouse, this course emphasizes the various techniques of data mining, such as association, classification, clustering and prediction for on-line analyses within the framework of data warehouse architectures. This course also promotes students to conduct a real-life data analyzing project in Big Data Era.

Prerequisite(s)/Corequisite(s): ISQA 8050 and ISQA 8310 and ISQA 8040, not open to non-degree graduate students.

ISQA 8720 APPLIED STATISTICAL MACHINE LEARNING (3 credits)

This course focuses on advanced techniques in the analysis and evaluation of data, using both supervised and unsupervised methods. It covers the main types of statistical learning models needed for complex data analytics problems, as well as aspects of model development and optimization. Topics include: Linear and Non-Linear Regression Models, Classification, Resampling Methods, Model Selection and Regularization, Decision Trees, Model Boosting and Bagging, Support Vector Machines, and Clustering methods. This is an applied, hands-on course that will use a state-of-the-art statistical tool to implement the discussed approaches in assignments and a course project and focuses on the understanding and application of the concepts.

Prerequisite(s)/Corequisite(s): ISQA 8156 (B- grade or better) and the following topics: The equivalent of two classes of statistics and/or advanced mathematics and a minimum of one semester of applying R in courses and/or projects

ISQA 8736 DECISION SUPPORT SYSTEMS (3 credits)

This course examines a set of information systems which specifically support managerial decision makers: Decision Support Systems, Group Decision Support Systems, Executive Information Systems, Data Warehouses, Expert Systems, and Neural Networks. This course explores the development, implementation, and application of these systems, how these systems can be applied to current business problems, as well as how organizational issues impact the implementation and usage of these systems. (Cross-listed with ISQA 4730)

Prerequisite(s)/Corequisite(s): CIST 2100 or equivalent.

ISQA 8750 STORYTELLING WITH DATA (3 credits)

This course provides an in-depth study of how to build a compelling story using data for business professionals to make winning arguments, it provides an overview of a number of technologies and research disciplines that enabled the power of data visualization. Data visualization is critical to managing large volumes of data, and can be defined as the science (analytical) and art (design) of manipulating and presenting data for expression and cognitive recognition. Data visualization involves using data in a way that humans can clearly understand, supporting efforts by organization to gain competitive advantage by changing operations, decision-making, and strategic initiatives.

Prerequisite(s)/Corequisite(s): CSCI 1620 or equivalent. Admission into the UNO graduate program, basic web development or work experience with comparable grounding in programing, scripting concepts & technologies and permission by the instructor is needed.

ISQA 8810 INFORMATION TECHNOLOGY PROJECT FUNDAMENTALS (3 credits)

The course will integrate concepts and techniques from management science, psychology, organizational behavior, & administration change to identify, understand & propose solutions to the problems of project management. The purpose of the course is to prepare the graduate for project participation and leadership.

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8820 PROJECT RISK MANAGEMENT (3 credits)

This course will cover project risk management, i.e., the process of measuring or assessing risk in projects and then developing strategies to manage the risk. The topics covered will include: Risk Management Planning, Risk Identification, Quantitative Risk Analysis, Qualitative Risk Analysis, Risk Response Planning, and Risk Monitoring and Control will be covered in detail. Students will learn how to apply and use the tools and techniques needed to perform these project management tasks. A collection of readings on risk management from the empirical literature coupled with risk management standards from organizations such as IEEE and the Project Management Institute (PMI) will be used to provide the student with an excellent foundation in risk management and control.

Prerequisite(s)/Corequisite(s): ISQA 8810 or permission of instructor.

ISQA 8900 INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS (1-3 credits)

The content of the course will vary. However, both the student and the faculty member must sign an Independent Research Agreement and file it with the Master of Science in Management Information Systems Graduate Program Committee before registration for the course. This agreement will detail the project, the schedule for its completion, the form of the output, the method of evaluation and other relevant information pertaining to the project.

Prerequisite(s)/Corequisite(s): Permission of instructor, and at least 12 hours of course work toward a M.S. in MIS should be completed.

ISQA 8910 INFORMATION SYSTEMS INTERNSHIP (1-3 credits)

Information Systems Internship provides students with an opportunity for practical application and further development of knowledge and skills acquired in the MS MIS degree program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s)/Corequisite(s): Permission of the instructor required. Students must have completed a minimum of 18 credit hours towards the MS MIS program. Not open to non-degree graduate students.

ISQA 8950 CAPSTONE MANAGEMENT INFORMATION SYSTEMS (3 credits)

The course consists of a student executed Information Systems design project providing an in-depth practical experience. It typically covers system conceptualization, analysis, and design. It may also involve prototyping. The project will typically not include the actual implementation of the system. This course replaces the MS in MIS comprehensive exam requirement.

Prerequisite(s)/Corequisite(s): Students must have 6 credit hours or fewer left in the program. Students must have completed all core classes. Not open to non-degree graduate students.

ISQA 8990 THESIS (1-6 credits)

This course is a research project designed and executed under supervision of a thesis supervisory committee. Student will develop skills, including the ability to design, conduct, analyze, and report results in writing (i.e., thesis) of an original, independent, scientific investigation. The student's thesis supervisory committee must approve the project plan.

Prerequisite(s)/Corequisite(s): ISQA 8060 research methods or equivalent. Graduate major in MIS and approval of the thesis supervisory committee. Not open to non-degree graduate students.

ISQA 9010 FOUNDATIONS OF INFORMATION SYSTEMS RESEARCH (3 credits)

This course covers the following areas: (1) information systems as an academic discipline including classic readings in IS and its reference disciplines, (2) theory development and evaluation, (3) research methods applicability in IS.

Prerequisite(s)/Corequisite(s): Doctoral student standing in the information systems areas or with the permission of the instructor; ISQA 8060 or equivalent. Not open to non-degree graduate students.

ISQA 9020 TECHNICAL AND PROCESS ISSUES IN INFORMATION SYSTEMS RESEARCH (3 credits)

This seminar is a survey course on the technical and process issues in information systems research. The course balances the acquisition of knowledge about the conduct of research in technical and process issues with the application of that knowledge to research on information systems. Major topics include: software engineering, programming, data base systems, decision support systems, data warehousing and mining systems, object-oriented systems, adaptive and expert systems, client-service systems, information filtering and multimedia systems, information agents, mobile computing, telecommunications, and electronic commerce.

Prerequisite(s)/Corequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 9010 is recommended. Not open to non-degree graduate students.

ISQA 9030 BEHAVIORAL AND ORGANIZATIONAL ISSUES IN INFORMATION SYSTEMS (3 credits)

This seminar is a survey course on behavioral and organizational issues in information systems research. The course balances the acquisition of knowledge about the conduct of research in behavioral and organizational issues with the application of that knowledge to research on information systems. The course is intended for doctoral students in Information Technology or related areas.

Prerequisite(s)/Corequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 9010 is recommended. Not open to non-degree graduate students.

ISQA 9120 APPLIED EXPERIMENTAL DESIGN AND ANALYSIS (3 credits)

Constructing and analyzing designs for experimental investigations; completely randomized, randomized complete block and Latin-square designs, split-plot designs, incomplete block designs, confounded factorial designs, nested designs, and treatment of missing data, comparison of designs. The course will use computer-assisted analysis and graphic techniques included in software such as Statistical Analysis Software (SAS) or Statistical Package for Social Sciences (SPSS) or R (a programming language that provides a wide variety of statistical and graphical techniques. Similar to the S language).

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156 or consent of instructor. Not open to non-degree graduate students.

ISQA 9130 APPLIED MULTIVARIATE ANALYSIS (3 credits)

The use of multivariate analysis for solving business problems. Multivariate Analysis of Variance (MANOVA), factor, cluster, and discriminant analysis techniques in IT research. The course will use computer-assisted analysis and graphic techniques included in software such as Statistical Analysis Software (SAS) or Statistical Package for Social Sciences (SPSS) or R (A programming language that provides a wide variety of statistical and graphical techniques. Similar to the S language).

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156 or consent of instructor. Not open to non-degree graduate students.

ISQA 9150 RESEARCH IN INFORMATION TECHNOLOGY (3 credits)

Research methods in Information Technology involves an overview of the research process specific to problems in IT. Students will learn about theories in IT relevant to their areas of research. They will identify key components of research problems in IT, understand different types of research processes, develop research questions, and design research projects. They will learn to construct research instruments that enable them to collect data. They will also learn about the different data collection and analysis tools and techniques. As part of this course, students will take the CITI training and achieve the research readiness they need to succeed in the PhD in IT program.

Prerequisite(s)/Corequisite(s): Permission of the instructor. Not open to non-degree graduate students.

ISQA 9900 ADVANCED RESEARCH IN INFORMATION SYSTEMS (3 credits)

This course provides a format for exploration of advanced research areas that are of interest to doctoral students in the information systems and/or information technology area. The specific research area will vary from semester to semester, in keeping with research interests of faculty and students. Examples of areas include, but are not limited to, e-business technology, mobile commerce, intelligent agents e-enabled decision support, electronic collaboration, computer-mediated communications, human-computer interaction and information assurance.

Prerequisite(s)/Corequisite(s): Admission to PhD program in Information Technology or permission of instructor

Management Information Systems, MS

Department of Information Systems and Quantitative Analysis,
College of Information Science & Technology

Vision Statement

The Master of Science in management information systems (MIS) degree is designed to give students the skills and background needed to develop and manage an organization's information resources, technology, and infrastructure. It will serve as a source of added knowledge and experience for MIS graduates and practitioners interested in obtaining an advanced degree. It will also provide career growth opportunities for the non-MIS and non-business degree holders who find that their careers demand graduate level MIS education. The MS in MIS prepares students for a variety of positions, including applications and web-site developer, computer network

manager, business system analyst/manager, consultant, and technology manager. The MS in MIS also prepares students for admission to doctoral programs in information systems. A community advisory committee helps keep the program current with the needs of the business community.

Other Program Related Information

Fast Track

The College of Information Science & Technology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate CIST area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field.
- Students must have completed no less than 60 undergraduate hours and within at least 24 undergraduate credits yet to complete.
- Students must have a minimum undergraduate GPA of 3.0, with the exception of computer science, which requires a minimum undergraduate GPA of 3.5.
- Students must complete the Fast Track Approval form, obtain all signatures and submit it to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 (3.5 for computer science) is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - For all CIST degrees, if a student successfully completes their undergraduate BS degree with a cumulative GPA of 3.0 (3.5 for computer science) and all graduate courses with a 3.0 or better, you may be recommended for admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

International Dual Degree

The College of IS&T, in conjunction with the Management Center Innsbruck (Austria) (MCI) and the Technical University of Braunschweig (Germany) (TUB), offers a small number of interested students the opportunity to receive both the MS in MIS (UNO) degree and the MA in Management, Communications and Information Technology (MCiT) (MCI) or the Masters in MIS (TUB) degree in a two-year, full-time equivalent period. This is implemented as an international dual degree track within the MS in MIS degree with courses that transfer in both directions. The international dual degree track, like the traditional MS in MIS program, requires the equivalent of 36 U.S. credit hours of course work beyond any foundation requirements. Students who wish to pursue this option will work closely with an advisor to develop a detailed plan of study.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: July 1
- Spring: December 1
- Summer: April 1

Other Requirements

- The minimum undergraduate grade point average (GPA) requirement for the MS in MIS program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a four year undergraduate degree.
- **Entrance Exam:** An entrance exam is required for those who do not have a baccalaureate or equivalent degree from an institution of higher education in the United States. Submit GMAT or GRE scores with at least these minimum scores:
 - GRE Verbal: 144, GRE Quantitative: 148, GMAT: 500
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** Applicants are required to submit a statement of purpose with a maximum of 750 words that address the following. The statement must be written in the applicant's own words, reflecting their goals and aspirations. Plagiarism in the statement may result in the rejection of the entire application.
 - Motivations for pursuing graduate education
 - Relevant qualifications or work experience that demonstrate potential for success in the graduate program
 - Career goals
 - Why you want to study at UNO
- **Resume:** Submit a detailed resume indicating your work experience and background.
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.educationalperspectives.org/>) (EPE).

www.edperspective.org/). This graduate program will conduct an in-house credential evaluation of your transcript(s).

- UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
- *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.
- OPTIONAL: One letter of recommendation from a reference who can evaluate your work and/or academic achievements.
- OPTIONAL: Application for Graduate Assistant Position

The MS in MIS program hires departmental Graduate Assistants (GA) after successful completion of at least a semester in the program. However, a few research positions may be available to incoming students. If you are interested in applying for one of those positions, please submit a letter stating your research area interests and why you feel you would make a good GA. Please note that GA positions will be considered after admission and program admission is not a guarantee of receiving a GA position.

Students interested in taking courses without admission to the MS in MIS degree program may do so with permission of the graduate program committee. Contact mgreiner@unomaha.edu.

Requirements

Foundation Courses

Foundation courses ensure that all students in the MS Management Information Systems (MIS) program have a strong foundation on which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for other courses in the program, but they also contain a distinct body of knowledge that is an important part of the MIS professional's education. All foundation courses are required for all students. Students who have obtained an undergraduate MIS degree will typically have this foundation. Other students, including computer science or engineering majors, will usually have to take one or more foundation courses. Occasionally, a student's work experience may be sufficient to waive one or more foundation courses.

Waivers for foundation courses are granted by the chair of the graduate program committee upon the recommendation of the faculty member who is responsible for an individual foundation course. Students requesting a waiver for a particular course should be prepared to meet with a faculty member and answer questions in the area of the course. They should bring to the meeting any relevant transcripts, course syllabi, course material, or evidence of practical experience. Some foundation courses may have an option for testing out.

Foundation courses cannot be used to satisfy the 36 semester hours required for the MS in MIS degree. Students who have not completed all the foundation course requirements may be admitted on provisional status until those requirements have satisfactorily been completed. All must be completed prior to or concurrent with the first six hours of MS in MIS graduate course work.

Code	Title	Credits
CYBR 2980	SPECIAL TOPICS IN CYBERSECURITY	1-3
or equivalent		
ISQA 3900	WEB APPLICATION DEVELOPMENT	3

Total Credits

10-15

Degree Requirements

Complete ISQA 8310 as early as possible in your program, provided you have met the prerequisite of ISQA 8030 or equivalent.

Earn a total of 36 credit hours with a number 8000 or above (excluding foundation courses listed in the admissions requirements). The 36 credit hours may be earned in two ways:

- Capstone option: 18 hours core classes (6 courses) + 15 hours electives (5 courses) + 3 hours capstone (ISQA 8950)
- Thesis option: 18 hours core classes (6 courses) + 9 hours electives (3 courses) + 3 hours research methods (ISQA 8060) + 6 hours thesis (ISQA 8990)

Capstone Option

Code	Title	Credits
Required Courses		
ISQA 8210	MANAGEMENT OF SOFTWARE DEVELOPMENT	3
ISQA 8220	ADVANCED SYSTEMS ANALYSIS AND DESIGN	3
ISQA 8310	IT INFRASTRUCTURE & CLOUD COMPUTING	3
ISQA 8380	ENTERPRISE ARCHITECTURE AND SYSTEMS INTEGRATION	3
ISQA 8410	DATA MANAGEMENT	3
ISQA 8420	MANAGING THE I.S. FUNCTION	3

ISQA 8990 THESIS (6 Hours Required) ¹	3
Total Credits	36

¹ See Exit Requirements below for additional details.

Exit Requirements

Either pass ISQA 8950 or complete the thesis option (thesis plus thesis defense).

Code	Title	Credits
ISQA 8990	THESIS	6
or		
ISQA 8950	CAPSTONE MANAGEMENT INFORMATION SYSTEMS	3

All core classes must be complete before students may enroll in ISQA 8950.

All candidates should carefully review the Graduate College requirements for forming the Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval forms, and final approval and submission of the thesis.

Transfer students may request permission to transfer as many as 12 semester hours of credit on a 36-hour program provided the courses are pertinent to the student's graduate program. Submit petitions to the Graduate Program Committee for transfer credit and include a syllabus for each course to be transferred.

Students have seven years to complete their MS in MIS degree. The 7-year time limit starts with the first degree-program class on the plan of study.

Concentrations

The ISQA faculty has developed a set of concentrations to assist students as they work to complete the MS in MIS program. Concentrations consist of a set of elective courses that are related to a particular subject area. Students may choose to take courses that make up a concentration, or not, as they see fit. Concentrations are not minors in the traditional sense, but rather reflect areas in demand in the community. If you have any questions regarding these concentrations, please contact the MS in MIS graduate advisor.

Analytics Concentration

Data analytics uses a variety of techniques to examine large amounts of data to discover patterns that can lead to business insights. Data analytics has broad applicability in customer behavior analysis, fraud detection, scientific inquiry, process improvement, financial analysis, trend analysis, forecasting, and decision-making. Techniques may include statistical methods, data mining, modeling and simulation, and data visualization. The analytics concentration prepares students for work in the area of analytics, and also offers the necessary methodological foundation for thesis work in a master's or PhD program.

ISQA 8080	SEMINAR IN MANAGEMENT INFORMATION SYSTEMS ²	
ISQA 8086	SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS ²	
ISQA 8900	INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS ²	
ISQA 8990	THESIS ^{2,3}	
Total Credits		12

¹ This is not an exhaustive list. Other courses may be taken as electives with approval of the GPC.

² Topic must be related to Analytics concentration area. Prior approval from the GPC is required to use this course.

³ Only three hours of the required six hours of thesis may be applied to the concentration.

Data Management Concentration

The effective management of data and information is a fundamental task not only in the information society, but also for civilization as a whole. This concentration will prepare students to manage a growing variety of types of data throughout the data lifecycle. The curriculum gives students theoretical and practical training in database design, database administration, data quality management, knowledge management, business intelligence, data integration, and data governance. Students will gain exposure to transaction processing systems, data warehouses, and XML data stores. Students may also gain experience managing geospatial data.

- ³ Topic must be related to Data Management concentration area. Prior approval from the GPC is required to use this course.
- ⁴ Only three hours of the required six hours of thesis credit may be applied to the concentration.

Electronic Commerce Concentration

The rise of electronic commerce offers opportunities for both research and practice. Yet a critical examination of the electronic commerce landscape is required to make sense of this subject. A multitude of technologies and applications have brought about changes in business and society that require careful consideration. Some key topics include understanding the effects of new information technologies on the value proposition, market opportunities, revenue models for business through electronic commerce, that inform the design of web and mobile applications. This concentration is suited for students who would like to pursue careers in IT consulting, start-up companies, and technology venues. Students interested in Electronic Commerce are encouraged to declare a formal concentration by contacting the graduate advisor.

Code	Title	Credits

- ² Topic must be related to e-Commerce concentration area. Prior approval from the GPC is required to use this course.
- ³ Only three hours of the required six hours of thesis credit may be applied to the concentration.

Geographic Information Systems Concentration

The use of spatial data for management, analysis, and decision-making has grown dramatically in both the public and private sectors, as global positioning systems, mobile devices, and geographic information systems (GIS) have become widespread. The concentration in GIS provides students with the technical and conceptual skills to manage geospatial data and apply it to solving geospatial problems. Students will learn the principles of geospatial data and mapping systems, global positioning systems, representation and management of geospatial data within computer systems, construction and use of maps, and the use of geospatial functions for decision-support.

Code	Title	Credits
Required Courses		
GEOG 8535	CARTOGRAPHY AND DATA VISUALIZATION	4
GEOG 8056	GEOGRAPHIC INFORMATION SYSTEMS I	4
GEOG 8666	GEOGRAPHIC INFORMATION SYSTEMS II	4
Total Credits		12

Health Informatics Concentration

Students interested in health informatics or working in the health care industry are encouraged to declare a formal concentration by contacting a MS in MIS advisor. The health informatics concentration integrates MIS with biomedical informatics. The AMIA defines biomedical informatics as a multi-disciplinary field that studies and pursues the effective uses of biomedical data, information, and knowledge for scientific inquiry, problem solving, and decision making, driven by efforts to improve human health. Biomedical informatics as the core scientific discipline that supports applied research and practice in several disciplines including health informatics and clinical informatics.

ISQA 8530	E-COMMERCE SECURITY	
ISQA 8560	INFORMATION WARFARE AND SECURITY	
ISQA 8080	SEMINAR IN MANAGEMENT INFORMATION SYSTEMS ²	
ISQA 8086	SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS ²	
ISQA 8900	INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS ²	
CYBR 8386	COMPUTER AND NETWORK FORENSICS	
ISQA 8990	THESIS ^{2,3}	

Total Credits **12**

¹ This is not an exhaustive list. Other courses may be taken as electives with approval of the GPC.

² Topic must be related to Information Assurance concentration area. Prior approval from the GPC is required to use this course.

³ Only three hours of the required six hours of thesis credit may be applied to the concentration.

IT Audit and Control Concentration

The IT Audit and Control concentration will provide students with the technical, organizational, accounting/auditing, and managerial background to plan and conduct IT audit and control activities. The concentration will cover the following conceptual areas: business risks and the management

of business risk, IT risk as a component of business risk, the need to manage IT risks, basic type of controls required in a business system in order to control IT risks, controls associated with top management, system development, programming, data resource management, database, security, operations management, quality assurance, boundary controls, and communications. Issues associated with new system control risks created by the use of the internet for business applications and electronic business will also be covered in one or more courses. Students will learn and apply and integrate technical, managerial and conceptual skills needed to plan and conduct IT audits and establish appropriate controls.

Prerequisite Courses

Students must have completed at least 9 hours of the MS in MIS core courses (beyond foundation requirements) prior to enrolling for the concentration. In addition, the following preparation is required for this concentration:

Code	Title	Credits
BSAD 8110	ACCOUNTING AND FINANCIAL FUNDAMENTALS	3

(This course is only required for students who have had no exposure to accounting fundamentals. Students will be given an automatic waiver if they have taken two semesters of accounting in their undergraduate degree.)

³ Only three hours of the required six hours of thesis credit may be applied to the concentration.

Project Management Concentration

The Project Management concentration will provide students with the technical, organizational and managerial background to be effective project managers, project leaders, information technology managers, and software engineers. The curriculum in this concentration integrates project management standards developed by organizations such as IEEE

(The Institute of Electrical and Electronics Engineers) and PMI (Project Management Institute) with conceptual background from disciplines such as project management, software engineering, management science, psychology, organization behavior, and organization change. Students are to start coursework in the project management concentration after completion of at least 9 hours of the core courses, including ISQA 8210.

Quality of Work Standards

The Graduate College's Quality of Work standards shall be applied to foundation courses as well as courses taken as part of the degree program. In particular, the GPC will recommend to the Graduate College that any

1. Student receiving a grade of "C-" or below in any foundation courses will be automatically dismissed from the program or, in the case of unclassified or non-degree students, be automatically denied admission.
2. Student receiving a grade of "C+" or "C" in any foundation course will be placed on probation or dismissed from the program.
3. Student not maintaining a "B" (3.0 on 4.0 scale) average in foundation courses will be placed on probation or dismissed from the program.

Business Administration, MBA and Management Information Systems, MS (MBA/MIS)

Department of Business Administration, College of Business Administration

Department of Information Systems & Quantitative Analysis, College of Information Science & Technology

Vision Statement

In today's context of globally integrated and interdependent businesses, ubiquitous information technologies, and a mobile workforce, it is critical that graduate education provides students opportunities to develop integrated business and technology skills. The primary purpose of this dual degree program is to provide this integration by enabling students to complete the MBA and MS in MIS degrees simultaneously. This track is designed for dedicated students who are willing to take on the challenges related to graduate education from two perspectives—business administration and management information systems. As such, this program involves intensive preparation in both business administration and information systems and a specialization in an area that combines both backgrounds. The dual degree program requires a minimum of 55 hours of course work beyond foundation requirements. Students who wish to pursue this option must work closely with an adviser to develop an integrated plan of study at an early stage. Students who complete the dual degree program will receive two degrees, two diplomas, and will have both degrees recorded on their transcript.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Spring: November 1
- Summer: April 1
- Fall: July 1 (June 1 for international students)

Other Requirements

- All applicants must have earned a minimum junior/senior GPA of 3.0 for both the MBA and the MS in MIS programs.
- **Entrance Exam:** Official GMAT score: minimum GMAT score of 500 with a minimum 20th percentile for both the verbal and quantitative portions; **or** 299 on the GRE with a minimum 20th percentile for both the verbal and quantitative portions.
 - MIS GMAT/GRE Waiver policy: GMAT/GRE score is waived for students with a baccalaureate or equivalent degree from an institution of higher education in the United States

- **MBA GMAT/GRE Waiver policy:** Beginning in Fall 2021, the GMAT/GRE is no longer required by the MBA department for admission to the MBA/MIS degree.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** Applicants are required to submit a 750 word statement of purpose addressing the following. The statement must be written in the applicant's own words, reflecting their goals and aspirations. Plagiarism in the statement may result in the rejection of the entire application.
 - Why you want to study at UNO
 - Career goals
 - Relevant qualifications or work experience that demonstrate potential for success in the graduate program
 - Motivations for pursuing graduate education
- **Resume:** Include work experience and education
- **Letters of Recommendation:** Three letters of recommendation (names and addresses submitted as part of the online application) from individuals who can evaluate your work and/or academic achievement
- Interview: optional
 - Although not required, applicants are strongly encouraged to arrange for an interview with one or more members of the graduate program committees of the MBA and MIS programs by directly contacting the committee chairperson of the College of IS&T. Telephone interviews are highly recommended for applicants outside the local area.
- Students qualifying for admission based on the standard outlined above, but lacking some foundation courses, will be granted provisional status until all foundation courses are completed with grades of "B" (3.0 on a 4.0 scale) or better.
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of the transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
 - *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

MBA Directed Elective Requirements

Directed Elective Requirement

For students who have earned an undergraduate or graduate degrees in accounting, economics, management, or marketing, the core course(s) corresponding to the student's previously earned degree(s) will be waived. To satisfy degree requirements, the student must complete a directed elective in the waived field as indicated. For students who have earned an undergraduate or graduate degree in finance, the core course(s) corresponding to the student's previously earned degree may be waived upon request. Students with more than one core course waiver will be required to take an additional 1-credit hour seminar or 3-credit hour elective to fulfill degree requirements.

MBA/MIS Exit Requirements

Capstone Courses (5 hours)

BSAD 8800 **MBA Project-Focused Capstone** (2 credits) (taken within the last 9 hours or the final semester of the program). This course will focus on students completing a service-learning consulting project for a nonprofit or other organization. This consulting project will focus on the application of the knowledge and skills learned in this program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite:** Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the Capstone course. Not open to non-degree graduate students.

ISQA 8950 **MIS Capstone** (3 credits) (taken within the last 6 hours or the final semester of the program, with all core courses completed).

Code	Title	Credits
BSAD 8800	MBA PROJECT-FOCUSED CAPSTONE	2
ISQA 8950	CAPSTONE MANAGEMENT INFORMATION SYSTEMS	3

Thesis Option

To take this option, a student will be required to enroll in six (6) hours of thesis credit:

MBA Program

Code	Title	Credits
BSAD 8990	THESIS	1-6

MS-MIS Program

Code	Title	Credits
ISQA 8990	THESIS	3

The thesis must be in an area that relates to both the business administration and information systems domains. The Supervisory Committee must include at least one CBA faculty member and one ISQA faculty member.

Other Requirements to Complete the Program

Attendance at a *minimum* of 2 MBA leadership seminars

Other Program-Related Information

Transfer Credits

A student may transfer credits into the MBA/MIS dual-degree program subject to the following conditions:

- No more than 1/3 of the credits for the dual-degree program may be transfer credits
- No more than 1/3 of the business credits for the dual-degree program may be transfer credits
- No more than 1/3 of the MIS credits for the dual-degree program may be transfer credits
- The transfer credits must conform to the transfer policies of the individual programs that make up the dual-degree program

Total Credit Hours: 55

Academic Performance

In addition to UNO Graduate College Quality of Work Standards, Dual Degree (DD) students may repeat only once a BSAD 8-0-level course in which they receive any grade, including "W" or "I". Students earning three "C/C+" grades, or a grade of "C-" or below, will be automatically dismissed from the DD program. Dismissed students will be immediately

administratively withdrawn from all courses in which they are enrolled for DD credit.

Students who have been dismissed may not enroll in any courses for DD credit in any subsequent semester or summer session until reinstatement has been granted by the Dual-Degree Program Academic Standards Committee (DDPASC) comprised of the 2 GPC Chairs and 1 faculty member from each GPC.

Students who have been dismissed from the DD program may submit a written petition for reinstatement to the DDPASC. Students petitioning the DDPASC for reinstatement may not enroll in any course for DD credit until after the DDPASC has ruled on the petition. Upon receiving a petition for reinstatement, the DDPASC will evaluate the student's written petition for reinstatement. As part of the reinstatement petitioning process, the DDPASC reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student; this information may be used by the DDPASC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege and not all students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period at the DDPASC's discretion and must satisfy the probationary conditions specified by the DDPASC. In addition to probationary conditions, reinstated students will be subject to additional reinstatement conditions as specified by the DDPASC. These reinstatement conditions will include retaking one or more courses in which the student must earn a grade of "B" (3.0) or higher (the exact grade requirements for retaken courses may in fact be higher than "B" (3.0)). Students not satisfying the probationary or reinstatement conditions will be automatically dismissed.

Grades Earned in Repeated Courses

When making decisions related to the Quality of Work Standards issues outlined in the UNO Graduate Catalog, the Dual-Degree Program Academic Standards Committee (DDPASC) will consider the initial grade(s) received in a course as well as the most recent grade received for the course. This approach differs from the method used to calculate GPA in a student's MavLINK/DegreeWorks file, where the most recent grade replaces the grade received in the previous course attempt.

Public Administration, MPA and Management Information Systems, MS (MPA/MIS)

School of Public Administration, College of Public Affairs & Community Service, Department of Information Systems & Quantitative Analysis, College of Information Science & Technology

Vision Statement

In government and non-profit organizations, there is a significant need and a long-term demand for persons with advanced skills in information management technology. The primary purpose of this dual degree option is to prepare students to manage and lead organizations in the future. To meet this need, the School of Public Administration and the College of Information Science & Technology offer the option to complete both the MPA and the MS in MIS degree jointly by completing 54-57 hours of course work beyond foundation requirements. This joint degree program is designed for dedicated students who are able to successfully complete graduate intensive study from two perspectives—public administration and management information systems—while achieving a synergy between the two fields. As such, the program involves graduate coursework in both public administration and information systems, with integrative experiences that will attain the desired synergy. Students interested in this option will

work closely with a faculty mentor to develop an integrated plan of study at an early stage.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022 and Fall 2022)

- Fall: June 1
- Spring: October 1

Other Requirements

- The general prerequisite for admission to the program is a four year bachelors' degree with a minimum of a 3.0 GPA of the junior-senior year (last 50-60 credit hours).
- **Entrance Exam:** An entrance exam is required for those who do not have a baccalaureate or equivalent degree from an institution of higher education in the United States. Submit GMAT or GRE scores with at least these minimum scores:
 - GRE Verbal: 144, GRE Quantitative: 148, GMAT: 500
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 563, Internet-based TOEFL: 85, IELTS: 6.5, PTE: 58, Duolingo: 105
- **Statement of Purpose**
- **Writing Sample:** From work or previous academic experiences. Alternatively, if you do not have a writing sample, please submit a two page double-spaced word processed essay that addresses the following two topics:

- Your unique personal qualities and life experiences that distinguish you from other applicants to our graduate program
- Two accomplishments that demonstrate your potential for success in the graduate program
- **Resume:** Indicate your work experience and background
- **Letters of Recommendation:** Two letters of recommendation are required
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
 - *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

Degree Requirements

MPA/MIS Foundation Courses

A student must have completed some basic courses either as an undergraduate student or prior to enrolling in the first MS in MIS course. Students may start MPA courses while completing the MIS foundation courses.

Code	Title	Credits

Data Analytics Certificate

Department of Information Systems and Quantitative Analysis,
College of Information Science & Technology

Vision Statement

Data analytics uses a variety of techniques to examine large amounts of data to discover patterns that can lead to business insights. Data analytics has broad applicability in customer behavior analysis, fraud detection, scientific inquiry, process improvement, financial analysis, trend analysis, forecasting, and decision-making. Techniques may include statistical methods, data mining, modeling and simulation, and data visualization. The certificate is designed to equip students to apply the theory and practice of data analytics to solving problems in a variety of economic, social, and scientific domains.

Total Credits		15

¹ ISQA 8080, ISQA 8086, and ISQA 8900 may be used but must be related to data analytics. Prior approval from the GPC is required to use these courses.

Completion of the Certificate

During what is expected to be the semester the certificate is completed and prior to the posted deadline, students should apply for the certificate through MavLINK on or before the deadline. If you complete the application form and do not complete all of the requirements for the certificate, contact the Office of Graduate Studies as soon as possible. You must reapply during

the next semester in which you expect to complete the certificate; no additional fee is charged to reactivate your application.

The following requirements are due 12 working days prior to commencement:

- “Incomplete” and “NR” grades from previous terms must be removed so that the grade will be in the Office of Graduate Studies.
- All fees, fines, and other obligations due the university must be settled.

For students currently enrolled in courses that are a part of their plan of study, enrollment must be maintained in order to complete the certificate. A grade for any current enrollment must be received by the Registrar's Office no later than the close of business on the fifteenth working day following the end of a semester.

Awarding of Graduate Certificates

The Office of Graduate Studies will mail the certificate to students when all requirements are completed and all obligations to the university are satisfied. The Graduate College will not approve any changes in the student's permanent record once the certificate is awarded.

Data Management Certificate

**Department of Information Systems and Quantitative Analysis,
College of Information Science & Technology**

Vision Statement

Data management focuses on the processes and techniques to manage data as a valuable organizational and societal asset throughout the data lifecycle. The certificate will give students theoretical and practical training in database design and development, database administration, data integration, data engineering, and data governance. Students will be exposed to a variety of data types and different kind of databases such as relational database, data warehouse, and NoSQL and big data databases.

 - Paper-based TOEFL: 563, Internet-based TOEFL: 85, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Resume:** Submit a detailed resume indicating your work experience and background
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
 - *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.
- **OPTIONAL Statement of Purpose:** Applicants may submit a statement of purpose with a maximum of 750 words that address:
 - motivations for pursuing graduate education
 - relevant qualifications or work experience that demonstrate potential for success in the graduate program
 - career goals
 - why you want to study at UNO

The data management graduate certificate consists of three core courses (9 credits) and two electives (6 credits) for a total of 15 credit hours. Specific course requirements for the graduate certificate are described below. There are three prerequisite courses which may be waived by the chair of the graduate program committee, based on courses already taken, applicable work experience, test out exams offered by the department, or the recommendation of faculty teaching the prerequisite courses.

Degree Requirements

Prerequisites

The following courses are prerequisites of the required courses. Elective courses may have additional prerequisites. All prerequisites must be completed with grades of "B" or better.

- One programming class such as CIST 1400 or equivalent
- One semester of undergraduate database management or equivalent, e.g.,
 - ISQA 3310 Managing the database environment
 - CSCI 4850 Database Management Systems
 - ISQA 8040 An overview of systems development

No more than two courses (6 credit hours maximum) can be used on two MIS-related certificates (Data Analytics, Information Assurance, Project Management, and Systems Analysis and Design).

Code	Title	Credits
Required Courses		
ISQA 8306	DATABASE ADMINISTRATION	3
ISQA 8410	DATA MANAGEMENT	3
ISQA 8450	NOSQL AND BIG DATA TECHNOLOGIES	3
Electives		
6		
ISQA 8016	BUSINESS INTELLIGENCE	
ISQA 8206	INFORMATION AND DATA QUALITY MANAGEMENT	
ISQA 8380	ENTERPRISE ARCHITECTURE AND SYSTEMS INTEGRATION	
ISQA 8460	INTERNET OF THINGS (IOT), BIG DATA AND THE CLOUD	
ISQA 8570	INFORMATION SECURITY POLICY AND ETHICS	
ISQA 8600	FROM DATA TO DECISIONS	
ISQA 8700	DATA MINING: THEORY AND PRACTICE	
GEOG 8056	GEOGRAPHIC INFORMATION SYSTEMS I	
GEOG 8535	CARTOGRAPHY AND DATA VISUALIZATION	
ISQA 8080	SEMINAR IN MANAGEMENT INFORMATION SYSTEMS ¹	
ISQA 8086	SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS ¹	
Total Credits		15

¹ Topic must be related to data management. Prior approval from the GPC is required to use this course.

Topic of ISQA 8080 and ISQA 8086 must be related to data management. Prior approval from the GPC is required to use this course. Other courses related to data management that are not included in the list of electives may count towards the certificate after approval by the GPC.

Information Assurance Certificate

Department of Information Systems and Quantitative Analysis,
College of Information Science & Technology

Vision Statement

The goal of the ISQA graduate certificate program is to allow post-baccalaureate students and working professionals to expand their educational background and complete work that could count towards a graduate degree. Earning the graduate certificate will enhance skill sets; provide exposure to new information technologies, theories and practices; allow individuals to work toward various professional certifications; increase growth potential with employers; and increase prospects of obtaining a graduate degree. The graduate certificate program offers existing technical and managerial professionals the chance to improve and hone their communication skills to aide in their professional development.

The information assurance (IA) certificate will provide students with the technical, organizational and managerial background to assist in planning, deploying, and managing security technologies to achieve information assurance.

Program Contact Information

Martina Greiner, PhD, Graduate Program Chair (GPC)

Program Website (<https://www.unomaha.edu/college-of-information-science-and-technology/information-systems-and-quantitative-analysis/graduate/graduate-certificates.php>)

Other Program Related Information

The certificate in information assurance can be obtained online, but students will need to consult with the GPC on course offerings.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: July 1
- Spring: December 1
- Summer: April 1

Other Requirements

- The minimum undergraduate grade point average requirement for the Information Assurance certificate program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a four-year undergraduate degree.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Resume:** Submit a detailed resume indicating your work experience and background.
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
 - *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.
- **OPTIONAL Statement of Purpose:**
 - Applicants may submit a statement of purpose with a maximum of 750 words that address:
 - motivations for pursuing graduate education
 - relevant qualifications or work experience that demonstrate potential for success in the graduate program

- career goals
- why you want to study at UNO

Degree Requirements

Prerequisite Courses

The following courses are prerequisite courses for the required courses. Elective courses may have additional prerequisites. All prerequisites must be completed with grades of "B" or better.

Code	Title	Credits

ISQA 8900	INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS ¹	3
Total Credits		12

¹ Topic must be related to information assurance. Prior approval from the GPC is required to use this course.

Completion of the Certificate

During what is expected to be the semester the certificate is completed and prior to the posted deadline, students should apply for the certificate through MavLINK on or before the deadline. If students complete the application form and do not complete all of the requirements for the certificate, contact the Office of Graduate Studies as soon as possible. Applicants must reapply during the next semester in which you expect to complete the certificate; no additional fee is charged to reactivate your application.

The following requirements are due 12 working days prior to commencement:

- "Incomplete" and "NR" grades from previous terms must be removed so that the grade will be in the Office of Graduate Studies.
- All fees, fines, and other obligations due the university must be settled.

For students currently enrolled in courses that are a part of their plan of study, enrollment must be maintained in order to complete the certificate. A grade for any current enrollment must be received by the Registrar's Office no later than the close of business on the fifteenth working day following the end of a semester.

Awarding of Graduate Certificates

The Office of Graduate Studies will mail the certificate to students when all requirements are completed and all obligations to the university are satisfied. The Graduate College will not approve any changes in the student's permanent record once the certificate is awarded.

Project Management Certificate

Department of Information Systems and Quantitative Analysis,
College of Information Science & Technology

Vision Statement

The goal of the ISQA graduate certificate program is to allow post-baccalaureate students and working professionals to expand their educational background and complete work that could count towards a graduate degree. Earning the graduate certificate will enhance skill sets; provide exposure to new information technologies, theories and practices; allow individuals to work towards various professional certifications; increase growth potential with employers; and increase prospects of obtaining a graduate degree. The graduate certificate programs offer existing technical and managerial professionals the chance to improve and hone their communication skills to aide in their professional development.

The project management certificate will provide students with the technical, organizational and managerial background to become project managers, project leaders, information technology managers, and software engineers.

Mathematics

Degree Programs Offered

- Mathematics, MA (p. 1266)
- Mathematics, MS (p. 1270)
- Mathematics, MAT (p. 1269)

Certificates Offered

- Secondary Mathematics Specialist Certificate (p. 1274)

MATH 8016 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with CSCI 4010, CSCI 8016, MATH 4010).

Prerequisite(s)/Corequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

MATH 8036 MODERN ALGEBRA (3 credits)

Algebra is the study of mathematical manipulations that preserve something (like equality - when solving equations). The areas in which Algebra finds application are quite diverse, from Ancient Greek Geometry through to Modern Information Protection and Security (error correcting codes, data compression, and cryptography). This course begins with topics that should be familiar (such as ruler-and-compass constructions, and modular arithmetic) and builds upon this foundation through polynomial rings up to finite fields and basic group theory. (Cross-listed with MATH 4030).

Prerequisite(s)/Corequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better

MATH 8050 ALGORITHMIC GRAPH THEORY (3 credits)

Review of the basic concepts of graph theory. Introduction to perfect graphs and their characterizations. Main classes of perfect graphs and their properties. Algorithms for main problems of perfect graphs. Applications of perfect graphs in several fields such as scheduling, VLSI and communication networks. (Cross-listed with CSCI 8050).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and MATH 4150 or MATH 8156 or permission of instructor. Not open to non-degree graduate students.

MATH 8056 LINEAR ALGEBRA (3 credits)

Linear algebra is extensively utilized in the mathematical modeling of many natural phenomena. Many scientific and engineering disciplines, such as data science, chemical engineering and biology, make extensive use of the theory and techniques commonly present in basic to advanced linear algebra courses. The goal of this course is to help students to grasp a solid theoretical understanding of vectors, vector spaces, inner product spaces, linear transformations, eigenvalues, canonical forms, complex vectors, matrices, and orthogonality. By going through the materials in a mathematically rigorous way, students will develop deeper and more accurate intuitions of the basic concepts in linear algebra. Consequently, the applications of linear algebra will become much more transparent. (Cross-listed with MATH 4050).

Prerequisite(s)/Corequisite(s): MATH 2050 with a grade of C- or better; MATH 2030 or MATH 2230 or equivalent with a grade of C- or better; or permission

MATH 8060 ALGORITHMIC COMBINATORICS (3 credits)

This course includes classical combinatorial analysis graph theory, trees, network flow, matching theory, external problems, and block designs. (Cross-listed with CSCI 8060).

Prerequisite(s)/Corequisite(s): MATH 3100, CSCI 3100, MATH 8105 or CSCI 8105 or instructor's permission.

MATH 8080 DESIGN AND ANALYSIS OF ALGORITHMS (3 credits)

The course provides students an understanding of advanced topics in algorithms. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, dynamic programming, greedy algorithms, graph algorithms, and the theory of NP-Completeness. (Cross-listed with CSCI 8080).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 or equivalent. Not open to non-degree graduate students.

MATH 8105 APPLIED COMBINATORICS (3 credits)

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with CSCI 3100, CSCI 8105, MATH 3100).

MATH 8116 ABSTRACT ALGEBRA I (3 credits)

An introduction to group theory. Various classes of group are studied: symmetric groups, abelian, cyclic, and permutation groups. Basic tools are developed and used: subgroups, normal subgroups, cosets, the Lagrange theorem, group homomorphisms, quotient groups, direct products, and group actions on a set. The course culminates with the Sylow theorems in finite group theory. The theory is illustrated with examples from geometry, linear algebra, number theory, crystallography, and combinatorics. (Cross-listed with MATH 4110).

Prerequisite(s)/Corequisite(s): MATH 4050/MATH 8056 with a C- or better or MATH 4560/MATH 8566 with a C- or better or permission of instructor

MATH 8126 ABSTRACT ALGEBRA II (3 credits)

An introduction to ring and field theory. Various classes of commutative rings are considered including polynomial rings, and the Gaussian integers. Examples of fields include finite fields and various extensions of the rational numbers. Concepts such as that of an ideal, integral domain, characteristic and extension field are studied. The course culminates with an introduction to Galois theory. Applications include the resolution of two classical problems: the impossibility of angle-trisection and the general insolubility of polynomial equations of degree 5 or higher. (Cross-listed with MATH 4120)

Prerequisite(s)/Corequisite(s): MATH 4110/MATH 8116 with a C- or better or permission of instructor

MATH 8156 GRAPH THEORY & APPLICATIONS (3 credits)

Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 4150, CSCI 8156, MATH 4150).

Prerequisite(s)/Corequisite(s): MATH 2030 or permission of instructor.

MATH 8235 INTRODUCTION TO ANALYSIS (3 credits)

This course provides a theoretical foundation for the concepts of elementary calculus. Topics include real number system, topology of the real line, limits, functions of one variable, continuity, differentiation. (Cross-listed with MATH 3230).

Prerequisite(s)/Corequisite(s): MATH 1960 and MATH 2230 each with a grade of C- or better.

MATH 8236 MATHEMATICAL ANALYSIS I (3 credits)

Provides a theoretical foundation for the concepts of elementary calculus. Topics include ordered fields and the real number system, basic properties of complex numbers, metric space topology, sequences and series in \mathbb{R}^k , limits and continuity in a metric space, monotonic functions. (Cross-listed with MATH 4230).

Prerequisite(s)/Corequisite(s): MATH 3230/MATH 8235 or equivalent

MATH 8246 MATHEMATICAL ANALYSIS II (3 credits)

Provides a theoretical foundation for the concepts of classical Calculus (vector calculus included). Topics include sequences and series of functions, uniform convergence, power series, Fourier series, multivariable real differential and integral calculus, the Implicit Function Theorem, integration of different forms, and the important formulas, connecting those integrals, due to: Green, Gauss, Riemann, and Ostrogradski. (Cross-listed with MATH 4240).

Prerequisite(s)/Corequisite(s): MATH 4230/MATH 8236

MATH 8250 PARTIAL DIFFERENTIAL EQUATIONS (3 credits)

Partial differential equations (PDEs) are fundamental in the application of mathematics to science and engineering. Topics to be covered will include: Linear and nonlinear first-order equations, classification of second-order linear equations, elliptic, hyperbolic and parabolic equations and boundary value problems, and Green's functions.

Prerequisite(s)/Corequisite(s): MATH 1970, MATH 2350, or instructor's permission. MATH 4330/MATH 8336 is recommended, but not required.

MATH 8276 COMPLEX ANALYSIS (3 credits)

This course is an introduction to the theory of functions of a complex variable, a fundamental area of mathematics with multiple applications to science and engineering. Topics include the field of complex numbers, complex differentiation, the complex contour integral and Cauchy's integral formula, Taylor expansions and analytic functions, conformal mapping and Riemann's conformal equivalence theorem, residue theory and Laurent series, harmonic functions, and applications. (Cross-listed with MATH 4270).

Prerequisite(s)/Corequisite(s): MATH 3230/MATH 8235 or permission of the instructor.

MATH 8305 NUMERICAL METHODS (3 credits)

This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 3300, CSCI 8305, MATH 3300).

Prerequisite(s)/Corequisite(s): MATH 1960 with a C- or better or permission of instructor.

MATH 8306 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, CSCI 8306, MATH 4300).

Prerequisite(s)/Corequisite(s): MATH 2050 with a C- or better or permission of instructor.

MATH 8316 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, CSCI 8316, MATH 4310).

Prerequisite(s)/Corequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

MATH 8326 COMPUTATIONAL OPERATIONS RESEARCH (3 credits)

Survey of computational methods used in the solution of operations research problems. Topics include scripting to guide optimization software, metaheuristics for optimization, and basic machine learning algorithms. (Cross-listed with MATH 4320).

Prerequisite(s)/Corequisite(s): MATH 3200 and MATH 4300 each with a grade of C- or better or permission of instructor.

MATH 8336 INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS (3 credits)

This course introduces the basic methods of PDEs guided by applications in physics and engineering. The main topics to be covered include The Linear First order PDEs, Transport equations, Characteristics, Classification of PDEs, Separation of variables, Heat conduction, vibrating membranes, boundary value problems, Maximum principle, Sturm-Liouville problems, Fourier series, Fourier integrals, Harmonic functions, Legendre polynomials, Distributions, Green's functions. (Cross-listed with MATH 4330).

Prerequisite(s)/Corequisite(s): MATH 1970 with a C- or better and MATH 2350 with a C- or better, or permission of instructor; MATH 2050 recommended, not required.

MATH 8356 ORDINARY DIFFERENTIAL EQUATIONS (3 credits)

This course covers the theory of initial-, boundary-, and eigenvalue problems, existence theorems, real and complex linear systems of differential equations, and stability theory. There will be a strong emphasis on methods for finding solutions of initial and boundary value problems and analyzing properties of these solutions for various ordinary differential equations. (Cross-listed with MATH 4350).

Prerequisite(s)/Corequisite(s): MATH 1970 with a C- or better, MATH 2050 with a C- or better, and MATH 2350 with a C-, or better or instructor's permission.

MATH 8400 DYNAMICAL SYSTEMS AND CHAOS (3 credits)

Review of difference equations and differential equations, stability theory, periodic orbits, Lyapunov exponents, fractals, chaos, state reconstruction from time series data.

Prerequisite(s)/Corequisite(s): Permission from Instructor

MATH 8406 THE FINITE ELEMENT METHOD (3 credits)

Introduction to finite elements methods for solving ordinary and partial differential equations. Theoretical foundations of finite element methods for boundary value problems, approximation by piecewise polynomial functions, variation formulation of partial differential equations, basic error estimates. The Rayleigh-Ritz-Galerkin method, convergence of approximations, time-dependent problems, error analysis, discretization and computer implementation, applications to problems in elasticity, heat transfer, and fluid mechanics. (Cross-listed with MATH 4400).

Prerequisite(s)/Corequisite(s): MATH 1970, MATH 2050 and MATH 2350 all with a C- or better or instructor permission. MATH 3300/MATH 8305 and MATH 4330/MATH 8336 recommended. Students should be able to use a programming language (ie MATLAB) to complete computational assignments

MATH 8410 BOOLEAN NETWORKS (3 credits)

This course is focused on introduction to discrete dynamical networks, in particular logical networks, and their applications.

Prerequisite(s)/Corequisite(s): MATH 1960 (Calculus II), MATH 2230 (proof writing skills), MATH 4740 or equivalent (basic probability theory), basic computer skills; or permission of the instructor.

MATH 8430 LINEAR PROGRAMMING (3 credits)

This course includes a complete development of theoretical and computational aspects of linear programming. Basic theoretical foundations covered include polyhedra, convexity, linear inequalities and duality. Advanced topics such as decomposition and column generation are covered. Both simplex methods and interior point methods are included.

Prerequisite(s)/Corequisite(s): MATH 4300/MATH 8306

MATH 8440 NETWORK PROGRAMMING (3 credits)

A presentation of network flow models and optimization algorithms. Topics include pure, generalized, integer, and constrained network problems, plus special cases of each, including transportation, assignment, shortest-path, transshipment, and multicommodity.

Prerequisite(s)/Corequisite(s): MATH 4300/MATH 8306

MATH 8456 INTRODUCTION TO MACHINE LEARNING AND DATA MINING (3 credits)

This is an introduction to machine learning and data mining which covers the following topics with an emphasis on mathematical and statistical analysis: linear and nonlinear regression models, model selection and regularization methods, resampling methods, classification models, tree-based models, and unsupervised learning topics. If time allows, text mining and deep learning will also be introduced in the course. Statistical software will be used. (Cross-listed with MATH 4450, STAT 4450, STAT 8456)

Prerequisite(s)/Corequisite(s): MATH 4740/8746 with a C- or better or STAT 3800/8805 with a C- or better or permission of instructor.

MATH 8460 INTEGER PROGRAMMING (3 credits)

Advanced study in mathematical programming with integer or mixed integer variables. Topics include integer programming, model creation, developing solution algorithms, and applications of integer programming.

Prerequisite(s)/Corequisite(s): MATH 2030 or MATH 2230 Not open to non-degree graduate students.

MATH 8480 MULTI-AGENT SYSTEMS AND GAME THEORY (3 credits)

This course covers advanced topics in the area of coordination of distributed agent-based systems with a focus on computational aspects of game theory. The main topics covered in this course include distributed constraint satisfaction, distributed constraint optimization, and competitive and cooperative game theory. (Cross-listed with CSCI 8480).

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456. Suggested background courses: CSCI 4480 or CSCI 8486; CSCI 8080. Not open to non-degree graduate students.

MATH 8500 NUMERICAL LINEAR ALGEBRA (3 credits)

Topics covered in this course include error propagation, solutions of nonlinear equations, solutions of linear and nonlinear systems by various schemes, matrix norms and conditioning, and computation of eigenvalues and eigenvectors. (Cross-listed with CSCI 8500).

Prerequisite(s)/Corequisite(s): MATH 1960 and MATH 2050, or permission of instructor. Familiarity with computer programming is assumed.

MATH 8510 NUMERICAL DIFFERENTIAL EQUATIONS (3 credits)

Topics covered in this course include interpolation and approximations, numerical differentiation, numerical integration, and numerical solutions of ordinary and partial differential equations. (Cross-listed with CSCI 8510).

Prerequisite(s)/Corequisite(s): MATH 1970, MATH 2350, or permission of instructor. Familiarity with computer programming is assumed.

MATH 8520 ADVANCED TOPICS IN OPERATIONS RESEARCH (3 credits)

Advanced treatment of a specific topic in the area of operations research not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with CSCI 8520).

Prerequisite(s)/Corequisite(s): MATH 4300 or MATH 8306 or CSCI 4300 or CSCI 8306 or permission of the instructor.

MATH 8566 NUMBER THEORY & CRYPTOGRAPHY (3 credits)

An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 4560, CSCI 8566, MATH 4560).

Prerequisite(s)/Corequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

MATH 8616 INTRODUCTION TO TOPOLOGY (3 credits)

This is a proof-oriented course presenting the foundations of topology. Metric spaces and general topological spaces are introduced. The course explores the properties of connectedness, compactness and completeness, and operations of Tychonoff product and hyperspace. (Cross-listed with MATH 4610).

Prerequisite(s)/Corequisite(s): MATH 3230/8235 with a C- or better or permission of instructor.

MATH 8620 GENERAL TOPOLOGY (3 credits)

General topology has roots in geometry and analysis through the study of spaces, dimensions, and transformations. Its development was influenced by the parallel development of (axiomatic) set theory. This course introduces topological spaces from the point of view of separation axioms, countability axioms, compactifications, Baire property, and other completeness properties. Basic concepts of Descriptive Set Theory are also introduced.

Prerequisite(s)/Corequisite(s): MATH 4610/8616 or permission of instructor.

MATH 8626 ITERATED FUNCTION SYSTEMS AND FRACTALS (3 credits)

This is a proof-oriented course presenting the foundations of fractal geometry. It introduces students to the beauty, magic, and applications of fractals and iterated function systems, with emphasis on the mathematics behind it all. Topics range from contractions on hyperspaces and their fixed points to fractal dimensions to Julia and Mandelbrot sets. (Cross-listed with MATH 4620).

Prerequisite(s)/Corequisite(s): MATH 8616 with a C or better or permission of instructor.

MATH 8645 MODERN GEOMETRY (3 credits)

This course will study the modern foundations of Euclidean and Non-Euclidean Geometry. Included will be a study of the principles of axiomatic systems. Euclidean Geometry will be investigated using Hilbert's axioms for Euclidean geometry (or another equivalent Euclidean geometry axiom set). Hyperbolic geometry will be encountered through the models of Klein and Poincare. Neutral geometry with Lambert and Saccheri quadrilaterals will be studied. Finite geometries and projective geometries will also be explored. (Cross-listed with MATH 3640).

Prerequisite(s)/Corequisite(s): MATH 2230 with a grade of C- or better.

MATH 8650 INTRODUCTION TO PROBABILITY MODELS (3 credits)

This is an introduction to probability modeling including Poisson Processes, Markov chains, birth-death processes, queueing models and renewal theory. Applications will be an important part of the course.

Prerequisite(s)/Corequisite(s): MATH 4740/MATH 8746 or STAT 3800/STAT 8805 or permission of instructor.

MATH 8666 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)

This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, CSCI 8666, MATH 4660).

Prerequisite(s)/Corequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

MATH 8670 TOPICS IN PROBABILITY AND STATISTICS (3 credits)

A variable topics course in probability and or statistics. Topics covered will include one or more of the following: reliability theory and applications in engineering and science, advanced probability and statistical models, theory of parametric estimation and applications, and advanced probability theory and application.

Prerequisite(s)/Corequisite(s): MATH 4740/MATH 8740 or STAT 3800/STAT 8800 or permission from instructor

MATH 8720 RELIABILITY THEORY (3 credits)

This course covers the probabilistic and statistical aspects of reliability theory. Reliability theory is concerned with the probability that a component or system is successfully working over a given time period or at a specific time instance. (Cross-listed with STAT 8720).

MATH 8746 INTRODUCTION TO PROBABILITY AND STATISTICS I (3 credits)

A mathematical introduction to probability theory including the properties of probability; probability distributions; expected values and moments; specific discrete and continuous distributions; and transformations of random variables. (Cross-listed with MATH 4740).

Prerequisite(s)/Corequisite(s): MATH 1970 and either MATH 2230 or MATH 2030 or permission of instructor.

MATH 8756 INTRODUCTION TO PROBABILITY AND STATISTICS II (3 credits)

Theory and methods of statistical inference including sampling distributions, estimators, estimation, and statistical hypotheses. (Cross-listed with MATH 4750).

Prerequisite(s)/Corequisite(s): MATH 4740/MATH 8746

MATH 8766 TOPICS IN APPLIED MATHEMATICS (3 credits)

Selection of such topics such as dynamical systems and chaos, Boolean networks, modeling of discrete or continuous systems, matrix theory, difference equations, information theory, discrete events simulation and other approved by Upper Curriculum Committee. (Cross-listed with MATH 4760).

Prerequisite(s)/Corequisite(s): MATH 3100/CSCI 3100

MATH 8855 HISTORY OF MATHEMATICS (3 credits)

An overview of the history of mathematics and famous mathematicians via studying and solving famous mathematical problems, exploring famous mathematical theorems, and studying the biographies of famous mathematicians. (Cross-listed with MATH 3850).

Prerequisite(s)/Corequisite(s): MATH 1970 and MATH 2230

MATH 8960 MASTER'S PROJECT (1-6 credits)

An applied project, designed and executed under the supervision of both a faculty and industry advisor. In the project the student will apply their mathematical and/or statistical skills to an applied problem. The student will present their results via a written report and oral presentation. (Cross-listed with STAT 8960).

Prerequisite(s)/Corequisite(s): Permission of faculty advisor and graduate program chair. Not open to non-degree graduate students.

MATH 8970 INDEPENDENT GRADUATE STUDIES (1-3 credits)

Under this number a graduate student may pursue studies in an area that is not normally available to him/her in a formal course. The topics studied will be a graduate area in mathematics to be determined by the instructor.

Prerequisite(s)/Corequisite(s): Permission of instructor and graduate classification.

MATH 8980 GRADUATE SEMINAR (1-3 credits)

A graduate seminar in mathematics.

MATH 8990 THESIS (1-6 credits)

An independent research project, written under the supervision of a graduate adviser in the department of mathematics. Approval of the topic and the completed project by thesis committee is required.

Prerequisite(s)/Corequisite(s): Approval of the topic and the completed project by thesis committee is required.

MATH 9110 ADVANCED TOPICS IN APPLIED MATHEMATICS (3 credits)

Advanced treatment of a specific topic in the area of applied mathematics not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ.

Prerequisite(s)/Corequisite(s): Permission of instructor.

MATH 9230 THEORY OF FUNCTION OF REAL VARIABLES (3 credits)

A theoretical foundation for the concepts of measure theory and integration on a measure space as developed by Henry Leon Lebesgue (followed by others) starting the first decade of the 20th century including a comparison with Riemann's classical construction of integration theory known from classical calculus. Topics include: Real number system, convergence, continuity, bounded variation, differentiation, Lebesgue-Stieltjes integration, abstract measure theory, and the L_p spaces.

Prerequisite(s)/Corequisite(s): MATH 4230/MATH 8236 or permission of the instructor

Mathematics, MA

Department of Mathematics, College of Arts & Sciences

Vision Statement

The Master of Arts in mathematics is designed to achieve two objectives:

- Provide a strong program of course work in mathematics beyond the undergraduate level and
- Be flexible enough to accommodate a wide variety of student interests and backgrounds. There are no required courses in the program, but students are strongly encouraged to develop an emphasis in the

courses which make up their individual plan of study; such an emphasis provides both focus and depth in the graduate experience.

Whatever their objectives in their graduate programs, students should form a close working relationship with a faculty member having similar mathematical interests as soon as possible. This will ensure good advice in planning a coherent plan of study. In addition, an advisor may be able to suggest special topics courses, independent study, or the thesis option which could all be used to pursue one's interests in greater depth.

Finally, students who plan to pursue a doctoral degree in mathematics should include a sequence in analysis and a sequence in algebra in their plans of study.

Program Website (<http://www.unomaha.edu/math/>)

Other Program Related Information

Graduate Assistantships

The Department of Mathematics annually awards graduate assistantships for work within the department. There are also several joint UNO/MCC positions where the teaching assignments are at Metropolitan Community College. All of these positions pay an annual stipend plus a waiver of tuition. For the details of the nature of the work, please visit the assistantships page of the Department of Mathematics website.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: July 31
- Spring: November 30
- Summer: April 15

Other Requirements

For unconditional admission, an applicant should:

- Have completed a bachelor's degree with a grade point average of at least 3.0 in mathematics courses taken.
- Have completed 15 credit hours of mathematics courses beyond calculus, including MATH 3230/MATH 8235 or equivalent.
- Applicants lacking the 15 credit hours beyond calculus may be eligible for admission in a provisional or unclassified status with a deficiency to be made up in addition to the degree requirements listed.
- Applicants who satisfy the admission requirements above except for the GPA requirement may be granted provisional admission to the graduate program. They will be granted unconditional admission upon completion of 12 graduate hours with a grade of "B" or better in each course.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.

- Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105

Degree Requirements

Required Courses

There are no required courses. Choose mathematics courses with a MATH or STAT prefix numbered 8000 or above and ending in the digit zero or six, excluding MATH 8880. At least 15 of these hours must be in courses with a number ending in the zero digit. These 15 hours may include the six hours of thesis, MATH 8990, and three hours of independent study, MATH 8970.

Electives

Since all courses are electives with the exception of the six thesis credit hours, all courses taken must satisfy the above requirements for the 30 credit hours. Up to 12 hours of graduate work electives may be taken in areas related to mathematics such as physics, computer science, and economics, if permission is obtained from the Graduate Program Committee.

Exit Requirements

Students are required to take six hours of MATH 8990. All candidates should carefully review the Graduate College requirements for forming the Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval forms, and final approval and submission of the thesis.

Concentrations

Students may choose (although there is no requirement to do so) to add a concentration to their Mathematics MA degree. There are currently three available concentrations:

Mathematics, MA with Computational Mathematics Concentration
Mathematics, MA with Operations Research Concentration
Mathematics, MA with Statistics Concentration

Total Credit Hours: 30

Concentrations

Computational Mathematics Concentration

Code	Title	Credits
Core Courses		
Select at least 5 of the following:		15
MATH 8336	INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS ¹	
MATH 8250	PARTIAL DIFFERENTIAL EQUATIONS	
MATH/CSCI 8500	NUMERICAL LINEAR ALGEBRA	
MATH/CSCI 8510	NUMERICAL DIFFERENTIAL EQUATIONS	
MATH 8406	THE FINITE ELEMENT METHOD ¹

Exit Requirement

Students are required to take 6 hours of MATH 8990. All candidates should carefully review the Graduate College requirements for forming the Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval Forms, and final approval and submission of the thesis.

Mathematics, MAT

Department of Mathematics, College of Arts & Sciences

Vision Statement

The Master of Arts for Teachers of Mathematics degree is ideal for:

- Current high school teachers who are planning on teaching advanced secondary mathematics such as Dual-Enrollment calculus at their high school.
- Any student interested in teaching freshman/sophomore level mathematics courses at local universities.
- Any student interested in pursuing a PhD in education with an emphasis in mathematics.

NOTE: This program does not help a student get a state certification to teach high school math. For those students with an undergraduate degrees already interested in pursuing a degree to teach high school math, but do not yet have a state certification to teach, consider the Teacher Academy Project (<http://www.unomaha.edu/college-of-education/moec/projects/teacher-academy-project/>).

michaelmatthews@unomaha.edu

Program Website (<http://www.unomaha.edu/college-of-arts-and-sciences/mathematics/>)

Other Program-Related Information

Graduate Assistantships

The Department of Mathematics annually awards a few graduate assistantships for work within the department. These positions pay an annual stipend plus a waiver of tuition. For the details of

the nature of the work, please contact the graduate chair, Andrew Swift, aswift@unomaha.edu

Teachers of Mathematics Scholarship

The Teacher of Mathematics Scholarship is awarded to teachers of high school mathematics who are interested in obtaining a graduate degree in mathematics (MS, MA, or MAT) at UNO for the purpose of becoming eligible to teach UNO calculus dual enrollment courses. These scholarships are awarded to teachers in school districts that are participating in the Dual Enrollment program. They will provide for the reimbursement of resident tuition for up to six graduate credit hours per semester for one year. No scholarship award becomes final until UNO graduate admission status is obtained. Continuation beyond the first year depends upon satisfactory academic progress and funds available. For further information contact Dr. Janice Rech, jrech@unomaha.edu

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- Have obtained at least a "B" (3.0 on a 4.0 scale) average in previous mathematics courses, including two courses beyond elementary calculus.
- Hold state certification for teaching secondary school mathematics
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105

Degree Requirements

Code	Title	Credits
Required Courses		
Complete the Mathematics for Teachers sequence:		
MTCH 8020	MATHEMATICAL MODELING FOR SECONDARY TEACHERS	3
MTCH 8030	ALGEBRA FOR ALGEBRA TEACHERS	3
MTCH 8040	TOPICS IN MATHEMATICAL COMPUTING	3
Education Courses		
Graduate only courses TED 8xx0 to be selected in consultation with your advisor		9
Mathematic Sequences		
Complete two advisor approved Mathematics (not MTCH) sequence of courses (total of 18 hours). Each sequence must consist of three connected courses (as defined by the MAT advisors). ¹		18
Total Credits		36

¹ For example: Applied Modern Algebra, Algebra 1, and Algebra 2. If one of the courses has been taken previously as an undergraduate the course will not count toward the 36 credits, however it will count in terms of completed the three course sequence. Such a situation would in effect enable the MAT student to finish the three course sequence quicker and free up one class for an elective in mathematics.

Exit Requirements

• Comprehensive Examination

- Pass the mathematics comprehensive examination. The examination is offered three times a year; on April 15, July 15, and November 15th (or the proceeding Friday if any of these dates falls on a weekend). The mathematics exam is three hours in length and covers the terminal course of each of the two math sequence of courses. Each course instructor will write a 1.5 hour exam and grade the exam as pass or fail. To pass the overall MAT mathematics portion comprehensive exam, the student must pass both.

MTCH 8010 STATISTICAL RESEARCH FOR MATHEMATICS TEACHERS (3 credits)

This course is designed for graduate students in the MAT program who select the statistics option to complete their degree. The student will do a literature review, design a study involving mathematics education, gather and analyze the data, and prepare a manuscript for submission to a refereed journal. (The course will not count toward a major in the MA or MS program.) To prepare for the course, interested students should contact the instructor of the course several months before (8 is the norm) to have time to do the groundwork for the study.

Prerequisite(s)/Corequisite(s): STAT 8015 and TED 8010.

MTCH 8020 MATHEMATICAL MODELING FOR SECONDARY TEACHERS (3 credits)

This course will examine the mathematics underlying several problem situations found in a variety of societal settings. Mathematical models of problems in current literature will be examined and other models will be constructed based on data collected through course activities. Topics relevant to these problems will include function analysis, algebra, geometry, trigonometry and probability and statistics. The role of mathematics in society will be evidenced as problems considered will be timely and sources utilized will include original documentation whenever possible (i.e. recent research reports, government reports and publications).

MTCH 8030 ALGEBRA FOR ALGEBRA TEACHERS (3 credits)

This course will use study interesting mathematical systems related to key algebraic ideas and study habits of mind that are key to effective problem solving. The properties about numbers and operations discovered will connect to the same properties taught in school algebraic course. Special attention will be paid to linear, quadratic, exponential, and logarithmic, polynomial functions in connection to their importance in school algebra.

Prerequisite(s)/Corequisite(s): Admission to the Graduate Program

MTCH 8040 TOPICS IN MATHEMATICAL COMPUTING (3 credits)

This course focuses on the current state-of-the-art technology that is either designed for or is uniquely suitable for teaching mathematics. (Cross-listed with STEM 8040)

Prerequisite(s)/Corequisite(s): MATH 2200 or equivalent or approval of instructor.

MTCH 8880 ADVANCED PLACEMENT INSTITUTE: CALCULUS (3 credits)

A workshop for teachers planning to offer an advanced placement course in calculus. Objectives include increasing teacher competencies in single-variable calculus, discussion and study of AP calculus exams, implementations of AP courses in calculus, and development and presentation of projects for graduate credit. (This course will not count toward the M.A. or M.S. degrees in Mathematics, or the Secondary Mathematics Specialist Graduate Certificate.)

Prerequisite(s)/Corequisite(s): Graduate in mathematics or mathematics education.

Mathematics, MS

Department of Mathematics, College of Arts & Sciences

Vision Statement

The Master of Science in mathematics is designed to achieve two objectives:

- Provide a strong program of course work in mathematics beyond the undergraduate level and
- Be flexible enough to accommodate a wide variety of student interests and backgrounds. There are no required courses in the program, but students are strongly encouraged to develop an emphasis in the courses which make up their individual plan of study; such an emphasis provides both focus and depth in the graduate experience.

Whatever their objectives in their graduate programs, students should form a close working relationship with a faculty member having similar mathematical interests as soon as possible. This will ensure good advice in planning a coherent plan of study. In addition, an advisor may be able to suggest special topics courses, independent study, or the thesis option which could all be used to pursue one's interests in greater depth. Finally, students who plan to pursue a doctoral degree in mathematics should include a sequence in analysis and a sequence in algebra in their plans of study.

Other Program Related Information

Graduate Assistantships

The Department of Mathematics annually awards graduate assistantships for work within the department. There are also several joint UNO/MCC positions where the teaching assignments are at Metropolitan Community College. All of these positions pay an annual stipend plus a waiver of tuition. For the details of the nature of the work, please visit the assistantships page of the Department of Mathematics website.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: July 31
- Spring: November 30
- Summer: April 15

Other Requirements

For unconditional admission, an applicant should:

- Have completed a bachelor's degree with a grade point average of at least 3.0 in mathematics courses taken.
- Have completed 15 credit hours of mathematics courses beyond calculus, including MATH 3230/MATH 8235 or equivalent.
- Applicants lacking the 15 credit hours beyond calculus may be eligible for admission in a provisional or unclassified status with a deficiency to be made up in addition to the degree requirements listed.
- Applicants who satisfy the admission requirements above except for the GPA requirement may be granted provisional admission to the graduate program. They will be granted unconditional admission upon completion of 12 graduate hours with a grade of "B" or better in each course.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105

Degree Requirements

Required Courses

There are no required courses. Choose mathematics courses with a MATH or STAT prefix numbered 8000 or above and ending in the digit zero or six, excluding MATH 8880. At least 18 of these hours must be in courses with a number ending in a zero digit. These 18 may include three hours of independent study, MATH 8970. Courses numbered 8xx5 will not count towards the MS degree in Mathematics.

If the project option is chosen, the six required hours of MATH 8960 or STAT 8960 will count towards the overall credit hour total, and the required 18 hours of courses ending in a zero digit.

If a student chooses to add a concentration to their degree program (see below) then there will be specific courses that will be needed to be completed to fulfill the concentration requirements.

Electives

Since there are no required courses, all courses are electives which must satisfy the requirements given above for the 36 credit hours. Up to 12 hours of graduate work electives may be taken in areas related to mathematics, physics, computer science, and economics, if permission is obtained from the Graduate Program Committee.

Exit Requirements

Select One:

- **Comprehensive Examination**
 - The comprehensive examination is based on three related courses (one of which must have a number ending in a zero digit) consisting of two parts. The first part is a one-week take-home examination. The second part is a three hour examination which may be open book, at the discretion of the instructor(s). The examination is normally taken in the student's final semester and should be scheduled well in advance of the graduate college deadlines.
- **Project**
 - A mathematical or statistical project undertaken under the supervision of both a faculty advisor and an external (industry) advisory. The purpose of the project is for the student to work on a

'real-world' problem. The student will produce a written report and give an oral presentation of their work. Students are required to register for six hours of MATH 8960 or STAT 8960.

Concentrations

Students may choose (although there is no requirement to do so) to add a concentration to their Mathematics MS degree. There are currently four available concentrations:

Mathematics, MS with Computational Mathematics Concentration
 Mathematics, MS with Data Science Concentration
 Mathematics, MS with Operations Research Concentration
 Mathematics, MS with Statistics Concentration

Total Credit Hours: 36

Concentrations

Courses numbered 8–5 will not count towards the MS degree in Mathematics.

Computational Mathematics Concentration

Code	Title	Credits
Core Courses		
Select at least 5 of the following:		15
MATH 8336	INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS ¹	
MATH 8250	PARTIAL DIFFERENTIAL EQUATIONS	
MATH/CSCI 8500	NUMERICAL LINEAR ALGEBRA	
MATH/CSCI 8510	NUMERICAL DIFFERENTIAL EQUATIONS	
MATH 8406	THE FINITE ELEMENT METHOD ¹	
MATH 8970	INDEPENDENT GRADUATE STUDIES	
Electives		
Select at least 21 credit hours of courses related to computational mathematics (see below).		21
Total Credits		36

¹ Students who were undergraduates at UNO and took MATH 4330 or MATH 4400 may not take MATH 8336 or MATH 8406 at the graduate level. Students can replace these requirements with additional elective courses.

Electives

At least 21 credit hours of courses related to computational mathematics. Students must have at least 18 hours of courses ending on 0, including the core courses.

Some suggested courses are provided below. Other elective courses may be possible with the prior permission of the graduate program chair.

If any of the core course requirements were waived, then additional electives should be taken in their place.

Code	Title	Credits
MATH 8356	ORDINARY DIFFERENTIAL EQUATIONS ¹	3
MATH 8056	LINEAR ALGEBRA ¹	3
MATH 8236	MATHEMATICAL ANALYSIS I ¹	3
MATH 8246	MATHEMATICAL ANALYSIS II ¹	3
MATH 8276	COMPLEX ANALYSIS ¹	3
MATH 8400	DYNAMICAL SYSTEMS AND CHAOS	3
MATH/CSCI 8766	TOPICS IN APPLIED MATHEMATICS	3
MATH 8970	INDEPENDENT GRADUATE STUDIES	1-3

¹ Students who were undergraduates at UNO and took MATH 4350, MATH 4050, MATH 4230, MATH 4240, or MATH 4270 may not take MATH 8356, MATH 8056, MATH 8236, MATH 8246, or MATH 8276 at the graduate level.

Exit Requirements

Comprehensive Examination

The comprehensive examination is based on three related courses (one of which must have a number ending in a zero digit) consisting of two parts. The first part is a one-week take-home examination. The second part is a 3-hour examination which may be open book, at the discretion of the instructor(s). The examination is normally taken in the student's final semester and should be scheduled well in advance of the graduate college deadlines.

(Note: The project exit requirement is not available for those students wishing to complete the Computational Mathematics concentration, only the comprehensive exam exit requirement is allowed).

Data Science Concentration

Prerequisites

Some statistics and computer programming are highly recommended.

Required Courses

Code	Title	Credits
Introductory Courses		
MATH 8746	INTRODUCTION TO PROBABILITY AND STATISTICS I ¹	3
MATH 8756	INTRODUCTION TO PROBABILITY AND STATISTICS II ¹	3
Core Courses		
STAT 8416	INTRODUCTION TO DATA SCIENCE ²	3
STAT 8426	EXPLORATORY DATA VISUALIZATION AND QUANTIFICATION ²	3
MATH/CSCI 8306	DETERMINISTIC OPERATIONS RESEARCH MODELS ²	3
Approved Electives		
Select at least 15 credit hours from the following: ³		15
MATH/CSCI 8316	PROBABILISTIC OPERATIONS RESEARCH MODELS ⁴	
MATH 8430	LINEAR PROGRAMMING	
MATH 8440	NETWORK PROGRAMMING	
MATH 8460	INTEGER PROGRAMMING	
MATH 8650	INTRODUCTION TO PROBABILITY MODELS	
MATH 8670	TOPICS IN PROBABILITY AND STATISTICS	
STAT 8436	LINEAR MODELS ⁴	
STAT 8446	TIME SERIES ANALYSIS ⁴	
STAT 8456	INTRODUCTION TO MACHINE LEARNING AND DATA MINING ⁴	
STAT 8700	BAYESIAN STATISTICS	
STAT 8710	DESIGN AND ANALYSIS OF EXPERIMENTS	
STAT 8720	RELIABILITY THEORY	
MATH 8970	INDEPENDENT GRADUATE STUDIES	
STAT 8730	ADVANCED STATISTICAL MACHINE LEARNING	
STAT/MATH 8960	MASTER'S PROJECT	6
Total Credits		36

¹ Students who were undergraduates at UNO and took MATH 4740 or MATH 4750 may not take MATH 8746 or MATH 8756. For those students who can demonstrate previous statistical exposure can appeal to the graduate program chair to waive the MATH 8746/MATH 8756 requirements. Students can replace these requirements with additional elective courses.

² Students who were undergraduates at UNO and took STAT 4410, STAT 4420, or MATH 4300 may not take STAT 8416, STAT 8426, or MATH 8306 at the graduate level. Students can replace these requirements with additional elective courses.

³ If any of the introductory or core course requirements were waived, then additional electives should be taken in their place. Other elective courses may be possible with the prior permission of the graduate program chair.

⁴ Students who were undergraduates at UNO and took MATH 4310, STAT 4430, or STAT 4440 may not take MATH 8316, STAT 8436, or STAT 8446 at the graduate level.

Exit Requirement

Each student is required to complete a project involving working with real-world data. The student will be advised by both a faculty and external advisor, and a completed written and oral report is required.

Students are required to sign up for 6 hours of MATH 8960 or STAT 8960.

(Note: The comprehensive exam exit requirement is not available for those students wishing to complete the Data Science concentration, only the project exit requirement is allowed).

Operations Research Concentration

Code	Title	Credits
Core Courses		
Select at least 5 of the following:		15
MATH/CSCI 8306	DETERMINISTIC OPERATIONS RESEARCH MODELS ¹	
MATH/CSCI 8316	PROBABILISTIC OPERATIONS RESEARCH MODELS ¹	
MATH 8326	COMPUTATIONAL OPERATIONS RESEARCH ¹	
MATH 8430	LINEAR PROGRAMMING	
MATH 8440	NETWORK PROGRAMMING	
MATH 8460	INTEGER PROGRAMMING	
Electives		
Select one of the following (see below):		21
For students choosing the comprehensive exam option, at least 21 credit hours of courses related to operations research		
For students choosing the project option, at least 15 credit hours of courses related to operations research and 6 credit hours of MATH 8960		
Total Credits		36

¹ Students who were undergraduates at UNO and took MATH 4300, MATH 4310, or MATH 4320 may not take MATH 8306, MATH 8316, or MATH 8326 at the graduate level. Students can replace these requirements with additional elective courses.

Electives

For students choosing the comprehensive exam option, at least 21 credit hours of courses related to operations research.

For students choosing the project option, at least 15 credit hours of courses related to operations research.

Students must have at least 18 hours of courses ending on 0, including the core courses and, for those choosing the project option, the 6 hours of project, MATH 8960.

Some suggested courses are provided below. Other elective courses may be possible with the prior permission of the graduate program chair.

If any of the core course requirements were waived, then additional electives should be taken in their place.

Code	Title	Credits
MATH/CSCI 8520	ADVANCED TOPICS IN OPERATIONS RESEARCH	3
MATH 8746	INTRODUCTION TO PROBABILITY AND STATISTICS I ¹	3
MATH 8756	INTRODUCTION TO PROBABILITY AND STATISTICS II ¹	3
MATH 8650	INTRODUCTION TO PROBABILITY MODELS	3
MATH/CSCI 8156	GRAPH THEORY & APPLICATIONS ¹	3
STAT 8416	INTRODUCTION TO DATA SCIENCE ¹	3
STAT 8426	EXPLORATORY DATA VISUALIZATION AND QUANTIFICATION ¹	3
STAT 8436	LINEAR MODELS ¹	3
STAT 8446	TIME SERIES ANALYSIS ¹	3
MATH 8970	INDEPENDENT GRADUATE STUDIES	1-3

¹ Students who were undergraduates at UNO and took MATH 4740, MATH 4750, MATH 4150, STAT 4410, STAT 4420, STAT 4430, or STAT 4440 may not take MATH 8746, MATH 8756, MATH 8156, STAT 8416, STAT 8426, STAT 8436, or STAT 8446 at the graduate level.

Exit Requirements

Code	Title	Credits
MATH/STAT 8960	MASTER'S PROJECT	6

The comprehensive examination is based on three related courses (one of which must have a number ending in a zero digit) consisting of two parts. The first part is a one-week take-home examination. The second part is a 3-hour examination which may be open book, at the discretion of the instructor(s). The examination is normally taken in the student's final semester and should be scheduled well in advance of the graduate college deadlines.

A project undertaken under the supervision of both a faculty advisor and an external (industry) advisory. The purpose of the project is for the student to work on a 'real-world' problem using the skills learned during their coursework. The student will produce a written report and give an oral presentation of their work. Students are required to register for 6 hours of MATH 8960.

Statistics Concentration

Code	Title	Credits
Core Courses		
MATH 8746	INTRODUCTION TO PROBABILITY AND STATISTICS I ¹	3
MATH 8756	INTRODUCTION TO PROBABILITY AND STATISTICS II ¹	3
STAT 8436	LINEAR MODELS ¹	3
STAT 8710	DESIGN AND ANALYSIS OF EXPERIMENTS	3
Electives		
Select one of the following (see below):		24

For students choosing the comprehensive exam option, at least 24 credit hours of courses with a statistical nature, with at least 15 hours of courses ending in 0

For students choosing the project option, at least 18 credit hours of courses with a statistical nature, with at least 9 hours of courses ending in 0. Six hours of MATH 8960 are required.

Total Credits **36**

¹ Students who were undergraduates at UNO and took MATH 4740, MATH 4750, or STAT 4430 may not take MATH 8746, MATH 8756, or STAT 8436 at the graduate level. Students can replace these requirements with additional elective courses.

Electives

For students choosing the comprehensive exam option, at least 24 credit hours of courses with a statistical nature, with at least 15 hours of courses ending in 0.

For students choosing the project option, at least 18 credit hours of courses with a statistical nature, with at least 9 hours of courses ending in 0.

Some suggested courses are provided below. Other elective courses may be possible with the prior permission of the graduate program chair.

If any of the core course requirements were waived, then additional electives should be taken in their place.

Code	Title	Credits

Exit Requirements

Code	Title	Credits
STAT/MATH 8960	MASTER'S PROJECT	6

The comprehensive examination is based on three related courses (one of which must have a number ending in a zero digit) consisting of two parts. The first part is a one-week take-home examination. The second part is a 3-hour examination which may be open book, at the discretion of the instructor(s). The examination is normally taken in the student's final semester and should be scheduled well in advance of the graduate college deadlines.

A statistical project undertaken under the supervision of both a faculty advisor and an external (industry) advisory. The purpose of the project is for the student to work on a 'real-world' problem. The student will produce a written report and give an oral presentation of their work.

Students are required to register for 6 hours of STAT 8960.

Secondary Mathematics Specialist Certificate

Department of Mathematics, College of Arts & Sciences

Vision Statement

The Secondary Mathematics Specialist certificate is ideal for:

- Current high school teachers who are planning on teaching advanced secondary mathematics such as Dual-Enrollment calculus at their high school and already have a masters degree in a STEM or education field or would like to get one.
- Any student interested in teaching freshman/sophomore level mathematics courses at local universities.
- Any student interested in pursuing a PhD in education with an emphasis in mathematics.

NOTE: This program does not help a student get a state certification to teach high school math. For those students with an undergraduate degrees already interested in pursuing a degree to teach high school math, but do not yet have a state certification to teach, consider the Teacher Academy Project (<http://www.unomaha.edu/college-of-education/moec/projects/teacher-academy-project/>).

Program Website (<http://www.unomaha.edu/college-of-arts-and-sciences/mathematics/>)

Other Program Related Information

Graduate Assistantships

The Department of Mathematics annually awards a few graduate assistantships for work within the department. These positions pay an annual stipend plus a waiver of tuition. For the details of the nature of the work, please contact the graduate department chair, Andrew Swift, aswift@unomaha.edu.

Teachers of Mathematics Scholarship

The Teacher of Mathematics Scholarship is awarded to teachers of high school mathematics who are interested in obtaining a graduate degree in mathematics (MS, MA, or MAT) at UNO for the purpose of becoming eligible to teach UNO calculus dual enrollment courses. These scholarships are awarded to teachers in school districts that are participating in the Dual Enrollment program. They will provide for the reimbursement of resident tuition for up to six graduate credit hours per semester for one year. No scholarship award becomes final until UNO graduate admission status is obtained. Continuation beyond the first year depends upon satisfactory academic progress and funds available. For further information contact Dr. Janice Rech, jrech@unomaha.edu.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

Individuals applying must satisfy the following requirements which are the same as for the Mathematics MAT degree.

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- Have obtained at least a "B" (3.0 on a 4.0 scale) average in previous mathematics courses, including two courses beyond elementary calculus
- Hold state certification for teaching secondary school mathematics
- Course prerequisites will be determined at admission

Degree Requirements

MTCH 8040	TOPICS IN MATHEMATICAL COMPUTING	3
Mathematic Sequences		
	Complete one advisor approved Mathematics (not MTCH) sequence of courses (total of 9 hours). One sequence must include MATH 8756 and one of the following: STAT 8416 or STAT 8426. One additional MATH/STAT elective is required and can be part of either sequence.)	9
Total Credits		18

Music, MM

Degree Programs Offered

- Music, MM (p. 1278)

Certificates Offered

- Kodaly Certificate (p. 1279)

MUS 815A APPLIED BASSOON (1-3 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 815B APPLIED CELLO (1-3 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for 1-3 credits. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the string faculty.

MUS 815C APPLIED CLARINET (1-3 credits)

This course provides individual weekly instruction on clarinet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 815D APPLIED DOUBLE BASS (1-3 credits)

This course, applied bass, is intended for private study of the double bass at the university graduate level. This course provides individual weekly instruction on double bass. Students work with the instructor to schedule lessons for one to three credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): An audition is required of all students registering for three hours of study and declaring bass as their major instrument. Not open to non-degree graduate students.

MUS 815E APPLIED EUPHONIUM (1-3 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815F APPLIED FLUTE (1-3 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors), two credit hours (music education majors), or three credit hours (music performance majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty, or successful completion of at least 1 credit of MUS 815F. Students enrolled in this course must also enroll in an instrumental ensemble.

MUS 815G APPLIED FRENCH HORN (1-3 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815H APPLIED GUITAR (1-3 credits)

This course, applied guitar, is intended for private study of the guitar at the university graduate level. This course provides individual weekly instruction on guitar. Students work with the instructor to schedule lessons for one to three credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): An audition is required of all students registering for three hours of study and declaring guitar as their major instrument. Not open to non-degree graduate students.

MUS 815I APPLIED HARP (1-3 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for 1-3 credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): An audition is required of all students registering for three hours of study and declaring harp as their major instrument. Not open to non-degree graduate students.

MUS 815J APPLIED OBOE (1-3 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 815K APPLIED PERCUSSION (1-3 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Admission into the graduate college. Enrollment in this course requires an audition performed for and approved by the percussion faculty. Must attend the weekly masterclass. Not open to non-degree graduate students.

MUS 815L APPLIED PIANO (1-3 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 815M APPLIED PIPE ORGAN (1-3 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 815N APPLIED SAXOPHONE (1-3 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 815O APPLIED TROMBONE (1-3 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815P APPLIED TRUMPET (1-3 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815Q APPLIED TUBA (1-3 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815R APPLIED VIOLA (1-3 credits)

This course, applied bass, is intended for private study of the viola at the university graduate level. This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one to three credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): An audition is required of all students registering for three hours of study and declaring viola as their major instrument. Not open to non-degree graduate students.

MUS 815S APPLIED VIOLIN (1-3 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for 1-3 credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): An audition is required of all students registering for three hours of study and declaring violin as their major instrument. Not open to non-degree graduate students.

MUS 815T VOICE (1-3 credits)

This course provides graduate level individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one or two credit hour (MM Education candidates) or three credit hours (MM Performance candidates). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for and approved by the voice faculty. All students must attend the weekly masterclass.

MUS 8006 SPECIAL STUDIES IN MUSIC (1-3 credits)

Seminars or workshops in Theory, History, Performance, and Music Education designed to meet specific interests and needs of students. Topics and number of credits for each specific offering will be announced during the prior semester. (Cross-listed with MUS 4000).

Prerequisite(s)/Corequisite(s): Graduate and permission of department.

MUS 8160 PERFORMING ENSEMBLES (0-1 credits)

This course is designed to provide high quality performance experience for the graduate level string, voice, and instrumental students. In addition to the series concerts on campus, there are frequent appearances at professional music conferences and community/statewide events. Students will be exposed to a wide variety of music from appropriate style periods.

Prerequisite(s)/Corequisite(s): Graduate standing, audition. Not open to non-degree graduate students.

MUS 8246 ADVANCED AUDIO RECORDING TECHNIQUES (3 credits)

This course provides students with advanced instruction in sound mixing, digital audio editing, audio post-production and mastering. Topics include advanced digital audio editing, audio signal processing techniques, analog signal processing hardware, automation, and final product authoring and mastering. (Cross-listed with MUS 4240).

Prerequisite(s)/Corequisite(s): MUS 3170, MUS 4200 & MUS 4210. Not open to non-degree graduate students.

MUS 8436 ARRANGING FOR JAZZ ENSEMBLE (3 credits)

Techniques of writing for jazz ensembles of various combinations of instruments. (Cross-listed with MUS 4430).

Prerequisite(s)/Corequisite(s): MUS 2480 or MUS 2420

MUS 8446 MUSIC SINCE 1945 (3 credits)

This course covers important developments in music in the United States and Europe since 1945. (Cross-listed with MUS 4440).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of the instructor.

MUS 8460 MUSIC ANALYSIS FOR PERFORMANCE (3 credits)

Advanced study of performance practice and music analysis.

Prerequisite(s)/Corequisite(s): Graduate Student in Music

MUS 8536 HISTORY OF WESTERN OPERA (3 credits)

This course will consist of significant music theater works in the Western world from 1600 to the present. (Cross-listed with MUS 4530).

Prerequisite(s)/Corequisite(s): Music major or permission of instructor

MUS 8546 RENAISSANCE MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature c. 1350-1600. (Cross-listed with MUS 4540).

Prerequisite(s)/Corequisite(s): MUS 2550, 2560, 2570 and graduate. Not open to non-degree graduate students.

MUS 8556 BAROQUE MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from c. 1600-1750. (Cross-listed with MUS 4550).

Prerequisite(s)/Corequisite(s): MUS 2550, MUS 2560 and graduate.

MUS 8566 CLASSICAL MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from c. 1750-1815. (Cross-listed with MUS 4560).

Prerequisite(s)/Corequisite(s): MUS 2550, 2560, 2570 and graduate

MUS 8576 ROMANTIC MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of Music literature from c. 1815-1912. (Cross-listed with MUS 4570).

Prerequisite(s)/Corequisite(s): MUS 2550, MUS 2560 and graduate.

MUS 8586 MUSIC FROM 1900 - 1945 (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from the post-romantic period to 1945. The objective will be to provide the student with a broad overview with special attention given to composers and individual works which typify a style or form. (Cross-listed with MUS 4580).

Prerequisite(s)/Corequisite(s): MUS 2560.

MUS 8596 AFRICAN-AMERICAN POPULAR MUSIC FROM BEBOP TO HIP-HOP (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of African-American popular music literature from c. 1900-present. The objective will be to provide the student with a broad overview with special attention given to musicians and individual works which typify a style or form. Listening assignments will be an integral part of the course, and attendance at live performances will supplement the lectures, discussions and readings. (Cross-listed with MUS 4590, BLST 8596, BLST 4590).

Prerequisite(s)/Corequisite(s): Music major standing or permission of instructor.

MUS 8600 PEDAGOGY OF WORLD MUSIC (3 credits)

This class will cover the two primary approaches to teaching world musics; the world music curriculum and the music in America curriculum. Pedagogical approaches to the case study and the cultural survey will be included. Activities relating to performing and listening to world musics are also part of the course.

Prerequisite(s)/Corequisite(s): Graduate

MUS 8606 PIANO PEDAGOGY (3 credits)

This course is a survey of the art of teaching the piano. Course content will include a survey of beginning and intermediate piano methods, literature for the beginning/intermediate piano student, studio business practice, professional organizations, and group piano instruction pedagogy. (Cross-listed with MUS 4600).

MUS 8610 ORGANIZATION AND ADMINISTRATION IN MUSIC (3 credits)

Course is designed to acquaint students with the knowledge and concepts necessary for understanding and developing music education programs in the public schools and specific knowledge pertaining to policies and procedures for administering and supervising programs of music education.

MUS 8616 VOICE PEDAGOGY (3 credits)

This course is a study of the physiological and acoustical properties of the vocal mechanism and of the various techniques used in developing the singing voice. Also, it will apply knowledge acquired about the voice through studio teaching and observations of other voice teachers. (Cross-listed with MUS 4610).

Prerequisite(s)/Corequisite(s): Voice Music Major or permission of instructor.

MUS 8630 RESEARCH AND BIBLIOGRAPHY IN MUSIC (3 credits)

A study of research techniques and literature in music toward the objectives of reading and evaluating music research and doing independent work in the area.

Prerequisite(s)/Corequisite(s): Graduate standing in the UNO School of Music.

MUS 8640 FOUNDATIONS OF MUSIC EDUCATION (3 credits)

A study of psychological and historical backgrounds of music education through attention to relevant topics in the psychology of music and learning theory and through relevant readings in the history of music education as well as sociological trends in American schools.

Prerequisite(s)/Corequisite(s): Graduate.

MUS 8660 PEDAGOGY OF MUSIC THEORY (3 credits)

Designed to introduce teachers to the techniques and problems of teaching music theory in elementary and secondary schools and colleges. This will be accomplished through a variety of methods to include a review of texts, teaching, and research.

Prerequisite(s)/Corequisite(s): Acceptance to the graduate program in music.

MUS 8670 KODALY I: METHODOLOGY (3 credits)

This course provides strategies for teaching music based on the philosophies and practices of musician-composer-educator Zoltan Kodaly. Level I courses focus specifically on pedagogy, repertoire, and materials for grades prekindergarten through grade 1.

MUS 8680 KODALY 2: METHODOLOGY (3 credits)

This course provides strategies for teaching music based on the philosophies and practices of musician-composer-educator Zoltan Kodaly. Level I courses focus specifically on pedagogy, repertoire, and materials for grades 2 through grade 4.

Prerequisite(s)/Corequisite(s): Successful completion of MUS 8670

MUS 8690 KODALY 3: METHODOLOGY (3 credits)

This course provides strategies for teaching music based on the philosophies and practices of musician-composer-educator Zoltan Kodaly. Level III courses focus specifically on pedagogy, repertoire, and materials for grades 5-6.

Prerequisite(s)/Corequisite(s): Successful completion of MUS 8680.

MUS 8696 HEALTH AND WELLNESS FOR MUSICIANS (3 credits)

Health and Wellness for Musicians gives an overview of the dimensions of wellness and common health/wellness challenges for musicians. The course provides students with a toolbox of ideas and strategies for the development, design, and implementation of a music wellness campaign for non-musicians and individualized wellness plans for specific instruments and voice types. (Cross-listed with MUS 4660).

MUS 8700 CONDUCTING PRACTICUM (1-3 credits)

Private instruction in conducting and an intense study of the various disciplines in music and their relationship and application to the art of conducting. Course may include a group seminar component. This course may be repeated for credit.

Prerequisite(s)/Corequisite(s): Acceptance into the graduate program for conducting majors. Permission of instructor for performance or music education majors.

MUS 8710 KODALY 4: METHODOLOGY AND ADVANCED STUDIES (3 credits)

This course provides strategies for teaching music based on the philosophies and practices of musician-composer-educator Zoltan Kodaly. It is designed for students who have completed Kodaly certification (levels I-III). The course assists students in continual development of individual musicianship, mentoring, and research skills.

MUS 8720 KODALY 1: MUSICIANSHIP (1 credit)

This course provides basic musicianship skills through singing, conducting, and dictating simple rhythms, melodies and folk songs.

Prerequisite(s)/Corequisite(s): Requires concurrent enrollment in MUS 8670

MUS 8726 CHORAL LITERATURE (3 credits)

A survey course in the study of significant choral genre of the various periods of music from plain song to contemporary music. (Cross-listed with MUS 4720).

Prerequisite(s)/Corequisite(s): Graduate music major standing or permission of the instructor.

MUS 8730 KODALY 2: MUSICIANSHIP (1 credit)

This course provides intermediate musicianship skills through singing, conducting, and dictating simple rhythms, melodies and folk songs.

Prerequisite(s)/Corequisite(s): Prerequisites: MUS 8670 and MUS 8720; Requires concurrent enrollment in MUS 8680

MUS 8736 KEYBOARD LITERATURE (3 credits)

This course will examine literature written for keyboard (piano) from the 16th century to the present. Emphasis will be placed on solo literature of the Baroque, Classic, Romantic, and Contemporary periods. Included are keyboard concertos with orchestra and works for four hands and two pianos. (Cross-listed with MUS 4730).

MUS 8740 KODALY 3: MUSICIANSHIP (1 credit)

This course provides advanced musicianship skills through singing, conducting, and dictation of rhythms, melodies and folk songs in multiple meters, scales, and modes.

Prerequisite(s)/Corequisite(s): Prerequisite must have completed MUS 8680 and MUS 8730; Requires concurrent enrollment in MUS 8690

MUS 8746 VOICE LITERATURE (3 credits)

This course is a study of the development of art song in Europe and America. Emphasis will be given to German and French song literature and their influences on English and American song. (Cross-listed with MUS 4740).

Prerequisite(s)/Corequisite(s): MUS 815T or permission of graduate instructor.

MUS 8770 KODALY 4: MUSICIANSHIP (1 credit)

This course provides advanced musicianship skills through singing, conducting, and dictation of rhythms, melodies and folk songs in multiple meters, scales, and modes.

Prerequisite(s)/Corequisite(s): Prerequisites: completion of MUS 8690 and MUS 8740; Corequisites: Requires concurrent enrollment in MUS 8710

MUS 8970 GRADUATE PROJECT (3 credits)

Completion of a graduate project relevant to the student's major area of study under the supervision of an advisor. The project must demonstrate competency in writing and research/creative activity as it pertains to appropriate aspects of music.

Prerequisite(s)/Corequisite(s): A committee comprised of three full-time faculty members, with graduate standing in the School of Music must approve the project.

MUS 8980 RECITAL (3 credits)

This course involves the selection, preparation and public performance of a full recital in the student's major applied area. The recital should demonstrate the student's competency in a variety of styles and make advanced technical and interpretative demands. The course also includes related Electronic Press Kit: program, press release and photo.

Prerequisite(s)/Corequisite(s): Students are required to pay a Recital Fee which covers costs for programs and recording. Students must be concurrently enrolled in applied lessons (MUS 815) on the instrument/voice on which they are performing the recital.

MUS 8990 THESIS (3 credits)

The purpose of this course is to allow graduate students in Music Education the opportunity to develop a substantive thesis which employs and mirrors research or original thought of a quality and quantity appropriate to advanced work in music education. This course will be handled on an individual study basis with aid and consultation from a faculty thesis advisor and thesis committee. Method of grading will be a designation of "satisfactory" or "unsatisfactory".

Prerequisite(s)/Corequisite(s): MUS 8630 and 24 hours of graduate coursework. A Proposed Supervisory Committee Form and Thesis Proposal Approval Form filed with the Office of Graduate Studies before initiating the thesis at least one semester prior to the anticipated graduation date.

Music, MM

School of Music, College of Communication, Fine Arts & Media

Vision Statement

The Master of Music degree at the University of Nebraska at Omaha (UNO) is divided into four concentrations: music education, music performance, jazz and conducting. The music performance and jazz concentrations are 30 hour programs that emphasize performance and applied music. Courses dealing with history, theory, and pedagogy are included, and opportunities for internships and performances in local professional organizations such as Opera Omaha, Omaha Performing Arts, the Jewell and the Omaha Symphony are enjoyed by students at UNO. The music education concentration is a 30 hour program with courses that emphasize pedagogy, practical application of music skills, and research for teachers at all levels. The class times and offerings are scheduled with the current practitioner in mind and include the option to complete much of the coursework online or during summer sessions. The conducting concentration is a thirty-hour program that emphasizes individualized instruction in conducting and maximizes experiences in front of an ensemble. Courses in music history, literature, and theory supplement the practical experience to help produce well-rounded graduates with considerable knowledge of techniques and literature. The conducting concentration is available through in-person instruction, online/remote instruction, or hybrid instruction. In order to pursue the online/remote delivery option students must have an off-campus lab ensemble approved by graduate conducting faculty as part of the audition process.

Admissions

General Application Requirements and Admission Criteria

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: June 15
- Spring: November 15
- Summer: April 15

Other Requirements

- Applicants must have an undergraduate degree in music from an accredited institution and have an undergraduate cumulative GPA of 3.0 or a GPA of 3.0 or better in all music courses.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Resume**
- If the applicant does not have an undergraduate degree in music, the applicant must take the School of Music Graduate Diagnostic Exam before enrolling in any graduate courses in order to determine which undergraduate foundation courses may be necessary.
- An audition for a panel of three graduate faculty members is required for all applicants wishing to pursue the **Performance, Jazz or Conducting** concentration.

Degree Requirements

Student must select an area of concentration.

Exit Requirements

All students must take final comprehensive examinations. Students can take comprehensive exams before the semester in which they intend to graduate; however, all required coursework in the program must be completed. The exception is if a student has not completed one required course and is enrolled in that course during the semester in which they are taking their comprehensive exams. Comprehensive exams will be offered three times during the course of the year—Fall, Spring and Summer. Normally the exams are administered on the last Saturday of October or first Saturday in November (Fall Semester), the last Saturday of March or first Saturday in April (Spring Semester), and the last Friday of June or the first Friday of July (Summer Term).

Kodaly Certificate

School of Music, College of Communication, Fine Arts & Media

Vision Statement

The Kodály graduate certificate program is designed provide music educators with an opportunity to enhance their pedagogical skills with a program that promotes music literacy through experiential learning in singing, movement, and reading activities. The Kodály program—named for the methods developed by Zoltán Kodály, a Hungarian composer and ethnomusicologist—includes courses that provide classroom applications of the method, folksong literature research, conducting experiences, and instruction in solfege.

Political Science

Degree Programs Offered

- Political Science, MS (p. 1284)

Certificates Offered

- Government Certificate (p. 1289)
- Global Information Operations Certificate (p. 1288)
- Intelligence and National Security Certificate (p. 1291)

PSCI 8000 SEMINAR IN THE RESEARCH METHODS IN POLITICAL SCIENCE (3 credits)

This course introduces students to the methods of data collection and analysis for political science research.

Prerequisite(s)/Corequisite(s): Permission of graduate adviser

PSCI 8005 QUANTITATIVE ANALYSIS IN POLITICAL SCIENCE (3 credits)

This course introduces students to the techniques that political scientists use to answer research questions with quantitative data, as well as issues of research design, hypothesis formation, and causation. The course emphasizes the methods used to collect, analyze, and extract information from data using statistical computer software. (Cross-listed with PSCI 3000)

Prerequisite(s)/Corequisite(s): Permission of graduate adviser

PSCI 8015 URBAN POLITICS (3 credits)

This course introduces students to the development, powers, forms of government, and functions of cities and their suburbs as well as the problems faced by elected officials, business and community leaders, and citizens in the urban setting. (Cross-listed with PSCI 3010)

Prerequisite(s)/Corequisite(s): PSCI 1100.

PSCI 8036 THE PRESIDENCY (3 credits)

This course introduces students to the development and modern application of presidential leadership through examination of presidential selection, presidential decision-making, the relationship of the presidency with other governmental and non-governmental actors, and the role of the presidency in making public policy. (Cross-listed with PSCI 4030)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8040 SEMINAR IN AMERICAN GOVERNMENT AND POLITICS (3 credits)

This course introduces students to classic and contemporary scholarship on the principles, institutions, processes, and policies of national government in the United States with an emphasis on engaging in thoughtful discussion and individual research.

Prerequisite(s)/Corequisite(s): Permission of graduate adviser

PSCI 8045 GOVERNMENT AND POLITICS OF NEBRASKA (3 credits)

This course introduces students to the development, structures, functions and public policies of the government of the state of Nebraska.. (Cross-listed with PSCI 3040)

Prerequisite(s)/Corequisite(s): PSCI 1100.

PSCI 8046 CONGRESS AND THE LEGISLATIVE PROCESS (3 credits)

This course introduces students to the development of the Congress and modern application of the legislative process through examination of congressional elections, congressional leadership, congressional decision-making, legislative rules and procedures, the relationship of the Congress with other governmental and non-governmental actors, and the role of the Congress in making public policy. (Cross-listed with PSCI 4040)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8055 STATE GOVERNMENT AND POLITICS (3 credits)

This course introduces students to the development, structures, functions and public policies of states. (Cross-listed with PSCI 3050)

Prerequisite(s)/Corequisite(s): PSCI 1100.

PSCI 8056 THE JUDICIAL PROCESS (3 credits)

This course introduces students to the administration of law in federal and state courts with respect to the organization of the courts, judicial selection, judicial powers, judicial decision-making, judicial policy-making, the bar, and reform movements in the pursuit of justice. (Cross-listed with PSCI 4050)

Prerequisite(s)/Corequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 8100 SEMINAR IN POLITICAL ECONOMY (3 credits)

A comprehensive study of theories of political economy, linkages between politics and economics, and major contemporary issues.

Prerequisite(s)/Corequisite(s): Permission of the graduate adviser

PSCI 8105 LGBT POLITICS (3 credits)

This course introduces students to the political struggle for Lesbian, Gay, Bisexual, and Transgender (LGBT) equal rights in the United States using a model of political empowerment, which may be applied for all minority or identity groups and social movements, generating operationalized measures of progress toward the loci of political power. (Cross-listed with PSCI 3100, WGST 3100, WGST 8105)

PSCI 8116 POLITICAL PSYCHOLOGY (3 credits)

This course introduces students to the role of human thought, emotion, and behavior in politics through examination of the psychological factors that motivate political elites and the mass public. (Cross-listed with PSC I 4110, PSYC 4110, PSYC 8116)

Prerequisite(s)/Corequisite(s): PSCI 1100 is recommended.

PSCI 8120 SEMINAR IN LEADERSHIP (3 credits)

This course introduces students to classical and contemporary scholarship on leadership theory, research, and application. Students gain a foundation in models of leadership, assess their own leadership styles, and learn to integrate what they learn in corporate, governmental, non-profit, or community organizations. (Cross-listed with CACT 8510)

Prerequisite(s)/Corequisite(s): Permission of graduate adviser.

PSCI 8126 PUBLIC OPINION AND POLLING (3 credits)

This course introduces students to the origins, nature, measurement, and consequences of public opinion on policymaking. (Cross-listed with PSCI 4120)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8135 WOMEN AND POLITICS (3 credits)

This course introduces students to women's political participation, including holding elective office, socialization, the feminist movement and its opposition, and public policies with particular impact on women. The focus is on contemporary perspectives on women in American political ideas and behavior. (Cross-listed with PSCI 3130, WGST 3130, WGST 8135)

PSCI 8145 LATINO/-A POLITICS (3 credits)

This course introduces students to the dynamism and growth of the role of Latinos, as a group of political actors, in the United States. This course provides students with an exposure to and understanding of various concepts and dimensions of this phenomenon, including historical and contemporary Latino political thought and the efforts to increase political empowerment (representation and participation) and influence through grassroots, social, and political movements. (Cross-listed with PSCI 3140, LLS 3140, LLS 8145)

PSCI 8146 CONSTITUTIONAL LAW: CIVIL RIGHTS (3 credits)

This course introduces students to the history, principles, and judicial interpretation of key constitutional provisions and federal statutes regarding civil rights in the United States. (Cross-listed with PSCI 4140)

Prerequisite(s)/Corequisite(s): PSCI 1100 or equivalent.

PSCI 8150 SEMINAR IN CONSTITUTIONAL LAW (3 credits)

This course introduces students to the Constitution and the Supreme Court's exercise of judicial review in relation to governmental powers, civil rights, and civil liberties.

Prerequisite(s)/Corequisite(s): Permission of graduate advisor.

PSCI 8165 POLITICAL PARTIES (3 credits)

This course introduces students to the origin, development, structure, and functions of political parties in the United States as political organizations, coalitions of voters, and governing coalitions that seek to hold office and influence public policy. (Cross-listed with PSCI 3160)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8175 INTEREST GROUPS (3 credits)

This course introduces students to the theories, formation, organization, and activities of interest groups and their impact on public policy, particularly through their role in campaigns and elections and lobbying. (Cross-listed with PSCI 3170)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8176 CONSTITUTIONAL LAW: FOUNDATIONS (3 credits)

This course introduces students to the principles, design and operation of the American constitutional system with emphasis on analysis of the Declaration of Independence, the Articles of Confederation, the proceedings of the Constitutional Convention, and the Federalist Papers. (Cross-listed with PSCI 4170)

Prerequisite(s)/Corequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 8185 CAMPAIGNS AND ELECTIONS (3 credits)

This course introduces students to the evolution and modern application of campaigns and elections in the United States through examination of campaign management and campaign strategy in congressional and presidential elections. (Cross-listed with PSCI 3180)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8186 CONSTITUTIONAL LAW: THE FEDERAL SYSTEM (3 credits)

This course introduces students to American constitutional law as it relates to issues of federalism, the relation of the nation and the states, and separation of powers, the relation of the three branches of the national government. (Cross-listed with PSCI 4180)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8196 CONSTITUTIONAL LAW: CIVIL LIBERTIES (3 credits)

This course introduces students to the philosophy, history, and development of the personal liberties guaranteed by the Constitution including freedom of speech, religion, assembly, petition, and the right of privacy, primarily through examination of Supreme Court decisions. (Cross-listed with PSCI 4190)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8200 SEMINAR IN FOREIGN POLICY AND NATIONAL SECURITY (3 credits)

This course introduces students to classic and contemporary scholarship on the formulation and implementation of foreign and national security policy in the United States with an emphasis on engaging in thoughtful discussion and individual research.

Prerequisite(s)/Corequisite(s): Permission of the graduate adviser.

PSCI 8206 INTERNATIONAL RELATIONS OF EAST ASIA (3 credits)

This course introduces students to the international politics of East Asia with an emphasis on the contemporary relations among major East Asian states (China, Japan, the Korean peninsula) and the United States. (Cross-listed with PSCI 4200)

PSCI 8216 INTERNATIONAL RELATIONS OF THE MIDDLE EAST (3 credits)

This course focuses on the international politics of the Middle East region, specifically looking at conditions for peace and causes of war. It examines how the international system, domestic politics, ideologies, and leaders influence international politics in the Middle East. (Cross-listed with PSCI 4210)

PSCI 8220 SEMINAR ON INTERNATIONAL LEADERSHIP AND STRATEGY (3 credits)

This course introduces students to international leadership and strategy theory, research, and application.

Prerequisite(s)/Corequisite(s): Permission of graduate advisor.

PSCI 8225 INTERNATIONAL ORGANIZATIONS (3 credits)

This course introduces students to the history, principles, structures, and processes developed to organize and legitimize peaceful reconciliation of the differences of nation-states and to advance their mutual interests in the contemporary global political and economic system. (Cross-listed with PSCI 3220)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8235 GENDER AND GLOBAL POLITICS (3 credits)

This seminar introduces students to gender politics in comparative and international politics. (Cross-listed with PSCI 3230, WGST 3230, WGST 8235)

PSCI 8245 THE POLITICS AND PRACTICE OF HUMAN RIGHTS (3 credits)

This course introduces students to human rights issues across the globe and explores the theoretical foundations of human rights as well as human rights institutions and transitional justice. (Cross-listed with PSCI 3240)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8246 INTERNATIONAL CONFLICT RESOLUTION (3 credits)

This course introduces students to different approaches to peace, their basic assumptions, and their application to current conflicts.. (Cross-listed with PSCI 4240)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8250 SEMINAR IN INTERNATIONAL RELATIONS (3 credits)

This course introduces students to classic and contemporary scholarship on the issues, theories, and methodological approaches associated with the study of the nation-state system, international law, international organizations, international security, and globalization.

Prerequisite(s)/Corequisite(s): Permission of graduate adviser

PSCI 8255 GLOBAL SECURITY ISSUES (3 credits)

This course introduces students to issues of national and international security that cross boundaries and threaten all countries including issues such as climate change, environmental deterioration, population and demographics, gender issues, disease and public health, the media, asymmetrical warfare, drugs/organized crime, and cyberthreats. (Cross-listed with PSCI 3250)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8256 INTELLIGENCE AND NATIONAL SECURITY (3 credits)

This course introduces students to the United States intelligence services, and their relation to broader U.S. national security policy. (Cross-listed with PSCI 4250)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8265 UNITED STATES FOREIGN POLICY (3 credits)

This course introduces students to the analysis of foreign and defense policy processes in the United States, including the role of the President, Congress, Departments of State and Defense, the intelligence community, and other actors/factors affecting policy formulation and implementation. (Cross-listed with PSCI 3260)

Prerequisite(s)/Corequisite(s): PSCI 2210.

PSCI 8266 INTERNATIONAL LAW (3 credits)

The course introduces students to the general principles of international law, including the key actors, the creation and sources of international law, the interpretation of international law by courts and tribunals, and its enforcement. (Cross-listed with PSCI 4260)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8276 GLOBAL ENVIRONMENTAL POLITICS (3 credits)

This course introduces students to issues of global environmental politics and policy, including the science behind issues such as climate change, how environmental policy is made at the national and international levels, and what role politics plays in determining environmental resource use. (Cross-listed with ENVN 4270, PSCI 4270)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8286 INTERNATIONAL RELATIONS OF LATIN AMERICA (3 credits)

Analysis of the role of Latin American states in the international political arena. Emphasis upon developing, applying and testing an explanatory theory of international politics through the study of the inter-American system: the regional, institutional and ideological environment, power relations, policies and contemporary problems. (This course fulfills the department's international politics requirement). (Cross-listed with PSCI 4280, LLS 4280, LLS 8286)

PSCI 8296 INTERNATIONAL DEVELOPMENT & SUSTAINABILITY (3 credits)

This course introduces students to different concepts of international development through the lens of sustainability. The course explores a broad range of activities related to international development, including international aid, trade, philanthropy, interventions in conflict, peacebuilding, public health, human rights, social justice, and the environment. (Cross-listed with PSCI 4290, CACT 8306)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8300 SEMINAR IN POLITICAL THEORY (3 credits)

This course introduces students to the history of political theory, from its origins in ancient Greece to its manifestations in contemporary thought. (Cross-listed with CACT 8200)

Prerequisite(s)/Corequisite(s): Permission of graduate advisor.

PSCI 8316 CLASSICAL POLITICAL THOUGHT (3 credits)

This course introduces students to key works representative of premodern political thought. Authors examined may include Plato, Aristotle, Xenophon, Cicero, Augustine, and Aquinas. (Cross-listed with PSCI 4310).

Prerequisite(s)/Corequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8326 EARLY MODERN POLITICAL THOUGHT (3 credits)

This course introduces students to key works of the 16th through mid-18th centuries. Authors examined may include Machiavelli, Hobbes, Hume, Smith and Montesquieu. (Cross-listed with PSCI 4320)

Prerequisite(s)/Corequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8336 LATE MODERN POLITICAL THOUGHT (3 credits)

This course introduces students to key texts of the mid-18th through 19th centuries. Authors to be examined may include Rousseau, Burke, Mill, Tocqueville, Marx, and Nietzsche. (Cross-listed with PSCI 4330).

Prerequisite(s)/Corequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8345 AMERICAN POLITICAL THOUGHT (3 credits)

This course introduces students to the ideals, ideologies, identities, and institutions of American political thought from the country's origins to the present. Topics to be covered may include the political thought of the early American settlers and of the founding generation, the debates over the creation and implementation of the Constitution, the 19th century arguments over slavery, the rise of progressivism, the New Deal and its critics, and contemporary American conservatism and liberalism. (Cross-listed with PSCI 3340)

Prerequisite(s)/Corequisite(s): PSCI 2310 is recommended.

PSCI 8346 CONTEMPORARY POLITICAL THOUGHT (3 credits)

This course introduces students to leading works of contemporary political thought, including Marx, Spencer, Dahl, Rawls, feminism, and rational choice. The theories, their interrelationships, the theorists, and the manifestations of these works will be discussed and analyzed. (Cross-listed with PSCI 4340)

Prerequisite(s)/Corequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8356 DEMOCRACY (3 credits)

A basic study of theory, practice and practitioners of political democracy, its roots, development, present application and problems and future. (Cross-listed with PSCI 4350)

Prerequisite(s)/Corequisite(s): PSCI 2500 or equivalent is recommended.

PSCI 8366 AUTHORITARIAN REGIMES (3 credits)

An analysis of various types of authoritarian regimes, their differences from democratic governments, and the causes of their establishment, maintenance, and failure. (Cross-listed with PSCI 4360).

PSCI 8376 GENERALS AND POLITICIANS: CIVIL-MILITARY RELATIONS (3 credits)

This course introduces students to civil-military relations and military politics across the globe. (Cross-listed with PSCI 4370).

Prerequisite(s)/Corequisite(s): PSCI 2500 or equivalent is recommended.

PSCI 8500 SEMINAR IN COMPARATIVE POLITICS (3 credits)

This course introduces students to classic and contemporary scholarship on the issues, theories, and methodological approaches associated with the systematic and comparative study of nation-states and their political systems with an emphasis on engaging in thoughtful discussion and individual research.

Prerequisite(s)/Corequisite(s): Permission of graduate adviser.

PSCI 8505 EUROPEAN POLITICS (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Europe, including the European Union. (Cross-listed with PSCI 3500)

PSCI 8506 GOVERNMENT AND POLITICS OF GREAT BRITAIN (3 credits)

A comprehensive study of British politics and government. Emphasis will be focused on the formal institutions and informal customs and practices of the British political system. (This course satisfies the department's comparative politics requirement). (Cross-listed with PSCI 4500)

PSCI 8526 POLITICS OF FRANCE (3 credits)

This course introduces students to the political heritage of France, contemporary political institutions and problems, and political and policy responses to these problems. (Cross-listed with PSCI 4520)

PSCI 8556 POLITICAL VIOLENCE, INSURGENCY, AND TERRORISM (3 credits)

This course is a survey on the types of violence used within a political context, focusing on its causes, forms and consequences. Specifically, this course details why and how violence occurs, and its impact on institutions and the people operating within that system. (Cross-listed with PSCI 4550).

PSCI 8585 GOVERNMENT AND POLITICS OF RUSSIA AND THE POST-SOVIET STATES (3 credits)

This course introduces students to the political cultures, institutions, processes, and public policies of Russia and the states of the former Soviet Union. (Cross-listed with PSCI 3580)

PSCI 8626 ISLAM AND POLITICS (3 credits)

This course introduces students to the interaction between religion and politics in the Muslim world, covering various political ideologies in the Muslim world and different experiences of Muslim-majority countries such as Saudi Arabia, Pakistan, Iran, Turkey, Indonesia, and Egypt. It will also analyze mainstream and radical transnational Islamic movements. (Cross-listed with PSCI 4620)

PSCI 8645 GOVERNMENT AND POLITICS OF CHINA AND EAST ASIA (3 credits)

This course introduces students to the political cultures, institutions, processes, policies, and other characteristics of China and neighboring states, with reference to other major powers engaged in the region. (Cross-listed with PSCI 3640)

PSCI 8665 GOVERNMENT AND POLITICS OF JAPAN AND EAST ASIA (3 credits)

This course introduces students to the political cultures, institutions, processes, policies and other characteristics of Japan and neighboring states, with reference to other major powers engaged in the region. (Cross-listed with PSCI 3660)

PSCI 8685 GOVERNMENT AND POLITICS OF LATIN AMERICA (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Latin America. (Cross-listed with PSCI 3680, LLS 3680, LLS 8685)

PSCI 8705 GOVERNMENT AND POLITICS OF THE MIDDLE EAST (3 credits)

This course introduces students to government and politics in the contemporary Middle East, including considerations of state formation, authoritarianism and democratization, state-society relations, religion, culture, gender, and economy. (Cross-listed with PSCI 3700)

PSCI 8716 COMPARATIVE INTERNATIONAL DEVELOPMENT AND INNOVATION (3 credits)

Comparative International Development and Innovation will analyze the rise and fall of civilizations from a historical and theoretical perspective in a comparative manner. The course will address issues concerning political, social, economic, and environmental change in national, and international contexts. Among its major emphases are state institutions, economic growth, entrepreneurship, and the transformation of social structure and culture. (Cross-listed with PSCI 4710, ENTR 4710, ENTR 8716).

PSCI 8776 POLITICAL SOCIOLOGY (3 credits)

This course explores political sociology, focusing on political processes and power. Political sociologists investigate relationships between political institutions and various other institutions, including but not limited to the economy, education, media, and religion, and the impacts that these relationships have on society and the individuals that comprise the society. This course will explore the concepts, theories, and knowledge that comprise this field such as power, legitimacy, the state, networks, stratification, and collective action. (Cross-listed with PSCI 4770, SOC 4770, SOC 8776).

Prerequisite(s)/Corequisite(s): Graduate standing

PSCI 8826 POLITICS AND FILM (3 credits)

This course introduces students to the analysis of politics and film, focusing on how politics is portrayed in film and the politics of film making. (Cross-listed with JMC 4820, JMC 8826, PSCI 4820)

PSCI 8900 READINGS IN POLITICAL SCIENCE (1-3 credits)

This course provides students an opportunity to study an advanced and specialized subject matter in the field of political science not covered in existing courses. The student must be capable of pursuing a highly independent course of study, which must be approved in consultation with the instructor in advance. This course may be repeated for different topics up to a maximum of six credit hours.

Prerequisite(s)/Corequisite(s): Permission of graduate adviser

PSCI 8910 POLITICAL SCIENCE INTERNSHIP (3 credits)

This course offers students an opportunity to experience the resolution of public issues through direct involvement in career-oriented policy organizations. The host organization must be approved in advance in consultation with the internship coordinator. This course may be repeated for a maximum of six credit hours.

Prerequisite(s)/Corequisite(s): Permission of instructor.

PSCI 8920 SEMINAR IN SPECIAL TOPICS IN POLITICAL SCIENCE (1-3 credits)

This course introduces students to an advanced and specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of twelve credit hours.

Prerequisite(s)/Corequisite(s): Permission of graduate advisor.

PSCI 8926 ADVANCED SPECIAL TOPICS IN POLITICAL SCIENCE (1-3 credits)

This course introduces students to an advanced and specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours. (Cross-listed with PSCI 4920)

PSCI 8980 RESEARCH IN POLITICAL SCIENCE (3 credits)

This course provides students an opportunity to conduct research in a specialized subject matter in the field of political science. The student must be capable of pursuing a highly independent course of study, which must be approved in consultation with the instructor in advance. This course may be repeated for different topics up to a maximum of six credit hours.

Prerequisite(s)/Corequisite(s): Permission of graduate advisor, not open to non-degree graduate students.

PSCI 8990 THESIS (3-6 credits)

A research project, written under the supervision of a graduate adviser in the Department of Political Science, in which the students establish their capacity to design, conduct and complete an original, independent, scholarly investigation of a high order. The research topic and the completed project must be approved by the student's departmental committee.

Prerequisite(s)/Corequisite(s): Permission of graduate program chair. Not open to non-degree graduate students.

Political Science, MS

Department of Political Science, College of Arts & Sciences

Vision Statement

The Department of Political Science's vision is to provide quality research, teaching, and service for our students, community, and academic field in order to produce qualified individuals and advanced knowledge to benefit communities regionally, nationally, and internationally. UNO is recognized by the Carnegie Foundation for the Advancement of Teaching as a doctoral and research institution. We value diversity among faculty, staff, and students and recognize its essential contribution to campus culture and development of knowledge. The Master of Science in political science offers a broad foundation in the discipline with a high degree of interdisciplinary collaboration, if desired. Some students enter the program with the intention of continuing on with their PhD, while others use the program to prepare themselves as practitioners in the fields of education, government, intelligence, law, journalism, non-profit, or lobbying. Students can earn the degree completely on-line, on-campus, or blended (on-line/on-campus).

Other Program Related Information

Online Delivery

- The Department of Political Science offers a program to earn a master's degree for which *all required courses can be taken online*. Many of our students are mid-career professionals seeking a better understanding of the subject matter from fields such as; education, military, and public service. Others are more traditional students who intend to continue onto a PhD. Our program has been in place since 1969 and we currently have over 80 active students. There are several advantages to UNO's online MS in political science (PSCI):
 - High-quality curriculum from a distinguished university. UNO is one of 88 institutions of higher education nationally classified as a doctoral/research university, according to the Carnegie Foundation for the Advancement of Teaching—out of the 4000 academic institutions it categorizes. In addition, UNO received a first-tier regional best ranking in the U.S. News & World Report's 2010 edition of America's Best Colleges.
 - Low tuition from a convenient, accessible location—your computer. Students can select courses that are taught entirely online. It is very rare for our courses to have specific times in which you are required to be online.
- The UNO PSCI master's program affords its students an environment that serves as an incubator for acquiring the skills necessary for students' desired careers, and for developing a self-understanding that will enable students to succeed both professionally and personally.

Students are assured of a high-quality degree program that not only meets but exceeds national standards of education in political science.

- **Our Flexibility:** our program offers flexibility to tailor an area of specialization. This flexibility encourages students to create an approved program of study that incorporates interests in other disciplines, such as communications, criminal justice, economics, geography, history, psychology, public administration, social work, sociology, teacher education, and urban studies. We accept up to 9 hours of graduate-level transfer credit, graded at a B or above, from another accredited institution that has not been applied towards another degree or completed program. In addition, students can apply up to 12 approved elective credit hours of UNO-taught courses outside the field of political science.

Fast Track Program

The Department of Political Science has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing BA/BS in Political Science or BA in International Studies desiring to pursue a MS in Political Science.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.5.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Notes:

- 8000-level courses taken at the undergraduate level without having been accepted into the integrated program will not count towards a graduate program.
- Students accepted into the Fast Track program may be denied entry into the graduate program due to, but not limited to poor performance, academic integrity issues, and other violations of the student code of conduct.
- Before starting graduate work, students are expected to complete all PSCI subfield introductory courses (1100, 2000, 2210, 2310, and 2500) and 2-3 (3000/4000) level political science courses.
- Please inquire with the Department of Political Science academic program coordinator for more information about this program.

Admissions

General Application Requirements and Admission Criteria

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: June 15 (February 15 if interested in scholarship or graduate assistantship, contact the academic program coordinator for details)
- Spring: October 15 (September 15 if interested in scholarship or graduate assistantship, contact the academic graduate program chair for details)
- Summer: March 15

Other Requirements

- Baccalaureate degree or previous master's degree with a minimum of 3.0 GPA.
- Fifteen credit hours in political science-related courses is preferred. The selection committee looks for previous coursework in American government, political theory, international relations, comparative politics, and social science (quantitative) methodology. Applicants without the above undergraduate background in political science may be admitted on a provisional basis and be required to take prerequisite courses before starting graduate work. A grade of B or above is required in each of these courses.
- **English-Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80 with no sub-score under 15, IELTS: 6.5, PTE: 53, Duolingo: 105
 - Passing with a minimum score does not guarantee admission into the program.
- **Statement of Purpose:** A personal statement (1-2 pages) explaining why the applicant is seeking admission into this program, how his/her academic/professional experiences can contribute to his/her success in this program, and how this program will contribute to his/her future academic/professional ambitions.
- **Writing Sample:** Submission of an academic, research-based writing sample. The sample must be written in English, include citations, and be a minimum of five pages in length. This writing sample can be a previous assignment. If no such paper exists, the applicant should contact the academic program coordinator for an alternative assignment.
- **Resume:** Submit a professional resume
- **Letters of Recommendation:** Submit two letters of recommendation from a former professor (preferred), supervisor, or individual that can speak to one's academic potential in a graduate program. If applicants have recently graduated from UNO, it is expected that one of the letters will be from a UNO political science faculty member. It is preferred that applicants use their references' institutional (.edu) or professional email.
- GRE scores are not required for admission, however, applicants are welcome to submit them.
- Official transcripts from all attended institutions. Please note that although the Office of Graduate Studies forwards applications to departments for review with unofficial transcripts, students cannot enroll until all official transcripts have been received. Due to this, the Department of Political Science has elected to wait for official transcripts before reviewing applications.

Degree Requirements

Code	Title	Credits
Required: Methods Seminar		3
PSCI 8000	SEMINAR IN THE RESEARCH METHODS IN POLITICAL SCIENCE	
Required: Three Core Subfield Seminars		9
PSCI 8040	SEMINAR IN AMERICAN GOVERNMENT AND POLITICS	
PSCI 8250	SEMINAR IN INTERNATIONAL RELATIONS	
PSCI 8300	SEMINAR IN POLITICAL THEORY	
PSCI 8500	SEMINAR IN COMPARATIVE POLITICS	
Required for Non-thesis Students: Two Additional Seminars (from list below or remaining subfield seminar)		6
PSCI 8100	SEMINAR IN POLITICAL ECONOMY	
PSCI 8120	SEMINAR IN LEADERSHIP	
PSCI 8150	SEMINAR IN CONSTITUTIONAL LAW	
PSCI 8200	SEMINAR IN FOREIGN POLICY AND NATIONAL SECURITY	
PSCI 8220	SEMINAR ON INTERNATIONAL LEADERSHIP AND STRATEGY	
PSCI 8920	SEMINAR IN SPECIAL TOPICS IN POLITICAL SCIENCE	
Required: Four Elective Courses (from remaining seminars or list below)		12
PSCI 8005	QUANTITATIVE ANALYSIS IN POLITICAL SCIENCE	
PSCI 8015	URBAN POLITICS	
PSCI 8036	THE PRESIDENCY	
PSCI 8045	GOVERNMENT AND POLITICS OF NEBRASKA	
PSCI 8046	CONGRESS AND THE LEGISLATIVE PROCESS	
PSCI 8055	STATE GOVERNMENT AND POLITICS	
PSCI 8056	THE JUDICIAL PROCESS	
PSCI 8105	LGBT POLITICS	
PSCI 8116	POLITICAL PSYCHOLOGY	
PSCI 8126	PUBLIC OPINION AND POLLING	
PSCI 8135	WOMEN AND POLITICS	
PSCI 8145	LATINO/-A POLITICS	
PSCI 8146	CONSTITUTIONAL LAW: CIVIL RIGHTS	
PSCI 8165	POLITICAL PARTIES	
PSCI 8175	INTEREST GROUPS	
PSCI 8176	CONSTITUTIONAL LAW: FOUNDATIONS	
PSCI 8185	CAMPAIGNS AND ELECTIONS	
PSCI 8186	CONSTITUTIONAL LAW: THE FEDERAL SYSTEM	
PSCI 8196	CONSTITUTIONAL LAW: CIVIL LIBERTIES	
PSCI 8206	INTERNATIONAL RELATIONS OF EAST ASIA	
PSCI 8216	INTERNATIONAL RELATIONS OF THE MIDDLE EAST	
PSCI 8225	INTERNATIONAL ORGANIZATIONS	
PSCI 8235	GENDER AND GLOBAL POLITICS	
PSCI 8245	THE POLITICS AND PRACTICE OF HUMAN RIGHTS	
PSCI 8246	INTERNATIONAL CONFLICT RESOLUTION	

PSCI 8255	GLOBAL SECURITY ISSUES
PSCI 8256	INTELLIGENCE AND NATIONAL SECURITY
PSCI 8265	UNITED STATES FOREIGN POLICY
PSCI 8266	INTERNATIONAL LAW
PSCI 8276	GLOBAL ENVIRONMENTAL POLITICS
PSCI 8286	INTERNATIONAL RELATIONS OF LATIN AMERICA
PSCI 8296	INTERNATIONAL DEVELOPMENT & SUSTAINABILITY
PSCI 8316	CLASSICAL POLITICAL THOUGHT
PSCI 8326	EARLY MODERN POLITICAL THOUGHT
PSCI 8336	LATE MODERN POLITICAL THOUGHT
PSCI 8345	AMERICAN POLITICAL THOUGHT
PSCI 8346	CONTEMPORARY POLITICAL THOUGHT
PSCI 8356	DEMOCRACY
PSCI 8366	AUTHORITARIAN REGIMES
PSCI 8376	GENERALS AND POLITICIANS: CIVIL-MILITARY RELATIONS
PSCI 8505	EUROPEAN POLITICS
PSCI 8506	GOVERNMENT AND POLITICS OF GREAT BRITAIN
PSCI 8526	POLITICS OF FRANCE
PSCI 8556	POLITICAL VIOLENCE, INSURGENCY, AND TERRORISM
PSCI 8585	GOVERNMENT AND POLITICS OF RUSSIA AND THE POST-SOVIET STATES
PSCI 8626	ISLAM AND POLITICS
PSCI 8645	GOVERNMENT AND POLITICS OF CHINA AND EAST ASIA
PSCI 8665	GOVERNMENT AND POLITICS OF JAPAN AND EAST ASIA
PSCI 8685	GOVERNMENT AND POLITICS OF LATIN AMERICA
PSCI 8705	GOVERNMENT AND POLITICS OF THE MIDDLE EAST
PSCI 8716	COMPARATIVE INTERNATIONAL DEVELOPMENT AND INNOVATION
PSCI 8776	POLITICAL SOCIOLOGY
PSCI 8826	POLITICS AND FILM
PSCI 8900	READINGS IN POLITICAL SCIENCE
PSCI 8926	ADVANCED SPECIAL TOPICS IN POLITICAL SCIENCE
PSCI 8910	POLITICAL SCIENCE INTERNSHIP
PSCI 8980	RESEARCH IN POLITICAL SCIENCE
PSCI 8990	THESIS (if approved by GPC)

Total Credits**30****Notes on Courses:**

- Courses may not be available every term or may only be offered on-campus or online for said term.
- Students must successfully complete PSCI 8000 within the first 15 credit hours/five courses of their program.
- A student who does not have sufficient background in one or more subfields may be required to take a provisional undergraduate course before taking its equivalent graduate seminar.
- Electives may be taken outside of the political science department with approval from the graduate chair. The course must be related to political science.

- Students who were undergraduate students at UNO cannot take a dual-listed course at the graduate level if they have already taken the course at the undergraduate level. For example, if they completed PSCI 4270/ENVN 4270 Global Environmental Politics as an undergraduate student, they cannot take PSCI 8276 Global Environmental Politics as part of their MS degree.
- Students may not count more than six credit hours of courses ending in 8-5 (for example, 8265) towards the completion of their degree.
- Any concentration or certificate a student would like to add-on to his/her MS-PSCI program must be officially added within the first 15 credit hours.

Notes on Exit Requirements

All students begin this program as a non-thesis student. Students who would like to complete a thesis may petition to do so after completing 15 credit hours, but at least one term before he/she plans on starting his/her thesis. To petition to change to the thesis track, a student must request an application form, and submit it to the academic program coordinator during the time specified above. The graduate chair will then evaluate whether a thesis track is the best option for the petitioning student. If denied, a student may appeal once in a following term by going through the same process. During a petition, the graduate program committee will review the application.

Non-Thesis Exit Requirement: Comprehensive Exam

Graduating political science master's degree students will complete a written comprehensive essay synthesizing their knowledge of at least three political science subfields to answer one prompt. Passing answers must demonstrate proficiency in each of the four MS-PSCI student learning objectives: research methods, writing in the discipline, critical thinking and proficiency of subfields.

Students must notify the APC at the beginning of their graduating term, noting the three subfields to be included in the comprehensive essay. The essay is open book, open note. Students will have 72 hours to complete their essay(s) within a designated window of time.

Students must write their exam during the spring or fall semester of the year in which they graduate. Students graduating in the summer may write their essay the prior spring if they have 6 or less credit hours remaining to complete in the degree program to be taken over the summer term, AND they have completed at least three subfield seminars.

Thesis Exit Requirement (6 credit hours)

PSCI 8990: The first term of thesis includes the forming of the thesis committee and approval of one's thesis proposal. The second three credit hours will focus on writing and defending the thesis.

Students must have a minimum of three voting committee members. All committee members must be graduate faculty members with a PhD and employed by UNO. One of the committee members must be from a non-political science field. Distance students may work with a faculty member outside of UNO, however, this member cannot be a voting member on the committee. Please refer to the graduate catalog's thesis guidelines for more detailed information.

Students must follow UNO's Graduate College's thesis submission guidelines and ensure that all paperwork has been submitted to the graduate office on time.

American Government and Politics Concentration

The American government and politics concentration is a 15 credit hour/5 course subset of the MS in political science program (MS-PSCI). If students wish to add this concentration onto their program, they must do so within the first 15 credit hours of their MS-PSCI program following the proper change-of-program procedures.

*Other courses as approved by Graduate Chair.

Total Credits **15**

Academic Progress Policy

Students may be dismissed from the program after:

1. Not enrolling and/or successfully completing a course after two consecutive years.
2. Earning three or more W grades.
3. Earning two or more grades of C+ or below.

Under extenuating circumstances, students may apply for a waiver through the GPC. If a waiver is granted, students may be updated to the most recent catalog year.

Students who do not successfully complete a course during their admit term, or allowed deferment time, will be dismissed from the program.

Students may reapply to the program if dismissed for inactivity.

Incomplete Policy

The Department will comply with the UNO's Incomplete Policy (<https://www.unomaha.edu/registrar/faculty-and-staff/grading/incomplete.php>).

In line with the UNO graduate policy on **incomplete grades**, the grade "I" is only to be issued due to a student's illness, military service, hardship, or death in the immediate family after the student has completed a substantial amount of the course. The professor reserves the right to use his/her discretion in determining additional situations where a grade of "I" may apply and what "substantial" means for that course. It is expected that the student discuss this matter with the professor and create a plan of action towards the completion of this course in a timely manner. The professor also reserves the right to decide the consequences for a student who does not finish the course in the time agreed. Consequences may include, but are not limited to, an extended deadline, a permanent incomplete, or a failing grade for the course.

In-progress grades (IP) are only to be issued during the second part of a thesis project when a student is actively working towards its completion.

Standing I/IP Grades

Students with an I/IP can have a maximum number of 9 'active' credit hours.

If a student has 9 credit hours of I/IP grades (total from past terms), he/she may not enroll in new courses. A student may start enrolling in new courses as he/she reduces his/her credit hours of I/IP grades. Any student with an I/IP cannot have more than 9 'active' credit hours at one time (includes current courses as well as I/IP grades).

I/IP Credit Hours	New Credit Hour Allowance	Total 'Active' Credit Hour Load
0	9 (full time)	9
3	6	9
6	3	9
9	0	9

The graduate program chair reserves the right to waive this policy for a student, based on compelling circumstances.

Academic Dishonesty Policy

Academic dishonesty is a violation of the student code of conduct and is cause for a student to be dismissed from the program. Graduate students are expected to know what counts as academic dishonesty (<https://www.unomaha.edu/student-life/student-conduct-and-community-standards/policies/academic-integrity.php>).

Instructors reserve the right to decide how to address issues of academic dishonesty in their courses. Students may be subject to (including, but not limited to): the failure on the specific assignment or failure of the entire course.

Faculty will report all instances of graduate student academic dishonesty to the Graduate Program Chair.

The student has the right to appeal this decision through the appropriate channels. Please see the student code of conduct for further information.

Global Information Operations Certificate

Departments of Political Science, Computer Science, and Religion,
College of Arts and Sciences and Information Science & Technology

Vision Statement

The certificate in global information operations is a program designed to meet the need for a broad-based, interdisciplinary understanding of international cultures and related issues in today's global society by graduate students, active duty military and civilian professionals working in the fields of public service, national security, defense policy and intelligence analysis. The program seeks to satisfy varying academic, career, and professional post graduate goals of traditional and non-traditional students that prepare them for their responsibility as active citizens through leadership, participation and employment in diverse environments throughout the nation and the world. At this point in time, this certificate is not offered for online students.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: June 15
- Spring: October 15
- Summer: March 15

Other Requirements

For students applying to, or who are a current MS-PSCI student in good standing:

- Minimum of 3.0 GPA

For students applying for this certificate as a stand-alone program:

- Baccalaureate degree or previous master's degree with a minimum of 3.0 GPA.
- Nine credit hours in relevant fields is preferred. Students without the necessary background may be admitted on a provisional basis and be required to take prerequisite courses before starting graduate work. Students must earn a grade of B or above in each of these courses.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.

- Paper-based TOEFL: 550, Internet-based TOEFL: 80 (with no sub-score under 15), IELTS: 6.5, PTE: 53, Duolingo: 105
- Passing with a minimum score does not guarantee admission into the the program. program
- **Statement of Purpose:** The personal statement (1-2 pages) should explain why the applicant is seeking admission into this program, how his/her academic/professional experiences can contribute to his/her success in this program, and how this program will contribute to his/her future academic/professional ambitions.
- **Professional Resume**
- **Letters of Recommendation:** Two letters of recommendation are required from a former professor (preferred), supervisor, or individual that can speak to one's academic potential in a graduate program. If the applicant has recently graduated from UNO, it is expected that one of the letters will be from a UNO political science faculty member. graduate program program It is preferred that applicants use their references' institutional (.edu) or professional email.
- GRE scores are not required for admission, however, students are welcome to include them.
- Official transcripts from all previously attended institutions. Please note that although the Office of Graduate Studies forwards applications to departments for review with unofficial transcripts, students cannot enroll until all official transcripts have been received. Due to this, the Department of Political Science has elected to wait for official transcripts before reviewing applications.

Students who do not successfully complete a course during their admit term, or allowed deferment time, will be dismissed from the program.

Students may reapply to the program if dismissed for inactivity.

Government Certificate

Department of Political Science, College of Arts and Sciences

Vision Statement

UNO's Department of Political Science offers an 18 credit hour graduate certificate in government for educators and other professionals who already have an advanced degree in another field and wish to expand their knowledge in political science. This certificate is designed to help educators meet the new requirements set by the Higher Learning Commission to teach government-related courses in institutions of higher education or dual enrollment/concurrent enrollment courses in high schools. This certificate can be earned completely online. This certificate can be earned as a stand-alone program, or in conjunction with the MS in political science.

Note: Students who took undergraduate courses at UNO cannot take any dual-listed courses at the graduate level they took as an undergraduate. Students cannot have more than two courses ending in 8–5 counted towards their program. Other courses may be approved at the discretion of the graduate chair.

Courses may not be offered every term. Some courses may only be offered online or on-campus.

Exit Requirements:

Students must earn a 3.0 GPA or above to graduate with no more than one course graded as a C+ or below.

Academic Progress Policy

Students may be dismissed from the program after:

1. Not enrolling and/or successfully completing a course after two consecutive years.
2. Earning two or more W grades.
3. Earning more than one grade of C+ or below, even if GPA is a 3.0 or above.

Under extenuating circumstances, students may apply for a waiver through the GPC. If a waiver is granted, students may be updated to the most recent catalog year.

Students who do not successfully complete a course during their admit term, or allowed deferment time, will be dismissed from the program.

Students may reapply to the program if dismissed for inactivity.

Intelligence and National Security Certificate

Department of Political Science, College of Arts and Sciences

Vision Statement

The intelligence and national security certificate is a 15 credit hour program designed to meet the need for an in-depth and critical analysis of US foreign policy and national security by graduate students, active duty military, and civilian professionals working in the fields of public service, national security, defense policy, and intelligence analysis. The program of study seeks to satisfy varying academic, career, and personal post-graduate goals of traditional and non-traditional students that prepare them for their responsibility as active citizens through leadership, participation and employment in intelligence, military, and foreign relations careers. This certificate can be earned completely online. This certificate can be earned independently of the MS in political science or in conjunction with it.

Psychology

Degree Programs Offered

- Psychology, MA (p. 1298)
- Psychology, PhD (p. 1301)
- Industrial/Organizational Psychology, MS (p. 1303)
- School Psychology, MS (p. 1305)
- School Psychology, EdS (p. 1304)
- Applied Behavior Analysis, MS (p. 1306)

Certificates Offered

- Applied Behavior Analysis Certificate (p. 1307)
- Human Resources and Training Certificate (p. 1065)

PSYC 8000 THE PROFESSION OF PSYCHOLOGY (0 credits)

Required non-credit course for graduate students in psychology. Intended to familiarize the beginning graduate student with the profession of psychology including such topics as ethics, professional organizations, job and educational opportunities, use of reference materials, licensing and certification and other relevant material.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 8016 HISTORY OF PSYCHOLOGY (3 credits)

A study of the origins, development and nature of psychology and its relation to external events; emphasis on the period since 1875. (Cross-listed with PSYC 4010)

Prerequisite(s)/Corequisite(s): Admission to graduate program in Psychology or permission of instructor. Not open to non-degree students or students in other departments or programs.

PSYC 8116 POLITICAL PSYCHOLOGY (3 credits)

This course introduces students to the role of human thought, emotion, and behavior in politics through examination of the psychological factors that motivate political elites and the mass public. (Cross-listed with PSCI 4110, PSCI 8116, PSYC 4110)

Prerequisite(s)/Corequisite(s): PSCI 1100 is recommended.

PSYC 8156 AFRICAN AMERICAN PSYCHOLOGY (3 credits)

African American Psychology traces the psychological history of Africans and African Americans from self-attributes and identity, through race and racism, to cognition, learning, and language. This course will review concepts relevant to understanding the psychology of African Americans, methodological and research issues, and best practices. (Cross-listed with PSYC 4150, BLST 4150, BLST 8156).

Prerequisite(s)/Corequisite(s): Graduate standing

PSYC 8250 FAMILY ANALYSIS AND TREATMENT (3 credits)

This courses covers theories and techniques for family therapy, with special reference to adapting individual and group therapeutic, as well as consultation, principles for family interventions. Case analyses and evaluation methods are considered.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8256 LIMITS OF CONSCIOUSNESS (3 credits)

A course focusing on the scientific study of the psychology, neurology, and philosophy of mind. This course is designed for students who are interested in thinking about thinking. (Cross-listed with PSYC 4250, PHIL 3250)

Prerequisite(s)/Corequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 8276 ANIMAL BEHAVIOR (3 credits)

Behavior of diverse animals for the understanding of the relationships between nervous integration and the behavior manifested by the organism, as well as the evolution and adaptive significance of behavior as a functional unit. (Cross-listed with PSYC 4270, BIOL 4270, BIOL 8276)

Prerequisite(s)/Corequisite(s): BIOL 1750 and PSYC 1010 or permission of instructor, junior-senior.

PSYC 8286 ANIMAL BEHAVIOR LABORATORY (3 credits)

Laboratory and field studies of animal behavior with an ethological emphasis. Classical laboratory experiences and independent studies will be conducted. (Cross-listed with PSYC 4280, BIOL 4280, BIOL 8286)

Prerequisite(s)/Corequisite(s): PSYC 4270 or BIOL 4270 or PSYC 8276 or BIOL 8273 and not open to non-degree graduate students.

PSYC 8296 NEUROETHOLOGY (3 credits)

In the field of Neuroethology a major goal is to understand the neural bases of animal behaviors in a natural context. In this course students will investigate how behaviors are generated and modulated by the nervous system in organisms ranging from insects to mammals. We will explore the neural mechanisms underlying a variety of animal behaviors as they interact with their natural environment ranging from sensory perception of the world (e.g. echolocation, electrolocation), to locomotor movements (e.g. flying, swimming), to more complex behaviors (e.g. learning, memory). (Cross-listed with BIOL 4290, BIOL 8296, NEUR 4290).

Prerequisite(s)/Corequisite(s): Graduate Standing. Not open to non-degree graduate students.

PSYC 8316 PSYCHOLOGICAL AND EDUCATIONAL TESTING (3 credits)

The use of standardized tests in psychology and education is considered with special regard to their construction, reliability and validity. (Cross-listed with PSYC 4310)

Prerequisite(s)/Corequisite(s): PSYC 1010 and junior/senior and not open to non-degree graduate students.

PSYC 8326 HORMONES & BEHAVIOR (3 credits)

In this course, students will examine the interaction between hormones, chemical messengers released from endocrine glands, and behavior in both human and animal systems. Methods for studying hormonal issues on behavior will be addressed. This course will provide students in psychology, biology, and related disciplines an understanding of how hormones affect sensory processing, motor activities, and processing of information in the central nervous system. (Cross-listed with PSYC 4320, BIOL 4320, BIOL 8326)

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of department.. Not open to non-degree graduate students.

PSYC 8336 SOCIAL NEUROSCIENCE (3 credits)

This course will evaluate the biological substrates of sociality and social behavior, and explore the impact of social environments on brain function and development. Students in the course will explore the molecular, cellular, neurotransmitter, and endocrine influences on social behavior, including affiliative care, aggression, social bonding, altruism, and social cognition. (Cross-listed with NEUR 4330)

Prerequisite(s)/Corequisite(s): Graduate status or permission of Instructor. Not open to non-degree graduate students.

PSYC 8446 ABNORMAL PSYCHOLOGY (3 credits)

A course designed to examine the aberrant behavior of individuals. Symptoms, dynamics, therapy and prognosis of syndromes are considered. (Cross-listed with PSYC 4440)

Prerequisite(s)/Corequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 8456 PERSONALITY THEORIES (3 credits)

A comparative approach to the understanding and appreciation of personality theories considering history, assertions, applications, validations and prospects. (Cross-listed with PSYC 4450)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 8476 MENTAL HEALTH AND AGING (3 credits)

The goal of this course is to survey the mental health needs of older adults. Consideration is given to identifying both positive mental health and pathological conditions. Treatment interventions effective with older adults and their families also are discussed. (Cross-listed with PSYC 4470, GERO 4470, GERO 8476)

Prerequisite(s)/Corequisite(s): Junior or senior.

PSYC 8500 PROFESSIONAL, LEGAL, AND ETHICAL FOUNDATIONS OF SCHOOL PSYCHOLOGY (3 credits)

This course covers the role description and job activities of a school psychologist, as well as theories, assessment and intervention techniques, certification requirements, employment opportunities, public policy, legislation, and ethics relevant to school psychology. School-based field experiences will also be included in the course.

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of dept. Not open to non-degree graduate students.

PSYC 8520 FOUNDATIONS OF ASSESSMENT (3 credits)

Course content covers traditional psychometric concepts (e.g., norms, reliability, validity) and their application to various areas of human behavior that are assessed (e.g., cognitive ability, personality, achievement). Clinical considerations are applied to how assessment information is integrated into a problem-solving process.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8526 PSYCHOLINGUISTICS (3 credits)

A discussion of the literature concerned with how such psychological variables as perception, learning, memory and development relate to the linguistic variables of sentence structure, meaning and speech sounds. (Cross-listed with PSYC 4520)

Prerequisite(s)/Corequisite(s): Senior level or graduate level student or permission of the instructor. Not open to non-degree graduate students.

PSYC 8530 EARLY CHILDHOOD ASSESSMENT (3 credits)

This course is an introduction to the assessment of children during early development including infancy, toddler, preschool and early primary ages. Assessment will be discussed as it relates to problem-solving and data-based decision making (i.e., diagnosis, treatment, program evaluation). Students will learn the principles of working with young children and their families and how these principles will be used in conducting valid and reliable assessments that, in turn, lead to appropriate interventions.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8536 CULTURAL PSYCHOLOGY (3 credits)

This course will provide an overview of the cultural, community and ecological factors that play a role in how people perceive their environments. The goal is to investigate the ways in which culture affects individual behaviors, attitudes and cognitions. It may be easy to tell that two cultures are different, but identifying exactly what is meant - and all that is encompassed - when speaking about "culture" can be much more difficult. Culture can include everything from gender constructs and race/ethnicity to the effects of new technologies. All of these aspects of culture affect individuals' psychological make-up and behavior. Although psychology has largely developed from a Western tradition, attention to research from non-Western perspectives will also be emphasized. This course supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 4530, CACT 8106).

Prerequisite(s)/Corequisite(s): Enrollment in MA in Critical & Creative Thinking program or by permission of the instructor.

PSYC 8540 SCHOOL AGE ASSESSMENT (3 credits)

This course covers data-based decision-making as it applies to schools. Students will learn and practice the skills of reviewing records, interviewing, systematically observing, and testing. They will be exposed to the following types of assessments: academic, behavior, curriculum-based, intellectual, social-emotional, and screening measures.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8550 PSYCHOTHERAPEUTIC INTERVENTIONS (3 credits)

This course provides graduate students knowledge in the application of evidence-based therapeutic interventions that can be utilized with children and adolescents in school, home, and family settings. Various approaches and techniques are presented along with supporting research. Observation and participation in clinical cases may be arranged.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8576 BEHAVIOR ANALYSIS AND INTERVENTIONS (3 credits)

Introduction to experimental methodology, rationale and research literature of changing behavior through behavior modification techniques. Particular attention will be paid to methodological concerns regarding single subject design, ethical considerations and ramifications of behavior intervention with children and youth. (Cross-listed with PSYC 4570)

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8590 PSYCHOLOGY OF EXCEPTIONAL CHILDREN (3 credits)

The content of this course will focus on children who are identified as "exceptional"; in terms of behavioral, cognitive, and learning problems. Exceptionality in this sense includes students who are in need of preventative and/or intervention-based services. The topics will be approached from a multidisciplinary perspective and emphasis will be placed on utilizing a response to intervention approach in working with exceptional individuals. The service-learning component of the course will require students to learn about the educational environment by spending time in an elementary classroom, consulting with school staff and addressing the educational needs of students.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8636 ORGANIZATIONAL PSYCHOLOGY (3 credits)

This is a survey course which will cover the major concepts, theories and empirical research related to organizational psychology. Specific topics will include: work motivation, leadership, decision making and job satisfaction as well as more recent trends such as cultural diversity, work teams, work-family and quality issues. (Cross-listed with PSYC 4630)

Prerequisite(s)/Corequisite(s): Admission to a graduate program or graduate certificate program. Not open to non-degree graduate students.

PSYC 8646 PERSONNEL PSYCHOLOGY (3 credits)

A survey of psychological principles, theories and research related to personnel issues. Course includes discussion of personnel selection, performance appraisal, recruitment, training and health and safety. (Cross-listed with PSYC 4640)

Prerequisite(s)/Corequisite(s): Admission to a graduate program or graduate certificate program. Not open to non-degree graduate students.

PSYC 8656 CREATIVITY AND INNOVATION IN ORGANIZATIONS (3 credits)

To provide a discussion of the antecedents of individual and organizational creativity, including measurement, models, characteristics of the individual and the environment that facilitate creativity and innovation in an organizational setting. Students in this course will be able to understand the research literature related to creativity and innovation and apply the findings to improve critical and creative thinking, implementation of creative ideas, and development of creative teams and organizations. This course supports the Organizational Science and Leadership concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 4650, CACT 8506)

PSYC 8700 ETHICS AND LAW FOR PSYCHOLOGY AND APPLIED BEHAVIOR ANALYSIS (3 credits)

This course provides graduate students with advanced knowledge of ethical codes, legal statutes, and case law that guide the profession of psychology and related applied fields with particular attention to the practice of applied behavior analysis. The primary emphasis of the class is on clinic-, community-, and school-based practice with children and adolescents.

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

PSYC 8800 GRADUATE SEMINAR IN THE AGING BRAIN (3 credits)

The Graduate Seminar in the Aging Brain is a graduate level gerontology course focused on understanding the changes to the brain due to normal aging and aging-related diseases. This is an elective course for the Gerontology graduate program at UNO. The content matter of this course also makes it a relevant fit for graduate students from disciplines such as biology, psychology, geriatric medicine, nursing, social work, and exercise science. By the end of the course, students should have a thorough understanding of the changes to the brain in healthy aging and aging-related disease that affect cognitive and emotional functioning. (Cross-listed with GERO 8800).

Prerequisite(s)/Corequisite(s): Graduate level standing

PSYC 8806 LAW & PSYCHOLOGY: ETHICS, RESEARCH & SERVICE (3 credits)

This course presents legal principles relevant to all psychological specialties, with special reference to mental health services. Ethical reasoning and the APA ethics code are considered. (Cross-listed with PSYC 4800)

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

PSYC 8896 GENES, BRAIN, AND BEHAVIOR (3 credits)

This course will evaluate the complex interaction between an organism's genome and neural activity pattern in the nervous system as related to behavior. In this course students will explore how changes in gene expression (allelic variants, epigenetics, differential regulation) and gene networks within neural tissue can reciprocally influence behaviors such as communication, foraging, reproduction, and cognition. (Cross-listed with NEUR 4890, NEUR 8896, BIOL 4890, BIOL 8896).

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

PSYC 8900 PROBLEMS IN PSYCHOLOGY (1-6 credits)

A faculty-supervised research project, involving empirical or library work and oral or written reports.

Prerequisite(s)/Corequisite(s): Written permission of department. Not open to non-degree graduate students.

PSYC 8950 PRACTICUM FOR MASTER'S STUDENTS (1-6 credits)

Faculty-supervised experience in industry or business designed to bridge the gap between the classroom and a job, emphasizing use of previously acquired knowledge in dealing with practical problems for master's students.

Prerequisite(s)/Corequisite(s): Written permission of your practicum committee. Not open to non-degree graduate students.

PSYC 8970 MASTER'S LEVEL PRACTICUM IN SCHOOL PSYCHOLOGY (1-6 credits)

Faculty-supervised experience designed to provide experience in academic and behavioral assessment and intervention with children, and consultation with parents and school personnel.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8980 PRACTICUM IN DEVELOPMENTAL PSYCHOLOGY (1-6 credits)

Faculty-supervised experience in a setting designed to provide a practical understanding of theoretical concepts of human development. Emphasizes direct observation and or personal interaction as a means of training, and can be directed toward various populations within the developmental life span (e.g., infants, preschoolers, middle childhood, adolescents, adults, aged persons).

Prerequisite(s)/Corequisite(s): PSYC 9560 and permission of Developmental Psychology Area Committee. Not open to non-degree graduate students.

PSYC 8990 THESIS (1-6 credits)

Independent research project written under supervision of a faculty committee. May be repeated up to a total of six hours.

Prerequisite(s)/Corequisite(s): Written permission of your thesis committee. Not open to non-degree graduate students.

PSYC 9010 PROSEMINAR: STATISTICAL METHODS I (3 credits)

The purpose of this course is to introduce students to the statistical concepts of correlation and regression. The course will cover basic understanding of these techniques, their applications, and interpretations of results.

Prerequisite(s)/Corequisite(s): Graduate standing and an undergraduate course in basic statistics which included an introduction to correlation and linear regression. Not open to non-degree graduate students.

PSYC 9020 PROSEMINAR: STATISTICAL METHODS II (3 credits)

An advanced approach to experimental design and inferential statistics using the analysis of variance models.

Prerequisite(s)/Corequisite(s): A course in basic statistics which included an introduction to analysis of variance. Not open to non-degree graduate students.

PSYC 9030 SEMINAR: TOPICS IN INDUSTRIAL ORGANIZATIONAL PSYCHOLOGY (3-9 credits)

A topic area within field of Industrial Organizational Psychology will be explored in depth.

Prerequisite(s)/Corequisite(s): Admission to Industrial Organizational graduate program and permission of instructor. Not open to non-degree graduate students.

PSYC 9040 PROSEMINAR LEARNING (3 credits)

A comprehensive and intensive coverage of experimental literature on learning in humans and animals.

Prerequisite(s)/Corequisite(s): Permission of instructor. Not open to non-degree graduate students.

PSYC 9050 APPLIED BEHAVIOR ANALYSIS IN EDUCATION (3 credits)

The purpose of this course is to familiarize students with knowledge and skills in educational systems, educational assessment, educational interventions, and problem solving models with an emphasis on applied behavior analysis.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 9070 PROSEMINAR: COGNITIVE PSYCHOLOGY (3 credits)

This course will be a comprehensive overview of the field of cognitive psychology including the topics of attention and performance, memory, problem solving, and language. In addition, there will be a more in-depth coverage of selected issues.

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor. Not open to non-degree graduate students.

PSYC 9090 PSYCHOMETRIC THEORY (3 credits)

Study of theoretical and practical problems related to the development and use of psychological measures and research designs covering such topics as scaling, test development, reliability, validity, interpretation of results and generalizability.

Prerequisite(s)/Corequisite(s): PSYC 3130 or equivalent. Not open to non-degree graduate students.

PSYC 9100 SMALL N RESEARCH DESIGNS (3 credits)

This course uses applications of research methodology that involve direct observation and single-subject designs to identify evidence-based practices that address clinical problems experienced by individuals across a variety of settings. Topics covered include behavioral assessment techniques, graphing data, single subject experimental designs, and consumer satisfaction with interventions.

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor.

PSYC 9120 MULTIVARIATE STATISTICAL ANALYSIS (3 credits)

An examination of statistical techniques for describing and analyzing multivariate data commonly collected in behavioral research. Analytic techniques derived from general linear model will be considered, focusing on proper interpretation and use. The course is intended for doctoral students in psychology and (selectively) for advanced masters students in behavioral sciences.

Prerequisite(s)/Corequisite(s): PSYC 9090, 9010 and 9020 or permission of instructor. Not open to non-degree graduate students.

PSYC 9130 APPLICATIONS OF ADVANCED STATISTICS IN PSYCHOLOGY (3 credits)

This course covers a variety of statistical tools that may be used to answer research questions for group designs. A primary focus of the class is the application of statistical tools to psychology research and practice.

Prerequisite(s)/Corequisite(s): Admission to a graduate program in Psychology. Not open to non-degree graduate students.

PSYC 9140 ASSESSMENT AND TREATMENT OF AUTISM SPECTRUM DISORDERS (3 credits)

The purpose of this course is to familiarize students with the diagnosis, assessment, and treatment of autism spectrum disorders (ASD). (Cross-listed with SPED 9140).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 9230 PROSEMINAR: BEHAVIORAL NEUROSCIENCE (3 credits)

A study of the biological substrates of behavior with emphasis upon neuroanatomy, neurophysiology and neuropharmacology.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 9240 PROSEMINAR: EVOLUTIONARY PSYCHOLOGY (3 credits)

A comprehensive overview of behavioral biology including topics of evolution and behavior, behavioral ecology, physiology and genetics of behavior, and learning.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 9320 SEMINAR IN PROGRAM EVALUATION (3 credits)

This course is intended to help advanced graduate students in the applied social sciences understand the literature and conduct evaluation research. The history of program evaluation and philosophies manifest in evaluation research are reviewed, alternative evaluation models are discussed, and relevant methodological and practical issues such as quasi-experimental design and utilization are explored.

Prerequisite(s)/Corequisite(s): Students should have prior graduate-level course work or experience in research design and statistics in the applied social sciences. Not open to non-degree graduate students.

PSYC 9421 POSITIVE ORGANIZATIONAL PSYCHOLOGY AND LEADERSHIP (3 credits)

This course is a graduate seminar on organizational psychology and leadership that focuses on the understanding and critical analysis of theory and practice pertaining to individual functioning at work. Positive organizational psychology theories and practices will provide the overarching framework in understanding potential solutions to challenges and problems facing leaders and their employees. (Cross-listed with CACT 8520)

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

PSYC 9430 PROSEMINAR: PERSONALITY (3 credits)

A course considering the effects of personality variables on behavior. A historical, theoretical, psychometric and experimental approach will be emphasized.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 9440 PROSEMINAR: SOCIAL PSYCHOLOGY (3 credits)

Examination of theories, research findings and controversies in social psychology. Topics will include socialization; person perception; interpersonal attraction, leadership and group effectiveness; attitudes, attitude measurement, and attitude change; intergroup relations, power and social influence. New topics will be added as they become part of the research interests of social psychologists.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 9460 SEMINAR IN AGING AND HUMAN BEHAVIOR (3 credits)

This course will examine in detail age-related changes in psychological processes and explore the implications of these changes for behavior. The course is intended primarily for graduate students in psychology and gerontology. (Cross-listed with GERO 9460)

Prerequisite(s)/Corequisite(s): Graduate standing in gerontology or psychology.

PSYC 9470 PRACTICUM IN APPLIED BEHAVIOR ANALYSIS (1-12 credits)

The practicum in applied behavior analysis provides students with intensive supervised experience providing behavior analytic services to improve the well-being of children and their families. Students will be assigned to practicum sites based on their respective interests, career goals, and availability of positions.

Prerequisite(s)/Corequisite(s): One semester of coursework in the Applied Behavior Analysis Master's degree program or admission to the Applied Behavior Analysis Certificate program. Not open to non-degree graduate students.

PSYC 9500 SOCIOEMOTIONAL DEVELOPMENT (3 credits)

This seminar is designed to provide an in-depth examination of the research literature on socioemotional development (emotional development that influences social behavior & development), with particular emphasis on both classic issues and current topics of debate. The course topics cover issues of importance in infancy, childhood, and adolescence. Research methods, as they apply to socioemotional development, will be emphasized throughout the course.

Prerequisite(s)/Corequisite(s): Graduate standing and PSYC 9560. Not open to non-degree graduate students.

PSYC 9510 RESEARCH METHODS IN DEVELOPMENTAL PSYCHOLOGY (3 credits)

This course is designed to provide graduate students in developmental psychology and school psychology with the necessary skills to enable them to frame a research question and to design a study to answer that question. In addition, students will become familiar with methodologies for specialized areas within developmental psychology. Research ethics is a major component in the course.

Prerequisite(s)/Corequisite(s): PSYC 9560. Not open to non-degree graduate students.

PSYC 9530 COGNITIVE DEVELOPMENT (3 credits)

This course covers contemporary issues in theory and research concerning the development of processes by which environmental information is perceived, attended to, stored, transformed and used. Both Piagetian and information processing orientations will be emphasized.

Prerequisite(s)/Corequisite(s): PSYC 9560. Not open to non-degree graduate students.

PSYC 9550 PSYCHOSOCIAL DEVELOPMENT (3 credits)

A seminar focusing on research methods, theory and the empirical literature as they apply to social and personality development across the life span. All students will be expected to design and conduct a mini-observational experimental study in some specific area of social and personality development.

Prerequisite(s)/Corequisite(s): Graduate standing and PSYC 9560. Not open to non-degree graduate students.

PSYC 9560 PROSEMINAR: DEVELOPMENTAL PSYCHOLOGY (3 credits)

A survey of developmental processes across the life-span, with a particular emphasis on the interface of biological, cognitive and social influences. Theories of human development and issues pertaining to developmental processes are examined. The primary focus in the course is on the research literature pertaining to developmental psychology. Special emphasis is given to the role of context in development and to the topics of research methods, multicultural factors in development and social policy.

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

PSYC 9570 APPLIED BEHAVIOR ANALYSIS (3 credits)

A comprehensive introduction to experimental methodology in applied behavior analysis. Topics covered include observational recording systems, reliability indices, procedural implementation of behavioral techniques, single-subject research designs and a broad review of the research literature.

Prerequisite(s)/Corequisite(s): A minimum of one course in learning theory (PSYC 8560, PSYC 8576, PSYC 9040, or equivalent) and permission. Not open to non-degree graduate students.

PSYC 9610 MOTIVATION & MORALE (3 credits)

A course focusing on theory and research in the areas of work motivation, work behavior and job satisfaction. Emphasis is placed on such topics as expectancy theory, job redesign, leadership, absenteeism, turnover, goal setting and behavior modification.

Prerequisite(s)/Corequisite(s): Admission into industrial/organizational psychology graduate program and permission of instructor. Not open to non-degree graduate students.

PSYC 9620 INDUSTRIAL TRAINING AND ORGANIZATIONAL DEVELOPMENT (3 credits)

This course will review theory and research relevant to training and organizational development, with emphasis on diagnosis, design, implementation, and evaluation. Practical concerns associated with intervention will be addressed.

Prerequisite(s)/Corequisite(s): Admission into industrial/organizational psychology graduate program and PSYC 9090, PSYC 9010, and PSYC 9020. Not open to non-degree graduate students.

PSYC 9630 LEADERSHIP THEORIES AND RESEARCH (3 credits)

The purpose of this course is to provide the student with a thorough review of the theories and research in the area of leadership. Theories reviewed will be those that focus on the role of the individual in effective leadership, the role of the situation, and the role of the followers. Special attention will be given to the psychological theories of leadership. The application of leadership research and theory to areas such as selection and training will also be reviewed.

Prerequisite(s)/Corequisite(s): Admission into the psychology graduate program or graduate standing and instructor permission. Not open to non-degree graduate students.

PSYC 9640 PROBLEM SOLVING & DECISION MAKING (3 credits)

The primary objective of the course is to acquaint students with some of the major conceptual, methodological, and measurement issues within the field of problem solving and decision making. Due to the scope of this field, the course will focus on the psychological research on individual decision making, with special emphasis on the cognitive and motivational processes underlying problem solving and decision making. The second major objective of the course is to encourage students to creatively integrate and apply decision making approaches and findings to traditional areas of concern to the industrial-organizational psychologist (e.g., employee selection, performance appraisal, training, leadership, motivation). The third objective is to hone students' critical thinking skills and their ability to present their ideas in a clear and coherent manner using oral and written formats.

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

PSYC 9650 RESEARCH METHODS IN PSYCHOLOGY (3 credits)

A course designed to allow students to integrate and extend their knowledge and understanding of psychological research. Students will develop skills in writing research proposals, conducting research, and preparing manuscripts for publications.

Prerequisite(s)/Corequisite(s): PSYC 9010 or PSYC 9020. Not open to non-degree graduate students.

PSYC 9660 CRITERION DEVELOPMENT AND PERFORMANCE APPRAISAL (3 credits)

An in-depth examination of the fundamentals of personnel psychology including job analysis, criterion development and performance measurement and appraisal in organizations. Practical experience in the application of techniques and procedures is emphasized through group and individual projects in organizational settings.

Prerequisite(s)/Corequisite(s): Admission to industrial/organizational psychology graduate program and PSYC 9090 (may be taken concurrently). Not open to non-degree graduate students.

PSYC 9670 PERSONNEL SELECTION (3 credits)

An exploration of current theory and practice in personnel selection. Problem solving strategies are emphasized through the design, analysis, and interpretation of selection research and the implementation of selection programs consistent with Equal Opportunity Guidelines and federal law.

Prerequisite(s)/Corequisite(s): Admission to industrial organizational psychology graduate program, PSYC 9660. Not open to non-degree graduate students.

PSYC 9680 GROUPS AND TEAMS (3 credits)

Teamwork is hard but inevitable; individuals must be able to work effectively in a team. Teamwork is only becoming more difficult and complex as organizations use technology to communicate across space and time, bringing together culturally and functionally diverse, physically distributed team members who are members of multiple teams or systems of teams. This course explores what it means to be a good team member, to help others work effectively in teams, and to diagnose and solve teamwork problems. Challenges such as communication, decision-making, conflict resolution, and leadership are explored.

Prerequisite(s)/Corequisite(s): Admission to industrial organizational psychology graduate program and PSYC 9660. Not open to non-degree graduate students.

PSYC 9780 ADVANCED CONSULTATION IN PSYCHOLOGY AND EDUCATION (3 credits)

The course is designed to provide education and psychology professionals a comprehensive understanding of foundational theories and processes of consultation applied to education and psychology problems of children. A major objective is to focus on developing consultation skills considered necessary to be an effective consultant through direct practice and feedback. The course will emphasize the relationship between the consultant and parents, teachers, and other professionals within the school and child mental health settings.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 9910 TOPICAL SEMINAR IN PSYCHOLOGY (1-3 credits)

A discussion of specific advanced topics which will be announced whenever the course is offered.

Prerequisite(s)/Corequisite(s): Permission of instructor. Not open to non-degree graduate students.

PSYC 9940 SCHOOL PSYCHOLOGY APPLIED RESEARCH PROJECT (1-7 credits)

The applied research project consists of students conducting an independent research project from start to finish. This project should have relevance to a practical aspect of school psychology and provide a unique contribution to the field. It may be quantitative or qualitative in nature, and must rely on sound research methodology.

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

PSYC 9950 PRACTICUM FOR DOCTORAL STUDENTS (1-6 credits)

Faculty-supervised experience in industry or business designed to bridge the gap between the classroom and a job, emphasizing use of previously acquired knowledge in dealing with practical problems for doctoral students.

Prerequisite(s)/Corequisite(s): Admission to industrial/organizational psychology graduate program. Not open to non-degree graduate students.

PSYC 9960 RESEARCH OTHER THAN THESIS (1-12 credits)

Research work under supervision of a faculty member. May be repeated up to a total of 12 credit hours.

Prerequisite(s)/Corequisite(s): Enrollment in a graduate program beyond the master's level. Not open to non-degree graduate students.

PSYC 9970 ED.S. LEVEL PRACTICUM IN SCHOOL PSYCHOLOGY (1-6 credits)

School Psychology School-Based Practicum is a capstone course in school psychology intended for students who have completed their Master's degree in School Psychology. This course is designed to reflect the scientist-practitioner model of training and practice in School Psychology. To accomplish this goal, students will be assigned to a practicing school psychologist employed by the public schools. The content of this course will focus on integrating previous and concurrent training experiences from courses and field experiences.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 9980 INTERNSHIP IN SCHOOL PSYCHOLOGY (3-6 credits)

School Psychology Internship is the final course in school psychology intended for students who have completed all of their other coursework. It is a 1200 hour culminating experience leading to licensure/certification as a school psychologist in most states, and eligibility for the NCSP exam. The internship requires that students apply the domains of training and practice that are outlined in the School Psychology program philosophy and training objectives. University and site-based supervision is required.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 9990 PSYCHOLOGY DISSERTATION (1-24 credits)

The course provides doctoral candidates in Psychology with a process to complete a dissertation research plan. The course learning activities will focus on the completion of a candidate's dissertation. The course is designed to allow advanced doctoral candidates to demonstrate technical mastery of the discipline and to advance knowledge by completing an investigation.

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

Psychology, MA

Department of Psychology, College of Arts and Sciences

Vision Statement

The Master of Arts in psychology is designed to give students a broad background in the field of psychology plus a sufficient degree of specialization to prepare them for either careers or further graduate training.

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Fall 2022)

- Fall: January 10

Other Requirements

- Baccalaureate degree with a minimum of 3.0 GPA.
- A minimum of 15 undergraduate semester hours or the equivalent of psychology or related courses including: basic statistics and an

upper level laboratory course, independent research, or equivalent, emphasizing the experimental method, data collection, statistical analysis, and report writing are required.

- **Entrance Exam:** Graduate Record Examination (GRE)
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.

- Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105

- **Statement of Purpose**
- **Writing Sample** (preferred APA style)
- **Resume**
- **Letters of Recommendation:** Three letters of recommendation from professors and individuals who can speak to applicant's potential for success in a graduate program are required.

Degree Requirements

Student must select an area of concentration.

Required Course

Code	Title	Credits
PSYC 8000	THE PROFESSION OF PSYCHOLOGY	0

Total number of required credits is determined by the area of concentration completed.

Other Requirements Needed for a Student to Complete the Program

Obtaining a score of at least 600 on the Advanced Psychology Test of the GRE. (NOTE: not required for the applied behavior analysis, neuroscience & behavior, developmental, cognitive areas of concentration).

Total Credit Hours: 30-37

Concentrations

Cognitive Concentration (Thesis Option 30 hours)

Code	Title	Credits
Required Cognitive Concentration Proseminar Courses		
PSYC 9010	PROSEMINAR: STATISTICAL METHODS I	3
PSYC 9020	PROSEMINAR: STATISTICAL METHODS II	3
PSYC 9070	PROSEMINAR: COGNITIVE PSYCHOLOGY	3
PSYC 9230	PROSEMINAR: BEHAVIORAL NEUROSCIENCE	3
PSYC 9560	PROSEMINAR: DEVELOPMENTAL PSYCHOLOGY	3

Advanced Cognitive Courses

Select three of the following:		9
PSYC 8526	PSYCHOLINGUISTICS	
PSYC 9040	PROSEMINAR LEARNING	
PSYC 9120	MULTIVARIATE STATISTICAL ANALYSIS	
PSYC 9530	COGNITIVE DEVELOPMENT	
PSYC 9910	TOPICAL SEMINAR IN PSYCHOLOGY ¹	

PSYC 8990	THESIS	6
Total Credits		30

¹ PSYC 9910: (Cognitive topic)

Exit Requirements

- Comprehensive Examination
- Thesis
 - All candidates should carefully review the Graduate College requirements for forming the Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval Forms and final approval of a thesis and final submission of the thesis.

Developmental Concentration (31-37 hours) Plan A (Thesis Option 31 hours)

Plan A is recommended for students who plan to pursue a PhD and/or who wish to complete an independent research project (the thesis).

This plan requires completion of a minimum of 31 credit hours, as listed below:

Code	Title	Credits
PSYC 9560	PROSEMINAR: DEVELOPMENTAL PSYCHOLOGY	3
PSYC 9010	PROSEMINAR: STATISTICAL METHODS I	3
PSYC 9020	PROSEMINAR: STATISTICAL METHODS II	3
PSYC 9650	RESEARCH METHODS IN PSYCHOLOGY	3
PSYC 9960	RESEARCH OTHER THAN THESIS ¹	1

Developmental Concentration Courses

Select two of the following: 6

PSYC 9070	PROSEMINAR: COGNITIVE PSYCHOLOGY ²	
PSYC 9230	PROSEMINAR: BEHAVIORAL NEUROSCIENCE ²	
PSYC 9430	PROSEMINAR: PERSONALITY	
PSYC 9440	PROSEMINAR: SOCIAL PSYCHOLOGY	

Advanced Developmental Concentration Seminars

Select two of the following: 6

PSYC 9500	SOCIOEMOTIONAL DEVELOPMENT	
PSYC 9510	RESEARCH METHODS IN DEVELOPMENTAL PSYCHOLOGY	
PSYC 9530	COGNITIVE DEVELOPMENT	
PSYC 9550	PSYCHOSOCIAL DEVELOPMENT	

PSYC 8990	THESIS	6
-----------	--------	---

Total Credits 31

¹ PSYC 9960: (1-6 credit hours)

² Note you must take either PSYC 9070 or PSYC 9230 as one of the options.

Plan B (Non-Thesis Option 37 hours)

Plan B is recommended for students who plan to work in an applied setting involving children and/or families and who do not plan to pursue a PhD. This plan requires completion of a minimum of 37 credit hours. In addition to required course work, students choose 3 elective courses (within or outside the Department of Psychology).

Instead of a thesis, students complete two applied practica (6 credit hours).

Code	Title	Credits
PSYC 9560	PROSEMINAR: DEVELOPMENTAL PSYCHOLOGY	3

PSYC 9650	RESEARCH METHODS IN PSYCHOLOGY	3
PSYC 9960	RESEARCH OTHER THAN THESIS ¹	1

Statistics Course

PSYC 9010	PROSEMINAR: STATISTICAL METHODS I	3
or PSYC 9020	PROSEMINAR: STATISTICAL METHODS II	

Developmental Concentration Proseminars

Select two of the following: 6

PSYC 9070	PROSEMINAR: COGNITIVE PSYCHOLOGY	
PSYC 9230	PROSEMINAR: BEHAVIORAL NEUROSCIENCE	
PSYC 9430	PROSEMINAR: PERSONALITY	
PSYC 9440	PROSEMINAR: SOCIAL PSYCHOLOGY	

Advanced Developmental Concentration Seminars

Select two of the following: 6

PSYC 9500	SOCIOEMOTIONAL DEVELOPMENT	
PSYC 9510	RESEARCH METHODS IN DEVELOPMENTAL PSYCHOLOGY	
PSYC 9530	COGNITIVE DEVELOPMENT	
PSYC 9550	PSYCHOSOCIAL DEVELOPMENT	

Developmental Concentration Electives

Select three of the following: 9

PSYC 8250	FAMILY ANALYSIS AND TREATMENT	
PSYC 8316	PSYCHOLOGICAL AND EDUCATIONAL TESTING	
PSYC 8590	PSYCHOLOGY OF EXCEPTIONAL CHILDREN	
PSYC 9090	PSYCHOMETRIC THEORY	
PSYC 9320	SEMINAR IN PROGRAM EVALUATION	
PSYC 9570	APPLIED BEHAVIOR ANALYSIS	

Additional Course

Select an additional course outside the Department of Psychology (e.g., SOWK, SOC, SPED, GERO, CJUS, COUN, and PA).

PSYC 8980	PRACTICUM IN DEVELOPMENTAL PSYCHOLOGY ²	6
-----------	--	---

Total Credits 37

¹ PSYC 9960: (1-6 credit hours)

² PSYC 8980: (6 credit hours)

Exit Requirements

- Comprehensive Examination
- Thesis
 - All candidates should carefully review the Graduate College requirements for forming the Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval Forms and final approval of a thesis and final submission of the thesis.

Industrial Organizational Concentration (Thesis Option 36 hours)

Code	Title	Credits

Social/Personality Exit Requirements

- **Thesis**
 - All candidates should carefully review the Graduate College requirements for forming the Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval Forms and final approval of a thesis and final submission of the thesis.
- **Social/Personality MA Comps**
 - Option 1- PSYC GRE
 - Proseminar requirement (3 non-stat prosems or 2 non-stat prosems and a waiver/substitution) with a grade of B- or better.
 - PSYC GRE score of 600 or better.
 - Option 2- Research
 - Proseminar requirement (3 non-stat prosems or 2 non-stat prosems and a waiver/substitution) with a grade of B- or better.
 - Research requirement- one from the list below. All research must be conducted at UNO and be supervised by a faculty member from the social/personality psychology area.
 1. Co-author on a presentation or poster at an approved international or national level conference.
 2. First author on a presentation or poster at an approved regional level conference.
 3. Co-author on an accepted publication in a peer review journal.
 - We expect that the student will play a significant role in the research process for satisfaction of the comps requirement. If a co-author, the student must have contributed significantly and meaningfully to the paper or manuscript.
 - List of approved conferences (other conferences may be approved by request).
 1. International/National: APA, APS, SPSP, SPSSI, SESP, EASP.
 2. Regional: regional APA conference (e.g., MPA).

- Student will submit an e-mail of request to the Social/Personality director and his/her advisor. Student letter must include citation (authors, title, and conference) and a letter or e-mail showing acceptance.
- Social/Personality area faculty will review the request in case there are any concerns, or the conference is not on the approved list.
- If approved, Social/Personality director will submit the comps completion form to the graduate office.

%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.

- Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105

- **Statement of Purpose**
- **Writing Sample** (preferred APA style)
- **Resume**
- **Letters of Recommendation:** Three letters of recommendation are required from professors and individuals who can speak to the applicant's potential for success in a graduate program.

Special Performance Quality Rule

If at any time a grade of "C", (2.0 on a 4.0 scale) in graduate courses become a matter of record, a graduate student in the Department of Psychology will be placed on probation. An unexcused grade of "W" in a proseminar course will be considered equivalent to a grade of "C" for purposes of this policy. An excused "W" must be approved by the chair of the department of psychology. Students placed on this probation will forfeit any departmental graduate assistantship they may have and any approved programs of study will be subject to re-evaluation and change. Before registering for additional courses, a student placed on probation must, with the assistance and approval of his/her advisor, submit a plan for remediation of his/her academic problems, and have that plan approved by the Graduate Program Committee. The Graduate Program Committee will review and, if appropriate, modify the plan. Further, any enrollment in graduate courses must be approved by the Graduate Program Committee. The student will remain on probation until the Graduate Program Committee approves termination of probation status. If a student earns a second "C", the student will be dismissed from the program and the GPC will work to come up with a plan, and evaluate if it is possible for the student to return to the program at some point.

Psychology, PhD

Department of Psychology, College of Arts & Sciences

Our PhD programs prepare students for applied, research, or teaching positions in the areas of developmental psychology, industrial/organizational psychology and neuroscience and behavior.

Industrial/Organizational Psychology, MS

Department of Psychology, College of Arts & Sciences

Vision Statement

The MS in industrial/organizational psychology is designed to prepare students for work in applied settings as well as for continued education. Students are trained using the scientist-practitioner model advocated by Society for Industrial Organizational Psychology (SIOP).

School Psychology, EdS

Department of Psychology, College of Arts & Sciences

Vision Statement

The UNO school psychology program's mission is to graduate students who have met high levels of academic excellence relevant to the knowledge and skills in the profession of school psychology and that are engaged in and committed to the community. The program is designed to prepare graduates to function as scientist-practitioners in service to children and their families, schools, and communities. The program emphasizes an indirect service delivery approach that is oriented in data-based problem-solving and is responsive to cultural and ecological contexts. Although indirect approaches are emphasized (e.g., consultation, assessment, prevention, and early intervention), graduates are prepared to apply direct psychological services (e.g., individual-, group-, and systems-level interventions) when conditions warrant.

- ¹ Elective courses must be approved by school psychology program committee. Students must submit a written justification to the program director at least one month before the start of the course stating how the proposed elective course fits into their plan of study. The course catalog description must be included in the justification.

36 hours is earned for the EdS in School Psychology
36 hours is earned in a Master's degree in School Psychology

Total Credit Hours: 72

Exit Requirement:

Must successfully complete the School Psychology PRAXIS Examination.

Special Performance Quality Rule

If at any time a grade of "C", (2.0 on a 4.0 scale) in graduate courses become a matter of record, a graduate student in the Department of Psychology will be placed on probation. An unexcused grade of "W" in a proseminar course will be considered equivalent to a grade of "C" for purposes of this policy. An excused "W" must be approved by the chair of the Department of Psychology. Students placed on this probation will forfeit any departmental graduate assistantship they may have and any approved programs of study will be subject to re-evaluation and change. Before registering for additional courses, a student placed on probation must, with the assistance and approval of his/her advisor, submit a plan for remediation of his/her academic problems, and have that plan approved by the graduate program committee. The graduate program committee will review and, if appropriate, modify the plan. Further, any enrollment in graduate courses must be approved by the graduate program committee. The student will remain on probation until the graduate program committee approves termination of probation status. If a student earns a second "C", the student will be dismissed from the program and the graduate program

committee will work to come up with a plan, and evaluate if it is possible for the student to return to the program at some point.

School Psychology, MS

Department of Psychology, College of Arts and Sciences

Vision Statement

The UNO school psychology program's mission is to graduate students who have met high levels of academic excellence relevant to the knowledge and skills in the profession of school psychology and are engaged in and committed to the community. The program is designed to prepare graduates to function as scientist-practitioners in service to children and their families, schools, and communities. The program emphasizes an indirect service delivery approach that is oriented in data-based problem-solving and is responsive to cultural and ecological contexts. Although indirect approaches are emphasized (e.g., consultation, assessment, prevention, and early intervention), graduates are prepared to apply direct psychological services (e.g., individual-, group-, and systems-level interventions) when conditions warrant.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Fall 2022)

- Fall: December 15

Other Requirements

- A minimum of 15 undergraduate semester hours or the equivalent of psychology courses including: basic statistics and an upper level laboratory course, independent research, or equivalent, emphasizing the experimental method, data collection, statistical analysis, and report writing, are required.
- **Entrance Exam:** Graduate Record Examination (GRE) is required
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose**
- **Writing Sample** (preferred APA style)
- **Resume**
- **Letters of Recommendation:** Three letters of recommendation from professors and individuals who can speak to applicant's potential for success in a graduate program

MMI 904	Proseminar Learning	3
Total Credits		36

¹ PSYC 8550: the other course is taken at the EdS level.

Exit Requirement

Comprehensive Portfolio (CP)

Students are required to submit a Comprehensive Portfolio (CP) near the end of their master's work. A portfolio is a systematic and purposeful collection of work that documents a student's professional competencies within the program's training objectives. The CP meets the graduate school's master's-level comprehensive examination requirement. The portfolio is intended to represent the student's progress towards meeting program outcomes and his or her ability to effect positive change for children, schools, and families. Thus, it is a formative and summative evaluation of student progress through the program's training objectives.

Special Performance Quality Rule

If at any time a grade of "C", (2.0 on a 4.0 scale) in graduate courses become a matter of record, a graduate student in the Department of Psychology will be placed on probation. An unexcused grade of "W" in a proseminar course will be considered equivalent to a grade of "C" for purposes of this policy. An excused "W" must be approved by the chair of the Department of Psychology. Students placed on this probation will forfeit any departmental graduate assistantship they may have and any approved programs of study will be subject to re-evaluation and change. Before registering for additional courses, a student placed on probation must, with the assistance and approval of his/her advisor, submit a plan for remediation of his/her academic problems, and have that plan approved by the graduate program committee. The graduate program committee will review and, if appropriate, modify the plan. Further, any enrollment in graduate courses must be approved by the graduate program committee. The student will remain on probation until the graduate program committee approves termination of probation status. If a student earns a second "C", the student will be dismissed from the program and the GPC will work to come up with a plan, and evaluate if it is possible for the student to return to the program at some point.

Applied Behavior Analysis, MS

Department of Psychology, College of Arts and Sciences; Munroe Meyer Institute, UNMC

Vision Statement

The University of Nebraska Omaha and Munroe Meyer Institute (MMI) Applied Behavior Analysis Program's mission is to graduate students who have met high levels of academic excellence in clinical and research skills in applied behavior analysis and mental/behavioral health. The ABA Program trains students in a behavior analytic orientation to provide much needed services for children and adolescents, including those with behavioral and neurodevelopmental disabilities. The MS degree is for those individuals with a bachelor's degree seeking a master's degree and a program of coursework and practicum leading to Board Certification in Behavior Analysis. There is also a certificate program [SK1] (p. 1) for those individuals who already have a masters, Educational Specialist or PhD degree and wish to acquire additional knowledge and skills in applied behavior analysis.

Program Contact Information

Mark Shriver, PhD, Graduate Program Chair (GPC)
Munroe Meyer Institute
402.559.6408
mshriver@unmc.edu

Program Website (<https://www.unomaha.edu/college-of-arts-and-sciences/psychology/academics/graduate-programs/aba-program/>)

Other Program Related Information

The UNO and MMI ABA MS program leads to Board Certification in Behavior Analysis (BCBA). This involves completion of (1) the program's Association for Behavior Analysis International Verified Course Sequence (listed below) and (2) the Behavior Analyst Certification Board fieldwork experience (1500-2000 hours). See BACB website (<http://bacb.com/>) for more details on attaining BCBA.

The program coursework also addresses content areas required for license as a mental health practitioner in Nebraska. Upon completion of the program, students will have obtained necessary prerequisites for Provisional Licensure as a Mental Health Practitioner (PLMHP) in the state of Nebraska. See the Nebraska Department of Health and Human Services website for more details on attaining a PLMHP.

The majority of coursework is online. However, most online courses require a synchronous meeting, typically weekly, which students will join via Zoom video. All courses, including online courses, follow a semester schedule sequence.

Admissions

General Application Requirements and Admissions Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Fall 2022)

- Fall: January 10

Other Requirements

- A minimum of 15 undergraduate semester hours (or the equivalent) of psychology courses including: basic statistics and an upper level laboratory course, independent research, or equivalent, emphasizing the experimental method, data collection, statistical analysis, and report writing are required.
- **Entrance Exam:** Graduate Record Examination (GRE)

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.

- Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105

- **Statement of Purpose:** The statement of purpose should include: the applicant's purpose in applying for graduate study, the particular area of specialization within the major field, the applicant's plans for future occupation or profession, and any additional information that may aid the selection committee in evaluating your preparation and your aptitude for graduate study. The applicant should specifically address your goals and objectives in pursuing graduate study.

- **Writing Sample:** Senior authored writing sample

- **Resume**

- **Letters of Recommendation-** Three required

The ABA Handbook (<https://www.unomaha.edu/college-of-arts-and-sciences/psychology/academics/graduate-programs/aba-program/>) is a comprehensive resource for prospective and current students in the Applied

Behavior Analysis program at UNO. Refer to this document for information concerning the program content, training, policies, research, and more.

Applied Behavior Analysis Certificate

Department of Psychology, College of Arts and Sciences; Munroe Meyer Institute, UNMC

Vision Statement

The University of Nebraska Omaha and Munroe Meyer Institute (MMI) Applied Behavior Analysis Program's mission is for graduate students who have met high levels of academic excellence in clinical and research skills in applied behavior analysis and mental/behavioral health. The ABA Program trains students in a behavior analytic orientation to provide much needed services for children and adolescents, including those with behavioral and neurodevelopmental disabilities. The certificate program complements the existing MS in Applied Behavior Analysis. The MS degree is for those individuals with a bachelor's degree seeking a master's degree and a program of coursework and practicum leading to Board Certification in Behavior Analysis. The certificate program is for those individuals who already have a masters, educational specialist or PhD degree and wish to acquire additional knowledge and skills in applied behavior analysis.

Program Website (<https://www.unomaha.edu/college-of-arts-and-sciences/psychology/academics/graduate-programs/aba-program/aba-cert.php>)

Other Program Related Information

This UNO ABA certificate program *does not* lead to Board Certification in Behavior Analysis (BCBA) *unless* one takes all courses in the Association for Behavior Analysis International (ABAI) verified course sequence and completes 1500 or 2000 hours of required supervised fieldwork. The supervised fieldwork is not offered as a course in the ABA certificate program and must be arranged independently by the student. See BACB (<http://bacb.com/>) for more details on attaining BCBA and requirements for supervised fieldwork.

The majority of coursework is online. However, most online courses require a synchronous meeting, typically weekly, which students will join via Zoom video. All courses, including online courses, follow a semester schedule sequence.

Although a university practicum experience is offered, due to the intensity of the supervision requirements, full-time employees who are seeking BCBA and taking courses part-time are strongly encouraged to consider the supervised fieldwork experience option instead. See <https://www.bacb.com/experience-standards-monthly-system/>

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- Applicants must have completed a master's degree with at least a 3.0 GPA, a major or a minor (or at least a 15 credit concentration) in psychology, education, or a related area.
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- Statement of Purpose:** a 1000-word essay describing why they seek admission to this program
- One letter of recommendation

Public Administration Degree Programs Offered

- Public Administration, MPA (p. 1312)
- Public Administration, PhD (p. 1315)
- Public Administration, MPA and Management Information Systems, MS (MPA/MIS (p. 1254)) (p. 1254)
- Public Administration, MPA and Social Work, MSW (MPA/MSW) (p. 1317)

Certificates Offered

- Public Management Certificate (p. 1322)
- Nonprofit Management Certificate (p. 1323)

PA 8010 THE PUBLIC ECONOMY (3 credits)

This course focuses on microeconomics and its application to policy and management in the public and non-profit sectors. The concept of efficiency is developed along with the goal of social equity to help determine the roles of the public, private, and non-profit sectors. Some key issues examined are: the balance between equity and efficiency, government intervention in the market, privatization of public services, and cost benefit analysis.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PA 8020 AVIATION MANAGEMENT AND POLICY (3 credits)

The purpose of the course is to acquaint students with advanced concepts of aviation administration and the implementation of aviation policy within the public sector and to identify key concepts and critical issues both domestic and international. The primary focus is to explore the various effects that have resulted from the formation and enactment of major aviation and transportation regulatory issues. (Cross-listed with AVN 8020).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PA 8030 INTERNSHIP IN PUBLIC ADMINISTRATION (1-6 credits)

Maximum of 3 hours to be granted upon completion of written report on internship. Internship in some government: national, state, local or nonprofit agency and in some instances public-oriented private agencies. Students will take course as Satisfactory/Unsatisfactory. An additional 3 hours may be taken through PA 8040.

Prerequisite(s)/Corequisite(s): Nine hours of MPA coursework and permission of school. Not open to non-degree graduate students.

PA 8040 INTERNSHIP IN PUBLIC ADMINISTRATION (1-6 credits)

Maximum of 3 hours to be granted upon completion of written report on internship. Internship in some government: national, state, local or nonprofit agency and in some instances public-oriented private agencies. Students will take the course as Satisfactory/Unsatisfactory. An additional 3 hours may be taken through PA 8030.

Prerequisite(s)/Corequisite(s): Nine hours of MPA course work and permission of the school. Not open to non-degree graduate students.

PA 8050 FOUNDATIONS OF PUBLIC ADMINISTRATION (3 credits)

The purpose of this course is to introduce the student to the art and science of public administration and to enable the student to develop the knowledge, skills and abilities requisite to the pursuit of graduate education in public administration.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students

PA 8090 ORGANIZATION THEORY AND BEHAVIOR (3 credits)

A study of the various approaches to understanding public organizations and people in them with special emphasis on the design, functioning and management of public agencies.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students

PA 8100 ADVANCED MANAGEMENT AND LEADERSHIP FOR PUBLIC AND NONPROFIT PROFESSIONALS (3 credits)

This course is designed to advance students' understanding and techniques about the role of leadership and ethics in the public and nonprofit sectors. Special attention will be paid on the application of theories of leadership and ethics to manage various boundary spanning activities including managing external relationships, collaborations/networks, performance, and innovation and change. (Cross-listed with AVN 8100)

Prerequisite(s)/Corequisite(s): PA 8050 and PA 8090. Not open to non-degree graduate students.

PA 8106 MARKETING IN PUBLIC, NON-PROFIT AND AVIATION ORGANIZATIONS (3 credits)

This course will focus on developing a working knowledge of marketing and its component parts as they may be applied to non-profit organizations. Emphasis will be placed on understanding the marketing process and applying marketing principles to real organizational settings. (Cross-listed with PA 4100).

Prerequisite(s)/Corequisite(s): Graduate and permission of instructor, and PA 8010, PA 8090; or permission of department.

PA 8110 MANAGING INFORMATION IN THE PUBLIC SECTOR (3 credits)

This course is directed toward in-career and pre-career students in public administration who wish to acquire knowledge of issues in the management of information in the public sector and the basics of computing applications in the public sector. Its primary focus is on special issues in the management of information.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050 and PA 8090, or permission of school. Not open to non-degree graduate students.

PA 8120 ANALYSIS AND DECISION MAKING (3 credits)

This course assists students to develop their skills in research design and data analysis, covering both qualitative and quantitative data relevant to public affairs. The course introduces students to the fundamentals of research design, data collection, data and statistical analysis, and drawing pertinent policy and management recommendations. (Cross-listed with AVN 8120).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students

PA 8130 MANAGING DIGITAL GOVERNANCE (3 credits)

This course equips current and future public and nonprofit managers with capabilities and strategies to evaluate, participate in, and/or lead an information technology (digital governance) project to improve or even transform public service and governance. Because information technology has become increasingly integrated into public service and governance, understanding the role of information and information technology in government has become a necessity. This course provides the concepts and tools for public and nonprofit managers to succeed in the information age by better managing information as a resource and information technology as an enabler for public services and governance. The topics include digital divide, online participation, strategic IT management and change management, information resource and knowledge management, financing IT projects, IT project and performance management, management of IT outsourcing, and business process management. Basic literacy in computing and information technology is an integral part of the course. The discussion of these topics will address the growing use of information and communication technologies such as social media, smart mobile devices, and internet of things. Moreover, this course addresses the interplay of management, technology, and policy in the context of public service organizations, including governmental and non-profit organizations. This course offers the best of both practical and academic worlds via assigned readings and exercises, discussions, and a service-oriented project. The emphasis is on research-based knowledge and best practices informing one another. The class discussion is aimed at integrating professional experience with quality research to generate additional insights.

Prerequisite(s)/Corequisite(s): PA 8050. Not open to non-degree graduate students.

PA 8206 COMMUNITY ORGANIZING & SOCIAL CHANGE (3 credits)

This course will focus on various theories and applications of organizing communities and neighborhoods to effect change. Of particular interest is the role of engaging citizens in improving their communities. (Cross-listed with PA 4200).

Prerequisite(s)/Corequisite(s): Permission of instructor. Not open to non-degree graduate students.

PA 8300 POLICY DESIGN AND IMPLEMENTATION (3 credits)

This course examines the formulation, adoption, implementation and evaluation of public policy. Important topics include the basic features of American government, the causes and determinants of public policies, the dynamics of decision-making in the public sector, the obstacles to "successful" public programs, and the criteria for the assessment of a public program's impact. Special emphasis is given to the role public managers play within the policy process.

Prerequisite(s)/Corequisite(s): PA 8050, PA 8090 and PA 8120. Not open to non-degree graduate students.

PA 8320 PUBLIC POLICY EVALUATION (3 credits)

This course is designed to have the students understand the role of evaluation in the policy process, to demonstrate how to conduct and implement evaluations of public programs, to illustrate the procedures for presenting an evaluation report to public officials and citizens, to introduce operational issues and problems associated with management of an office of policy evaluation, and to insure the exploration of conflicts and limitations inherent to public policy evaluation.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050, PA 8090 and PA 8120 and completion of at least 24 hours in the MPA program, not open to non-degree graduate students

PA 8330 SEMINAR IN POLICY ANALYSIS (3 credits)

Application of analytical techniques to the assessment of alternative courses of public action and the development and design of public programs; utilization and impact of expert analysis by public officials and political groups; impact and role of technical analysis in a democracy; management of policy analysis units within government.

Prerequisite(s)/Corequisite(s): PA 8050 and PA 8120, not open to non-degree graduate students

PA 8400 PUBLIC AND NONPROFIT BUDGETING (3 credits)

The purpose of the course is to familiarize public administration students with the basic characteristics and features of public budgets and enable them to deal competently with them.

Prerequisite(s)/Corequisite(s): PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8410 PUBLIC HUMAN RESOURCE MANAGEMENT (3 credits)

A study of the personnel process in American governmental administration. The processes and problems of recruiting, structuring and operating public bureaucracies are examined as well as problems in personnel leadership, neutrality, accountability and performance.

Prerequisite(s)/Corequisite(s): PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8420 PUBLIC WORKS MANAGEMENT (3 credits)

This course is designed to develop an understanding of the profession of public works management, and its relationship with urban service delivery. Students will learn substantive specialty areas of public works, as well as management techniques to improve service delivery efficiency.

Prerequisite(s)/Corequisite(s): PA 8050. Not open to non-degree graduate students.

PA 8436 MUNICIPAL ADMINISTRATION (3 credits)

The administrative structure and administrative practices of American cities covering such areas as finance, personnel, public works, public safety, health, utilities and planning. (Cross-listed with PA 4430).

Prerequisite(s)/Corequisite(s): PA 8010 and PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8440 ORGANIZATION DEVELOP. & PLANNED CHANGE IN THE PUBLIC SECTOR (3 credits)

This course provides students with the theories and skills necessary to manage organizational change in the public sector. To accomplish this will require that the student become versed in the strategies of organizational development (OD) and planning in the public sector while at the same time mastering intervention techniques.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050, PA 8090, PA 8120 and completion of at least 24 hours in the MPA, not open to non-degree graduate students

PA 8450 SEMINAR IN ADVANCED MANAGEMENT ANALYSIS IN PUBLIC AGENCIES (3 credits)

A study of theory and method related to analysis of problems of organization and workflow in public agencies. The course includes problem analysis, field study methods, design of improved methods, selecting alternatives and developing decision packages.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050, PA 8090, PA 8120 and completion of at least 24 hours in the MPA program.

PA 8470 ADMINISTRATIVE ETHICS AND LEADERSHIP (3 credits)

Ethical action and effective leadership are especially important in public service and they are closely related. This course introduces students to concepts from public sector ethics and from leadership theory. Emphasis is placed on decision-making processes, relationships between public and nonprofit sector professionals and elected officials and citizens, and the role of the career public service professional in a democratic society.

Prerequisite(s)/Corequisite(s): PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8480 SEMINAR IN PUBLIC FINANCIAL ADMINISTRATION (3 credits)

The study of public finance administration policy and techniques areas. Emphasis is placed on the technical aspects of public finance administration with particular emphasis on the purposes, processes and issues associated with particular techniques or technique areas. (Cross-listed with AVN 8480).

Prerequisite(s)/Corequisite(s): PA 8050 or permission of department.

PA 8500 ISSUES IN PUBLIC-PRIVATE SECTOR COOPERATION (3 credits)

This course introduces students to the organization and processes, as well as the tools and techniques, of public-private sector cooperation. The objective of such a course is to familiarize students with the concepts and skills needed to develop and administer joint activities between the public and private sectors. Such cooperative activities have become an important aspect of public administration in recent years.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050, PA 8090 or permission of school. Not open to non-degree graduate students.

PA 8516 LONG-TERM CARE ADMINISTRATION (3 credits)

An investigation of the broad range of policy issues, theoretical concerns and practical management strategies influencing the design, organization and delivery of long-term care services. (Cross-listed with GERO 4510, GERO 8516, PA 4510).

Prerequisite(s)/Corequisite(s): Permission of instructor and PA 8050, PA 8090 or permission of school. Not open to non-degree graduate students.

PA 8520 SEMINAR IN GRANT WRITING (3 credits)

This course explores the grant-writing process from initial conceptualization through submission and award to final report. The purposes of the course are to provide graduate students with the expertise and tools needed to fund their own research, to provide effective grant-writing assistance to faculty mentors and other colleagues, and to compete more effectively in the job market and/or for acceptance into doctoral and post-doctoral programs.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050 and PA 8090. Not open to non-degree graduate students.

PA 8530 PLANNING AND EVALUATION (3 credits)

The basic question presented in this course is how we can use strategic planning and evaluation to build public and nonprofit organizations that function creatively and effectively, and that enhance the overall public value of their services.

Prerequisite(s)/Corequisite(s): PA 8100, PA 8050, PA 8090, PA 8120 and PA 8300. Not open to non-degree graduate students.

PA 8550 INTRODUCTION TO THE NON-PROFIT SECTOR (3 credits)

This course focuses on the contribution and importance of philanthropy, volunteerism and nonprofit organizations in society. Includes the differentiation between both public and private nonprofit organizations and the for profit sector. Management issues regarding nonprofit agencies is introduced.

Prerequisite(s)/Corequisite(s): Graduate standing, PA 8010, PA 8090 and permission of advisor or permission of school. Not open to non-degree graduate students.

PA 8560 NONPROFIT FINANCIAL MANAGEMENT (3 credits)

The focus of this course is on developing an understanding of the managing of financial resources within a nonprofit organization. A special emphasis is also placed on developing and executing budgets for such organizations.

Prerequisite(s)/Corequisite(s): Graduate standing and PA 8550 or permission of instructor. Not open to non-degree graduate students.

PA 8566 INTERGOVERNMENTAL MANAGEMENT (3 credits)

This course is directed at those who wish to improve their knowledge and understanding of intergovernmental relations as it impacts policy and administration in the United States. The course will look at history and theoretical underpinnings of intergovernmental relations, the different elements of these relationships and review specific management arenas that are affected by these relationships. (Cross-listed with PA 4560).

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050 and PA 8090; or permission of school. Not open to non-degree graduate students.

PA 8580 NONPROFIT HUMAN RESOURCES MANAGEMENT (3 credits)

This graduate-level course provides an introduction to the theories, principles, policies and practices related to leading and managing human resources in nonprofit organizations, including personnel, board and volunteer management and development.

Prerequisite(s)/Corequisite(s): Graduate standing and permission of adviser; PA 8050; or permission of school. Not open to non-degree graduate students

PA 8596 TECHNIQUES TOPICS IN NONPROFIT MANAGEMENT (1-3 credits)

A variable content course emphasizing nonprofit management techniques and topics. Topics include nonprofit leadership, board executive staff roles and relationships, personnel and volunteer management, financial management, proposal and grant writing community resources, special events planning and administration, needs assessments and legal ethical aspects.

Prerequisite(s)/Corequisite(s): PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8600 ADMINISTRATIVE LAW (3 credits)

A review of the principal elements of the role and character of legal processes in government administration, including delegation of powers, legal forms of administrative action, liability of government units and officers and judicial review of administrative action.

Prerequisite(s)/Corequisite(s): PA 8050, not open to non-degree graduate students

PA 8616 MUNICIPAL LAW (3 credits)

This course is directed at both graduates and undergraduates who wish to have some exposure to the legal issues which affect public administrators. At the conclusion of the course, each student should have a basic understanding of municipal law which defines the parameters within which a public administrator must function, as well as other laws or legal concepts which will affect them on a day-to-day basis. Upon completion of the course, the student should be able to identify potential legal problems with their proposed actions.

Prerequisite(s)/Corequisite(s): PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8676 PROGRAMS AND SERVICES FOR THE ELDERLY (3 credits)

This course is provided to give the student a historical overview of programs for the elderly; examine the national policy process as it relates to the older American; and review the principles and practices relative to the existing national programs for the aged. (Cross-listed with GERO 4670, GERO 8676).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PA 8710 FUND RAISING IN PUBLIC AND NON-PROFIT ORGANIZATIONS (3 credits)

The purpose of this course is to introduce students to a variety of fund raising methods, provide the context in which these methods might be used, and provide an understanding of how fund raising operates within public and not-for-profit organizations.

Prerequisite(s)/Corequisite(s): Graduate standing and permission of instructor, PA 8010, and PA 8090; or permission of school. Not open to non-degree graduate students.

PA 8740 HEALTH CARE POLICY (3 credits)

This course helps students understand major health care policy making and related issues. It focuses on the history/background; physical, social, and economic environment; policy process; and political marketplace of contemporary U.S. health care policies. Topics include health care reform, cost containment, indigent health care and urban vs. rural health care. A health care background is helpful, but not required.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PA 8810 SEMINAR IN METROPOLITAN PLANNING (3 credits)

An overview of the present status of planning in metropolitan areas with special emphasis on structure of planning departments, comprehensive plans and problems of annexation.

Prerequisite(s)/Corequisite(s): PA 8050 or permission of instructor or permission of school. Not open to non-degree graduate students.

PA 8826 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

An introduction to environmental law and regulations intended for students pursuing careers in environmental sciences or related fields. The course emphasizes the origins, implementation, and enforcement of U.S. state and federal laws and regulations. Major federal environmental laws, covering air and water quality, solid and hazardous waste, pollution prevention and remediation, and natural resources will be discussed. Usually offered Fall semesters. (Cross-listed with ENVN 8826, ENVN 4820, BIOL 4820, GEOG 4820, GEOG 8826).

Prerequisite(s)/Corequisite(s): Graduate Standing or Permission from the Instructor.

PA 8896 SPECIAL TOPICS PUBLIC ADMIN (3 credits)

A course with the purpose of acquainting the student with key issues and topics of special concern to public and non-profit management that they otherwise would not receive elsewhere. No more than six hours of total credit in PA 8896 and PA 8906 can be taken without prior permission by the graduate program committee. Further, each topic in the course will need the approval of the Dean of Graduate Studies prior to being offered. (Cross-listed with PA 4890).

PA 8906 SPECIAL TOPICS IN PUBLIC ADMINISTRATION (1-3 credits)

A variable content course with Public Administration and Urban Studies topics selected in accordance with student and faculty interest. Possible topics include urban homesteading, administrative federalism and economic development and the public sector. (Cross-listed with PA 4900).

Prerequisite(s)/Corequisite(s): PA 8050 or permission of the school. Not open to non-degree graduate students.

PA 8920 READINGS IN PUBLIC ADMINISTRATION (1-3 credits)

Specially planned readings in public administration for the graduate student who encounters scheduling problems in the completion of his degree program, or who has special preparatory needs and who is adjudged by the department to be capable of pursuing a highly independent course of study.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050, PA 8090, PA 8120, and permission of the school. Not open to non-degree graduate students.

PA 8940 RESEARCH IN PUBLIC ADMINISTRATION (1-3 credits)

The course is intended for advanced graduate students in public administration. It is especially suited for those in-career students who have had their internships waived and who might profit more by in-depth research on a problem of public administration rather than additional classroom courses.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050, PA 8090, PA 8120, and permission of the school. Not open to non-degree graduate students.

PA 8990 CAPSTONE PROJECT IN PUBLIC ADMINISTRATION (3 credits)

The Capstone Project offers each student the opportunity to demonstrate mastery of the theory and practice of public administration by applying the knowledge and skills gained in the MPA program to a project of the student's choice. This involves completing a project report reflecting the cumulative knowledge gained from these experiences. The course is intended only for students who are completing their Masters of Public Administration (MPA).

Prerequisite(s)/Corequisite(s): Completion of at least 30 hours in the MPA, PA 8050, PA 8100, PA 8090, PA 8120, PA 8300, PA 8400, PA 8530 and school permission. Not open to non-degree graduate students.

PA 9000 FOUNDATIONS OF PUBLIC ADMINISTRATION (3 credits)

This course is designed as a doctoral seminar that surveys the development of public administration from its earliest antecedents to the present day, taking both a historical and topical approach.

Prerequisite(s)/Corequisite(s): Admission into the doctoral program. Not open to non-degree graduate students.

PA 9080 ADVANCED STATISTICAL APPLICATIONS (3 credits)

This is a required course which will provide the student with fundamentals of modern statistical techniques used in criminal justice and public affairs research. (Cross-listed with CRCJ 9080).

Prerequisite(s)/Corequisite(s): CRCJ 8950

PA 9200 THEORIES OF THE POLICY PROCESS (3 credits)

Proseminar in public policy with emphasis on the development and application of theories of the formulation, adoption, and implementation of public policy.

Prerequisite(s)/Corequisite(s): Completion of a Master's degree in Public Administration or a related field, and permission of the instructor. Not open to non-degree graduate students.

PA 9300 KNOWLEDGE DEVELOPMENT AND USE IN THE PUBLIC SERVICE PROFESSION (3 credits)

This course will examine current issues in knowledge, development and use in the public service professions. Emphasis is placed on understanding various systematic research to effect social change.

Prerequisite(s)/Corequisite(s): Admission to doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9400 THE ENVIRONMENT OF PUBLIC ADMINISTRATION (3 credits)

The purpose of this course is to enable the doctoral student to understand the role and responsibility of public administration in the context of the broader political economy.

Prerequisite(s)/Corequisite(s): Admission to the doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9500 THEORIES OF NONPROFIT ORGANIZATIONS AND CIVIL SOCIETY (3 credits)

This seminar course focuses on the theories and context of nonprofit and voluntary organizations, philanthropy, and civic society. It is designed for Ph.D. students to increase their depth of knowledge in specific content areas, including historical, legal, social, political, economic, behavioral, religious, ethical, organizational, and critical theories. The purpose is to help students gain knowledge of theories and context related to nonprofit and voluntary organizations, philanthropy, and civic society; as well as develop other skills to improve as a scholar.

Prerequisite(s)/Corequisite(s): Admission to the doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9600 SEMINAR IN ADVANCED MANAGEMENT THEORY (3 credits)

This course examines how recent advances in management theory may be incorporated into the practice of public administration.

Prerequisite(s)/Corequisite(s): Admission to doctoral program and PA 8090 or permission of instructor. Not open to non-degree graduate students.

PA 9700 PUBLIC BUDGETING AND FINANCIAL THEORY (3 credits)

This seminar is focused on theoretical issues in public budgeting and governmental finance. The aim of the seminar is for the student to understand the central issues in public budgeting and finance, and the place of this field of study within public administration.

Prerequisite(s)/Corequisite(s): Admission to doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9800 ADVANCED RESEARCH DESIGN (3 credits)

This is a required course which will expose students to advanced topics in research methods in preparation for writing their doctoral dissertation. It will also apply advanced methodological techniques to problems in the field.

Prerequisite(s)/Corequisite(s): Admission to the doctoral program. Not open to non-degree graduate students.

PA 9900 ADVANCED TOPICS (3 credits)

This course provides a format for exploration of topics of interest to advanced students in public administration. Topics covered will change periodically in keeping with the interests of faculty and students. (Cross-listed with AVN 9900).

Prerequisite(s)/Corequisite(s): Admission to PhD program in Public Administration or permission of instructor. Not open to non-degree graduate students.

PA 9920 TEACHING AND PROFESSIONAL SKILLS WORKSHOP (1 credit)

The workshop offers training for a career in higher education. Instruction and practice in teaching includes creating and presenting lecture material, facilitating discussion, constructing syllabi, and related matters. Instruction in professional skills includes topics such as interviewing for positions, writing and publishing, and the tenure process.

Prerequisite(s)/Corequisite(s): Admission to Ph.D. program or permission of instructor. Not open to non-degree graduate students.

PA 9930 PHD RESEARCH & PROFESSIONAL SKILLS WORKSHOP (1 credit)

This one credit hour PhD workshop offers training and practice related to research and professional development to prepare for a career in higher education or another research-oriented career. Topics covered include developing a research design and proposal, applying for research funding, presenting research, publishing research, preparing to go on the academic or professional job market, and self-care/well-being.

Prerequisite(s)/Corequisite(s): Admission to the doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9950 QUANTITATIVE METHODS IN PUBLIC ADMINISTRATION (3 credits)

This course is designed to prepare the student to understand and apply advanced statistical methods needed in the design and analysis of public administration investigations. The major topics to be covered include research designs, nonexperimental research and specialized research designs, multiple linear regression, analysis of covariance, and logistic regression.

Prerequisite(s)/Corequisite(s): CRCJ 8030 or equivalent, PA 8050 or permission of the school. Not open to non-degree graduate students.

PA 9960 QUALITATIVE RESEARCH METHODS (3 credits)

This course is a doctoral seminar in the methods and practice of qualitative research. Advanced research design techniques, validity, mixed methodology, and qualitative research tools common to the practice of public administration are presented.

Prerequisite(s)/Corequisite(s): Admission to the doctoral program in public administration or permission of the instructor. Not open to non-degree graduate students.

PA 9970 DIRECTED RESEARCH IN PUBLIC ADMINISTRATION (3 credits)

This course offers a structure for doctoral students to conduct advanced research in their chosen area of specialization. (Cross-listed with AVN 9970).

Prerequisite(s)/Corequisite(s): Admission to Ph.D. program in Public Administration and permission of instructor. Not open to non-degree graduate students.

PA 9980 DIRECTED READINGS IN PUBLIC ADMINISTRATION (1-6 credits)

This course is designed to provide the advanced graduate student with the opportunity to do extended readings on a specialized public administration topic. (Cross-listed with AVN 9980).

Prerequisite(s)/Corequisite(s): Admission to the Ph.D. program in public administration and permission. Not open to non-degree graduate students.

PA 9990 DISSERTATION (1-20 credits)

The dissertation is an original research project conducted and written under the direction of a faculty dissertation committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge in public administration.

Prerequisite(s)/Corequisite(s): Admission to Ph.D. program in public administration. Admission to candidacy for Ph.D. degree. Prior to enrolling for dissertation hours, student must have permission from the chair of the supervisory committee. Not open to non-degree graduate students.

Public Administration, MPA

School of Public Administration, College of Public Affairs & Community Service

Vision Statement

The mission of the Master of Public Administration program is to strengthen the public service in a democratic and diverse society by educating students to manage and lead public and nonprofit institutions effectively, ethically and democratically.

Other Program Related Information

Fast Track Program

The School of Public Administration has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students with a major in Emergency Management from the UNO School of Public Administration, desiring to pursue a Master of Public Administration degree.
- Students should have senior status and must be within at least 30 undergraduate credits yet to complete their undergraduate degree. Exceptional students who do not meet this requirement may be considered.
- Students must have a minimum undergraduate GPA of 3.5.
- Students must complete the Fast-Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course

- Students will work with their undergraduate advisor to register for the graduate courses.
- Students must consult with the MPA advisor prior to enrollment in one of the courses listed below.
- A minimum cumulative GPA of 3.5 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the MPA program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - For this program, if students maintain at least a grade of B+ in courses taken, they will be recommended for admission to the MPA program.
 - The admit term must be after the completion term of the undergraduate degree.

The following courses may be taken under the Fast-Track program:

- PA 8050: Foundations of Public Service
- PA 8090: Organizational Theory and Behavior
- PA 8100: Advanced Management and Leadership for Public and Nonprofit Organizations (Note: This course may only be taken if both PA 8050 and PA 8090 are completed).

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Fall 2022, Spring 2022)

- Fall: June 1
- Spring: October 1
- Summer: NA

Other Requirements

- The general prerequisite for admission to the MPA program is a four-year bachelors' degree with a minimum 3.0 GPA in the junior and senior years (last 50-60 credit hours)
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose/Admissions Essay:** The essay should be two to four pages (doubled-spaced) and answer the following questions:
 - Please tell us about the factors in your background that will help us understand your interest in a profession in the public or nonprofit sectors.
 - What are your professional goals? Ten years from now, what do you hope to be doing professionally?
 - How can an MPA from UNO help you to achieve these goals?
- **Resume**
- **Letters of Recommendation:** Two letters of recommendation are required

Generally, students will be admitted unconditionally if they have a strong undergraduate record, demonstrate good communication skills in their

admission essay, receive favorable recommendations, and have goals consistent with the mission of the MPA program.

Degree Requirements

Public Administration, PhD

School of Public Administration, College of Public Affairs & Community Service

Vision Statement

The PhD in public administration program creates a supportive, collaborative, and rigorous environment for students to develop their intellectual identities and a comprehensive understanding of the field and a range of research traditions. Our students and alumni make significant contributions to theory, policy, research, and practice towards enhancing a democratic society. We value intellectual openness, collaboration, diversity, and excellence.

The PhD program in public administration is a research degree with a focus on public and nonprofit administration and management in a democratic and diverse society. It is the terminal degree for research and theory development.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Fall 2022)

- For applicants seeking a funded graduate assistantship: January 15
- For all other applicants: March 15

Other Requirements

- An earned master's degree in public administration or related field from an accredited institution.
- Generally, the target master's degree level GPA is above 3.20 (on a 4.0 scale).
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 557, Internet-based TOEFL 90, IELTS: 6.5, PTE: 61, Duolingo: 110
 - Applicants are expected to demonstrate the ability to communicate orally and in writing in a manner sufficient to compete effectively at the doctoral level.
- **Statement of Purpose:** A five-page statement of intent describing the applicant's goals in pursuing a PhD and plans after completion of the PhD, research interests and desired area of specialization offered in the PhD program, discussion of school faculty with whom the applicant would like to work related to research interests, and an explanation of academic and professional backgrounds preparing the applicant to pursue a PhD.
- **Writing Sample:** An academic or professional writing sample is required. This can be, for example, a term paper, thesis, conference paper, evaluation report, or published work.
 - Include a separate 1-page abstract that summarizes the contents of the writing sample. If applicable, please include an explanation of your contribution if the work submitted is multi-authored.
- **Resume:** The resume or CV will be examined to assess an applicant's professional work experience and/or extracurricular activities while attending school. Additionally, resumes are examined to assess an applicant's potential ability to understand and do research on the context and practice of contemporary public administration.
- **Letters of Recommendation:** Three letters are required. At least two recommendations must be from academics such as current or

former professors. The Office of Graduate Studies will contact each recommender via email to obtain the letters.

- Applicants who have completed any undergraduate or graduate coursework at international higher education institution(s), for the purpose of having your application reviewed by the School of Public Administration, you may submit a copy of your unofficial transcripts, in addition to all other application materials. Should the department wish to make a recommendation for admission, you will be required to have a course-by-course transcript evaluation completed by WES, ECE, or Educational Perspectives prior to your admission being formally reviewed and processed by the Office of Graduate Studies.
- Students are responsible for additional information found on the PhD in Public Administration website.
- The doctoral program committee reviews student academic preparation, specifying appropriate courses that must be taken as prerequisites to doctoral study. Except for those who have completed an MPA degree, new doctoral students may be required to first complete MPA course prerequisites or reading prior to enrolling in 9000-level core or research courses.

Degree Requirements

Required Courses Summary

92 hours of graduate credit hours beyond the baccalaureate degree. This includes 21 hours of core courses, 12 hours of research courses, six hours of specialization courses, two 1-hour workshops on teaching and research skills, 15 hours of dissertation coursework, and 36 hours of additional graduate-level coursework. The 36 hours of additional graduate-level coursework may be earned from an accredited institution toward a Master of Public Administration degree or a master's degree (MA or MS) in a related academic discipline or field.

Public Administration, MPA and Social Work, MSW (MPA/MSW)

School of Public Administration and Grace Abbott School of Social Work, College of Public Affairs & Community Service

Vision Statement

The MPA/MSW dual degree program is a collaborative effort between the University of Nebraska at Omaha (UNO), Grace Abbott School of Social Work and the School of Public Administration. This program offers interdisciplinary preparation in the fields of social work and public administration leading to the master of social work and the master of public administration degrees, with fewer required credit hours than it would take to obtain these degrees independently.

The program prepares students to provide a variety of advanced direct and indirect social work services and assume leadership in the public service sector, specifically in administrative and policy work with governmental units and nonprofit organizations.

Students beginning the MPA/MSW program at the MSW Foundation level must complete 81 credit hours total. Students beginning the MPA/MSW program at the Advanced Standing level must complete 57 credit hours total.

Progress Review

The doctoral program committee will conduct a review of student progress each year. The committee will make such recommendations as appropriate to the student's advisor. As part of the review, students will be required to submit a summary of annual progress and plans.

Field Examination

Following completion of coursework, doctoral students take the field examination, which includes two questions: one comprehensive and one related to the student's specialization. The field exam is given in open-book format over two days, eight-hours each day. The field exam testing period is in August (about one week before the fall semester starts) each year.

Degree Candidacy

Students who have successfully passed the required coursework in their program of study and the field examination apply for Admission to Candidacy for the Doctoral Degree. This application requires majority consent of the student's supervisory committee, the doctoral program committee, and the dean for Graduate Studies.

After admission to degree candidacy, the student must maintain continuous enrollment until they receive the degree. The School monitors this enrollment. Students not in residence must register for a minimum of one semester credit hour of dissertation research. Failure to register during each academic semester will result in termination of the candidacy. Per Graduate College policy, if the term of candidacy is extended beyond three years (excluding summer terms), the candidate must pass another examination.

Dissertation

The dissertation represents an original contribution to knowledge development in the field of public administration. Following successful completion of all coursework and field exams, doctoral students apply for candidacy for the degree and then defend a dissertation proposal before their supervisory committee. Following successful defense of the proposal, students work under the guidance of their supervisory committee chair until the project is complete. Two readers from the student's supervisory committee then review the entire document and may recommend further work or changes. After the committee chair and readers agree that the dissertation is ready for defense, the student schedules a public defense.

The time limit on granting the PhD in public administration degree is eight (8) years from the time of filing the plan of study in the Office of Graduate Studies

Quality of Work Standards

Doctoral students are expected to do work of high caliber. Failure to maintain quality of work standards may result in probation or dismissal from the program. Reasons for probation or dismissal may include:

Program Website (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/public-administration/academics/mpa-dual-degree-msw-mpa.php>)

Other Program Related Information

- The Master of Social Work (MSW) program prepares students for advanced social work practice. Master's level social workers are employed in public and private agencies, including medical settings, schools, residential treatment centers, court and correctional agencies, and community planning and development agencies. Their activities and interventions are designed to promote a more effectively-functioning society as it struggles to "provide for the general welfare," as well as to help people, families, groups and institutions within that society achieve self-fulfillment.
- The MSW degree at the Grace Abbott School of Social Work is accredited by the Council on Social Work Education (CSWE), the national accrediting body for all social work education.
- Information on certification and licensure is available on the Nebraska Department of Health and Human Services website (<http://dhhs.ne.gov/Pages/default.aspx>).

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Fall 2022)

- Fall: January 15

Note: If admitted to the Master of Social Work program and you wish to become a dual degree MSW/MPA student you will need to adhere to the MPA deadline date which is **June 1**(fall) or **October 1** (spring).

Other Requirements

- The general prerequisite for admission to the program is a four-year bachelors' degree with a minimum of a 3.0 GPA (on a 4.0 scale) in the junior and senior years (last 50-60 hours).
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL, 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** Two statements of purpose are required; one for the School of Public Administration and one for the Grace Abbott School of Social Work
 - For Social Work, the statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, and should be no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.
 - Why have you chosen social work? Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.

- Social work is a values-based profession dedicated to mitigating inequality and enhancing human wellbeing, especially for vulnerable, marginalized, and oppressed populations. From the core values and ethical principles identified in the NASW Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>), identify and discuss one that resonates with you and one that may challenge you.
- Social workers are self-reflective, strengths-based, and growth-oriented. Identify a strength that you possess and an area for growth. Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.
- The social work profession is rooted in social justice. Social workers adopt a stance of cultural humility and strive towards cultural awareness. Discuss a time when you realized that one of your personal or cultural identities influenced your reaction to a social situation. Reflecting on that experience, how might it influence your future social work practice?
- If you have a compelling autobiographical story relevant to your application, but that falls outside of the items addressed within the statement, you may add a letter to the Admissions Committee. Your letter will be considered, but will not be scored.
- For Public Administration, the essay should answer the following questions:
 - Please tell us about the factors in your background that will help us understand your interest in a profession in the public or nonprofit sectors.
 - What are your professional goals? Ten years from now, what do you hope to be doing professionally?
 - How can this dual degree from UNO help you achieve these goals?
- **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:
 - Educational experiences since high school
 - List start and end dates with month and year
 - Identify whether the position is part or full-time
 - Identify whether the position is paid or volunteer
 - Field placements, internships or practicums
 - Honors or distinctions received
 - Professional experiences, especially in human services
- **Letters of Recommendation:** Three letters of recommendation are required. Recommendation requests are generated from your online application. The recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past three years, at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.

The MSW **Foundation Program** is a 63 credit hour program available to applicants who do **not** hold a BSSW degree from an accredited school of social work within the last 10 years.

The MPA/MSW **Advanced Standing Program** is a 57 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work within the last 10 years.

Public Administration, MPA and Management Information Systems, MS (MPA/MIS)

School of Public Administration, College of Public Affairs & Community Service, Department of Information Systems & Quantitative Analysis, College of Information Science & Technology

Vision Statement

In government and non-profit organizations, there is a significant need and a long-term demand for persons with advanced skills in information management technology. The primary purpose of this dual degree option is to prepare students to manage and lead organizations in the future. To meet this need, the School of Public Administration and the College of Information Science & Technology offer the option to complete both the MPA and the MS in MIS degree jointly by completing 54-57 hours of course work beyond foundation requirements. This joint degree program is designed for dedicated students who are able to successfully complete graduate intensive study from two perspectives—public administration and management information systems—while achieving a synergy between the two fields. As such, the program involves graduate coursework in both public administration and information systems, with integrative experiences that will attain the desired synergy. Students interested in this option will work closely with a faculty mentor to develop an integrated plan of study at an early stage.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022 and Fall 2022)

- Fall: June 1
- Spring: October 1

Other Requirements

- The general prerequisite for admission to the program is a four year bachelors' degree with a minimum of a 3.0 GPA of the junior-senior year (last 50-60 credit hours).
- **Entrance Exam:** An entrance exam is required for those who do not have a baccalaureate or equivalent degree from an institution of higher education in the United States. Submit GMAT or GRE scores with at least these minimum scores:
 - GRE Verbal: 144, GRE Quantitative: 148, GMAT: 500
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 563, Internet-based TOEFL: 85, IELTS: 6.5, PTE: 58, Duolingo: 105
- **Statement of Purpose**
- **Writing Sample:** From work or previous academic experiences. Alternatively, if you do not have a writing sample, please submit a two page double-spaced word processed essay that addresses the following two topics:
 - Your unique personal qualities and life experiences that distinguish you from other applicants to our graduate program
 - Two accomplishments that demonstrate your potential for success in the graduate program
- **Resume:** Indicate your work experience and background
- **Letters of Recommendation:** Two letters of recommendation are required
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
 - *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

Degree Requirements

MPA/MIS Foundation Courses

A student must have completed some basic courses either as an undergraduate student or prior to enrolling in the first MS in MIS course. Students may start MPA courses while completing the MIS foundation courses.

Code	Title	Credits
Six hours of programming coursework or equivalent experience:		6
CYBR 2980	SPECIAL TOPICS IN CYBERSECURITY	1-3
ISQA 3900	WEB APPLICATION DEVELOPMENT	3
One semester of undergraduate information systems, or:		3
ISQA 8030	INFORMATION SYSTEMS AND ETHICS	
One semester of undergraduate statistics, or:		3
CIST 2500	INTRODUCTION TO APPLIED STATISTICS FOR IS&T	
Select one of the following:		3-6
ISQA 8040	AN OVERVIEW OF SYSTEMS DEVELOPMENT	
ISQA 4110 & ISQA 4120 & ISQA 3310	INFORMATION SYSTEMS ANALYSIS and SYSTEM DESIGN AND IMPLEMENTATION and MANAGING THE DATABASE ENVIRONMENT

MPA/MIS Exit Requirements

Capstone Option

MPA Capstone Course:

Code	Title	Credits
PA 8990	CAPSTONE PROJECT IN PUBLIC ADMINISTRATION	3

The MPA Capstone Course is taken at the end of the program, with no more than nine credit hours remaining. All Public Administration core classes must be completed prior to taking the Capstone Course.

MIS Capstone Course:

Code	Title	Credits
ISQA 8950	CAPSTONE MANAGEMENT INFORMATION SYSTEMS	3

Six credit hours or fewer may be left in the program. All MIS core courses must have been completed.

Thesis Option

To take this option, a student will be required to enroll in six hours of thesis credit.

Code	Title	Credits
ISQA 8990	THESIS	6

The thesis must be in an area that relates to both the public administration and information systems domains.

Total Credit Hours: 57

Public Management Certificate

School of Public Administration, College of Public Affairs & Community Service

Vision Statement

The purpose of the certificate in public management is to allow working professionals with careers in the public sector or graduate students in a related field of study (such as political science or city and regional planning) to expand their educational background and to enhance their knowledge in the area of public management. The graduate certificate is designed to extend students' understanding of theory and practice in the field of public management.

Nonprofit Management Certificate

School of Public Administration, College of Public Affairs & Community Service

Vision Statement

The purpose of the certificate in nonprofit management is to allow working professionals with careers in the nonprofit sector, or graduate students in a related field of study, to expand their educational background and to enhance their knowledge in the area of nonprofit management. The graduate certificate is designed to extend students' understanding of theory and practice in the field of nonprofit management.

Program Contact Information

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022 and Fall 2022)

- Fall: June 1
- Spring: October 1
- Summer: NA

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Writing Sample:** The writing sample should be an essay as described in the application

- **Resume:** Submit a resume including work history
- **Letters of Recommendation:** Two letters of recommendation are required

Degree Requirements

Degree Requirements

Secondary Education, MS

Department of Teacher Education, College of Education, Health, and Human Sciences

Vision Statement

Designed for those teaching in secondary schools across a variety of curricular areas, the secondary education program offers an integrated approach to developing the skills and dispositions needed for today's educational environments. Graduate students choose a program of study that explores content and pedagogy and that also supports their professional goals and standards of practice.

The program is specifically designed around the pillars of:

- Implementing **culturally responsive teaching practices**
- Engaging in **research** and **assessment** to inform instructional decision making
- Applying **theoretical frameworks** to guide teaching
- Using sound **digital pedagogy**

Program Website (<http://www.unomaha.edu/college-of-education/teacher-education/graduate/secondary-education.php>)

Other Program-Related Information

The master's degree in secondary education does not lead to initial teacher certification.

Unclassified Students

Students who are not planning to pursue a program leading to a graduate certificate or a master's degree can be admitted to secondary education with unclassified status. Candidates holding a previous master's degree in education who are seeking additional teaching endorsements may wish to choose an unclassified status. Unclassified students are allowed to take courses for which they meet the prerequisite. Successful completion of graduate courses as an unclassified student does not obligate the department to accept those courses for credit toward the fulfillment of degree requirements. Formal advisement in an endorsement area is required.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: August 1
- Spring: December 1
- Summer: June 1

Other Requirements

- A minimum undergraduate GPA of 3.0 (on a 4.0 scale).
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- A valid teaching certificate **or** application to a program that leads to certification (e.g. Teacher Academy Project concentration).
- UNO College of Education, Health, and Human Science's "Personal and Professional Fitness" form
- International students who do not intend to teach in the U.S. **may** be eligible for admission.

Degree Requirements

The Master of Science in secondary education requires 36 hours of graduate level courses in four areas:

- Research
- Assessment
- Culturally responsive teaching
- Theoretical frameworks for effective teaching

Code	Title	Credits
Concentrations		
Secondary education concentrations - The required courses for a Master of Science in secondary education vary by concentration. The courses for each concentration are determined in consultation with the concentration advisor.		33
Exit Requirement		
TED 8900	SECONDARY EDUCATION GRADUATE CAPSTONE (Exit requirement - Must receive a grade of B or better.)	3
Total Credits		36

Concentrations

Bilingual Education Concentration

TED 8000 SPECIAL STUDIES (1-3 credits)

A series of intensive studies especially for in-service teachers scheduled as regular seminars or classes, according to purpose.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8006 SPECIAL METHODS IN THE CONTENT AREA (3 credits)

This course is designed to develop knowledge, skills, and dispositions requisite of teachers. Course content is determined by the discipline area. For some content areas a field experience will be required. This is an in-school, guided practicum completed in conjunction with TED 4000 math, science, language arts, world languages, Business, Information Technology, ESL and social studies sections. Candidates must demonstrate competencies related to performance in 7-12 classrooms. This is the final practicum experience prior to the clinical practice semester. (Cross-listed with TED 4000).

TED 8010 INTRODUCTION TO RESEARCH (3 credits)

This course will introduce advanced degree candidates to: A) An understanding of the scientific method as applied to behavioral research B) Assessment, evaluation, descriptive, causal-comparative, experimental and historical data gathering procedures and analytical strategies C) Sampling theory, techniques, distribution and hypothesis testing D) Specific designs, methods, and tools of research E) Search and retrieval of published research, both American and international (global), in the library and over the Internet F) Critical evaluation of research studies G) Basic statistics, both descriptive and inferential, and H) Preparation of a research proposal containing three chapters: Problem, Review of Related Research and Methodology.

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8030 SEMINAR IN EDUCATION: SPECIAL TOPICS (1-3 credits)

This is a variable content course focusing on topics of current relevance to PK-12 teachers.

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8040 SEMINAR ON STUDENT TEACHING/NEW TEACHER INDUCTION (3 credits)

The seminar is designed for experienced teachers who are, or may be, serving as cooperating teachers for student teachers or as mentor teachers for beginning teachers. Participants will study the purposes, techniques, and trends involved in serving as a cooperating teacher or as a mentor.

Prerequisite(s)/Corequisite(s): Successful teaching experience is required for this course.

TED 8050 DATA-DRIVEN DECISION MAKING FOR EDUCATORS (3 credits)

This course provides graduate students with hands-on experiences that model data-driven decision making for educational success in today's classroom. Students will learn how to create valid and reliable assessments; interpret test data; use data to identify student, classroom, program, and school needs; and in general, to systematically enhance educational decision making. In addition, students will experience activities that can be integrated into student lessons to help to deepen concept learning, and to build student data literacy. The course will use real data sets, in interesting, hands on and technology-rich activities to find the "educational story" represented by the data. (Cross-listed with STEM 8050).

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8055 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)

This course is designed to enhance candidates' understanding of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs) in the U.S. context.

As dedicated practitioners, reflective scholars, and responsible citizens, students will have knowledge of factors that contribute to an effective multicultural and multilingual learning environment. TED 3050 includes an in school, guided practicum. Candidates must demonstrate competencies related to teaching English Learners (ELs) in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education. (Cross-listed with TED 3050).

Prerequisite(s)/Corequisite(s): TED 2300 (EDUC 2010) OR TED 2380; and TED 2050.

TED 8060 CURRENT ISSUES AND TRENDS IN EDUCATION (3 credits)

The course is an advanced study of current issues and trends which have substantial impact on PK-12 education. The graduate candidates who take this class will read, analyze, and evaluate relevant research in order to become conversant in those issues.

Prerequisite(s)/Corequisite(s): Graduate status is required.

TED 8070 TEACHING MULTIPLE INTELLIGENCE (3 credits)

This course focuses on the utilization of the multiple intelligences (MI) theory by teachers to enhance children's understanding of various disciplines. Graduate candidates will have the opportunity to explore, evaluate, and develop various methodologies that foster understanding.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8080 STORYTELLING AND EDUCATION (3 credits)

This course is designed to consider the importance of storytelling, to provide teacher candidates with the background materials for storytelling, to study resource material for storytelling from a variety of cultures, and to develop techniques for storytelling. Actual experience in storytelling and opportunities for evaluating storytelling experiences will be provided.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8100 RESEARCH PROJECT (1-3 credits)

This course is designed for individual or group study and analysis of specific problems in schools dealing with curriculum and instruction in areas which have a broad scope of application rather than a specific level.

Prerequisite(s)/Corequisite(s): Approval of Advisor.

TED 8120 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)

TED 8120 is designed to enhance graduate candidates' knowledge of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs). As dedicated practitioners, reflective scholars, and responsible citizens, graduate candidates will learn strategies for designing and promoting effective multicultural and multilingual learning environments. This course includes an in-school, guided practicum through which graduate candidates must demonstrate competencies related to standards related to teaching ELs in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education's ESL teaching endorsement.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

TED 8130 LANGUAGE, CULTURE, AND POWER (3 credits)

This course will focus on the intersection of language, culture, and power in the schools. This seminar will research how each component impacts the students and teachers in the classroom.

TED 8150 ANTI-RACISM EDUCATION: PRINCIPLES AND PRACTICES (3 credits)

This course provides a theoretical analysis of race, racism and the implications for anti-racist education. In addition to exploring the key features of anti-racism education, the course also addresses other axes of oppression, namely, class and gender, with a critical focus on racialized power and privilege, and how such features function in the broader U.S. context as well as the schooling environment. Of equal importance is a critical interrogation of the historical, ideological, and political processes that produce and maintain racism. Course participants explore pedagogies, curriculum, and school leadership strategies as mechanisms for instituting anti-racism work in schools and community.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8160 ENGLISH AS A SECOND LANGUAGE STRATEGIES FOR PK-12 EDUCATORS (3 credits)

This course is designed to enhance graduate candidates' knowledge of PK-12 English as a Second Language (ESL) pedagogical and assessment strategies that address the needs of English Language Learners (ELs) in content area classrooms. As dedicated practitioners, reflective scholars, and responsible citizens, graduate candidates will be able to explore evidence-based pedagogical and assessment strategies to use in educational contexts serving ELs.

Prerequisite(s)/Corequisite(s): Graduate candidate status. Not open to non-degree graduate students.

TED 8170 DEVELOPMENTAL ASSESSMENT OF THE YOUNG CHILD (3 credits)

This course is designed as a survey of developmental assessment in early childhood education (ages birth to eight years). Selection of assessment tools and strategies, implementation, data collection, analysis of results, and teaching impact are addressed in context of key assessment purposes in the early childhood field.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8180 CULTURALLY RESPONSIVE TEACHING (3 credits)

This course includes an introductory analysis of the societal and institutional processes and problems which have bearing upon the education of children in urban settings. In addition, the course will focus on knowledge, skills and dispositions related to instructional strategies and classroom management needed for effective teaching in an urban environment.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8190 CONTEMPORARY ISSUES IN URBAN EDUCATION (3 credits)

This course is designed for candidates who wish to keep abreast of contemporary issues which confront the educational institution and teaching profession within the urban milieu.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8200 SOCIAL WORLDS OF THE YOUNG CHILD (3 credits)

This course will explore theoretical and cultural perspectives on the social and emotional development of young children. This course will also examine the relationship between social emotional development, guidance practices, democratic life skills, and school readiness.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8210 THE PRINCIPLES OF MULTICULTURAL EDUCATION (3 credits)

This course will develop practicing teachers' awareness of and skill in meeting the needs of P-12 students with regards to the areas of human understanding, acceptance and value. Candidates will examine existing attitudes towards various minority groups such as racial, ethnic, gender, exceptionality, etc. School materials and attitudes will also be examined in determining the effect they have on PK-12 students.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8220 PLAY AS A LEARNING MEDIUM IN EARLY CHILDHOOD EDUCATION (3 credits)

This course provides an in-depth examination of young children's play and its curricular role in the early childhood classroom. The origins, developmental outcomes, assessment, curricular implementation, and evaluation of play will be covered, with an emphasis on play as a major component of developmentally appropriate practice with young children. The focus is on teachers learning to help children become partners in the operation of the learning environment.

TED 8230 LITERATURE FOR THE YOUNG CHILD (3 credits)

Literature for the young child is examined through the lens of developmentally appropriate practice for informing educators' interactions with children and also for developing high-quality, literature-related projects of study across the early childhood (birth-through-age-eight) continuum.

Prerequisite(s)/Corequisite(s): Graduate Status.

TED 8240 FAMILY, SCHOOL, AND COMMUNITY PARTNERS (3 credits)

This course will examine the purposes and methods for developing family, school, and community partnerships. Candidates will explore characteristics of diverse families and develop the skills necessary for planning, design, implementation, and evaluation of effective partnerships in early childhood settings.

Prerequisite(s)/Corequisite(s): Graduate Status.

TED 8250 ASSESSMENT FOR CLASSROOM TEACHER (3 credits)

This course studies assessment principles, effective practices, and classroom assessment processes throughout the curriculum. The research regarding assessment for learning is studied and application is made to classroom practices.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8260 ADVANCED CURRICULUM IN EARLY CHILDHOOD (3 credits)

This course is designed to provide an in-depth examination of the processes used in selecting and implementing appropriate curricular content in programs for children ages three to eight years. Particular emphasis is on the role of the teacher as a dedicated practitioner and reflective scholar in the early learning environment.

TED 8270 TRENDS IN EARLY CHILDHOOD EDUCATION (3 credits)

This course provides a context for examining socio-political and research-based influences underlying trends in early childhood education at the local, national and international levels.

Prerequisite(s)/Corequisite(s): Graduate Status.

TED 8280 INTRODUCTION TO HUMAN RIGHTS IN P-12 EDUCATION (3 credits)

The course examines the intersection of human rights and P-12 education and prepares individuals to effectively work with and advocate for children and adolescents in educational settings. Students completing the course will be able to 1) demonstrate an increased understanding of fundamental human rights with a specific emphasis on education rights and the human rights of children and adolescents 2) create learning environments that elevate human rights in educational settings and 3) design developmentally appropriate instruction for children and adolescents on varied human rights topics.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8300 EFFECTIVE TEACHING PRACTICES (3 credits)

This course focuses on specific characteristics and behaviors of effective teachers. Course content will be derived from research on teaching and learning.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8310 HUMAN DEVELOPMENT - CONTEMPORARY IMPLICATIONS FOR TEACHING & LEARNING (3 credits)

This course examines human growth and learning from birth through late adolescence. It is designed to prepare teachers to synthesize information regarding developmental theory and subsequently apply this to lesson design and effective content-area pedagogy. Candidates will examine multiple frameworks related to the cognitive, social/emotional, and physical development of children and use those to analyze current educational practices in PK-12 schools. Cultural influences impacting human development and implications for educational practices will also be examined. The course will include field-based experiences.

Prerequisite(s)/Corequisite(s): Admission into a Teacher Education Department graduate program.

TED 8370 DATA VISUALIZATION AND MODELING FOR EDUCATORS (3 credits)

In the growing context of data informed decisions there is a need to answer "what if" questions in a variety of decision-making situations, as well as to display data both visually and interactively. This course will provide foundational skills in data visualization and modeling for educational decision making and instruction. It draws upon key fundamentals in data visualization (representing data trends visually) as well as key strategies in data modeling (interactive representations to explore possible outcomes). The course also explores the use of visualization and modeling technologies as well as assisting student learning with these tools. (Cross-listed with STEM 8370).

TED 8376 TEACHING AT THE MIDDLE LEVEL (3 credits)

This course will provide candidates with a variety of middle level teaching techniques and strategies in their classrooms that have been identified in current research literature as appropriate for the middle level. This course is designed to introduce candidates to the unique characteristics of the middle student, school, curriculum, history, and philosophy. (Cross-listed with TED 4370).

TED 8390 CLASSROOM MANAGEMENT IN PRACTICE (3 credits)

This course will provide graduate students with a survey of general classroom management methods for classrooms. Candidates will enhance their understanding of three basic components of effective pedagogy: 1) proactive classroom management, 2) high-impact instructional strategies that impact student engagement and learning, 3) behavior management techniques that incorporate practice, feedback, research, and reflection.

Prerequisite(s)/Corequisite(s): Graduate standing

TED 8410 IMPROVEMENT OF INSTRUCTION: SPECIAL TOPICS (3 credits)

This course provides an in-depth study of instructional theory, research, and methodology designed to extend teachers' professional knowledge base and enhance their pedagogical skills. When offered, a course may be limited to improvement of instruction in a selected subject area. (Cross-listed with STEM 8410).

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8420 TRENDS AND TEACHING STRATEGIES IN SCIENCE EDUCATION (3 credits)

This course is designed for the graduate candidate in the Department of Teacher Education whose study program emphasis is in the area of science education. The course will describe and analyze past and present trends in science education, including curricula, teaching-learning strategies, the laboratory and instructional materials. The course focus will be K-12 and as such is meant to serve both elementary and secondary graduate candidates. (Cross-listed with STEM 8420).

TED 8430 SCHOOL CURRICULUM PLANNING (3 credits)

This course is designed to provide advanced degree candidates with an understanding of the theory, principles, and practices utilized in curriculum planning in American schools. This course focuses on the principles and practices of effective curriculum planning and teachers' part in these processes as curriculum developers. (Cross-listed with STEM 8430).

TED 8470 TEACHING THE LANGUAGE ARTS (3 credits)

This course is designed to enhance candidates' knowledge of best practices in teaching reading, writing, listening, and speaking. Candidates will learn about research supported appropriate language arts instruction strategies and assessments. This course will inform graduate students as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

TED 8480 FOUNDATIONS OF BILINGUAL EDUCATION (3 credits)

This course is designed to give future and current teachers a thorough understanding of the theoretical, political, historical, and practical foundations of bilingual/multicultural education in the United States. As dedicated practitioners, reflective scholars, and responsible citizens, graduate students will have knowledge of factors that contribute to effective multilingual and multicultural learning environments that promote individual and societal bilingualism. Advanced Spanish language proficiency required.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8490 SPANISH LANGUAGE ARTS (3 credits)

This course is designed to reinforce first and second language acquisition theory as it relates to dual immersion settings. Best practices for developing and reinforcing bilingualism and biliteracy are presented and used for planning and delivering instruction. Spanish fluency is required for the course.

Prerequisite(s)/Corequisite(s): Graduate status required for graduate students pursuing the bilingual education endorsement and concentration (does not lead to a Nebraska Department of Education teaching endorsement). Advanced Spanish language proficiency required.

TED 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)

This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with AVN 8510, STEM 8510).

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8520 SCHOOL LIBRARY CAPSTONE (3 credits)

Candidates will gain direct experience and an understanding of the theories, concepts and activities integral to public services, technical services, and the administration in a 21st Century library and information agency at an assigned field site. Candidates will demonstrate the ability to plan, develop, and implement programming and services for patrons and diverse learners in their schools and communities.

Prerequisite(s)/Corequisite(s): There are no course prereqs for the Capstone Practicum but candidates must be in the final 2 semesters of their library media program & must complete an application for the Practicum the semester prior to their practicum. Not open to non-degree grads.

TED 8530 INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS (3 credits)

This course is designed to provide graduate candidates with the opportunity to enhance interdisciplinary instructional strategies, curricular understanding, and lesson preparation in the areas of science, technology, engineering, the arts, and mathematics (STEAM) through analysis and reflective practices in STEAM. This course provides hands-on experiences that model STEAM integration techniques, including how to effectively engage with community agencies and partners to bring STEAM into the classroom. This course emphasizes not only the technical aspects of STEM, but also the creativity and innovation that arts integration can add to enhance STEM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. (Cross-listed with STEM 8530).

Prerequisite(s)/Corequisite(s): This course includes both teacher education and STEAM related topics and therefore fits into both TED and STEM program coursework.

TED 8540 DIGITAL CITIZENSHIP (3 credits)

The course explores key concepts of Digital Citizenship pertaining to digital law, digital ethics, digital interaction, digital literacy, and cyber-security. The course addresses an educator's role as technology leader in both policy and practice to establish a responsible and robust digital learning community in P-12 schools.

Prerequisite(s)/Corequisite(s): Graduate Standing/Status

TED 8550 TECHNOLOGY FOR CREATIVE AND CRITICAL THINKING (3 credits)

Technology for Creativity and Critical Thinking investigates the use of visual media tools in P-12 digital learning environments. This course provides candidates an opportunity to develop leadership skills and dispositions relevant to advocacy initiatives addressing policy and best practice in the use of technology in P-12 schools.

TED 8560 TECHNOLOGY FOR DIVERSE LEARNERS (3 credits)

This course will engage candidates that facilitate the use of instructional technology, pedagogy, and strategies to better meet the needs of diverse learners. Candidates will explore categories of diverse learners relevant and specific to their own organizations and learning environments to ensure candidates can effectively research and implement assistive technology, instructional technology, and applications to enhance learning opportunities for children and youth.

TED 8570 INTERNET IN THE LEARNING PROCESS (3 credits)

This course is designed to help educators actively explore instructional implementations of Internet use appropriate for use in K-12 classrooms, successful diffusion of Internet innovations in educational environments, and emerging multicultural "breaking down the walls of the classroom" concepts available to educators through Internet use.

TED 8580 ONLINE TEACHING AND LEARNING (3 credits)

Online Teaching and Learning is a course for education professionals that investigates the use of online tools for planning, preparing and assessing student learning in a digital environment. The course will prepare candidates to provide leadership for digital initiatives within learning organizations. The course encourages educators to explore methods of virtual lesson delivery and online assessment through direct instruction and online study.

Prerequisite(s)/Corequisite(s): Graduate Admissions status

TED 8590 TEACHING AND LEARNING IN DIGITAL ENVIRONMENTS (3 credits)

This course is an introduction to future-ready information and instructional technologies for use with children and youth. Course will cover a diverse array of technical literacies that serve as content and skill goals for today's children and youth in P-12 schools and other learning organizations.

TED 8610 TEACHING OF WRITING THROUGHOUT THE CURRICULUM (3 credits)

This course is designed to enhance candidates' knowledge of best practices in teaching writing. Candidates will learn about research supported appropriate writing instruction strategies and assessments. Candidates will be writing extensively throughout the course as they examine the varied ways writing genres extend throughout the curriculum. This course will inform candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8620 ADVANCED SUPPORT OF INSTRUCTIONAL TECHNOLOGY ENVIRONMENTS (3 credits)

This course is designed for P-12 educators who wish to become better advocates of technology integration or become technology coordinators or school technicians. Course enrollees will evaluate and implement advanced strategies to keep technology up to date, effectively use technology, and properly manage technology in a school setting.

TED 8650 CHILDREN'S LITERATURE AND EDUCATION (3 credits)

Candidates in this graduate course will explore story, poetry, drama, and informational materials for elementary students with an emphasis on methods for including literature in school curricula with an awareness of diverse children's lives, discourses, and understandings. Examines current issues, recent materials, and the theoretical and research base of this field to develop meaningful and creative learning, literacy, and library experiences for children.

TED 8660 YOUNG ADULT LITERATURE (3 credits)

This course extends candidates' knowledge of literature for young adults. The course addresses current trends in the genre and engages candidates in activities that support pedagogies in basic, visual, information and cultural literacies.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8695 LITERACY AND LEARNING (3 credits)

This course examines ways in which reading and writing can facilitate student learning in content areas studies (e.g., science, social studies, physical education, art, music, and math). The main focus is on teaching practices that engage students and contribute to their learning, integrating their background knowledge and cultural experiences with content area literacy. (Cross-listed with TED 3690).

TED 8700 ELEMENTARY EDUCATION CAPSTONE COURSE (3 credits)

This course is designed as a required, final capstone course for Elementary Education graduate students to be taken in the last nine hours of the Master of Science program. A grade of B or better must be received in TED 8700 to show satisfactory completion of the course and for program completion.

Prerequisite(s)/Corequisite(s): Permission of the Elementary Education Program Chair. Not open to non-degree graduate students.

TED 8710 RESEARCH AND INQUIRY (3 credits)

Candidates will demonstrate an understanding of the theories, concepts and activities integral to reference resources and services in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of effective search strategies and efficient use of both print and digital resources, design and promote information literacy instruction that is developmentally appropriate, and understand the legal and ethical responsibilities integral to positive and proactive reference services for patrons and diverse learners.

TED 8720 INTRODUCTION TO INSTRUCTIONAL COACHING IN PK-12 EDUCATION (3 credits)

This course examines the prominent coaching models used in PK-12 schools (i.e. teacher-centered coaching, student-centered coaching, cognitive coaching, transformational coaching). Candidates completing this course will be able to: develop an understanding of best practices in coaching, create a common lexicon for the role of an instructional coach, engage in the coaching cycle, and create a personal vision for their work as a coach. Candidates will engage in a field based experience to apply their learning.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8726 SPECIAL LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the major types of 21st Century special libraries and information agencies. Candidates will demonstrate an understanding of social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the special libraries and information agencies. (Cross-listed with TED 4720).

TED 8740 ORGANIZATION OF INFORMATION (3 credits)

This course addresses current theory and best practice in descriptive and subject cataloging and classification of information resources that align with school library standards and guidelines. Candidates will demonstrate the ability to integrate the legal and ethical standards of their discipline in ensuring access to information and ideas for a diverse array of learners in schools and communities.

TED 8746 ORGANIZATION OF INFORMATION (3 credits)

Candidates will demonstrate a basic understanding of the theories, concepts and activities of descriptive and subject cataloging and classification procedures of information resources in 21st Century libraries and information agencies.

TED 8760 MANAGING COLLECTIONS IN LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the theories, concepts and activities integral to proactive collection management in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of community analysis, collection analysis, and the ability to conduct critical evaluations of a diverse array of information resources.

TED 8770 INTEGRATING TECHNOLOGY INTO INSTRUCTIONAL DESIGN (3 credits)

The purpose of this course is to introduce participants to effective methods for the integration of educational media into instructional design and provides participants (1) knowledge of broad instructional design theories and models with a concentration on constructivism, (2) experience in designing instruction that effectively integrates technology into the teaching-learning process, and (3) experience in producing instructional media. The course is intended to provide fundamentals in the selection, evaluation, production, application and utilization of educational media. This course is designed for in-service library media or instructional technology specialists as well as regular classroom teachers.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8800 MULTICULTURAL LITERATURE FOR CHILDREN AND YOUTH (3 credits)

This is designed as a graduate-level course dealing with utilization of literary materials representing authors and content from multiple perspectives, particularly authors whose cultural and ethnic backgrounds differ from the mainstream.

TED 8810 STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH (3 credits)

This course will explore theoretical and foundational pedagogical strategies in early childhood education used to deliver integrative STEM education in the preK-12 setting. In order to understand the research and practice of STEM disciplines in preK-12, it is necessary to examine the social, cultural, political, and functional aspects that influence them. Candidates will investigate the nature of STEM education, Early Childhood Education (ECE) pedagogy and perspectives of learning, content knowledge and dispositions for educators of STEM topics, and issues of access and equity for STEM education through literature, discussion, and practice. This course includes a community outreach component in which candidates will use qualitative methods to observe class topics in public settings. (Cross-listed with STEM 8810)

Prerequisite(s)/Corequisite(s): Graduate status

TED 8816 PRINCIPLES AND PHILOSOPHY OF INTEGRATING CAREER AND ACADEMIC EDUCATION (3 credits)

This course presents the philosophies and principles/practices underlying how schools can better prepare students for the workplaces of the future with emphasis on the integration of career education within broader academic preparation. The roles and responsibilities of teachers, counselors, and administrators in implementing integrated approaches will be examined. (Cross-listed with TED 4810).

TED 8820 CAPSTONE IN STEM EDUCATION (3 credits)

This course will prepare graduate students for the integration, articulation, and differentiation of curriculum and instruction in and between the STEM core areas of Science, Technology, Engineering, and Mathematics. Special emphasis will be on using the STEM core content to help provide applications and context to existing science and mathematics curriculum and instruction and on providing leadership in developing curriculum for mathematics and science dependent courses in engineering and technology.

Prerequisite(s)/Corequisite(s): The student must be enrolled in one of the following concentrations: STEM, mathematics, science, technology; and be enrolled in the last six hours of their program of study. Not open to non-degree graduate students.

TED 8830 LEADERSHIP AND MANAGEMENT IN SCHOOL LIBRARIES (3 credits)

The course explores best practice for effective leadership and management of 21st Century school libraries. Candidates will gain a comprehensive knowledge of the theories, policies and processes involved in directing a school library in support of the personal and academic success of P-12 students. Candidates will explore and employ ethical codes of conduct in their profession to ensure school libraries meet the needs of their diverse array of patrons.

TED 8840 ENGINEERING EDUCATION EXTERNSHIP (3 credits)

This graduate course will address the best practice of effective teaching and learning in Engineering Education through professional collaboration between K-12 STEM (Science, Technology, Engineering, and Mathematics) teachers and practicing engineering professionals. K-12 STEM teachers, as graduate students in the course, will learn about and address real-world applications and career opportunities in STEM education through the externship. K-12 STEM teachers will research and develop authentic, experiential learning opportunities and projects for the classroom through course supports associated with lecture, discussion, and partnerships with practicing engineering professionals. The externship will be integral to the K-12 STEM teachers' experiences and work in this course, as the course models effective professional collaboration founded on experience, knowledge, and skills to achieve a curriculum enhancement goal. (Cross-listed with STEM 8840).

Prerequisite(s)/Corequisite(s): Graduate status. Not open to non-degree graduate students.

TED 8850 PROFESSIONAL COLLABORATION (3 credits)

This course is designed to prepare candidates to work in collaboration with other professionals and parents to create a learning environment that enhances the potential for academic success and improvement of instructional practices. The focus will be on collaborative problem solving. (Cross-listed with SPED 8980).

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

TED 8856 COORDINATION TECHNIQUES IN WORK-BASED LEARNING (3 credits)

This course reviews responsibilities and techniques of coordination for the work-based learning teacher-coordinator and/or work-based learning coordinator, with special emphasis on administration of the part-time cooperative program and analysis of the laws and regulations governing this program. (Cross-listed with TED 4850).

TED 8860 INVENTION & INNOVATION IN ENGINEERING EDUCATION (3 credits)

This course will address emerging trends in STEM education for in-service K-12 STEM teachers with a focus on the use of engineering education practices in teaching and learning content. STEM teachers will receive applicable, hands-on, classroom-ready experiences through lecture, professional instruction, and projects that will emphasize product design and creation through the Engineering Design Process. The Engineering Design Process will be central to the candidates' experiences in this course and will be used by the candidates to develop curriculum utilizing emerging trends to supplement current course content and standards. Interdisciplinary planning will be central to the course. (Cross-listed with STEM 8860).

Prerequisite(s)/Corequisite(s): Graduate status is required.

TED 8880 LEADERSHIP IN EARLY CHILDHOOD EDUCATION (3 credits)

This course seeks to prepare candidates with leadership skills in the early childhood field that will empower them to initiate and implement changes in programs serving young children and families. Candidates will explore and apply frameworks of leadership and analyze policy, governance, and power structures that can impact change. Candidates will also learn effective advocacy skills to positively influence policies and practices in program and governance structures. Lastly, candidates will examine approaches for developing new leaders in early childhood education through reflective supervision and mentorship.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8900 SECONDARY EDUCATION GRADUATE CAPSTONE (3 credits)

The Secondary Education Graduate Capstone course provides candidates with an opportunity to apply the knowledge, skills, and dispositions acquired during their program to content specific synthesis activities in their respective disciplines. Candidates will demonstrate their ability to integrate information from program coursework in the design, development and presentation of a final capstone project related to teaching and learning in 21st Century educational environments.

Prerequisite(s)/Corequisite(s): 30 credit hours towards degree completion; Permission required by Program Advisor. Not open to non-degree graduate students.

TED 8970 INDEPENDENT STUDY (1-3 credits)

This is a specially designed course taken under the supervision of a graduate faculty member to accommodate the student who has identified a focus of study not currently available in the departmental offerings and who has demonstrated capability for working independently.

Prerequisite(s)/Corequisite(s): Permission of Department and Graduate Faculty member.

TED 8980 PRACTICUM: VARIOUS CONTENT AREAS (1-6 credits)

This course is designed to provide school professionals with a guided, supervised, field experience that will develop and enhance the knowledge, skills, and dispositions requisite of a successful educational practitioner.

Prerequisite(s)/Corequisite(s): Prerequisites for the course will vary, depending on the content/discipline area. See syllabus for specific discipline area.

TED 8990 THESIS (1-6 credits)

This course is an independent research project completed under the direction of a thesis advisor and required of all candidates pursuing a Master of Science with Thesis option.

Prerequisite(s)/Corequisite(s): Completion of Selective Retention and approval of advisor. Not open to non-degree graduate students.

TED 9100 THEORIES, MODELS, AND PRACTICES OF LITERACY (3 credits)

This course develops a framework about the theories, models, practices, processes, and related research associated with literacy. The content looks across grade levels and student populations, and across social and cultural contexts in an examination of factors that impact theories and processes of literacy.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 9110 PRINCIPLES AND PRACTICES FOR TEACHING READERS (3 credits)

This graduate course for both elementary and secondary teachers is open to any candidate who has graduate standing in education. The purpose of the course is to develop a broad understanding of the reading process as well as materials and instructional strategies that support students who are emerging, developing, and maturing as readers in all areas of the curriculum.

TED 9130 ASSESSMENTS AND INTERVENTIONS - ELEMENTARY (3 credits)

This course is designed for graduate candidates enrolled in the Literacy Masters or Reading Specialist endorsement program. The purpose of this course is to develop an understanding of theory and research as it relates to assessment and evaluation and instructional approaches that support reading development. This knowledge is applied through a practicum experience with elementary students in which candidates integrate knowledge and practices related to assessment and evaluation of readers' strengths and needs.

TED 9140 ASSESSMENT AND INTERVENTION - SECONDARY (3 credits)

This course is designed for graduate candidates in literacy endorsement and Master's programs. The purpose of this course is to develop an understanding of theory and research as it relates to assessment and evaluation and instructional approaches as they relate to reading difficulties among middle and high school students. Included in this course is knowledge about the role and responsibility of a literacy leader as it relates to coaching, mentoring, supervision, and evaluation of a reading program. Application of this information is demonstrated through a practicum experience with middle and high school students.

Prerequisite(s)/Corequisite(s): TED 9100; TED 9110 concurrent with, or prior to TED 9140.

TED 9180 LITERACY RESEARCH SEMINAR (3 credits)

This course will develop advanced degree candidates' understanding and ability to critically examine current literacy research through work with (1) scientific methods of quantitative and qualitative research (2) discussion of historical trends in literacy research, (3) designs, methods, and tools of research, and (4) reviewing and critically examining current research studies in literacy. These examinations will be conducted from the perspectives of knowledge about literacy processes, classroom practice, and influence of previous research results. Teacher candidates will apply these issues in an action research project they design.

TED 9190 LITERACY GRADUATE CAPSTONE (3 credits)

This course is designed to help Literacy Masters students synthesize the knowledge gained from the program in order to serve as literacy leaders within the complex organizations of classrooms, schools, and school districts. In this course students will integrate their learning across the program in order to organize their future activities in teaching, leadership, advocacy, and engagement opportunities in ways that honor the interrelationships among classroom, school, sociocultural and economic contexts. They will prepare to engage with all literacy education stakeholders in cutting edge, innovative ways that advance both the learning of PK-12 students and the literacy education field.

Prerequisite(s)/Corequisite(s): This course is designed as a capstone event. Accordingly, students must have no more than 6 additional remaining credit hours of coursework. Permit to enroll required.

TED 9200 CRITICAL PEDAGOGY: TEACHING FOR SOCIAL JUSTICE (3 credits)

This course examines ways in which ideology, power, and culture intersect in P-12 educational settings. Undemocratic, inequitable, and oppressive structures are identified. Possibilities for democratic, equitable transformations are proposed.

Prerequisite(s)/Corequisite(s): Graduate status

STEM 8030 EVOLUTION: FROM GENOMES TO ECOSYSTEMS (3 credits)

This course will prepare students to evaluate and discuss evolution as an underlying concept in all of biology. Further, it will provide a comprehensive overview of evolutionary processes related to the evolution of genomes, development, physiology, morphology, behavior, and ecosystems. (Cross-listed with BIOL 8030).

Prerequisite(s)/Corequisite(s): Courses for graduate admission or equivalent, or with permission of instructor.

STEM 8040 TOPICS IN MATHEMATICAL COMPUTING (3 credits)

This course focuses on the current state-of-the-art technology that is either designed for or is uniquely suitable for teaching mathematics. (Cross-listed with MTCH 8040)

Prerequisite(s)/Corequisite(s): MATH 2200 or equivalent or approval of instructor.

STEM 8050 DATA-DRIVEN DECISION MAKING FOR EDUCATORS (3 credits)

This course provides graduate students with hands-on experiences that model data-driven decision making for educational success in today's classroom. Students will learn how to create valid and reliable assessments; interpret test data; use data to identify student, classroom, program, and school needs; and in general, to systematically enhance educational decision making. In addition, students will experience activities that can be integrated into student lessons to help to deepen concept learning, and to build student data literacy. The course will use real data sets, in interesting, hands on and technology-rich activities to find the "educational story" represented by the data. (Cross-listed with TED 8050).

Prerequisite(s)/Corequisite(s): Graduate Standing.

STEM 8170 ECOSYSTEM ANALYSIS FOR EDUCATORS (3 credits)

This course is designed for education graduate students who wish to take a field-based biology course that uses an interdisciplinary approach to understanding the ecosystem of the tallgrass prairie. This course engages graduate students in methods reflecting multidisciplinary STEM strategies (e.g. scientific inquiry, modeling, geographic information system mapping, etc.) associated with research taking place at the Glacier Creek Preserve. Graduate students completing this course will develop advanced knowledge of ecology, restoration ecology, and monitoring of prairie habitat restoration. Graduate students will focus on the technical, biogeochemical, ecological and cultural aspects of analyzing and restoring the prairie ecosystem and its various habitats. (Cross-listed with BIOL 8170)

Prerequisite(s)/Corequisite(s): Graduate Standing or Permission from the Instructor.

STEM 8370 DATA VISUALIZATION AND MODELING FOR EDUCATORS (3 credits)

In the growing context of data informed decisions there is a need to answer "what if" questions in a variety of decision-making situations, as well as to display data both visually and interactively. This course will provide foundational skills in data visualization and modeling for educational decision making and instruction. It draws upon key fundamentals in data visualization (representing data trends visually) as well as key strategies in data modeling (interactive representations to explore possible outcomes). The course also explores the use of visualization and modeling technologies as well as assisting student learning with these tools. (Cross-listed with TED 8370).

STEM 8410 IMPROVEMENT OF INSTRUCTION: SPECIAL TOPICS (3 credits)

This course provides an in-depth study of instructional theory, research, and methodology designed to extend teachers' professional knowledge base and enhance their pedagogical skills. When offered, a course may be limited to improvement of instruction in a selected subject area. (Cross-listed with TED 8410).

STEM 8420 TRENDS AND TEACHING STRATEGIES IN SCIENCE EDUCATION (3 credits)

This course is designed for the graduate candidate in the Department of Teacher Education whose study program emphasis is in the area of science education. The course will describe and analyze past and present trends in science education, including curricula, teaching-learning strategies, the laboratory and instructional materials. The course focus will be K-12 and as such is meant to serve both elementary and secondary graduate candidates. (Cross-listed with TED 8420).

Prerequisite(s)/Corequisite(s): Graduate standing.

STEM 8430 SCHOOL CURRICULUM PLANNING (3 credits)

This course is designed to provide advanced degree candidates with an understanding of the theory, principles, and practices utilized in curriculum planning in American schools. This course focuses on the principles and practices of effective curriculum planning and teachers' part in these processes as curriculum developers. (Cross-listed with TED 8430).

STEM 8450 BIOLOGY EDUCATION RESEARCH METHODS (3 credits)

In this course, students will learn the methods of conducting pedagogical research in Biology, understand how people learn the concepts, practices, and ways of thinking in science and engineering; understand the nature and development of expertise in a discipline; help identify and measure appropriate learning objectives and instructional approaches that advance students toward those objectives; contribute to the knowledge base in a way that can guide the translation of statistical findings to classroom practice; and identify approaches to make science and engineering education broad and inclusive. Students will work with live data sets to evaluate effective pedagogical approaches in the biology classroom of various audiences (K-16).

STEM 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)

This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with TED 8510, AVN 8510)

Prerequisite(s)/Corequisite(s): Graduate standing.

STEM 8530 INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS (3 credits)

This course is designed to provide graduate candidates with the opportunity to enhance interdisciplinary instructional strategies, curricular understanding, and lesson preparation in the areas of science, technology, engineering, the arts, and mathematics (STEAM) through analysis and reflective practices in STEAM. This course provides hands-on experiences that model STEAM integration techniques, including how to effectively engage with community agencies and partners to bring STEAM into the classroom. This course emphasizes not only the technical aspects of STEM, but also the creativity and innovation that arts integration can add to enhance STEM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. (Cross-listed with TED 8530)

Prerequisite(s)/Corequisite(s): This course includes both teacher education and STEAM related topics and therefore fits into both TED and STEM program coursework.

STEM 8810 STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH (3 credits)

This course will explore theoretical and foundational pedagogical strategies in early childhood education used to deliver integrative STEM education in the preK-12 setting. In order to understand the research and practice of STEM disciplines in preK-12, it is necessary to examine the social, cultural, political, and functional aspects that influence them. Candidates will investigate the nature of STEM education, Early Childhood Education (ECE) pedagogy and perspectives of learning, content knowledge and dispositions for educators of STEM topics, and issues of access and equity for STEM education through literature, discussion, and practice. This course includes a community outreach component in which candidates will use qualitative methods to observe class topics in public settings. (Cross-listed with TED 8810)

Prerequisite(s)/Corequisite(s): Graduate status

STEM 8840 ENGINEERING EDUCATION EXTERNSHIP (3 credits)

This graduate course will address the best practice of effective teaching and learning in Engineering Education through professional collaboration between K-12 STEM (Science, Technology, Engineering, and Mathematics) teachers and practicing engineering professionals. K-12 STEM teachers, as graduate students in the course, will learn about and address real-world applications and career opportunities in STEM education through the externship. K-12 STEM teachers will research and develop authentic, experiential learning opportunities and projects for the classroom through course supports associated with lecture, discussion, and partnerships with practicing engineering professionals. The externship will be integral to the K-12 STEM teachers' experiences and work in this course, as the course models effective professional collaboration founded on experience, knowledge, and skills to achieve a curriculum enhancement goal. (Cross-listed with TED 8840).

Prerequisite(s)/Corequisite(s): Graduate status. Not open to non-degree graduate students.

STEM 8860 INVENTION & INNOVATION IN ENGINEERING EDUCATION (3 credits)

This course will address emerging trends in STEM education for in-service K-12 STEM teachers with a focus on the use of engineering education practices in teaching and learning content. STEM teachers will receive applicable, hands-on, classroom-ready experiences through lecture, professional instruction, and projects that will emphasize product design and creation through the Engineering Design Process. The Engineering Design Process will be central to the candidates' experiences in this course and will be used by the candidates to develop curriculum utilizing emerging trends to supplement current course content and standards. Interdisciplinary planning will be central to the course. (Cross-listed with TED 8860)

Prerequisite(s)/Corequisite(s): Graduate status is required.

STEM 8910 CAPSTONE IN CS EDUCATION (3 credits)

This course will allow graduate students, as an individual or as part of a group, to study and analyze specific problems related to teaching computing in schools. Projects will be concerned with the curriculum and/or instruction of computing and should address a broad scope of application rather than a specific level. (Cross-listed with CSTE 8910).

Prerequisite(s)/Corequisite(s): Student must have completed 21 hours in the Masters of CS Education program.

Social Work

Degree Programs Offered

- Social Work, MSW (p. 1341)
- Social Work, MSW and Criminology and Criminal Justice, MS (MSW/CRCJ) (p. 1099)
- Public Administration, MPA and Social Work, MSW (MPA/MSW) (p. 1317)
- Social Work, MSW and Public Health, MPH (MSW/MPH) (p. 1347)

Certificates Offered

- Managing Juvenile and Adult Populations Certificate (p. 1101)

SOWK 8016 SOCIAL WORK WITH AMERICAN INDIANS (3 credits)

This course provides the student with a broad study of the origins, influences and issues of the American Indian which affect social work practice. The usefulness of established social work generalist methods is explored. Alternative methods applicable to culturally diverse people across the lifespan are presented. This is a Service Learning class. (Cross-listed with SOWK 4010).

Prerequisite(s)/Corequisite(s): SOWK 8130 prior to or concurrent, or BSSW degree. Not open to non-degree graduate students.

SOWK 8026 SOCIAL WORK WITH THE AFRICAN AMERICAN FAMILY (3 credits)

This course seeks to develop in students an awareness and understanding of some of the social and psychological/cognitive realities influencing the behavior of African American youth and families across the lifespan. The content draws upon theories, research and social work practice skills relevant to African American youth and families, as well as the cognitive process and social systems which impact African youth and families. (Cross-listed with SOWK 4020).

Prerequisite(s)/Corequisite(s): Admission to the Master of Social Work program or permission of the Grace Abbott School of Social Work.

SOWK 8046 WORKING WITH MINORITY ELDERLY (3 credits)

This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 4690, GERO 8696, SOWK 4040).

SOWK 8056 ETHNIC DIVERSITY AND SOCIAL WORK PRACTICE (3 credits)

This course focuses on effective generalist social work practice with clients of ethnic diversity. (Cross-listed with SOWK 4050)

Prerequisite(s)/Corequisite(s): Admission to the MSW program or permission of the Grace Abbott School of Social Work

SOWK 8070 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT I (3 credits)

This course is the first part of a two-semester sequence within the Master of Social Work required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan, particularly infancy through adolescence, within the social environment at the micro- and macro-level (e.g., individuals, families, groups, organizations, institutions, and communities), as they relate to effective social work generalist practice.

Prerequisite(s)/Corequisite(s): Undergraduate Human Biology course (prior to or concurrent) and admission to the Master of Social Work program.

SOWK 8080 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT II (3 credits)

This course is the second part of a two-semester sequence within the Master of Social Work required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan— particularly during young, middle, and late adulthood— within the social environment at the micro- and macro-level (e.g., individuals, families, groups, organizations, institutions, and communities), as they relate to effective social work generalist practice.

Prerequisite(s)/Corequisite(s): SOWK 8070

SOWK 8090 SOCIAL WELFARE POLICY (3 credits)

This course is an introduction to social welfare policy analysis. The course examines social welfare policy taking into account historical, political, economic, social, and cultural perspectives. Basic concepts and choices are examined in relation to values, ethics, context, social functioning and social consequences.

Prerequisite(s)/Corequisite(s): Admission to the Master of Social Work program or permission of the Grace Abbott School of Social Work.

SOWK 8110 INSTITUTIONAL OPPRESSION (3 credits)

This course is about institutional racism, sexism and classism as it relates to social policy and social injustice. The focus is on how institutional oppressions are related and are mutually reinforcing. The consequences of institutional racism, sexism and classism are examined at the individual, group, family, and agency levels.

Prerequisite(s)/Corequisite(s): Admission to the Master of Social Work program or permission of the Grace Abbott School of Social Work.

SOWK 8130 GENERALIST PRACTICE I (3 credits)

This course provides an introduction to the values, ethics, knowledge, and skills of generalist social work practice. Using constructs from the Generalist Intervention Model, systems theory, and the strengths-based perspective, students learn about engagement, assessment, planning and contracting, intervention, evaluation, and termination. Diversity and case management are emphasized as part of bringing planned change to client systems, including individuals and families..

Prerequisite(s)/Corequisite(s): SOWK 8070 prior or concurrent.

SOWK 8150 GENERALIST PRACTICE II (3 credits)

This practice course is an introduction to a goal-oriented planned change process with an emphasis on educational, support, and task groups, organizations, and communities. The focus is on building knowledge and developing indirect practice skills in collaboration, planning, empowerment, and advocacy to effect social change using the Generalist Intervention Model.

Prerequisite(s)/Corequisite(s): SOWK 8130 prior, and SOWK 8080 prior or concurrent

SOWK 8160 GENERALIST SOCIAL WORK PRACTICUM I (3 credits)

This course is designed to provide supervised, individual and experiential learning offered within the setting of a selected social service agency. The student will be introduced to a variety of social work practice roles, develop professional relationships with client systems and learn to apply different interventions to effect change across the life span. In order to facilitate integration of classroom theory with practice, students will attend a seven-week practicum seminar (2 hours per week).

Prerequisite(s)/Corequisite(s): Prior: Human Biology, Research Methods, and Statistics deficiencies complete; Prior or Concurrent: SOWK 8070, SOWK 8090, SOWK 8130; Not open to non-degree graduate students.

SOWK 8170 GENERALIST SOCIAL WORK PRACTICUM II (3 credits)

This course is designed to provide supervised, individual, experiential learning offered within the setting of a social service agency, typically the same agency as in SOWK 8160. This course builds upon opportunities provided and competence achieved in Generalist Social Work Practicum I.

Prerequisite(s)/Corequisite(s): Prior or Concurrent: SOWK 8160, SOWK 8080, SOWK 8110, and SOWK 8150. Not open to non-degree graduate students.

SOWK 8190 RESEARCH & COMPUTER APPLICATIONS (3 credits)

This course focuses on the use of research and computer programs in social work practice. Social and behavioral science research methods are reviewed. Students learn to analyze existing data using SPSS and to write an empirical research report. The use of Microsoft Word, Excel, and PowerPoint in social work practice are explored.

Prerequisite(s)/Corequisite(s): Admission to the Master of Social Work program.

SOWK 8220 CLINICAL SOCIAL WORK WITH INDIVIDUALS (3 credits)

This advanced course provides an in-depth study of several theories of personality and behavior, and of therapeutic approaches derived from the theories. Major focus is on therapy with individuals across the life span, but application to family systems is also considered, as well as the fit of each theory within the broader social systems framework.

Prerequisite(s)/Corequisite(s): SOWK 8170 prior to or concurrent; SOWK 8160 or admitted with advanced standing.

SOWK 8230 CLINICAL SOCIAL WORK WITH GROUPS (3 credits)

This advanced course provides knowledge of and experience in working with groups as systems. It includes both assessment of dynamics as well as developing skills in intervention modalities appropriate for working with various types of groups.

Prerequisite(s)/Corequisite(s): SOWK 8220; SOWK 8170 or admitted to the Master of Social Work program with advanced standing.

SOWK 8240 SOCIAL WORK PRACTICE WITH CHILDREN (3 credits)

This advanced practice course provides an overview of several social work interventions used with children and adolescents. A brief review of normal child development and the family life cycle is the context for presenting a range of children's problems and special needs. The course will cover several intervention models and address their application in various service settings and in individual, family, group, and social action formats. Children in diverse family settings, institutions, and in minority families and cultures are considered to understand unique therapeutic issues present for them.

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing and SOWK 8220.

SOWK 8250 SOCIAL WORK PRACTICE WITH FAMILIES (3 credits)

This course considers the family context as a system for therapeutic intervention. The family unit and its diverse forms are defined; theories for assessment and understanding family's interactions across the lifespan are considered, and the alternative modalities useful for treating family dysfunction are presented. As a practice-oriented course, it emphasizes the development of professional skills in working with the family across the lifespan.

Prerequisite(s)/Corequisite(s): SOWK 8220; SOWK 8170 or admitted to the Master of Social Work program with advanced standing.

SOWK 8260 SOCIAL WORK PRACTICE WITH OLDER ADULTS (3 credits)

This course is part of the advanced MSW curriculum and focuses on micro- and macro-level practice skills essential to competent and effective social work practice with diverse older adults. This course emphasizes clinical and complimentary/ alternative interventions (particularly creativity programming) that focus on individuals and small groups as well as community practice skills that involve social marketing and community organizing, networking, and collaborating with inter-professional community practitioners.

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Social Work program with advanced standing.

SOWK 8270 SOCIAL WORK PRACTICE WITH SEXUAL CONCERNS (3 credits)

This course provides a survey of the current knowledge base, theory and research in human sexuality with a focus on advanced practice intervention and prevention approaches for a variety of sexuality issues faced by individuals, couples, and families throughout the lifespan.

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing, and SOWK 8220.

SOWK 8280 SOCIAL WORK PRACTICE WITH COUPLES AND CHANGING FAMILY STRUCTURES (3 credits)

This is an advanced practice course designed to prepare students to provide therapy for couples and families at all life stages who are experiencing problems in intimacy, marital, divorce, or remarriage adjustment.

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Master of Social Work Program with advanced standing and SOWK 8220.

SOWK 8290 SOCIAL WORK PRACTICE IN HEALTH AND MENTAL HEALTH (3 credits)

This course emphasizes the development of advanced level clinical and social work practice skills for working with selected acute and chronic health and mental health conditions affecting individuals across the life cycle.

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing, and SOWK 8220. Not open to non-degree graduate students.

SOWK 8400 ADVANCED SOCIAL WORK PRACTICUM I (3 credits)

This course is designed to provide supervised, individual professional learning experiences offered within the setting of a selected social service agency in the student's chosen concentration. The student will be introduced to a variety of advanced direct and indirect social work practices. The Dual Degree Program is a part of Integrated Practice. Dual Degree students may take SOWK 8400 as their administrative practicum. If so, then PA 8010, 8050 and 8090 must be taken prior to and one course from concentration prior to or concurrently.

Prerequisite(s)/Corequisite(s): SOWK 8190, SOWK 8220, SOWK 8230. Additional prerequisites for dual-degree students. Not open to non-degree graduate students.

SOWK 8410 ADVANCED SOCIAL WORK PRACTICUM II (3 credits)

This course is designed to provide supervised, individual professional learning experiences offered within the setting of a social service agency in the student's chosen concentration, typically the same agency as in SOWK 8400. This course builds upon opportunities provided and competence achieved in Advanced Social Work Practicum I.

Prerequisite(s)/Corequisite(s): SOWK 8400 prior or concurrent, and an additional course from the plan of study. Not open to non-degree graduate students.

SOWK 8420 ADVANCED SOCIAL WORK PRACTICUM III (1-3 credits)

This course is designed to provide a third supervised, individual professional learning experience offered within the setting of a social service agency in the student's chosen concentration. This course builds upon opportunities provided and competence achieved in Advanced Social Work Practicum II.

Prerequisite(s)/Corequisite(s): SOWK 8410 prior to or concurrent, and permission of the Grace Abbott School of Social Work.

SOWK 8510 SOCIAL WORK LEADERSHIP (3 credits)

This course provides social work students with the knowledge and skills to be leaders in their organizations and communities. This course will explore leadership models and theories, and their usefulness in diverse settings, including social work leadership ethics. Students will also learn models and theories related to general supervision, power, and authority in public and nonprofit organizations. Useful skills covered include conflict management and evidence-informed decision-making. Students will also learn about care of self and others, especially as it relates to resiliency and vicarious trauma.

Prerequisite(s)/Corequisite(s): SOWK 8160 or admitted to the Master of Social Work program with advanced standing.

SOWK 8516 TREATMENT ISSUES IN CHEMICAL DEPENDENCY (3 credits)

This course addresses chemical dependency treatment issues including denial, minimization, relapse and its prevention, resistance, family dynamics, poly-substance abuse, co-occurring disorders, spirituality and the influence of self-help groups. The education will include the clinical treatment needs of individuals suffering from chemical dependency, taking into consideration diversity, gender, culture and lifestyle. (Cross-listed with COUN 4510, COUN 8516, SOWK 4510).

Prerequisite(s)/Corequisite(s): Admission to counseling program or social work programs or permission of instructor. For social work students, SOWK 8686 or COUN 8696 and SOWK 8696 or COUN 8696 must be taken prior to COUN 8516 or SOWK 8516. Not open to non-degree graduate students.

SOWK 8536 SCHOOL SOCIAL WORK (3 credits)

This course explores the field of social work practice in school settings, including the history of social work practice in schools, school environment, roles of school social workers, mandated foundations for school social work services, eligibility for special education and 504 plans, theories of practice that include school and community based models, and interventions for target populations in schools. (Cross-listed with SOWK 4530).

Prerequisite(s)/Corequisite(s): SOWK 3320 or SOWK 8130. Not open to non-degree graduate students.

SOWK 8540 PLANNING FOR SOCIAL CHANGE (3 credits)

This course takes an in-depth look at the framework of macro-level problem solving and its application to all areas of social work practice. Focus will be placed on the critical exploration of social problems, their causes, and their potential solutions from a lens of broader social inequity.

Prerequisite(s)/Corequisite(s): SOWK 8160 or admitted to the Master of Social Work (MSW) program with advanced standing. Not open to non-degree graduate students.

SOWK 8550 SOCIAL JUSTICE AND SOCIAL ADVOCACY (3 credits)

This course provides a perspective on national and international social and economic injustices experienced by people under corporate globalization. Practice implications for social workers are addressed.

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing. Not open to non-degree graduate students.

SOWK 8560 ADVANCED COMMUNITY PRACTICE (3 credits)

This course is an elective macro course in the MSW curriculum. The course is designed to help students develop an analytical and empirical approach to empowering communities. The course builds on the social work "person-in-environment" perspective by focusing on the client system and its environmental contexts as a partner in practice. This course is particularly relevant to direct practice with and advocacy for diverse disempowered groups in society. The course may use a community-based service-learning pedagogy.

Prerequisite(s)/Corequisite(s): SOWK 8170 or Master of Social Work student admitted with advanced standing or permission of the Grace Abbott School of Social Work. Not open to non-degree graduate students.

SOWK 8570 ADMINISTRATION OF SOCIAL WELFARE AGENCIES (3 credits)

This course focuses on the knowledge and skills needed by administrative leaders of social welfare agencies. Students will learn about resource issues, including grant writing, fundraising, budgeting, and financial management. Acknowledging political contexts and shaping organizational culture will also be covered. In addition, they will learn about personnel and managerial issues related to collaboration, human relations, governing/advisory boards, and strategic planning.

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing.

SOWK 8600 PERMANENCE FOR CHILDREN (3 credits)

This course is about the child welfare system and focuses on policies, laws, and agency structures designed to help abused and neglected children and their families.

Prerequisite(s)/Corequisite(s): SOWK 8130 or admitted to the Master of Social Work program with advanced standing.

SOWK 8610 FAMILY AND COMMUNITY VIOLENCE (3 credits)

This course covers family and community violence across the life span with an emphasis on gaining knowledge of the issue, skills in policy analysis, and a broad framework for developing effective services in various service settings.

Prerequisite(s)/Corequisite(s): SOWK 8130 or admitted to the Master of Social Work program with advanced standing.

SOWK 8626 TRAUMA AND RESILIENCE (3 credits)

This course provides an overview of issues related to trauma including: the factors related to development of trauma, definitions of trauma, the impact of trauma on individuals, families and communities, and the programs and practices that are most effective and appropriate regarding the social work role in responding to trauma. (Cross-listed with SOWK 4620)

Prerequisite(s)/Corequisite(s): SOWK 8070 and SOWK 8080 or Advanced Standing

SOWK 8650 HEALTH/MENTAL HEALTH POLICIES FOR SOCIAL WORK (3 credits)

This course emphasizes the development of health and mental health policy analysis skills and knowledge for social work students. Major topics include government response to health care, cultural and historical perspectives, service provision, and epidemiological trends across the life span. It provides a framework for clinical interventions in a variety of health and mental health settings.

Prerequisite(s)/Corequisite(s): SOWK 8090 or admitted to the Master of Social Work program with advanced standing.

SOWK 8686 MEDICAL AND PSYCHOSOCIAL ASPECTS OF ALCOHOL/DRUG USE AND ADDICTION (3 credits)

This course introduces students to substance abuse disorders and their impact on the individual, family, and society. It covers psychopharmacology, alcohol and drug interactions, drug classifications, theories of chemical dependency, various models of treatment, vulnerable populations, and ethical and legal issues. (Cross-listed with SOWK 4680, COUN 4680, COUN 8686)

Prerequisite(s)/Corequisite(s): Admission to counseling program or social work program or permission of instructor.

SOWK 8696 ASSESSMENT AND CASE MANAGEMENT IN SUBSTANCE ABUSE (3 credits)

This course focuses on assessment of clients and their environment, and diagnosis and referral for substance abuse treatment. Emphasis is given to assessment instruments, treatment levels, treatment planning, case management, and social justice. (Cross-listed with COUN 4690, COUN 8696, SOWK 4690).

Prerequisite(s)/Corequisite(s): Admission to MSW program or permission of the School and SOWK 8686 or COUN 8686 (or equivalent course) prior to or concurrent.

SOWK 8806 SOCIAL WORK AND THE LAW (3 credits)

This course presents the fundamental principles of criminal and civil law that have relevance to the practice of social work. Topics include: the legal system, legal research methods, professional ethical/legal responsibilities and liabilities, family law, elder law, criminal law, juvenile law, personal injury law, employment discrimination law, capacity to make contracts and wills, rights of institutionalized patients, and rights of handicapped children to an education. (Cross-listed with SOWK 4800)

Prerequisite(s)/Corequisite(s): SOWK 8090 or admitted to the Master of Social Work program with advanced standing.

SOWK 8816 SPIRITUALITY AND SOCIAL WORK PRACTICE (3 credits)

Social work literature defines spirituality as the human striving for a sense of meaning, purpose, values, and fulfillment. Spirituality is expressed through diverse forms throughout a client's lifespan; it is central to clients' understanding of suffering and their attempts to resolve it. This course examines major issues pertaining to spiritually-sensitive social work practice with clients of diverse religious and non-religious (i.e., outside sectarian institutional contexts) perspectives. (Cross-listed with SOWK 4810)

Prerequisite(s)/Corequisite(s): Students in the Master of Social Work program, or permission of the Grace Abbott School of Social Work.

SOWK 8826 GLOBAL ENGAGEMENT: A SOCIAL WORK PERSPECTIVE (3 credits)

This course prepares students to work in a global setting. Students examine theories, concepts, and skills related to social development, cross-cultural engagement, and issues related to particular countries. The course is designed with two elements: 1) On-campus classroom learning focused on global social work knowledge, and, 2) Field-based labs that involve direct engagement with an international population. Students select one lab: i) faculty-led trip to China for two-weeks, ii) refugee resettlement service-learning project in Omaha. (Cross-listed with SOWK 4820).

Prerequisite(s)/Corequisite(s): Admitted to Graduate College. Travel overseas early summer-course lab. Passport, visa-China, travel insurance-UNO, immunizations and registration (International Studies) required to travel abroad. Faculty member leading trip will provide further info.

SOWK 8836 CRISIS INTERVENTION (3 credits)

The prevalence of crisis experiences within our society and lifespan development necessitates that social workers acquire a knowledge and skill-base for effective and professional crisis intervention practice. Students will study the ABC Model of Crisis Intervention and how to ethically practice with diverse and vulnerable populations. Students will apply crisis intervention theory and models of intervention to various concern areas including but not limited to: suicide, sexual assault, domestic violence, substance abuse, grief and loss, and violence. A systems, strengths, and cultural emphasis will be applied to the various crisis situations covered. (Cross-listed with SOWK 4830)

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing or permission of the Grace Abbott School of Social Work.

SOWK 8856 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)

This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 4850, GERO 8856, SOWK 4850.)

Prerequisite(s)/Corequisite(s): SOWK 8130 or advanced standing

SOWK 8880 TOPICAL SEMINAR IN SOCIAL WORK (3 credits)

Specific seminar topics will focus on advanced content in social work theory and practice. The course description will be announced when a specific topical seminar is proposed. The topics selected will be consistent with School of Social Work program objectives, faculty expertise, and student needs. This course may be repeated for up to nine hours credit.

SOWK 8886 TOPICAL SEMINAR IN SOCIAL WORK (3 credits)

Specific seminar topics will focus on advanced content in social work theory and practice. The course description will be announced when a specific topical seminar is proposed. The topics selected will be consistent with Grace Abbott School of Social Work program objectives, faculty expertise, and student needs. (Cross-listed with SOWK 4880)

Prerequisite(s)/Corequisite(s): Admission to the Master of Social Work (MSW) program or permission of the Grace Abbott School of Social Work (GASSW).

SOWK 8900 SPECIAL STUDIES IN SOCIAL WELFARE (1-3 credits)

This independent study course allows students to pursue a special selected area or topic within social welfare in order to deepen knowledge and/or skills in that particular area.

Prerequisite(s)/Corequisite(s): Permission of the Grace Abbott School of Social Work (GASSW). Not open to non-degree graduate students.

SOWK 8940 EVALUATION OF SOCIAL PROGRAMS (3 credits)

This is an advanced research course in the evaluation of social programs and social agencies which focuses on agency organizational structure, program design and effectiveness, and social impact.

Prerequisite(s)/Corequisite(s): SOWK 8190

SOWK 8950 RESEARCH METHODS IN CLINICAL PRACTICE (3 credits)

This course provides a study of the issues involved in clinical research methodology. Students are introduced to the tools for documenting the effects of clinical practice interventions for individuals, couples, families and groups (including qualitative and quantitative methodologies: single-case design, standardized measurement, self-report data, self-monitoring, case study, grounded theory etc.).

Prerequisite(s)/Corequisite(s): SOWK 8190 and SOWK 8220

SOWK 8960 RESEARCH OTHER THAN THESIS (3 credits)

This course enables students, under faculty supervision, to prepare a research proposal, carry out the study, and prepare a detailed report of the purpose, design, outcome, and significance of the study.

Prerequisite(s)/Corequisite(s): SOWK 8190 and permission of the Grace Abbott School of Social Work

SOWK 8990 MASTER'S THESIS (3-6 credits)

The Master's thesis provides students the opportunity to acquire first-hand experience in research methods under faculty direction. With the guidance of the thesis coordinator and a supervisory committee, the student prepares a research proposal, conducts the proposed study, and prepares a detailed report of the purpose, design, results, and implications of the findings.

Prerequisite(s)/Corequisite(s): SOWK 8190 and permission of the Grace Abbott School of Social Work (GASSW)

Social Work, MSW

Grace Abbott School of Social Work, College of Public Affairs & Community Service

Vision Statement

The mission of the Grace Abbott School of Social Work is to educate students to become highly qualified social workers who serve people of all ages and influence the systems that affect them, to advance knowledge through teaching and research, and to engage with diverse communities to promote socially just societies.

Program Website (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/social-work/>)

Other Program Related Information

The MSW program has received continuous accreditation from the Council on Social Work Education since 1940. The MSW program prepares graduates for advanced social work practice within a variety of settings. The MSW degree is recognized for licensure for independent social work practice in the United States. More information regarding licensure and certification can be found on local Department of Health and Human Services websites.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Fall 2022)

- Fall: January 15

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 85, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** The statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, in no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.
 - If you have a compelling autobiographical story relevant to your application, but that falls outside of the items addressed within the statement, you may add a letter to the Admissions Committee. Your letter will be considered, but will not be scored.
 - What type of work are you planning to engage with once you attain your MSW degree? Specifically, what are the issues, populations, and levels of practice you hope to work with after graduate school?
 - The social work profession is rooted in social justice. Social workers adopt a stance of cultural humility and strive towards cultural awareness. Discuss a time when you realized that one of your personal or cultural identities influenced your reaction to a social situation. Reflecting on that experience, how might it influence your future social work practice?
 - Social workers are self-reflective, strengths-based, and growth-oriented. Identify a strength that you possess and an area for growth. Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.

- Social work is a values-based profession dedicated to mitigating inequality and enhancing human wellbeing, especially for vulnerable, marginalized, and oppressed populations. From the core values and ethical principles identified in the NASW Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>), identify and discuss one that resonates with you and one that may challenge you.
- Why have you chosen social work? Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.
- **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:
 - Educational experiences since high school
 - List start and end dates with month and year
 - Identify whether the position is part or full-time
 - Identify whether the position is paid or volunteer
 - Field placements, internships or practicums
 - Honors or distinctions received
 - Professional experiences, especially in human services
- **Letters of Recommendation:** Three letters of recommendation are required, the recommendation requests are generated from your online application. These recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past two years, it is suggested that at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.

The MSW **Foundation Program** is a 63 credit hour program available to applicants who do **not** hold a BSSW degree from an accredited school of social work within the last 10 years.

The MSW **Advanced Standing Program** is a 39 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work within the last 10 years.

Social Work, MSW and Criminology and Criminal Justice, MS (MSW/CRCJ)

Grace Abbott School of Social Work, School of Criminology & Criminal Justice, College of Public Affairs & Community Service

Vision Statement

The MSW/MSRCJ dual degree program is a collaborative effort between the University of Nebraska at Omaha, Grace Abbott School of Social Work and the School of Criminology and Criminal Justice. The MSW/MSRCJ offers interdisciplinary preparation in the fields of social work and criminal justice leading to the master of social work and the master of criminal justice degrees, with fewer required credit hours than it would take to obtain these degrees independently.

This dual degree program prepares students to provide a range of advanced social work services and assume leadership in the field of criminal justice and social work. Graduates with a dual MSW/MSRCJ are prepared to respond to the needs of the community by working with delinquent and criminal populations and the systems that impact these populations.

Students beginning the MSW/MSRCJ program at the MSW Foundation level must complete 81 credit hours total. Students beginning the MSW/MSRCJ program at the Advanced Standing level, must complete 57 credit hours total.

Total Credits **57**

¹ A student must receive a grade of "B" or higher in practicum courses (SOWK 8400 and SOWK 8410).

² Courses not selected from among the three listed may be used as an elective.

Exit Requirements

- CRCJ 8970 Capstone course is offered in the fall and spring semesters. Once all required coursework has been completed, the student can register to take the capstone course. In this course, students will make arrangements with the instructor to conduct a research project. The course will end with a research report detailing results and written in a way consistent with agency and/or criminal justice organizational standards.
- Satisfactory completion with a grade of B or better in SOWK 8400 and SOWK 8410

Academic Policies and Standards

- The MSW Student Handbook can be found here (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/social-work/student-resources/>).

Public Administration, MPA and Social Work, MSW (MPA/MSW)

School of Public Administration and Grace Abbott School of Social Work, College of Public Affairs & Community Service

Vision Statement

The MPA/MSW dual degree program is a collaborative effort between the University of Nebraska at Omaha (UNO), Grace Abbott School of Social Work and the School of Public Administration. This program offers interdisciplinary preparation in the fields of social work and public administration leading to the master of social work and the master of public administration degrees, with fewer required credit hours than it would take to obtain these degrees independently.

The program prepares students to provide a variety of advanced direct and indirect social work services and assume leadership in the public service sector, specifically in administrative and policy work with governmental units and nonprofit organizations.

Students beginning the MPA/MSW program at the MSW Foundation level must complete 81 credit hours total. Students beginning the MPA/MSW program at the Advanced Standing level must complete 57 credit hours total.

Program Website (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/public-administration/academics/mpa-dual-degree-msw-mpa.php>)

Other Program Related Information

- The Master of Social Work (MSW) program prepares students for advanced social work practice. Master's level social workers are employed in public and private agencies, including medical settings, schools, residential treatment centers, court and correctional agencies, and community planning and development agencies. Their activities and interventions are designed to promote a more effectively-functioning society as it struggles to "provide for the general welfare," as well as to help people, families, groups and institutions within that society achieve self-fulfillment.

- The MSW degree at the Grace Abbott School of Social Work is accredited by the Council on Social Work Education (CSWE), the national accrediting body for all social work education.
- Information on certification and licensure is available on the Nebraska Department of Health and Human Services website (<http://dhhs.ne.gov/Pages/default.aspx>).

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Fall 2022)

- Fall: January 15

Note: If admitted to the Master of Social Work program and you wish to become a dual degree MSW/MPA student you will need to adhere to the MPA deadline date which is **June 1**(fall) or **October 1** (spring).

Other Requirements

- The general prerequisite for admission to the program is a four-year bachelors' degree with a minimum of a 3.0 GPA (on a 4.0 scale) in the junior and senior years (last 50-60 hours).
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL, 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** Two statements of purpose are required; one for the School of Public Administration and one for the Grace Abbott School of Social Work
 - For Social Work, the statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, and should be no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.
 - Why have you chosen social work? Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.
 - Social work is a values-based profession dedicated to mitigating inequality and enhancing human wellbeing, especially for vulnerable, marginalized, and oppressed populations. From the core values and ethical principles identified in the NASW Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>), identify and discuss one that resonates with you and one that may challenge you.
 - Social workers are self-reflective, strengths-based, and growth-oriented. Identify a strength that you possess and an area for growth. Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.
 - The social work profession is rooted in social justice. Social workers adopt a stance of cultural humility and strive towards cultural awareness. Discuss a time when you realized that one of your personal or cultural identities influenced your reaction

to a social situation. Reflecting on that experience, how might it influence your future social work practice?

- If you have a compelling autobiographical story relevant to your application, but that falls outside of the items addressed within the statement, you may add a letter to the Admissions Committee. Your letter will be considered, but will not be scored.
- For Public Administration, the essay should answer the following questions:
 - Please tell us about the factors in your background that will help us understand your interest in a profession in the public or nonprofit sectors.
 - What are your professional goals? Ten years from now, what do you hope to be doing professionally?
 - How can this dual degree from UNO help you achieve these goals?
- **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:
 - Educational experiences since high school
 - List start and end dates with month and year
 - Identify whether the position is part or full-time
 - Identify whether the position is paid or volunteer
 - Field placements, internships or practicums
 - Honors or distinctions received
 - Professional experiences, especially in human services
- **Letters of Recommendation:** Three letters of recommendation are required. Recommendation requests are generated from your online application. The recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past three years, at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.

The MSW **Foundation Program** is a 63 credit hour program available to applicants who do **not** hold a BSSW degree from an accredited school of social work within the last 10 years.

The MPA/MSW **Advanced Standing Program** is a 57 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work within the last 10 years.

Social Work, MSW and Public Health, MPH (MSW/MPH)

Grace Abbott School of Social Work, College of Public Affairs & Community Service, College of Public Health, University of Nebraska Medical Center

Vision Statement

The MSW/MPH dual degree program is a collaborative effort between the University of Nebraska Medical Center, College of Public Health and the University of Nebraska at Omaha, Grace Abbott School of Social Work. This program offers interdisciplinary preparation in the fields of social work and public health leading to the master of social work and the master of public

health degrees, with fewer required credit hours than it would take to obtain these degrees independently.

This dual degree program prepares students to provide the range of advanced social work services and assume leadership in the public health sector to promote and protect physical and mental health, with a focus on population-based services, prevention, collaboration, and strategies and policies grounded in basic science.

Students beginning the MSW/MPH program at the MSW Foundation level must complete 81 credit hours total. Students beginning the MSW/MPH program at the Advanced Standing level, must complete 57 credit hours total.

Other Program Related Information

- The Master of Social Work (MSW) program prepares students for advanced social work practice. Master's-level social workers are employed in public and private agencies, including medical settings, schools, residential treatment centers, court and correctional agencies, and community planning and development agencies. Their activities and interventions are designed to promote a more effective-functioning society as it struggles to "provide for the general welfare," as well as to help people, families, groups, and institutions within the society achieve self-fulfillment.
- The MSW degree at the Grace Abbott School of Social Work is accredited by the Council on Social Work Education (CSWE), the national accrediting body for all social work education.
- Information on certification and licensure is available on the Nebraska Department of Health and Human Services' website (<http://dhhs.ne.gov/Pages/default.aspx>)

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Summer 2021, and Fall 2021)

- Summer or Fall Start: January 15 (MSW), June 1 (MPH)
- The MPH application is completed online (<http://www.unmc.edu/publichealth/admissions/mphdualdegree/mph-msw.html>) through the College of Public Health at the University of Nebraska Medical Center.
 - The MSW Admissions Committee decides on admission to the MSW program; the MPH Admissions Committee decides on admission to the MPH program. A student not admitted to both programs may pursue the other degree if admitted.

MSW Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** The statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, in no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.
 - If you have a compelling autobiographical story relevant to your application, but that falls outside of the items addressed within the statement, you may add a letter to the Admissions Committee. Your letter will be considered, but will not be scored.
 - What type of work are you planning to engage with once you attain your MSW degree? Specifically, what are the issues, populations, and levels of practice you hope to work with after graduate school?
 - The social work profession is rooted in social justice. Social workers adopt a stance of cultural humility and strive towards cultural awareness. Discuss a time when you realized that one of your personal or cultural identities influenced your reaction to a social situation. Reflecting on that experience, how might it influence your future social work practice?
 - Social workers are self-reflective, strengths-based, and growth-oriented. Identify a strength that you possess and an area for growth. Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.
 - Social work is a values-based profession dedicated to mitigating inequality and enhancing human wellbeing, especially for vulnerable, marginalized, and oppressed populations. From the core values and ethical principles identified in the NASW Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>), identify and discuss one that resonates with you and one that may challenge you.
 - Why have you chosen social work? Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.

- **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:
 - Educational experiences since high school
 - List start and end dates with month and year
 - Identify whether the position is part or full-time
 - Identify whether the position is paid or volunteer
 - Field placements, internships or practicums
 - Honors or distinctions received
 - Professional experiences, especially in human services
- **Letters of Recommendation:** Three letters of recommendation are required, the recommendation requests are generated from your online application. These recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past two years, it is suggested that at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.

MPH Other Requirements

- GRE

The MSW/MPH **Foundation Program** is a 78 credit hour program available to applicants who do not hold a BSSW degree from an accredited school of social work within the last 10 years.

The MSW/MPH **Advanced Standing Program** is a 54 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work within the last 10 years.

Sociology, MA

Department of Sociology & Anthropology, College of Arts & Sciences

Vision Statement

This innovative degree program provides students with advanced knowledge in sociological theory, methods, and research. The flexible and interdisciplinary nature of the program allows students to focus on an additional academic specialty area within or outside of sociology. Department faculty members have strengths in several areas, including families and gender, health, inequality and social justice, work and organizations, race and ethnicity, and anthropology. The department also has close connections to the Office of Latino/Latin American Studies, Native American Studies, and Women's and Gender Studies.

Other Program Related Information

Fast Track Program

The Department of Sociology & Anthropology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BA/BS in Sociology who are desiring to pursue an MA in Sociology.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0 and a GPA of 3.3 in SOC and ANTH courses.
- Students must complete the Fast Track Approval form, obtain all signatures, and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
 - ANTH 1050, SOC 1010, SOC 2120, SOC 2130, SOC 2134 should be completed before enrolling in the first graduate course.
 - SOC 3510 and SOC 3514 should be taken before or concurrently with enrollment in the first graduate course.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status, including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the

applicant will need to contact the Office of Graduate Studies for a fee waiver code.

- Admission to Fast Track does NOT guarantee admission to the graduate program.
- The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022 and Fall 2022)

- Fall: April 15
- Spring: November 15

Other Requirements

- Baccalaureate degree or previous master's degree with a minimum 3.0 GPA.
- Applicants for admission to the graduate program in sociology should present a minimum of 15 undergraduate credit hours in the following social science courses:
 - Statistics, research methods, and social theory
 - A minimum of six additional hours of sociology or other social science courses
- Undergraduate courses in statistics, research methods, and social theory are required before the student can enroll in the graduate courses in the same areas.
 - Students without the specific prerequisite courses may be admitted provisionally, but deficiencies should be removed in the first year of graduate study.
 - All prerequisite courses must be passed with a grade of "B" (3.0 on a 4.0 scale) or better.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80 (no sub-score under 15), IELTS: 6.5, PTE: 53, Duolingo: 105
 - Passing with a minimum score does not guarantee admission into the program.
- **Statement of Purpose:** Outline your career goals, why a graduate degree in Sociology will help you attain these goals, and why the UNO MA in sociology is a good fit. Make sure your statement includes the following components:
 - Discuss how your academic goals fit into the Department of Sociology & Anthropology's strengths and areas of research.
 - Detail your research interests and how these interests are sociological.
 - Provide a brief (1-2 paragraph) personal statement regarding the development of your academic interest in Sociology.
- **Writing Sample:** Submission of an academic, research-based writing sample. The sample must be written in English, include citations, and be a minimum of five pages in length. This writing sample can be a previous assignment. If no such paper exists, the applicant should contact the graduate program chair for an alternative assignment.
- **Resume:** The resume should highlight the education and employment experiences that are especially relevant to graduate work in sociology.
- **Letters of Recommendation:** Two letters of recommendation from a former or current professor (preferred), supervisor, or individual that can speak to one's academic potential in a graduate program. If

students have recently graduated from UNO with a major in Sociology, it is expected that one of the letters will be from a faculty member in the UNO Sociology & Anthropology Department.

- GRE scores are not required for admission; however, students are welcome to submit them.
- **Applicants with International Transcripts:** Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (<https://www.wes.org/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or Educational Perspectives (<https://www.edperspective.org/>). This graduate program will conduct an in-house credential evaluation of your transcript(s).
 - UNO reserves the right to require a course-by-course evaluation from WES, ECE, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
 - *Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.
- Official transcripts from all attended institutions. Please note that although the Office of Graduate Studies forwards applications to departments for review with unofficial transcripts, students cannot enroll until all official transcripts have been received.

Degree Requirements

Code	Title	Credits
Required Courses		
SOC 8030	SOCIOLOGICAL INQUIRY & RESEARCH DESIGN	3
SOC 8040	SOCIOLOGICAL STATISTICS	3
SOC 8060	QUALITATIVE METHODS	3
SOC 8100	SOCIAL INEQUALITY	3
Select one from the following:		
SOC 8010	CLASSICAL SOCIOLOGICAL THEORY	
SOC 8020	CONTEMPORARY SOCIOLOGICAL THEORY	

Electives

Elective courses will be chosen in consultation with the GPC and/or your advisor. The department offers a rotating selection of elective courses based on faculty specialty areas. Students in the thesis option (see below) may take up to six hours of electives outside of sociology; students pursuing the applied project or non-thesis option (comprehensive exams) may take up to nine hours outside of sociology. All outside courses must be relevant to the student's interest area within sociology and should be approved by the GPC and/or advisor.	9-21
--	------

Exit Requirements:

Thesis Option

This option is especially recommended for students who wish to pursue the PhD degree after completing their MA and/or who wish to gain research and writing experience through the thesis process.

Coursework

Students must complete a minimum of 24 credit hours of approved graduate work in sociology and related disciplines, plus six hours of thesis credit, for a total of 30 credit hours.

Code	Title	Credits
SOC 8990	THESIS	6

Thesis Committee

Students will form a thesis committee of UNO faculty members who are knowledgeable about the thesis topic. The committee will consist of at least three members, all of whom must be graduate faculty, and at least one of whom must be a sociologist:

- a committee chair from within the department
- at least one additional member from within the department
- at least one outside member from another academic department

Prior to beginning the thesis, students must have their project formally approved by the thesis committee. Students must pass an oral defense structured around the thesis to complete the degree requirements.

Applied Project Option

The capstone experience in this program option is a research project conducted in an applied setting. Students will use the skills and knowledge they have acquired in the program to conduct a project and produce a report for a "client" in the community (or elsewhere). Students may seek out their own project site or choose from among the community organizations with which the department already has relationships. Examples of potential projects include evaluating program effectiveness, assessing community needs, or designing training programs for employees.

This option is especially recommended for students who plan to enter the job market immediately after completion of the MA degree; would like to gain a better idea of the type of employment for which they are qualified with an MA in sociology; and/or are already working in a setting amenable to a project of this nature.

Coursework

Students must complete a minimum of 30 credit hours of approved graduate work in sociology and related disciplines, plus six hours of applied project credit, for a total of 36 credit hours.

Code	Title	Credits
SOC 8960	APPLIED PROJECT (6 Hours Required)	1-6

Project Committee

Students will form a project committee that consists of:

- a committee chair from within the department
- a representative from the project site
- at least one other faculty member from the university with expertise or interest in the project

Prior to beginning the project, students must have their proposal formally approved by the project committee. Students must also have their final project report approved. While the project site representative must sign off on the proposal approval form, only the UNO faculty members will be responsible for approving the final project.

Non-Thesis Option

The non-thesis, comprehensive exam option is recommended for students who wish to maximize their exposure to coursework in sociology and related disciplines.

Coursework

Students must complete a minimum of 36 credit hours of approved graduate work in sociology and related disciplines.

Comprehensive Exam

The comprehensive examination focuses on the student's coursework, particularly the topical focus area developed by the student. Students will

answer one of two questions on sociological theory, one of two questions on research methods, and one of two questions from the focus area.

The exam is a one-week take-home exam to be scheduled in consultation with the Graduate Program Chair. Students will work with the Graduate Program Chair to select 2 readers for each section (theory, research methods, focus area). Each of the three sections of the exam will be evaluated separately on the following basis:

- high pass
- pass
- conditional pass
- or fail

In the case of a conditional pass in a section or sections, the students will have an opportunity to revise their answers for reevaluation by the faculty readers.

In the case of a failing evaluation in a section or sections, the student will have one more opportunity per section to re-take the exam. The student will answer the other of the two questions they were originally presented with for each failing section. Both readers will evaluate the new answer(s), with conditional pass available as a possible recommendation.

Total Credit Hours

Thesis Option: 30
Project Option: 36
Non-Thesis Option: 36

SOC 8010 CLASSICAL SOCIOLOGICAL THEORY (3 credits)

This course surveys the nineteenth century writers whose ideas have had a strong influence on the development of contemporary sociology and sociological theories. It examines work in such areas as: structural functionalism; conflict theory; rationalism; and the beginnings of modern symbolic interaction, feminist, and race theory. The course emphasizes a close reading of original texts, as well as seminar-style class discussions.

Prerequisite(s)/Corequisite(s): Graduate; permission of instructor if outside Sociology MA program.

SOC 8020 CONTEMPORARY SOCIOLOGICAL THEORY (3 credits)

This course reviews some of the most important developments in contemporary sociological theory. It examines work in such areas as: symbolic interactionism, phenomenology and ethnomethodology; dramaturgical analysis; functionalism and neo-functionalism; structuralism, post-structuralism and postmodernity; postcolonial and subaltern studies; neo-marxism; critical theory; critical race studies; feminist theory; cultural theory; and world systems and globalization theory. The course emphasizes a close reading of original texts, as well as seminar-style class discussions.

Prerequisite(s)/Corequisite(s): Graduate; permission of instructor if outside Sociology MA program.

SOC 8030 SOCIOLOGICAL INQUIRY & RESEARCH DESIGN (3 credits)

This course focuses on the research design process from a sociological perspective. It gives broad, intermediate-level coverage to social science research methodology, with an emphasis on the logic of research procedures. Topics covered include the relationship of theory and research, causal analysis, sampling, and quantitative and qualitative design approaches.

Prerequisite(s)/Corequisite(s): Graduate; undergraduate course in research methods; permission of instructor if outside Sociology MA program.

SOC 8040 SOCIOLOGICAL STATISTICS (3 credits)

This course focuses on intermediate statistics and data analysis as applied to social research. Topics include descriptive statistics, probability, significance tests, multiple regression, and more advanced topics as time permits. Students will also learn how to utilize computer software packages to perform statistical analyses.

Prerequisite(s)/Corequisite(s): Graduate; undergraduate statistics course; permission of instructor if outside Sociology MA program.

SOC 8050 SEMINAR ON TEACHING: PEDAGOGICAL THEORY AND PRACTICE (3 credits)

A survey of various approaches to teaching at the college level (including critical, feminist, and other pedagogical theories) as well as strategies that can be employed in teaching. Topics include: syllabus and course design, evaluation and assessment strategies, developing a teaching style and philosophy, and the scholarship of teaching and learning. Emphasis is on preparing new teachers in sociology, but the course is intended for any graduate student who may already be teaching or anticipates teaching in the future.

Prerequisite(s)/Corequisite(s): Enrollment in the graduate program in sociology or permission of the instructor.

SOC 8060 QUALITATIVE METHODS (3 credits)

This course familiarizes students with contemporary qualitative methodologies and techniques by which the social sciences explore social and cultural relations in natural settings. Students will conduct individual and or group field projects.

Prerequisite(s)/Corequisite(s): Graduate standing or permission of the instructor.

SOC 8100 SOCIAL INEQUALITY (3 credits)

This course examines social inequality from a sociological vantage point. Students will review theoretical frameworks for studying social inequality, processes that result in the unequal distributions of individual resources, empirical analyses of inequality, and the consequences of various inequalities for intergenerational social mobility. While the course focuses on inequality in the United States, global and international dimensions of social inequality are also covered.

Prerequisite(s)/Corequisite(s): Graduate; permission of instructor if outside of Sociology MA program

SOC 8136 SOCIOLOGY OF DEVIANCE (3 credits)

This course introduces students to the sociological study of behaviors that have been labeled as "deviant" because they presumably violate social norms. The course takes a constructionist approach, critically analyzing how deviance is socially defined, organized, and managed. Students will be challenged to see the diversity and pervasiveness of deviance in society and to question the labelling of behaviors, individuals, and powerless groups as deviant. We will explore the social processes, powerful actors, and social institutions that create deviance as well as efforts to resist definitions of deviance. (Cross-listed with SOC 4130).

Prerequisite(s)/Corequisite(s): Graduate standing.

SOC 8146 URBAN SOCIOLOGY (3 credits)

This course examines classical and contemporary sociological theories on city formation, the urbanization process, and the interaction of society and the built environment. Topics covered include suburbanization, gentrification, residential segregation, social networks, crime, housing, city culture, and public policy. The focus is on U.S. cities with selected comparisons to other world regions. Students will also get basic knowledge and exposure to research methods to study urban areas locally. (Cross-listed with SOC 4140).

Prerequisite(s)/Corequisite(s): Graduate standing, or permission of instructor

SOC 8156 AMERICAN FAMILY PROBLEMS (3 credits)

This course explores the problems and issues faced by contemporary American families, such as racism and sexism; the challenges of childhood and adolescence; divorce and remarriage; work and family conflict; and family violence. The difficulty of defining both "family" and "problems" is addressed throughout the course. (Cross-listed with SOC 4150)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

SOC 8176 SOCIOLOGY OF FATHERHOOD (3 credits)

This course examines the existing social science research on fatherhood, exploring topics such as the evolution, history, demography, and politics of fatherhood; father involvement and its relationship to both children's and men's well-being; the effects of diversity and family structure on fatherhood; and public policy surrounding fatherhood. (Cross-listed with SOC 4170)

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

SOC 8186 OCCUPATIONS & CAREERS: FULFILLMENT AND CHALLENGES AT WORK (3 credits)

This course examines what makes individuals and groups happy and satisfied with their jobs, and the factors that can turn "a dead-end job" into a meaningful pursuit that lasts decades. The course utilizes a life course approach and covers early socialization experiences to retirement transitions. It also employs a sociological lens to explore how individual experiences in the work realm are affected by stratification (such as race/ethnicity, gender, sexuality, social class, and parental status) and as well as by occupational norms and structures, workplace relationships, and culture and practices at the organizational and societal levels. (Cross-listed with SOC 4180).

Prerequisite(s)/Corequisite(s): Enrollment in sociology graduate program or permission of the instructor.

SOC 8200 HEALTH & SOCIETY (3 credits)

The course provides a critical sociological understanding of health, illness, healing, and medical care within a social context. The focus ranges from examining health and illness behavior and patient-provider interaction to issues addressing the social organization of health care and medicine.

Prerequisite(s)/Corequisite(s): Graduate standing.

SOC 8216 DISABILITY AND SOCIETY (3 credits)

This course takes a sociologically grounded but interdisciplinary look at the past, present, and potential future of disability. Along the way, competing models and theories of disability are critically explored and substantive issues pertaining to the social experiences and social responses to people with disabilities are discussed. (Cross-listed with SOC 4210)

Prerequisite(s)/Corequisite(s): SOC 1010 and junior or senior standing; or permission of instructor. Not open to non-degree graduate students.

SOC 8246 SOCIAL TRANSFORMATIONS IN LATIN AMERICA (3 credits)

The course reviews the main social, economic, and political forces that have shaped Latin American societies, and the sociological theories used to understand Latin American development and underdevelopment. Race, ethnicity, gender and class in Latin America, as well as the region's position in the global economy are examined. (Cross-listed with SOC 4240, LLS 4240, LLS 8246).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

SOC 8256 CRISSCROSSING THE CONTINENT: LATIN AMERICAN MIGRATIONS (3 credits)

In this course we will use an interdisciplinary lens to study the changes and continuities of migration in the Americas. The course starts with an overview of immigration to the Americas during the first era of mass migration (1850-1920) to explore the relevance of European migrations for national and identity constructions in the Southern Cone of America. Students then will be introduced to the impacts of social and political change on emigration flows, both regionally and beyond the region. They will also explore migration related policies at the national and regional level. We will also study the changes and continuities in the migration system of the Americas. Lastly, we will analyze the new North-South migration, as well as immigration to Latin America from Asia (recent and historical), Europe, and Africa. (Cross-listed with SOC 4250, LLS 4250, LLS 8256).

Prerequisite(s)/Corequisite(s): Graduate standing

SOC 8316 SOCIOLOGY OF SEXUALITIES (3 credits)

This class focuses on the social construction of sexualities - especially heterosexual sexualities, bisexual sexualities, and homosexual sexualities. A primary focus of the class will be LGBT/Queer Studies. The class examines how sexual desires/identities/orientations vary or remain the same in different places and times, and how they interact with other social and cultural phenomenon such as government, family, popular culture, scientific inquiry, and race, gender, and class. (Cross-listed with SOC 4310)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

SOC 8356 WORK & FAMILY (3 credits)

This course examines the contemporary problems that individuals, families and communities in the U.S. have in integrating work and family/personal life. (Cross-listed with SOC 4350)

SOC 8446 HUMAN CONNECTION, LONELINESS, & HEALTH (3 credits)

This course examines the "loneliness epidemic" through a sociological perspective and is based on the premise that loneliness is a public health issue, as research consistently shows it is associated with a vast array of physical and mental health outcomes. After discussing the extent of loneliness and how to define it by distinguishing it from other types of social pain, the course covers: 1) the extent and nature of loneliness and its cultural/social sources; 2) the pathways from loneliness to health outcomes; and 3) possible interventions to reduce loneliness and improve public health. (Cross-listed with SOC 4440).

Prerequisite(s)/Corequisite(s): Graduate standing.

SOC 8500 COMPLEX ORGANIZATIONS (3 credits)

This graduate seminar provides an overview focused on the understanding and analysis of intricate internal and external organizational forces such as organizational bureaucracy, organizational culture, autonomy and control systems, which affect performance of organizational members as well as influence organizational survival. (Cross-listed with CACT 8500)

Prerequisite(s)/Corequisite(s): Graduate enrollment or permission of class instructor.

SOC 8550 ORGANIZATIONAL CULTURE (3 credits)

This course will discuss the various dimensions of organizational cultures and their consequences to organizational life. Emphasis will be placed on the significance of culture to human behavioral patterns, and the analysis of how organizational cultures shape the behavior and performance of organizational members. The course will prepare students for leadership success in organizations using advanced knowledge of organizational culture.

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

SOC 8556 ORGANIZATIONAL DIVERSITY AND INCLUSION (3 credits)

This course provides advanced-level knowledge of the structural understanding, assessment, analysis, and management of social diversity as well as successful inclusion strategies in the workplace. Concepts and theories dealing with structural basis of the creation of difference, consequences of difference, inclusion, affirmative action, and diversity consulting skills are fully examined in this course. This course will prepare students for successful leadership in diverse organizational environments. (Cross-listed with SOC 4550)

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

SOC 8600 SEMINAR IN SOCIAL ORGANIZATION (3 credits)

Graduate seminar on the sociological analysis of organizational fields and an in-depth study of one organizational system, such as decision-making, authority, communication, change, supervision, technology, bureaucracy, and reward system, in one organizational type within one organizational field. As seminar topics change, this course may be repeated twice in a student's program without implying duplication.

Prerequisite(s)/Corequisite(s): Graduate standing and SOC 4620/8626; or permission of instructor.

SOC 8626 APPLIED FORMAL ORGANIZATIONS (3 credits)

An advanced-level applied organizational sociology course that uses organizational theory, concepts, research, and practice to examine the structural bases of organizational effectiveness, efficiency, survival, and actions of organizational members. The course is designed to prepare students for organizational leadership using advanced knowledge and skills of organizational sociology. (Cross-listed with SOC 4620).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

SOC 8706 WOMEN'S HEALTH AND ISSUES OF DIVERSITY (3 credits)

This course provides a critical understanding of the inter-relationship between socio-cultural, economic, and political factors and women's physical and mental health. The aim is to provide an overview of the experience with the health care system. Emphasis will be on critically examining recent scholarship from a sociological, behavioral, health policy perspective. (Cross-listed with SOC 4700, PHHB 4700, PHHB 8706)

Prerequisite(s)/Corequisite(s): Graduate standing.

SOC 8746 SOCIAL JUSTICE AND SOCIAL CHANGE (3 credits)

This course investigates the economic, political and social constraints on equality present in local, national and global arrangements. Students will gain a theoretical understanding of these conditions as well as those that lead to social change, spanning from day-to-day resistance techniques to large scale social movements. Students will participate in a service learning or applied project as they explore contemporary social justice issues and learn both theoretical and practical tools needed to become successful change makers, activists, or community organizers. Examples of social justice movements or campaigns form the basis for understanding injustice at a local, national, and global level. (Cross-listed with SOC 4740)

Prerequisite(s)/Corequisite(s): SOC 1010 and junior standing; or permission of instructor.

SOC 8766 ENVIRONMENTAL SOCIOLOGY (3 credits)

This course is an introduction to environmental sociology, a field of sociology that explores the interaction between the environment and society. Environmental sociologists consider how political, social, and economic factors have come to shape our patterns of interaction with the natural and built environment. Students will be expected to use the sociological perspective to understand the landscape of environmental problems, focusing on such issues as environment and health, disaster, environmental policy, climate change, environmental risk, human and animal interactions, sustainability, environmental justice and social movements. (Cross-listed with SOC 4760).

SOC 8776 POLITICAL SOCIOLOGY (3 credits)

This course explores political sociology, focusing on political processes and power. Political sociologists investigate relationships between political institutions and various other institutions, including but not limited to the economy, education, media, and religion, and the impacts that these relationships have on society and the individuals that comprise the society. This course will explore the concepts, theories, and knowledge that comprise this field such as power, legitimacy, the state, networks, stratification, and collective action. (Cross-listed with PSCI 4770, PSCI 8776, SOC 4770).

Prerequisite(s)/Corequisite(s): Graduate standing

SOC 8786 URBAN LATIN AMERICA (3 credits)

This course examines the experience of Latin American urbanization, attending to its contributions to urban sociology, social movements, and policymaking. Topics include urban transitions (e.g. pre-Hispanic to colonial, post-colonial to industrial, and the neoliberal turn), socio-spatial configurations (e.g. plazas, squatter settlements), urban marginality debates, urban politics, and planning as well as governance innovations (e.g. bus rapid transit systems, participatory budgeting). Students will compare city case studies across the region and to urban life in the United States. (Cross-listed with SOC 4780, LLS 4780, LLS 8786).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor

SOC 8806 CONTEMPORARY TOPICS IN SOCIOLOGY (3 credits)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 4800)

Prerequisite(s)/Corequisite(s): Sociology major; or permission of instructor.

SOC 8836 SOCIOLOGY OF MENTAL HEALTH & ILLNESS (3 credits)

This course will apply the sociological perspective to various topics regarding mental health and illness. The course will cover topics such as the social construction of mental illness, the social epidemiology of mental illness, labeling and stigma of those with a mental illness, and mental health policy/treatment. (Cross-listed with SOC 4830)

Prerequisite(s)/Corequisite(s): SOC 1010, and junior standing; or permission of the instructor.

SOC 8856 SOCIOLOGY OF RELIGION (3 credits)

This course looks at religion as a social and cultural phenomenon, examining how religious beliefs, practices, institutions and movements shape and are shaped by their social context. Topics include: sociological theories and explanations of religion and spirituality; definitions of religion and the distinction between religion and other ideologies or worldviews; the measurement of religiosity and the scientific study of religion; trends in religiosity, spirituality, and the religious landscape historically and globally; sociological insights gained from the study of new religions, secularization, fundamentalism, and other issues related to contemporary religious experience. (Cross-listed with SOC 4850)

Prerequisite(s)/Corequisite(s): SOC 1010 and junior standing; or permission of instructor

SOC 8886 CONTEMPORARY TOPICS IN SOCIOLOGY (ONE CREDIT HOUR) (1 credit)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 4880).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

SOC 8896 CONTEMPORARY TOPICS IN SOCIOLOGY (TWO CREDIT HOURS) (2 credits)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 4890).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

SOC 8950 PRACTICUM IN APPLIED SOCIOLOGY (3 credits)

A practical work experience under supervision that provides opportunity for applying principles from the student's academic area of concentration.

Prerequisite(s)/Corequisite(s): Graduate sociology major. Not open to non-degree graduate students.

SOC 8960 APPLIED PROJECT (1-6 credits)

This capstone experience in the applied project option is an independent research project conducted in an applied setting under the supervision of a graduate faculty member in the department..

Prerequisite(s)/Corequisite(s): Graduate sociology major; permission of the graduate program chair. Not open to non-degree graduate students.

SOC 8980 INDEPENDENT STUDY IN SOCIOLOGY (1-3 credits)

Guided reading or independent research in special topics in Sociology under the supervision of a member of the Sociology faculty. This course is designed primarily for the student interested in topics not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated once for credit.

Prerequisite(s)/Corequisite(s): Permission of the instructor. Not open to non-degree graduate students.

SOC 8990 THESIS (1-6 credits)

A research project, written under the supervision of a graduate advisor in the Department of Sociology & Anthropology, in which the student designs, conducts, and completes an original, independent, scholarly investigation at a graduate level. The research topic and the completed project must be approved by the student's departmental committee.

Prerequisite(s)/Corequisite(s): Permission from Graduate Chair. Not open to non-degree graduate students.

SOC 9110 APPLIED SOCIAL GERONTOLOGY (3 credits)

An overview of social gerontology with an emphasis on the interplay between social, psychological and physical elements in later life. Restricted to graduate students only; required of gerontology students. (Cross-listed with GERO 9110)

Prerequisite(s)/Corequisite(s): Graduate.

Special Education, MS

Department of Special Education, College of Education, Health, and Human Sciences

Vision Statement

The mission of the Department of Special Education and Communication Disorders is to prepare dedicated practitioners, reflective scholars, and responsible citizens who are unique in their ability to facilitate, design, implement, and evaluate programs for individuals with disabilities.

This is accomplished by creating opportunities for the acquisition and maintenance of knowledge, skills, and dispositions as prescribed by the Council for Exceptional Children, the Council on Academic Accreditation in Audiology and Speech-Language Pathology (for graduate program only), and state and federal regulations.

Graduate candidates follow a course of study with accompanying practical experiences that are grounded in learned society theory, research, evidence-based practice, and experience. Our candidates develop essential interpersonal skills that make them valued members of collaborative, interdisciplinary teams in a variety of settings. Thus, each program of study is designed to promote problem-solving skills that enable candidates to continue to broaden their skills and enhance their expertise throughout their professional career. These skills facilitate the recognition and

integration of professional ethics with the individual needs and values of the communities they serve.

Program Contact Information

Shari DeVeny, PhD, Graduate Program Chair (GPC)

Program Website (<http://www.unomaha.edu/college-of-education/special-education-communication-disorders/graduate/special-education.php>)

Other Program Related Information

Candidates seeking a master's degree in special education must meet the criteria for admission to the Graduate College and the department. Graduate-level hours taken as a non-degree student may be subsequently included in a program of study at the discretion of the graduate program committee and the dean for graduate studies. The department adheres to all restrictions on non-degree students. No student with non-degree status may enroll in a practicum course. Candidates completing the degree program meet the academic requirements for PK-6, K-6 or 7-12 endorsement by the Nebraska Department of Education. Candidates may complete practicum experiences at both the K-6 and 7-12 levels. One of these practicum experiences may be completed in the candidate's classroom. The other must be completed outside the candidate's classroom.

Praxis II Contest Test Information

All candidates seeking an endorsement in special education (Special Education Generalist, or 33-hour Behavior Intervention Specialist) for the first time, are required to receive a **passing score** on the **Praxis II** content test in each endorsement area of their preparation prior to the endorsement being recommended. This link (<http://www.ets.org/praxis/ne/requirements/>) will take you to the ETS website page for the Nebraska Department of Education requirements, which lists the Nebraska requirements for each endorsement area.

Unclassified Students

Students who are not planning to pursue a program leading to a graduate certificate or a master's degree can be admitted to the special education program as unclassified students. Candidates holding a previous master's degree in education who are seeking additional teaching endorsements may wish to choose an unclassified status. Unclassified students are allowed to take courses for which they meet the prerequisite. Successful completion of graduate courses as an unclassified student does not obligate the department to accept those courses for credit toward the fulfillment of degree requirements. Formal advisement in an endorsement area is required.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

- Fall: July 1
- Spring: November 1
- Summer: April 1

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined

country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.

- Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** Include a formal written statement, at least one page in length, of why you want to pursue a master's degree in special education. Explain your current job/position, career goals and additional experiences with individuals with disabilities.
- **Letters of Recommendation:** Two Letters of Professional/Academic Recommendation are required. These recommenders should be able to speak to the graduate's undergraduate academic work, the applicant's potential to do graduate work, and/or the applicant's professional competence.
- Personal and Professional Fitness Form
- Copy of teaching certificate
- All candidates must have completed SPED 4800/SPED 8806 and SPED 1500 or SPED 8030 (or an equivalent to any of these), and methods courses in reading and math.

Degree Requirements

Code	Title	Credits
Concentration		
Select an area of concentration:		
	Applied Behavior Analysis Concentration	
	Behavior Intervention Specialist Concentration	
	Special Education Generalist	

Exit Requirements

Once course work is completed candidates must successfully pass a comprehensive examination or write a thesis to receive a Master of Science degree.

Code	Title	Credits
	Comprehensive Examination	
SPED 8990	THESIS	6

All candidates should carefully review the Graduate College requirements for forming the Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of the thesis.

All candidates must complete 6 credit hours in SPED 8990 in order to receive a Master's of Science degree in special education.

Graduate-Level Practicums

All candidates must obtain the permission of their academic advisor prior to applying for and registering for practicums. All candidates who are adding an endorsement must complete one (or more) practicum experience(s) as part of their preparation. At least one of these experiences must be an all-day, 16-week experience in the endorsement area. **Applications will not be considered unless all materials are submitted by September 15 for spring practicum and February 1 for fall practicum.**

The department will issue a permit that allows the candidate to enroll in the appropriate practicum course. It is the candidate's responsibility to apply for the proper course. Professional seminars are required as part of the experience and attendance is mandatory.

Candidates may be removed from their placement at the request of the candidate, department, or school district/community agency.

SPED 8816	BEHAVIOR INTERVENTIONS AND SUPPORTS	3
Generalist Concentration Option Courses		
Select one of the following options:		6-9
K-6 Option—Select three of the following (must be graduate only - 8xx0):		
SPED/COUN 8016	MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS	
SPED/COUN 8656	TRANSITION PLANNING	
SPED 8806	SOCIAL AND EMOTIONAL DEVELOPMENT OF CHILDREN AND YOUTH	
SPED 8820	CHARACTERISTICS OF EMOTIONAL AND BEHAVIORAL DISORDERS	
SPED 8850	INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH EMOTIONAL AND BEHAVIORAL DISORDERS	
SPED 8870	AUTISM SPECTRUM DISORDERS: BEHAVIORAL SUPPORT AND INTERVENTIONS	
Or other course as approved by your advisor		
7-12 Option:		
SPED/COUN 8656	TRANSITION PLANNING	
Select two of the following (3 hours out of the 6 hours required must be graduate only - 8xx0):		
SPED/COUN 8016	MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS	
SPED 8806	SOCIAL AND EMOTIONAL DEVELOPMENT OF CHILDREN AND YOUTH	
SPED 8820	CHARACTERISTICS OF EMOTIONAL AND BEHAVIORAL DISORDERS	

SPED 8850	INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH EMOTIONAL AND BEHAVIORAL DISORDERS
SPED 8870	AUTISM SPECTRUM DISORDERS: BEHAVIORAL SUPPORT AND INTERVENTIONS
Or other course(s) approved by your advisor	
Total Credits	36-39

A student can enroll only twice in each graduate course included on a plan of study. If the course is not successfully completed on the second attempt, the student will be dismissed from the program. An enrollment is defined as being enrolled in the course after the last day to withdraw via MavLINK and receive a 100% refund. The last day to withdraw will be stated in the current academic calendar. (<https://www.unomaha.edu/registrar/academic-calendar.php>) In addition to the Quality of Work Standards established by the Graduate College, students may only repeat a graduate level course on a plan of study one time in which they receive any grade, including "W" or "I".

SPED 8000 SPECIAL PROJECTS (1-3 credits)
 This course is designed to allow graduate candidates to pursue independent study of a topic under the direction and guidance of a faculty member. Topics studied and the nature of the learning activities is mutually agreed upon by the candidate and instructor.
Prerequisite(s)/Corequisite(s): Permission by the instructor. Not open to non-degree graduate students.

SPED 8016 MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS (3 credits)
 This course explores the role that educators and school mental health professionals play in identifying the risk factors and warning signs of children and youth with mental health concerns. Students will understand the risk and protective factors at the individual, family, school, and community level as related to children and youth's mental health. The course will provide an overview of externalizing and internalizing disorders as well as school-based and community-based treatments and interventions. (Cross-listed with COUN 4010, COUN 8016, SPED 4010).
Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

SPED 8030 TEACHING STUDENTS WITH EXCEPTIONALITIES (3 credits)
 This course is designed to describe the characteristics and learning styles of students with various exceptional learning needs. This course also is intended to provide candidates with a knowledge base for the foundation of special education including the basic procedural flow of referral, identification and instruction and strategies for modifying the learning environment and individualizing instruction.
Prerequisite(s)/Corequisite(s): Graduate standing.

SPED 8046 WORKSHOP IN SPECIAL EDUCATION OR SPEECH-LANGUAGE PATHOLOGY (1-6 credits)
 The purpose of this course is to provide workshops or special seminars in the area of special education and communication disorders. This course will prepare graduate candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. (Cross-listed with SPED 4040).
Prerequisite(s)/Corequisite(s): Must have graduate status and permission.

SPED 8100 RESEARCH PROJECTS (1-3 credits)
 The purpose of this course is to allow candidates to participate in research activities other than those related to the thesis. Specific course content and type of research will be dependent on the nature of the intended research and must be approved by the supervising advisor and Department Chair prior to registration.
Prerequisite(s)/Corequisite(s): Graduate standing and admitted into a special education or speech-language pathology program of study.

SPED 8120 HIGH INCIDENCE DISABILITIES (3 credits)

This introductory course is designed to examine characteristics of learners with high incidence disabilities and the impact of those characteristics on learning. The focus will be on the manifestation of disabilities including learning disabilities, behavior disorders, mild to moderate intellectual disabilities, speech and language disorders, attention-deficit hyperactivity disorders, and autism spectrum disorders.

Prerequisite(s)/Corequisite(s): Graduate Standing.

SPED 8236 LANGUAGE DEVELOPMENT AND DISORDERS FOR TEACHERS (3 credits)

This course is designed to introduce the candidate to the nature and structure of language, current theories of language, normal first and second language development, language disorders, multicultural issues in language assessment, and contemporary classroom management of language deficits. The topics will be examined from an educational perspective to enhance the teachers knowledge of language and to facilitate classroom management of language deficits exhibited by exceptional children in grades pre-K through 12. (Cross-listed with SPED 4230).

Prerequisite(s)/Corequisite(s): Admission to Graduate College

SPED 8250 LITERACY ASSESSMENT AND INTERVENTIONS FOR STUDENTS WITH DISABILITIES (3 credits)

This course is designed to provide graduate candidates skills and strategies for instructing students with high incidence disabilities, including dyslexia, that struggle to acquire literacy skills. Emphasis is placed on diagnosis and assessment of specific reading and writing difficulties to determine effective instructional strategies. Instructional strategies will address modifications directed at teaching oral language, reading, writing, and spelling skills.

Prerequisite(s)/Corequisite(s): Admission to the Master of Science degree program in special education or permission of the instructor. Not open to non-degree graduate students.

SPED 8300 READINGS IN SPECIAL EDUCATION (1-3 credits)

Reading and discussion of current methodological developments, research, and innovations in special education.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in special education. Not open to non-degree graduate students.

SPED 8646 METHODS AND MATERIALS IN SPECIAL EDUCATION (3 credits)

This course is designed to describe the various instructional methods that have been used successfully in supporting students with disabilities in a variety of settings. This course is also intended to provide pre-service and in-service candidates with knowledge and evidence-based teaching strategies essential for modifying the learning environment and individualizing instruction for students with disabilities. In addition, teaching methods will focus on academic curriculum lesson planning, development of IEPs, selection of instructional methods and materials, and universal design for learning (UDL). (Cross-listed with SPED 4640).

Prerequisite(s)/Corequisite(s): Admission into a Special Education Master's program and SPED 8120. Not open to non-degree graduate students.

SPED 8656 TRANSITION PLANNING (3 credits)

Curriculum oriented for teachers and related professionals to work with the career development and transition of individuals with disabilities within a multicultural and global society. Includes information for elementary through adulthood with emphasis on transition from high school to community living. (Cross-listed with SPED 4650).

Prerequisite(s)/Corequisite(s): SPED 1500. Not open to non-degree graduate students.

SPED 8670 MATH INTERVENTIONS (3 credits)

The purpose of this course is to prepare graduate candidates to teach, co-teach or consult in the area of mathematics interventions. Graduate candidates will examine and apply the existing research in mathematics instruction for students with exceptional needs.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in Special Education. Not open to non-degree graduate students.

SPED 8700 SEMINAR IN SPECIAL EDUCATION (3 credits)

The seminar in Special Education is designed to be one of the very last courses taken by a master's degree candidate. Content covers a wide range of topics such as: 1) continuum of care; 2) educational and community service systems; 3) legislation; 4) family concerns; and 5) comparative special education. Each candidate develops a teaching module on one of the course topics, which is discussed and evaluated in class.

Prerequisite(s)/Corequisite(s): Graduate standing.

SPED 8716 INTERACTIONS AND COLLABORATION (3 credits)

This course is offered to investigate the building blocks of collaboration. Effective interpersonal communication and collaboration skills are presented as the foundation necessary to build relationships among school personnel, families and community members. (Cross-listed with SPED 4710).

Prerequisite(s)/Corequisite(s): Admission to Graduate College

SPED 8720 GRADUATE PRACTICUM IN SPECIAL EDUCATION (3 credits)

This graduate special education practicum course provides candidates with either inservice experience or placement in a school program for students with exceptionalities at an academic level commensurate with the candidate's desired level of the special education generalist endorsement (K-6 or 7-12).

Prerequisite(s)/Corequisite(s): Admission to the graduate program in the desired endorsement, completion of 30 hours of required course work, and permission. Not open to non-degree graduate students.

SPED 8730 ADVANCED GRADUATE PRACTICUM IN SPECIAL EDUCATION (3 credits)

This course provides candidates with a second semester of classroom experience teaching students with disabilities. This experience is for graduate candidates who are extending their endorsement. For students seeking an additional endorsement as a Special Education Generalist, this course would prepare them for endorsement in grades K-6 or 7-12. For students seeking an additional endorsement in Behavior Intervention Specialist, this course would prepare them for endorsement in grades PK-6 or 7-12.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in the desired endorsement and completion of SPED 8720, SPED 8830 or SPED 8840. Not open to non-degree graduate students.

SPED 8806 SOCIAL AND EMOTIONAL DEVELOPMENT OF CHILDREN AND YOUTH (3 credits)

This course is designed to prepare teacher candidates and graduate candidates with the understanding of the psychological, biological and environmental factors that affect the social-emotional development of children and adolescents. Emphasis is placed on the interaction of these factors for children with exceptional learning needs and the implications for the learning environment. (Cross-listed with SPED 4800).

SPED 8810 RESEARCH METHODS IN SPECIAL EDUCATION (3 credits)

This course is designed to provide an examination of the theoretical approaches to conducting educational research, research design and analysis, and interpretation and evaluation of existing research in special education and related fields.

Prerequisite(s)/Corequisite(s): SPED 8120 or permission from the instructor. Not open to non-degree graduate students.

SPED 8816 BEHAVIOR INTERVENTIONS AND SUPPORTS (3 credits)

This course introduces a variety of practical interventions that teachers may use to support the positive classroom behavior of all students within a tiered model. Universal, targeted, and individualized strategies are presented. (Cross-listed with SPED 4810).

SPED 8820 CHARACTERISTICS OF EMOTIONAL AND BEHAVIORAL DISORDERS (3 credits)

This course is designed to assess and examine the causes and characteristics of behavioral disorders, which constitute internalizing, externalizing, and pervasive developmental disorders. Extensive use of the case study method will be used.

Prerequisite(s)/Corequisite(s): Admission to the Master of Science degree program in special education.

SPED 8830 GRADUATE PRACTICUM IN BEHAVIOR INTERVENTION SPECIALIST (3 credits)

This course provides candidates with either an in-service experience or placement in a school program in which the candidate works with students with emotional and behavioral disorders at an academic level commensurate with the candidate's desired level of endorsement (PK-9, or 7-12).

Prerequisite(s)/Corequisite(s): Admission to the graduate program in special education with an emphasis in behavior intervention specialist, completion of 30 hours of the required coursework, and permission by the department. Not open to non-degree graduate students.

SPED 8840 ADVANCED PRACTICUM IN BEHAVIOR INTERVENTION SPECIALIST (3 credits)

This course provides candidates with additional experiences in working with students with disabilities who present challenging behaviors, including emotional disturbance and autism. This course is designed for graduate students who are already endorsed in special education.

Prerequisite(s)/Corequisite(s): Behavior Intervention Specialist program and permission. Not open to non-degree graduate students.

SPED 8850 INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH EMOTIONAL AND BEHAVIORAL DISORDERS (3 credits)

The focus of the course will be on instruction and interventions that are effective for students with behavior disorders such as explicit instruction, social skills support, supporting executive functions, and cognitive strategy instruction.

Prerequisite(s)/Corequisite(s): Graduate standing and successful completion of SPED 8820, not open to non-degree students.

SPED 8860 BEHAVIOR MODIFICATION (3 credits)

This course is designed to equip candidates with the skills necessary to assess, modify, and evaluate behavior in accordance with best practice and research-based approaches. In addition, this course will train candidates on how to conduct a functional behavioral assessment and create behavioral intervention plans in accordance with IDEA.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in special education. Not open to non-degree graduate students.

SPED 8870 AUTISM SPECTRUM DISORDERS: BEHAVIORAL SUPPORT AND INTERVENTIONS (3 credits)

This course is designed to provide information on the behavioral characteristics, instructional needs and necessary curriculum development specifically for children and youth with autism spectrum disorder (ASD).

Prerequisite(s)/Corequisite(s): Admission to the graduate program in special education. Not open to non-degree graduate students.

SPED 8900 SPECIAL EDUCATION LAW (3 credits)

The purpose of this course is to research and explore legal and policy issues affecting special education within our schools. Case law will be examined to ensure effective special education programs for children and youth with disabilities. (Cross-listed with EDL 8900).

Prerequisite(s)/Corequisite(s): Graduate Standing. Not open to non-degree graduate students.

SPED 8910 ASSESSMENT IN SPECIAL EDUCATION (3 credits)

This course provides an overview of measurement and evaluation concepts, strategies, and techniques that are appropriate for students with special needs. Graduate candidates will implement and analyze formal and informal assessments using a systematic and comprehensive approach. Emphasis is placed on those assessment strategies that yield objective data regarding individual learning characteristics that provide a basis for educational decision making.

Prerequisite(s)/Corequisite(s): Graduate standing and SPED 8120

SPED 8920 SPECIAL EDUCATION LEADERSHIP (3 credits)

The purpose of this course is to examine special education administration and leadership issues. This course will focus on policies and procedures necessary to effectively provide leadership to programs for children and youth with disabilities.

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

SPED 8930 INCLUSION/COLLABORATION PRACTICUM (3 credits)

This course provides candidates with a practicum experience in the inclusion/collaboration specialty area with emphasis across PK-12 settings.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in inclusion/collaboration and permission by the department. Not open to non-degree graduate students.

SPED 8960 ADVANCED ASSESSMENT AND INTERVENTION (3 credits)

This course provides graduate candidates with in-depth practicum experiences in the administration and interpretation of standardized academic achievement measures, criterion-referenced tests, informal assessments, and progress monitoring with children experiencing learning difficulties. Emphasis is placed on utilizing assessment information in order to develop and monitor intervention plans.

Prerequisite(s)/Corequisite(s): Admission to the Master of Science degree program in special education; SPED 8910, SPED 8646, SPED 8156, and SPED 8970; or have permission from the instructor. Not open to non-degree graduate students.

SPED 8970 INSTRUCTIONAL STRATEGIES (3 credits)

This course is designed to prepare graduate candidates with in-depth information regarding effective teaching strategies for students with high-incidence disabilities. Primary emphasis is placed on providing students with theoretical and practical foundations in the design and implementation of cognitive strategy instruction and the use of evidence-based practices and the selection and monitoring of individualized interventions.

Prerequisite(s)/Corequisite(s): Admission to the Master of Science degree in special education, SPED 8120, SPED 8646 or equivalent or permission of the instructor. Not open to non-degree graduate students.

SPED 8980 PROFESSIONAL COLLABORATION (3 credits)

This course is designed to prepare candidates to work in collaboration with other professionals and parents to create a learning environment that enhances the potential for academic success and improvement of instructional practices. The focus will be on collaborative problem solving. (Cross-listed with TED 8850).

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

SPED 8990 THESIS (1-6 credits)

This course is intended for all graduate candidates in the Department of Special Education and Communication Disorders who are seeking a Master of Arts degree. The candidate is expected to generate and complete an independent research project under the guidance of a thesis advisor.

Prerequisite(s)/Corequisite(s): Permission of Thesis Committee Chair and TED 8010. Not open to non-degree graduate students.

SPED 9140 ASSESSMENT AND TREATMENT OF AUTISM SPECTRUM DISORDERS (3 credits)

The purpose of this course is to familiarize students with the diagnosis, assessment, and treatment of autism spectrum disorders (ASD). (Cross-listed with PSYC 9140).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Speech-Language Pathology, MS

Department of Special Education, College of Education, Health, and Human Sciences

Vision Statement

The mission of the Department Special Education and Communication Disorders is to prepare dedicated practitioners, reflective scholars, and responsible citizens who are unique in their ability to facilitate, design, implement, and evaluate programs for individuals with disabilities. This is accomplished by creating opportunities for the acquisition and maintenance of knowledge, skills, and dispositions as prescribed by the Council for Exceptional Children, the Council on Academic Accreditation in Audiology and Speech-Language Pathology, and state and federal regulations.

Program Website (<http://www.unomaha.edu/college-of-education/special-education-communication-disorders/graduate/speech-language-pathology.php>)

Other Program Related Information

Program Description

The graduate program in speech-language pathology is designed to prepare speech-language pathologists for Nebraska teacher certification, state licensure, and certification by the American Speech-Language-Hearing Association.

The Master of Science (MS) in speech-language pathology at University of Nebraska at Omaha is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (<https://caa.asha.org/>) (CAA) of the American Speech-Language-Hearing Association (<https://www.asha.org/>), 2200 Research Boulevard #310, Rockville, Maryland 20850, 800.498.2071 or 301.296.5700.

The next CAA re-accreditation on-site review will be in 2028.

The program also is accredited by the Nebraska Department of Education and the Council for the Accreditation of Educator Preparation (CAEP).

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Fall 2022)

- Fall: January 15 for all application materials

Other Requirements

- A bachelor's degree in speech-language pathology or communication disorders; or if bachelor's degree in another field, must have completed the following undergraduate courses in communication disorders: CDIS 4420, CDIS 4460, CDIS 4750, CDIS 4450, CDIS 4430, CDIS 4370, CDIS 4330, CDIS 4390, CDIS 4490, CDIS 4500, CDIS 4380, CDIS 4470 & CDIS 4480 and a chemistry or physics, statistics, biological sciences (e.g., biology, human anatomy or physiology), social/behavioral sciences (e.g., psychology, sociology, anthropology or public health) courses.
- **Entrance Exam:** Graduate Record Exam is required, the exam must have been completed within within the last five years
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
 - If scores are more than two years old the applicant may be required to retake the exam
- **Statement of Purpose:** The statement of purpose should cover your long range goals in the profession, a summary paragraph of a research-based article in your area of interest, a brief description of what distinguishes you from other highly qualified applicants, and your experience with individual(s) with special needs
- Personal Fitness Statement (form is online with graduate application materials)
- **Letters of Recommendation:** Two letters of recommendation are required
- The program may conduct applicant interviews.

Degree Requirements

- In order to acquire the knowledge and skills requisite to the practice of speech-language pathology to function in a broad variety of clinical situations, and to render a wide spectrum of patient care, individuals must have skills and attributes in five areas: communication, motor, intellectual-cognitive, sensory-observational, and behavioral-social. These skills enable a student to meet graduate and professional requirements as measured by state licensure and national certification. (Council of Academic Programs in Communication and Sciences and Disorders, 2007).
- Candidates must complete a speech-language-hearing screen within the **first 30 days** of enrollment.
- Academic integrity is expected for all interactions and requirements. This includes, but is not limited to: original work on exams, accountability and completion of requirements, maintenance of confidentiality for individuals and class discussions when appropriate, and accurate citation for original work. Plagiarism will result in an automatic failing grade for the assignment. Please refer to the UNO Academic Integrity Policy for more specific descriptions of academic integrity violations.
 - The Praxis I - CORE Academic Skills for Educators test must be successfully passed per NDE requirements within the **first 30 days** of enrollment or the student will be prohibited from registering for classes. Scores must be sent to UNO directly from ETS, using code RA6420.
- A background check and Nebraska Adult and Child Abuse & Neglect Registry Release must be successfully completed prior to enrollment and prior to each externship.

- Each candidate must take the Praxis II - Subject Assessment test. Scores must be submitted prior to applying for graduation. Scores must be sent to UNO directly from ETS, using code RA0174.

Code	Title	Credits
Required Courses		
CDIS 8240	LANGUAGE DISORDERS IN SCHOOL-AGE CHILDREN	3
CDIS 8410	MOTOR SPEECH DISORDERS	3
CDIS 8420	VOICE DISORDERS	3
CDIS 8430	FLUENCY DISORDERS	3
CDIS 8440	APHASIA & RELATED LANGUAGE DISORDERS	3
CDIS 8500	BASIC CLINICAL PRACTICUM IN SPEECH-LANGUAGE PATHOLOGY ¹	6
CDIS 8510	EDUCATIONAL EXTERNSHIP IN COMMUNICATION DISORDERS ⁴	4
CDIS 8520	MEDICAL EXTERNSHIP IN COMMUNICATION DISORDERS ⁴	4
CDIS 8540	AUTISM SPECTRUM DISORDER	2
CDIS 8560	AUGMENTATIVE & ALTERNATIVE COMMUNICATION	2
CDIS 8570	DYSPHAGIA	3
CDIS 8590	EARLY INTERVENTION: BIRTH TO FIVE	3
Electives		
Student, in consultation with an advisor, will select an elective. The 3 hours of elective credit will be waived if the thesis option is chosen. The following list is a sampling of recommended electives:		3
SPED 8016	MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS	
SPED 8030	TEACHING STUDENTS WITH EXCEPTIONALITIES	
SPED 8120	HIGH INCIDENCE DISABILITIES	
SPED 8250	LITERACY ASSESSMENT AND INTERVENTIONS FOR STUDENTS WITH DISABILITIES	
SPED 8656	TRANSITION PLANNING	
SPED 8980/ TED 8850	PROFESSIONAL COLLABORATION	
CDIS 8556	SPECIAL NEEDS STUDENTS FROM DIVERSE COMMUNITIES	
SPED 8970	INSTRUCTIONAL STRATEGIES	
SPED 8820	CHARACTERISTICS OF EMOTIONAL AND BEHAVIORAL DISORDERS	
SPED 8900	SPECIAL EDUCATION LAW	
GERO/PSYC 8476	MENTAL HEALTH AND AGING	
GERO 8506	LEGAL ASPECTS OF AGING	
GERO 8676	PROGRAMS AND SERVICES FOR THE ELDERLY	
GERO 8696/ SOWK 8046	WORKING WITH MINORITY ELDERLY	
Total Credits		42

¹ CDIS 8500 (register three times)

² CDIS 8510 (Schools). Placements for this practicum is made as space permits.

³ CDIS 8520 (Hospitals; Rehabilitation Centers). Placements for this practicum is made as space permits.

⁴ CDIS 8510 and CDIS 8520 each will be taken once for four credit hours each. Students must earn a grade of "B" or better in each of these courses, as students may not retake either course. Failure to achieve a grade of "B" or better in either course will result in automatic dismissal from the program. Withdrawal from 8510 or 8520 is contingent upon written permission of the advisor and current grade of B or better at the time of requested withdrawal. These varied practica are designed to provide the candidate with a wide range of clinical experiences with individuals across the age span, cultural backgrounds, cognitive levels, and disability categories.

****All student clinicians need to earn a B or higher in order to pass externships. Externships may not be retaken.**

Exit Requirements

Non-Thesis Option

- Successfully complete the comprehensive exam.

Thesis Option

- Complete 6 credit hours of SPED 8990
- Successfully complete the SLP Praxis exam.

Speech-Language Pathology Intervention Policy for Content and Clinicals

Every course/clinic assignment in the speech-language pathology program is connected to the Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC) along with the Council on Academic Accreditation Standards (CAA). CFCC and CAA standards are found in each course syllabus and must be successfully met for the course to count toward certification by the American Speech-Language-Hearing Association (ASHA). Please refer to ASHA's website for more information on CFCC and CAA standards (links below).

2020 Standards for the Certificate of Clinical Competence in Speech-Language Pathology

Academic Accreditation Standards for Graduate Programs

Updated Graduate Intervention Policy (<https://www.unomaha.edu/college-of-education-health-and-human-sciences/special-education-communication-disorders/graduate/spth-intervention-policy-updated1-1.pdf>)

CDIS 8240 LANGUAGE DISORDERS IN SCHOOL-AGE CHILDREN (3 credits)

This course focuses on the relationship between spoken and written language and its role in language-based learning disabilities in school-age students. It addresses the characteristics of language and reading impairments; the subtypes of these disorders including dyslexia; and the different diagnostic strategies, assessment tools, and intervention approaches used with them. Various models of language and reading as they relate to development and disorders will be reviewed.

Prerequisite(s)/Corequisite(s): Graduate standing in Speech-Language Pathology and a course in later (school age) language development. Not open to non-degree graduate students.

CDIS 8396 HEARING SCIENCE (3 credits)

This course is designed for undergraduate majors in speech-language pathology and audiology and for graduate candidates in education of the deaf/hard of hearing. The course will include basic terminology, anatomy and physiology of the hearing mechanism, acoustics and physics of sound, the processes of human hearing, elements of basic hearing measurements, psychophysics. This course will prepare speech-language pathology candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. (Cross-listed with CDIS 4390).

Prerequisite(s)/Corequisite(s): Admission to Graduate College

CDIS 8410 MOTOR SPEECH DISORDERS (3 credits)

This course is designed to integrate background information from neurophysiology related to motor speech disorders (MSD). The term motor speech disorders refers to speech deficits and differences resulting from injury to the human nervous system. This course will focus on acquired movement-based disorders of speech production that impact one or more of the following subsystems of speech: respiration, phonation, resonance, and/or articulation, including the dysarthrias and apraxia of speech. This course will entail clinical description and characteristics of the impairments as well as on the psychosocial changes in life activities and participation of individuals who live with MSD.

Prerequisite(s)/Corequisite(s): SPED 4470/CDIS 4470 or SPED 8470/CDIS 8470 or equivalent; graduate standing in Speech-Language Pathology. Not open to non-degree graduate students.

CDIS 8420 VOICE DISORDERS (3 credits)

The purpose of this course is to provide candidates the opportunity to study the disorders of voice in depth so that they are able to effectively orchestrate caseloads including this disorder type. Voice disorders of both organic and functional etiology will be studied. Candidates will have opportunities to conduct instrumental voice evaluation techniques. The disorders will be discussed to cover the range of topics including etiology, symptomology, assessment and diagnosis, prognosis, and treatment, both medical and non-medical.

Prerequisite(s)/Corequisite(s): Graduate standing in Speech-Language Pathology. Not open to non-degree graduate students.

CDIS 8430 FLUENCY DISORDERS (3 credits)

This course examines the types and causes of rate, rhythm, and stress pattern differences as they relate to child, adolescent, and adult fluency disorders. Theory, current research, and contemporary practice information will constitute the foundation within which to address issues of identification, general assessment, differential assessment, prescription, and the implementation and evaluation of treatment strategies. The course is intended for graduate students in speech-language pathology.

Prerequisite(s)/Corequisite(s): Graduate standing in Speech-Language Pathology. Not open to non-degree graduate students.

CDIS 8440 APHASIA & RELATED LANGUAGE DISORDERS (3 credits)

This course is designed to integrate background information from neurophysiology to aphasia and related disorders such as right hemisphere syndrome, traumatic brain injury (TBI), and dementia. The term aphasia refers to linguistic deficits and differences resulting from injury to the human nervous system. This course will focus on acquired cognitive and linguistic-based disorders of the human communication system. This course will entail clinical description and characteristics of the impairments as well as on the psychosocial changes in life activities and participation of individuals who live with aphasia and/or related disorders.

Prerequisite(s)/Corequisite(s): SPED 4470/SPED 8470, CDIS 4470/CDIS 8470 or equiv; grad standing in SLP. Grad SLPs without SPED 4470/CDIS 4470 can concurrently enroll in SPED 4470/SPED 8470 or CDIS 4470/CDIS 8470 with advisor permission. Not open to non-degree graduate students.

CDIS 8470 NEUROPHYSIOLOGY OF SPEECH AND LANGUAGE (3 credits)

The purpose of this course is to provide speech-language pathology graduate candidates an introduction to human neuroanatomy and neurophysiology of the speech, language and hearing mechanisms, across the lifespan. Emphasis is placed on developing an understanding of the neurophysiological underpinnings of human communication and its disorders. Ultimately, the course will prepare speech-language pathology graduate candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world.

Prerequisite(s)/Corequisite(s): Graduate Standing Speech-Language Pathology Majors in the CDIS 4380 or equivalency. Not open to non-degree graduate students.

CDIS 8486 RESEARCH METHODS IN COMMUNICATION DISORDERS (3 credits)

This course will provide candidates with an introductory set of skills to interpret and evaluate research in communication disorders and closely related fields. In addition, this course will provide candidates with basic knowledge regarding research designs and analyses commonly used in communication disorders and related fields. The content addressed in this course will prepare candidates to judiciously evaluate evidence-based practice and apply the scientific method to clinical decision-making. It offers an opportunity to cultivate critical thinking skills imperative to becoming dedicated practitioners, reflective scholars, and responsible citizens who can adeptly meet the ever-evolving challenges of their profession.

Prerequisite(s)/Corequisite(s): This course is designed for graduate and undergraduate students majoring in speech-language pathology and is a required course for speech-language pathology candidates.

CDIS 8500 BASIC CLINICAL PRACTICUM IN SPEECH-LANGUAGE PATHOLOGY (2 credits)

These courses are designed to provide the speech-language pathology candidate clinicians with diverse clinical experiences prior to full-semester clinical externships in the educational, and medical settings.

Prerequisite(s)/Corequisite(s): Graduate standing in Speech-Language Pathology Program, completed any previous semester of 8500 with a B or above, currently maintain at least a 3.0 GPA overall. Permission from program faculty. Not open to non-degree graduate students.

CDIS 8510 EDUCATIONAL EXTERNSHIP IN COMMUNICATION DISORDERS (4 credits)

This course is designed to provide the speech-language pathology candidate with experiences of a clinical nature in educational settings. The purpose of the course is to advance the candidate's skills in the evaluation and management of communication and swallowing disorders.

Prerequisite(s)/Corequisite(s): Successful completion of "Foundation Block" (CDIS 4550/8556; SPED 8030, 8120 or equivalent) and three semesters of SPED 8500/CDIS 8500 unless otherwise indicated. Permission required. Not open to non-degree graduate students.

CDIS 8520 MEDICAL EXTERNSHIP IN COMMUNICATION DISORDERS (4 credits)

This course is designed to provide the speech-language candidate with experiences of a clinical nature in medical settings. The purpose is to advance the candidates' skills in the evaluation and management of communication and swallowing disorders.

Prerequisite(s)/Corequisite(s): Three semesters of SPED 8500/CDIS 8500 unless otherwise indicated plus permission. Not open to non-degree students.

CDIS 8530 SEMINAR IN SPEECH-LANGUAGE PATHOLOGY (3 credits)

This course is designed to provide intensive discussion of research or problems of current professional interest based on current literature in speech-language pathology. This course will prepare candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world.

Prerequisite(s)/Corequisite(s): Graduate standing

CDIS 8540 AUTISM SPECTRUM DISORDER (2 credits)

This course is designed to familiarize candidates with the features of, and interventions for, individuals with autism spectrum disorder. The course will emphasize evidence-based practices when utilizing various methodologies for supporting social and communication skills.

Prerequisite(s)/Corequisite(s): Co-requisite: SPED 8560/CDIS 8560. Admission to the Graduate College. Not open to non-degree graduate students.

CDIS 8556 SPECIAL NEEDS STUDENTS FROM DIVERSE COMMUNITIES (3 credits)

The purpose of this course is to study the impact of cultural and linguistic diversity on communication, learning, and behavior. The contrast between what is considered 'normal' language / learning development and in the presence of culturally and linguistically diverse (CLD) P-12 students will receive special emphasis.

CDIS 8560 AUGMENTATIVE & ALTERNATIVE COMMUNICATION (2 credits)

This course is designed to introduce students to the nature and process of augmentative and alternative communication (AAC), current theories and models of AAC, basic elements of AAC systems, and contemporary AAC clinical practices and principles. Topics will be examined from educational and rehabilitation perspectives as they relate to assessment, prescription, implementation and evaluation. The course will emphasize practical solutions in AAC for children and adults using both high technology and other less-complex communication strategies. Students will explore high-tech, low-tech, and no-tech options of AAC and gain knowledge of and experience with assessment of clients for AAC needs, prescription of an appropriate level of AAC, practice with implementing various AAC systems, and on-going evaluation of the AAC system's effectiveness with clients.

Prerequisite(s)/Corequisite(s): Graduate standing in Speech-Language Pathology program; co-requisite: SPED 8540/CDIS 8540.

CDIS 8570 DYSPHAGIA (3 credits)

This course is designed to integrate background information from neurophysiology to dysphagia. The term dysphagia refers to swallowing disorders resulting from congenital birth anomalies (i.e., cleft palate, cerebral palsy, etc.) as well as acquired injury to the central nervous system (i.e., stroke, head injury, etc.). This course will introduce candidates to bedside, radiographic, and endoscopic assessment procedures as well as direct, indirect, and medical management techniques of dysphagia. Additionally, this course will provide clinical description and characteristics of swallowing impairments as well as on the psychosocial changes in life activities and participation of individuals who live with dysphagia.

Prerequisite(s)/Corequisite(s): SPED 4470/CDIS 4470 or equivalent, graduate standing in speech-language pathology. Not open to non-degree graduate students.

CDIS 8590 EARLY INTERVENTION: BIRTH TO FIVE (3 credits)

This course is designed to provide candidates with knowledge about supporting communicative disorders in young children, and their families, within a multicultural and global framework. It will cover assumptions underlying current approaches to the evaluation and treatment in the developing child. Major emphasis will be upon the theoretical foundations of the study and treatment of communication disorders in children from birth to age five.

Prerequisite(s)/Corequisite(s): SPED 4420/CDIS 4420 or equivalent. Admission to Graduate Program in Speech-Language Pathology. Not open to non-degree graduate students.

Urban Studies, MS

School of Public Administration, College of Public Affairs & Community Service

Vision Statement

Our graduates are social entrepreneurs, urban thinkers and agents of change. The Master of Science in urban studies is the degree for individuals desiring to make a difference in urban areas. UNO's urban studies program is a professional degree that trains leaders to critically analyze urban problems and engage residents in the creation of innovative solutions to conditions in the human community, built environment and natural systems.

Program Website (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/public-administration/academics/msus.php>)

Other Program Related Information

The Master of Science in Urban Studies program has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students with a major in Emergency Management from the UNO School of Public Administration, desiring to pursue a Master of Science in Urban Studies.
- Students should have senior status and must be within at least 30 undergraduate credits yet to complete their undergraduate degree. Exceptional students who do not meet this requirement may be considered.
- Students must have a minimum undergraduate GPA of 3.5.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their undergraduate advisor to register for the graduate courses.
- Students must consult with the Urban Studies advisor prior to enrollment in one of the courses listed below.
- A minimum cumulative GPA of 3.5 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the Urban Studies program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - For this program, if students maintain at least a grade of B+ in courses taken, they will be recommended for admission to the Urban Studies program.
 - The admit term must be after the completion term of the undergraduate degree.

The following courses may be taken under the Fast Track program:

- UBNS 8000:Seminar in Urban Studies
- UBNS 8060:Introduction to Urban Planning
- UBNS 8020:Race, Ethnicity and American Urban Culture**
- UBNS 8200:Community Organizing and Development**
- PA 8010:The Public Economy**

**Must have completed or be concurrently enrolled in UBNS 8000

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, Summer 2022, and Fall 2022)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- The general prerequisite for admission to the urban studies program is a four-year bachelors' degree with a minimum grade point average of 3.0 in the junior and senior years combined (last 50-60 credit hours). Under extenuating circumstances an average below 3.0 will be considered.
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 80, PTE: 53, Duolingo: 105
- Statement of Purpose:** A two-page typed essay on how the MS in urban studies will further the applicant's career objectives must be included with the application for admission
- Resume**
- Letters of Recommendation:** Two letters of recommendation are required

Degree Requirements

Code	Title	Credits
Required Courses		
UBNS 8000/ GEOG 8830	SEMINAR IN URBAN STUDIES	3
PA/AVN 8120	ANALYSIS AND DECISION MAKING	3
PA 8010	THE PUBLIC ECONOMY	3
UBNS/BLST 8020	RACE, ETHNICITY, AND AMERICAN CULTURE	3
GEOG 8056	GEOGRAPHIC INFORMATION SYSTEMS I	4
UBNS 8200	COMMUNITY ORGANIZING AND DEVELOPMENT	3

Electives

Urban studies (UBNS) is an interdisciplinary field. The UBNS strives to expose students to courses taught by faculty in the School of Public Administration who have expertise in urban studies, as well as faculty in other academic units. Students select five elective courses with the approval of the UBNS chair from the following list based on interests in the human community, built environment or natural systems. This is subject to change depending on course availability, and prospective as well as current students should check the program's website periodically for updates approved by the director of urban studies. Electives are intended to give students knowledge and skills that prepare them to manage projects and organizations. Electives currently include, but are not limited to the following:

PA 8030	INTERNSHIP IN PUBLIC ADMINISTRATION (Students who have not had at least two years full-time professional experience in the public or nonprofit sector (experience must have been in the sector of the student's primary future career interest) are required to complete an internship. The internship is taken following completion of preparatory coursework as determined by the director of the urban studies program.)	
CACT 8326	ECOLOGICAL SUSTAINABILITY AND HUMAN HEALTH	
ENVN/CACT 8316	OUR ENERGY FUTURE: SOCIETY, THE ENVIRONMENT AND SUSTAINABILITY	
GEOG 8126	URBAN GEOGRAPHY	
GEOG 8166	URBAN SUSTAINABILITY	
GEOG 8210	SEMINAR IN CULTURAL GEOGRAPHY	
GEOG/GEOL 8616	ENVIRONMENTAL MONITORING AND ASSESSMENT	
PHHB 8360	COMMUNITY HEALTH	
PSCI 8015	URBAN POLITICS	
PA 8436	MUNICIPAL ADMINISTRATION	
PA/BIOL/GEOG 8826	INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS	
PA/AVN 8896	SPECIAL TOPICS PUBLIC ADMIN	
SOC 8100	SOCIAL INEQUALITY	
SOC 8146	URBAN SOCIOLOGY	
SOC 8200	HEALTH & SOCIETY	
SOC 8746	SOCIAL JUSTICE AND SOCIAL CHANGE	
Exit Requirement		
PA 8990	CAPSTONE PROJECT IN PUBLIC ADMINISTRATION	3

Total Credits **37**

Internship

Students who have not had at least two years full-time professional experience in the public or nonprofit sector (experience must have been in the sector of the student's primary future career interest) are encouraged to complete an internship. The internship may be given as a supervised course of three credit hours as part of the 37 hours required in the urban studies program. The internship is taken following completion of preparatory coursework as determined by the director of the urban studies program.

UBNS 8000 SEMINAR IN URBAN STUDIES (3 credits)

This course provides an interdisciplinary overview of the forces influencing and influenced by urbanization and urbanism. (Cross-listed with GEOG 8830)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

UBNS 8020 RACE, ETHNICITY, AND AMERICAN URBAN CULTURE (3 credits)

This course explores two central themes, race and ethnicity, which have played a dominant role in the shaping of American society and American culture. (Cross-listed with BLST 8020).

Prerequisite(s)/Corequisite(s): BLST 1000, BLST 1100, or permission by the instructor.

UBNS 8060 INTRODUCTION TO URBAN PLANNING (3 credits)

This course is an introduction to the development of urban planning as it has shaped and reacted to major trends in U.S. history. It provides students with major themes and traditions in the field of planning and includes planning practice, planning procedures and methods and contemporary issues in the field.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

UBNS 8200 COMMUNITY ORGANIZING AND DEVELOPMENT (3 credits)

This course focuses on various theories and applications of organizing communities and neighborhoods to effect change. Of particular interest is the role of engaging citizens in improving their communities.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

UBNS 8500 URBAN POLICY (3 credits)

Seminar on urban policies and policymaking. Attention is given to various current urban issues and the policy options surrounding them. Policy theories, policy processes, and the institutions of policymaking in cities are covered. Topics of focus include policies related to policing, economic development, land use, transportation, education, poverty, housing, and ordinances.

Prerequisite(s)/Corequisite(s): Graduate student standing, but open to non-degree seeking students with Bachelor's degree; open to certificate students

UBNS 8820 COMPARATIVE URBAN STUDIES (3 credits)

Emphasis is upon contrasting the cities of the developed and developing areas of the world

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

UBNS 8940 DIRECTED RESEARCH IN URBAN STUDIES (3 credits)

The course is intended for advanced graduate students in urban studies or geography. It is especially suited for those in-career students who have had their internships waived and who might profit more by in-depth research on a problem of urban studies rather than additional classroom courses. (Cross-listed with GEOG 8840).

Prerequisite(s)/Corequisite(s): Completed 9 graduate hours in Urban Studies. Permission from the School. For Geography students, GEOG 8126 (Urban Geography) or permission from the School.

Writing, MFA

Writer's Workshop Department, College of Communication, Fine Arts & Media

Vision Statement

The MFA in Writing is a two-year program of focused instruction for creative writers who are committed to a literary career. The program comprises four 16-week distance writing seminars and five 10-day, conference-style Nebraska residency sessions. The seminars and residencies are integrated to help those who need to hone their writing and critical thinking in order to participate competitively in the wider domain of contemporary American letters. In a two-year course of study, the student earns 60 credit hours toward a Masters of Fine Arts degree in one of six genres: fiction, creative nonfiction, poetry, young adult, playwriting, or screenwriting.

Program Contact Information

Kevin Clouther, Program Coordinator
221 Weber Fine Arts Building (WFAB)

kclouther@unomaha.edu

Miles Waggener, MFA, Graduate Program Chair
217 Weber Fine Arts Building (WFAB)
402.554.2151

mwaggener@unomaha.edu

Program Website (<http://www.unomaha.edu/unmfaw/>)

Other Program Related Information

- The MFA in Writing is low-residency.
- Upon acceptance, a \$500 non-refundable deposit is required to hold the student's place in the program. This deposit is applied toward the first residency's meals and lodging fee.

Admissions

General Application Requirements and Admission Criteria (p. 945)

Program-Specific Requirements

Application Deadlines (Spring 2022, and Fall 2022)

- Fall: June 1
- Spring: November 1
- Summer: NA

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>) must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 550, Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- **Statement of Purpose:** A one- to two-page single-spaced self-assessment of your background in writing, reasons for wanting to enter the MFA program, and your goals as a writer.
 - For **fiction, creative nonfiction, poetry, and young adult** include any other experience you have in the wider community of literature (e.g. organizing or participating in workshops, attending conferences, working for literary magazines, etc.).
 - For **playwriting and screenwriting**, include any specific experience as it pertains to screenwriting or to full-length plays, one-act plays, and ten-minute plays, as well as any experience in other areas of film or theatre.
- **Writing Sample:** A manuscript representing your best work in the genre track (fiction, creative nonfiction, poetry, young adult, playwriting, or screenwriting) for which you are applying.
 - 15 pages of poetry
 - 15-20 pages of playwriting
 - 30 pages of screenwriting
 - 30-40 pages of fiction, creative nonfiction, or young adult
- **Letters of Recommendation:** Two letters of recommendation from persons who can attest to your ability to complete a course of graduate study, the ability to work independently, and/or the quality of your prior literary achievements.

NOTE: Your statement of purpose and your writing sample must be submitted in your online application in .pdf format. Manuscripts should be in 12-point typeface with 1" margins. Prose should be double-spaced; poetry may be single-spaced. Playwriting submissions should follow standard playwriting format; screenwriting submissions should follow standard screenwriting format. Material in genres other than the one in which you are applying will not be read. For specific information, as well as current residency dates for the program, please consult the program website

(<https://www.unomaha.edu/college-of-communication-fine-arts-and-media/writers-workshop/mfa-program/>).

Degree Requirements

PATHWAY 1 Traditional MFA in Writing

Currently enrolled and new students are automatically enrolled in this pathway, unless otherwise approved.

PATHWAY 2 Partial Substitution of Credit Hours Already Earned

Students who have successfully completed graduate-level coursework at UNO or any accredited institution can reduce costs by requesting that up to 18 hours of previously earned credit be applied to the UNO MFA in Writing degree. Subject to individual approval.

PATHWAY 3 Partial Substitution of Credit Hours Earned Through Additional Coursework

Students have the option to enroll in a limited number of approved courses offered online or on any University of Nebraska campus and have those credits substituted for required MFA degree credit hours. Subject to individual approval.

Required Residency Session

Code	Title	Credits
MFAW 8700	RESIDENCY SESSION	3

Register for one 3-hour session per semester (4 semesters)

Residencies are conference-style sessions (10 days) consisting of workshops of student writing, craft and theory classes, individual conferences with mentoring faculty, and readings.

Writing Options (choose one)

Seminars

Seminars are semester-long (16 weeks) supervised distance studies in writing, during which the student corresponds regularly with a faculty mentor on the work that was proposed during the preceding residency session. At least four times a semester, the student must submit creative and critical writing to the faculty mentor. The mentor will respond with revisions, suggestions for further readings, and discussion. Students must register for one 12-hour seminar session per semester for four semesters.

Code	Title	Credits
Fiction		
MFAW 8830	FICTION SEMINAR	12
Non-Fiction		
MFAW 8840	NONFICTION SEMINAR	12
Playwriting		
MFAW 8850	PLAYWRITING AND SCREENWRITING SEMINAR	12
Poetry		
MFAW 8820	POETRY SEMINAR	12
Exit Requirements		
MFAW 8710	GRADUATING RESIDENCY SESSION	0

Total Credit Hours: 60

MFAW 8700 RESIDENCY SESSION (3 credits)

A ten-day colloquium presenting lectures, classes, workshops, readings and individual conferences with seminar faculty. Taken 4 times, the Residency Session ends one seminar session and begins the next. The session affords students intensive contact with faculty and peers before returning to their writing projects.

Prerequisite(s)/Corequisite(s): Admission to MFA in Writing program. Permission of the Program Director. Not open to non-degree graduate students.

MFAW 8710 GRADUATING RESIDENCY SESSION (0 credits)

The Graduation Residency Session is the final residency for MFA students who have successfully completed their seminars and creative thesis. In the ten days of this residency, students will give a graduating lecture, "mentor" new students in their first residency, and give a reading from their thesis. A graduating ceremony will cap their activities during this session.

MFAW 8720 ENRICHMENT RESIDENCY SESSION (2 credits)

An eight-day creative writing symposium-style course presenting lectures, workshops, readings and individual conferences with faculty. The Enrichment Residency affords advanced writing students additional intensive contact with published and apprentice writers to reinforce and enrich their life-long commitment to the art of writing and to the continuing development of their craft.

Prerequisite(s)/Corequisite(s): MFA Program Director's permission. Must have completed MFA/PhD with writing emphasis. Writers with MA in English and emphasis in writing, or writers with an extensive background in writing may also be considered. Not open to non-degree graduate students.

MFAW 8820 POETRY SEMINAR (6-12 credits)

An individualized course in poetry writing. Taken 4 times, the required seminar offers practical instruction in writing and criticism. Using distance technology, student and instructor work through independent projects designed to sharpen the student's writing skills. Each student will compose both original poetry and critical analyses of poetry by other writers preparatory to submitting an original book-length manuscript of publishable quality by the final semester.

Prerequisite(s)/Corequisite(s): Acceptance into the MFA in Writing Program and permission of the MFA Program Coordinator. Not open to non-degree graduate students.

MFAW 8830 FICTION SEMINAR (6-12 credits)

An individualized course in fiction writing. Taken four times, the seminar offers practical instruction in fiction writing and criticism. Using distance technology, student and instructor work through individualized writing projects designed to sharpen the student's writing skills to a professional edge. Students will compose both original fiction and critical analyses of fiction preparatory to submitting an original book-length manuscript of publishable quality by their final semester's work.

Prerequisite(s)/Corequisite(s): Permission of Program Director. Not open to non-degree graduate students.

MFAW 8840 NONFICTION SEMINAR (6-12 credits)

An individualized course in nonfiction writing. Taken 4 times, the seminar offers practical instruction in writing and criticism. Students will compose both original nonfiction and critical analyses of nonfiction.

Prerequisite(s)/Corequisite(s): Permission of Program Director. Not open to non-degree graduate students.

MFAW 8850 PLAYWRITING AND SCREENWRITING SEMINAR (6-12 credits)

An individualized seminar in playwriting or screenwriting. Taken 4 times, the seminar offers practical instruction in playwriting/screenwriting and criticism. Using distance technologies, student and instructor work through independent projects designed to sharpen the student's writing. Each student will compose both original scripts and critical analyses of scripts by other playwrights or screenwriters preparatory to submitting at minimum a full-length script, a one-act script, and a ten-minute script by the final semester.

Prerequisite(s)/Corequisite(s): Acceptance into the MFA in Writing Program and permission of the MFA Program Coordinator. Not open to non-degree graduate students.

MFAW 8870 ENRICHMENT SEMINAR IN WRITING (6 credits)

An advanced writing semester for those who want assistance launching a new writing project or have a degree in one genre and want to pursue study of another, such as fiction, creative nonfiction, poetry, young adult, playwriting, or screenwriting.

Prerequisite(s)/Corequisite(s): Corequisite: MFAW 8720. Permission from Program Coordinator required.

- Religious Studies Minor (p. 1371)
- Spanish Minor (p. 1371)

Ancient Mediterranean Studies Minor

Departments of History, English, Religious Studies, Philosophy, Political Science, and Art and Art History

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Courses Available for the Minor

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Black Studies Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Business Administration Minor

Graduate students may complete a graduate minor in business administration. The minor requires the approval of the MBA advisor,

completion of the MBA foundation courses, and the completion of a minimum of nine (9) graduate credit hours of BSAD courses, at least six (6) of which are in BSAD courses open only to graduate students (8000-level or higher), excluding courses which are foundation courses for any degree program. BSAD 8060 cannot be counted toward the minor. A grade of "B" (3.0 on a 4.0 scale) must be earned in each course counting toward the minor. All hours counting toward the minor must be earned at UNO.

Criminology and Criminal Justice Minor

Requirements

Code	Title	Credits
Required Course		
CRCJ 8020	SEMINAR IN ADMINISTRATION OF JUSTICE	3
Elective Courses		
Select two of the following:		6
CRCJ 8040	SEMINAR IN POLICE AND SOCIETY	
CRCJ 8050	SEMINAR IN CORRECTIONS	
CRCJ 8060	SEMINAR IN THE CRIMINAL COURT SYSTEM	
CRCJ 8080	SEMINAR IN JUVENILE JUSTICE	
CRCJ 8130	SEMINAR IN WOMEN AND CRIMINAL JUSTICE	
CRCJ 8210	PROGRAM EVALUATION AND POLICY ANALYSIS	
CRCJ 8230	TERRORISM	
CRCJ 8190	INDEPENDENT STUDY	
CRCJ 9020	SEMINAR ON THEORIES OF CRIME	
CRCJ 9150	SPECIAL TOPICS IN CRIMINAL JUSTICE RESEARCH	
CRCJ 9160	SEMINAR IN COMMUNITY-BASED CORRECTIONS	
CRCJ 9170	SEMINAR ON INSTITUTIONAL CORRECTIONS	
CRCJ 9200	SEMINAR ON VIOLENT CRIME AND CRIMINAL BEHAVIOR	
Total Credits		9

Economics Minor

The Department of Economics offers a graduate minor to students pursuing a graduate degree in other programs. The requirement for the minor is that the student completes a minimum of three graduate courses (9 hours) in economics with grades of "B" or better (3.0 on a 4.0 scale) in each course. The courses to be taken for the minor are to be approved by both the student's advisor in the student's major subject and by the Graduate Program Chair (GPC) of economics.

English Minor

With the approval of the student's advisor and the English graduate program committee, a student may include a minor as part of their plan of study. A minor requires nine (9) hours of approved coursework.

French Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Geography Minor Requirements

Code	Title	Credits
GEOG 8000	HISTORY AND PHILOSOPHY OF GEOGRAPHY	3
Additional geography courses selected in consultation with the graduate program chair		6
Total Credits		9

German Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Gerontology Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

History Minor

(9 hours)

To earn a graduate minor in history, a student must complete 9 hours of graduate-level history courses with the grade of a "B" (3.0 on a 4.0 scale) or better.

Management Information Systems Minor

(9 hours)

The Management Information Systems area offers a graduate minor to students pursuing graduate degrees in other programs at UNO. The requirements for the minor are that the student completes a minimum of three graduate courses (nine semester hours ending in 0), receiving a grade of "B" (3.0 on a 4.0 scale) or better in each course. The courses to be taken for the minor are to be approved by the student's advisor in the student's major subject and by the Graduate Program Chair (GPC) in management information systems. For declaring a MIS minor, a minimum TOEFL score of 550 is required and a GPA of 3.0 or better in current graduate program are required.

Mathematics Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours of MATH or STAT prefixed courses, with at least a B average. At least six of the nine graduate credit hours must be from courses ending in zero. Note that MATH 8880 cannot be used to satisfy the requirements of a mathematics minor. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Medieval/Renaissance Studies Minor

Requirements

Code	Title	Credits
Select 9 hours from the following:		9
ART 8756	LATE ROMAN AND BYZANTINE ART HISTORY	
ART 8836	ITALIAN RENAISSANCE ART HISTORY	
ART 8910	INDEPENDENT STUDY IN ART HISTORY	
MUS 8546	RENAISSANCE MUSIC LITERATURE	
ENGL 8300	SEMINAR: SHAKESPEARE

HIST 8546	MEDIEVAL EUROPE	
HIST 8616	TUDOR AND STUART ENGLAND	
Total Credits		9

NOTE: The preceding list does not include the various departmental numbers for graduate directed readings courses, even though these highly individualized reading and research classes may be applied to the

requirements for the minor. This list also does not include the various special topics courses in individual departments which may be taken for graduate credit.

Native American Studies Minor

(9 hours)

The minimum requirement for the graduate minor is 9 credits taken at the 8000 and/or 9000 levels.

A student's program will be planned in consultation with the Native American Studies (NAS) Graduate advisor, who will hold graduate faculty status. This cross-disciplinary minor will include choices among approved graduate lecture courses, seminars, and directed reading courses.

Three (3) hours of thesis can be counted toward the minimum requirement of 9 credits, but only in the graduate advisor and the thesis committee members agree that the topic is related to Native American studies.

Students must complete each course of their 9-credit minor with a grade of "B" (3.0 on a 4.0 scale) or better.

No comprehensive exam will be required after completion of the three required courses for the minor.

Political Science Minor

Students outside of political science may earn a political science minor in conjunction with their graduate program by taking 9 credit hours/3 seminars in political science. At least 3 credit hours/1 seminar must include a political science subfield of: American government, political theory, comparative politics, or international relations. Students must earn a B or above in all political science courses taken for the minor. Students must apply for this minor through the proper procedures.

Code	Title	Credits
Required: At least 3 credit hours/1 seminar in the political science subfields listed below:		3
PSCI 8040	SEMINAR IN AMERICAN GOVERNMENT AND POLITICS	
PSCI 8250	SEMINAR IN INTERNATIONAL RELATIONS	
PSCI 8300	SEMINAR IN POLITICAL THEORY	
PSCI 8500	SEMINAR IN COMPARATIVE POLITICS	
Electives: The remaining 6 credit hours/2 seminars may include any remaining seminars listed above as well as those listed below:		6
PSCI 8100	SEMINAR IN POLITICAL ECONOMY	
PSCI 8120	SEMINAR IN LEADERSHIP	
PSCI 8150	SEMINAR IN CONSTITUTIONAL LAW	
PSCI 8200	SEMINAR IN FOREIGN POLICY AND NATIONAL SECURITY	
PSCI 8220	SEMINAR ON INTERNATIONAL LEADERSHIP AND STRATEGY	
PSCI 8920	SEMINAR IN SPECIAL TOPICS IN POLITICAL SCIENCE	

Religious Studies Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Spanish Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Graduate Courses A-Z

A

- Accounting (ACCT) (p. 1372)

Accounting (ACCT)

ACCT 8016 ADVANCED FINANCIAL ACCOUNTING (3 credits)

Specialized issues in financial accounting. Principal topics include business combinations and consolidated financial statements, partnership accounting, translation of foreign currency financial statements, accounting for foreign currency denominated transactions, and SEC reporting requirements. (Cross-listed with ACCT 4010).

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3030 and ACCT 3040 with a grade of "C+" (2.33) or better in each. Not open to non-degree graduate students.

ACCT 8026 ANALYTICS FOR ACCOUNTING (3 credits)

Students develop an Analytics Mindset for the accounting profession, which includes the crossover competencies of accounting and business knowledge, data modeling and analytic abilities, and communication skills. Principal topics include fundamentals of data capture and cleansing, database development and implementation, visualization and presentation of information, and the use of accounting information for business decisions. (Cross-listed with ACCT 4020).

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3030 and ACCT 3080 with a grade of "C" (2.0) or better in each. Not open to non-degree graduate students.

ACCT 8046 ADVANCED FEDERAL INCOME TAXATION (3 credits)

Analysis of various advanced tax issues, such as accounting methods, property transactions, and formation, operation, and liquidation of C-corporations, S-corporations and partnerships. (Cross-listed with ACCT 4040).

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3020 with a grade of "C" (2.0) or better. Not open to non-degree graduate students.

ACCT 8050 FINANCIAL STATEMENT ANALYSIS (3 credits)

Using the financial statement and supplemental information as inputs, this course utilizes a systematic fundamental analysis approach across a variety of decision-making contexts to understand how a business generates value for shareholders.

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 3040 with a "C" (2.0) or better. Not open to non-degree graduate students.

ACCT 8066 ADVANCED MANAGERIAL ACCOUNTING (3 credits)

Intensive study and discussion of the responsibilities of managerial accountants in the decision-making process in organizations and the consequences of the manner in which they use cost accounting information in decision-making. (Cross-listed with ACCT 4060).

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3050 with a grade of "C" (2.0) or better. Not open to non-degree graduate students.

ACCT 8076 GOVERNMENTAL/NONPROFIT ACCOUNTING AND AUDITING (3 credits)

Study of budgeting, accounting, financial reporting and auditing in governmental and nonprofit entities. (Cross-listed with ACCT 4070).

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3030 with a grade of "C" (2.0) or better. Not open to non-degree graduate students.

ACCT 8080 DATABASE DEVELOPMENT AND USE IN AIS (3 credits)

This course will cover tools and methods that facilitate business analytic techniques, including database development and use, data mining, and information analysis for decision-making. A working understanding of spreadsheet software is assumed.

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of instructor. Successful completion of BSAD 8110, ACCT 2020, or equivalent. Not open to non-degree graduate students.

ACCT 8090 INFORMATION SYSTEMS AUDITING (3 credits)

This course presents a broad overview of the professional practice of information systems audit, emphasizing control and audit procedures related to security along with Information Technology General Controls. Content studied will include professional standards, guidelines, and procedures promulgated by the Information Systems Audit and Control Association.

Prerequisite(s)/Corequisite(s): ACCT 4080 with a grade of C (2.0) or better. Admission to MAcc or MBA program or permission of instructor. Not open to non-degree graduate students.

ACCT 8210 FINANCIAL ACCOUNTING THEORY (3 credits)

The development of accounting, current accounting theory and present controversies and suggested theory and practice.

Prerequisite(s)/Corequisite(s): ACCT 3040. Not open to non-degree graduate students.

ACCT 8220 GRADUATE TOPICS IN INCOME TAXATION (3 credits)

This course will discuss commonly encountered tax issues such as gift and estate taxation, income taxation of estates and trusts, and exempt organizations, as well discuss current events while introducing the student to practitioner-oriented research publications.

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 4040 or ACCT 8046 with a "C" (2.0) or better, or concurrent enrollment in ACCT 4040 or ACCT 8046. Not open to non-degree students.

ACCT 8230 MANAGEMENT ACCOUNTING ISSUES (3 credits)

An analysis of information to assist managers in determining successful strategies, developing those strategies into plans and controlling operating activities to achieve strategic goals.

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 3050 or BSAD 8210 with a "C" (2.0) of better. Not open to non-degree graduate students.

ACCT 8250 SEMINAR IN ACCOUNTING (3 credits)

A study of a specific area within the accounting discipline. Possible areas include: auditing, financial, managerial, systems and tax. May be repeated, but no area can be taken more than once.

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA programs or permission of instructor. Not open to non-degree students.

ACCT 8260 FEDERAL TAX RESEARCH AND PLANNING (3 credits)

This course is intended to provide students with a working knowledge of the primary and secondary tax resources used in practice to solve tax problems, as well as basic tax planning concepts.

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 4040 or ACCT 8046 with a "C" (2.0) or better. Not open to non-degree students.

ACCT 8280 SEMINAR IN ACCOUNTING INFORMATION SYSTEMS (3 credits)

This course examines current topics in Accounting Information Systems (AIS), how AIS contributes to business effectiveness and ineffectiveness, and the interaction between AIS and human decision-makers.

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of instructor. Successful completion of BSAD 8110, ACCT 2020, or equivalent. Not open to non-degree graduate students.

ACCT 8290 ADVANCED FINANCIAL AUDITING (3 credits)

This course will provide students with an intense study of financial auditing in accordance with generally accepted auditing standards.

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 4080 with a grade of "C" (2.0) or better.

ACCT 8900 INDEPENDENT RESEARCH (1-3 credits)

This is an independent research course in which the student completes a focused project, typically individual research, under faculty supervision to supplement graduate study in a specific area within the Accounting discipline.

Prerequisite(s)/Corequisite(s): Completed contract and permission needed from director of MACC program. Not open to non-degree graduate students.

ACCT 8910 SPECIAL TOPICS IN ACCOUNTING (3 credits)

A variable content course with accounting topics based on student and faculty interest. May be repeated to a maximum of six (6) hours.

Prerequisite(s)/Corequisite(s): Admission to MAcc program and permission of instructor. Not open to non-degree graduate students.

Anthropology (ANTH)

ANTH 8216 CULTURAL ANTHROPOLOGY (3 credits)

Cultural Anthropology is the sub-discipline of Anthropology that systematically considers cultural diversity (similarities and differences) in all known human societies. The scope of cultural anthropology is one of the broadest in the social sciences and includes the study of subsistence strategies and economies, kinship and social organization, political organization, religion, gender, language, expressive arts, human-environment relationships, and globalization. (Cross-listed with ANTH 4210).

Prerequisite(s)/Corequisite(s): ANTH 1050 or permission of Instructor

ANTH 8226 NORTH AMERICAN ARCHAEOLOGY (3 credits)

This course explores more than 20,000 years of Native American culture and lifeways in North America. Indigenous peoples faced numerous challenges throughout this vast and diverse continent. Hunters, gatherers, fishers, and horticulturalists adapted to all regions of North America. Students will be introduced to a range of archaeological concepts, methods and theoretical perspectives central to learning about this rich heritage of American archaeology. (Cross-listed with ANTH 4220).

Prerequisite(s)/Corequisite(s): ANTH 1050 or permission of instructor

ANTH 8236 ETHNOMEDICINES OF THE AMERICAS (3 credits)

An anthropological approach to the study of the cultural systems of specific American ethnomedicines (traditional medicines) of North, Central and South America. For each ethnomedicine, the historical context, philosophy, practice, therapeutics, and utilization will be examined to understand how and why each ethnomedicine has survived despite tremendous extermination pressure. (Cross-listed with ANTH 4230).

Prerequisite(s)/Corequisite(s): ANTH 1050 or permission of the instructor.

ANTH 8246 MEDICAL ANTHROPOLOGY (3 credits)

Medical anthropology is the cross-cultural study of human culture, health and illness. Using multiple theoretical perspectives, this course examines how cultural, social, environmental, and biological factors interact to produce patterns of health and illness in past and present human societies. (Cross-listed with ANTH 4240)

Prerequisite(s)/Corequisite(s): ANTH1050 and junior or senior standing; or permission of the instructor.

ANTH 8256 ENVIRONMENTAL ANTHROPOLOGY AND NATIVE PEOPLES OF THE GREAT PLAINS (3 credits)

Environmental anthropology seeks to understand the interrelationships between human societies and their biophysical and social environments. This course introduces students to basic concepts and theories used by anthropologists to study environmental influences upon both past and present Native American societies on the North American Great Plains. Particular attention will be given to the rapid and dramatic environmental changes that continue to challenge Native Americans in the Great Plains today. (Cross-listed with ANTH 4250)

ANTH 8926 SEMINAR IN ANTHROPOLOGY (3 credits)

This course reviews research and writing in an area of current interest in the field of anthropology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with ANTH 4920).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor

ANTH 8980 INDEPENDENT STUDY IN ANTHROPOLOGY (1-3 credits)

This course is guided reading or independent research in special topics in Anthropology under the supervision of a member of the Anthropology faculty. This course is designed primarily for the student interested in topics not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated once for credit.

Prerequisite(s)/Corequisite(s): Permission of the instructor. Not open to non-degree graduate students.

Architectural Engineering (AREN)

AREN 8000 ARCHITECTURAL ENGINEERING GRADUATE SEMINAR (1 credit)

Literature Review, reading and evaluation of technical publications concerned with theory and/or experimental data in various areas of Architectural Engineering, attendance at Architectural Engineering Graduate Project and Team Design presentations, preparation of the Master of Architectural Engineering graduate project proposal, assignments related to improving written and oral communication skills.

AREN 8010 GRADUATE DESIGN PROJECT I (3 credits)

Requires a professionally written report and oral presentation that demonstrates both mastery of the subject and a high level of writing and oral communication skills. Perform a detailed investigation in the option area of the master of architectural engineering degree. Students are permitted to enroll in this course twice. Those who fail to earn a passing grade after enrolling in this course a second time will be referred to the AE Graduate Committee, and may result in termination of their program of graduate studies.

Prerequisite(s)/Corequisite(s): AREN 8000 or AE 8000; AREN 1010, AE 4010, AREN 4020, AE 4020 or CIVE 314; permission. Not open to non-degree graduate students.

AREN 8020 GRADUATE DESIGN PROJECT II (1 credit)

Second of two-course capstone design project for the MAE degree. Requires a professionally written report and oral presentation that demonstrates both mastery of the subject and a high level of writing and oral communication skills.

Prerequisite(s)/Corequisite(s): AREN 8010 or AE 8010; permission. Not open to non-degree graduate students.

AREN 8030 INTERDISCIPLINARY TEAM DESIGN PROJECT I (5 credits)

This course is the first semester of the capstone design sequence in architectural engineering. Develop and design the electrical, lighting, mechanical, and structural systems for a building, from programming through design development phase, as an interdisciplinary team effort.

Prerequisite(s)/Corequisite(s): (Acoustics/Mechanical option:) AREN 4150 or AE 4150, AREN 4300 or AE 4300; (Electrical/Lighting option:) AREN 4250 or AE 4250, AREN 8220 or AE 8220; (Structural option:) CIVE 444. Not open to non-degree graduate students.

AREN 8040 INTERDISCIPLINARY TEAM DESIGN 2 (3 credits)

Is the second semester of the capstone design sequence in architectural engineering. Develop and design the electrical, lighting, mechanical, and structural systems for a building, from the design development phase through construction documents, as an interdisciplinary team effort. This course is intended to be taken the semester following AREN 8030/AE 8030.

Prerequisite(s)/Corequisite(s): AREN 8030 or AE 8030. Not open to non-degree graduate students.

AREN 8050 INTERNSHIP IN ARCHITECTURAL ENGINEERING (3 credits)

This course requires participation in a full time summer internship associated with an Architectural Engineering related entity. The course includes weekly assignments and a final presentation designed to create interaction between the AE entity and the intern associated with the business side of the entity. General topics include Business Plans, Marketing, Finance and Budgets, Contacts, Legal issues and professionalism.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

AREN 8060 ARCHITECTURAL ENGINEERING PROFESSIONAL PRACTICE I (3 credits)

Investigation of issues related to the integration of building design processes with professional architectural engineering practice. Aspects of building design project finance, budgets, contracts, legal issues, professional licensure, and professional responsibility. The perspective of life-cycle costing. Professional ethics will be thoroughly integrated with all course topics.

Prerequisite(s)/Corequisite(s): ISMG 2060 or CONE 2060.

AREN 8070 ARCHITECTURAL ENGINEERING PROFESSIONAL PRACTICE II (3 credits)

Continuation of investigation of issues related to the integration of building design processes with professional architectural engineering design practice. Building design specifications, estimating, bidding, building construction contract negotiations, building design project management, project team personnel management, project risk, and key regulatory measures.

Prerequisite(s)/Corequisite(s): ISMG 2060; AREN 8060 or AE 8060

AREN 8080 APPLIED EXPERIMENTAL DESIGN AND STATISTICAL ANALYSIS (3 credits)

Overview of advanced experimental design methods and statistical analysis techniques. Application of these to the planning, execution, analysis, and description of research in architectural engineering.

Prerequisite(s)/Corequisite(s): STAT 3800

AREN 8090 SUSTAINABLE BUILDING DESIGN (3 credits)

Integrates building design with the principles of minimum resource use, energy conservation, and healthy indoor environments.

Prerequisite(s)/Corequisite(s): CIVE 341 and (AREN 3100, AE 3100, AREN 8410 or AE 8410). Not open to non-degree graduate students.

AREN 8110 INDOOR AIR QUALITY ENGINEERING (3 credits)

Indoor air quality, codes, standards, HVAC equipment, commissioning, operation, maintenance, investigation, and remediation.

Prerequisite(s)/Corequisite(s): AREN 3100 or AE 3100

AREN 8120 BUILDING CONTROL AND AUTOMATION SYSTEMS (3 credits)

Fundamental concepts of building control theory and automation. Building control: state-variable plant and closed-loop system representation, time and frequency response, stability, root-locus methods and design of building control systems. Automation: thermostats, dampers, valves, direct digital control, control of air handling units, terminal units, primary building systems, supervisory control and system optimization, communication systems, BACnet, and DDC system design and implementation.

AREN 8140 BUILDING ENERGY III: ADVANCED BUILDING ENERGY SYSTEM MODELING (3 credits)

Advanced Analysis, Modeling, Dynamics and Optimization of Building Energy Systems. Be familiar with Engineering Equation Solver (EES) Programming; Be able to build models for Air Handling Unit Systems and Vapor Compression Cycle Equipment; Be able to analyze building operating efficiency and identify faulty operating conditions; Be able to conduct retrofit energy efficiency analysis and feasibility study.

Prerequisite(s)/Corequisite(s): AREN 3100 or AE 3100; AREN 4120 or AE 4120; or instructor permission.

AREN 8150 BUILDING ENERGY SIMULATION AND PERFORMANCE CONTRACTING (3 credits)

Integrated approach to deliver energy improvement retrofit projects that provide economical and ecological benefits. Proficiency in EnergyPlus or DOE-2 and in retrofit cost estimation will be attained and integrated into an engineering economic analysis. Partnering configurations, contracts, financing, and measurement and verification. Concepts applied to a practical class project.

AREN 8170 THEORY AND APPLICATION OF THERMAL SYSTEMS MEASUREMENT (3 credits)

Analysis, theory, and methods of instrumentation for thermal system energy consumption measurement and scientific research testing. Emphasis placed on sensors, transducers, and error analysis.

Prerequisite(s)/Corequisite(s): STAT 8805 or equivalent.

AREN 8180 INDOOR AIR QUALITY DESIGN (3 credits)

Engineering approach to indoor air quality design. Topics include modeling and calculation methods to predict and design for acceptable indoor air quality.

Prerequisite(s)/Corequisite(s): (AREN 3120 or AE 3120) and (AREN 4110, AE 4110, AREN 8110 or AE 8110)

AREN 8206 LIGHTING II: THEORY, DESIGN & APPLICATION (3 credits)

Design and analysis of lighting systems; the emphasis is on the integration between the lighting design process and the technical foundations for building lighting; topics include design criteria; lighting design procedures, lighting modes and subjective effects; calculation tools. Lab sessions include photometric measurements and computer applications. (Cross-listed with AREN 4200).

Prerequisite(s)/Corequisite(s): AREN 3200 or AE 3200

AREN 8210 LIGHTING III: ADVANCED DESIGN PRACTICE (3 credits)

Design and analysis of lighting for outdoor sports, floodlighting and interior applications; economic analysis; modeling algorithms; advanced photometrics.

Prerequisite(s)/Corequisite(s): AREN 8206 or AE 8206.

AREN 8220 ELECTRICAL SYSTEMS FOR BUILDINGS II (3 credits)

Power systems analysis and design, integration of electrical system components into functional, safe, and reliable power distribution systems for commercial and industrial facilities. Per Unit Analysis, Fault Analysis, Power Quality, Grounding, Overcurrent Protection Coordination, Complete power system design.

Prerequisite(s)/Corequisite(s): AREN 3220 or AE 3220

AREN 8230 LIGHT SOURCES (3 credits)

Fundamental science and principles of light generation in modern electric light sources; characteristics that influence applications of light sources.

Prerequisite(s)/Corequisite(s): AREN 8206 or AE 8206.

AREN 8240 LIGHTING METRICS (3 credits)

AREN 8250 DAYLIGHTING (3 credits)
Use of natural light in building design. Solar position, sky luminance, distribution models, daylighting equipment, calculation methods, and psychological concepts. Extensive use of computer modeling and scale models.

Prerequisite(s)/Corequisite(s): AREN 4200, AE 4200, AREN 8206 or AE 8206

AREN 8260 BUILDING COMMUNICATION SYSTEMS (3 credits)

Integration of voice, data and video systems into overall building design. Topics include: scalability, wireless systems; interference; project management; current industry standards and protocols.

Prerequisite(s)/Corequisite(s): AREN 3220 or AE 3220. Not open to non-degree graduate students.

AREN 8306 ADVANCED NOISE CONTROL (3 credits)

Characterization of acoustic sources; use and measurement of sound power and intensity; sound-structure interaction; acoustic enclosures and barriers; muffling devices; vibration control; and active noise control. (Cross-listed with AREN 4300).

Prerequisite(s)/Corequisite(s): AREN 3300 or AE 3300

AREN 8330 ADVANCED ARCHITECTURAL ACOUSTICS (3 credits)

Advanced study of the behavior of sound in rooms. Design of acoustical spaces; physical and computational modeling; measurement techniques; and introduction to sound reinforcement in rooms.

Prerequisite(s)/Corequisite(s): AREN 3300 or AE 3300

AREN 8350 ELECTROACOUSTICS (3 credits)

Electrical-mechanical-acoustical circuit analogies; transducers, loudspeakers, microphones, and accelerometers; directivity; calibration techniques; and sound reinforcement systems in rooms.

AREN 8510 MASONRY AND TIMBER DESIGN (3 credits)

Masonry as a structural material, unreinforced masonry design, reinforced masonry design, state-of-the-art assessment methods for existing masonry structures, timber as a structural material, timber design.

Prerequisite(s)/Corequisite(s): CIVE 440 and CIVE 441 or equivalents

AREN 8600 SMART BUILDING SENSORS AND PROGRAMMING (3 credits)

Principles of modeling, interfacing, and signal conditioning of sample building sensors, and acquisition and analysis of data utilizing engineering programming language such as LabVIEW. Overview of current sensing technology and control in buildings.

Prerequisite(s)/Corequisite(s): CIST 1400

AREN 8626 MEMS SENSORS DYNAMICS (3 credits)

Study of the dynamics of Microelectromechanical system (MEMS) beam-structures. Modeling principles and data analysis from different types of MEMS will be explained along with deep theoretical and experimental investigation of nonlinear MEMS dynamics. Learn to conduct experiments using state-of-the-art MEMS characterization tools. (Cross-listed with AREN 4620).

Prerequisite(s)/Corequisite(s): Instructor Permission

AREN 8800 GRADUATE SEMINAR IN ARCHITECTURAL ENGINEERING AND CONSTRUCTION (1 credit)

The objectives of this course are to broaden student knowledge on engineering topics, improve presentation and professional skills, as well as learn about professional development resources available on campus. To pass the course, a student must attend a minimum of 15 Durham School Graduate Student Seminars, MAE project presentations, and/or MS/PhD thesis presentations in the College of Engineering. The student must also present one seminar within the Durham School Graduate Student Seminar series, prior to the final oral examination. All MS and PhD graduate students in architectural engineering must enroll within their first 3 semesters of matriculation.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

AREN 8920 INDIVIDUAL INSTRUCTION IN ARCHITECTURAL ENGINEERING (1-3 credits)

Individual instruction in Architectural Engineering at the graduate level in a selected area, under the supervision and guidance of an Architectural Engineering faculty member.

AREN 8940 SPECIAL TOPICS IN ARCHITECTURAL ENGINEERING (3 credits)

Special topics in Architectural Engineering at the graduate level that are not yet covered in other courses in the Architectural Engineering curriculum.

Prerequisite(s)/Corequisite(s): Permission.

AREN 8950 INDIVIDUAL INSTRUCTION IN ARCHITECTURAL ENGINEERING (1-3 credits)

Individual instruction in Architectural Engineering at the graduate level in a selected area, under the supervision and guidance of an Architectural Engineering faculty member.

AREN 8990 MASTER'S THESIS (1-10 credits)

Masters Thesis.

Prerequisite(s)/Corequisite(s): Admission to Architectural Engineering masters degree program and permission of major advisor. Not open to non-degree graduate students.

AREN 9160 BUILDING ENERGY SYSTEMS MODELING, CONTROL, AND OPTIMIZATION (3 credits)

Modeling, control and optimization of the secondary building energy systems; building envelope, room comfort zones, air handling units, cooling and heating water loops.

Prerequisite(s)/Corequisite(s): AREN 4100, AE 4100, AREN 8120 or AE 8120

AREN 9180 COMPUTATIONAL FLUID DYNAMICS MODELING OF INDOOR ENVIRONMENTS (3 credits)

Application of computational fluid dynamics software to modeling of indoor environments. Topics include turbulence modeling, boundary conditions, natural and forced convection flows, species transport, and fire modeling.

Prerequisite(s)/Corequisite(s): AREN 4110, AE 4110, AREN 8116 or AE 8116

AREN 9200 COLOR THEORY (3 credits)

Theories of color vision; theoretical and mathematical basis for chromaticity, color temperature, color rendering metrics, color matching functions, and color spaces; spectral weighting functions; measurement of color.

Prerequisite(s)/Corequisite(s): AREN 4200, AE 4200, AREN 8206 or AE 8206

AREN 9210 CURRENT RESEARCH IN ILLUMINATING ENGINEERING (3 credits)

Examination of the most current research in illuminating engineering. Study of experimental methodologies and research practices. Analysis of technical papers from current lighting journals.

Prerequisite(s)/Corequisite(s): Graduate standing and permission of instructor.

AREN 9220 BEHAVIORAL SCIENCES FOR LIGHTING RESEARCH (3 credits)

Overview of experimental design methods and statistical analysis techniques, specifically as these are applied to the planning, execution, analysis and description of lighting experiments.

AREN 9300 CURRENT TOPICS IN ARCHITECTURAL ACOUSTICS (3 credits)

A review of current topics in architectural acoustics. Subjects may include objective versus subjective measures in performance spaces, electronic enhancement of rooms, advanced computational modeling techniques, and auralization.

Prerequisite(s)/Corequisite(s): AREN 8330 or AE 8330

AREN 9970 RESEARCH OTHER THAN THESIS (1-6 credits)

Supervised non-thesis research and independent study.

AREN 9980 SPECIAL TOPICS (1-3 credits)

Advanced topics in architectural engineering not covered in other 9000 level courses.

AREN 9990 DOCTORAL DISSERTATION (1-24 credits)

(1-24 credits, max 55)

Prerequisite(s)/Corequisite(s): Admission to doctoral degree program and permission of supervisory committee chair

Art (ART)

ART 8006 SPECIAL SEMINARS IN ART EDUCATION (1-3 credits)

A series of intensive courses in the history and theory of art education designed specifically for elementary and secondary school art teachers. These courses are scheduled as special seminars or workshops according to purpose. (Cross-listed with ART 4000)

ART 8316 ADVANCED SCULPTURE (3 credits)

Advanced work in area of student's choice with facilities for oxyacetylene welding, arc welding and wood working. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 4310)

ART 8416 ADVANCED PAINTING (3 credits)

Advanced instruction in oil painting permits students the time and environment to work and develop individually. Emphasis on developing cohesive body of work as continuation from work done in Intermediate painting. Knowledge of contemporary painting integral to painting practice. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 4410)

ART 8516 ADVANCED TECHNIQUES IN PRINTMAKING (3 credits)

This course allows students to develop their skills in both lithography and intaglio and the color processes for each printmaking technique. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 4510)

ART 8616 ADVANCED CERAMICS (3 credits)

This course will consist of advanced work on the potter's wheel, casting and preparations in glaze composition, as well as loading and firing of a high-fire kiln. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 4610)

ART 8736 CLASSICAL ART HISTORY (3 credits)

This course is a study of painting, sculpture, architecture and minor arts of the classical world beginning with Cycladic art and including Minoan, Mycenaean, Greek, Etruscan and Roman art through 300 A.D. Lab fee required. (Cross-listed with ART 4730)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 8756 LATE ROMAN AND BYZANTINE ART HISTORY (3 credits)

A study of painting, sculpture and architecture of the Eastern Roman Empire from the founding of Constantinople, and of Western Europe from the time of Constantine to the dissolution of the Western Roman Empire. Lab fee required. (Cross-listed with ART 4750)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 8836 ITALIAN RENAISSANCE ART HISTORY (3 credits)

A study of painting, sculpture and architecture in Italy during the 14th, 15th and 16th centuries. Lab fee required. (Cross-listed with ART 4830)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 8856 BAROQUE AND ROCOCO ART HISTORY (3 credits)

This course is a study of painting, sculpture and architecture in Europe during the 17th and 18th centuries. Lab fee required. (Cross-listed with ART 4850)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 8886 MODERN ART I (ART OF EUROPE AND THE AMERICAS, 1850-1920) (3 credits)

A study of the most significant developments in European art and architecture dating from the early Modern period and examined in varied contexts (artistic, religious, political, economic, etc.). (Cross-listed with ART 4880)

ART 8896 MODERN ART II (ART OF EUROPE AND THE AMERICAS, 1918-1968) (3 credits)

This course explores the major artistic movements and artists active in Europe and the Americas between the end of WWI and the Vietnam Era circa 1968. (Cross-listed with ART 4890)

ART 8906 CONTEMPORARY ART HISTORY SINCE 1968 (3 credits)

This course introduces contemporary visual arts in a global context from 1968 to the present with topics of discussion including art, aesthetics, politics, gender and sexuality, race and economics. (Cross-listed with ART 4900)

ART 8910 INDEPENDENT STUDY IN ART HISTORY (1-3 credits)

Independent research under the direct supervision of the sponsoring faculty member, generally involving the writing of a paper. The topic of the research and the expectations for credit should be jointly agreed upon in writing by the student and the faculty member at the beginning of the semester.

Prerequisite(s)/Corequisite(s): Permission of instructor.

ART 8936 SPECIAL TOPICS IN ART HISTORY (3 credits)

These illustrated lecture courses deal with a limited topic in the field of art history. The course may be coordinated with an external event such as an exhibition, publication or study trip. Lab fee required. (Cross-listed with ART 4930)

Prerequisite(s)/Corequisite(s): ART 2060 or instructor permission.

Athletic Training (ATHT)

ATHT 8110 ATHLETIC TRAINING TECHNIQUES (2 credits)

Overview course including basic components of the athletic training profession including the prevention, recognition, evaluation and immediate care of athletic injuries. Medical terminology, tissue healing, taping procedures, and professional considerations will be covered.

Prerequisite(s)/Corequisite(s): Admission to the Master of Arts in Athletic Training. Not open to non-degree graduate students.

ATHT 8120 EMERGENCY MANAGEMENT OF INJURY AND ILLNESS (2 credits)

The purpose of this course is to prepare students to respond to emergent conditions that affect patients involved in physical activity. Students will learn to recognize the signs and symptoms of acute injury and illness, assess patients using evidence-based methods, apply appropriate treatments, make appropriate referral decisions, and implement effective prevention strategies to reduce the risk of injury and illness.

Prerequisite(s)/Corequisite(s): Admission to the Master of Arts in Athletic Training program. Not open to non-degree graduate students.

ATHT 8130 THERAPEUTIC INTERVENTIONS I (2 credits)

This course will cover the pathophysiology of musculoskeletal injuries as well as the theory, physiology and application of physical agents used in the treatment of these injuries. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ATHT 8230 THERAPEUTIC INTERVENTIONS II (2 credits)

This course will introduce students to the use of basic theories and principles of athletic injury rehabilitation including therapeutic exercise. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.

Prerequisite(s)/Corequisite(s): ATHT 8130/HEKI 8130. Not open to non-degree graduate students.

ATHT 8240 ORTHOPEDIC ASSESSMENT I (2 credits)

The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the lower extremity. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the foot, ankle, lower leg, knee, thigh and hip. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.

Prerequisite(s)/Corequisite(s): Admission to the Master of Arts in Athletic Training Program. Not open to non-degree graduate students.

ATHT 8250 CLINICAL PRACTICUM IN ATHLETIC TRAINING I (2 credits)

Clinical Practicum in Athletic Training I is the first course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): Admission to the MA in Athletic Training program, instructor permission, & compliance with published Athletic Training Program Technical Standards for Admission. Not open to non-degree graduate students.

ATHT 8330 THERAPEUTIC INTERVENTIONS III (2 credits)

This course will introduce students to the use of basic theories and principles of physical agents and manual therapies. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.

Prerequisite(s)/Corequisite(s): ATHT 8230/HEKI 8230. Not open to non-degree graduate students.

ATHT 8340 ORTHOPEDIC ASSESSMENT II (2 credits)

The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the upper extremity. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the shoulder, elbow, wrist, hand and fingers. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.

Prerequisite(s)/Corequisite(s): ATHT 8240/HEKI 8240. Not open to non-degree graduate students.

ATHT 8350 CLINICAL PRACTICUM IN ATHLETIC TRAINING II (2 credits)

Clinical Practicum in Athletic Training II is the second course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): ATHT 8250/HEKI 8250 Clinical Practicum I. Not open to non-degree graduate students.

ATHT 8360 ADVANCED ORTHOPEDIC & MEDICAL ASPECTS OF ATHLETIC TRAINING (3 credits)

This course will provide the student with knowledge and skill in the area of orthopedic and medical aspects of athletic training. Students will gain this knowledge through directed observation, experiential learning, literature review, and hands-on experience under the supervision of local medical professionals. The student will be exposed to advanced evaluation of medical conditions, systemic diseases, and other disorders; observe common surgical procedures for orthopedic conditions; and medical management of patients and physically active populations in conjunction with other healthcare providers.

Prerequisite(s)/Corequisite(s): Admission to Master of Arts in Athletic Training Program

ATHT 8410 ATHLETIC TRAINING ADMINISTRATION (2 credits)

This course will introduce students to administrative topics related to athletic training. Management strategies for financial resources, personnel, facilities, medical records, and third-party reimbursement will be covered. Additionally, legal and ethical professional practice standards will be introduced.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ATHT 8450 INTERNSHIP IN ATHLETIC TRAINING (2 credits)

This course is designed to provide an immersive athletic training clinical experience for students. The internship is a supervised, educational clinical work experience of at least 300 hours over a minimum of 4-weeks during a single semester. This experience will allow the student the opportunity to take more responsibility for the care, prevention, and rehabilitation of athletic injuries with a particular team or group of patients, as well as help plan and provide daily coverage for practices or clinical appointments.

Prerequisite(s)/Corequisite(s): Permission from the instructor or program director. Not open to non-degree graduate students.

ATHT 8530 THERAPEUTIC INTERVENTIONS IV (2 credits)

This course will introduce students to the use of basic theories and principles of athletic training related to pharmacology, nutrition and psychosocial wellness. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.

Prerequisite(s)/Corequisite(s): ATHT 8330/HEKI 8330. Not open to non-degree graduate students.

ATHT 8540 ORTHOPEDIC ASSESSMENT III (2 credits)

The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the head, face and spine. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the head, face and spine. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.

Prerequisite(s)/Corequisite(s): ATHT 8340/HEKI 8340. Not open to non-degree graduate students.

ATHT 8550 CLINICAL PRACTICUM IN ATHLETIC TRAINING III (2 credits)

Clinical Practicum in Athletic Training III is the third course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): ATHT 8350/HEKI 8350 Clinical Practicum II. Not open to non-degree graduate students.

ATHT 8650 CLINICAL PRACTICUM IN ATHLETIC TRAINING IV (2 credits)

Clinical Practicum in Athletic Training IV is the fourth course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): ATHT 8550/HEKI 8550 Clinical Practicum III

Aviation (AVN)

AVN 8020 AVIATION MANAGEMENT AND POLICY (3 credits)

The purpose of the course is to acquaint students with advanced concepts of aviation administration and the implementation of aviation policy within the public sector and to identify key concepts and critical issues both domestic and international. The primary focus is to explore the various affects that have resulted from the formation and enactment of major aviation and transportation regulatory issues. (Cross-listed with PA 8020).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

AVN 8030 INTERNSHIP IN AVIATION ADMINISTRATION (1-6 credits)

A maximum of 6 hours to be granted upon completion of written report on internship. The internship will be in some area of aviation administration: national, state, local or non-profit agency and in some instances public-oriented private agencies. Students will take the course as Credit/No Credit. May be taken for a maximum of 6 hours of credit.

Prerequisite(s)/Corequisite(s): Permission of aviation graduate program coordinator.

AVN 8040 INTERNSHIP IN AVIATION ADMINISTRATION (1-6 credits)

A maximum of 6 hours to be granted upon completion of written report on internship. The internship will be in some area of aviation administration: national, state, local or non-profit agency and in some instances public-oriented private agencies. Students will take the course as Credit/No Credit. May be taken for a maximum of 6 hours of credit.

Prerequisite(s)/Corequisite(s): Permission of aviation graduate program coordinator.

AVN 8060 TRANSPORTATION SECURITY (3 credits)

This course explores contemporary issues in transportation by applying lessons learned from the historical development of national and international transportation security in the post 9/11 world. Topics include the influences of crime and terrorism on the conduct of transportation operations; the role of government in the formulation of transportation security policies, procedures, and practices; the study of individual airport, seaport, rail, and highway security systems; and contemporary passenger and cargo screening issues. Strategies and efforts to counter current and emerging threats will also be examined.

Prerequisite(s)/Corequisite(s): PA 8050, PA 8100, PA 8090 (May be taken concurrently with AVN 8045)

AVN 8086 AIRPORT SAFETY AND SECURITY (3 credits)

This course will explore the role of airports in relation to safety and security. Topics will include regulations, responsibilities, security issues, ramp safety, disaster preparedness, and emergency management. (Cross-listed with AVN 4080).

Prerequisite(s)/Corequisite(s): AVN 1000 or its equivalent or permission of the instructor.

AVN 8095 AIRPORT ADMINISTRATION AND PLANNING (3 credits)

The course covers the principles of airport master planning. Fundamental principles of airport layout and design include runway configuration, airside/landside technology, passenger and cargo terminal. Capacity and delay effects will be emphasized. (Cross-listed with AVN 3090).

AVN 8100 ADVANCED MANAGEMENT AND LEADERSHIP FOR PUBLIC AND NONPROFIT PROFESSIONALS (3 credits)

This course is designed to advance students' understanding and techniques about the role of leadership and ethics in the public and nonprofit sectors. Special attention will be paid on the application of theories of leadership and ethics to manage various boundary spanning activities including managing external relationships, collaborations/networks, performance, and innovation and change. (Cross-listed with PA 8100)

Prerequisite(s)/Corequisite(s): PA 8050 and PA 8090. Not open to non-degree graduate students.

AVN 8120 ANALYSIS AND DECISION MAKING (3 credits)

This course assists students to develop their skills in research design and data analysis, covering both qualitative and quantitative data relevant to public affairs. The course introduces students to the fundamentals of research design, data collection, data and statistical analysis, and drawing pertinent policy and management recommendations. (Cross-listed with PA 8120).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

AVN 8155 AVIATION LAW (3 credits)

This course will increase the student's knowledge of aviation law. Particular attention will focus on the manner in which legal forces affect the aviation system. (Cross-listed with AVN 3150).

Prerequisite(s)/Corequisite(s): AVN 1000 or equivalent or instructor permission.

AVN 8250 AIRPORT ADMINISTRATION (3 credits)

AVN 8250 provides an extensive overview of the responsibilities associated with the operation and administration of public airports. Federal policies and regulations, contemporary and emerging management issues, and accepted practices related to the operation and management of commercial service and general aviation airports as an integral component of the national and international transportation system will be examined.

AVN 8360 TRANSPORTATION SAFETY (3 credits)

Safety is a fundamental concern in any transportation mode and a required competency for individuals working in any transportation or public works field. This course provides a thorough overview of the development and maintenance of safety policies and procedures for transportation activities. The federal Safety Management System (SMS) process including Quality Management Strategies using safety risk management (hazard identification, risk assessment and control) serves as the foundation for understanding the need to implement a safety culture stressing proactive v. reactive transportation safety program development and management. Predictive tools and methods such as Gap Analysis (GA), Fault Tree Analysis (FTA), and data sharing approaches are explored. Environmental Protection and Occupational Health and Safety policy and programs affecting transportation mode safety are also examined.

Prerequisite(s)/Corequisite(s): PA 8050

AVN 8370 AIRPORT DEVELOPMENT (3 credits)

AVN 8370 focuses on the planning process and applied design criteria associated with the development of public airports. Federal, state and regional systems, and specific airport master planning initiatives will be examined. Application of airport design standards and recommendations for the development of appropriate navigable airspace, airfield facilities, passenger terminals, and other components of the airport's physical plant will be covered.

Prerequisite(s)/Corequisite(s): AVN 8250

AVN 8480 SEMINAR IN PUBLIC FINANCIAL ADMINISTRATION (3 credits)

The study of public finance administration policy and technique areas. Emphasis is placed on the technical aspects of public finance administration with particular emphasis on the purposes, processes, and issues associated with particular techniques or technique areas. (Cross-listed with PA 8480).

Prerequisite(s)/Corequisite(s): PA 8050 or permission of department.

AVN 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)

This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with TED 8510, STEM 8510).

Prerequisite(s)/Corequisite(s): Graduate standing.

AVN 8605 INTERNATIONAL AVIATION (3 credits)

This course examines global air transport and its impact on the development of the global economy. Lectures and readings will provide a solid foundation of historical knowledge about international air transport and its development in various countries, before exploring current policy debates about liberalization, global alliances, and other critical issues. (Cross-listed with AVN 3600).

Prerequisite(s)/Corequisite(s): AVN 8020 or permission of the instructor.

AVN 8750 TRANSPORTATION FINANCE (3 credits)

This course focuses on the financial administration of public transportation facilities with a strong emphasis on commercial service airports. Areas of emphasis include: fiscal and managerial accounting strategies, capital development financing, revenue and cost centers, the economic impact of airports, airport performance measures. Current trends and issues associated with transportation finance are discussed.

Prerequisite(s)/Corequisite(s): PA 8010 and AVN 8020

AVN 8906 SPECIAL TOPICS IN AVIATION (1-3 credits)

This course will address various topics in the Aviation Industry, determined each time the course is offered. Possible topics include international aviation, current issues and regulatory agencies within the industry, along with other topics. (Cross-listed with AVN 4900)

AVN 8920 READINGS IN AVIATION ADMINISTRATION (1-3 credits)

Specially planned readings in public administration for the graduate student who encounters scheduling problems in the completion of his degree program, or who has special preparatory needs and who is adjudged by the department to be capable of pursuing a highly independent course of study.

Prerequisite(s)/Corequisite(s): Eighteen hours in the MPA program or permission of graduate program committee.

AVN 8940 RESEARCH IN AVIATION ADMINISTRATION (1-3 credits)

The course is intended for advanced graduate students in public administration. It is especially suited for those in-career students who have had their internships waived and who might profit more by in-depth research on a problem of public administration rather than additional classroom courses.

Prerequisite(s)/Corequisite(s): Twenty-one hours in the MPA program or permission of the graduate program committee.

AVN 8996 AIR TRANSPORTATION (3 credits)

This course fulfills the Aviation Institute capstone projects for undergraduates. Lectures and readings will cover contemporary issues and problems in air transportation, as well as material related to research design and implementation. (Cross-listed with AVN 4990).

AVN 9900 ADVANCED TOPICS (3 credits)

This course provides a format for exploration of topics of interest to advanced students in public administration. Topics covered will change periodically in keeping with the interests of faculty and students. (Cross-listed with PA 9900)

Prerequisite(s)/Corequisite(s): Admission to PhD program in Public administration or permission of instructor.

AVN 9970 DIRECTED RESEARCH IN PUBLIC ADMINISTRATION (1-6 credits)

This course offers a structure for doctoral students to conduct advanced research in their chosen area of specialization. (Cross-listed with PA 9970).

Prerequisite(s)/Corequisite(s): Admission to Ph.D. program in public administration and permission of instructor.

AVN 9980 DIRECTED READINGS IN PUBLIC ADMINISTRATION (1-6 credits)

This course is designed to provide the advanced graduate student with the opportunity to do extended readings on a specialized public administration topic. (Cross-listed with PA 9980).

Prerequisite(s)/Corequisite(s): Admission to Ph.D. program in public administration and permission.

Bioinformatics (BIOI)

BIOI 8850 SPECIAL TOPICS IN BIOINFORMATICS (3 credits)

This course is intended to provide a mechanism for offering instruction in subject areas that are not covered in other regularly scheduled courses. In general, courses offered under the BIOI 8850 designation will focus on evolving subject areas in bioinformatics.

Prerequisite(s)/Corequisite(s): Course prerequisites of a specific offering of BIOI 8850 will be determined by the supervising faculty member and will be identified in the course proposal. It is anticipated that permission of the faculty member teaching the course will be required.

Biology (BIOL)

BIOL 8010 SEMINAR IN BIOLOGY (1 credit)

A study of current research in any of the divisions of biology. Graduate students will complete this course once for credit.

Prerequisite(s)/Corequisite(s): Graduate student in biology and written permission of graduate faculty supervisor. Not open to non-degree graduate students.

BIOL 8020 INDEPENDENT RESEARCH IN BIOLOGY (1-6 credits)

Research work under supervision of a member of the graduate faculty. May be taken more than once for credit; up to 4 credits for thesis option of M.S. degree and up to 6 credits for the non-thesis option of the M.S. degree.

Prerequisite(s)/Corequisite(s): Graduate student in biology and written permission of graduate faculty supervisor. Not open to non-degree graduate students.

BIOL 8030 EVOLUTION: FROM GENOMES TO ECOSYSTEMS (3 credits)

This course will prepare students to evaluate and discuss evolution as an underlying concept in all of biology. Further, it will provide a comprehensive overview of evolutionary processes related to the evolution of genomes, development, physiology, morphology, behavior, and ecosystems. (Cross-listed with STEM 8030).

Prerequisite(s)/Corequisite(s): Courses for graduate admission or equivalent, or with permission of instructor.

BIOL 8036 SPECIAL TOPICS IN BIOLOGY (3 credits)

A lecture and/or laboratory course for biology majors pertaining to a specific biological topic not available in the regular curriculum. Topics will be developed by individual faculty members reflecting their special interests and expertise. The course may be repeated for credit. (Cross-listed with BIOL 4030).

Prerequisite(s)/Corequisite(s): Graduate standing.

BIOL 8060 ADVANCED TOPICS IN BIOLOGY (3 credits)

Lecture and/or laboratory courses for graduate students designed to provide exposure to biological specialities not offered in the regular curriculum.

Prerequisite(s)/Corequisite(s): Graduate and permission. Not open to nondegree students.

BIOL 8070 ADVANCED READINGS IN BIOLOGY (1-3 credits)

An in-depth study of the literature in a limited segment of the biological sciences under the supervision of a graduate faculty member. May be taken more than once for credit up to a total of six credits.

Prerequisite(s)/Corequisite(s): Graduate student in biology and written permission of graduate faculty supervisor. Not open to non-degree graduate students.

BIOL 8106 BIOGEOGRAPHY (3 credits)

This course is intended as an introduction to biogeography, the study of the distribution and evolution of organisms across space and through time. Usually offered every year. (Cross-listed with BIOL 4100, GEOG 4100, GEOG 8106, GEOL 4100, GEOL 8106)

Prerequisite(s)/Corequisite(s): BIOL 1450 and 1750 or GEOL 3100 or BIOL 3100, junior-senior.

BIOL 8116 STATISTICS FOR BIOLOGICAL SCIENCES (4 credits)

Introduction to statistical methods and software used to display, summarize, analyze, and interpret biological and medical data. (Cross-listed with BIOL 4110)

BIOL 8126 CONSERVATION BIOLOGY (3 credits)

Study of biological diversity at the genetic, species and ecosystem levels, its values, and the factors that threaten it. We will explore the scientific basis of conservation biology and how it can be applied to the maintenance of biological diversity. Usually offered every year. (Cross-listed with BIOL 4120).

Prerequisite(s)/Corequisite(s): Graduate student in Biology. Not open to non-degree graduate students.

BIOL 8136 MOLECULAR GENETICS (4 credits)

A lecture and lab course that explores the frontiers of molecular genetics research. Topics addressed will include DNA replication, gene function, gene expression, genetic manipulation, cloning, mutational analysis, genome sequencing, and epigenetics. Research techniques will include DNA/RNA isolation, PCR, cloning, gel electrophoresis, transgene generation, data analysis, and quantitative rtPCR. Students will get a solid grounding in scientific writing and presentations, as well as reading and assessing primary scientific literature. Lecture, discussion, and laboratory. Usually offered fall semester. (Cross-listed with BIOL 4130)

Prerequisite(s)/Corequisite(s): BIOL 2140, 3020 and CHEM 2210 or 2260 or their equivalents. Not open to nondegree students.

BIOL 8146 CELLULAR BIOLOGY (4 credits)

This course is a modern study of mammalian cell function. Focus will be placed on developing skills in experimental cellular biology. Material covered will include tissue culture techniques, cell staining applications, fluorescent microscopy, determination of gene expression, and high-throughput assay design. (Cross-listed with BIOL 4140)

Prerequisite(s)/Corequisite(s): BIOL 2140, 3020 and CHEM 2210 or 2250. Junior or senior undergraduate standing or graduate standing. Must enroll in laboratory section and lecture for this course. Not open to non-degree graduate students.

BIOL 8156 CANCER BIOLOGY (3 credits)

The etiology of cancers, differences between types of malignancies, oncogenes and genetic modifiers, treatments, susceptibility, and tumor-induced immunosuppression are discussed. This is an active course focused on inquiry-based learning and the purpose of this course is to provide students a foundation in cancer biology while applying tools learned through cell biology, genetics, and immunology courses. (Cross-listed with BIOL 4150).

BIOL 8166 BIOINFORMATICS FOR BIOLOGISTS (3 credits)

This course intends to introduce fundamental concepts in bioinformatics with an emphasis on how to use biological databases and computational tools to solve common bioinformatics problems in biology and biomedicine. The topics consist of sequence database access and searching, sequence alignment and phylogeny, functional prediction of DNA and protein sequences, and genome sequencing and annotation. Students are expected to learn fundamental concepts in bioinformatics and gain extensive experience with the use of bioinformatics analysis tools. (Cross-listed with BIOL 4160).

Prerequisite(s)/Corequisite(s): BIOL 2140 Genetics; BIOL 3020 Molecular Biology of the Cell; Or Permission of instructor

BIOL 8170 ECOSYSTEM ANALYSIS FOR EDUCATORS (3 credits)

This course is designed for education graduate students who wish to take a field-based biology course that uses an interdisciplinary approach to understanding the ecosystem of the tallgrass prairie. This course engages graduate students in methods reflecting multidisciplinary STEM strategies (e.g. scientific inquiry, modeling, geographic information system mapping, etc.) associated with research taking place at the Glacier Creek Preserve. Graduate students completing this course will develop advanced knowledge of ecology, restoration ecology, and monitoring of prairie habitat restoration. Graduate students will focus on the technical, biogeochemical, ecological and cultural aspects of analyzing and restoring the prairie ecosystem and its various habitats. (Cross-listed with STEM 8170)

Prerequisite(s)/Corequisite(s): Graduate Standing or Permission from the Instructor.

BIOL 8186 FRESHWATER ECOLOGY (4 credits)

A study of the physical, chemical and biological relationships that serve to establish and maintain plant and animal communities in freshwater environments. (Cross-listed with BIOL 4180, ENVN 4180).

Prerequisite(s)/Corequisite(s): Prerequisites: BIOL 1450 and BIOL 1750, junior-senior, or permission of instructor. Registration requirements: Must enroll in lab. Not open to non-degree graduate students.

BIOL 8190 COMMUNITIES AND ECOSYSTEMS (3 credits)

Advanced study of populations, communities and ecosystems; may require overnight weekend field trips.

Prerequisite(s)/Corequisite(s): BIOL 3340/8345, graduate in biology. Not open to nondegree students.

BIOL 8200 PLANT ECOLOGY (4 credits)

Advanced study of plant communities and of individual plant species including relationships with the environment and vegetative dynamics. Emphases on methods of evaluation and analysis. May require overnight field trips.

Prerequisite(s)/Corequisite(s): BIOL 3340/8345, graduate in biology. Recommended: BIOL 3530/8535. (Fall) Not open to nondegree students.

BIOL 8216 FIRE ECOLOGY (3 credits)

Study of fire in ecosystems including characteristics of fire, effects on flora, fauna and the abiotic environment, and use in maintaining native ecosystems. May include two weekend field exercises. (Cross-listed with BIOL 4210)

Prerequisite(s)/Corequisite(s): BIOL 3340, graduate in biology. Not open to nondegree students.

BIOL 8226 POPULATION BIOLOGY (4 credits)

Population biology takes a conceptual approach to study the dynamics, ecology, genetics, and evolution of populations. Topics include the growth and regulation of populations, population interactions, selection on individuals and groups, mating systems, and life history evolution. Implications of these topics for areas such as the ecology and evolution of disease, conservation, and resource management will be highlighted. Concepts are reinforced through labs emphasizing interpretation of results from population simulations and the relationship between theory and experimentation in population biology. Usually offered in alternate years. (Cross-listed with BIOL 4220).

Prerequisite(s)/Corequisite(s): Graduate student in Biology or permission of instructor

BIOL 8236 EVOLUTION (3 credits)

The course emphasizes the general principles of evolution, particularly focusing on evolutionary changes and the mechanisms of evolution (natural selection, gene flow, mutation and genetic drift) that apply to all or most organisms. The course covers micro- and macroevolution, speciation, and human evolution. Students will discover how scientists can learn about what has happened in the evolutionary past and the most common patterns of change (i.e., changes that have characterized various groups of organisms). (Cross-listed with BIOL 4230).

Prerequisite(s)/Corequisite(s): Prerequisites are BIOL 2140, junior or senior undergraduate status, Biology graduate status, or permission by the instructor. Not open to non-degree graduate students.

BIOL 8246 MARINE BIOLOGY (3 credits)

An introduction to the marine environment, this course explores physical conditions of the ocean including ocean chemistry, salinity, waves and currents, and tides as well as the ecology of planktonic, nektonic and benthic organisms— their communities and environments. Impacts of humans on the marine environment will also be covered. (Cross-listed with BIOL 4240)

Prerequisite(s)/Corequisite(s): BIOL 1750

BIOL 8250 DESIGN AND ANALYSIS OF BIOLOGICAL RESEARCH (3 credits)

This course examines the statistical aspects of the design of laboratory and field experiments in biology. Basic statistical methods are reviewed and advanced methods presented. Statistical computer packages are used.

Prerequisite(s)/Corequisite(s): Undergraduate course in statistics is recommended. Not open to nondegree students.

BIOL 8256 FIELD MARINE BIOLOGY (1 credit)

This lab is a hands-on introduction to the marine environment using a field trip to the Gulf Coast. Students will observe first-hand examples of local marine habitats and organisms. Students will be required to take a trip to the Gulf Coast of Texas, Louisiana, Mississippi, and Alabama during Spring Break. Students will be required to provide their own basic camping and snorkeling gear. (Cross-listed with BIOL 4250)

Prerequisite(s)/Corequisite(s): BIOL 1750, previous or concurrent enrollment in BIOL 4240 and permission of instructor.

BIOL 8266 BEHAVIORAL ECOLOGY (3 credits)

Behavioral ecology is the study of behavior from an evolutionary and ecological point of view. Through the integration of research at different organizational levels and the use of many different organisms, behavioral ecology is one of the most integrative fields in biological sciences. This course will provide an introduction to the basic concepts of behavioral ecology and the integrative approaches used in behavioral ecology. Further, the course will train students in critical reading and discussion of primary literature in writing and in an oral setting. (Cross-listed with BIOL 4260)

Prerequisite(s)/Corequisite(s): Admission into the graduate college. Not open to non-degree graduate students.

BIOL 8276 ANIMAL BEHAVIOR (3 credits)

Behavior of diverse animals for the understanding of the relationships between nervous integration and the behavior manifested by the organism, as well as the evolution and adaptive significance of behavior as a functional unit. (Cross-listed with BIOL 4270, PSYC 4270, PSYC 8276)

Prerequisite(s)/Corequisite(s): BIOL 1750 and PSYC 1010 or permission of instructor, junior-senior.

BIOL 8286 ANIMAL BEHAVIOR LABORATORY (3 credits)

Laboratory and field studies of animal behavior with an ethological emphasis. Classical laboratory experiences and independent studies will be conducted. (Cross-listed with BIOL 4280, PSYC 4280, PSYC 8286)

Prerequisite(s)/Corequisite(s): PSYC 4270 or BIOL 4270 or PSYC 8276 or BIOL 8273. Not open to non-degree graduate students.

BIOL 8296 NEUROETHOLOGY (3 credits)

In the field of Neuroethology a major goal is to understand the neural bases of animal behaviors in a natural context. In this course students will investigate how behaviors are generated and modulated by the nervous system in organisms ranging from insects to mammals. We will explore the neural mechanisms underlying a variety of animal behaviors as they interact with their natural environment ranging from sensory perception of the world (e.g. echolocation, electrolocation), to locomotor movements (e.g. flying, swimming), to more complex behaviors (e.g. learning, memory). (Cross-listed with BIOL 4290, NEUR 4290, PSYC 8296)

Prerequisite(s)/Corequisite(s): Graduate Standing. Not open to non-degree graduate students.

BIOL 8326 HORMONES & BEHAVIOR (3 credits)

In this course, students will examine the interaction between hormones, chemical messengers released from endocrine glands, and behavior in both human and animal systems. Methods for studying hormonal issues on behavior will be addressed. This course will provide students in psychology, biology, and related disciplines an understanding of how hormones affect sensory processing, motor activities, and processing of information in the central nervous system. (Cross-listed with BIOL 4320, PSYC 4320, PSYC 8326)

Prerequisite(s)/Corequisite(s): Admission to graduate level PSYC program or permission of dept. Not open to non-degree graduate students.

BIOL 8345 ECOLOGY (4 credits)

Study of interrelationships between organisms and their biotic and abiotic environment; includes the physical environment, population biology, community dynamics, biotic interactions and evolution. Usually offered Fall, Spring, Summer. (Cross-listed with BIOL 3340)

Prerequisite(s)/Corequisite(s): Prerequisites are BIOL 1450 and BIOL 1750; junior-senior or Biology graduate student; or permission by instructor. Not open to non-degree graduate students.

BIOL 8416 WETLAND ECOLOGY AND MANAGEMENT (3 credits)

This course will examine the principles and theory of wetland ecology with application towards wetland management and regulation. An interdisciplinary overview of physical, biological and regulatory aspects of wetlands will allow students to synthesize information from their backgrounds in geography, geology and ecology. Definitions, classifications, natural processes and functions of wetland environments will be presented. Labs concentrate on field techniques used to assess specific plant, animal, soil, and hydrological characteristics of wetlands. (Cross-listed with ENVN 4410 and BIOL 4410)

Prerequisite(s)/Corequisite(s): BIOL 3340 or instructor permission.

BIOL 8426 RESTORATION ECOLOGY (3 credits)

Restoration Ecology examines how people assist with the recovery of ecosystems that have been degraded. The course will examine the theory and application of restoration ecology through lecture, discussion, field trips, and development of a restoration management plan for a degraded ecosystem near Omaha. The course will provide information and resources used by restoration and land management professionals to plan, implement, and manage restorations. (Cross-listed with BIOL 4420, ENVN 4420)

Prerequisite(s)/Corequisite(s): Graduate standing.

BIOL 8446 PLANT PHYSIOLOGY (4 credits)

A study of plant processes and functions with emphasis on photosynthesis, growth and development, metabolism and mineral nutrition. (Cross-listed with BIOL 4440)

Prerequisite(s)/Corequisite(s): BIOL1450, BIOL1750, and CHEM 2210 or CHEM 2250; or permission of instructor.

BIOL 8450 BIOLOGY EDUCATION RESEARCH METHODS (3 credits)

In this course, students will learn the methods of conducting pedagogical research in Biology, understand how people learn the concepts, practices, and ways of thinking in science and engineering; understand the nature and development of expertise in a discipline; help identify and measure appropriate learning objectives and instructional approaches that advance students toward those objectives; contribute to the knowledge base in a way that can guide the translation of statistical findings to classroom practice; and identify approaches to make science and engineering education broad and inclusive. Students will work with live data sets to evaluate effective pedagogical approaches in the biology classroom of various audiences (K-16).

BIOL 8454 VIROLOGY LABORATORY (1 credit)

A laboratory to accompany virology lecture. This course enables students to work with viruses in the laboratory and to conduct experiments using viral systems. Experimental design, data gathering, data analysis and manuscript writing will be integral parts of the course. The experiments include host cell characterization, viral infection, virus purification from infected cells, viral genome isolation and viral transfection. Sequence analysis and sequence comparison will also be introduced. Laboratory exercises will emphasize fundamental molecular biology techniques and instrumentation. Usually offered in Fall semester. (Cross-listed with BIOL 4454)

BIOL 8456 VIROLOGY (3 credits)

A comprehensive course about viruses. The course will address principles of viral infection, virus-host interaction, viral evolution and viral disease processes. Cellular and molecular aspects of viral infection will be the primary focus. This will include examination of viral particles, viral multiplication cycles, regulation of gene expression, viral assembly and viral escape. Viral immunology, viral defenses, viral vaccines and antiviral compounds will also be addressed. Emerging viruses and current viral topics will be a major part of the course. Usually offered in Fall semester. (Cross-listed with BIOL 4450)

BIOL 8466 COMPARATIVE IMMUNOLOGY (4 credits)

This course is an exploration of comparative immunology across kingdoms. There will be a strong focus on human as well as mouse immunology. Laboratory sessions require dissections to determine lymphoid anatomy of representative organisms. Samples will be prepared and analyzed using immunological techniques such as flow cytometry. (Cross-listed with BIOL 4460).

Prerequisite(s)/Corequisite(s): Two classroom sessions and one laboratory session per week. Graduate standing. Not open to non-degree graduate students.

BIOL 8496 MEDICINAL USES OF PLANTS (3 credits)

A scientific study of the biochemical properties and physiological effects of medicinal plants, including their historical uses, current applications to varying systems of the human body, and pathways by which today's potent drugs have transitioned from wild flora. Usually offered Fall semesters of even-numbered years. (Cross-listed with BIOL 4490)

BIOL 8535 FLORA OF THE GREAT PLAINS (4 credits)

A study of common vascular plants found in the Great Plains region, including identification, description, and classification techniques and an introduction to the plant communities of Nebraska. Usually offered every Fall and Summer. (Cross-listed with BIOL 3530.)

Prerequisite(s)/Corequisite(s): BIOL 1450-1750. Not open to nondegree students.

BIOL 8606 GIS APPLICATIONS FOR ENVIRONMENTAL SCIENCE (1 credit)

This course introduces the use of geographic information systems (GIS) and other geospatial tools for work in the fields of environmental science, ecology, and natural resource management. The course will develop a working knowledge of the common software and hardware tools used by ecologists through hands-on projects. (Cross-listed with BIOL 4600, ENVN 4600)

Prerequisite(s)/Corequisite(s): BIOL 3340 or permission of instructor.

BIOL 8646 MICROBIAL PHYSIOLOGY (4 credits)

This course will cover the diversity in structures, genetics, metabolism, and regulation observed in microorganisms with a focus on bacteria. Usually offered Fall semesters. (Cross-listed with BIOL 4640).

Prerequisite(s)/Corequisite(s): Prerequisites are BIOL 2140 and BIOL 3020 or equivalents. Not open to non-degree graduate students.

BIOL 8654 BIOCHEMISTRY I LABORATORY (1 credit)

A laboratory course to help integrate the concepts learned in biochemistry lecture with the development of biochemical laboratory skills including experimental design, data analysis, presentation of results and communication of scientific information, with a focus on formal instruction in journal-style writing and notebook skills. There is an emphasis on protein properties, including enzyme activity. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. (Fall) (Cross-listed with BIOL 4654, CHEM 4654, CHEM 8654).

BIOL 8656 BIOCHEMISTRY I (3 credits)

A comprehensive introduction to biochemistry emphasizing: structure-function relationships for proteins, carbohydrates, lipids, and nucleic acids; protein purification; enzyme kinetics and mechanisms; membranes and membrane transport; carbohydrate metabolism including glycolysis, the citric acid cycle and oxidative phosphorylation; and important applications of thermodynamics and the properties of water to living systems. (Fall) (Cross-listed with BIOL 4650, CHEM 4650, CHEM 8656).

Prerequisite(s)/Corequisite(s): CHEM 2260 and CHEM 2274; and either CHEM 2400 or BIOL 3020, all with a C- or better. Other comparable courses taken at accredited colleges or universities are acceptable. BIOL 8654 must be taken concurrently.

BIOL 8664 BIOCHEMISTRY II LABORATORY (1 credit)

A laboratory course to help integrate the concepts learned in Biochemistry II lecture with the development of biochemical laboratory skills, to gain practical experience in experimental design, data analysis, presentation of results and communication of scientific information, with a focus on formal instruction in journal-style writing and notebook skills. There is an emphasis on nucleic acid properties. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. (Spring) (Cross-listed with BIOL 4664, CHEM 4664, CHEM 8664).

BIOL 8666 BIOCHEMISTRY II (3 credits)

A continuation of the study of the structure and function of biomolecules and biochemical reactions with an emphasis on metabolism of carbohydrates, lipid, amino acids and nucleotides, and the chemistry of signal transduction and genetic information transfer. (Spring) (Cross-listed with BIOL 4660, CHEM 4660, CHEM 8666).

Prerequisite(s)/Corequisite(s): CHEM 8656 and CHEM 8654 or BIOL 8656 and BIOL 8654 with a grade of B- or better. BIOL 8664 must be taken concurrently.

BIOL 8685 BIOLOGY OF AFRICA (3 credits)

Biology of Africa (3) Introduction to the plants, animals, and habitats of Africa. Although other groups are included, this course will focus on the large mammals of east Africa and will pay particular attention to elephant reproduction and biology. Other topics include Serengeti migrations, hippos, lions and other large cats, reptiles, and human evolution. Usually offered alternate Spring semesters. (Cross-listed with BIOL 3680).

BIOL 8716 TOXICOLOGY (3 credits)

An overview of the fundamentals of toxicology. Concepts include the dose-response relationship, absorption, distribution and excretion of toxicants, and the biotransformation of xenobiotics. Emphasis will be given to metals, pesticides, pharmaceutical compounds, chemical carcinogenesis and endocrine disruption. Usually offered Fall. (Cross-listed with BIOL 4710)

Prerequisite(s)/Corequisite(s): CHEM 2210 or 2260 and BIOL 1750, BIOL 3020 or equivalent.

BIOL 8735 FAUNA OF THE GREAT PLAINS (3 credits)

A survey of the common animal groups found in the Great Plains, including their evolution, ecology, distribution and specific adaptations to the environment of the temperate North American grasslands. (Cross-listed with BIOL 3730)

Prerequisite(s)/Corequisite(s): BIOL 1750. Not open to nondegree students.

BIOL 8736 VERTEBRATE ENDOCRINOLOGY (3 credits)

An overview of the fundamentals of vertebrate endocrinology. Concepts include: the mammalian hypothalamus-pituitary system, the endocrinology of mammalian reproduction, the mammalian adrenal glands, endocrine disruption, endocrinology and metabolism. (Cross-listed with BIOL 4730)

Prerequisite(s)/Corequisite(s): Organic chemistry, Biol 1750, Biol 3020 or equivalent.

BIOL 8746 ANIMAL PHYSIOLOGY (3 credits)

An overview of the fundamentals of animal physiology. Concepts include: the physiology of nerve and muscle function, endocrine function, cardiovascular and respiratory function, oxygen and carbon dioxide delivery by the blood, and osmoregulation and excretion. The course is comparative in nature, including examples from humans, mammals, vertebrates and invertebrate animals. Usually offered Spring. (Cross-listed with BIOL 4740.)

BIOL 8760 CLINICAL REASONING (3 credits)

This is an intensive class in which students will translate biological concepts into solving case-based scenarios in clinical medicine. Relevant readings will prepare students to address these challenges in small-group settings. Intended as an advanced preparatory course for healthcare professionals or students desiring exposure to clinical decision-making. Usually offered during Summer semester.

Prerequisite(s)/Corequisite(s): Molecular Biology; Microbiology or Immunology; plus instructor approval.

BIOL 8766 GENOME TECHNOLOGY AND ANALYSIS (3 credits)

This course will introduce the latest genome sequencing technologies and their broad applications in biology and medicine. Students will learn how genome sequencing is conducted by different platforms and obtain practical experience of how to use bioinformatics tools for genome analysis. Students are expected to be able to perform sequence analysis efficiently and interpret the results properly. (Cross-listed with BIOL 4760)

Prerequisite(s)/Corequisite(s): BIOL2140 Genetics; or Permission of instructor

BIOL 8770 CLINICAL READINGS (3 credits)

This course is a rigorous study of current biomedical, translational, and clinical primary literature spanning a wide range of human health and disease.

Prerequisite(s)/Corequisite(s): Graduate and written permission of graduate faculty member.

BIOL 8786 VERTEBRATE ZOOLOGY (4 credits)

A study of the general biology of the subphylum vertebrata including the morphology, anatomy, physiology and ecology of vertebrate representatives. (Cross-listed with BIOL 4780)

Prerequisite(s)/Corequisite(s): Prerequisites are BIOL 1450, BIOL 1750, and Junior or Senior standing.

BIOL 8796 MAMMALOLOGY (4 credits)

The biology of mammals, including their evolution, functional morphology, physiology, ecology, zoogeography, behavior, classification and identification, with emphasis on North American groups. Field trips. Usually offered in alternate years. (Cross-listed with BIOL 4790)

Prerequisite(s)/Corequisite(s): BIOL 1450, BIOL 1750, junior or senior standing. Must enroll in laboratory section.

BIOL 8826 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

Seminar on environmental law and regulation. The course will address federal regulations, implementing instructions, legal principles and requirements. The major federal environmental laws, air and water quality, solid and hazardous waste, and pollution prevention and remediation will be discussed. Usually offered Fall semesters.

Prerequisite(s)/Corequisite(s): Junior-senior and permission.

BIOL 8836 DEVELOPMENTAL GENETICS (2 credits)

This course considers experimental approaches in developmental genetics and provides students with first-hand experience in laboratory techniques used in developmental genetics. (Cross-listed to BIOL 4830)

Prerequisite(s)/Corequisite(s): This course considers experimental approaches in developmental genetics and provides students with first-hand experience in laboratory techniques used in developmental genetics.

BIOL 8846 HERPETOLOGY (4 credits)

The biology of amphibians and reptiles, including their evolution, classification, anatomy, physiology, ecology, distribution and identification, with emphasis on North American groups. Methods for studying herptiles are examined. Usually offered in Spring semesters of even years. (Cross-listed with BIOL 4840).

Prerequisite(s)/Corequisite(s): Prerequisites are BIOL 1450, BIOL 1750 and Junior-Senior standing. Must enroll in lab. Not open to non-degree graduate students.

BIOL 8856 DEVELOPMENTAL BIOLOGY (3 credits)

This course explores principles underlying the development of multicellular organisms, stressing the environmental, genetic, molecular, cellular, tissue, and evolutionary mechanisms of animal development. Usually offered once per year. (Cross-listed with BIOL 4850)

BIOL 8866 COMPARATIVE GENOMICS (3 credits)

This course will introduce fundamental concepts in genomics and genome comparison. Students will learn how genomes are constructed, how they evolve, how individual genomes are unique, and what genomic knowledge means in terms of human health and medicine. (Cross-listed with BIOL 4860)

BIOL 8876 MOLECULAR AND CELLULAR NEUROBIOLOGY (3 credits)

This course presents foundational topics in molecular and cellular neurobiology in the context of how the nervous system is functionally organized. Topics include: nervous system cell types and their subcellular organization; electrical properties of neurons and glia; energy metabolism and biochemistry of the brain; intra- and intercellular neuronal signaling; the regulation of gene expression in neuronal cells; synaptic plasticity; and how these are altered in disease. (Cross-listed with BIOL 4870, NEUR 4870, NEUR 8876).

Prerequisite(s)/Corequisite(s): NEUR 1500, or both NEUR 1520 and NEUR 1540, or BIOL 3020, or permission of instructor.

BIOL 8896 GENES, BRAIN, AND BEHAVIOR (3 credits)

This course will evaluate the complex interaction between an organism's genome and neural activity pattern in the nervous system as related to behavior. In this course students will explore how changes in gene expression (allelic variants, epigenetics, differential regulation) and gene networks within neural tissue can reciprocally influence behaviors such as communication, foraging, reproduction, and cognition. (Cross-listed with BIOL 4890, NEUR 4890, NEUR 8896, PSYC 8896)

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

BIOL 8946 ENTOMOLOGY (4 credits)

The study of insects; their classification, morphology, physiology, behavior, life histories, ecology and evolution. (Cross-listed with BIOL 4940)

Prerequisite(s)/Corequisite(s): BIOL 1750.

BIOL 8966 ADVANCED GENETICS (3 credits)

An in-depth consideration of topics in genetics, including the conceptual and molecular definition of a gene, cytogenetics, mutation, population genetics, developmental genetics, gene regulation and the application of genetics to other areas of biology. (Cross-listed with BIOL 4960).

Prerequisite(s)/Corequisite(s): BIOL 2140 and BIOL 3020 and concurrent enrollment or completion of either CHEM 3650 or CHEM 4610 or CHEM 4650 or BIOL 4650, or permission of the instructor.

BIOL 8976 ADVANCED BOTANY (4 credits)

Advanced Botany examines plant structures (cells, tissues, and organs) and their connections with plant functions (growth, reproduction, photosynthesis, respiration, and dispersal). Topics covered include energy metabolism, development and morphogenesis, genetics, ecology, and the latest in plant taxonomy and phylogeny, keeping students on the forefront of cutting-edge botanical research. In lab, students conduct activities such as dissecting plant organs, making microscope slides, and conducting plant-based experiments, using plants from the local area, from native Great Plains collections, and from around the world and grown in the greenhouse. Students compare and contrast both physiological and morphological adaptations to varying environments. (Cross-listed with BIOL 4970, ENVN 4970).

Prerequisite(s)/Corequisite(s): Graduate Standing

BIOL 8986 ORNITHOLOGY (4 credits)

An introduction to the general biology of birds, including their anatomy, physiology, behavior, ecology, classification and identification with emphasis on North American groups. Usually offered in alternate years. (Cross-listed with BIOL 4980)

Prerequisite(s)/Corequisite(s): BIOL 1750.

BIOL 8990 THESIS (1-6 credits)

An original and independent research project written under the supervision of a faculty thesis advisory committee.

Prerequisite(s)/Corequisite(s): Graduate student in biology and written permission of graduate faculty supervisor. Not open to non-degree graduate students.

Biomechanics (BMCH)

BMCH 8000 SEMINAR IN BIOMECHANICS (0 credits)

Required non-credit course for graduate students in biomechanics. Intended to familiarize the graduate student with current ongoing biomechanical research at UNO and other institutions. The seminar will additionally include topics focusing on professional development, job and educational opportunities, and biomechanical methodologies.

Prerequisite(s)/Corequisite(s): Must be a student in BMCH graduate program. Not open to non-degree graduate students.

BMCH 8006 BIOMATERIALS (3 credits)

Students will learn the classification, properties, characterization methods, body interactions, applications, and design principles of biomaterials. (Cross-listed with BMCH 4000).

BMCH 8030 BIostatISTICS IN BIOMECHANICS I (3 credits)

The focus of the course is to prepare students to understand and apply research and biostatistical methods needed in the design and analysis of biomechanical investigations. The major topics to be covered include research design and multiple linear regression. (Cross-listed with BMKI 9031)

Prerequisite(s)/Corequisite(s): Graduate Standing in Biomechanics program or Department Permission.

BMCH 8100 NONLINEAR ANALYSIS FOR MOVEMENT STUDIES (3 credits)

This course is to introduce different nonlinear methods for the analysis of biological and movement time series. Emphasis will be given on understanding the algorithms behind each nonlinear method. (Cross-listed with BMKI 9101).

Prerequisite(s)/Corequisite(s): Instructor Permission.

BMCH 8106 BIOINSPIRED ROBOTICS (3 credits)

The goal of the course is to involve students in an interdisciplinary vision of biomechanics, biology, engineering and architecture by learning how humans and other animals function in their environment. These design principles from nature can be translated into novel devices, structures, and robots. (Cross-listed with BMCH 4100).

BMCH 8200 MATLAB FOR MOVEMENT SCIENCES (3 credits)

Introduction to Matlab software, plotting data, spectral analysis and the Fourier transform, data smoothing, and image analysis of movement related data. All topics will be implemented using Matlab. (Cross-listed with BMKI 9201).

Prerequisite(s)/Corequisite(s): Instructor permission.

BMCH 8206 METHODS IN BIOMECHANICS I (3 credits)

In this course students learn about the methods and equipment used in biomechanics as well as the analysis of data collected from those methods. Course experiences include both lecture and lab based learning. (Cross-listed with BMCH 4200).

Prerequisite(s)/Corequisite(s): Department Permission

BMCH 8216 METHODS IN BIOMECHANICS II (3 credits)

In this course students learn about advanced methods and equipment used in biomechanics, as well as the analysis of data collected from those methods. Course experiences include both lecture and lab based learning. This course builds on the experience gained in BMCH 4200/8206, Methods in Biomechanics I. (Cross-listed with BMCH 4210).

Prerequisite(s)/Corequisite(s): BMCH 8206 or Department Permission

BMCH 8400 MOTOR LEARNING I (3 credits)

Discussion and analysis of scientific principles related to the learning of motor skills; review related literature and research in motor learning. The focus of the course is on recent theories of how movements are acquired and performed, and on factors that have implications for motor learning throughout the life span. (Cross-listed with BMKI 9401).

Prerequisite(s)/Corequisite(s): Department Permission.

BMCH 8410 MOTOR CONTROL I (3 credits)

The focus of the course is to explore the study of the conditions and factors that influence the control and performance of motor skills from both neurophysiological and psychobiological perspectives. (Cross-listed with BMKI 9411).

Prerequisite(s)/Corequisite(s): Department Permission. Not open to non-degree graduate students.

BMCH 8420 MOTOR DEVELOPMENT (3 credits)

This course focuses on the study of motor development, the processes that underlie this development and the factors that influence it. Students will gain an understanding of the major theoretical perspectives of motor development across the life span with special emphasis given in child development. (Cross-listed with BMKI 9421).

Prerequisite(s)/Corequisite(s): Department Permission.

BMCH 8450 ADVANCED BIOMECHANICS (3 credits)

The course will address the biomechanical basis of human performance including mechanical analysis of human gait, fundamental movement patterns and techniques used for collecting biomechanical data. (Cross-listed with BMKI 9451).

Prerequisite(s)/Corequisite(s): BMCH 4630 (Biomechanics) [previously PE 4630] or Instructor Permission.

BMCH 8646 ORTHOPEDIC BIOMECHANICS (3 credits)

Orthopedic Biomechanics focuses on the use of biomechanical principles and scientific methods to address clinical questions that are of particular interest to professionals such as orthopedic surgeons, physical therapists, rehabilitation specialists, and others. (Cross-listed with BMCH 4640).

Prerequisite(s)/Corequisite(s): Department Permission

BMCH 8666 CLINICAL IMMERSION FOR RESEARCH AND DESIGN (3 credits)

This course will involve exposure to current clinical practices, identification of unmet clinical needs, and information regarding future career options. In this course, students will be matched with local clinical sites to provide a unique opportunity for innovative and interdisciplinary approaches to problem solving subject to practical constraints. Concepts in clinical rehabilitation, integrated assessments, regulation of medical devices in health care will be covered. This course will review the latest research efforts for rehabilitation in the context of device design and implementation. (Cross-listed with BMCH 4660).

Prerequisite(s)/Corequisite(s): Instructor Permission. Not open to non-degree graduate students.

BMCH 8676 INTRODUCTION TO MECHANICS OF BIOMATERIALS (3 credits)

In this course students will learn how to analyze the stresses and strains in different structures under complex loading conditions with extensive examples from biomaterials and materials generally used in the medical device field. (Cross-listed with BMCH 4670).

Prerequisite(s)/Corequisite(s): BMCH 3000 or Department Permission

BMCH 8686 SPORTS BIOMECHANICS (3 credits)

This course is intended to provide students with a foundational knowledge on how to analyze sport movements through biomechanical analytical methods. Students will utilize foundational biomechanical principles and apply them to a variety of sports and associated movements. (Cross-listed with BMCH 4680).

Prerequisite(s)/Corequisite(s): BMCH 4630

BMCH 8900 INDEPENDENT RESEARCH IN BIOMECHANICS (1-6 credits)

In this course individuals or groups will conduct research projects for the study and analysis of biomechanical topics.

Prerequisite(s)/Corequisite(s): Permission of the Department and approval by Faculty Advisor. Not open to non-degree graduate students.

BMCH 8910 INDEPENDENT STUDY IN BIOMECHANICS (1-6 credits)

This is a variable credit course designed for graduate students in Biomechanics who would benefit from independent reading assignments and problems. Independent study enables individual students or a small group of students to focus on topics typically not explored in other offerings or to explore topics currently offered in further depth. (Cross-listed with BMKI 9911).

Prerequisite(s)/Corequisite(s): Graduate student in BMCH and approval by Faculty Advisor. Not open to non-degree graduate students.

BMCH 8990 THESIS IN BIOMECHANICS (1-6 credits)

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's advisory committee. In this project the student will develop skills in research design, research conduct, data analysis, and reporting. The final product of this course will be an original thesis of independent scientific investigation.

Prerequisite(s)/Corequisite(s): Department Permission. Not open to non-degree graduate students.

Biomedical Informatics (BMI)

BMI 8000 ADVANCES IN BIOMEDICAL INFORMATICS (0 credits)

BMI 8000 provides a regular forum for BMI graduate students, where the latest developments in the field of Biomedical Informatics are introduced and discussed. The course also functions as a central communication and collaboration hub for graduate students in BMI. Participation is required.

Prerequisite(s)/Corequisite(s): Students in the MS in BMI and PhD in BMI program may register. Not open to non-degree graduate students.

BMI 8020 ADVANCED COURSE IN BIOINFORMATICS (3 credits)

This is a special topics course designed to explore the research interests of faculty and students. Therefore, topics may include, but are not limited to, such areas of study as next-generational sequencing, biological networks, proteomics, metabolomics, and biomedical informatics.

Prerequisite(s)/Corequisite(s): Admission to the MS/PhD Program in the College of Information Science and Technology, or permission of the instructor. Not open to non-degree graduate students.

BMI 8080 SEMINAR IN BIOMEDICAL INFORMATICS (1-3 credits)

This is a variable-content course that engages students in current research in Biomedical Informatics and develops skills in the oral and written presentation of scientific research.

Prerequisite(s)/Corequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular course offerings.

BMI 8100 INTRODUCTION TO BIOMEDICAL INFORMATICS (3 credits)

This course offers students an overview of the field of biomedical informatics, combining perspectives from computing, biosciences and medicine. The historical development of the field and its influence on biological, clinical, and translational research will be discussed. Issues related to bioinformatics, clinical, bioimaging and public health/population informatics will be explored.

Prerequisite(s)/Corequisite(s): Class standing of senior or above.

BMI 8300 PUBLIC HEALTH GENOMICS (3 credits)

This course will address the biopsychosocial issues that bridge genomics and public health, which are generally considered two vastly different disciplines. The focus will center on understanding how genomics may be incorporated into health promotion and disease prevention efforts for individuals and population.

Prerequisite(s)/Corequisite(s): Class standing of senior or above.

BMI 8400 LINEAR ALGEBRA FOR ADVANCED COMPUTING AND AI (3 credits)

Matrix Analysis and Linear Algebra are at the core of several important algorithms and techniques that are widely used in machine learning for data analytics, imaging informatics, and bioinformatics. The course will explore fundamental concepts of matrix analysis and linear algebra as they apply to machine learning, emphasizing applications over proofs. Students will have an opportunity to perform "pencil and paper" calculations as well as more sophisticated numerical computations using a programming language/statistical environment of their choice. Applications of linear algebra to machine learning in the context of imaging informatics and biomedicine will be covered in depth.

Prerequisite(s)/Corequisite(s): Proficiency in programming and knowledge of calculus are required. Familiarity with concepts from biology is beneficial but not required.

BMI 8540 FOUNDATIONS IN PROGRAMMING FOR BIOMEDICAL INFORMATICS (3 credits)

Foundations in programming, software development, pipeline management, and version control are critical for developing a capable biomedical informatics workforce. This course will provide foundations in programming skills necessary for students with a limited computer science background to develop fluency and basic skills in the concepts of software development for biomedical informatics. Specific topics covered will include Unix/Linux shell programming, Python, databases, Applications Programming Interface (APIs), software versioning, and data management.

Prerequisite(s)/Corequisite(s): Experience with programming in a scripting, database management, or object-oriented programming language is strongly recommended but not required.

BMI 8850 BIOMEDICINE FOR THE NONMEDICAL PROFESSIONAL (3 credits)

This course will cover the basic principles of molecular and cellular biology, human anatomy, physiology, and pathology that are essential to an informed use of biomedical data. The biomedical topics will be interspersed and complemented with discussions about relevant data sources and datasets, emphasizing their strengths and weaknesses, and the lectures will be enriched with virtual anatomical dissections. Reading assignments from the primary literature and multimedia materials will supplement the textbook.

Prerequisite(s)/Corequisite(s): Class standing of senior or above

BMI 8866 BIOINFORMATICS ALGORITHMS (3 credits)

The main objective of this course is to provide an organized forum for students to learn recent developments in Bioinformatics, particularly, from the algorithmic standpoint. The course will present basic algorithmic concepts in Bioinformatics and show how they are connected to molecular biology and biotechnology. Standard topics in the field such as restriction mapping, motif finding, sequence comparison, and database search will be covered. The course will also address problems related to Bioinformatics like next generation sequencing, DNA arrays, genome rearrangements and biological networks. (Cross-listed with BIOI 4860).

Prerequisite(s)/Corequisite(s): CSCI 3320 and BIOL 1450; Or permission of instructor.

BMI 8896 GENETIC SEQUENCE ANALYSIS (3 credits)

The goal of this course is to introduce students to major topics in computerized analysis of genetic sequences. In particular the course will allow students to become familiar with the computational tools and software that aid in the modern molecular biology experiments and analysis of experimental results. Following the completion of this course, it is expected that the students will have a basic understanding of the theoretical foundations of the sequence analysis tools and develop competence in evaluating the output from these tools in a biological context. This course will emphasize hands-on experience with the programs for nucleotide and amino acid sequence analysis and molecular phylogeny.

Prerequisite(s)/Corequisite(s): Permission from the instructor.

BMI 8900 INDEPENDENT RESEARCH IN BIOMEDICAL INFORMATICS (1-3 credits)

The content of the course will vary, however both the student and the faculty member must sign an Independent Research Agreement and file it with the Biomedical Informatics Graduate Program Committee before registration for the course. This agreement will detail the project, the schedule for its completion, the form of the output, the method of evaluation and other relevant information pertaining to the project.

Prerequisite(s)/Corequisite(s): Permission of instructor, and at least 12 hours of course work toward the MS BMI program should be completed.

BMI 8910 INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the Biomedical Informatics graduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s)/Corequisite(s): Students must have completed a minimum of 12 credit hours towards the MS in BMI program. Not open to non-degree graduate students.

BMI 8970 INDEPENDENT STUDY IN BIOINFORMATICS (1-3 credits)

This is a variable-credit course designed for graduate students in bioinformatics who would benefit from independent reading assignments and research-type problems. Independent study enables coverage of topics not taught in scheduled course offerings.

Prerequisite(s)/Corequisite(s): Permission of a supervising faculty member and approval of the Bioinformatics Program Committee Chair. A formal description of the problem area to be investigated, the resources to be used, and the results to be produced must be prepared.

BMI 8990 THESIS IN BIOMEDICAL INFORMATICS (1-6 credits)

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.

Prerequisite(s)/Corequisite(s): Graduate major in BMI and approval of the Thesis Advisory Committee. Not open to non-degree graduate students.

BMI 9900 ADVANCED RESEARCH IN BIOMEDICAL INFORMATICS (1-3 credits)

This course provides a format for exploring advanced research areas for doctoral students in Biomedical Informatics and related fields. Specific topics will vary in keeping with research interest of faculty and students.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Biomedical Informatics. Not open to non-degree graduate students.

BMI 9980 INDEPENDENT RESEARCH IN BIOMEDICAL INFORMATICS (1-3 credits)

This course allows students to research a topic of their interest that is not available in a formal course. The topic to be studied must be agreed upon by the student and the instructor.

Prerequisite(s)/Corequisite(s): Admission to Ph.D. program in Biomedical Informatics and permission of instructor. Not open to non-degree graduate students.

BMI 9990 DISSERTATION (1-12 credits)

The dissertation is an original research project conducted and written under the direction of a faculty dissertation committee supervisory committee.

The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge in health or bioinformatics and demonstrate technical mastery of the discipline.

Prerequisite(s)/Corequisite(s): Admission to the Ph.D. program in Biomedical Informatics and candidacy for the Ph.D. degree. Prior to enrolling for dissertation hours, the students must have permission of the supervisory committee. Not open to non-degree graduate students.

Biomechanics and Kinesiology

BMKI 9000 GRANT WRITING FOR THE BIOMEDICAL SCIENCES (3 credits)

The purpose of this course is to introduce students to the scientific process and translate it to effective grant writing for biomedical sciences. Topics covered include hypotheses development, strong inference, how to write specific aims, how to generate ideas, federal grant processes with emphasis on National Institutes of Health, National Science Foundation and Veterans' Affairs, how to evaluate calls for grant applications, grant construction, and stylistic writing approaches. Students will compare and contrast successful and unsuccessful grant submissions.

BMKI 9001 RESEARCH IN HEALTH & KINESIOLOGY (3 credits)

The course introduces students to scientific writing, quantitative research design, and statistical methods. Considerable emphasis is placed on evaluation of research in scholarly publications. A research proposal in the form of a grant proposal is written as one of the course requirements. Students will develop the skills necessary to analyze study designs in existing literature and create a research proposal. (Cross-listed with HEKI 8030).

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

BMKI 9010 PRINCIPLES AND PRACTICE OF BIOMEDICAL RESEARCH (3 credits)

The purpose of this course is to introduce students to a variety of topics related to research practice that will allow them to be successful, independent scientists. Topics covered include manuscript writing and plagiarism, authorship, mentoring, research ethics, responsible conduct of research, presentation skills, research notebook keeping, scientific etiquette, and time and laboratory management.

BMKI 9031 BIostatistics in Biomechanics I (3 credits)

The focus of the course is to prepare students to understand and apply research and biostatistical methods needed in the design and analysis of biomechanical investigations. The major topics to be covered include research design and multiple linear regression. (Cross-listed with BMCH 8030)

Prerequisite(s)/Corequisite(s): Graduate Standing in Biomechanics program or Department Permission.

BMKI 9040 BIostatistics in Biomechanics II (3 credits)

The focus of the course is to prepare graduate students to understand and apply advanced research and biostatistical methods needed in the design and analysis of biomechanical investigations. The major topics to be covered include advanced research design and the general linear model. This course builds upon basic research design and linear regression learned in Biostatistics in Biomechanics I for the application in single factor and multi-factor experimental analyses.

Prerequisite(s)/Corequisite(s): Graduate Standing, BMCH 8030/ BMKI 9031 or equivalent

BMKI 9041 ADVANCED STATISTICS (3 credits)

This course will be a study in the statistical methods commonly used in descriptive and experimental research in physical education and exercise science. Application, particularly regarding the purpose, selection, and interpretation of statistical procedures will be emphasized. (Cross-listed with KINS 8040).

Prerequisite(s)/Corequisite(s): HPER 8030/HEKI 8030 or BMKI 9001/ HPER 9031/HEKI 9031 or equivalent

BMKI 9050 PHYSICAL ACTIVITY EPIDEMIOLOGY (3 credits)

This course will cover the broad scope of the issues related to epidemiological methods that are relevant to the study of physical activity populations. It is intended to enhance students' ability to understand and apply epidemiological methods to physical activity related research.

Prerequisite(s)/Corequisite(s): PE 8130/KINS 8130 and PE 8040/KINS 8040 or related course, or permission by the instructor. Not open to non-degree graduate students.

BMKI 9101 NONLINEAR ANALYSIS FOR MOVEMENT STUDIES (3 credits)

This course is to introduce different nonlinear methods for the analysis of biological and movement time series. Emphasis will be given on understanding the algorithms behind each nonlinear method. (Cross-listed with BMCH 8100).

Prerequisite(s)/Corequisite(s): Instructor Permission

BMKI 9131 IMPLEMENTING PHYSICAL ACTIVITY IN DIVERSE POPULATIONS (3 credits)

This course will focus on information necessary to assess, design, implement, and evaluate the need for and effectiveness of physical activity interventions in diverse populations, races, and ethnicities. These populations will include: African American, Native American, Hispanic, Asian American, Pacific Islanders, and Caucasian. Additionally, candidates will complete a health and physical activity service learning project in which they will work with diverse populations in the community. (Cross-listed with KINS 8130).

Prerequisite(s)/Corequisite(s): PE 3900/KINS 3900 or PE 8905/KINS 8905 or PE 8700/KINS 8700 or HED 8600/PHHB 8600.

BMKI 9141 PHYSICAL ACTIVITY ASSESSMENT AND HEALTH RELATED RESEARCH (3 credits)

This course will cover the broad scope of research on physical activity and public health. Emphasis will be placed on the application of physical activity assessment techniques. (Cross-listed with KINS 8140).

BMKI 9201 MATLAB FOR MOVEMENT SCIENCES (3 credits)

Introduction to Matlab software, plotting data, spectral analysis and the Fourier transform, data smoothing, and image analysis of movement related data. All topics will be implemented using Matlab. (Cross-listed with BMCH 8200).

Prerequisite(s)/Corequisite(s): Instructor permission.

BMKI 9401 MOTOR LEARNING I (3 credits)

Discussion and analysis of scientific principles related to the learning of motor skills; review related literature and research in motor learning. The focus of the course is on recent theories of how movements are acquired and performed, and on factors that have implications for motor learning throughout the life span. (Cross-listed with BMCH 8400).

Prerequisite(s)/Corequisite(s): Department Permission.

BMKI 9411 MOTOR CONTROL I (3 credits)

The focus of the course is to explore the study of the conditions and factors that influence the control and performance of motor skills from both neurophysiological and psychobiological perspectives. (Cross-listed with BMCH 8410).

Prerequisite(s)/Corequisite(s): Department Permission. Not open to non-degree graduate students.

BMKI 9421 MOTOR DEVELOPMENT (3 credits)

This course focuses on the study of motor development, the processes that underlie this development and the factors that influence it. Students will gain an understanding of the major theoretical perspectives of motor development across the life span with special emphasis given in child development. (Cross-listed with BMCH 8420).

Prerequisite(s)/Corequisite(s): PE 2800 (Motor Behavior) or permission of instructor.

BMKI 9451 ADVANCED BIOMECHANICS (3 credits)

The course will address the biomechanical basis of human performance including mechanical analysis of human gait, fundamental movement patterns and techniques used for collecting biomechanical data. (Cross-listed with BMCH 8450).

Prerequisite(s)/Corequisite(s): BMCH 4630 (Biomechanics) [previously PE 4630] or Instructor Permission.

BMKI 9460 ADVANCED BIOMECHANICS II (3 credits)

A comprehensive and advanced detailed investigation of the biomechanics of motor performance in special populations such as stroke, Parkinson's disease, and amputees. Includes advanced study of the mechanical analysis of motor skills and movement patterns and the research techniques for collecting and interpreting biomechanical data. Detailed lectures will cover etiology of such special populations with a focus on the endpoint movement disorders.

Prerequisite(s)/Corequisite(s): BMCH 8450 or BKMI 9451/BMCH 9451 or Instructor Permission. Not open to non-degree graduate students.

BMKI 9500 MOTOR LEARNING II (3 credits)

The focus of the course is to further explore the study of the conditions and factors that influence the learning and performance of motor skills.

Prerequisite(s)/Corequisite(s): BMCH 8400, BMKI 9401/BMCH 9401 or Instructor Permission. Not open to non-degree graduate students.

BMKI 9510 MOTOR CONTROL II (3 credits)

The focus of the course is to further explore the study of the conditions and factors that influence the control and performance of motor skills.

Prerequisite(s)/Corequisite(s): BMCH 8410, BMKI 9411/BMCH 9411 or Department Permission. Not open to non-degree graduate students.

BMKI 9520 MOTOR DEVELOPMENT II (3 credits)

This course focuses on the study of motor development, the processes that underlie this development and the factors that influence it. This course will focus on exploring motor development in clinical populations of people with autism, down syndrome, cerebral palsy, etc. and the factors that influence the progression of motor skills.

Prerequisite(s)/Corequisite(s): BMCH 8420 or permission from instructor.

BMKI 9701 PSYCHOLOGY OF PHYSICAL ACTIVITY (3 credits)

The central purpose of this course is to examine the psychological antecedents and consequences of exercise and physical activity behaviors. The course will focus on traditional theories/principles of psychology as they relate to various physical activity settings. (Cross-listed with KINS 8700).

BMKI 9810 HIGHER EDUCATION TEACHING SEMINAR (3 credits)

The seminar is designed to prepare students for entry into a higher education teaching career. This seminar requires doctoral students to teach an undergraduate or graduate lecture course relevant to their field of preparation. The seminar includes an examination of the roles, responsibilities, and privileges associated with teaching in higher education.

Prerequisite(s)/Corequisite(s): Admittance to the UNO Doctoral Program in Biomechanics and Kinesiology and successful completion of 24 hours of doctoral coursework and approval from advisor. Not open to non-degree graduate students.

BMKI 9820 SERVICE EXPERIENCE IN HIGHER EDUCATION (3 credits)

This seminar will allow students the opportunity to gain valuable knowledge of the service expectations of faculty in higher education settings. The seminar will focus on service opportunities within the university, within the profession and within the community. Participants in the seminar will complete appropriate service activities.

Prerequisite(s)/Corequisite(s): Admittance to the UNO Doctoral program in Biomechanics and Kinesiology, successful completion of 24 hours of doctoral coursework, and approval from advisor. Not open to non-degree graduate students.

BMKI 9851 EXERCISE FOR SPECIAL POPULATIONS (3 credits)

The course will examine the physiological and medical limitations imposed on people with various common chronic diseases/conditions including arthritis, osteoporosis, exercise-induced asthma, obesity, diabetes, hypertension and pregnancy. Special groups such as children and elders will be discussed. Content will emphasize the etiology and guidelines for exercise testing, prescription, and supervision. (Cross-listed with HEKI 8850).

Prerequisite(s)/Corequisite(s): PE 4940/KINS 4940 or PE 8946/KINS 8946

BMKI 9870 MUSCULOSKELETAL SIMULATION (3 credits)

This course covers knowledge and skills needed to generate dynamic models, analyses, and simulations of the human musculoskeletal system for different types of movement. In this course, students build and analyze computer simulations implemented on common software platforms to gain insight into movement biomechanics and control. The materials covered in this course may be of interest to engineers, physical therapists, and biomedical researchers looking to apply their technical skills to solving clinical problems. This course emphasizes the technical skills necessary to conduct and analyze musculoskeletal simulations of movement.

Prerequisite(s)/Corequisite(s): Department Permission.

BMKI 9910 DOCTORAL SEMINAR (3 credits)

The major goal of this course is to teach the graduate student how to write manuscripts/grants and be an effective academician with strong ethics. The outcome of this course is for the student to produce a manuscript based on data acquired in the laboratory from the ideas developed in the seminar or submit a grant that will support the research ideas developed in at least one semester. The material covered is intended to equip students with the skills necessary to be successful in their academic careers with emphasis given on writing scientific papers.

Prerequisite(s)/Corequisite(s): Admission into the PhD program. Not open to non-degree graduate students.

BMKI 9911 INDEPENDENT STUDY IN BIOMECHANICS (1-6 credits)

This is a variable credit course designed for graduate students in Biomechanics who would benefit from independent reading assignments and problems. Independent study enables individual students or a small group of students to focus on topics typically not explored in other offerings or to explore topics currently offered in further depth. (Cross-listed with BMCH 8910).

Prerequisite(s)/Corequisite(s): Graduate student in BMCH and approval by Faculty Advisor. Not open to non-degree graduate students.

BMKI 9951 ADVANCED EXERCISE PHYSIOLOGY (3 credits)

A detailed analysis of selected topics including acute and chronic effects of exercise on metabolic, pulmonary, and cardiovascular function; and sports nutrition. Current research findings and methodology will be emphasized. (Cross-listed with KINS 8950).

Prerequisite(s)/Corequisite(s): PE 4940/KINS 4940 or equivalent

BMKI 9960 ADVANCED EXERCISE PHYSIOLOGY II (3 credits)

The focus of this course is a detailed analysis of the mechanisms responsible for acute and chronic responses to exercise at the cellular and molecular level. Current and historical research will be emphasized.

Prerequisite(s)/Corequisite(s): PE 8950/KINS 8950 or BMKI 9951/PE 9951/KINS 9951. Not open to non-degree graduate students.

BMKI 9990 DISSERTATION (1-15 credits)

The course provides doctoral candidates in Biomechanics & Kinesiology with a process to complete a dissertation research plan. The course learning activities will focus on the completion of a candidate's dissertation. The course is designed to allow advanced doctoral candidates to demonstrate technical mastery of the discipline and to advance knowledge by completing an investigation.

Prerequisite(s)/Corequisite(s): Admittance to UNO Doctoral Program in Biomechanics & Kinesiology, successful completion of doctoral coursework & comprehensive exams, dissertation supervisory committee chair approval & advancement to candidacy. Not open to non-degree graduate students.

Black Studies (BLST)

BLST 8020 RACE, ETHNICITY, AND AMERICAN CULTURE (3 credits)

This course explores two central themes, race and ethnicity, which have played a dominant role in the shaping of American society and American culture. (Cross-listed with UBNS 8020).

Prerequisite(s)/Corequisite(s): BLST 1000, BLST 1100, or permission by the instructor.

BLST 8036 AFRICANA RELIGIONS (3 credits)

An introduction to religions in Africa and the diaspora, including African Traditional Religions, Christianity, Islam, and Afro-Caribbean religious traditions, using anthropological, historical, and other academic approaches to the study of religious and spiritual traditions. In particular, students will learn about the role of spirits, ancestors, witches, and other invisible agents in ideas and practices regarding health and healing. Finally, the class will examine the complex inter-relationships between religious ideas and practices and contemporary post-colonial political-economic realities, including the consequences of genocide and other human rights violations and the role of religious communities in social and economic development. (Cross-listed with RELI 8036, RELI 4030, BLST 4030).

BLST 8040 AFRO-AMERICAN SOCIOLINGUISTICS (3 credits)

The aim of this course is to examine Black American English (i.e., vernacular theory) and the contributions of language to our understanding of sociolinguistic theory. The course demonstrates how Black American English reveals the complexities of the African American experience. The course also examines significant theories and arguments concerning the genesis, maintenance and social function of African American English.

Prerequisite(s)/Corequisite(s): BLST 1000, BLST 2100 or permission of instructor.

BLST 8070 ADVANCED AFRICAN AMERICAN HISTORIOGRAPHY (3 credits)

The purpose of this course is to examine the conceptual and historical foundations of Afro-American historiography. To achieve this, the course takes as its point of departure the concept of vindication as it has traditionally been used by African American scholars, namely the conflict between white racism and the African American assertion of a counter identity.

Prerequisite(s)/Corequisite(s): BLST 1000, BLST 1100, or permission of instructor. BLST8070

BLST 8080 SPECIAL TOPICS IN BLACK STUDIES (3 credits)

The content of this course will change periodically. Each time this course is offered it will focus, in detail and in depth, on some aspect of the black experience, such as language and dialect, historiography and historicity, theology and religion, musicology, literature, etc. Students may repeat this course as often as they like, as long as a specific subject is not duplicated.

BLST 8096 BLACK STUDIES ORAL HISTORY (3 credits)

The focus of this course is to examine the method, procedure, transcription and the use of oral history in black studies research. Emphasis will be directed toward describing and evaluating the variables of memory, history and cultural authority, to produce written source materials collected from oral interviews. (Cross-listed with BLST 4090.)

BLST 8110 GLOBAL-LOCAL: OPPORTUNITIES, BARRIERS, ENGAGEMENT (3 credits)

This course focuses on global cultural and social forces and how they interact to form nexuses of both opportunity and obstacle to constructive human engagement on a wide array of social issues. An overview of topics covered in the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. This course will provide students with the analytical tools, collaborative engagement skills, and applied problem-solving techniques that will help students succeed in this concentration and program. (Cross-listed with CACT 8110)

Prerequisite(s)/Corequisite(s): Graduate standing.

BLST 8156 AFRICAN AMERICAN PSYCHOLOGY (3 credits)

African American Psychology traces the psychological history of Africans and African Americans from self-attributes and identity, through race and racism, to cognition, learning, and language. This course will review concepts relevant to understanding the psychology of African Americans, methodological and research issues, and best practices. (Cross-listed with BLST 4150, PSYC 4150, PSYC 8156).

Prerequisite(s)/Corequisite(s): BLST 1000 and Junior standing or Instructor permission

BLST 8205 BLACK NATIONALISM AND PAN AFRICANISM (3 credits)

A study of the development of movements for self-determination in Afro-America and analysis of various nationalistic conceptual frameworks in the Diaspora and on the continent. (Cross-listed with BLST 3200).

Prerequisite(s)/Corequisite(s): BLST 1000, BLST 2410, or permission of instructor.

BLST 8266 WOMEN OF COLOR WRITERS (3 credits)

Women of Color Writers is designed to introduce graduate students to the multicultural, literary experience, creativity and contributions of women of color writers to contemporary world literature. (Cross-listed with BLST 4260)

BLST 8560 BLACK LEADERS OF THE TWENTIETH CENTURY (3 credits)

This course is an intellectual study of selected African American leaders of the 20th century, such as: Booker T. Washington, T. Thomas Fortune, Ida Wells-Barnett, W.E.B. DuBois, James Weldon Johnson, Marcus Garvey, Mary McLeod Bethune and Charles Hamilton Houston. Direct emphasis will focus on examining issues and schemes of race, gender and class, relative to the selected subjects and their participation in mass social movements.

BLST 8570 SEMINAR IN BLACK STUDIES (3 credits)

This course introduces the student to the professional background of the academic field of Africana Studies. Among the topics to be covered are the predecessors to the current field, the main proponents of the intellectual traditions of Africana studies, the fundamental philosophical bases of the field, the key documents and texts, the professional journals and associations, the Afrocentric perspective and critique, and the protocols of academic and scholarly work in Africana studies.

Prerequisite(s)/Corequisite(s): BLST 1000, BLST 1050, BLST 3950.

BLST 8580 SEMINAR IN RESEARCH AND WRITINGS OF W.E.B. DUBOIS (3 credits)

This course examines the life and writings of W.E.B. DuBois, who stands as the most eminent intellectual produced by people of African descent in the United States. Perhaps, next to Cheikh Anta Diop, DuBois is the most respected and honored African scholar of the 20th century. Within the context of Western traditions, DuBois is in the top category of prodigious intellectuals developed in the West. He is the father of modern American sociology, the founder of reconstruction history, the leader in urban analysis, the first serious student of inter-racial relations, as well as a novelist, poet, playwright, and essayist.

BLST 8586 COMMUNICATING RACE, ETHNICITY & IDENTITY (3 credits)

This is an undergraduate/graduate course that provides students with definitional and experiential knowledge about the origin of racial concepts, theories, and practices, definitions of ethnicity and identity, and the communicative relationship between race, ethnicity, and identity. (Cross-listed with BLST 4580, CMST 4580, CMST 8586)

BLST 8596 AFRICAN-AMERICAN POPULAR MUSIC FROM BEBOP TO HIP-HOP (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of African-American popular music literature from c. 1900-present. The objective will be to provide the student with a broad overview with special attention given to musicians and individual works which typify a style or form. Listening assignments will be an integral part of the course, and attendance at live performances will supplement the lectures, discussions and readings. (Cross-listed with MUS 8596, MUS 4590, BLST 4590).

Prerequisite(s)/Corequisite(s): Music major standing or permission of instructor.

BLST 8656 SLAVERY AND RACE RELATIONS IN THE AMERICAS (3 credits)

Slavery and Race Relations in the Americas examines the historical relationship between the trans-Atlantic slave trade and American race relations, connecting the enslavement of Africans in the Americas to race relations in the Caribbean, Latin America, and the United States. (Cross-listed with BLST 4650, HIST 4070, HIST 8076, LLS 8656).

Prerequisite(s)/Corequisite(s): Graduate standing

BLST 8700 AFRICAN PHILOSOPHY (3 credits)

Explores ancient, traditional and contemporary philosophical/theological concepts and doctrines of Africans through an investigation of their cosmological, metaphysical, ontological, and ethical world view.

Prerequisite(s)/Corequisite(s): Graduate status.

BLST 8716 BROWN V. BOARD OF EDUCATION (3 credits)

Brown v. Board of Education traces the educational history of African Americans from segregation to desegregation to re-segregation. This course will review the legal cases before and after the Supreme Court's Brown decision, their aftermath, and the effects on educational policies and practices. (Cross-listed with BLST 4710).

Prerequisite(s)/Corequisite(s): Graduate standing

BLST 8756 CRITICAL QUANTITATIVE RESEARCH METHODS (3 credits)

This online undergraduate/graduate course is a comprehensive source for foundational concepts in quantitative behavioral research. The course is designed to expose students to the role and importance of critical quantitative research of marginalized and underrepresented groups. Students will examine and gain definitional and empirical knowledge about conducting culturally relevant quantitative research and will learn both the logic behind and procedures for critical quantitative research, including research ethics, correlational and experimental designs, data collection, sampling, analysis, and reporting. (Cross-listed with BLST 4750).

Prerequisite(s)/Corequisite(s): Graduate student or instructor permission

BLST 8886 SEMINAR ON BLACK LEADERSHIP IN AMERICA (3 credits)

Designed as a senior and graduate seminar, this course will examine the meaning and attributes of effective leadership. The role of black leadership in the African American experience will be examined. Profiles of selected African American leaders and their political strategies also will be analyzed in the seminar. (Cross-listed with BLST 4880).

Prerequisite(s)/Corequisite(s): Senior or graduate student or instructor permission.

Business Administration (BSAD)

BSAD 8000 BUSINESS ETHICS: ACHIEVING SOCIAL RESPONSIBILITY (2 credits)

This core MBA course will explore the relationship between law and ethics, will examine the generally-accepted theoretical principles associated with doing business ethically, and will examine practical ethical issues associated with various facets of business.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent) or admission to the MAcc program. Students with an undergraduate major or a graduate degree in Law may not include this course in a plan of study for the MBA degree. Not open to non-degree students

BSAD 8010 LEGAL, SOCIAL AND ETHICAL ENVIRONMENT (3 credits)

Focus upon law and ethics. Business law, legal processes, and regulation will be the subject matter focus. Business ethics will be a recurring focus of analysis. Analysis of the social environment will include public policy. Both subject matter and analysis will be integrated to build the student's critical thinking skills.

Prerequisite(s)/Corequisite(s): Completion of MBA foundation requirements and BSAD 8060 (BSAD 8060 prior to or concurrent); or admission to the MAcc program. Not open to nondegree students.

BSAD 8020 ENVIRONMENTAL ECONOMICS AND MANAGEMENT (3 credits)

This course covers topics related to environmental economics and policy, with an emphasis on comparative policy analysis and business strategies towards the environment. (Cross-listed with ECON 8020)

Prerequisite(s)/Corequisite(s): Principles of Microeconomics (ECON 2200) and Principles of Macroeconomics (ECON 2220), or Analytical Foundations of Economics (BSAD 8180), or permission of the instructor. Not open to non-degree graduate students.

BSAD 8026 RESEARCH METHODS IN ECONOMICS AND BUSINESS (3 credits)

Covers the methodology of economics: choosing a research topic, literature search tools, data source identification, data summary techniques, basic statistical data analysis using statistical packages, and clear economics writing. The student will become familiar with these techniques through text materials, journal studies, and completion of an empirical economics paper. (Cross-listed with ECON8296.)

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to nondegree students.

BSAD 8030 INFORMATION TECHNOLOGY IN BUSINESS (3 credits)

The premise of this course is that today's managers must learn to use information technology to create competitive firms, manage global corporations and provide useful products and services to customers. Accordingly, the content of this course is focused on use of information technology for competitive advantage. Students will develop case studies of firms who have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application.

Prerequisite(s)/Corequisite(s): Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent). Not open to nondegree students.

BSAD 8040 BUSINESS AND INFORMATION TECHNOLOGY: CONNECTING PEOPLE AND INFORMATION (2 credits)

The premise of this course is that today's managers must learn to use information technology to create competitive firms, manage global corporations and provide useful products and services to customers. Accordingly, the content of this course is focused on use of information technology for competitive advantage. Students will develop case studies of firms who have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in management information systems may not include this course in a plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8050 BUSINESS CONDITIONS ANALYSIS (3 credits)

This course is concerned with the statistical measurement and evaluation of general business conditions, and the adaptation of business policies to changing business conditions. Emphasis is placed upon the practical application of the statistical techniques of analysis to the business situation, within the framework of the aggregate economy.

Prerequisite(s)/Corequisite(s): ECON 2200 or BSAD 8180. Not open to nondegree students.

BSAD 8060 PEOPLE: CULTIVATING SKILLS FOR LEADERSHIP (2 credits)

This course will prepare students with the skills to effectively enact the critical leadership skills of listening, employee feedback and coaching, goal-setting, empowerment/delegation, influencing, interviewing, conflict, negotiation, intercultural awareness, team/group discussions, and business etiquette.

Prerequisite(s)/Corequisite(s): Admission to the MBA program. Not open to non-degree graduate students.

BSAD 8066 HEALTHCARE ANALYTICS FOR BUSINESS (3 credits)

This course will focus on the use of analytics to develop key performance indicators that integrate and evaluate clinical, administrative, and financial performance. Key concepts in this course will include information management, performance metrics, data visualization, and communication of results across the healthcare ecosystem. Specific topics will include health outcomes analysis, financial performance, developing an analytics strategy, data quality and governance, and the four stages of actionable intelligence. (Cross-listed with MGMT 4060, SCMT 4060).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8070 EXECUTIVE COMMUNICATION (1 credit)

This course emphasizes both strategic and practical approaches to business communication from an executive perspective and provides students with tools to improve their business communication skills. This course will focus on composing effective executive/business documents business reports, and briefings.

Prerequisite(s)/Corequisite(s): Enrollment in Executive MBA Program. Not open to non-degree graduate students.

BSAD 8076 INTERNATIONAL LOGISTICS MANAGEMENT (3 credits)

This course will focus on the logistics of international trade and how managers facilitate the flow of goods and services in import and export environments. Students will learn about infrastructure and business practices needed to manage international transportation, communications, services, and regulatory requirements. Students will develop an understanding of international terms of trade, transaction risk management, and location decisions for placement of warehouses and distribution centers. (Cross-listed with SCMT 4070).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8080 BUSINESS FORECASTING (3 credits)

The course will cover forecasting tools and applications applied to business settings. We will cover traditional Econometric forecasting methods in the first half of the class. In the second half of the course, we will focus on models in predictive analytics and machine learning, since these models are quickly becoming critical tools for forecasters in many settings. The course will include lecture and lab time, and labs will be focused on teaching students how to implement the models discussed in lectures. (Cross-listed with ECON 8310).

Prerequisite(s)/Corequisite(s): ECON 8320 (or equivalent programming experience) AND ECON 8300 (or equivalent multivariate regression analysis coursework) or permission of instructor. Not open to non-degree graduate students.

BSAD 8090 ESSENTIAL LEADERSHIP SKILLS (3 credits)

This course will teach students the interpersonal skills necessary to effectively manage others. Second, this course will serve as a vehicle to assess the business content knowledge and computer literacy of incoming MBA students in order to provide customized remediation recommendations for each student. Third, the course will collect information that will be used for assessment and accreditation purposes to evaluate the effectiveness of the MBA program. This course will address the following MBA program themes: communication, change agent, teamwork, information technology, critical thinking and information gathering and analysis.

Prerequisite(s)/Corequisite(s): Admission to the MBA program and completion of MBA foundation courses (or equivalent) or may be taken concurrently with the final foundation course. Not open to nondegree students.

BSAD 8096 PRINCIPLES OF COLLABORATION (3 credits)

Students will work with techniques for team leadership, interpersonal collaboration, consensus-building, creative problem solving, negotiation, facilitation, group process design, collaborative workspace design, and collaboration engineering. Students will gain hands-on experience with collaboration technologies. (Cross-listed with MGMT 4090, ITIN 4090)

Prerequisite(s)/Corequisite(s): Admission to a graduate program at UNO or the STRATCOM Leader Fellow Program. Not open to non-degree students.

BSAD 8100 MANAGERIAL ECONOMICS (3 credits)

The course will offer students tools of analysis drawn from consumer theory and the theory of the firm in order to improve the understanding of human behavior as it is constrained in the context of business decision-making. This course is intended for students who are seeking the degree of Master of Science in Economics or the degree of Master of Business Administration. (Cross-listed with ECON 8210).

Prerequisite(s)/Corequisite(s): ECON 2200 and 2220 or BSAD 8180 and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to nondegree students.

BSAD 8110 ACCOUNTING AND FINANCIAL FUNDAMENTALS (3 credits)

The course is designed to give incoming graduate students the foundation in accounting that is necessary for subsequent graduate courses. Emphasis is on introducing the students to as many accounting concepts as possible.

Prerequisite(s)/Corequisite(s): Graduate admission or permission of the appropriate graduate advisor. This course cannot be used in a plan of study for any graduate program at UNO. Not open to non-degree graduate students.

BSAD 8136 HUMAN RESOURCE MANAGEMENT (3 credits)

This course is a comprehensive review of human resource management concepts and practices. The course is designed to educate future managers and leaders on the importance of utilizing effective human resource methods that comply with federal laws and provide the organization with high-quality talent that provides a competitive advantage. (Cross-listed with MGMT 4030).

BSAD 8146 TOTAL REWARDS (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee compensation and benefit programs. The course is designed to enable future managers and human resource professionals to utilize effective strategies for managing the single largest controllable expense for organizations; employee pay and benefits. (Cross-listed with MGMT 4010).

Prerequisite(s)/Corequisite(s): BSAD 8136 or permission of instructor

BSAD 8150 ECONOMICS: ESSENTIAL CONCEPTS FOR MANAGERS (2 credits)

This course exposes MBA students to fundamental economic concepts necessary for successful business planning and financial success. Topics include: Comparative advantage and international trade, market dynamics, the role that the competitive landscape plays in company decision-making, macroeconomic growth and development, and monetary and fiscal policy and their impact on business activity.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in economics may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8156 TALENT DEVELOPMENT (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee training and development programs to optimize human capital effectiveness in modern organizations. The course is designed to enable future managers and human resource professionals to utilize effective strategies for assessing employee training needs and developing appropriate solutions to maximize talent utilization. (Cross-listed with MGMT 4120).

Prerequisite(s)/Corequisite(s): BSAD 8136 or permission of instructor.

BSAD 8166 STAFFING THE ORGANIZATION (3 credits)

This course is a comprehensive review of issues and techniques related to the acquisition of high-quality human resources for optimal organizational effectiveness. The course is designed to enable future managers and human resource professionals to utilize effective strategies for recruiting, selecting, placing, and integrating new employees into the organization's workforce. (Cross-listed with MGMT 4110).

Prerequisite(s)/Corequisite(s): BSAD 8136 or permission of instructor.

BSAD 8176 EMERGING TRENDS IN SUPPLY CHAIN MANAGEMENT (3 credits)

This course will focus on megatrends influencing supply chain management and design in the 21st century. Key concepts in this course will include contemporary opportunities and challenges in creating customer value via the supply chain with a focus on globalization, sustainability, and risk management. Specific topics will include the influence of the empowered customer on supply chain design, global supply chain trends, and the need for integration of technology and talent to create a competitive advantage. (Cross-listed with SCMT 4170).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8180 ANALYTICAL FOUNDATIONS OF ECONOMICS (3 credits)

To familiarize students with the basic economic theory and policy analysis (principles level) required to analyze economic problems and to understand and evaluate recommendations designed to solve those problems. This is a course for students and professionals seeking a degree of Master of Business Administration with little or no formal background in economics.

Prerequisite(s)/Corequisite(s): Graduate. This course cannot be used in a plan of study for any graduate program at UNO. Not open to non-degree graduate students.

BSAD 8200 MANAGERIAL ACCOUNTING (3 credits)

A study of concepts, analysis and procedures of accounting utilizing internal financial and non-financial data which provides management with information for planning and controlling routine operations, for non-routine decisions, policy-making and long-range planning; and for external reporting to stockholders, governments and interested parties.

Prerequisite(s)/Corequisite(s): ACCT 2010 and 2020 or BSAD 8110, and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to nondegree students.

BSAD 8206 CONSULTATIVE SELLING PRINCIPLES (3 credits)

The primary focus of the Consultative Selling Principles course is to develop the behaviors, methodologies, principles, and processes required to successfully lead and manage complex selling initiatives to a win-win close. The course examines and applies, through role playing and other activities, the critical relationship building, critical thinking, problem solving, listening and negotiating capabilities which are the foundation skills underlying consultative selling. (Cross-listed with MKT 4200)

Prerequisite(s)/Corequisite(s): MKT 3310 with 'C+' or better; MKT 3100 with C+ or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8210 ACCOUNTING: DECISIONS & CONSEQUENCES (2 credits)

Managers and administrators must be able to understand, analyze, and use accounting information to make operational and strategic business decisions. In this course, we will study practical uses of accounting information to address the problems and decisions managers face in business. Emphasis is placed on the user of accounting information rather than the preparer. Upon completion of this course, a student should be able to use accounting information to make management decisions, understand how accounting rules inform those decisions, and consequently, how those decisions affect a company's financial reports.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or graduate degree in accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8216 SELLING FINANCIAL SERVICES (3 credits)

Selling Financial Services concentrates on methods to effectively sell services and products in the financial services industry, including the banking, brokerage and insurance sectors. Targeting, initiating, and acquiring client relationships, expanding business opportunities, and maintaining long-term client relationships are the course's focal points. This integrative course is designed to provide students with a basic understanding of the selling profession and sales culture within the financial services industry. (Cross-listed with MKT 4210, FNBK 4210).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

BSAD 8226 GLOBAL STRATEGIC ACCOUNT MANAGEMENT (3 credits)

Throughout this course, the management of strategic account programs at national, multi-country, and global levels will be addressed. The primary focus of the curriculum is on the critical success factors for driving revenue, sustainable long term-growth and profitability with a base of core strategic buyers.

Prerequisite(s)/Corequisite(s): Senior or graduate student standing and permission of the instructor. Not open to non-degree graduate students.

BSAD 8230 CHANGE MANAGEMENT (2 credits)

This course provides a theoretical as well as pragmatic approach to change management for executive and senior level leaders in all types of organizations. Focus is given to organizational structure, managing culture, and critical components of senior level management effectiveness in leading change.

Prerequisite(s)/Corequisite(s): Enrollment in the Executive MBA program. Not open to non-degree graduate students.

BSAD 8240 EXECUTIVE LEADERSHIP DEVELOPMENT (2 credits)

This course aims to enhance the leadership effectiveness of students by developing executive competencies in problem solving, collaborative behaviors, teamwork, and conflict resolution. Students will gain crucial experience in using effective leadership tools to become leaders who act with a deeper understanding of themselves, their organizations, and their communities, and contribute positively to the growth of each.

Prerequisite(s)/Corequisite(s): Enrollment in UNO's Executive MBA program. Not open to non-degree graduate students.

BSAD 8250 ORGANIZATIONAL BEHAVIOR: ENHANCING HUMAN & ORGANIZATIONAL CAPABILITIES (2 credits)

This course will prepare students with the knowledge necessary to manage and lead organizations effectively. Students will learn management theories, understand important research findings in organizational behavior, and apply both theory and research results to real organizational situations, thus giving them the capacity to use OB theories to enhance organizational effectiveness.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in management may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8260 ACCOUNTING THEORY & PRACTICE (2 credits)

This course is designed to enhance students' understanding of financial statements and how executive decisions can influence these statements. Financial statements, including footnotes and explanatory material, are the primary instruments utilized by parties external to the enterprise in making judgments about the enterprise. By understanding how management decisions are reflected in the financial statements, managers will understand how they can influence their judgment.

Prerequisite(s)/Corequisite(s): Enrollment in UNO's Executive MBA program. Not open to non-degree graduate students.

BSAD 8280 STEWARDSHIP OF THE FIRM'S RESOURCES: HUMAN RESOURCE MANAGEMENT (2 credits)

This course provides a comprehensive review of effective human resource theory and practice with an emphasis on managerial influence on attracting, retaining, developing, and rewarding employees.

Prerequisite(s)/Corequisite(s): Admittance to the Executive MBA Program. Not open to nondegree students.

BSAD 8300 ORGANIZATION THEORY & DESIGN (3 credits)

A study of theories and guidelines for enhancing organizational effectiveness by matching an organization's structure to its environment, strategy, technology and size.

Prerequisite(s)/Corequisite(s): Graduate. Not open to nondegree students.

BSAD 8310 MANAGING PERFORMANCE IN ORGANIZATIONS (3 credits)

A human behavior course emphasizing the areas of individual behavior, interpersonal behavior, group behavior and the interplay of human and non-human factors.

Prerequisite(s)/Corequisite(s): Essential Leadership Skills (BSAD 8060) or admission to the MAcc program. Not open to nondegree students.

BSAD 8326 SALES MANAGEMENT (3 credits)

The student will be exposed to current research findings in sales management and to business cases and simulations where sales management theories and concepts will be applied. This course will prepare students to develop and implement specific compensation, motivation, and evaluation strategies for managing sales professionals across a wide variety of organizations. (Cross-listed with MKT 4320.)

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8330 STRATEGIC COLLABORATION: LEADING HIGH IMPACT TEAMS (1 credit)

This course is designed to enhance students' understanding of collaboration principles, practices and processes. In this interactive course, students will learn how to utilize collaboration tools and techniques and creative problem solving methods to enhance strategic decision making. Other concepts that will be introduced include building and assessing high-performing teams, managing and leading teams, identifying and resolving team dysfunctions, and team decision making approaches. Ultimately, students will learn how to be more influential and improve interactions so people and organizations can work together more efficiently.

Prerequisite(s)/Corequisite(s): Enrollment in Executive MBA Program. Not open to non-degree graduate students.

BSAD 8336 PROJECT MANAGEMENT (3 credits)

This course will focus on the planning and execution of complex projects within an organization. Students will learn how to conduct stakeholder analysis, plan the scope of a project, develop a project budget, lead a project team, and define the steps necessary to bring a complex project to a successful conclusion. Students will recognize how the strategy, structure, and culture of an organization can be used to identify and prioritize complex projects. (Cross-listed with MGMT 4330, SCMT 4330)

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program; or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8340 INTERNATIONAL BUSINESS STUDY ABROAD (3 credits)

This course provides students with an international business and cultural experience through a study tour in a selected international location. Students will develop an understanding of the factors that affect international business decisions by visiting American companies operating abroad and foreign companies that export goods and services to the U.S. Typically, travel is conducted during Spring Break.

Prerequisite(s)/Corequisite(s): Instructor Permission. Not open to non-degree graduate students.

BSAD 8345 CONSUMER BEHAVIOR (3 credits)

Consumers purchase, use, experience, and dispose of products and services as part of their consumption process. How and why consumers choose various brand options, form judgments about these brands, and decide which options to buy and/or re-buy are essential knowledge for marketing professionals. The course covers the psychological and social issues that guide consumption decisions. (Cross-listed with MKT 3320).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8350 SEMINAR IN MANAGEMENT (3 credits)

A student participation course emphasizing current issues and problems in the areas of management theory and operation.

Prerequisite(s)/Corequisite(s): Graduate. Not open to non-degree students.

BSAD 8356 GLOBAL SOURCING AND INNOVATION (3 credits)

This course focuses on global suppliers as partners in the development and commercialization of new products. Students will learn about open innovation and the integration of internal and external business systems in new product innovation. Students will develop an understanding of regulatory policies related to information sharing and the intellectual property rights of buyers and suppliers. (Cross-listed with SCMT 4350).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8360 FINANCIAL MANAGEMENT FOR EXECUTIVES (3 credits)

Students will develop strategic decision making skills by using financial concepts including time value of money, capital budgeting processes, cash flow forecasting and project risk analysis. Topics covered include: capital budgeting, financial statement analysis, capital structure, financial risk analysis and others..

Prerequisite(s)/Corequisite(s): Enrollment in the Executive MBA program. Not open to non-degree graduate students.

BSAD 8366 E-MARKETING (3 credits)

This course focuses on utilizing the Internet as a marketing platform. Course content includes discussion of how the Internet is used by businesses for designing products, pricing, promotions, distribution, positioning, gathering information, and cultivating relationships with stakeholders. The discussion about the rise of social media, sharing economy, virtual reality devices, and other relevant trends will also be part of the course. (Cross-listed with MKT 4360).

Prerequisite(s)/Corequisite(s): BSAD 8400 with a grade of 'B' or above. Not open to non-degree graduate students.

BSAD 8370 BUSINESS LAW AND ETHICS (2 credits)

Only students who have been admitted to the Executive MBA program may take this course. A comprehensive examination of the existing structure and mechanisms used to resolve disputes in the United States, which allows the student to understand the strengths and weaknesses of this system. It will specifically examine the body of substantive law that affects management, including court decisions, statutes (federal and state), traditional ethical theories as they relate to the law, and international problems that exist in the legal environment.

Prerequisite(s)/Corequisite(s): Enrollment in Executive MBA Program. Not open to non-degree graduate students.

BSAD 8376 SUPPLY CHAIN ANALYTICS (3 credits)

This course focuses on integrating supply chain management through the use of key performance indicators. Key concepts in this course include data visualization, supplier performance metrics, service-dominant logic, and the supply chain for data. Specific topics include the influence of the empowered customer on supply chain metrics, using metrics to develop a competitive advantage, data-driven decision making, and the four stages of actionable intelligence. (Cross-listed with SCMT 4370).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8380 STRATEGIC OPERATIONS MANAGEMENT (2 credits)

Students will learn how effective decision-making skills can be used to create a long-term competitive advantage for an organization through operational excellence. Key concepts in this course will include operations management, quality management, and data analytics. Specific topics will include process improvement, quality assurance, supply chain management, project management, and performance assessment.

Prerequisite(s)/Corequisite(s): Enrollment in UNO's Executive MBA program. Not open to non-degree graduate students.

BSAD 8386 INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT (3 credits)

This course will focus on the strategic procurement of products and services in order to gain a competitive advantage through integrated supply management. Students will learn about strategic supply management, contract negotiation, and supplier quality management. Students will develop an understanding of supplier performance management through the use of supply chain information systems. (Cross-listed with MKT 4380, SCMT 4380)

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8396 MARKETING ANALYTICS (3 credits)

This course focuses on the application of data analytics in marketing decision making (e.g., segmentation, sales forecasting, and resource allocation). Students will learn to apply statistics and econometrics to solve marketing problems. Key topics in this course include marketing data visualization, marketing metrics, descriptive and predictive analytics, and digital marketing analytics. This course takes a very hands-on approach with real-world databases and equips students with tools that can be used immediately on the job. (Cross-listed with MKT 4370).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8400 MARKETING POLICIES (3 credits)

This course provides an introduction to the fundamental concepts of marketing, including a customer orientation, matched with attention to competition and core strengths. The course will illustrate strategies and principles that will help you understand how marketing managers, product managers or service managers must think through their situations, determine their goals and lay a course to achieve those goals.

Prerequisite(s)/Corequisite(s): Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent); or admission to MAcc program. Not open to nondegree students.

BSAD 8420 MARKETING: UNDERSTANDING CONSUMERS AND MARKETS (2 credits)

This course exposes MBA students to the fundamental concepts, practices and issues of marketing. A wide range of marketing practices and structures will be explored including product and service firms, consumer and business markets, profit and not-for-profit organizations, domestic and global companies, and small and large businesses.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in marketing may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8426 BUSINESS DEMOGRAPHICS (3 credits)

The goal of this course is to develop a demographic perspective in order to assist in understanding the business environment and business policy. How population change impacts consumer markets and all of the functions (for example, accounting, finance and management) that must exist for these markets to perform. Includes a history of population change and policy as well as a view toward international population considerations. (Cross-listed with MKT 4420).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8430 STRATEGIC BRAND MANAGEMENT (3 credits)

An exploration of the characteristics, meanings, and management of brands in the business world. The course examines brands as a strategic asset, and draws on managerial, consumer, and cultural perspectives.

Prerequisite(s)/Corequisite(s): BSAD 8420 or permission of instructor. Not open to nondegree students.

BSAD 8440 DECISION ANALYTICS (2 credits)

Students will learn to use statistical and decision making tools to interpret data to solve practical management problems and gain desired results. Areas of focus will include market research, decision analysis, data analytics, and business forecasting.

Prerequisite(s)/Corequisite(s): Enrollment in Executive MBA Program. Not open to non-degree graduate students.

BSAD 8450 SEMINAR IN MARKETING (3 credits)

Exploration, study and critical analysis of contemporary marketing problems, trends, methods and approaches for seminar discussion and written report.

Prerequisite(s)/Corequisite(s): Graduate. Not open to nondegree students.

BSAD 8456 MANAGERIAL NEGOTIATION STRATEGIES (3 credits)

This course introduces students to the theory and practice of negotiation. The ability to negotiate successfully rests on a combination of analytical and interpersonal skills. In this course we will develop a set of conceptual frameworks that should help students better analyze negotiations in general and prepare more effectively for future negotiations in which they may be involved. This course is designed to help students better understand the theories, processes, and practices of negotiation, as well as conflict resolution and relationship management so that students can be more effective negotiators in a wide variety of situations. (Cross-listed with MGMT 4450, SCMT 4450).

BSAD 8466 SUPPLY CHAIN INTEGRATION (3 credits)

This course will focus on the integration of internal and external systems designed to maximize the efficiency and effectiveness of supply chain networks developed by industrial organizations, government agencies, and not-for-profit organizations. Key concepts will include supply chain design, trends in technology, and cross-functional collaboration, coordination, and communication along the value chain. Specific topics will include the influence of empowered customers on supply chain integration, global supply chain trends, closed-loop supply chains, and the challenges and benefits of integrating technology and talent in the workplace. (Cross-listed with SCMT 4460).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8480 APPLICATIONS IN ECONOMICS (2 credits)

Students will learn how to apply micro-economic concepts to corporate strategy. Topics covered include demand analysis and consumer behavior, cost efficiencies such as economies of scale and scope, market structure and strategic pricing, applications of game theory to strategy, and others. The course will also cover macroeconomic conditions and concepts that affect business decisions such as the detection, measurement, and determinants of business cycles and the resulting impact of macroeconomic policy.

Prerequisite(s)/Corequisite(s): Admittance to the Executive MBA Program. Not open to nondegree students.

BSAD 8510 SECURITY ANALYSIS (3 credits)

Study of the efficient market, fundamental and technical analysis approaches for the valuation of marketable securities. Methods of analysis are considered for the economy, industry groups and individual corporations.

Prerequisite(s)/Corequisite(s): BSAD 8500. Not open to nondegree students.

BSAD 8520 SEMINAR INVESTMENT MANAGEMENT (3 credits)

This course focuses upon the modern portfolio theory of investment management and its application in formulation of policies for individuals and institutional investors. Topics addressed will include qualitative and quantitative analysis of the risks and returns of portfolio management using efficient market, fundamental analysis, and technical analysis approaches.

Prerequisite(s)/Corequisite(s): BSAD 8510. Not open to nondegree students.

BSAD 8530 BANK & FINANCIAL MARKETS (3 credits)

This course focuses on the theory and practice in managing commercial banks. Topics covered include but not limited to: bank regulations, bank performance analysis, asset liability management, credit analysis and consumer loans. The course emphasizes the link between theory and practice through assigned course related readings, guest lecturers from industry experts, and a comprehensive bank research project on a local bank of your choice. At the end of the course, students should have a good understanding of basic banking theories as well as banking practices, and current issues and challenges facing the banking industry.

Prerequisite(s)/Corequisite(s): BSAD 8500. Not open to non-degree graduate students.

BSAD 8540 MULTINATIONAL FINANCIAL MANAGEMENT (3 credits)

The focus of this course is on multinational financial management as viewed and practiced by the multinational firm and on current developments in international financial markets, including global banking. Familiarity with certain areas of the firm's environment, such as the international monetary system, the European Monetary System, and determination of exchange rates under alternative regimes, is essential to the international financial manager.

Prerequisite(s)/Corequisite(s): BSAD 8500. Not open to nondegree students.

BSAD 8550 SEMINAR IN FINANCE (1-3 credits)

Selected topics from areas of business finance.

Prerequisite(s)/Corequisite(s): BSAD 8500. Not open to nondegree students.

BSAD 8560 MARKETING STRATEGIES (3 credits)

Marketing is the core of an operating business. Marketing is the art and science of creating customer value and market place exchanges that benefit the organization and its stakeholders. It is an organizational philosophy and a set of guiding principles for interfacing with customers, competitors, collaborators, and the environment. Students will learn how successful businesses match their objectives and resources with opportunities in the marketplace by identifying and measuring consumer needs, determining target markets and deciding which products and services to offer. Strategies for pricing, promoting and distributing the firm's products and services to create competitive advantage in domestic and international markets are covered.

Prerequisite(s)/Corequisite(s): Enrollment in UNO's Executive MBA program. Not open to non-degree graduate students.

BSAD 8570 STRATEGIC MANAGEMENT (3 credits)

This course centers around the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. Students will develop the strategic thinking skills needed to formulate and execute successful strategies for firms/organizations in a variety of industries and dynamic environments. Emphasis is given to the contributions of several business disciplines of study, such as marketing, finance and management, to understanding both the internal operations of the organization and the influences of the external environment. This course is integrative and introduces both the theory and practice that enables that integrative process.

Prerequisite(s)/Corequisite(s): Enrollment in UNO's Executive MBA program. Not open to non-degree graduate students.

BSAD 8576 INVESTMENT MANAGEMENT FOR FINANCIAL ANALYSTS (3 credits)

This course provides critical knowledge needed for students pursuing a career in investment management. The topic areas bridge academic theory, current industry practice, and ethical and professional standards and comprehensively address the areas assessed in the Chartered Financial Analyst examinations. (Cross-listed with FNBK 4570)

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

BSAD 8590 SEMINAR IN BUSINESS ADMINISTRATION (3 credits)

This course hosts the international business consulting project. Both a theory and a practical course, it examines opportunities and challenges for a domestic U.S. firm or industry attempting to enter or expand its presence in an international market. Emphasis is placed on developing focused and appropriate research objectives, the collection and analysis of data for decision-making, development and evaluation of strategy alternatives, and on the production and presentation of a professional, prescriptive consulting report.

Prerequisite(s)/Corequisite(s): Admittance to the Executive MBA Program. Not open to nondegree students.

BSAD 8596 RISK MANAGEMENT FOR BUSINESS MANAGERS (3 credits)

An analysis of risk management techniques for handling the risk exposures most businesses face, including insurance, self insurance, risk control, and risk avoidance, among others. (Cross-listed with FNBK 4590.)

BSAD 8600 REAL ESTATE FINANCE THEORY AND APPLICATIONS (3 credits)

This course explores advanced financial analysis tools and methodologies used to quantify complex factors surrounding real estate productivity, value, investment, and project feasibility. Specific course topics will coincide with student interest in one of three focus areas: Investment, Development, or Commercial Finance.

Prerequisite(s)/Corequisite(s): RELU 3410 and BSAD 8630, or permission of Real Estate Program Director.

BSAD 8605 REAL ESTATE CONCEPTS AND APPLICATIONS (3 credits)

Upper-level survey course in real estate principles, concepts, and their applications. The course will familiarize students with industry terminology, current practices, and cover the following topics: Licensure, property rights, legal descriptions, real estate law and contracts, appraisal, financing, investments, Fair Housing, and related topic areas. NOTE: Students cannot receive credit for both RELU 2410 and RELU 3410. (Cross-listed with RELU 3410).

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program, or permission of Real Estate Program Director.

BSAD 8606 FINANCIAL RISK MANAGEMENT (3 credits)

The course provides students with an intermediate level analysis of financial derivatives, and the use of these instruments for managing risk in financial institutions. (Cross-listed with FNBK 4600.)

Prerequisite(s)/Corequisite(s): BSAD 8500 and 8510 or their equivalent, and graduate standing. Not open to nondegree students.

BSAD 8610 REAL ESTATE APPRAISAL (3 credits)

This course addresses the fundamentals of real estate valuation and appraising, including factors affecting value, valuing land, improvements, and special classes of residential property, appraisal practice and rules, depreciation and obsolescence, and the mathematics of appraising.

Prerequisite(s)/Corequisite(s): RELU 3410 and BSAD 8630, or permission of instructor.

BSAD 8620 VALUATION OF INTELLECTUAL PROPERTY (3 credits)

Intellectual Property (IP) is critical to business success. Accounting, economics, and finance all struggle to quantify "value" of individual IP (e.g., trademark) and bundles of IP (e.g., patent pool). Value depends on the context (e.g., infringement versus depreciation versus sale). This course focuses on application of theory.

Prerequisite(s)/Corequisite(s): BSAD 8010 or BSAD 8100 or BSAD 8110 or BSAD 8500, or its equivalents. Not open to non-degree graduate students.

BSAD 8630 FINANCE: UNDERSTANDING CAPITAL AND CASH (2 credits)

As a comprehensive introduction to financial management, the course will cover various fields of finance and discuss topics including the time value of money, bond and stock valuation, capital budgeting.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070, 8150 and 8210. Students with an undergraduate major or a graduate degree in finance or accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8640 IT: STRATEGIC DEVELOPMENT AND DEPLOYMENT (1 credit)

Students will gain a strategic perspective of information technology management, including current trends and best practices, and understand how technology can be used in competitive positioning. Processes for innovation and research and development spending and new business models will be covered.

BSAD 8650 INTERNATIONAL: COMPETING IN GLOBAL MARKETS (2 credits)

This course allows students to develop an understanding of the evolution of the global political economy, challenges faced when operating in the global business environment, and how to evaluate the risks and returns of global expansion. Students will also learn how to effectively communicate in international settings, to successfully manage international conflicts, and to conduct effective cross-border business negotiations.

Prerequisite(s)/Corequisite(s): Enrollment in the Executive MBA Program. Not open to non-degree graduate students.

BSAD 8696 EMERGING TECHNOLOGY AND INNOVATION (3 credits)

This course equips entrepreneurially-minded students with a more complete range and vision of the viability of various startup opportunities (with a specific focus on innovative technologies and innovative business models). Students will become familiarized with the new and emerging technologies and innovations that define modern industries and product categories, as well as the various shifts in the way cutting-edge business gets done, regardless of industry. (Cross-listed with ENTR 4690, MGMT 4690).

Prerequisite(s)/Corequisite(s): Admission to a UNO graduate degree program or permission of instructor

BSAD 8700 BUSINESS ANALYTICS: MAKING SENSE OF DATA (2 credits)

The purpose of this course is to provide business managers with an understanding of the important role data analytics has assumed in today's organizations. Data analytics has become a key component in accomplishing strategic and operational goals. This course is designed to familiarize students with the concepts and principles of analytics. It is targeted for graduate or MBA students who have little or no background in analytics. Therefore, it focuses on breadth of coverage rather than depth in any specific area.

Prerequisite(s)/Corequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent); or admission to the MAcc program. Not open to non-degree graduate students.

BSAD 8710 SUPPLY CHAIN MANAGEMENT (3 credits)

This course will focus on supply chain management as a key functional area of organizational success. Students will learn about current techniques used by supply chain practitioners to make strategic and tactical decisions that support the overall strategy and day-to-day operations of an organization. Students will develop an understanding of how supply chain decisions and appropriate metrics of performance can be utilized to improve the operational efficiency and effectiveness of an organization.

Prerequisite(s)/Corequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8720 STRATEGIC FINANCIAL MANAGEMENT (2 credits)

This course is intended to be advanced financial management. It will stress the theory and application of topics including, but not limited to capital budgeting, cash flow estimation, real options, capital structure, dividends and share repurchases, working capital management, budgeting, planning and forecasting, and lease management. The material covered in Strategic Financial Management will increase the student's knowledge of how to strategically manage financial resources to increase the intrinsic value of the organization.

Prerequisite(s)/Corequisite(s): For MBA students, BSAD 8630. For MAcc students, completion of all Master of Accounting (MAcc) foundation courses. Not open to non-degree graduate students.

BSAD 8726 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with ENTR 4720, ITIN 4720, ITIN 8256, MGMT 4720, MKT 4720).

Prerequisite(s)/Corequisite(s): Admission to a graduate program or by instructor permission

BSAD 8736 ECONOMICS OF ENTREPRENEURSHIP (3 credits)

This course will review economic theories of entrepreneurship with special emphasis on Schumpeter's theory of creative destruction. The main focus of the seminar will be on the "high-level" entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 4730, ECON 8436)

Prerequisite(s)/Corequisite(s): ECON 2200 or permission of the instructor for all students

BSAD 8750 TELECOMMUNICATIONS IN BUSINESS (3 credits)

This course is designed to introduce students to basic technology of modern telecommunications, including voice, data and video, as well as the contemporary issues of telecommunication policy. In addition, the course will address managerial issues of modern telecommunications in business.

Prerequisite(s)/Corequisite(s): Graduate. Not open to non-degree graduate students.

BSAD 8766 SELLING IN AN ENTREPRENEURIAL CONTEXT (3 credits)

Successful entrepreneurs are able to identify unmet needs in the marketplace and then design and sell products or services that fulfill those needs. Sales effectiveness is essential for entrepreneurs because they must be able to build sustainable sales pipelines that ensure profitable growth as other pressing issues such as financing, staffing, product development are addressed. This course will focus on consultative solution-based sales fundamentals that can be applied in the entrepreneurial selling environment. (Cross-listed with ENTR 4760, MKT 4760)

Prerequisite(s)/Corequisite(s): GPA 2.5 or better; MKT 3100 with a 2.5 grade or better; MKT 3310 with a 2.5 grade or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8776 INTRODUCTORY MAVERICK VENTURE FUND (1 credit)

This course teaches the basics of venture capital, including, the topics of term sheets, due diligence and learning the perspectives of the entrepreneur and investor. Students in this course have the opportunity to observe more advanced students making investments, ranging from 5,000 dollars to 10,000 dollars plus. This course is the first of three, one-credit courses where students gain more advanced venture funding knowledge and application at each level. (Cross-listed with ENTR 4770).

Prerequisite(s)/Corequisite(s): This course requires instructor approval. Students must apply and interview to take this course. Preference is given to students in their junior year, and must have three semesters of school left before graduating.

BSAD 8786 INTERMEDIATE MAVERICK VENTURE FUND (1 credit)

In this course, students source deals, listen to pitches, and select start-ups to be funded. Investments typically range from 5,000 dollars to 10,000 dollars plus. This course is the second in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4780).

Prerequisite(s)/Corequisite(s): This course requires instructor approval. Students must have completed BSAD 8776 with a grade of C or better.

BSAD 8796 ADVANCED MAVERICK VENTURE FUND (1 credit)

This course applies advanced concepts of venture capital. Students will learn how to monitor and assist start-ups in the scaling process. Students learn how to leverage community partners to amplify investment opportunities. This course is the third in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4790).

Prerequisite(s)/Corequisite(s): This course requires instructor approval. Students must have completed BSAD 8786 with a grade of C or better.

BSAD 8800 MBA PROJECT-FOCUSED CAPSTONE (2 credits)

In this Master's of Business Administration (MBA) required project-focused capstone course, students complete a service-learning consulting project for a non-profit or other type of organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program.

Prerequisite(s)/Corequisite(s): Students must complete this course in the final semester or within the final 9 credits of their MBA program courses. A minimum B grade required to successfully complete the course and qualify for graduation. Not open to non-degree graduate students.

BSAD 8810 APPLIED STRATEGIC LEADERSHIP (3 credits)

Applied and integrative course in the MBA program, with an emphasis on field experiences when possible.

Prerequisite(s)/Corequisite(s): Concurrent enrollment in, or completion of, BSAD 8060. Not open to nondegree students.

BSAD 8820 SUSTAINABLE BUSINESS PRACTICES (1 credit)

This course exposes students to motivations for, and implications of business engagement in, sustainable management practices. As such the course addresses why firms have increasingly been investing in energy and natural resource conservation, recycling, green products, green branding, and environmental impact mitigation. This course addresses a firm's market-based incentives to grow profits, gain market share and/or otherwise differentiate themselves from their competition through green initiatives.

Prerequisite(s)/Corequisite(s): BSAD 8150 or permission of instructor. Not open to non-degree graduate students.

BSAD 8830 STRATEGY: DEVELOPING SUSTAINABLE COMPETITIVE ADVANTAGE (2 credits)

This course centers on the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. The primary objective of this course is to sharpen the ability of students to think strategically, to diagnose situations from a strategic perspective and to develop creative solutions to enable firms to achieve a sustainable competitive advantage.

Prerequisite(s)/Corequisite(s): Students must successfully complete BSAD 8150 and BSAD 8210 before enrolling in this course. This course must be taken within the first 20 hours of the MBA program. Not open to non-degree graduate students.

BSAD 8880 ARTS AND THE EXECUTIVE (3 credits)

The course will provide the graduate student with an understanding of the organizational and managerial issues involved in an arts organization as the role of the arts in the business community.

Prerequisite(s)/Corequisite(s): Graduate. Not open to nondegree students.

BSAD 8900 INDEPENDENT STUDY (1-6 credits)

Individual research in an academic area in business administration.

Prerequisite(s)/Corequisite(s): Graduate and permission of MBA Advisor. Requires submission of completed Independent Study Contract to MBA Advisor prior to registration. Not open to non-degree graduate students.

BSAD 8910 SPECIAL TOPICS IN BUSINESS (1-3 credits)

May be repeated up to (6). A series of special courses each designed to focus on current major topics and developments in a specific area of economics or business, scheduled as a workshop or seminar according to purpose.

Prerequisite(s)/Corequisite(s): Graduate in good standing and as indicated for specific workshop or seminar. Not open to non-degree graduate students.

BSAD 8916 SPECIAL TOPICS IN ECONOMICS (1-3 credits)

(May be repeated up to 6) A series of special courses each designed to focus on current major topics and developments in a specific area of economics or business, scheduled as a workshop or seminar according to purpose. (Cross-listed with ECON 8916, ECON 4910).

Prerequisite(s)/Corequisite(s): Graduate student in good standing or advanced undergraduate student and as indicated for specific workshop or seminar.

BSAD 8990 THESIS (1-6 credits)

A research project, under the supervision of a faculty thesis adviser in the College of Business Administration, in which the student establishes his capacity to design, conduct and complete an independent, scholarly investigation of a high order of originality. The research topic and the completed project must be approved by the student's faculty thesis adviser and two other faculty members, one of whom must be from outside the program area.

Prerequisite(s)/Corequisite(s): Permission of graduate adviser. Not open to non-degree graduate students.

Chemical Engineering (CHME)

CHME 8306 CHEMICAL ENGINEERING LAB (4 credits)

Selected experiments in chemical engineering. Emphasis on experimental design, interpretation of results, and formal oral and written reports. (Cross-listed with CHME 4300).

Prerequisite(s)/Corequisite(s): CHME 2030 and CHME 3330 and (coreq CHME 4420 or CHME 8426)

CHME 8346 DIFFUSIONAL OPERATIONS (3 credits)

Application of diffusional theory to the design of processing equipment required for absorption, adsorption, leaching, drying, and chemical reactions. (Cross-listed with CHME 4340).

Prerequisite(s)/Corequisite(s): CHME 3330 and CHME 4420 and MATH 2350

CHME 8426 CHEMICAL REACTOR ENGINEERING AND DESIGN (3 credits)

Basic principles of chemical kinetics are coupled with models descriptive of rates of energy and mass transfer for the analysis and design of reactor systems. (Cross-listed with CHME 4420).

Prerequisite(s)/Corequisite(s): CHME 3230

CHME 8896 AIR POLLUTION, ASSESSMENT AND CONTROL (3 credits)

Survey of the present status of the air pollution problem and the application of engineering and scientific principles to its practical and effective coordinated control. (Cross-listed with CHME 4890).

Prerequisite(s)/Corequisite(s): Senior standing, not open to nondegree students

Chemistry (CHEM)

CHEM 8040 SEMINAR IN TEACHING ADVANCED PLACEMENT CHEMISTRY (2 credits)

This course provides an introduction to the Advanced Placement high-school chemistry course and includes instruction on content and methods specific to teaching an Advanced Placement chemistry course. Emphasis will be placed on subject content and adaptations of college-level laboratory experiments to the high-school level.

Prerequisite(s)/Corequisite(s): Concurrent enrollment in the Advanced Placement Chemistry Institute at UNO and current employment as a high-school science teacher or instructor permission.

CHEM 8215 INTRODUCTION TO MOLECULAR MODELING (3 credits)

The course covers the advantages and limitations of current modeling systems, the criteria for choosing the appropriate modeling system to best solve a given problem and the computer resources needed to conduct the modeling experiments. Following an introduction to the theory behind a variety of modeling systems, students model organic and bioorganic compounds in projects designed to mimic real world applications. (Alternate Spring semesters). (Cross-listed with CHEM 3210).

Prerequisite(s)/Corequisite(s): CHEM 2260 and CHEM 2274 with a grade of C- or better.

CHEM 8236 ADVANCED ORGANIC CHEMISTRY - SYNTHESIS (3 credits)

An advanced lecture course in modern theories and organic reactions with application to synthesis. (Alternate Fall semesters) (Cross-listed with CHEM 4230).

CHEM 8246 ADVANCED ORGANIC CHEMISTRY - MECHANISM (3 credits)

An advanced lecture course in organic chemical reactions. (Cross-listed with CHEM 4240).

Prerequisite(s)/Corequisite(s): CHEM 2260 and CHEM 2400 with a C- or better

CHEM 8256 ADVANCED ORGANIC CHEMISTRY: MECHANISMS AND MODELING (4 credits)

Presentation of advanced topics in organic chemistry focused on structure, bonding and reaction mechanisms. The use of molecular modeling software as means to predict structure, relative stabilities and reaction thermodynamics are covered in a hands-on environment. The course will survey various modeling methods and show its relevance to molecular orbital theory. The basic methodologies used to explore organic mechanisms are presented and then used to study mechanistic details of various reaction types. Students cannot count both Chem 4250 and Chem 4240 toward their degree. (Cross-listed with CHEM 4250).

Prerequisite(s)/Corequisite(s): CHEM 2260 and CHEM 2274 with a C- or better

CHEM 8316 POLYMER CHEMISTRY (3 credits)

An introduction to the chemical and physical properties of polymers. Emphasis will be on physical properties and structure/property relationships. Topics will include kinetics and synthesis. Students will gain an understanding of the characteristics of polymers and their applications.

Prerequisite(s)/Corequisite(s): CHEM 2260 and CHEM 3350 with a grade of C or better, or instructor permission.

CHEM 8355 PHYSICAL CHEMISTRY I (3 credits)

A presentation of selected topics from the areas of classical thermodynamics and electrochemistry. (Fall) (Cross-listed with CHEM 3350).

Prerequisite(s)/Corequisite(s): Concurrent enrollment in CHEM 8359.

CHEM 8359 PHYSICAL CHEMISTRY I LABORATORY (1 credit)

Physical chemistry laboratory covering topics in thermodynamics, kinetics and electrochemistry, to be taken concurrently with CHEM 3350/8355. Instruction and practice in scientific writing is also an emphasis of the course. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. Offered in Fall. (Cross-listed with CHEM 3354).

CHEM 8365 PHYSICAL CHEMISTRY II (3 credits)

A presentation of selected topics from the areas of quantum mechanics, spectroscopy, kinetics and statistical mechanics. (Cross-listed with CHEM 3360).

Prerequisite(s)/Corequisite(s): CHEM 3350 and CHEM 3354 with a grade of C- or better.

CHEM 8369 PHYSICAL CHEMISTRY II LABORATORY (1 credit)

Physical chemistry laboratory covering topics in quantum mechanics, computational chemistry, spectroscopy, and kinetics, to be taken concurrently with CHEM 3360. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. Offered in Spring. (Cross-listed with CHEM 3364).

CHEM 8406 INSTRUMENTAL ANALYSIS (3 credits)

Study of instrumentation for use in quantitative and trace analysis. Advanced instrumental methods and electronics for instrumentation are included. (Spring) (Cross-listed with CHEM 4400).

Prerequisite(s)/Corequisite(s): Concurrent enrollment in CHEM 8409

CHEM 8409 INSTRUMENTAL ANALYSIS LABORATORY (1 credit)

Investigation of instrument performance and use of instrumentation in quantitative and trace analysis. Advanced instrumental methods and electronics for instrumentation are included. (Spring) (Cross-listed with CHEM 4404).

Prerequisite(s)/Corequisite(s): Concurrent enrollment in CHEM 8406

CHEM 8429 SPECTROMETRIC CHARACTERIZATIONS (1 credit)

Laboratory course involving the use of spectrometric instrumentation for the identification of compounds containing organic functional groups. (Cross-listed with CHEM 3424).

Prerequisite(s)/Corequisite(s): CHEM 2260, CHEM 2274, CHEM 2400 and CHEM 2404 with a grade of C or better.

CHEM 8506 ADVANCED INORGANIC CHEMISTRY (3 credits)

The application of bonding models for understanding of the composition, structure, and reactions of inorganic molecules, including organometallic and bioinorganic complexes. (Cross-listed with CHEM 4500).

Prerequisite(s)/Corequisite(s): CHEM 8355 or may be taken concurrently.

CHEM 8654 BIOCHEMISTRY I LABORATORY (1 credit)

A laboratory course to help integrate the concepts learned in biochemistry lecture with the development of biochemical laboratory skills including experimental design, data analysis, presentation of results and communication of scientific information, with a focus on formal instruction in journal-style writing and notebook skills. There is an emphasis on protein properties, including enzyme activity. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. (Fall) (Cross-listed with BIOL 4654, BIOL 8654, CHEM 4654).

CHEM 8656 BIOCHEMISTRY I (3 credits)

A comprehensive introduction to biochemistry emphasizing: structure-function relationships for proteins, carbohydrates, lipids, and nucleic acids; protein purification; enzyme kinetics and mechanisms; membranes and membrane transport; carbohydrate metabolism including glycolysis, the citric acid cycle and oxidative phosphorylation; and important applications of thermodynamics and the properties of water to living systems. (Fall) (Cross-listed with BIOL 4650, BIOL 8656, CHEM 4650).

Prerequisite(s)/Corequisite(s): CHEM 2260 and CHEM 2274; and either CHEM 2400 or BIOL 3020, all with a C- or better. Other comparable courses taken at accredited colleges or universities are acceptable. CHEM 8654 must be taken concurrently.

CHEM 8664 BIOCHEMISTRY II LABORATORY (1 credit)

A laboratory course to help integrate the concepts learned in Biochemistry II lecture with the development of biochemical laboratory skills, to gain practical experience in experimental design, data analysis, presentation of results and communication of scientific information, with a focus on formal instruction in journal-style writing and notebook skills. There is an emphasis on nucleic acid properties. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. (Spring) (Cross-listed with BIOL 4664, BIOL 8664, CHEM 4664).

CHEM 8666 BIOCHEMISTRY II (3 credits)

A continuation of the study of the structure and function of biomolecules and biochemical reactions with an emphasis on metabolism of carbohydrates, lipids, amino acids and nucleotides, and the chemistry of signal transduction and genetic information transfer. (Spring) (Cross-listed with BIOL 4660, BIOL 8666, CHEM 4660).

Prerequisite(s)/Corequisite(s): CHEM 8656 and CHEM 8654 or BIOL 8656 and BIOL 8654 with a grade of B- or better. CHEM 8664 must be taken concurrently.

CHEM 8676 PROTEIN PURIFICATION AND CHARACTERIZATION (2 credits)

This course is a study of protein biochemistry, protein purification techniques, and characterization strategies with an emphasis on chromatography and crystallography. The course has a significant laboratory component. (Cross-listed with CHEM 4670).

Prerequisite(s)/Corequisite(s): CHEM 8656 and CHEM 8654 (grade of B or better), or permission of instructor.

CHEM 8936 SPECIAL TOPICS IN CHEMISTRY (1-3 credits)

Selected special topics in chemistry. (Cross-listed with CHEM 4930).

Prerequisite(s)/Corequisite(s): CHEM 2260, CHEM 2400 with a grade of C or better. Some topics will require more advanced prerequisites and will be accepted for advanced course work in chemistry.

CHEM 8966 CHEMISTRY PROBLEMS (1-3 credits)

Independent student research and communication of results. (Cross-listed with CHEM 4960).

Prerequisite(s)/Corequisite(s): CHEM 4950 with a grade of C or better and permission of instructor.

CHEM 8990 RESEARCH IN CHEMISTRY (0 credits)

Experimental or theoretical work in chemistry or an interdisciplinary field involving chemical content, analysis and communication of results.

Prerequisite(s)/Corequisite(s): Permission of instructor, graduate, and sufficient grounding in the research area to fully support successful project accomplishment.

College of Information Science & Technology (CIST)

CIST 9040 COLLOQUIUM ON IT RESEARCH (1 credit)

The purpose of the course is to provide a forum for interaction among doctoral students and faculty on topics of relevance to professional success as researchers. Topics to be discussed include: nature of research in information technology; research problem selection, development, and presentation with special emphasis on the doctoral dissertation; dissertation process; development and crafting of papers for journals; collaboration on research projects; and review process for journal papers.

Prerequisite(s)/Corequisite(s): Admission to PhD program in Information Technology or permission of instructor.

CIST 9050 COLLOQUIUM ON IT TEACHING (1 credit)

The purpose of the course is to provide a forum for interaction among doctoral student and faculty on topics of relevance to professional success as teachers/educators in university settings. Topics to be discussed include: issues and challenges of teaching; getting started in teaching; course preparation; teaching methods; assessment of students; on-going course development; diversity in the classroom; use of technology in teaching including online education; and developing and maintaining a teaching portfolio.

Prerequisite(s)/Corequisite(s): Doctoral students in Information Technology and Biomedical informatics. Students from doctoral programs across the University of Nebraska are welcome to register with permission of instructor. Not open to non-degree graduate students.

CIST 9060 COLLOQUIUM ON IT PROFESSION AND ETHICS (1 credit)

The purpose of this course is to provide a forum for interaction among doctoral students and faculty on topics of relevance to professional success as members of the academy. Some of the topics to be discussed will include: ethics and professional code of conduct; strategies for dealing with academic dishonesty/plagiarism; academic and professional organizations in the IT profession (e.g., IEEE, ACM, AIS, PMI, AITP); challenges of human subjects research; developing survival skills: balancing service, teaching and research, etc.; career development and progression; and role and nature of local, national, and international service.

Prerequisite(s)/Corequisite(s): Any IS&T PhD student is eligible to attend; other Doctoral students can attend with permission of instructor. Not open to non-degree graduate students.

CIST 9080 RESEARCH DIRECTIONS IN I.T. (3 credits)

The purpose of this course is to provide a forum for interaction among doctoral students and faculty on topics of relevance to IT research and make them familiar with current and future research directions in IT. Students will examine what constitutes a research contribution, gain hands-on experience with directed research, and explore the breadth of sub-disciplines within IT research.

Prerequisite(s)/Corequisite(s): Doctoral standing in Information Technology or permission of course coordinators. Not open to non-degree graduate students.

CIST 9100 SEMINAR ON READINGS IN IT (1 credit)

Seminar focused on IT literature within a topic area aligned with PhD in IT concentrations, providing opportunity for in-depth review and discussion of materials in the concentration reading list. Provides exposure to current topics, research methods, and professional practice for the concentration.

Prerequisite(s)/Corequisite(s): Open to all currently admitted PhD students and other graduate students by instructor permission. May be repeated up to 3 times for credit in Major Field of Study, and up to 3 times as an elective.

CIST 9900 SPECIAL TOPICS IN INFORMATION TECHNOLOGY (1-3 credits)

This course is designed to acquaint students with issues which are current to the field or emerging trends in the information technology area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s)/Corequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular topic offerings.

CIST 9970 RESEARCH OTHER THAN THESIS (1-3 credits)

This is a directed research course enabling students to pursue a research topic individually under the direction of a graduate faculty member. Research problems should help introduce students to practical research methods in the field of computing, and they should be framed in such a way to enable the student to complete the work in the course of one semester.

Prerequisite(s)/Corequisite(s): Requires instructor permission. Only open to doctoral students in the IT PhD program. Course cannot be taken for credit after candidacy nor count towards core/major field of study requirements in the IT PhD. Not open to non-degree graduate students.

CIST 9980 INDEPENDENT STUDY IN INFORMATION TECHNOLOGY (1-3 credits)

This course allows students to research a topic of their interest that is not available in a formal course. The topic to be studied must be agreed upon by the student and the instructor.

Prerequisite(s)/Corequisite(s): Permission of the instructor. Not open to non-degree graduate students.

CIST 9990 DISSERTATION (1-12 credits)

The dissertation is an original research project conducted and written under the direction of a faculty supervisory committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge in information systems and/or information technology.

Prerequisite(s)/Corequisite(s): Admission to the Ph.D. program in Information Technology. Admission to candidacy for the Ph.D. degree. Prior to enrolling for dissertation hours, the students must have permission of the supervisory committee. Not open to non-degree graduate students.

Civil Engineering (CIVE)

CIVE 819 FLOW SYSTEMS DESIGN (3 credits)

Application of hydraulic principles to the design of water distribution systems, wastewater and stormwater collection systems, channelized flow systems and treatment facilities. (Cross-listed with CIVE 419).

Prerequisite(s)/Corequisite(s): CIVE 326 or CIVE 327; Corequisite: CIVE 352

CIVE 821 HAZARDOUS WASTE MANAGEMENT AND TREATMENT (3 credits)

Survey of the hazardous waste management system in the USA. State and federal hazardous waste regulations. Chemical characteristics of hazardous waste and unit operations and processes used for treatment of soil, water, and air. (Cross-listed with CIVE 421).

Prerequisite(s)/Corequisite(s): CIVE 326.

CIVE 822 POLLUTION PREVENTION: PRINCIPLES AND PRACTICES (3 credits)

Introduction to pollution prevention (P2) and waste minimization methods. Practical applications to small businesses and industries. Legislative and historical development of P2 systems analysis, waste estimation, P2 methods, P2 economics, and sources of P2 information. (Cross-listed with CIVE 422).

CIVE 823 PHYSICAL & CHEMICAL TREATMENT PROCESSES IN ENVIRONMENTAL ENG (3 credits)

Evaluation and analysis of physical and chemical unit operations and processes applied to the treatment of water, wastewater, and hazardous wastes.

Prerequisite(s)/Corequisite(s): CIVE326 and CIVE425

CIVE 824 SOLID WASTE MANAGEMENT ENGINEERING (3 credits)

Planning design and operation of solid and waste collection processing, treatment, and disposal systems including materials, resources and energy recovery systems. (Cross-listed with CIVE 424).

Prerequisite(s)/Corequisite(s): CIVE 326 and CIVE 334

CIVE 826 DESIGN OF WATER TREATMENT FACILITIES (3 credits)

Analyses of water supplies and design of water treatment and distribution systems. (Cross-listed with CIVE 426).

Prerequisite(s)/Corequisite(s): CIVE425

CIVE 827 DESIGN OF WASTEWATER TREATMENT AND DISPOSAL FACILITIES (3 credits)

Analysis of systems for wastewater treatment and disposal. (Cross-listed with CIVE 427).

Prerequisite(s)/Corequisite(s): CIVE 425

CIVE 828 ENVIRONMENTAL ENGINEERING CHEMISTRY (3 credits)

Basic concepts from general chemistry. Thermodynamic and kinetic basis for the composition of aquatic systems. Equilibrium chemistry, including acid-base reactions, reduction-oxidation reactions, metal speciation and precipitation, and gas/liquid partitioning.

Prerequisite(s)/Corequisite(s): CIVE 326. Not open to non-degree graduate students.

CIVE 829 BIOLOGICAL WASTE TREATMENT (3 credits)

Principles of biological processes and their application in the design of waste treatment systems.

Prerequisite(s)/Corequisite(s): CIVE 326 or equivalent.

CIVE 830 FUNDAMENTALS OF WATER QUALITY MODELING (3 credits)

Comprehensive study of water quality and the effects of various water pollutants on the aquatic environment; modeling of water quality variables. (Cross-listed with CIVE 430).

Prerequisite(s)/Corequisite(s): CIVE 326

CIVE 831 SMALL TREATMENT SYSTEMS (3 credits)

Design of small and decentralized waste water management systems. (Cross-listed with CIVE 431.)

Prerequisite(s)/Corequisite(s): CIVE 326 or permission. Not open to non-degree graduate students.

CIVE 834 SOIL MECHANICS II (3 credits)

(Lecture 3, option Lab 3) Application of the effective stress principle to shear strength of cohesive soils; analysis of stability of slopes. Development of continuum relationships for soils; solutions for stresses and displacements for an elastic continuum, solution of the consolidation equation for various initial and boundary conditions.

Prerequisite(s)/Corequisite(s): CIVE334

CIVE 836 FOUNDATION ENGINEER (3-4 credits)

(Lecture 3, Optional Lab 3) Subsoil exploration and interpretation; selection of foundation systems; determination of allowable bearing capacity and settlement; design of deep foundations; pile driving analysis; control of groundwater.

Prerequisite(s)/Corequisite(s): CIVE334

CIVE 839 INTRODUCTION TO BRIDGE ENGINEERING (3 credits)

Structural types, bridge loads, design of bridge slabs, steel girder bridges, and prestressed concrete girder bridges. Evaluation of existing bridges. Problems related to fatigue and corrosion. Field testing of bridges.

Prerequisite(s)/Corequisite(s): CIVE440 or CIVE441 or CIVE840

CIVE 840 REINFORCED CONCRETE DESIGN I (3 credits)

Introduction to the design of reinforced concrete building components. Emphasis is placed on the design of flexural and compression members, simple walls, foundations, and floor systems using the latest ACI design requirements.

Prerequisite(s)/Corequisite(s): CIVE341

CIVE 842 STRUCTURAL DYNAMICS (3 credits)

Dynamic behavior of civil engineering structures. Free and forced vibrations of multi degree-of-freedom systems. Response of continuous beam and frames. Elasto-plastic behavior. Dynamic loads on bridges. Analysis and design considerations for buildings and bridges subjected to seismic loadings. Emphasis is on application of computer-aided numerical procedures.

Prerequisite(s)/Corequisite(s): CIVE341

CIVE 843 ADVANCED STRUCTURAL ANALYSIS (3 credits)

Matrix analysis methods and computer solutions for indeterminate structures. Additional topics: static condensation, shear deformations, and non-prismatic members in matrix-based analyses, moment distribution method, load cases and load combinations for buildings and bridges, and influence lines and analysis for moving loads. (Cross-listed with CIVE 443)

Prerequisite(s)/Corequisite(s): CIVE 341. Not open to non-degree graduate students.

CIVE 844 STRUCTURAL DESIGN AND PLANNING (3 credits)

Principles of design of steel and reinforced concrete structural building systems, planning of building vertical and horizontal load resisting systems, and bridge systems. Several design projects involve indeterminate analysis and design concepts for both steel and reinforced concrete. (Cross-listed with CIVE 444).

Prerequisite(s)/Corequisite(s): CIVE 440 and CIVE 441

CIVE 846 STEEL DESIGN II (3 credits)

A continuation of CIVE 441. The principles and procedures used in design of steel buildings, design of plate girders, design and analysis of building systems, design and analysis of composite steel-concrete building systems, innovative building systems, and introduction to seismic design of steel buildings. Plate buckling, beam, column, and beam-column design. Frame stability. Introduction to connection design.

Prerequisite(s)/Corequisite(s): CIVE441

CIVE 847 REINFORCED CONCRETE II (3 credits)

Shear friction theory, strut-and-tie modeling, anchorage, deflection, slender and bi-axially loaded members, torsion, two-way action and punching shear, and footing design. Excel spreadsheets are developed and used for various design tasks. (Continuation of topics covered in CIVE 440/CIVE 840.) (Cross-listed with CIVE 447).

Prerequisite(s)/Corequisite(s): CIVE 440 or CIVE 840

CIVE 849 INTRODUCTORY FINITE ELEMENT ANALYSIS IN SOLID MECHANICS (3 credits)

Matrix methods of analysis. The finite element stiffness method with a focus on solid mechanics. Isoparametric elements formulation based on energy principles. Perform finite element analyses using commercial software.

Prerequisite(s)/Corequisite(s): CIVE 443 or 843

CIVE 850 PRESTRESSED CONCRETE (3 credits)

Analysis and design of prestressed concrete members. Axial force, bending, shear, torsion, prestress losses, initial and long-term deflection, partial prestressing, statically indeterminate structures.

Prerequisite(s)/Corequisite(s): CIVE341 and CIVE440

CIVE 851 INTRODUCTION TO FINITE ELEMENT ANALYSIS (3 credits)

Matrix methods of analysis. The finite element stiffness method. Computer programs. Applications to structures and soils. Introduction to finite element analysis of fluid flow. (Cross-listed with CIVE 451).

Prerequisite(s)/Corequisite(s): MENG 3250 or EMEC 3250; and MENG 4800 or EMEC 4800.

CIVE 852 WATER RESOURCES DEVELOPMENT (3 credits)

Theory and application of systems engineering with emphasis on optimization and simulation techniques for evaluating alternatives in water resources developments related to water supply, flood control, hydroelectric power, drainage, water quality, water distribution, irrigation and water measurement. (Cross-listed with CIVE 452).

Prerequisite(s)/Corequisite(s): CIVE 352

CIVE 853 GIS IN WATER RESOURCES (3 credits)

Familiarization with a wide range of spatial information and used in hydrologic and water resources analysis. Development of expertise in GIS systems, especially ArcGIS, Digital mapping and analysis of water resources information. Hydrologic terrain analysis using digital elevation models. Integration of time series and geospatial data. Hydrologic Information Systems. River and watershed networks. Evapotranspiration, Precipitation (PRISM), Soil, and Landuse maps, and databases. Use of Remote Sensing tools.

CIVE 854 HYDRAULIC ENGINEERING (3 credits)

Fundamentals of hydraulics with applications of mechanics of solids, mechanics of fluids, and engineering economics to the design of hydraulic structures. Continuity, momentum, and energy principles are applied to special problems from various branches of hydraulic engineering. (Cross-listed with CIVE 454).

Prerequisite(s)/Corequisite(s): CIVE 352

CIVE 855 NONPOINT SOURCE POLLUTION CONTROL ENGINEERING (3 credits)

Identification, characterization, and assessment of nonpoint source pollutants; transport mechanisms and remediation technologies; design methodologies and case studies. (Cross-listed with CIVE 455).

Prerequisite(s)/Corequisite(s): CIVE 326 and CIVE 352

CIVE 856 SURFACE WATER HYDROLOGY (3 credits)

Stochastic analysis of hydrological data and processes including rainfall, runoff, infiltration, temperature, solar radiation, wind, and non-point pollution. Space-time hydrologic modeling with emphasis on the application of techniques in the design of engineering projects. (Cross-listed with CIVE 456).

CIVE 857 APPLIED STRUCTURAL ANALYSIS (3 credits)

Review of basic concepts. Mesh generation using a preprocessor. 2D and 3D Model generation. Boundary conditions. Implicit and explicit solution algorithms. Interpretation of analysis results using a post-processor. Solution of problems using existing FE software.

Prerequisite(s)/Corequisite(s): CIVE851

CIVE 858 GROUNDWATER ENGINEERING (3 credits)

Application of engineering principles to the movement of groundwater. Analysis and design of wells, well fields, and artificial recharge. Analysis of pollutant movement. (Cross-listed with CIVE 458).

Prerequisite(s)/Corequisite(s): CIVE 352.

CIVE 859 RELIABILITY OF STRUCTURES (3 credits)

Fundamental concepts related to structural reliability, safety measures, load models, resistance models, system reliability, optimum safety levels, and optimization of design codes.

Prerequisite(s)/Corequisite(s): CIVE341, not open to nondegree students

CIVE 861 URBAN TRANSPORTATION PLANNING (3 credits)

Development of urban transportation planning objectives and goals. Data collection procedures, land use and travel forecasting techniques, trip generation, trip distribution, modal choice analysis, and traffic assignment. Site development and traffic impact analysis. (Cross-listed with CIVE 461).

Prerequisite(s)/Corequisite(s): CIVE 361

CIVE 862 HIGHWAY DESIGN (3 credits)

Design of roadways, intersections, interchanges, parking facilities, and land development site access and circulation. Emphasis on design projects. (Cross-listed with CIVE462)

CIVE 863 TRAFFIC ENGINEERING (3 credits)

Design of signalized intersections, arterial street and network signal systems, and freeway control systems. Emphasis on design projects. (Cross-listed with CIVE463)

Prerequisite(s)/Corequisite(s): CIVE361

CIVE 864 ANALYSIS AND ESTIMATION OF TRANSPORTATION DEMAND (3 credits)

Introduction to conceptual, methodological and mathematical foundations of analysis and design of transportation services; review of probabilistic modeling; application of discrete choice models to demand analysis.

Prerequisite(s)/Corequisite(s): CIVE461 or CIVE861 or equivalent

CIVE 865 HIGHWAY GEOMETRICS (3 credits)

Principles of highway geometrics. Sight distances, design vehicles, vehicle characteristics, horizontal and vertical alignment, cross section elements, and at-grade intersections and interchanges.

Prerequisite(s)/Corequisite(s): (CIVE462 or CIVE862), not open to nondegree students

CIVE 866 TRAFFIC CHARACTERISTICS (3 credits)

Use of the concepts of volume, speed, density, and capacity to describe the characteristics and performance of surface, air, and water transportation systems.

Prerequisite(s)/Corequisite(s): (CIVE463 or CIVE863) and (STAT3800 or MATH3800)

CIVE 867 TRANSPORTATION SAFETY ENGINEERING (3 credits)

Safety criteria in the planning, design and operation phases of highway, rail, airport, mass transit, pipeline, and waterway transportation systems. Background of safety legislation and funding requirements. Identification of high accident locations and methods to determine cost/effectiveness of improvements.

Prerequisite(s)/Corequisite(s): Permission.

CIVE 868 AIRPORT PLANNING AND DESIGN (3 credits)

Planning and design of general aviation and air-carrier airports. Land-side components include vehicle ground access systems, vehicle circulation parking and terminal buildings. Air-side components include aircraft apron-gate area, taxiway system, runway system and air traffic control facilities and airspace. Emphasis on design projects. (Cross-listed with CIVE468)

Prerequisite(s)/Corequisite(s): CIVE361

CIVE 869 COMPUTER-AIDED INTERCHANGE DESIGN (3 credits)

Principles of high-speed traffic operations, safety, and decision making related to critical design parameters used for optimal interchange geometric design through development of an interchange design project using graphical and civil engineering software.

Prerequisite(s)/Corequisite(s): CIVE 862. Not open to non-degree graduate students.

CIVE 871 BITUMINOUS MATERIALS AND MIXTURES (3 credits)

Understanding of the physical, chemical, geometrical, and mechanical characteristics and practical applications of bituminous materials and mixtures. Fundamental mechanics for elastic and inelastic materials and basic theories associated with mechanical data analyses and designs. Recent advances and significant research outcomes for further discussions. Applications of theories to laboratory and field testing. (Cross-listed with CIVE 471)

Prerequisite(s)/Corequisite(s): CIVE 378. Not open to non-degree graduate students.

CIVE 872 PAVEMENT DESIGN AND EVALUATION (3 credits)

Thickness design of flexible and rigid pavement systems for highways and airports; design of paving materials; evaluation and strengthening of existing pavements. (Cross-listed with CIVE 472).

Prerequisite(s)/Corequisite(s): CIVE 334

CIVE 875 WATER QUALITY STRATEGY (3 credits)

A holistic approach to the selection and analysis of planning strategies for protecting water quality from nonpoint sources of contamination. An introduction to the use of methods of analyzing the impact of strategies on whole systems and subsystem for selecting strategies; and for evaluating present strategies.

CIVE 881 COMPUTATIONAL PROBLEM SOLVING IN CIVIL ENGINEERING (3 credits)

Introduction of numerical methods to solve problems in civil engineering, including finding roots of equations, solving linear algebra equations, optimization, curve fitting, numerical differentiation and integration, and finite difference method. Computational methods in numerical integration, matrix operations and ordinary differential equations as they apply to civil engineering problems. (Cross-listed with CIVE 481)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

CIVE 898 SPECIAL TOPICS IN CIVIL ENGINEERING (1-6 credits)

Special problems, topics, or research in civil engineering. (Cross-listed with CIVE 498).

CIVE 899 MASTERS THESIS (1-10 credits)

Master's Thesis

Prerequisite(s)/Corequisite(s): Admission to masters degree program and permission of major adviser, Not open to nondegree students.

CIVE 916 ENVIRONMENTAL LAW AND WATER RESOURCE MANAGEMENT SEMINAR (3 credits)

An interdisciplinary seminar with the Department of Civil Engineering. Contemporary environmental issues and water resource Management.

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

CIVE 940 BEHAVIOR OF STEEL MEMBERS (3 credits)

Behavior and/or design of structural steel members and their connections. Torsion effects on open and closed thin walled members. Frame buckling and stability considerations in structural steel frames. Dynamic analysis and seismic design considerations.

Prerequisite(s)/Corequisite(s): CIVE 446/CIVE 846. Not open to non-degree graduate students.

CIVE 945 STRUCTURAL ANALYSIS AND DESIGN FOR DYNAMIC LOADS (3 credits)

Behavior of structural materials and systems under dynamic loads. Analysis and design for dynamic loads. Computational techniques. Selected laboratory demonstrations of the dynamic behavior of structural systems.

Prerequisite(s)/Corequisite(s): CIVE 443 or CIVE 843, and CIVE 842; or permission. Not open to non-degree graduate students.

CIVE 948 BLAST-RESISTANT STRUCTURAL DESIGN (3 credits)

Introduction to explosion effects. Air-blast. Fragmentation. Single-Degree-of-Freedom (SDOF) analysis. Equivalent SDOF systems. Pressure-impulse diagrams. Energy solutions. Steel design. Reinforced concrete design.

Masonry design. Progressive collapse. Windows and doors.

Prerequisite(s)/Corequisite(s): CIVE842

CIVE 949 STEEL BRIDGE DESIGN (3-6 credits)

Analysis and design of steel bridges for short, medium-, and long-span road and water crossings. Stringer bridges. Truss, arch, cable-stayed, and suspension bridges. High performance steel and accelerated construction.

Prerequisite(s)/Corequisite(s): (CIVE436 or CIVE836) and (CIVE446 or CIVE846). Not open to non-degree graduate students.

CIVE 954 ADVANCED HYDRAULICS (3 credits)

Advanced studies involving pipe and culvert hydraulics, rapidly-varied flow in open channels, sediment transport, river mechanics, control, and design.

Prerequisite(s)/Corequisite(s): CIVE 854. Not open to non-degree graduate students.

CIVE 958 CONTAMINANT TRANSPORT IN POROUS MEDIA (3 credits)

Theory of flow and contaminant transport in porous media including groundwater flow, multiphase flow, equilibrium contaminant distribution, reactive transport of contaminants, and colloid transport in porous media.

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

CIVE 961 MASS TRANSIT SYSTEMS (3 credits)

The place of mass transit in solving urban transportation problems: transit system and terminal characteristics and planning criteria. Speed, capacity, accessibility, and operation of mass transit systems. Future prospects in transit technology and case studies of existing systems.

Prerequisite(s)/Corequisite(s): Not open to nondegree students

CIVE 962 APPLICATION OF GEOGRAPHIC INFORMATION SYSTEMS (GIS) TO TRANSPORTATION (3 credits)

Geographic Information Systems (GIS) structure, function, and concepts such as spatial data models, relational databases, and spatial analyses. GIS project planning, management, and applications to transportation-related issues.

Prerequisite(s)/Corequisite(s): Not open to nondegree students

CIVE 963 HIGHWAY SAFETY DATA ANALYSIS (3 credits)

Highway safety issues and appropriate accident data analysis. Quantify changes in safety when modifications are made to highways in an effort to enhance safety. Judge reported safety improvements and carry out appropriate analysis for assessing the effectiveness of safety improvements.

Prerequisite(s)/Corequisite(s): STAT8805, not open to nondegree students

CIVE 964 THEORY TRAFFIC FLOW (3 credits)

Analysis of traffic characteristics as applied to traffic engineering facility design and flow optimization. Capacity of expressways, ramps, weaving sections, and intersections. Analytical approaches to flow analysis, queueing theory, flow density relationships, and traffic simulation.

Prerequisite(s)/Corequisite(s): CIVE 866 and (STAT 3800 or STAT 8805). Not open to non-degree graduate students.

CIVE 965 TRAFFIC CONTROL SYSTEMS (3 credits)

Principles of traffic control. Design and analysis of intersection, arterial street, network, and freeway control systems. Traffic surveillance and driver information systems.

Prerequisite(s)/Corequisite(s): CIVE 966 and permission. Not open to non-degree graduate students.

CIVE 966 TRANSPORTATION PLANNING AND ECONOMICS (3 credits)

Community growth and development based on planning decisions regarding land use whereby transportation facilities are fitted to land use. Economic studies that consider the consequences to transportation agencies, users, and nonusers. Agency expenditures, capital outlay and annual expenses for maintenance and operations. User consequences such as vehicle operating costs; commercial time costs; accident costs; discomfort and inconvenience costs; and assignment of money valuations to pleasure, recreation, and culture. Nonusers consequences items such as cost reductions or increases in public services; increases in value of crops and natural resources where areas become more readily accessible; changes in business and industrial activities; and increase or decrease of residential property values.

Prerequisite(s)/Corequisite(s): Permission.

CIVE 967 ANALYSIS AND DESIGN OF TRANSPORTATION SAFETY SYSTEMS (3 credits)

Operations research techniques for modeling system performance and design of transportation services. Routing and scheduling problems. Network equilibration and partially distributed queueing systems.

Prerequisite(s)/Corequisite(s): Not open to nondegree students

CIVE 989 SEMINAR IN CIVIL ENGINEERING (1-6 credits)

Current topics, research projects, and review of current literature in the various areas of civil engineering.

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

CIVE 998 SPECIAL PROBLEMS IN CIVIL ENGINEERING (1-6 credits)

Reading and evaluation of technical publications concerned with theory and/or experimental data. Subsequent assignments are coordinated with the student's particular interests in his/her field of specialization.

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

CIVE 999 DOCTORAL DISSERTATION (1-24 credits)

Doctoral Dissertation.

Prerequisite(s)/Corequisite(s): Admission to doctoral degree program and permission of supervisory committee chair. Not open to nondegree students.

Communication (COMM)

COMM 8010 COMMUNICATION RESEARCH METHODS SEMINAR: QUANTITATIVE (3 credits)

Philosophy of scientific investigation from a quantitative standpoint, including process and products, in comparison to other ways of knowing. Introduces students to quantitative designs and statistical applications for communication research and to data gathering methods appropriate for such designs. Emphasis is placed on preparing, evaluating and writing quantitatively oriented communication research proposals and reports.

Prerequisite(s)/Corequisite(s): Graduate majoring in communication or permission of instructor. Not open to non-degree graduate students.

COMM 8020 COMMUNICATION RESEARCH METHODS SEMINAR: QUALITATIVE (3 credits)

This course is an introduction to the methodology and practice of qualitative research. Within the course, students will be exposed to research paradigms, approaches to qualitative research, and ways to collect and analyze qualitative data. Students will be required to design and carry out their own qualitative research project.

Prerequisite(s)/Corequisite(s): Open to School of Communication Graduate Students only

COMM 8030 TOPICAL SEMINAR: RESEARCH METHODS (3 credits)

This variable-content course provides students with in-depth knowledge about various communication research methods (e.g., survey or experimental, content analysis, legal, assessment strategies, ethnography, advanced critique, etc.) or other communication methods and assessment in context with particular areas of study.

Prerequisite(s)/Corequisite(s): Graduate student status

COMM 8110 GRADUATE TEACHING ASSISTANT SEMINAR (1 credit)

This course provides weekly training, assessment, and teaching strategies for graduate teaching assistants within the the School of Communication.

Prerequisite(s)/Corequisite(s): School of Communication Graduate Teaching Assistants Only. Not open to non-degree graduate students.

COMM 8180 TOPICAL SEMINAR: COMMUNICATION STUDIES (3 credits)

A variable content course dealing with communication studies. Each offering will treat a single aspect of communications studies in-depth - e.g., interpersonal conflict, gender and communication, organizational culture, health systems communication, relational communication, political communication, marital and family communication, communication education, rhetorical critique, etc. Course may be repeated.

Prerequisite(s)/Corequisite(s): Graduate Student Standing

COMM 8200 SEMINAR IN POPULAR CULTURE, MASS MEDIA AND VISUAL RHETORIC (3 credits)

This course studies how discursive meaning is made through established and emerging visual technologies and the impact visual symbol systems are having upon the field of rhetoric in general. Students will investigate how visual technologies, discourse theory, and semiotic theory has intersected with and expanded contemporary rhetorical theories, and they will apply these theories to visual texts. (Cross-listed with ENGL 8760).

COMM 8300 TOPICAL SEMINAR: JOURNALISM AND MEDIA COMMUNICATION (3 credits)

Substantive study of specialized areas and modes of journalism and media communication (broadcasting, film, print, public relations, advertising, social media, etc). Content will vary. Course may be repeated.

Prerequisite(s)/Corequisite(s): Graduate Student Status

COMM 8436 GLOBAL MEDIA COMMUNICATION (3 credits)

In-depth study of global media communication systems. This course will examine cultural influence of dominant global media, the changing global media climates, information flow, regulation and censorship of media worldwide. Students will look at the various aspects of mass communication including advertising, public relations, broadcasting, movies and social media. There will be an emphasis on global communication theories and on critical examinations of media systems. (Cross-listed with JMC 4430)

COMM 8470 FOUNDATIONS SEMINAR: COMMUNICATION STUDIES (3 credits)

This course is part of the Communication graduate degree core coursework. The course exposes students to the structure and historical development of the Communication Studies discipline. It also addresses issues involved in conceptualizing, evaluating, and doing research in Communication Studies from post-positive, interpretive, and critical perspectives. Additionally, the course examines Communication Studies in selected contexts and sub-disciplines. Finally, current and future directions in the development of the Communication Studies discipline are addressed.

Prerequisite(s)/Corequisite(s): Communication graduate students admitted to program; others may enroll only with instructor permission

COMM 8500 TOPICAL SEMINAR: COMMUNICATION THEORY (3 credits)

This course has a twofold purpose: (1) to expose students to different perspectives on building and critiquing theory (e.g., the classical versus the interpretive naturalistic perspectives.) (2) to apply perspectives to the analysis and critique of a range of influential theoretical approaches employed in the communication discipline (e.g., systems theory, semiotics, message reception/processing theories).

Prerequisite(s)/Corequisite(s): Graduate Student status

COMM 8570 FOUNDATIONS SEMINAR: JOURNALISM AND MEDIA COMMUNICATION (3 credits)

This course is part of the Communication graduate degree core coursework. This course presents a broad-based historical, theoretical, and methodological introduction to Mass Communication research and interconnection with Communication Studies. Course content moves from the initial, early 20th century research through contemporary studies and critique.

Prerequisite(s)/Corequisite(s): Communication graduate students admitted to program; others may enroll only with instructor permission. Not open to non-degree graduate students.

COMM 8970 GRADUATE PROJECT (3 credits)

Project Option students must complete a three-hour graduate project written under the supervision of an adviser. A two-member graduate committee must approve the project.

Prerequisite(s)/Corequisite(s): COMM 8010, 8020, 8470, 8570 and student must be admitted to candidacy.

COMM 8980 INDEPENDENT STUDY (1-3 credits)

Students conduct independent research under the supervision of an adviser. May be taken multiple times with approval of graduate adviser.

COMM 8990 THESIS (1-6 credits)

Independent research project written under the supervision of an adviser.

COMM 9400 SEMINAR IN COMMUNICATION & TECHNOLOGY (3 credits)

A synthesis of speech and mass communication research as it relates to the study of computers and technology. Computer Mediated Communication (CMC) will be emphasized. Students write a research paper appropriate for submission to an academic conference.

Prerequisite(s)/Corequisite(s): COMM 8470 or 8570, and COMM 8010 or 8020, or permission of instructor.

Communication Disorders (CDIS)

CDIS 8240 LANGUAGE DISORDERS IN SCHOOL-AGE CHILDREN (3 credits)

This course focuses on the relationship between spoken and written language and its role in language-based learning disabilities in school-age students. It addresses the characteristics of language and reading impairments; the subtypes of these disorders including dyslexia; and the different diagnostic strategies, assessment tools, and intervention approaches used with them. Various models of language and reading as they relate to development and disorders will be reviewed.

Prerequisite(s)/Corequisite(s): Graduate standing in Speech-Language Pathology and a course in later (school age) language development. Not open to non-degree graduate students.

CDIS 8396 HEARING SCIENCE (3 credits)

This course is designed for undergraduate majors in speech-language pathology and audiology and for graduate candidates in education of the deaf/hard of hearing. The course will include basic terminology, anatomy and physiology of the hearing mechanism, acoustics and physics of sound, the processes of human hearing, elements of basic hearing measurements, psychophysics. This course will prepare speech-language pathology candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. (Cross-listed with CDIS 4390).

Prerequisite(s)/Corequisite(s): Admission to Graduate College

CDIS 8410 MOTOR SPEECH DISORDERS (3 credits)

This course is designed to integrate background information from neurophysiology related to motor speech disorders (MSD). The term motor speech disorders refers to speech deficits and differences resulting from injury to the human nervous system. This course will focus on acquired movement-based disorders of speech production that impact one or more of the following subsystems of speech: respiration, phonation, resonance, and/or articulation, including the dysarthrias and apraxia of speech. This course will entail clinical description and characteristics of the impairments as well as on the psychosocial changes in life activities and participation of individuals who live with MSD.

Prerequisite(s)/Corequisite(s): SPED 4470/CDIS 4470 or SPED 8470/CDIS 8470 or equivalent; graduate standing in Speech-Language Pathology. Not open to non-degree graduate students.

CDIS 8420 VOICE DISORDERS (3 credits)

The purpose of this course is to provide candidates the opportunity to study the disorders of voice in depth so that they are able to effectively orchestrate caseloads including this disorder type. Voice disorders of both organic and functional etiology will be studied. Candidates will have opportunities to conduct instrumental voice evaluation techniques. The disorders will be discussed to cover the range of topics including etiology, symptomatology, assessment and diagnosis, prognosis, and treatment, both medical and non-medical.

Prerequisite(s)/Corequisite(s): Graduate standing in Speech-Language Pathology. Not open to non-degree graduate students.

CDIS 8430 FLUENCY DISORDERS (3 credits)

This course examines the types and causes of rate, rhythm, and stress pattern differences as they relate to child, adolescent, and adult fluency disorders. Theory, current research, and contemporary practice information will constitute the foundation within which to address issues of identification, general assessment, differential assessment, prescription, and the implementation and evaluation of treatment strategies. The course is intended for graduate students in speech-language pathology.

Prerequisite(s)/Corequisite(s): Graduate standing in Speech-Language Pathology. Not open to non-degree graduate students.

CDIS 8440 APHASIA & RELATED LANGUAGE DISORDERS (3 credits)

This course is designed to integrate background information from neurophysiology to aphasia and related disorders such as right hemisphere syndrome, traumatic brain injury (TBI), and dementia. The term aphasia refers to linguistic deficits and differences resulting from injury to the human nervous system. This course will focus on acquired cognitive and linguistic-based disorders of the human communication system. This course will entail clinical description and characteristics of the impairments as well as on the psychosocial changes in life activities and participation of individuals who live with aphasia and/or related disorders.

Prerequisite(s)/Corequisite(s): SPED 4470/SPED 8470, CDIS 4470/CDIS 8470 or equiv; grad standing in SLP. Grad SLPs without SPED 4470/CDIS 4470 can concurrently enroll in SPED 4470/SPED 8470 or CDIS 4470/CDIS 8470 with advisor permission. Not open to non-degree graduate students.

CDIS 8470 NEUROPHYSIOLOGY OF SPEECH AND LANGUAGE (3 credits)

The purpose of this course is to provide speech-language pathology graduate candidates an introduction to human neuroanatomy and neurophysiology of the speech, language and hearing mechanisms, across the lifespan. Emphasis is placed on developing an understanding of the neurophysiological underpinnings of human communication and its disorders. Ultimately, the course will prepare speech-language pathology graduate candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world.

Prerequisite(s)/Corequisite(s): Graduate Standing Speech-Language Pathology Majors in the CDIS 4380 or equivalency. Not open to non-degree graduate students.

CDIS 8486 RESEARCH METHODS IN COMMUNICATION DISORDERS (3 credits)

This course will provide candidates with an introductory set of skills to interpret and evaluate research in communication disorders and closely related fields. In addition, this course will provide candidates with basic knowledge regarding research designs and analyses commonly used in communication disorders and related fields. The content addressed in this course will prepare candidates to judiciously evaluate evidence-based practice and apply the scientific method to clinical decision-making. It offers an opportunity to cultivate critical thinking skills imperative to becoming dedicated practitioners, reflective scholars, and responsible citizens who can adeptly meet the ever-evolving challenges of their profession.

Prerequisite(s)/Corequisite(s): This course is designed for graduate and undergraduate students majoring in speech-language pathology and is a required course for speech-language pathology candidates.

CDIS 8500 BASIC CLINICAL PRACTICUM IN SPEECH-LANGUAGE PATHOLOGY (2 credits)

These courses are designed to provide the speech-language pathology candidate clinicians with diverse clinical experiences prior to full-semester clinical externships in the educational, and medical settings.

Prerequisite(s)/Corequisite(s): Graduate standing in Speech-Language Pathology Program, completed any previous semester of 8500 with a B or above, currently maintain at least a 3.0 GPA overall. Permission from program faculty. Not open to non-degree graduate students.

CDIS 8510 EDUCATIONAL EXTERNSHIP IN COMMUNICATION DISORDERS (4 credits)

This course is designed to provide the speech-language pathology candidate with experiences of a clinical nature in educational settings. The purpose of the course is to advance the candidate's skills in the evaluation and management of communication and swallowing disorders.

Prerequisite(s)/Corequisite(s): Successful completion of "Foundation Block" (CDIS 4550/8556; SPED 8030, 8120 or equivalent) and three semesters of SPED 8500/CDIS 8500 unless otherwise indicated. Permission required. Not open to non-degree graduate students.

CDIS 8520 MEDICAL EXTERNSHIP IN COMMUNICATION DISORDERS (4 credits)

This course is designed to provide the speech-language candidate with experiences of a clinical nature in medical settings. The purpose is to advance the candidates' skills in the evaluation and management of communication and swallowing disorders.

Prerequisite(s)/Corequisite(s): Three semesters of SPED 8500/CDIS 8500 unless otherwise indicated plus permission. Not open to non-degree students.

CDIS 8530 SEMINAR IN SPEECH-LANGUAGE PATHOLOGY (3 credits)

This course is designed to provide intensive discussion of research or problems of current professional interest based on current literature in speech-language pathology. This course will prepare candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world.

Prerequisite(s)/Corequisite(s): Graduate standing

CDIS 8540 AUTISM SPECTRUM DISORDER (2 credits)

This course is designed to familiarize candidates with the features of, and interventions for, individuals with autism spectrum disorder. The course will emphasize evidence-based practices when utilizing various methodologies for supporting social and communication skills.

Prerequisite(s)/Corequisite(s): Co-requisite: SPED 8560/CDIS 8560. Admission to the Graduate College. Not open to non-degree graduate students.

CDIS 8556 SPECIAL NEEDS STUDENTS FROM DIVERSE COMMUNITIES (3 credits)

The purpose of this course is to study the impact of cultural and linguistic diversity on communication, learning, and behavior. The contrast between what is considered 'normal' language / learning development and in the presence of culturally and linguistically diverse (CLD) P-12 students will receive special emphasis.

CDIS 8560 AUGMENTATIVE & ALTERNATIVE COMMUNICATION (2 credits)

This course is designed to introduce students to the nature and process of augmentative and alternative communication (AAC), current theories and models of AAC, basic elements of AAC systems, and contemporary AAC clinical practices and principles. Topics will be examined from educational and rehabilitation perspectives as they relate to assessment, prescription, implementation and evaluation. The course will emphasize practical solutions in AAC for children and adults using both high technology and other less-complex communication strategies. Students will explore high-tech, low-tech, and no-tech options of AAC and gain knowledge of and experience with assessment of clients for AAC needs, prescription of an appropriate level of AAC, practice with implementing various AAC systems, and on-going evaluation of the AAC system's effectiveness with clients.

Prerequisite(s)/Corequisite(s): Graduate standing in Speech-Language Pathology program; co-requisite: SPED 8540/CDIS 8540.

CDIS 8570 DYSPHAGIA (3 credits)

This course is designed to integrate background information from neurophysiology to dysphagia. The term dysphagia refers to swallowing disorders resulting from congenital birth anomalies (i.e., cleft palate, cerebral palsy, etc.) as well as acquired injury to the central nervous system (i.e., stroke, head injury, etc.). This course will introduce candidates to bedside, radiographic, and endoscopic assessment procedures as well as direct, indirect, and medical management techniques of dysphagia. Additionally, this course will provide clinical description and characteristics of swallowing impairments as well as on the psychosocial changes in life activities and participation of individuals who live with dysphagia.
Prerequisite(s)/Corequisite(s): SPED 4470/CDIS 4470 or equivalent, graduate standing in speech-language pathology. Not open to non-degree graduate students.

CDIS 8590 EARLY INTERVENTION: BIRTH TO FIVE (3 credits)

This course is designed to provide candidates with knowledge about supporting communicative disorders in young children, and their families, within a multicultural and global framework. It will cover assumptions underlying current approaches to the evaluation and treatment in the developing child. Major emphasis will be upon the theoretical foundations of the study and treatment of communication disorders in children from birth to age five.

Prerequisite(s)/Corequisite(s): SPED 4420/CDIS 4420 or equivalent. Admission to Graduate Program in Speech-Language Pathology. Not open to non-degree graduate students.

Communication Studies (CMST)

CMST 8116 RHETORICAL THEORY AND CRITICISM (3 credits)

Rhetorical theory and criticism, emphasizing ways of evaluating oral communication. (Cross-listed with CMST 4110)

CMST 8126 COMMUNICATION AND SOCIAL PROTEST (3 credits)

This class will examine the role played by communication in movements for social change in contemporary society. We will examine social movements which rely on speeches (i.e. women's rights movements), social movements which rely on the grassroots political efforts of their members (i.e. the environmental rights movement) and the overall strategies of persuasion utilized in movements which seek social change, including emerging communication technologies. (Cross-listed with CMST 4120)

Prerequisite(s)/Corequisite(s): Non-degree or admission to School of Communication M.A. program.

CMST 8136 FAMILY COMMUNICATION (3 credits)

This course emphasizes the role of communication in family relationships. Theories, models, and research methods will be used to examine the family in various cultures and contexts (e.g., nuclear families, single-parent families, and blended families). Topics that will be covered in this course include: family conflict, family roles, family stories, family stress, family well-being, genograms, marriage, and divorce. (Cross-listed with CMST 4130)

Prerequisite(s)/Corequisite(s): Graduate majoring in the School of Communication or permission of instructor. Not open to non-degree graduate students.

CMST 8146 COMMUNICATION AND HUMAN RELATIONSHIPS (3 credits)

This course applies theories of interpersonal processes and communication principles to the study of close, significant and personal human relationships. Discussion focuses on the communication in different types of relationships and relational stages, e.g., strangers, acquaintances, friendships and intimates. (Cross-listed with CMST 4140)

Prerequisite(s)/Corequisite(s): Graduate Standing. Not open to non-degree graduate students.

CMST 8156 CORPORATE TRAINING AND DEVELOPMENT (3 credits)

This course introduces students to the process of designing communication training programs and workshops for a variety of professional settings. It provides students, especially those who are prospective trainers and/or consultants, with experiential and cognitive knowledge about needs assessment, adult learning, communication training research, objectives writing, module design, interactive delivery methods and program evaluation. (Cross-listed with CMST 4150)

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

CMST 8166 COMMUNICATION FOR INSTRUCTIONAL SETTINGS (3 credits)

This course is designed to help prospective instructors and/or trainers understand and apply the principles of communication in instructional settings (i.e., classrooms, workshops, training programs). It introduces students to the research area in the speech communication discipline called 'Instructional Communication' by covering these five units:

1) Communication Strategies, Objectives, & Content; 2) Student Communication Needs & Expectations; 3) Feedback, Reinforcement, & Discussion; 4) Context, Climate, & Influence; and 5) Teacher Communicator Style, Characteristics, & Behaviors. (Cross-listed with CMST 4160)

Prerequisite(s)/Corequisite(s): Graduate Standing.

CMST 8176 ORGANIZATIONAL COMMUNICATION (3 credits)

This course will help students understand organizational communication theories, models, and processes; apply these principles in organizational communication speaking exercises; and learn management and leadership skills. (Cross-listed with CMST 4170)

Prerequisite(s)/Corequisite(s): Graduate Standing. Not open to non-degree graduate students.

CMST 8186 COMMUNICATION LEADERSHIP AND POWER AND ORGANIZATIONS (3 credits)

This course provides theoretical and experiential knowledge about such topics as communication leadership styles and tactics, superior and subordinate interactions, power, ethical responsibilities, and diversity gender issues related to communication leadership. (Cross-listed with CMST 4180)

Prerequisite(s)/Corequisite(s): Graduate Standing. Not open to non-degree graduate students.

CMST 8196 COMPUTER-MEDIATED COMMUNICATION (3 credits)

Computer-Mediated Communication addressing emerging issues of virtual communities, identity, civic life and participation, online relationships, collaborative work environments, digital networks, gender race class issues, legal and ethical considerations of technology, and commodification of mediated communication. (Cross-listed with CMST 4190)

Prerequisite(s)/Corequisite(s): Admission into the graduate program

CMST 8226 HEALTH COMMUNICATION (3 credits)

This course introduces students to the interdisciplinary field of health communication. In this course, students will learn various theories of health communication as well as current research and trends in health communication and its related fields. To speak to the complexity and dynamism of health communication, this course will expose students to the multiple voices and perspectives involved in the delivery of health and healthcare. (Cross-listed with CMST 4220)

Prerequisite(s)/Corequisite(s): Junior standing; a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

CMST 8516 PERSUASION AND SOCIAL INFLUENCE (3 credits)

The primary goal of this course is to provide students with a solid grounding in theories, principles, and strategies of persuasion social influence as they apply to everyday contexts in which influence attempts take place. Students should gain familiarity with findings from empirical investigations on persuasion, social influence, and compliance gaining, and will learn about strategies and techniques of persuasion relating (Cross-listed with CMST 4510)

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

CMST 8526 PSYCHOLINGUISTICS (3 credits)

A discussion of the literature concerned with how such psychological variables as perception, learning, memory and development relate to the linguistic variables of sentence structure, meaning and speech sounds. (Cross-listed with CMST 4520)

Prerequisite(s)/Corequisite(s): Admission into graduate program. Not open to non-degree graduate students.

CMST 8536 INTERCULTURAL COMMUNICATION-US (3 credits)

This course will provide a foundation that leads to Intercultural Communication competence. Specifically, this course is to introduce the concepts of cross-cultural communication. Theory and research are integrated with application and necessary skills are identified and developed. (Cross-listed with CMST 4530)

CMST 8546 CONTEMPORARY SYSTEMS OF COMMUNICATION (3 credits)

An adaptation of General Systems Theory concepts to the study of human communication processes with emphasis on systems analysis of contemporary interpersonal communication perspectives. (Cross-listed with CMST 4540)

Prerequisite(s)/Corequisite(s): Graduate standing and major in communication; or permission of instructor.

CMST 8556 NONVERBAL COMMUNICATION (3 credits)

This course is designed to familiarize the student with current knowledge and research about nonverbal communication and to provide a wide variety of practical experiences through which the student can analyze and evaluate his or her own nonverbal behavior and that of others. The course, also, reviews the functions, areas and applied contexts of nonverbal communication. (Cross-listed with CMST 4550)

Prerequisite(s)/Corequisite(s): Graduate Standing. Not open to non-degree graduate students.

CMST 8566 COMMUNICATION, TEAMWORK, & FACILITATION (3 credits)

This course focuses on the communication practices, process tools, and theory associated with team problem solving, group discussion, facilitation skills, facilitative leadership, meeting management, and training in effective group interaction. (Cross-listed with CMST 4560)

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to nondegree students.

CMST 8576 INTERCULTURAL COMMUNICATION IN THE GLOBAL WORKPLACE (3 credits)

This course examines the intercultural perspective of organizational communication in a modern global world by focusing on the management of cultural differences in the global workplace. The trend towards a global economy is bringing people of different ethnic and cultural background together. Thus, the development of greater intercultural understanding has become an essential element of global workplace. After taking this course you will be more aware of cultural diversity in an organizational setting and further develop intercultural sensitivity and intercultural competence that will help you adapt to your future organizational life. (Cross-listed with CMST 4570)

CMST 8586 COMMUNICATING RACE, ETHNICITY & IDENTITY (3 credits)

This is an undergraduate/graduate course that provides students with definitional and experiential knowledge about the origin of racial concepts, theories, and practices, definitions of ethnicity and identity, and the communicative relationship between race, ethnicity, and identity. (Cross-listed with CMST 4580, BLST 4580, BLST 8586)

CMST 8606 COMMUNICATION THEORY AND APPLICATION (3 credits)

This course begins by introducing students to two broad categories of theory development - objective and interpretive. Then concepts and assumptions associated with each of these two perspectives are employed to critically evaluate several specific theories that fall within different of the sub-disciplines of the field of communication: interpersonal, group, organizational, mass, public/theoretical, cultural, and intercultural/gender. Along with critically evaluating and comparing/contrasting different communication theories, emphasis is placed on how the theories can be effectively applied in concrete settings and circumstances. (Cross-listed with CMST 4600)

Prerequisite(s)/Corequisite(s): Graduate standing

CMST 8626 DIRECTING FORENSICS (3 credits)

To provide students planning to teach speech in high school or college with a philosophy and detailed knowledge of how to direct a forensic program. (Cross-listed with CMST 4620)

CMST 8706 INTERPERSONAL CONFLICT (3 credits)

This course provides an overview of interpersonal conflict processes. It examines perspectives on conflict, patterns of constructive and destructive conflict, conflict styles and tactics, interpersonal power, negotiation strategies, conflict assessment, and conflict skill development. (Cross-listed with CMST 4700)

Prerequisite(s)/Corequisite(s): Communication major

CMST 8806 CONFLICT MEDIATION (3 credits)

This course develops knowledge of mediation theory, research, and practice and communication skills essential to the effective mediation of disputes in various contexts. (Cross-listed with CMST 4800)

Prerequisite(s)/Corequisite(s): Graduate major in Communication or Master of Business Administration (MBA) program, or instructor permission.

Community & Regional Planning (CRP)

CRP 8006 INTRODUCTION TO PLANNING (3 credits)

The field of community and regional planning is introduced and is studied in relation to the history of cities, urbanization, and regionalization. The course explores the origins and evolution of American urban and regional planning practice. The planning process as a response to social, political, physical, and economic factors is analyzed. The course introduces the community comprehensive planning process, plan implementation, and functional areas of planning. Cross-listed with CRP-4000.

CRP 8020 PLANNING THEORY (3 credits)

Linkages between knowledge and organized action in planning practice are analyzed in terms of philosophical underpinnings, decision theory, programming, policy formulation, politics, goals, values and social change. The historical traditions of contemporary planning theory are studied. The identities, roles, and relationships of planners with society are explored.

Prerequisite(s)/Corequisite(s): CRP 4000/8006

CRP 8040 LEGAL ASPECTS OF PLANNING (3 credits)

Applications of constitutional, common, administrative, and statutory law in the planning process are studied. The roles of the branches of American government in the regulation and control of land use and development, as well as in the planning, development, and delivery of public services and facilities are examined. Legal theories, issues, cases, and applications relevant to planning are included.

Prerequisite(s)/Corequisite(s): CRP 4000/8006

CRP 8506 SOCIAL PLANNING & POLICY (3 credits)

The area of social planning and policy is introduced and studied through a historical presentation of U.S. social welfare policy, an exploration of models and methods utilized by government and human service agencies in the planning of social programs, and analysis of contemporary social policy issues. Areas to be covered include privatization, universalism vs. selectivity, race and ethnicity, homelessness, and poverty. Cross-listed with CRP 4500.

CRP 8606 PLANNING AND DESIGN IN THE BUILT ENVIRONMENT (3 credits)

The course introduces principles and practices of planning, design, and implementation for multiple-structure built environments. The influences of physical, social, environmental, and economic factors upon planned and designed environments are studied. Various planning and design methods, processes, and products are introduced. Means of project implementation are explored, and examples of existing and proposed projects are studied. (Cross-listed with CRP 4600).

CRP 8706 ENVIRONMENTAL PLANNING AND POLICY (3 credits)

The course introduces environmental planning, including its history and origins. Major environmental issues throughout the world, and the roles of planning in addressing these problems, are discussed. The environmental planning process and environmental legislation are studied. (Cross-listed with CRP 4700).

CRP 8806 ECONOMIC DEVELOPMENT AND REGIONAL PLANNING (3 credits)

This course introduces the theory and principles of economic development planning and regional planning involving multiple jurisdictions. Concepts, analytical approaches, and theories of economic growth of local communities and multijurisdictional regions are introduced. The course includes consideration of local economic development plans for small communities, as well regional plans for multijurisdictional areas. International perspectives of economic development and regional planning are also discussed. (Cross-listed with CRP 4800).

CRP 8900 PROFESSIONAL SEMINAR (1 credit)

Diverse issues relating to contemporary professional planning practice are studied through abbreviated case studies and presentations by visiting specialists and participants in the planning process. Interrelated social, economic, political, and physical factors affecting specific planning situations are studied. Current and emerging roles for professional planners are discussed and analyzed.

Prerequisite(s)/Corequisite(s): CRP major

CRP 8976 SELECTED TOPICS, COMMUNITY & REGIONAL PLANNING (1-6 credits)

Group investigation of a topic in community and regional planning and development. (Cross-listed with CRP 4970).

CRP 8980 SPECIAL PROBLEMS IN COMMUNITY AND REGIONAL PLANNING (1-6 credits)

Individual or group investigations of problems relating to community and regional planning.

Prerequisite(s)/Corequisite(s): MCRP degree candidate

CRP 9000 PROFESSIONAL PLANNING PRACTICE (3 credits)

Current concepts, ideas, and issues relating to professional planning practice are studied. The course examines the contexts of planning practice, the professional planner's relationship to society, ethics in professional planning practice, and political and organizational behavior in plan making and policy implementation. Roles of citizens, client groups, and consultants in the planning process are explored. Forms of collaborative problem solving, including mediation and negotiation, are explored. Planning office and project management issues and approaches, including personnel administration and project financing and budgeting, are discussed.

Prerequisite(s)/Corequisite(s): CRP 4000/CRP 8006 or concurrent

Computer Science (CSCI)

CSCI 8000 ADVANCED CONCEPTS IN PROGRAMMING LANGUAGES (3 credits)

Logic/Declarative programming is an important programming paradigm in which problems are described in terms of the properties they possess. As a result, in this style of programming many algorithmic elements, which explicitly must be articulated when writing programs in other programming languages, can be omitted. Core elements of logic programming play important roles in AI.

Prerequisite(s)/Corequisite(s): CSCI 3320; CSCI 3660; CSCI 4220. Not open to non-degree graduate students.

CSCI 8010 FOUNDATIONS OF COMPUTER SCIENCE (3 credits)

This is a foundational course for students enrolled in the graduate program in computer science. The objectives are to introduce students to a large body of concepts so that they are better prepared for undertaking the core courses in the graduate program. It is assumed that student would have programmed in a high-level language and have exposure to basic college level mathematical concepts such as logarithms, exponents, sequences, and counting principles.

Prerequisite(s)/Corequisite(s): Students are expected to have written programs using a high-level programming language and should understand basic mathematical concepts including exponents, logarithms, sequences, and counting principles. Not open to non-degree graduate students.

CSCI 8016 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with MATH 4010, MATH 8016, CSCI 4010).

Prerequisite(s)/Corequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

CSCI 8040 LARGE SCALE NETWORK ANALYSIS ALGORITHMS (3 credits)

The course will provide a review of the properties of large complex network systems, such as those occurring in social networks, epidemiology and biological systems. We will discuss algorithms to analyze these properties, their implementations, their stability under information fluctuation and how information spreads through networks.

Prerequisite(s)/Corequisite(s): Students should be comfortable w/ programming, have knowledge of data structures, preliminary graph algorithms, & linear algebra. Suggest Prep Courses: CSCI 4150 or CSCI 8156; CSCI 3320; MATH 4050 or Permission. Not open to non-degree graduate students.

CSCI 8050 ALGORITHMIC GRAPH THEORY (3 credits)

Review of the basic concepts of graph theory. Introduction to perfect graphs and their characterizations. Main classes of perfect graphs and their properties. Algorithms for main problems of perfect graphs. Applications of perfect graphs in several fields such as scheduling, VLSI and communication networks. (Cross-listed with MATH 8050).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and MATH 4150 or MATH 8156 or permission of instructor. Not open to non-degree graduate students.

CSCI 8060 ALGORITHMIC COMBINATORICS (3 credits)

This course includes classical combinatorial analysis graph theory, trees, network flow, matching theory, external problems, and block designs. (Cross-listed with MATH 8060).

Prerequisite(s)/Corequisite(s): MATH 3100, CSCI 3100, MATH 8105 or CSCI 8105 or instructor's permission.

CSCI 8080 DESIGN AND ANALYSIS OF ALGORITHMS (3 credits)

The course provides students an understanding of advanced topics in algorithms. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, dynamic programming, greedy algorithms, graph algorithms, and the theory of NP-Completeness. (Cross-listed with MATH 8080).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 or equivalent. Not open to non-degree graduate students.

CSCI 8100 EXPERT SYSTEMS (3 credits)

A study of the theoretical basis and practical design of expert systems. Knowledge engineering. Foundations in logic programming, the architecture of expert systems, languages (Prolog, LISP) for expert systems, expert system shells, knowledge acquisition, current issues.

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456 or equivalent. Not open to non-degree graduate students.

CSCI 8105 APPLIED COMBINATORICS (3 credits)

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with MATH 8105, MATH 3100, CSCI 3100).

CSCI 8110 ADVANCED TOPICS IN ARTIFICIAL INTELLIGENCE (3 credits)

An in-depth study of one or more topics selected from: search techniques, knowledge representation, knowledge programming, parallel processing in Artificial Intelligence, natural language processing, image processing, current and future directions, etc. May be repeated with different topics, with permission of adviser.

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456 or equivalent.

CSCI 8150 ADVANCED COMPUTER ARCHITECTURE (3 credits)

Various parallel architectures, models of parallel computation, processor arrays, multiprocessor systems, pipelined and vector processors, dataflow computers and systolic array structures.

Prerequisite(s)/Corequisite(s): CSCI 4350, CSCI 4500 and graduate. Not open to non-degree graduate students.

CSCI 8156 GRAPH THEORY & APPLICATIONS (3 credits)

Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 4150, MATH 4150, MATH 8156).

Prerequisite(s)/Corequisite(s): MATH 2030 or permission of instructor.

CSCI 8160 INTRODUCTION TO VLSI DESIGN (3 credits)

Introduction to the principle concepts of integrated circuit layout. Presentation of the hardware foundations, algorithmic mathematical and graph theoretical foundations of circuit layout. Partitioning problems in integrated circuits. Placement and floor planning phase in layout. Routing algorithms and compaction techniques. Applications of graph theory in several steps of the design process of VLSI circuits.

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and CSCI 4350 or CSCI 8356. Not open to non-degree graduate students.

CSCI 8170 VLSI TESTING (3 credits)

This course covers topics in VLSI testing. In particular, topics covered include fault modeling, fault simulation, test generation, testability profiles, built-in tests, and binary decision diagrams.

Prerequisite(s)/Corequisite(s): Bachelors degree and permission from the Graduate Program Committee; CSCI 4350. Not open to non-degree graduate students.

CSCI 8200 INTERCONNECTION NETWORKS (3 credits)

This course is to introduce the technology of interconnection networks from topology of networks, through routing and flow control, to a discussion of hardware/software fault tolerance, and to understand parameters affecting performance.

Prerequisite(s)/Corequisite(s): Bachelors degree and permission from the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8210 ADVANCED COMMUNICATIONS NETWORKS (3 credits)

Advanced study of communication networks, analysis of communication needs, special problems encountered in different types of networks, efficiency and traffic analysis and emerging hardware software technologies. Detailed "hands-on" study of the TCP/IP networking protocols.

Prerequisite(s)/Corequisite(s): CSCI 3550 or 8555 or equivalent. Not open to non-degree graduate students.

CSCI 8256 HUMAN COMPUTER INTERACTION (3 credits)

Human computer interaction is concerned with the joint performance of tasks by humans and machines; human capabilities to use machines (including learnability of interfaces); algorithms and programming of the interface; engineering concerns that arise in designing and building interfaces; the process of specification, design, and implementation of interfaces; and design trade-offs. (Cross-listed with CSCI 4250).

CSCI 8266 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, ITIN 4260, ITIN 8266).

CSCI 8300 IMAGE PROCESSING AND COMPUTER VISION (3 credits)

This course introduces the computer system structures and programming methodologies for digital image processing and computer vision. The course will cover the mathematical models of digital image formation, image representation, image enhancement and image understanding. Techniques for edge detection, region growing, segmentation, two-dimensional and three-dimensional description of object shapes will be discussed. The course will concentrate on the study of knowledge-based approaches for computer interpretation and classification of natural and man-made scenes and objects.

Prerequisite(s)/Corequisite(s): CSCI 1620 and CSCI 3220. Not open to non-degree graduate students.

CSCI 8305 NUMERICAL METHODS (3 credits)

This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 3300, MATH 3300, MATH 8305).

Prerequisite(s)/Corequisite(s): MATH 1960 with a C- or better or permission of instructor

CSCI 8306 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, MATH 4300, MATH 8306).

Prerequisite(s)/Corequisite(s): MATH 2050 with a C- or better or permission of instructor.

CSCI 8316 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, MATH 4310, MATH 8316).

Prerequisite(s)/Corequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

CSCI 8325 DATA STRUCTURES (3 credits)

This is a core that will cover a number of data structures such as tree, hashing, priority queues and graphs as well as different algorithm design methods by examining common problem-solving techniques. (Cross-listed with CSCI 3320)

CSCI 8340 DATABASE MANAGEMENT SYSTEMS II (3 credits)

A continuation of the study of Data Base Management Systems. Extended discussion of logical data base design, normalization theory, query optimization, concurrent issues. Advanced topics including distributed data bases, deductive data bases, data base machine, and others.

Prerequisite(s)/Corequisite(s): CSCI 8856 or equivalent. Not open to non-degree graduate students.

CSCI 8350 DATA WAREHOUSING AND DATA MINING (3 credits)

Covers topics related to decision support queries. In particular, topics covered include building data warehouses, On-Line Analysis Processing (OLAP), maintenance of materialized views, indexing, various data mining techniques, and integration of OLAP and data mining.

Prerequisite(s)/Corequisite(s): CSCI 8856; bachelors degree and permission from Graduate Committee. Not open to non-degree graduate students.

CSCI 8360 MACHINE LEARNING FOR TEXT (3 credits)

This course focuses on the fundamental techniques for extraction of various insights from text data which is ubiquitous on the Web, social media sites, emails, news articles, digital libraries, and other sources. The course topics will include concepts and techniques used by search engines to crawl, index, and rank web pages on the Web, machine learning techniques for categorization of news articles into different categories, sentiment and opinion analysis of social media chats, text summarization, and information extraction.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

CSCI 8366 FOUNDATIONS OF CYBERSECURITY (3 credits)

Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 4360, CYBR 8366)

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CSCI 8390 ADVANCED TOPICS IN DATA BASE MANAGEMENT (3 credits)

An in-depth study of one or more topics in the field of Data Base Management Systems, such as logical and/or physical data base design, query optimization, distributed data bases, intelligent knowledge-based systems, emerging technologies and applications. May be repeated with different topics with permission of adviser.

Prerequisite(s)/Corequisite(s): CSCI 4850 or CSCI 8856 or equivalent. Not open to non-degree graduate students.

CSCI 8400 ADVANCED COMPUTER GRAPHICS (3 credits)

Computer graphics continues to play an important role in computer science. This course covers the mathematical foundations of three-dimensional representation and animation; ray tracing and path tracing rendering methods; using the graphical processing unit (GPU) for real time applications; and concludes with simulation of natural phenomenon.

Prerequisite(s)/Corequisite(s): Bachelors degree or permission from the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8410 DISTRIBUTED SYSTEMS AND NETWORK SECURITY (3 credits)

The course aims at understanding the issues surrounding data security, integrity, confidentiality and availability in distributed systems. Further, we will discuss various network security issues, threats that exist and strategies to mitigate them. This course will cover topics in cryptography, public key infrastructure, authentication, hashing, digital signatures, ARP protection, IP and IPSEC, IP Tables, SSL/TLS, firewalls, etc. (Cross-listed with CYBR 8410)

Prerequisite(s)/Corequisite(s): CSCI 8366 or equivalent(s). Not open to non-degree graduate students.

CSCI 8420 SOFTWARE ASSURANCE (3 credits)

Software assurance is a reasoned, auditable argument created to support the belief that the software will operate as expected. This course is an intersection of knowledge areas necessary to perform engineering activities or aspects of activities relevant for promoting software assurance. This course takes on a software development lifecycle perspective for the prevention of flaws. (Cross-listed with CYBR 8420)

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836 OR by permission of the Instructor. Not open to non-degree graduate students.

CSCI 8430 TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT (3 credits)

This course examines in detail: the principles of a security architecture, access control, policy and the threat of malicious code; the considerations of trusted system implementation to include hardware security mechanisms, security models, security kernels, and architectural alternatives; the related assurance measures associated with trusted systems to include documentation, formal specification and verification, and testing, and approaches that extend the trusted system, into applications and databases and into networks and distributed systems.

Prerequisite(s)/Corequisite(s): CSCI 8366 or equivalents, or instructor permission. Not open to non-degree graduate students.

CSCI 8440 SECURE SYSTEMS ENGINEERING (3 credits)

This course takes a global risk-based view of the process of defining, verifying, validating and continuously monitoring secure information systems. The course will investigate a number of secure system solutions, starting with the definition of the system security needs, and tracing through methods of verification and validation of security controls, as well as ways to continuously monitor the corresponding assurances. (Cross-listed with CYBR 8440)

Prerequisite(s)/Corequisite(s): CSCI 8366 or IASC 8366

CSCI 8446 INTRODUCTION TO PARALLEL COMPUTING (3 credits)

Need for higher-performance computers. Topics discussed include: classification of parallel computers; shared-memory versus message passing matchings; for ms of parallelism, measure of performance; designing parallel algorithms; parallel programming and parallel languages; synchronization constructs; and operating systems for parallel computers. (Cross-listed with CSCI 4440)

Prerequisite(s)/Corequisite(s): CSCI 4500 or CSCI 8506 (May be taken concurrently). Not open to non-degree graduate students.

CSCI 8450 ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING (3 credits)

The course will provide in depth study of the topics in natural language processing and understanding, such as syntax, lexical and computational semantics, natural language ambiguities and their disambiguation, logical form construction and inference. The course will survey state-of-the-art natural language processing toolkits and knowledge bases that boost the development of modern language processing and understanding applications.

Prerequisite(s)/Corequisite(s): CSCI 3320 OR CSCI 3660 OR CSCI 4450. Not open to non-degree graduate students.

CSCI 8456 INTRODUCTION TO ARTIFICIAL INTELLIGENCE (3 credits)

An introduction to artificial intelligence. The course will cover topics such as machine problem solving, uninformed and informed searching, propositional logic, first order logic, approximate reasoning using Bayesian networks, temporal reasoning, planning under uncertainty and machine learning. (Cross-listed with CSCI 4450).

CSCI 8476 PATTERN RECOGNITION (3 credits)

Structures and problems of pattern recognition. Mathematics model of statistical pattern recognition, multivariate probability, Bay's decision theory, maximum likelihood estimation, whitening transformations. Parametric and non-parametric techniques, linear discriminant function, gradient-descent procedure, clustering and unsupervised learning, and feature selection algorithms. (Cross-listed with CSCI 4470)

Prerequisite(s)/Corequisite(s): CSCI 1620 with C- or better, and MATH 2050. Recommended: MATH 4740/8746 or STAT 3800/8805.

CSCI 8480 MULTI-AGENT SYSTEMS AND GAME THEORY (3 credits)

This course covers advanced topics in the area of coordination of distributed agent-based systems with a focus on computational aspects of game theory. The main topics covered in this course include distributed constraint satisfaction, distributed constraint optimization, and competitive and cooperative game theory. (Cross-listed with MATH 8480)

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456. Suggested background courses: CSCI 4480 or CSCI 8486; CSCI 8080. Not open to non-degree graduate students.

CSCI 8486 ALGORITHMS FOR ROBOTICS (3 credits)

This course provides an introduction to software techniques and algorithms for autonomously controlling robots using software programs called controllers. Students will be taught how to program and use software controllers on simulated as well as physical robots. (Cross-listed with CSCI 4480).

Prerequisite(s)/Corequisite(s): CSCI 3320 with C- or better. CSCI 4450/8456 is a recommended but not essential pre-requisite.

CSCI 8500 NUMERICAL LINEAR ALGEBRA (3 credits)

Topics covered in this course include error propagation, solutions of nonlinear equations, solutions of linear and nonlinear systems by various schemes, matrix norms and conditioning, and computation of eigenvalues and eigenvectors. (Cross-listed with MATH 8500).

Prerequisite(s)/Corequisite(s): MATH 1960 and MATH 2050, or permission of instructor. Familiarity with computer programming is assumed.

CSCI 8506 OPERATING SYSTEMS (3 credits)

Operating system principles. The operating system as a resource manager; I/O programming, interrupt programming and machine architecture as it relates to resource management; memory management techniques for uni-multiprogrammed systems; process description and implementation; processor management (scheduling); I/O device, controller, and channel management; file systems. Operating system implementation for large and small machines. (Cross-listed with CSCI 4500).

Prerequisite(s)/Corequisite(s): CSCI 3710, CSCI 3320/8325, MATH 1950, and CSCI 4350/8356 with C- or better.

CSCI 8510 NUMERICAL DIFFERENTIAL EQUATIONS (3 credits)

Topics covered in this course include interpolation and approximations, numerical differentiation, numerical integration, and numerical solutions of ordinary and partial differential equations. (Cross-listed with MATH 8510).

Prerequisite(s)/Corequisite(s): MATH 1970, MATH 2350, or permission of instructor. Familiarity with computer programming is assumed.

CSCI 8520 ADVANCED TOPICS IN OPERATIONS RESEARCH (3 credits)

Advanced treatment of a specific topic in the area of operations research not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with MATH 8520).

Prerequisite(s)/Corequisite(s): MATH 4300 or MATH 8306 or CSCI 4300 or CSCI 8306 or permission of the instructor.

CSCI 8530 ADVANCED OPERATING SYSTEMS (3 credits)

State of the art techniques for operating system structuring and implementation. Special purpose operating systems. Pragmatic aspects of operating system design, implementation, and use.

Prerequisite(s)/Corequisite(s): CSCI 4500/8506. Not open to nondegree students.

CSCI 8555 COMMUNICATION NETWORKS (3 credits)

This course is designed to bring students up to the state of the art in networking technologies with a focus on Internet. It will cover the principles of networking with an emphasis on protocols, implementations and design issues. (Cross-listed with CSCI 3550)

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 with C- or better. Data structures and algorithms. C or C++ programming.

CSCI 8566 NUMBER THEORY & CRYPTOGRAPHY (3 credits)

An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 4560, MATH 4560, MATH 8566).

Prerequisite(s)/Corequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

CSCI 8590 FUNDAMENTALS OF DEEP LEARNING (3 credits)

This course is an introduction to deep learning, a branch of machine learning concerned with the development and application of neural networks. Deep learning trains the machine to learn patterns that it is presented with rather than requiring the human operator to define the patterns that the machine should look for. Deep learning is behind many recent advances in artificial intelligence, such as face recognition, speech recognition and autonomous driving. This course will cover the foundations of deep learning, learning theory, basic/advanced neural networks and problem domains of many selected applications.

Prerequisite(s)/Corequisite(s): CSCI 3320 or instructor permission

CSCI 8610 FAULT TOLERANT DISTRIBUTED SYSTEMS (3 credits)

This course is to study the theory and practice of designing computer systems in the presence of faulty components. Emphasizes the basics of how faults can affect systems and what is required to mask or compensate for their efforts.

Prerequisite(s)/Corequisite(s): CSCI 4500 and CSCI 4350. Not open to non-degree graduate students.

CSCI 8620 MOBILE COMPUTING AND WIRELESS NETWORKS (3 credits)

Contemporary issues in mobile computing and wireless networks, including the differences between mobile computing and the traditional distributed computing paradigm, impediments of the mobile and wireless environments, problems and limitations due to such impediments, using the spectrum, wireless data networks, various network layers solutions, location management techniques, mobile IP, wireless LANs, wireless TCP, ad hoc networks, performance issues, security issues.

Prerequisite(s)/Corequisite(s): CSCI 3550 or CSCI 8555. Not open to non-degree graduate students.

CSCI 8626 COMPUTER GRAPHICS (3 credits)

An introduction to the acquisition, manipulation and display of graphical information using digital techniques. Topics include discussion of the various hardware devices used for input and output, the classical algorithms and data structures used in manipulation of graphical objects, the user interface to the graphics system, and applicable standards. (Cross-listed with CSCI 4620).

Prerequisite(s)/Corequisite(s): ISQA 3300 or CSCI 3320.

CSCI 8666 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)

This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, MATH 4660, MATH 8666).

Prerequisite(s)/Corequisite(s): MATH 2030. Recommended: CSCI 3320/ CSCI 8325.

CSCI 8700 SOFTWARE SPECIFICATIONS AND DESIGN (3 credits)

A continuation of the study of software engineering with an emphasis on early phases of software development, namely requirements engineering/ specification and architectural design. Includes an in-depth study of practices for effective software requirements specification and architectural design, as well as formal specifications of software systems. Related topics such as metrics and support tools are also covered.

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8706 COMPILER CONSTRUCTION (3 credits)

Assemblers, interpreters and compilers. Compilation of simple expressions and statements. Analysis of regular expressions. Organization of a compiler, including compile-time and run-time symbol tables, lexical scan, syntax scan, object code generation and error diagnostics. (Cross-listed with CSCI 4700).

CSCI 8710 MODERN SOFTWARE DEVELOPMENT METHODOLOGIES (3 credits)

Designed to introduce students to advanced object technology and other modern methodologies for developing software systems. Intended for graduate students who have mastered the basic concepts and issues of software engineering. Course covers advanced object-oriented software development. The course also covers several offshoots of object technology, including: component-based software engineering, aspect-oriented software development, software product line engineering, service-oriented computing, etc.

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836.

CSCI 8760 FORMAL METHODS IN SOFTWARE ENGINEERING (3 credits)

In the high consequence system domain, a primary objective of any construction technique employed is to provide sufficiently convincing evidence that the system, if put into operation, will not experience a high consequence failure or that the likelihood of such a failure falls within acceptable probabilistically defined limits. Systems for which such evidence can be provided are called high assurance systems. The objective of this course is to examine software-engineering techniques across the development life cycle that are appropriate for high assurance systems. The course will analyze the nature of the evidence provided by various techniques (e.g., does a given technique provide sufficiently strong evidence in a given setting).

Prerequisite(s)/Corequisite(s): CSCI 8000 and CSCI 8836 or CSCI 4830

CSCI 8766 TOPICS IN MODELING (3 credits)

Selection of such topics as formulation and analysis of various models involving Markov chains, Markov processes (including birth and death processes), queues, cellular automata, difference and differential equations, chaotic systems and fractal geometries. (Cross-listed with CSCI 4760).

Prerequisite(s)/Corequisite(s): MATH 2350 and MATH 4740 or MATH 8746.

CSCI 8790 ADVANCED TOPICS IN SOFTWARE ENGINEERING (3 credits)

An in-depth study of one or more topics in the field of software engineering such as human factors in software engineering, software specifications and modeling, reuse and design recovery, software valuations, software management, emerging technology and applications.

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8836 INTRODUCTION SOFTWARE ENGINEERING (3 credits)

Basic concepts and major issues of software engineering, current tools and techniques providing a basis for analyzing, designing, developing, maintaining and evaluating the system. Technical, administrative and operating issues. Privacy, security and legal issues. (Cross-listed with CSCI 4830).

CSCI 8856 DATABASE MANAGEMENT SYSTEMS (3 credits)

Basic concepts of data base management systems (DBMSs). The relational, hierarchical and network models and DBMSs which use them. Introduction to data base design. (Cross-listed with CSCI 4850).

CSCI 8876 DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS (3 credits)

This required course for undergraduate bioinformatics majors provides foundational knowledge on database aspects used in the field and an overview of their applications in bioinformatics, biomedical informatics, and health/clinical informatics. The course begins with a brief review of key concepts in computational molecular biology related to database search/development, database management systems, the difference between primary and secondary databases, and bioinformatics-related aspects of modeling and theory in computer science. The major focus is on the multiple challenges and aspects of bio-database development, search, and pattern discovery. The course uses problem-based learning to help students develop database management skills as they apply to high throughput "-omics." data, the basics of data management, data provenance and governance, standards, and analysis through KDD-based workflows. This course will also consider the fundamentals of artificial intelligence and machine learning as they pertain to bioinformatics, from the perspective of database storage, I/O, and analysis. (Cross-listed with BIOI 4870)

Prerequisite(s)/Corequisite(s): CSCI 3320 and BIOI 3500, or permission of instructor; BIOI 3500 can be taken concurrently. Prior completion of CSCI 4850 is strongly recommended but not required. Not open to non-degree graduate students.

CSCI 8910 MASTER OF SCIENCE CAPSTONE (3 credits)

The capstone course is to integrate coursework, knowledge, skills and experimental learning to enable the student to demonstrate a broad mastery of knowledge, skills, and techniques across the Master degree curriculum of Computer Science for a promise of initial employability and further career advancement. The course is designed to be in a student-centered and student-directed manner which requires the command, analysis and synthesis of knowledge and skills. Students may apply their knowledge and skill to a project which serves as an instrument of evaluation. Students are encouraged to foster an interdisciplinary research and cultivate industry alliances and cooperation in this course. This capstone course should be taken only after students have completed at least 3/4 of course requirements for the major.

Prerequisite(s)/Corequisite(s): Master's degree of Computer Science with course-only option (program III). Not open to nondegree students.

CSCI 8920 ADVANCED TOPICS COMPUTER SCIENCE (3 credits)

An in-depth study, at the graduate level, of one or more topics that are not treated in other courses. May be repeated with different topics with permission of adviser.

Prerequisite(s)/Corequisite(s): Permission of instructor; will vary with offering. Not open to non-degree graduate students.

CSCI 8950 GRADUATE INTERNSHIP IN COMPUTER SCIENCE (1-3 credits)

The purpose of this course is to provide students with opportunities to apply their academic studies in environments such as those found in business, industry, and other non-academic organizations. The student interns will sharpen their academic focus and develop better understanding of non-academic application areas.

Prerequisite(s)/Corequisite(s): Permission of the graduate program chairperson and a minimum grade point average of 3.0 (B), with at most one grade below B, but not lower than C+ for all CS graduate classes. Not open to non-degree graduate students.

CSCI 8960 THESIS EQUIVALENT PROJECT IN COMPUTER SCIENCE (1-6 credits)

This course allows a graduate student to conduct a research project in computer science or a related area. The project is expected to place an emphasis on applied, implementations-based, or experimental research. The process for development and approval of the project must include: appointment of supervisory committee (chaired by project adviser), a proposal approved by the supervisory committee, monitoring of the project by the supervisory committee, an oral examination over the completed written product conducted by the supervisory committee, and final approval by the supervisory committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines.

Prerequisite(s)/Corequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 8970 INDEPENDENT STUDY (1-3 credits)

Under this number a graduate student may pursue studies in an area that is not normally available in a formal course. The topics to be studied will be in a graduate area of computer science to be determined by the instructor.

Prerequisite(s)/Corequisite(s): Permission of the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8980 GRADUATE SEMINAR (1-3 credits)

This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques and methodologies, and/or the current research results in the fundamental areas of computer science. Topics to be covered by the course will vary in different semesters.

Prerequisite(s)/Corequisite(s): Permission of the Instructor. Not open to non-degree graduate students.

CSCI 8986 TOPICS IN COMPUTER SCIENCE (1-3 credits)

A variable topic course in computer science at the senior/graduate level. Topics not normally covered in the computer science degree program, but suitable for senior/graduate-level students. (Cross-listed with CSCI 4980).

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

CSCI 8990 THESIS (1-6 credits)

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.

Prerequisite(s)/Corequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 9210 TYPE SYSTEMS BEHIND PROGRAMMING LANGUAGES (3 credits)

Empirical evidence suggests that a large number of errors made when writing software can be detected by analyzing the behavior of the program from the perspective of type. This course provides an in-depth exploration of various type systems for programming languages.

Prerequisite(s)/Corequisite(s): CSCI 8000. Not open to non-degree graduate students.

CSCI 9220 REWRITING AND PROGRAM TRANSFORMATION (3 credits)

This course begins by exploring the foundations of term rewriting. Topics such as unification, confluence, completion and termination are covered. Then a strategic framework is considered in which the application of rewrite rules can be controlled.

Prerequisite(s)/Corequisite(s): CSCI 8000. Not open to non-degree graduate students.

CSCI 9350 MATHEMATICAL AND LOGICAL FOUNDATIONS OF DATA MINING (3 credits)

With the maturity of data mining techniques, it is extremely important to examine the foundations of data mining. Instead of providing coverage of basic data mining methods, the course will focus on methodology employed in data mining, logical and mathematical foundations of data mining, as well as other issues related to the intrinsic nature of data mining.

Prerequisite(s)/Corequisite(s): CSCI 8456, CSCI 8856, and CSCI 8390. Not open to non-degree graduate students.

CSCI 9410 ADVANCED TOPICS IN LOGIC PROGRAMMING (3 credits)

This course will examine some advanced topics in logic programming, in particular logic programming under stable model (or answer set) semantics. Answer set programming is a common name of the field. Formal syntax, semantics, and proofs of correctness for logic programs will be considered. Elements of inductive and Prolog programming will also be introduced. Each advanced topic will be followed by how it has been applied in practice. Advanced applications of logic programming will be covered in detail.

Prerequisite(s)/Corequisite(s): CSCI 8000 and doctoral student standing in Information Technology or the permission of the instructor.

CSCI 9420 INTELLIGENT AGENT SYSTEMS (3 credits)

This course covers the principles of interaction between agents in multi-agent systems using game theory. Relevant topics studied in this course include competitive games, statistical Bayesian games, cooperative games, and mechanism design. Students will have to implement projects related to the material studied in the course.

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and CSCI 4450 or CSCI 8456. Not open to non-degree graduate students.

CSCI 9710 METHODS IN SOFTWARE ENGINEERING RESEARCH (3 credits)

This course provides guidelines on how to conduct research in the field of software engineering by presenting the research methods, classic readings, and development of theories and their application to real life problems. The main emphasis of the course is to provide opportunity for in-depth study of topics such as contemporary methods for software development.

Prerequisite(s)/Corequisite(s): CSCI 8836 or equivalent course and doctoral student standing in Information Technology or permission of the instructor. Not open to non-degree graduate students.

CSCI 9810 RESEARCH FOUNDATIONS IN THEORETICAL COMPUTING (3 credits)

This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques, and methodologies, and/or the current research results in the fundamental areas of theoretic computing. The course will examine advanced research topics in computer science and engineering, including foundations of automata theory, computability, complexity analysis, computational logics and algorithmic analysis, hybrid dynamic systems theory, number theory, adaptation and learning theory, concepts and principles in computational geometry, stochastic processes, and random optimization. Each topic will be discussed with a perspective of research issues and directions. Active student participation in investigation of the research topics, survey of the current state-of-art, and identifying the future research insights is required. Students will take turn presenting their research results on specific topics. Topics to be covered by the course will vary in different semesters.

Prerequisite(s)/Corequisite(s): The prerequisites of this course vary depending on the areas to be covered in the semester the course is offered. Good standing in Ph.D. program is required. Permission of the instructor may be required. Not open to non-degree graduate students.

Computer Science Teacher Education (CSTE)

CSTE 8020 EXPLORING COMPUTER SCIENCE FOR TEACHERS (3 credits)

This course provides a breadth first introduction to computer science for pre-service and in-service teachers. The Exploring Computer Science curriculum (<http://www.exploringcs.org>) serves as a guiding framework for this course, which introduces domain knowledge and appropriate teaching techniques related to teaching human computer interaction, computational problem solving, web design, programming, data analysis, and artificial intelligence in school environments. The course also covers ethical and social issues in computing along with an overview of computing careers.

CSTE 8030 COMPUTER SCIENCE PRINCIPLES FOR TEACHERS (3 credits)

This course introduces pre-service and in-service teachers to the foundational principles of computer science. It aims to help them learn the essential thought processes used by computer scientists to solve problems, expressing those solutions as computer programs. It prepares them to teach the AP CS Principles course (<https://apcentral.collegeboard.org/courses/ap-computer-science-principles>) as defined by the College Board. Students explore several different curricula available through College Board endorsed providers.

Prerequisite(s)/Corequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or equivalent with C- or better.

CSTE 8040 OBJECT ORIENTED PROGRAMMING FOR TEACHERS (3 credits)

This course provides an in-depth treatment of the fundamentals of object-oriented programming (OOP) in Java programming language environment. Topics include data types and information representation, control structures, classes and objects, methods, encapsulation, and use of introductory data structures to solve real-world problems. Additionally, this course interleaves coverage of OOP content with discussion of common learner misconceptions and teaching strategies/tools that can be employed to aid learners' mastery of this material. This course prepares students to implement the Advanced Placement Computer Science A curriculum in a secondary school setting.

Prerequisite(s)/Corequisite(s): CSTE 8020 or CSTE 8030.

CSTE 8910 CAPSTONE IN CS EDUCATION (3 credits)

This course will allow graduate students, as an individual or as part of a group, to study and analyze specific problems related to teaching computing in schools. Projects will be concerned with the curriculum and/or instruction of computing and should address a broad scope of application rather than a specific level. (Cross-listed with STEM 8910).

Prerequisite(s)/Corequisite(s): The student must have completed at least 21 credit hours in the Masters of CS Education program.

CSTE 8920 SEMINAR IN CS EDUCATION: SPECIAL TOPICS (1-3 credits)

This course will cover variable content focusing on CS education topics relevant to PK-12 teachers and based on current research trends. New curricula, tools, assessments, programming languages, or related standards may be covered.

Prerequisite(s)/Corequisite(s): Advisor and/or instructor approval.

CSTE 8960 THESIS EQUIVALENT PROJECT IN CS EDUCATION (1-6 credits)

This course allows a graduate student to conduct a research project in computing education. The process for development and approval of the project must include: appointment of supervisory committee (chaired by project adviser), a proposal approved by the supervisory committee, monitoring of the project by the supervisory committee, an oral examination over the completed written product conducted by the supervisory committee, & final approval by the supervisory committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines. Project credits must be completed over two or more academic terms.

Prerequisite(s)/Corequisite(s): Completion of required Core courses and approval of advisor.

CSTE 8970 CS ED INDEPENDENT STUDY (1-3 credits)

This is a specially designed course taken under the supervision of a graduate faculty member to accommodate the student who has identified a focus of study not currently available in the departmental offerings and who has demonstrated capability for working independently.

Prerequisite(s)/Corequisite(s): Permission of the department and graduate faculty member.

CSTE 8990 THESIS (1-6 credits)

This course is an independent research project completed under the direction of a thesis advisor and required of all candidates pursuing a Master of Science with Thesis option. Thesis credits must be completed over two or more academic terms.

Prerequisite(s)/Corequisite(s): Completion of Required Core Courses and approval of advisor. Not open to non-degree graduate students.

Construction Engineering (CONE)

CONE 960 PROFESSIONAL PRACTICE (0 credits)

CONE 960 is required of CONE majors prior to graduation. The work experience must be pre-approved by the faculty adviser in the CONE department. Work experience in a construction related work area.

Prerequisite(s)/Corequisite(s): Senior standing

CONE 8166 WOOD/CONTEMPORARY MATERIALS DESIGN (3 credits)

Design of structural timber, beams, columns, and connections. Introduction to applicable design philosophies and codes. Overview of materials design. Masonry, aluminum, and contemporary materials such as plastics and fiber reinforced systems and composite material groups. Design considerations, cost and constructability analysis. (Cross-listed with CONE 4160)

Prerequisite(s)/Corequisite(s): CIVE 341

CONE 8176 FORMWORK SYSTEMS (3 credits)

Design of structural timber, beams, columns, and connections. Introduction to applicable design philosophies and codes. Overview of materials design, masonry, aluminum, and contemporary materials such as plastics and fiber reinforced systems and composite material groups. Design considerations, cost and constructability analysis. (Cross-listed with CONE 4170)

Prerequisite(s)/Corequisite(s): CONE 4160; Pre/Co-req.: CIVE 441

CONE 8210 CONSTRUCTION RISK ASSESSMENT AND MANAGEMENT (3 credits)

The overall process of hazards risk management (risk identification, risk analysis, risk assessment, risk communication), risk based decision making and risk mitigation. Classification of building stock, defining vulnerability, risk assessment methods, assessing economic losses and cost benefit analysis. Case studies will be used to demonstrate the application of risk management principles/techniques in practice.

Prerequisite(s)/Corequisite(s): STAT 3800. Not open to non-degree graduate students.

CONE 8506 SUSTAINABLE CONSTRUCTION (3 credits)

Sustainable construction and its application to the green building industry. Topics include: the LEED certification process, sustainable building site management, efficient wastewater applications, optimizing energy performance, indoor environmental issues, performance measurement/verification, recycled content and certified renewable materials. (Cross-listed with CONE 4500)

CONE 8596 INTRODUCTION TO BUILDING INFORMATION MODELING (3 credits)

This course instructs CAD users on the effective use of Building Information Model (BIM) for integration of design, document and construction estimate. Topics include: model-based 3D design, file formats, interoperability, and MEP modeling. (Cross-listed with CONE 4590)

Prerequisite(s)/Corequisite(s): CNST 1120, or Graduate standing in AE, CIVE, CNST or CONE.

CONE 8666 HEAVY AND/OR CIVIL ESTIMATING (3 credits)

Estimating techniques and strategies for heavy and/or civil construction. Unit pricing, heavy and civil construction takeoffs and estimating, equipment analysis, overhead cost and allocations, estimating software and government contracts. (Cross-listed with CONE 4660).

Prerequisite(s)/Corequisite(s): CONE 3190 and CONE 3780 and CONE 4850

CONE 8816 HIGHWAY & BRIDGE CONSTRUCTION (3 credits)

The methods and equipment required in the construction of roads and bridges. Methods and equipment necessary for roads and bridges. Substructure and superstructures, precast and cast-in-place segments, and standard and specialized equipment. (Cross-listed with CONE 4810)

Prerequisite(s)/Corequisite(s): CONE 3190 or CNST 2410

CONE 8826 HEAVY AND/OR CIVIL CONSTRUCTION (3 credits)

History, theory, methods, and management principles of planning and executing heavy and/or civil projects. Emerging and new equipment capabilities. Economical use of equipment and management of costs associated with production. (Cross-listed with CNST 4820, CNST 8826, CONE 4820).

Prerequisite(s)/Corequisite(s): CNST 3790. Not open to non-degree graduate students.

CONE 8836 SUPPORT OF EXCAVATION (3 credits)

The design and placement of excavation supports according to OSHA requirements and industry standards. A variety of routine to moderately complex support systems. Open excavations, sheet piling and cofferdams. Soil mechanics, lateral loads, hydrology, and pumping methods. (Cross-listed with CONE 4830)

CONE 8856 CONSTRUCTION PLANNING, SCHEDULING, AND CONTROLS (3 credits)

Planning and scheduling a project using the critical path methods (CPM) with computer applications. Project pre-planning, logic networks, precedence diagrams, time estimates, critical path, float time, crash programs, scheduling, short interval schedules, pull planning, and monitoring project activities. (Cross-listed with CNST 4850, CNST 8856, CONE 4850)

Prerequisite(s)/Corequisite(s): CNST 3780. Not open to non-degree graduate students.

CONE 8950 GRADUATE INTERNSHIP (3 credits)

Open only to Construction Management graduate students. Participation in a full-time summer internship with an approved Construction Engineering or Construction Management related entity. Includes weekly assignments and a final presentation that are designed to create interaction between the Construction entity and the intern, and associated with the business aspects of the entity. General topics include Business Plans, Marketing, Finance and Budgets, Contracts, Legal Issues and Professionalism. (Cross-listed with CNST 8950)

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

CONE 8980 SPECIAL TOPICS IN CONSTRUCTION ENGINEERING (1-6 credits)

Individual and small group investigation of special topics in construction engineering. A signed student-instructor learning contact is required. Topics vary.

Prerequisite(s)/Corequisite(s): Master of engineering in construction or related discipline and permission. Not open to non-degree graduate Students.

CONE 9990 DOCTORAL DISSERTATION (1-24 credits)

None provided

Prerequisite(s)/Corequisite(s): Admission to doctoral degree program and permission of supervisory committee chair. Not open to nondegree students.

Construction Management (CNST)

CONE 960 PROFESSIONAL PRACTICE (0 credits)

CONE 0960 is required of CONE majors prior to graduation. The work experience must be pre-approved by the faculty adviser in the CONE department. Work experience in a construction related work area.

Prerequisite(s)/Corequisite(s): Senior standing

CONE 8166 WOOD/CONTEMPORARY MATERIALS DESIGN (3 credits)

Design of structural timber, beams, columns, and connections. Introduction to applicable design philosophies and codes. Overview of materials design. Masonry, aluminum, and contemporary materials such as plastics and fiber reinforced systems and composite material groups. Design considerations, cost and constructability analysis. (Cross-listed with CONE 4160)

Prerequisite(s)/Corequisite(s): CIVE 341

CONE 8176 FORMWORK SYSTEMS (3 credits)

Design of structural timber, beams, columns, and connections. Introduction to applicable design philosophies and codes. Overview of materials design, masonry, aluminum, and contemporary materials such as plastics and fiber reinforced systems and composite material groups. Design considerations, cost and constructability analysis. (Cross-listed with CONE 4170)

Prerequisite(s)/Corequisite(s): CONE 4160; Pre/Co-req.: CIVE 441

CONE 8210 CONSTRUCTION RISK ASSESSMENT AND MANAGEMENT (3 credits)

The overall process of hazards risk management (risk identification, risk analysis, risk assessment, risk communication), risk based decision making and risk mitigation. Classification of building stock, defining vulnerability, risk assessment methods, assessing economic losses and cost benefit analysis. Case studies will be used to demonstrate the application of risk management principles/techniques in practice.

Prerequisite(s)/Corequisite(s): STAT 3800. Not open to non-degree graduate students.

CONE 8506 SUSTAINABLE CONSTRUCTION (3 credits)

Sustainable construction and its application to the green building industry. Topics include: the LEED certification process, sustainable building site management, efficient wastewater applications, optimizing energy performance, indoor environmental issues, performance measurement/verification, recycled content and certified renewable materials. (Cross-listed with CONE 4500)

CONE 8596 INTRODUCTION TO BUILDING INFORMATION MODELING (3 credits)

This course instructs CAD users on the effective use of Building Information Model (BIM) for integration of design, document and construction estimate. Topics include: model-based 3D design, file formats, interoperability, and MEP modeling. (Cross-listed with CONE 4590)

Prerequisite(s)/Corequisite(s): CNST 1120, or Graduate standing in AE, CIVE, CNST or CONE.

CONE 8666 HEAVY AND/OR CIVIL ESTIMATING (3 credits)

Estimating techniques and strategies for heavy and/or civil construction. Unit pricing, heavy and civil construction takeoffs and estimating, equipment analysis, overhead cost and allocations, estimating software and government contracts. (Cross-listed with CONE 4660).

Prerequisite(s)/Corequisite(s): CONE 3190 and CONE 3780 and CONE 4850

CONE 8816 HIGHWAY & BRIDGE CONSTRUCTION (3 credits)

The methods and equipment required in the construction of roads and bridges. Methods and equipment necessary for roads and bridges. Substructure and superstructures, precast and cast-in-place segments, and standard and specialized equipment. (Cross-listed with CONE 4810)

Prerequisite(s)/Corequisite(s): CONE 3190 or CNST 2410

CONE 8826 HEAVY AND/OR CIVIL CONSTRUCTION (3 credits)

History, theory, methods, and management principles of planning and executing heavy and/or civil projects. Emerging and new equipment capabilities. Economical use of equipment and management of costs associated with production. (Cross-listed with CNST 4820, CNST 8826, CONE 4820).

Prerequisite(s)/Corequisite(s): CNST 3790. Not open to non-degree graduate students.

CONE 8836 SUPPORT OF EXCAVATION (3 credits)

The design and placement of excavation supports according to OSHA requirements and industry standards. A variety of routine to moderately complex support systems. Open excavations, sheet piling and cofferdams. Soil mechanics, lateral loads, hydrology, and pumping methods. (Cross-listed with CONE 4830)

CONE 8856 CONSTRUCTION PLANNING, SCHEDULING, AND CONTROLS (3 credits)

Planning and scheduling a project using the critical path methods (CPM) with computer applications. Project pre-planning, logic networks, precedence diagrams, time estimates, critical path, float time, crash programs, scheduling, short interval schedules, pull planning, and monitoring project activities. (Cross-listed with CNST 4850, CNST 8856, CONE 4850)

Prerequisite(s)/Corequisite(s): CNST 3780. Not open to non-degree graduate students.

CONE 8950 GRADUATE INTERNSHIP (3 credits)

Open only to Construction Management graduate students. Participation in a full-time summer internship with an approved Construction Engineering or Construction Management related entity. Includes weekly assignments and a final presentation that are designed to create interaction between the Construction entity and the intern, and associated with the business aspects of the entity. General topics include Business Plans, Marketing, Finance and Budgets, Contracts, Legal Issues and Professionalism. (Cross-listed with CNST 8950)

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

CONE 8980 SPECIAL TOPICS IN CONSTRUCTION ENGINEERING (1-6 credits)

Individual and small group investigation of special topics in construction engineering. A signed student-instructor learning contact is required. Topics vary.

Prerequisite(s)/Corequisite(s): Master of engineering in construction or related discipline and permission. Not open to non-degree graduate Students.

CONE 9990 DOCTORAL DISSERTATION (1-24 credits)

None provided

Prerequisite(s)/Corequisite(s): Admission to doctoral degree program and permission of supervisory committee chair. Not open to nondegree students.

CONE 960 PROFESSIONAL PRACTICE (0 credits)

CONE 0960 is required of CONE majors prior to graduation. The work experience must be pre-approved by the faculty adviser in the CONE department. Work experience in a construction related work area.

Prerequisite(s)/Corequisite(s): Senior standing

CONE 8166 WOOD/CONTEMPORARY MATERIALS DESIGN (3 credits)

Design of structural timber, beams, columns, and connections. Introduction to applicable design philosophies and codes. Overview of materials design. Masonry, aluminum, and contemporary materials such as plastics and fiber reinforced systems and composite material groups. Design considerations, cost and constructability analysis. (Cross-listed with CONE 4160)

Prerequisite(s)/Corequisite(s): CIVE 341

CONE 8176 FORMWORK SYSTEMS (3 credits)

Design of structural timber, beams, columns, and connections. Introduction to applicable design philosophies and codes. Overview of materials design, masonry, aluminum, and contemporary materials such as plastics and fiber reinforced systems and composite material groups. Design considerations, cost and constructability analysis. (Cross-listed with CONE 4170)

Prerequisite(s)/Corequisite(s): CONE 4160; Pre/Co-req.: CIVE 441

CONE 8210 CONSTRUCTION RISK ASSESSMENT AND MANAGEMENT (3 credits)

The overall process of hazards risk management (risk identification, risk analysis, risk assessment, risk communication), risk based decision making and risk mitigation. Classification of building stock, defining vulnerability, risk assessment methods, assessing economic losses and cost benefit analysis. Case studies will be used to demonstrate the application of risk management principles/techniques in practice.

Prerequisite(s)/Corequisite(s): STAT 3800. Not open to non-degree graduate students.

CONE 8506 SUSTAINABLE CONSTRUCTION (3 credits)

Sustainable construction and its application to the green building industry. Topics include: the LEED certification process, sustainable building site management, efficient wastewater applications, optimizing energy performance, indoor environmental issues, performance measurement/verification, recycled content and certified renewable materials. (Cross-listed with CONE 4500)

CONE 8596 INTRODUCTION TO BUILDING INFORMATION MODELING (3 credits)

This course instructs CAD users on the effective use of Building Information Model (BIM) for integration of design, document and construction estimate. Topics include: model-based 3D design, file formats, interoperability, and MEP modeling. (Cross-listed with CONE 4590)

Prerequisite(s)/Corequisite(s): CNST 1120, or Graduate standing in AE, CIVE, CNST or CONE.

CONE 8666 HEAVY AND/OR CIVIL ESTIMATING (3 credits)

Estimating techniques and strategies for heavy and/or civil construction. Unit pricing, heavy and civil construction takeoffs and estimating, equipment analysis, overhead cost and allocations, estimating software and government contracts. (Cross-listed with CONE 4660).

Prerequisite(s)/Corequisite(s): CONE 3190 and CONE 3780 and CONE 4850

CONE 8816 HIGHWAY & BRIDGE CONSTRUCTION (3 credits)

The methods and equipment required in the construction of roads and bridges. Methods and equipment necessary for roads and bridges. Substructure and superstructures, precast and cast-in-place segments, and standard and specialized equipment. (Cross-listed with CONE 4810)

Prerequisite(s)/Corequisite(s): CONE 3190 or CNST 2410

CONE 8826 HEAVY AND/OR CIVIL CONSTRUCTION (3 credits)

History, theory, methods, and management principles of planning and executing heavy and/or civil projects. Emerging and new equipment capabilities. Economical use of equipment and management of costs associated with production. (Cross-listed with CNST 4820, CNST 8826, CONE 4820).

Prerequisite(s)/Corequisite(s): CNST 3790. Not open to non-degree graduate students.

CONE 8836 SUPPORT OF EXCAVATION (3 credits)

The design and placement of excavation supports according to OSHA requirements and industry standards. A variety of routine to moderately complex support systems. Open excavations, sheet piling and cofferdams. Soil mechanics, lateral loads, hydrology, and pumping methods. (Cross-listed with CONE 4830)

CONE 8856 CONSTRUCTION PLANNING, SCHEDULING, AND CONTROLS (3 credits)

Planning and scheduling a project using the critical path methods (CPM) with computer applications. Project pre-planning, logic networks, precedence diagrams, time estimates, critical path, float time, crash programs, scheduling, short interval schedules, pull planning, and monitoring project activities. (Cross-listed with CNST 4850, CNST 8856, CONE 4850)

Prerequisite(s)/Corequisite(s): CNST 3780. Not open to non-degree graduate students.

CONE 8950 GRADUATE INTERNSHIP (3 credits)

Open only to Construction Management graduate students. Participation in a full-time summer internship with an approved Construction Engineering or Construction Management related entity. Includes weekly assignments and a final presentation that are designed to create interaction between the Construction entity and the intern, and associated with the business aspects of the entity. General topics include Business Plans, Marketing, Finance and Budgets, Contracts, Legal Issues and Professionalism. (Cross-listed with CNST 8950)

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

CONE 8980 SPECIAL TOPICS IN CONSTRUCTION ENGINEERING (1-6 credits)

Individual and small group investigation of special topics in construction engineering. A signed student-instructor learning contact is required. Topics vary.

Prerequisite(s)/Corequisite(s): Master of engineering in construction or related discipline and permission. Not open to non-degree graduate Students.

CONE 9990 DOCTORAL DISSERTATION (1-24 credits)

None provided

Prerequisite(s)/Corequisite(s): Admission to doctoral degree program and permission of supervisory committee chair. Not open to nondegree students.

Counseling (COUN)

COUN 8006 SPECIAL STUDIES IN COUNSELING (1-6 credits)

This course is designed to allow candidates to pursue independent study of a topic under the direction and guidance of a faculty member. Topics studied and the nature of the learning activities are mutually agreed upon by the candidate and instructor. This course will prepare graduate (or undergraduate) candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. (Cross-listed with COUN 4000).

Prerequisite(s)/Corequisite(s): Permission by the Department. Must be admitted to the Counseling Program. Not open to non-degree graduate students.

COUN 8010 INTRODUCTION TO COUNSELING (3 credits)

This is an exploratory course for students entering, or considering entering, the field of professional counseling. The focus is on: 1) the development of the profession of counseling, 2) your own professional and personal development as well as your understanding of what contributes to your development as an effective counselor, and 3) a general overview of specific requirements for successful completion of a master's degree in Counseling at UNO.

Prerequisite(s)/Corequisite(s): Undergraduate Degree. Department permit required for non-degree seeking students (based on availability)

COUN 8016 MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS (3 credits)

This course explores the role that educators and school mental health professionals play in identifying the risk factors and warning signs of children and youth with mental health concerns. Students will understand the risk and protective factors at the individual, family, school, and community level as related to children and youth's mental health.

The course will provide an overview of externalizing and internalizing disorders as well as school-based and community-based treatments and interventions. (Cross-listed with COUN 4010, SPED 4010, SPED 8016).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

COUN 8030 COUNSELING PRACTICES (3 credits)

The major purpose of Counseling 8030 is to assist students in skill development as noted in Ivey's Intentional Interviewing and Counseling Model. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism. Candidates will continue to develop counseling skills through additional coursework leading to practicum and internship experiences.

Prerequisite(s)/Corequisite(s): Open only to students admitted to the UNO Counseling Program; Department permission is required for students with non-degree status; and is based on availability.

COUN 8040 ETHICAL ISSUES FOR PROFESSIONAL COUNSELORS (3 credits)

This course examines the ethical, professional, and legal aspects of individual, couple and family counseling including liabilities incurred by the professional. The course addresses the appropriate ethical guidelines as stated by the American Counseling Association (ACA) code of ethics in a participatory format.

Prerequisite(s)/Corequisite(s): Open only to students admitted to the UNO Counseling Program; Department permission is required for students with non-degree status; and is based on availability.

COUN 8050 INTRODUCTION TO PROFESSIONAL SCHOOL COUNSELING (1 credit)

This is an exploratory course for candidates considering entering the field of professional school counseling. This introductory course is required for candidates majoring in counseling, with a concentration in school counseling. Selected issues underlying the school counseling profession are studied.

Prerequisite(s)/Corequisite(s): Admission to the Graduate College and/or the Counseling Department.

COUN 8100 RESEARCH PROJECT IN COUNSELING (1-3 credits)

Individual or group study and analysis of specific problems/issues in the field.

Prerequisite(s)/Corequisite(s): Admission to Counseling program and permission of instructor. Not open to non-degree students.

COUN 8110 HUMAN DEVELOPMENT AND PSYCHO-SOCIAL INTERVENTION STRATEGIES (3 credits)

This course is designed to examine theories of human development covering the lifespan of the individual and the psychosocial interventions appropriate to various phases of the lifespan. The course will emphasize human development as an interactive process involving individuals in a number of contexts; hence human diversity factors (racial ethnic groups, gender, sexual orientation) also will be considered.

Prerequisite(s)/Corequisite(s): Open only to students admitted to the UNO Counseling Program; Department permission is required for students with non-degree status; and is based on availability.

COUN 8150 STUDENT AND STUDENT PERSONNEL WORK IN HIGHER EDUCATION (3 credits)

An overview of the characteristics of college students and their interaction with campus environmental influences. The impact of student personnel work is considered as it affects personality growth, social development and career planning by college students.

Prerequisite(s)/Corequisite(s): Admission to Counseling program. Not open to non-degree graduate students.

COUN 8200 COUNSELING THEORIES (3 credits)

This course is designed to examine counseling theories and the historical and geographic influence on counseling theory development.

Prerequisite(s)/Corequisite(s): Open only to students admitted to the UNO Counseling Program. Not open to non-degree graduate students.

COUN 8210 ORGANIZATION & ADMINISTRATION OF SCHOOL COUNSELING PROGRAMS (3 credits)

The course introduces graduate candidates to an administrative systems approach to organizing comprehensive and developmental school counseling programs for all k-12 students. The American School Counselor Association's (ASCA) National Model for School Counseling Programs provides the foundation for content. Topics include, but are not limited to, school counseling programs: Foundation, Delivery System, Management System, and Accountability domains. Special focus is also placed on developing educational leadership skills, advocacy for k-12 students, and bringing about positive systemic change. Teaching counselor candidates to effectively manage school counseling programs is an important part of our effort to prepare educational leaders.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling Dept. Not open to non-degree graduate students.

COUN 8220 COUNSELING PRACTICUM (3 credits)

This course is the first of the clinical application courses of counseling knowledge, techniques, and specialty areas in clinical mental health settings. Candidates practice, develop and improve counseling skills in an environment of professional constructive criticism.

Prerequisite(s)/Corequisite(s): Pre-Reqs: COUN 8010, COUN 8030, COUN 8040, COUN 8200, COUN 8280, COUN 8400, COUN 8516, COUN 8520, COUN 8920 Co-Reqs: COUN 8360, COUN 8610, COUN 8800 Registration Reqs: Attend Practicum Orientation; Dept Consent. Not open to non-degree graduate students.

COUN 8226 CAREER DEVELOPMENT AND LIFESTYLE (3 credits)

This course will serve as an introduction to the topics of career counseling and career development.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling as degree seeking student; Department permit for non-degree seeking student (based on availability)

COUN 8230 APPRAISAL TECHNIQUES IN COUNSELING (3 credits)

Appraisal Techniques in Counseling includes the history of individual appraisal, the major technical considerations governing assessments, and a survey of measurement devices in the cognitive and affective domains. The course will include uses and implications of standardized and non-standardized assessment devices. Additionally, this course will cover the responsible use and interpretation of ability, aptitude, interest, personality, and career development assessment tools. Whenever it is applicable, a strengths-based, positive psychology approach will be integrated and utilized throughout this course.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling Department as degree seeking student; Department permission for non-counseling/degree seeking student in UNO allied mental health discipline only (based on availability)

COUN 8250 INTERNSHIP: CLINICAL MENTAL HEALTH COUNSELING (3 credits)

This course is the first of the clinical applications of knowledge, techniques, and specialty areas in community settings. Students practice, develop and improve counseling skills in an environment of professional constructive criticism. This course is required for all graduate students in counseling who meet the prerequisites.

Prerequisite(s)/Corequisite(s): COUN 8220 with grade of B or better; Department Permission. Not open to non-degree graduate students.

COUN 8260 ADVANCED INTERNSHIP: CLINICAL MENTAL HEALTH COUNSELING (3 credits)

Field experience in an approved agency program under the supervision of a licensed counselor and university instructor.

Prerequisite(s)/Corequisite(s): Completion of COUN 8250 with grade of B or higher. Not open to non-degree graduate students.

COUN 8270 GROUP TECHNIQUES (1 credit)

This course is intended to prepare students to effectively incorporate group principles appropriate to various counseling settings including schools, treatment centers, and agencies. This class includes a group experience.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Counseling or permission of instructor. Not open to non-degree graduate students.

COUN 8280 CRISIS INTERVENTION STRATEGIES AND TECHNIQUES (3 credits)

This course will present approaches to crisis intervention which include definitions and characteristics of a crisis, a brief history of crisis intervention and associated theories/models and a practice of skills for intervention and crisis case management. Topics will include applied therapeutic counseling strategies in general casework and in crisis intervention cases, in particular, which describe actual techniques to alleviate the crisis.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling as degree seeking student; COUN 8030, COUN 8200, COUN 8040; Dept permission/graduate status as degree seeking student in allied mental/behavioral health (based on availability). Not open to non-degree graduate students.

COUN 8306 COUNSELING TECHNIQUES I (1 credit)

This course will present the counseling process, knowledge of beginning skills development and application of techniques related to a specific approach. Topics may include Adlerian counseling (specified in this syllabus), anger management, play therapy, solution focused, cognition, and other topics as needed. (Cross-listed with COUN 4300).

Prerequisite(s)/Corequisite(s): Admission to Counseling program. Not open to non-degree students; must take prior to practicum.

COUN 8316 COUNSELING TECHNIQUES II (1 credit)

This course will present the counseling process, knowledge of beginning skills development and application of techniques related to a specific approach. Topics may include Rational Emotive Behavior Therapy (REBT) (specified in the syllabus), anger management, play therapy, solution focused, cognition, and other topics as needed.. (Cross-listed with COUN 4310)

Prerequisite(s)/Corequisite(s): Admission to Counseling program; must take prior to practicum. Not open to non-degree students.

COUN 8330 PRACTICUM FOR SCHOOL COUNSELORS (3 credits)

This course is the first of the clinical applications to provide the prospective school counselor with supervision in a school counseling setting. Candidates will continue to develop counseling skills and will become immersed in the work of a professional school counselor. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism.

Prerequisite(s)/Corequisite(s): Instructor Consent; COUN 8030; COUN 8040; COUN 8200; COUN 8210; COUN 8280; COUN 8630; COUN 8650; COUN 8670; COUN 8700; COUN 8740; Grade of B or better in COUN 8030 and COUN 8040. Not open to non-degree graduate students.

COUN 8360 GROUP THEORY & TECHNIQUES (3 credits)

This course is intended to prepare students to effectively incorporate group principles appropriate to various counseling settings including schools, clinical mental health treatment facilities, and agencies. This class includes a group experience.

Prerequisite(s)/Corequisite(s): Admission as degree seeking student in UNO Counseling Dept; Pre-Req: COUN 8030, COUN 8040; Completion of Group Experience and Department permission. Not open to non-degree graduate students.

COUN 8400 ADVANCED THEORY AND TECHNIQUES IN COUNSELING (3 credits)

This course introduces students to the basic knowledge and skills necessary to understand and apply counseling techniques related to differential approaches to treatment. Topics may include Solution-Focused, Adlerian, Cognitive-Behavioral (CBT), Dialectical Behavioral (DBT), Motivational Interviewing, and other techniques as deemed to be relevant/appropriate.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling program; Pre-Req: COUN 8030; COUN 8200

COUN 8406 COUNSELING TECHNIQUES III (1 credit)

This course will assist candidates in developing more systematic integration of previously learned information and skills and the application to specific counseling situations related to various approaches. Topics may include Solution Focused Counseling - SFC (specified in the syllabus), Dialectical Behavioral Therapy, anger management, art therapy, play therapy, solution focused, cognition, and other topics as needed. (Cross-listed with COUN 4400)

Prerequisite(s)/Corequisite(s): Admission to Counseling program. Not open to non-degree students.

COUN 8430 INTERNSHIP IN SCHOOL COUNSELING (3 credits)

This course is the second of the clinical applications to provide the prospective school counselor with supervision in a school counseling setting. Candidates will continue to develop counseling skills and will become immersed in the work of a professional school counselor. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism.

Prerequisite(s)/Corequisite(s): Pre-req: COUN 8330. Not open to non-degree graduate students.

COUN 8450 COLLEGE STUDENT PERSONNEL INTERNSHIP (1-6 credits)

This course is designed to provide practical work experience under supervision in various areas within student personnel services.

Prerequisite(s)/Corequisite(s): COUN 8030, COUN 8040, COUN 8006, COUN 8150, COUN 8360, COUN 8520

COUN 8460 ADVANCED INTERNSHIP IN SCHOOL COUNSELING (3-6 credits)

This course is the third of the clinical applications to provide the prospective school counselor with supervision in a school counseling setting. Candidates will continue to develop counseling skills and will become immersed in the work of a professional school counselor. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism.

Prerequisite(s)/Corequisite(s): COUN 8330. Not open to non-degree graduate students.

COUN 8500 CONSULTATION IN PROFESSIONAL COUNSELING (2 credits)

Instruction in this course is founded upon commitment to the beliefs that individuals are valuable, responsible and capable, and that all human service professionals should work to create the conditions in which people value themselves as human beings and behave accordingly. As reflective decision-makers, such professionals value human potential and purposefully design policies, processes and programs that facilitate the realization of that potential. The counselor learns that consultation and collaboration are first and foremost helping relationships that have as their foundation the dignity and respect of individuals/groups involved. Consultation and collaboration are characterized as problem-solving processes that involve a variety of key decision points. A generic model is provided for students as a "cognitive map" upon which they can reflect when attempting to determine effective practice.

Prerequisite(s)/Corequisite(s): Admission to the Counseling Program. Not open to non-degree graduate students

COUN 8516 TREATMENT ISSUES IN CHEMICAL DEPENDENCY (3 credits)

This course addresses chemical dependency treatment issues including denial, minimization, relapse and its prevention, resistance, family dynamics, poly-substance abuse, co-occurring disorders, spirituality and the influence of self-help groups. The education will include the clinical treatment needs of individuals suffering from chemical dependency, taking into consideration diversity, gender, culture and lifestyle. (Cross-listed with COUN 4510, SOWK 4510, SOWK 8516).

Prerequisite(s)/Corequisite(s): Admission to counseling program or social work programs or permission of instructor. Not open to non-degree graduate students.

COUN 8520 COUNSELING MULTICULTURAL AND DIVERSE POPULATIONS (3 credits)

This course will make candidates more aware of the societal context in which counseling takes place and to help prepare candidates for work with persons who are members of populations which require special knowledge and skills of the counselor. Certain special populations will be considered in comparative detail as well as a general information which will emphasize acquiring broader understandings transferable to counseling with any special population.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

COUN 8610 INTRODUCTION TO MARITAL AND FAMILY THERAPY (3 credits)

This course is the first of the clinical mental health applications to provide the prospective mental health counselor with instruction in marital and family therapy. Students will continue to develop counseling skills and will become immersed in the work of a professional counselor. Students practice, develop and improve marital and family counseling skills in an environment of professional and constructive peer feedback.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling program; COUN 8030, COUN 8200, COUN 8040. Not open to non-degree graduate students.

COUN 8620 SURVEY OF ISSUES IN SCHOOL COUNSELING (2 credits)

This course is designed to provide school counselors with information on topics that are current and relevant to secondary school settings. It will allow candidates and practicing counselors the opportunity to study and evaluate what activities school counselors are currently engaged in and consideration of strategies to deal with students and families.

Prerequisite(s)/Corequisite(s): Admission to counseling program. Not open to non-degree graduate students.

COUN 8630 FOUNDATIONS AND ISSUES IN SECONDARY COUNSELING (3 credits)

This course is designed to introduce the history, current ASCA (American School Counselor Association) model, and the role of a professional school counselor; and to provide information on and practice with topics that are current and relevant to secondary school settings.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling Dept. Not open to non-degree graduate students.

COUN 8650 ISSUES IN ELEMENTARY AND MIDDLE SCHOOL COUNSELING (3 credits)

This course is intended to prepare students to effectively implement an elementary and/or middle school counseling program. Candidates will develop awareness and skill sets through an overview of the unique issues, approaches, systems and practice of elementary and middle school counseling.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling Dept. Not open to non-degree graduate students.

COUN 8656 TRANSITION PLANNING (3 credits)

Curriculum oriented for teachers and related professionals to work with the career development and transition of individuals with disabilities within a multicultural and global society. Includes information for elementary through adulthood with emphasis on transition from high school to community living.

Prerequisite(s)/Corequisite(s): EDUC 2510 or SPED 1500. Not open to non-degree graduate students.

COUN 8670 CAREER DEVELOPMENT POST-SECONDARY TRANSITIONS (3 credits)

This course is an introduction to career counseling and career development and post-secondary planning in P-12 schools. This course is required for all graduate students seeking a masters degree in counseling with a concentration in school counseling.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling Dept

COUN 8686 MEDICAL AND PSYCHOSOCIAL ASPECTS OF ALCOHOL/ DRUG USE AND ADDICTION (3 credits)

This course introduces students to substance abuse disorders and their impact on the individual, family, and society. It covers psychopharmacology, alcohol and drug interactions, drug classifications, theories of chemical dependency, various models of treatment, vulnerable populations, and ethical and legal issues. (Cross-listed with SOWK 4680, SOWK 8686, COUN 4680).

Prerequisite(s)/Corequisite(s): Admission to counseling program or social work program or permission of instructor.

COUN 8696 ASSESSMENT AND CASE MANAGEMENT IN SUBSTANCE ABUSE (3 credits)

This course focuses on assessment of clients and their environment, and diagnosis and referral for substance abuse treatment. Emphasis is given to assessment instruments, treatment levels, treatment planning, case management, and social justice. (Cross-listed with COUN 4690, SOWK 4690, SOWK 8696).

Prerequisite(s)/Corequisite(s): Admission to counseling program or social work program or permission of instructor.

COUN 8700 CHILD AND ADOLESCENT COUNSELING (3 credits)

This course is an introduction to counseling children and adolescents and will examine the theories, techniques, professional settings, cultural, and ethical/legal issues associated with counseling children and adolescents in a diverse society. Although diagnosis of mental disorders will be discussed, the course is designed to build competencies in counseling children and adolescents, with specific attention to social, developmental, and behavioral issues across professional settings.

Prerequisite(s)/Corequisite(s): Admission to UNO Counseling Department; COUN 8030 or Department Permission. Not open to non-degree graduate students.

COUN 8740 SCHOOL COUNSELING GROUPS (3 credits)

This course is designed to provide the school counselor candidate with a focused study of small group counseling and enrichment programs in schools.

Prerequisite(s)/Corequisite(s): Instructor Consent; Documented completion of group experience. Not open to non-degree graduate students.

COUN 8750 SCHOOL COUNSELING GROUPS & ENRICHMENT PROGRAMS (2 credits)

This course is intended to prepare students to effectively incorporate small group design, implementation, and assessment as part of a school counseling program. Candidates will develop small group counseling skills and strategies for enrichment program development and delivery.

Prerequisite(s)/Corequisite(s): Counseling Major. COUN 8030 and COUN 8270 and COUN 8406 or permission. Not open to non-degree graduate students.

COUN 8756 MID-LIFE, CAREER CHANGE, PRERETIREMENT PLANNING (3 credits)

This course is designed to involve candidates in the exploration of the developmental tasks of mid-life, myths and realities related to career change as well as the implication of preretirement planning. Factual information, as well as model examination and evaluation are presented to aid the candidate in becoming better equipped to understand some of the forces which affect the well-being of middle aged persons as they prepare for the later years. (Cross-listed with GERO 4750 and GERO 8756)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

COUN 8800 CLINICAL MENTAL HEALTH COUNSELING (3 credits)

This course is an introduction to the specialization of clinical mental health counseling. The course content examines the historical, philosophical, educational, ethical, and psychological concepts and foundations of clinical mental health counseling. Additionally, the course will explore key public and private professional settings and programs within the clinical mental health paradigm, professional advocacy and leadership, and the personal and professional skills and traits expected of professional counselors.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

COUN 8810 LAW AND ETHICS IN HIGHER EDUCATION AND STUDENT AFFAIRS (3 credits)

This introductory course is designed to ground future student affairs practitioners in the guiding ethical and legal standards and principles of higher education administrators and student affairs professionals. The course will examine ethical and legal principles through evidence-based readings, discussion/lecture, case studies, exams, and projects. The course will also challenge students to examine their personal values and beliefs and their potential influence on future decision making responses as a student affairs professional.

Prerequisite(s)/Corequisite(s): Admission to the UNO Counseling Department or department permission.

COUN 8820 CRISIS AND EMERGENCY MANAGEMENT IN HIGHER EDUCATION (3 credits)

This course is designed to provide future student affairs professionals with an understanding of the role of higher education institutions respond and adapt to crises that affect institutional well-being and the well-being of faculty, staff, and students. The course will feature content on crisis and emergency management theory and policy—as well as their implications on the well-being of the institution and key stakeholders (i.e., administrators, faculty, staff, students, community, alumni). Specific focus will be given to examining the specific role of the student affairs professional in the design, implementation, and assessment of crisis and emergency management policy and procedures.

Prerequisite(s)/Corequisite(s): Admission to the UNO Department of Counseling and/or department permission

COUN 8830 CURRENT ISSUES IN HIGHER EDUCATION AND STUDENT AFFAIRS (1 credit)

This course involves a detailed exploration of current events and issues related to Student Affairs and Higher Education. The higher education ecological environment will be explored and issues pertaining to students will be investigated within the context of the current higher educational landscape. Finally, the college campus's social, political, and physical landscapes will be discussed and current events facing student affairs and higher education professionals will be examined in order to provide students with information on conflicting perspectives related to relevant issues across academia and higher education as a whole.

Prerequisite(s)/Corequisite(s): Admission to the UNO Counseling Department and/or department permission

COUN 8850 THE COLLEGE STUDENT EXPERIENCE (3 credits)

This course will examine the personal, academic, and psychosocial, and institutional variables common to the experience of students in public and private institutions of higher education in the United States.

Prerequisite(s)/Corequisite(s): Full admission to the UNO Counseling Department and/or permission from the Counseling Department Chair.

COUN 8920 TREATMENT PLANNING AND THE DSM (3 credits)

This course is designed to orient students to the stages of treatment planning and use of the DSM-5 as a part of the treatment process in mental health settings. The course will examine the stages of treatment planning and offer opportunities to integrate counseling theories into practice. Factors such as psychopathology/pharmacology, ethics, and human diversity will be considered.

Prerequisite(s)/Corequisite(s): Department Consent. Not open to non-degree graduate students.

COUN 8930 HISTORY OF HIGHER EDUCATION AND STUDENT AFFAIRS (3 credits)

This course will examine a range of topics relevant to understanding and working in higher education institutions. Specific topics will include the purpose of higher education, accessibility and student diversity issues, financial and legal factors, extracurricular activities, and issues related to faculty and staff experiences.

Prerequisite(s)/Corequisite(s): Full admission to the UNO graduate program in Student Affairs in Higher Education or permission from Counseling Department Chair

COUN 8940 DIVERSITY AND WELLNESS ISSUES IN HIGHER EDUCATION (3 credits)

This course is an exploration of holistic wellness and of power, privilege, social identities, social justice theories and multicultural issues and practices within the context of higher education. We begin by offering foundational definitions of terminology used throughout the course and delve into understanding systems of oppression, privilege, power, and activism through a holistic wellness lens. We then explore and discuss specific social identities, returning again to think about identity through a social justice lens.

Prerequisite(s)/Corequisite(s): Full admission to the UNO Counseling Department and/or permission from the Counseling Department Chair. Not open to non-degree graduate students.

COUN 8950 ORGANIZATION, ADMINISTRATION, AND LEADERSHIP IN HIGHER EDUCATION (3 credits)

This course will provide an analysis of leadership, management, and organizational theory and practice in US higher education with particular emphasis on student affairs/student development. An examination of current practices of management will include human, fiscal, and physical resource management. This course is required for all students who are seeking a master's degree (M.S.) in Student Affairs in Higher Education.

Prerequisite(s)/Corequisite(s): Full admission to the UNO Counseling Department and/or permission from the Counseling Department Chair.

COUN 8980 DIGITAL LEARNING: POLICY, PROGRAMMING, & SYSTEMS (3 credits)

This course is an exploration of digital learning organizational structures within the context of higher education. We begin by offering foundational definitions of terminology used throughout the course and delve into understanding how digital learning fits within the broader context of college and university operations. We then explore and discuss strategies for understanding relevant policies, technology systems and wrap-around support services to ultimately engage and retain digital learners in pursuit of post-secondary education.

Prerequisite(s)/Corequisite(s): Admission to UNO Department of Counseling and/or department permission.

COUN 8986 COUNSELING SKILLS IN GERONTOLOGY (3 credits)

This course is intended to help develop basic counseling skills for application in gerontology. (Cross-listed with GERO 4980, GERO 8986).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

COUN 8990 THESIS (1-6 credits)

To develop the candidate's ability to carry out accepted procedures associated with the research process.

Prerequisite(s)/Corequisite(s): Approval of the Thesis Review Committee and permission of student's thesis chairperson. Not open to non-degree graduate students.

Criminology and Criminal Justice (CRCJ)

CRCJ 8010 NATURE OF CRIME (3 credits)

This course provides an overview of the major dimensions of crime in the U.S. Content areas included are the epidemiology of crime, the costs of crime and typologies of crime and criminals.

Prerequisite(s)/Corequisite(s): Admission to UNO Graduate College.

CRCJ 8020 SEMINAR IN ADMINISTRATION OF JUSTICE (3 credits)

This course is designed to provide students with a critical understanding of responses to crime. Particular emphasis is placed on theory and research bearing upon the effectiveness of the policies and strategies of the principal institutions of the criminal justice system - the police, courts and corrections. Additionally, philosophical and practical matters pertaining to "justice" and "fairness" in the administration of the criminal law are explored.

Prerequisite(s)/Corequisite(s): Admission to UNO Graduate College.

CRCJ 8030 CRIMINAL JUSTICE RESEARCH THEORY AND METHODOLOGY (3 credits)

Research theory and methodology in the social sciences as applicable to criminal justice; preparation of research designs, conceptual models; sampling procedures; and development of individual research papers.

Prerequisite(s)/Corequisite(s): Admission to UNO Graduate College.

CRCJ 8040 SEMINAR IN POLICE AND SOCIETY (3 credits)

This course is designed to explore the role of the police in American society. Attention is given to the origins of policing, the nature of police organizations and police work, and patterns of relations between the police and the public. The values of a democratic society as they affect the law enforcement role are discussed.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in Criminology and Criminal Justice; or admission to the UNO graduate program and permission of instructor.

CRCJ 8050 SEMINAR IN CORRECTIONS (3 credits)

This course is designed to give an analytical perspective to the history, development, implementation and future of critical issues in the field of corrections. Primary focus will be directed toward an exploration of the various theoretical approaches to corrections and the research intended to support or refute these perspectives.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8060 SEMINAR IN THE CRIMINAL COURT SYSTEM (3 credits)

This course is designed to provide a social science perspective on the role of the courts in the criminal justice system. The ideals of the system will be compared with actual functioning, and court reform programs and proposals will be critically examined.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8070 SEMINAR IN CRIMINAL LAW AND PROCEDURE (3 credits)

This course is designed to examine substantive criminal law as the basis of social control in our country. Contemporary issues such as the insanity defense, decriminalization of so-called victimless crimes, sexual assault and abortion, and current proposals to assist victims of crimes will be among the topics explored. In addition, current criminal procedure problems relating to right to counsel, search and seizure and interrogation will be examined.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8080 SEMINAR IN JUVENILE JUSTICE (3 credits)

An inquiry in the social ramifications of the entire juvenile delinquency process including labeling, detention, incarceration and tolerance. Pre- and post-adjudicatory issues are dealt with as well as a realistic perspective given to delinquency prevention strategies.

Prerequisite(s)/Corequisite(s): Admission to UNO graduate program.

CRCJ 8090 SEMINAR IN THEORETICAL CRIMINOLOGY (3 credits)

A study of the etiology of crime as a social phenomenon and an objective analysis of the historical influences and thought which molded its development into an accepted contemporary science.

Prerequisite(s)/Corequisite(s): Admission to graduate program in criminology and criminal justice; or admission to UNO graduate program and instructor permission.

CRCJ 8100 CRIMINAL JUSTICE ORGANIZATION, ADMINISTRATION AND MANAGEMENT (3 credits)

This course will deal with issues in the organization and administration of modern justice agencies. The students will be exposed to theories, concepts, and issues relating to the administration and organization of justice agencies.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8110 VICTIMOLOGY (3 credits)

The Victimology seminar provides an overview of key research areas on prevalence, predictors, and consequences of various forms of victimization. By the end of the course, students will develop a critical understanding and appreciation of the development and current state of theories of victimology, measurement of different types of victimization, and quantitative and qualitative results that have been used to inform research in the field. Furthermore, students will learn how to critically analyze and interpret primary research regarding victimization.

Prerequisite(s)/Corequisite(s): Admission to UNO graduate program.

CRCJ 8130 SEMINAR IN WOMEN AND CRIMINAL JUSTICE (3 credits)

This course focuses on the experiences of women in the criminal justice system. It will cover the history of criminological theory on women, application of mainstream criminological theory to women, and women as offenders, victims, and professionals in the criminal justice system.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8136 SOCIOLOGY OF DEVIANT BEHAVIOR (3 credits)

This course is designed to investigate the etiology of many forms of norm-violating conduct. Emphasis will be placed on rule-breaking behavior as defined in the criminal statutes. (Cross-listed with CRCJ 4130).

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8180 CRIMINAL JUSTICE INTERNSHIP (3 credits)

This course is designed to provide supervised individualized learning experiences in a selected criminal justice agency. The principal objective of the internship is to provide students with the opportunity to apply theoretical and methodological principles acquired in graduate courses to the analysis of problems in local criminal justice agencies.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Criminology and Criminal Justice, successful completion of 15 hours of graduate work, and permission of instructor. Not open to non-degree graduate students.

CRCJ 8190 INDEPENDENT STUDY (1-3 credits)

Individual projects in research, literature review or creative production which may or may not be an extension of course work. The work will be supervised and evaluated by departmental graduate faculty members.

Prerequisite(s)/Corequisite(s): Admission to graduate program at UNO, and permission of instructor.

CRCJ 8210 PROGRAM EVALUATION AND POLICY ANALYSIS (3 credits)

This course is a survey of program evaluation and policy analysis techniques. The focus is on theoretical foundations of the Criminal Justice policy process, program development and implementation, research designs specific to program evaluation and policy research, and methodological techniques commonly used to evaluate criminal justice programs and policies.

Prerequisite(s)/Corequisite(s): Admission to doctoral program in Criminology and Criminal Justice; or admission to graduate program at UNO and CRCJ 8030; or instructor permission.

CRCJ 8230 TERRORISM (3 credits)

A course devoted to an exploration and analysis of contemporary special problems in the broad spectrum of law enforcement and corrections.

CRCJ 8356 COMMUNITY-BASED CORRECTIONS (3 credits)

This course is intended for advanced students with a special interest in the correctional process as applied in a community setting. It is designed to focus on innovative community-based strategies for dealing with the offender as well as the traditional processes of probation and parole.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8516 VIOLENCE (3 credits)

This course is a survey of the nature and extent of violence. The focus is on patterns of violence across social groups, the causes and correlates of violence and violent behavior, and programs/policies geared toward violence prevention and reduction. Also of interest is the relationship between theory and violence research.

Prerequisite(s)/Corequisite(s): Upper-division CRCJ major; CRCJ minor; or CRCJ 1010 and jr/sr standing.

CRCJ 8800 SPECIAL PROBLEMS IN CRIMINAL JUSTICE (3 credits)

A course devoted to an exploration and analysis of contemporary special problems in the broad spectrum of criminal justice philosophy. This course looks at philosophical issues related to social control. The purpose of this course is to foster a deeper understanding of the reasons, justifications, and problems related to societal approaches to the control of its citizens.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or UNO graduate student and permission of instructor.

CRCJ 8850 RISK/NEEDS ASSESSMENT INSTRUMENTS (3 credits)

This course is designed to provide students with advanced knowledge and understanding in the area of risk/needs assessment tools used in the juvenile and adult justice system.

Prerequisite(s)/Corequisite(s): Admission to graduate program in criminology and criminal justice; or, instructor permission.

CRCJ 8950 STATISTICAL APPLICATIONS IN CRIMINAL JUSTICE & PUBLIC ADMIN (3 credits)

This is a required course which provides a foundation for the use of statistical methods in criminal justice and public affairs research. It will review fundamentals of research, showing the interplay between the theory, the research, the statistical method, and the interpretation.

Prerequisite(s)/Corequisite(s): Admission to UNO Graduate college.

CRCJ 8970 CAPSTONE PROJECT IN CRIMINOLOGY AND CRIMINAL JUSTICE (3 credits)

The Capstone Project offers each student the opportunity to demonstrate mastery of the theory and practice of Criminology and Criminal Justice by applying the knowledge and skills gained in the Master of Science program to a project of the student's choice. This involves completing a project report reflecting the cumulative knowledge gained from these experiences. This class is intended only for students who are completing their Master of Science degree in Criminology and Criminal Justice.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice MS program, and completion of a minimum of 24 credit hours; or permission of Masters Program Coordinator. Not open to non-degree graduate students.

CRCJ 8990 MASTERS THESIS (1-6 credits)

The thesis is required for all students in the MA program. It provides students with an opportunity to integrate theories, concepts, and aspects of the criminology and criminal justice literature with methods and techniques for conducting research, through the completion of an original research project. The thesis project should constitute original research and is conducted under the supervision of a Masters Thesis Committee.

Prerequisite(s)/Corequisite(s): Admission to the MA program in Criminology and Criminal Justice; and, CRCJ 8010, CRCJ 8020, CRCJ 8030, CRCJ 8950 and 6 other 8000+ CRCJ courses. Not open to non-degree graduate students.

CRCJ 9010 SEMINAR ON LAW & SOCIAL CONTROL (3 credits)

This is a required course which will examine the relationships between the state, the law, and the citizen in a democratic society. It will also examine the relationship between social control, law and social change.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Criminology and Criminal Justice; or UNO graduate student and permission of instructor.

CRCJ 9020 SEMINAR ON THEORIES OF CRIME (3 credits)

This is a required course which emphasizes conceptual and theoretical issues in contemporary criminological theory. It also provides students with a working knowledge of theory construction.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice MA or PhD graduate programs; or admission to UNO graduate program and instructor permission.

CRCJ 9030 SEMINAR ON RACE, ETHNICITY, AND CRIMINAL JUSTICE (3 credits)

This is a required course which introduces students to current empirical research and theory on racial minorities and the criminal justice system. It focuses on racial minorities as victims of crime, as offenders, and as criminal justice professionals.

Prerequisite(s)/Corequisite(s): Admission to UNO graduate program.

CRCJ 9040 COMPARATIVE CRIMINOLOGY AND CRIMINAL JUSTICE SYSTEMS (3 credits)

This course provides a cross-national examination of the dynamics of criminality and the social response to crime. It also describes the extent and nature of crime in different countries.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and instructor permission.

CRCJ 9050 ACADEMIC WRITING (3 credits)

This course is designed to familiarize students with academic and professional writing with the goal of promoting the development of formal writing and organizational skills. Students will learn how to construct and organize scholarly papers to better prepare them for the comprehensive examination, the doctoral dissertation, the development of scholarly journal articles and monographs, and the development of funded project proposals.

Prerequisite(s)/Corequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and permission of instructor.

CRCJ 9080 ADVANCED STATISTICAL APPLICATIONS (3 credits)

This is a required course which will provide the student with fundamentals of modern statistical techniques used in criminal justice and public affairs research. (Cross-listed with PA 9080.)

Prerequisite(s)/Corequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and CRCJ 8950 or PA 8950 and instructor permission.

CRCJ 9090 SPECIAL PROBLEMS IN RESEARCH METHODS (3 credits)

This course will explore specialized topics in research methodology. The course assumes that participants have a firm understanding of the basic principles of research methods and statistics.

Prerequisite(s)/Corequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9100 SPECIAL PROBLEMS IN STATISTICAL ANALYSIS (3 credits)

This course will explore advanced techniques of statistical analysis within the field of criminal justice. It assumes that participants have taken courses in basic descriptive and inferential statistics and advanced multivariate analysis of variance and regression.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in Criminology and Criminal Justice and CRCJ 9080; or admission to UNO graduate program, CRCJ 9080, and permission of the instructor.

CRCJ 9130 ADVANCED RESEARCH ON POLICING (3 credits)

This course will explore critical research issues in American policing. The focus of the course may vary and cover topics such as police discretion, police use of force, labor unions in law enforcement, gender differences in policing, and police organization management.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and permission of the instructor.

CRCJ 9150 SPECIAL TOPICS IN CRIMINAL JUSTICE RESEARCH (3 credits)

This course will focus on specialized topics in criminology & criminal justice research. The purpose of the course is to provide students with an opportunity to read and critique current research on topics such as the history of the criminal justice system, civilian review of the police, sentencing, or the application of the death penalty.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9160 SEMINAR IN COMMUNITY-BASED CORRECTIONS (3 credits)

This course will deal with strategies of correctional reform and with models and practices of community-based corrections. Recent innovations in community-based corrections will be examined to demonstrate how they fit into an overall correctional strategy.

Prerequisite(s)/Corequisite(s): Admission to UNO graduate program.

CRCJ 9170 SEMINAR ON INSTITUTIONAL CORRECTIONS (3 credits)

This course will examine the role of correctional institutions in the criminal justice system. The student will be exposed to the historical, current, and projected role of these institutions.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 9180 SEMINAR ON THE CRIMINAL COURT SYSTEM (3 credits)

This course will focus on the structure, organization, and operation of the state and federal court systems in the United States. The purpose of the course is to survey recent research on the dynamics of courthouse justice—charging, plea bargaining, bail decision making, jury decision making, and sentencing.

Prerequisite(s)/Corequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 9200 SEMINAR ON VIOLENT CRIME AND CRIMINAL BEHAVIOR (3 credits)

This course exposes students to the leading theories and research in the area of violent criminal behavior. It addresses major violent crimes including rape, homicide, and child sexual physical abuse.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 9220 ADVANCED CRIMINOLOGICAL THEORY AND THEORY CONSTRUCTION (3 credits)

This course is designed to extend students' knowledge of theory and theory construction beyond the basics of the elements and propositions of particular criminological theories. Students will have an opportunity to examine in depth topics such as theory construction, theory integration, theory compatibility and synthesis, and new directions in criminological theory.

Prerequisite(s)/Corequisite(s): CRCJ 8090 or CRCJ 9020 and admission to graduate program in Criminology and Criminal Justice; or permission of instructor.

CRCJ 9250 SEMINAR ON VICTIMIZATION ACROSS THE LIFE-COURSE (3 credits)

The Seminar on Victimization across the Life-course provides graduate students a survey of the primary topics regarding the predictors and consequences of victimization at various points in life. This an elective course for graduate students in Criminology and Criminal Justice. By the end of the course, students will understand major theories, research methods, and seminal research studies in the victimology field. Furthermore, students will learn how to critically analyze and interpret primary research regarding victimization.

Prerequisite(s)/Corequisite(s): Admission to UNO graduate program. Not open to non-degree graduate students.

CRCJ 9700 TEACHING CRIMINAL JUSTICE AT THE COLLEGE/ UNIVERSITY LEVEL (3 credits)

This seminar is a required course for doctoral students in criminal justice. The purpose of the course is to provide students with the knowledge and skills that will enable them to become informed, effective, and stimulating teachers. A variety of pedagogical issues will be covered during the course of the semester; theories of learning and student motivation; constructing a course syllabus; designing effective writing assignments and in-class exercises; leading class discussions; testing and grading; and managing the classroom.

Prerequisite(s)/Corequisite(s): Admission to Criminology and Criminal Justice PhD graduate program; or admission to Criminology and Criminal Justice MA or MS graduate program and instructor permission. Not open to nondegree students.

CRCJ 9800 ADVANCED RESEARCH DESIGN (3 credits)

This is a required course which will expose students to advanced topics in research methods in preparation for writing their doctoral dissertation. It will also apply advanced methodological techniques to problems in the field.

Prerequisite(s)/Corequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9980 DIRECTED READINGS IN CRIMINOLOGY & CRIMINAL JUSTICE (1-6 credits)

This course is designed to provide the advanced graduate student with the opportunity to do extended readings on a specialized criminology or criminal justice topic.

Prerequisite(s)/Corequisite(s): Admission to graduate program in criminology and criminal justice or UNO graduate program, and permission of instructor.

CRCJ 9990 DISSERTATION (1-20 credits)

The dissertation is an original research project conducted and written under the direction of a faculty dissertation committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge on crime and criminal justice.

Prerequisite(s)/Corequisite(s): Completion of all coursework, completion of the comprehensive examination, and permission of Supervisory Committee Chair. Not open to non-degree graduate students.

Critical and Creative Thinking (CACT)

CACT 8000 INTRODUCTION TO CRITICAL AND CREATIVE THINKING (3 credits)

This course is the foundational introductory course for the Master of Arts in Critical and Creative Thinking program (MA CCT). It focuses on the development of students' skills as critical thinkers and creative problem solvers as well as the cultivation of students' capacity to recognize and leverage tools, resources, and ideas towards finding innovative solutions to everyday problems.

Prerequisite(s)/Corequisite(s): Graduate status and acceptance into MA CACT program or permission of instructor.CACT8000

CACT 8060 TOPICS IN CRITICAL AND CREATIVE THINKING (3 credits)

This is a course on selected topics offered on a one-time or occasional basis. The course may be repeated as long as the topic is different each time.

May be cross listed with other departments when topics are appropriate to other departments. A complete topics syllabus will be available on file in the Office of the Master of Arts in Critical and Creative Thinking program.

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8080 INDEPENDENT STUDY (1-3 credits)

This course is designed for those students who are independently pursuing an area of study that is not covered under the existing curriculum. The student will be supervised by a member of the faculty of the MA in Critical and Creative Thinking program. All course assignments, readings, requirements, and expectations will be clearly communicated to the student in advance. May be repeated for credit for a total of six credit hours.

Prerequisite(s)/Corequisite(s): Admission into the MA CCT program, successful completion of 6 hours of CACT coursework, including CACT 8000, and permission of faculty member. Not open to non-degree graduate students.

CACT 8090 CRITICAL AND CREATIVE THINKING GRADUATE PROJECT (3 credits)

The Graduate Project is an applied student project under the direction of a faculty advisor. In the project, the student will apply interdisciplinary knowledge and skills gained within the program to address a problem or to expand knowledge within or across disciplines. The product or artifact produced by the student may take a variety of forms.

Prerequisite(s)/Corequisite(s): Permission of faculty advisor and Graduate Program Committee Leadership (or its designee). Not open to non-degree graduate students.

CACT 8100 GLOBAL CINEMA (3 credits)

A critical and analytic study of foreign films focusing on overlapping global issues. This course supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking.

CACT 8106 CULTURAL PSYCHOLOGY (3 credits)

This course will provide an overview of the cultural, community and ecological factors that play a role in how people perceive their environments. The goal is to investigate the ways in which culture affects individual behaviors, attitudes and cognitions. It may be easy to tell that two cultures are different, but identifying exactly what is meant - and all that is encompassed - when speaking about "culture" can be much more difficult. Culture can include everything from gender constructs and race/ethnicity to the effects of new technologies. All of these aspects of culture affect individuals' psychological make-up and behavior. Although psychology has largely developed from a Western tradition, attention to research from non-Western perspectives will also be emphasized. This course supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 4530, PSYC 8536).

Prerequisite(s)/Corequisite(s): Enrollment in MA in Critical & Creative Thinking program or by permission of the instructor.

CACT 8110 GLOBAL-LOCAL: OPPORTUNITIES, BARRIERS, ENGAGEMENT (3 credits)

This course focuses on global cultural and social forces and how they interact to form nexuses of both opportunity and obstacle to constructive human engagement on a wide array of social issues. An overview of topics covered in the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. This course will provide students with the analytical tools, collaborative engagement skills, and applied problem-solving techniques that will help students succeed in this concentration and program. (Cross-listed with BLST 8110)

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8116 GEOGRAPHY OF ECONOMIC GLOBALIZATION (3 credits)

A study of the geography of economic globalization and the geography of the world economy. The major topics include the historical development of the world economy and globalization from the geographical perspective, trends in geography of global production, trade and investment, the most important factors and actors in the globalization processes and its geographic effects, geography of transnational corporations, case studies of economic geography of selected industries and service activities, effects of globalization on the developed and developing countries. This course also supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with GEOG 4550, GEOG 8556)

Prerequisite(s)/Corequisite(s): Graduate status.

CACT 8200 SEMINAR IN POLITICAL THEORY (3 credits)

This course introduces students to the history of political theory, from its origins in ancient Greece to its manifestations in contemporary thought. (Cross-listed with PSCI 8300)

Prerequisite(s)/Corequisite(s): Permission of graduate advisor.

CACT 8206 COMPARATIVE RELIGIOUS ETHICS (3 credits)

An introduction to historical and contemporary approaches to comparative religious ethics, with special focus on specific case studies as encountered in societies and religious communities across the globe. In addition to reading authors from a variety of perspectives (Aristotelians, natural law theorists, philosophers of law, pragmatists, theologians, and historians of religion), students will be introduced to special topics in the field, e.g., religion and public life, religion and law, syncretism, the secular/non-secular divide, etc. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 4200, RELI 8206)

CACT 8215 VALUES AND VIRTUES (3 credits)

This course explores advanced topics in ethics with particular emphasis on value theory and virtue ethics. Topics to be considered include the meaning and status of value claims, sources of value, intrinsic goods, agent-relative goods, practical reason, moral development, happiness, moral ambiguity, moral luck, the identification of virtues, and relationships of care, trust, and responsibility. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PHIL 3060)

CACT 8226 VIOLENT CONFLICTS, PEACEBUILDING, AND THE ETHICS OF INTERVENTION (3 credits)

This course is designed to familiarize the student with the nature of violent conflict, including terrorism, and a variety of the mechanisms for peacebuilding. The course will also explore human rights and the ethics of intervention. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 4220, RELI 8226)

CACT 8306 INTERNATIONAL DEVELOPMENT & SUSTAINABILITY (3 credits)

This course introduces students to different concepts of international development through the lens of sustainability. The course explores a broad range of activities related to international development, including international aid, trade, philanthropy, interventions in conflict, peacebuilding, public health, human rights, social justice, and the environment. (Cross-listed with PSCI 4290, PSCI 8296)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

CACT 8310 ECOLOGICAL WRITING AND ANALYSIS (3 credits)

This course provides students with the opportunity to develop expertise in a wide range of foundational works and key techniques of ecological writing and theory in English. By engaging mindfully with these works and techniques, students will develop advanced skills in ecologically oriented critical analysis and creative thinking. This course supports the Writing and Critical Reflection and the Health and the Environment concentrations in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENGL 8310)

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8316 OUR ENERGY FUTURE: SOCIETY, THE ENVIRONMENT AND SUSTAINABILITY (3 credits)

In this course, students will analyze our energy options including the environmental, economic, and ethical connections with a particular emphasis on electrical energy. The course doesn't prescribe a particular energy future but rather emphasizes development of the knowledge and skills to more effectively contribute to the conversation. To understand our future, the course begins with the present energy landscape and its historical underpinnings, then focuses on developing a student's ability to critically assess energy options by examining the associated implications, consequences, intent, origins, and bias. Students' own work, life, and academic experience are used in the course to underscore the individual relevance of these energy choices. The course includes the necessary science, but the greater emphasis is on the associated critical and creative thinking so that ultimately students can make informed, creative, sustainable energy choices. (Cross-listed with ENVN 4310, ENVN 8316)

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8326 ECOLOGICAL SUSTAINABILITY AND HUMAN HEALTH (3 credits)

The course will explore and develop the complex context of the systemic links among ecosystems and human health (and more broadly human well-being) using case studies including climate change, water quality, infectious diseases and agricultural production. Students will develop skills in critical thinking and applied research by studying biological connections between humans and ecosystems and how social, economic and cultural processes and practices mediate these connections. This course supports the Health and the Environment concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENVN 4320)

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8400 A HISTORY OF AMERICAN IMMIGRATION POLICIES AND LAWS (3 credits)

This seminar will examine the evolution of American immigration policies and laws from the colonial period to the present day. Where appropriate, the course will examine American immigration laws in a comparative context. It will pay particular attention to how state policies create and/or sustain inclusionary or exclusionary practices for members of different racial, ethnic, religious, or gender groups in American society.

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8410 IMMIGRATION, MIGRATION, AND DIASPORA: CRITICAL APPROACHES AND THEORIES OF MOVEMENT IN LITERATURE (3 credits)

This seminar in literature and some film analyzes the depictions in non-fiction and fiction of displacement as a result of immigration, migration, refugee status, or any other considered movement, intentional or imposed. It will focus largely on the U.S. experiences of those displaced from all locales. (Cross-listed with ENGL 8410)

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8416 LITERATURE/CULTURE: CENTRAL AMERICA AND THE CARIBBEAN 1898-2000 (3 credits)

"Literature/ Culture: Central America and the Caribbean 1898- 2000" studies major historical and socio-cultural events in Latin American history in the 20th century, through their articulation in literary texts, film, and other cultural expressions from Central America and the Hispanic Caribbean. (Cross-listed with SPAN 4150, SPAN 8156)

CACT 8420 MEXICO AND THE U.S. BORDERLANDS: TWO HISTORIES, ONE DESTINY (3 credits)

Exploration of U.S.-Mexico Borderlands history and its pathways to current developments. It reviews borderland encounters, miscegenation, and wars between Indigenous groups, Europeans, North Americans, and Mexicans. It looks at the history of the drafting of the imaginary U.S.-Mexico borderline and follows its development until the construction of a wall to separate an undividable socio-cultural space. The course integrates a comparative conceptual approach to empires, nation-building, territorial expansion, identity formation, code-mixed English-Spanish uses, and state sovereignty.

CACT 8430 INTERNATIONAL MIGRATION, DEVELOPMENT AND CITIZENSHIP (3 credits)

The course allows students to gain an understanding of the forces driving contemporary world migration, the policies and practices of development expelling or attracting migrants from and to different parts of the world, and migrants' relative success in their quest for belonging and citizenship in their host communities. This course supports the International Migration, Development and Citizenship concentration in the Master of Arts in Critical and Creative Thinking.

CACT 8500 COMPLEX ORGANIZATIONS (3 credits)

This graduate seminar provides an overview focused on the understanding and analysis of intricate internal and external organizational forces such as organizational bureaucracy, organizational culture, autonomy and control systems, which affect performance of organizational members as well as influence organizational survival. (Cross-listed with SOC 8500)

Prerequisite(s)/Corequisite(s): Graduate enrollment or permission of class instructor.

CACT 8506 CREATIVITY AND INNOVATION IN ORGANIZATIONS (3 credits)

To provide a discussion of the antecedents of individual and organizational creativity, including measurement, models, characteristics of the individual and the environment that facilitate creativity and innovation in an organizational setting. Students in this course will be able to understand the research literature related to creativity and innovation and apply the findings to improve critical and creative thinking, implementation of creative ideas, and development of creative teams and organizations. This course supports the Organizational Science and Leadership concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 4650, PSYC 8656)

CACT 8510 SEMINAR IN LEADERSHIP (3 credits)

This course introduces students to classical and contemporary scholarship on leadership theory, research, and application. Students gain a foundation in models of leadership, assess their own leadership styles, and learn to integrate what they learn in corporate, governmental, non-profit, or community organizations. (Cross-listed with PSCI 8120)

Prerequisite(s)/Corequisite(s): Permission of graduate adviser.

CACT 8520 POSITIVE ORGANIZATIONAL PSYCHOLOGY AND LEADERSHIP (3 credits)

This course is a graduate seminar on organizational psychology and leadership that focuses on the understanding and critical analysis of theory and practice pertaining to individual functioning at work. Positive organizational psychology theories and practices will provide the overarching framework in understanding potential solutions to challenges and problems facing leaders and their employees. (Cross-listed with PSYC 9421).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

CACT 8530 PERSONNEL PSYCHOLOGY AND LEADERSHIP (3 credits)

This course provides an overview of personnel psychology from a leadership perspective. Topics include methodology, employee selection, performance appraisal, organizational attitudes and behavior, motivation, and leadership style.

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor

CACT 8610 PROFESSIONAL AND TECHNICAL WRITING (3 credits)

This course will introduce students to the theory, research, and practices of professional and technical writing. Through readings, discussions, and assignments, students will gain an understanding of the types and circumstances of communication challenges encountered in the workplace. The course will also consider the roles of persuasion and ethics in written communication. (Cross-listed with ENGL 8610)

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8630 DIGITAL RHETORIC (3 credits)

This course provides students with the opportunity to develop expertise in the theory and practice of digital rhetoric by considering technology's deep impact on how we define and engage in writing. Students examine contemporary writing practices as part of a rich rhetorical tradition while they design and create effective multimodal compositions and analyze foundational works in digital rhetoric. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENGL 8630)

Prerequisite(s)/Corequisite(s): Graduate standing.

CACT 8640 CREATIVE NONFICTION IN DIGITAL ENVIRONMENTS (3 credits)

Students in this course will study creative nonfiction in digital environments, analyze rhetorical situations created in digital environments, and create individual creative nonfiction blogs-which might include, in addition to other modalities, sounds, animations, and hypertext. The course will also focus on the study and analysis of craft-elements of creative nonfiction: narrative persona, tone, rhythm and style, scenic construction, among others. Students taking this course will learn to read with interpretative and analytical proficiency a broad range of creative nonfiction in digital environments. (Cross-listed with ENGL 8640).

Prerequisite(s)/Corequisite(s): Graduate standing

CACT 8650 WRITING ACROSS DIFFERENCES: RHETORICAL THEORY FOR PERSUASION AND PUBLIC ADVOCACY (3 credits)

This course provides students a theoretical foundation for understanding how language is used in various types of discourses and texts as a means of convincing others of a given viewpoint or idea. Students will apply this theory to real-world writing scenarios in their scholarly areas of interest, to advocacy and social issues movements, or to address workplace needs and goals. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENGL 8650)

Prerequisite(s)/Corequisite(s): Graduate standing.

Cybersecurity (CYBR)

CYBR 8000 CENTER OF ACADEMIC EXCELLENCE-CYBER OPERATIONS COMPLETION CERTIFICATE (0 credits)

This course is utilized to provide a specific designation for students that have completed the Center of Academic Excellence - Cyber Operations coursework. It is a zero credit hour class used to designate the completion of this focus area in the cybersecurity curriculum.

Prerequisite(s)/Corequisite(s): Instructor Permission. The program committee will work with the UG advisors to ascertain that the student has fulfilled all requirements for this designation-if he/she has or will within the last semester, they will be allowed to register for this class.

CYBR 8080 SPECIAL TOPICS IN INFORMATION ASSURANCE (1-6 credits)

The course provides a format for exploring advanced research areas for graduate students in Information Assurance and related fields. Specific topics vary, in keeping with research interests of faculty and students. Examples include applied data mining, mobile security, web services and applications, vulnerability assessments, cloud computing security, and other issues in Information Assurance research.

Prerequisite(s)/Corequisite(s): Instructor Permission.

CYBR 8366 FOUNDATIONS OF CYBERSECURITY (3 credits)

Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 4360, CSCI 8366)

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CYBR 8386 COMPUTER AND NETWORK FORENSICS (3 credits)

Computer forensics involves the preservation, identification, extraction and documentation of computer evidence stored on a computer. This course takes a technical, legal, and practical approach to the study and practice of incident response, computer forensics, and network forensics. Topics include legal and ethical implications, duplication and data recovery, steganography, network forensics, and tools and techniques for investigating computer intrusions. This course is intended as a second course in information assurance for undergraduate students as well as other qualified students. It is also intended as a foundation course for graduate digital forensics studies.

Prerequisite(s)/Corequisite(s): CYBR 1100, CIST 3600, CSCI 3500 or ISQA 3400, CYBR 3350 or CYBR 3370; or instructor permission.

CYBR 8396 MOBILE DEVICE FORENSICS (3 credits)

Mobile device forensics is the science of recovering digital evidence from a mobile device under forensically sound conditions using accepted methods. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a mobile device forensics investigation. Topics include: an introduction to digital and mobile device forensics, mobile forensics standards, acquisition methods (manual, logical, physical and provider-side), Android and iOS filesystem analysis, decoding approaches, application data analysis, and report writing. Students will be required to perform several investigations in a controlled lab environment, including acquiring forensically sound evidence and analyzing these using industry standard tools. (Cross-listed with CYBR 4390).

CYBR 8410 DISTRIBUTED SYSTEMS AND NETWORK SECURITY (3 credits)

The course aims at understanding the issues surrounding data security, integrity, confidentiality and availability in distributed systems. Further, we will discuss various network security issues, threats that exist and strategies to mitigate them. This course will cover topics in cryptography, public key infrastructure, authentication, hashing, digital signatures, ARP protection, IP and IPSEC, IP Tables, SSL/TLS, firewalls, etc. (Cross-listed with CSCI 8410)

Prerequisite(s)/Corequisite(s): IASC 8366 or equivalent(s); or instructor permission. Not open to non-degree graduate students.

CYBR 8420 SOFTWARE ASSURANCE (3 credits)

Software assurance is a reasoned, auditable argument created to support the belief that the software will operate as expected. This course is an intersection of knowledge areas necessary to perform engineering activities or aspects of activities relevant for promoting software assurance. This course takes on a software development lifecycle perspective for the prevention of flaws. (Cross-listed with CSCI 8420)

Prerequisite(s)/Corequisite(s): CSCI 4830 or CSCI 8836 OR by permission of the Instructor. Not open to non-degree graduate students.

CYBR 8436 QUANTUM COMPUTING AND CRYPTOGRAPHY (3 credits)

The course builds an understanding of exciting concepts behind quantum computing and quantum cryptography. In doing so it will introduce the principles of qubits, superposition, entanglement, teleportation, measurement, quantum error correction, quantum algorithms such as quantum Fourier transformation, Shor's algorithm and Grover's algorithm, quantum key exchange, quantum encryption, and secure quantum channels that are built using these principles. It will also discuss advantages of quantum computing and cryptography over classical computing and cryptography and limitations thereof. The students will come out with a working understanding of the field of quantum computing and quantum cryptography. During the course, students will also implement several of the quantum algorithms. (Cross-listed with CYBR 4430, CSCI 4430).

CYBR 8440 SECURE SYSTEMS ENGINEERING (3 credits)

This course takes a global risk-based view of the process of defining, verifying, validating and continuously monitoring secure information systems. The course will investigate a number of secure system solutions, starting with the definition of the system security needs, and tracing through methods of verification and validation of security controls, as well as ways to continuously monitor the corresponding assurances. (Cross-listed with CSCI 8440)

Prerequisite(s)/Corequisite(s): CSCI 8366 or IASC 8366.

CYBR 8446 INDUSTRIAL CONTROL SYSTEM SECURITY (3 credits)

The objective of this course is to research vulnerabilities into, and provide guidance for securing, industrial control systems (ICS). ICS is a general term that encompasses several types of control systems, including supervisory control and data acquisition (SCADA) systems, distributed control systems (DCS), and other control system items such as Programmable Logic Controllers (PLC). The student will learn to identify network and device vulnerabilities and potential countermeasures to these weaknesses. (Cross-listed with CYBR 4440)

Prerequisite(s)/Corequisite(s): CSCI 3550.

CYBR 8450 APPLIED CRYPTOGRAPHY (3 credits)

In this course we will implement stream and block ciphers in different modes, public key algorithms, hash functions, message authentication codes, random number generators, etc. Along the way we will also explore weaknesses of these algorithms and implement well-known attacks on them. We will also solve crypto challenges and puzzles. This is a hand-on course and will require programming proficiency. The preferred language will be Python; you can, however, use other object oriented languages.

Prerequisite(s)/Corequisite(s): CSCI 8410 or CYBR 8410

CYBR 8456 HOST-BASED VULNERABILITY DISCOVERY (3 credits)

The class will cover security issues at an implementation and hardware level. The students will learn assembly language and the use of a reverse assembler and debugger. This will allow the student to analyze various "packing" algorithms for computer viruses, the viruses themselves, operating system "hooking", "fuzzing", and other machine code, host-based exploits. The class will be using both Windows and Linux as operating systems. (Cross-listed with CYBR 4450.)

Prerequisite(s)/Corequisite(s): CSCI 3710 and CYBR 2250.

CYBR 8466 NETWORK-BASED VULNERABILITY DISCOVERY (3 credits)

The course is an advanced class in which the students learn various techniques for testing for and identifying security flaws in network software and web applications. Internet technologies such as HTTP, DNS, DHCP, and others are examined in the context of cyber security. Students are expected to participate in numerous hands-on experiments related to Information Assurance with respect to web technologies. (Cross-listed with CYBR 4460)

Prerequisite(s)/Corequisite(s): CSCI 3550

CYBR 8470 SECURE WEB APPLICATION DEVELOPMENT (3 credits)

Web applications are pervasive fixtures of 21st century culture. Web application security is an inclusive, amorphous, term that spans application level security, i.e. ensuring high level code cannot be exploited, server level security, i.e. ensuring server resources such as databases and file systems cannot be exploited, and network security, i.e. ensuring unauthorized parties cannot access a server or tamper with user sessions. This course cross-cuts the web application security concepts across the different categories above and takes a heavily hands-on approach to introduce students to the world of secure web app. design and development.

Prerequisite(s)/Corequisite(s): Instructor Permission

CYBR 8480 SECURE MOBILE DEVELOPMENT (3 credits)

Mobile devices are already pervasive fixtures of 21st century culture and increasingly the internet of things (IoT) and wearables are proliferating throughout the world. As this proliferation occurs, numerous vendor-centric and third-party mobile, wearable, and internet of things apps are being created by developers and downloaded by end-users with little to no thought about the security and privacy of the information used and collected by the apps. This course examines this issue from a development point of view to a) introduce mobile/wearable/IoT architectures and technologies, b) increase student application development competencies with these technologies, and c) integrate secure design principles into the ideation, design, and testing phases during development.

Prerequisite(s)/Corequisite(s): CYBR 8470 or Instructor Permission

CYBR 8546 COMPUTER SECURITY MANAGEMENT (3 credits)

The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST 4540, CYBR 4540, ISQA 8546)

Prerequisite(s)/Corequisite(s): IASC 4360 or permission of the instructor.

CYBR 8570 INFORMATION SECURITY POLICY AND ETHICS (3 credits)

The course will cover the development and need for information security policies, issues regarding privacy, and the application of computer ethics. (Cross-listed with ISQA 8570)

Prerequisite(s)/Corequisite(s): CIST 2100 or BSAD 8030, or permission of instructor.

CYBR 8900 INDEPENDENT STUDY IN INFORMATION ASSURANCE (1-3 credits)

The course provides a format for exploring advanced research areas for graduate students in Information Assurance and related fields. The class is designed for students that would like to explore specific Information Assurance topics at a greater depth, or topics that are not currently a part of the IA curriculum. The class is proposed and organized by the student, with participating faculty mentoring.

Prerequisite(s)/Corequisite(s): Instructor Permission

CYBR 8910 INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the MS in CyberSecurity (CYBR) program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s)/Corequisite(s): Students must have completed a minimum of 12 credit hours towards the MS in CYBR program. Instructor permission is required to register. Not open to non-degree graduate students.

CYBR 8950 GRADUATE CAPSTONE IN INFORMATION ASSURANCE (3 credits)

This is the graduate capstone course where students extend and apply their knowledge in defining, implementing, and assessing secure information systems. Students will demonstrate their ability to specify, apply, and assess different types of countermeasures at different points in the enterprise with a special focus on system boundaries. Students will complete and defend a Certification and Accreditation package. This course is intended for graduate students in the MS in IA degree program, coursework option, that are close to graduation (see prerequisites). This course replaces the MS in IA comprehensive examination requirement.

Prerequisite(s)/Corequisite(s): CYBR 8366, CYBR 8410, and CYBR 8456 and concentration area (systems or management and policy). Students must have 6 credit hours or less left in the program.

CYBR 8986 SPECIAL TOPICS IN INFORMATION ASSURANCE (1-3 credits)

The course provides a format for exploring advanced research areas for undergraduate students in Information Assurance and related fields. Specific topics vary, in keeping with research interests of faculty and students. Examples include applied data mining, mobile security, web services and applications, vulnerability assessments, cloud computing security, and other issues in Information Assurance research. (Cross-listed with CYBR 4980)

Prerequisite(s)/Corequisite(s): Instructor Permission.

CYBR 8990 THESIS IN INFORMATION ASSURANCE (1-6 credits)

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.

Prerequisite(s)/Corequisite(s): Instructor Permission.

CYBR 9460 SECURITY OF EMBEDDED SYSTEMS (3 credits)

An embedded system is some combination of computer hardware and software, either fixed in capability or programmable, which is specifically designed for a particular function. Industrial machines, automobile electronic systems, medical equipment, cameras, household appliances, airplanes, and vending machines, are among the myriad possible hosts of an embedded system. This course covers forward-looking topics in the security of embedded systems, including topics such as logic circuit obfuscation, hardware security methods, network setup exploits, and other "lower level" computer architecture subjects with respect to cybersecurity.

Prerequisite(s)/Corequisite(s): CYBR 8366 - Foundations of Information Assurance

Economics (ECON)

ECON 8010 SEMINAR IN PUBLIC FINANCE (3 credits)

This course is designed to develop the tools of applied welfare economics and to use these tools to evaluate the expenditure and tax decisions of governments. The structure, effects and reform of the U.S. individual and corporate income taxes, social security and healthcare system will be emphasized. Government debt and deficits will also be discussed.

Prerequisite(s)/Corequisite(s): ECON 3200 or ECON 8210 or BSAD 8100 or permission

ECON 8020 ENVIRONMENTAL ECONOMICS AND MANAGEMENT (3 credits)

This course covers topics related to environmental economics and policy, with an emphasis on comparative policy analysis and business strategies towards the environment. (Cross-listed with BSAD 8020).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220 or BSAD 8180, or permission of the instructor. Not open to non-degree graduate students.

ECON 8050 ECONOMIC EDUCATION (3 credits)

A study and examination of economic principles and how they can be related to the teacher's classroom presentation. This course is designed to furnish the k-12 teacher with sufficient background and understanding to aid in the recognition of economic issues and the teaching of economic concepts and principles.

Prerequisite(s)/Corequisite(s): No previous course work in economics. Not open to Economics majors.

ECON 8200 SEMINAR IN MICRO ECONOMIC THEORY (3 credits)

The course covers major topics in microeconomic theory. The major topics covered are the theory of consumer behavior, theory of production and cost, theory of the firm, pure exchange economy, general equilibrium, and welfare theory.

Prerequisite(s)/Corequisite(s): ECON 3200, ECON 3220 and ECON 8306 or permission.

ECON 8210 MANAGERIAL ECONOMICS (3 credits)

Microeconomics for graduate students of business. Economic analysis of the business firm and its environments, with emphasis on market structure, production possibilities and cost factors. Additional consideration is given to the theory of the firm under conditions of uncertainty. (Cross-listed with BSAD 8100).

Prerequisite(s)/Corequisite(s): Graduate student in economics and ECON 2200 or equivalent.

ECON 8216 INDUSTRIAL ORGANIZATION (3 credits)

In this class we will examine why firms and industries behave the way that they do. We will explore why some industries face intense competition while others enjoy large profits, why some industries offer only bundles, and why some firms buy up their supply chain when others do not. This theoretical course will illuminate un-theoretical implications to your life and future business ventures. This course will use your economic knowledge, a bit of psychology (behavioral economics) and game theory to answer questions like "Why does everyone hate the cable company?" and "Why are CEOs given so many stock options?" (Cross-listed with ECON 4210).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 8220 SEMINAR IN MACRO THEORY (3 credits)

This course traces the development of macroeconomic theory from the classical point of view to current schools of thought. Keynesian, neo-Keynesian and neo-classical models are developed.

Prerequisite(s)/Corequisite(s): ECON 3200 or ECON 8210 or BSAD 8100, ECON 3220, and ECON 8306, or permission.

ECON 8230 BUSINESS CONDITIONS ANALYSIS (3 credits)

This course is concerned with the statistical measurement and evaluation of general business conditions, as well as the adaptation of business policies to changing business conditions. Emphasis is placed upon the practical application of statistical analysis techniques to business situations within the framework of the aggregate economy.

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220.

ECON 8290 RESEARCH METHODS IN ECONOMICS AND BUSINESS (3 credits)

Covers the methodology of economics: choosing a research topic, literature search tools, data source identification, data summary techniques, basic statistical data analysis using statistical packages, and clear economics writing. The student will become familiar with these techniques through text materials, journal studies, and completion of an empirical economics paper.

Prerequisite(s)/Corequisite(s): ECON 3200, ECON 3220, or equivalents, or permission of the instructor. Not open to non-degree graduate students.

ECON 8300 ECONOMETRICS (3 credits)

The study of the underlying assumptions, techniques and applications of single and multiple equation regression analysis in economics.

Prerequisite(s)/Corequisite(s): Basic Statistics, ECON 8306/ECON 4300, or permission. Not open to non-degree graduate students.

ECON 8306 QUANTITATIVE APPLICATIONS IN ECONOMICS AND BUSINESS (3 credits)

The study and application of modern quantitative techniques to problem-solving in economics and business. It is designed to help the student to translate verbal arguments in economics and business into their mathematical equivalents, to improve analytical skills, and to attain proficiency in marginal analysis, equilibrium analysis, static optimization, and comparative statics analysis. It covers topics such as exponential and logarithmic functions and their applications, linear algebra and its applications, derivatives and their applications, maximization of functions with one variable and multi variables, maximization with non negativity constraints, and integral calculus and its applications in economics and business. (Cross-listed with ECON 4300).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, or BSAD 8180.

ECON 8310 BUSINESS FORECASTING (3 credits)

The course will cover forecasting tools and applications applied to business settings. We will cover traditional Econometric forecasting methods in the first half of the class. In the second half of the course, we will focus on models in predictive analytics and machine learning, since these models are quickly becoming critical tools for forecasters in many settings. The course will include lecture and lab time, and labs will be focused on teaching students how to implement the models discussed in lectures. (Cross-listed with BSAD 8080).

Prerequisite(s)/Corequisite(s): ECON 8320 (or equivalent programming experience) AND ECON 8300 (or equivalent multivariate regression analysis coursework) or permission of instructor. Not open to non-degree graduate students.

ECON 8316 BUSINESS INTELLIGENCE AND REPORTING (3 credits)

The course will teach students to use state-of-the-art Business Intelligence (BI) software to generate reports and information from data. BI software is used to inform decision-making in industries from transportation to medicine, from marketing to government, and is facilitated by rapidly increasing access to data in all industries. Students will learn to employ best practices in visualization and verbal communication as they are trained to create valuable insights from data and convey those insights to stakeholders. Additionally, the course will aid students in preparing for certification in the use of state-of-the-art BI software. (Cross-listed with ECON 4350).

Prerequisite(s)/Corequisite(s): ECON 3310 OR ECON 8320 (or concurrent enrollment) AND BSAD 2130 (or equivalent) OR Instructor Approval

ECON 8320 TOOLS FOR DATA ANALYSIS (3 credits)

The course will cover basic principles of programming languages, as well as libraries useful in collecting, cleaning and analyzing data to answer research questions. The course will utilize basic Economic principles and Econometric methods as inspiration for assignments and projects throughout the duration of the course, and will do so in a way that is accessible to non-Economists. This course is intended to introduce the student to the Python programming language as a tool for conducting data analysis. While the course uses Python, the student should be able to move to other languages frequently used in data analysis using the principles taught in this course.

Prerequisite(s)/Corequisite(s): ECON 2200 or BSAD 8150 (or equivalent); BSAD 2130 or equivalent; or instructor approval.

ECON 8326 NATURAL RESOURCE ECONOMICS (3 credits)

This course introduces students to the economics and management of Earth's natural resources. We address questions such as: Are we running out of natural resources? Are we using resources in a sustainable fashion? What role do markets play in resource use? We will address issues related to fossil-based resources, minerals, fisheries, water, land, forests and other associated topics. The course covers the basic theoretical framework for understanding the optimal rate of resource use, identifies the factors that determine the actual rate of use, and considers and evaluates various public policy prescriptions. (Cross-listed with ECON 4320).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, BSAD 8150 or permission of instructor.

ECON 8330 DATA ANALYSIS FROM SCRATCH (3 credits)

Econometrics is routinely taught as an application class using a 'black box' like Stata or SAS to perform calculations. This class takes a different approach. Using the Python programming language, we build all estimators from scratch. Additionally, we introduce numerous non-parametric and simulation techniques. This approach to econometrics results in a stronger understanding of statistical assumptions and methods, a better understanding of when a method is appropriate, and stronger programming techniques. Furthermore, a deeper understanding of the underlying mechanics provides the student the ability to program custom procedures not already built into popular software packages.

Prerequisite(s)/Corequisite(s): A multivariate or regression analysis course such as ECON 8300, ISQA 9130 or STAT 8436, and a programming class such as ECON 8320 or equivalent programming experience; or instructor approval. Not open to non-degree graduate students.

ECON 8346 ECONOMICS OF TECHNOLOGY (3 credits)

The seminar discusses whether innovation is more driven by demand or supply forces, the optimal timing of adoption of new technology, whether new technology benefits workers and consumers, and whether government is successful at supporting promising new technology. (Cross-listed with ECON 4340).

Prerequisite(s)/Corequisite(s): ECON 2200 or BSAD 8180 or permission of the instructor.

ECON 8456 DOMESTIC MONETARY THEORY AND POLICY (3 credits)

The course will introduce students to topics in money and banking, financial institutions, markets, financial instruments, and monetary theory in order to enhance financial decision making and enable students to effectively analyze economic news in media such as the Wall Street Journal, The New York Times, Business Week, Barrons, The Economist, and other related business publications. This knowledge will enable students to formulate their own views about the current economic environment, government policies, and responses to economic environments. (Cross-listed with ECON 4450).

ECON 8576 ECONOMIC CONDITIONS ANALYSIS (3 credits)

This course teaches students how to conduct an economic analysis of, and produce an economic forecast for, a local economy such as a state, county, or metropolitan area. Students will learn where to find data, how to analyze that data, how to develop models with the data, and how to present the data in a clear, concise, and jargon-free manner. The final published report will be authored by the students registered in the course. All students will contribute equally to the final report. The instructor will ensure equal participation. (Cross-listed with ECON 4570).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, or Permission from the instructor

ECON 8600 HEALTH ECONOMICS (3 credits)

This course is designed to help students understand how the theories and models of economics can be applied to the study of health and health care. The examination of the markets (demand and supply) for health, health care and health insurance is stressed. In addition, the economic analytic tools such as microeconomic theories and economic evaluation methods also will be reviewed and introduced. The objective of this course is to equip students with the knowledge tools to examine and analyze the problems issues of health care from the perspective of economics.

Prerequisite(s)/Corequisite(s): ECON 2200 or equivalent.

ECON 8616 INTERNATIONAL TRADE (3 credits)

An analysis of the character of international economic relations. Subjects covered include the economic basis for international specialization and trade, the economic gains from trade, commercial policy, economic integration and economic growth. (Cross-listed with ECON 4610).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8626 INTERNATIONAL MONETARY ECONOMICS (3 credits)

An analysis of the international monetary system. Subjects covered include the balance of payments adjustment mechanism, alternative exchange rate systems, external effects of monetary and fiscal policy, foreign investments and international monetary reform. (Cross-listed with ECON 4620).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8666 INTERNATIONAL ECONOMIC DEVELOPMENT (3 credits)

This course introduces theories and application of economic development and growth, economic problems facing developing countries, analyzes domestic economic issues (e.g., per capita GDP, income distribution, population, unemployment, urbanization, education, fiscal policies, and financial policies), and international economic issues (e.g., trade, foreign investment, and foreign debt). Financial crises, debt crises, and economic recovery will be discussed. (Cross-listed with ECON 4660).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8736 ECONOMICS OF ENTREPRENEURSHIP (3 credits)

This course will review economic theories of entrepreneurship with special emphasis on Schumpeter's theory of creative destruction. The main focus of the seminar will be on the "high-level" entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 4730, BSAD 8736.)

Prerequisite(s)/Corequisite(s): ECON 2200 or permission of the instructor for all students.

ECON 8856 ECONOMICS OF URBAN AND REGIONAL DEVELOPMENT (3 credits)

This course will consider factors and trends in development at the global and national level but will focus primarily on economic development at the state, local, and regional levels in the United States. The focus of this course will be real world strategic planning for economic development. (Cross-listed with ECON 4850).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 8910 SPECIAL STUDIES IN ECONOMICS (1-3 credits)

(May be repeated up to 6) A series of special courses, each designed to focus on current major issues and developments in a specific area of economics or business, scheduled as a workshop or seminar according to purpose.

Prerequisite(s)/Corequisite(s): Graduate student in good standing and as indicated for specific workshop or seminar.

ECON 8916 SPECIAL TOPICS IN ECONOMICS (1-3 credits)

(May be repeated up to 6 hours) A series of special courses each designed to focus on current major topics and developments in a specific area of economics or business, scheduled as a workshop or seminar according to purpose. (Cross-listed with BSAD 8916, ECON 4910).

Prerequisite(s)/Corequisite(s): Graduate student in good standing or advanced undergraduate student and as indicated for specific workshop or seminar.

ECON 8920 INDEPENDENT STUDY (1-3 credits)

Guided independent study and research.

Prerequisite(s)/Corequisite(s): Graduate student in economics and permission of instructor.

ECON 8940 ECONOMIC INTERNSHIP (1-3 credits)

Guided internship in a firm or organization that makes use of, or extends, the student's skill in economics.

Prerequisite(s)/Corequisite(s): Completion of at least nine hours of graduate level economics and permission of instructor.

ECON 8990 THESIS (1-6 credits)

An independent research project, written under the supervision of a graduate adviser in the department of economics. Approval of the topic and the completed project by departmental committee is required.

Prerequisite(s)/Corequisite(s): Approval of the topic and the completed project by departmental committee is required.

Educational Leadership (EDL)

EDL 8000 SPECIAL STUDIES IN EDUCATIONAL LEADERSHIP (3 credits)

This course will provide candidates in educational leadership with the opportunities and experiences of in-depth study of a specialized area of practice and research in school leadership.

Prerequisite(s)/Corequisite(s): Admission to Graduate Studies or permission of instructor.

EDL 8010 INTRODUCTORY RESEARCH METHODS (3 credits)

The Introductory Research Methods course will introduce graduate degree candidates to foundational topics in quantitative, qualitative, and mixed methods research. Particular attention will be given to aligning evidence based literature frameworks with research methodology and data analysis techniques. The course will also prepare graduate students to generate ethically considered research topics and formally evaluate and present research findings in written form.

Prerequisite(s)/Corequisite(s): Graduate Standing

EDL 8020 EDUCATIONAL POLICY AND LEADERSHIP (1 credit)

This course explores the expanded federal and state presence in local school districts. Historical and political factors influencing the governance of today's schools are explored, as well as current trends and policy decisions.

Prerequisite(s)/Corequisite(s): Acceptance to Graduate Studies or department permission.

EDL 8030 INTRODUCTION TO EDUCATIONAL LEADERSHIP (3 credits)

This course is designed to introduce the beginning school leadership candidate to theories and practices of organization, motivation, leadership, and change processes, in order to develop an understanding of schools as complex organizations and the nature and challenges of leadership.

Prerequisite(s)/Corequisite(s): Admission to UNO Graduate Studies or department permission.

EDL 8050 SCHOOL-COMMUNITY CONNECTIONS (3 credits)

School leaders engage the external and internal communities in their buildings and districts. This course assists candidates in developing an understanding of school-community relations, practicing the skills of positive influence with education stakeholders, and refining the dispositions of responsible citizenship by connecting to diverse community needs.

Prerequisite(s)/Corequisite(s): Admission to Graduate Studies or department permission.

EDL 8100 INDEPENDENT STUDY IN EDUCATIONAL LEADERSHIP (1-6 credits)

This course is designed to allow graduate candidates in educational leadership to pursue independent study of a topic under the direction and guidance of a faculty member. Topics studied and the nature of the learning activities are mutually agreed upon by the candidate and instructor. This course will prepare school leaders as practitioners and researchers who can meet the dynamic challenges of education.

Prerequisite(s)/Corequisite(s): Admittance to the doctoral program in educational administration/leadership, or instructor permission.

EDL 8310 ISSUES IN TECHNOLOGY FOR SCHOOL LEADERS (1 credit)

This class addresses the unique needs that those in administrative positions encounter in the constantly changing world of technology. Topics include: managing sustainability and obsolescence; ethics and policies for faculty, staff and students-including prevention of cyberbullying; technology for teaching and learning; and technology for business and accountability.

EDL 8320 ESSENTIALS OF DATA ANALYSIS AND PRESENTATION (1 credit)

This course is designed to give graduate students a foundational understanding of how information is processed, interpreted, and presented to provide school leaders with the ability to make data informed decisions. Major topics include how usable information can be extracted from tests and surveys, how probability is used to make claims from data sets, how charts and tables can be most effectively leveraged to understand the full scope of data sets, and how to publish results.

EDL 8340 ISSUES IN IDENTITY, CULTURE, AND POWER (1 credit)

This class promotes personal reflection and content awareness needed for educational leaders to promote racial equity in education. Topics include structural racism, bias, historical context of educational policy, and a call to action for racial justice in education.

EDL 8350 ISSUES IN MANAGEMENT FOR SCHOOL LEADERS (1 credit)

This class addresses the unique needs that those in educational leadership positions encounter when determining resource management of non-instructional systems. Topics include resource acquisition and management, using resources effectively, and oversight of facilities.

EDL 8400 ELEMENTARY SCHOOL INTERNSHIP IN EDUCATIONAL LEADERSHIP (3 credits)

Elementary internship is designed to provide practice in elementary and general and special education administration and supervision according to the interests and needs of the candidates. Candidates will work with practicing administrators and a university supervisor.

Prerequisite(s)/Corequisite(s): Candidates must be enrolled in the Master's and/or the Building Administration Endorsement program in Educational Leadership and be in their last year of the program or have department permission. Permit to enroll from department is required.

EDL 8410 SECONDARY SCHOOL INTERNSHIP IN EDUCATIONAL LEADERSHIP (3 credits)

Secondary school internship is designed to provide practice in 7-12 and general and special education administration and supervision according to the interests and needs of the candidates. Candidates will work with practicing administrators and a university supervisor.

Prerequisite(s)/Corequisite(s): Candidates must be enrolled in the Master's and/or the School Administration Endorsement program in Educational Leadership and be in their last year of the program or have department permission. Permit to enroll from department is required.

EDL 8470 ADMINISTRATION AND SUPERVISION IN SCHOOLS (3 credits)

This course is designed to prepare educational leaders as dedicated practitioners, reflective scholars, and responsible citizens as they relate to the administration of a school site and system. This course is specifically designed to address the problems, issues, and opportunities of building level leadership.

Prerequisite(s)/Corequisite(s): Admission to Graduate College. Not open to non-degree graduate students.

EDL 8490 INSTRUCTIONAL LEADERSHIP (3 credits)

School leaders serve as instructional leaders in their buildings and districts. This course assists candidates in developing knowledge and practicing skills necessary to lead educators and schools in the areas of instruction and curriculum.

Prerequisite(s)/Corequisite(s): Admission to the Graduate College

EDL 8550 SCHOOL BUSINESS MANAGEMENT (3 credits)

This course will analyze the functions of school business management: budgetary processes, financial accounting, auditing and reporting, management of funds, purchasing procedures, transportation, food services, insurance and inventory control.

Prerequisite(s)/Corequisite(s): EDAD8030 (previously or concurrently). Not open to non-degree graduate students.

EDL 8560 SCHOOL FINANCE (1 credit)

This course provides a study of the current sources of school financing: local, state, and federal. In addition to a review of the history of school finance, emphasis is placed on current problems in school finance, especially those related to overseeing the financial aspects of a school district.

Prerequisite(s)/Corequisite(s): EDL 8350 or permission of the instructor.

EDL 8596 FOUNDATIONS OF LEADERSHIP DEVELOPMENT (3 credits)

Leadership development is an educational outcome for college students, and at UNO, is strongly encouraged. This course will expose students to foundational leadership theories and challenge them to explore personal and social competencies associated with effective collaboration and leadership. (Cross-listed with EDL 4590).

EDL 8620 SCHOOL PLANTS AND EQUIPMENT (3 credits)

This course is designed for aspiring superintendents and central office leaders. It will prepare school leaders to be proactive in developing specifications for school buildings that will enhance educational processes. It includes planning procedures for new and remodeled buildings, soliciting support for projects, site selection, design, maintenance and operations of school buildings.

Prerequisite(s)/Corequisite(s): Admission to Graduate College

EDL 8710 INTERPERSONAL RELATIONSHIPS IN EDUCATIONAL LEADERSHIP (3 credits)

This course deals with the establishment of quality interpersonal and group relations among adults in school settings. Candidates will develop an increased awareness of their own and others' perspectives and will develop dispositions and skills that will allow them to work more productively. This course does not meet the requirements of Nebraska law LB 250 (Multi-Cultural and Interpersonal Relations).

Prerequisite(s)/Corequisite(s): Admission to the Graduate Studies and Department of Educational Leadership or department permission.

EDL 8720 MULTICULTURAL AND NON-SEXIST AWARENESS (1 credit)

This course is designed for certificated educational employees, both teachers and administrators, seeking renewal of Nebraska certification under Nebraska LB 250 (Multi-Cultural and Interpersonal Relations). This course meets the requirements of Nebraska law LB 250 (Multi-Cultural and Interpersonal Relations). The purpose of the course is to develop awareness of cultural diversity in American society and to develop skills to effectively meet the needs of students, parents, and school community members.

Prerequisite(s)/Corequisite(s): Graduate level. Permit of department required.

EDL 8730 COMMUNICATION AND CULTURE IN EDUCATIONAL HUMAN RESOURCES (1 credit)

This course focuses upon the interpersonal and professional knowledge, skills, and dispositions of human resources issues and functions for effective leadership in education.

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

EDL 8740 PROFESSIONAL DEVELOPMENT FOR SCHOOL LEADERSHIP (1 credit)

This course addresses strategies and models of planning, implementing, and evaluating adult and organizational learning for effective leadership in education.

Prerequisite(s)/Corequisite(s): Admittance to Graduate College. Not open to non-degree graduate students.

EDL 8750 FUNDAMENTALS OF HUMAN RESOURCES IN EDUCATION (1 credit)

This course examines the frameworks that schools utilize to recruit, select, place, and support faculty and staff. School leaders need human resources skills and knowledge in order to effectively implement strategies and policies related to staff management, motivation, and evaluation.

Prerequisite(s)/Corequisite(s): Admission to Graduate College. Not open to non-degree graduate students.

EDL 8780 EDUCATIONAL LEADERSHIP SUMMIT (2 credits)

The leadership summit in educational leadership synthesizes the program of school administration, supervision, and management in a manner that can be professionally presented and clearly articulated.

Prerequisite(s)/Corequisite(s): Twenty four credit hours must be completed or taken concurrently in educational leadership. Department permit to enroll is required. Not open to non-degree graduate students.

EDL 8800 SCHOOL LEADERSHIP ACADEMY (3 credits)

A leadership course designed for current and aspiring school administrators and teacher-leaders. The course content will relate administrative theory to operations of schools drawing on research, models, and various organizational structures. This course is specifically designed to bridge leadership and management theory to the practical operations of schools.

Prerequisite(s)/Corequisite(s): Advisor's approval.

EDL 8810 URBAN SCHOOL LEADERSHIP (3 credits)

This course is designed to acquaint candidates with urban concerns and issues which most significantly affect the administration of schools in and around metropolitan areas.

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

EDL 8900 SPECIAL EDUCATION LAW (3 credits)

The purpose of this course is to research and explore legal and policy issues affecting special education within our schools. Case law will be examined to ensure effective special education programs for children and youth with disabilities. (Cross-listed with SPED 8900).

Prerequisite(s)/Corequisite(s): Graduate Standing. Not open to non-degree graduate students.

EDL 9000 SEMINAR IN RESEARCH DESIGN (3 credits)

This course will provide support and assistance concerning principles of research design as related to topics in educational leadership. Instruction as to appropriate format, style, and content of educational research as well as designing methodology for dissertation proposal will be emphasized.

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

EDL 9610 or permission from instructor. Not open to non-degree students.

EDL 9010 ADVANCED SEMINAR IN EDUCATIONAL RESEARCH (3 credits)

This seminar will provide support for doctoral candidates in applying skills of educational research to the creation of a successful dissertation.

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

EDL 9000 or permission from instructor. Not open to non-degree graduate students.

EDL 9020 CONCEPTS AND CONTEXTS FOR LEADERSHIP IN SCHOOL LIBRARIES (3 credits)

Concepts and Context for School Libraries will introduce candidates to the broad landscape of school librarianship and its relationship to the greater library and information profession.

Prerequisite(s)/Corequisite(s): Admission to the University of Nebraska Doctoral Program in Educational Administration or other University of Nebraska doctoral program in education, and instructor permission. Not open to non-degree graduate students.

EDL 9110 FIELD PROJECT IN EDUCATIONAL ADMINISTRATION (1-3 credits)

Administrative practitioners will study a current or anticipated educational problem using research techniques. Candidates will review a change process to their school or district that has recently been implemented or is under consideration for future implementation as the capstone work for the Educational Specialist degree.

Prerequisite(s)/Corequisite(s): Admittance to the Ed.S. program and completion of EDL 9200. Candidates are encouraged, but not required, to utilize the project from EDL 9200 for the focus of the field project. Not open to non-degree students.

EDL 9200 ADVANCED PRACTICUM IN EDUCATIONAL ADMINISTRATION (3 credits)

This course is an independent, advanced practicum course meant to help practitioners prepare to be reflective scholars. It builds upon theory and practice of educational leadership and provides a guided experience.

Prerequisite(s)/Corequisite(s): Admittance to the Ed.S. program and completion of EDL 9200. Candidates are encouraged, but not required, to utilize the project from EDL 9200 for the focus of the field project. Not open to non-degree students.

EDL 9310 ISSUES IN STRATEGIC PLANNING FOR SCHOOL LEADERS (1 credit)

Strategic planning is critical to the health, growth and sustainability of a school district. The process provides an opportunity to prioritize goals, actions, time and resources on key initiative. This course will examine the strategic planning processes used by leaders to guide educational change and improvement.

EDL 9320 LEGAL ISSUES IN SPECIAL EDUCATION (1 credit)

School Leaders have an obligation to know the rights of students with disabilities and the laws and policies that protect those rights. This course will focus on the mandatory requirements of Individuals with Disabilities Education Improvement Act (IDEIA) of 2004; the Americans with Disabilities Act (ADA) of 1990, amended in 2008 and the Rehabilitation Act of 1973, Section 504 along with program mandates and the case law that protects these students.

EDL 9330 ISSUES IN SCHOOL OPERATIONS (1 credit)

This course addresses leadership issues that current and prospective school leaders will find applicable as they earn certification as a superintendent, principal, curriculum supervisor, or special education leader. This one-hour course will provide knowledge and skills educational leaders will need to effectively and efficiently lead a public or private school building, program, or school district. Course modules will engage candidates in developing a leadership entry/transition plan, a leadership succession plan, and a leadership succession board policy and administrative procedures.

EDL 9340 CONTEMPORARY ISSUES IN SCHOOL LAW (1 credit)

This course is concerned with the most recent legal challenges and judicial decisions that are impacting schools. Topics include the most recent decisions from all levels of the courts up to the Supreme Court. School leaders will help prevent litigation by understanding the implications of current cases for the purpose of work with students, staff, faculty and community members without infringing upon their due process rights. School leaders may use the current decisions to update student and faculty handbooks and understand the critical need for guidance by school district legal counsel.

Prerequisite(s)/Corequisite(s): School Law 9540 Legal Issues in Special Education Law 8920 or Instructor permission

EDL 9500 FRAMEWORKS OF BEST PRACTICE: LEADERSHIP IN SCHOOL LIBRARIES (3 credits)

This class will explore best practice in school libraries using the framework of current national standards for school librarianship preparation programs. Major areas for exploration include but are not limited to teaching for learning, literacy and reading, information and access, advocacy and leadership, and program management and administration.

Prerequisite(s)/Corequisite(s): Admission to the University of Nebraska Joint Doctoral Program in Educational Administration pursuing studies in educational leadership with an emphasis in school librarianship or with instructor permission. Not open to non-degree graduate students.

EDL 9510 SEMINAR IN CULTURE AND CONTEXT OF SCHOOLING (3 credits)

An advanced seminar designed to enhance understanding of the cultural and social forces, trends, and issues that influence the delivery and effectiveness of schooling.

Prerequisite(s)/Corequisite(s): Admission to the Department of Educational Administration and Supervision and the Ed.D. Program. Not open to non-degree graduate students.

EDL 9520 ACHIEVING SCHOOL EXCELLENCE (3 credits)

An advanced seminar on the pursuit of improvement in education and the role of administration in guiding positive school change through influence, persuasion, power, ethics, and research.

Prerequisite(s)/Corequisite(s): Admission to the University of Nebraska Joint Doctoral Degree program or admission to another University of Nebraska doctoral program. Not open to non-degree graduate students.

EDL 9530 PARADIGMS AND PRACTICES OF SCHOOLING (3 credits)

This is an advanced seminar to explore leadership and supervisory practices. Particular attention will be given to organizational conceptualizations (paradigms) for addressing current educational problems and issues. Candidates will be encouraged to think outside the traditional frames of education in order to improve student achievement in PK-12 schools. When a paradigm shifts, the way we view the world and what we assume to be true dramatically changes. When faced with shifting circumstances, school leaders can turn change into opportunity and opportunity into success.

Prerequisite(s)/Corequisite(s): Admittance to the UNO-UNL Joint Doctorate Program. Not open to non-degree graduate students.

EDL 9540 SCHOOL LAW (3 credits)

This course is concerned with laws related to schools. Topics include certification, contract, negligence, student rights, due process, curriculum, and discipline. Each topic is approached through study of most recent court cases.

Prerequisite(s)/Corequisite(s): Admission to Graduate Studies or instructor permission. Not open to non-degree graduate students.

EDL 9550 SYMPOSIUM ON SCHOOL LEADERSHIP (3 credits)

The purpose of this seminar is to relate research, theory, and practice in educational organizations. The course is designed to engage candidates with a systematic examination of school reform, best practices, and the implications for practitioners. The symposium will involve candidates with the changing roles and functions of educational leaders in rapidly changing metropolitan educational environments.

Prerequisite(s)/Corequisite(s): Admission to Graduate Studies or permission of instructor.

EDL 9610 STATISTICAL METHODS FOR THE BEHAVIORAL SCIENCES (3 credits)

This course is designed to help graduate students develop competence in understanding and using statistical methods for the behavioral and social sciences. The course introduces broad historically based topics in statistics such as probability theory, the Law of Large Numbers, and the Central Limit Theorem to develop conceptually based models for hypothesis testing, description of data, and statistical inference. Emphasis is placed on the evaluation of statistical methods used in published research and the development of analytic models in dissertation research.

Prerequisite(s)/Corequisite(s): Admission to the Doctor of Education (Ed.D.) program in Educational Leadership or Department/Instructor's permission.

EDL 9620 APPLIED ADVANCED STATISTICS IN EDUCATIONAL ADMINISTRATION (3 credits)

This course is designed to develop competence in using advanced-level statistics. The course includes parametric and nonparametric inferential statistics and scale development. The statistical analyses include: analyses of variance, regression analyses, factor and reliability analyses, chi-square, Mann-Whitney U, Wilcoxon Signed-Ranks, and Kruskal-Wallis.

Prerequisite(s)/Corequisite(s): EDL 9610 and must be admitted to the EdD program, or instructor's permission.

EDL 9630 QUALITATIVE RESEARCH (3 credits)

Qualitative Research develops skills and competence in designing, collecting, and analyzing data for studies in educational research.

Prerequisite(s)/Corequisite(s): EDL 9610 or equivalent. Not open to non-degree graduate students.

EDL 9650 PROGRAM EVALUATION FOR EDUCATIONAL ADMINISTRATORS (3 credits)

This course provides an introduction to program evaluation theory and practice. It will address the range of approaches within education human service program evaluation, the standards established by the profession, the "how to" of program evaluation, and the skills needed to conduct program evaluation.

Prerequisite(s)/Corequisite(s): Admission to the Graduate College or instructor's permission.

EDL 9660 STRATEGIC LEADERSHIP FOR SCHOOL LIBRARIES (3 credits)

This course will focus on the political, economic and social trends that have shaped school libraries and develop the skills and dispositions required for leaders of 21st Century school library programs.

Prerequisite(s)/Corequisite(s): Admission to the University of Nebraska Joint Doctoral Program in Educational Administration or to any other doctoral program in the University of Nebraska, or instructor permission. Not open to non-degree graduate students.

EDL 9670 INQUIRY AND RESEARCH FOR LEADERSHIP IN SCHOOL LIBRARIES (3 credits)

Inquiry and Research for Leadership in School Librarianship will examine current research in the school library field and focus on action research based on authentic need.

Prerequisite(s)/Corequisite(s): Admission to the University of Nebraska Joint Doctoral Program in Educational Administration or to any other doctoral program in the University of Nebraska, or instructor permission. Not open to non-degree graduate students.

EDL 9980 SUPERINTENDENT INTERNSHIP IN EDUCATIONAL ADMINISTRATION (3 credits)

This course is a guided, field-based internship for candidates seeking the school superintendent endorsement from the Nebraska Department of Education (NDE). The internship will provide candidates with experiences in the various roles and responsibilities of a superintendent.

Prerequisite(s)/Corequisite(s): Admittance to the the EdD or EdS in educational administration or departmental permission. Candidates must submit an internship application by April 1 for following fall term.

EDL 9990 DISSERTATION (1-12 credits)

The course provides doctoral candidates in Educational Administration and Supervision with a process to complete a dissertation research plan. The course learning activities will focus on the completion of a candidate's dissertation. The course is designed to allow advanced doctoral candidates to demonstrate technical mastery of the discipline and to advance knowledge by completing an investigation.

Prerequisite(s)/Corequisite(s): Admittance to the EdD in Educational Administration. Department permit to enroll required. Not open to non-degree graduate students.

Electrical and Computer Engineering (ECEN)

ECEN 8006 ELECTRONIC INSTRUMENTATION (3 credits)

Applications of analog and digital devices to electronic instrumentation. Includes transducers, instrumentation amplifiers, mechanical and solid state switches, data acquisition systems, phase-lock loops, and modulation techniques. Demonstrations with working circuits and systems. (Cross-listed with ECEN 4000)

Prerequisite(s)/Corequisite(s): Senior Standing in Engineering or Permission. Not open to non-degree graduate students.

ECEN 8066 POWER SYSTEMS ANALYSIS (3 credits)

Symmetrical components and fault calculations, power system stability, generator modeling (circuit view point), voltage control system, high voltage DC transmission, and system protection. (Cross-listed with ECEN 4060)

Prerequisite(s)/Corequisite(s): ECEN 3380. Not open to non-degree graduate students.

ECEN 8076 POWER SYSTEMS PLANNING (3 credits)

Economic evaluation, load forecasting, generation planning, transmission planning, production simulation, power plant reliability characteristics, and generation system reliability. (Cross-listed with ECEN 4070)

Prerequisite(s)/Corequisite(s): ECEN 3050. Not open to non-degree graduate students.

ECEN 8086 ENGINEERING ELECTROMAGNETICS (3 credits)

Applied electromagnets: Transmission lines in digital electronics and communication. The quasistatic electric and magnetic fields; electric and magnetic circuits and electromechanical energy conversion. Guided waves; rectangular and cylindrical metallic waveguides and optical filters. Radiation and antennas; line and aperture antennas and arrays. (Cross-listed with ECEN 4080)

Prerequisite(s)/Corequisite(s): ECEN 3060. Not open to non-degree graduate students.

ECEN 8106 MULTIVARIATE RANDOM PROCESSES (3 credits)

Probability space, random vectors, multivariate distributions, moment generating functions, conditional expectations, discrete and continuous-time random processes, random process characterization and representation, linear systems with random inputs. (Cross-listed with ECEN 4100)

Prerequisite(s)/Corequisite(s): ECEN 3050. Not open to non-degree graduate students.

ECEN 8150 DIGITAL IMAGE PROCESSING (3 credits)

Topics covering the spatial and spectral analysis of digital image processing systems, the design of multi-dimensional digital filters and systems, and advanced theories and technologies in digital image processing systems.

Prerequisite(s)/Corequisite(s): ECEN 4240 or ECEN 8246 or permission.

ECEN 8166 MATERIALS AND DEVICES FOR COMPUTER MEMORY, LOGIC, AND DISPLAY (3 credits)

Survey of fundamentals and application of devices used for memory, logic, and display. Magnetic, superconductive, semi-conductive, and dielectric materials. (Cross-listed with ECEN 4160)

Prerequisite(s)/Corequisite(s): PHYS 2120, not open to non-degree graduate students.

ECEN 8176 SEMICONDUCTOR FUNDAMENTALS II (3 credits)

Analysis of BJT's and MOSFET's from a first principle materials viewpoint. Statics and dynamic analysis and characterization. (Cross-listed with ECEN 4170.)

Prerequisite(s)/Corequisite(s): ECEN 4210 or ECEN 8216. Not open to non-degree graduate students.

ECEN 8206 PLASMA PROCESSING OF SEMICONDUCTORS (3 credits)

Physics of plasmas and gas discharges developed. Includes basic collisional theory, the Boltzman equation and the concept of electron energy distribution. Results are related to specific gas discharge systems used in semiconductor processing, such as sputtering, etching, and deposition systems. (Cross-listed with ECEN 4200)

Prerequisite(s)/Corequisite(s): Senior or graduate Standing. Not open to non-degree graduate students.

ECEN 8216 PRINCIPLES OF SEMICONDUCTOR MATERIALS AND DEVICES I (3 credits)

Introduction to semiconductor fundamentals, charge carrier concentration and carrier transport, energy bands, and recombination. PN junction, static and dynamic, and special PN junction diode devices. (Cross-listed with ECEN 4210)

Prerequisite(s)/Corequisite(s): PHYS 2130. Not open to non-degree graduate students.

ECEN 8246 DIGITAL SIGNAL PROCESSING (3 credits)

The temporal and spectral analysis of digital signals and systems, the design of digital filters and systems, and advanced systems including multi-rate digital signal processing techniques. (Cross-listed with ECEN 4240)

Prerequisite(s)/Corequisite(s): ECEN 3550

ECEN 8286 POWER ELECTRONICS (3 credits)

Basic analysis and design of solid-state power electronic devices and converter circuitry. (Cross-listed with ECEN 4280)

Prerequisite(s)/Corequisite(s): ECEN 3040, ECEN 3160.

ECEN 8306 WIND ENERGY (3 credits)

This broad multidisciplinary course will combine engineering principles of both the mechanical/aerodynamical and electrical components and systems, along with economic and environmental considerations for siting and public policy, to appropriately cover the relevant topics associated with all scales of wind energy implementations. (Cross-listed with ECEN 4300)

Prerequisite(s)/Corequisite(s): Senior standing or permission.

ECEN 8336 MICROPROCESSOR SYSTEM DESIGN (4 credits)

Microprocessor based systems. Architecture; design and interfacing. Memory design, input/output ports, serial communications, and interrupts. Generating assembly ROM code, assembly/C firmware generation, and designing device drivers. (Cross-listed with ECEN 4330)

Prerequisite(s)/Corequisite(s): ECEN 3100 with grade of C or better and ECEN 3320 with grade of C or better.

ECEN 8356 EMBEDDED MICROCONTROLLER DESIGN (4 credits)

Microcontroller architecture: design, programming, and interfacing for embedded systems. Timing issues, memory interfaces, serial and parallel interfacing, and functions for common microcontrollers. (Cross-listed with ECEN 4350)

Prerequisite(s)/Corequisite(s): (ECEN 4330/ECEN 8336, STAT 3800. Pre- or co-req: CSCI 4500.

ECEN 8366 ELECTRIC MACHINES (3 credits)

Provides a solid background in electric machine analysis, covering fundamental concepts, techniques, and methods for analysis and design. Discussion of transformers and presentation of some new systems and applications. (Cross-listed with ECEN 4360)

Prerequisite(s)/Corequisite(s): PHYS 2120 and ECEN 2160

ECEN 8376 PARALLEL AND DISTRIBUTED PROCESS (3 credits)

Parallel and Distributed Processing concepts, principles, techniques and machines. (Cross-listed with ECEN 4370).

Prerequisite(s)/Corequisite(s): ECEN 4350 or ECEN 8356

ECEN 8426 BASIC ANALYTICAL TECHNIQUES IN ELECTRICAL ENGINEERING (3 credits)

Applications of partial differential equations, matrices, vector analysis, complex variables, and infinite series to problems in electrical engineering. (Cross-listed with ECEN 4420)

Prerequisite(s)/Corequisite(s): MATH 2350. Not open to non-degree graduate students.

ECEN 8446 LINEAR CONTROL SYSTEMS (3 credits)

Classical (transfer function) and modern (state variable) control techniques. Both time domain and frequency domain techniques are studied.

Traditional, lead, lag, and PID compensators are examined, as well as state variable feedback. (Cross-listed with ECEN 4440)

Prerequisite(s)/Corequisite(s): ECEN 3040. Not open to non-degree graduate students.

ECEN 8486 DECISION ANALYSIS (3 credits)

Principles of engineering economy including time value of money, net present value, and internal rate of return. Use of influence diagram and decision tree to structure and analyze decision situations under uncertainty including use of stochastic dominance, value of information, and utility theory. Fundamentals of two-person matrix games including Nash equilibrium. (Cross-listed with ECEN 4480)

Prerequisite(s)/Corequisite(s): ECEN 3050 or STAT 3800

ECEN 8506 BIOINFORMATICS (3 credits)

This course examines how information is organized in biological sequences such as DNA and proteins and will look at computational techniques which make use of this structure. During this class various biochemical processes that involve these sequences are studied to understand how these processes effect the structure of these sequences. In the process bioinformatics algorithms, tools, and techniques which are used to explore genomic and amino acid sequences are also introduced. (Cross-listed with ECEN 4500)

Prerequisite(s)/Corequisite(s): Computer programming language and ECEN 3050 or STAT 3800 or equivalent.

ECEN 8516 INTRODUCTION TO VLSI SYSTEM DESIGN (3 credits)

The concepts, principles, and methodology at all levels of digital VLSI system design and focused on gate-level VLSI implementation. (Cross-listed with ECEN 4510).

Prerequisite(s)/Corequisite(s): ECEN 3100

ECEN 8526 INTRODUCTION TO COMPUTER-AIDED DIGITAL DESIGN (3 credits)

The concepts, simulation techniques and methodology in computer-aided digital design at system and logic levels. (Cross-listed with ECEN 4520)

Prerequisite(s)/Corequisite(s): ECEN 3100

ECEN 8536 COMPUTATIONAL AND SYSTEMS BIOLOGY (3 credits)

Provides the required biology primer and covers functional genomics, transcriptomics, differential expression, clustering, classification, prediction, biomarker discovery, pathway analysis and network based approaches to high throughput biological data analysis. Includes the development of databases, algorithms, web-based and other tools regarding management and analysis of life science data. Areas of study include DNA, RNA, and protein sequence analysis, functional genomics and proteomics, 3D macromolecule structure prediction, and systems/network approach. (Cross-listed with ECEN 4530).

Prerequisite(s)/Corequisite(s): By permission.

ECEN 8546 POWER SYSTEMS OPERATION AND CONTROL (3 credits)

Characteristics and generating units. Control of generation, economic dispatch, transmission losses, unit commitment, generation with limited supply, hydrothermal coordination, and interchange evaluation and power pool. (Cross-listed with ECEN 4540)

Prerequisite(s)/Corequisite(s): ECEN 8386. Not open to non-degree graduate students.

ECEN 8606 LABVIEW PROGRAMMING (3 credits)

Labview as a programming language and for applications to acquire data, to access the network, control lab instruments, and for video and sound applications. (Cross-listed with ECEN 4600)

Prerequisite(s)/Corequisite(s): Prior programming experience.

ECEN 8616 DIGITAL COMMUNICATIONS MEDIA (4 credits)

Topics related to the transport of bit streams from one geographical location to another over various physical media such as wire pairs, coaxial cable, optical fiber, and radio waves. Transmission characteristics, media interfacing, delay, distortion, noise, and error detection and correction techniques. (Cross-listed with ECEN 4610)

ECEN 8626 COMMUNICATION SYSTEMS (3 credits)

Mathematical descriptions of signals in communication systems. Principles of analog modulation and demodulation. Performance analysis of analog communication systems in the presence of noise. (Cross-listed with ECEN 4620)

Prerequisite(s)/Corequisite(s): ECEN 3040 and ECEN 3050. Not open to non-degree graduate students.

ECEN 8636 DIGITAL SIGNAL PROCESSING (3 credits)

Discrete system analysis using Z-transforms. Analysis and design of digital filters. Discrete Fourier transforms. (Cross-listed with ECEN 4630)

Prerequisite(s)/Corequisite(s): ECEN 3040. Not open to non-degree graduate students.

ECEN 8646 DIGITAL COMMUNICATION SYSTEMS (3 credits)

Principles of digital transmission of information in the presence of noise. Design and analysis of baseband PAM transmission systems and various carrier systems including ASK, FSK, PSK. (Cross-listed with ECEN 4640)

Prerequisite(s)/Corequisite(s): ECEN 4620. Not open to non-degree graduate students.

ECEN 8656 INTRODUCTION TO DATA COMPRESSION (3 credits)

Introduction to the concepts of Information Theory and Redundancy removal. Simulation of various data compression schemes such as Delta Modulation, Differential Pulse Code Modulation, Transform Coding and Runlength Coding. (Cross-listed with ECEN 4650)

Prerequisite(s)/Corequisite(s): ECEN 3050. Not open to non-degree graduate students.

ECEN 8666 TELECOMMUNICATION ENGINEERING I (4 credits)

Standard telecommunications protocols, architecture of long distance integrated data networks, local area networks, wide area networks, radio and satellite networks. Network management, internetworking, system modeling and performance analysis. (Cross-listed with ECEN 4660).

Prerequisite(s)/Corequisite(s): ECEN 3620; ECEN 4610/ECEN 8616 prior to or concurrent.

ECEN 8676 ELECTROMAGNETIC THEORY AND APPLICATIONS (3 credits)

Engineering application of Maxwell's equations. Fundamental Parameters of Antennas, Radiation analysis, and synthesis of antenna arrays. Aperture Antennas. (Cross-listed with ECEN 4670)

Prerequisite(s)/Corequisite(s): ECEN 3060. Not open to non-degree graduate students.

ECEN 8686 MICROWAVE ENGINEERING (3 credits)

Applications of active and passive devices to microwave systems. Includes impedance matching, resonators, and microwave antennas. (Cross-listed with ECEN 4680)

Prerequisite(s)/Corequisite(s): ECEN 3060. Not open to non-degree graduate students.

ECEN 8696 ANALOG INTEGRATED CIRCUITS (3 credits)

Analysis and design of analog integrated circuits both bipolar and MOS. Basic circuit elements such as differential pairs, current sources, active loads, output drivers used in the design of more complex analog integrated circuits. (Cross-listed with ECEN 4690)

Prerequisite(s)/Corequisite(s): ECEN 3610. Not open to non-degree graduate students.

ECEN 8706 DIGITAL AND ANALOG VLSI DESIGN (3 credits)

Introduction to VLSI design techniques for analog and digital circuits. Fabrication technology and device modeling. Design rules for integrated circuit layout. LSI design options with emphasis on the standard cell approach of digital and analog circuits. Lab experiments, computer simulation and layout exercises. (Cross-listed with ECEN 4700)

Prerequisite(s)/Corequisite(s): ECEN 3610. Not open to non-degree graduate students.

ECEN 8716 COMPUTER COMMUNICATION NETWORKS (4 credits)

This course investigates the standard protocols and hardware solutions defined by the International Standard Organization (ISO) and Institute of Electrical and Electronics Engineers (IEEE) for the computer communications networks. Included are ISO OSI model, IEEE 802.X (Ethernet, token bus, token ring) and Asynchronous Transfer Modals (ATM) networks. (Cross-listed with ECEN 4710)

Prerequisite(s)/Corequisite(s): ECEN 3250

ECEN 8736 MOBILE AND PERSONAL COMMUNICATIONS (4 credits)

This course provides basic concepts on mobile and personal communications. Concepts on mobile and personal communications. Modulation techniques for mobile radio, equalization, diversity, channel coding, and speech coding. (Cross-listed with ECEN 4730)

Prerequisite(s)/Corequisite(s): ECEN 3250

ECEN 8746 DIGITAL SYSTEMS (3 credits)

Synthesis using state machines; design of digital systems; micro programming in small controller design; hardware description language for design and timing analysis. (Cross-listed with ECEN 4740)

Prerequisite(s)/Corequisite(s): ECEN 3700. Not open to non-degree graduate students.

ECEN 8756 SATELLITE COMMUNICATIONS (4 credits)

The fundamental concepts of satellite communications. Orbits, launching satellites, modulation and multiplexing, multiple access, earth stations, coding, interference and special problems in satellite communications. (Cross-listed with ECEN 4750)

Prerequisite(s)/Corequisite(s): ECEN 3520

ECEN 8766 WIRELESS COMMUNICATIONS (3 credits)

The fundamental concepts of wireless communications. Basic communications concepts such as multiple access, and spectrum. Propagation, radio, standards, and internetworking. Current issues in wireless communications. (Cross-listed with ECEN 4760)

Prerequisite(s)/Corequisite(s): ECEN 3250 or ECEN 4620 prior to or concurrent

ECEN 8776 DIGITAL SYSTEMS ORGANIZATION AND DESIGN (3 credits)

Hardware development languages, hardware organization and realization, microprogramming, interrupt, intersystem communication, and peripheral interfacing. (Cross-listed with ECEN 4770)

Prerequisite(s)/Corequisite(s): ECEN 4750 or ECEN 8746. Not open to non-degree graduate students.

ECEN 8796 OPTICAL FIBER COMMUNICATIONS (4 credits)

Fundamentals of lightwave communication in optical fiber waveguides, physical description of fiber optic systems. Properties of the optical fiber and fiber components. Electro-optic devices: light sources and modulators, detectors and amplifiers; optical transmitter and receiver systems. Fiber optic link design and specification; fiber optic networks. (Cross-listed with ECEN 4790)

Prerequisite(s)/Corequisite(s): ECEN 4630.

ECEN 8806 INTRODUCTION TO LASERS AND LASER APPLICATIONS (3 credits)

Physics of electronic transition production stimulated emission of radiation. Threshold conditions for laser oscillation. Types of lasers and their applications in engineering. (Cross-listed with ECEN 4800)

Prerequisite(s)/Corequisite(s): PHYS 2130.

ECEN 8826 ANTENNAS AND RADIO PROPAGATION FOR WIRELESS COMMUNICATIONS (4 credits)

Fundamental theory of antennas and radio propagation for wireless communications. Basic antenna characteristics and various antennas and antenna arrays. Basic propagation mechanisms and various channel models, such as Friis free space model, Hata model, lognormal distribution, and multipath model. Includes practical antenna design for high radio frequency (RF) with modeling software tools such as Numerical Electromagnetic Code (NEC) and ADvanced Design System (ADS). Design projects will be assigned as the main part of course. (Cross-listed with ECEN 4820)

Prerequisite(s)/Corequisite(s): ECEN 3280

ECEN 8830 RANDOM PROCESSES IN ENGINEERING (3 credits)

Topics related to the concept of random variables, functions of random variables and random processes.

Prerequisite(s)/Corequisite(s): STAT 3800

ECEN 8846 NETWORK SECURITY (4 credits)

Network security and cryptographic protocols. Classical encryption techniques, block ciphers and stream cyphers, public-key cryptography, authentications digital signatures, key management and distributions, network vulnerabilities, transport-level security, IP security. (Cross-listed with ECEN 4840)

ECEN 8850 SPREAD SPECTRUM COMMUNICATIONS (3 credits)

Introduction to the theory of spread spectrum communications: direct sequence, frequency and time hopping techniques. Topics include properties of pseudo-random binary sequences, low-probability-of-intercept (LPI) and anti-jamming (AJ) methods, performance of spread spectrum systems, applications of spread spectrum techniques in radio frequency and optical code-division multiple access (CDMA) systems.

Prerequisite(s)/Corequisite(s): ECEN 4630 or ECEN 8616 or permission.

ECEN 8866 APPLIED PHOTONICS (3 credits)

Introduction to the use of electromagnetic radiation for performing optical measurements in engineering applications. Basic electromagnetic theory and light interaction with matter are covered with corresponding laboratory experiments conducted. (Cross-listed with ECEN 4860)

Prerequisite(s)/Corequisite(s): ECEN 3060 or permission. Not open to non-degree graduate students.

ECEN 8886 WIRELESS SECURITY (4 credits)

A comprehensive overview on the recent advances in wireless network and system security. Covers security issues and solutions in emerging wireless access networks and systems as well as multihop wireless networks. (Cross-listed with ECEN 4880)

Prerequisite(s)/Corequisite(s): ECEN 3250

ECEN 8916 SPECIAL TOPICS IN ELECTRIC AND COMPUTER ENGINEERING IV (1-4 credits)

Special topics in the emerging areas of electrical, computer and electronics engineering which may not be covered in the other courses in the electrical, and computer engineering curriculum. (Cross-listed with ECEN 4910)

ECEN 8926 INDIVIDUAL STUDY IN ELECTRICAL AND COMPUTER ENGINEERING IV (1-3 credits)

Individual study in a selected electrical, computer or electronics engineering area under the supervision and guidance of a Electrical and Computer Engineering faculty member. (Cross-listed with ECEN 4920).

ECEN 8930 INDEPENDENT STUDY IN COMPUTER AND ELECTRONICS ENGINEERING (1-3 credits)

Individual study at the graduate level in a selected computer or electronics engineering area under the supervision and guidance of a Computer and Electronics Engineering faculty member.

Prerequisite(s)/Corequisite(s): Departmentally approved proposal.

ECEN 8950 SPECIAL TOPICS (1-3 credits)

Special topics in the newly emerging areas of computer and electronics engineering not covered in the other courses in the computer and electronics engineering curriculum.

ECEN 8986 SPECIAL TOPICS IN ELECTRICAL ENGINEERING IV (1-6 credits)

Offered as the need arises to meet electrical engineering topics for fourth-year and graduate students not covered in other courses. (Cross-listed with ECEN 4980)

ECEN 8990 MASTERS THESIS (1-10 credits)

Masters thesis work.

Prerequisite(s)/Corequisite(s): Admission to masters degree program and permission of supervisory committee chair. Not open to non-degree graduate students.

ECEN 9110 COMMUNICATION THEORY (3 credits)

Applications of probability and statistics to signals and noise; correlation; sampling; shot noise; spectral analysis; Gaussian processes; filtering.

Prerequisite(s)/Corequisite(s): ECEN 8626, and ECEN 8646 or ECEN 8106.

ECEN 9120 ERROR CONTROL CODING (3 credits)

Fundamentals of error correction and detection in digital communication and storage systems. Linear and algebraic block codes; Hamming, BCH and Reed Solomon codes; algebraic decoding techniques; structure and performance of convolutional codes, turbo codes, and trellis coded modulation; MAP, Viterbi, and sequential decoding techniques.

Prerequisite(s)/Corequisite(s): ECEN 4100 or ECEN 8106, and ECEN 4640 or ECEN 8646, or Permission.

ECEN 9130 ADVANCED ANALOG AND MIXED-SIGNAL INTEGRATED CIRCUITS (3 credits)

Advanced current mirrors and op-amps. Comparators and sample/hold (S/H) circuits. Band-gap reference circuits. Trans-linear circuits and analog multipliers. Voltage controlled oscillators. Operational trans-conductance amplifiers (OTA's). Switched capacitor circuits. Data converters. Non-linearity, mismatch, and short-channel effects. Continuous time domain integrated filters. Current conveyors. Phase locked loops. Analog CAD.

Prerequisite(s)/Corequisite(s): ECEN 8696 and permission. Not open to non-degree graduate students.

ECEN 9150 ADAPTIVE SIGNAL PROCESSING (3 credits)

Adaptive filtering algorithms, frequency and transform domain adaptive filters, and simulation and critical evaluation of adaptive signal processing for real world applications.

Prerequisite(s)/Corequisite(s): ECEN 4100 or ECEN 8106, ECEN 4630 or ECEN 8636, and permission. Not open to non-degree graduate students.

ECEN 9260 STATISTICAL SIGNAL PROCESSING FOR WIRELESS COMMUNICATION (3 credits)

Statistical signal processing and applications for wireless communications covering the characteristics of random signals, optimum linear filters, statistical parameter estimation using maximum likelihood (ML) and minimum mean-square error (MMSE) methods, adaptive signal processing using least-mean-square (LMS) and recursive least-square (RLS) approaches, Kalman filtering, and eigenanalysis algorithms. Applications of the statistical signal processing techniques in wireless communications will be explored.

Prerequisite(s)/Corequisite(s): ECEN 4240 or ECEN 8246, ECEN 4760 or ECEN 8766, and ECEN 8830. Not open to non-degree graduate students.

ECEN 9320 ADVANCED POWER ELECTRONICS AND APPLICATIONS (3 credits)

Analysis and design of power electronic circuits and their applications, including: snubber circuits, resonant converters and soft switching techniques, pulse-width modulation techniques, control of power electronic circuits, power electronics and control for electric machines and wind energy systems, flexible AC-transmission system (FACTS) devices, and high-voltage DC (HVDC) transmission.

Prerequisite(s)/Corequisite(s): ECEN 4360 or ECEN 8366, ECEN 4280 or ECEN 8286.

ECEN 9350 COMPUTATIONAL INTELLIGENCE (3 credits)

Computational intelligence paradigms and their applications, including: artificial neural networks, fuzzy logic systems, swarm intelligence, evolutionary computation (e.g. genetic algorithms), machine learning (e.g., supervised learning, unsupervised learning, and reinforcement learning), neurocontrol and adaptive critic designs, and applications of computational intelligence for system identification, state estimation, time series prediction, signal processing, adaptive control, optimization, diagnostics, prognostics, etc.

Prerequisite(s)/Corequisite(s): MATH 1970, 2350 and 2050. Good skills using MATLAB. Not open to non-degree graduate students.

ECEN 9460 OPTIMAL FILTERING ESTIMATION AND PREDICTION (3 credits)

Techniques for optimally extracting information about the past, present, or future status of a dynamic system from noise-corrupted measurements on that system.

Prerequisite(s)/Corequisite(s): ECEN 8106 or permission. Not open to non-degree graduate students.

ECEN 9570 ADVANCED COMPUTER METHODS IN POWER SYSTEM ANALYSIS (3 credits)

Power System matrices, sparsity techniques, network equivalents, contingency analysis, power flow optimization, state estimation, and power system restructuring examined via computer methods.

Prerequisite(s)/Corequisite(s): ECEN 8066. Not open to non-degree graduate students.

ECEN 9590 WIRELESS COMMUNICATIONS (3 credits)

Principles of wireless communications, including: description of the wireless channel characteristics; ultimate performance limits of wireless systems; performance analysis of digital modulation techniques over wireless channels; diversity techniques; adaptive modulation; multiple-antenna communications; multi-carrier modulation; and multi-user wireless communications.

Prerequisite(s)/Corequisite(s): ECEN 8646 and permission. Not open to non-degree graduate students.

ECEN 9600 SOLID STATE DEVICES (3 credits)

Gallium arsenide and silicon devices. Device properties based on structure and physical properties of the materials.

Prerequisite(s)/Corequisite(s): ECEN 3150, not open to non-degree graduate students.

ECEN 9650 PASSIVE MICROWAVE COMPONENTS (3 credits)

Application of Maxwell's Equations to the analysis of waveguides, resonant cavities, filters and other passive microwave devices.

Prerequisite(s)/Corequisite(s): ECEN 8676 or ECEN 8686. Not open to non-degree graduate students.

ECEN 9670 INTRODUCTION TO QUANTUM ELECTRONICS (3 credits)

Introduction to the quantum aspects of electron devices.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ECEN 9710 SEMINAR (1-12 credits)

Selected topics.

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

ECEN 9750 OPTICAL PROPERTIES OF MATERIALS (3 credits)

Quantum mechanical description of the optical properties of solids (complex refractive index and its dispersion, effects of electric and magnetic fields, temperature, stress; additional special topics as desired.

Prerequisite(s)/Corequisite(s): ECEN 9670 or permission. Not open to non-degree graduate students.

ECEN 9770 SPACE-TIME WIRELESS COMMUNICATIONS (3 credits)

Theory of space-time (ST) wireless communication systems. Emphasis will be placed on spatial diversity, smart antenna systems, MIMO capacity of multi-antenna fading channels, space-time signaling, space-time receivers and interference mitigation. Includes overview of more advanced topics such as MIMO-OFDM and current trends in research and industry.

Prerequisite(s)/Corequisite(s): ECEN 4610, ECEN 4630, ECEN 4760.

ECEN 9790 NON-LINEAR FIBER OPTIC SYSTEMS (3 credits)

Linear and non-linear propagations in optical fibers. Topics include fiber non-linearity, fundamentals of optical amplifiers, semiconductor and fiber amplifiers, soliton communications. Applications include high capacity and long distance transmissions, all-optical networks.

Prerequisite(s)/Corequisite(s): ECEN 4790 or ECEN 8796 or permission.

ECEN 9860 OPTOELECTRONICS (3 credits)

Modern phenomena associated with optoelectronics Electro-optical effect such as Pockel effect, Kerr effect, and nonlinear optical phenomena. Material and devices used in modern communications, femtosecond lasers, and optical computer systems.

Prerequisite(s)/Corequisite(s): ECEN 8866. Not open to non-degree graduate students.

ECEN 9910 INDEPENDENT STUDY (1-24 credits)

Selected topic under the direction and guidance of a faculty member.

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

ECEN 9920 RESEARCH OTHER THAN THESIS (1-6 credits)

Supervised non-thesis research and independent study.

Prerequisite(s)/Corequisite(s): Permission and graduate standing.

ECEN 9960 TOPICS IN ELECTRICAL ENGINEERING (3 credits)

Selected topics in electrical engineering.

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

ECEN 9980 ADVANCED SPECIAL TOPICS (1-3 credits)

Advanced topics in computer and electronics engineering not covered in other 9000 level courses.

Prerequisite(s)/Corequisite(s): Permission.

ECEN 9990 DOCTORAL DISSERTATION (1-24 credits)

Dissertation research.

Prerequisite(s)/Corequisite(s): Admission to doctoral degree program and permission of supervisory committee chair. Not open to non-degree graduate students.

Emergency Management (EMGT)

EMGT 8060 PLANNING, PREPAREDNESS, AND MITIGATION (3 credits)

This course addresses the pre-disaster phases of Emergency Management, including planning, preparedness, and mitigation. The class covers the National Response Framework (NRF) and the National Incident Management System (NIMS) and their influence on modern community Emergency Management and Homeland Security. EMGT 8060 is intended to prepare students for the various tangible and intangible considerations EMGT professionals face when planning and preparing for disasters, either natural or man-made.

Prerequisite(s)/Corequisite(s): Students must have completed or be concurrently taking the beginning core of the MPA curriculum.

EMGT 8430 RESPONSE, RECOVERY & RESILIENCE (3 credits)

This course addresses the post-impact/disaster phases of Emergency Management, including response, recovery, and resiliency. The class focuses on disasters declarations and assistance, interagency cooperation, unified and incident command, operational application of the National Incident Management System (NIMS), and the political, legal, social, and economic considerations inherent with responding to and recovering from emergencies.

Prerequisite(s)/Corequisite(s): Students must have completed or be concurrently taking the beginning core of the MPA curriculum.

EMGT 8600 CONTEMPORARY ISSUES IN EMERGENCY MANAGEMENT (3 credits)

This course exposes the student to contemporary issues in Emergency Management including how to conduct exercise design, development, and evaluation. What different factors affect administration of emergency management services and what actions are required for planning, preparedness, mitigation, response, and recovery strategies when dealing with Natural Disasters, Medical Pandemics and Outbreaks, and Terrorism/Para Military Events that threaten the United States.

Prerequisite(s)/Corequisite(s): Students must have completed or be concurrently taking the beginning core of the MPA curriculum.

Engineering (ENGR)

ENGR 8076 PROJECT MANAGEMENT (3 credits)

Project development, role of the project manager, project selection, project planning, budgeting and cost estimation, project scheduling, and project termination.

ENGR 8100 ERGONOMICS (3 credits)

Introduction to the principles of ergonomics. Information processing, human output and control, workplace design and environmental conditions. Not open to students with credit in ISMG 3150.

ENGR 8156 COGNITIVE ERGONOMICS (3 credits)

Human factors affecting work. Focus on humans: energy requirements, lighting, noise, monotony and fatigue, learning, simulations versus sequential tasks. Experimental evaluation of concepts.

ENGR 8166 PHYSICAL ERGONOMICS (3 credits)

Human performance in work. Human response to various environmental and task-related variables with emphasis on physical and physiological effects.

Prerequisite(s)/Corequisite(s): ENGR 4300 or permission

ENGR 8176 OCCUPATIONAL SAFETY HYGIENE ENGINEERING (3 credits)

Introduction to occupational hygiene engineering with emphasis on workplace environmental quality. Heat, illumination, noise, and ventilation.

Prerequisite(s)/Corequisite(s): Senior standing or permission.

ENGR 8230 RELIABILITY ENGINEERING (3 credits)

System and component reliability analyses of series, parallel and complex systems. Concepts of reliability, availability, and maintainability in design of systems. Methods of reliability testing and estimation.

ENGR 8306 APPLIED STATISTICS AND QUALITY CONTROL (3 credits)

Systematic analysis of processes through the use of statistical analysis, methods, and procedures; statistical process control, sampling, regression, ANOVA, quality control, and design of experiments. Use of software for performing a statistical analysis.

Prerequisite(s)/Corequisite(s): MENG 3210 or MECH 3210.

ENGR 8310 STOCHASTIC PROCESSES (3 credits)

Fundamentals of stochastic processes and their application in modeling production/inventory control, maintenance and manufacturing systems. Markov and semi-Markov chains, Poisson processes, renewal processes, regenerative processes and Markov decision processes.

ENGR 8406 DISCRETE EVENT SIMULATION MODELING (3 credits)

Development of simulation models of discrete systems. Model development, Monte Carlo techniques, random number generators, and output analysis.

Prerequisite(s)/Corequisite(s): CONE 2060; MENG 3210 or MECH 3210 and CIST 1400 or CSCI 1620 or CSCI 2240 or permission

ENGR 8606 PACKAGING ENGINEERING (3 credits)

Investigation of packaging processes, materials, equipment and design. Container design, material handling, storage, packing and environmental regulations, and material selection.

Prerequisite(s)/Corequisite(s): CONE 2060, MENG 3210, MENG 3730

ENGR 8616 RFID SYSTEMS IN THE SUPPLY CHAIN (3 credits)

Foundations of Radio Frequency Identification Systems (RFID). The fundamentals of how RFID components of tag, transponder, and antennae are utilized to create RFID systems. Best practices for implementation of RFID systems in common supply operations.

ENGR 8696 TECHNOLOGY, SCIENCE AND CIVILIZATION (3 credits)

(Lect 2 Dis. 2) This course studies the development of technology as a trigger of change upon humankind, from the earliest tools of Homo Habilis to the advent of the radio telescope in exploring the creation of the universe. The course traces the paths from early science to development of the sciences and technologies that will dominate the new millennium. (8696 is for non SET students.) (Cross-listed with ENGR 4690).

Prerequisite(s)/Corequisite(s): Senior or permission. (ENGR 8696 is for non-SET students.)

ENGR 8816 SUPPLY CHAIN OPTIMIZATION (3 credits)

Foundations of supply chain network modeling. The concepts that support the economic and service trade-offs in supply chain and logistics management. Using decision support system (DSS) to design optimal logistics network models given data requirements and operational parameters. Using leading software packages to model problems arising in strategic management of logistics networks.

ENGR 8820 MATERIAL PLAN IN LOGISTIC SYSTEMS (3 credits)

Theory, practice and application of inventory, demand and supply planning techniques in multistage environments. Managing economies of scale, uncertainties, capacity constraints, and product availability in a supply chain. Integrated planning, supply chain coordination and technology enablers.

Prerequisite(s)/Corequisite(s): MENG 3210 or MECH 3210; ISMG 3280

ENGR 8836 LOGISTICS IN THE SUPPLY CHAIN (3 credits)

The process of planning, implementing and controlling the efficient, effective flow and storage of goods, services and related information from the point of origin to the point of consumption. Domestic transportation systems, distribution centers and warehousing, international logistics, logistic system controls, and reengineering logistics systems.

ENGR 8910 SPECIAL TOPICS IN ENGINEERING MANAGEMENT (1-6 credits)

Subject matter in emerging areas of engineering management and closely related areas not covered in other courses within the MEM curriculum. Topics, activities, and delivery methods vary.

ENGR 9010 TOTAL QUALITY MANAGEMENT USING SIX SIGMA TECHNIQUES (3 credits)

Introduction to advanced topics in Engineering Management and the foundations of Total Quality Management (TQM). Costs of quality, statistical tools, initiating change, advanced topics, and TQM in practice. Using DMAIC, DFSS, and CQPQ along with the other industry accepted Six Sigma Quality Techniques.

ENGR 9050 ANALYSIS OF ENGINEERING MANAGEMENT (3 credits)

Continuation of concepts and principles of engineering management applied to production cases.

ENGR 9060 FINANCIAL ENGINEERING (3 credits)

Applications of principle and financial economics in industrial and systems engineering. Term structure of interest, capital asset pricing and other capital allocation modes. Evaluation of real-options using binomial lattice, Black Scholes and other pricing models.

Prerequisite(s)/Corequisite(s): ISMG 8066.

ENGR 9190 DETERMINANTS OF OCCUPATIONAL PERFORMANCE (3 credits)

Focus on the individual in the industrial working environment. Emphasis on evaluation of fatigue, training, shift work, perception, vigilance, and work rest scheduling as they relate to the working environment.

Prerequisite(s)/Corequisite(s): Permission.

Engineering Mechanics (EMEC)

EMEC 8616 SP TOP IN ENG MECHANICS (1-6 credits)

Treatment of special topics in engineering mechanics by experimental, computation and/or theoretical methods. Topics will vary from semester to semester. See current schedule of classes for offerings.

EMEC 9610 ADV INV IN ENG MECH (1-12 credits)

English (ENGL)

ENGL 8010 SEMINAR: TEXT-BASED RESEARCH METHODS FOR ENGLISH STUDIES (3 credits)

An overview of the theories, methods and practices for conducting text-based research in English and related disciplines; graduate students gain experience conducting textual analysis and interpretation using relevant theories and methods, and reporting findings.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in English or permission of instructor.

ENGL 8020 SEMINAR: COLLEGE WRITING INSTRUCTION (5 credits)

The seminar in college writing instruction prepares Graduate Teaching Assistants to fulfill their responsibilities as teachers of first-year composition.

Prerequisite(s)/Corequisite(s): Graduate status and a teaching assistantship. Not open to non-degree graduate students.

ENGL 8026 AMERICAN POETRY TO 1900 (3 credits)

A comprehensive survey of the American poetic tradition from the 17th to the end of the 19th century. (Cross-listed with ENGL 4020).

Prerequisite(s)/Corequisite(s): Graduate standing; ENGL 8010 or ENGL 8030 recommended.

ENGL 8030 FIELD-BASED RESEARCH METHODS IN ENGLISH STUDIES (3 credits)

An overview of resources and methods for conducting qualitative, field-based research in English and related disciplines; students gain experience collecting data and analyzing data and reporting findings.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in English or permission of instructor. Not open to non-degree graduate students.

ENGL 8036 AMERICAN POETRY SINCE 1900 (3 credits)

A survey of the American poetic tradition from the turn of the twentieth-century to the present, focusing on various "schools" such as Imagism, High Modernism, the Harlem Renaissance, Confessional, Beats, and New Formalism. (Cross-listed with ENGL 4030).

Prerequisite(s)/Corequisite(s): Graduate Standing; ENGL 8010 or ENGL 8030 recommended

ENGL 8040 WRITING FOR PUBLICATION (3 credits)

In this seminar, students will study and practice methods for transforming their scholarly research and/or creative nonfiction into publishable articles and essays, as well as conference papers and other modes of sharing that work publicly. Students will edit and revise previously drafted work with the guidance of instructor feedback, advice from faculty mentors in their fields, and peer review. They will also research the larger structures and expectations of professional publishing in their fields.

Prerequisite(s)/Corequisite(s): Graduate standing and instructor permission.

ENGL 8066 THE AMERICAN NOVEL (3 credits)

A comprehensive survey of the evolution of the American Novel from the 1780s to the present day. Special emphasis will be placed on how a broad range of authors have responded to changing cultural and historical circumstances, and on how they have expressed widely varying viewpoints depending on their own gender, race, geographic region, and/or ethnicity. (Cross-listed with ENGL 4060).

Prerequisite(s)/Corequisite(s): Graduate standing in English

ENGL 8070 SEMINAR: WALT WHITMAN AND EMILY DICKINSON (3 credits)

A comprehensive examination of the poetry of Walt Whitman and Emily Dickinson.

Prerequisite(s)/Corequisite(s): Graduate Program admission. ENGL 8010 or ENGL 8030 recommended.

ENGL 8100 SEMINAR: TOPICS IN AMERICAN LITERATURE (3 credits)

This course involves the investigation of a particular topic (genre, author or group of authors, time period, subject area) in American literature. (The course may be repeated for additional credits under different topics.) Formerly ENGL 8060.

Prerequisite(s)/Corequisite(s): Graduate standing; ENGL 8010 or 8030 recommended

ENGL 8146 AMERICAN LITERARY REALISM AND NATURALISM (3 credits)

In the late nineteenth and early twentieth century two major literary genres - Realism and Naturalism - emerged in the United States not only to challenge the primacy of Romanticism and its generally optimistic view of life but also to actively engage with the modern America created after the Civil War. This course examines a wide range of realist and naturalist works, written between 1865 and 1914, by an extremely diverse group of male and female authors from different races, ethnicities, regions, religions, and socioeconomic classes. Emphasis will be placed on how various cultural, economic, political, and social factors influenced the construction and reception of these works. (Cross-listed with ENGL 4140).

Prerequisite(s)/Corequisite(s): Graduate standing in English

ENGL 8160 SEMINAR: POSTMODERN FICTION OF THE UNITED STATES (3 credits)

A seminar in American Fiction from the second half of the twentieth century into the twenty-first century which presents and discusses some of the major trends and issues associated with postmodern culture in America.

ENGL 8166 TOPICS IN AMERICAN REGIONALISM (3 credits)

A study of major topics in American literary regionalism, with special emphasis on particular social, cultural, and geographical contexts. Focus will be determined by instructor, but may include particular historical periods, geographic regions, authors, or literary themes. (Cross-listed with ENGL 4160).

Prerequisite(s)/Corequisite(s): Graduate standing in English

ENGL 8190 BOOK-SMART: EDUCATION IN LITERATURES AND CULTURES (3 credits)

The purpose of this course is to enable a critical consideration of how education is tied inextricably to issues of class, gender, religion, culture, and politics as well as an examination of how literature responds to and represents the theme of education, often also powerfully making the case for outsiders excluded by systems of privilege.

ENGL 8236 LATINO LITERATURE (3 credits)

A study of representative works of Mexican-American, Spanish-American, and American writers, along with their cultural and historical antecedents. Formerly ENGL 4180/8186 Chicano Literature and Culture. (Cross-listed with ENGL 4230).

Prerequisite(s)/Corequisite(s): Graduate, permission.

ENGL 8246 TEACHING LATINO LITERATURE (3 credits)

This course is designed specifically for current or future teachers of high school students. It introduces pedagogical approaches of contemporary literature by Latinos/as in the United States. The course provides an overview of Mexican American, Chicano/a, and other Latino/a voices in American literature from mid-19th Century to the present and complement that with social, cultural, historical and other approaches to developing teaching strategies. (Cross-listed with ENGL 4240)

ENGL 8256 WOMEN'S STUDIES IN LITERATURE (3 credits)

A critical study of literature by and/or about women in which students learn about contributions of women to literature, ask what literature reveals about the identity and roles of women in various contexts, and evaluates standard interpretations from the perspectives of current research and individual experience. (Cross-listed with ENGL 4250, WGST 4250).

ENGL 8266 WOMEN OF COLOR WRITERS (3 credits)

Women of Color Writers is designed to introduce students to the multicultural, literary experience and contributions of women of color writers. The course will elucidate the multi-ethnic and feminist/womanist perspectives reflected in literary works by examining the themes, motifs and idioms about a womanist perspective. The course examines critically the implications and conceptual grounds of literary study which have been based almost entirely on white, male literary experiences and criteria. (Cross-listed with ENGL 4260).

Prerequisite(s)/Corequisite(s): Graduate English major or permission of instructor for 8266

ENGL 8276 WOMEN WRITERS OF THE NORTH AMERICAN WEST (3 credits)

A survey of U.S. and Canadian women writers (18th century to the present) enabling students to examine issues of gender and sexuality across a wide thematic range, including settlement, land use, cultural displacement, and survival in western territories, states, and provinces of North America. (Cross-listed with ENGL 4270, WGST 4270).

Prerequisite(s)/Corequisite(s): Graduate standing; ENGL 8010 or ENGL 8030 recommended.

ENGL 8286 QUEER AMERICAN WESTS (3 credits)

A survey of queer literatures about the American West. The course will explore a variety of genres, including poetry, short stories, plays, novels, creative nonfiction, and, depending on time, film/television. "Queer" will be construed as including any "non-normative" sexualities and sexual identities (e.g., genderqueer, winkle, two-spirit, 3rd/4th gender). Non-western writers (e.g., Walt Whitman) imagining the West queerly may also be included. (Cross-listed with ENGL 4280, WGST 3160).

Prerequisite(s)/Corequisite(s): ENGL 8010 or ENGL 8030 recommended

ENGL 8300 SEMINAR: SHAKESPEARE (3 credits)

Critical analysis of ten tragedies, ten histories, or ten comedies of Shakespeare. Formerly ENGL 9120.

ENGL 8306 ANGLO-SAXON LITERATURE (3 credits)

From the sixth to the eleventh centuries, a people known collectively as the Anglo-Saxons ruled Britain, giving it a new name and establishing the roots of the modern English language. Anglo-Saxon culture continues to haunt the modern imagination. We study the historic, artistic and intellectual environment that produced this influential literary tradition. We also place these people, their language, and their writings within the context of the broader early medieval world. Finally, we engage with some of the foremost modern scholars of this fascinating culture. (Cross-listed with ENGL 4300).

Prerequisite(s)/Corequisite(s): Graduate standing.

ENGL 8310 ECOLOGICAL WRITING AND ANALYSIS (3 credits)

This course provides students with the opportunity to develop expertise in a wide range of foundational works and key techniques of ecological writing and theory in English. By engaging mindfully with these works and techniques, students will develop advanced skills in ecologically oriented critical analysis and creative thinking. This course supports the Writing and Critical Reflection and the Health and the Environment concentrations in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8310)

ENGL 8326 CHAUCER (3 credits)

A literary, linguistic, and historical study of the works of Geoffrey Chaucer: his dream visions, Troilus and Criseyde, and the Canterbury Tales. (Cross-listed with ENGL 4320).

ENGL 8336 RENAISSANCE SATIRE (3 credits)

Satirical traditions and the literature of critique and invective as inherited from medieval and classical forms. Considerations will include satire as an aesthetic, philosophical, and political mode of expression; topicality as it relates to and portrays cultural history; and self-representation through humanist learning and response. (Cross-listed with ENGL 4330).

Prerequisite(s)/Corequisite(s): Graduate standing

ENGL 8346 SHAKESPEARE (3 credits)

A critical study of selected plays and poetry from Shakespeare's works, in the context of the historical and cultural moment of the English Renaissance and as a set of texts inherited and reinvented by modernity. (Cross-listed with ENGL 4340).

Prerequisite(s)/Corequisite(s): ENGL 1160

ENGL 8376 RESTORATION AND EIGHTEENTH CENTURY LITERATURE (3 credits)

Poetry, prose (exclusive of the novel), and drama of England in the Restoration and 18th century (1660-1800), with emphasis on Swift and Johnson. Formerly ENGL 4620/8626. (Cross-listed with ENGL 4370).

ENGL 8396 MEDIEVAL CELTIC LITERATURE (3 credits)

This course examines the literature and culture of the Celtic civilizations. The course examines the archeological record and texts about the Celts by Greek and Roman authors, as well as later medieval tales from the Irish, Welsh, and Breton traditions. All texts are in translation with guided reference to the original languages. (Cross-listed with ENGL 4390).

Prerequisite(s)/Corequisite(s): ENGL 2410 or ENGL 2420 and one ENGL course above 3299, or instructor permission; ENGL 2310 recommended. Not open to non-degree graduate students.

ENGL 8400 SEMINAR: ENGLISH RENAISSANCE (3 credits)

A seminar in a few significant literary figures of the English Renaissance. Formerly ENGL 8080.

ENGL 8410 IMMIGRATION, MIGRATION, AND DIASPORA: CRITICAL APPROACHES AND THEORIES OF MOVEMENT IN LITERATURE (3 credits)

This seminar in literature and some film analyzes the depictions in non-fiction and fiction of displacement as a result of immigration, migration, refugee status, or any other considered movement, intentional or imposed. It will focus largely on the U.S. experiences of those displaced from all locales. (Cross-listed with CACT 8410).

Prerequisite(s)/Corequisite(s): Graduate standing.

ENGL 8416 LITERATURE OF THE ROMANTIC PERIOD (3 credits)

Poetry and prose (excluding the novel) of England from 1798 to 1830. Formerly ENGL 4810/8816. (Cross-listed with ENGL 4410).

ENGL 8426 NINETEENTH-CENTURY ENGLISH AND ANGLOPHONE LITERATURES (3 credits)

English and Anglophone poetry and prose (excluding the novel) in the nineteenth century. (Cross-listed with ENGL 4420).

Prerequisite(s)/Corequisite(s): Graduate standing

ENGL 8436 THE BRITISH AND ANGLOPHONE NOVEL (19TH AND 20TH CENTURY) (3 credits)

Introduction to the British and Anglophone novel in the nineteenth and twentieth century. (Cross-listed with ENGL 4430).

Prerequisite(s)/Corequisite(s): Graduate standing

ENGL 8496 GREAT WORKS OF BRITISH LITERATURE (3 credits)

This course pursues a trans-historical approach to literary study while interrogating what makes a literary work "great" within the field of British Literature. It allows students to engage with great works of British literature from across the ages - starting with the foundations of British literary history in the medieval period and extending to the present. Attending to formal, thematic, and historical dimensions of a wide array of literary texts, we will increase our appreciation of the many ways texts make meaning while developing a deep understanding of the British literary tradition. Reading literature with a sense of purpose and comparatively across time will allow us not only to appreciate great works but also to enhance the impact they have on us. Furthermore, we will recognize how culture and politics inform what literary works become deemed "great," thereby developing a critical understanding of the process of canon formation. (Cross-listed with ENGL 4490).

Prerequisite(s)/Corequisite(s): Graduate standing in English

ENGL 8610 PROFESSIONAL AND TECHNICAL WRITING (3 credits)

This course will introduce students to the theory, research, and practices of professional and technical writing. Through readings, discussions, and assignments, students will gain an understanding of the types and circumstances of communication challenges encountered in the workplace. The course will also consider the roles of persuasion and ethics in written communication. (Cross-listed with CACT 8610).

ENGL 8615 INTRODUCTION TO LINGUISTICS (3 credits)

An introduction to the concepts and methodology of the scientific study of language; includes language description, history, theory, variation, and semantics as well as first and second language acquisition. (Cross-listed with ENGL 3610).

ENGL 8620 SEMINAR: JANE AUSTEN (3 credits)

This seminar examines Jane Austen's oeuvre from her juvenilia to her posthumous fragments, giving particular emphasis to her six great novels, *Northanger Abbey*, *Sense and Sensibility*, *Pride and Prejudice*, *Mansfield Park*, *Emma*, and *Persuasion*. Austen biography and scholarship provide the framework for studying her literary career.

ENGL 8626 HISTORY OF ENGLISH (3 credits)

A critical study of both the internal and external histories of English. Includes historical development of English phonology, morphology, graphics, syntax, diction, dialects, and semantics. (Cross-listed with ENGL 4620).

ENGL 8630 DIGITAL RHETORIC (3 credits)

This course provides students with the opportunity to develop expertise in the theory and practice of digital rhetoric by considering technology's deep impact on how we define and engage in writing. Students examine contemporary writing practices as part of a rich rhetorical tradition while they design and create effective multimodal compositions and analyze foundational works in digital rhetoric. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8630).

ENGL 8640 CREATIVE NONFICTION IN DIGITAL ENVIRONMENTS (3 credits)

Students in this course will study creative nonfiction in digital environments, analyze rhetorical situations created in digital environments, and create individual creative nonfiction blogs-which might include, in addition to other modalities, sounds, animations, and hypertext. The course will also focus on the study and analysis of craft-elements of creative nonfiction: narrative persona, tone, rhythm and style, scenic construction, among others. Students taking this course will learn to read with interpretative and analytical proficiency a broad range of creative nonfiction in digital environments. (Cross-listed with CACT 8640).

ENGL 8646 APPLIED LINGUISTICS (3 credits)

This course is designed to develop knowledge and skills for second language instructors and others interested in second language learning and instruction. Content covers relevant second language acquisition (SLA) theory and second language pedagogy. (Cross-listed with ENGL 4640)

Prerequisite(s)/Corequisite(s): ENGL 3610 and Junior standing or with permission from instructor.

ENGL 8650 WRITING ACROSS DIFFERENCES: RHETORICAL THEORY FOR PERSUASION AND PUBLIC ADVOCACY (3 credits)

This course provides students a theoretical foundation for understanding how language is used in various types of discourses and texts as a means of convincing others of a given viewpoint or idea. Students will apply this theory to real-world writing scenarios in their scholarly areas of interest, to advocacy and social issues movements, or to address workplace needs and goals. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8650).

ENGL 8656 STRUCTURE OF ENGLISH (3 credits)

A study of grammar as it has been conceived through history, including traditional prescriptive and descriptive approaches as well as transformational-generative grammar. (Cross-listed with ENGL 4650).

Prerequisite(s)/Corequisite(s): ENGL 3610 / ENGL 8615 or permission

ENGL 8676 SOCIOLINGUISTICS (3 credits)

An exploration of interconnections between language, culture, and communicative meaning, stressing interactional, situational, and social functions of language as they take place and are created within social contexts. (Cross-listed with ENGL 4670).

Prerequisite(s)/Corequisite(s): ENGL 3610/ENGL 8615, or permission.

ENGL 8696 TOPICS IN LINGUISTICS (3 credits)

Studies in a selected subfield or problem area of linguistics such as sociolinguistics, generative semantics, applied linguistics, descriptive linguistics, teaching English as a foreign language, etc. Formerly ENGL 4960/8966. (Cross-listed with ENGL 4690).

Prerequisite(s)/Corequisite(s): ENGL 4610/ENGL 8616, or permission.

ENGL 8736 RHETORIC (3 credits)

A study of contemporary theories of invention, form, and style and their application in written discourse. Formerly ENGL 4530/8536. (Cross-listed with ENGL 4730).

ENGL 8740 SEMINAR: DISCOURSE, CULTURE, AND POWER (3 credits)

A graduate-level introduction to theories and methodologies of analyzing spoken and written discourse. Students will employ various methods to collect natural language data, including field research, and analyze the data using appropriate theoretical orientations to discourse analysis.

ENGL 8750 OXBOW WRITING PROJECT (3 credits)

Oxbow Writing Project summer institute immerses K-16 educators in writing pedagogy via their own writing, presentations about writing and pedagogy, reading and discussing professional literature, designing and implementing an in-depth inquiry project, and developing leadership strengths. Oxbow is a National Writing Project Site.

Prerequisite(s)/Corequisite(s): Acceptance into Oxbow Writing Project Summer Institute

ENGL 8756 COMPOSITION THEORY & PEDAGOGY (3 credits)

This course is an overview of composition theories and pedagogies since 1968 and focuses on how historical movements in education and theoretical frameworks (rhetorical, expressivist, socio-cognitivist, collaborative, social constructionist, critical pedagogy, cultural studies, feminist, technological, and linguistic theories) both enrich and complicate the teaching of composition. (Cross-listed with ENGL 4750).

ENGL 8760 SEMINAR IN POPULAR CULTURE, MASS MEDIA AND VISUAL RHETORIC (3 credits)

This course studies how discursive meaning is made through established and emerging visual technologies and the impact visual symbol systems are having upon the field of rhetoric in general. Students will investigate how visual technologies, discourse theory, and semiotic theory has intersected with and expanded contemporary rhetorical theories, and they will apply these theories to visual texts. (Cross-listed with COMM 8200).

ENGL 8770 L2 COMPOSITION PEDAGOGY (3 credits)

This course helps prepare students to teach writing to Language Learners. Students will review principles of Second Language Acquisition Theory, study theories of teaching writing, and learn tenets of curriculum design. Students who complete the course will be able to design curricula, courses, syllabi, and lesson plans.

Prerequisite(s)/Corequisite(s): Graduate Standing

ENGL 8775 WRITING CENTER THEORY, PEDAGOGY, AND RESEARCH (3 credits)

This course is an introduction to writing center theory, pedagogy, research, and history. The course is designed for undergraduate and graduate students interested in or already working in a writing center. Throughout the course we will explore a wide range of models for writing center work and the often problematic metaphors associated with those models. The overall aim in this course will be to help students develop multiple strategies for teaching writing one-to-one, for conducting research in writing centers, and for understanding writing center administration. (Cross-listed with ENGL 3770).

ENGL 8796 ENGLISH CAREER PREPARATION (1 credit)

This course will prepare students for an internship or a career, addressing topics such as finding and applying for internships, workplace and industry, resume and cover letters, interviewing techniques, developing a professional portfolio, and statement of goals. Taking this course prior to an internship is highly recommended. (Cross-listed with ENGL 4790).

Prerequisite(s)/Corequisite(s): The course is restricted to undergraduate Majors and graduate students in English.

ENGL 8800 SEMINAR: TOPICS IN ENGLISH LANGUAGE AND LITERATURE (3 credits)

An intensive study of one or more authors, genres in literature and language not covered by regular courses.

Prerequisite(s)/Corequisite(s): Graduate standing

ENGL 8806 ENGLISH INTERNSHIP (1-3 credits)

Supervised internship in a professional setting with a local employer or nonprofit organization. Hands-on experience. Work hours, activities, and responsibilities must be specified in a written agreement between the employer and the student in consultation with the internship director. Some internships will be paid and some will not. (Cross-listed with ENGL 4800).

Prerequisite(s)/Corequisite(s): ENGL 2410 or ENGL 2420, an ENGL 4000-level writing course, and permission of internship director.

ENGL 8816 DIGITAL LITERACIES FOR TECHNICAL COMMUNICATORS (3 credits)

This course addresses emerging issues in digital literacies such as the rhetoric of technology, technological competency, technology and information ecologies, critical awareness of technology and human interactions, judicious application of technological knowledge, user-centered design, networking and online communities, ethics and technology, and culture and technology. (Cross-listed with ENGL 4810, JMC 8816, JMC 4810).

Prerequisite(s)/Corequisite(s): Graduate Standing or permission of instructor

ENGL 8826 AUTOBIOGRAPHY (3 credits)

In this creative nonfiction writing course, students will craft, workshop, and revise original works of autobiographical nonfiction. Students will read, discuss and critically analyze writing techniques found in diverse autobiographical prose by published authors and student peers. A final project will invite students to research and summarize a book-length autobiography of their own. (Cross-listed with ENGL 4820).

Prerequisite(s)/Corequisite(s): graduate standing

ENGL 8836 TECHNICAL COMMUNICATION (3 credits)

Technical Communication introduces students to the field of technical communication. Students will study the development of print and electronic genres common to industry settings, the design and production of technical documents, the writing processes and work practices of professional technical communicators, and the roles of technical communicators in organizational contexts. (Cross-listed with ENGL 4830, JMC 4830, JMC 8836).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

ENGL 8846 TRAVEL WRITING (3 credits)

Travel Writing is a course in professional writing. Although the course includes critical examinations of texts, the primary focus is on the composition of various kinds of travel essays. (Cross-listed with ENGL 4840).

Prerequisite(s)/Corequisite(s): Graduate standing

ENGL 8850 SEMINAR: SPIRITUAL NONFICTION (3 credits)

Spiritual Nonfiction is a creative nonfiction writing seminar where students study and practice various forms and styles of spiritual nonfiction. The comparative study of spirituality and religion is not the focus of this course. Writing is the focus. Discussion of the characteristics of spiritual experiences and ideas will be limited to their formalistic treatment within individual works.

Prerequisite(s)/Corequisite(s): Graduate Standing. At least one creative nonfiction writing course at 4000/8000 level.

ENGL 8856 INFORMATION DESIGN FOR TECHNICAL COMMUNICATORS (3 credits)

This course introduces students to strategies for integrating visual and textual elements of technical documents. Instruction will focus on design theory and application through individual and collaborative projects. Students will develop the professional judgment necessary for making and implementing stylistic choices appropriate for communicating technical information to a lay audience. (Cross-listed with ENGL 4850, JMC 4850, JMC 8856).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

ENGL 8866 THE MODERN FAMILIAR ESSAY (3 credits)

Students in this course will read as well as write the Modern Familiar Essay, a sub-genre of Creative Nonfiction, with an emphasis on writing the informal essay. Essays will represent a wide scope of perspectives and issues, including gender, social class, education, politics, culture, sexuality, health, race, and ethnicity, and will range from the the sixteenth century "inventor" of the modern essay to twenty-first century practitioners of the form. This course will also cover a wide range of sub-genres and stylistic forms, such as memoir, autobiography, flash, experimental, and more. (Cross-listed with ENGL 4860).

Prerequisite(s)/Corequisite(s): Graduate standing and/or admittance to the Advanced Writing program

ENGL 8870 SEMINAR: PUBLISHING NON-FICTION (3 credits)

A seminar in the process leading to publication of essays in one or more of the following genres: scholarly essay, personal essay, travel essay, pedagogical essay, autobiographical essay.

Prerequisite(s)/Corequisite(s): Graduate standing and 6 hours of graduate credit.

ENGL 8876 TECHNICAL EDITING (3 credits)

This course introduces students to the roles and responsibilities of technical editors: the editorial decision-making processes for genre, design, style, and production of technical information; the communication with technical experts, writers, and publishers; the collaborative processes of technical editing; and the techniques technical editors use during comprehensive, developmental, copyediting, and proofreading stages. (Cross-listed with ENGL 4870, JMC 4870, JMC 8876).

Prerequisite(s)/Corequisite(s): ENGL 1160 or permission of the instructor

ENGL 8880 ADVANCED PLACEMENT INSTITUTE: LANGUAGE & COMPOSITION (3 credits)

An intensive Advanced Placement Summer Institute focusing on curricular and pedagogical questions, paired with independent specialized research into various topics related to the planning, organization, implementation, and improvement of Advanced Placement English Language and Composition instruction and learning at the secondary educational level. Course may be repeated if the APSI topic is different.

Prerequisite(s)/Corequisite(s): Must register for and successfully complete the UNO Advanced Placement Summer Institute for English Language and Composition.

ENGL 8890 SEMINAR: EXPERIMENTS IN CREATIVE NONFICTION (3 credits)

This is a graduate seminar in creative nonfiction. This course explores, through an intensive engagement with long and short forms of creative nonfiction, the ways in which contemporary practitioners of the genre have experimented with form and meaning. Students will attempt their own experiments in writing.

Prerequisite(s)/Corequisite(s): Graduate Standing, Two graduate-level creative nonfiction courses from ENGL 8846, ENGL 8866, ENGL 8870, or ENGL 8800, when topic is appropriate.

ENGL 8896 CAPSTONE COURSE IN TECHNICAL COMMUNICATION (3 credits)

In this capstone course, students will extend foundational skills learned in previous technical communication courses. Students will demonstrate their competency in the technical documentation process in organizational environments, the issues important to the technical communication profession, and the practices of writing and creating complex technical documents for specific purpose and audience. (Cross-listed with ENGL 4890, JMC 8896, JMC 4890).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

ENGL 8900 INDEPENDENT STUDY (1-3 credits)

Specially planned readings in a well-defined field of literature or language, carried out under the supervision of a member of the graduate faculty. Designed primarily for the student who has need of work not currently available in the departmental offering and who has demonstrated capability of working independently.

Prerequisite(s)/Corequisite(s): Graduate, permission of instructor, and no "incompletes" outstanding.

ENGL 8910 SEMINAR: CRITICAL THEORY (3 credits)

Seminar in critical theory with readings in New Criticism, semiotics, structuralism, deconstruction, New Historicism, feminist and gender theory, cultural materialism, psychoanalytic theory, queer theory, postcolonial theory, New Formalism, and other more recent theoretical developments in literary study.

Prerequisite(s)/Corequisite(s): ENGL 8010 recommended.

ENGL 8936 NARRATIVE NONFICTION (3 credits)

Students will read, discuss, and write critical analyses of narrative nonfiction by published and student writers. They will craft, workshop, and revise original works of narrative nonfiction. (Cross-listed with ENGL 4930).

Prerequisite(s)/Corequisite(s): One creative nonfiction course or permission from the instructor

ENGL 8956 BRINGING THE WAR HOME: DEPICTIONS OF WAR VETERANS IN LITERATURE AND FILM (3 credits)

Course explores the impact of war on combatants, their families and communities as represented in literary fiction, film, historical documentation, first-person accounts, and other texts written in or translated to English. (Cross-listed with ENGL 4950, MEDH 4950).

Prerequisite(s)/Corequisite(s): Graduate standing

ENGL 8966 TOPICS IN LANGUAGE AND LITERATURE (3 credits)

This course introduces students to a specialized subject matter in the discipline of English Studies not covered in existing courses. This course may be repeated for different topics. (Cross-listed with ENGL 4960).

Prerequisite(s)/Corequisite(s): Graduate Standing

ENGL 8976 WRITING ABOUT SICKNESS AND HEALTH (3 credits)

Students will explore many themes of the human experience in healthcare through reading and discussion of selected poems, short stories, excerpts from fiction, and essays and creative nonfiction. To help students generate their own poems, stories, and essays, the class will incorporate the work of community writing programs and projects. (Cross-listed with ENGL 4970).

ENGL 8990 THESIS (3-6 credits)

Independent research or creative project written under the supervision of a director.

Prerequisite(s)/Corequisite(s): Graduate, permission of thesis director. Not open to non-degree graduate students.

Entrepreneurship (ENTR)

ENTR 8156 GEOGRAPHY, GENDER AND ENTREPRENEURSHIP (3 credits)

An advanced seminar focused on links among geography, gender and work, emphasizing leadership and entrepreneurship. The course considers theory and method in addition to empirical work. The nature of space, of gender, and of work, are examined. Topics include the gendering of work, the geography of entrepreneurship, gender and leadership. (Cross-listed with ENTR 4150, GEOG 4150, GEOG 8156, WGST 4150, WGST 8156)

Prerequisite(s)/Corequisite(s): Junior, senior, or graduate standing, or permission of instructor.

ENTR 8716 COMPARATIVE INTERNATIONAL DEVELOPMENT AND INNOVATION (3 credits)

Comparative International Development and Innovation will analyze the rise and fall of civilizations from a historical and theoretical perspective in a comparative manner. The course will address issues concerning political, social, economic, and environmental change in national, and international contexts. Among its major emphases are state institutions, economic growth, entrepreneurship, and the transformation of social structure and culture. (Cross-listed with ENTR 4710, PSCI 4710, PSCI 8716).

Environmental Engineering (ENVE)

ENVE 8980 SPECIAL PROBLEMS IN ENVIRONMENTAL ENGINEERING (1-6 credits)

Special research-oriented problems in current topics in environmental engineering.

Prerequisite(s)/Corequisite(s): Permission.

ENVE 8990 MASTER'S THESIS (6-10 credits)

Master's thesis work

ENVE 9900 SEMINAR IN ENVIRONMENTAL ENGINEERING (1 credit)

Presentation and discussion of current research topics and projects in environmental engineering and closely allied areas.

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

ENVE 9980 SPECIAL TOPICS IN ENVIRONMENTAL ENGINEERING (1-6 credits)

Independent library and/or experimental research, analysis, evaluation and presentation of current and advanced topics in environmental engineering and closely related areas.

Prerequisite(s)/Corequisite(s): Permission.

Environmental Studies (ENVN)

ENVN 8316 OUR ENERGY FUTURE: SOCIETY, THE ENVIRONMENT AND SUSTAINABILITY (3 credits)

In this course, students will analyze our energy options including the environmental, economic, and ethical connections with a particular emphasis on electrical energy. The course doesn't prescribe a particular energy future but rather emphasizes development of the knowledge and skills to more effectively contribute to the conversation. To understand our future, the course begins with the present energy landscape and its historical underpinnings, then focuses on developing a student's ability to critically assess energy options by examining the associated implications, consequences, intent, origins, and bias. Students' own work, life, and academic experience are used in the course to underscore the individual relevance of these energy choices. The course includes the necessary science, but the greater emphasis is on the associated critical and creative thinking so that ultimately students can make informed, creative, sustainable energy choices. (Cross-listed with ENVN 4310, CACT 8316)

Prerequisite(s)/Corequisite(s): Graduate standing.

ENVN 8336 INTRODUCTION TO GREEN INFRASTRUCTURE (3 credits)

This course provides an overview of green infrastructure including issues managed with green infrastructure (storm water quality and quantity, urban habitat value, urban sustainability, etc.); basic design and management parameters for best management practices (BMPs); case study applications of BMPs; treatment train assessment and evaluation; and regulatory and cost considerations. (Cross-listed with ENVN 4330).

Prerequisite(s)/Corequisite(s): Graduate standing.

ENVN 8356 GLOBAL CLIMATE CHANGE (3 credits)

The primary objective of this course is for students to form a scientific, evidence-based, stance on current and future changes to the Earth's climate. To this end, this course will be based on scientific inquiry into the current state of knowledge. Particular emphases are placed on evidence and causes of change, and the associated environmental and social impacts, including: water resources, extreme weather, human health, and others of interest to the class. (Cross-listed with GEOG 8356, GEOG 4350, ENVN 4350).

Prerequisite(s)/Corequisite(s): Graduate standing

ENVN 8826 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

An introduction to environmental law and regulations intended for students pursuing careers in environmental sciences or related fields. The course emphasizes the origins, implementation, and enforcement of U.S. state and federal laws and regulations. Major federal environmental laws, covering air and water quality, solid and hazardous waste, pollution prevention and remediation, and natural resources will be discussed. Usually offered Fall semesters. (Cross-listed with ENVN 4820, BIOL 4820, GEOG 8826, GEOG 4820, PA 8826).

Prerequisite(s)/Corequisite(s): Graduate Standing or Permission from the Instructor.

Executive Master of Science/ Information Technology (EMIT)

EMIT 8000 MANAGING & LEADING IN A DIGITAL WORLD (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to the challenges and opportunities of managing and leading in a digital world within the context of a dynamic environment of technology workforce diversity, a global and emerging collaborative economy, and concern for ethics and social responsibility in the development of systems/technologies.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8050 IT LEADERSHIP (2 credits)

This course equips students with the knowledge, skills and tools to be an effective information technology (IT) leader. The primary focus of the course is on developing leadership capability and ability to contribute, both strategically and operationally, to the performance of an organization through IT.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8100 IT STRATEGY AND CHANGE MANAGEMENT (2 credits)

This course introduces students to a critical view of both strategic and tactical levels of IT management. The course also addresses the challenges of managing IT-enabled change and the complexities associated with managing people, processes, and technology.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program is required. Not open to non-degree graduate students.

EMIT 8150 BIG DATA ANALYTICS AND VIZUALIZATION (2 credits)

This course introduces students to data analytics including big data analytics, data quality, and visualization. Topics will include concepts, exercises, tools and techniques surrounding data analytics, quality, visualization, IoT and cloud computing within the context of addressing business challenges and/or to create competitive advantage.

Prerequisite(s)/Corequisite(s): This course is intended exclusively for IT professionals in the EMIT program. Not open to non-degree graduate students.

EMIT 8200 MANAGING INFORMATION TECHNOLOGY INNOVATION (2 credits)

This course introduces students to the concepts, applications and tools for facilitating IT Innovation, Creativity, Entrepreneurship and Risk Taking.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8250 MANAGING INFORMATION ASSURANCE (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to information assurance topics including areas such as managing cloud and mobile security, IT governance and policy, and information assurance planning and deployment.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8300 SYSTEMS DEVELOPMENT AND MAINTENANCE (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to the development and maintenance of software-intensive systems.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8350 ENTERPRISE COMPUTING IN THE ERA OF BIG DATA (2 credits)

This course explores design, managerial and technical issues relevant to creating big data based solutions from a holistic viewpoint. Students will develop an understanding of both the technical and business aspects by exploring a balanced view of the theoretical foundation and practical implications of Enterprise Computing in the context of Big Data and other related (emerging) technologies.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8400 LEADING TEAMS AND MANAGING VIRTUAL WORK (2 credits)

This course introduces students in the Executive Master of Science in Information Technology (EMIT) program to fundamental concepts, principles, theories, and practices related to organizational teamwork. Students will learn and practice skills to run productive & effective collaborative problem solving efforts, using modern collaboration technology.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8450 EVALUATION OF ENTERPRISE I.T. (2 credits)

This course introduces students to concepts associated with evaluation of enterprise IT investments. Topics addressed will include understanding financial statements, IT investment value vs risk tradeoffs, understanding cost of adopting IT innovations and/or emerging technologies, designing reports, designing of IT-KPIs, performance measurement systems such as balanced scorecard and more.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8500 MANAGING AND LEVERAGING EMERGING TECHNOLOGIES (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to industry models and processes to identify, track, pilot and eventually adopt business innovations and/or emerging technologies that could provide an advantage for a business. Students will also learn how IT can facilitate business process change. Concepts and exercises surrounding Lean IT will be covered to optimize the processes in the IT organization.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8700 EMERGING CHALLENGES FOR IT EXECUTIVES (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to emerging challenges that will be faced by IT executives.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8990 INTEGRATED EMIT CAPSTONE PROJECT (2-6 credits)

This course serves as the integrated capstone project for the Executive Master of Science in Information Technology (EMIT) program.

Prerequisite(s)/Corequisite(s): Admission to the executive Master of Science in IT (EMIT) program and completion of all cohort modules prior to submission of integrated project. Concurrent enrollment with other EMIT modules will be required. Not open to non-degree graduate students.

Foreign Language & Literature (FLNG)

FLNG 8020 SEMINAR:FL/TESOL RESEARCH (3 credits)

A survey of Second Language Acquisition theory and methodology culminating in a student-designed, classroom-based research project.

FLNG 8030 SEMINAR: SECOND LANGUAGE ACQUISITION THEORY (3 credits)

An advanced introduction to second language acquisition theories based in neurolinguistics, psycholinguistics, and sociolinguistics. Students will explore various schools of thought about how people learn languages other than their language(s) of nurture; this includes languages that are acquired by adolescents and adults, both inside and outside the classroom.

FLNG 8040 SEMINAR: ASSESSMENT & CURRICULUM DESIGN (3 credits)

This course will familiarize (future) language educators with current trends in the assessment of language skills as well as expose them to the design, implementation, and evaluation of second language curricula.

FLNG 8050 THEORY AND METHODS IN THE TEACHING OF HERITAGE LANGUAGES (3 credits)

This course is designed to introduce graduate candidates to current theoretical and pedagogical approaches to teaching heritage languages in the United States. As dedicated practitioners, reflective scholars, and responsible citizens, students will be able to explore evidence-based pedagogical and assessment strategies to use in educational contexts serving bilingual/heritage speakers.

Prerequisite(s)/Corequisite(s): SPAN 8086 or instructor permission

FLNG 8060 APPROACHES AND METHODS IN LANGUAGE TEACHING (3 credits)

This course offers a foundation in the approaches and methods for the teaching of second language, third languages, and foreign languages from the perspectives of language acquisition research and language teaching pedagogy. The main goals are to teach teachers and applied linguistics researchers about current research-based approaches to teaching languages including content-based instruction, task-based instruction, and critical approaches. The course also dives into best practices for syllabus design, lesson planning, and creation of course and lesson objectives.

Prerequisite(s)/Corequisite(s): Graduate standing

FLNG 8900 DIRECTED READINGS (3 credits)

Special directed readings arranged individually with students on topics not explored in other graduate offerings.

Prerequisite(s)/Corequisite(s): Permission of instructor and/or at least twelve graduate hours completed. Graduate non-degree students not allowed.

FLNG 8960 SEMINAR:SPECIAL TOPICS (3 credits)

This course provides a format for the exploration of topics of interest to advanced foreign language/TESOL students.

French (FREN)

FREN 8036 ADVANCED FRENCH CONVERSATION (3 credits)

This course focuses on the development of oral skills in French through the use of complex and sophisticated conversational structures and nuanced lexicon. Students will be involved in expressing or presenting their ideas and opinions, interpersonal speaking activities, and a variety of activities including reading short literary and cultural texts and screening films. (Cross-listed with FREN 4030).

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

FREN 8056 SEMINAR IN THE CULTURE AND CIVILIZATION OF QUEBEC (3 credits)

An introduction to the many facets of Quebec Culture & Civilization, through readings on Quebec's history and contemporary culture and also through films and other media related to Quebec. (Cross-listed with FREN 4050).

Prerequisite(s)/Corequisite(s): FREN 2120 or departmental permission.

FREN 8156 CONTEMPORARY FRENCH NOVEL (3 credits)

Selected contemporary French novels are analyzed and discussed. The main objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the texts under consideration. In addition, students will examine the sociopolitical and cultural contexts of these literary works. (Cross-listed with FREN 4150).

Prerequisite(s)/Corequisite(s): FREN 3060 or departmental permission. Not open to non-degree graduate students.

FREN 8176 CONTEMPORARY FRENCH THEATER (3 credits)

Selected contemporary French plays are analyzed and discussed. The main objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the texts under consideration. (Cross-listed with FREN 4170).

Prerequisite(s)/Corequisite(s): FREN 3060 or permission of instructor. Not open to non-degree graduate students.

FREN 8226 THE STRUCTURE OF FRENCH (3 credits)

A survey of the linguistic structure of modern French, including phonology, morphology, and syntax. (Cross-listed with FREN 4220).

Prerequisite(s)/Corequisite(s): FREN 3040 or departmental permission. Not open to non-degree graduate students.

FREN 8440 SEMINAR: FRENCH COMPOSITION (3 credits)

This course provides opportunities for students to refine their composition skills in French through extensive writing workshops and peer editing. Computer applications to composition will be employed.

Prerequisite(s)/Corequisite(s): Admission to the Graduate College.

FREN 8866 MODERN FRENCH WOMEN AUTHORS (3 credits)

Selected contemporary French literary texts written by women are analyzed and discussed. This may include novels, short stories, poetry, and graphic novels. The primary objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the works under consideration. In addition, students will examine the sociopolitical and cultural contexts of these works. (Cross-listed with FREN 4860).

Prerequisite(s)/Corequisite(s): FREN 3060 or permission. Not open to non-degree graduate students.

FREN 8900 FRENCH INDEPENDENT STUDY (1-3 credits)

Specifically planned projects and readings in a well-defined field of French literature or linguistics carried out under the supervision of a member of the foreign languages faculty holding graduate faculty status.

FREN 8906 INDEPENDENT STUDY (1-3 credits)

Specially planned readings in a well-defined field of literature, carried out under the supervision of a member of the foreign language faculty. Designed primarily for the student who has need of work not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated for credit once. (Cross-listed with FREN 4900).

Prerequisite(s)/Corequisite(s): Permission of the instructor, junior or senior standing, and no incompletes outstanding. Not open to non-degree graduate students.

FREN 8956 PRO-SEMINAR: LITERATURE AND/OR FILM (3 credits)

This course is dedicated to the study of a narrow field of the literature and/or cinema of the Francophone world. (Cross-listed with FREN 4950).

Prerequisite(s)/Corequisite(s): Graduate student status.

FREN 8966 PRO-SEMINAR: CULTURE AND SOCIETY (3 credits)

This course will address narrow field of study of the civilization, history, film, contemporary culture, art, politics, and or cultural studies of the Francophone world. (Cross-listed with FREN 4960).

Prerequisite(s)/Corequisite(s): FREN 3030, FREN 3040, and FREN 3060

FREN 8976 PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS (3 credits)

This course will address a narrow field of study of linguistics, translation/interpretation or the professional language of the Francophone world. (Cross-listed with FREN 4970).

Prerequisite(s)/Corequisite(s): Graduate student status.

Geography (GEOG)

GEOG 8000 HISTORY AND PHILOSOPHY OF GEOGRAPHY (3 credits)

Introduction to history of geography. Emphasis on significant concepts, methodologies, and philosophies in geography from classical Greeks to the present.

Prerequisite(s)/Corequisite(s): Permission

GEOG 8016 CONSERVATION OF NATURAL RESOURCES (3 credits)

This course provides a diverse overview of the principles and contemporary issues related to ecology and management of wildlife, fisheries, forests, soil, rangeland, minerals, and water. It includes the philosophical, economic and social aspects of resource management. Current local, regional, and global issues are examined. (Cross-listed with GEOG 4010).

Prerequisite(s)/Corequisite(s): Three hours of geography

GEOG 8026 SPATIAL ANALYSIS IN GEOGRAPHY (3 credits)

An introduction to spatial analysis with a focus on spatial statistics. Emphasis will be placed on the nature of geographic data, spatial data handling, modeling logic, sampling theory, and design. Both descriptive and spatial statistics methods are covered. Students will receive hands-on experience working with statistical data sets, software, and scientific visualization of research results. (Cross-listed with GEOG 4020).

Prerequisite(s)/Corequisite(s): STAT 1530 or STAT 3000 and GEOG 4050 or permission

GEOG 8036 COMPUTER MAPPING AND VISUALIZATION (3 credits)

Computer techniques in the mapping and visualization of spatial data. Various forms of spatial data manipulation and computer graphic output techniques are examined. Particular attention is given to the creation of maps for the internet and the incorporation of interaction and animation in their display. (Cross-listed with GEOG 4030).

Prerequisite(s)/Corequisite(s): GEOG 1090 or permission of instructor. Background in programming, particularly JavaScript, highly recommended.

GEOG 8040 SEMINAR IN EDUCATION GEOGRAPHY (3 credits)

This seminar surveys the goals, methods, and content associated with teaching geography in elementary, secondary, and in higher education. It is designed to aid current and future teachers in teaching geography.

Prerequisite(s)/Corequisite(s): Permission

GEOG 8046 GEOARCHAEOLOGY (3 credits)

An introduction to geoarchaeology: the application of methods and techniques of geography, geology and other earth sciences to solve archaeological problems and reconstruct past environments. (Cross-listed with GEOL 4040, GEOG 4040).

GEOG 8056 GEOGRAPHIC INFORMATION SYSTEMS I (4 credits)

An introduction to the concepts and principles of geographic information systems (GIS). Emphasis will be placed on geographic data inputs, manipulation, analysis, and output functions. Exercises introduce students to GIS software and applications. Usually offered Fall, Spring, Summer. (Cross-listed with GEOG 4050).

Prerequisite(s)/Corequisite(s): 3 hours in Geography or by permission

GEOG 8106 BIOGEOGRAPHY (3 credits)

This course is intended as an introduction to biogeography, the study of the distribution and evolution of organisms across space and through time. Usually offered every year. (Cross-listed with BIOL 4100, GEOL 4100, BIOL 8106, GEOL 8106, GEOG 4100).

Prerequisite(s)/Corequisite(s): BIOL 1450 and BIOL 1750 or GEOL 3100 or BIOL 3100, junior-senior

GEOG 8126 URBAN GEOGRAPHY (3 credits)

This course is designed to serve as an introduction to the complex and dynamic urban system, including the physical, economic, political, cultural, social, and environmental forces that shape the form and function of cities, as well as how individuals and groups experience urban life. We make ample use of geographic information systems (GIS) to analyze cities and better understand crucial urban concepts such as urban growth and development, patterns of urban form, segregation and neighborhood change, economic specialization and agglomeration, urban sprawl, and environmental justice. (Cross-listed with GEOG 4120).

GEOG 8130 SEMINAR IN ECONOMIC GEOGRAPHY (3 credits)

This seminar course investigates the development of current world economic systems through the elements of primary, secondary, tertiary, quarternary and quinary production on a micro and macro scale. Exchange and transactional systems, consumption linkages, resource management, economic health on global and local scales, and location decision-making are major topics.

Prerequisite(s)/Corequisite(s): Graduate in geography and permission of instructor

GEOG 8156 GEOGRAPHY, GENDER AND ENTREPRENEURSHIP (3 credits)

An advanced seminar focused on links among geography, gender and work, emphasizing leadership and entrepreneurship. The course considers theory and method in addition to empirical work. The nature of space, of gender, and of work, are examined. Topics include the gendering of work, the geography of entrepreneurship, gender and leadership. (Cross-listed with WGST 4150, GEOG 4150, ENTR 4150, ENTR 8156, WGST 8156).

Prerequisite(s)/Corequisite(s): Junior, senior, or graduate standing, or permission of instructor.

GEOG 8166 URBAN SUSTAINABILITY (3 credits)

Using sustainability as a conceptual framework, students in this course will investigate a variety of social, economic, and environmental challenges facing cities of the 21st century. Topics and issues explored include urban growth and expansion, livability, equity & gentrification, energy use & production, urban farming, poverty, automobility & transportation, water security, urban pollution, and the role of cities in climate change. (Cross-listed with GEOG 4160)

Prerequisite(s)/Corequisite(s): Graduate standing.

GEOG 8176 ADVANCED CULTURAL GEOGRAPHY (3 credits)

This course examines current theoretical debate and research practice in a select topic in Cultural Geography. Emphasis will be on readings and discussion with students engaging in original research. Specific thematic focus will vary from year to year. This course may be taken multiple times as long as topics differ. (Cross-listed with GEOG 4170).

Prerequisite(s)/Corequisite(s): Graduate standing and permission of the instructor.

GEOG 8210 SEMINAR IN CULTURAL GEOGRAPHY (3 credits)

This course explores the different theoretical, methodological and empirical approaches in cultural geography, while also addressing its development, its evolution, its competing schools of thought, and new frontiers.

Prerequisite(s)/Corequisite(s): Permission

GEOG 8236 GREAT PLAINS & NEBRASKA (3 credits)

This course is a comprehensive examination of the Great Plains region from a geographical perspective. It considers both the physical and human geography of the Plains, with particular attention to our home, Nebraska. Topics to be covered include: the Plains' unique ecosystems, its early human inhabitants, its later settlers, its evolving land-use patterns, and current issues. (Cross-listed with GEOG 4230).

GEOG 8266 PROCESS GEOMORPHOLOGY (4 credits)

A lecture and laboratory course focused on understanding Earth surface processes and the evolution of landforms across spatial and temporal scales. The course emphasizes applying unifying concepts in geomorphology, quantitative methodology and modern process-oriented geomorphology to interpret landscape evolution. (Cross-listed with GEOG 4260, GEOL 4260).

Prerequisite(s)/Corequisite(s): One of the following: GEOL 1010, GEOL 1170, GEOG 1030, GEOG 1050 or instructor permission.

GEOG 8310 GEOGRAPHY OF AGRICULTURE (3 credits)

A systematic study of the characteristics and patterns of world agriculture. Usually offered on demand.

Prerequisite(s)/Corequisite(s): Permission

GEOG 8326 CLIMATOLOGY (3 credits)

A study of climatic processes and their effect on shaping the physical landscape. Emphasis on physical and applied aspects of the field. (Cross-listed with GEOG 4320).

Prerequisite(s)/Corequisite(s): GEOG 1030, GEOG 1050, GEOG 3510, or permission of instructor.

GEOG 8336 SOIL GENESIS, MORPHOLOGY AND CLASSIFICATION (4 credits)

This course is designed to familiarize students with basic soil chemical, physical and biological properties, soil morphological characteristics, soil classification and soil forming processes. The course focuses on relationships between soils and environmental factors and how such factors alter soil forming processes. The lab will focus on developing basic field skills, including soil morphological descriptions and soil mapping, as well as common laboratory methods used to analyze soils. (Cross-listed with GEOG 4330, GEOL 4330).

Prerequisite(s)/Corequisite(s): One of the following: GEOG 1030, GEOG 1050, GEOL 1010, GEOL 1170 or instructor permission.

GEOG 8346 WATER RESOURCES (3 credits)

This course explores the applied principles of hydrology, water systems modeling, river basin development, and water management issues and practices in the United States and other parts of the world. Two local Saturday field trips will be required. (Cross-listed with GEOG 4340).

Prerequisite(s)/Corequisite(s): Six hours of Physical Geography or equivalent and graduate standing.

GEOG 8356 GLOBAL CLIMATE CHANGE (3 credits)

The primary objective of this course is for students to form a scientific, evidence-based, stance on current and future changes to the Earth's climate. To this end, this course will be based on scientific inquiry into the current state of knowledge. Particular emphases are placed on evidence and causes of change, and the associated environmental and social impacts, including: water resources, extreme weather, human health, and others of interest to the class. (Cross-listed with GEOG 4350, ENVN 8356, ENVN 4350).

Prerequisite(s)/Corequisite(s): Graduate standing

GEOG 8500 SPECIAL TOPICS IN GEOGRAPHY (1-3 credits)

This course will provide for an in-depth study of a geographical or geological subject (as specified in the course subtitle). Subjects will be offered as sections of GEOG 8500, but will be separate from one another. Students may repeat GEOG 8500 as often as they like as long as no specific subject is duplicated. Course to be offered with approval of Graduate Program Committee and Dean for Graduate Studies.

Prerequisite(s)/Corequisite(s): Variable

GEOG 8535 CARTOGRAPHY AND DATA VISUALIZATION (4 credits)

An introduction to the concepts and techniques of map construction and visual data communication. Topics include map scale, map projections, thematic cartography, history of cartography, computer mapping, and global positioning systems. Particular attention is given to designing both paper and Internet distributed maps. This course is offered in both the Fall and Spring semesters. (Cross-listed with GEOG 3530).

Prerequisite(s)/Corequisite(s): GEOG 1000 or GEOG 1020 and GEOG 1030 or GEOG 1050

GEOG 8536 HISTORICAL GEOGRAPHY OF THE UNITED STATES (3 credits)

This course examines the geography, physical and human, real, perceived, or theoretical, of the United States' historical development. It considers the ways history has and has not been affected by geography. It will also cover the field of historical geography, its theories and practices. (Cross-listed with GEOG 4530).

GEOG 8545 CARTOGRAPHY & GIS LAB (2 credits)

An introduction to the methods and techniques of map construction using both graphic design and geographic information system software. Topics include map design for both general reference and thematic maps. Particular attention is given to the processing, compilation, data classification, and symbolization of various types of spatial data. This course is the lab component of GEOG 8535.

Prerequisite(s)/Corequisite(s): Concurrent or previous registration in GEOG 8535.

GEOG 8556 GEOGRAPHY OF ECONOMIC GLOBALIZATION (3 credits)

A study of the geography of economic globalization and the geography of the world economy. The major topics include the historical development of the world economy and globalization from the geographical perspective, trends in geography of global production, trade and investment, the most important factors and actors in the globalization processes and its geographic effects, geography of transnational corporations, case studies of economic geography of selected industries and service activities, effects of globalization on the developed and developing countries. This course also supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with GEOG 4550, CACT 8116).

Prerequisite(s)/Corequisite(s): Graduate status.

GEOG 8600 INDEPENDENT RESEARCH (1-3 credits)

This is an independent research course, where students undertake and complete a focused independent project under faculty supervision, exploring an aspect of geography in greater depth.

Prerequisite(s)/Corequisite(s): Completed independent research contract between faculty and student and permission of adviser or the Graduate Studies Coordinator.

GEOG 8616 ENVIRONMENTAL MONITORING AND ASSESSMENT (3 credits)

An interdisciplinary approach to techniques for the design and implementation of environmental inventory and monitoring schemes used to evaluate natural resources. Students work as teams to synthesize information from their backgrounds in geography, geology and ecology to evaluate the impacts of human actions on environmental quality following the framework for environmental assessments provided by the National Environmental Policy Act. Course is organized to accommodate variable needs of students with different backgrounds and career choices. Usually offered every year. (Cross-listed with BIOL 4610, ENVN 4610, GEOG 4610, GEOL 4610, GEOL 8616)

Prerequisite(s)/Corequisite(s): Permission of instructor.

GEOG 8626 GEOGRAPHICAL FIELD STUDIES (3 credits)

Field experience course based on variable topics and themes. Students must attend the multiple day field trip that will require overnight stays. (Cross-listed with GEOG 4620).

Prerequisite(s)/Corequisite(s): Instructor Permission. Not open to non-degree graduate students.

GEOG 8636 ENVIRONMENTAL REMOTE SENSING (4 credits)

An introduction to remote sensing science and technology. Emphasis will be placed on multispectral data, matter/energy interactions, sensor system characteristics, photogrammetry, image interpretation, digital image processing, and environmental applications. Formal laboratory instruction will provide students with problem-solving skills and hands-on experience with remote sensing and GIS software. (Cross-listed with GEOG 4630).

Prerequisite(s)/Corequisite(s): GEOG 1060 or GEOG 1070 or GEOL 1170. Introductory statistics highly recommended.

GEOG 8640 REMOTE SENSING ADVANCED CONCEPTS AND APPLICATIONS (3 credits)

Designed for the graduate student desiring to do advanced work in remote sensing. The emphasis of the course is on non-photographic sensors and especially digital processing of multispectral satellite data. The applications are multidisciplinary in nature. Usually offered on demand.

Prerequisite(s)/Corequisite(s): GEOG 4630 / GEOG 8636

GEOG 8646 CRITICAL ZONE SCIENCE (4 credits)

This course examines the Critical Zone (CZ), Earth's permeable layer that extends from the top of vegetation to the bottom of groundwater. The CZ is a constantly evolving layer where rock, soil, water, air, and living organisms interact to regulate the landscape and natural habitats; it also determines the availability of life-sustaining resources, including our food production and water quality. CZ science is an interdisciplinary and international endeavor focused on cross-disciplinary science. In this course, we will focus on using data available from the existing National Science Foundation (NSF)-funded CZ Observatories (CZOs) along with readings, discussions and activities to explore interactions within the CZ. (Cross-listed with GEOG 4640, GEOL 4640)

Prerequisite(s)/Corequisite(s): One of the following: GEOL 1170, GEOL 1010, GEOG 1030 or GEOG 1050; one chemistry or physics course recommended; or instructor permission.

GEOG 8650 LAND USE (3 credits)

A field course designed to understand, by actual field investigation, land use patterns in urban areas through the comprehension of social, physical and economic factors which tend to shape the land use of a given place. The major emphasis will be placed upon field investigations in the urban area, with the functional region receiving the major consideration.

Prerequisite(s)/Corequisite(s): GEOG 4120/ GEOG 8126

GEOG 8666 GEOGRAPHIC INFORMATION SYSTEMS II (4 credits)

An introduction to advanced geographic information systems (GIS) topics. Emphasis will be placed on algorithms and analysis for information extraction. Topics include spatial interpolation, remote sensing GIS integration, software development, spatial analysis, GIS modeling, and future advances in GIS. Formal laboratory instruction will provide students with GIS experience to solve application problems. Usually offered in Fall. (Cross-listed with GEOG 4660).

Prerequisite(s)/Corequisite(s): GEOG 4050/ GEOG 8056

GEOG 8670 CARTOGRAPHIC METHODS (3 credits)

An applied graduate seminar in cartography and geospatial science. The course examines advanced methods for the representation of spatial data. Emphasis is placed on the design of interactive Internet-based maps. Projects will be directed toward the creation of map-based web pages.

Prerequisite(s)/Corequisite(s): A junior/senior course in cartography, GIS, computer mapping, or visualization.

GEOG 8680 SEMINAR IN GEOSPATIAL SCIENCE (3 credits)

Seminar in Geospatial Science examines the origins, development and prospects of spatial information technology to understand people, places, and processes of the earth. The overall approach is to examine the three main components of geospatial science: 1) Geographic Information Systems (GIS), the software, hardware, outputs, personnel, and practices that together facilitate the analysis and mapping of geographic entities and phenomena; 2) Remote Sensing, the use and processing of aerial photographs and satellite imagery; and 3) Cartography, the general processing and display of geographic information for both analysis and communication.

Prerequisite(s)/Corequisite(s): Graduate standing. Prior coursework in geographic information systems, remote sensing or cartography.

GEOG 8700 RESEARCH METHODS (3 credits)

The course provides students with an overview of research approaches and methods used by geographers. Students are expected to put these methods into practice by drafting a full thesis proposal by semester's end.

GEOG 8800 INTERNSHIP IN ENVIRONMENTAL/REGIONAL PLANNING (1-6 credits)

(repeatable up to six hours) Internship with local planning agencies enabling students to gain knowledge and experience in comprehensive regional or environmental planning. Usually offered Fall, Spring, and Summer.

Prerequisite(s)/Corequisite(s): Permission and 12 graduate hours in geography.

GEOG 8826 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

An introduction to environmental law and regulations intended for students pursuing careers in environmental sciences or related fields. The course emphasizes the origins, implementation, and enforcement of U.S. state and federal laws and regulations. Major federal environmental laws, covering air and water quality, solid and hazardous waste, pollution prevention and remediation, and natural resources will be discussed. Usually offered Fall semesters. (Cross-listed with ENVN 8826, ENVN 4820, BIOL 4820, GEOG 4820, PA 8826).

Prerequisite(s)/Corequisite(s): Graduate Standing or Permission from the Instructor.

GEOG 8830 SEMINAR IN URBAN STUDIES (3 credits)

This course provides an interdisciplinary overview of the forces influencing and influenced by urbanization and urbanism. (Cross-listed with UBNS 8000)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

GEOG 8840 DIRECTED RESEARCH IN URBAN STUDIES (3 credits)

The course is intended for advanced graduate students in urban studies or geography. It is especially suited for those in-career students who have had their internships waived and who might profit more by in-depth research on a problem of urban studies rather than additional classroom courses. (Cross-listed with UBNS 8940).

Prerequisite(s)/Corequisite(s): Completed 9 graduate hours in Urban Studies. Permission from the School. For Geography students, GEOG 8126 (Urban Geography) or permission from the School.

GEOG 8990 THESIS (1-6 credits)

Independent research project conducted under the supervision of an adviser and thesis committee.

Prerequisite(s)/Corequisite(s): Graduate student in geography who has successfully presented and defended their thesis proposal.

Geology (GEOL)

GEOL 8106 BIOGEOGRAPHY (3 credits)

This course is intended as an introduction to biogeography, the study of the distribution and evolution of organisms across space and through time. Usually offered every year. (Cross-listed with GEOL 4100, BIOL 4100, BIOL 8106, GEOG 4100, GEOG 8106).

Prerequisite(s)/Corequisite(s): BIOL 1450 and BIOL 1750 or GEOL 3100 or BIOL 3100, junior-senior.

GEOL 8616 ENVIRONMENTAL MONITORING AND ASSESSMENT (3 credits)

An interdisciplinary approach to techniques for the design and implementation of environmental inventory and monitoring schemes used to evaluate natural resources. Students work as teams to synthesize information from their backgrounds in geography, geology and ecology to evaluate the impacts of human actions on environmental quality following the framework for environmental assessments provided by the National Environmental Policy Act. Course is organized to accommodate variable needs of students with different backgrounds and career choices. Usually offered every year. (Cross-listed with BIOL 4610, ENVN 4610, GEOG 4610, GEOG 8616, GEOL 4610).

Prerequisite(s)/Corequisite(s): Permission of instructor.

German (GERM)

GERM 8046 ADVANCED GERMAN COMPOSITION AND STYLISTICS (3 credits)

Advanced grammatical principles, composition and stylistics.

GERM 8226 THE STRUCTURE OF GERMAN (3 credits)

A survey of the linguistic structure of modern German, including phonology, morphology, and syntax. (Cross-listed with GERM 4220).

Prerequisite(s)/Corequisite(s): GERM 3040 and GERM 4610, or permission.

GERM 8440 SEMINAR:GERMAN COMPOSITION (3 credits)

This course will provide opportunities for students to refine their composition skills in German through extensive writing practice, writing workshops, and peer editing. Computer applications to composition will be employed.

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

GERM 8906 INDEPENDENT STUDY (1-3 credits)

Specially planned readings in a well-defined field of literature, carried out under the supervision of a member of the foreign language faculty. Designed primarily for the student who has need of work not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated for credit once.

Prerequisite(s)/Corequisite(s): Permission of the instructor, junior or senior standing, and no incompletes outstanding.

GERM 8956 PRO-SEMINAR: LITERATURE AND/OR FILM (3 credits)

This course is dedicated to the study of a narrow field of the literature and/or cinema of the German-speaking world. (Cross-listed with GERM 4950).

Prerequisite(s)/Corequisite(s): Graduate student status.

GERM 8966 PRO-SEMINAR: SOCIETY AND CULTURE (3 credits)

This course will address a narrow field of study of the civilization, history, film, contemporary culture, art, politics, and/or cultural studies of the German-speaking world. (Cross-listed with GERM 4960).

Prerequisite(s)/Corequisite(s): GERM 3030, GERM 3040, and GERM 3060

GERM 8976 PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS (3 credits)

This course will address a narrow field of study of linguistics, translation/interpretation or the professional language of the German-speaking world. (Cross-listed with GERM 4970).

Prerequisite(s)/Corequisite(s): Graduate student status.

Gerontology (GERO)

GERO 8020 INTRODUCTION TO RESEARCH METHODS (3 credits)

An introduction to research methods and statistical procedures in the social and behavioral sciences.

GERO 8056 ADVANCED BIOLOGY OF AGING (3 credits)

This course covers biological aging topics at an advanced level, and is designed for undergraduate and graduate students who have some prior knowledge about biology or aging. The course will be interdisciplinary in nature and focus on topics relevant to gerontology, biology, psychology, and exercise science. Students will learn how to think critically about primary research in the biology of aging. Furthermore, they will apply their knowledge of the biology of aging field by creating a handbook of healthy aging for older adults. (Cross-listed with GERO 4050, NEUR 4050).

Prerequisite(s)/Corequisite(s): Junior or senior standing for undergraduate students or graduate level standing

GERO 8106 EDUCATIONAL GERONTOLOGY (3 credits)

An introduction to the field of education for and about the aging. The institutions and processes of education will be analyzed to determine their relationships and value to persons who are now old and those who are aging. (Cross-listed with GERO 4100).

Prerequisite(s)/Corequisite(s): Students must have a junior, senior or graduate student status.

GERO 8206 VOLUNTEER MANAGEMENT (3 credits)

The purpose of this course is to equip managers of volunteers in aging services to develop, maintain, assess impact and evaluate a sustainable volunteer program that will provide reliable and necessary services to older adults and further to be embraced as a valuable asset by professionals working in the field of aging. (Cross-listed with GERO 4200).

Prerequisite(s)/Corequisite(s): Graduate Student

GERO 8356 ISSUES IN AGING (3 credits)

This course is intended for students in gerontology and in other fields who are interested in a humanistic approach to understanding significant issues which affect the lives of older people. (Cross-listed with GERO 4350).

GERO 8426 RECREATION FOR THE AGING (3 credits)

Role of leisure services as related to understanding and working with elders. Emphasis on recreation programming as a mode of intervention. Analysis and study of the phases of aging, with reference to psychomotor, affective, and cognitive changes; introduction to the theories of aging and how they relate to the lifestyle of this population; recreational therapy intervention, activity adaptation and program design; leisure education and issues and trends. (Cross-listed with GERO 4420, RLS 4420, RLS 8426).

GERO 8466 PSYCHOLOGY OF ADULT DEVELOPMENT AND AGING (3 credits)

The focus of this course is on the major social and psychological changes that occur as a function of aging. Both normal and abnormal patterns of developmental change are examined, along with their implications for behavior. (Cross-listed with GERO 4460, PSYC 4460)

Prerequisite(s)/Corequisite(s): Junior or Senior.

GERO 8476 MENTAL HEALTH AND AGING (3 credits)

The goal of this courses is to survey the mental health needs of older adults. Consideration is given to identifying both positive mental health and pathological conditions. Treatment interventions effective with older adults and their families are also discussed. (Cross-listed with GERO 4470, PSYC 4470, PSYC 8476).

Prerequisite(s)/Corequisite(s): Junior or senior.

GERO 8486 GLOBAL AGING (3 credits)

The study of aging around the world by a comparative method in a cross-cultural and cross-national framework. An explanation of some practical experiences and developments in Europe, Asia and Africa will be examined. (Cross-listed with GERO 4480).

GERO 8500 POLITICS IN AGING (3 credits)

The purpose of this course is to provide an understanding of the role of the political process in the emergence of public policy towards older adults in the United States, particularly during the past century.

GERO 8506 LEGAL ASPECTS OF AGING (3 credits)

This course centers on the legal concerns likely to arise as people age. We will discuss the American legal system with an emphasis on underlying legal concepts and issues of special importance to older persons. Some of the topics include guardianship, finances in retirement, abuse and neglect, Social Security, and Medicare and Medicaid. Consideration of the legal concerns which are likely to arise as people age. Includes introduction to American legal system, and emphasis on underlying legal concepts and issues of special importance to older persons. (Cross-listed with GERO 4500).

GERO 8516 LONG-TERM CARE ADMINISTRATION (3 credits)

An investigation of the broad range of policy issues, theoretical concerns and practical management strategies influencing the design, organization and delivery of long-term care services. (Cross-listed with GERO 4510, PA 4510, PA 8516).

GERO 8526 SENIOR HOUSING (3 credits)

The senior housing course is designed to provide students with an in-depth understanding of the various housing options available to older adults including aging in place to hospice. At the end of the course students will have a working knowledge of the needs of older adults and how this is used in making decisions about housing. (Cross-listed with GERO 4520).

Prerequisite(s)/Corequisite(s): Graduate student

GERO 8556 HEALTH ASPECTS OF AGING (3 credits)

This course emphasizes health promotion for older adults. Special health needs of older Americans are compared and contrasted with health needs for other age groups. Prevention or delaying of chronic diseases and disorders are emphasized. (Cross-listed with GERO 4550, PHHB 4550, PHHB 8556, WGST 4550).

GERO 8566 NUTRITION AND AGING (3 credits)

The goal of this course is to provide an understanding of the relationship between nutrition and successful or usual aging. This course will review the basics of good nutrition and relate them to the usual food intake of older adults. It will identify the impact of poor nutrition. This course will also look at the role nutrition plays in various disease processes that are associated with aging. It will provide information about support services that are available to assure good nutrition into old age for those living independently. (Cross-listed with GERO 4560).

GERO 8676 PROGRAMS AND SERVICES FOR THE ELDERLY (3 credits)

This course is provided to give the student a historical overview of programs for the elderly; examine the national policy process as it relates to the older American; and review the principles and practices relative to the existing national programs for the aged. (Cross-listed with GERO 4670, PA 8676).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

GERO 8696 WORKING WITH MINORITY ELDERLY (3 credits)

This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 4690, SOWK 4040, SOWK 8046).

GERO 8726 BABY BOOMERS AND THE 21ST CENTURY (3 credits)

Marketing decisions and strategies apply to all businesses and are influenced by the target market. The economic realities and the character of America will change due to shifting demographics of baby boomers. Businesses that understand the power of the baby boomers will succeed; failure to understand that power may lead to economic consequences. Students from many disciplines will benefit from this cross-referenced course blending the realities of gerontology with the predictions of baby boomer behavior and the resulting impact to all businesses. (Cross-listed with GERO 4720).

Prerequisite(s)/Corequisite(s): Junior, Senior and Graduate Level Standing.

GERO 8730 DYING, DEATH & GRIEVING (3 credits)

An examination of theory and research relevant to interaction with the older, terminally ill person, focusing on communication with widows and other survivors as well as the dying patient. (Cross-listed with PHHB 8730).

Prerequisite(s)/Corequisite(s): Graduate Students

GERO 8756 MID-LIFE, CAREER CHANGE, PRERETIREMENT PLANNING (3 credits)

This course is designed to involve candidates in the exploration of the developmental tasks of mid-life, myths and realities related to career change as well as the implication of preretirement planning. Factual information, as well as model examination and evaluation are presented to aid the candidate in becoming better equipped to understand some of the forces which affect the well-being of middle aged persons as they prepare for the later years. (Cross-listed with COUN 8756, GERO 4750).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

GERO 8800 GRADUATE SEMINAR IN THE AGING BRAIN (3 credits)

The Graduate Seminar in the Aging Brain is a graduate level gerontology course focused on understanding the changes to the brain due to normal aging and aging-related diseases. This is an elective course for the Gerontology graduate program at UNO. The content matter of this course also makes it a relevant fit for graduate students from disciplines such as biology, psychology, geriatric medicine, nursing, social work, and exercise science. By the end of the course, students should have a thorough understanding of the changes to the brain in healthy aging and aging-related disease that affect cognitive and emotional functioning. (Cross-listed with PSYC 8800).

Prerequisite(s)/Corequisite(s): Graduate level standing

GERO 8810 GRADUATE SEMINAR IN THE BIOLOGY OF AGING (3 credits)

This course provides an in-depth investigation of key topics in the biology of aging for graduate students. The course will be interdisciplinary in nature and focus on topics relevant to gerontology, biology, psychology, neuroscience, and exercise science. Students will learn about theory, primary research, and hypotheses within the biology of aging field. Students will be asked to think critically and apply their knowledge through assignments and class discussions.

Prerequisite(s)/Corequisite(s): graduate level standing

GERO 8856 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)

This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 4850, SOWK 4850, SOWK 8856).

GERO 8920 SPECIAL STUDIES IN GERONTOLOGY (1-3 credits)

Special studies designed around the interests and needs of the individual student in such areas as the psychology, sociology, economics, biology, or politics of aging, as well as operation of various service systems. This independent study may include a literature review or a field project in which experience is gained in the community, identifying and analyzing needs and services related to older people.

Prerequisite(s)/Corequisite(s): Instructor permission

GERO 8940 GRADUATE PRACTICUM (3 credits)

This course provides the opportunity to students to share field experiences; to obtain guidance concerning various relationships with agency, staff and clients; and to develop a broadly based perspective of the field of aging.

Prerequisite(s)/Corequisite(s): Nine hours in gerontology and permission. Students must be enrolled in the certificate or degree program (MA, PhD) as well as have a minimum GPA of 3.0. Not open to non-degree students.

GERO 8956 PALLIATIVE CARE: MENTORING A HEALTHCARE APPROACH OF PATIENT-CENTERED CARE WITH FOCUS ON WELL-BEING (3 credits)

This course provides a foundation for the recognition of the need to implement palliative medical care. Using current texts and literature, video and podcast lectures by colleagues, and review of cases and topics, a student will understand the definitions, purposes, and benefits of palliative medical care. The student will learn the avenues and ways to implement palliative care to provide care that promotes well-being. (Cross-listed with GERO 4950).

GERO 8980 LITERATURE AND AGING (3 credits)

In this course, we will examine the experience of aging and of being an older person through the world's great literature. We will study this universal experience by reading novels, short stories, poems, plays, and personal narratives from across different eras and cultures. In this way we hope to come to a better understanding of: 1) the older adults we serve as patients and clients; 2) our own aging process and those of our close family members and friends; 3) literary works and their relevance in our everyday lives.

Prerequisite(s)/Corequisite(s): Graduate students only.

GERO 8986 COUNSELING SKILLS IN GERONTOLOGY (3 credits)

This course is intended to help develop basic counseling skills for application in gerontology. (Cross-listed with COUN 8986, GERO 4980).
Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

GERO 8990 THESIS (1-6 credits)

Independent research project required of all students working toward the Master of Arts degree. The thesis is written under the supervision of the thesis adviser and the thesis committee.

Prerequisite(s)/Corequisite(s): Permission from adviser.

GERO 9020 GRADUATE SEMINAR IN STATISTICAL APPLICATIONS (3 credits)

Provides an introduction to statistical methods and data management used in the social, behavioral and health sciences.

GERO 9110 APPLIED SOCIAL GERONTOLOGY (3 credits)

An overview of social gerontology with an emphasis on the interplay between social, psychological and physical elements in later life. Restricted to graduate students only; required of gerontology students. (Cross-listed with SOC 9110).

Prerequisite(s)/Corequisite(s): Graduate.

GERO 9460 SEMINAR IN AGING AND HUMAN BEHAVIOR (3 credits)

This course will examine in detail age-related changes in psychological processes and explore the implications of these changes for behavior. The course is intended primarily for graduate students in psychology and gerontology. (Cross-listed with PSYC 9460).

Prerequisite(s)/Corequisite(s): Graduate standing in gerontology or psychology or permission of the instructor.

GERO 9990 DISSERTATION (1-6 credits)

This course provides doctoral students pursuing the PhD in Human Sciences with a specialization in gerontology to complete a dissertation research plan. The course learning activities will focus on the completion of an approved dissertation.

Prerequisite(s)/Corequisite(s): Admittance to the PhD in Human Sciences with a specialization in gerontology. Not open to non-degree graduate students.

Health & Kinesiology (HEKI)

HEKI 8000 SPECIAL STUDIES (1-3 credits)

A series of intensive courses - scheduled as regular seminars or workshops according to purpose.

Prerequisite(s)/Corequisite(s): Permission of department.

HEKI 8030 RESEARCH IN HEALTH & KINESIOLOGY (3 credits)

The course introduces students to scientific writing, quantitative research design, and statistical methods. Considerable emphasis is placed on evaluation of research in scholarly publications. A research proposal in the form of a grant proposal is written as one of the course requirements. Students will develop the skills necessary to analyze study designs in existing literature and create a research proposal. (Cross-listed with BMKI 9001).

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

HEKI 8100 RESEARCH PROJECT (1-3 credits)

Individual or group study and analysis of specific problems in health, physical education or recreation.

Prerequisite(s)/Corequisite(s): Permission of instructor.

HEKI 8220 PROBLEMS & ISSUES IN HPER (3 credits)

An examination of current problems and issues in HPER that relate to the general aims and purposes of HPER.

HEKI 8300 ANALYSIS OF RESEARCH AND LITERATURE IN HUMAN MOVEMENT (3 credits)

Survey of research and literature in Human Movement for the purpose of orienting the candidate to possible areas of research and developing an understanding of and appreciation for writings in the field. The course may be offered focusing on only one specific area in HPER.

Prerequisite(s)/Corequisite(s): HPER 8030 or HEKI 8030

HEKI 8500 QUALITATIVE RESEARCH METHODS (3 credits)

An examination of qualitative research methods. Emphasis on the broad application of qualitative research in public health, education, and social sciences. Course topics include research design, data collection, data analysis, and reporting.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

HEKI 8850 EXERCISE FOR SPECIAL POPULATIONS (3 credits)

The course will examine the physiological and medical limitations imposed on people with various common chronic diseases/conditions including arthritis, osteoporosis, exercise-induced asthma, obesity, diabetes, hypertension and pregnancy. Special groups such as children and elders will be discussed. Content will emphasize the etiology and guidelines for exercise testing, prescription, and supervision. (Cross-listed with BMKI 9851).

Prerequisite(s)/Corequisite(s): PE 4940/KINS 4940 or PE 8946/KINS 8946

HEKI 8990 THESIS (1-6 credits)

The thesis experience is designed to help develop the candidate's ability to execute accepted procedures associated with the research process appropriate to the Master's degree.

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

History (HIST)

HIST 8010 RESEARCH DIRECTED READINGS PROJECT (1-3 credits)

Special research problems and or directed readings arranged individually with students on topics not explored in other graduate offerings. If students do not complete all the readings during the semester in which they enroll in the course, they must complete all the readings within one academic year of their enrollment.

Prerequisite(s)/Corequisite(s): Minimum of nine graduate hours in history completed. Permission of history Graduate Program Chair. Open only to students enrolled in the History MA program. Not open to non-degree graduate students.

HIST 8016 RELIGION IN EARLY AMERICA (3 credits)

This course examines the history and nature of religion in North America to c. 1770 with an emphasis on the British colonies. (Cross-listed with HIST 4010, RELI 4050).

Prerequisite(s)/Corequisite(s): Must be a graduate student enrolled in History MA program. Not open to non-degree graduate students.

HIST 8020 GRADUATE INTERNSHIP (1-3 credits)

The graduate student is supervised by a member of the faculty in a project involving part-time employment or service with a museum, historic site, historical society or other institution. Work hours, activities, reporting requirements, and responsibilities must be specified in written agreement between employer, student, Graduate Program Chair, and/or supervising faculty member. Normally taken for 3 hours. If a hosting institution cannot commit to a supervised workload which the departmental advisor and/or Graduate Program Chair believe to be equivalent to 3 hours, course may be taken for fewer hours. In such circumstances, student may repeat course up to a total of 3 hours.

Prerequisite(s)/Corequisite(s): Student must be enrolled in the History MA program and have completed at least 6 hours of graduate credit. Student must have approval of Graduate Program Chair (GPC) and/or supervising faculty before enrolling. Not open to non-degree graduate students.

HIST 8030 GRADUATE HISTORICAL METHODOLOGY (3 credits)

This course will examine various historical methodologies which have been employed by historians to provide structural interpretations of the past. Although exact content may vary, examples of methodologies include the Whig Interpretation, Marxism, Structuralism, Postmodernism, and the New Social History.

Prerequisite(s)/Corequisite(s): Students must be enrolled in the MA program in history. Not open to non-degree graduate students.

HIST 8046 HOMESCAPES: THE MATERIAL CULTURE OF EVERYDAY LIFE IN AMERICA, 1600-1860 (3 credits)

This course examines the culture and technologies of house forms and work landscapes in North America, 1600-1860. (Cross-listed with HIST 4040).

Prerequisite(s)/Corequisite(s): Graduate student in history, or permission of the graduate chair.

HIST 8056 HISTORY OF WOMEN IN AMERICA TO 1875 (3 credits)

This course examines the history of women in what is now the United States from the seventeenth century to 1875. Topics include law, work, sexuality and reproduction, slavery, cross-cultural encounters, religion, political activism, and the transformation of gender by the market and industrial revolutions. (Cross-listed with HIST 4050).

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

HIST 8066 HISTORY OF WOMEN IN AMERICA FROM 1875 - 1992 (3 credits)

This course examines the history of women in the United States from 1875 to 1992. Topics include law, work, sexuality and reproduction, immigration, civil rights, political participation and party politics, and changes to the American gender system, including family structure and employment. (Cross-listed with HIST 4060, WGST 4060, WGST 8066).

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

HIST 8076 SLAVERY AND RACE RELATIONS IN THE AMERICAS (3 credits)

Slavery and Race Relations in the Americas examines the historical relationship between the trans-Atlantic slave trade and American race relations, connecting the enslavement of Africans in the Americas to race relations in the Caribbean, Latin America, and the United States. (Cross-listed with HIST 4070, BLST 4650, BLST 8656, LLS 8656).

Prerequisite(s)/Corequisite(s): Graduate standing

HIST 8146 COLONIAL AMERICAN HISTORY (3 credits)

This course provides a study of the settlement and development of North America to c. 1763 with an emphasis on the British colonies. (Cross-listed with HIST 4140).

HIST 8156 THE AMERICAN REVOLUTIONARY ERA, 1763-89 (3 credits)

This course examines the period of the American Revolution beginning with the changed circumstances in the British North American colonies following the end of the French and Indian War and concluding with the ratification of the United States Constitution. The course analyses social, political, and military themes from this period. (Cross-listed with HIST 4150).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8166 THE EARLY AMERICAN REPUBLIC: FROM THE CONSTITUTION TO THE SECOND PARTY SYSTEM (3 credits)

This course covers an important period of American history beginning with the first federal government and ending with an analysis of the consolidation of the Second American Party system. Topics to be covered include the earliest debates over the nature of the federal government, foreign relations, the emergence of political parties, and the rise of the Jacksonian democracy. (Cross-listed with HIST 4160).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8176 HISTORY OF THE AMERICAN WEST (3 credits)

An examination of the unique aspects of the region of the United States known as "the west." Students will learn about the multiple peoples, cultures, and environments which combined to form this region. Content will also include an examination of how the myths of the west were created. (Cross-listed with HIST 4170).

Prerequisite(s)/Corequisite(s): Graduate standing

HIST 8186 THE AMERICAN CIVIL WAR PERIOD: FROM THE TEXAS REVOLUTION THROUGH RECONSTRUCTION (3 credits)

This course focuses on the period of the American Civil War. It will begin with the background to, and events of the Texas Revolution. It will then consider the growing national tensions over slavery, particularly as a consequence of the Mexican-American War before examining the immediate causes of the civil war. The course will then examine the war itself before concluding with analysis of Reconstruction. (Cross-listed with HIST 4180).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8246 EMERGENCE OF MODERN AMERICA (3 credits)

This course examines American history from the end of Reconstruction to the end of World War II. Among the topics covered are western expansion, industrialization, immigration, and the expanding international footprint of the United States. (Cross-listed with HIST 4240).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8336 U.S. CONSTITUTIONAL HISTORY TO 1860 (3 credits)

This course will examine the history of the United States constitution from its promulgation in 1787 through the end of the Civil War. This will include consideration of both English and colonial precedents. The course will analyze the process of writing and ratifying the document in the late 1780s and will then look at some of the key legal decisions between 1790 and 1860. (Cross-listed with HIST 4330).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8346 U.S. CONSTITUTIONAL HISTORY SINCE 1860 (3 credits)

This course examine the increasingly important role played by competing interpretations of the United States constitution since the outbreak of the Civil War. This will include the emergence of the idea of a "living constitution," the extension of constitutional guarantees to the states, and examination of critical Supreme Court cases. (Cross-listed with HIST 4340).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8366 THE U.S. IN THE COLD WAR (3 credits)

This course will examine the impact of the Cold War in modern American history on two levels. First it will seek to understand how the Cold War influenced American foreign policy decisions since the end of World War II and examine the long term consequences of those policies for both the U.S. and the world. Secondly, this course will examine how the Cold War impacted or shaped American culture, domestic politics, and social movements in the postwar period. (Cross-listed with HIST 4360).

Prerequisite(s)/Corequisite(s): Graduate student in history, or permission of the graduate chair.

HIST 8406 HISTORY OF NORTH AMERICAN INDIGENOUS CULTURES (3 credits)

A survey of traditional North American Indigenous cultures, their interaction with the environment, with one another, and with other people groups. This course covers indigenous societies to the present day. (Cross-listed with HIST 4400).

Prerequisite(s)/Corequisite(s): Graduate standing

HIST 8416 HISTORY OF NEBRASKA (3 credits)

An examination of the history of Nebraska from Native American occupation to the present, with emphasis on environmental factors that have shaped the region and its people. (Cross-listed with HIST 4410).

Prerequisite(s)/Corequisite(s): Graduate standing

HIST 8426 THE SIOUX TRIBE (3 credits)

A cultural and historical study of the Sioux tribes emphasizing the earliest historic period to the present. (Cross-listed with HIST 4420).

HIST 8456 NATIVE AMERICAN ENVIRONMENTALISM (3 credits)

This course studies North American tribal subsistence and natural resource use practices from the early historic period to the present, Native Americans as environmentalists, and modern tribal environmentalism. (Cross-listed with HIST 4450).

HIST 8466 AMERICAN IMMIGRATION HISTORY (3 credits)

A study of American immigration from the colonial era to the present. Topics covered include Old World origins of migration, the old immigrants from western Europe, the new immigrants from southern and eastern Europe, non-European immigrants, native-born American responses to immigrants, the periods of immigrant adjustment in the new physical environment, and the contemporary revival of ethnicity. (Cross-listed with HIST 4460).

Prerequisite(s)/Corequisite(s): Graduate student standing or permission of the graduate chair

HIST 8486 THE UNITED STATES IN THE 1960S (3 credits)

This course is a review of the economic, social, cultural, and political changes that marked the United States in the 1960s. (Cross-listed with HIST 4480).

HIST 8536 EUROPE: RENAISSANCE & REFORMATION (3 credits)

This course will examine European history from the fifteenth through the seventeenth centuries. Among the topics which will be covered are the Renaissance, the Protestant Reformation, the Catholic Reformation, Wars of Religion, the beginning of European overseas expansion, and the Scientific Revolution. In addition to examining the religious ideas and revolutions of the period, there will also be analysis of economic, social, and political change. (Cross-listed with HIST 4530).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8546 MEDIEVAL EUROPE (3 credits)

A dive into the history of medieval Europe through the stories of men and women, their beliefs, struggles, contradictions and achievements. (Cross-listed with HIST 4540).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8616 TUDOR AND STUART ENGLAND (3 credits)

English history from the end of the Wars of the Roses in 1485 to the death of Queen Anne in 1714. The course will examine the efforts of the Tudors and Stuarts to establish dynasties, the religious upheavals in the sixteenth and seventeenth centuries, changes in the role of Parliament, the Civil Wars, and the beginning of English overseas expansion. (Cross-listed with HIST 4610).

Prerequisite(s)/Corequisite(s): graduate standing

HIST 8656 HISTORY OF MODERN IRELAND (3 credits)

A survey of Irish history from the Act of Union of 1801 through the civil rights movement of "Troubles" of Northern Ireland in the 1970s. (Cross-listed with HIST 4650).

HIST 8726 THE HOLOCAUST (3 credits)

An interdisciplinary approach in a seminar oriented format discussing various aspects of the most notorious genocide in modern times. The course will explore the history of anti-Semitism, the rise of Nazi Germany and the road to the 'final solution.' It will further explore psychological, sociological and intellectual aspects of the dark side of humanity. (Cross-listed with HIST 4720, RELI 4160, RELI 8166).

HIST 8736 ISRAEL AND PALESTINE (3 credits)

This course will outline the history of the conflict over Palestine/Israel, examine its present status, and explore its likely unfolding in the future. It seeks to provide a broad and concise understanding of the historical events which have shaped the relations between Israelis and Palestinians, as well as a keen awareness of the challenges and prospects related to their future. (Cross-listed with HIST 4730).

HIST 8746 COMPARATIVE GENOCIDE (3 credits)

This course explores genocide and its many forms throughout history. It begins by considering the varied elements and definitions of the term. Next it looks at what makes people kill before going on to examine many different genocides throughout history. Finally, the course addresses the prosecution and prevention of genocide. (Cross-listed with HIST 4740).

Prerequisite(s)/Corequisite(s): Graduate student enrolled in History MA program. Not open to non-degree graduate students.

HIST 8806 U.S. AND THE MIDDLE EAST (3 credits)

This course focuses on the evolution of US relations with and Foreign Policy vis-a-vis the Middle East over the last six decades. It seeks to illuminate the constant features in contrast to the changes in direction, examining the agendas of varying administrations as well as the treatment by the media of this region. It follows a chronological framework with particular emphasis on key thematic topics. While emphasizing the political dimensions of international relations, the class will also explore cultural and social aspects of the ties between the US and the peoples of the Middle East. (Cross-listed with HIST 4800).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students

HIST 8826 MESOPOTAMIA AND PRE-ISLAMIC PERSIA (3 credits)

Examination of the Ancient Near East from the emergence of its earliest civilizations—Sumer, Akkad and Babylonia—through the Bronze and Iron Ages, concluding with Persia in the Common Era (CE) just before the rise of Islam. (Cross-listed with HIST 4820).

HIST 8836 ANCIENT GREEK MYTH, RELIGION & MAGIC (3 credits)

Students will examine the impact of ancient Greek myth and belief on actual religious practice: e.g., "lived" religion. Areas covered include formal civic sacrifice, wartime religion, family and personal devotions, mystery cults, oracles and seers, plus the popular pursuit of magic. (Cross-listed with HIST 4830, RELI 4830, RELI 8836).

Prerequisite(s)/Corequisite(s): Junior standing

HIST 8846 ALEXANDER THE GREAT AND THE MACEDONIAN ORIGIN (3 credits)

Examination of the conquests of Alexander the Great, as well as controversies in Alexander studies. Includes discussion of both the Macedonian culture that produced him and the career of his father, Philip II. (Cross-listed with HIST 4840).

Prerequisite(s)/Corequisite(s): Graduate standing

HIST 8856 ROME AND THE EARLY CHURCH (3 credits)

Students will cover Roman-Christian-Jewish interactions from just before the birth of Jesus of Nazareth to c. 450 CE, with an emphasis on social and political history. We catalogue Christianity's transformation from its origins as a Jewish movement and an illegal "superstition" to the dominant religion of the Roman empire. (Cross-listed with HIST 4850, RELI 4850, RELI 8856).

Prerequisite(s)/Corequisite(s): Junior standing.

HIST 8916 TOPICS IN HISTORY (3 credits)

This course introduces students to specialized subject matter not available in existing History courses. Course may be repeated as long as the topic is substantially different each time. Course may be cross-listed with other programs e.g. Native American Studies (NAMS), Women's and Gender Studies (WGST) when topics are appropriate. (Cross-listed with HIST 4910).

Prerequisite(s)/Corequisite(s): Graduate standing

HIST 8990 THESIS (1-6 credits)

Thesis research project written under supervision of an adviser.

Prerequisite(s)/Corequisite(s): Completion of twenty-four hours of history graduate work. Approval of Graduate Program Chair. Not open to non-degree graduate students.

HIST 9100 SEMINAR IN HISTORY (3 credits)

This seminar guides advanced graduate students through critical readings and practices in historical research or historiography. Topics will vary and course can be repeated under different topics.

Prerequisite(s)/Corequisite(s): Open only to History MA students who have completed HIST 3930 or equivalent. Non-History MA students may be admitted after consultation with History GPC and instructor. Not open to non-degree graduate students.

HIST 9200 COLLOQUIUM (3 credits)

The colloquium guides advanced graduate students through the historiography of a specific subject. Topics will vary and course can be repeated under different topics. Open only to students enrolled in MA program in history unless permission granted by History Department Graduate Program Chair.

Prerequisite(s)/Corequisite(s): Open only to History MA students who have completed HIST 2980, HIST 3930 or equivalent. Non-History MA students may be admitted after consultation with History GPC and instructor. Not open to non-degree graduate students.

Information Systems & Quantitative Analysis (ISQA)

ISQA 8016 BUSINESS INTELLIGENCE (3 credits)

This course intends to provide graduate students in-depth exposure to the growing field of business intelligence. Business intelligence (BI) consists of the set of concepts and techniques used to analyze business data in support of decision-making and planning. BI spans a number areas of management information systems, including Decision Support Systems (DSS), Enterprise Resource Planning (ERP), Data Warehousing, Knowledge Management, Customer Relationship Management, Data Mining, and others.

Prerequisite(s)/Corequisite(s): (ISQA 4150 or ISQA 8156) and ISQA 8040 and ISQA 8050. Not open to non-degree graduate students.

ISQA 8030 INFORMATION SYSTEMS AND ETHICS (3 credits)

This course gives you an introduction to organizations and the role that information and information systems play in supporting an organization's operations, decision-making processes, quality management, and strategic activities. The course provides an introduction to the management of information systems function, the strategic and regulatory issues of telecommunications, and ethical and legal issues related to information systems.

Prerequisite(s)/Corequisite(s): Admission into the MS in MIS program.

ISQA 8040 AN OVERVIEW OF SYSTEMS DEVELOPMENT (3 credits)

The course presents an overview of the systems development lifecycle and database development. The course will focus on theory, current tools and techniques that the system developer can use to develop and document information systems. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8050 DATA ORGANIZATION AND STORAGE (3 credits)

The course will provide concepts of data organization, data storage, and data transfer through computer networks. The performance implications of various design decisions will be explored. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8060 RESEARCH IN MIS (3 credits)

This course covers research methods and their application to the development and evaluation of management information systems. Also covered is the relationship between organization theory and IS research.

Prerequisite(s)/Corequisite(s): CIST 2500, CIST 2100, and ISQA 8040, or permission of the instructor.

ISQA 8080 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (1-5 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s)/Corequisite(s): 1) Permission of the instructor. 2) Additional prerequisite courses may be required for particular course offerings.

ISQA 8086 SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS (1-5 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ISQA 4000)

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 8106 INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION (3 credits)

This course examines the frameworks and tools used to develop an organization's information system architecture. It provides the analytical skills and conceptual frameworks with which to make recommendations and decisions regarding the integration of information technology components into an information system architecture. (Cross-listed with ISQA 4100)

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 3310

ISQA 8136 INFORMATION TECHNOLOGY FOR DEVELOPMENT (3 credits)

Information Technology for Development (ITD) is the implementation and evaluation of information technology infrastructures to stimulate economic, social and human development. In this service-learning course, students will learn and apply ITD concepts for developing and adding value through IT by working with small business entrepreneurs in Omaha or rural Nebraska. Students will evaluate micro-business technology needs, prepare business technology plans, provide training, and implement appropriate solutions, to the extent possible within a semester class. (Cross-listed with ISQA 4130)

Prerequisite(s)/Corequisite(s): Though not required, the following courses or their equivalent would provide the necessary background : CIST 1100, CIST 1300, ISQA 3210, ISQA 3310, ISQA 3400. Not open to non-degree graduate students.

ISQA 8156 ADVANCED STATISTICAL METHODS FOR IS&T (3 credits)

This course emphasizes the application and interpretation of statistical methods including design of experiments, analysis of variance, multiple regression, and nonparametric procedures and the use of statistical computer packages. The intent is to develop quantitative abilities needed for quantitatively intensive jobs and for advanced study in management information systems, computer science and information technology. (Cross-listed with ISQA 4150)

Prerequisite(s)/Corequisite(s): CIST 2500 or equivalent (at least one course in statistics)

ISQA 8160 APPLIED DISTRIBUTION FREE STATISTICS (3 credits)

The primary objective of this course is to expose students to methods of analyzing data from non-normal populations including binomial tests, contingency tables, use of ranks, Kolmogorov-Smirnov type statistics and other selected topics.

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156

ISQA 8166 INTRODUCTION TO ENTERPRISE RESOURCE PLANNING (3 credits)

Introduction to Enterprise Resource Planning (ERP) is designed to expose students to the primary enterprise application that forms the information systems (IS) infrastructure for most large organizations today. The primary purpose of this course is for students to gain an understanding of the enterprise wide, cross functional nature of ERP software. In the process of learning about ERPs, the students develop "hands on" experience with the largest and most well-known ERP application, SAP. (Cross-listed with ISQA 4160, SCMT 4160)

Prerequisite(s)/Corequisite(s): CIST 2100 or equivalent. Not open to non-degree graduate students.

ISQA 8180 ELECTRONIC COMMERCE (3 credits)

Electronic Commerce is the digital enablement of transactions between multiple parties. A multitude of technologies, tools and applications have brought about changes in business, and society that require careful consideration. Students are given an overview of electronic commerce business models and required to apply these to solve business problems or take on opportunities presented. They will cover topics such as social networking, electronic markets, and political and ethical issues associated with electronic commerce, and business plans for technology ventures. They will apply these concepts using Web 2.0 tools, mobile applications and website design assignments.

ISQA 8196 PROCESS REENGINEERING WITH INFORMATION TECHNOLOGY (3 credits)

Business process reengineering issues are examined. Reengineering concepts and methods are introduced. Additional special project(s) are required. SAP will be introduced. (Cross-listed with ISQA 4190)

Prerequisite(s)/Corequisite(s): CIST 2500; prerequisite/co-requisite ISQA 4110.

ISQA 8206 INFORMATION AND DATA QUALITY MANAGEMENT (3 credits)

The course primarily focuses on developing an in-depth understanding of Data and Information Quality (DQ and IQ) concepts and issues. On completing this course students will be able to understand and use DQ and IQ Concepts in Information Systems projects, be able to recognize various patterns of Data and Design Deficiencies in Systems and be able to suggest appropriate DQ and IQ improvement plans in light of known deficiencies in systems. (Cross-listed with ISQA 4200)

Prerequisite(s)/Corequisite(s): CIST 2500

ISQA 8210 MANAGEMENT OF SOFTWARE DEVELOPMENT (3 credits)

This course should encourage you to think critically about aspects of software development that make it difficult and strategies to mitigate these challenges. This course integrates concepts from software engineering, management science, psychology, and organizational behavior to identify, understand, and propose solutions to problems associated with software development. We examine and consider issues from various perspectives, such as the project manager, development team, senior management, and project sponsor. This course prepares students for various roles within a software development effort including leadership positions in software development. Students will practice software project management and agile methods of managing projects in a semester long team project using contemporary project and development methods.

Prerequisite(s)/Corequisite(s): ISQA 8040 or equivalent. Not open to non-degree graduate students.

ISQA 8220 ADVANCED SYSTEMS ANALYSIS AND DESIGN (3 credits)

This course is a systems analysis and design course for systems and business analysts. The course presents an overview of object-oriented system analysis and design. The course will then focus on theory, best practices, and modern methodologies that analysts can use to analyze and design information systems.

Prerequisite(s)/Corequisite(s): ISQA 8040 or (ISQA 4110 and ISQA 4120) or equivalent and ISQA 8050 or ISQA 3310 or equivalent

ISQA 8250 FACILITATION OF COLLABORATIVE PROBLEM SOLVING (3 credits)

The course focuses on the facilitation of collaborative problem solving and decision making processes. Students learn how to design and facilitate collaborative workshops, with support from both paper-based and electronic meeting tools. The course is hands-on and experiential, with students working in small teams to conduct real workshops.

ISQA 8306 DATABASE ADMINISTRATION (3 credits)

This course is designed to give students an applied, practical introduction to database administration. Students will gain an understanding of the functioning of a database management system and its relationship to the computing environment in which it runs. They will learn the concepts, principles, and techniques necessary to carry out such functions as database object creation, storage management, capacity planning, performance tuning, backup and recovery, and security management. Each semester the course will focus on one commercial database management system (DBMS), such as Oracle. (Cross-listed with ISQA 4300)

Prerequisite(s)/Corequisite(s): ISQA 8040 or ISQA 3310 or CSCI 4850. Not open to non-degree graduate students.

ISQA 8310 IT INFRASTRUCTURE & CLOUD COMPUTING (3 credits)

This course provides a graduate-level introduction to the business and technical decisions around technical infrastructure. It covers topics related to computer and systems architecture and communications networks, with a focus on the technical and business decisions around technology. Students completing the course will be able to understand and design network infrastructure, evaluate cloud computing offerings, and communicate their decisions. The course covers hardware, software, and cloud computing technologies.

ISQA 8340 APPLIED REGRESSION ANALYSIS (3 credits)

The primary objective of this course is to expose students to regression models and applications with particular emphasis on applying these concepts to IT research. Topics to be discussed include: Foundations of regression analysis using least squares procedures; model formulation, stepwise regression, transformations; graphical methods, estimation; inference; influence diagnosis; matrix formulation, multicollinearity, time series, and nonlinear models.

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156, not open to non-degree graduate students.

ISQA 8380 ENTERPRISE ARCHITECTURE AND SYSTEMS INTEGRATION (3 credits)

This course is designed to give students grounding in the concepts, issues, and tools needed to manage enterprise architecture, distributed systems & Internet-based environments. The goal of the course is to equip students to make the architecture and infrastructure-related decisions needed for successful development and use of contemporary client/server and Internet-based systems. Topics include middleware, architecture, XML, JSON, web services, service-oriented architecture, enterprise application integration, distributed computing services, Model View Controller (MVC) development frameworks.

Prerequisite(s)/Corequisite(s): ISQA 8310 and ISQA 8050 or equivalent; permit required.

ISQA 8410 DATA MANAGEMENT (3 credits)

The course provides in-depth coverage of such areas as: the relational model, SQL, data modeling, data quality management, database design, data warehousing, business intelligence, document and content management, NoSQL systems, and data governance. The course offers a mix of theoretical treatment and hands-on application. Current DBMS and data modeling software will be used.

Prerequisite(s)/Corequisite(s): ISQA 8050 or equivalent, permit only.

ISQA 8420 MANAGING THE I.S. FUNCTION (3 credits)

The course provides a focus on the business management implications of the information explosion. The course is organized around a management audit of the information services activity to help present and future managers recognize and implement effective information services management.

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8450 NOSQL AND BIG DATA TECHNOLOGIES (3 credits)

The course will cover topics in the area of NoSQL and Big Data management. The course is intended to get students familiarized with NoSQL and Big Data technologies, explore how these database technologies differ conceptually from traditional relational database technologies, understand their applications, uses, advantages, and disadvantages, and provide hands-on experience with NoSQL and Big Data databases. The course offers a mix of theoretical treatment and hands-on application of the discussed NoSQL and Big Data technologies.

Prerequisite(s)/Corequisite(s): Prior exposure to data management is expected. The prereq is: ISQA 3310, ISQA 8040, CSCI 4850, or work experience that has given you a comparable grounding in database concepts and technologies; in this case permission by the instructor is needed.

ISQA 8460 INTERNET OF THINGS (IOT), BIG DATA AND THE CLOUD (3 credits)

This course introduces the Internet of Things (IoT). It provides an overview of a number of technologies and research disciplines that enable the Internet to reach out into the real world of physical objects. In the future, the "Things" in question may have identities and virtual personalities, operating in smart spaces using intelligent interfaces to connect and communicate with the social, environmental, and user context.

Prerequisite(s)/Corequisite(s): Basic Web Development using HTML/CSS and some MVC framework. The equivalent of two semester exposure to programming.

ISQA 8510 MANAGING USABILITY FUNCTIONS IN SYSTEMS DEVELOPMENT ORGANIZATION (3 credits)

This course deals with usability of information systems, from the perspective of organizing and managing usability functions in a systems development organization. After briefly introducing the background to system usability and usability principles, the course focuses specifically on the introduction, organization, support, management and evaluation of usability functions in systems development organizations. The role of the usability professional in the organization is emphasized.

Prerequisite(s)/Corequisite(s): Two semesters of programming or demonstrable experience and ISQA 8040 or equivalent, not open to non-degree graduate students.

ISQA 8525 GRAPHICAL USER INTERFACE DESIGN (3 credits)

This course is an introduction to interaction design with a primary emphasis on designing usable and useful computer interfaces. Students will learn the principles of interface design grounded in a fundamental understanding of human cognitive processes. They will learn how end-users develop and use mental models of interaction and will apply this knowledge to the design of interfaces for real-world applications. A design project will challenge students to plan their own designs, to develop interfaces and to integrate them into a working application prototype, to test their application with real users, and to effectively communicate the overall results. (Cross-listed with ISQA 3520)

Prerequisite(s)/Corequisite(s): CIST 1300

ISQA 8530 E-COMMERCE SECURITY (3 credits)

The course will integrate concepts, principles, and technologies from business, telecommunications, and computer science to identify, understand, and propose solutions to the security threats to e-commerce.

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 8310. Not open to non-degree graduate students.

ISQA 8546 COMPUTER SECURITY MANAGEMENT (3 credits)

The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST4540, CYBR 4540, CYBR 8546)

Prerequisite(s)/Corequisite(s): IASC 4360 or permission of the instructor.

ISQA 8560 INFORMATION WARFARE AND SECURITY (3 credits)

This course will study the nature of information warfare, including computer crime and information terrorism, as it relates to international, national, economic, organizational, and personal security. Information warfare policy and ethical issues will be examined.

Prerequisite(s)/Corequisite(s): CIST 2100 or BSAD 8030 or ISQA 8030, or permission of instructor required.

ISQA 8570 INFORMATION SECURITY POLICY AND ETHICS (3 credits)

The course will cover the development and need for information security policies, issues regarding privacy, and the application of computer ethics. (Cross-listed with IASC 8570)

Prerequisite(s)/Corequisite(s): CIST 2100 or BSAD 8030, or permission of instructor.

ISQA 8580 SECURITY RISK MANAGEMENT AND ASSESSMENT (3 credits)

The purpose of this course is to prepare the student for managing information security at the organizational level. This course will combine concepts from strategic management, decision science and risk analysis to prepare the student to integrate security issues into an organizational strategic planning process.

Prerequisite(s)/Corequisite(s): CIST 2100 or ISQA 8030. Not open to non-degree graduate students.

ISQA 8596 IT AUDIT AND CONTROL (3 credits)

This course explores organizational and managerial issues relevant to planning and conducting IT audit and control activities. The course covers the following conceptual areas: business risks and the management of business risk, IT risk as a component of business risk, the need to manage IT risks, and the basic type of controls required in a business system in order to control IT risks. Issues associated with new risks created by the use of the internet for business applications and electronic business are also covered. (Cross-listed with ISQA 4590)

Prerequisite(s)/Corequisite(s): A solid understanding of business foundations such as accounting and introductory auditing and exposure to the IS discipline is essential for success in this course. Permission of instructor is required to enroll.

ISQA 8600 FROM DATA TO DECISIONS (3 credits)

This course focuses on inquiry-driven data preparation and exploratory analysis skills for audience-driven, decision-oriented data analysis. Students gain experience in data evaluation, cleaning, documentation, and exploration with basic descriptive statistics and visualizations.

ISQA 8700 DATA MINING: THEORY AND PRACTICE (3 credits)

This course provides students theoretical issues as well as practical methods for conducting data mining process, including the implementation of a warehouse. After covering the essential concepts, issues, techniques to build an effective data warehouse, this course emphasizes the various techniques of data mining, such as association, classification, clustering and prediction for on-line analyses within the framework of data warehouse architectures. This course also promotes students to conduct a real-life data analyzing project in Big Data Era.

Prerequisite(s)/Corequisite(s): ISQA 8050 and ISQA 8310 and ISQA 8040, not open to non-degree graduate students.

ISQA 8720 APPLIED STATISTICAL MACHINE LEARNING (3 credits)

This course focuses on advanced techniques in the analysis and evaluation of data, using both supervised and unsupervised methods. It covers the main types of statistical learning models needed for complex data analytics problems, as well as aspects of model development and optimization.

Topics include: Linear and Non-Linear Regression Models, Classification, Resampling Methods, Model Selection and Regularization, Decision Trees, Model Boosting and Bagging, Support Vector Machines, and Clustering methods. This is an applied, hands-on course that will use a state-of-the-art statistical tool to implement the discussed approaches in assignments and a course project and focuses on the understanding and application of the concepts.

Prerequisite(s)/Corequisite(s): ISQA 8156 (B- grade or better) and the following topics: The equivalent of two classes of statistics and/or advanced mathematics and a minimum of one semester of applying R in courses and/or projects

ISQA 8736 DECISION SUPPORT SYSTEMS (3 credits)

This course examines a set of information systems which specifically support managerial decision makers: Decision Support Systems, Group Decision Support Systems, Executive Information Systems, Data Warehouses, Expert Systems, and Neural Networks. This course explores the development, implementation, and application of these systems, how these systems can be applied to current business problems, as well as how organizational issues impact the implementation and usage of these systems. (Cross-listed with ISQA 4730)

Prerequisite(s)/Corequisite(s): CIST 2100 or equivalent.

ISQA 8750 STORYTELLING WITH DATA (3 credits)

This course provides an in-depth study of how to build a compelling story using data for business professionals to make winning arguments, it provides an overview of a number of technologies and research disciplines that enabled the power of data visualization. Data visualization is critical to managing large volumes of data, and can be defined as the science (analytical) and art (design) of manipulating and presenting data for expression and cognitive recognition. Data visualization involves using data in a way that humans can clearly understand, supporting efforts by organization to gain competitive advantage by changing operations, decision-making, and strategic initiatives.

Prerequisite(s)/Corequisite(s): CSCI 1620 or equivalent. Admission into the UNO graduate program, basic web development or work experience with comparable grounding in programing, scripting concepts & technologies and permission by the instructor is needed.

ISQA 8810 INFORMATION TECHNOLOGY PROJECT FUNDAMENTALS (3 credits)

The course will integrate concepts and techniques from management science, psychology, organizational behavior, & administration change to identify, understand & propose solutions to the problems of project management. The purpose of the course is to prepare the graduate for project participation and leadership.

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8820 PROJECT RISK MANAGEMENT (3 credits)

This course will cover project risk management, i.e., the process of measuring or assessing risk in projects and then developing strategies to manage the risk. The topics covered will include: Risk Management Planning, Risk Identification, Quantitative Risk Analysis, Qualitative Risk Analysis, Risk Response Planning, and Risk Monitoring and Control will be covered in detail. Students will learn how to apply and use the tools and techniques needed to perform these project management tasks. A collection of readings on risk management from the empirical literature coupled with risk management standards from organizations such as IEEE and the Project Management Institute (PMI) will be used to provide the student with an excellent foundation in risk management and control.

Prerequisite(s)/Corequisite(s): ISQA 8810 or permission of instructor.

ISQA 8900 INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS (1-3 credits)

The content of the course will vary. However, both the student and the faculty member must sign an Independent Research Agreement and file it with the Master of Science in Management Information Systems Graduate Program Committee before registration for the course. This agreement will detail the project, the schedule for its completion, the form of the output, the method of evaluation and other relevant information pertaining to the project.

Prerequisite(s)/Corequisite(s): Permission of instructor, and at least 12 hours of course work toward a M.S. in MIS should be completed.

ISQA 8910 INFORMATION SYSTEMS INTERNSHIP (1-3 credits)

Information Systems Internship provides students with an opportunity for practical application and further development of knowledge and skills acquired in the MS MIS degree program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s)/Corequisite(s): Permission of the instructor required. Students must have completed a minimum of 18 credit hours towards the MS MIS program. Not open to non-degree graduate students.

ISQA 8950 CAPSTONE MANAGEMENT INFORMATION SYSTEMS (3 credits)

The course consists of a student executed Information Systems design project providing an in-depth practical experience. It typically covers system conceptualization, analysis, and design. It may also involve prototyping. The project will typically not include the actual implementation of the system. This course replaces the MS in MIS comprehensive exam requirement.

Prerequisite(s)/Corequisite(s): Students must have 6 credit hours or fewer left in the program. Students must have completed all core classes. Not open to non-degree graduate students.

ISQA 8990 THESIS (1-6 credits)

This course is a research project designed and executed under supervision of a thesis supervisory committee. Student will develop skills, including the ability to design, conduct, analyze, and report results in writing (i.e., thesis) of an original, independent, scientific investigation. The student's thesis supervisory committee must approve the project plan.

Prerequisite(s)/Corequisite(s): ISQA 8060 research methods or equivalent. Graduate major in MIS and approval of the thesis supervisory committee. Not open to non-degree graduate students.

ISQA 9010 FOUNDATIONS OF INFORMATION SYSTEMS RESEARCH (3 credits)

This course covers the following areas: (1) information systems as an academic discipline including classic readings in IS and its reference disciplines, (2) theory development and evaluation, (3) research methods applicability in IS.

Prerequisite(s)/Corequisite(s): Doctoral student standing in the information systems areas or with the permission of the instructor; ISQA 8060 or equivalent. Not open to non-degree graduate students.

ISQA 9020 TECHNICAL AND PROCESS ISSUES IN INFORMATION SYSTEMS RESEARCH (3 credits)

This seminar is a survey course on the technical and process issues in information systems research. The course balances the acquisition of knowledge about the conduct of research in technical and process issues with the application of that knowledge to research on information systems. Major topics include: software engineering, programming, data base systems, decision support systems, data warehousing and mining systems, object-oriented systems, adaptive and expert systems, client-service systems, information filtering and multimedia systems, information agents, mobile computing, telecommunications, and electronic commerce.

Prerequisite(s)/Corequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 9010 is recommended. Not open to non-degree graduate students.

ISQA 9030 BEHAVIORAL AND ORGANIZATIONAL ISSUES IN INFORMATION SYSTEMS (3 credits)

This seminar is a survey course on behavioral and organizational issues in information systems research. The course balances the acquisition of knowledge about the conduct of research in behavioral and organizational issues with the application of that knowledge to research on information systems. The course is intended for doctoral students in Information Technology or related areas.

Prerequisite(s)/Corequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 9010 is recommended. Not open to non-degree graduate students.

ISQA 9120 APPLIED EXPERIMENTAL DESIGN AND ANALYSIS (3 credits)

Constructing and analyzing designs for experimental investigations; completely randomized, randomized complete block and Latin-square designs, split-plot designs, incomplete block designs, confounded factorial designs, nested designs, and treatment of missing data, comparison of designs. The course will use computer-assisted analysis and graphic techniques included in software such as Statistical Analysis Software (SAS) or Statistical Package for Social Sciences (SPSS) or R (a programming language that provides a wide variety of statistical and graphical techniques. Similar to the S language).

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156 or consent of instructor. Not open to non-degree graduate students.

ISQA 9130 APPLIED MULTIVARIATE ANALYSIS (3 credits)

The use of multivariate analysis for solving business problems. Multivariate Analysis of Variance (MANOVA), factor, cluster, and discriminant analysis techniques in IT research. The course will use computer-assisted analysis and graphic techniques included in software such as Statistical Analysis Software (SAS) or Statistical Package for Social Sciences (SPSS) or R (A programming language that provides a wide variety of statistical and graphical techniques. Similar to the S language).

Prerequisite(s)/Corequisite(s): ISQA 4150 or ISQA 8156 or consent of instructor. Not open to non-degree graduate students.

ISQA 9150 RESEARCH IN INFORMATION TECHNOLOGY (3 credits)

Research methods in Information Technology involves an overview of the research process specific to problems in IT. Students will learn about theories in IT relevant to their areas of research. They will identify key components of research problems in IT, understand different types of research processes, develop research questions, and design research projects. They will learn to construct research instruments that enable them to collect data. They will also learn about the different data collection and analysis tools and techniques. As part of this course, students will take the CITI training and achieve the research readiness they need to succeed in the PhD in IT program.

Prerequisite(s)/Corequisite(s): Permission of the instructor. Not open to non-degree graduate students.

ISQA 9900 ADVANCED RESEARCH IN INFORMATION SYSTEMS (3 credits)

This course provides a format for exploration of advanced research areas that are of interest to doctoral students in the information systems and/or information technology area. The specific research area will vary from semester to semester, in keeping with research interests of faculty and students. Examples of areas include, but are not limited to, e-business technology, mobile commerce, intelligent agents e-enabled decision support, electronic collaboration, computer-mediated communications, human-computer interaction and information assurance.

Prerequisite(s)/Corequisite(s): Admission to PhD program in Information Technology or permission of instructor

International Studies (INST)**INST 8015 ISEP EXCHANGE - SEMESTER (1-18 credits)**

This is a UNO Study Abroad course - graduate version of INST 1010.

IT Innovation (ITIN)**ITIN 8000 TECHNOLOGY & INNOVATION-STATE OF THE ART (3 credits)**

ITIN 8000 provides a regular forum for IT Innovation graduate students, where the latest developments in the field of IT Innovation are introduced and discussed. The course also functions as a central communication and collaboration hub for graduate students in IT Innovation. Participation is required.

Prerequisite(s)/Corequisite(s): Students in the MS in IT Innovation program may register. Not open to non-degree graduate students.

ITIN 8006 SPECIAL TOPICS IN IT INNOVATION (1-6 credits)

This course is designed to acquaint students with issues which are current to the field or emerging trends in the IT Innovation area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ITIN 4000).

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ITIN 8100 INTERMEDIA (3 credits)

This is an ongoing course that brings together students of the arts and students of scientific disciplines in order to facilitate and promote the creation of intermedia art, and to further explore shared resources, joint research, and exhibition/performance opportunities.

Prerequisite(s)/Corequisite(s): Instructor permission

ITIN 8210 DESIGN SCIENCE AND THEORY DEVELOPMENT (3 credits)

The purpose of this course is to help students understand theory, theoretical contributions, and design science. Students will approach such questions as: What is a theory? What makes a good theory? Why are theories just theories and not laws? What is not a theory? Following this introduction, we explore design science as a research methodology and Information Technology design theories. Ultimately, students create their own new studies around some design concept.

Prerequisite(s)/Corequisite(s): Graduate standing / permission of the instructor

ITIN 8220 DESIGN PROCESS (3 credits)

Inter-disciplinary design teams will work together to design and innovate products of the future. The design projects in the course are developed to directly address a problem brought forward by a technology company in the Omaha area in order to provide students with a design experience that directly impacts real-world product development. Students will focus on the technological (interface), physical (ergonomics) and aesthetic quality of design, and will learn how to conduct rigorous user studies in a laboratory setting. Teams will be cross disciplinary and consider all aspects of the design, creation, testing, and fabrication of the products.

ITIN 8256 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with BSAD 8726, ENTR 4720, ITIN 4720, MGMT 4720, MKT 4720).

Prerequisite(s)/Corequisite(s): Admission to a graduate program or instructor permission.

ITIN 8266 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, CSCI 8266, ITIN 4260).

ITIN 8300 RESEARCH FOUNDATIONS (3 credits)

This course serves as an introduction to research literature and research methodology in the innovation and creativity research domain. Students are introduced to skills, methodological issues, and bibliographic resources to enhance their ability in critically evaluating and conducting research in the IT Innovation field. Through a series of readings, in-class discussions, and lectures the student will select and define a research question, explore the various types of research designs and complete a literature review. This course is structured to make research meaningful and significant and enable students to write effectively.

Prerequisite(s)/Corequisite(s): CIST 2500 or equivalent

ITIN 8900 INDEPENDENT STUDIES (1-3 credits)

A variable credit course for the graduate student who will benefit from independent reading assignments and research type problems. Independent study makes available courses of study not available in scheduled course offerings. The student wishing to take an independent study course should find a faculty member willing to supervise the course and then submit, for approval, a written proposal (including amount of credit) to the IT Innovation Graduate Program Committee Chair at least three weeks prior to registration.

Prerequisite(s)/Corequisite(s): Written permission required

ITIN 8940 ITIN CAPSTONE I (3 credits)

The purpose of the Information Technology Innovation (ITIN) capstone courses is for ITIN majors to explore, identify, evaluate, design, construct and implement a new innovative product that leverages information technology and includes an interdisciplinary field of study. The capstone is the culmination product of the specific various disciplines a student has selected as the unique combination for his or her degree. This course serves as part one of the capstone project for the ITIN Masters degree. The two courses for the ITIN capstone project are intended to be completed in two consecutive semesters (Fall/Spring).

Prerequisite(s)/Corequisite(s): Must be pursuing ITIN MS degree and have completed: two sections of ITIN 8000, ITIN 8220, 8300, and 3 hours of upper division courses in interdisciplinary area identified in the student's course plan. Not open to non-degree graduate students.

ITIN 8950 ITIN CAPSTONE II (3 credits)

The purpose of the ITIN capstone courses is for ITIN majors to explore, identify, evaluate, design, construct and implement a new innovative product that leverages information technology and an interdisciplinary field. The capstone is the culmination product for prospective graduate and utilizes the discipline(s) a student has selected as the unique combination for his or her degree. This course serves as part two of the capstone project for the Information Technology Innovation (ITIN) program. The two courses for the ITIN capstone project are taught in two consecutive semesters.

Prerequisite(s)/Corequisite(s): Must be pursuing ITIN MS degree and have completed: three sections of ITIN 8000, ITIN 8220, 8300, 8940 and 6 hours of upper division courses in interdisciplinary area identified in the student's course plan. Not open to non-degree graduate students.

ITIN 8990 THESIS (1-6 credits)

This course is required for the Master of Science degree in the MS in IT Innovation Program. The purpose of this course is to conduct original research in IT Innovation, under supervision of a faculty member, culminating in a paper document that represents the student's competency in their chosen field, as well as scholarly contributions. With consultation from their committee, MS in IT Innovation thesis students should be prepared to independently complete the writing of their thesis and successfully defend their thesis.

Prerequisite(s)/Corequisite(s): Graduate major in ITIN and approval of the Thesis Advisory Committee.

ITIN 9300 SOCIAL COMPUTING AND ITS APPLICATIONS (3 credits)

It is indisputable that social media and the Internet more broadly reshaped information disbursement and processing. Digital participation and communication has become the 'new normal' and the dividing line between off- and online communities is increasingly blurred. This leads to specific challenges in the extraction and analysis of online social media data, and the management of new communication.

Prerequisite(s)/Corequisite(s): Open to all currently-admitted doctoral students. Students should have a technical aptitude; experience with at least one web scripting language, (e.g. PHP, rails, python etc) is helpful. Experience with JSON is advantageous but not essential.

Journalism and Media Communication (JMC)

JMC 8016 HISTORY OF MASS COMMUNICATION (3 credits)

This class covers development of the U.S. media from 1690 to present day, including newspapers, magazines, radio, television, the new media of the Internet, advertising and public relations. A special emphasis is placed on freedom of the press. (Cross-listed with JMC 4010).

JMC 8046 SOCIAL MEDIA MEASUREMENT AND MANAGEMENT (3 credits)

Social Media Measurement and Management explores the dynamic development of social media platforms within a journalism and media communication context. Students of journalism, broadcasting, public relations, advertising and marketing will examine theories and best practices of social media interaction and engagement. (Cross-listed with JMC 4040).

Prerequisite(s)/Corequisite(s): Good standing as a UNO graduate student.

JMC 8226 LITERARY JOURNALISM (3 credits)

Survey of the journalistic works of pertinent American writers through readings, lectures, discussions, plus creative writing assignments. (Cross-listed with JMC 4220).

Prerequisite(s)/Corequisite(s): JMC 2100 and Junior Standing

JMC 8235 PRINCIPLES OF PUBLIC RELATIONS (3 credits)

This course will focus primarily on techniques to garner and sustain public understanding, acceptance and support for an organization. This course will explain the merits of these techniques through theory and application, and will offer constant reminders of the relationship between theory and practice. Understanding theory can result in more efficient and effective use of techniques. (Cross-listed with JMC 3230).

Prerequisite(s)/Corequisite(s): JMC 2100, JMC 2104 and minimum GPA of 2.25

JMC 8246 PUBLIC RELATIONS CASE STUDIES (3 credits)

The course is designed to enable the student: 1) to integrate issue-management and decision-making theoretical models with the communication theory and research techniques presented in JMC 3230/ JMC 8236 and 2) to apply professional judgment to the public relations problem-solving process through the development of structured analysis of historical cases. (Cross-listed with JMC 4240).

JMC 8266 MEDIA RELATIONS (3 credits)

This course focuses on the communication tools used in media relations, the nuances of working with reporters from press and various media, news writing, news judgment, strategic planning, and the application of communication theories in understanding the relationship between news organizations and media relations representatives for organizations and corporations. (Cross-listed with JMC 4260).

JMC 8316 MEDIA & POLITICS (3 credits)

An in-depth study of the impact of the media on political communication. This course will explore the symbiotic relationship of media and political communication, including the influence of traditional mass media, digital media, and social media on the political communication process. Students will delve into media theories and critically examine the influence of the media on the political communication process. (Cross-listed with JMC 4310).

JMC 8346 MEDIA REGULATION & FREEDOM (3 credits)

Media and Internet regulation and free expression as defined and interpreted through First Amendment rights, prior restraint and obscenity case law, advertising and public relations, broadcast and cable TV regulation and deregulation policy, new telecommunication media, and privacy. (Cross-listed with JMC 4340).

Prerequisite(s)/Corequisite(s): ENGL1160

JMC 8376 COMMUNICATION WORKSHOP (3 credits)

A workshop to explore communication theory and processes and to develop skills in their application. (Cross-listed with JMC 4370).

Prerequisite(s)/Corequisite(s): Junior Standing, Permission of instructor

JMC 8386 FILM THEORY AND CRITICISM (3 credits)

Study of major trends in film criticism and theory in (primarily) Europe and America, with concentrated analysis of selected films. (Cross-listed with JMC 4380).

JMC 8396 MEDIA ENTREPRENEURSHIP (3 credits)

4390 Media Entrepreneurship explores new and emerging media business models from local, national and global perspectives. Students learn about and work within the start-up economy and entrepreneurial approaches. The course offers professional and critical perspectives. (Cross-listed with JMC 4390, ENTR 4390).

Prerequisite(s)/Corequisite(s): Minimum cumulative GPA- 2.25; Junior standing, ENGL 1160 or equivalent, or instructor permission.

JMC 8406 MASS MEDIA ETHICS (3 credits)

The course examines ethical standards and practices of the media - print, electronic and online media, as well as advertising, public relations and entertainment media. It includes development of ethical decision-making skills. (Cross-listed with JMC 4400).

JMC 8416 COMMUNICATION LAW AND POLICY (3 credits)

Communication practitioners need to understand legal protections and constraints. This course explores legal concepts, frameworks and principles to understand constitutional, statutory, regulatory and case law and policies. The student must have a basic understanding of government, social studies and human rights principles. The First Amendment and international law provide a framework for exploring current cases and issues. (Cross-listed with JMC 4410).

JMC 8426 SPORTS WRITING (3 credits)

Students will learn all aspects of the specialized aspect of sports media communication. Areas covered will include writing, interviewing, storytelling, using multiple media platforms and the ethics of sports reporting. Various writing experiences across the media spectrum, from traditional media to the new forms of online journalism, will be addressed. (Cross-listed with JMC 4420)

Prerequisite(s)/Corequisite(s): JMC 2100 and JMC 2104; JMC 2200; JMC 2300; JMC 2370; and minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

JMC 8506 MASS COMMUNICATION AND PUBLIC OPINION (3 credits)

This class represents a study of the philosophy, process and effects of mass communication; the relationship between the mass media and public opinion and propaganda; and the nature, function and measurement of public opinion. (Cross-listed with JMC 4500).

JMC 8816 DIGITAL LITERACIES FOR TECHNICAL COMMUNICATORS (3 credits)

This course addresses emerging issues in digital literacies such as the rhetoric of technology, technological competency, technology and information ecologies, critical awareness of technology and human interactions, judicious application of technological knowledge, user-centered design, networking and online communities, ethics and technology, and culture and technology. (Cross-listed with ENGL 4810, ENGL 8816, JMC 4810).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor

JMC 8826 POLITICS AND FILM (3 credits)

This course introduces students to the analysis of politics and film, focusing on how politics is portrayed in film and the politics of film making. (Cross-listed with PSCI 4820, JMC 4820, PSCI 8826).

JMC 8836 TECHNICAL COMMUNICATION (3 credits)

Technical Communication introduces students to the field of technical communication. Students will study the development of print and electronic genres common to industry settings, the design and production of technical documents, the writing processes and work practices of professional technical communicators, and the roles of technical communicators in organizational contexts. (Cross-listed with ENGL 4830, ENGL 8836, JMC 4830).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor

JMC 8856 INFORMATION DESIGN FOR TECHNICAL COMMUNICATORS (3 credits)

This course introduces students to strategies for integrating visual and textual elements of technical documents. Instruction will focus on design theory and application through individual and collaborative projects. Students will develop the professional judgment necessary for making and implementing stylistic choices appropriate for communicating technical information to a lay audience. (Cross-listed with ENGL 4850, ENGL 8856, JMC 4850).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor

JMC 8876 TECHNICAL EDITING (3 credits)

This course introduces students to the roles and responsibilities of technical editors: the editorial decision-making processes for genre, design, style, and production of technical information; the communication with technical experts, writers, and publishers; the collaborative processes of technical editing; and the techniques technical editors use during comprehensive, developmental, copyediting, and proofreading stages. (Cross-listed with ENGL 4870, ENGL 8876, JMC 4870).

Prerequisite(s)/Corequisite(s): ENGL 1160 or permission of the instructor

JMC 8896 CAPSTONE COURSE IN TECHNICAL COMMUNICATION (3 credits)

In this capstone course, students will extend foundational skills learned in previous technical communication courses. Students will demonstrate their competency in the technical documentation process in organizational environments, the issues important to the technical communication profession, and the practices of writing and creating complex technical documents for specific purpose and audience. (Cross-listed with ENGL 4890, ENGL 8896, JMC 4890).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

JMC 8906 SEMINAR MASS COMMUNICATION (3 credits)

A senior seminar applying historical and theoretical perspective to current issues and developments in mass communications. (Cross-listed with JMC 4900)

Prerequisite(s)/Corequisite(s): Graduate standing

JMC 8926 MEDIA LITERACY (3 credits)

An advanced seminar on the study of media and information literacy through deconstruction of mass communication content, meaning construction, framing analyses and critical/cultural approaches. (Cross-listed with JMC 4920).

Kinesiology (KINS)

KINS 8040 ADVANCED STATISTICS (3 credits)

This course will be a study in the statistical methods commonly used in descriptive and experimental research in physical education and exercise science. Application, particularly regarding the purpose, selection, and interpretation of statistical procedures will be emphasized. (Cross-listed with BMKI 9041).

Prerequisite(s)/Corequisite(s): HPER 8030/HEKI 8030 or BMKI 9001/HPER 9031/HEKI 9031 or equivalent

KINS 8056 EXERCISE AND SPORT NUTRITION (3 credits)

This course presents an overview of the principles of nutrition and the relationship between nutrition and health, fitness, and sports performance. It is designed to provide students with the knowledge and skills necessary to assess nutritional status, improve overall health, and enhance sports performance. (Cross-listed with KINS 4050).

KINS 8076 OPTIMIZING SPORTS PERFORMANCE (3 credits)

The course is designed for coaches, athletes and physically active people, and allied health professionals. Course content emphasizes integration of several disciplines in sports medicine aimed at preparing one for optimal sports performance. Topics include peaking, detraining, overuse injury, efficiency, special foods and nutritional requirements, genetics and trainability, and designing of multi-year training schedules. (Cross-listed with KINS 4070).

Prerequisite(s)/Corequisite(s): PE 4940/KINS 4940 with a grade of C- or better.

KINS 8086 CLINICAL EXERCISE PHYSIOLOGY (3 credits)

This course will offer students the knowledge, skills, and abilities to take the American College of Sports Medicine's health fitness instructor certification exam. This course will emphasize health risk assessment, exercise testing, and exercise prescription for healthy and clinical populations. (Cross-listed with KINS 4080).

Prerequisite(s)/Corequisite(s): PE 4940/KINS 4940 with a grade of C- or better.

KINS 8120 CURRENT TOPICS IN WEIGHT MANAGEMENT (3 credits)

This course will focus on current issues related to weight management. Students will review and apply the guidelines for physical activity and nutrition, critique current perspectives about weight management in the scientific literature and popular media (e.g., books, podcasts, news articles), and develop a best practice for weight management using what they have learned.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

KINS 8130 IMPLEMENTING PHYSICAL ACTIVITY IN DIVERSE POPULATIONS (3 credits)

This course will focus on information necessary to assess, design, implement, and evaluate the need for and effectiveness of physical activity interventions in diverse populations, races, and ethnicities. These populations will include: African American, Native American, Hispanic, Asian American, Pacific Islanders, and Caucasian. Additionally, candidates will complete a health and physical activity service learning project in which they will work with diverse populations in the community. (Cross-listed with BMKI 9131).

KINS 8140 PHYSICAL ACTIVITY ASSESSMENT AND HEALTH RELATED RESEARCH (3 credits)

This course will cover the broad scope of research on physical activity and public health. Emphasis will be placed on the application of physical activity assessment techniques. (Cross-listed with BMKI 9141).

KINS 8206 PLANNING WORKSITE WELLNESS PROGRAMS (3 credits)

This course will focus on the planning of quality worksite wellness programs utilizing standards established by the Association for Worksite Health Promotion. Steps in the planning process such as needs assessment, strategic planning, implementation, and evaluation will be taught with special application to the worksite. Critical issues involving worksite programs also will be addressed such as upper management support, program standards, corporate culture, competencies for worksite health promotion professionals, economic benefits, behavioral theories, legal issues, and the integration of worksite wellness programs and health care. (Cross-listed with KINS 4200).

Prerequisite(s)/Corequisite(s): Junior standing.

KINS 8240 SPORT IN AMERICAN CULTURE (3 credits)

Sport in American culture is a study of sport from a theoretical perspective. The relationship between sport and sub-cultures (to include disadvantaged American cultures), economics, global influences, and technology will be analyzed.

KINS 8280 CURRICULUM IN PHYSICAL EDUCATION (3 credits)

A study of the foundations for curriculum development. Special consideration is given to curriculum change, curriculum patterns and programs in physical education which will meet a culturally diverse, global society.

KINS 8316 LOWER EXTREMITY EVALUATION (3 credits)

This course is designed to provide the candidate with knowledge and skill in the area of advanced athletic injury assessment. The candidate will be exposed to current methodology in the field of orthopedic assessment, pathophysiology of orthopedic injury, and application of current research in injury evaluation. The candidate will receive practical experience in the management of athletic injuries. This course will focus on the low back, hip, and lower extremities. (Cross-listed with KINS 4310).

Prerequisite(s)/Corequisite(s): PE 8326/KINS 8326 and PE 8710/KINS 8710. Not open to non-degree graduate students.

KINS 8320 EVIDENCE-BASED PRACTICE IN SPORTS MEDICINE (3 credits)

This course is designed to provide the student with knowledge and skill in the area of developing clinical research questions, assessing research study designs, understanding statistical and epidemiological analyses, interpreting peer-reviewed manuscripts, the incorporation of research into clinical practice, understanding the role of an athletic trainer within the public health system, international classification of function, health literacy, and social determinants of health. Students in this course will learn to understand the role of evidence based /practice in clinical decision making.

KINS 8326 UPPER EXTREMITY EVALUATION (3 credits)

This course is designed to provide the candidate with knowledge and skill in the area of advanced athletic injury assessment. The candidate will be exposed to current methodology in the field of orthopedic assessment, pathophysiology of orthopedic injury, and application of current research in injury evaluation. The candidate will receive practical experience in the management of athletic injuries. This course will focus on the head, neck, thorax, and upper extremities. (Cross-listed with KINS 4320).

Prerequisite(s)/Corequisite(s): PE 8316/KINS 8316, PE 8336/KINS 8336 and PE 8720/KINS 8720. Not open to non-degree graduate students.

KINS 8336 ATHLETIC THERAPEUTIC MODALITIES (3 credits)

This course will cover the theory, physiology and application of physical agents used in the treatment of injuries and illness. Students will gain practical experience utilizing selected agents to treat injuries and illnesses. (Cross-listed with KINS 4330).

Prerequisite(s)/Corequisite(s): PE 8326/KINS 8326 and PE 8710/KINS 8710. Not open to non-degree graduate students.

KINS 8356 ORGANIZATION AND ADMINISTRATION OF ATHLETIC TRAINING (3 credits)

Administration of athletic training programs including the use of records and forms, budgets, facility design and legal concerns. (Cross-listed with KINS 4350).

Prerequisite(s)/Corequisite(s): PE 4340/KINS 4340, PE 4320/KINS 4320

KINS 8370 ANALYZING PHYSICAL EDUCATION TEACHING & SPORT INSTRUCTION (3 credits)

This course will examine the teaching and coaching in physical education and sport. It will identify assessment techniques utilized in teaching and coaching behavior research as well as typical prescriptions in an effort to improve one's performance.

Prerequisite(s)/Corequisite(s): Graduate standing

KINS 8506 BEHAVIORAL ASPECTS OF COACHING (3 credits)

This course is designed to provide the physical education teacher and athletic coach with an overview of the behavioral aspects of coaching athletes. The course will provide information which will enable the coach to enhance as well as orchestrate performance of elementary, junior high, senior high, college, and post-college athletes. (Cross-listed with KINS 4500).

KINS 8700 PSYCHOLOGY OF PHYSICAL ACTIVITY (3 credits)

The central purpose of this course is to examine the psychological antecedents and consequences of exercise and physical activity behaviors. The course will focus on traditional theories/principles of psychology as they relate to various physical activity settings. (Cross-listed with BMKI 9701).

KINS 8710 CLINICAL PRACTICUM IN ATHLETIC TRAINING I (1 credit)

Clinical Practicum in Athletic Training I is the first course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): Admission to the MA in Athletic Training program, instructor permission, & compliance with published Athletic Training Program Technical Standards for Admission. Co-requisite: PE 8326/KINS 8326. Not open to non-degree graduate students.

KINS 8720 CLINICAL PRACTICUM IN ATHLETIC TRAINING II (1 credit)

Clinical Practicum in Athletic Training II is the second course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): Admitted to MA in Athletic Training, PE 8710/KINS 8710, instructor permission, & compliance w/published Athletic Training Program Technical Standards for Admission. Co-reqs: PE 8316/KINS 8316 & PE 8336/KINS 8336. Not open to non-degree graduate students.

KINS 8730 CLINICAL PRACTICUM IN ATHLETIC TRAINING III (1 credit)

Clinical Practicum in Athletic Training III is the third course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): Admitted to MA in Athletic Training, PE 8720/KINS 8720, instructor permission, & compliance w/published Athletic Training Program Technical Standards for Admission. Co-reqs: PE 8346/KINS 8346 & PE 8356/KINS 8356. Not open to non-degree graduate students.

KINS 8740 CLINICAL PRACTICUM IN ATHLETIC TRAINING IV (1 credit)

Clinical Practicum in Athletic Training IV is the fourth course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.

Prerequisite(s)/Corequisite(s): Admission to the MA in Athletic Training, PE 8730/KINS 8730 instructor permission, and compliance with published Athletic Training Program Technical Standards for Admission. Co-req: PE 8966/KINS 8966. Not open to non-degree graduate students.

KINS 8800 RISK MANAGEMENT FOR HEALTH FITNESS PROFESSIONALS (3 credits)

A study of risk management for health fitness professionals with a focus on minimizing liability exposures for health fitness facilities and their personnel. Principles of risk management such as the assessment of liability exposures, the development and implementation of risk management strategies, and the evaluation of these strategies will be explored as well as the law as it pertains to health fitness liability. Candidates will develop the knowledge and skill to manage high quality health fitness programs in various settings.

Prerequisite(s)/Corequisite(s): PE 4010/KINS 4010 or PE 8016/KINS 8016

KINS 8856 CARDIOVASCULAR DISEASE PREVENTION AND REHABILITATION (3 credits)

The purpose of this course is to provide candidates with an introduction to the theories and practices involved in all phases of cardiac rehabilitation. (Cross-listed with KINS 4850).

Prerequisite(s)/Corequisite(s): PE 2500/BMCH 2500 with a grade of C- or better or BIOL 2840 with a grade of C- or better, PE 4940/KINS 4940 with a grade of C- or better

KINS 8865 SCIENTIFIC ASPECTS OF STRENGTH DEVELOPMENT (3 credits)

This course is designed to explore the nature of muscular strength development, to investigate the physiological basis of physical conditioning, and to provide teachers, coaches and trainers with practical experience in designing specialized conditioning programs for a variety of sports and cultures.

KINS 8900 MANAGEMENT & LEADERSHIP SKILLS FOR FITNESS WELLNESS MANAGERS (3 credits)

This course is a study of management and leadership skills necessary for the successful management of fitness and wellness facilities and programs. Candidates will develop knowledge and practical skills in the areas of personnel and financial management, marketing, and operating policies procedures as well as develop a personal leadership philosophy based on sound principles of leaders.

Prerequisite(s)/Corequisite(s): PE 4010/KINS 4010 or PE 8016/KINS 8016 or ACSM Health Fitness Certification.

KINS 8910 INTERNSHIP IN EXERCISE SCIENCE (3 credits)

This course is an off-campus, supervised, educational work experience of at least 150 clock hours at an approved worksite offering programs and experiences in fitness development or health promotion. Candidates must have current CPR certification.

Prerequisite(s)/Corequisite(s): The prerequisites for this course include 90 hours completed, 2.5 GPA, PE 4900/KINS 4900 and permission of instructor.

KINS 8950 ADVANCED EXERCISE PHYSIOLOGY (3 credits)

A detailed analysis of selected topics including acute and chronic effects of exercise on metabolic, pulmonary, and cardiovascular function; and sports nutrition. Current research findings and methodology will be emphasized. (Cross-listed with BMKI 9951).

Prerequisite(s)/Corequisite(s): PE 4940/KINS 4940 or equivalent

KINS 8970 TOPICS IN SPORTS MEDICINE (3 credits)

This course is designed to help students synthesize and apply their knowledge of athletic training and sports medicine to current topics, unique populations, and other areas of exercise, sports medicine and health care. (Cross-listed with KINS 9971).

KINS 9300 SYSTEMATIC REVIEW AND META-ANALYSIS (3 credits)

This course is designed to introduce students to the process of completing systematic reviews and meta-analyses. The objective of the course is to provide students with a foundation of the requisite skills necessary to perform a quantitative and qualitative synthesis of the literature within their area of interest.

Prerequisite(s)/Corequisite(s): HEKI 8030 or equivalent research methods course.

KINS 9971 TOPICS IN SPORTS MEDICINE (3 credits)

This course is designed to help students synthesize and apply their knowledge of athletic training and sports medicine to current topics, unique populations, and other areas of exercise, sports medicine and health care. (Cross-listed with KINS 8970).

Latino/Latin American Studies (LLS)

LLS 8145 LATINO/-A POLITICS (3 credits)

This course introduces students to the dynamism and growth of the role of Latinos, as a group of political actors, in the United States. This course provides students with an exposure to and understanding of various concepts and dimensions of this phenomenon, including historical and contemporary Latino political thought and the efforts to increase political empowerment (representation and participation) and influence through grassroots, social, and political movements. (Cross-listed with PSCI 8145, LLS 3140, PSCI 3140)

LLS 8246 SOCIAL TRANSFORMATIONS IN LATIN AMERICA (3 credits)

The course reviews the main social, economic, and political forces that have shaped Latin American societies, and the sociological theories used to understand Latin American development and underdevelopment. Race, ethnicity, gender and class in Latin America, as well as the region's position in the global economy are examined. (Cross-listed with SOC 8246, SOC 4240, LLS 4240).

Prerequisite(s)/Corequisite(s): Graduate standing

LLS 8256 CRISSCROSSING THE CONTINENT: LATIN AMERICAN MIGRATIONS (3 credits)

In this course we will use an interdisciplinary lens to study the changes and continuities of migration in the Americas. The course starts with an overview of immigration to the Americas during the first era of mass migration (1850-1920) to explore the relevance of European migrations for national and identity constructions in the Southern Cone of America. Students then will be introduced to the impacts of social and political change on emigration flows, both regionally and beyond the region. They will also explore migration related policies at the national and regional level. We will also study the changes and continuities in the migration system of the Americas. Lastly, we will analyze the new North-South migration, as well as immigration to Latin America from Asia (recent and historical), Europe, and Africa. (Cross-listed with SOC 8256, SOC 4250, LLS 4250).

Prerequisite(s)/Corequisite(s): Graduate standing

LLS 8286 INTERNATIONAL RELATIONS OF LATIN AMERICA (3 credits)

Analysis of the role of Latin American states in the international political arena. Emphasis upon developing, applying and testing an explanatory theory of international politics through the study of the inter-American system: the regional, institutional and ideological environment, power relations, policies and contemporary problems. (This course fulfills the department's international politics requirement). (Cross-listed with LLS 4280, PSCI 4280, PSCI 8286)

LLS 8656 SLAVERY AND RACE RELATIONS IN THE AMERICAS (3 credits)

Slavery and Race Relations in the Americas examines the historical relationship between the trans-Atlantic slave trade and American race relations, connecting the enslavement of Africans in the Americas to race relations in the Caribbean, Latin America, and the United States. (Cross-listed with BLST 8656, BLST 4650, HIST 8076, HIST 4070).

Prerequisite(s)/Corequisite(s): Graduate standing

LLS 8685 GOVERNMENT AND POLITICS OF LATIN AMERICA (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Latin America. (Cross-listed with LLS 3680, PSCI 3680, PSCI 8685)

LLS 8786 URBAN LATIN AMERICA (3 credits)

This course examines the experience of Latin American urbanization, attending to its contributions to urban sociology, social movements, and policymaking. Topics include urban transitions (e.g. pre-Hispanic to colonial, post-colonial to industrial, and the neoliberal turn), socio-spatial configurations (e.g. plazas, squatter settlements), urban marginality debates, urban politics, and planning as well as governance innovations (e.g. bus rapid transit systems, participatory budgeting). Students will compare city case studies across the region and to urban life in the United States. (Cross-listed with SOC 4780, SOC 8786, LLS 4780).

Prerequisite(s)/Corequisite(s): Graduate standing

LLS 8906 INDEPENDENT STUDY (1-3 credits)

This course is designed for those students who are independently pursuing an area of Latino/Latin American Studies that is not covered under the existing curriculum. The student will be supervised by a member of the faculty of the LLS program. All course assignments, requirements, and expectations will be clearly indicated in advance. May be repeated for credit, up to six hours, under a different topic.

Prerequisite(s)/Corequisite(s): Permission of LLS faculty member required.

LLS 8916 CONTEMPORARY TOPICS IN LLS: SOCIAL SCIENCES (3 credits)

A discussion-led course on current and evolving issues and questions pertaining to the Latino and Latin American immigrant population in the United States and its transnational ties to Latin America and the Caribbean. Topics fall within the social sciences. The course may also include service-learning assignments when appropriate. (Cross-listed with LLS 4910.)

Prerequisite(s)/Corequisite(s): A graduate student in good standing and instructor permission.

LLS 8926 CONTEMPORARY TOPICS IN LLS:HUMANITIES (3 credits)

This course is an interdisciplinary topical approach that explores various aspects of Latino/Latin American Studies. Selected topics will be suitable for examination from the perspective of the humanities (literature, art, dance, music, theatre, and philosophy topics). Topics and disciplines will vary from term to term. Course description will be announced in advance. Repeatable up to nine credits if content differs. (Cross-listed with LLS 4920.)

LLS 8956 LATIN AMERICAN STUDY ABROAD (1-3 credits)

This course is designed as an international study abroad course that will introduce undergraduate and graduate students to the dynamism of socio-cultural, economic and political changes taking place across Latin America. Note: International travel and special fees required. (Cross-listed with LLS 4950)

Prerequisite(s)/Corequisite(s): Senior standing or Junior standing with permission of the department. LLS 1000 or LLS 1010 or equivalent and departmental permission.

Master of Fine Arts Writing (MFAW)

MFAW 8700 RESIDENCY SESSION (3 credits)

A ten-day colloquium presenting lectures, classes, workshops, readings and individual conferences with seminar faculty. Taken 4 times, the Residency Session ends one seminar session and begins the next. The session affords students intensive contact with faculty and peers before returning to their writing projects.

Prerequisite(s)/Corequisite(s): Admission to MFA in Writing program. Permission of the Program Director. Not open to non-degree graduate students.

MFAW 8710 GRADUATING RESIDENCY SESSION (0 credits)

The Graduation Residency Session is the final residency for MFA students who have successfully completed their seminars and creative thesis. In the ten days of this residency, students will give a graduating lecture, "mentor" new students in their first residency, and give a reading from their thesis. A graduating ceremony will cap their activities during this session.

MFAW 8720 ENRICHMENT RESIDENCY SESSION (2 credits)

An eight-day creative writing symposium-style course presenting lectures, workshops, readings and individual conferences with faculty. The Enrichment Residency affords advanced writing students additional intensive contact with published and apprentice writers to reinforce and enrich their life-long commitment to the art of writing and to the continuing development of their craft.

Prerequisite(s)/Corequisite(s): MFA Program Director's permission. Must have completed MFA/PhD with writing emphasis. Writers with MA in English and emphasis in writing, or writers with an extensive background in writing may also be considered. Not open to non-degree graduate students.

MFAW 8820 POETRY SEMINAR (6-12 credits)

An individualized course in poetry writing. Taken 4 times, the required seminar offers practical instruction in writing and criticism. Using distance technology, student and instructor work through independent projects designed to sharpen the student's writing skills. Each student will compose both original poetry and critical analyses of poetry by other writers preparatory to submitting an original book-length manuscript of publishable quality by the final semester.

Prerequisite(s)/Corequisite(s): Acceptance into the MFA in Writing Program and permission of the MFA Program Coordinator. Not open to non-degree graduate students.

MFAW 8830 FICTION SEMINAR (6-12 credits)

An individualized course in fiction writing. Taken four times, the seminar offers practical instruction in fiction writing and criticism. Using distance technology, student and instructor work through individualized writing projects designed to sharpen the student's writing skills to a professional edge. Students will compose both original fiction and critical analyses of fiction preparatory to submitting an original book-length manuscript of publishable quality by their final semester's work.

Prerequisite(s)/Corequisite(s): Permission of Program Director. Not open to non-degree graduate students.

MFAW 8840 NONFICTION SEMINAR (6-12 credits)

An individualized course in nonfiction writing. Taken 4 times, the seminar offers practical instruction in writing and criticism. Students will compose both original nonfiction and critical analyses of nonfiction.

Prerequisite(s)/Corequisite(s): Permission of Program Director. Not open to non-degree graduate students.

MFAW 8850 PLAYWRITING AND SCREENWRITING SEMINAR (6-12 credits)

An individualized seminar in playwriting or screenwriting. Taken 4 times, the seminar offers practical instruction in playwriting/screenwriting and criticism. Using distance technologies, student and instructor work through independent projects designed to sharpen the student's writing. Each student will compose both original scripts and critical analyses of scripts by other playwrights or screenwriters preparatory to submitting at minimum a full-length script, a one-act script, and a ten-minute script by the final semester.

Prerequisite(s)/Corequisite(s): Acceptance into the MFA in Writing Program and permission of the MFA Program Coordinator. Not open to non-degree graduate students.

MFAW 8870 ENRICHMENT SEMINAR IN WRITING (6 credits)

An advanced writing semester for those who want assistance launching a new writing project or have a degree in one genre and want to pursue study of another, such as fiction, creative nonfiction, poetry, young adult, playwriting, or screenwriting.

Prerequisite(s)/Corequisite(s): Corequisite: MFAW 8720. Permission from Program Coordinator required.

Materials Engineering (MATL)

MATL 8616 MATERIALS LABORATORY II (3 credits)

Application of scientific principles in the laboratory to the analysis of materials problems and selection of engineering materials. (Cross-listed with MATL 4610)

Prerequisite(s)/Corequisite(s): MATL 3600. Not open to non-degree graduate students.

MATL 8656 APPLIED PHYSICAL METALLURGY AND DESIGN (3 credits)

Principles of alloying; alloy selection; modification of the physical properties of structural alloys by thermal, mechanical, and chemical treatment; solidification and joining phenomena. (Cross-listed with MATL 4650)

Prerequisite(s)/Corequisite(s): MATL 3600. Not open to non-degree graduate students.

Mathematics (MATH)

MATH 8016 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with CSCI 4010, CSCI 8016, MATH 4010).

Prerequisite(s)/Corequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

MATH 8036 MODERN ALGEBRA (3 credits)

Algebra is the study of mathematical manipulations that preserve something (like equality - when solving equations). The areas in which Algebra finds application are quite diverse, from Ancient Greek Geometry through to Modern Information Protection and Security (error correcting codes, data compression, and cryptography). This course begins with topics that should be familiar (such as ruler-and-compass constructions, and modular arithmetic) and builds upon this foundation through polynomial rings up to finite fields and basic group theory. (Cross-listed with MATH 4030).

Prerequisite(s)/Corequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better

MATH 8050 ALGORITHMIC GRAPH THEORY (3 credits)

Review of the basic concepts of graph theory. Introduction to perfect graphs and their characterizations. Main classes of perfect graphs and their properties. Algorithms for main problems of perfect graphs. Applications of perfect graphs in several fields such as scheduling, VLSI and communication networks. (Cross-listed with CSCI 8050).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 and MATH 4150 or MATH 8156 or permission of instructor. Not open to non-degree graduate students.

MATH 8056 LINEAR ALGEBRA (3 credits)

Linear algebra is extensively utilized in the mathematical modeling of many natural phenomena. Many scientific and engineering disciplines, such as data science, chemical engineering and biology, make extensive use of the theory and techniques commonly present in basic to advanced linear algebra courses. The goal of this course is to help students to grasp a solid theoretical understanding of vectors, vector spaces, inner product spaces, linear transformations, eigenvalues, canonical forms, complex vectors, matrices, and orthogonality. By going through the materials in a mathematically rigorous way, students will develop deeper and more accurate intuitions of the basic concepts in linear algebra. Consequently, the applications of linear algebra will become much more transparent. (Cross-listed with MATH 4050).

Prerequisite(s)/Corequisite(s): MATH 2050 with a grade of C- or better; MATH 2030 or MATH 2230 or equivalent with a grade of C- or better; or permission

MATH 8060 ALGORITHMIC COMBINATORICS (3 credits)

This course includes classical combinatorial analysis graph theory, trees, network flow, matching theory, external problems, and block designs. (Cross-listed with CSCI 8060).

Prerequisite(s)/Corequisite(s): MATH 3100, CSCI 3100, MATH 8105 or CSCI 8105 or instructor's permission.

MATH 8080 DESIGN AND ANALYSIS OF ALGORITHMS (3 credits)

The course provides students an understanding of advanced topics in algorithms. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, dynamic programming, greedy algorithms, graph algorithms, and the theory of NP-Completeness. (Cross-listed with CSCI 8080).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 or equivalent. Not open to non-degree graduate students.

MATH 8105 APPLIED COMBINATORICS (3 credits)

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with CSCI 3100, CSCI 8105, MATH 3100).

MATH 8116 ABSTRACT ALGEBRA I (3 credits)

An introduction to group theory. Various classes of group are studied: symmetric groups, abelian, cyclic, and permutation groups. Basic tools are developed and used: subgroups, normal subgroups, cosets, the Lagrange theorem, group homomorphisms, quotient groups, direct products, and group actions on a set. The course culminates with the Sylow theorems in finite group theory. The theory is illustrated with examples from geometry, linear algebra, number theory, crystallography, and combinatorics. (Cross-listed with MATH 4110).

Prerequisite(s)/Corequisite(s): MATH 4050/MATH 8056 with a C- or better or MATH 4560/MATH 8566 with a C- or better or permission of instructor

MATH 8126 ABSTRACT ALGEBRA II (3 credits)

An introduction to ring and field theory. Various classes of commutative rings are considered including polynomial rings, and the Gaussian integers. Examples of fields include finite fields and various extensions of the rational numbers. Concepts such as that of an ideal, integral domain, characteristic and extension field are studied. The course culminates with an introduction to Galois theory. Applications include the resolution of two classical problems: the impossibility of angle-trisection and the general insolubility of polynomial equations of degree 5 or higher. (Cross-listed with MATH 4120)

Prerequisite(s)/Corequisite(s): MATH 4110/MATH 8116 with a C- or better or permission of instructor

MATH 8156 GRAPH THEORY & APPLICATIONS (3 credits)

Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 4150, CSCI 8156, MATH 4150).

Prerequisite(s)/Corequisite(s): MATH 2030 or permission of instructor.

MATH 8235 INTRODUCTION TO ANALYSIS (3 credits)

This course provides a theoretical foundation for the concepts of elementary calculus. Topics include real number system, topology of the real line, limits, functions of one variable, continuity, differentiation. (Cross-listed with MATH 3230).

Prerequisite(s)/Corequisite(s): MATH 1960 and MATH 2230 each with a grade of C- or better.

MATH 8236 MATHEMATICAL ANALYSIS I (3 credits)

Provides a theoretical foundation for the concepts of elementary calculus. Topics include ordered fields and the real number system, basic properties of complex numbers, metric space topology, sequences and series in \mathbb{R}^k , limits and continuity in a metric space, monotonic functions. (Cross-listed with MATH 4230).

Prerequisite(s)/Corequisite(s): MATH 3230/MATH 8235 or equivalent

MATH 8246 MATHEMATICAL ANALYSIS II (3 credits)

Provides a theoretical foundation for the concepts of classical Calculus (vector calculus included). Topics include sequences and series of functions, uniform convergence, power series, Fourier series, multivariable real differential and integral calculus, the Implicit Function Theorem, integration of different forms, and the important formulas, connecting those integrals, due to: Green, Gauss, Riemann, and Ostrogradski. (Cross-listed with MATH 4240).

Prerequisite(s)/Corequisite(s): MATH 4230/MATH 8236

MATH 8250 PARTIAL DIFFERENTIAL EQUATIONS (3 credits)

Partial differential equations (PDEs) are fundamental in the application of mathematics to science and engineering. Topics to be covered will include: Linear and nonlinear first-order equations, classification of second-order linear equations, elliptic, hyperbolic and parabolic equations and boundary value problems, and Green's functions.

Prerequisite(s)/Corequisite(s): MATH 1970, MATH 2350, or instructor's permission. MATH 4330/MATH 8336 is recommended, but not required.

MATH 8276 COMPLEX ANALYSIS (3 credits)

This course is an introduction to the theory of functions of a complex variable, a fundamental area of mathematics with multiple applications to science and engineering. Topics include the field of complex numbers, complex differentiation, the complex contour integral and Cauchy's integral formula, Taylor expansions and analytic functions, conformal mapping and Riemann's conformal equivalence theorem, residue theory and Laurent series, harmonic functions, and applications. (Cross-listed with MATH 4270).

Prerequisite(s)/Corequisite(s): MATH 3230/MATH 8235 or permission of the instructor.

MATH 8305 NUMERICAL METHODS (3 credits)

This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 3300, CSCI 8305, MATH 3300).

Prerequisite(s)/Corequisite(s): MATH 1960 with a C- or better or permission of instructor.

MATH 8306 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, CSCI 8306, MATH 4300).

Prerequisite(s)/Corequisite(s): MATH 2050 with a C- or better or permission of instructor.

MATH 8316 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, CSCI 8316, MATH 4310).

Prerequisite(s)/Corequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

MATH 8326 COMPUTATIONAL OPERATIONS RESEARCH (3 credits)

Survey of computational methods used in the solution of operations research problems. Topics include scripting to guide optimization software, metaheuristics for optimization, and basic machine learning algorithms. (Cross-listed with MATH 4320).

Prerequisite(s)/Corequisite(s): MATH 3200 and MATH 4300 each with a grade of C- or better or permission of instructor.

MATH 8336 INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS (3 credits)

This course introduces the basic methods of PDEs guided by applications in physics and engineering. The main topics to be covered include The Linear First order PDEs, Transport equations, Characteristics, Classification of PDEs, Separation of variables, Heat conduction, vibrating membranes, boundary value problems, Maximum principle, Sturm-Liouville problems, Fourier series, Fourier integrals, Harmonic functions, Legendre polynomials, Distributions, Green's functions. (Cross-listed with MATH 4330).

Prerequisite(s)/Corequisite(s): MATH 1970 with a C- or better and MATH 2350 with a C- or better, or permission of instructor; MATH 2050 recommended, not required.

MATH 8356 ORDINARY DIFFERENTIAL EQUATIONS (3 credits)

This course covers the theory of initial-, boundary-, and eigenvalue problems, existence theorems, real and complex linear systems of differential equations, and stability theory. There will be a strong emphasis on methods for finding solutions of initial and boundary value problems and analyzing properties of these solutions for various ordinary differential equations. (Cross-listed with MATH 4350).

Prerequisite(s)/Corequisite(s): MATH 1970 with a C- or better, MATH 2050 with a C- or better, and MATH 2350 with a C-, or better or instructor's permission.

MATH 8400 DYNAMICAL SYSTEMS AND CHAOS (3 credits)

Review of difference equations and differential equations, stability theory, periodic orbits, Lyapunov exponents, fractals, chaos, state reconstruction from time series data.

Prerequisite(s)/Corequisite(s): Permission from Instructor

MATH 8406 THE FINITE ELEMENT METHOD (3 credits)

Introduction to finite elements methods for solving ordinary and partial differential equations. Theoretical foundations of finite element methods for boundary value problems, approximation by piecewise polynomial functions, variation formulation of partial differential equations, basic error estimates. The Rayleigh-Ritz-Galerkin method, convergence of approximations, time-dependent problems, error analysis, discretization and computer implementation, applications to problems in elasticity, heat transfer, and fluid mechanics. (Cross-listed with MATH 4400).

Prerequisite(s)/Corequisite(s): MATH 1970, MATH 2050 and MATH 2350 all with a C- or better or instructor permission. MATH 3300/MATH 8305 and MATH 4330/MATH 8336 recommended. Students should be able to use a programming language (ie MATLAB) to complete computational assignments

MATH 8410 BOOLEAN NETWORKS (3 credits)

This course is focused on introduction to discrete dynamical networks, in particular logical networks, and their applications.

Prerequisite(s)/Corequisite(s): MATH 1960 (Calculus II), MATH 2230 (proof writing skills), MATH 4740 or equivalent (basic probability theory), basic computer skills; or permission of the instructor.

MATH 8430 LINEAR PROGRAMMING (3 credits)

This course includes a complete development of theoretical and computational aspects of linear programming. Basic theoretical foundations covered include polyhedra, convexity, linear inequalities and duality. Advanced topics such as decomposition and column generation are covered. Both simplex methods and interior point methods are included.

Prerequisite(s)/Corequisite(s): MATH 4300/MATH 8306

MATH 8440 NETWORK PROGRAMMING (3 credits)

A presentation of network flow models and optimization algorithms. Topics include pure, generalized, integer, and constrained network problems, plus special cases of each, including transportation, assignment, shortest-path, transshipment, and multicommodity.

Prerequisite(s)/Corequisite(s): MATH 4300/MATH 8306

MATH 8456 INTRODUCTION TO MACHINE LEARNING AND DATA MINING (3 credits)

This is an introduction to machine learning and data mining which covers the following topics with an emphasis on mathematical and statistical analysis: linear and nonlinear regression models, model selection and regularization methods, resampling methods, classification models, tree-based models, and unsupervised learning topics. If time allows, text mining and deep learning will also be introduced in the course. Statistical software will be used. (Cross-listed with MATH 4450, STAT 4450, STAT 8456)

Prerequisite(s)/Corequisite(s): MATH 4740/8746 with a C- or better or STAT 3800/8805 with a C- or better or permission of instructor.

MATH 8460 INTEGER PROGRAMMING (3 credits)

Advanced study in mathematical programming with integer or mixed integer variables. Topics include integer programming, model creation, developing solution algorithms, and applications of integer programming.

Prerequisite(s)/Corequisite(s): MATH 2030 or MATH 2230 Not open to non-degree graduate students.

MATH 8480 MULTI-AGENT SYSTEMS AND GAME THEORY (3 credits)

This course covers advanced topics in the area of coordination of distributed agent-based systems with a focus on computational aspects of game theory. The main topics covered in this course include distributed constraint satisfaction, distributed constraint optimization, and competitive and cooperative game theory. (Cross-listed with CSCI 8480).

Prerequisite(s)/Corequisite(s): CSCI 4450 or CSCI 8456. Suggested background courses: CSCI 4480 or CSCI 8486; CSCI 8080. Not open to non-degree graduate students.

MATH 8500 NUMERICAL LINEAR ALGEBRA (3 credits)

Topics covered in this course include error propagation, solutions of nonlinear equations, solutions of linear and nonlinear systems by various schemes, matrix norms and conditioning, and computation of eigenvalues and eigenvectors. (Cross-listed with CSCI 8500).

Prerequisite(s)/Corequisite(s): MATH 1960 and MATH 2050, or permission of instructor. Familiarity with computer programming is assumed.

MATH 8510 NUMERICAL DIFFERENTIAL EQUATIONS (3 credits)

Topics covered in this course include interpolation and approximations, numerical differentiation, numerical integration, and numerical solutions of ordinary and partial differential equations. (Cross-listed with CSCI 8510).

Prerequisite(s)/Corequisite(s): MATH 1970, MATH 2350, or permission of instructor. Familiarity with computer programming is assumed.

MATH 8520 ADVANCED TOPICS IN OPERATIONS RESEARCH (3 credits)

Advanced treatment of a specific topic in the area of operations research not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with CSCI 8520).

Prerequisite(s)/Corequisite(s): MATH 4300 or MATH 8306 or CSCI 4300 or CSCI 8306 or permission of the instructor.

MATH 8566 NUMBER THEORY & CRYPTOGRAPHY (3 credits)

An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 4560, CSCI 8566, MATH 4560).

Prerequisite(s)/Corequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

MATH 8616 INTRODUCTION TO TOPOLOGY (3 credits)

This is a proof-oriented course presenting the foundations of topology. Metric spaces and general topological spaces are introduced. The course explores the properties of connectedness, compactness and completeness, and operations of Tychonoff product and hyperspace. (Cross-listed with MATH 4610).

Prerequisite(s)/Corequisite(s): MATH 3230/8235 with a C- or better or permission of instructor.

MATH 8620 GENERAL TOPOLOGY (3 credits)

General topology has roots in geometry and analysis through the study of spaces, dimensions, and transformations. Its development was influenced by the parallel development of (axiomatic) set theory. This course introduces topological spaces from the point of view of separation axioms, countability axioms, compactifications, Baire property, and other completeness properties. Basic concepts of Descriptive Set Theory are also introduced.

Prerequisite(s)/Corequisite(s): MATH 4610/8616 or permission of instructor.

MATH 8626 ITERATED FUNCTION SYSTEMS AND FRACTALS (3 credits)

This is a proof-oriented course presenting the foundations of fractal geometry. It introduces students to the beauty, magic, and applications of fractals and iterated function systems, with emphasis on the mathematics behind it all. Topics range from contractions on hyperspaces and their fixed points to fractal dimensions to Julia and Mandelbrot sets. (Cross-listed with MATH 4620).

Prerequisite(s)/Corequisite(s): MATH 8616 with a C or better or permission of instructor.

MATH 8645 MODERN GEOMETRY (3 credits)

This course will study the modern foundations of Euclidean and Non-Euclidean Geometry. Included will be a study of the principles of axiomatic systems. Euclidean Geometry will be investigated using Hilbert's axioms for Euclidean geometry (or another equivalent Euclidean geometry axiom set). Hyperbolic geometry will be encountered through the models of Klein and Poincare. Neutral geometry with Lambert and Saccheri quadrilaterals will be studied. Finite geometries and projective geometries will also be explored. (Cross-listed with MATH 3640).

Prerequisite(s)/Corequisite(s): MATH 2230 with a grade of C- or better.

MATH 8650 INTRODUCTION TO PROBABILITY MODELS (3 credits)

This is an introduction to probability modeling including Poisson Processes, Markov chains, birth-death processes, queueing models and renewal theory. Applications will be an important part of the course.

Prerequisite(s)/Corequisite(s): MATH 4740/MATH 8746 or STAT 3800/STAT 8805 or permission of instructor.

MATH 8666 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)

This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, CSCI 8666, MATH 4660).

Prerequisite(s)/Corequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

MATH 8670 TOPICS IN PROBABILITY AND STATISTICS (3 credits)

A variable topics course in probability and or statistics. Topics covered will include one or more of the following: reliability theory and applications in engineering and science, advanced probability and statistical models, theory of parametric estimation and applications, and advanced probability theory and application.

Prerequisite(s)/Corequisite(s): MATH 4740/MATH 8740 or STAT 3800/STAT 8800 or permission from instructor

MATH 8720 RELIABILITY THEORY (3 credits)

This course covers the probabilistic and statistical aspects of reliability theory. Reliability theory is concerned with the probability that a component or system is successfully working over a given time period or at a specific time instance. (Cross-listed with STAT 8720).

MATH 8746 INTRODUCTION TO PROBABILITY AND STATISTICS I (3 credits)

A mathematical introduction to probability theory including the properties of probability; probability distributions; expected values and moments; specific discrete and continuous distributions; and transformations of random variables. (Cross-listed with MATH 4740).

Prerequisite(s)/Corequisite(s): MATH 1970 and either MATH 2230 or MATH 2030 or permission of instructor.

MATH 8756 INTRODUCTION TO PROBABILITY AND STATISTICS II (3 credits)

Theory and methods of statistical inference including sampling distributions, estimators, estimation, and statistical hypotheses. (Cross-listed with MATH 4750).

Prerequisite(s)/Corequisite(s): MATH 4740/MATH 8746

MATH 8766 TOPICS IN APPLIED MATHEMATICS (3 credits)

Selection of such topics such as dynamical systems and chaos, Boolean networks, modeling of discrete or continuous systems, matrix theory, difference equations, information theory, discrete events simulation and other approved by Upper Curriculum Committee. (Cross-listed with MATH 4760).

Prerequisite(s)/Corequisite(s): MATH 3100/CSCI 3100

MATH 8855 HISTORY OF MATHEMATICS (3 credits)

An overview of the history of mathematics and famous mathematicians via studying and solving famous mathematical problems, exploring famous mathematical theorems, and studying the biographies of famous mathematicians. (Cross-listed with MATH 3850).

Prerequisite(s)/Corequisite(s): MATH 1970 and MATH 2230

MATH 8960 MASTER'S PROJECT (1-6 credits)

An applied project, designed and executed under the supervision of both a faculty and industry advisor. In the project the student will apply their mathematical and/or statistical skills to an applied problem. The student will present their results via a written report and oral presentation. (Cross-listed with STAT 8960).

Prerequisite(s)/Corequisite(s): Permission of faculty advisor and graduate program chair. Not open to non-degree graduate students.

MATH 8970 INDEPENDENT GRADUATE STUDIES (1-3 credits)

Under this number a graduate student may pursue studies in an area that is not normally available to him/her in a formal course. The topics studied will be a graduate area in mathematics to be determined by the instructor.

Prerequisite(s)/Corequisite(s): Permission of instructor and graduate classification.

MATH 8980 GRADUATE SEMINAR (1-3 credits)

A graduate seminar in mathematics.

MATH 8990 THESIS (1-6 credits)

An independent research project, written under the supervision of a graduate adviser in the department of mathematics. Approval of the topic and the completed project by thesis committee is required.

Prerequisite(s)/Corequisite(s): Approval of the topic and the completed project by thesis committee is required.

MATH 9110 ADVANCED TOPICS IN APPLIED MATHEMATICS (3 credits)

Advanced treatment of a specific topic in the area of applied mathematics not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ.

Prerequisite(s)/Corequisite(s): Permission of instructor.

MATH 9230 THEORY OF FUNCTION OF REAL VARIABLES (3 credits)

A theoretical foundation for the concepts of measure theory and integration on a measure space as developed by Henry Leon Lebesgue (followed by others) starting the first decade of the 20th century including a comparison with Riemann's classical construction of integration theory known from classical calculus. Topics include: Real number system, convergence, continuity, bounded variation, differentiation, Lebesgue-Stieltjes integration, abstract measure theory, and the L_p spaces.

Prerequisite(s)/Corequisite(s): MATH 4230/MATH 8236 or permission of the instructor

Mathematics for Teachers (MTCH)

MTCH 8010 STATISTICAL RESEARCH FOR MATHEMATICS TEACHERS (3 credits)

This course is designed for graduate students in the MAT program who select the statistics option to complete their degree. The student will do a literature review, design a study involving mathematics education, gather and analyze the data, and prepare a manuscript for submission to a refereed journal. (The course will not count toward a major in the MA or MS program.) To prepare for the course, interested students should contact the instructor of the course several months before (8 is the norm) to have time to do the groundwork for the study.

Prerequisite(s)/Corequisite(s): STAT 8015 and TED 8010.

MTCH 8020 MATHEMATICAL MODELING FOR SECONDARY TEACHERS (3 credits)

This course will examine the mathematics underlying several problem situations found in a variety of societal settings. Mathematical models of problems in current literature will be examined and other models will be constructed based on data collected through course activities. Topics relevant to these problems will include function analysis, algebra, geometry, trigonometry and probability and statistics. The role of mathematics in society will be evidenced as problems considered will be timely and sources utilized will include original documentation whenever possible (i.e. recent research reports, government reports and publications).

MTCH 8030 ALGEBRA FOR ALGEBRA TEACHERS (3 credits)

This course will use study interesting mathematical systems related to key algebraic ideas and study habits of mind that are key to effective problem solving. The properties about numbers and operations discovered will connect to the same properties taught in school algebra course. Special attention will be paid to linear, quadratic, exponential, and logarithmic, polynomial functions in connection to their importance in school algebra.

Prerequisite(s)/Corequisite(s): Admission to the Graduate Program

MTCH 8040 TOPICS IN MATHEMATICAL COMPUTING (3 credits)

This course focuses on the current state-of-the-art technology that is either designed for or is uniquely suitable for teaching mathematics. (Cross-listed with STEM 8040)

Prerequisite(s)/Corequisite(s): MATH 2200 or equivalent or approval of instructor.

MTCH 8880 ADVANCED PLACEMENT INSTITUTE: CALCULUS (3 credits)

A workshop for teachers planning to offer an advanced placement course in calculus. Objectives include increasing teacher competencies in single-variable calculus, discussion and study of AP calculus exams, implementations of AP courses in calculus, and development and presentation of projects for graduate credit. (This course will not count toward the M.A. or M.S. degrees in Mathematics, or the Secondary Mathematics Specialist Graduate Certificate.)

Prerequisite(s)/Corequisite(s): Graduate in mathematics or mathematics education.

Mechanical Engineering (MECH)

MECH 8066 AIR CONDITIONING SYSTEM DESIGN (3 credits)

Application of thermodynamic principles to the design of air conditioning systems. A comprehensive design project will be an integral part of the course. (Cross-listed with MECH 4060).

Prerequisite(s)/Corequisite(s): MECH 3000 or MENG 3000

MECH 8076 POWER PLANT SYSTEM DESIGN (3 credits)

Application of the thermodynamic and fluid dynamic principles to the design of power plants. A comprehensive design project will be an integral part of the course. (Cross-listed with MECH 4070).

Prerequisite(s)/Corequisite(s): MECH 3000 or MENG 3000

MECH 8086 HEAT EXCHANGER DESIGN (3 credits)

Design methodology for various heat exchangers employed in mechanical engineering. Introduction to computer-aided design as applied to heat exchangers. Hands-on exercises in actual design tasks. (Cross-listed with MECH 4080).

Prerequisite(s)/Corequisite(s): MECH 3000 or MENG 3000

MECH 8206 HEAT TRANSFER (3 credits)

Heat Transfer by conduction, convection, and radiation. Correlation of theory with experimental data and engineering design. (Cross-listed with MECH 4200).

Prerequisite(s)/Corequisite(s): CIVE 310, MECH 3100 or MENG 3100. Not open to non-degree graduate students.

MECH 8226 INDUSTRIAL QUALITY CONTROL (3 credits)

Statistical process control and quality assurance techniques in manufacturing. Control charts, acceptance sampling, and analyses and design of quality control systems. (Cross-listed with MECH 4220).

Prerequisite(s)/Corequisite(s): MECH 3210, MENG 3210 or STAT 3800

MECH 8386 MECHANICS OF BIOMATERIALS (3 credits)

Theory, application, simulation, and design of biomaterials that apply mechanical principles for solving medical problems (case studies in artery, brain, bone, etc.). Tentative topics include Mechanical characterization of biomaterials; Bio-manufacturing a tissue; Function-structure relationship; Design and analysis of medical implants; Active response of biomaterials; growth and remodeling mechanism; Cellular behavior and measurements, etc. (Cross-listed with MECH 4380).

Prerequisite(s)/Corequisite(s): MECH 3430 or MENG 3430. Not open to non-degree graduate students.

MECH 8456 MECHANICAL ENGINEERING DESIGN CONCEPTS (3 credits)

Development of design concepts. Introduction to synthesis techniques and mathematical analysis methods. Application of these techniques to mechanical engineering design projects. (Cross-listed with MECH 4450).

Prerequisite(s)/Corequisite(s): (MECH 2000 or MENG 2000) and (MECH 3420 or MENG 3420) and (MECH 3500 or MENG 3500) and (MECH 3100, MENG 3100 or CIVE 310). Not open to non-degree graduate students.

MECH 8476 MECHANICAL ENGINEERING DESIGN II (2 credits)

Definition, scope, analysis, synthesis, and the design for the solution of a comprehensive engineering problem in any major area of mechanical engineering. (Cross-listed with MECH 4470).

Prerequisite(s)/Corequisite(s): MECH 4460 or MENG 4460. Not open to non-degree graduate students.

MECH 8486 ADVANCED MECHANICS OF MATERIALS (3 credits)

Stresses and strains at a point. Theories of failure. Thick-walled pressure vessels and spinning discs. Torsion of non-circular sections. Torsion of thin-walled sections, open, closed and multicelled. Bending of unsymmetrical sections. Cross shear and shear center. Curved beams. Introduction to elastic energy methods. (Cross-listed with MECH 4480).

Prerequisite(s)/Corequisite(s): (MECH 3250 or MENG 3250) and (MECH 3730 or MENG 3730)

MECH 8496 ADVANCED DYNAMICS (3 credits)

Particle dynamics using Newton's laws, energy principles, momentum principles. Rigid body dynamics using Euler's equations and Lagrange's equations. Variable mass systems. Gyroscopic motion. (Cross-listed with MECH 4490).

Prerequisite(s)/Corequisite(s): (MECH 3730 or MENG 3730); and MATH 2350. Not open to non-degree graduate students.

MECH 8506 MECHANICAL ENGINEERING CONTROL SYSTEMS DESIGN (3 credits)

Applications of control systems analysis and synthesis for mechanical engineering equipment. Control systems for pneumatic, hydraulic, kinematic, electromechanical, and thermal systems. (Cross-listed with MECH 4500).

Prerequisite(s)/Corequisite(s): MECH 3500 or MENG 3500. Not open to non-degree graduate students.

MECH 8510 INTRODUCTION TO FINITE ELEMENT ANALYSIS (3 credits)

Matrix methods of analysis. The finite element stiffness method. Computer programs. Applications to structures and soils. Introduction to finite element analysis of fluid flow.

Prerequisite(s)/Corequisite(s): (MECH 3250 or MENG 3250) and (MECH 8806 or MENG 8806) or permission

MECH 8526 EXPERIMENTAL STRESS ANALYSIS I (3 credits)

Investigation of the basic theories and techniques associated with the analysis of stress using mechanical strain gages, electric strain gages, brittle lacquer, photoelasticity and membrane analogy. (Cross-listed with MECH 4520).

Prerequisite(s)/Corequisite(s): MECH 3250 or MENG 3250

MECH 8546 INTRODUCTION TO CONTINUUM MODELING (3 credits)

Basic concepts of continuum modeling. Development of models and solutions to various mechanical, thermal and electrical systems. Thermo-mechanical and electro-mechanical coupling effects. Differential equations, dimensional methods and similarity. (Cross-listed with MECH 4540).

Prerequisite(s)/Corequisite(s): MATH 2350; and (MECH 3250 or MENG 3250) and (MECH 3730 or MENG 3730). Not open to non-degree graduate students.

MECH 8556 VEHICLE DYNAMICS (3 credits)

Introduction to basic mechanics governing automotive vehicle dynamic acceleration, braking, ride, handling and stability. Analytical methods, including computer simulation, in vehicle dynamics. The different components and subsystems of a vehicle that influence vehicle dynamic performance. (Cross-listed with MECH 4550).

Prerequisite(s)/Corequisite(s): (MECH 3430 or MENG 3430) and (MECH 3500 or MENG 3500). Not open to non-degree graduate students.

MECH 8586 DIGITAL CONTROL OF MECHANICAL SYSTEMS (3 credits)

Introduction to digital measurement and control of mechanical systems. Applications of analysis and synthesis of discrete time systems. (Cross-listed with MECH 4580).

Prerequisite(s)/Corequisite(s): MECH 4500 or MENG 4500. Not open to non-degree graduate students.

MECH 8706 THEORY AND PRACTICE OF MATERIALS PROCESSING (3 credits)

Theory, practice and application of conventional machining, forming, and non-traditional machining processes with emphasis on tool life, dynamics of machine tools and adaptive control. (Cross-listed with MECH 4700).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

MECH 8746 MANUFACTURING SYSTEMS I (3 credits)

Principles of automated production lines; analysis of transfer lines; group technology; flexible manufacturing systems; and just-in-time; and optimization strategies for discrete parts manufacturing. (Cross-listed with MECH 4740).

MECH 8750 VIBRATION THEORY AND APPLICATIONS (3 credits)

Variational principles, Lagrange's Equation. Equations of motion for multi-degree of freedom systems. Free vibrations, eigenvalue problem: modal analysis. Forced vibrations: general solutions, resonance, effect of damping, and superposition. Vibrations of continuous systems: vibrations frequencies and mode shapes for bars, membranes, beams, and plates. Experimental methods and techniques.

Prerequisite(s)/Corequisite(s): (MECH 3730 or MENG 3730) and (MATH 2350, 4330 or MATH 8336)

MECH 8766 MANUFACTURING INFORMATION SYSTEMS (3 credits)

An exploration of information systems and their impact in a manufacturing environment. Software, hardware, database systems, enterprise resource planning, networking, and the internet. (Cross-listed with MECH 4760).

Prerequisite(s)/Corequisite(s): Senior standing, and CIST 1400 or CSCI 1620 or CSCI 2240.

MECH 8806 NUMERICAL METHODS IN ENGINEERING (3 credits)

Numerical algorithms and their convergence properties in: solving nonlinear equations; direct and iterative schemes for linear systems of equations; eigenvalue problems; polynomial and spline interpolation; curve fitting; numerical integration and differentiation; initial and boundary value problems for Ordinary Differential Equations (ODE's) and systems of ODE's with applications to engineering; finite difference methods for partial differential equations (potential problems, heat-equation, wave-equation). (Cross-listed with MECH 4800).

Prerequisite(s)/Corequisite(s): MATH 2350 or MATH 8355

MECH 8836 ENGINEERING ANALYSIS WITH FINITE ELEMENTS (3 credits)

Analysis of engineering systems using finite elements; a critical and challenging task performed during the design process for many engineering systems. Four very distinct domains are studied: Structural stress analysis, heat transfer, fluid flow, and modal analysis. (Cross-listed with MECH 4830).

Prerequisite(s)/Corequisite(s): (MECH 3100 or MENG 3100) , (MECH 3430 or MENG 3430) , (MECH 3500 or MENG 3500) and (Prereq/ Coreq: MECH 4200 or MENG 4200). Not open to non-degree graduate students.

MECH 8916 SPECIAL TOPICS IN ENGINEERING MECHANICS (1-6 credits)

Treatment of special topics in engineering mechanics by experimental, computational and/or theoretical methods. Topics will vary from term to term. (Cross-listed with MECH 4910).

MECH 8986 LABORATORY AND ANALYTICAL INVESTIGATIONS (0-6 credits)

Investigation and written report of research into specific problem in any major area of mechanical engineering. (Cross-listed with MECH 4980).

MECH 9180 FUNDAMENTALS IN FINITE ELEMENTS (3 credits)

Theory of finite elements. Displacement versus force method. Formulation of element stiffness matrices. Convergence criteria. Solution methods for large sets of equations. Application to trusses, frames, plates and shells.

Prerequisite(s)/Corequisite(s): (MECH 8486 or MENG 8486) , (MECH 8806, MENG 8806, or CIVE 851)

MECH 9210 QUALITY ENGINEERING: USE OF EXPER DESIGN & TECHNIQUES (3 credits)

Extension of industrial quality control methods and techniques. Off-line and on-line quality control methods. Development of quality at the design state through planned experiments and analyses. Experimental design methods will include factorial, 2k, 3k, and fractional factorials designs. The course will include an applied project in design of quality.

MECH 9250 MANUFACTURING AND DYNAMIC SYSTEMS MODELING (3 credits)

Difference and differential equation models directly from series of observed data. Underlying system analysis including impulse response, stability and feedback interpretation. Forecasting and accuracy of forecasts. Periodic and exponential trends in seasonal series. Modeling two series simultaneously. Minimum mean squared error control and forecasting by leading indicators. Illustrative applications to real life data in science and engineering.

Prerequisite(s)/Corequisite(s): MATH 8356.

MECH 9300 MECHANICS OF COMPOSITE MATERIALS (3 credits)

Introduction to composite materials. Properties of anisotropic lamina. Laminated composites. Failure theories. Analysis of composite structures.

Prerequisite(s)/Corequisite(s): MECH 4480, MENG 4480, MECH 8486 or MENG 8486

MECH 9330 THEORY OF ELASTICITY I (3 credits)

Plane stress and strain. Solution of two-dimensional problems by polynomials. Two-dimensional problems in polar coordinates. Triaxial stress and strain. Torsion of noncircular cross section. Bending of prismatical bars. Hydrodynamical analogies.

Prerequisite(s)/Corequisite(s): MECH 4480, MENG 4480, MECH 8486 or MENG 8486; MATH 2350.

MECH 9370 THEORY OF PLATES AND SHELLS (3 credits)

Basic equations for the bending and stretching of thin plates with small deformations. General theory of deformation of thin shells with small deflections. Large deformations theories of plates and shells. Effect of edge conditions.

Prerequisite(s)/Corequisite(s): (MECH 8486 or MENG 8486) and MATH 8336

MECH 9420 THEORY OF PLASTICITY (3 credits)

Basic concepts of plasticity. Yield conditions and yield surfaces. Torsion of cylindrical bars and Saint Venant-Mises and Prandtl-Reuss theories. General theory of plane strain and shear lines. Steady and pseudo-steady plastic flow. Extremum principles. Engineering applications.

Prerequisite(s)/Corequisite(s): MECH 9330 or MENG 9330

MECH 9700 ADVANCED MANUFACTURING PROCESSING (3 credits)

Theory, practice and technology of advanced manufacturing processes, with emphasis on process mechanism, surface integrity, tool and machine design, adaptive control and expert systems.

Prerequisite(s)/Corequisite(s): Permission.

Music (MUS)

MUS 815A APPLIED BASSOON (1-3 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 815B APPLIED CELLO (1-3 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for 1-3 credits. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the string faculty.

MUS 815C APPLIED CLARINET (1-3 credits)

This course provides individual weekly instruction on clarinet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 815D APPLIED DOUBLE BASS (1-3 credits)

This course, applied bass, is intended for private study of the double bass at the university graduate level. This course provides individual weekly instruction on double bass. Students work with the instructor to schedule lessons for one to three credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): An audition is required of all students registering for three hours of study and declaring bass as their major instrument. Not open to non-degree graduate students.

MUS 815E APPLIED EUPHONIUM (1-3 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815F APPLIED FLUTE (1-3 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors), two credit hours (music education majors), or three credit hours (music performance majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty, or successful completion of at least 1 credit of MUS 815F. Students enrolled in this course must also enroll in an instrumental ensemble.

MUS 815G APPLIED FRENCH HORN (1-3 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815H APPLIED GUITAR (1-3 credits)

This course, applied guitar, is intended for private study of the guitar at the university graduate level. This course provides individual weekly instruction on guitar. Students work with the instructor to schedule lessons for one to three credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): An audition is required of all students registering for three hours of study and declaring guitar as their major instrument. Not open to non-degree graduate students.

MUS 815I APPLIED HARP (1-3 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for 1-3 credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): An audition is required of all students registering for three hours of study and declaring harp as their major instrument. Not open to non-degree graduate students.

MUS 815J APPLIED OBOE (1-3 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 815K APPLIED PERCUSSION (1-3 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Admission into the graduate college. Enrollment in this course requires an audition performed for and approved by the percussion faculty. Must attend the weekly masterclass. Not open to non-degree graduate students.

MUS 815L APPLIED PIANO (1-3 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 815M APPLIED PIPE ORGAN (1-3 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 815N APPLIED SAXOPHONE (1-3 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 815O APPLIED TROMBONE (1-3 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815P APPLIED TRUMPET (1-3 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815Q APPLIED TUBA (1-3 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815R APPLIED VIOLA (1-3 credits)

This course, applied bass, is intended for private study of the viola at the university graduate level. This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one to three credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): An audition is required of all students registering for three hours of study and declaring viola as their major instrument. Not open to non-degree graduate students.

MUS 815S APPLIED VIOLIN (1-3 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for 1-3 credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): An audition is required of all students registering for three hours of study and declaring violin as their major instrument. Not open to non-degree graduate students.

MUS 815T VOICE (1-3 credits)

This course provides graduate level individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one or two credit hour (MM Education candidates) or three credit hours (MM Performance candidates). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for and approved by the voice faculty. All students must attend the weekly masterclass.

MUS 8006 SPECIAL STUDIES IN MUSIC (1-3 credits)

Seminars or workshops in Theory, History, Performance, and Music Education designed to meet specific interests and needs of students. Topics and number of credits for each specific offering will be announced during the prior semester. (Cross-listed with MUS 4000).

Prerequisite(s)/Corequisite(s): Graduate and permission of department.

MUS 8160 PERFORMING ENSEMBLES (0-1 credits)

This course is designed to provide high quality performance experience for the graduate level string, voice, and instrumental students. In addition to the series concerts on campus, there are frequent appearances at professional music conferences and community/statewide events. Students will be exposed to a wide variety of music from appropriate style periods.

Prerequisite(s)/Corequisite(s): Graduate standing, audition. Not open to non-degree graduate students.

MUS 8246 ADVANCED AUDIO RECORDING TECHNIQUES (3 credits)

This course provides students with advanced instruction in sound mixing, digital audio editing, audio post-production and mastering. Topics include advanced digital audio editing, audio signal processing techniques, analog signal processing hardware, automation, and final product authoring and mastering. (Cross-listed with MUS 4240).

Prerequisite(s)/Corequisite(s): MUS 3170, MUS 4200 & MUS 4210. Not open to non-degree graduate students.

MUS 8436 ARRANGING FOR JAZZ ENSEMBLE (3 credits)

Techniques of writing for jazz ensembles of various combinations of instruments. (Cross-listed with MUS 4430).

Prerequisite(s)/Corequisite(s): MUS 2480 or MUS 2420

MUS 8446 MUSIC SINCE 1945 (3 credits)

This course covers important developments in music in the United States and Europe since 1945. (Cross-listed with MUS 4440).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of the instructor.

MUS 8460 MUSIC ANALYSIS FOR PERFORMANCE (3 credits)

Advanced study of performance practice and music analysis.

Prerequisite(s)/Corequisite(s): Graduate Student in Music

MUS 8536 HISTORY OF WESTERN OPERA (3 credits)

This course will consist of significant music theater works in the Western world from 1600 to the present. (Cross-listed with MUS 4530).

Prerequisite(s)/Corequisite(s): Music major or permission of instructor

MUS 8546 RENAISSANCE MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature c. 1350-1600. (Cross-listed with MUS 4540).

Prerequisite(s)/Corequisite(s): MUS 2550, 2560, 2570 and graduate. Not open to non-degree graduate students.

MUS 8556 BAROQUE MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from c. 1600-1750. (Cross-listed with MUS 4550).

Prerequisite(s)/Corequisite(s): MUS 2550, MUS 2560 and graduate.

MUS 8566 CLASSICAL MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from c. 1750-1815. (Cross-listed with MUS 4560).

Prerequisite(s)/Corequisite(s): MUS 2550, 2560, 2570 and graduate

MUS 8576 ROMANTIC MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of Music literature from c. 1815-1912. (Cross-listed with MUS 4570).

Prerequisite(s)/Corequisite(s): MUS 2550, MUS 2560 and graduate.

MUS 8586 MUSIC FROM 1900 - 1945 (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from the post-romantic period to 1945. The objective will be to provide the student with a broad overview with special attention given to composers and individual works which typify a style or form. (Cross-listed with MUS 4580).

Prerequisite(s)/Corequisite(s): MUS 2560.

MUS 8596 AFRICAN-AMERICAN POPULAR MUSIC FROM BEBOP TO HIP-HOP (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of African-American popular music literature from c. 1900-present. The objective will be to provide the student with a broad overview with special attention given to musicians and individual works which typify a style or form. Listening assignments will be an integral part of the course, and attendance at live performances will supplement the lectures, discussions and readings. (Cross-listed with MUS 4590, BLST 8596, BLST 4590).

Prerequisite(s)/Corequisite(s): Music major standing or permission of instructor.

MUS 8600 PEDAGOGY OF WORLD MUSIC (3 credits)

This class will cover the two primary approaches to teaching world music; the world music curriculum and the music in America curriculum. Pedagogical approaches to the case study and the cultural survey will be included. Activities relating to performing and listening to world musics are also part of the course.

Prerequisite(s)/Corequisite(s): Graduate

MUS 8606 PIANO PEDAGOGY (3 credits)

This course is a survey of the art of teaching the piano. Course content will include a survey of beginning and intermediate piano methods, literature for the beginning/intermediate piano student, studio business practice, professional organizations, and group piano instruction pedagogy. (Cross-listed with MUS 4600).

MUS 8610 ORGANIZATION AND ADMINISTRATION IN MUSIC (3 credits)

Course is designed to acquaint students with the knowledge and concepts necessary for understanding and developing music education programs in the public schools and specific knowledge pertaining to policies and procedures for administering and supervising programs of music education.

MUS 8616 VOICE PEDAGOGY (3 credits)

This course is a study of the physiological and acoustical properties of the vocal mechanism and of the various techniques used in developing the singing voice. Also, it will apply knowledge acquired about the voice through studio teaching and observations of other voice teachers. (Cross-listed with MUS 4610).

Prerequisite(s)/Corequisite(s): Voice Music Major or permission of instructor.

MUS 8630 RESEARCH AND BIBLIOGRAPHY IN MUSIC (3 credits)

A study of research techniques and literature in music toward the objectives of reading and evaluating music research and doing independent work in the area.

Prerequisite(s)/Corequisite(s): Graduate standing in the UNO School of Music.

MUS 8640 FOUNDATIONS OF MUSIC EDUCATION (3 credits)

A study of psychological and historical backgrounds of music education through attention to relevant topics in the psychology of music and learning theory and through relevant readings in the history of music education as well as sociological trends in American schools.

Prerequisite(s)/Corequisite(s): Graduate.

MUS 8660 PEDAGOGY OF MUSIC THEORY (3 credits)

Designed to introduce teachers to the techniques and problems of teaching music theory in elementary and secondary schools and colleges. This will be accomplished through a variety of methods to include a review of texts, teaching, and research.

Prerequisite(s)/Corequisite(s): Acceptance to the graduate program in music.

MUS 8670 KODALY I: METHODOLOGY (3 credits)

This course provides strategies for teaching music based on the philosophies and practices of musician-composer-educator Zoltan Kodaly. Level I courses focus specifically on pedagogy, repertoire, and materials for grades prekindergarten through grade 1.

MUS 8680 KODALY 2: METHODOLOGY (3 credits)

This course provides strategies for teaching music based on the philosophies and practices of musician-composer-educator Zoltan Kodaly. Level I courses focus specifically on pedagogy, repertoire, and materials for grades 2 through grade 4.

Prerequisite(s)/Corequisite(s): Successful completion of MUS 8670

MUS 8690 KODALY 3: METHODOLOGY (3 credits)

This course provides strategies for teaching music based on the philosophies and practices of musician-composer-educator Zoltan Kodaly. Level III courses focus specifically on pedagogy, repertoire, and materials for grades 5-6.

Prerequisite(s)/Corequisite(s): Successful completion of MUS 8680.

MUS 8696 HEALTH AND WELLNESS FOR MUSICIANS (3 credits)

Health and Wellness for Musicians gives an overview of the dimensions of wellness and common health/wellness challenges for musicians. The course provides students with a toolbox of ideas and strategies for the development, design, and implementation of a music wellness campaign for non-musicians and individualized wellness plans for specific instruments and voice types. (Cross-listed with MUS 4660).

MUS 8700 CONDUCTING PRACTICUM (1-3 credits)

Private instruction in conducting and an intense study of the various disciplines in music and their relationship and application to the art of conducting. Course may include a group seminar component. This course may be repeated for credit.

Prerequisite(s)/Corequisite(s): Acceptance into the graduate program for conducting majors. Permission of instructor for performance or music education majors.

MUS 8710 KODALY 4: METHODOLOGY AND ADVANCED STUDIES (3 credits)

This course provides strategies for teaching music based on the philosophies and practices of musician-composer-educator Zoltan Kodaly. It is designed for students who have completed Kodaly certification (levels I-III). The course assists students in continual development of individual musicianship, mentoring, and research skills.

MUS 8720 KODALY 1: MUSICIANSHIP (1 credit)

This course provides basic musicianship skills through singing, conducting, and dictating simple rhythms, melodies and folk songs.

Prerequisite(s)/Corequisite(s): Requires concurrent enrollment in MUS 8670

MUS 8726 CHORAL LITERATURE (3 credits)

A survey course in the study of significant choral genre of the various periods of music from plain song to contemporary music. (Cross-listed with MUS 4720).

Prerequisite(s)/Corequisite(s): Graduate music major standing or permission of the instructor.

MUS 8730 KODALY 2: MUSICIANSHIP (1 credit)

This course provides intermediate musicianship skills through singing, conducting, and dictating simple rhythms, melodies and folk songs.

Prerequisite(s)/Corequisite(s): Prerequisites: MUS 8670 and MUS 8720; Requires concurrent enrollment in MUS 8680

MUS 8736 KEYBOARD LITERATURE (3 credits)

This course will examine literature written for keyboard (piano) from the 16th century to the present. Emphasis will be placed on solo literature of the Baroque, Classic, Romantic, and Contemporary periods. Included are keyboard concertos with orchestra and works for four hands and two pianos. (Cross-listed with MUS 4730).

MUS 8740 KODALY 3: MUSICIANSHIP (1 credit)

This course provides advanced musicianship skills through singing, conducting, and dictation of rhythms, melodies and folk songs in multiple meters, scales, and modes.

Prerequisite(s)/Corequisite(s): Prerequisite must have completed MUS 8680 and MUS 8730; Requires concurrent enrollment in MUS 8690

MUS 8746 VOICE LITERATURE (3 credits)

This course is a study of the development of art song in Europe and America. Emphasis will be given to German and French song literature and their influences on English and American song. (Cross-listed with MUS 4740).

Prerequisite(s)/Corequisite(s): MUS 815T or permission of graduate instructor.

MUS 8770 KODALY 4: MUSICIANSHIP (1 credit)

This course provides advanced musicianship skills through singing, conducting, and dictation of rhythms, melodies and folk songs in multiple meters, scales, and modes.

Prerequisite(s)/Corequisite(s): Prerequisites: completion of MUS 8690 and MUS 8740; Corequisites: Requires concurrent enrollment in MUS 8710

MUS 8970 GRADUATE PROJECT (3 credits)

Completion of a graduate project relevant to the student's major area of study under the supervision of an advisor. The project must demonstrate competency in writing and research/creative activity as it pertains to appropriate aspects of music.

Prerequisite(s)/Corequisite(s): A committee comprised of three full-time faculty members, with graduate standing in the School of Music must approve the project.

MUS 8980 RECITAL (3 credits)

This course involves the selection, preparation and public performance of a full recital in the student's major applied area. The recital should demonstrate the student's competency in a variety of styles and make advanced technical and interpretative demands. The course also includes related Electronic Press Kit: program, press release and photo.

Prerequisite(s)/Corequisite(s): Students are required to pay a Recital Fee which covers costs for programs and recording. Students must be concurrently enrolled in applied lessons (MUS 815) on the instrument/voice on which they are performing the recital.

MUS 8990 THESIS (3 credits)

The purpose of this course is to allow graduate students in Music Education the opportunity to develop a substantive thesis which employs and mirrors research or original thought of a quality and quantity appropriate to advanced work in music education. This course will be handled on an individual study basis with aid and consultation from a faculty thesis advisor and thesis committee. Method of grading will be a designation of "satisfactory" or "unsatisfactory".

Prerequisite(s)/Corequisite(s): MUS 8630 and 24 hours of graduate coursework. A Proposed Supervisory Committee Form and Thesis Proposal Approval Form filed with the Office of Graduate Studies before initiating the thesis at least one semester prior to the anticipated graduation date.

Natural Sciences (NSCI)

NSCI 8140 CHEMISTRY FOR HIGH SCHOOL TEACHERS (4 credits)

This course is a study of the chemistry concepts essential to high school chemistry courses which meet the National Science Education Standards. Taking this course will help high school chemistry teachers increase their understanding of chemistry to become more effective teachers of chemistry.

Prerequisite(s)/Corequisite(s): Current employment as a high school teacher and instructor permission based on adequate chemistry background.

Neuroscience (NEUR)

NEUR 8006 SYSTEMS NEUROSCIENCE (3 credits)

This is an advanced course for the Neuroscience major designed to provide a solid understanding of the peripheral and central connections that make the systems of the body function. Data and theories of brain-behavior relationships from current research in neuroscience will be discussed. (Cross-listed with NEUR 4000).

Prerequisite(s)/Corequisite(s): Graduate standing or permission. Not open to non-degree graduate students.

NEUR 8876 MOLECULAR AND CELLULAR NEUROBIOLOGY (3 credits)

This course presents foundational topics in molecular and cellular neurobiology in the context of how the nervous system is functionally organized. Topics include: nervous system cell types and their subcellular organization; electrical properties of neurons and glia; energy metabolism and biochemistry of the brain; intra- and intercellular neuronal signaling; the regulation of gene expression in neuronal cells; synaptic plasticity; and how these are altered in disease. (Cross-listed with BIOL 4870, BIOL 8876, NEUR 4870).

Prerequisite(s)/Corequisite(s): NEUR 1500, or both NEUR 1520 and NEUR 1540, or BIOL 3020, or permission of instructor.

NEUR 8896 GENES, BRAIN, AND BEHAVIOR (3 credits)

This course will evaluate the complex interaction between an organism's genome and neural activity pattern in the nervous system as related to behavior. In this course students will explore how changes in gene expression (allelic variants, epigenetics, differential regulation) and gene networks within neural tissue can reciprocally influence behaviors such as communication, foraging, reproduction, and cognition. (Cross-listed with NEUR 4890, BIOL 4890, BIOL 8896, PSYC 8896).

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

Philosophy (PHIL)

PHIL 8225 PHILOSOPHY OF ART (3 credits)

An inquiry into historical and contemporary philosophical perspectives on the making, interpreting and criticizing of works of art, including relations of the arts to other dimensions of cultures. (Cross-listed with PHIL 3220)

Prerequisite(s)/Corequisite(s): Graduate standing

PHIL 8655 PHILOSOPHY OF MIND (3 credits)

A discussion of various accounts of the nature of minds which focuses upon philosophical problems such as whether the mind is identical with the brain, the extent of similarities between human minds and computers, the nature of personal identity and the relationship of mental activity to behavior. (Cross-listed with PHIL 3650)

Prerequisite(s)/Corequisite(s): 6 hours of philosophy or permission of instructor.

PHIL 8900 READINGS IN PHILOSOPHY (3 credits)

An individually organized program of readings pertinent to one or more topics subordinate to the heading of Philosophy. To be carried out under the supervision of a member of the graduate faculty. May be repeated once for credit.

Prerequisite(s)/Corequisite(s): Graduate, permission of instructor, and no "incompletes" outstanding.

Physics (PHYS)

PHYS 8055 THE PHILOSOPHY OF SPACE EXPLORATION (3 credits)

This course deals mainly with the justification of space exploration in the face of conflicting needs. Topics to be studied include objections to the space program and responses to them, spin-off benefits, space industrialization, planetary and interstellar exploration, space colonies, search for life elsewhere, and other related theoretical issues. (Cross-listed with PHYS 3050)

Prerequisite(s)/Corequisite(s): Graduate or permission of instructor.

PHYS 8110 REPRESENTATIONS IN PHYSICS INSTRUCTION (3 credits)

In this course, students will integrate pedagogical knowledge with content knowledge in physics. Specifically, students will learn how to plan instruction in physics and physical science using research-based tools that target state and national science standards. Students in this class will learn what productive representations their students can use to assist them in bridging phenomena, words and mathematics. The course will focus on cross-cutting concepts in motion, forces, and energy/momentum. This course is designed for pre- and in-service teachers.

Prerequisite(s)/Corequisite(s): PHYS 1050, PHYS 1110, PHYS 2110, or permission of the instructor.

PHYS 8120 EXPERIMENTS IN PHYSICS INSTRUCTION (3 credits)

In this course, students will learn to reconceptualize the role experiments play in the teaching and learning of physics. Specifically, students will learn a framework for thinking about experiments that engage understanding, and they will use this framework to plan instruction in physics and physical science that targets state and national science standards. Students in this class will also learn the role of labs and their integration, multilayered experiments, and practical aspects of experimentation. This course is designed for pre- and in-service teachers.

Prerequisite(s)/Corequisite(s): PHYS 1050, PHYS 1110, PHYS 2110, or permission of the instructor.

PHYS 8155 MODERN DEVELOPMENTS IN PHYSICS (3 credits)

A resume of the most important discoveries, changes and new concepts gleaned from the last decade of research in physics. Superconductivity, lasers, masers, superfluidity, ultra large magnetic fields, space plasmas, nuclear fusion power, etc. Designed for updating physical science concepts for science majors and for science teachers. (Cross-listed with PHYS 3150)

Prerequisite(s)/Corequisite(s): PHYS 1120 or PHYS 2120.

PHYS 8165 CURRENT TOPICS IN SCIENCE (1-3 credits)

The subject matter of this course will generally not be presented in a standard physics course and may be of an interdisciplinary nature. The specific topics and prerequisites will be listed in the schedule. (Cross-listed with PHYS 3160)

Prerequisite(s)/Corequisite(s): Permission of instructor.

PHYS 8206 INTRODUCTION TO QUANTUM MECHANICS (3 credits)

This course provides an introduction to the historical development of modern physics and to the Schroedinger formulation of quantum mechanics. Specific topics will include square wells potential barriers, the simple harmonic oscillator potential and the hydrogen atom. Characteristics of multi-electron atoms, including angular momentum coupling schemes, spectra and transition rules will also be included. (Cross-listed with PHYS 4200)

Prerequisite(s)/Corequisite(s): PHYS 3250 or permission.

PHYS 8210 TEACHING PROBLEM-SOLVING IN PHYSICS (3 credits)

In this course, students will learn how to teach problem-solving process abilities within the context of physics. Specifically, students will learn how the Zone of Proximal Development can be used as a model for designing structured problem-solving activities that build student abilities with time and acquisition of content knowledge, leading to their students solving multi-step and multi-concept problems. Students will also learn how to assess problem-solving process in a consistent and rigorous way. Concepts include problem framing and getting students to see beyond surface features, physics representations, translating physics representations into mathematics, multi-equation and multi-concepts problems, and reflection. Content includes motion, force, energy, momentum, electric force and fields, and magnetism.

Prerequisite(s)/Corequisite(s): PHYS 1050, PHYS 1110, PHYS 2110, or permission of the instructor.

PHYS 8216 QUANTUM THEORY (3 credits)

The matrix operator formalism is covered along with philosophical implications of this approach. The methods developed will be applied to simple harmonic oscillator and hydrogen atom potentials. Raising and lowering operators, creation-annihilation operators, and first and second order perturbation theory will be discussed. (Cross-listed with PHYS 4210)

Prerequisite(s)/Corequisite(s): PHYS 4200 or permission.

PHYS 8226 PHYSICS OF MOLECULES AND SOLIDS (3 credits)

This course covers the various types of atomic bonding found in molecules and solids. Electronic energy levels and spectra of molecules will be discussed. Topics in solid state physics will include mechanics and thermodynamics of crystals, the scattering of waves including x-ray and neutron scattering, electron scattering and phonon and photon interactions. (Cross-listed with PHYS 4220)

Prerequisite(s)/Corequisite(s): PHYS 4200 or permission.

PHYS 8230 PHYSICS EDUCATION METHODS (3 credits)

In this course, students will integrate the research on learning theories with effective educational practices in the teaching of physics. Specifically, students will learn how to implement active learning strategies that support eliciting of student ideas, listening and questioning, and relationship building. In effect, this course focuses on the 'soft' skills needed for effective teaching of physics. Students will read articles from the education literature both specific to physics and in general. They will reflect on their experiences with their own students and how this relates to the literature they read.

Prerequisite(s)/Corequisite(s): PHYS 1050, PHYS 1110, PHYS 2110, or permission of the instructor.

PHYS 8236 SPECIAL RELATIVITY AND NUCLEAR PHYSICS (3 credits)

This course includes a brief historical background of the development of relativity theory and the importance of the experiments performed in conjunction with it. Lorentz transformations and covariant formalism will be developed and applied to certain problems in mechanics and electricity and magnetism. The nuclear physics portion of the course will include the historical development of the concept of the nuclear atom. Theoretical models of nuclear structure will be discussed, along with the theory of alpha, beta and gamma decay. Fission and fusion discussed as time permits. (Cross-listed with PHYS 4230)

Prerequisite(s)/Corequisite(s): PHYS 4200 or permission.

PHYS 8306 GENERAL RELATIVITY (3 credits)

A study of general relativity theory and its leading applications. Physical motivations and conceptual foundations will be explored. Students will be guided step-by-step to mastery of the tensor analysis required by this theory. Topics covered will include the equivalence principle, recap of special relativity, tensors, curvature and geodesics, Einstein field equations, black holes, cosmology, and gravitational waves. (Cross-listed with PHYS 4300)

Prerequisite(s)/Corequisite(s): PHYS 3750 and PHYS 4230, or permission of instructor.

PHYS 8356 ASTROPHYSICS (3 credits)

This course introduces the fundamental of astrophysics to students with a prior knowledge of physics and mathematics. A review will be given of light and telescopes, classical and quantum mechanics and special relativity. Basic laws of physics will be applied to various topics such as: the sun, nuclear fusion and particle physics, evolution and end state of stars, interstellar medium, galaxies and cosmology. (Cross-listed with PHYS 4350)

Prerequisite(s)/Corequisite(s): PHYS 2130 or 4200 and MATH 1970.

Recommended: PHYS 1350.

PHYS 8455 CLASSICAL MECHANICS (3 credits)

Statics and dynamics of particles and rigid bodies including the equations of Lagrange and Hamilton. (Cross-listed with PHYS 8455)

Prerequisite(s)/Corequisite(s): MATH 1970, PHYS 3250 or permission.

PHYS 8505 ELEMENTS OF ELECTRONICS (3 credits)

The topics covered will include basic circuit theory, principles and operation of electronic devices such as diodes, transistors and integrated circuits.

Application of these devices in various electronic circuits. Both analog and digital circuitry will be studied. (Cross-listed with PHYS 3500)

Prerequisite(s)/Corequisite(s): PHYS 1120 or PHYS 2120 and MATH 1970

PHYS 8506 BIOLOGICAL PHYSICS (3 credits)

This course is designed primarily for students specializing in Biomedical Physics. As a part of Biomedical Physics program at the Department of Physics, the course introduces the fundamental principles of physics and the use of these principles for various biological applications.

PHYS 4500/8506 covers various topics including cells, polymers, polyelectrolytes, membranes, mesoscopic forces, self-assembly, photonics, fluid mechanics, motility, chemical kinetics, enzyme kinetics, modern experimental techniques of biophysics. Each topic connects biomolecules with their functions and relevant biological phenomena from a physics perspective. This course will benefit students with interests in biological and medical physics, as well as chemistry, biology. (Cross-listed with PHYS 4500).

Prerequisite(s)/Corequisite(s): PHYS 2110 or permission of instructor required. PHYS 2120 and 3300 are recommended.

PHYS 8556 PHYSICS IN MEDICINE (3 credits)

This course is designed primarily for students desiring to specialize in Biomedical Physics. The course introduces principles and applications of various medical imaging modalities and medical physics based therapies. Topics include such imaging techniques as ultrasound, X-ray imaging, Computed Tomography (CT), MRI imaging, and positron emission tomography. The course discusses physical principles behind medical imaging and therapeutic applications and covers interaction of different kinds of radiation with biological matter. (Cross-listed with PHYS 4550).

PHYS 8605 THERMODYNAMICS AND STATISTICAL PHYSICS (3 credits)

Topics include: empirical and absolute temperature, equations of state, work, heat, entropy, the four laws of thermodynamics, phase changes, thermodynamic potentials, classical and quantum statistics of an ideal gas (e.g., blackbody radiation). Possible applications to be included: Einstein theory of a solid, paramagnetism, blackbody radiation, and conduction of electrons. (Cross-listed with PHYS 3600)

Prerequisite(s)/Corequisite(s): PHYS 2120 and MATH 1970.

PHYS 8755 ELECTRICITY AND MAGNETISM I (3 credits)

An advanced study of electrostatics and magnetostatics, including Coulomb's law, Gauss' law, the scalar potential, conductors and dielectrics, electrostatic energy, special methods, electric currents, Ampere's law, the magnetic induction, Faraday's law, and the electromagnetic wave equation as obtained from Maxwell's equations, with simple examples such as transmission lines and antennas. (Cross-listed with PHYS 3750)

Prerequisite(s)/Corequisite(s): MATH 1950, MATH 1960, MATH 1970, PHYS 3250, or permission.

PHYS 8765 ELECTRICITY AND MAGNETISM II (3 credits)

A selection of more advanced topics from electromagnetic theory, including a deeper treatment of the electromagnetic wave equations derived from Maxwell's equations, extending to propagation, reflection, and refraction of plane waves, waves in wave guides, and radiation. Other topics covered might be magnetism and magnetic energy, plasmas, and special relativity. (Cross-listed with PHYS 3760)

Prerequisite(s)/Corequisite(s): PHYS 3750.

PHYS 8805 OPTICS (3 credits)

The behavior of electromagnetic radiation as formulated in the ray, wave, and quantum models. Topics will include: reflection and refraction, vergence, matrix method, optical instruments, scalar waves, electromagnetic waves, blackbody radiation, interference, diffraction, and lasers; if time permits, fiber optics and holography will also be included. (Cross-listed with PHYS 3800)

Prerequisite(s)/Corequisite(s): PHYS 1120 or PHYS 2120 and MATH 1970.

PHYS 8956 PROBLEMS IN PHYSICS (1-3 credits)

Individual laboratory and/or library work, or reading course in some field of physics. (Cross-listed with PHYS 4950, PHYS 4960, PHYS 8966)

Prerequisite(s)/Corequisite(s): PHYS 2120 and permission of instructor.

PHYS 8960 TOPICS IN THE TEACHING OF NATURAL SCIENCE (1-4 credits)

This course is for K-12 science teachers with emphasis on content appropriate to the educational standards of the State of Nebraska and the National Science Education Standards. Teaching methodologies and technologies will be integrated with the subject matter. The format varies but is that of a workshop using lecture, individual mentoring, group study, laboratory exercises and presentations. The number of credits offered will vary.

Prerequisite(s)/Corequisite(s): Permission of Instructor.

PHYS 8966 PROBLEMS IN PHYSICS (1-3 credits)

Individual laboratory and/or library work, or reading course in some field of physics. (Cross-listed with PHYS 4950, PHYS 4960, PHYS 8956)

Prerequisite(s)/Corequisite(s): PHYS 2120 and permission of instructor.

Political Science (PSCI)

PSCI 8000 SEMINAR IN THE RESEARCH METHODS IN POLITICAL SCIENCE (3 credits)

This course introduces students to the methods of data collection and analysis for political science research.

Prerequisite(s)/Corequisite(s): Permission of graduate adviser

PSCI 8005 QUANTITATIVE ANALYSIS IN POLITICAL SCIENCE (3 credits)

This course introduces students to the techniques that political scientists use to answer research questions with quantitative data, as well as issues of research design, hypothesis formation, and causation. The course emphasizes the methods used to collect, analyze, and extract information from data using statistical computer software. (Cross-listed with PSCI 3000)

Prerequisite(s)/Corequisite(s): Permission of graduate advisor

PSCI 8015 URBAN POLITICS (3 credits)

This course introduces students to the development, powers, forms of government, and functions of cities and their suburbs as well as the problems faced by elected officials, business and community leaders, and citizens in the urban setting. (Cross-listed with PSCI 3010)

Prerequisite(s)/Corequisite(s): PSCI 1100.

PSCI 8036 THE PRESIDENCY (3 credits)

This course introduces students to the development and modern application of presidential leadership through examination of presidential selection, presidential decision-making, the relationship of the presidency with other governmental and non-governmental actors, and the role of the presidency in making public policy. (Cross-listed with PSCI 4030)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8040 SEMINAR IN AMERICAN GOVERNMENT AND POLITICS (3 credits)

This course introduces students to classic and contemporary scholarship on the principles, institutions, processes, and policies of national government in the United States with an emphasis on engaging in thoughtful discussion and individual research.

Prerequisite(s)/Corequisite(s): Permission of graduate adviser

PSCI 8045 GOVERNMENT AND POLITICS OF NEBRASKA (3 credits)

This course introduces students to the development, structures, functions and public policies of the government of the state of Nebraska.. (Cross-listed with PSCI 3040)

Prerequisite(s)/Corequisite(s): PSCI 1100.

PSCI 8046 CONGRESS AND THE LEGISLATIVE PROCESS (3 credits)

This course introduces students to the development of the Congress and modern application of the legislative process through examination of congressional elections, congressional leadership, congressional decision-making, legislative rules and procedures, the relationship of the Congress with other governmental and non-governmental actors, and the role of the Congress in making public policy. (Cross-listed with PSCI 4040)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8055 STATE GOVERNMENT AND POLITICS (3 credits)

This course introduces students to the development, structures, functions and public policies of states. (Cross-listed with PSCI 3050)

Prerequisite(s)/Corequisite(s): PSCI 1100.

PSCI 8056 THE JUDICIAL PROCESS (3 credits)

This course introduces students to the administration of law in federal and state courts with respect to the organization of the courts, judicial selection, judicial powers, judicial decision-making, judicial policy-making, the bar, and reform movements in the pursuit of justice. (Cross-listed with PSCI 4050)

Prerequisite(s)/Corequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 8100 SEMINAR IN POLITICAL ECONOMY (3 credits)

A comprehensive study of theories of political economy, linkages between politics and economics, and major contemporary issues.

Prerequisite(s)/Corequisite(s): Permission of the graduate adviser

PSCI 8105 LGBT POLITICS (3 credits)

This course introduces students to the political struggle for Lesbian, Gay, Bisexual, and Transgender (LGBT) equal rights in the United States using a model of political empowerment, which may be applied for all minority or identity groups and social movements, generating operationalized measures of progress toward the loci of political power. (Cross-listed with PSCI 3100, WGST 3100, WGST 8105)

PSCI 8116 POLITICAL PSYCHOLOGY (3 credits)

This course introduces students to the role of human thought, emotion, and behavior in politics through examination of the psychological factors that motivate political elites and the mass public. (Cross-listed with PSCI 4110, PSYC 4110, PSYC 8116)

Prerequisite(s)/Corequisite(s): PSCI 1100 is recommended.

PSCI 8120 SEMINAR IN LEADERSHIP (3 credits)

This course introduces students to classical and contemporary scholarship on leadership theory, research, and application. Students gain a foundation in models of leadership, assess their own leadership styles, and learn to integrate what they learn in corporate, governmental, non-profit, or community organizations. (Cross-listed with CACT 8510)

Prerequisite(s)/Corequisite(s): Permission of graduate adviser.

PSCI 8126 PUBLIC OPINION AND POLLING (3 credits)

This course introduces students to the origins, nature, measurement, and consequences of public opinion on policymaking. (Cross-listed with PSCI 4120)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8135 WOMEN AND POLITICS (3 credits)

This course introduces students to women's political participation, including holding elective office, socialization, the feminist movement and its opposition, and public policies with particular impact on women. The focus is on contemporary perspectives on women in American political ideas and behavior. (Cross-listed with PSCI 3130, WGST 3130, WGST 8135)

PSCI 8145 LATINO/-A POLITICS (3 credits)

This course introduces students to the dynamism and growth of the role of Latinos, as a group of political actors, in the United States. This course provides students with an exposure to and understanding of various concepts and dimensions of this phenomenon, including historical and contemporary Latino political thought and the efforts to increase political empowerment (representation and participation) and influence through grassroots, social, and political movements. (Cross-listed with PSCI 3140, LLS 3140, LLS 8145)

PSCI 8146 CONSTITUTIONAL LAW: CIVIL RIGHTS (3 credits)

This course introduces students to the history, principles, and judicial interpretation of key constitutional provisions and federal statutes regarding civil rights in the United States. (Cross-listed with PSCI 4140)

Prerequisite(s)/Corequisite(s): PSCI 1100 or equivalent.

PSCI 8150 SEMINAR IN CONSTITUTIONAL LAW (3 credits)

This course introduces students to the Constitution and the Supreme Court's exercise of judicial review in relation to governmental powers, civil rights, and civil liberties.

Prerequisite(s)/Corequisite(s): Permission of graduate advisor.

PSCI 8165 POLITICAL PARTIES (3 credits)

This course introduces students to the origin, development, structure, and functions of political parties in the United States as political organizations, coalitions of voters, and governing coalitions that seek to hold office and influence public policy. (Cross-listed with PSCI 3160)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8175 INTEREST GROUPS (3 credits)

This course introduces students to the theories, formation, organization, and activities of interest groups and their impact on public policy, particularly through their role in campaigns and elections and lobbying. (Cross-listed with PSCI 3170)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8176 CONSTITUTIONAL LAW: FOUNDATIONS (3 credits)

This course introduces students to the principles, design and operation of the American constitutional system with emphasis on analysis of the Declaration of Independence, the Articles of Confederation, the proceedings of the Constitutional Convention, and the Federalist Papers. (Cross-listed with PSCI 4170)

Prerequisite(s)/Corequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 8185 CAMPAIGNS AND ELECTIONS (3 credits)

This course introduces students to the evolution and modern application of campaigns and elections in the United States through examination of campaign management and campaign strategy in congressional and presidential elections. (Cross-listed with PSCI 3180)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8186 CONSTITUTIONAL LAW: THE FEDERAL SYSTEM (3 credits)

This course introduces students to American constitutional law as it relates to issues of federalism, the relation of the nation and the states, and separation of powers, the relation of the three branches of the national government. (Cross-listed with PSCI 4180)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8196 CONSTITUTIONAL LAW: CIVIL LIBERTIES (3 credits)

This course introduces students to the philosophy, history, and development of the personal liberties guaranteed by the Constitution including freedom of speech, religion, assembly, petition, and the right of privacy, primarily through examination of Supreme Court decisions. (Cross-listed with PSCI 4190)

Prerequisite(s)/Corequisite(s): PSCI 1100

PSCI 8200 SEMINAR IN FOREIGN POLICY AND NATIONAL SECURITY (3 credits)

This course introduces students to classic and contemporary scholarship on the formulation and implementation of foreign and national security policy in the United States with an emphasis on engaging in thoughtful discussion and individual research.

Prerequisite(s)/Corequisite(s): Permission of the graduate adviser.

PSCI 8206 INTERNATIONAL RELATIONS OF EAST ASIA (3 credits)

This course introduces students to the international politics of East Asia with an emphasis on the contemporary relations among major East Asian states (China, Japan, the Korean peninsula) and the United States. (Cross-listed with PSCI 4200)

PSCI 8216 INTERNATIONAL RELATIONS OF THE MIDDLE EAST (3 credits)

This course focuses on the international politics of the Middle East region, specifically looking at conditions for peace and causes of war. It examines how the international system, domestic politics, ideologies, and leaders influence international politics in the Middle East. (Cross-listed with PSCI 4210)

PSCI 8220 SEMINAR ON INTERNATIONAL LEADERSHIP AND STRATEGY (3 credits)

This course introduces students to international leadership and strategy theory, research, and application.

Prerequisite(s)/Corequisite(s): Permission of graduate advisor.

PSCI 8225 INTERNATIONAL ORGANIZATIONS (3 credits)

This course introduces students to the history, principles, structures, and processes developed to organize and legitimize peaceful reconciliation of the differences of nation-states and to advance their mutual interests in the contemporary global political and economic system. (Cross-listed with PSCI 3220)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8235 GENDER AND GLOBAL POLITICS (3 credits)

This seminar introduces students to gender politics in comparative and international politics. (Cross-listed with PSCI 3230, WGST 3230, WGST 8235)

PSCI 8245 THE POLITICS AND PRACTICE OF HUMAN RIGHTS (3 credits)

This course introduces students to human rights issues across the globe and explores the theoretical foundations of human rights as well as human rights institutions and transitional justice. (Cross-listed with PSCI 3240)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8246 INTERNATIONAL CONFLICT RESOLUTION (3 credits)

This course introduces students to different approaches to peace, their basic assumptions, and their application to current conflicts.. (Cross-listed with PSCI 4240)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8250 SEMINAR IN INTERNATIONAL RELATIONS (3 credits)

This course introduces students to classic and contemporary scholarship on the issues, theories, and methodological approaches associated with the study of the nation-state system, international law, international organizations, international security, and globalization.

Prerequisite(s)/Corequisite(s): Permission of graduate adviser

PSCI 8255 GLOBAL SECURITY ISSUES (3 credits)

This course introduces students to issues of national and international security that cross boundaries and threaten all countries including issues such as climate change, environmental deterioration, population and demographics, gender issues, disease and public health, the media, asymmetrical warfare, drugs/organized crime, and cyberthreats. (Cross-listed with PSCI 3250)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8256 INTELLIGENCE AND NATIONAL SECURITY (3 credits)

This course introduces students to the United States intelligence services, and their relation to broader U.S. national security policy. (Cross-listed with PSCI 4250)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8265 UNITED STATES FOREIGN POLICY (3 credits)

This course introduces students to the analysis of foreign and defense policy processes in the United States, including the role of the President, Congress, Departments of State and Defense, the intelligence community, and other actors/factors affecting policy formulation and implementation. (Cross-listed with PSCI 3260)

Prerequisite(s)/Corequisite(s): PSCI 2210.

PSCI 8266 INTERNATIONAL LAW (3 credits)

The course introduces students to the general principles of international law, including the key actors, the creation and sources of international law, the interpretation of international law by courts and tribunals, and its enforcement. (Cross-listed with PSCI 4260)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8276 GLOBAL ENVIRONMENTAL POLITICS (3 credits)

This course introduces students to issues of global environmental politics and policy, including the science behind issues such as climate change, how environmental policy is made at the national and international levels, and what role politics plays in determining environmental resource use. (Cross-listed with ENVN 4270, PSCI 4270)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8286 INTERNATIONAL RELATIONS OF LATIN AMERICA (3 credits)

Analysis of the role of Latin American states in the international political arena. Emphasis upon developing, applying and testing an explanatory theory of international politics through the study of the inter-American system: the regional, institutional and ideological environment, power relations, policies and contemporary problems. (This course fulfills the department's international politics requirement). (Cross-listed with PSCI 4280, LLS 4280, LLS 8286)

PSCI 8296 INTERNATIONAL DEVELOPMENT & SUSTAINABILITY (3 credits)

This course introduces students to different concepts of international development through the lens of sustainability. The course explores a broad range of activities related to international development, including international aid, trade, philanthropy, interventions in conflict, peacebuilding, public health, human rights, social justice, and the environment. (Cross-listed with PSCI 4290, CACT 8306)

Prerequisite(s)/Corequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8300 SEMINAR IN POLITICAL THEORY (3 credits)

This course introduces students to the history of political theory, from its origins in ancient Greece to its manifestations in contemporary thought. (Cross-listed with CACT 8200)

Prerequisite(s)/Corequisite(s): Permission of graduate advisor.

PSCI 8316 CLASSICAL POLITICAL THOUGHT (3 credits)

This course introduces students to key works representative of premodern political thought. Authors examined may include Plato, Aristotle, Xenophon, Cicero, Augustine, and Aquinas. (Cross-listed with PSCI 4310).

Prerequisite(s)/Corequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8326 EARLY MODERN POLITICAL THOUGHT (3 credits)

This course introduces students to key works of the 16th through mid-18th centuries. Authors examined may include Machiavelli, Hobbes, Hume, Smith and Montesquieu. (Cross-listed with PSCI 4320)

Prerequisite(s)/Corequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8336 LATE MODERN POLITICAL THOUGHT (3 credits)

This course introduces students to key texts of the mid-18th through 19th centuries. Authors to be examined may include Rousseau, Burke, Mill, Tocqueville, Marx, and Nietzsche. (Cross-listed with PSCI 4330).

Prerequisite(s)/Corequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8345 AMERICAN POLITICAL THOUGHT (3 credits)

This course introduces students to the ideals, ideologies, identities, and institutions of American political thought from the country's origins to the present. Topics to be covered may include the political thought of the early American settlers and of the founding generation, the debates over the creation and implementation of the Constitution, the 19th century arguments over slavery, the rise of progressivism, the New Deal and its critics, and contemporary American conservatism and liberalism. (Cross-listed with PSCI 3340)

Prerequisite(s)/Corequisite(s): PSCI 2310 is recommended.

PSCI 8346 CONTEMPORARY POLITICAL THOUGHT (3 credits)

This course introduces students to leading works of contemporary political thought, including Marx, Spencer, Dahl, Rawls, feminism, and rational choice. The theories, their interrelationships, the theorists, and the manifestations of these works will be discussed and analyzed. (Cross-listed with PSCI 4340)

Prerequisite(s)/Corequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8356 DEMOCRACY (3 credits)

A basic study of theory, practice and practitioners of political democracy, its roots, development, present application and problems and future. (Cross-listed with PSCI 4350)

Prerequisite(s)/Corequisite(s): PSCI 2500 or equivalent is recommended.

PSCI 8366 AUTHORITARIAN REGIMES (3 credits)

An analysis of various types of authoritarian regimes, their differences from democratic governments, and the causes of their establishment, maintenance, and failure. (Cross-listed with PSCI 4360).

PSCI 8376 GENERALS AND POLITICIANS: CIVIL-MILITARY RELATIONS (3 credits)

This course introduces students to civil-military relations and military politics across the globe. (Cross-listed with PSCI 4370).

Prerequisite(s)/Corequisite(s): PSCI 2500 or equivalent is recommended.

PSCI 8500 SEMINAR IN COMPARATIVE POLITICS (3 credits)

This course introduces students to classic and contemporary scholarship on the issues, theories, and methodological approaches associated with the systematic and comparative study of nation-states and their political systems with an emphasis on engaging in thoughtful discussion and individual research.

Prerequisite(s)/Corequisite(s): Permission of graduate adviser.

PSCI 8505 EUROPEAN POLITICS (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Europe, including the European Union. (Cross-listed with PSCI 3500)

PSCI 8506 GOVERNMENT AND POLITICS OF GREAT BRITAIN (3 credits)

A comprehensive study of British politics and government. Emphasis will be focused on the formal institutions and informal customs and practices of the British political system. (This course satisfies the department's comparative politics requirement). (Cross-listed with PSCI 4500)

PSCI 8526 POLITICS OF FRANCE (3 credits)

This course introduces students to the political heritage of France, contemporary political institutions and problems, and political and policy responses to these problems. (Cross-listed with PSCI 4520)

PSCI 8556 POLITICAL VIOLENCE, INSURGENCY, AND TERRORISM (3 credits)

This course is a survey on the types of violence used within a political context, focusing on its causes, forms and consequences. Specifically, this course details why and how violence occurs, and its impact on institutions and the people operating within that system. (Cross-listed with PSCI 4550).

PSCI 8585 GOVERNMENT AND POLITICS OF RUSSIA AND THE POST-SOVIET STATES (3 credits)

This course introduces students to the political cultures, institutions, processes, and public policies of Russia and the states of the former Soviet Union. (Cross-listed with PSCI 3580)

PSCI 8626 ISLAM AND POLITICS (3 credits)

This course introduces students to the interaction between religion and politics in the Muslim world, covering various political ideologies in the Muslim world and different experiences of Muslim-majority countries such as Saudi Arabia, Pakistan, Iran, Turkey, Indonesia, and Egypt. It will also analyze mainstream and radical transnational Islamic movements. (Cross-listed with PSCI 4620)

PSCI 8645 GOVERNMENT AND POLITICS OF CHINA AND EAST ASIA (3 credits)

This course introduces students to the political cultures, institutions, processes, policies, and other characteristics of China and neighboring states, with reference to other major powers engaged in the region. (Cross-listed with PSCI 3640)

PSCI 8665 GOVERNMENT AND POLITICS OF JAPAN AND EAST ASIA (3 credits)

This course introduces students to the political cultures, institutions, processes, policies and other characteristics of Japan and neighboring states, with reference to other major powers engaged in the region. (Cross-listed with PSCI 3660)

PSCI 8685 GOVERNMENT AND POLITICS OF LATIN AMERICA (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Latin America. (Cross-listed with PSCI 3680, LLS 3680, LLS 8685)

PSCI 8705 GOVERNMENT AND POLITICS OF THE MIDDLE EAST (3 credits)

This course introduces students to government and politics in the contemporary Middle East, including considerations of state formation, authoritarianism and democratization, state-society relations, religion, culture, gender, and economy. (Cross-listed with PSCI 3700)

PSCI 8716 COMPARATIVE INTERNATIONAL DEVELOPMENT AND INNOVATION (3 credits)

Comparative International Development and Innovation will analyze the rise and fall of civilizations from a historical and theoretical perspective in a comparative manner. The course will address issues concerning political, social, economic, and environmental change in national, and international contexts. Among its major emphases are state institutions, economic growth, entrepreneurship, and the transformation of social structure and culture. (Cross-listed with PSCI 4710, ENTR 4710, ENTR 8716).

PSCI 8776 POLITICAL SOCIOLOGY (3 credits)

This course explores political sociology, focusing on political processes and power. Political sociologists investigate relationships between political institutions and various other institutions, including but not limited to the economy, education, media, and religion, and the impacts that these relationships have on society and the individuals that comprise the society. This course will explore the concepts, theories, and knowledge that comprise this field such as power, legitimacy, the state, networks, stratification, and collective action. (Cross-listed with PSCI 4770, SOC 4770, SOC 8776).

Prerequisite(s)/Corequisite(s): Graduate standing

PSCI 8826 POLITICS AND FILM (3 credits)

This course introduces students to the analysis of politics and film, focusing on how politics is portrayed in film and the politics of film making. (Cross-listed with JMC 4820, JMC 8826, PSCI 4820)

PSCI 8900 READINGS IN POLITICAL SCIENCE (1-3 credits)

This course provides students an opportunity to study an advanced and specialized subject matter in the field of political science not covered in existing courses. The student must be capable of pursuing a highly independent course of study, which must be approved in consultation with the instructor in advance. This course may be repeated for different topics up to a maximum of six credit hours.

Prerequisite(s)/Corequisite(s): Permission of graduate adviser

PSCI 8910 POLITICAL SCIENCE INTERNSHIP (3 credits)

This course offers students an opportunity to experience the resolution of public issues through direct involvement in career-oriented policy organizations. The host organization must be approved in advance in consultation with the internship coordinator. This course may be repeated for a maximum of six credit hours.

Prerequisite(s)/Corequisite(s): Permission of instructor.

PSCI 8920 SEMINAR IN SPECIAL TOPICS IN POLITICAL SCIENCE (1-3 credits)

This course introduces students to an advanced and specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of twelve credit hours.

Prerequisite(s)/Corequisite(s): Permission of graduate advisor.

PSCI 8926 ADVANCED SPECIAL TOPICS IN POLITICAL SCIENCE (1-3 credits)

This course introduces students to an advanced and specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours. (Cross-listed with PSCI 4920)

PSCI 8980 RESEARCH IN POLITICAL SCIENCE (3 credits)

This course provides students an opportunity to conduct research in a specialized subject matter in the field of political science. The student must be capable of pursuing a highly independent course of study, which must be approved in consultation with the instructor in advance. This course may be repeated for different topics up to a maximum of six credit hours.

Prerequisite(s)/Corequisite(s): Permission of graduate advisor, not open to non-degree graduate students.

PSCI 8990 THESIS (3-6 credits)

A research project, written under the supervision of a graduate adviser in the Department of Political Science, in which the students establish their capacity to design, conduct and complete an original, independent, scholarly investigation of a high order. The research topic and the completed project must be approved by the student's departmental committee.

Prerequisite(s)/Corequisite(s): Permission of graduate program chair. Not open to non-degree graduate students.

Psychology (PSYC)

PSYC 8000 THE PROFESSION OF PSYCHOLOGY (0 credits)

Required non-credit course for graduate students in psychology. Intended to familiarize the beginning graduate student with the profession of psychology including such topics as ethics, professional organizations, job and educational opportunities, use of reference materials, licensing and certification and other relevant material.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 8016 HISTORY OF PSYCHOLOGY (3 credits)

A study of the origins, development and nature of psychology and its relation to external events; emphasis on the period since 1875. (Cross-listed with PSYC 4010)

Prerequisite(s)/Corequisite(s): Admission to graduate program in Psychology or permission of instructor. Not open to non-degree students or students in other departments or programs.

PSYC 8116 POLITICAL PSYCHOLOGY (3 credits)

This course introduces students to the role of human thought, emotion, and behavior in politics through examination of the psychological factors that motivate political elites and the mass public. (Cross-listed with PSCI 4110, PSCI 8116, PSYC 4110)

Prerequisite(s)/Corequisite(s): PSCI 1100 is recommended.

PSYC 8156 AFRICAN AMERICAN PSYCHOLOGY (3 credits)

African American Psychology traces the psychological history of Africans and African Americans from self-attributes and identity, through race and racism, to cognition, learning, and language. This course will review concepts relevant to understanding the psychology of African Americans, methodological and research issues, and best practices. (Cross-listed with PSYC 4150, BLST 4150, BLST 8156).

Prerequisite(s)/Corequisite(s): Graduate standing

PSYC 8250 FAMILY ANALYSIS AND TREATMENT (3 credits)

This course covers theories and techniques for family therapy, with special reference to adapting individual and group therapeutic, as well as consultation, principles for family interventions. Case analyses and evaluation methods are considered.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8256 LIMITS OF CONSCIOUSNESS (3 credits)

A course focusing on the scientific study of the psychology, neurology, and philosophy of mind. This course is designed for students who are interested in thinking about thinking. (Cross-listed with PSYC 4250, PHIL 3250)

Prerequisite(s)/Corequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 8276 ANIMAL BEHAVIOR (3 credits)

Behavior of diverse animals for the understanding of the relationships between nervous integration and the behavior manifested by the organism, as well as the evolution and adaptive significance of behavior as a functional unit. (Cross-listed with PSYC 4270, BIOL 4270, BIOL 8276)

Prerequisite(s)/Corequisite(s): BIOL 1750 and PSYC 1010 or permission of instructor, junior-senior.

PSYC 8286 ANIMAL BEHAVIOR LABORATORY (3 credits)

Laboratory and field studies of animal behavior with an ethological emphasis. Classical laboratory experiences and independent studies will be conducted. (Cross-listed with PSYC 4280, BIOL 4280, BIOL 8286)

Prerequisite(s)/Corequisite(s): PSYC 4270 or BIOL 4270 or PSYC 8276 or BIOL 8273 and not open to non-degree graduate students.

PSYC 8296 NEUROETHOLOGY (3 credits)

In the field of Neuroethology a major goal is to understand the neural bases of animal behaviors in a natural context. In this course students will investigate how behaviors are generated and modulated by the nervous system in organisms ranging from insects to mammals. We will explore the neural mechanisms underlying a variety of animal behaviors as they interact with their natural environment ranging from sensory perception of the world (e.g. echolocation, electrolocation), to locomotor movements (e.g. flying, swimming), to more complex behaviors (e.g. learning, memory). (Cross-listed with BIOL 4290, BIOL 8296, NEUR 4290).

Prerequisite(s)/Corequisite(s): Graduate Standing. Not open to non-degree graduate students.

PSYC 8316 PSYCHOLOGICAL AND EDUCATIONAL TESTING (3 credits)

The use of standardized tests in psychology and education is considered with special regard to their construction, reliability and validity. (Cross-listed with PSYC 4310)

Prerequisite(s)/Corequisite(s): PSYC 1010 and junior/senior and not open to non-degree graduate students.

PSYC 8326 HORMONES & BEHAVIOR (3 credits)

In this course, students will examine the interaction between hormones, chemical messengers released from endocrine glands, and behavior in both human and animal systems. Methods for studying hormonal issues on behavior will be addressed. This course will provide students in psychology, biology, and related disciplines an understanding of how hormones affect sensory processing, motor activities, and processing of information in the central nervous system. (Cross-listed with PSYC 4320, BIOL 4320, BIOL 8326)

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of department.. Not open to non-degree graduate students.

PSYC 8336 SOCIAL NEUROSCIENCE (3 credits)

This course will evaluate the biological substrates of sociality and social behavior, and explore the impact of social environments on brain function and development. Students in the course will explore the molecular, cellular, neurotransmitter, and endocrine influences on social behavior, including affiliative care, aggression, social bonding, altruism, and social cognition. (Cross-listed with NEUR 4330)

Prerequisite(s)/Corequisite(s): Graduate status or permission of Instructor. Not open to non-degree graduate students.

PSYC 8446 ABNORMAL PSYCHOLOGY (3 credits)

A course designed to examine the aberrant behavior of individuals. Symptoms, dynamics, therapy and prognosis of syndromes are considered. (Cross-listed with PSYC 4440)

Prerequisite(s)/Corequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 8456 PERSONALITY THEORIES (3 credits)

A comparative approach to the understanding and appreciation of personality theories considering history, assertions, applications, validations and prospects. (Cross-listed with PSYC 4450)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 8476 MENTAL HEALTH AND AGING (3 credits)

The goal of this course is to survey the mental health needs of older adults. Consideration is given to identifying both positive mental health and pathological conditions. Treatment interventions effective with older adults and their families also are discussed. (Cross-listed with PSYC 4470, GERO 4470, GERO 8476)

Prerequisite(s)/Corequisite(s): Junior or senior.

PSYC 8500 PROFESSIONAL, LEGAL, AND ETHICAL FOUNDATIONS OF SCHOOL PSYCHOLOGY (3 credits)

This course covers the role description and job activities of a school psychologist, as well as theories, assessment and intervention techniques, certification requirements, employment opportunities, public policy, legislation, and ethics relevant to school psychology. School-based field experiences will also be included in the course.

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of dept. Not open to non-degree graduate students.

PSYC 8520 FOUNDATIONS OF ASSESSMENT (3 credits)

Course content covers traditional psychometric concepts (e.g., norms, reliability, validity) and their application to various areas of human behavior that are assessed (e.g., cognitive ability, personality, achievement). Clinical considerations are applied to how assessment information is integrated into a problem-solving process.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8526 PSYCHOLINGUISTICS (3 credits)

A discussion of the literature concerned with how such psychological variables as perception, learning, memory and development relate to the linguistic variables of sentence structure, meaning and speech sounds. (Cross-listed with PSYC 4520)

Prerequisite(s)/Corequisite(s): Senior level or graduate level student or permission of the instructor. Not open to non-degree graduate students.

PSYC 8530 EARLY CHILDHOOD ASSESSMENT (3 credits)

This course is an introduction to the assessment of children during early development including infancy, toddler, preschool and early primary ages. Assessment will be discussed as it relates to problem-solving and data-based decision making (i.e., diagnosis, treatment, program evaluation). Students will learn the principles of working with young children and their families and how these principles will be used in conducting valid and reliable assessments that, in turn, lead to appropriate interventions.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8536 CULTURAL PSYCHOLOGY (3 credits)

This course will provide an overview of the cultural, community and ecological factors that play a role in how people perceive their environments. The goal is to investigate the ways in which culture affects individual behaviors, attitudes and cognitions. It may be easy to tell that two cultures are different, but identifying exactly what is meant - and all that is encompassed - when speaking about "culture" can be much more difficult. Culture can include everything from gender constructs and race/ethnicity to the effects of new technologies. All of these aspects of culture affect individuals' psychological make-up and behavior. Although psychology has largely developed from a Western tradition, attention to research from non-Western perspectives will also be emphasized. This course supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 4530, CACT 8106).

Prerequisite(s)/Corequisite(s): Enrollment in MA in Critical & Creative Thinking program or by permission of the instructor.

PSYC 8540 SCHOOL AGE ASSESSMENT (3 credits)

This course covers data-based decision-making as it applies to schools. Students will learn and practice the skills of reviewing records, interviewing, systematically observing, and testing. They will be exposed to the following types of assessments: academic, behavior, curriculum-based, intellectual, social-emotional, and screening measures.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8550 PSYCHOTHERAPEUTIC INTERVENTIONS (3 credits)

This course provides graduate students knowledge in the application of evidence-based therapeutic interventions that can be utilized with children and adolescents in school, home, and family settings. Various approaches and techniques are presented along with supporting research. Observation and participation in clinical cases may be arranged.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8576 BEHAVIOR ANALYSIS AND INTERVENTIONS (3 credits)

Introduction to experimental methodology, rationale and research literature of changing behavior through behavior modification techniques. Particular attention will be paid to methodological concerns regarding single subject design, ethical considerations and ramifications of behavior intervention with children and youth. (Cross-listed with PSYC 4570)

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8590 PSYCHOLOGY OF EXCEPTIONAL CHILDREN (3 credits)

The content of this course will focus on children who are identified as "exceptional"; in terms of behavioral, cognitive, and learning problems. Exceptionality in this sense includes students who are in need of preventative and/or intervention-based services. The topics will be approached from a multidisciplinary perspective and emphasis will be placed on utilizing a response to intervention approach in working with exceptional individuals. The service-learning component of the course will require students to learn about the educational environment by spending time in an elementary classroom, consulting with school staff and addressing the educational needs of students.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8636 ORGANIZATIONAL PSYCHOLOGY (3 credits)

This is a survey course which will cover the major concepts, theories and empirical research related to organizational psychology. Specific topics will include: work motivation, leadership, decision making and job satisfaction as well as more recent trends such as cultural diversity, work teams, work-family and quality issues. (Cross-listed with PSYC 4630)

Prerequisite(s)/Corequisite(s): Admission to a graduate program or graduate certificate program. Not open to non-degree graduate students.

PSYC 8646 PERSONNEL PSYCHOLOGY (3 credits)

A survey of psychological principles, theories and research related to personnel issues. Course includes discussion of personnel selection, performance appraisal, recruitment, training and health and safety. (Cross-listed with PSYC 4640)

Prerequisite(s)/Corequisite(s): Admission to a graduate program or graduate certificate program. Not open to non-degree graduate students.

PSYC 8656 CREATIVITY AND INNOVATION IN ORGANIZATIONS (3 credits)

To provide a discussion of the antecedents of individual and organizational creativity, including measurement, models, characteristics of the individual and the environment that facilitate creativity and innovation in an organizational setting. Students in this course will be able to understand the research literature related to creativity and innovation and apply the findings to improve critical and creative thinking, implementation of creative ideas, and development of creative teams and organizations. This course supports the Organizational Science and Leadership concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 4650, CACT 8506)

PSYC 8700 ETHICS AND LAW FOR PSYCHOLOGY AND APPLIED BEHAVIOR ANALYSIS (3 credits)

This course provides graduate students with advanced knowledge of ethical codes, legal statutes, and case law that guide the profession of psychology and related applied fields with particular attention to the practice of applied behavior analysis. The primary emphasis of the class is on clinic-, community-, and school-based practice with children and adolescents.

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

PSYC 8800 GRADUATE SEMINAR IN THE AGING BRAIN (3 credits)

The Graduate Seminar in the Aging Brain is a graduate level gerontology course focused on understanding the changes to the brain due to normal aging and aging-related diseases. This is an elective course for the Gerontology graduate program at UNO. The content matter of this course also makes it a relevant fit for graduate students from disciplines such as biology, psychology, geriatric medicine, nursing, social work, and exercise science. By the end of the course, students should have a thorough understanding of the changes to the brain in healthy aging and aging-related disease that affect cognitive and emotional functioning. (Cross-listed with GERO 8800).

Prerequisite(s)/Corequisite(s): Graduate level standing

PSYC 8806 LAW & PSYCHOLOGY: ETHICS, RESEARCH & SERVICE (3 credits)

This course presents legal principles relevant to all psychological specialties, with special reference to mental health services. Ethical reasoning and the APA ethics code are considered. (Cross-listed with PSYC 4800)

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

PSYC 8896 GENES, BRAIN, AND BEHAVIOR (3 credits)

This course will evaluate the complex interaction between an organism's genome and neural activity pattern in the nervous system as related to behavior. In this course students will explore how changes in gene expression (allelic variants, epigenetics, differential regulation) and gene networks within neural tissue can reciprocally influence behaviors such as communication, foraging, reproduction, and cognition. (Cross-listed with NEUR 4890, NEUR 8896, BIOL 4890, BIOL 8896).

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

PSYC 8900 PROBLEMS IN PSYCHOLOGY (1-6 credits)

A faculty-supervised research project, involving empirical or library work and oral or written reports.

Prerequisite(s)/Corequisite(s): Written permission of department. Not open to non-degree graduate students.

PSYC 8950 PRACTICUM FOR MASTER'S STUDENTS (1-6 credits)

Faculty-supervised experience in industry or business designed to bridge the gap between the classroom and a job, emphasizing use of previously acquired knowledge in dealing with practical problems for master's students.

Prerequisite(s)/Corequisite(s): Written permission of your practicum committee. Not open to non-degree graduate students.

PSYC 8970 MASTER'S LEVEL PRACTICUM IN SCHOOL PSYCHOLOGY (1-6 credits)

Faculty-supervised experience designed to provide experience in academic and behavioral assessment and intervention with children, and consultation with parents and school personnel.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8980 PRACTICUM IN DEVELOPMENTAL PSYCHOLOGY (1-6 credits)

Faculty-supervised experience in a setting designed to provide a practical understanding of theoretical concepts of human development. Emphasizes direct observation and or personal interaction as a means of training, and can be directed toward various populations within the developmental life span (e.g., infants, preschoolers, middle childhood, adolescents, adults, aged persons).

Prerequisite(s)/Corequisite(s): PSYC 9560 and permission of Developmental Psychology Area Committee. Not open to non-degree graduate students.

PSYC 8990 THESIS (1-6 credits)

Independent research project written under supervision of a faculty committee. May be repeated up to a total of six hours.

Prerequisite(s)/Corequisite(s): Written permission of your thesis committee. Not open to non-degree graduate students.

PSYC 9010 PROSEMINAR: STATISTICAL METHODS I (3 credits)

The purpose of this course is to introduce students to the statistical concepts of correlation and regression. The course will cover basic understanding of these techniques, their applications, and interpretations of results.

Prerequisite(s)/Corequisite(s): Graduate standing and an undergraduate course in basic statistics which included an introduction to correlation and linear regression. Not open to non-degree graduate students.

PSYC 9020 PROSEMINAR: STATISTICAL METHODS II (3 credits)

An advanced approach to experimental design and inferential statistics using the analysis of variance models.

Prerequisite(s)/Corequisite(s): A course in basic statistics which included an introduction to analysis of variance. Not open to non-degree graduate students.

PSYC 9030 SEMINAR: TOPICS IN INDUSTRIAL ORGANIZATIONAL PSYCHOLOGY (3-9 credits)

A topic area within field of Industrial Organizational Psychology will be explored in depth.

Prerequisite(s)/Corequisite(s): Admission to Industrial Organizational graduate program and permission of instructor. Not open to non-degree graduate students.

PSYC 9040 PROSEMINAR LEARNING (3 credits)

A comprehensive and intensive coverage of experimental literature on learning in humans and animals.

Prerequisite(s)/Corequisite(s): Permission of instructor. Not open to non-degree graduate students.

PSYC 9050 APPLIED BEHAVIOR ANALYSIS IN EDUCATION (3 credits)

The purpose of this course is to familiarize students with knowledge and skills in educational systems, educational assessment, educational interventions, and problem solving models with an emphasis on applied behavior analysis.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 9070 PROSEMINAR: COGNITIVE PSYCHOLOGY (3 credits)

This course will be a comprehensive overview of the field of cognitive psychology including the topics of attention and performance, memory, problem solving, and language. In addition, there will be a more in-depth coverage of selected issues.

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor. Not open to non-degree graduate students.

PSYC 9090 PSYCHOMETRIC THEORY (3 credits)

Study of theoretical and practical problems related to the development and use of psychological measures and research designs covering such topics as scaling, test development, reliability, validity, interpretation of results and generalizability.

Prerequisite(s)/Corequisite(s): PSYC 3130 or equivalent. Not open to non-degree graduate students.

PSYC 9100 SMALL N RESEARCH DESIGNS (3 credits)

This course uses applications of research methodology that involve direct observation and single-subject designs to identify evidence-based practices that address clinical problems experienced by individuals across a variety of settings. Topics covered include behavioral assessment techniques, graphing data, single subject experimental designs, and consumer satisfaction with interventions.

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor.

PSYC 9120 MULTIVARIATE STATISTICAL ANALYSIS (3 credits)

An examination of statistical techniques for describing and analyzing multivariate data commonly collected in behavioral research. Analytic techniques derived from general linear model will be considered, focusing on proper interpretation and use. The course is intended for doctoral students in psychology and (selectively) for advanced masters students in behavioral sciences.

Prerequisite(s)/Corequisite(s): PSYC 9090, 9010 and 9020 or permission of instructor. Not open to non-degree graduate students.

PSYC 9130 APPLICATIONS OF ADVANCED STATISTICS IN PSYCHOLOGY (3 credits)

This course covers a variety of statistical tools that may be used to answer research questions for group designs. A primary focus of the class is the application of statistical tools to psychology research and practice.

Prerequisite(s)/Corequisite(s): Admission to a graduate program in Psychology. Not open to non-degree graduate students.

PSYC 9140 ASSESSMENT AND TREATMENT OF AUTISM SPECTRUM DISORDERS (3 credits)

The purpose of this course is to familiarize students with the diagnosis, assessment, and treatment of autism spectrum disorders (ASD). (Cross-listed with SPED 9140).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 9230 PROSEMINAR: BEHAVIORAL NEUROSCIENCE (3 credits)

A study of the biological substrates of behavior with emphasis upon neuroanatomy, neurophysiology and neuropharmacology.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 9240 PROSEMINAR: EVOLUTIONARY PSYCHOLOGY (3 credits)

A comprehensive overview of behavioral biology including topics of evolution and behavior, behavioral ecology, physiology and genetics of behavior, and learning.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 9320 SEMINAR IN PROGRAM EVALUATION (3 credits)

This course is intended to help advanced graduate students in the applied social sciences understand the literature and conduct evaluation research. The history of program evaluation and philosophies manifest in evaluation research are reviewed, alternative evaluation models are discussed, and relevant methodological and practical issues such as quasi-experimental design and utilization are explored.

Prerequisite(s)/Corequisite(s): Students should have prior graduate-level course work or experience in research design and statistics in the applied social sciences. Not open to non-degree graduate students.

PSYC 9421 POSITIVE ORGANIZATIONAL PSYCHOLOGY AND LEADERSHIP (3 credits)

This course is a graduate seminar on organizational psychology and leadership that focuses on the understanding and critical analysis of theory and practice pertaining to individual functioning at work. Positive organizational psychology theories and practices will provide the overarching framework in understanding potential solutions to challenges and problems facing leaders and their employees. (Cross-listed with CACT 8520)

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

PSYC 9430 PROSEMINAR: PERSONALITY (3 credits)

A course considering the effects of personality variables on behavior. A historical, theoretical, psychometric and experimental approach will be emphasized.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 9440 PROSEMINAR: SOCIAL PSYCHOLOGY (3 credits)

Examination of theories, research findings and controversies in social psychology. Topics will include socialization; person perception; interpersonal attraction, leadership and group effectiveness; attitudes, attitude measurement, and attitude change; intergroup relations, power and social influence. New topics will be added as they become part of the research interests of social psychologists.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PSYC 9460 SEMINAR IN AGING AND HUMAN BEHAVIOR (3 credits)

This course will examine in detail age-related changes in psychological processes and explore the implications of these changes for behavior. The course is intended primarily for graduate students in psychology and gerontology. (Cross-listed with GERO 9460)

Prerequisite(s)/Corequisite(s): Graduate standing in gerontology or psychology.

PSYC 9470 PRACTICUM IN APPLIED BEHAVIOR ANALYSIS (1-12 credits)

The practicum in applied behavior analysis provides students with intensive supervised experience providing behavior analytic services to improve the well-being of children and their families. Students will be assigned to practicum sites based on their respective interests, career goals, and availability of positions.

Prerequisite(s)/Corequisite(s): One semester of coursework in the Applied Behavior Analysis Master's degree program or admission to the Applied Behavior Analysis Certificate program. Not open to non-degree graduate students.

PSYC 9500 SOCIOEMOTIONAL DEVELOPMENT (3 credits)

This seminar is designed to provide an in-depth examination of the research literature on socioemotional development (emotional development that influences social behavior & development), with particular emphasis on both classic issues and current topics of debate. The course topics cover issues of importance in infancy, childhood, and adolescence. Research methods, as they apply to socioemotional development, will be emphasized throughout the course.

Prerequisite(s)/Corequisite(s): Graduate standing and PSYC 9560. Not open to non-degree graduate students.

PSYC 9510 RESEARCH METHODS IN DEVELOPMENTAL PSYCHOLOGY (3 credits)

This course is designed to provide graduate students in developmental psychology and school psychology with the necessary skills to enable them to frame a research question and to design a study to answer that question. In addition, students will become familiar with methodologies for specialized areas within developmental psychology. Research ethics is a major component in the course.

Prerequisite(s)/Corequisite(s): PSYC 9560. Not open to non-degree graduate students.

PSYC 9530 COGNITIVE DEVELOPMENT (3 credits)

This course covers contemporary issues in theory and research concerning the development of processes by which environmental information is perceived, attended to, stored, transformed and used. Both Piagetian and information processing orientations will be emphasized.

Prerequisite(s)/Corequisite(s): PSYC 9560. Not open to non-degree graduate students.

PSYC 9550 PSYCHOSOCIAL DEVELOPMENT (3 credits)

A seminar focusing on research methods, theory and the empirical literature as they apply to social and personality development across the life span. All students will be expected to design and conduct a mini-observational experimental study in some specific area of social and personality development.

Prerequisite(s)/Corequisite(s): Graduate standing and PSYC 9560. Not open to non-degree graduate students.

PSYC 9560 PROSEMINAR: DEVELOPMENTAL PSYCHOLOGY (3 credits)

A survey of developmental processes across the life-span, with a particular emphasis on the interface of biological, cognitive and social influences. Theories of human development and issues pertaining to developmental processes are examined. The primary focus in the course is on the research literature pertaining to developmental psychology. Special emphasis is given to the role of context in development and to the topics of research methods, multicultural factors in development and social policy.

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

PSYC 9570 APPLIED BEHAVIOR ANALYSIS (3 credits)

A comprehensive introduction to experimental methodology in applied behavior analysis. Topics covered include observational recording systems, reliability indices, procedural implementation of behavioral techniques, single-subject research designs and a broad review of the research literature.

Prerequisite(s)/Corequisite(s): A minimum of one course in learning theory (PSYC 8560, PSYC 8576, PSYC 9040, or equivalent) and permission. Not open to non-degree graduate students.

PSYC 9610 MOTIVATION & MORALE (3 credits)

A course focusing on theory and research in the areas of work motivation, work behavior and job satisfaction. Emphasis is placed on such topics as expectancy theory, job redesign, leadership, absenteeism, turnover, goal setting and behavior modification.

Prerequisite(s)/Corequisite(s): Admission into industrial/organizational psychology graduate program and permission of instructor. Not open to non-degree graduate students.

PSYC 9620 INDUSTRIAL TRAINING AND ORGANIZATIONAL DEVELOPMENT (3 credits)

This course will review theory and research relevant to training and organizational development, with emphasis on diagnosis, design, implementation, and evaluation. Practical concerns associated with intervention will be addressed.

Prerequisite(s)/Corequisite(s): Admission into industrial/organizational psychology graduate program and PSYC 9090, PSYC 9010, and PSYC 9020. Not open to non-degree graduate students.

PSYC 9630 LEADERSHIP THEORIES AND RESEARCH (3 credits)

The purpose of this course is to provide the student with a thorough review of the theories and research in the area of leadership. Theories reviewed will be those that focus on the role of the individual in effective leadership, the role of the situation, and the role of the followers. Special attention will be given to the psychological theories of leadership. The application of leadership research and theory to areas such as selection and training will also be reviewed.

Prerequisite(s)/Corequisite(s): Admission into the psychology graduate program or graduate standing and instructor permission. Not open to non-degree graduate students.

PSYC 9640 PROBLEM SOLVING & DECISION MAKING (3 credits)

The primary objective of the course is to acquaint students with some of the major conceptual, methodological, and measurement issues within the field of problem solving and decision making. Due to the scope of this field, the course will focus on the psychological research on individual decision making, with special emphasis on the cognitive and motivational processes underlying problem solving and decision making. The second major objective of the course is to encourage students to creatively integrate and apply decision making approaches and findings to traditional areas of concern to the industrial-organizational psychologist (e.g., employee selection, performance appraisal, training, leadership, motivation). The third objective is to hone students' critical thinking skills and their ability to present their ideas in a clear and coherent manner using oral and written formats.

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

PSYC 9650 RESEARCH METHODS IN PSYCHOLOGY (3 credits)

A course designed to allow students to integrate and extend their knowledge and understanding of psychological research. Students will develop skills in writing research proposals, conducting research, and preparing manuscripts for publications.

Prerequisite(s)/Corequisite(s): PSYC 9010 or PSYC 9020. Not open to non-degree graduate students.

PSYC 9660 CRITERION DEVELOPMENT AND PERFORMANCE APPRAISAL (3 credits)

An in-depth examination of the fundamentals of personnel psychology including job analysis, criterion development and performance measurement and appraisal in organizations. Practical experience in the application of techniques and procedures is emphasized through group and individual projects in organizational settings.

Prerequisite(s)/Corequisite(s): Admission to industrial/organizational psychology graduate program and PSYC 9090 (may be taken concurrently). Not open to non-degree graduate students.

PSYC 9670 PERSONNEL SELECTION (3 credits)

An exploration of current theory and practice in personnel selection. Problem solving strategies are emphasized through the design, analysis, and interpretation of selection research and the implementation of selection programs consistent with Equal Opportunity Guidelines and federal law.

Prerequisite(s)/Corequisite(s): Admission to industrial organizational psychology graduate program, PSYC 9660. Not open to non-degree graduate students.

PSYC 9680 GROUPS AND TEAMS (3 credits)

Teamwork is hard but inevitable; individuals must be able to work effectively in a team. Teamwork is only becoming more difficult and complex as organizations use technology to communicate across space and time, bringing together culturally and functionally diverse, physically distributed team members who are members of multiple teams or systems of teams. This course explores what it means to be a good team member, to help others work effectively in teams, and to diagnose and solve teamwork problems. Challenges such as communication, decision-making, conflict resolution, and leadership are explored.

Prerequisite(s)/Corequisite(s): Admission to industrial organizational psychology graduate program and PSYC 9660. Not open to non-degree graduate students.

PSYC 9780 ADVANCED CONSULTATION IN PSYCHOLOGY AND EDUCATION (3 credits)

The course is designed to provide education and psychology professionals a comprehensive understanding of foundational theories and processes of consultation applied to education and psychology problems of children. A major objective is to focus on developing consultation skills considered necessary to be an effective consultant through direct practice and feedback. The course will emphasize the relationship between the consultant and parents, teachers, and other professionals within the school and child mental health settings.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 9910 TOPICAL SEMINAR IN PSYCHOLOGY (1-3 credits)

A discussion of specific advanced topics which will be announced whenever the course is offered.

Prerequisite(s)/Corequisite(s): Permission of instructor. Not open to non-degree graduate students.

PSYC 9940 SCHOOL PSYCHOLOGY APPLIED RESEARCH PROJECT (1-7 credits)

The applied research project consists of students conducting an independent research project from start to finish. This project should have relevance to a practical aspect of school psychology and provide a unique contribution to the field. It may be quantitative or qualitative in nature, and must rely on sound research methodology.

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

PSYC 9950 PRACTICUM FOR DOCTORAL STUDENTS (1-6 credits)

Faculty-supervised experience in industry or business designed to bridge the gap between the classroom and a job, emphasizing use of previously acquired knowledge in dealing with practical problems for doctoral students.

Prerequisite(s)/Corequisite(s): Admission to industrial/organizational psychology graduate program. Not open to non-degree graduate students.

PSYC 9960 RESEARCH OTHER THAN THESIS (1-12 credits)

Research work under supervision of a faculty member. May be repeated up to a total of 12 credit hours.

Prerequisite(s)/Corequisite(s): Enrollment in a graduate program beyond the master's level. Not open to non-degree graduate students.

PSYC 9970 ED.S. LEVEL PRACTICUM IN SCHOOL PSYCHOLOGY (1-6 credits)

School Psychology School-Based Practicum is a capstone course in school psychology intended for students who have completed their Master's degree in School Psychology. This course is designed to reflect the scientist-practitioner model of training and practice in School Psychology. To accomplish this goal, students will be assigned to a practicing school psychologist employed by the public schools. The content of this course will focus on integrating previous and concurrent training experiences from courses and field experiences.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 9980 INTERNSHIP IN SCHOOL PSYCHOLOGY (3-6 credits)

School Psychology Internship is the final course in school psychology intended for students who have completed all of their other coursework. It is a 1200 hour culminating experience leading to licensure/certification as a school psychologist in most states, and eligibility for the NCSP exam. The internship requires that students apply the domains of training and practice that are outlined in the School Psychology program philosophy and training objectives. University and site-based supervision is required.

Prerequisite(s)/Corequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 9990 PSYCHOLOGY DISSERTATION (1-24 credits)

The course provides doctoral candidates in Psychology with a process to complete a dissertation research plan. The course learning activities will focus on the completion of a candidate's dissertation. The course is designed to allow advanced doctoral candidates to demonstrate technical mastery of the discipline and to advance knowledge by completing an investigation.

Prerequisite(s)/Corequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

Public Administration (PA)

PA 8010 THE PUBLIC ECONOMY (3 credits)

This course focuses on microeconomics and its application to policy and management in the public and non-profit sectors. The concept of efficiency is developed along with the goal of social equity to help determine the roles of the public, private, and non-profit sectors. Some key issues examined are: the balance between equity and efficiency, government intervention in the market, privatization of public services, and cost benefit analysis.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PA 8020 AVIATION MANAGEMENT AND POLICY (3 credits)

The purpose of the course is to acquaint students with advanced concepts of aviation administration and the implementation of aviation policy within the public sector and to identify key concepts and critical issues both domestic and international. The primary focus is to explore the various effects that have resulted from the formation and enactment of major aviation and transportation regulatory issues. (Cross-listed with AVN 8020).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PA 8030 INTERNSHIP IN PUBLIC ADMINISTRATION (1-6 credits)

Maximum of 3 hours to be granted upon completion of written report on internship. Internship in some government: national, state, local or nonprofit agency and in some instances public-oriented private agencies. Students will take course as Satisfactory/Unsatisfactory. An additional 3 hours may be taken through PA 8040.

Prerequisite(s)/Corequisite(s): Nine hours of MPA coursework and permission of school. Not open to non-degree graduate students.

PA 8040 INTERNSHIP IN PUBLIC ADMINISTRATION (1-6 credits)

Maximum of 3 hours to be granted upon completion of written report on internship. Internship in some government: national, state, local or nonprofit agency and in some instances public-oriented private agencies. Students will take the course as Satisfactory/Unsatisfactory. An additional 3 hours may be taken through PA 8030.

Prerequisite(s)/Corequisite(s): Nine hours of MPA course work and permission of the school. Not open to non-degree graduate students.

PA 8050 FOUNDATIONS OF PUBLIC ADMINISTRATION (3 credits)

The purpose of this course is to introduce the student to the art and science of public administration and to enable the student to develop the knowledge, skills and abilities requisite to the pursuit of graduate education in public administration.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students

PA 8090 ORGANIZATION THEORY AND BEHAVIOR (3 credits)

A study of the various approaches to understanding public organizations and people in them with special emphasis on the design, functioning and management of public agencies.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students

PA 8100 ADVANCED MANAGEMENT AND LEADERSHIP FOR PUBLIC AND NONPROFIT PROFESSIONALS (3 credits)

This course is designed to advance students' understanding and techniques about the role of leadership and ethics in the public and nonprofit sectors. Special attention will be paid on the application of theories of leadership and ethics to manage various boundary spanning activities including managing external relationships, collaborations/networks, performance, and innovation and change. (Cross-listed with AVN 8100)

Prerequisite(s)/Corequisite(s): PA 8050 and PA 8090. Not open to non-degree graduate students.

PA 8106 MARKETING IN PUBLIC, NON-PROFIT AND AVIATION ORGANIZATIONS (3 credits)

This course will focus on developing a working knowledge of marketing and its component parts as they may be applied to non-profit organizations. Emphasis will be placed on understanding the marketing process and applying marketing principles to real organizational settings. (Cross-listed with PA 4100).

Prerequisite(s)/Corequisite(s): Graduate and permission of instructor, and PA 8010, PA 8090; or permission of department.

PA 8110 MANAGING INFORMATION IN THE PUBLIC SECTOR (3 credits)

This course is directed toward in-career and pre-career students in public administration who wish to acquire knowledge of issues in the management of information in the public sector and the basics of computing applications in the public sector. Its primary focus is on special issues in the management of information.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050 and PA 8090, or permission of school. Not open to non-degree graduate students.

PA 8120 ANALYSIS AND DECISION MAKING (3 credits)

This course assists students to develop their skills in research design and data analysis, covering both qualitative and quantitative data relevant to public affairs. The course introduces students to the fundamentals of research design, data collection, data and statistical analysis, and drawing pertinent policy and management recommendations. (Cross-listed with AVN 8120).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students

PA 8130 MANAGING DIGITAL GOVERNANCE (3 credits)

This course equips current and future public and nonprofit managers with capabilities and strategies to evaluate, participate in, and/or lead an information technology (digital governance) project to improve or even transform public service and governance. Because information technology has become increasingly integrated into public service and governance, understanding the role of information and information technology in government has become a necessity. This course provides the concepts and tools for public and nonprofit managers to succeed in the information age by better managing information as a resource and information technology as an enabler for public services and governance. The topics include digital divide, online participation, strategic IT management and change management, information resource and knowledge management, financing IT projects, IT project and performance management, management of IT outsourcing, and business process management. Basic literacy in computing and information technology is an integral part of the course. The discussion of these topics will address the growing use of information and communication technologies such as social media, smart mobile devices, and internet of things. Moreover, this course addresses the interplay of management, technology, and policy in the context of public service organizations, including governmental and non-profit organizations. This course offers the best of both practical and academic worlds via assigned readings and exercises, discussions, and a service-oriented project. The emphasis is on research-based knowledge and best practices informing one another. The class discussion is aimed at integrating professional experience with quality research to generate additional insights.

Prerequisite(s)/Corequisite(s): PA 8050. Not open to non-degree graduate students.

PA 8206 COMMUNITY ORGANIZING & SOCIAL CHANGE (3 credits)

This course will focus on various theories and applications of organizing communities and neighborhoods to effect change. Of particular interest is the role of engaging citizens in improving their communities. (Cross-listed with PA 4200).

Prerequisite(s)/Corequisite(s): Permission of instructor. Not open to non-degree graduate students.

PA 8300 POLICY DESIGN AND IMPLEMENTATION (3 credits)

This course examines the formulation, adoption, implementation and evaluation of public policy. Important topics include the basic features of American government, the causes and determinants of public policies, the dynamics of decision-making in the public sector, the obstacles to "successful" public programs, and the criteria for the assessment of a public program's impact. Special emphasis is given to the role public managers play within the policy process.

Prerequisite(s)/Corequisite(s): PA 8050, PA 8090 and PA 8120. Not open to non-degree graduate students.

PA 8320 PUBLIC POLICY EVALUATION (3 credits)

This course is designed to have the students understand the role of evaluation in the policy process, to demonstrate how to conduct and implement evaluations of public programs, to illustrate the procedures for presenting an evaluation report to public officials and citizens, to introduce operational issues and problems associated with management of an office of policy evaluation, and to insure the exploration of conflicts and limitations inherent to public policy evaluation.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050, PA 8090 and PA 8120 and completion of at least 24 hours in the MPA program, not open to non-degree graduate students

PA 8330 SEMINAR IN POLICY ANALYSIS (3 credits)

Application of analytical techniques to the assessment of alternative courses of public action and the development and design of public programs; utilization and impact of expert analysis by public officials and political groups; impact and role of technical analysis in a democracy; management of policy analysis units within government.

Prerequisite(s)/Corequisite(s): PA 8050 and PA 8120, not open to non-degree graduate students

PA 8400 PUBLIC AND NONPROFIT BUDGETING (3 credits)

The purpose of the course is to familiarize public administration students with the basic characteristics and features of public budgets and enable them to deal competently with them.

Prerequisite(s)/Corequisite(s): PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8410 PUBLIC HUMAN RESOURCE MANAGEMENT (3 credits)

A study of the personnel process in American governmental administration. The processes and problems of recruiting, structuring and operating public bureaucracies are examined as well as problems in personnel leadership, neutrality, accountability and performance.

Prerequisite(s)/Corequisite(s): PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8420 PUBLIC WORKS MANAGEMENT (3 credits)

This course is designed to develop an understanding of the profession of public works management, and its relationship with urban service delivery. Students will learn substantive specialty areas of public works, as well as management techniques to improve service delivery efficiency.

Prerequisite(s)/Corequisite(s): PA 8050. Not open to non-degree graduate students.

PA 8436 MUNICIPAL ADMINISTRATION (3 credits)

The administrative structure and administrative practices of American cities covering such areas as finance, personnel, public works, public safety, health, utilities and planning. (Cross-listed with PA 4430).

Prerequisite(s)/Corequisite(s): PA 8010 and PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8440 ORGANIZATION DEVELOP. & PLANNED CHANGE IN THE PUBLIC SECTOR (3 credits)

This course provides students with the theories and skills necessary to manage organizational change in the public sector. To accomplish this will require that the student become versed in the strategies of organizational development (OD) and planning in the public sector while at the same time mastering intervention techniques.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050, PA 8090, PA 8120 and completion of at least 24 hours in the MPA, not open to non-degree graduate students

PA 8450 SEMINAR IN ADVANCED MANAGEMENT ANALYSIS IN PUBLIC AGENCIES (3 credits)

A study of theory and method related to analysis of problems of organization and workflow in public agencies. The course includes problem analysis, field study methods, design of improved methods, selecting alternatives and developing decision packages.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050, PA 8090, PA 8120 and completion of at least 24 hours in the MPA program.

PA 8470 ADMINISTRATIVE ETHICS AND LEADERSHIP (3 credits)

Ethical action and effective leadership are especially important in public service and they are closely related. This course introduces students to concepts from public sector ethics and from leadership theory. Emphasis is placed on decision-making processes, relationships between public and nonprofit sector professionals and elected officials and citizens, and the role of the career public service professional in a democratic society.

Prerequisite(s)/Corequisite(s): PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8480 SEMINAR IN PUBLIC FINANCIAL ADMINISTRATION (3 credits)

The study of public finance administration policy and techniques areas. Emphasis is placed on the technical aspects of public finance administration with particular emphasis on the purposes, processes and issues associated with particular techniques or technique areas. (Cross-listed with AVN 8480).

Prerequisite(s)/Corequisite(s): PA 8050 or permission of department.

PA 8500 ISSUES IN PUBLIC-PRIVATE SECTOR COOPERATION (3 credits)

This course introduces students to the organization and processes, as well as the tools and techniques, of public-private sector cooperation. The objective of such a course is to familiarize students with the concepts and skills needed to develop and administer joint activities between the public and private sectors. Such cooperative activities have become an important aspect of public administration in recent years.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050, PA 8090 or permission of school. Not open to non-degree graduate students.

PA 8516 LONG-TERM CARE ADMINISTRATION (3 credits)

An investigation of the broad range of policy issues, theoretical concerns and practical management strategies influencing the design, organization and delivery of long-term care services. (Cross-listed with GERO 4510, GERO 8516, PA 4510).

Prerequisite(s)/Corequisite(s): Permission of instructor and PA 8050, PA 8090 or permission of school. Not open to non-degree graduate students.

PA 8520 SEMINAR IN GRANT WRITING (3 credits)

This course explores the grant-writing process from initial conceptualization through submission and award to final report. The purposes of the course are to provide graduate students with the expertise and tools needed to fund their own research, to provide effective grant-writing assistance to faculty mentors and other colleagues, and to compete more effectively in the job market and/or for acceptance into doctoral and post-doctoral programs.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050 and PA 8090. Not open to non-degree graduate students.

PA 8530 PLANNING AND EVALUATION (3 credits)

The basic question presented in this course is how we can use strategic planning and evaluation to build public and nonprofit organizations that function creatively and effectively, and that enhance the overall public value of their services.

Prerequisite(s)/Corequisite(s): PA 8100, PA 8050, PA 8090, PA 8120 and PA 8300. Not open to non-degree graduate students.

PA 8550 INTRODUCTION TO THE NON-PROFIT SECTOR (3 credits)

This course focuses on the contribution and importance of philanthropy, volunteerism and nonprofit organizations in society. Includes the differentiation between both public and private nonprofit organizations and the for profit sector. Management issues regarding nonprofit agencies is introduced.

Prerequisite(s)/Corequisite(s): Graduate standing, PA 8010, PA 8090 and permission of advisor or permission of school. Not open to non-degree graduate students.

PA 8560 NONPROFIT FINANCIAL MANAGEMENT (3 credits)

The focus of this course is on developing an understanding of the managing of financial resources within a nonprofit organization. A special emphasis is also placed on developing and executing budgets for such organizations.

Prerequisite(s)/Corequisite(s): Graduate standing and PA 8550 or permission of instructor. Not open to non-degree graduate students.

PA 8566 INTERGOVERNMENTAL MANAGEMENT (3 credits)

This course is directed at those who wish to improve their knowledge and understanding of intergovernmental relations as it impacts policy and administration in the United States. The course will look at history and theoretical underpinnings of intergovernmental relations, the different elements of these relationships and review specific management arenas that are affected by these relationships. (Cross-listed with PA 4560).

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050 and PA 8090; or permission of school. Not open to non-degree graduate students.

PA 8580 NONPROFIT HUMAN RESOURCES MANAGEMENT (3 credits)

This graduate-level course provides an introduction to the theories, principles, policies and practices related to leading and managing human resources in nonprofit organizations, including personnel, board and volunteer management and development.

Prerequisite(s)/Corequisite(s): Graduate standing and permission of adviser; PA 8050; or permission of school. Not open to non-degree graduate students

PA 8596 TECHNIQUES TOPICS IN NONPROFIT MANAGEMENT (1-3 credits)

A variable content course emphasizing nonprofit management techniques and topics. Topics include nonprofit leadership, board executive staff roles and relationships, personnel and volunteer management, financial management, proposal and grant writing community resources, special events planning and administration, needs assessments and legal ethical aspects.

Prerequisite(s)/Corequisite(s): PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8600 ADMINISTRATIVE LAW (3 credits)

A review of the principal elements of the role and character of legal processes in government administration, including delegation of powers, legal forms of administrative action, liability of government units and officers and judicial review of administrative action.

Prerequisite(s)/Corequisite(s): PA 8050, not open to non-degree graduate students

PA 8616 MUNICIPAL LAW (3 credits)

This course is directed at both graduates and undergraduates who wish to have some exposure to the legal issues which affect public administrators.

At the conclusion of the course, each student should have a basic understanding of municipal law which defines the parameters within which a public administrator must function, as well as other laws or legal concepts which will affect them on a day-to-day basis. Upon completion of the course, the student should be able to identify potential legal problems with their proposed actions.

Prerequisite(s)/Corequisite(s): PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8676 PROGRAMS AND SERVICES FOR THE ELDERLY (3 credits)

This course is provided to give the student a historical overview of programs for the elderly; examine the national policy process as it relates to the older American; and review the principles and practices relative to the existing national programs for the aged. (Cross-listed with GERO 4670, GERO 8676).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PA 8710 FUND RAISING IN PUBLIC AND NON-PROFIT ORGANIZATIONS (3 credits)

The purpose of this course is to introduce students to a variety of fund raising methods, provide the context in which these methods might be used, and provide an understanding of how fund raising operates within public and not-for-profit organizations.

Prerequisite(s)/Corequisite(s): Graduate standing and permission of instructor, PA 8010, and PA 8090; or permission of school. Not open to non-degree graduate students.

PA 8740 HEALTH CARE POLICY (3 credits)

This course helps students understand major health care policy making and related issues. It focuses on the history/background; physical, social, and economic environment; policy process; and political marketplace of contemporary U.S. health care policies. Topics include health care reform, cost containment, indigent health care and urban vs. rural health care. A health care background is helpful, but not required.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

PA 8810 SEMINAR IN METROPOLITAN PLANNING (3 credits)

An overview of the present status of planning in metropolitan areas with special emphasis on structure of planning departments, comprehensive plans and problems of annexation.

Prerequisite(s)/Corequisite(s): PA 8050 or permission of instructor or permission of school. Not open to non-degree graduate students.

PA 8826 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

An introduction to environmental law and regulations intended for students pursuing careers in environmental sciences or related fields. The course emphasizes the origins, implementation, and enforcement of U.S. state and federal laws and regulations. Major federal environmental laws, covering air and water quality, solid and hazardous waste, pollution prevention and remediation, and natural resources will be discussed. Usually offered Fall semesters. (Cross-listed with ENVN 8826, ENVN 4820, BIOL 4820, GEOG 4820, GEOG 8826).

Prerequisite(s)/Corequisite(s): Graduate Standing or Permission from the Instructor.

PA 8896 SPECIAL TOPICS PUBLIC ADMIN (3 credits)

A course with the purpose of acquainting the student with key issues and topics of special concern to public and non-profit management that they otherwise would not receive elsewhere. No more than six hours of total credit in PA 8896 and PA 8906 can be taken without prior permission by the graduate program committee. Further, each topic in the course will need the approval of the Dean of Graduate Studies prior to being offered. (Cross-listed with PA 4890).

PA 8906 SPECIAL TOPICS IN PUBLIC ADMINISTRATION (1-3 credits)

A variable content course with Public Administration and Urban Studies topics selected in accordance with student and faculty interest. Possible topics include urban homesteading, administrative federalism and economic development and the public sector. (Cross-listed with PA 4900).

Prerequisite(s)/Corequisite(s): PA 8050 or permission of the school. Not open to non-degree graduate students.

PA 8920 READINGS IN PUBLIC ADMINISTRATION (1-3 credits)

Specially planned readings in public administration for the graduate student who encounters scheduling problems in the completion of his degree program, or who has special preparatory needs and who is adjudged by the department to be capable of pursuing a highly independent course of study.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050, PA 8090, PA 8120, and permission of the school. Not open to non-degree graduate students.

PA 8940 RESEARCH IN PUBLIC ADMINISTRATION (1-3 credits)

The course is intended for advanced graduate students in public administration. It is especially suited for those in-career students who have had their internships waived and who might profit more by in-depth research on a problem of public administration rather than additional classroom courses.

Prerequisite(s)/Corequisite(s): PA 8010, PA 8050, PA 8090, PA 8120, and permission of the school. Not open to non-degree graduate students.

PA 8990 CAPSTONE PROJECT IN PUBLIC ADMINISTRATION (3 credits)

The Capstone Project offers each student the opportunity to demonstrate mastery of the theory and practice of public administration by applying the knowledge and skills gained in the MPA program to a project of the student's choice. This involves completing a project report reflecting the cumulative knowledge gained from these experiences. The course is intended only for students who are completing their Masters of Public Administration (MPA).

Prerequisite(s)/Corequisite(s): Completion of at least 30 hours in the MPA, PA 8050, PA 8100, PA 8090, PA 8120, PA 8300, PA 8400, PA 8530 and school permission. Not open to non-degree graduate students.

PA 9000 FOUNDATIONS OF PUBLIC ADMINISTRATION (3 credits)

This course is designed as a doctoral seminar that surveys the development of public administration from its earliest antecedents to the present day, taking both a historical and topical approach.

Prerequisite(s)/Corequisite(s): Admission into the doctoral program. Not open to non-degree graduate students.

PA 9080 ADVANCED STATISTICAL APPLICATIONS (3 credits)

This is a required course which will provide the student with fundamentals of modern statistical techniques used in criminal justice and public affairs research. (Cross-listed with CRCJ 9080).

Prerequisite(s)/Corequisite(s): CRCJ 8950

PA 9200 THEORIES OF THE POLICY PROCESS (3 credits)

Proseminar in public policy with emphasis on the development and application of theories of the formulation, adoption, and implementation of public policy.

Prerequisite(s)/Corequisite(s): Completion of a Master's degree in Public Administration or a related field, and permission of the instructor. Not open to non-degree graduate students.

PA 9300 KNOWLEDGE DEVELOPMENT AND USE IN THE PUBLIC SERVICE PROFESSION (3 credits)

This course will examine current issues in knowledge, development and use in the public service professions. Emphasis is placed on understanding various systematic research to effect social change.

Prerequisite(s)/Corequisite(s): Admission to doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9400 THE ENVIRONMENT OF PUBLIC ADMINISTRATION (3 credits)

The purpose of this course is to enable the doctoral student to understand the role and responsibility of public administration in the context of the broader political economy.

Prerequisite(s)/Corequisite(s): Admission to the doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9500 THEORIES OF NONPROFIT ORGANIZATIONS AND CIVIL SOCIETY (3 credits)

This seminar course focuses on the theories and context of nonprofit and voluntary organizations, philanthropy, and civic society. It is designed for Ph.D. students to increase their depth of knowledge in specific content areas, including historical, legal, social, political, economic, behavioral, religious, ethical, organizational, and critical theories. The purpose is to help students gain knowledge of theories and context related to nonprofit and voluntary organizations, philanthropy, and civic society; as well as develop other skills to improve as a scholar.

Prerequisite(s)/Corequisite(s): Admission to the doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9600 SEMINAR IN ADVANCED MANAGEMENT THEORY (3 credits)

This course examines how recent advances in management theory may be incorporated into the practice of public administration.

Prerequisite(s)/Corequisite(s): Admission to doctoral program and PA 8090 or permission of instructor. Not open to non-degree graduate students.

PA 9700 PUBLIC BUDGETING AND FINANCIAL THEORY (3 credits)

This seminar is focused on theoretical issues in public budgeting and governmental finance. The aim of the seminar is for the student to understand the central issues in public budgeting and finance, and the place of this field of study within public administration.

Prerequisite(s)/Corequisite(s): Admission to doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9800 ADVANCED RESEARCH DESIGN (3 credits)

This is a required course which will expose students to advanced topics in research methods in preparation for writing their doctoral dissertation. It will also apply advanced methodological techniques to problems in the field.

Prerequisite(s)/Corequisite(s): Admission to the doctoral program. Not open to non-degree graduate students.

PA 9900 ADVANCED TOPICS (3 credits)

This course provides a format for exploration of topics of interest to advanced students in public administration. Topics covered will change periodically in keeping with the interests of faculty and students. (Cross-listed with AVN 9900).

Prerequisite(s)/Corequisite(s): Admission to PhD program in Public Administration or permission of instructor. Not open to non-degree graduate students.

PA 9920 TEACHING AND PROFESSIONAL SKILLS WORKSHOP (1 credit)

The workshop offers training for a career in higher education. Instruction and practice in teaching includes creating and presenting lecture material, facilitating discussion, constructing syllabi, and related matters. Instruction in professional skills includes topics such as interviewing for positions, writing and publishing, and the tenure process.

Prerequisite(s)/Corequisite(s): Admission to Ph.D. program or permission of instructor. Not open to non-degree graduate students.

PA 9930 PHD RESEARCH & PROFESSIONAL SKILLS WORKSHOP (1 credit)

This one credit hour PhD workshop offers training and practice related to research and professional development to prepare for a career in higher education or another research-oriented career. Topics covered include developing a research design and proposal, applying for research funding, presenting research, publishing research, preparing to go on the academic or professional job market, and self-care/well-being.

Prerequisite(s)/Corequisite(s): Admission to the doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9950 QUANTITATIVE METHODS IN PUBLIC ADMINISTRATION (3 credits)

This course is designed to prepare the student to understand and apply advanced statistical methods needed in the design and analysis of public administration investigations. The major topics to be covered include research designs, nonexperimental research and specialized research designs, multiple linear regression, analysis of covariance, and logistic regression.

Prerequisite(s)/Corequisite(s): CRCJ 8030 or equivalent, PA 8050 or permission of the school. Not open to non-degree graduate students.

PA 9960 QUALITATIVE RESEARCH METHODS (3 credits)

This course is a doctoral seminar in the methods and practice of qualitative research. Advanced research design techniques, validity, mixed methodology, and qualitative research tools common to the practice of public administration are presented.

Prerequisite(s)/Corequisite(s): Admission to the doctoral program in public administration or permission of the instructor. Not open to non-degree graduate students.

PA 9970 DIRECTED RESEARCH IN PUBLIC ADMINISTRATION (3 credits)

This course offers a structure for doctoral students to conduct advanced research in their chosen area of specialization. (Cross-listed with AVN 9970).

Prerequisite(s)/Corequisite(s): Admission to Ph.D. program in Public Administration and permission of instructor. Not open to non-degree graduate students.

PA 9980 DIRECTED READINGS IN PUBLIC ADMINISTRATION (1-6 credits)

This course is designed to provide the advanced graduate student with the opportunity to do extended readings on a specialized public administration topic. (Cross-listed with AVN 9980).

Prerequisite(s)/Corequisite(s): Admission to the Ph.D. program in public administration and permission. Not open to non-degree graduate students.

PA 9990 DISSERTATION (1-20 credits)

The dissertation is an original research project conducted and written under the direction of a faculty dissertation committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge in public administration.

Prerequisite(s)/Corequisite(s): Admission to Ph.D. program in public administration. Admission to candidacy for Ph.D. degree. Prior to enrolling for dissertation hours, student must have permission from the chair of the supervisory committee. Not open to non-degree graduate students.

Public Health & Behavior (PHHB)

PHHB 8050 APPLIED RESEARCH IN PUBLIC HEALTH (3 credits)

This course will assist candidates to develop the basic skills to conduct applied research to address contemporary problems in public health. The course will emphasize proposal writing, data collection, research design, statistical analysis, computer application, and writing of research reports.

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

PHHB 8080 TOPICS IN HEALTH EDUCATION (3 credits)

This course will explore important current issues in Health Education. Candidates will explore economic, political, ethical and technological developments that affect the practice of Health Education. There is no limit to the number of times a candidate may enroll in HED 8080 as long as a different topic is offered each time.

Prerequisite(s)/Corequisite(s): Graduate.

PHHB 8206 A PUBLIC HEALTH APPROACH TO MENTAL HEALTH (3 credits)

This public health course will help students think critically about the prevention, identification, and treatment of mental illness in the United States. Students will be introduced to concepts from the disciplines of public health, psychology and sociology to understand mental health disorders and their impact on population health. Students will explore health disparities through the lens of cultural, social, behavioral, psychological, and economic factors. Students will recognize that mental health exists on a continuum and develop skills to address environmental influences on behavior. (Cross-listed with PHHB 4200).

PHHB 8250 HUMAN SEXUALITY (3 credits)

This graduate-level course is aimed at providing an overview of the current scientific knowledge concerning human sexuality. The course is designed to be interdisciplinary in nature, providing the biological, behavioral and cultural aspects of human sexuality. Priority will be given to candidates from the helping professions. Qualified candidates from other related disciplines must have permission of instructor.

Prerequisite(s)/Corequisite(s): Undergraduate Anatomy and Physiology

PHHB 8270 INTERVENTIONS IN HEALTH EDUCATION (3 credits)

This course will provide health behavior candidates with an opportunity to investigate, contrast, develop, implement and evaluate a variety of intervention activities, to be applied in different settings. Theories regarding methods to enhance behavior change and teaching strategies to meet the health needs of a diverse population will be explored.

Prerequisite(s)/Corequisite(s): Graduate status.

PHHB 8330 ALCOHOL EDUCATION (3 credits)

A study of the problems associated with alcohol use, misuse and abuse. The patterns and trends of use, theories of dependence, pharmacological aspects and health consequences are explored. Emphasis is given to the identification of people with alcohol related problems and the role of the private and public sectors in prevention, education, intervention, and referral. Methods of assessing needs, prescribing, implementing, and evaluating alcohol education programs will be explored.

PHHB 8360 COMMUNITY HEALTH (3 credits)

An in-depth examination of community health and determinants of community health issues. The epidemiology, statistical sciences, environmental health, political influences on health, and behavioral social sciences for community health are examined. Students are expected to be able to apply concepts addressed in class to contemporary health issues.

PHHB 8400 HEALTH PROMOTION PROGRAM PLANNING (3 credits)

An in-depth application of the health promotion program planning process utilizing a choice of planning models. Students develop a comprehensive plan in response to an actual grant announcement and follow appropriate guidelines.

PHHB 8450 EPIDEMIOLOGY & PREVENTION OF DISEASE (3 credits)

The course is designed for health behavior graduate students and others who are interested in public health. The causes, prevention, treatment and control of prevalent communicable and non-communicable disease in a culturally diverse and global society will be emphasized. Special emphasis will be given to diseases and health problems that can be prevented or controlled through education and advocacy. Students will apply skills to contemporary issues.

PHHB 8500 HEALTH PROGRAM DESIGN (3 credits)

This course will provide students the skills to design an education/advocacy health initiative based on health behavior theory and models. They will develop a plan that includes a detailed needs assessment, a carefully crafted set of SMART (Specific, Measurable, Achievable, Relevant, Time-Bound) objectives for all levels of program outcome, an implementation strategy using health behavior models, and a thorough and systematic evaluation framework (formative and summative).

PHHB 8556 HEALTH ASPECTS OF AGING (3 credits)

This course emphasizes health promotion for older adults. Special health needs of older Americans are compared and contrasted with health needs for other age groups. Prevention or delaying of chronic diseases and disorders are emphasized. (Cross-listed with PHHB 4550, GERO 4550, GERO 8556, WGST 4550).

PHHB 8600 HEALTH BEHAVIOR (3 credits)

The purpose of this course is to study the theoretical foundations of health behavior. Candidates will develop an understanding of the determinants of health behavior, the models and theories that provide a framework for predicting health behavior, and the strategies employed to bring about behavioral changes for health and disease prevention in individuals and groups.

PHHB 8706 WOMEN'S HEALTH AND ISSUES OF DIVERSITY (3 credits)

This course provides a critical understanding of the inter-relationship between socio-cultural, economic, and political factors and women's physical and mental health. The aim is to provide an overview of the experience with the health care system. Emphasis will be on critically examining recent scholarship from a sociological, behavioral, health policy perspective. (Cross-listed with PHHB 4700, SOC 4700, SOC 8706).

Prerequisite(s)/Corequisite(s): Graduate standing.

PHHB 8730 DYING, DEATH & GRIEVING (3 credits)

An examination of theory and research relevant to interaction with the older, terminally ill person, focusing on communication with widows and other survivors as well as the dying patient. (Cross-listed with GERO 8730).

Prerequisite(s)/Corequisite(s): Graduate Students

PHHB 8750 PROGRAM EVALUATION AND INSTRUMENTATION (3 credits)

This course will build skills for selection, development and analysis of various types of instruments and techniques for conducting process, impact, and outcome evaluations in health promotion, education, and behavior. Evaluation of health behavior change and its antecedents, changes in community services programs, and community health status will be discussed. Candidates will learn methods for developing choosing psychometric tools, choosing appropriate evaluation designs, procedures for data collection, and describing evaluation results. Emphasis will be placed on political, statistical, and theoretical aspects of instrumentation and evaluation practices.

Prerequisite(s)/Corequisite(s): HED 8270/PHHB 8270 or permission of instructor.

PHHB 8850 HEALTH ASPECTS OF STRESS MANAGEMENT (3 credits)

The health-related aspects of stress management and control will be the focus of this course. Selected techniques for self-regulating stress will be demonstrated, practiced and analyzed. Candidates will be introduced to current scientific research in human stress.

Prerequisite(s)/Corequisite(s): Graduate.

PHHB 8950 PUBLIC HEALTH LEADERSHIP AND ADVOCACY (3 credits)

This course incorporates public health leadership theory and practices that are grounded in biomedical and social science and sanctioned by public law. Also included is the politics of communities and organizations. Advocacy is emphasized as a key tool to secure funding and to help assure that local, state, and federal policy-makers will adopt, implement, and maintain important public health regulations, policies and programs.

Prerequisite(s)/Corequisite(s): Fifteen (15) health education graduate credits. Not open to non-degree graduate students.

PHHB 8980 HEALTH EDUCATION PRACTICUM (1-3 credits)

This course offers graduate candidates in health education an opportunity to gain practical, on-the-job training in health education in local schools, businesses, hospitals, clinics, voluntary health agencies or governmental health agencies.

Prerequisite(s)/Corequisite(s): Candidates must have completed 21 credit hours at the undergraduate or graduate level (3.0 GPA or above) in health education prior to enrolling in this course. Not open to non-degree graduate students.

Recreation-Leisure Study (RLS)

RLS 8000 SPECIAL STUDIES IN RECREATION AND LEISURE STUDIES (1-3 credits)

A series of intensive courses especially designed for (1) practitioners within recreation, parks and leisure services and/or (2) candidate majors within recreation and leisure studies; scheduled as seminars or workshops, according to purpose.

Prerequisite(s)/Corequisite(s): Graduate.

RLS 8050 SEMINAR IN RECREATION THERAPY (3 credits)

Seminars especially designed for recreational therapy majors within recreation and leisure studies and/or practitioners within therapeutic recreation and leisure services.

Prerequisite(s)/Corequisite(s): Graduate standing

RLS 8060 PERSPECTIVES OF LEISURE EDUCATION (3 credits)

A survey approach which will focus on an awareness and understanding of leisure values, lifestyles, contributions, and basic concepts associated with the clinical application of leisure education.

Prerequisite(s)/Corequisite(s): Graduate standing and permission of the instructor.

RLS 8076 CAMPUS RECREATION MANAGEMENT (3 credits)

A review of the knowledge, skills, and abilities required for the management of typical campus recreation programs and facilities. This course will prepare students for entry level positions managing campus recreation employees, programs, facilities and services. (Cross-listed with RLS 4070)

RLS 8080 RT: CLINICAL ASSESSMENT, EVALUATION & RESEARCH (3 credits)

An overview of the role of assessment, evaluation and research and their relevance to the priorities of the field of recreational therapy (RT). A seminar approach that will include historical and philosophical concepts as well as practical experience related to these areas. Special attention will be given to implications for developing a comprehensive understanding of the roles that assessment and evaluation play in the research process in providing information about RT efficacy and outcomes. The course will also provide the candidate an opportunity to develop a research agenda that is consistent with current recreation therapy efficacy needs.

Prerequisite(s)/Corequisite(s): Graduate standing.

RLS 8246 RECREATION ADMINISTRATION (3 credits)

Designed to provide a background of information on public, private and commercial recreation with special attention to organization, promotion, and development from the administrative aspect. (Cross-listed with RLS 4240)

Prerequisite(s)/Corequisite(s): RLS major and senior status.

RLS 8306 RECREATION PROGRAMMING AND LEADERSHIP (3 credits)

An advanced study of recreational programming and planning through practical applications. Emphasis is upon understanding proven programming and leadership knowledge and skills, understanding participant leisure behavior, understanding participant leisure needs, and skill development in ways through which organizations, agencies and businesses create service to respond to the leisure needs of the consumer. (Cross-listed with RLS 4300)

Prerequisite(s)/Corequisite(s): Junior, senior or graduate.

RLS 8406 TRAVEL AND TOURISM (3 credits)

This course is designed to provide the recreation major or practitioner, and other interested candidates, with an awareness of the major components of the travel and tourism industry, including its costs and benefits to a resident community. (Cross-listed with RLS 4400)

Prerequisite(s)/Corequisite(s): Junior Standing.

RLS 8420 LEISURE, PLAY AND HUMAN DEVELOPMENT (3 credits)

An examination of leisure and play as conditions of human development, reflections of human development, and as buffers for adjusting to age-related life events. These three foci will be considered in relationship to the entire life span, and implications will be drawn for recreation and leisure services.

Prerequisite(s)/Corequisite(s): Graduate standing.

RLS 8426 RECREATION FOR THE AGING (3 credits)

Role of leisure services as related to understanding and working with elders. Emphasis on recreation programming as a mode of intervention. Analysis and study of the phases of aging, with reference to psychomotor, affective, and cognitive changes; introduction to the theories of aging and how they relate to the lifestyle of this population; recreational therapy intervention, activity adaptation and program design; leisure education and issues and trends. (Cross-listed with RLS 4420, GERO 4420, GERO 8426)

Religion (RELI)

RELI 8036 AFRICANA RELIGIONS (3 credits)

An introduction to religions in Africa and the diaspora, including African Traditional Religions, Christianity, Islam, and Afro-Caribbean religious traditions, using anthropological, historical, and other academic approaches to the study of religious and spiritual traditions. In particular, students will learn about the role of spirits, ancestors, witches, and other invisible agents in ideas and practices regarding health and healing. Finally, the class will examine the complex inter-relationships between religious ideas and practices and contemporary post-colonial political-economic realities, including the consequences of genocide and other human rights violations and the role of religious communities in social and economic development. (Cross-listed with RELI 4030, BLST 8036, BLST 4030).

RELI 8156 JUDAISM IN THE MODERN AGE (3 credits)

A critical investigation of Judaism since the Enlightenment emphasizing historical, intellectual and religious-legal developments. Pivotal movements (e.g., Hassidism, Reform, Historical Conservative Judaism, Modern Orthodoxy, Zionism) and major historical events (e.g., the American and French Revolutions, Tsarist oppression, the Holocaust and the establishment of the State of Israel) will be analyzed for their ongoing impact. (Cross-listed with RELI 4150)

Prerequisite(s)/Corequisite(s): Nine hours in religion or permission of instructor.

RELI 8166 THE HOLOCAUST (3 credits)

An interdisciplinary approach in a seminar oriented format discussing various aspects of the most notorious genocide in modern times. The course will explore the history of anti-Semitism, the rise of Nazi Germany and the road to the 'final solution.' It will further explore psychological, sociological and intellectual aspects of the dark side of humanity. (Cross-listed with RELI 4160, HIST 4720, HIST 8726)

RELI 8176 HISTORY OF CHRISTIANITY I (3 credits)

The development of Christian theological, ritual, and social practice from the beginnings of Christianity through the Reformation. History of Christianity from its origins in the first century through the sixteenth century movements for reform. (Cross-listed with RELI 4170).

RELI 8206 COMPARATIVE RELIGIOUS ETHICS (3 credits)

An introduction to historical and contemporary approaches to comparative religious ethics, with special focus on specific case studies as encountered in societies and religious communities across the globe. In addition to reading authors from a variety of perspectives (Aristotelians, natural law theorists, philosophers of law, pragmatists, theologians, and historians of religion), students will be introduced to special topics in the field, e.g., religion and public life, religion and law, syncretism, the secular/non-secular divide, etc. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 4200, CACT 8206)

RELI 8226 VIOLENT CONFLICTS, PEACEBUILDING, AND THE ETHICS OF INTERVENTION (3 credits)

This course is designed to familiarize the student with the nature of violent conflict, including terrorism, and a variety of the mechanisms for peacebuilding. The course will also explore human rights and the ethics of intervention. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 4220, CACT 8226)

RELI 8256 WAR, RELIGION, AND HUMAN RIGHTS (3 credits)

What is the connection between human rights, religion, conflict, and peacebuilding? Does religion cause war or help to stop it? How can human rights violations be prevented or stopped, and can religious actors be engaged in this work? Is the use of force ever appropriate to protect human rights? This course engages all of these questions by examining the ethical thought of multiple religious traditions; the work of human rights organizations; the just war tradition; and questions about sovereignty, peacebuilding, and the use of force worldwide. It includes discussion of historical issues and contemporary case studies. (Cross-listed with RELI 4250).

RELI 8266 THE END OF THE WORLD: RELIGION AND APOCALYPSE (3 credits)

This course introduces students to sacred texts and their interpretation by "end of the world" groups across world history. Several ancient, medieval, and contemporary groups are discussed. Special attention is paid to the connections between apocalyptic and political movements, as well as religion and violence. (Cross-listed with RELI 4260).

Prerequisite(s)/Corequisite(s): Graduate standing

RELI 8406 WOMEN IN ISLAM (3 credits)

This course examines the religious, political and cultural assignments ascribed to Muslim women. Starting with the Qur'an, social, legal, and scriptural norms will be explored through the voices of Muslim women around the world. Passages of the Qur'an, hadiths and the commentaries that lead to the elevation and/ or demise of Muslim women and their rights are studied. Examining the role of the female body, sexuality and seclusion within a historical context will lead to an understanding of the gendering of women in Islam. (Cross-listed with RELI 4400)

Prerequisite(s)/Corequisite(s): Graduate standing.

RELI 8426 MUSLIMS IN AMERICA (3 credits)

This course is designed to familiarize the student with the multiplicity of Muslim voices in the United States and to examine the myths created through stereotyping and orientaling. The course will also investigate how Muslims in America form identities as hybrids and transnationals and follows the chronological development of American Muslims including their identity construction, religious issues, and politics. (Cross-listed with RELI 4420)

Prerequisite(s)/Corequisite(s): Graduate Standing.

RELI 8556 JESUS IN FILM (3 credits)

This course is a study of how the life of Jesus of Nazareth has been portrayed in cinema over the past century. Emphasis will be placed upon knowledge of the principal written sources (the canonical gospels), how films emphasize certain themes and offer their own interpretations, the motives or intentions of the actors, and the reception by audiences of some of the main portrayals of Jesus in film. (Cross-listed with RELI 4550).

RELI 8606 WOMEN AND RELIGION (3 credits)

This course on women and religion will focus on the intersections of power and oppression that women experience in four of the major world religions - Judaism, Christianity, Buddhism, and Islam. Students will examine the historical, cultural and religious contexts that highlight women's involvement or exclusion from activity and power within each religion. Students will research case studies from around the world to examine tensions within and between religious and secular societies through the lens of gender. (Cross-listed with RELI 4600).

RELI 8836 ANCIENT GREEK MYTH, RELIGION & MAGIC (3 credits)

Students will examine the impact of ancient Greek myth and belief on actual religious practice: e.g., "lived" religion. Areas covered include formal civic sacrifice, wartime religion, family and personal devotions, mystery cults, oracles and seers, plus the popular pursuit of magic. (Cross-listed with HIST 8836, HIST 4830, RELI 4830).

RELI 8856 ROME AND THE EARLY CHURCH (3 credits)

Students will cover Roman-Christian-Jewish interactions from just before the birth of Jesus of Nazareth to c. 450 CE, with an emphasis on social and political history. We catalogue Christianity's transformation from its origins as a Jewish movement and an illegal "superstition" to the dominant religion of the Roman empire. (Cross-listed with HIST 8856, HIST 4850, RELI 4850).

Prerequisite(s)/Corequisite(s): Junior standing.

RELI 8900 READINGS IN RELIGION (1-6 credits)

An individually organized program of readings pertinent to one or more topics subordinate to the heading of Religion. To be carried out under the supervision of a member of the graduate faculty. May be repeated for credit when the topic varies.

Prerequisite(s)/Corequisite(s): Graduate, permission of instructor, and no incompletes outstanding.

Russian (RUSS)

RUSS 8946 RUSSIAN MASTERPIECES (3 credits)

This course introduces Russian literature in translation and will be conducted in English. Readings in this survey course will include a selection of Russian authors from the early 19th century period to the present. The main objective of this course is the development of critical reading skills and an in-depth understanding of major authors, movements, and themes in Russian literature. Students will read selections from numerous authors in a variety of genres, including short stories, theater, poetry, and the novel. (Cross-listed with RUSS 4940)

Prerequisite(s)/Corequisite(s): Graduate standing

Science, Tech, Engr, and Math (STEM)

STEM 8030 EVOLUTION: FROM GENOMES TO ECOSYSTEMS (3 credits)

This course will prepare students to evaluate and discuss evolution as an underlying concept in all of biology. Further, it will provide a comprehensive overview of evolutionary processes related to the evolution of genomes, development, physiology, morphology, behavior, and ecosystems. (Cross-listed with BIOL 8030).

Prerequisite(s)/Corequisite(s): Courses for graduate admission or equivalent, or with permission of instructor.

STEM 8040 TOPICS IN MATHEMATICAL COMPUTING (3 credits)

This course focuses on the current state-of-the-art technology that is either designed for or is uniquely suitable for teaching mathematics. (Cross-listed with MTCH 8040)

Prerequisite(s)/Corequisite(s): MATH 2200 or equivalent or approval of instructor.

STEM 8050 DATA-DRIVEN DECISION MAKING FOR EDUCATORS (3 credits)

This course provides graduate students with hands-on experiences that model data-driven decision making for educational success in today's classroom. Students will learn how to create valid and reliable assessments; interpret test data; use data to identify student, classroom, program, and school needs; and in general, to systematically enhance educational decision making. In addition, students will experience activities that can be integrated into student lessons to help to deepen concept learning, and to build student data literacy. The course will use real data sets, in interesting, hands on and technology-rich activities to find the "educational story" represented by the data. (Cross-listed with TED 8050).

Prerequisite(s)/Corequisite(s): Graduate Standing.

STEM 8170 ECOSYSTEM ANALYSIS FOR EDUCATORS (3 credits)

This course is designed for education graduate students who wish to take a field-based biology course that uses an interdisciplinary approach to understanding the ecosystem of the tallgrass prairie. This course engages graduate students in methods reflecting multidisciplinary STEM strategies (e.g. scientific inquiry, modeling, geographic information system mapping, etc.) associated with research taking place at the Glacier Creek Preserve. Graduate students completing this course will develop advanced knowledge of ecology, restoration ecology, and monitoring of prairie habitat restoration. Graduate students will focus on the technical, biogeochemical, ecological and cultural aspects of analyzing and restoring the prairie ecosystem and its various habitats. (Cross-listed with BIOL 8170)

Prerequisite(s)/Corequisite(s): Graduate Standing or Permission from the Instructor.

STEM 8370 DATA VISUALIZATION AND MODELING FOR EDUCATORS (3 credits)

In the growing context of data informed decisions there is a need to answer "what if" questions in a variety of decision-making situations, as well as to display data both visually and interactively. This course will provide foundational skills in data visualization and modeling for educational decision making and instruction. It draws upon key fundamentals in data visualization (representing data trends visually) as well as key strategies in data modeling (interactive representations to explore possible outcomes). The course also explores the use of visualization and modeling technologies as well as assisting student learning with these tools. (Cross-listed with TED 8370).

STEM 8410 IMPROVEMENT OF INSTRUCTION: SPECIAL TOPICS (3 credits)

This course provides an in-depth study of instructional theory, research, and methodology designed to extend teachers' professional knowledge base and enhance their pedagogical skills. When offered, a course may be limited to improvement of instruction in a selected subject area. (Cross-listed with TED 8410).

STEM 8420 TRENDS AND TEACHING STRATEGIES IN SCIENCE EDUCATION (3 credits)

This course is designed for the graduate candidate in the Department of Teacher Education whose study program emphasis is in the area of science education. The course will describe and analyze past and present trends in science education, including curricula, teaching-learning strategies, the laboratory and instructional materials. The course focus will be K-12 and as such is meant to serve both elementary and secondary graduate candidates. (Cross-listed with TED 8420).

Prerequisite(s)/Corequisite(s): Graduate standing.

STEM 8430 SCHOOL CURRICULUM PLANNING (3 credits)

This course is designed to provide advanced degree candidates with an understanding of the theory, principles, and practices utilized in curriculum planning in American schools. This course focuses on the principles and practices of effective curriculum planning and teachers' part in these processes as curriculum developers. (Cross-listed with TED 8430).

STEM 8450 BIOLOGY EDUCATION RESEARCH METHODS (3 credits)

In this course, students will learn the methods of conducting pedagogical research in Biology, understand how people learn the concepts, practices, and ways of thinking in science and engineering; understand the nature and development of expertise in a discipline; help identify and measure appropriate learning objectives and instructional approaches that advance students toward those objectives; contribute to the knowledge base in a way that can guide the translation of statistical findings to classroom practice; and identify approaches to make science and engineering education broad and inclusive. Students will work with live data sets to evaluate effective pedagogical approaches in the biology classroom of various audiences (K-16).

STEM 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)

This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with TED 8510, AVN 8510)

Prerequisite(s)/Corequisite(s): Graduate standing.

STEM 8530 INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS (3 credits)

This course is designed to provide graduate candidates with the opportunity to enhance interdisciplinary instructional strategies, curricular understanding, and lesson preparation in the areas of science, technology, engineering, the arts, and mathematics (STEAM) through analysis and reflective practices in STEAM. This course provides hands-on experiences that model STEAM integration techniques, including how to effectively engage with community agencies and partners to bring STEAM into the classroom. This course emphasizes not only the technical aspects of STEM, but also the creativity and innovation that arts integration can add to enhance STEM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. (Cross-listed with TED 8530)

Prerequisite(s)/Corequisite(s): This course includes both teacher education and STEAM related topics and therefore fits into both TED and STEM program coursework.

STEM 8810 STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH (3 credits)

This course will explore theoretical and foundational pedagogical strategies in early childhood education used to deliver integrative STEM education in the preK-12 setting. In order to understand the research and practice of STEM disciplines in preK-12, it is necessary to examine the social, cultural, political, and functional aspects that influence them. Candidates will investigate the nature of STEM education, Early Childhood Education (ECE) pedagogy and perspectives of learning, content knowledge and dispositions for educators of STEM topics, and issues of access and equity for STEM education through literature, discussion, and practice. This course includes a community outreach component in which candidates will use qualitative methods to observe class topics in public settings. (Cross-listed with TED 8810)

Prerequisite(s)/Corequisite(s): Graduate status

STEM 8840 ENGINEERING EDUCATION EXTERNSHIP (3 credits)

This graduate course will address the best practice of effective teaching and learning in Engineering Education through professional collaboration between K-12 STEM (Science, Technology, Engineering, and Mathematics) teachers and practicing engineering professionals. K-12 STEM teachers, as graduate students in the course, will learn about and address real-world applications and career opportunities in STEM education through the externship. K-12 STEM teachers will research and develop authentic, experiential learning opportunities and projects for the classroom through course supports associated with lecture, discussion, and partnerships with practicing engineering professionals. The externship will be integral to the K-12 STEM teachers' experiences and work in this course, as the course models effective professional collaboration founded on experience, knowledge, and skills to achieve a curriculum enhancement goal. (Cross-listed with TED 8840).

Prerequisite(s)/Corequisite(s): Graduate status. Not open to non-degree graduate students.

STEM 8860 INVENTION & INNOVATION IN ENGINEERING EDUCATION (3 credits)

This course will address emerging trends in STEM education for in-service K-12 STEM teachers with a focus on the use of engineering education practices in teaching and learning content. STEM teachers will receive applicable, hands-on, classroom-ready experiences through lecture, professional instruction, and projects that will emphasize product design and creation through the Engineering Design Process. The Engineering Design Process will be central to the candidates' experiences in this course and will be used by the candidates to develop curriculum utilizing emerging trends to supplement current course content and standards. Interdisciplinary planning will be central to the course. (Cross-listed with TED 8860)

Prerequisite(s)/Corequisite(s): Graduate status is required.

STEM 8910 CAPSTONE IN CS EDUCATION (3 credits)

This course will allow graduate students, as an individual or as part of a group, to study and analyze specific problems related to teaching computing in schools. Projects will be concerned with the curriculum and/or instruction of computing and should address a broad scope of application rather than a specific level. (Cross-listed with CSTE 8910).

Prerequisite(s)/Corequisite(s): Student must have completed 21 hours in the Masters of CS Education program.

Social Work (SOWK)

SOWK 8016 SOCIAL WORK WITH AMERICAN INDIANS (3 credits)

This course provides the student with a broad study of the origins, influences and issues of the American Indian which affect social work practice. The usefulness of established social work generalist methods is explored. Alternative methods applicable to culturally diverse people across the lifespan are presented. This is a Service Learning class. (Cross-listed with SOWK 4010).

Prerequisite(s)/Corequisite(s): SOWK 8130 prior to or concurrent, or BSSW degree. Not open to non-degree graduate students.

SOWK 8026 SOCIAL WORK WITH THE AFRICAN AMERICAN FAMILY (3 credits)

This course seeks to develop in students an awareness and understanding of some of the social and psychological/cognitive realities influencing the behavior of African American youth and families across the lifespan. The content draws upon theories, research and social work practice skills relevant to African American youth and families, as well as the cognitive process and social systems which impact African youth and families. (Cross-listed with SOWK 4020).

Prerequisite(s)/Corequisite(s): Admission to the Master of Social Work program or permission of the Grace Abbott School of Social Work.

SOWK 8046 WORKING WITH MINORITY ELDERLY (3 credits)

This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 4690, GERO 8696, SOWK 4040).

SOWK 8056 ETHNIC DIVERSITY AND SOCIAL WORK PRACTICE (3 credits)

This course focuses on effective generalist social work practice with clients of ethnic diversity. (Cross-listed with SOWK 4050)

Prerequisite(s)/Corequisite(s): Admission to the MSW program or permission of the Grace Abbott School of Social Work

SOWK 8070 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT I (3 credits)

This course is the first part of a two-semester sequence within the Master of Social Work required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan, particularly infancy through adolescence, within the social environment at the micro- and macro-level (e.g., individuals, families, groups, organizations, institutions, and communities), as they relate to effective social work generalist practice.

Prerequisite(s)/Corequisite(s): Undergraduate Human Biology course (prior to or concurrent) and admission to the Master of Social Work program.

SOWK 8080 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT II (3 credits)

This course is the second part of a two-semester sequence within the Master of Social Work required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan— particularly during young, middle, and late adulthood— within the social environment at the micro- and macro-level (e.g., individuals, families, groups, organizations, institutions, and communities), as they relate to effective social work generalist practice.

Prerequisite(s)/Corequisite(s): SOWK 8070

SOWK 8090 SOCIAL WELFARE POLICY (3 credits)

This course is an introduction to social welfare policy analysis. The course examines social welfare policy taking into account historical, political, economic, social, and cultural perspectives. Basic concepts and choices are examined in relation to values, ethics, context, social functioning and social consequences.

Prerequisite(s)/Corequisite(s): Admission to the Master of Social Work program or permission of the Grace Abbott School of Social Work.

SOWK 8110 INSTITUTIONAL OPPRESSION (3 credits)

This course is about institutional racism, sexism and classism as it relates to social policy and social injustice. The focus is on how institutional oppressions are related and are mutually reinforcing. The consequences of institutional racism, sexism and classism are examined at the individual, group, family, and agency levels.

Prerequisite(s)/Corequisite(s): Admission to the Master of Social Work program or permission of the Grace Abbott School of Social Work.

SOWK 8130 GENERALIST PRACTICE I (3 credits)

This course provides an introduction to the values, ethics, knowledge, and skills of generalist social work practice. Using constructs from the Generalist Intervention Model, systems theory, and the strengths-based perspective, students learn about engagement, assessment, planning and contracting, intervention, evaluation, and termination. Diversity and case management are emphasized as part of bringing planned change to client systems, including individuals and families..

Prerequisite(s)/Corequisite(s): SOWK 8070 prior or concurrent.

SOWK 8150 GENERALIST PRACTICE II (3 credits)

This practice course is an introduction to a goal-oriented planned change process with an emphasis on educational, support, and task groups, organizations, and communities. The focus is on building knowledge and developing indirect practice skills in collaboration, planning, empowerment, and advocacy to effect social change using the Generalist Intervention Model.

Prerequisite(s)/Corequisite(s): SOWK 8130 prior, and SOWK 8080 prior or concurrent

SOWK 8160 GENERALIST SOCIAL WORK PRACTICUM I (3 credits)

This course is designed to provide supervised, individual and experiential learning offered within the setting of a selected social service agency. The student will be introduced to a variety of social work practice roles, develop professional relationships with client systems and learn to apply different interventions to effect change across the life span. In order to facilitate integration of classroom theory with practice, students will attend a seven-week practicum seminar (2 hours per week).

Prerequisite(s)/Corequisite(s): Prior: Human Biology, Research Methods, and Statistics deficiencies complete; Prior or Concurrent: SOWK 8070, SOWK 8090, SOWK 8130; Not open to non-degree graduate students.

SOWK 8170 GENERALIST SOCIAL WORK PRACTICUM II (3 credits)

This course is designed to provide supervised, individual, experiential learning offered within the setting of a social service agency, typically the same agency as in SOWK 8160. This course builds upon opportunities provided and competence achieved in Generalist Social Work Practicum I.

Prerequisite(s)/Corequisite(s): Prior or Concurrent: SOWK 8160, SOWK 8080, SOWK 8110, and SOWK 8150. Not open to non-degree graduate students.

SOWK 8190 RESEARCH & COMPUTER APPLICATIONS (3 credits)

This course focuses on the use of research and computer programs in social work practice. Social and behavioral science research methods are reviewed. Students learn to analyze existing data using SPSS and to write an empirical research report. The use of Microsoft Word, Excel, and PowerPoint in social work practice are explored.

Prerequisite(s)/Corequisite(s): Admission to the Master of Social Work program.

SOWK 8220 CLINICAL SOCIAL WORK WITH INDIVIDUALS (3 credits)

This advanced course provides an in-depth study of several theories of personality and behavior, and of therapeutic approaches derived from the theories. Major focus is on therapy with individuals across the life span, but application to family systems is also considered, as well as the fit of each theory within the broader social systems framework.

Prerequisite(s)/Corequisite(s): SOWK 8170 prior to or concurrent; SOWK 8160 or admitted with advanced standing.

SOWK 8230 CLINICAL SOCIAL WORK WITH GROUPS (3 credits)

This advanced course provides knowledge of and experience in working with groups as systems. It includes both assessment of dynamics as well as developing skills in intervention modalities appropriate for working with various types of groups.

Prerequisite(s)/Corequisite(s): SOWK 8220; SOWK 8170 or admitted to the Master of Social Work program with advanced standing.

SOWK 8240 SOCIAL WORK PRACTICE WITH CHILDREN (3 credits)

This advanced practice course provides an overview of several social work interventions used with children and adolescents. A brief review of normal child development and the family life cycle is the context for presenting a range of children's problems and special needs. The course will cover several intervention models and address their application in various service settings and in individual, family, group, and social action formats. Children in diverse family settings, institutions, and in minority families and cultures are considered to understand unique therapeutic issues present for them.

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing and SOWK 8220.

SOWK 8250 SOCIAL WORK PRACTICE WITH FAMILIES (3 credits)

This course considers the family context as a system for therapeutic intervention. The family unit and its diverse forms are defined; theories for assessment and understanding family's interactions across the lifespan are considered, and the alternative modalities useful for treating family dysfunction are presented. As a practice-oriented course, it emphasizes the development of professional skills in working with the family across the lifespan.

Prerequisite(s)/Corequisite(s): SOWK 8220; SOWK 8170 or admitted to the Master of Social Work program with advanced standing.

SOWK 8260 SOCIAL WORK PRACTICE WITH OLDER ADULTS (3 credits)

This course is part of the advanced MSW curriculum and focuses on micro- and macro-level practice skills essential to competent and effective social work practice with diverse older adults. This course emphasizes clinical and complimentary/ alternative interventions (particularly creativity programming) that focus on individuals and small groups as well as community practice skills that involve social marketing and community organizing, networking, and collaborating with inter-professional community practitioners.

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Social Work program with advanced standing.

SOWK 8270 SOCIAL WORK PRACTICE WITH SEXUAL CONCERNS (3 credits)

This course provides a survey of the current knowledge base, theory and research in human sexuality with a focus on advanced practice intervention and prevention approaches for a variety of sexuality issues faced by individuals, couples, and families throughout the lifespan.

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing, and SOWK 8220.

SOWK 8280 SOCIAL WORK PRACTICE WITH COUPLES AND CHANGING FAMILY STRUCTURES (3 credits)

This is an advanced practice course designed to prepare students to provide therapy for couples and families at all life stages who are experiencing problems in intimacy, marital, divorce, or remarriage adjustment.

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted the Master of Social Work Program with advanced standing and SOWK 8220.

SOWK 8290 SOCIAL WORK PRACTICE IN HEALTH AND MENTAL HEALTH (3 credits)

This course emphasizes the development of advanced level clinical and social work practice skills for working with selected acute and chronic health and mental health conditions affecting individuals across the life cycle.

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing, and SOWK 8220. Not open to non-degree graduate students.

SOWK 8400 ADVANCED SOCIAL WORK PRACTICUM I (3 credits)

This course is designed to provide supervised, individual professional learning experiences offered within the setting of a selected social service agency in the student's chosen concentration. The student will be introduced to a variety of advanced direct and indirect social work practices. The Dual Degree Program is a part of Integrated Practice. Dual Degree students may take SOWK 8400 as their administrative practicum. If so, then PA 8010, 8050 and 8090 must be taken prior to and one course from concentration prior to or concurrently.

Prerequisite(s)/Corequisite(s): SOWK 8190, SOWK 8220, SOWK 8230. Additional prerequisites for dual-degree students. Not open to non-degree graduate students.

SOWK 8410 ADVANCED SOCIAL WORK PRACTICUM II (3 credits)

This course is designed to provide supervised, individual professional learning experiences offered within the setting of a social service agency in the student's chosen concentration, typically the same agency as in SOWK 8400. This course builds upon opportunities provided and competence achieved in Advanced Social Work Practicum I.

Prerequisite(s)/Corequisite(s): SOWK 8400 prior or concurrent, and an additional course from the plan of study. Not open to non-degree graduate students.

SOWK 8420 ADVANCED SOCIAL WORK PRACTICUM III (1-3 credits)

This course is designed to provide a third supervised, individual professional learning experience offered within the setting of a social service agency in the student's chosen concentration. This course builds upon opportunities provided and competence achieved in Advanced Social Work Practicum II.

Prerequisite(s)/Corequisite(s): SOWK 8410 prior to or concurrent, and permission of the Grace Abbott School of Social Work.

SOWK 8510 SOCIAL WORK LEADERSHIP (3 credits)

This course provides social work students with the knowledge and skills to be leaders in their organizations and communities. This course will explore leadership models and theories, and their usefulness in diverse settings, including social work leadership ethics. Students will also learn models and theories related to general supervision, power, and authority in public and nonprofit organizations. Useful skills covered include conflict management and evidence-informed decision-making. Students will also learn about care of self and others, especially as it relates to resiliency and vicarious trauma.

Prerequisite(s)/Corequisite(s): SOWK 8160 or admitted to the Master of Social Work program with advanced standing.

SOWK 8516 TREATMENT ISSUES IN CHEMICAL DEPENDENCY (3 credits)

This course addresses chemical dependency treatment issues including denial, minimization, relapse and its prevention, resistance, family dynamics, poly-substance abuse, co-occurring disorders, spirituality and the influence of self-help groups. The education will include the clinical treatment needs of individuals suffering from chemical dependency, taking into consideration diversity, gender, culture and lifestyle. (Cross-listed with COUN 4510, COUN 8516, SOWK 4510).

Prerequisite(s)/Corequisite(s): Admission to counseling program or social work programs or permission of instructor. For social work students, SOWK 8686 or COUN 8696 and SOWK 8696 or COUN 8696 must be taken prior to COUN 8516 or SOWK 8516. Not open to non-degree graduate students.

SOWK 8536 SCHOOL SOCIAL WORK (3 credits)

This course explores the field of social work practice in school settings, including the history of social work practice in schools, school environment, roles of school social workers, mandated foundations for school social work services, eligibility for special education and 504 plans, theories of practice that include school and community based models, and interventions for target populations in schools. (Cross-listed with SOWK 4530).

Prerequisite(s)/Corequisite(s): SOWK 3320 or SOWK 8130. Not open to non-degree graduate students.

SOWK 8540 PLANNING FOR SOCIAL CHANGE (3 credits)

This course takes an in-depth look at the framework of macro-level problem solving and its application to all areas of social work practice. Focus will be placed on the critical exploration of social problems, their causes, and their potential solutions from a lens of broader social inequity.

Prerequisite(s)/Corequisite(s): SOWK 8160 or admitted to the Master of Social Work (MSW) program with advanced standing. Not open to non-degree graduate students.

SOWK 8550 SOCIAL JUSTICE AND SOCIAL ADVOCACY (3 credits)

This course provides a perspective on national and international social and economic injustices experienced by people under corporate globalization. Practice implications for social workers are addressed.

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing. Not open to non-degree graduate students.

SOWK 8560 ADVANCED COMMUNITY PRACTICE (3 credits)

This course is an elective macro course in the MSW curriculum. The course is designed to help students develop an analytical and empirical approach to empowering communities. The course builds on the social work "person-in-environment" perspective by focusing on the client system and its environmental contexts as a partner in practice. This course is particularly relevant to direct practice with and advocacy for diverse disempowered groups in society. The course may use a community-based service-learning pedagogy.

Prerequisite(s)/Corequisite(s): SOWK 8170 or Master of Social Work student admitted with advanced standing or permission of the Grace Abbott School of Social Work. Not open to non-degree graduate students.

SOWK 8570 ADMINISTRATION OF SOCIAL WELFARE AGENCIES (3 credits)

This course focuses on the knowledge and skills needed by administrative leaders of social welfare agencies. Students will learn about resource issues, including grant writing, fundraising, budgeting, and financial management. Acknowledging political contexts and shaping organizational culture will also be covered. In addition, they will learn about personnel and managerial issues related to collaboration, human relations, governing/advisory boards, and strategic planning.

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing.

SOWK 8600 PERMANENCE FOR CHILDREN (3 credits)

This course is about the child welfare system and focuses on policies, laws, and agency structures designed to help abused and neglected children and their families.

Prerequisite(s)/Corequisite(s): SOWK 8130 or admitted to the Master of Social Work program with advanced standing.

SOWK 8610 FAMILY AND COMMUNITY VIOLENCE (3 credits)

This course covers family and community violence across the life span with an emphasis on gaining knowledge of the issue, skills in policy analysis, and a broad framework for developing effective services in various service settings.

Prerequisite(s)/Corequisite(s): SOWK 8130 or admitted to the Master of Social Work program with advanced standing.

SOWK 8626 TRAUMA AND RESILIENCE (3 credits)

This course provides an overview of issues related to trauma including: the factors related to development of trauma, definitions of trauma, the impact of trauma on individuals, families and communities, and the programs and practices that are most effective and appropriate regarding the social work role in responding to trauma. (Cross-listed with SOWK 4620)

Prerequisite(s)/Corequisite(s): SOWK 8070 and SOWK 8080 or Advanced Standing

SOWK 8650 HEALTH/MENTAL HEALTH POLICIES FOR SOCIAL WORK (3 credits)

This course emphasizes the development of health and mental health policy analysis skills and knowledge for social work students. Major topics include government response to health care, cultural and historical perspectives, service provision, and epidemiological trends across the life span. It provides a framework for clinical interventions in a variety of health and mental health settings.

Prerequisite(s)/Corequisite(s): SOWK 8090 or admitted to the Master of Social Work program with advanced standing.

SOWK 8686 MEDICAL AND PSYCHOSOCIAL ASPECTS OF ALCOHOL/DRUG USE AND ADDICTION (3 credits)

This course introduces students to substance abuse disorders and their impact on the individual, family, and society. It covers psychopharmacology, alcohol and drug interactions, drug classifications, theories of chemical dependency, various models of treatment, vulnerable populations, and ethical and legal issues. (Cross-listed with SOWK 4680, COUN 4680, COUN 8686)

Prerequisite(s)/Corequisite(s): Admission to counseling program or social work program or permission of instructor.

SOWK 8696 ASSESSMENT AND CASE MANAGEMENT IN SUBSTANCE ABUSE (3 credits)

This course focuses on assessment of clients and their environment, and diagnosis and referral for substance abuse treatment. Emphasis is given to assessment instruments, treatment levels, treatment planning, case management, and social justice. (Cross-listed with COUN 4690, COUN 8696, SOWK 4690).

Prerequisite(s)/Corequisite(s): Admission to MSW program or permission of the School and SOWK 8686 or COUN 8686 (or equivalent course) prior to or concurrent.

SOWK 8806 SOCIAL WORK AND THE LAW (3 credits)

This course presents the fundamental principles of criminal and civil law that have relevance to the practice of social work. Topics include: the legal system, legal research methods, professional ethical/legal responsibilities and liabilities, family law, elder law, criminal law, juvenile law, personal injury law, employment discrimination law, capacity to make contracts and wills, rights of institutionalized patients, and rights of handicapped children to an education. (Cross-listed with SOWK 4800)

Prerequisite(s)/Corequisite(s): SOWK 8090 or admitted to the Master of Social Work program with advanced standing.

SOWK 8816 SPIRITUALITY AND SOCIAL WORK PRACTICE (3 credits)

Social work literature defines spirituality as the human striving for a sense of meaning, purpose, values, and fulfillment. Spirituality is expressed through diverse forms throughout a client's lifespan; it is central to clients' understanding of suffering and their attempts to resolve it. This course examines major issues pertaining to spiritually-sensitive social work practice with clients of diverse religious and non-religious (i.e., outside sectarian institutional contexts) perspectives. (Cross-listed with SOWK 4810)

Prerequisite(s)/Corequisite(s): Students in the Master of Social Work program, or permission of the Grace Abbott School of Social Work.

SOWK 8826 GLOBAL ENGAGEMENT: A SOCIAL WORK PERSPECTIVE (3 credits)

This course prepares students to work in a global setting. Students examine theories, concepts, and skills related to social development, cross-cultural engagement, and issues related to particular countries. The course is designed with two elements: 1) On-campus classroom learning focused on global social work knowledge, and, 2) Field-based labs that involve direct engagement with an international population. Students select one lab: i) faculty-led trip to China for two-weeks, ii) refugee resettlement service-learning project in Omaha. (Cross-listed with SOWK 4820).

Prerequisite(s)/Corequisite(s): Admitted to Graduate College. Travel overseas early summer-course lab. Passport, visa-China, travel insurance-UNO, immunizations and registration (International Studies) required to travel abroad. Faculty member leading trip will provide further info.

SOWK 8836 CRISIS INTERVENTION (3 credits)

The prevalence of crisis experiences within our society and lifespan development necessitates that social workers acquire a knowledge and skill-base for effective and professional crisis intervention practice. Students will study the ABC Model of Crisis Intervention and how to ethically practice with diverse and vulnerable populations. Students will apply crisis intervention theory and models of intervention to various concern areas including but not limited to: suicide, sexual assault, domestic violence, substance abuse, grief and loss, and violence. A systems, strengths, and cultural emphasis will be applied to the various crisis situations covered. (Cross-listed with SOWK 4830)

Prerequisite(s)/Corequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing or permission of the Grace Abbott School of Social Work.

SOWK 8856 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)

This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 4850, GERO 8856, SOWK 4850.)

Prerequisite(s)/Corequisite(s): SOWK 8130 or advanced standing

SOWK 8880 TOPICAL SEMINAR IN SOCIAL WORK (3 credits)

Specific seminar topics will focus on advanced content in social work theory and practice. The course description will be announced when a specific topical seminar is proposed. The topics selected will be consistent with School of Social Work program objectives, faculty expertise, and student needs. This course may be repeated for up to nine hours credit.

SOWK 8886 TOPICAL SEMINAR IN SOCIAL WORK (3 credits)

Specific seminar topics will focus on advanced content in social work theory and practice. The course description will be announced when a specific topical seminar is proposed. The topics selected will be consistent with Grace Abbott School of Social Work program objectives, faculty expertise, and student needs. (Cross-listed with SOWK 4880)

Prerequisite(s)/Corequisite(s): Admission to the Master of Social Work (MSW) program or permission of the Grace Abbott School of Social Work (GASSW).

SOWK 8900 SPECIAL STUDIES IN SOCIAL WELFARE (1-3 credits)

This independent study course allows students to pursue a special selected area or topic within social welfare in order to deepen knowledge and/or skills in that particular area.

Prerequisite(s)/Corequisite(s): Permission of the Grace Abbott School of Social Work (GASSW). Not open to non-degree graduate students.

SOWK 8940 EVALUATION OF SOCIAL PROGRAMS (3 credits)

This is an advanced research course in the evaluation of social programs and social agencies which focuses on agency organizational structure, program design and effectiveness, and social impact.

Prerequisite(s)/Corequisite(s): SOWK 8190

SOWK 8950 RESEARCH METHODS IN CLINICAL PRACTICE (3 credits)

This course provides a study of the issues involved in clinical research methodology. Students are introduced to the tools for documenting the effects of clinical practice interventions for individuals, couples, families and groups (including qualitative and quantitative methodologies: single-case design, standardized measurement, self-report data, self-monitoring, case study, grounded theory etc.).

Prerequisite(s)/Corequisite(s): SOWK 8190 and SOWK 8220

SOWK 8960 RESEARCH OTHER THAN THESIS (3 credits)

This course enables students, under faculty supervision, to prepare a research proposal, carry out the study, and prepare a detailed report of the purpose, design, outcome, and significance of the study.

Prerequisite(s)/Corequisite(s): SOWK 8190 and permission of the Grace Abbott School of Social Work

SOWK 8990 MASTER'S THESIS (3-6 credits)

The Master's thesis provides students the opportunity to acquire first-hand experience in research methods under faculty direction. With the guidance of the thesis coordinator and a supervisory committee, the student prepares a research proposal, conducts the proposed study, and prepares a detailed report of the purpose, design, results, and implications of the findings.

Prerequisite(s)/Corequisite(s): SOWK 8190 and permission of the Grace Abbott School of Social Work (GASSW)

Sociology (SOC)

SOC 8010 CLASSICAL SOCIOLOGICAL THEORY (3 credits)

This course surveys the nineteenth century writers whose ideas have had a strong influence on the development of contemporary sociology and sociological theories. It examines work in such areas as: structural functionalism; conflict theory; rationalism; and the beginnings of modern symbolic interaction, feminist, and race theory. The course emphasizes a close reading of original texts, as well as seminar-style class discussions.

Prerequisite(s)/Corequisite(s): Graduate; permission of instructor if outside Sociology MA program.

SOC 8020 CONTEMPORARY SOCIOLOGICAL THEORY (3 credits)

This course reviews some of the most important developments in contemporary sociological theory. It examines work in such areas as: symbolic interactionism, phenomenology and ethnomethodology; dramaturgical analysis; functionalism and neo-functionalism; structuralism, post-structuralism and postmodernity; postcolonial and subaltern studies; neo-marxism; critical theory; critical race studies; feminist theory; cultural theory; and world systems and globalization theory. The course emphasizes a close reading of original texts, as well as seminar-style class discussions.

Prerequisite(s)/Corequisite(s): Graduate; permission of instructor if outside Sociology MA program.

SOC 8030 SOCIOLOGICAL INQUIRY & RESEARCH DESIGN (3 credits)

This course focuses on the research design process from a sociological perspective. It gives broad, intermediate-level coverage to social science research methodology, with an emphasis on the logic of research procedures. Topics covered include the relationship of theory and research, causal analysis, sampling, and quantitative and qualitative design approaches.

Prerequisite(s)/Corequisite(s): Graduate; undergraduate course in research methods; permission of instructor if outside Sociology MA program.

SOC 8040 SOCIOLOGICAL STATISTICS (3 credits)

This course focuses on intermediate statistics and data analysis as applied to social research. Topics include descriptive statistics, probability, significance tests, multiple regression, and more advanced topics as time permits. Students will also learn how to utilize computer software packages to perform statistical analyses.

Prerequisite(s)/Corequisite(s): Graduate; undergraduate statistics course; permission of instructor if outside Sociology MA program.

SOC 8050 SEMINAR ON TEACHING: PEDAGOGICAL THEORY AND PRACTICE (3 credits)

A survey of various approaches to teaching at the college level (including critical, feminist, and other pedagogical theories) as well as strategies that can be employed in teaching. Topics include: syllabus and course design, evaluation and assessment strategies, developing a teaching style and philosophy, and the scholarship of teaching and learning. Emphasis is on preparing new teachers in sociology, but the course is intended for any graduate student who may already be teaching or anticipates teaching in the future.

Prerequisite(s)/Corequisite(s): Enrollment in the graduate program in sociology or permission of the instructor.

SOC 8060 QUALITATIVE METHODS (3 credits)

This course familiarizes students with contemporary qualitative methodologies and techniques by which the social sciences explore social and cultural relations in natural settings. Students will conduct individual and or group field projects.

Prerequisite(s)/Corequisite(s): Graduate standing or permission of the instructor.

SOC 8100 SOCIAL INEQUALITY (3 credits)

This course examines social inequality from a sociological vantage point. Students will review theoretical frameworks for studying social inequality, processes that result in the unequal distributions of individual resources, empirical analyses of inequality, and the consequences of various inequalities for intergenerational social mobility. While the course focuses on inequality in the United States, global and international dimensions of social inequality are also covered.

Prerequisite(s)/Corequisite(s): Graduate; permission of instructor if outside of Sociology MA program

SOC 8136 SOCIOLOGY OF DEVIANCE (3 credits)

This course introduces students to the sociological study of behaviors that have been labeled as "deviant" because they presumably violate social norms. The course takes a constructionist approach, critically analyzing how deviance is socially defined, organized, and managed. Students will be challenged to see the diversity and pervasiveness of deviance in society and to question the labelling of behaviors, individuals, and powerless groups as deviant. We will explore the social processes, powerful actors, and social institutions that create deviance as well as efforts to resist definitions of deviance. (Cross-listed with SOC 4130).

Prerequisite(s)/Corequisite(s): Graduate standing.

SOC 8146 URBAN SOCIOLOGY (3 credits)

This course examines classical and contemporary sociological theories on city formation, the urbanization process, and the interaction of society and the built environment. Topics covered include suburbanization, gentrification, residential segregation, social networks, crime, housing, city culture, and public policy. The focus is on U.S. cities with selected comparisons to other world regions. Students will also get basic knowledge and exposure to research methods to study urban areas locally. (Cross-listed with SOC 4140).

Prerequisite(s)/Corequisite(s): Graduate standing, or permission of instructor

SOC 8156 AMERICAN FAMILY PROBLEMS (3 credits)

This course explores the problems and issues faced by contemporary American families, such as racism and sexism; the challenges of childhood and adolescence; divorce and remarriage; work and family conflict; and family violence. The difficulty of defining both "family" and "problems" is addressed throughout the course. (Cross-listed with SOC 4150)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

SOC 8176 SOCIOLOGY OF FATHERHOOD (3 credits)

This course examines the existing social science research on fatherhood, exploring topics such as the evolution, history, demography, and politics of fatherhood; father involvement and its relationship to both children's and men's well-being; the effects of diversity and family structure on fatherhood; and public policy surrounding fatherhood. (Cross-listed with SOC 4170)

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

SOC 8186 OCCUPATIONS & CAREERS: FULFILLMENT AND CHALLENGES AT WORK (3 credits)

This course examines what makes individuals and groups happy and satisfied with their jobs, and the factors that can turn "a dead-end job" into a meaningful pursuit that lasts decades. The course utilizes a life course approach and covers early socialization experiences to retirement transitions. It also employs a sociological lens to explore how individual experiences in the work realm are affected by stratification (such as race/ethnicity, gender, sexuality, social class, and parental status) and as well as by occupational norms and structures, workplace relationships, and culture and practices at the organizational and societal levels. (Cross-listed with SOC 4180).

Prerequisite(s)/Corequisite(s): Enrollment in sociology graduate program or permission of the instructor.

SOC 8200 HEALTH & SOCIETY (3 credits)

The course provides a critical sociological understanding of health, illness, healing, and medical care within a social context. The focus ranges from examining health and illness behavior and patient-provider interaction to issues addressing the social organization of health care and medicine.

Prerequisite(s)/Corequisite(s): Graduate standing.

SOC 8216 DISABILITY AND SOCIETY (3 credits)

This course takes a sociologically grounded but interdisciplinary look at the past, present, and potential future of disability. Along the way, competing models and theories of disability are critically explored and substantive issues pertaining to the social experiences and social responses to people with disabilities are discussed. (Cross-listed with SOC 4210)

Prerequisite(s)/Corequisite(s): SOC 1010 and junior or senior standing; or permission of instructor. Not open to non-degree graduate students.

SOC 8246 SOCIAL TRANSFORMATIONS IN LATIN AMERICA (3 credits)

The course reviews the main social, economic, and political forces that have shaped Latin American societies, and the sociological theories used to understand Latin American development and underdevelopment. Race, ethnicity, gender and class in Latin America, as well as the region's position in the global economy are examined. (Cross-listed with SOC 4240, LLS 4240, LLS 8246).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

SOC 8256 CRISSCROSSING THE CONTINENT: LATIN AMERICAN MIGRATIONS (3 credits)

In this course we will use an interdisciplinary lens to study the changes and continuities of migration in the Americas. The course starts with an overview of immigration to the Americas during the first era of mass migration (1850-1920) to explore the relevance of European migrations for national and identity constructions in the Southern Cone of America. Students then will be introduced to the impacts of social and political change on emigration flows, both regionally and beyond the region. They will also explore migration related policies at the national and regional level. We will also study the changes and continuities in the migration system of the Americas. Lastly, we will analyze the new North-South migration, as well as immigration to Latin America from Asia (recent and historical), Europe, and Africa. (Cross-listed with SOC 4250, LLS 4250, LLS 8256).

Prerequisite(s)/Corequisite(s): Graduate standing

SOC 8316 SOCIOLOGY OF SEXUALITIES (3 credits)

This class focuses on the social construction of sexualities - especially heterosexual sexualities, bisexual sexualities, and homosexual sexualities. A primary focus of the class will be LGBT/Queer Studies. The class examines how sexual desires/identities/orientations vary or remain the same in different places and times, and how they interact with other social and cultural phenomenon such as government, family, popular culture, scientific inquiry, and race, gender, and class. (Cross-listed with SOC 4310)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

SOC 8356 WORK & FAMILY (3 credits)

This course examines the contemporary problems that individuals, families and communities in the U.S. have in integrating work and family/personal life. (Cross-listed with SOC 4350)

SOC 8446 HUMAN CONNECTION, LONELINESS, & HEALTH (3 credits)

This course examines the "loneliness epidemic" through a sociological perspective and is based on the premise that loneliness is a public health issue, as research consistently shows it is associated with a vast array of physical and mental health outcomes. After discussing the extent of loneliness and how to define it by distinguishing it from other types of social pain, the course covers: 1) the extent and nature of loneliness and its cultural/social sources; 2) the pathways from loneliness to health outcomes; and 3) possible interventions to reduce loneliness and improve public health. (Cross-listed with SOC 4440).

Prerequisite(s)/Corequisite(s): Graduate standing.

SOC 8500 COMPLEX ORGANIZATIONS (3 credits)

This graduate seminar provides an overview focused on the understanding and analysis of intricate internal and external organizational forces such as organizational bureaucracy, organizational culture, autonomy and control systems, which affect performance of organizational members as well as influence organizational survival. (Cross-listed with CACT 8500)

Prerequisite(s)/Corequisite(s): Graduate enrollment or permission of class instructor.

SOC 8550 ORGANIZATIONAL CULTURE (3 credits)

This course will discuss the various dimensions of organizational cultures and their consequences to organizational life. Emphasis will be placed on the significance of culture to human behavioral patterns, and the analysis of how organizational cultures shape the behavior and performance of organizational members. The course will prepare students for leadership success in organizations using advanced knowledge of organizational culture.

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

SOC 8556 ORGANIZATIONAL DIVERSITY AND INCLUSION (3 credits)

This course provides advanced-level knowledge of the structural understanding, assessment, analysis, and management of social diversity as well as successful inclusion strategies in the workplace. Concepts and theories dealing with structural basis of the creation of difference, consequences of difference, inclusion, affirmative action, and diversity consulting skills are fully examined in this course. This course will prepare students for successful leadership in diverse organizational environments. (Cross-listed with SOC 4550)

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

SOC 8600 SEMINAR IN SOCIAL ORGANIZATION (3 credits)

Graduate seminar on the sociological analysis of organizational fields and an in-depth study of one organizational system, such as decision-making, authority, communication, change, supervision, technology, bureaucracy, and reward system, in one organizational type within one organizational field. As seminar topics change, this course may be repeated twice in a student's program without implying duplication.

Prerequisite(s)/Corequisite(s): Graduate standing and SOC 4620/8626; or permission of instructor.

SOC 8626 APPLIED FORMAL ORGANIZATIONS (3 credits)

An advanced-level applied organizational sociology course that uses organizational theory, concepts, research, and practice to examine the structural bases of organizational effectiveness, efficiency, survival, and actions of organizational members. The course is designed to prepare students for organizational leadership using advanced knowledge and skills of organizational sociology. (Cross-listed with SOC 4620).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

SOC 8706 WOMEN'S HEALTH AND ISSUES OF DIVERSITY (3 credits)

This course provides a critical understanding of the inter-relationship between socio-cultural, economic, and political factors and women's physical and mental health. The aim is to provide an overview of the experience with the health care system. Emphasis will be on critically examining recent scholarship from a sociological, behavioral, health policy perspective. (Cross-listed with SOC 4700, PHHB 4700, PHHB 8706)

Prerequisite(s)/Corequisite(s): Graduate standing.

SOC 8746 SOCIAL JUSTICE AND SOCIAL CHANGE (3 credits)

This course investigates the economic, political and social constraints on equality present in local, national and global arrangements. Students will gain a theoretical understanding of these conditions as well as those that lead to social change, spanning from day-to-day resistance techniques to large scale social movements. Students will participate in a service learning or applied project as they explore contemporary social justice issues and learn both theoretical and practical tools needed to become successful change makers, activists, or community organizers. Examples of social justice movements or campaigns form the basis for understanding injustice at a local, national, and global level. (Cross-listed with SOC 4740)

Prerequisite(s)/Corequisite(s): SOC 1010 and junior standing; or permission of instructor.

SOC 8766 ENVIRONMENTAL SOCIOLOGY (3 credits)

This course is an introduction to environmental sociology, a field of sociology that explores the interaction between the environment and society. Environmental sociologists consider how political, social, and economic factors have come to shape our patterns of interaction with the natural and built environment. Students will be expected to use the sociological perspective to understand the landscape of environmental problems, focusing on such issues as environment and health, disaster, environmental policy, climate change, environmental risk, human and animal interactions, sustainability, environmental justice and social movements. (Cross-listed with SOC 4760).

SOC 8776 POLITICAL SOCIOLOGY (3 credits)

This course explores political sociology, focusing on political processes and power. Political sociologists investigate relationships between political institutions and various other institutions, including but not limited to the economy, education, media, and religion, and the impacts that these relationships have on society and the individuals that comprise the society. This course will explore the concepts, theories, and knowledge that comprise this field such as power, legitimacy, the state, networks, stratification, and collective action. (Cross-listed with PSCI 4770, PSCI 8776, SOC 4770).

Prerequisite(s)/Corequisite(s): Graduate standing

SOC 8786 URBAN LATIN AMERICA (3 credits)

This course examines the experience of Latin American urbanization, attending to its contributions to urban sociology, social movements, and policymaking. Topics include urban transitions (e.g. pre-Hispanic to colonial, post-colonial to industrial, and the neoliberal turn), socio-spatial configurations (e.g. plazas, squatter settlements), urban marginality debates, urban politics, and planning as well as governance innovations (e.g. bus rapid transit systems, participatory budgeting). Students will compare city case studies across the region and to urban life in the United States. (Cross-listed with SOC 4780, LLS 4780, LLS 8786).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor

SOC 8806 CONTEMPORARY TOPICS IN SOCIOLOGY (3 credits)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 4800)

Prerequisite(s)/Corequisite(s): Sociology major; or permission of instructor.

SOC 8836 SOCIOLOGY OF MENTAL HEALTH & ILLNESS (3 credits)

This course will apply the sociological perspective to various topics regarding mental health and illness. The course will cover topics such as the social construction of mental illness, the social epidemiology of mental illness, labeling and stigma of those with a mental illness, and mental health policy/treatment. (Cross-listed with SOC 4830)

Prerequisite(s)/Corequisite(s): SOC 1010, and junior standing; or permission of the instructor.

SOC 8856 SOCIOLOGY OF RELIGION (3 credits)

This course looks at religion as a social and cultural phenomenon, examining how religious beliefs, practices, institutions and movements shape and are shaped by their social context. Topics include: sociological theories and explanations of religion and spirituality; definitions of religion and the distinction between religion and other ideologies or worldviews; the measurement of religiosity and the scientific study of religion; trends in religiosity, spirituality, and the religious landscape historically and globally; sociological insights gained from the study of new religions, secularization, fundamentalism, and other issues related to contemporary religious experience. (Cross-listed with SOC 4850)

Prerequisite(s)/Corequisite(s): SOC 1010 and junior standing; or permission of instructor

SOC 8886 CONTEMPORARY TOPICS IN SOCIOLOGY (ONE CREDIT HOUR) (1 credit)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 4880).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

SOC 8896 CONTEMPORARY TOPICS IN SOCIOLOGY (TWO CREDIT HOURS) (2 credits)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 4890).

Prerequisite(s)/Corequisite(s): Graduate standing or permission of instructor.

SOC 8950 PRACTICUM IN APPLIED SOCIOLOGY (3 credits)

A practical work experience under supervision that provides opportunity for applying principles from the student's academic area of concentration.

Prerequisite(s)/Corequisite(s): Graduate sociology major. Not open to non-degree graduate students.

SOC 8960 APPLIED PROJECT (1-6 credits)

This capstone experience in the applied project option is an independent research project conducted in an applied setting under the supervision of a graduate faculty member in the department..

Prerequisite(s)/Corequisite(s): Graduate sociology major; permission of the graduate program chair. Not open to non-degree graduate students.

SOC 8980 INDEPENDENT STUDY IN SOCIOLOGY (1-3 credits)

Guided reading or independent research in special topics in Sociology under the supervision of a member of the Sociology faculty. This course is designed primarily for the student interested in topics not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated once for credit.

Prerequisite(s)/Corequisite(s): Permission of the instructor. Not open to non-degree graduate students.

SOC 8990 THESIS (1-6 credits)

A research project, written under the supervision of a graduate advisor in the Department of Sociology & Anthropology, in which the student designs, conducts, and completes an original, independent, scholarly investigation at a graduate level. The research topic and the completed project must be approved by the student's departmental committee.

Prerequisite(s)/Corequisite(s): Permission from Graduate Chair. Not open to non-degree graduate students.

SOC 9110 APPLIED SOCIAL GERONTOLOGY (3 credits)

An overview of social gerontology with an emphasis on the interplay between social, psychological and physical elements in later life. Restricted to graduate students only; required of gerontology students. (Cross-listed with GERO 9110)

Prerequisite(s)/Corequisite(s): Graduate.

Spanish (SPAN)

SPAN 8026 LANGUAGE ENHANCEMENT THROUGH VOCABULARY LEARNING (3 credits)

This class aims to expand students' vocabulary in Spanish. This will be achieved through doing an overview of current research that investigates how vocabulary is learned; identifying effective vocabulary learning strategies; and exploring topics not commonly encountered in Spanish classes such as commerce and science. The course also includes points of contact with the Spanish-speaking community in Omaha, where students can participate in interactions that connect what has been learned in the classroom to language use in real life. (Cross-listed with SPAN 4020).

Prerequisite(s)/Corequisite(s): Graduate standing

SPAN 8036 ADVANCED SPANISH CONVERSATION (3 credits)

This course targets the development of oral skills in Spanish through the incorporation of complex and sophisticated conversational structures and nuanced lexicon. In particular, the course focuses on presentational (i.e., expressing or exposing ideas or opinions), and interpersonal speaking (i.e., engaging in conversation where learners narrate and describe in the major time frames of past, present, and future in paragraph-length discourse with control of aspect). (Cross-listed with SPAN 4030)

Prerequisite(s)/Corequisite(s): Graduate standing

SPAN 8046 ADVANCED COMPOSITION AND STYLISTICS (3 credits)

In this capstone course, required for the completion of the major, learners will explore and practice advanced grammatical structures, write compositions in a variety of genres, and familiarize themselves with advanced stylistics. (Cross-listed with SPAN 4040)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

SPAN 8066 INTRODUCTION TO TRANSLATION AND INTERPRETATION (3 credits)

This course offers an introduction to the translation and interpretation field. Course objectives include (a) understanding translation theory; (b) comprehending the role of communication in translation and interpretation; (c) targeting common grammatical and pragmatic errors; (d) increasing vocabulary knowledge in a variety of fields; and (e) gaining an increased awareness of the rigor and demands innate to the translation and interpretation fields. (Cross-listed with SPAN 4060).

Prerequisite(s)/Corequisite(s): Admission to MALT program or permission of instructor

SPAN 8076 HISPANIC BILINGUALISM (3 credits)

This course explores bilingualism among Spanish speaking populations. Topics include societal bilingualism, the history of Spanish and language policy in Spain, Latin America, and the U.S., psychological aspects of bilingualism, monolingual vs. bilingual acquisition, first vs second language acquisition, and Spanish as a heritage language in the U.S. (Cross-listed with SPAN 4070).

SPAN 8086 INTRODUCTION TO HISPANIC LINGUISTICS (3 credits)

This course introduces students to the field of linguistics by exploring the following areas: phonetics and phonology (sound systems), morphology (word formation), historical linguistics (language development over time), and sociolinguistics and pragmatics (language in society and context), among others, as framed within the study of the Spanish language. (Cross-listed with SPAN 4080).

Prerequisite(s)/Corequisite(s): SPAN 3030 and SPAN 3040 OR SPAN 3010 and SPAN 3020; Graduate standing

SPAN 8126 HISPANIC SOCIOLINGUISTICS (3 credits)

This course introduces sociolinguistics, the study of the relationship between language and society, with an emphasis on the Spanish language. Its focus will be on correlational linguistics (how social factors such as age, gender and socioeconomic status affect language) and language and society (the role language plays in human conduct and social organization). Course topics will include the concept of speech communities, sociolinguistic variables, phonological and syntactic variation as well as languages in contact, bilingualism, Spanish in the U.S., Spanish as a heritage language, and language attitudes and ideologies. (Cross-listed with SPAN 4120).

Prerequisite(s)/Corequisite(s): SPAN 8086 or instructor permission

SPAN 8136 SPANISH IN THE UNITED STATES (3 credits)

This course looks at Spanish in the U.S. from a sociolinguistic perspective. Course topics include: Dialectal/regional differences, dialect contact, Spanish- English bilingualism and code-switching, "Spanglish", language maintenance, language ideologies surrounding Spanish in the U.S., and Spanish in public spheres (e.g., TV, movies, radio, music, stand-up comedy). (Cross-listed with SPAN 4130).

Prerequisite(s)/Corequisite(s): SPAN 8086 or instructor permission

SPAN 8146 INTRODUCTION TO LATIN AMERICAN FILM (3 credits)

The course will be a thematic study of significant Latin American films emphasizing and further investigating their relationship to history, culture, society and political issues that have often given rise to social movements. Films from a variety of Spanish-speaking countries including Mexico, Argentina, Chile, Cuba, Bolivia, etc. will be studied in their socio-political context. At the 8146 level, students will be introduced to theoretical approaches such as early film theory, montage theory, feminist theory, race theory, and phenomenological film theory in order to deepen their understanding these themes. (Cross-listed with SPAN 4140, LLS 4140).

SPAN 8156 LITERATURE/CULTURE: CENTRAL AMERICA AND THE CARIBBEAN 1898-2000 (3 credits)

"Literature/ Culture: Central America and the Caribbean 1898- 2000" studies major historical and socio-cultural events in Latin American history in the 20th century, through their articulation in literary texts, film, and other cultural expressions from Central America and the Hispanic Caribbean. (Cross-listed with SPAN 4150, CACT 8156)

Prerequisite(s)/Corequisite(s): SPAN 3030, SPAN 3040 and SPAN 3060 or permission of instructor

SPAN 8176 INTRODUCTION TO LATIN AMERICAN LITERATURES (3 credits)

The course is intended as an introduction to the study of canonical and non-canonical texts in Latin American literatures, from the 16th to 21st centuries. It seeks to acquaint students with the rich literary traditions of a large region, from South America to Central America and Mexico, as well as with the historical challenges posed by the salient heterogeneity of texts included in the Latin American corpus, from the standpoint of ethnicity, gender, social class, and literary genre. The course also focuses on continuing to develop Spanish language skills, specifically reading for comprehension and interpretation of metaphorical meaning, writing, and presentational speaking skills in Spanish. (Cross-listed with SPAN 4170, LLS 4170).

Prerequisite(s)/Corequisite(s): SPAN 3030 and SPAN 3040, or SPAN 3010 and SPAN 3020; SPAN 3060

SPAN 8226 THE STRUCTURE OF SPANISH (3 credits)

This course introduces students to the structure of the Spanish language with a focus on its morphology and syntax as seen in the study of constituents of a sentence, lexical categories, content and function words, the pronominal system, the structure of simple and complex sentences, and the verbal system, among others. It reviews frequent syntactical errors in Spanish L2 and Heritage learners with the purpose of advancing their linguistic competence. (Cross-listed with SPAN 4220).

Prerequisite(s)/Corequisite(s): SPAN 3030 and 3040 or SPAN 3010 and SPAN 3020; graduate standing

SPAN 8440 SEMINAR:SPANISH COMPOSITION (3 credits)

This course provides opportunities for students to refine their composition skills in Spanish through extensive writing workshops and peer editing. Computer applications to composition will be employed.

Prerequisite(s)/Corequisite(s): Admission to the Graduate College.

SPAN 8900 SPANISH INDEPENDENT STUDY: GRADUATE ONLY (1-3 credits)

Specifically planned projects and readings in a well-defined field of literature or linguistics carried out under the supervision of a member of the foreign languages faculty holding graduate faculty status.

Prerequisite(s)/Corequisite(s): Acceptance into the Master of Arts in Language Teaching Program (MALT). Must have completed a minimum of six graduate credit hours.

SPAN 8906 INDEPENDENT STUDY (1-3 credits)

Specially planned readings in a well-defined field of literature, carried out under the supervision of a member of the foreign language faculty. Designed primarily for the student who has need of work not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated for credit once.

Prerequisite(s)/Corequisite(s): Senior status, no incompletes outstanding, and departmental permission.

SPAN 8956 PRO-SEMINAR: LITERATURE AND/OR FILM (3 credits)

This course is dedicated to the study of a narrower field of the literature and/or cinema of the Spanish-speaking world. (Cross-listed with SPAN 4950)

Prerequisite(s)/Corequisite(s): Graduate standing

SPAN 8966 PRO-SEMINAR: CULTURE AND SOCIETY (3 credits)

This course will address a narrow field of study of the civilization, history, film, contemporary culture, art, politics, and/or cultural studies of the Spanish-speaking world. (Cross-listed with SPAN 4960)

Prerequisite(s)/Corequisite(s): SPAN 3030, SPAN 3040, and SPAN 3060.

SPAN 8976 PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS (3 credits)

This course will address a narrow field of study of linguistics, translation/interpretation or the professional language of the Spanish-speaking world. (Cross-listed with SPAN 4970)

Prerequisite(s)/Corequisite(s): Graduate standing.

Special Education & Communication Disorders (SPED)

SPED 8000 SPECIAL PROJECTS (1-3 credits)

This course is designed to allow graduate candidates to pursue independent study of a topic under the direction and guidance of a faculty member. Topics studied and the nature of the learning activities is mutually agreed upon by the candidate and instructor.

Prerequisite(s)/Corequisite(s): Permission by the instructor. Not open to non-degree graduate students.

SPED 8016 MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS (3 credits)

This course explores the role that educators and school mental health professionals play in identifying the risk factors and warning signs of children and youth with mental health concerns. Students will understand the risk and protective factors at the individual, family, school, and community level as related to children and youth's mental health.

The course will provide an overview of externalizing and internalizing disorders as well as school-based and community-based treatments and interventions. (Cross-listed with COUN 4010, COUN 8016, SPED 4010).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

SPED 8030 TEACHING STUDENTS WITH EXCEPTIONALITIES (3 credits)

This course is designed to describe the characteristics and learning styles of students with various exceptional learning needs. This course also is intended to provide candidates with a knowledge base for the foundation of special education including the basic procedural flow of referral, identification and instruction and strategies for modifying the learning environment and individualizing instruction.

Prerequisite(s)/Corequisite(s): Graduate standing.

SPED 8046 WORKSHOP IN SPECIAL EDUCATION OR SPEECH-LANGUAGE PATHOLOGY (1-6 credits)

The purpose of this course is to provide workshops or special seminars in the area of special education and communication disorders. This course will prepare graduate candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. (Cross-listed with SPED 4040).

Prerequisite(s)/Corequisite(s): Must have graduate status and permission.

SPED 8100 RESEARCH PROJECTS (1-3 credits)

The purpose of this course is to allow candidates to participate in research activities other than those related to the thesis. Specific course content and type of research will be dependent on the nature of the intended research and must be approved by the supervising advisor and Department Chair prior to registration.

Prerequisite(s)/Corequisite(s): Graduate standing and admitted into a special education or speech-language pathology program of study.

SPED 8120 HIGH INCIDENCE DISABILITIES (3 credits)

This introductory course is designed to examine characteristics of learners with high incidence disabilities and the impact of those characteristics on learning. The focus will be on the manifestation of disabilities including learning disabilities, behavior disorders, mild to moderate intellectual disabilities, speech and language disorders, attention-deficit hyperactivity disorders, and autism spectrum disorders.

Prerequisite(s)/Corequisite(s): Graduate Standing.

SPED 8236 LANGUAGE DEVELOPMENT AND DISORDERS FOR TEACHERS (3 credits)

This course is designed to introduce the candidate to the nature and structure of language, current theories of language, normal first and second language development, language disorders, multicultural issues in language assessment, and contemporary classroom management of language deficits. The topics will be examined from an educational perspective to enhance the teachers knowledge of language and to facilitate classroom management of language deficits exhibited by exceptional children in grades pre-K through 12. (Cross-listed with SPED 4230).

Prerequisite(s)/Corequisite(s): Admission to Graduate College

SPED 8250 LITERACY ASSESSMENT AND INTERVENTIONS FOR STUDENTS WITH DISABILITIES (3 credits)

This course is designed to provide graduate candidates skills and strategies for instructing students with high incidence disabilities, including dyslexia, that struggle to acquire literacy skills. Emphasis is placed on diagnosis and assessment of specific reading and writing difficulties to determine effective instructional strategies. Instructional strategies will address modifications directed at teaching oral language, reading, writing, and spelling skills.

Prerequisite(s)/Corequisite(s): Admission to the Master of Science degree program in special education or permission of the instructor. Not open to non-degree graduate students.

SPED 8300 READINGS IN SPECIAL EDUCATION (1-3 credits)

Reading and discussion of current methodological developments, research, and innovations in special education.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in special education. Not open to non-degree graduate students.

SPED 8646 METHODS AND MATERIALS IN SPECIAL EDUCATION (3 credits)

This course is designed to describe the various instructional methods that have been used successfully in supporting students with disabilities in a variety of settings. This course is also intended to provide pre-service and in-service candidates with knowledge and evidence-based teaching strategies essential for modifying the learning environment and individualizing instruction for students with disabilities. In addition, teaching methods will focus on academic curriculum lesson planning, development of IEPs, selection of instructional methods and materials, and universal design for learning (UDL). (Cross-listed with SPED 4640).

Prerequisite(s)/Corequisite(s): Admission into a Special Education Master's program and SPED 8120. Not open to non-degree graduate students.

SPED 8656 TRANSITION PLANNING (3 credits)

Curriculum oriented for teachers and related professionals to work with the career development and transition of individuals with disabilities within a multicultural and global society. Includes information for elementary through adulthood with emphasis on transition from high school to community living. (Cross-listed with SPED 4650).

Prerequisite(s)/Corequisite(s): SPED 1500. Not open to non-degree graduate students.

SPED 8670 MATH INTERVENTIONS (3 credits)

The purpose of this course is to prepare graduate candidates to teach, co-teach or consult in the area of mathematics interventions. Graduate candidates will examine and apply the existing research in mathematics instruction for students with exceptional needs.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in Special Education. Not open to non-degree graduate students.

SPED 8700 SEMINAR IN SPECIAL EDUCATION (3 credits)

The seminar in Special Education is designed to be one of the very last courses taken by a master's degree candidate. Content covers a wide range of topics such as: 1) continuum of care; 2) educational and community service systems; 3) legislation; 4) family concerns; and 5) comparative special education. Each candidate develops a teaching module on one of the course topics, which is discussed and evaluated in class.

Prerequisite(s)/Corequisite(s): Graduate standing.

SPED 8716 INTERACTIONS AND COLLABORATION (3 credits)

This course is offered to investigate the building blocks of collaboration. Effective interpersonal communication and collaboration skills are presented as the foundation necessary to build relationships among school personnel, families and community members. (Cross-listed with SPED 4710).

Prerequisite(s)/Corequisite(s): Admission to Graduate College

SPED 8720 GRADUATE PRACTICUM IN SPECIAL EDUCATION (3 credits)

This graduate special education practicum course provides candidates with either inservice experience or placement in a school program for students with exceptionalities at an academic level commensurate with the candidate's desired level of the special education generalist endorsement (K- 6 or 7-12).

Prerequisite(s)/Corequisite(s): Admission to the graduate program in the desired endorsement, completion of 30 hours of required course work, and permission. Not open to non-degree graduate students.

SPED 8730 ADVANCED GRADUATE PRACTICUM IN SPECIAL EDUCATION (3 credits)

This course provides candidates with a second semester of classroom experience teaching students with disabilities. This experience is for graduate candidates who are extending their endorsement. For students seeking an additional endorsement as a Special Education Generalist, this course would prepare them for endorsement in grades K-6 or 7-12. For students seeking an additional endorsement in Behavior Intervention Specialist, this course would prepare them for endorsement in grades PK-6 or 7-12.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in the desired endorsement and completion of SPED 8720, SPED 8830 or SPED 8840. Not open to non-degree graduate students.

SPED 8806 SOCIAL AND EMOTIONAL DEVELOPMENT OF CHILDREN AND YOUTH (3 credits)

This course is designed to prepare teacher candidates and graduate candidates with the understanding of the psychological, biological and environmental factors that affect the social-emotional development of children and adolescents. Emphasis is placed on the interaction of these factors for children with exceptional learning needs and the implications for the learning environment. (Cross-listed with SPED 4800).

SPED 8810 RESEARCH METHODS IN SPECIAL EDUCATION (3 credits)

This course is designed to provide an examination of the theoretical approaches to conducting educational research, research design and analysis, and interpretation and evaluation of existing research in special education and related fields.

Prerequisite(s)/Corequisite(s): SPED 8120 or permission from the instructor. Not open to non-degree graduate students.

SPED 8816 BEHAVIOR INTERVENTIONS AND SUPPORTS (3 credits)

This course introduces a variety of practical interventions that teachers may use to support the positive classroom behavior of all students within a tiered model. Universal, targeted, and individualized strategies are presented. (Cross-listed with SPED 4810).

SPED 8820 CHARACTERISTICS OF EMOTIONAL AND BEHAVIORAL DISORDERS (3 credits)

This course is designed to assess and examine the causes and characteristics of behavioral disorders, which constitute internalizing, externalizing, and pervasive developmental disorders. Extensive use of the case study method will be used.

Prerequisite(s)/Corequisite(s): Admission to the Master of Science degree program in special education.

SPED 8830 GRADUATE PRACTICUM IN BEHAVIOR INTERVENTION SPECIALIST (3 credits)

This course provides candidates with either an in-service experience or placement in a school program in which the candidate works with students with emotional and behavioral disorders at an academic level commensurate with the candidate's desired level of endorsement (PK- 9, or 7-12).

Prerequisite(s)/Corequisite(s): Admission to the graduate program in special education with an emphasis in behavior intervention specialist, completion of 30 hours of the required coursework, and permission by the department. Not open to non-degree graduate students.

SPED 8840 ADVANCED PRACTICUM IN BEHAVIOR INTERVENTION SPECIALIST (3 credits)

This course provides candidates with additional experiences in working with students with disabilities who present challenging behaviors, including emotional disturbance and autism. This course is designed for graduate students who are already endorsed in special education.

Prerequisite(s)/Corequisite(s): Behavior Intervention Specialist program and permission. Not open to non-degree graduate students.

SPED 8850 INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH EMOTIONAL AND BEHAVIORAL DISORDERS (3 credits)

The focus of the course will be on instruction and interventions that are effective for students with behavior disorders such as explicit instruction, social skills support, supporting executive functions, and cognitive strategy instruction.

Prerequisite(s)/Corequisite(s): Graduate standing and successful completion of SPED 8820, not open to non-degree students.

SPED 8860 BEHAVIOR MODIFICATION (3 credits)

This course is designed to equip candidates with the skills necessary to assess, modify, and evaluate behavior in accordance with best practice and research-based approaches. In addition, this course will train candidates on how to conduct a functional behavioral assessment and create behavioral intervention plans in accordance with IDEA.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in special education. Not open to non-degree graduate students.

SPED 8870 AUTISM SPECTRUM DISORDERS: BEHAVIORAL SUPPORT AND INTERVENTIONS (3 credits)

This course is designed to provide information on the behavioral characteristics, instructional needs and necessary curriculum development specifically for children and youth with autism spectrum disorder (ASD).

Prerequisite(s)/Corequisite(s): Admission to the graduate program in special education. Not open to non-degree graduate students.

SPED 8900 SPECIAL EDUCATION LAW (3 credits)

The purpose of this course is to research and explore legal and policy issues affecting special education within our schools. Case law will be examined to ensure effective special education programs for children and youth with disabilities. (Cross-listed with EDL 8900).

Prerequisite(s)/Corequisite(s): Graduate Standing. Not open to non-degree graduate students.

SPED 8910 ASSESSMENT IN SPECIAL EDUCATION (3 credits)

This course provides an overview of measurement and evaluation concepts, strategies, and techniques that are appropriate for students with special needs. Graduate candidates will implement and analyze formal and informal assessments using a systematic and comprehensive approach. Emphasis is placed on those assessment strategies that yield objective data regarding individual learning characteristics that provide a basis for educational decision making.

Prerequisite(s)/Corequisite(s): Graduate standing and SPED 8120

SPED 8920 SPECIAL EDUCATION LEADERSHIP (3 credits)

The purpose of this course is to examine special education administration and leadership issues. This course will focus on policies and procedures necessary to effectively provide leadership to programs for children and youth with disabilities.

Prerequisite(s)/Corequisite(s): Graduate standing. Not open to non-degree graduate students.

SPED 8930 INCLUSION/COLLABORATION PRACTICUM (3 credits)

This course provides candidates with a practicum experience in the inclusion/collaboration specialty area with emphasis across PK-12 settings.

Prerequisite(s)/Corequisite(s): Admission to the graduate program in inclusion/collaboration and permission by the department. Not open to non-degree graduate students.

SPED 8960 ADVANCED ASSESSMENT AND INTERVENTION (3 credits)

This course provides graduate candidates with in-depth practicum experiences in the administration and interpretation of standardized academic achievement measures, criterion-referenced tests, informal assessments, and progress monitoring with children experiencing learning difficulties. Emphasis is placed on utilizing assessment information in order to develop and monitor intervention plans.

Prerequisite(s)/Corequisite(s): Admission to the Master of Science degree program in special education; SPED 8910, SPED 8646, SPED 8156, and SPED 8970; or have permission from the instructor. Not open to non-degree graduate students.

SPED 8970 INSTRUCTIONAL STRATEGIES (3 credits)

This course is designed to prepare graduate candidates with in-depth information regarding effective teaching strategies for students with high-incidence disabilities. Primary emphasis is placed on providing students with theoretical and practical foundations in the design and implementation of cognitive strategy instruction and the use of evidence-based practices and the selection and monitoring of individualized interventions.

Prerequisite(s)/Corequisite(s): Admission to the Master of Science degree in special education, SPED 8120, SPED 8646 or equivalent or permission of the instructor. Not open to non-degree graduate students.

SPED 8980 PROFESSIONAL COLLABORATION (3 credits)

This course is designed to prepare candidates to work in collaboration with other professionals and parents to create a learning environment that enhances the potential for academic success and improvement of instructional practices. The focus will be on collaborative problem solving. (Cross-listed with TED 8850).

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

SPED 8990 THESIS (1-6 credits)

This course is intended for all graduate candidates in the Department of Special Education and Communication Disorders who are seeking a Master of Arts degree. The candidate is expected to generate and complete an independent research project under the guidance of a thesis advisor.

Prerequisite(s)/Corequisite(s): Permission of Thesis Committee Chair and TED 8010. Not open to non-degree graduate students.

SPED 9140 ASSESSMENT AND TREATMENT OF AUTISM SPECTRUM DISORDERS (3 credits)

The purpose of this course is to familiarize students with the diagnosis, assessment, and treatment of autism spectrum disorders (ASD). (Cross-listed with PSYC 9140).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Statistics (STAT)

STAT 8005 STATISTICAL METHODS I (3 credits)

An introduction to descriptive statistics, measures of central value and dispersion, probability and distributions, population and sample, simple linear regression, statistical inference: point estimation, confidence intervals, hypotheses testing, two population comparison, goodness-of-fit tests, analysis of variance. Statistical software like Minitab or Excel will be utilized in the course. (Cross-listed with STAT 3000).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220 or equivalent with a grade of C- or better.

STAT 8416 INTRODUCTION TO DATA SCIENCE (3 credits)

Topics covered in this course include Data Technology, Methods of gathering and cleaning structured or unstructured data, Exploratory data analysis & Dynamic and interactive data visualization, Modeling data for prediction, forecasting or classification. (Cross-listed with STAT 4410).

Prerequisite(s)/Corequisite(s): MATH 4740 with a C- or better or concurrent; or STAT 3800 with a C- or better or concurrent; or permission of instructor. Students should be comfortable with computer programming & have knowledge of data structures & preliminary statistical methods.

STAT 8426 EXPLORATORY DATA VISUALIZATION AND QUANTIFICATION (3 credits)

Topics covered in this course include Exploratory Data Visualization for categorical/qualitative single/multivariate data, Grammar of Graphics, Organizing Data for Visualization, Methods of Displaying Data that include dynamic and interactive visualization, Visual Diagnostics of Statistical Models and Visual Statistical Inference. Students planning to enroll in this course should be comfortable with computer programming and have knowledge of data structures and preliminary statistical methods. (Cross-listed with STAT 4420)

Prerequisite(s)/Corequisite(s): STAT 3800 or STAT 8805 or MATH 4740 or MATH 8746 with a grade of C- or better or another introductory probability/statistics course with a grade of C- or better, and MATH 3200 or CSCI 1620 with a grade of C- or better, or permission of instructor.

STAT 8436 LINEAR MODELS (3 credits)

This is an introduction to linear statistical models which will include: simple linear regression models, multiple linear regression models, ANOVA models including one way ANOVA, randomized block design, and other designs. Also, logistic regression models, Poisson regression models, bootstrapping/resampling models, survival analysis. Some necessary linear algebra and mathematical statistics ideas will be covered in the course also. If time allows, some mixed models and/or survival models. Much use of computer software will be made. (Cross-listed with STAT 4430)

Prerequisite(s)/Corequisite(s): MATH 4750 or MATH 8756 w/ a grade of C- or better or STAT 3800 or STAT 8805 w/ a C- or better or instructor permission based on students' having taken a basic statistics course w/ a grade of C- or better & having at least a basic knowledge of calculus.

STAT 8446 TIME SERIES ANALYSIS (3 credits)

The objective of this course is to learn and apply statistical methods for the analysis of data that have been observed over time. Topics covered include: Models for Stationary and Non-Stationary Time Series, Model Specification, Parameter Estimation, Model Diagnostics, Forecasting, Seasonal Models, Time Series Regression, and Spectral Analysis. Statistical software will be used. (Cross-listed with STAT 4440)

Prerequisite(s)/Corequisite(s): MATH 4750 or MATH 8756 w/ a grade of C- or better or STAT 3800 or STAT 8805 w/ a C- or better or another introductory probability/statistics course w/ a C- or better, or permission of instructor.

STAT 8456 INTRODUCTION TO MACHINE LEARNING AND DATA MINING (3 credits)

This is an introduction to machine learning and data mining which covers the following topics with an emphasis on mathematical and statistical analysis: linear and nonlinear regression models, model selection and regularization methods, resampling methods, classification models, tree-based models, and unsupervised learning topics. If time allows, text mining and deep learning will also be introduced in the course. Statistical software will be used. (Cross-listed with MATH 4450, MATH 8456, STAT 4450)

Prerequisite(s)/Corequisite(s): MATH 4740/8746 with a C- or better or STAT 3800/8805 with a C- or better or permission of instructor.

STAT 8700 BAYESIAN STATISTICS (3 credits)

The objective of this course is to introduce the Bayesian approach to statistical inference. Topics covered include: Review of probability, Bayes theorem, and Likelihood; The Bayesian methodology, prior and posterior distributions; Choices of prior distribution, conjugate and Jeffreys priors; Credible intervals and inference; Bayesian computation - Markov Chain Monte Carlo and the Gibbs Sampler; Hierarchical models; Regression models.

Prerequisite(s)/Corequisite(s): MATH 8756 or equivalent or permission of instructor.

STAT 8710 DESIGN AND ANALYSIS OF EXPERIMENTS (3 credits)

Introduction to design and analysis of controlled experiments. The goal of experimental design is to be able to construct an experiment to identify which factors most impact the response and do so in an efficient manner. Statistical software will be used. Types of designs studied include: Randomized Block Designs, Latin Square Designs, Incomplete Block Designs, Factorial Designs, and Nested Designs.

Prerequisite(s)/Corequisite(s): MATH 4750/8756 or permission of instructor.

STAT 8720 RELIABILITY THEORY (3 credits)

This course covers the probabilistic and statistical aspects of reliability theory. Reliability theory is concerned with the probability that a component or system is successfully working over a given time period or at a specific time instance. (Cross-listed with MATH 8720).

Prerequisite(s)/Corequisite(s): Either MATH 4740 or STAT 3800 or permission of the instructor. Some basics of mathematical analysis are helpful when discussing limit theorems, but not required.

STAT 8805 APPLIED ENGINEERING PROBABILITY AND STATISTICS (3 credits)

An introduction to the application of probability and statistics to engineering problems. Topics include: probability and probability distributions, mathematical expectation, distribution of random variables, binomial, Poisson, hypergeometric, gamma, normal, and t-distributions, Central Limit Theorem, confidence intervals, hypothesis testing. If time allows, some linear regression and contingency tables. Credit for both MATH 4740 and STAT 3800 will not be given. (Cross-listed with STAT 3800)

Prerequisite(s)/Corequisite(s): MATH 1970

STAT 8960 MASTER'S PROJECT (1-6 credits)

An applied project, designed and executed under the supervision of both a faculty and industry advisor. In the project the student will apply their mathematical and/or statistical skills to an applied problem. The student will present their results via a written report and oral presentation. (Cross-listed with MATH 8960).

Prerequisite(s)/Corequisite(s): Permission of faculty advisor and graduate program chair. Not open to non-degree graduate students.

Teacher Education (TED)

TED 8000 SPECIAL STUDIES (1-3 credits)

A series of intensive studies especially for in-service teachers scheduled as regular seminars or classes, according to purpose.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8006 SPECIAL METHODS IN THE CONTENT AREA (3 credits)

This course is designed to develop knowledge, skills, and dispositions requisite of teachers. Course content is determined by the discipline area. For some content areas a field experience will be required. This is an in-school, guided practicum completed in conjunction with TED 4000 math, science, language arts, world languages, Business, Information Technology, ESL and social studies sections. Candidates must demonstrate competencies related to performance in 7-12 classrooms. This is the final practicum experience prior to the clinical practice semester. (Cross-listed with TED 4000).

TED 8010 INTRODUCTION TO RESEARCH (3 credits)

This course will introduce advanced degree candidates to: A) An understanding of the scientific method as applied to behavioral research B) Assessment, evaluation, descriptive, causal-comparative, experimental and historical data gathering procedures and analytical strategies C) Sampling theory, techniques, distribution and hypothesis testing D) Specific designs, methods, and tools of research E) Search and retrieval of published research, both American and international (global), in the library and over the Internet F) Critical evaluation of research studies G) Basic statistics, both descriptive and inferential, and H) Preparation of a research proposal containing three chapters: Problem, Review of Related Research and Methodology.

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8030 SEMINAR IN EDUCATION: SPECIAL TOPICS (1-3 credits)

This is a variable content course focusing on topics of current relevance to PK-12 teachers.

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8040 SEMINAR ON STUDENT TEACHING/NEW TEACHER INDUCTION (3 credits)

The seminar is designed for experienced teachers who are, or may be, serving as cooperating teachers for student teachers or as mentor teachers for beginning teachers. Participants will study the purposes, techniques, and trends involved in serving as a cooperating teacher or as a mentor.

Prerequisite(s)/Corequisite(s): Successful teaching experience is required for this course.

TED 8050 DATA-DRIVEN DECISION MAKING FOR EDUCATORS (3 credits)

This course provides graduate students with hands-on experiences that model data-driven decision making for educational success in today's classroom. Students will learn how to create valid and reliable assessments; interpret test data; use data to identify student, classroom, program, and school needs; and in general, to systematically enhance educational decision making. In addition, students will experience activities that can be integrated into student lessons to help to deepen concept learning, and to build student data literacy. The course will use real data sets, in interesting, hands on and technology-rich activities to find the "educational story" represented by the data. (Cross-listed with STEM 8050).

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8055 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)

This course is designed to enhance candidates' understanding of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs) in the U.S. context. As dedicated practitioners, reflective scholars, and responsible citizens, students will have knowledge of factors that contribute to an effective multicultural and multilingual learning environment. TED 3050 includes an in school, guided practicum. Candidates must demonstrate competencies related to teaching English Learners (ELs) in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education. (Cross-listed with TED 3050).

Prerequisite(s)/Corequisite(s): TED 2300 (EDUC 2010) OR TED 2380; and TED 2050.

TED 8060 CURRENT ISSUES AND TRENDS IN EDUCATION (3 credits)

The course is an advanced study of current issues and trends which have substantial impact on PK-12 education. The graduate candidates who take this class will read, analyze, and evaluate relevant research in order to become conversant in those issues.

Prerequisite(s)/Corequisite(s): Graduate status is required.

TED 8070 TEACHING MULTIPLE INTELLIGENCE (3 credits)

This course focuses on the utilization of the multiple intelligences (MI) theory by teachers to enhance children's understanding of various disciplines. Graduate candidates will have the opportunity to explore, evaluate, and develop various methodologies that foster understanding.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8080 STORYTELLING AND EDUCATION (3 credits)

This course is designed to consider the importance of storytelling, to provide teacher candidates with the background materials for storytelling, to study resource material for storytelling from a variety of cultures, and to develop techniques for storytelling. Actual experience in storytelling and opportunities for evaluating storytelling experiences will be provided.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8100 RESEARCH PROJECT (1-3 credits)

This course is designed for individual or group study and analysis of specific problems in schools dealing with curriculum and instruction in areas which have a broad scope of application rather than a specific level.

Prerequisite(s)/Corequisite(s): Approval of Advisor.

TED 8120 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)

TED 8120 is designed to enhance graduate candidates' knowledge of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs). As dedicated practitioners, reflective scholars, and responsible citizens, graduate candidates will learn strategies for designing and promoting effective multicultural and multilingual learning environments. This course includes an in-school, guided practicum through which graduate candidates must demonstrate competencies related to standards related to teaching ELs in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education's ESL teaching endorsement.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

TED 8130 LANGUAGE, CULTURE, AND POWER (3 credits)

This course will focus on the intersection of language, culture, and power in the schools. This seminar will research how each component impacts the students and teachers in the classroom.

TED 8150 ANTI-RACISM EDUCATION: PRINCIPLES AND PRACTICES (3 credits)

This course provides a theoretical analysis of race, racism and the implications for anti-racist education. In addition to exploring the key features of anti-racism education, the course also addresses other axes of oppression, namely, class and gender, with a critical focus on racialized power and privilege, and how such features function in the broader U.S. context as well as the schooling environment. Of equal importance is a critical interrogation of the historical, ideological, and political processes that produce and maintain racism. Course participants explore pedagogies, curriculum, and school leadership strategies as mechanisms for instituting anti-racism work in schools and community.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8160 ENGLISH AS A SECOND LANGUAGE STRATEGIES FOR PK-12 EDUCATORS (3 credits)

This course is designed to enhance graduate candidates' knowledge of PK-12 English as a Second Language (ESL) pedagogical and assessment strategies that address the needs of English Language Learners (ELs) in content area classrooms. As dedicated practitioners, reflective scholars, and responsible citizens, graduate candidates will be able to explore evidence-based pedagogical and assessment strategies to use in educational contexts serving ELs.

Prerequisite(s)/Corequisite(s): Graduate candidate status. Not open to non-degree graduate students.

TED 8170 DEVELOPMENTAL ASSESSMENT OF THE YOUNG CHILD (3 credits)

This course is designed as a survey of developmental assessment in early childhood education (ages birth to eight years). Selection of assessment tools and strategies, implementation, data collection, analysis of results, and teaching impact are addressed in context of key assessment purposes in the early childhood field.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8180 CULTURALLY RESPONSIVE TEACHING (3 credits)

This course includes an introductory analysis of the societal and institutional processes and problems which have bearing upon the education of children in urban settings. In addition, the course will focus on knowledge, skills and dispositions related to instructional strategies and classroom management needed for effective teaching in an urban environment.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8190 CONTEMPORARY ISSUES IN URBAN EDUCATION (3 credits)

This course is designed for candidates who wish to keep abreast of contemporary issues which confront the educational institution and teaching profession within the urban milieu.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8200 SOCIAL WORLDS OF THE YOUNG CHILD (3 credits)

This course will explore theoretical and cultural perspectives on the social and emotional development of young children. This course will also examine the relationship between social emotional development, guidance practices, democratic life skills, and school readiness.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8210 THE PRINCIPLES OF MULTICULTURAL EDUCATION (3 credits)

This course will develop practicing teachers' awareness of and skill in meeting the needs of P-12 students with regards to the areas of human understanding, acceptance and value. Candidates will examine existing attitudes towards various minority groups such as racial, ethnic, gender, exceptionality, etc. School materials and attitudes will also be examined in determining the effect they have on PK-12 students.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8220 PLAY AS A LEARNING MEDIUM IN EARLY CHILDHOOD EDUCATION (3 credits)

This course provides an in-depth examination of young children's play and its curricular role in the early childhood classroom. The origins, developmental outcomes, assessment, curricular implementation, and evaluation of play will be covered, with an emphasis on play as a major component of developmentally appropriate practice with young children. The focus is on teachers learning to help children become partners in the operation of the learning environment.

TED 8230 LITERATURE FOR THE YOUNG CHILD (3 credits)

Literature for the young child is examined through the lens of developmentally appropriate practice for informing educators' interactions with children and also for developing high-quality, literature-related projects of study across the early childhood (birth-through-age-eight) continuum.

Prerequisite(s)/Corequisite(s): Graduate Status.

TED 8240 FAMILY, SCHOOL, AND COMMUNITY PARTNERS (3 credits)

This course will examine the purposes and methods for developing family, school, and community partnerships. Candidates will explore characteristics of diverse families and develop the skills necessary for planning, design, implementation, and evaluation of effective partnerships in early childhood settings.

Prerequisite(s)/Corequisite(s): Graduate Status.

TED 8250 ASSESSMENT FOR CLASSROOM TEACHER (3 credits)

This course studies assessment principles, effective practices, and classroom assessment processes throughout the curriculum. The research regarding assessment for learning is studied and application is made to classroom practices.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8260 ADVANCED CURRICULUM IN EARLY CHILDHOOD (3 credits)

This course is designed to provide an in-depth examination of the processes used in selecting and implementing appropriate curricular content in programs for children ages three to eight years. Particular emphasis is on the role of the teacher as a dedicated practitioner and reflective scholar in the early learning environment.

TED 8270 TRENDS IN EARLY CHILDHOOD EDUCATION (3 credits)

This course provides a context for examining socio-political and research-based influences underlying trends in early childhood education at the local, national and international levels.

Prerequisite(s)/Corequisite(s): Graduate Status.

TED 8280 INTRODUCTION TO HUMAN RIGHTS IN P-12 EDUCATION (3 credits)

The course examines the intersection of human rights and P-12 education and prepares individuals to effectively work with and advocate for children and adolescents in educational settings. Students completing the course will be able to 1) demonstrate an increased understanding of fundamental human rights with a specific emphasis on education rights and the human rights of children and adolescents 2) create learning environments that elevate human rights in educational settings and 3) design developmentally appropriate instruction for children and adolescents on varied human rights topics.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8300 EFFECTIVE TEACHING PRACTICES (3 credits)

This course focuses on specific characteristics and behaviors of effective teachers. Course content will be derived from research on teaching and learning.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8310 HUMAN DEVELOPMENT - CONTEMPORARY IMPLICATIONS FOR TEACHING & LEARNING (3 credits)

This course examines human growth and learning from birth through late adolescence. It is designed to prepare teachers to synthesize information regarding developmental theory and subsequently apply this to lesson design and effective content-area pedagogy. Candidates will examine multiple frameworks related to the cognitive, social/emotional, and physical development of children and use those to analyze current educational practices in PK-12 schools. Cultural influences impacting human development and implications for educational practices will also be examined. The course will include field-based experiences.

Prerequisite(s)/Corequisite(s): Admission into a Teacher Education Department graduate program.

TED 8370 DATA VISUALIZATION AND MODELING FOR EDUCATORS (3 credits)

In the growing context of data informed decisions there is a need to answer "what if" questions in a variety of decision-making situations, as well as to display data both visually and interactively. This course will provide foundational skills in data visualization and modeling for educational decision making and instruction. It draws upon key fundamentals in data visualization (representing data trends visually) as well as key strategies in data modeling (interactive representations to explore possible outcomes). The course also explores the use of visualization and modeling technologies as well as assisting student learning with these tools. (Cross-listed with STEM 8370).

TED 8376 TEACHING AT THE MIDDLE LEVEL (3 credits)

This course will provide candidates with a variety of middle level teaching techniques and strategies in their classrooms that have been identified in current research literature as appropriate for the middle level. This course is designed to introduce candidates to the unique characteristics of the middle student, school, curriculum, history, and philosophy. (Cross-listed with TED 4370).

TED 8390 CLASSROOM MANAGEMENT IN PRACTICE (3 credits)

This course will provide graduate students with a survey of general classroom management methods for classrooms. Candidates will enhance their understanding of three basic components of effective pedagogy: 1) proactive classroom management, 2) high-impact instructional strategies that impact student engagement and learning, 3) behavior management techniques that incorporate practice, feedback, research, and reflection.

Prerequisite(s)/Corequisite(s): Graduate standing

TED 8410 IMPROVEMENT OF INSTRUCTION: SPECIAL TOPICS (3 credits)

This course provides an in-depth study of instructional theory, research, and methodology designed to extend teachers' professional knowledge base and enhance their pedagogical skills. When offered, a course may be limited to improvement of instruction in a selected subject area. (Cross-listed with STEM 8410).

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8420 TRENDS AND TEACHING STRATEGIES IN SCIENCE EDUCATION (3 credits)

This course is designed for the graduate candidate in the Department of Teacher Education whose study program emphasis is in the area of science education. The course will describe and analyze past and present trends in science education, including curricula, teaching-learning strategies, the laboratory and instructional materials. The course focus will be K-12 and as such is meant to serve both elementary and secondary graduate candidates. (Cross-listed with STEM 8420).

TED 8430 SCHOOL CURRICULUM PLANNING (3 credits)

This course is designed to provide advanced degree candidates with an understanding of the theory, principles, and practices utilized in curriculum planning in American schools. This course focuses on the principles and practices of effective curriculum planning and teachers' part in these processes as curriculum developers. (Cross-listed with STEM 8430).

TED 8470 TEACHING THE LANGUAGE ARTS (3 credits)

This course is designed to enhance candidates' knowledge of best practices in teaching reading, writing, listening, and speaking. Candidates will learn about research supported appropriate language arts instruction strategies and assessments. This course will inform graduate students as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

TED 8480 FOUNDATIONS OF BILINGUAL EDUCATION (3 credits)

This course is designed to give future and current teachers a thorough understanding of the theoretical, political, historical, and practical foundations of bilingual/multicultural education in the United States. As dedicated practitioners, reflective scholars, and responsible citizens, graduate students will have knowledge of factors that contribute to effective multilingual and multicultural learning environments that promote individual and societal bilingualism. Advanced Spanish language proficiency required.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8490 SPANISH LANGUAGE ARTS (3 credits)

This course is designed to reinforce first and second language acquisition theory as it relates to dual immersion settings. Best practices for developing and reinforcing bilingualism and biliteracy are presented and used for planning and delivering instruction. Spanish fluency is required for the course.

Prerequisite(s)/Corequisite(s): Graduate status required for graduate students pursuing the bilingual education endorsement and concentration (does not lead to a Nebraska Department of Education teaching endorsement). Advanced Spanish language proficiency required.

TED 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)

This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with AVN 8510, STEM 8510).

Prerequisite(s)/Corequisite(s): Graduate standing.

TED 8520 SCHOOL LIBRARY CAPSTONE (3 credits)

Candidates will gain direct experience and an understanding of the theories, concepts and activities integral to public services, technical services, and the administration in a 21st Century library and information agency at an assigned field site. Candidates will demonstrate the ability to plan, develop, and implement programming and services for patrons and diverse learners in their schools and communities.

Prerequisite(s)/Corequisite(s): There are no course prereqs for the Capstone Practicum but candidates must be in the final 2 semesters of their library media program & must complete an application for the Practicum the semester prior to their practicum. Not open to non-degree grads.

TED 8530 INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS (3 credits)

This course is designed to provide graduate candidates with the opportunity to enhance interdisciplinary instructional strategies, curricular understanding, and lesson preparation in the areas of science, technology, engineering, the arts, and mathematics (STEAM) through analysis and reflective practices in STEAM. This course provides hands-on experiences that model STEAM integration techniques, including how to effectively engage with community agencies and partners to bring STEAM into the classroom. This course emphasizes not only the technical aspects of STEM, but also the creativity and innovation that arts integration can add to enhance STEM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. (Cross-listed with STEM 8530).

Prerequisite(s)/Corequisite(s): This course includes both teacher education and STEAM related topics and therefore fits into both TED and STEM program coursework.

TED 8540 DIGITAL CITIZENSHIP (3 credits)

The course explores key concepts of Digital Citizenship pertaining to digital law, digital ethics, digital interaction, digital literacy, and cyber-security. The course addresses an educator's role as technology leader in both policy and practice to establish a responsible and robust digital learning community in P-12 schools.

Prerequisite(s)/Corequisite(s): Graduate Standing/Status

TED 8550 TECHNOLOGY FOR CREATIVE AND CRITICAL THINKING (3 credits)

Technology for Creativity and Critical Thinking investigates the use of visual media tools in P-12 digital learning environments. This course provides candidates an opportunity to develop leadership skills and dispositions relevant to advocacy initiatives addressing policy and best practice in the use of technology in P-12 schools.

TED 8560 TECHNOLOGY FOR DIVERSE LEARNERS (3 credits)

This course will engage candidates that facilitate the use of instructional technology, pedagogy, and strategies to better meet the needs of diverse learners. Candidates will explore categories of diverse learners relevant and specific to their own organizations and learning environments to ensure candidates can effectively research and implement assistive technology, instructional technology, and applications to enhance learning opportunities for children and youth.

TED 8570 INTERNET IN THE LEARNING PROCESS (3 credits)

This course is designed to help educators actively explore instructional implementations of Internet use appropriate for use in K-12 classrooms, successful diffusion of Internet innovations in educational environments, and emerging multicultural "breaking down the walls of the classroom" concepts available to educators through Internet use.

TED 8580 ONLINE TEACHING AND LEARNING (3 credits)

Online Teaching and Learning is a course for education professionals that investigates the use of online tools for planning, preparing and assessing student learning in a digital environment. The course will prepare candidates to provide leadership for digital initiatives within learning organizations. The course encourages educators to explore methods of virtual lesson delivery and online assessment through direct instruction and online study.

Prerequisite(s)/Corequisite(s): Graduate Admissions status

TED 8590 TEACHING AND LEARNING IN DIGITAL ENVIRONMENTS (3 credits)

This course is an introduction to future-ready information and instructional technologies for use with children and youth. Course will cover a diverse array of technical literacies that serve as content and skill goals for today's children and youth in P-12 schools and other learning organizations.

TED 8610 TEACHING OF WRITING THROUGHOUT THE CURRICULUM (3 credits)

This course is designed to enhance candidates' knowledge of best practices in teaching writing. Candidates will learn about research supported appropriate writing instruction strategies and assessments. Candidates will be writing extensively throughout the course as they examine the varied ways writing genres extend throughout the curriculum. This course will inform candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8620 ADVANCED SUPPORT OF INSTRUCTIONAL TECHNOLOGY ENVIRONMENTS (3 credits)

This course is designed for P-12 educators who wish to become better advocates of technology integration or become technology coordinators or school technicians. Course enrollees will evaluate and implement advanced strategies to keep technology up to date, effectively use technology, and properly manage technology in a school setting.

TED 8650 CHILDREN'S LITERATURE AND EDUCATION (3 credits)

Candidates in this graduate course will explore story, poetry, drama, and informational materials for elementary students with an emphasis on methods for including literature in school curricula with an awareness of diverse children's lives, discourses, and understandings. Examines current issues, recent materials, and the theoretical and research base of this field to develop meaningful and creative learning, literacy, and library experiences for children.

TED 8660 YOUNG ADULT LITERATURE (3 credits)

This course extends candidates' knowledge of literature for young adults. The course addresses current trends in the genre and engages candidates in activities that support pedagogies in basic, visual, information and cultural literacies.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8695 LITERACY AND LEARNING (3 credits)

This course examines ways in which reading and writing can facilitate student learning in content areas studies (e.g., science, social studies, physical education, art, music, and math). The main focus is on teaching practices that engage students and contribute to their learning, integrating their background knowledge and cultural experiences with content area literacy. (Cross-listed with TED 3690).

TED 8700 ELEMENTARY EDUCATION CAPSTONE COURSE (3 credits)

This course is designed as a required, final capstone course for Elementary Education graduate students to be taken in the last nine hours of the Master of Science program. A grade of B or better must be received in TED 8700 to show satisfactory completion of the course and for program completion.

Prerequisite(s)/Corequisite(s): Permission of the Elementary Education Program Chair. Not open to non-degree graduate students.

TED 8710 RESEARCH AND INQUIRY (3 credits)

Candidates will demonstrate an understanding of the theories, concepts and activities integral to reference resources and services in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of effective search strategies and efficient use of both print and digital resources, design and promote information literacy instruction that is developmentally appropriate, and understand the legal and ethical responsibilities integral to positive and proactive reference services for patrons and diverse learners.

TED 8720 INTRODUCTION TO INSTRUCTIONAL COACHING IN PK-12 EDUCATION (3 credits)

This course examines the prominent coaching models used in PK-12 schools (i.e. teacher-centered coaching, student-centered coaching, cognitive coaching, transformational coaching). Candidates completing this course will be able to: develop an understanding of best practices in coaching, create a common lexicon for the role of an instructional coach, engage in the coaching cycle, and create a personal vision for their work as a coach. Candidates will engage in a field based experience to apply their learning.

Prerequisite(s)/Corequisite(s): Graduate Status

TED 8726 SPECIAL LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the major types of 21st Century special libraries and information agencies. Candidates will demonstrate an understanding of social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the special libraries and information agencies. (Cross-listed with TED 4720).

TED 8740 ORGANIZATION OF INFORMATION (3 credits)

This course addresses current theory and best practice in descriptive and subject cataloging and classification of information resources that align with school library standards and guidelines. Candidates will demonstrate the ability to integrate the legal and ethical standards of their discipline in ensuring access to information and ideas for a diverse array of learners in schools and communities.

TED 8746 ORGANIZATION OF INFORMATION (3 credits)

Candidates will demonstrate a basic understanding of the theories, concepts and activities of descriptive and subject cataloging and classification procedures of information resources in 21st Century libraries and information agencies.

TED 8760 MANAGING COLLECTIONS IN LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the theories, concepts and activities integral to proactive collection management in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of community analysis, collection analysis, and the ability to conduct critical evaluations of a diverse array of information resources.

TED 8770 INTEGRATING TECHNOLOGY INTO INSTRUCTIONAL DESIGN (3 credits)

The purpose of this course is to introduce participants to effective methods for the integration of educational media into instructional design and provides participants (1) knowledge of broad instructional design theories and models with a concentration on constructivism, (2) experience in designing instruction that effectively integrates technology into the teaching-learning process, and (3) experience in producing instructional media. The course is intended to provide fundamentals in the selection, evaluation, production, application and utilization of educational media. This course is designed for in-service library media or instructional technology specialists as well as regular classroom teachers.

Prerequisite(s)/Corequisite(s): Graduate status

TED 8800 MULTICULTURAL LITERATURE FOR CHILDREN AND YOUTH (3 credits)

This is designed as a graduate-level course dealing with utilization of literary materials representing authors and content from multiple perspectives, particularly authors whose cultural and ethnic backgrounds differ from the mainstream.

TED 8810 STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH (3 credits)

This course will explore theoretical and foundational pedagogical strategies in early childhood education used to deliver integrative STEM education in the preK-12 setting. In order to understand the research and practice of STEM disciplines in preK-12, it is necessary to examine the social, cultural, political, and functional aspects that influence them. Candidates will investigate the nature of STEM education, Early Childhood Education (ECE) pedagogy and perspectives of learning, content knowledge and dispositions for educators of STEM topics, and issues of access and equity for STEM education through literature, discussion, and practice. This course includes a community outreach component in which candidates will use qualitative methods to observe class topics in public settings. (Cross-listed with STEM 8810)

Prerequisite(s)/Corequisite(s): Graduate status

TED 8816 PRINCIPLES AND PHILOSOPHY OF INTEGRATING CAREER AND ACADEMIC EDUCATION (3 credits)

This course presents the philosophies and principles/practices underlying how schools can better prepare students for the workplaces of the future with emphasis on the integration of career education within broader academic preparation. The roles and responsibilities of teachers, counselors, and administrators in implementing integrated approaches will be examined. (Cross-listed with TED 4810).

TED 8820 CAPSTONE IN STEM EDUCATION (3 credits)

This course will prepare graduate students for the integration, articulation, and differentiation of curriculum and instruction in and between the STEM core areas of Science, Technology, Engineering, and Mathematics. Special emphasis will be on using the STEM core content to help provide applications and context to existing science and mathematics curriculum and instruction and on providing leadership in developing curriculum for mathematics and science dependent courses in engineering and technology. **Prerequisite(s)/Corequisite(s):** The student must be enrolled in one of the following concentrations: STEM, mathematics, science, technology; and be enrolled in the last six hours of their program of study. Not open to non-degree graduate students.

TED 8830 LEADERSHIP AND MANAGEMENT IN SCHOOL LIBRARIES (3 credits)

The course explores best practice for effective leadership and management of 21st Century school libraries. Candidates will gain a comprehensive knowledge of the theories, policies and processes involved in directing a school library in support of the personal and academic success of P-12 students. Candidates will explore and employ ethical codes of conduct in their profession to ensure school libraries meet the needs of their diverse array of patrons.

TED 8840 ENGINEERING EDUCATION EXTERNSHIP (3 credits)

This graduate course will address the best practice of effective teaching and learning in Engineering Education through professional collaboration between K-12 STEM (Science, Technology, Engineering, and Mathematics) teachers and practicing engineering professionals. K-12 STEM teachers, as graduate students in the course, will learn about and address real-world applications and career opportunities in STEM education through the externship. K-12 STEM teachers will research and develop authentic, experiential learning opportunities and projects for the classroom through course supports associated with lecture, discussion, and partnerships with practicing engineering professionals. The externship will be integral to the K-12 STEM teachers' experiences and work in this course, as the course models effective professional collaboration founded on experience, knowledge, and skills to achieve a curriculum enhancement goal. (Cross-listed with STEM 8840).

Prerequisite(s)/Corequisite(s): Graduate status. Not open to non-degree graduate students.

TED 8850 PROFESSIONAL COLLABORATION (3 credits)

This course is designed to prepare candidates to work in collaboration with other professionals and parents to create a learning environment that enhances the potential for academic success and improvement of instructional practices. The focus will be on collaborative problem solving. (Cross-listed with SPED 8980).

Prerequisite(s)/Corequisite(s): Admission to Graduate College.

TED 8856 COORDINATION TECHNIQUES IN WORK-BASED LEARNING (3 credits)

This course reviews responsibilities and techniques of coordination for the work-based learning teacher-coordinator and/or work-based learning coordinator, with special emphasis on administration of the part-time cooperative program and analysis of the laws and regulations governing this program. (Cross-listed with TED 4850).

TED 8860 INVENTION & INNOVATION IN ENGINEERING EDUCATION (3 credits)

This course will address emerging trends in STEM education for in-service K-12 STEM teachers with a focus on the use of engineering education practices in teaching and learning content. STEM teachers will receive applicable, hands-on, classroom-ready experiences through lecture, professional instruction, and projects that will emphasize product design and creation through the Engineering Design Process. The Engineering Design Process will be central to the candidates' experiences in this course and will be used by the candidates to develop curriculum utilizing emerging trends to supplement current course content and standards. Interdisciplinary planning will be central to the course. (Cross-listed with STEM 8860).

Prerequisite(s)/Corequisite(s): Graduate status is required.

TED 8880 LEADERSHIP IN EARLY CHILDHOOD EDUCATION (3 credits)

This course seeks to prepare candidates with leadership skills in the early childhood field that will empower them to initiate and implement changes in programs serving young children and families. Candidates will explore and apply frameworks of leadership and analyze policy, governance, and power structures that can impact change. Candidates will also learn effective advocacy skills to positively influence policies and practices in program and governance structures. Lastly, candidates will examine approaches for developing new leaders in early childhood education through reflective supervision and mentorship.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 8900 SECONDARY EDUCATION GRADUATE CAPSTONE (3 credits)

The Secondary Education Graduate Capstone course provides candidates with an opportunity to apply the knowledge, skills, and dispositions acquired during their program to content specific synthesis activities in their respective disciplines. Candidates will demonstrate their ability to integrate information from program coursework in the design, development and presentation of a final capstone project related to teaching and learning in 21st Century educational environments.

Prerequisite(s)/Corequisite(s): 30 credit hours towards degree completion; Permission required by Program Advisor. Not open to non-degree graduate students.

TED 8970 INDEPENDENT STUDY (1-3 credits)

This is a specially designed course taken under the supervision of a graduate faculty member to accommodate the student who has identified a focus of study not currently available in the departmental offerings and who has demonstrated capability for working independently.

Prerequisite(s)/Corequisite(s): Permission of Department and Graduate Faculty member.

TED 8980 PRACTICUM: VARIOUS CONTENT AREAS (1-6 credits)

This course is designed to provide school professionals with a guided, supervised, field experience that will develop and enhance the knowledge, skills, and dispositions requisite of a successful educational practitioner. **Prerequisite(s)/Corequisite(s):** Prerequisites for the course will vary, depending on the content/discipline area. See syllabus for specific discipline area.

TED 8990 THESIS (1-6 credits)

This course is an independent research project completed under the direction of a thesis advisor and required of all candidates pursuing a Master of Science with Thesis option.

Prerequisite(s)/Corequisite(s): Completion of Selective Retention and approval of advisor. Not open to non-degree graduate students.

TED 9100 THEORIES, MODELS, AND PRACTICES OF LITERACY (3 credits)

This course develops a framework about the theories, models, practices, processes, and related research associated with literacy. The content looks across grade levels and student populations, and across social and cultural contexts in an examination of factors that impact theories and processes of literacy.

Prerequisite(s)/Corequisite(s): Graduate status.

TED 9110 PRINCIPLES AND PRACTICES FOR TEACHING READERS (3 credits)

This graduate course for both elementary and secondary teachers is open to any candidate who has graduate standing in education. The purpose of the course is to develop a broad understanding of the reading process as well as materials and instructional strategies that support students who are emerging, developing, and maturing as readers in all areas of the curriculum.

TED 9130 ASSESSMENTS AND INTERVENTIONS - ELEMENTARY (3 credits)

This course is designed for graduate candidates enrolled in the Literacy Masters or Reading Specialist endorsement program. The purpose of this course is to develop an understanding of theory and research as it relates to assessment and evaluation and instructional approaches that support reading development. This knowledge is applied through a practicum experience with elementary students in which candidates integrate knowledge and practices related to assessment and evaluation of readers' strengths and needs.

TED 9140 ASSESSMENT AND INTERVENTION - SECONDARY (3 credits)

This course is designed for graduate candidates in literacy endorsement and Master's programs. The purpose of this course is to develop an understanding of theory and research as it relates to assessment and evaluation and instructional approaches as they relate to reading difficulties among middle and high school students. Included in this course is knowledge about the role and responsibility of a literacy leader as it relates to coaching, mentoring, supervision, and evaluation of a reading program. Application of this information is demonstrated through a practicum experience with middle and high school students.

Prerequisite(s)/Corequisite(s): TED 9100; TED 9110 concurrent with, or prior to TED 9140.

TED 9180 LITERACY RESEARCH SEMINAR (3 credits)

This course will develop advanced degree candidates' understanding and ability to critically examine current literacy research through work with (1) scientific methods of quantitative and qualitative research (2) discussion of historical trends in literacy research, (3) designs, methods, and tools of research, and (4) reviewing and critically examining current research studies in literacy. These examinations will be conducted from the perspectives of knowledge about literacy processes, classroom practice, and influence of previous research results. Teacher candidates will apply these issues in an action research project they design.

TED 9190 LITERACY GRADUATE CAPSTONE (3 credits)

This course is designed to help Literacy Masters students synthesize the knowledge gained from the program in order to serve as literacy leaders within the complex organizations of classrooms, schools, and school districts. In this course students will integrate their learning across the program in order to organize their future activities in teaching, leadership, advocacy, and engagement opportunities in ways that honor the interrelationships among classroom, school, sociocultural and economic contexts. They will prepare to engage with all literacy education stakeholders in cutting edge, innovative ways that advance both the learning of PK-12 students and the literacy education field.

Prerequisite(s)/Corequisite(s): This course is designed as a capstone event. Accordingly, students must have no more than 6 additional remaining credit hours of coursework. Permit to enroll required.

TED 9200 CRITICAL PEDAGOGY: TEACHING FOR SOCIAL JUSTICE (3 credits)

This course examines ways in which ideology, power, and culture intersect in P-12 educational settings. Undemocratic, inequitable, and oppressive structures are identified. Possibilities for democratic, equitable transformations are proposed.

Prerequisite(s)/Corequisite(s): Graduate status

Theatre (THEA)

THEA 8015 ADVANCED PROJECTS IN THEATRE: INDEPENDENT STUDY (1-3 credits)

Special projects in theatre supplementing regular courses; individual research projects; combined study and practicum. (Cross-listed with THEA 3010).

Prerequisite(s)/Corequisite(s): THEA 1000 Theatre Practicum, THEA 1700 Script Analysis

THEA 8026 ADVANCED PROJECTS IN THEATRE (1-3 credits)

Special projects in theatre supplementing regular courses; individual research projects; combined study and practicum. (Cross-listed with THEA 4020)

Prerequisite(s)/Corequisite(s): 9 hours of theatre in the general area to be studied and permission of the instructor.

THEA 8130 GLOBAL CITIZENSHIP IN THE ARTS (3 credits)

This course is about artistic excellence married to ethical practices and responsible world citizenship. Students will analyze and evaluate how to use art to address community issues and discover a road map that allows for authentic, consistent and sustainable commitment to the community and its needs.

THEA 8316 ADVANCED ACTING: POST REALISM (3 credits)

Advanced work in the technical skills of voice, speech, movement and textual analysis needed for post-realist material. (Cross-listed with THEA 4310)

Prerequisite(s)/Corequisite(s): THEA 1700, THEA 2300, THEA 1300, THEA 3300 or graduate with an undergraduate major or minor in theatre or permission of instructor.

THEA 8326 ADVANCED ACTING: GREEKS TO RESTORATION (3 credits)

The fundamental theories and practices of major styles of acting from ancient Greece to the Restoration, including interpretation of outstanding dramatic literature. (Cross-listed with THEA 4320)

Prerequisite(s)/Corequisite(s): THEA 1700, THEA 2300, THEA 1300, THEA 3300 or graduate with an undergraduate major or minor in theatre or permission of instructor.

THEA 8336 ADVANCED ACTING: ENSEMBLE PLAY PRODUCTION (3 credits)

In-depth exploration of a play or playwright's work to connect acting class with performance. Special emphasis on creating a working process that allows the ensemble to emerge. The class will culminate in public performance. (Cross-listed with THEA 4330)

Prerequisite(s)/Corequisite(s): THEA 1700, THEA 2300, THEA 1300, THEA 3300 or graduate with an undergraduate major or minor in theatre or permission of instructor.

THEA 8346 ADVANCED ACTING: AUDITIONING (3 credits)

An acting class designed to develop auditioning skills and material as well as cultivate a working knowledge of the business of acting. (Cross-listed with THEA 4340)

Prerequisite(s)/Corequisite(s): THEA 2310 or THEA 1300 and THEA 2320 or THEA 3300 and Junior standing. Graduate with an undergraduate major or minor in theatre or permission of the instructor.

THEA 8435 DIRECTING I (3 credits)

Directing I examines the development of the role of director in Western Theatre; provides practice in the directing process including script analysis, dramaturgical research, staging visual composition, collaboration with designers and performers; considers alternative approaches to directing and encourages students to begin to develop a personal directing style. (Cross-listed with THEA 3400)

Prerequisite(s)/Corequisite(s): Graduate standing with an undergraduate major or minor in theatre or permission of the instructor.

THEA 8446 DIRECTING II (3 credits)

A practicum in play selection, analysis, casting, rehearsing and performing. (Cross-listed with THEA 4400).

Prerequisite(s)/Corequisite(s): Graduate standing with an undergraduate major or minor in theatre or permission of the instructor.

THEA 8506 CHALLENGES IN PRODUCTION DESIGN (3 credits)

Evaluation and exploration of the world of theatrical storytelling using line, texture, contrast, theme, metaphor and symbolism. Students will work collaboratively as they foster their individual artistic talents, and recognize the impact of design on society through storytelling. (Cross-listed with THEA 4500).

Prerequisite(s)/Corequisite(s): THEA 1500/THEA 1510 and THEA 1700 or Graduate Standing with previous undergraduate experience or permission of instructor.

THEA 8516 CHALLENGES IN PRODUCTION DESIGN (3 credits)

Evaluation and exploration of the world of theatrical story telling using line, texture, contrast, theme, metaphor and symbolism. Students will work collaboratively as they foster their individual artistic talents, and recognize the impact of design on society through story telling. (Cross-listed with THEA 4510)

Prerequisite(s)/Corequisite(s): Graduate Standing or by permission of Instructor

THEA 8556 PERIOD STYLES IN DRESS AND DECOR (3 credits)

An historical survey course introducing students to the major periods and iconic styles and trends in western architecture, dress and interior decor of the past 2000 years; and to the social, cultural and technological influences on those trends, particularly as they relate to theatrical and production design. (Cross-listed with THEA 4550).

Prerequisite(s)/Corequisite(s): THEA 1700 and THEA 3700/THEA 3770, THEA 3710/THEA 3760, THEA 4710 or THEA 4720 or by permission of instructor.

THEA 8615 COLLABORATIVE DESIGN STUDIES (3 credits)

Collaborative Design Studies explores the integration and process of theatrical production including scenery, lighting, costume, projection and sound. It chronicles their individual and collective impact on storytelling. While developing the skills of the Scenographer, students will work collaboratively as they foster their individual artistic design talents, and recognize the impact of design on society through storytelling. (Cross-listed with THEA 3500).

Prerequisite(s)/Corequisite(s): Graduate Standing or Permission of Instructor

THEA 8616 SCENE DESIGN (3 credits)

Principles of composition, perspective and color for the stage; the designer's approach to the play, production of ground plans, elevations, sketches and models. (Cross-listed with THEA 4610)

Prerequisite(s)/Corequisite(s): Graduate with an undergraduate major or minor in theatre or permission of the instructor.

THEA 8665 STAGE AND TV LIGHTING (3 credits)

Characteristics and control of light and color and their application to the theatre and television; elementary electricity; lens systems; reflectors; lamps; control systems; automation. (Cross-listed with THEA 3660).

Prerequisite(s)/Corequisite(s): Graduate status or permission of instructor.

THEA 8755 THEATRE AND SOCIAL JUSTICE (3 credits)

This service-learning course will combine both research and practice in theatre that involves social change. Students will study the history of such theatre, with special focus on developments in the 20th century. All research will be accompanied by several community-based projects whereby students will create theatre with specific populations (schools, community centers, health centers, senior homes, etc.). (Cross-listed with THEA 3720).

Prerequisite(s)/Corequisite(s): Graduate in theatre. Graduate outside theatre with sufficient background in theatre and sociology political science requires permission of the instructor.

Urban Studies (UBNS)

UBNS 8000 SEMINAR IN URBAN STUDIES (3 credits)

This course provides an interdisciplinary overview of the forces influencing and influenced by urbanization and urbanism. (Cross-listed with GEOG 8830)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

UBNS 8020 RACE, ETHNICITY, AND AMERICAN URBAN CULTURE (3 credits)

This course explores two central themes, race and ethnicity, which have played a dominant role in the shaping of American society and American culture. (Cross-listed with BLST 8020).

Prerequisite(s)/Corequisite(s): BLST 1000, BLST 1100, or permission by the instructor.

UBNS 8060 INTRODUCTION TO URBAN PLANNING (3 credits)

This course is an introduction to the development of urban planning as it has shaped and reacted to major trends in U.S. history. It provides students with major themes and traditions in the field of planning and includes planning practice, planning procedures and methods and contemporary issues in the field.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

UBNS 8200 COMMUNITY ORGANIZING AND DEVELOPMENT (3 credits)

This course focuses on various theories and applications of organizing communities and neighborhoods to effect change. Of particular interest is the role of engaging citizens in improving their communities.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

UBNS 8500 URBAN POLICY (3 credits)

Seminar on urban policies and policymaking. Attention is given to various current urban issues and the policy options surrounding them. Policy theories, policy processes, and the institutions of policymaking in cities are covered. Topics of focus include policies related to policing, economic development, land use, transportation, education, poverty, housing, and ordinances.

Prerequisite(s)/Corequisite(s): Graduate student standing, but open to non-degree seeking students with Bachelor's degree; open to certificate students

UBNS 8820 COMPARATIVE URBAN STUDIES (3 credits)

Emphasis is upon contrasting the cities of the developed and developing areas of the world

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

UBNS 8940 DIRECTED RESEARCH IN URBAN STUDIES (3 credits)

The course is intended for advanced graduate students in urban studies or geography. It is especially suited for those in-career students who have had their internships waived and who might profit more by in-depth research on a problem of urban studies rather than additional classroom courses. (Cross-listed with GEOG 8840).

Prerequisite(s)/Corequisite(s): Completed 9 graduate hours in Urban Studies. Permission from the School. For Geography students, GEOG 8126 (Urban Geography) or permission from the School.

Women's and Gender Studies (WGST)

WGST 8066 HISTORY OF WOMEN IN AMERICA FROM 1875 - 1992 (3 credits)

This course examines the history of women in the United States from 1875 to 1992. Topics include law, work, sexuality and reproduction, immigration, civil rights, political participation and party politics, and changes to the American gender system, including family structure and employment. (Cross-listed with HIST 4060, WGST 4060, and HIST 8066).

Prerequisite(s)/Corequisite(s): Graduate standing

WGST 8105 LGBT POLITICS (3 credits)

This course introduces students to the political struggle for Lesbian, Gay, Bisexual, and Transgender (LGBT) equal rights in the United States using a model of political empowerment, which may be applied for all minority or identity groups and social movements, generating operationalized measures of progress toward the loci of political power. (Cross-listed with PSCI 3100, PSCI 8105, WGST 3100)

WGST 8135 WOMEN AND POLITICS (3 credits)

This course introduces students to women's political participation, including holding elective office, socialization, the feminist movement and its opposition, and public policies with particular impact on women. The focus is on contemporary perspectives on women in American political ideas and behavior. (Cross-listed with PSCI 3130, PSCI 8135, WGST 3130)

WGST 8156 GEOGRAPHY, GENDER AND ENTREPRENEURSHIP (3 credits)

An advanced seminar focused on links among geography, gender and work, emphasizing leadership and entrepreneurship. The course considers theory and method in addition to empirical work. The nature of space, of gender, and of work, are examined. Topics include the gendering of work, the geography of entrepreneurship, gender and leadership. (Cross-listed with WGST 4150, ENTR 4150, ENTR 8156, GEOG 4150 and GEOG 8156).

Prerequisite(s)/Corequisite(s): Junior, senior, or graduate standing, or permission of instructor.

WGST 8235 GENDER AND GLOBAL POLITICS (3 credits)

This seminar introduces students to gender politics in comparative and international politics. (Cross-listed with PSCI 3230, PSCI 8235, WGST 3230)

Writer's Workshop (WRWS)

WRWS 8000 FORM AND THEORY (3 credits)

This course is an advanced study of historical and contemporary theories, forms, and techniques in one or more literary genres, which may include poetry, fiction, nonfiction, drama, and screenwriting. Specific topics of study may change from term to term, and students may repeat the course under a new topic. Consult current class schedule.

WRWS 8106 FICTION STUDIO (4 credits)

An advanced course in fiction writing. Emphasis on refining the techniques of developing short fiction or the novel.

Prerequisite(s)/Corequisite(s): WRWS 3100 or permission of instructor.

WRWS 8116 ADVANCED FICTION STUDIO II (4 credits)

An advanced course in fiction in which students write and edit the most fully-developed short stories and/or novel sections of their college career, as well as read, analyze, and discuss assigned texts. Students examine the techniques of fiction writing, use the vocabulary and perspective they have gained so far to discuss their and others' work. They draw upon aspects of the self, the senses, imagination and memory to produce texts unique to their own voice and experience. (Cross-listed with WRWS 4100, WRWS 4110)

Prerequisite(s)/Corequisite(s): WRWS 3100 or permission of instructor. Not open to non-degree graduate students.

WRWS 8206 ADVANCED POETRY STUDIO I (4 credits)

An advanced course in poetry writing. Emphasis on refining poetic technique. (Cross-listed with WRWS 4200)

Prerequisite(s)/Corequisite(s): WRWS 3200 or WRWS 4210 or permission of instructor. Not open to non-degree graduate students.

WRWS 8216 POETRY STUDIO (4 credits)

A graduate workshop in poetry writing with emphasis on such elements of craft as rhythm, imagery, lineation, diction, and metaphor. The course presumes the student is familiar with principles and practice of Twentieth Century poetry in English.

Prerequisite(s)/Corequisite(s): Graduate standing and permission of instructor based on writing sample.

WRWS 8606 ADVANCED SCREENWRITING STUDIO I (4 credits)

This class will focus on the craft of screenwriting: plot, format, substance, style, scene development, film structure (both independent and main stream), three dimensional characters, and precise, professional dialogue. The student will complete a feature-length screenplay over course of the semester. There will be lectures and assigned reading. Once a month the student will view the current independent offering at Film Streams. This class will guide the student in completing a work portfolio, querying agents, applying to internships, and preparing for a career in film and television. (Cross-listed with WRWS 4600).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.
