Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 4040 or ACCT 8046 with a "C" (2.0) or better. Not open to non-degree students.

ACCT 8280 SEMINAR IN ACCOUNTING INFORMATION SYSTEMS (3 credits)

This course examines current topics in Accounting Information Systems (AIS), how AIS contributes to business effectiveness and ineffectiveness, and the interaction between AIS and human decision-makers.

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of instructor. Successful completion of BSAD 8110, ACCT 2020, or equivalent. Not open to non-degree graduate students.

ACCT 8290 ADVANCED FINANCIAL AUDITING (3 credits)

This course will provide students with an intense study of financial auditing in accordance with generally accepted auditing standards.

Prerequisite(s)/Corequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 4080 with a grade of "C" (2.0) or better.

ACCT 8900 INDEPENDENT RESEARCH (1-3 credits)

This is an independent research course in which the student completes a focused project, typically individual research, under faculty supervision to supplement graduate study in a specific area within the Accounting discipline.

Prerequisite(s)/Corequisite(s): Completed contract and permission needed from director of MACC program. Not open to non-degree graduate students.

ACCT 8910 SPECIAL TOPICS IN ACCOUNTING (3 credits)

A variable content course with accounting topics based on student and faculty interest. May be repeated to a maximum of six (6) hours.

Prerequisite(s)/Corequisite(s): Admission to MAcc program and permission of instructor. Not open to non-degree graduate students.

Accounting Concentration

To earn an accounting concentration, a student must

- complete a total of 24 credit hours, including 21 credit hours in required accounting courses and 3 credit hours in concentration electives,
- earn a minimum GPA of 2.50 overall, and
- earn a minimum GPA of 2.50 in all upper-division accounting courses successfully completed at UNO (excluding ACCT 3000, ACCT 4500, and ACCT 4510).

Code	Title	Credits
Accounting Concentration Required Courses		
ACCT 3020	BASIC FEDERAL INCOME TAXATION	3
ACCT 3030	INTERMEDIATE FINANCIAL ACCOUNTING I	3

ACCT 3040	INTERMEDIATE FINANCIAL ACCOUNTING II	3
ACCT 3050	INTERMEDIATE MANAGERIAL ACCOUNTING	3
ACCT 3080	ACCOUNTING INFORMATION SYSTEMS	3
ACCT 4020	ANALYTICS FOR ACCOUNTING	3
ACCT 4080	PRINCIPLES OF AUDITING	3

Accounting Concentration Elective Courses

Select one of the following: 3

ACCT 4010	ADVANCED FINANCIAL ACCOUNTING	
ACCT 4040	ADVANCED FEDERAL INCOME TAXATION	
ACCT 4060	ADVANCED MANAGERIAL ACCOUNTING	
ACCT 4070	GOVERNMENTAL/NONPROFIT ACCOUNTING AND AUDITING	

Total Credits 24**Secondary Concentration in Accounting Required Courses**

A secondary concentration in accounting, as a supplement to another BSBA concentration, may be obtained by completing ACCT 3020, ACCT 3030, ACCT 3040, and ACCT 3050 and earning a minimum GPA of 2.50 in all upper-division accounting courses successfully completed at UNO (excluding ACCT 3000, ACCT 4500, and ACCT 4510). Students must meet all prerequisites to enroll in any accounting course. Students wishing to substitute another upper-division accounting course for one of the four listed above must receive permission to do so from the school director.

Code	Title	Credits
ACCT 3020	BASIC FEDERAL INCOME TAXATION	3
ACCT 3030	INTERMEDIATE FINANCIAL ACCOUNTING I	3
ACCT 3040	INTERMEDIATE FINANCIAL ACCOUNTING II	3
ACCT 3050	INTERMEDIATE MANAGERIAL ACCOUNTING	3

Total Credits 12**Special Requirements****Course-related items:**

1. Students interested in taking the CPA Exam in Nebraska must complete ACCT 4070.
2. Students pursuing an accounting concentration who complete ACCT 3080 with a grade of C or better are not required to take the business core course MGMT 3100.

Concentration-related items:

- A student may enroll only twice in any upper-division accounting course. You are enrolled in a course if your name appears on the final class list published immediately after drop/add week. Therefore, you may drop a course only one time (excluding drops during drop/add week). If you drop the same course twice (or receive any grade below a C twice), you will not be permitted to enroll in this course a third time.
- A minimum GPA of 2.50 overall is required for enrollment in any upper-division (3000-level or 4000-level) accounting course.
- Accounting courses at the 4000-level also require a minimum GPA of 2.50 in all upper-division accounting courses successfully completed at UNO to date (excluding ACCT 3000, ACCT 4500, and ACCT 4510).
- Students who wish to contract to take upper-division accounting courses as "honors" courses should contact the course instructor.

Contact: UNO School of Accounting at 402.554.3650 or unocbaaccounting@unomaha.edu

¹ Requires placement from UNO's English Placement and Proficiency Exam.

² Requires placement from ACT/SAT scores, UNO's Math Placement Exam, or an approved prerequisite course within the last two years. Students might be required to take a lower level math course before MATH 1370 depending on their placement scores.

³ For this requirement students must choose from the following list: MKT 3100, CMST 2120, CMST 3100, CMST 3120, CMST 3130, CMST 3140, CMST 3150, or CMST 3160

⁴ A minimum Upper Division Accounting GPA of 2.50 is required for enrollment in any upper-division (4000-level) accounting course.

⁵ A minimum Upper Division Accounting GPA of 2.50 is required for enrollment in any upper-division (4000-level) accounting course. (See DegreeWorks for approved elective options)

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

General Education courses (Humanities, Social Science & Natural Science) must be from at least two different disciplines <https://www.unomaha.edu/general-education/overview/index.php>.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

Courses within the College of Business require students to obtain a minimum NU GPA of 2.5 or better.

Graduation Requirements:

Students must earn a minimum of 120 credit hours for a BSBA.

42 of those credit hours must be in upper division courses.

Students must earn a C (2.00) or above in all fundamental academic skills, pre-business, upper division business core, and business concentration courses.

CBA students must earn a minimum NU GPA of 2.50 and a minimum Business GPA of 2.50. If students are earning an accounting concentration or secondary concentration, a minimum upper division accounting GPA of 2.50 is additionally required.

Economics

Economics is concerned with how resources are allocated in production, prices are determined, incomes are distributed and growth occurs.

Economists examine such issues as how fiscal and monetary policies affect price and employment, the effect on international trade, of international trade agreements and the international price of the dollar, the size and future composition of the labor force, the effects of government regulations on the price, quantity and quality of goods and services, and costs and benefits of environmental policies.

Economists are employed by private businesses, utilities, railroads, government at all levels, educational institutions, labor unions, trade associations and non-profit organizations. In businesses, economists' duties include analyzing and forecasting industry and market conditions, and making recommendations and decisions relative to capital investments, marketing new products, employee compensation, and the impact of government regulation.

In addition, economics is superb preparation for graduate work in areas such as business law, political science, international relations, gerontology, and public administration. Economics also is an excellent dual **major** or **minor** for other areas of study.

Economics Club

The main purpose of the UNO Economics Club is to increase awareness and knowledge of economic issues among Economics Club members and the overall UNO community. The organization also provides a venue for student-members to examine issues related to academic success, career success, and related matters. The organization shall work towards increasing the membership's engagement with the Omaha community.

Membership eligibility includes all currently enrolled students in good standing who pay University Program and Facilities Fees (UPFF) at UNO. Any individual from the community is eligible for membership without voting privileges and the ability to run for office.

Any person who satisfies the eligibility requirements may become a member of the organization by completing an Economics Club Membership Form. The membership form is available at MH 332C or may be downloaded here (<https://www.unomaha.edu/college-of-business-administration/>). Contact phone number: 402.554.2803

Economics Fast Track Program

The Department of Economics has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- The program is available for undergraduate students pursuing the BS in Business Administration (with a concentration in Economics), BS in Economics, or BA in Economics, desiring to pursue a MS in Economics.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.5.

- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Students in the Fast Track program must only enroll in dual-level ECON courses (ECON 8xx6) as their graduate coursework prior to admittance to the graduate program.

Degrees Offered

Bachelor of Science in Business Administration (<https://catalog.unomaha.edu/undergraduate/college-business-administration/bs-business-administration/>)

Concentrations Offered

- Business Analytics Concentration (p. 384)
- Economics Concentration (p. 379)

Secondary Concentrations Offered

- Secondary Concentration in Economics (p. 379)
- Secondary Concentration in Business Analytics (p. 384)

Economics

- Actuary
- Business Journalist
- Consultant
- Data and Analytics Specialist
- Economic Analyst
- Economic Researcher
- Economic Strategist
- Financial Advisor
- Financial Analyst
- Market Analyst
- Policy Analyst
- Statistician
- Supply Chain Analyst

ECON 1200 AN INTRODUCTION TO THE U.S. ECONOMY (3 credits)

An introduction to U.S. economy and an investigation of U.S. and international economic problems and policies.

Prerequisite(s)/Corequisite(s): Not available to students who have completed either ECON 2200 or 2220.

Distribution: Social Science General Education course

ECON 2200 PRINCIPLES OF ECONOMICS (MICRO) (3 credits)

An introduction to economic principles, decision making and policies affecting product and resource markets. Particular emphasis is on price, output and input decisions by individuals and firms under various market conditions. An introduction to the fundamentals of international trade.

Prerequisite(s)/Corequisite(s): ENGL 1150 and MATH 1310 or MATH 1220 with 'C-' (1.67) or better, or permission of CBA advisor

Distribution: Social Science General Education course

ECON 2220 PRINCIPLES OF ECONOMICS (MACRO) (3 credits)

An introduction to economic principles, decision making and policies on national income and output, employment, growth, money, the price level and the international economy.

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220 and ENGL 1150 with a C-minus (1.67) or better, or permission of CBA advisor

Distribution: Social Science General Education course

ECON 2400 PRINCIPLES OF ECONOMICS FOR EDUCATORS (3 credits)

This course teaches principles of microeconomics and macroeconomics to K-12 educators. After taking this course students will be able to use the economic way of thinking to study current economic issues. Students will be introduced to macroeconomic principles, decision-making and policies on national income and output, employment, growth, money, price level, and fundamentals of international issues. Students will study microeconomic issues including product and resource markets, and prices output and input decisions under various market conditions. Economic concepts will be aligned to K-12 state social studies standards. This course cannot be substituted for ECON 2200 and/or ECON 2220.

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ENGL 1150. Not open to non-degree graduate students.

ECON 3130 ECONOMIC GEOGRAPHY (3 credits)

A comprehensive study of production, consumption and exchange in primary, secondary and tertiary economic activities as related to spatial factors. (Cross-listed with GEOG 3130).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better. or Majoring in Geography

ECON 3190 SPORTS ECONOMICS (3 credits)

Economics is frequently considered an abstract topic, with interesting results that are not easily applied in the real world. Through Sports Economics, however, students will explore the very real ways in which economics influences sporting competitions and the businesses surrounding them. Students will explore topics such as unionization in sports, discrimination, amateurism, monopoly power, game theory, and more in the context of sports, giving the student a deeper understanding of how these topics apply to real-world problems. After this course, students will understand how readily economics can be applied to businesses and problems in any industry or domain.

Prerequisite(s)/Corequisite(s): ECON 2200 OR ECON 1200 OR ECON 2400 OR Instructor Approval. Not open to non-degree graduate students.

ECON 3200 ECONOMIC THEORY: MICRO (3 credits)

Analysis of individual, firm and industry behavior in product and factor markets. Provides a theoretical foundation for managerial and public policy decision-making.

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220 and ECON 2200, each with a "C" (2.0) or better.

ECON 3220 ECONOMIC THEORY: MACRO (3 credits)

This course is designed to follow introductory economics, to examine the determination of output, employment, the price level, inflation, interest rates, and the exchange rate in the economy. Piece-by-piece, theoretical models will be constructed describing how each of these and other variables are determined in both, the long-run and in the short-run. We will analyze how changes in a particular event affect different markets in the economy, and in turn, how one market interacts with another within a general equilibrium framework. A large part of the course will be devoted to business cycle theory, macroeconomic policy issues, and open economy macroeconomics. The world economies are very much integrated, and thus, a full understanding of macroeconomics requires knowledge of international aspects of macroeconomics. The purpose of this course is to provide the student with an understanding of the connection between macroeconomic theory and related policy issues.

Prerequisite(s)/Corequisite(s): Completion of ECON 2200 with a C or better AND ECON 2220 with a C or better

ECON 3290 ECONOMICS OF PUBLIC ISSUES (3 credits)

Economics is frequently considered an abstract topic, with interesting results that are not easily applied in the real world. Through Economics of Public Issues, however, students will explore the real ways in which economics can be used to understand, explain, and answer tough questions that affect everyone. Students will explore and define capitalism and key economic institutions required for economies to develop and prosper. We will examine markets and market failures that exist today. Classes will focus on the outcomes - intended and unintended - of various policies (local, national, and global). While specific issues are going to be covered in the course the intent is that students will learn the tools and strategy of thinking like an economist to guide them through future issues that will come up in their personal, professional, and civic lives.

Prerequisite(s)/Corequisite(s): (ECON 2200 AND ECON 2220) OR ECON 1200 OR ECON 2400 OR Instructor Approval.

ECON 3300 INTRODUCTION TO ECONOMETRICS (3 credits)

An introduction to empirical research methods in economics. Subjects covered include estimations of the basic linear regression model, hypothesis testing, correlation coefficients, analysis of variance, multicollinearity, dummy variables, specification error, auto-correlation, heteroscedasticity and unconditional forecasting. Empirical illustrations are provided by reference to contemporary economic questions.

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200, ECON 2220, BSAD 2130 or BSAD 3160, each with a "C" (2.0) or better, or permission of instructor.

ECON 3310 SQL, DATABASES, AND DATA CLEANING FOR DATA SCIENTISTS (3 credits)

Analytics requires data. Within an organization, this data is usually housed in databases. In this class, you will extract data from these systems using Structured Query Language (SQL), programmatically combine multiple datasets, and learn advanced programmatic data cleaning techniques, such as regular expression.

Prerequisite(s)/Corequisite(s): ECON 2200 with a "C" or better

ECON 3320 INTRODUCTION TO ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS (3 credits)

This course explores the economic approach to environmental and natural resources. It introduces economic concepts and theory at a level accessible to non-economic majors but still challenging to economic majors. It then applies these to such topics as: air and water pollution, solid and hazardous waste management, renewable and nonrenewable natural resource use, and recycling.

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220 and ECON 2200, each with a "C" (2.0) or better.

ECON 3550 PUBLIC FINANCE (3 credits)

This course explores the objectives and rationale of government activity in a market economy, including positive and normative analysis of public expenditures and taxes. Topics include Social Security, health insurance, education, food stamps, student aid, unemployment insurance, efficiency and incidence of major revenue sources, and tax reform proposals. (Cross-listed with FNBK 3550).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better.

ECON 3600 INTRODUCTION TO INTERNATIONAL ECONOMICS (3 credits)

An introduction to analyses of international trade and the international monetary system. Subjects covered include the economic basis for international specialization and trade, the effect of trade on income distribution, commercial policy, economic integration, the balance of payments, adjustment mechanism, exchange rate determination, external effects of monetary and fiscal policy and foreign investment.

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better.

ECON 4000 SPECIAL TOPICS IN ECONOMICS (1-5 credits)

The course content and topic will vary. Please contact the economics department for specific course offerings.

ECON 4210 INDUSTRIAL ORGANIZATION (3 credits)

In this class we will examine why firms and industries behave the way that they do. We will explore why some industries face intense competition while others enjoy large profits, why some industries offer only bundles, and why some firms buy up their supply chain when others do not. This theoretical course will illuminate un-theoretical implications to your life and future business ventures. This course will use your economic knowledge, a bit of psychology (behavioral economics) and game theory to answer questions like "Why does everyone hate the cable company?" and "Why are CEOs given so many stock options?" (Cross-listed with ECON 8216).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 4300 QUANTITATIVE APPLICATIONS IN ECONOMICS AND BUSINESS (3 credits)

The study and application of modern quantitative techniques to problem-solving in economics and business. It is designed to help the student to translate verbal arguments in economics and business into their mathematical equivalents, to improve analytical skills, and to attain proficiency in marginal analysis, equilibrium analysis, static optimization, and comparative statics analysis. It covers topics such as exponential and logarithmic functions and their applications, linear algebra and its applications, derivatives and their applications, maximization of functions with one variable and multi variables, maximization with non negativity constraints, and integral calculus and its applications in economics and business. (Cross-listed with ECON 8306).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 4320 NATURAL RESOURCE ECONOMICS (3 credits)

This course introduces students to the economics and management of Earth's natural resources. We address questions such as: Are we running out of natural resources? Are we using resources in a sustainable fashion? What role do markets play in resource use? We will address issues related to fossil-based resources, minerals, fisheries, water, land, forests and other associated topics. The course covers the basic theoretical framework for understanding the optimal rate of resource use, identifies the factors that determine the actual rate of use, and considers and evaluates various public policy prescriptions. (Cross-listed with ECON 8326).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 4340 ECONOMICS OF TECHNOLOGY (3 credits)

The seminar discusses whether innovation is more driven by demand or supply forces, the optimal timing of adoption of new technology, whether new technology benefits workers and consumers, and whether government is successful at supporting promising new technology. (Cross-listed with ECON 8346).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220 and ECON 2200, each with a "C" (2.0) or better, or BSAD 8180, or permission of instructor.

ECON 4350 BUSINESS INTELLIGENCE AND REPORTING (3 credits)

The course will teach students to use state-of-the-art Business Intelligence (BI) software to generate reports and information from data. BI software is used to inform decision-making in industries from transportation to medicine, from marketing to government, and is facilitated by rapidly increasing access to data in all industries. Students will learn to employ best practices in visualization and verbal communication as they are trained to create valuable insights from data and convey those insights to stakeholders. Additionally, the course will aid students in preparing for certification in the use of state-of-the-art BI software. (Cross-listed with ECON 8316).

Prerequisite(s)/Corequisite(s): ECON 3310 OR ECON 8320 (or concurrent enrollment) AND BSAD 2130 (or equivalent) OR Instructor Approval

ECON 4450 DOMESTIC MONETARY THEORY AND POLICY (3 credits)

The course will introduce students to topics in money and banking, financial institutions, markets, financial instruments, and monetary theory in order to enhance financial decision making and enable students to effectively analyze economic news in media such as the Wall Street Journal, The New York Times, Business Week, Barrons, The Economist, and other related business publications. This knowledge will enable students to formulate their own views about the current economic environment, government policies, and responses to economic environments. (Cross-listed with ECON 8456).

Prerequisite(s)/Corequisite(s): ECON 3220, or permission of instructor.

ECON 4500 SPECIAL PROBLEMS IN ECONOMICS (2-3 credits)

Individual investigation of specific problems in the field of economics under the supervision of a faculty member.

Prerequisite(s)/Corequisite(s): Senior and permission of department chair.

ECON 4510 ECONOMIC INTERNSHIP (1-3 credits)

Students engage in part time employment in their area of concentration to gain relevant business experience and to practice the skills and concepts learned in the classroom. Supplemental reports and/or reading may be required (maximum 3 credit hours).

Prerequisite(s)/Corequisite(s): Permission of internship coordinator; 'C' (2.0) or better in ECON 2200 and ECON 2220; 2.5 Cumulative GPA; junior or senior standing.

ECON 4570 ECONOMIC CONDITIONS ANALYSIS (3 credits)

This course teaches students how to conduct an economic analysis of, and produce an economic forecast for, a local economy such as a state, county, or metropolitan area. Students will learn where to find data, how to analyze that data, how to develop models with the data, and how to present the data in a clear, concise, and jargon-free manner. The final published report will be authored by the students registered in the course. All students will contribute equally to the final report. The instructor will ensure equal participation. (Cross-listed with ECON 8576).

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220, or permission of the instructor

ECON 4610 INTERNATIONAL TRADE (3 credits)

An analysis of the character of international economic relations. Subjects covered include the economic basis for international specialization and trade, the economic gains from trade, commercial policy, economic integration and economic growth. (Cross-listed with ECON 8616).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 4620 INTERNATIONAL MONETARY ECONOMICS (3 credits)

An analysis of the international monetary system. Subjects covered include the balance of payments adjustment mechanism, alternative exchange rate systems, external effects of monetary and fiscal policy, foreign investments and international monetary reform. (Cross-listed with ECON 8626).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 4660 INTERNATIONAL ECONOMIC DEVELOPMENT (3 credits)

This course introduces theories and application of economic development and growth, economic problems facing developing countries, analyzes domestic economic issues (e.g., per capita GDP, income distribution, population, unemployment, urbanization, education, fiscal policies, and financial policies), and international economic issues (e.g., trade, foreign investment, and foreign debt). Financial crises, debt crises, and economic recovery will be discussed. (Cross-listed with ECON 8666).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 4730 ECONOMICS OF ENTREPRENEURSHIP (3 credits)

This course will review economic theories of entrepreneurship with special emphasis on Schumpeter's theory of creative destruction. The main focus of the seminar will be on the "high-level" entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 8736, BSAD 8736).

Prerequisite(s)/Corequisite(s): ECON 2200 or permission of the instructor for all students

ECON 4850 ECONOMICS OF URBAN AND REGIONAL DEVELOPMENT (3 credits)

This course will consider factors and trends in development at the global and national level but will focus primarily on economic development at the state, local, and regional levels in the United States. The focus of this course will be real world strategic planning for economic development. (Cross-listed with ECON 8856)

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 4990 SENIOR ASSESSMENT (0 credits)

This assessment tool is part of the Department's Student Outcomes effort. It is designed to monitor the Department's performance and to identify changes needed. Graduating seniors must register for and complete this course in the term in which they plan to graduate.

Prerequisite(s)/Corequisite(s): Students must register for ECON 4990 in the term in which they plan to graduate. Not open to non-degree graduate students.

Economics Concentration

For the Economics concentration, students must complete a total of eighteen (18) credit hours of economics courses beyond ECON 2200 and ECON 2220.

Code	Title	Credits
Economics Concentration Required Courses		
ECON 3200	ECONOMIC THEORY: MICRO	3
ECON 3220	ECONOMIC THEORY: MACRO	3
Economics Concentration Electives		
Students must select a minimum of twelve (12) credit hours beyond the two (2) required courses from economics department courses at the 3000 or 4000 level, of which at least six (6) credit hours must be at the 4000 level.		12
Total Credits		18

Secondary Concentration in Economics

A secondary concentration in economics, as a supplement to another BSBA concentration, may be obtained by completing the following:

Code	Title	Credits
ECON 2200	PRINCIPLES OF ECONOMICS (MICRO)	3
ECON 2220	PRINCIPLES OF ECONOMICS (MACRO)	3
Plus nine (9) hours of upper-division (3000/4000 level) courses in economics		9
Total Credits		15

Any course that may be used for an economics concentration may also be used for the secondary concentration in economics, provided that at least one of the courses is ECON 3200 or ECON 3220. A grade of C (2.00) or better is required in each course applied toward the secondary concentration.

- ¹ Requires placement from UNO's English Placement and Proficiency Exam.
- ² Requires placement from ACT/SAT scores, UNO's Math Placement Exam, or an approved prerequisite course within the last two years. Students might be required to take a lower level math course before MATH 1370 depending on their placement scores.
- ³ For this requirement students must choose from the following list: MKT 3100, CMST 2120, CMST 3100, CMST 3120, CMST 3130, CMST 3140, CMST 3150, or CMST 3160
- ⁴ An Economics Concentration Elective must be a 3000 or 4000 level course within the Economics department. (See DegreeWorks for approved options). It is highly encouraged for ECON concentration students to take ECON 3300 as an ECON 3000 level elective (ECON 3300 – offered only Spring semester).
- ⁵ An Economics Concentration Elective must be a 3000 or 4000 level course within the Economics department. (See DegreeWorks for approved options).
- ⁶ An Economics Concentration Elective must be a 3000 or 4000 level course within the Economics department. (See DegreeWorks for approved options)

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

General Education courses (Humanities, Social Science & Natural Science) must be from at least two different disciplines <https://www.unomaha.edu/>

general-education/overview/index.php. (<https://www.unomaha.edu/general-education/overview/index.php.html>)

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

Courses within the College of Business require students to obtain a minimum NU GPA of 2.5 or better.

Graduation Requirements:

Students must earn a minimum of 120 credit hours for a BSBA. 42 of those credit hours must be in upper division courses. Students must earn a C (2.00) or above in all fundamental academic skills, pre-business, upper division business core, and business concentration courses. CBA students must earn a minimum NU GPA of 2.50 and a minimum Business GPA of 2.50. If students are earning an accounting concentration or secondary concentration, a minimum upper division accounting GPA of 2.50 is additionally required.

Finance, Banking and Real Estate

Contact

Chair, Department of Finance, Banking and Real Estate
402.554.2418

Website (<http://www.unomaha.edu/college-of-business-administration/finance-banking-real-estate/>)

Degrees Offered

- Business Administration, Bachelor of Science (<https://catalog.unomaha.edu/undergraduate/college-business-administration/bs-business-administration/>)

Concentrations Offered

- Banking and Financial Markets Concentration (p. 383)
- Business Finance Concentration (p. 386)
- Investment Science and Portfolio Management Concentration (p. 388)
- Legal Studies Concentration (p. 389)
- Real Estate and Land Use Economics Concentration (p. 391)

Secondary Concentrations Offered

- Secondary Concentration in Business Finance (p. 386)
- Secondary Concentration in Legal Studies (p. 389)
- Secondary Concentration in Real Estate and Land Use Economics (p. 391)

Note: A careful structuring of course work will allow students to obtain a triple concentration in Investment Science and Portfolio Management, Business Finance, and Banking and Financial Markets, without extra courses. In addition, students may earn a concentration in Real Estate and Land Use Economics and a corresponding Finance concentration. Students must complete FNBK 3250 with a C+ or above in order to specialize in any Finance and Banking concentration or secondary concentration.

Certificates Offered

- Real Estate and Land Use Economics Program Certificate (<https://catalog.unomaha.edu/undergraduate/college-business-administration/bs-business-administration/real-estate-land-use-economics-certificate/>)

Finance, Banking, and Real Estate

- Appraiser
- Bank Operations Manager
- Commercial Banking Officer
- Commercial or Residential Broker
- Corporate Financial Officer
- Corporate Lawyer
- Financial Advisor
- Insurance Management
- Investment Analyst
- Mortgage Officer
- Portfolio Manager
- Real Estate Agent
- Retail Banking Officer
- Risk Management Specialist
- Stockbroker
- Underwriting Specialist

FNBK 2280 PERSONAL FINANCE (3 credits)

This course focuses strengthening the development of sound financial habits through knowledge and application of concepts and activities that enhance personal and family finance.

FNBK 2710 PRINCIPLES OF INSURANCE (3 credits)

This course is intended to introduce students to the basic concepts of risk and insurance. Special emphasis is placed on the insurance coverage needed by the consumer: life, health, homeowner and auto insurance. (Fall, Spring)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

FNBK 3000 FINANCIAL REPORTING AND ANALYSIS (3 credits)

Seeks to develop students' understanding of the origin and derivation of accounting data, and their skills in employing the data for the purpose of financial analysis, reporting and valuation.

Prerequisite(s)/Corequisite(s): ACCT 2020 with 'C' (2.0) or better.

FNBK 3250 PRINCIPLES OF FINANCIAL MANAGEMENT (3 credits)

As a comprehensive introduction to financial management, the course will cover various fields of finance and discuss topics including the time value of money, bond and stock valuation, capital budgeting.

Prerequisite(s)/Corequisite(s): ACCT 2020, ECON 2200, ECON 2220, MATH 1320 or MATH 1370 or MATH 1930, BSAD 2130 or 3160, ENGL 1160/ENGL 1164 or concurrent enrollment in ENGL 1160/1164 each with "C" or better and 2.5 GPA.

FNBK 3330 ENTREPRENEURIAL FINANCE (3 credits)

This course focuses on venture capital formation and the financing of entrepreneurial ventures. The course is intended for students interested in entrepreneurship, venture capital markets, investment banking, and other careers related to new venture financing and/or deal structuring. The course applies basic financial theory to the unique environment of incubating and growing new ventures. (Cross-listed with ENTR 3330).

Prerequisite(s)/Corequisite(s): FNBK 3250 with 'C' (2.0) or better.

FNBK 3400 INVESTMENT PRINCIPLES AND PRACTICES (3 credits)

A study of the market for investment securities, an introduction to the field of security analysis, and selection and management of a portfolio of securities. (Fall, Spring)

Prerequisite(s)/Corequisite(s): FNBK 3250 with 'C+' (2.33) or better, GPA of 2.5 or better or approval of instructor.

FNBK 3500 FINANCIAL MARKETS (3 credits)

An overview of money and banking, monetary policy, and analysis of the operations of financial markets in a global context, as well as the evolving regulatory framework within which these markets operate.

Prerequisite(s)/Corequisite(s): ECON 2200 and ECON 2220 and FNBK 3250 with 'C' or better, or approval of instructor.

FNBK 3550 PUBLIC FINANCE (3 credits)

This course explores the objectives and rationale of government activity in a market economy, including positive and normative analysis of public expenditures and taxes. Topics include Social Security, health insurance, education, food stamps, student aid, unemployment insurance, efficiency and incidence of major revenue sources, and tax reform proposals. (Cross-listed with ECON 3550).

Prerequisite(s)/Corequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better.

FNBK 3650 COMMERCIAL BANK MANAGEMENT (3 credits)

This course focuses on the theory and practice of managing commercial banks. Topics covered include but are not limited to: Bank regulations, bank performance analysis, asset liability management, credit analysis and consumer loans. This course emphasizes the link between theory and practice through readings, guest lecturers from industry experts, and a comprehensive bank research project on a local bank of your choice. At the end of the course, students should have a good understanding of basic banking theories as well as banking practices, and current issues and challenges facing the banking industry.

Prerequisite(s)/Corequisite(s): FNBK 3250 with 'C+' (2.33) or better, GPA of 2.5 or better or approval of instructor.

FNBK 3700 INTERNATIONAL FINANCIAL MANAGEMENT (3 credits)

This course focuses on the application of basic principles and techniques of international financial management to the decision-making process of the multinational firms. The course covers foreign exchange markets, management of foreign exchange risk, international working capital management, and foreign portfolio and direct investment. Factors bearing on international financing and investment decisions, such as political risk and international taxation issues will be also explored. (Fall, Spring, Summer).

Prerequisite(s)/Corequisite(s): FNBK 3250 with 'C+' (2.3) or better, GPA of 2.5 or better or approval of instructor.

FNBK 4000 SPECIAL TOPICS IN FINANCE AND BANKING (1-5 credits)

The course content and topic will vary. Please contact the CBA for specific course offerings.

FNBK 4150 INTERMEDIATE FINANCIAL MANAGEMENT (3 credits)

Seeks to develop the students' ability to identify, analyze and solve integrative problems in management of business finance, including financial analysis, working capital management, capital budgeting decisions, long term financing, and leasing, through the use of prescribed readings, case studies and computer applications. (Fall, Spring).

Prerequisite(s)/Corequisite(s): FNBK 3250 with 'C+' (2.33) or better, GPA of 2.5 or better, and senior standing. It is highly recommended that a student have an additional 6 hours of finance instruction beyond the introductory course prior to taking this class.

FNBK 4210 SELLING FINANCIAL SERVICES (3 credits)

Selling Financial Services concentrates on methods to effectively sell services and products in the financial services industry, including the banking, brokerage and insurance sectors. Targeting, initiating, and acquiring client relationships, expanding business opportunities, and maintaining long-term client relationships are the course's focal points. This integrative course is designed to provide students with a basic understanding of the selling profession and sales culture within the financial services industry. (Cross-listed with BSAD 8216, MKT 4210).

Prerequisite(s)/Corequisite(s): MKT 3310 with a C+ or better grade and 2.5 GPA. Not open to non-degree graduate students.

FNBK 4500 SPECIAL PROBLEMS IN FINANCE AND BANKING (2-3 credits)

Individual investigation of specific problems in the fields of finance and banking. (Fall, Spring).

Prerequisite(s)/Corequisite(s): Senior. Note: permission of department chair required prior to registration.

FNBK 4510 FINANCE AND BANKING INTERNSHIP (1-3 credits)

Students will engage in an applied experience in their area of specialization to gain relevant experience and to practice the skills and concepts learned in the classroom. Supplemental reports and/or reading may be required.

Note: FNBK4510 may be taken for a maximum of 3 credits.

Prerequisite(s)/Corequisite(s): Permission of internship coordinator; 'C+' or better in FNBK 3250; 2.5 cumulative gpa; junior or senior standing

FNBK 4570 INVESTMENT MANAGEMENT FOR FINANCIAL ANALYSTS (3 credits)

This course provides critical knowledge needed for students pursuing a career in investment management. The topic areas bridge academic theory, current industry practice, and ethical and professional standards and comprehensively address the areas assessed in the Chartered Financial Analyst examinations. (Cross-listed with BSAD 8576).

Prerequisite(s)/Corequisite(s): Senior standing. Not open to non-degree graduate students.

FNBK 4590 RISK MANAGEMENT FOR BUSINESS MANAGERS (3 credits)

An analysis of risk management techniques for handling the risk exposures most businesses face, including insurance, self insurance, risk control and risk avoidance, among others. (Cross-listed with BSAD 8596).

Prerequisite(s)/Corequisite(s): At least junior standing.

FNBK 4600 FINANCIAL RISK MANAGEMENT (3 credits)

The course provides students with an intermediate level analysis of financial derivatives, and the use of these instruments for managing risk in financial institutions. (Cross-listed with BSAD 8606).

Prerequisite(s)/Corequisite(s): FNBK 3400 and FNBK 3500 both with a 'C' (2.0) or better, and senior or graduate standing.

FNBK 4610 PORTFOLIO MANAGEMENT (3 credits)

This course will focus on modern development in portfolio management including efficient markets, stock selection, and hedging procedures. The main objective of this course is to prepare students for the management of financial resources through the development of skills necessary to make prudent investment decisions.

Prerequisite(s)/Corequisite(s): FNBK 3400 with a "C+" (2.33) or above, and a 2.5 GPA.

RELU 2410 REAL ESTATE PRINCIPLES AND PRACTICES (3 credits)

An introductory survey of real estate principles and practices which introduces the terminology, concepts and basic practices in the fields of real estate law, real estate finance, real estate appraisal, real estate property taxation and miscellaneous topic areas. Note: Students cannot receive credit for both RELU 2410 and RELU 3410. (Fall, Spring)

RELU 3410 REAL ESTATE CONCEPTS AND APPLICATIONS (3 credits)

Upper-level survey course in real estate principles, concepts, and their applications. The course will familiarize students with industry terminology, current practices, and cover the following topics: Licensure, property rights, legal descriptions, real estate law and contracts, appraisal, financing, investments, Fair Housing, and related topic areas. NOTE: Students cannot receive credit for both RELU 2410 and RELU 3410. (Cross-listed with BSAD 8605).

RELU 3430 REAL ESTATE BROKERAGE AND SALES (3 credits)

Overview of real estate brokerage and sales principles, to include buying and selling, leasing, brokerage business operations, contracts, closings, legal requirements, Fair Housing, advertising, and career opportunities.

Prerequisite(s)/Corequisite(s): RELU 2410 or RELU 3410.

RELU 3450 REAL ESTATE MANAGEMENT (3 credits)

Commercial and residential property management fundamentals, including leasing space, tenant selection and relations, maintenance and investor relations. (Fall)

Prerequisite(s)/Corequisite(s): RELU 2410 or RELU 3410.

RELU 3460 REAL ESTATE LAW (3 credits)

Upper-level survey course in real estate law, which examines estates in land, conveyances, leases, mortgages, easements, zoning, environmental law, contracts, taxes, foreclosures, landlord-tenant relations, agency, Fair Housing, and Nebraska License Law. (Cross-listed with LAWS 3460)

Prerequisite(s)/Corequisite(s): RELU 2410 or RELU 3410.

RELU 4390 REAL ESTATE INVESTMENTS (3 credits)

Methods used to analyze existing commercial real estate investments through traditional, as well as more technical, dynamic programming models.

Prerequisite(s)/Corequisite(s): RELU 2410 and FNBK 3250

RELU 4400 RESIDENTIAL REAL ESTATE FINANCE (3 credits)

Methods of financing residential real estate, analysis of mortgage risks, mortgage instruments, mortgage lenders, financial calculations, influences of governmental agencies. (Fall, Spring)

Prerequisite(s)/Corequisite(s): RELU 2410 and junior standing.

RELU 4410 BASIC APPRAISAL PROCEDURES (3 credits)

Fundamentals of real estate valuation and appraising; factors affecting value; valuing land, valuing improvements and the valuation of special classes of residential property; appraisal practice, depreciation and obsolescence, appraising rules, the mathematics of appraising; an appraisal of a single family residence is required.

Prerequisite(s)/Corequisite(s): RELU 2410 or RELU 3410 AND FNBK 3250 with a C or better

RELU 4420 INCOME PROPERTY APPRAISAL (3 credits)

Introduction to the theory and concepts of income capitalization approaches, methods and techniques to valuation of real estate income property. Characteristics of yield on investment real estate; future income projections; mortgage coefficients; purchase and leaseback reversions; Ellwood Tables; capitalization rates and investment yields; types of annuities; and condemnation appraisal. (Spring)

Prerequisite(s)/Corequisite(s): RELU 2410 or RELU 3410; and FNBK 3250

RELU 4440 CREATING A REAL ESTATE COMMUNITY (3 credits)

Market analysis and planning for land developments for various types of uses: residential, campus, civic centers, housing for the elderly, urban renewal, shopping centers.

Prerequisite(s)/Corequisite(s): RELU 2410 or RELU 3410.

RELU 4460 COMMERCIAL REAL ESTATE FINANCE (3 credits)

A foundation course in commercial real estate finance including legal, analytical, institutional and governmental aspects.

Prerequisite(s)/Corequisite(s): RELU 2410 and FNBK 3250

RELU 4500 REAL ESTATE INDEPENDENT STUDY (1-3 credits)

Individual investigation of specific issues or problems in real estate. **Prerequisite(s)/Corequisite(s):** Permission of Real Estate Program Director.

RELU 4510 REAL ESTATE INTERNSHIP (1-3 credits)

Correlation of theory and practice through part-time employment and weekly seminars; required readings. (Maximum of 4 hours).

Prerequisite(s)/Corequisite(s): Permission of program chair or internship coordinator.

functions of banks and certain related financial institutions. This program is specifically designed for those students interested in pursuing careers in banking, bank regulatory agencies, or in related financial institutions, such as credit unions, sales and consumer finance companies, and government agencies.

For this concentration, students complete a total of eighteen (18) credit hours, including fifteen (15) credit hours in required courses, and three (3) credit hours in concentration electives. The completion of specified courses in business finance, banking, and investment science and portfolio management may be applied toward concentration requirements in all three areas.

¹ Requires placement from UNO's English Placement and Proficiency Exam.

² Requires placement from ACT/SAT scores, UNO's Math Placement Exam, or an approved prerequisite course within the last two years. Students might be required to take a lower level math course before MATH 1370 depending on their placement scores.

³ Students who are concentrating in Banking and Financial Markets must receive a grade of "C+" or better in FNBK 3250.

⁴ For this requirement students must choose from the following list: MKT 3100, CMST 2120, CMST 3100, CMST 3120, CMST 3130, CMST 3140, CMST 3150, or CMST 3160

⁵ For this requirement students must choose from an approved list of Banking and Financial Markets Elective classes. (See DegreeWorks for approved options)

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

General Education courses (Humanities, Social Science & Natural Science) must be from at least two different disciplines <https://www.unomaha.edu/general-education/overview/index.php>. (<https://www.unomaha.edu/general-education/overview/index.php.html>)

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

Courses within the College of Business require students to obtain a minimum NU GPA of 2.5 or better.

Graduation Requirements:

Students must earn a minimum of 120 credit hours for a BSBA. 42 of those credit hours must be in upper division courses.

Students must earn a C (2.00) or above in all fundamental academic skills, pre-business, upper division business core, and business concentration courses.

CBA students must earn a minimum NU GPA of 2.50 and a minimum Business GPA of 2.50. If students are earning an accounting concentration or secondary concentration, a minimum upper division accounting GPA of 2.50 is additionally required.

Business Analytics Concentration

Because domain knowledge is critical to business analytics, the BSBA Business Analytics concentration is required to be completed together with another BSBA concentration within the College of Business Administration.

Core Requirements – Three Courses – 9 Credit Hours

- ¹ Requires placement from UNO's English Placement and Proficiency Exam.
- ² Requires placement from ACT/SAT scores, UNO's Math Placement Exam, or an approved prerequisite course within the last two years. Students might be required to take a lower level math course before MATH 1370 depending on their placement scores.
- ³ For this requirement students must choose from the following list: MKT 3100, CMST 2120, CMST 3100, CMST 3120, CMST 3130, CMST 3140, CMST 3150, or CMST 3160
- ⁴ For this requirement students must choose from an approved list of BA Elective classes. (See DegreeWorks for approved options)

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

General Education courses (Humanities, Social Science & Natural Science) must be from at least two different disciplines <https://www.unomaha.edu/general-education/overview/index.php>. (<https://www.unomaha.edu/general-education/overview/index.php.html>)

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

Courses within the College of Business require students to obtain a minimum NU GPA of 2.5 or better.

Graduation Requirements:

Students must earn a minimum of 120 credit hours for a BSBA.

42 of those credit hours must be in upper division courses.

Students must earn a C (2.00) or above in all fundamental academic skills, pre-business, upper division business core, and business concentration courses.

CBA students must earn a minimum NU GPA of 2.50 and a minimum Business GPA of 2.50. If students are earning an accounting concentration or secondary concentration, a minimum upper division accounting GPA of 2.50 is additionally required.

Business Finance Concentration

The objective of the business finance concentration is to prepare students for careers in such areas as financial management, capital budgeting, and international financial management. The focus is on the functions of finance in the firm, cash management, sources of financing, the financial system and strategic capital budgeting.

For this concentration, students must complete a total of eighteen (18) credit hours, including fifteen (15) credit hours in required courses, and three (3) credit hours in concentration electives. The completion of specified courses in business finance, banking, and investment science and portfolio management may be applied toward concentration requirements in all three areas.

Code	Title	Credits

Students must earn a minimum of 120 credit hours for a BSBA. 42 of those credit hours must be in upper division courses. Students must earn a C (2.00) or above in all fundamental academic skills, pre-business, upper division business core, and business concentration courses.

CBA students must earn a minimum NU GPA of 2.50 and a minimum Business GPA of 2.50. If students are earning an accounting concentration or secondary concentration, a minimum upper division accounting GPA of 2.50 is additionally required.

Investment Science and Portfolio Management Concentration

The investment science and portfolio management concentration provides theoretical and practical application of security analysis, asset pricing, and dynamic portfolio management for students interested in the investment management field. Students will have the opportunity to apply theoretical models discussed in class by managing funds in the student managed investment club. Students are encouraged to actively participate in the club early in their academic career.

For this concentration, students complete a total of eighteen (18) credit hours including fifteen (15) credit hours in required concentration courses and three (3) credit hours in concentration electives. The completion of specified courses in business finance, banking, and investment science and portfolio management may be applied toward concentration requirements in all three areas.

Legal Studies Concentration

The legal studies concentration emphasizes resolution of commercial disputes, for example disputes arising in a real estate context or in a human resources context, and students with a variety of career goals choose the legal studies concentration. Commercial risk management students choose the concentration to be well positioned to quantify and evaluate alternative resolutions of commercial disputes. This concentration prepares students who are interested in law as a form of critical thinking and analysis of social issues, as well as students pursuing a pre-law curriculum or preparing for a paralegal career. Some graduate track students seek this concentration as preparation for earning a graduate degree in business or for a career in forensic economics. In addition to a broad understanding of the law, quantitative skills are central to the legal studies concentration. Quantitative skills, are needed for estimation of the magnitude of remedies in a commercial context. Risk management requires the ability to be persuasive. Accordingly, written and oral communication skills are important for the legal studies concentration.

- ¹ Requires placement from UNO's English Placement and Proficiency Exam.
- ² Requires placement from ACT/SAT scores, UNO's Math Placement Exam, or an approved prerequisite course within the last two years. Students might be required to take a lower level math course before MATH 1370 depending on their placement scores.
- ³ For this requirement students must choose from an approved list of Real Estate and Land Use Economics Elective classes. Students taking "UBNS 1010" will need a 3000/4000 level elective to fulfill UD credit required for BSBA degree. (See DegreeWorks for approved options)
- ⁴ For this requirement students must choose from the following list: MKT 3100, CMST 3100, CMST 3120, CMST 3130, CMST 3140, CMST 3150, or CMST 3160

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

General Education courses (Humanities, Social Science & Natural Science) must be from at least two different disciplines <https://www.unomaha.edu/>

general-education/overview/index.php. (<https://www.unomaha.edu/general-education/overview/index.php.html>)

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

Courses within the College of Business require students to obtain a minimum NU GPA of 2.5 or better.

Graduation Requirements:

Students must earn a minimum of 120 credit hours for a BSBA. 42 of those credit hours must be in upper division courses. Students must earn a C (2.00) or above in all fundamental academic skills, pre-business, upper division business core, and business concentration courses.

CBA students must earn a minimum NU GPA of 2.50 and a minimum Business GPA of 2.50. If students are earning an accounting concentration or secondary concentration, a minimum upper division accounting GPA of 2.50 is additionally required.

Real Estate and Land Use Economics Program Certificate

A program certificate in Real Estate and Land Use Economics may be earned by completing three (3) credit hours of core course and twelve (12) credit hours from the list of Real Estate and Land Use Economics elective courses below, for a total of fifteen (15) credit hours.

A grade of "C" (2.0) or better is required in each course.

The program certificate is issued by the College of Business Dean's office.

Real Estate and Land Use Economics Program Certificate Required Core Courses: 3 credit hours

RELU 2410 Real Estate Principles and Practices

Real Estate and Land Use Economics Program Certificate Elective Courses: 12 credit hours

Select from the following:

RELU 3430	Real Estate Brokerage and Sales
RELU 3450	Real Estate Management
RELU 3460	Real Estate Law
RELU 4390	Real Estate Investments
RELU 4400	Residential Real Estate Finance
RELU 4410	Basic Appraisal Procedures
RELU 4440	Creating a Real Estate Community
RELU 4460	Commercial Real Estate Finance
RELU 4500	Special Problems in Real Estate and Land Use Economics (1-3 credits)*
RELU 4510	Real Estate Internship (1-3credits)*

Total Credits: 15

*Can be applied towards the UNO Real Estate Certificate, but cannot be used as pre-licensure courses required by the Nebraska Real Estate Commission.

UNO Real Estate Certificate

Requirements:

A Certificate in Real Estate is offered for non-degree, non-traditional, and/or non-business students seeking to build a solid foundation in key real estate concepts, earn a credential, and improve their marketability in the industry.

The proposed certificate may be obtained by completing fifteen (15) credit hours of coursework. A grade of "C" (2.0) or better is required in each course to be applied to the certificate, and an overall GPA of 2.5 within the certificate is required to earn the credential. The Certificate in Real Estate is not available for undergraduate business majors.

Degrees Offered

- Bachelor of Science in Business Administration (<https://catalog.unomaha.edu/undergraduate/college-business-administration/bs-business-administration/>)

Management Concentrations

Management concentrations include Management, Human Resource Management, and Supply Chain Management. Managers combine human and material resources to accomplish organizational objectives. Such results are achieved through the managerial processes of planning, leading, organizing and controlling. Today's competitive, global business environment presents many challenges to managers including managing change and innovation, managing diversity, developing a global perspective, becoming an effective leader, and improving organizational

performance by focusing on quality and continuous improvement. The management concentrations are designed to prepare students to effectively face these challenges in an environment of risk, uncertainty, and ambiguity. All Management concentrations require a minimum of eighteen (18) credit hours. **Students must complete MGMT 3490 with a C+ or above in order to take additional management courses to complete the Management concentration, the Human Resource Management concentration, or the secondary concentration in Management.** A student may choose more than one concentration with a resulting increase in the number of required courses.¹

¹ Note: Students completing more than one Management concentration cannot apply more than six common credits to each Management concentration.

Concentrations Offered:

- Management Concentration (p. 396)
- Human Resource Management Concentration (p. 398)
- Logistics & Supply Chain Management Concentration (p. 399)

Secondary Concentrations Offered:

- Secondary Concentration in Management (p. 396)
- Secondary Concentration in Logistics & Supply Chain Management (p. 399)

Management

- Account Executive
- Business Analyst
- Business Development Manager
- Business Systems Analyst
- Compliance Analyst
- Customer Relationship Manager
- Human Resources and Management Consultant
- Human Resources Executive
- Human Resources Manager
- Logistics Analyst
- Office Manager
- Operations Officer
- Project Manager
- Purchasing Specialist
- Retail Manager
- Training and Development Specialist

MGMT 1500 INTRODUCTION TO BUSINESS (3 credits)

This course is for students who are interested in gaining foundational knowledge in many aspects of the business world including economics, finance, marketing, management, and accounting.

Distribution: Social Science General Education course

MGMT 3100 MANAGEMENT INFORMATION SYSTEMS (3 credits)

The course covers a broad spectrum of knowledge and techniques in MIS. It presents an overview of the issues and strategies in managing IT resources for organizational effectiveness. Covered topics include but are not limited to IT planning, network computing, functional information systems and their integration, electronic commerce, decision support systems, and data and knowledge management.

Prerequisite(s)/Corequisite(s): ACCT 2020, MGMT 3200 or MKT 3200, and MGMT 3490, each with a 'C' (2.0) or better, and a 2.5 GPA. Not open to non-degree graduate students.

MGMT 3300 STRATEGYU: IDENTIFYING AND LEVERAGING YOUR DISTINCTIVE PROFESSIONAL CAPABILITIES (3 credits)

StrategyU is a course designed to merge strategic thinking with personal and professional growth. The goal of the course is to enable individuals to identify where they are personally and professionally, where they want to be in both areas in the future, and develop strategies for how to get there.

Prerequisite(s)/Corequisite(s): MGMT 3490 with a C+ or better and a 2.5 GPA; or permission of instructor. Not open to non-degree graduate students.

MGMT 3410 SUSTAINABLE SUPPLY CHAIN MANAGEMENT (3 credits)

Sustainable supply chain management is the design and management of business processes within and across organizational boundaries to meet the needs of the end customer. The overall goal of this course is to provide students with an understanding of present day issues and policies related to establishing a sustainable, competitive advantage through efficient use of resources and collaboration with external business partners. Students will develop critical thinking skills focused on business process analysis and the use of key performance indicators. (Cross-listed with SCMT 3410, MKT 3410).

Prerequisite(s)/Corequisite(s): Sophomore standing; GPA of 2.5 or better; or by permission of instructor. Not open to non-degree graduate students.

MGMT 3490 MANAGEMENT (3 credits)

In this course, students will develop a clear understanding of management concepts, develop critical thinking skills in applying management concepts to real world problems and begin to develop the technical, interpersonal, communication, conceptual and decision-making skills that are important to success as a manager in modern organizations. Current management trends are emphasized.

Prerequisite(s)/Corequisite(s): ENGL 1160 and MGMT 3200 or MKT 3200 each with a "C"(2.0) or above, and a 2.5 cumulative GPA.

MGMT 3600 BUSINESS ETHICS (3 credits)

Students will learn about the factors, opportunities and pressures that lead to ethical dilemmas, and will develop their understanding of foundations and processes that encourage and reward ethical decision making and behaviors. Lots of examples, sourced from case studies and current events will be provided. (Cross-listed with BSAD 3600, MKT 3600)

Prerequisite(s)/Corequisite(s): Junior classification (minimum of 58 earned credit hours) with a minimum 2.5 cumulative GPA. Completion of MGMT 3200 or MKT 3200 with a minimum grade of "C" (2.0). Not open to non-degree graduate students.

MGMT 3800 CROSS-SECTOR COLLABORATIVE LEADERSHIP (3 credits)

The goal of PA 3800/MGMT 3800 is to prepare students to serve as collaborative leaders of cross-sector initiatives. Specifically, this course will prepare students for success in working collaboratively across private, nonprofit and public sector organizations while also enhancing their overall development as a leader. Examples of successful and unsuccessful cross-sector collaborations will be explored along with discussions of theories related to cross-sector collaboration. (Cross-listed with PA 3800).

Prerequisite(s)/Corequisite(s): Permission from instructor or MGMT 3490 with a grade of C or higher or enrollment in the cross-sector collaborative leadership minor.

MGMT 4000 SPECIAL TOPICS IN MANAGEMENT (3 credits)

This special topics course will address specific topics which will vary by semester and is intended primarily for upper division students who are pursuing a management, supply chain management, or human resources management concentration.

Prerequisite(s)/Corequisite(s): Permission from the Department of Management chairperson.

MGMT 4010 TOTAL REWARDS (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee compensation and benefit programs. The course is designed to enable future managers and human resource professionals to utilize effective strategies for managing the single largest controllable expense for organizations; employee pay and benefits. (Cross-listed with BSAD 8146).

Prerequisite(s)/Corequisite(s): MGMT 3490 and MGMT 4030 with a C+ or better and a 2.5 GPA; or permission of instructor

MGMT 4030 HUMAN RESOURCE MANAGEMENT (3 credits)

This course is a comprehensive review of human resource management concepts and practices. The course is designed to educate future managers and leaders on the importance of utilizing effective human resource methods that comply with federal laws and provide the organization with high-quality talent that provides a competitive advantage. (Cross-listed with BSAD 8136).

Prerequisite(s)/Corequisite(s): MGMT 3490 with a C+ or better and a 2.5 GPA; or permission of instructor.

MGMT 4040 ORGANIZATIONAL BEHAVIOR (3 credits)

In this course students will learn the knowledge and skills necessary to effectively manage and lead others. The discussion and application of topics such as leadership, motivation and attitudes will provide a theoretical grounding in these areas and the opportunity to practice applying these concepts to real-world problems.

Prerequisite(s)/Corequisite(s): MGMT 3490 with a C+ or better and a 2.5 GPA; or permission of instructor. Not open to non-degree graduate students.

MGMT 4050 MANAGERIAL DECISION MAKING (3 credits)

This course will provide students with the opportunity to learn, understand, and apply techniques for effective individual and organizational problem solving. The students will interactively participate in generating, prioritizing and organizing their ideas in order to become better managerial decision-makers/problem solvers.

Prerequisite(s)/Corequisite(s): MGMT 3490 with a C, or a 2.5 GPA, or permission of instructor

MGMT 4060 HEALTHCARE ANALYTICS FOR BUSINESS (3 credits)

This course will focus on the use of analytics to develop key performance indicators that integrate and evaluate clinical, administrative, and financial performance. Key concepts in this course will include information management, performance metrics, data visualization, and communication of results across the healthcare ecosystem. Specific topics will include health outcomes analysis, financial performance, developing an analytics strategy, data quality and governance, and the four stages of actionable intelligence. (Cross-listed with BSAD 8066, SCMT 4060).

Prerequisite(s)/Corequisite(s): MGMT 3490 or SCMT 3410; GPA of 2.5 or better; or by permission of instructor. Not open to non-degree graduate students.

MGMT 4090 PRINCIPLES OF COLLABORATION (3 credits)

Students will work with techniques for team leadership, interpersonal collaboration, consensus-building, creative problem solving, negotiation, facilitation, group process design, collaborative workspace design, and collaboration engineering. Students will gain hands-on experience with collaboration technologies. (Cross-listed with BSAD 8096, ITIN 4090)

Prerequisite(s)/Corequisite(s): Junior standing or permission of instructor.

MGMT 4100 ORGANIZATION CHANGE AND DESIGN (3 credits)

This course is designed to increase students' understanding and knowledge of how organizations are designed and structured in order to create value and competitive advantage, and how organizations can operate in an effective and efficient manner in an ever-changing environment.

Prerequisite(s)/Corequisite(s): MGMT 3490 with a C+ or better and a 2.5 GPA; or permission of instructor.

MGMT 4110 STAFFING THE ORGANIZATION (3 credits)

This course is a comprehensive review of issues and techniques related to the acquisition of high-quality human resources for optimal organizational effectiveness. The course is designed to enable future managers and human resource professionals to utilize effective strategies for recruiting, selecting, placing, and integrating new employees into the organization's workforce. (Cross-listed with BSAD 8166).

Prerequisite(s)/Corequisite(s): MGMT 3490 and MGMT 4030 with a C+ or better and a 2.5 GPA; or permission of instructor. Students are encouraged to take MGMT 4220 prior to taking this course.

MGMT 4120 TALENT DEVELOPMENT (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee training and development programs to optimize human capital effectiveness in modern organizations. The course is designed to enable future managers and human resource professionals to utilize effective strategies for assessing employee training needs and developing appropriate solutions to maximize talent utilization. (Cross-listed with BSAD 8156).

Prerequisite(s)/Corequisite(s): MGMT 3490 and MGMT 4030 with a C+ or better and a 2.5 GPA; or permission of instructor.

MGMT 4150 INTERNATIONAL MANAGEMENT (3 credits)

The purpose of this course is to explore management theory and practice from an international or cross-cultural perspective to gain an appreciation for the complexities of managing in diverse cultural, political and economics environments. Specific emphasis is placed on studying the challenges of management and organization in multinational corporations.

Prerequisite(s)/Corequisite(s): MGMT 3490 with a C+ or better and a 2.5 GPA, or permission of instructor.

MGMT 4220 EMPLOYMENT LAW (3 credits)

This course is a comprehensive review of the legal framework in human resource management practice. The course is designed to prepare future managers and human resource professionals for the myriad legal issues involved in the employer-employee relationship and what is required for effective compliance. (Spring)

Prerequisite(s)/Corequisite(s): MGMT 3490 with a C+ or better, MGMT 3510 or MGMT 4030 with a C(2.0) or better, and a 2.5 GPA; or permission of instructor.

MGMT 4230 APPLIED LEADERSHIP FOR MANAGERS (3 credits)

The course provides an introduction to applied leadership concepts and practices. Students are given a background into systematic decision-making processes, and then are introduced to cases of how actual leaders think and solve problems. Building on these foundational models, students learn how to perform problem solving requirements they will experience as managers. Finally, it concludes with a look at psychological biases and traps that may affect decision-makers.

Prerequisite(s)/Corequisite(s): MGMT 3490 with a C+ or better, a minimum cumulative GPA of 2.5, or permission of instructor. Not open to non-degree graduate students.

MGMT 4330 PROJECT MANAGEMENT (3 credits)

This course will focus on the planning and execution of complex projects within an organization. Students will learn how to conduct stakeholder analysis, plan the scope of a project, develop a project budget, lead a project team, and define the steps necessary to bring a complex project to a successful conclusion. Students will recognize how the strategy, structure, and culture of an organization can be used to identify and prioritize complex projects. (Cross-listed with SCMT 4330, BSAD 8336)

Prerequisite(s)/Corequisite(s): MGMT 3490 with a C+ or better and a 2.5 GPA; or permission of the instructor. Not open to non-degree graduate students.

MGMT 4440 MANAGEMENT OF QUALITY AND PROCESS IMPROVEMENT (3 credits)

Major topics in this course include TQM, reengineering, process improvement, and tools and techniques to formulate, change and implement these concepts in organizations. Students can develop their knowledge and skills to apply these concepts in organizations through the applied orientation of this course.

Prerequisite(s)/Corequisite(s): MGMT 3490 with a C+ or better and a 2.5 GPA; or permission of instructor.

MGMT 4450 MANAGERIAL NEGOTIATION STRATEGIES (3 credits)

This course introduces students to the theory and practice of negotiation. The ability to negotiate successfully rests on a combination of analytical and interpersonal skills. In this course we will develop a set of conceptual frameworks that should help students better analyze negotiations in general and prepare more effectively for future negotiations in which they may be involved. This course is designed to help students better understand the theories, processes, and practices of negotiation, as well as conflict resolution and relationship management so that students can be more effective negotiators in a wide variety of situations. (Cross-listed with SMCT 4450, BSAD 8456)

Prerequisite(s)/Corequisite(s): MGMT 3490 with a grade of C+ or above, at least a cumulative GPA of 2.5, or permission of instructor.

MGMT 4480 CORPORATE AND BUSINESS STRATEGY (3 credits)

A comprehensive study of the analytical techniques and managerial tasks associated with developing, executing and monitoring a strategic course of action for medium to large firms. The interrelationships between the functional business areas will be stressed using a combination of contemporary readings, business cases, team projects or computerized situations.

Prerequisite(s)/Corequisite(s): Must be a graduating senior, have a declared major in BSBA program, 2.5 cumulative GPA, MGMT 3200 or MKT 3200, MGMT 3490, MKT 3310, FNBK 3250 with a "C" (2.0) or better.

MGMT 4500 SPECIAL PROBLEMS IN MANAGEMENT (1-3 credits)

This is an independent study course in which the student completes a focused project in the field of management, human resource management, international business, supply chain management, or entrepreneurship under faculty supervision.

Prerequisite(s)/Corequisite(s): MGMT 3490 C+ or better, 2.5 GPA; permission of program chair; junior/senior standing; must obtain agreement from a faculty member to supervise; submit completed Special Problems contract to MGMT Dept chairperson. Forms in CBA advising office.

MGMT 4510 MANAGEMENT INTERNSHIP (1-3 credits)

Students engage in part time employment in the management discipline to gain relevant business experience and to practice the skills and concepts learned in the classroom. Work assignment must encompass duties related to general management or a specialization within the domain (i.e. strategy, production/operations, project management, planning, organizing, leading, or controlling).

Prerequisite(s)/Corequisite(s): MGMT 3490 with a C+ or better, a 2.5 GPA, and junior level standing; and permission of instructor.

MGMT 4520 HUMAN RESOURCES MANAGEMENT INTERNSHIP (1-3 credits)

Students engage in part time employment in the human resource management discipline to gain relevant business experience and to practice the skills and concepts learned in the classroom. Work assignment must encompass duties related to general human resource management or a specialization within the domain (i.e. staffing, training, employee relations).

Prerequisite(s)/Corequisite(s): MGMT 4030 with a C+ or better, a 2.5 GPA, and junior level standing; and permission of instructor.

MGMT 4610 APPLIED LEADERSHIP FOR MANAGERS (3 credits)

The course provides an introduction to applied leadership concepts and practices by providing students with the knowledge and skills necessary to solve problems and make decisions as leaders.

Prerequisite(s)/Corequisite(s): Completion of at least 30 credit hours and a minimum 3.3 GPA. Not open to non-degree graduate students.

MGMT 4690 EMERGING TECHNOLOGY AND INNOVATION (3 credits)

This course equips entrepreneurially-minded students with a more complete range and vision of the viability of various startup opportunities (with a specific focus on innovative technologies and innovative business models). Students will become familiarized with the new and emerging technologies and innovations that define modern industries and product categories, as well as the various shifts in the way cutting-edge business gets done, regardless of industry. (Cross-listed with ENTR 4690, BSAD 8696).

Prerequisite(s)/Corequisite(s): Junior standing or higher; 2.75 minimum GPA; or permission of instructor

MGMT 4720 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with BSAD 8726, ITIN 4720, ITIN 8256, ENTR 4720, MKT 4720).

Prerequisite(s)/Corequisite(s): ENTR 3710 and junior standing or above or by instructor permission

MGMT 4960 CROSS-SECTOR COLLABORATIVE LEADERSHIP CAPSTONE (3 credits)

This is a capstone course that prepares students to be effective leaders in the 21st century. This course is the final leadership course in the Cross-Sector Collaborative Leadership minor. This minor requires a capstone project that encompasses the student's knowledge and training. It is designed to provide an applied service-learning opportunity for students. (Cross-listed with PA 4960).

Prerequisite(s)/Corequisite(s): Must be completing Cross-Sector Collaborative Leadership Minor. Not open to non-degree graduate students.

Management Concentration

The management concentration provides students with opportunities to develop the technical, interpersonal, conceptual, diagnostic, communication, and decision-making skills to effectively carry out management functions. The management concentration is designed with the flexibility to permit students to select management courses that will meet their specific interests and career objectives.

For this concentration, students must complete a total of eighteen (18) credit hours including nine (9) credit hours in required concentration core courses and nine (9) credit hours in concentration electives.

Code	Title	Credits
Management Concentration Required Courses		
Students must take at least 3 of the 4 courses listed below for a minimum of 9 credit hours. If a student takes all 4 courses, one will count as an elective.		9-12
MGMT 4040	ORGANIZATIONAL BEHAVIOR	
MGMT 4100	ORGANIZATION CHANGE AND DESIGN	
MGMT 4150	INTERNATIONAL MANAGEMENT	
MGMT 4230	APPLIED LEADERSHIP FOR MANAGERS	
Select two or three additional (3 credit) Management elective courses from the following:		6-9
SCMT 3410	SUSTAINABLE SUPPLY CHAIN MANAGEMENT	

SCMT 4170	EMERGING TRENDS IN SUPPLY CHAIN MANAGEMENT	
MGMT 4720	INNOVATION VENTURES	
MGMT 4030	HUMAN RESOURCE MANAGEMENT	
MGMT/BSAD/MKT 3600	BUSINESS ETHICS	
ENTR 3710	ENTREPRENEURIAL FOUNDATIONS	
MGMT 4000	SPECIAL TOPICS IN MANAGEMENT ¹	
MGMT 4050	MANAGERIAL DECISION MAKING	
MGMT 4110	STAFFING THE ORGANIZATION	
MGMT/SCMT 4330	PROJECT MANAGEMENT	
MGMT/ITIN 4090	PRINCIPLES OF COLLABORATION	
MGMT 4440	MANAGEMENT OF QUALITY AND PROCESS IMPROVEMENT	
MGMT/SCMT 4450	MANAGERIAL NEGOTIATION STRATEGIES	
MGMT 4060	HEALTHCARE ANALYTICS FOR BUSINESS	
MGMT 3300	STRATEGYU: IDENTIFYING AND LEVERAGING YOUR DISTINCTIVE PROFESSIONAL CAPABILITIES	
MGMT 4510	MANAGEMENT INTERNSHIP	
Total Credits		18

¹ MGMT 4000 can be taken multiple times and may include any department chair approved topic.

Note: Courses utilized to satisfy the management required courses may not be utilized to fulfill management elective course requirements.

Secondary Concentration in Management

A secondary concentration in management, as a supplement to another BSBA concentration, may be obtained by completing the following:

Code	Title	Credits
MGMT 3490	MANAGEMENT ¹	3
Plus nine (9) credit hours of specified MGMT courses		9
Total Credits		12

¹ MGMT 3490 with a grade of C+ or above.

Students must meet all prerequisites to enroll in MGMT 3490. At least one of the courses must be MGMT 4040 or MGMT 4100. To fulfill the additional six (6) credit hours required for the secondary concentration in Management, any course approved for the management concentration may also be used for the secondary concentration in management. A grade of C (2.00) or better is required in each course to apply to the secondary concentration in management.

¹ Requires placement from UNO's English Placement and Proficiency Exam.

- ² Requires placement from ACT/SAT scores, UNO's Math Placement Exam, or an approved prerequisite course within the last two years. Students might be required to take a lower level math course before MATH 1370 depending on their placement scores.
- ³ Students who are concentrating in Management must receive a grade of "C+" or better in MGMT 3490
- ⁴ For this requirement students must choose from an approved list of Management Core classes. (See DegreeWorks for approved options)
- ⁵ For these requirements students must choose from an approved list of Management Core/Elective classes. (See DegreeWorks for approved options)
- ⁶ For this requirement students must choose from the following list: MKT 3100, CMST 2120, CMST 3100, CMST 3120, CMST 3130, CMST 3140, CMST 3150, or CMST 3160
- ⁷ For this requirement students must choose from an approved list of Management Elective classes. (See DegreeWorks for approved options)

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

General Education courses (Humanities, Social Science & Natural Science) must be from at least two different disciplines <https://www.unomaha.edu/general-education/overview/index.php>. (<https://www.unomaha.edu/general-education/overview/index.php.html>)

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

Courses within the College of Business require students to obtain a minimum NU GPA of 2.5 or better.

Graduation Requirements:

Students must earn a minimum of 120 credit hours for a BSBA. 42 of those credit hours must be in upper division courses. Students must earn a C (2.00) or above in all fundamental academic skills, pre-business, upper division business core, and business concentration courses. CBA students must earn a minimum NU GPA of 2.50 and a minimum Business GPA of 2.50. If students are earning an accounting concentration or secondary concentration, a minimum upper division accounting GPA of 2.50 is additionally required.

Human Resource Management Concentration

The Human Resource Management concentration is for students who wish to focus on the human resource management functions of an organization. These functions include workforce staffing (recruitment and selection), talent development (training and development), performance management,

total rewards (compensation and benefits), employee and labor relations, and strategic human resource planning.

For this concentration, students complete a total of eighteen (18) credit hours including six (6) credit hours in required concentration courses and twelve (12) credit hours in concentration electives. Students must complete MGMT 4030 with a C+ or above in order to complete the Human Resource Management concentration.

Logistics & Supply Chain Management Concentration

The logistics & supply chain management concentration is for students who wish to focus on the supply chain functions within an organization. These functional areas include logistics (transportation management and scheduling), procurement (purchasing and materials management), effective resource management (lean manufacturing and lean supply chain management), and the three pillars of sustainable chains (people, profit, and planet).

For this concentration, students complete a total of eighteen (18) credit hours including nine (9) credit hours in required concentration core courses and nine (9) credit hours in concentration electives.

Code	Title	Credits
Logistics & Supply Chain Management Concentration Required Courses		
SCMT 3410	SUSTAINABLE SUPPLY CHAIN MANAGEMENT	3
SCMT/MKT 4380	INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT	3

SCMT 4170	EMERGING TRENDS IN SUPPLY CHAIN MANAGEMENT	
SCMT 4460	SUPPLY CHAIN INTEGRATION	
SCMT 4070	INTERNATIONAL LOGISTICS MANAGEMENT	
Total Credits		18

Secondary Concentration in Logistics & Supply Chain Management

A secondary concentration in logistics & supply chain management, as a supplement to another BSBA concentration, may be obtained by completing SCMT 3410 plus nine (9) credit hours of specified SCMT courses. Students must meet all prerequisites to enroll in SCMT 3410. At least one of the courses must be SCMT 4380 or SCMT 4350. To fulfill the additional six (6) credit hours of upper-division courses (3000 or 4000 level) required for the secondary concentration in logistics & supply chain management, any course approved for the logistics & supply chain management concentration may also be used for the secondary concentration in logistics & supply chain management. A grade of C (2.00) or better is required in each course to apply to the secondary concentration in logistics & supply chain management.

ENTR 2550 BUSINESS AND ECONOMICS IN AFRICAN AMERICAN COMMUNITIES (3 credits)

This course traces the evolution of African American business and economic development systems in the U.S. and will examine historical economic and political influences which impact African American business communities. Students will be exposed to various aspects of African American business and economics, including Black entrepreneurship and Black owned businesses before, during, and after slavery; an analysis of the role of Black churches in African-American communities; and the impact of modern economic and political systems on African American business communities. (Cross-listed with BLST 2550).

Distribution: U.S. Diversity General Education course

ENTR 2980 SEMINAR IN ENTREPRENEURSHIP (1 credit)

This seminar exposes students to entrepreneurs and innovators from multiple industries and varied backgrounds. This course will explicitly link entrepreneurship theories with the best practice experiences of successful entrepreneurs in the region. Through purposeful interaction with the region's start-up community, this course will strengthen the networks of entrepreneurship students and equip students with the knowledge and tools to make their business ideas a reality.

ENTR 3330 ENTREPRENEURIAL FINANCE (3 credits)

This course focuses on venture capital formation and the financing of entrepreneurial ventures. The course is intended for students interested in entrepreneurship, venture capital markets, investment banking, and other careers related to new venture financing and/or deal structuring. The course applies basic financial theory to the unique environment of incubating and growing new ventures. (Cross-listed with FNBK 3330).

Prerequisite(s)/Corequisite(s): ENTR 3710 with a C or better

ENTR 3710 ENTREPRENEURIAL FOUNDATIONS (3 credits)

A study of the analytical techniques and managerial tasks associated with developing and executing business plans for small firms and start-ups. These skills, including strategic positioning and competitor analysis, marketing, teaming, project and operations management, and cash flow projection will be taught through a combination of contemporary readings, speakers, and hands-on practice problems.

Prerequisite(s)/Corequisite(s): Sophomore standing and 2.0 GPA.

ENTR 4000 SPECIAL TOPICS IN ENTREPRENEURSHIP (3 credits)

This special topics course will address specific topics which will vary by semester and is intended primarily for upper division students who are pursuing an entrepreneurship concentration.

Prerequisite(s)/Corequisite(s): ENTR 3710 plus 6 hours of Entrepreneurship, all with C+ or better; GPA of 2.5 or better; or permission of instructor.

ENTR 4150 GEOGRAPHY, GENDER AND ENTREPRENEURSHIP (3 credits)

An advanced seminar focused on links among geography, gender and work, emphasizing leadership and entrepreneurship. The course considers theory and method in addition to empirical work. The nature of space, of gender, and of work, are examined. Topics include the gendering of work, the geography of entrepreneurship, gender and leadership. (Cross-listed with ENTR 8156, GEOG 4150, GEOG 8156, WGST 4150, WGST 8156)

Prerequisite(s)/Corequisite(s): Junior, senior, or graduate standing, or permission of instructor.

ENTR 4390 MEDIA ENTREPRENEURSHIP (3 credits)

4390 Media Entrepreneurship explores new and emerging media business models from local, national and global perspectives. Students learn about and work within the start-up economy and entrepreneurial approaches. The course offers professional and critical perspectives. (Cross-listed with JMC 4390, JMC 8396).

Prerequisite(s)/Corequisite(s): Minimum cumulative GPA- 2.25; Junior standing, ENGL 1160 or equivalent, or instructor permission.

ENTR 4530 ENTREPRENEURSHIP INTERNSHIP (1-3 credits)

Students engage in part time employment in a new or small business to gain relevant business experience and to practice the skills and concepts learned in the classroom. Work assignment must encompass duties related to establishing or growing a small business such as market research, customer development, systems design and implementation, funding activities, etc.

Prerequisite(s)/Corequisite(s): ENTR 3710 with a C+ or better, a 2.5 GPA, and junior level standing, and permission of instructor. Not open to non-degree graduate students.

ENTR 4690 EMERGING TECHNOLOGY AND INNOVATION (3 credits)

This course equips entrepreneurially-minded students with a more complete range and vision of the viability of various startup opportunities (with a specific focus on innovative technologies and innovative business models). Students will become familiarized with the new and emerging technologies and innovations that define modern industries and product categories, as well as the various shifts in the way cutting-edge business gets done, regardless of industry. (Cross-listed with MGMT 4690, BSAD 8696).

Prerequisite(s)/Corequisite(s): Junior standing or higher; 2.75 minimum GPA; or permission of instructor

ENTR 4710 COMPARATIVE INTERNATIONAL DEVELOPMENT AND INNOVATION (3 credits)

Comparative International Development and Innovation will analyze the rise and fall of civilizations from a historical and theoretical perspective in a comparative manner. The course will address issues concerning political, social, economic, and environmental change in national, and international contexts. Among its major emphases are state institutions, economic growth, entrepreneurship, and the transformation of social structure and culture. (Cross-listed with ENTR 8716, PSCI 4710, PSCI 8716).

Prerequisite(s)/Corequisite(s): Junior or senior standing

ENTR 4720 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with BSAD 8726, ITIN 4720, ITIN 8256, MGMT 4720, MKT 4720).

Prerequisite(s)/Corequisite(s): ENTR 3710 and junior standing or above or by instructor permission

ENTR 4730 NEW VENTURE FORMATION (3 credits)

This course is a comprehensive study of the interrelationships between functional business areas in a start-up or small firm. These interrelationships will be taught through the development of a complete business plan for a start-up or small business.

Prerequisite(s)/Corequisite(s): ENTR 3710 with a C (2.00) or better; GPA 2.5

ENTR 4740 TECHNOLOGY AND INNOVATION MANAGEMENT (3 credits)

This course covers the challenges that surround technology and innovation management. Approaching innovation management as a strategic process, this course will focus in on how the innovation process works and what kinds of organizational environments support this process, as well as how innovation affects the competitive dynamics of markets so that firms can better manage their innovation(s).

Prerequisite(s)/Corequisite(s): ENTR 3710. Not open to non-degree graduate students.

ENTR 4750 SOCIAL ENTREPRENEURSHIP (3 credits)

Motivated by the desire for social change and community betterment, social entrepreneurs use innovation to solve society's problems in a variety of settings - nonprofits, for-profit businesses, or government agencies. Guest speakers, case discussion, lecture, and student presentations will be used in this course and students will be expected to develop a detailed business plan for a social enterprise.

Prerequisite(s)/Corequisite(s): Minimum GPA 2.5

ENTR 4760 SELLING IN AN ENTREPRENEURIAL CONTEXT (3 credits)

Successful entrepreneurs are able to identify unmet needs in the marketplace and then design and sell products or services that fulfill those needs. Sales effectiveness is essential for entrepreneurs because they must be able to build sustainable sales pipelines that ensure profitable growth as other pressing issues such as financing, staffing, product development are addressed. This course will focus on consultative solution-based sales fundamentals that can be applied in the entrepreneurial selling environment. (Cross-listed with MKT 4760, BSAD 8766)

Prerequisite(s)/Corequisite(s): GPA 2.5 or better; MKT 3100 with a 2.5 grade or better; MKT 3310 with a 2.5 grade or better; or permission of instructor. Not open to non-degree graduate students.

ENTR 4770 INTRODUCTORY MAVERICK VENTURE FUND (1 credit)

This course teaches the basics of venture capital, including, the topics of term sheets, due diligence and learning the perspectives of the entrepreneur and investor. Students in this course have the opportunity to observe more advanced students making investments, ranging from 5,000 dollars to 10,000 dollars plus. This course is the first of three, one-credit courses where students gain more advanced venture funding knowledge and application at each level. (Cross-listed with BSAD 8776).

Prerequisite(s)/Corequisite(s): This course requires instructor approval.

ENTR 4780 INTERMEDIATE MAVERICK VENTURE FUND (1 credit)

In this course, students source deals, listen to pitches, and select start-ups to be funded. Investments typically range from 5,000 dollars to 10,000 dollars plus. This course is the second in a set of three courses that increase in difficulty with each course. (Cross-listed with BSAD 8786).

Prerequisite(s)/Corequisite(s): Students must have taken Maverick Venture Fund - 1: Venture Capital Concepts (ENTR 4770/8770).

ENTR 4790 ADVANCED MAVERICK VENTURE FUND (1 credit)

This course applies advanced concepts of venture capital. Students will learn how to monitor and assist start-ups in the scaling process. Students learn how to leverage community partners to amplify investment opportunities. This course is the third in a set of three courses that increase in difficulty with each course. (Cross-listed with BSAD 8796).

Prerequisite(s)/Corequisite(s): Students must have taken MAVERICK VENTURE FUND - 2: APPLICATION, SOURCING DEALS & DUE DILIGENCE

MKT 2210 SURVEY OF MARKETING (3 credits)

This course is designed for any student who has an interest in marketing and focuses on basic product and services marketing as well as digital and social media marketing.

MKT 3100 PROFESSIONAL SELLING (3 credits)

This course focuses on professional selling and relationship marketing principles and practices. A variety of personal and direct sales techniques, psychology, and application of personal communication theory will be applied. Role-plays and presentations will be utilized to help students learn and execute the sales process model.

Prerequisite(s)/Corequisite(s): ECON 2220 and ENGL 1160 both with 'C' (2.0) or better and GPA of 2.3 or better; or permission of instructor.

MKT 3200 BUSINESS COMMUNICATIONS (3 credits)

This course develops business communication skills such as selecting and using appropriate technologies for reaching intended audiences. Students will practice effective explanatory, narrative, persuasive, and investigative writing in the context of business communication.

Prerequisite(s)/Corequisite(s): ENGL 1160 and CMST 1110, each with a grade of "C" (2.0) or better; 2.5 GPA.

Distribution: Writing in the Discipline Single Course

MKT 3310 PRINCIPLES OF MARKETING (3 credits)

An examination of marketing functions and the institutions which perform them, choice of criteria for marketing strategy decisions, marketing structural relationships, and the role of marketing in society.

Prerequisite(s)/Corequisite(s): ECON 2200, MATH 1310 or MATH 1220, ENGL 1160, and MGMT 3200 or MKT 3200 all with 'C'(2.0) or better, and 2.5 GPA.

MKT 3320 CONSUMER BEHAVIOR (3 credits)

Consumers purchase, use, experience, and dispose of products and services as part of their consumption process. How and why consumers choose various brand options, form judgments about these brands, and decide which options to buy and/or re-buy are essential knowledge for marketing professionals. The course covers the psychological and social issues that guide consumption decisions. (Cross-listed with BSAD 8345).

Prerequisite(s)/Corequisite(s): MKT 3310 with 'C+' or better; 2.5 GPA or better; or permission of instructor.

MKT 3340 CHANNELS OF DISTRIBUTION (3 credits)

Channels management focuses on the associations of businesses and the performance of required functions making products and services available to end users when and where buyers demand them. Attention is paid to how intermediaries (e.g. wholesalers and retailers) interact and organize an efficient system to ensure that products and services are available in proper quantities and on time for consumers.

Prerequisite(s)/Corequisite(s): MKT 3310 with 'C+' or better; and GPA of 2.5 or better; or permission of instructor.

MKT 3350 MARKETING SERVICE PRODUCTS (3 credits)

This elective explores how intangibility forces customers to evaluate service products differently, creating more challenges for marketers. The course is based on the premise that financial benefits reward services that provide value to customers, and develops strategies for creating value.

Prerequisite(s)/Corequisite(s): MKT 3310 with a 'C+' or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 3360 DIGITAL MARKETING COMMUNICATIONS (3 credits)

This course considers the functions and resources necessary to place effective digital marketing communications before target audiences and thus help to achieve marketing objectives for both business and non-business organizations. Specifically, it includes leveraging the digital media in communicating, connecting, and engaging with various stakeholders such as customers, partners, government, and public institutions.

Prerequisite(s)/Corequisite(s): MKT 3310 with 'C+' or better and GPA of 2.5 or better; or permission of instructor.

MKT 3370 SOCIAL MEDIA MARKETING (3 credits)

The students will become familiar with the full range of promotional media, techniques and methodologies, understand the structuring of a promotional campaign according to the strategic objectives, be able to effectively integrate promotions into a composite marketing program, and be able to design and present a complex promotional strategy employing a diverse array of techniques and methods according to the specific objectives.

Prerequisite(s)/Corequisite(s): Completion of MKT 3310 with a C+ or better.

MKT 3380 INTERNATIONAL MARKETING (3 credits)

A study of the processes, procedures, characteristics and environments for goods and services in foreign market places. Reference is drawn to the theories and concepts of domestic marketing to appraise their applicability to international markets. Considerable attention is given to the features of the foreign market environments which both facilitate the marketing processes, inhibit them, and require strategies and tactics of accommodation.

Prerequisite(s)/Corequisite(s): MKT 3310 with 'C+' or better; GPA of 2.5 or better.

MKT 3390 GRAPHIC DESIGN FOR MARKETERS (3 credits)

The course provides a hands-on introduction to the concepts and tools used in graphic design to create marketing communications. Material and assignments will focus on how design supports marketing communication strategy. Students will learn the principles and vocabulary of design, how to critique graphic design, and how to create basic print materials. Students will learn and practice the skills necessary to communicate with graphic designers and advertising professionals in order to successfully implement marketing strategies.

Prerequisite(s)/Corequisite(s): MKT 3310 with 'C+' or better; 2.5 GPA or better.

MKT 3410 SUSTAINABLE SUPPLY CHAIN MANAGEMENT (3 credits)

Sustainable supply chain management is the design and management of business processes within and across organizational boundaries to meet the needs of the end customer. The overall goal of this course is to provide students with an understanding of present day issues and policies related to establishing a sustainable, competitive advantage through efficient use of resources and collaboration with external business partners. Students will develop critical thinking skills focused on business process analysis and the use of key performance indicators. (Cross-listed with SCMT 3410, MGMT 3410).

Prerequisite(s)/Corequisite(s): Sophomore standing; GPA of 2.5 or better; or by permission of instructor. Not open to non-degree graduate students.

MKT 3600 BUSINESS ETHICS (3 credits)

Students will learn about the factors, opportunities and pressures that lead to ethical dilemmas, and will develop their understanding of foundations and processes that encourage and reward ethical decision making and behaviors. Lots of examples, sourced from case studies and current events will be provided. (Cross-listed with BSAD 3600, MGMT 3600).

Prerequisite(s)/Corequisite(s): Junior classification (minimum of 58 earned credit hours) with a minimum 2.5 cumulative GPA. Completion of MGMT 3200 or MKT 3200 with a minimum grade of "C" (2.0). Not open to non-degree graduate students.

MKT 3610 BUSINESS TO BUSINESS MARKETING (3 credits)

This course examines the decisions involved in marketing goods and services to the industrial buyer as opposed to the consumer buyer. Buyer motivation, promotion decisions, channel decisions, product development and pricing policies involved in the marketing of industrial goods are considered.

Prerequisite(s)/Corequisite(s): MKT 3310 with 'C+' or better; 2.5 GPA or better; or permission of instructor

MKT 4000 SPECIAL TOPICS IN MARKETING (3 credits)

This special topics course will address specific topics which will vary by semester and is intended primarily for upper division students who are pursuing a marketing or sales concentration.

Prerequisite(s)/Corequisite(s): MKT 3310 plus 6 hours of Marketing, all with 'C+' or better; GPA of 2.5 or better; or permission of instructor.

MKT 4200 CONSULTATIVE SELLING PRINCIPLES (3 credits)

The primary focus of the Consultative Selling Principles course is to develop the behaviors, methodologies, principles, and processes required to successfully lead and manage complex selling initiatives to a win-win close. The course examines and applies, through role playing and other activities, the critical relationship building, critical thinking, problem solving, listening and negotiating capabilities which are the foundation skills underlying consultative selling. (Cross-listed with BSAD 8206)

Prerequisite(s)/Corequisite(s): MKT 3310 with 'C+' or better; MKT 3100 with C+ or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4210 SELLING FINANCIAL SERVICES (3 credits)

Selling Financial Services concentrates on methods to effectively sell services and products in the financial services industry, including the banking, brokerage and insurance sectors. Targeting, initiating, and acquiring client relationships, expanding business opportunities, and maintaining long-term client relationships are the course's focal points. This integrative course is designed to provide students with a basic understanding of the selling profession and sales culture within the financial services industry. (Cross-listed with BSAD 8216, FNBK 4210).

Prerequisite(s)/Corequisite(s): MKT 3310 with a C+ or better grade and 2.5 GPA. Not open to non-degree graduate students.

MKT 4220 GLOBAL STRATEGIC ACCOUNT MANAGEMENT (3 credits)

Throughout this course, the management of strategic account programs at national, multi-country, and global levels will be addressed. The primary focus of the curriculum is on the critical success factors for driving revenue, sustainable long term-growth and profitability with a base of core strategic buyers. (Cross-listed with BSAD 8226)

Prerequisite(s)/Corequisite(s): Senior or graduate student standing and permission of the instructor. Not open to non-degree graduate students.

MKT 4300 MARKETING MANAGEMENT (3 credits)

This case study course examines product, price, promotion and channel of distribution policies. Major emphasis is placed on analysis of marketing problems and the facets of making marketing decisions.

Prerequisite(s)/Corequisite(s): MKT 3310 with grade of 'C+' or better plus 6 hours of marketing, all with 'C' (2.0) or better, senior standing; GPA of 2.5 or better; or permission of instructor.

MKT 4320 SALES MANAGEMENT (3 credits)

The student will be exposed to current research findings in sales management and to business cases and simulations where sales management theories and concepts will be applied. This course will prepare students to develop and implement specific compensation, motivation, and evaluation strategies for managing sales professionals across a wide variety of organizations. (Cross-listed with BSAD 8326).

Prerequisite(s)/Corequisite(s): MKT 3310 with 'C+' or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4340 MARKETING RESEARCH (3 credits)

Application of analytical tools to marketing problems including markets, products, distribution channels, sales efforts and advertising. Emphasis on planning, investigation, collection, interpretation of data and presentation of results.

Prerequisite(s)/Corequisite(s): MKT 3310 with 'C+' or better; BSAD 2130 or BSAD 3140 or BSAD 3160 with 'C' (2.0) or better; GPA of 2.5 or better; or permission of instructor.

MKT 4360 E-MARKETING (3 credits)

This course focuses on utilizing the Internet as a marketing platform. Course content includes discussion of how the Internet is used by businesses for designing products, pricing, promotions, distribution, positioning, gathering information, and cultivating relationships with stakeholders. The discussion about the rise of social media, sharing economy, virtual reality devices, and other relevant trends will also be part of the course. (Cross-listed with BSAD 8366).

Prerequisite(s)/Corequisite(s): MKT 3310 with 'C+' or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4370 MARKETING ANALYTICS (3 credits)

This course focuses on the application of data analytics in marketing decision making (e.g., segmentation, sales forecasting, and resource allocation). Students will learn to apply statistics and econometrics to solve marketing problems. Key topics in this course include marketing data visualization, marketing metrics, descriptive and predictive analytics, and digital marketing analytics. This course takes a very hands-on approach with real-world databases and equips students with tools that can be used immediately on the job. (Cross-listed with BSAD 8396).

Prerequisite(s)/Corequisite(s): MKT 3310 with 'C+' or better; BSAD 2130 or BSAD 3140 or BSAD 3160 with 'C' (2.0) or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4380 INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT (3 credits)

This course will focus on the strategic procurement of products and services in order to gain a competitive advantage through integrated supply management. Students will learn about strategic supply management, contract negotiation, and supplier quality management. Students will develop an understanding of supplier performance management through the use of supply chain information systems. (Cross-listed with SCMT 4380, BSAD 8386.)

Prerequisite(s)/Corequisite(s): SCMT 3410; GPA of 2.5 or better; or by permission of instructor. Not open to non-degree graduate students.

MKT 4420 BUSINESS DEMOGRAPHICS (3 credits)

The goal of this course is to develop a demographic perspective in order to assist in understanding the business environment and business policy. How population change impacts consumer markets and all of the functions (for example, accounting, finance and management) that must exist for these markets to perform. Includes a history of population change and policy as well as a view toward international population considerations. (Cross-listed with BSAD 8426).

Prerequisite(s)/Corequisite(s): MKT 3310 with 'C+' or better; GPA 2.5 or better, Junior Standing; or permission of instructor. Not open to non-degree graduate students.

MKT 4500 SPECIAL PROBLEMS IN MARKETING (1-3 credits)

This course consists of an individual investigation of specific marketing topics under the supervision of a faculty member and could include readings, independent research, and a written research paper.

Prerequisite(s)/Corequisite(s): Principles of Marketing (MKT 3310) with minimum C+ or permission of instructor.

MKT 4510 MARKETING INTERNSHIP (1-3 credits)

Students engage in part time employment in the marketing discipline to gain relevant business experience and to practice the skills and concepts learned in the classroom. Work assignment must encompass duties related to general marketing or a specialization within the domain (i.e. selling, social media, advertising, market research).

Prerequisite(s)/Corequisite(s): MKT 3310 with a C+ or better, a 2.5 GPA, and junior level standing; and permission of instructor.

MKT 4540 SUPPLY CHAIN MANAGEMENT INTERNSHIP (1-3 credits)

Students engage in part-time employment in supply chain management to gain relevant business experience and to practice the skills and concepts learned in the classroom. Work assignment must encompass duties related to the field of supply chain management (i.e., purchasing, scheduling, supplier relations, materials management, or logistics). (Cross-listed with SCMT 4540)

Prerequisite(s)/Corequisite(s): MKT-MGMT 3410 Sustainable Supply Chain Management and GPA of 2.5 or better; or by permission of the instructor. Not open to non-degree graduate students.

MKT 4720 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with BSAD 8726, ITIN 4720, ITIN 8256, ENTR 4720, MGMT 4720).

Prerequisite(s)/Corequisite(s): ENTR 3710 and junior standing or above or by instructor permission

MKT 4760 SELLING IN AN ENTREPRENEURIAL CONTEXT (3 credits)

Successful entrepreneurs are able to identify unmet needs in the marketplace and then design and sell products or services that fulfill those needs. Sales effectiveness is essential for entrepreneurs because they must be able to build sustainable sales pipelines that ensure profitable growth as other pressing issues such as financing, staffing, product development are addressed. This course will focus on consultative solution-based sales fundamentals that can be applied in the entrepreneurial selling environment. (Cross-listed with ENTR 4760, BSAD 8766)

Prerequisite(s)/Corequisite(s): GPA 2.5 or better; MKT 3100 with a 2.5 grade or better; MKT 3310 with a 2.5 grade or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4800 HONORS STUDIES IN MARKETING (3 credits)

A comprehensive examination of marketing as it is practiced among firms representing different industrial sectors. Course objectives include individual inquiry, theoretical applications and limitations, and an increased academic understanding of the discipline of marketing. Only grades 'B' and above will be awarded. Students exhibiting performance below the 'B' level will receive an 'F' for the course. Admission to this course is by invitation only.

Prerequisite(s)/Corequisite(s): Permission of instructor. Senior standing, 3.2 GPA or above, declared business college specialization in MKT or BFIN or MGMT or communications (journalism, PR or broadcasting). Not open to non-degree graduate students.

Entrepreneurship Concentration

The Entrepreneurship Concentration is for students interested in starting, owning, and/or operating a business venture as well as students interested in serving entrepreneurial ventures as consultants, bankers, accountants, and marketing professionals. The entrepreneurship concentration has a practical emphasis designed to assist students in developing and operating their new and/or small ventures. Courses in this concentration lead students through the different processes of getting into business, addresses important operating issues relevant to the running of day-to-day activities of a venture, and discuss the important topic of planning for business growth and development.

For this concentration, students complete a total of eighteen (18) credit hours including twelve (12) credit hours in required concentration courses, and six (6) credit hours in concentration electives.

¹ Requires placement from UNO's English Placement and Proficiency Exam.

² Requires placement from ACT/SAT scores, UNO's Math Placement Exam, or an approved prerequisite course within the last two years. Students might be required to take a lower level math course before MATH 1370 depending on their placement scores.

³ For this requirement students must choose from an approved list of Entrepreneurship Elective classes. (See DegreeWorks for approved options)

⁴ For this requirement students must choose from an approved list of Entrepreneurship Elective classes. (See DegreeWorks for approved options)

sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

General Education courses (Humanities, Social Science & Natural Science) must be from at least two different disciplines <https://www.unomaha.edu/general-education/overview/index.php>. (<https://www.unomaha.edu/general-education/overview/index.php.html>)

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

Courses within the College of Business require students to obtain a minimum NU GPA of 2.5 or better.

Graduation Requirements:

Students must earn a minimum of 120 credit hours for a BSBA.

42 of those credit hours must be in upper division courses.

Students must earn a C (2.00) or above in all fundamental academic skills, pre-business, upper division business core, and business concentration courses.

CBA students must earn a minimum NU GPA of 2.50 and a minimum Business GPA of 2.50. If students are earning an accounting concentration or secondary concentration, a minimum upper division accounting GPA of 2.50 is additionally required.

Marketing Concentration

Students earning a concentration in marketing learn research skills necessary for discovering the needs or desires of their firm's target market. These skills enable marketers to develop a thorough understanding of their target market(s), the marketplace—whether local, national, global or virtual, the firm's competitors, and the competitive environment. Working together with other units in the firm, marketers design products and services that provide benefits and/or solve customer problems better or more efficiently than competitors' products. In other words, marketers contribute to the firm's competitive advantages to avoid being easily copied by competitors. Marketers design and implement strategic marketing plans in order to

1. Communicate effectively with the target market so customers understand the benefits offered by the firm relative to competitors;
2. Distribute products and services in ways that maximize customer satisfaction while simultaneously minimizing the firm's costs; and
3. Provide value to the target market so that customers are satisfied with the benefits received for the price paid, especially when compared to value available from competitors.

Students must complete MKT 3310 with a C+ or above in order to take additional marketing courses, to complete the marketing concentration, or to complete the secondary concentration in marketing.

Secondary Concentration in Marketing

A secondary concentration in marketing, as a supplement to another BSBA concentration, may be obtained by completing the following:

Code	Title	Credits
MKT 3310	PRINCIPLES OF MARKETING ¹	3
Plus nine (9) hours of upper-division (3000-4000 level) courses in marketing		9

Total Credits 12

¹ MKT 3310 with a grade of C+ or above.
² MKT 4000 can be taken multiple times and may include any department chair approved topic

Students must meet all prerequisites to enroll in MKT 3310. For students who wish to complete a secondary concentration in marketing, at least one of the courses must be MKT 4300 or MKT 4340. For the remaining six (6) hours of upper-division (3000 or 4000 level) marketing courses, any course approved for the marketing concentration may also be used for the secondary concentration in marketing, with the exception of MKT 4500. A grade of C (2.00) or better is required for a course to apply to the secondary concentration.

College of Communication, Fine Arts and Media

College Vision Statement

The College of Communication, Fine Arts and Media (CFAM) is united by its common conviction that imagination and human communication are inseparable aspects of the same intellectual process. Through innovative and traditional teaching and the use of emerging technologies, the college promotes learning, research, scholarship, creative activity, and service

to the profession and to the broader community in all aspects of human communication.

Central to the college's educational mission is the instruction of students in the essential, practical and theoretical knowledge that they will need to succeed in their chosen disciplines. Through its diverse outreach activities, the college is equally committed to the engagement of a broad constituency. The college makes important contributions to the cultural growth and well-being of the people of the region and prepares students to participate in a global community.

General Information

Overview of Degree Programs

The college is structured as three distinct schools: the School of the Arts (Art & Art History, Theatre, Writer's Workshop), the School of Communication and the School of Music.

The College of Communication, Fine Arts and Media (CFAM) offers the following degree programs:

- Bachelor of Arts
- Bachelor of Fine Arts
- Bachelor of Music
- Bachelor of Science
- Graduate Degrees (offered through Graduate Studies)

Accreditation Information

Major	Degree	Accreditation Body
Art History	BA	National Association of Schools of Art and Design (NASAD)
Music	BA	National Association of Music (NASM)
Music Conducting	MM	National Association of Schools of Music (NASM)
Music Education	BM	- National Association of Schools of Music (NASM) - National Council for Accreditation of Teacher Education (NCATE) - Nebraska Department of Education
Music Education	MM	National Association of Schools of Music (NASM)
Music Performance	BM MM	National Association of Schools of Music (NASM)
Studio Art	BASA BFA	National Association of Schools of Art and Design (NASAD)
Studio Art with K-12 Certification	BASA BFA	- National Association of Schools of Art and Design (NASAD) - National Council for Accreditation of Teacher Education (NCATE) - Nebraska Department of Education

Choice of Catalog Policy

The catalog year (requirement term) is what ties the student to the catalog year curriculum that they are required to follow and determines the

contract of degree requirements a student must fulfill in order to graduate. Generally, the catalog year defaults to the same semester that the student entered the University in a degree program; however, students are eligible for more recent catalog years if it is to their benefit and approved by their advisor. By changing catalogs, a student is responsible for fulfilling all of the graduation requirements in their newly chosen catalog year. Requests to Change of Catalog Year must be approved by your Academic Advisor(s) and the CFAM Dean's Office. Students who suspend their matriculation for more than two semesters forfeit the requirements under their initial catalog and must complete the program under the catalog for the academic year in which they return.

Program Contact Information

College of Communication, Fine Arts and Media Dean's Office:
402.554.3857

Program Website (<https://www.unomaha.edu/college-of-communication-fine-arts-and-media/>)

Admission Requirements

Admission to programs in the College of Communication, Fine Arts and Media follow regular admission procedures of the University outlined in the current undergraduate catalog. The application deadline for admission to a degree seeking program is August 1 for fall semester, December 1 for spring semester.

Students who wish to transfer into CFAM from another college within the University must obtain written permission from and meet with a CFAM Dean's Office advisor. A minimum cumulative grade point average (GPA) of 2.25 is required to transfer into the college.

Academic Requirements for the College Degrees

Number of Hours to Graduate

Students must complete a minimum of 120 semester hours of college credit toward the degree of Bachelor of Science in Communication, Bachelor of Arts in Communication, Bachelor of Arts in Art History, Bachelor of Arts in Studio Art, Bachelor of Fine Arts (Studio Art and Creative Writing), Bachelor of Arts in Theatre, Bachelor of Arts in Music or Bachelor of Music. The minimum credit hour requirement for students in art or music seeking K-12 certification may vary according to current guidelines for teacher certification. Students must maintain close contact with an advisor each semester to insure progress toward fulfillment of their course of study. No student may count more than 87 semester hours of credit in any one discipline toward graduation. Actual limits are determined by faculty in the various disciplines.

General Education Requirements

Students are required to complete the UNO General Education requirements. See below for specific information about quantitative literacy and writing in the discipline.

Quantitative Literacy

Students seeking degrees within the College of Communication, Fine Arts and Media can complete any of the courses approved for quantitative literacy.

Writing in the Discipline

The following courses have been approved to fulfill the requirement for Writing in the Discipline for students seeking degrees within the College of Communication, Fine Arts and Media:

Students in Art/Art History, Music (not K-12), and Writer's Workshop

WRWS 3500 Creative Writing in the Arts

Students in Communication studies or Journalism/Media Communication

JMC 2100/JMC 2104 Media Writing/Lab (For students in communication studies or journalism/media communication)

Students in Art, K-12 and Music, K-12 Only

TED 2100 Educational Foundations

Students in Theatre Only

THEA 3710 Theatre History and Literature: Modern 1850-2000

THEA 4780 Theatre History and Literature: Classical to 1500

THEA 4790 Theatre History and Literature: Renaissance to 1850

Academic advisors can provide information about the specific course required for each degree program

Foreign Language Requirement for BA degrees in Music, Theater, and Studio Art degrees

While Bachelor of Arts degrees typically require foreign language as part of the degree requirements, students in music, theatre, and studio arts are exempt from this requirement.

Minimum GPA/Additional Requirements

All students who have not yet earned any college credit and who are eligible to enter the university are accepted for admission to the college. Students who are seeking a degree within the School of Music are also required to complete an entrance audition for admission into the music program.

Admission of transfer students or students who have previously been enrolled at UNO is evaluated on an individual basis. A 2.25 grade point average in previous course work is required.

Application deadline for admission: August 1 for fall semester, December 1 for spring semester

Transfer Credit Policy

Students may apply no more than 96 quarter hours (64 semester hours), transferred from a two year institution, towards a UNO bachelor's degree. Academic advisors retain the right to accept or reject courses based on their transferability and validity to fulfill major requirements.

Unacceptable Credits

Credits in any courses classified as "remedial" or courses in other colleges of the university not approved by the College of Communication, Fine Arts and Media faculty may not be applied toward degrees offered by CFAM.

Retroactive Credit Policy

Placement Exams and Credit by Examinations Policies/Practices

<https://nextcatalog.unomaha.edu/undergraduate/student-life-support-services/testing-center/> (p. 64)

Residency Requirement

Thirty (30) of the last 36 hours required for the degree must be registered for and completed at the University of Nebraska at Omaha.

Quality of Work

A grade of "C" or higher will be required for any major course accepted for any College of Communication, Fine Arts and Media degree requirement. All students must maintain a minimum 2.0 grade point average (GPA) in all course work, including work transferred from other institutions, to remain in good standing in the college.

The School of Communication requires students to earn a minimum of "C" in all major course work. Furthermore, students who take sophomore level or above journalism and media communication courses, or junior level or above communication studies courses must maintain at least a 2.25 cumulative GPA.

The unit of Art & Art History requires students maintain a cumulative 2.5 GPA in all art courses. Studio majors must maintain a 3.0 GPA in their concentration studio areas. Students seeking K-12 certification must adhere to the GPA/grading standards set for the UNO Teacher Educator Preparation Program.

The School of Music requires a 2.5 GPA in all music courses. Students enrolled in the Bachelor of Music, performance concentration must maintain a 3.0 average in their major applied field. Students seeking K-12 certification must adhere to the GPA/grading standards set for the UNO Educator Preparation Program

All grades reported by the faculty to the registrar become a part of the student's permanent record and are included in computation of the cumulative grade point average, regardless of the total number required for the degree.

Good Academic Standing Policy

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

Credit/No Credit (CR/NC) Grades

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

Completion of Incomplete Grade

Students have one semester after an incomplete is awarded to complete the course work. After this, the grade changes to a withdrawal. Students who complete the required course work outside of the allotted time frame may still receive credit by re-enrolling and paying tuition for the course. Exceptions are made when a student has been working in good faith continuously to complete the course work, with no breaks in work submitted, or within contracted terms determined by the faculty member.

Repeatable Grades/Courses

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

Appeal Process

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

Grade Appeal Policy

Undergraduate students wanting to appeal a grade received in a College of Communication, Fine Arts and Media unit course should first discuss the matter directly with the instructor. If a satisfactory agreement is not

reached, the student may submit an appeal in writing to the chair/director of the academic unit in which the course is offered.¹

If the student and chair/director of the academic unit do not reach a satisfactory agreement, the student may submit an appeal in writing to the Dean of the College of Communication, Fine Arts and Media, at which point the appeal may be referred to the Education Policy Committee of the College for review. The student's written appeal to the Dean must be made by the end of the following semester after the academic unit's decision. For example, if the academic unit's decision is made in the fall semester, the student has until the end of the spring semester to submit a written appeal. If the Education Policy Committee of the College reviews the appeal it may request additional information from the student, the instructor, the academic unit or its chair/director as needed. Education Policy Committee members who have voted on the case at the academic unit level must recuse themselves from the Committee's vote. Upon making a decision, the Education Policy Committee will send its recommendation to the Dean's office in writing, and the Dean's office will notify the student of the College's decision.

Academic Amnesty

A student enrolled in the College of Communication, Fine Arts and Media may request to have one or two semesters (taken at UNO, UNL, and/or UNK) removed from their cumulative grade point average and degree consideration by petitioning for academic amnesty. The form for academic amnesty can be found at [The form for applying for Academic Amnesty can be found here \(https://www.unomaha.edu/college-of-communication-fine-arts-and-media/_files/docs/AcademicAmnestyPetition.pdf\)](https://www.unomaha.edu/college-of-communication-fine-arts-and-media/_files/docs/AcademicAmnestyPetition.pdf)

The following conditions for academic amnesty apply:

- The student must be at least four years removed from the semester(s) to be considered for academic amnesty.
- Petitioning students must have completed 24 credit hours of successful course work with a minimum grade point average of 2.5 since the amnesty period at UNO, UNL or UNK.
- Removal of GPA computation shall be by entire semester(s).
- Students who are granted academic amnesty will not be considered for degrees with academic honors. Names of petitioners will be reviewed by the dean's office for final action. There shall be no physical obliteration of any part of the student's record. Academic amnesty is not allowed after a student has graduated.

Academic Probation and Suspension

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

Reinstatement Policy Following Academic Suspension

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

Academic Advising

Each student enrolled in a College of Communication, Fine Arts and Media degree program is encouraged to review requirements for their intended degree with an assigned academic advisor. Information on assigned advisors is available in the student's relevant school offices. Additionally, students can contact academic advisors via the **MavTRACK** (<https://www.unomaha.edu/my/advising-system-mavtrack.php>). Review of specific degree requirements should be conducted with an advisor at scheduled times each semester in preparation for and prior to each enrollment/registration period.

Advising Holds

<https://nextcatalog.unomaha.edu/undergraduate/enrollment/enrollment/> (p. 23)

Student Holds

<https://nextcatalog.unomaha.edu/undergraduate/enrollment/enrollment/> (p. 23)

Senior Check

Students who have completed 91+ credit hours toward their chosen degree program are required to have a senior check completed by an academic advisor. This process will assure the student's graduation date, assuming satisfactory completion of all approved courses. All substitutions and/or changes to a student's degree requirements must be noted in writing during the advising process. Should this procedure not be followed, responsibility for meeting graduation requirements falls on the student. Errors made could prevent timely graduation.

School of Communication

Mission

The School of Communication provides a student-centered, dynamic environment designed to elevate, empower, and engage students to become skilled, ethical citizens and professionals who can excel in diverse local and global communities.

Vision

Our vision is to be a recognized leader in innovative teaching, leading-edge research/creative activity, and community-engagement initiatives. We will achieve this by supporting and attracting exceptional faculty and outstanding undergraduate and graduate students from within and outside the metropolitan area.

Other information

For students who are majors in the School of Communication, courses that have been applied toward general education requirements may also be applied to the major, minor, or second-field of concentration requirements, with the exception of the courses used to fulfill the general education oral communication requirement.

All students who take most sophomore-level or above (2000-, 3000- or 4000-level) journalism and media communication courses (JMC), or junior-level or above (3000- or 4000-level) communication studies (CMST) courses, are required to have a cumulative grade-point average of at least 2.25. Any exceptions will be by written permission of the school. Students will receive a worksheet listing requirements to track their progress toward a degree.

Communication studies majors may not complete more than a total of three hours of credit for forensics activities (CMST 3150 and CMST 3160) or more than a total of four hours of credit for internships, Applied Journalism/Broadcasting (JMC 3970), independent study, and advanced practicum. Exceptions to these limits can be made by the School of Communication director.

Journalism and media communication majors may not complete more than a total of four hours of credit for internships, Applied Journalism/Broadcasting (JMC 3970), independent study, and advanced practicum. Exceptions to these limits may be made by the School of Communication director.

Students may have two majors within the School of Communication by completing the requirements for both majors. Journalism and Media Communication majors may have a second major in Communication Studies, and Communication studies majors may have a second major in Journalism and Media Communication. Some classes, such as JMC 4970 /CMST 4970 , Internship Experience, may count toward both majors with adviser approval.

The Bachelor of Arts in Communication (BAC) degree includes a foreign language requirement (16 credit hours or high school equivalent), while the Bachelor of Science in Communication (BSC) degree includes a minimum of

15 hours in a second field of study (or a minor as specified by a department or school). A second field of study is defined as courses within a single department of the university or as courses that all relate to a single subject area or topic. The second field of study must include at least six hours of upper-level courses (3000- or 4000-level) except as specifically exempted in writing by a school adviser or the school director.

Students must earn at least a "C" in all courses required for the major, as well as in all foreign language courses required for the Bachelor of Arts in Communication and in all classes in the second field of study (or minor) required for the Bachelor of Science in Communication.

Contact

The School of Communication office areas are located in Arts and Sciences Hall Room 140, Room 107, Room 108, and Room 105. Phone: 402.554.2600 or 402.554.2520.

Website (<http://communication.unomaha.edu/>)

Degrees Offered

The School of Communication offers Bachelor of Arts and Bachelor of Science degree programs with majors in Communication Studies (course prefix is CMST) and Journalism and Media Communication (course prefix is JMC).

- Communication Studies, Bachelor of Arts (p. 421)
- Communication Studies, Bachelor of Science (p. 423)
- Journalism and Media Communication, Bachelor of Arts (p. 426)
- Journalism and Media Communication, Bachelor of Science (p. 430)

Writing in the Discipline

The advanced writing classes for all School of Communication majors are Media Writing Lab and Lecture JMC 2100 and JMC 2104).

Communication Studies

The requirements for the major in communication studies will include a minimum of 48 credits, plus 15 credits in a second field of study for a Bachelor of Science in Communication and 16 hours in a foreign language for a Bachelor of Arts in Communication.

Communication studies majors may choose from four career pathways: 1) *Corporate Training & Organizational Leadership*; 2) *Diversity & Cultural Affairs*; 3) *Human Relations & Conflict Management*; and 4) *Public Advocacy & Civic Engagement*.

Journalism and Media Communication

The major in journalism and media communication requires a minimum of 60 credits, plus 15 credits in a second field of study for a Bachelor of Science in Communication degree and 16 hours in a foreign language for a Bachelor of Arts in Communication degree. A total of 120 credits are required, including general education requirements and general electives.

Journalism and media communication majors must select one of three sequences (journalism, public relations/advertising, and creative media). Note: journalism and media communication courses may also be listed under the former course prefixes, JOUR and BRCT.

Minors Offered

- Communication Studies Minor (p. 425)
- Journalism and Media Communication Minor (p. 435)
- Visual Communication and Culture Minor (p. 435)

Communication Studies

Effective communication, whether written, spoken or non-verbal is essential for success in any career field and students who major in Communication Studies develop and hone these critical skills. Besides strong verbal,

nonverbal, and written communication skills, students who major in Communication Studies also develop expertise in speaking in front of small and large audiences. As part of the curriculum, students complete internships with nationally and internationally recognized organizations, both profit and non-profit.

The undergraduate program in Communication Studies offers students four career pathways: *Corporate Training and Organizational Leadership*; *Diversity and Cultural Affairs*; *Human Relations and Conflict Management*; and *Public Advocacy and Civic Engagement*.

Possible careers in Corporate Training and Organizational Leadership include:

- Career Planning Consultant
- Customer Relations Representative
- Trainer/Recruiter
- Personnel Interviewer
- Team Facilitator
- Employee Relations Representative
- Project Manager

Possible careers in Diversity and Cultural Affairs include:

- Community Relations
- Cultural Adjustment Facilitator
- Diversity Trainer/Consultant
- Peace Corp/Social and Human Services
- Political Coordinator

Possible careers in Human Relations and Conflict Management include:

- Claims Representative
- Community Relations
- Customer Service
- Social and Human Services
- Community Organizer
- Conflict Resolution Trainer
- Group/Team Facilitator
- Negotiator/Mediator

Possible careers in Public Advocacy and Civic Engagement include:

- Community Affairs Liaison
- Elected Official/Leader
- Legislative Assistant
- Lobbyist
- Press Secretary

Journalism and Media Communication

Journalism and Media Communication provides a comprehensive education in convergence journalism. Coursework in video/radio production, mass communication, media story-telling and communication law provide a foundation for any form of media communication.

Beyond the classroom, students get hands-on experiences working in the field through internships; service learning projects; production of the Omaha News, a weekly news program from the studios of UNO Television; working both on-air and behind the scenes at MavRadio (<https://www.mavradio.fm/>), our student-run radio station; broadcasts of UNO athletic events held at Baxter Arena; and working directly with professional clients in MavPR and Capstone Communications. Regardless of the path a student chooses, a degree in journalism/media communication can lead to

multiple career opportunities in front of the camera, behind it, in print, and online.

Creative Media

- Social media manager
- Brand manager
- Podcaster/host
- Video blogger
- Radio broadcaster

Journalism

- Journalist
- Technical writer
- Business editor
- Staff writer
- News producer
- Digital strategist

Public Relations/Advertising

- Public Relations specialist
- Copywriter
- Marketing director
- Campaign manager
- Media buyer

Communication Studies

CMST 1000 PUBLIC SPEAKING ANXIETY: CONQUER IT (1 credit)

This course will provide you with the practical techniques needed to reduce public speaking anxiety. You will learn the causes, bases, effects, and techniques to help you conquer public speaking anxiety while taking or before taking a public speaking class or before giving a presentation at any level for any major.

CMST 1110 PUBLIC SPEAKING FUNDS (3 credits)

Public Speaking Fundamentals helps students become effective public speakers, as well as critical listeners and evaluators of public communication. Students will learn the principles of audience adaptation, topic selection, organization, development of ideas and presentation of speeches. Each student will design and present a minimum of four public speeches. (Special 'Speaking Confidently' sections are available for the students with excessive levels of fear about public communication. Contact the School of Communication for applications.)

Distribution: Fundamental Academic Skills-Public Speaking

CMST 1310 PERSPECTIVES IN COMMUNICATION STUDIES (3 credits)

This course surveys concepts in the dynamic field of speech communication. Students will examine how communication practices shape our worldviews and our relationships in both private and public contexts. This course emphasizes concepts including, but not limited to: a) interpersonal relationships, b) organizational communication & employee relations, c) public & political communication, d) communication technology & human relationships, e) culture & communication, f) health communication, g) communication training & instructional development and h) conflict resolution. Students will also have the opportunity to be informed about possible careers in speech communication.

Prerequisite(s)/Corequisite(s): Not open to nondegree graduate students

Distribution: Social Science General Education course

CMST 2010 INTERPERSONAL COMMUNICATION (3 credits)

This course is an introduction to the study of interpersonal communication. Within this course, students will be introduced to the theories, research, and concepts relevant to interpersonal communication and will be given opportunities to develop and enhance their own communication skills.

Distribution: Social Science General Education course

CMST 2100 INTRODUCTION TO COMMUNICATION THEORY (3 credits)

Communication Theory is an undergraduate course designed to introduce students to the major foundational theories that inform the field of communication. Special emphasis is placed on communication theories that examine the self, the message, relationship development, groups and organizations, the public and the media, as well as culture and diversity. Skills learned in this course are necessary foundations for the upper-level communication courses as well as the Communication Studies capstone course.

CMST 2120 ARGUMENTATION AND DEBATE (3 credits)

Theory and practice of effective argumentation and debate. Students will participate in a variety of speaking activities involving the application of argumentation principles to current political and social issues.

Distribution: Fundamental Academic Skills-Public Speaking

CMST 2410 SMALL GROUP COMMUNICATION AND LEADERSHIP (3 credits)

This course is an introduction to the theory and practice of communication and leadership within small group settings. This course will provide students with broad knowledge about small group communication processes.

Distribution: Social Science General Education course

CMST 2420 PARLIAMENTARY PROCEDURE AND MEETING MANAGEMENT (2 credits)

Theory and practice of parliamentary procedure; forming organizations and drawing up constitutions and by-laws.

Prerequisite(s)/Corequisite(s): CMST 1110 or CMST 2120. Not open to non-degree graduate students.

CMST 3100 PRESENTATION & INTERVIEW ANXIETY REDUCTION TECHNIQUES (3 credits)

This course will provide you with the knowledge and practice of techniques related to reducing presentational speaking and interview anxieties. You will learn the causes, bases, measurement, correlates, effects, and treatment techniques for those who experience communication anxieties, especially related to giving a speech or preparing for an interview. Then you will develop a plan and execute the plan to reduce your presentation and interview anxieties.

Prerequisite(s)/Corequisite(s): A minimum cumulative GPA of 2.25 and CMST 1110 or 2120 and Junior Standing

CMST 3120 PERSUASIVE SPEAKING (3 credits)

This course explores persuasive public speaking and helps students learn to create messages of influence. Students will engage in audience analysis, organization, language choices, presentational slide development, delivery, and evaluation with an emphasis on effective use of persuasion speaking methodologies.

Prerequisite(s)/Corequisite(s): CMST 1110 or CMST 2120 (or SPCH 1110 or SPCH 2120); and minimum cumulative GPA of 2.25

CMST 3130 SPEECH COMMUNICATION IN BUSINESS AND THE PROFESSIONS (3 credits)

This course is designed to introduce students to the important and varied role communication plays in the workplace and other professional settings.

The course emphasizes informative and persuasive communication principles and practices in one-to-many presentational situations as well as group communication and interviewing.

Prerequisite(s)/Corequisite(s): Junior standing and CMST 1110 or 2120 or SPCH 1110 or 2120; and a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

CMST 3140 ADVANCED PUBLIC SPEAKING (3 credits)

This course covers the techniques, theory, and practice in the composition and presentation of public speeches.

Prerequisite(s)/Corequisite(s): CMST 1110 or CMST 2120 (or SPCH 1110 or SPCH 2120); and a minimum cumulative GPA of 2.25.

CMST 3150 INTERCOLLEGIATE FORENSIC ACTIVITIES (1-3 credits)

For those communication, pre-law, and other interested students who desire to participate in intercollegiate debate and forensics (informative, persuasive, impromptu, extemporaneous, and after-dinner speaking; oral interpretation, solo and or duet acting, rhetorical criticism, and discussion).

Prerequisite(s)/Corequisite(s): Permission of the Director of Forensics only

CMST 3160 INTERCOLLEG FORENSIC ACTVTS (1-3 credits)

For those communication, pre-law, and other interested students who desire to participate in intercollegiate debate and forensics (informative, persuasive, impromptu, extemporaneous, and after-dinner speaking; oral interpretation, solo and or duet acting, rhetorical criticism, and discussion).

Prerequisite(s)/Corequisite(s): Permission of the Director of Forensics only

CMST 3510 CULTURAL COMMUNICATION IN AFRICAN-AMERICAN CINEMA (3 credits)

This course examines ways in which cultural identity is communicated through African-American cinema, defined as movies with predominantly African American filmmakers, producers, and/or actors. Cultural communication is integrated with historical, political, and social motivation for African-American cinema. (Cross-listed with BLST 3510)

Prerequisite(s)/Corequisite(s): Sophomore standing and a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course

CMST 3520 INTERVIEWING (3 credits)

This course is a practical course that focuses on various types of interview performances. The course will explore interview types such as probing/journalistic, survey, recruiting/employment, performance, counseling, and persuasive

Prerequisite(s)/Corequisite(s): SPCH 1110 or SPCH 2120 or CMST 1110 or CMST 2120; sophomore standing; a minimum cumulative GPA of 2.25.

CMST 3600 SPECIAL TOPICS IN COMMUNICATION STUDIES (3 credits)

A variable topic course in communication studies at the Junior level. Topics to be covered may include but are not limited to: marital and family communication, instructional communication, organizational communication, intercultural communication, conflict, relational communication, communication competence, health communication, communication research or theory, communication and gender, social movements, political communication, listening, communication and the aged, etc. (May be repeated for credit as long as the topic is not the same.)

Prerequisite(s)/Corequisite(s): Junior standing or permission of the instructor; a minimum cumulative GPA of 2.25.

CMST 3750 GENDER AND COMMUNICATION (3 credits)

This course provides a survey of literature on communication about, by, and between women and men in society, personal relationships, and organizations. Students develop an understanding of how cultural meanings of gender both shape and are shaped by communication. (Cross-listed with WGST 3750).

Prerequisite(s)/Corequisite(s): Junior standing; minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course

CMST 4110 RHETORICAL THEORY AND CRITICISM (3 credits)

Rhetorical theory and criticism, emphasizing ways of evaluating oral communication. (Cross-listed with CMST 8116)

Prerequisite(s)/Corequisite(s): Junior standing and (Journalism/Media Communication major or Communication Studies major)

CMST 4120 COMMUNICATION AND SOCIAL PROTEST (3 credits)

This class will examine the role played by communication in movements for social change in contemporary society. We will examine social movements which rely on speeches (i.e. women's rights movements), social movements which rely on the grassroots political efforts of their members (i.e. the environmental rights movement) and the overall strategies of persuasion utilized in movements which seek social change, including emerging communication technologies. (Cross-listed with CMST 8126)

Prerequisite(s)/Corequisite(s): Junior Standing; 2.25 GPA

CMST 4130 FAMILY COMMUNICATION (3 credits)

This course emphasizes the role of communication in family relationships. Theories, models, and research methods will be used to examine the family in various cultures and contexts (e.g., nuclear families, single-parent families, and blended families). Topics that will be covered in this course include: family conflict, family roles, family stories, family stress, family well-being, genograms, marriage, and divorce. (Cross-listed with CMST 8136)

Prerequisite(s)/Corequisite(s): The prerequisite for the course is junior standing, and CMST 2010 or CMST 2410.; a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

CMST 4140 COMMUNICATION AND HUMAN RELATIONSHIPS (3 credits)

This course applies theories of interpersonal processes and communication principles to the study of close, significant and personal human relationships. Discussion focuses on the communication in different types of relationships and relational stages, e.g., strangers, acquaintances, friendships and intimates. (Cross-listed with CMST 8146)

Prerequisite(s)/Corequisite(s): Junior standing and (CMST 2010 or CMST 2410 or SPCH 2010 or SPCH 2410); and a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

CMST 4150 CORPORATE TRAINING AND DEVELOPMENT (3 credits)

This course introduces students to the process of designing communication training programs and workshops for a variety of professional settings. It provides students, especially those who are prospective trainers and/or consultants, with experiential and cognitive knowledge about needs assessment, adult learning, communication training research, objectives writing, module design, interactive delivery methods and program evaluation. (Cross-listed with CMST 8156)

Prerequisite(s)/Corequisite(s): Junior standing; and a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

CMST 4160 COMMUNICATION FOR INSTRUCTIONAL SETTINGS (3 credits)

This course is designed to help prospective instructors and/or trainers understand and apply the principles of communication in instructional settings (i.e., classrooms, workshops, training programs). It introduces students to the research area in the speech communication discipline called 'Instructional Communication' by covering these five units:

1) Communication Strategies, Objectives, & Content; 2) Student Communication Needs & Expectations; 3) Feedback, Reinforcement, & Discussion; 4) Context, Climate, & Influence; and 5) Teacher Communicator Style, Characteristics, & Behaviors. (Cross-listed with CMST 8166)

Prerequisite(s)/Corequisite(s): Junior standing, and CMST 2010 or CMST 2410 (or SPCH 2010 or SPCH 2410); and a minimum cumulative GPA of 2.25.

CMST 4170 ORGANIZATIONAL COMMUNICATION (3 credits)

This course will help students understand organizational communication theories, models, and processes; apply these principles in organizational communication speaking exercises; and learn management and leadership skills. (Cross-listed with CMST 8176)

Prerequisite(s)/Corequisite(s): Junior standing; and a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

CMST 4180 COMMUNICATION LEADERSHIP AND POWER AND ORGANIZATIONS (3 credits)

This course provides theoretical and experiential knowledge about such topics as communication leadership styles and tactics, superior and subordinate interactions, power, ethical responsibilities, and diversity gender issues related to communication leadership. (Cross-listed with CMST 8186)

Prerequisite(s)/Corequisite(s): Junior standing; and a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

CMST 4190 COMPUTER-MEDIATED COMMUNICATION (3 credits)

Computer Mediated Communication addressing emerging issues of virtual communities, identity, civic life and participation, online relationships, collaborative work environments, digital networks, gender race class issues, legal and ethical considerations of technology, and commodification of mediated communication. (Cross-listed with CMST 8196)

Prerequisite(s)/Corequisite(s): CMST 1110 (or SPCH 1110) and Junior standing; a minimum cumulative GPA of 2.25.

CMST 4220 HEALTH COMMUNICATION (3 credits)

This course introduces students to the interdisciplinary field of health communication. In this course, students will learn various theories of health communication as well as current research and trends in health communication and its related fields. To speak to the complexity and dynamism of health communication, this course will expose students to the multiple voices and perspectives involved in the delivery of health and healthcare. (Cross-listed with CMST 8226)

Prerequisite(s)/Corequisite(s): Junior standing; a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

CMST 4510 PERSUASION AND SOCIAL INFLUENCE (3 credits)

The primary goal of this course is to provide students with a solid grounding in theories, principles, and strategies of persuasion social influence as they apply to everyday contexts in which influence attempts take place. Students should gain familiarity with findings from empirical investigations on persuasion, social influence, and compliance gaining, and will learn about strategies and techniques of persuasion relating. (Cross-listed with CMST 8516)

Prerequisite(s)/Corequisite(s): Junior standing and (CMST 2010 or CMST 2410 or SPCH 2010 or SPCH 2410); and a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

CMST 4520 PSYCHOLINGUISTICS (3 credits)

A discussion of the literature concerned with how such psychological variables as perception, learning, memory and development relate to the linguistic variables of sentence structure, meaning and speech sounds (Cross-listed with CMST 8526.)

Prerequisite(s)/Corequisite(s): Senior standing; a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

CMST 4530 INTERCULTURAL COMMUNICATION-US (3 credits)

This course will provide a foundation that leads to Intercultural Communication competence. Specifically, this course is to introduce the concepts of cross-cultural communication. Theory and research are integrated with application and necessary skills are identified and developed. (Cross-listed with CMST 8536)

Prerequisite(s)/Corequisite(s): Junior standing; and a minimum cumulative GPA of 2.25.

Distribution: U.S. Diversity General Education course

CMST 4540 CONTEMPORARY SYSTEMS OF COMMUNICATION (3 credits)

An adaptation of General Systems Theory concepts to the study of human communication processes with emphasis on systems analysis of contemporary interpersonal communication perspectives. (Cross-listed with CMST 8546)

Prerequisite(s)/Corequisite(s): CMST 1110 and three hours of mathematics and three hours of natural sciences; or permission; and a minimum cumulative GPA of 2.25.

CMST 4550 NONVERBAL COMMUNICATION (3 credits)

This course is designed to familiarize the student with current knowledge and research about nonverbal communication and to provide a wide variety of practical experiences through which the student can analyze and evaluate his or her own nonverbal behavior and that of others. The course, also, reviews the functions, areas and applied contexts of nonverbal communication. (Cross-listed with CMST 8556)

Prerequisite(s)/Corequisite(s): Junior standing and (CMST 2010 or CMST 2410 or SPCH 2010 or SPCH 2410); and a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

CMST 4560 COMMUNICATION, TEAMWORK, & FACILITATION (3 credits)

This course focuses on the communication practices, process tools, and theory associated with team problem solving, group discussion, facilitation skills, facilitative leadership, meeting management, and training in effective group interaction. (Cross-listed with CMST 8566)

Prerequisite(s)/Corequisite(s): A minimum cumulative GPA of 2.25. Not open to nondegree students.

CMST 4570 INTERCULTURAL COMMUNICATION IN THE GLOBAL WORKPLACE (3 credits)

This course examines the intercultural perspective of organizational communication in a modern global world by focusing on the management of cultural differences in the global workplace. The trend towards a global economy is bringing people of different ethnic and cultural background together. Thus, the development of greater intercultural understanding has become an essential element of global workplace. After taking this course you will be more aware of cultural diversity in an organizational setting and further develop intercultural sensitivity and intercultural competence that will help you adapt to your future organizational life. (Cross-listed with CMST 8576).

Prerequisite(s)/Corequisite(s): Junior standing; and a minimum cumulative GPA of 2.25.

Distribution: Global Diversity General Education course

CMST 4580 COMMUNICATING RACE, ETHNICITY & IDENTITY (3 credits)

This is an undergraduate/graduate course that provides students with definitional and experiential knowledge about the origin of racial concepts, theories, and practices, definitions of ethnicity and identity, and the communicative relationship between race, ethnicity, and identity. (Cross-listed with CMST 8586, BLST 4580, BLST 8586)

Prerequisite(s)/Corequisite(s): CMST 4530 or Junior standing or instructor permission; minimum cumulative GPA of 2.25.

Distribution: U.S. Diversity General Education course

CMST 4600 COMMUNICATION THEORY AND APPLICATION (3 credits)

This course begins by introducing students to two broad categories of theory development - objective and interpretive. Then concepts and assumptions associated with each of these two perspectives are employed to critically evaluate several specific theories that fall within different of the sub-disciplines of the field of communication: interpersonal, group, organizational, mass, public/thetorical, cultural, and intercultural/gender. Along with critically evaluating and comparing/contrasting different communication theories, emphasis is placed on how the theories can be effectively applied in concrete settings and circumstances. (Cross-listed with CMST 8606)

Prerequisite(s)/Corequisite(s): Junior standing; and a minimum cumulative GPA of 2.25.

CMST 4620 DIRECTING FORENSICS (3 credits)

To provide students planning to teach speech in high school or college with a philosophy and detailed knowledge of how to direct a forensics program. (Cross-listed with CMST 8626)

CMST 4700 INTERPERSONAL CONFLICT (3 credits)

This course provides an overview of interpersonal conflict processes. It examines perspectives on conflict, patterns of constructive and destructive conflict, conflict styles and tactics, interpersonal power, negotiation strategies, conflict assessment, and conflict skill development. (Cross-listed with CMST 8706)

Prerequisite(s)/Corequisite(s): Junior standing and (CMST 2010 or SPCH 2010); and a minimum cumulative GPA of 2.25.

CMST 4800 CONFLICT MEDIATION (3 credits)

This course develops knowledge of mediation theory, research, and practice and communication skills essential to the effective mediation of disputes in various contexts. (Cross-listed with CMST 8806)

Prerequisite(s)/Corequisite(s): Junior standing and (CMST 2010 or CMST 3520 or CMST 4700 or SPCH 2010 or SPCH 3520 or SPCH 4700); and a minimum cumulative GPA of 2.25.

CMST 4940 COMMUNICATION STUDIES CAPSTONE SEMINAR (3 credits)

Communication Studies Capstone Seminar is an undergraduate course designed to provide students with the opportunity to integrate the knowledge and skills they have acquired as communication majors and to prepare them to enter the job market or graduate school using their speech communication skills and knowledge.

Prerequisite(s)/Corequisite(s): Senior standing; minimum cumulative GPA of 2.25 and major in Communication Studies. Not open to non-degree students.

CMST 4960 INTERNSHIP AND CAREER PREPARATION SEMINAR (1 credit)

This course will prepare students for doing an internship in a communication-related field by addressing such topics as writing resumes and cover letters, interviewing for jobs, and organizing a professional portfolio of their work. The topics covered also will assist with general career preparation. (Cross-listed with JMC 4960)

Prerequisite(s)/Corequisite(s): Sophomore standing; School of Communication major or minor; and minimum cumulative GPA of 2.25.

CMST 4970 INTERNSHIP EXPERIENCE (1 credit)

This course will provide students professional communication-related experience in an internship approved and supervised by the School of Communication. (Cross-listed with JMC 4970)

Prerequisite(s)/Corequisite(s): JMC 4960, CMST 4960, BRCT 4960, JOUR 4960, or SPCH 4960; junior standing; School of Communication major or minor; instructor permission; and minimum cumulative GPA of 2.25.

CMST 4980 INDEPENDENT STUDY COMMUNICATION (1-3 credits)

Specialized studies in communication supplementing regular courses: readings, research, tutorial.

Prerequisite(s)/Corequisite(s): Junior standing and Communication Major

CMST 4990 ADVANCED COMMUNICATION PRACTICUM (1-3 credits)

Special practicum experience in an area of communication.

Prerequisite(s)/Corequisite(s): Junior standing and Communication Major

Journalism and Media Communication

JMC 1050 FILM HISTORY AND APPRECIATION (3 credits)

A journey through one of many different possible worlds of film. Students will learn about various dimensions of filmmaking—historical development, cinematography, editing, screenwriting, and so much more. Exposure to critical perspectives on the genre(s) under consideration. Includes regular viewing of excerpts and full-length films. (Cross-listed with THEA 1050).

Distribution: Humanities and Fine Arts General Education course

JMC 1500 INTRODUCTION TO JOURNALISM AND MEDIA COMMUNICATION (3 credits)

A survey of the history, organization and social significance of the mass media, including newspapers, radio, television, books, magazines, advertising, public relations and films.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

JMC 2000 INFORMATION LITERACY FOR COMMUNICATION PROFESSIONALS (3 credits)

This course adapts information literacy to the specific needs of communication professionals, focusing on subject matter that is often in the news, in areas (such as geography, mathematics, various methods of professional practice, and concepts in natural sciences) that have been identified as shortcomings by faculty.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

JMC 2100 MEDIA WRITING LABORATORY (3 credits)

This class will teach students to gather information and write for all areas of mass communication, including print, broadcast, online media, public relations and advertising.

Prerequisite(s)/Corequisite(s): ENGL 1150; concurrent registration with JMC 2104

Distribution: Writing in the Discipline Single Course

JMC 2104 MEDIA WRITING LECTURE (1 credit)

Media Writing Lecture will help students master grammar, punctuation, spelling, Associated Press style and other language skills required for working in communication fields.

Prerequisite(s)/Corequisite(s): ENGL 1150; concurrent registration with JMC 2100

JMC 2150 NEWS WRITING AND REPORTING (3 credits)

The class addresses the theory and practice of writing and reporting for media audiences, with an emphasis on print and online media. Some of the assignments in the class will focus on covering public affairs and analyzing media coverage of public affairs.

Prerequisite(s)/Corequisite(s): JMC 2100, JMC 2104 and minimum cumulative GPA of 2.25.

JMC 2160 EDITING PRINCIPLES (3 credits)

This class encompasses the evaluation, editing and production of content for the print and online media, as well as public relations. It also includes writing headlines and captions, as well as learning layout and design principles.

Prerequisite(s)/Corequisite(s): JMC 2150 and minimum overall GPA of 2.25

JMC 2200 MEDIA STORYTELLING (3 credits)

Media Storytelling applies the skills learned in JOUR 2100 and JOUR 2104, Media Writing Lab and Lecture. Writing will remain a central focus of the class. Students will create online spaces and manage the content of those spaces. The class will provide a survey of skills in photography, videography, audio production and social media.

Prerequisite(s)/Corequisite(s): JMC 2100 and JMC 2104; a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

JMC 2320 VIDEO FIELD PRODUCTION (3 credits)

The class provides in-depth, hands-on theory and practice of field production and editing principles and techniques. It expands from single-camera to multi-camera projects. The goal is for students to leave this course with a strong understanding of aesthetic shooting principles, audio and video equipment, and a solid working knowledge of field production and post-production practices.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

JMC 2370 RADIO/AUDIO I (3 credits)

This course emphasizes the fundamentals of audio production and writing for radio and its online communication venues. On-air delivery, use of video and audio streaming and broadcast industry issues are also covered.

JMC 3030 ELECTRONIC NEWS WRITING AND REPORTING (3 credits)

This class offers an overview of writing news stories for radio, television and online venues. Writing style and technique, as well as news judgment, are emphasized. Some of the assignments in the class will focus on covering public affairs and analyzing media coverage of public affairs.

Prerequisite(s)/Corequisite(s): JMC 2100 or JMC 2104; and minimum cumulative GPA of 2.25.

JMC 3110 PHOTOGRAPHY (3 credits)

The theory, techniques and application of basic photographic operations of exposure, development and printing.

Prerequisite(s)/Corequisite(s): Sophomore standing and minimum overall GPA of 2.25

JMC 3220 CRITICAL WRITING FOR THE MASS MEDIA (3 credits)

This course is an introduction into journalistic opinion writing covering editorials, columns and popular entertainment reviews.

Prerequisite(s)/Corequisite(s): JMC 2100, JMC 2104; and minimum cumulative GPA of 2.25.

JMC 3230 PRINCIPLES OF PUBLIC RELATIONS (3 credits)

This course will focus primarily on techniques to garner and sustain public understanding, acceptance and support for an organization. This course will explain the merits of these techniques through theory and application, and will offer constant reminders of the relationship between theory and practice. Understanding theory can result in more efficient and effective use of techniques. (Cross-listed with JMC 8235).

Prerequisite(s)/Corequisite(s): JMC 2100, JMC 2104 and minimum GPA of 2.25

JMC 3270 PUBLIC AFFAIRS REPORTING (3 credits)

The class is designed to help students build and refine their researching, interviewing, reporting and writing skills through the coverage of a public affairs news beat for print, broadcast and online formats.

Prerequisite(s)/Corequisite(s): JMC 2150 or JMC 3030; minimum cumulative GPA of 2.25.

JMC 3300 SOCIAL MEDIA METRICS (3 credits)

Social Media Metrics applies quantitative literacy methods and online media skills to current measurement of social media. Students will experiment with currently available measurement tools to identify and learn to use best practices.

Prerequisite(s)/Corequisite(s): JMC 2200; and minimum cumulative GPA of 2.25

JMC 3320 VIDEO FIELD AND STUDIO PRODUCTION (3 credits)

The class introduces the student to the studio-production environment, equipment, and best practices. It applies single- and multi-camera field-production concepts to a multi-camera live switched environment. It provides reinforcement of field production and editing principles by integrating pre-produced elements into a live production. The goal is for students to leave this course with a strong understanding of live-production principles, studio-production equipment, and a solid working knowledge of studio-production and field-production practices.

Prerequisite(s)/Corequisite(s): JMC 2320 and minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

JMC 3330 TELEVISION NEWS VIDEO (3 credits)

Theories and techniques of shooting and editing TV news video.

Prerequisite(s)/Corequisite(s): JMC 3030 and minimum cumulative GPA of 2.25. Concurrent registration with JMC 3030 is permissible.

JMC 3350 MEDIA COMMUNICATION RESEARCH (3 credits)

Comprehensive overview of mass communication research focusing on planning, designing, conducting, analyzing, interpreting and applying research to address communication issues and problems.

Prerequisite(s)/Corequisite(s): Junior standing, and 2.25 cumulative GPA

JMC 3370 RADIO/AUDIO II (3 credits)

This course emphasizes the use of audio-editing techniques in multimedia digital production. The course uses computer-based audio production systems to create interactive media.

Prerequisite(s)/Corequisite(s): JMC 2370; and cumulative GPA of 2.25.

JMC 3400 MAGAZINE ARTICLE WRITING (3 credits)

This course is an introduction to news and feature writing for magazines.

Prerequisite(s)/Corequisite(s): JMC 2100, JMC 2104, and minimum cumulative GPA of 2.25.

JMC 3410 MAGAZINE EDITING, DESIGN AND PRODUCTION (3 credits)

A hands-on approach to magazines as an area of specialization involving development of editorial objectives and content, planning, writing articles, design and layout for magazine production and management. Students will work individually and as a part of the team to produce a magazine for print and digital publishing.

Prerequisite(s)/Corequisite(s): Minimum overall GPA of 2.25, JMC 2100, 2104

JMC 3500 PR AND ADVERTISING DESIGN (3 credits)

This is a course concerned with the principles of print and electronic public relations and advertising design using applied digital methods and skills. Students will learn the principles of design in a variety of print and interactive formats relating to public relations and advertising. Concepts will be taught in a lecture setting, and skills will be demonstrated in a lab setting. An advertising and public relations design campaign will be completed.

Prerequisite(s)/Corequisite(s): JMC 2100, JMC 2104 and minimum cumulative GPA of 2.25.

JMC 3620 PRINCIPLES OF CREATIVE ADVERTISING (3 credits)

This is an introduction to advertising principles in all media, including the psychology of advertising; the creative, production and marketing aspects; and practical exercises in print, broadcast and social media. The course is organized in a way to take students through the process of creating relevant solutions to solve client advertising problems/opportunities.

Prerequisite(s)/Corequisite(s): Minimum cumulative GPA of 2.25.

JMC 3700 INTRODUCTION TO VISUAL COMMUNICATION AND CULTURE (3 credits)

This course will introduce students to 'the visual,' both in production and critique. This course provides students the opportunity to further their own understanding of what "visual culture" is and how they both can critically create and consume the various products of that culture. In addition, this course will help students create, develop, and cultivate the knowledge base they will need to successfully complete the Visual Communication and Culture minor.

Distribution: Humanities and Fine Arts General Education course

JMC 3970 APPLIED JOURNALISM/BROADCASTING (1 credit)

For work on the campus student newspaper or radio or TV station.

Prerequisite(s)/Corequisite(s): Permission of instructor, minimum overall GPA of 2.25.

JMC 4010 HISTORY OF MASS COMMUNICATION (3 credits)

This class covers development of the U.S. media from 1690 to present day, including newspapers, magazines, radio, television, the new media of the Internet, advertising and public relations. A special emphasis is placed on freedom of the press.(Cross-listed with JMC 8016).

Prerequisite(s)/Corequisite(s): Junior standing; ENGL 1160; JMC 3350; and minimum overall GPA of 2.25

JMC 4040 SOCIAL MEDIA MEASUREMENT AND MANAGEMENT (3 credits)

Social Media Measurement and Management explores the dynamic development of social media platforms within a journalism and media communication context. Students of journalism, broadcasting, public relations, advertising and marketing will examine theories and best practices of social media interaction and engagement. (Cross-listed with JMC 8046)

Prerequisite(s)/Corequisite(s): JMC 2200; JMC 3350 taken previously or concurrently; and minimum cumulative GPA of 2.25.

JMC 4100 ROLE OF THE PRODUCER (3 credits)

Students will develop and refine skills in understanding the planning process behind various types of media production. Students will utilize information gathering, strategic thinking, writing, storyboarding, site surveys, analysis of lighting requirements, audio requirements, selecting and working with voiceover or on-camera talent, with the goal of taking these elements through various projects. Students will shoot, edit, and post-produce finished projects reflecting an understanding of professional requirements and the necessity for planning and troubleshooting.

Prerequisite(s)/Corequisite(s): JMC 3320; sophomore status; and cumulative GPA of 2.25.

JMC 4110 RADIO/AUDIO III (3 credits)

This course builds on skills, techniques and theory introduced in Radio/Audio I and Radio/Audio II. It will emphasize the management of college, public and commercial radio stations. Students will learn the administrative, program, production, news and sales aspects of a station. Because of the rapid growth of online media, students will also be expected to write online content for the university's radio and television stations. In addition to advanced production projects and managerial duties, students will research, write and produce an audio documentary.

Prerequisite(s)/Corequisite(s): JMC 3370 and minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

JMC 4200 VISUAL COMMUNICATION AND CULTURE CAPSTONE (3 credits)

This course is meant for those students who have declared the Visual Communication and Culture minor (VCC), housed within the School of Communication (CFAM). This course allows completion of the minor through an independent, juried research project that is conducted by the student under the direct supervision of the instructor of record for the course.

Prerequisite(s)/Corequisite(s): Junior-standing is required for registration; Declaration of VCC Minor; Completion of JMC 3700; Completion of other courses declared for Minor

JMC 4220 LITERARY JOURNALISM (3 credits)

Survey of the journalistic works of pertinent American writers through readings, lectures, discussions, plus creative writing assignments. (Cross-listed with JMC 8226).

Prerequisite(s)/Corequisite(s): Junior standing and JMC 2100 or JMC 2150 and minimum overall GPA of 2.25

JMC 4240 PUBLIC RELATIONS CASE STUDIES (3 credits)

The course is designed to enable the student: 1) to integrate issue-management and decision-making theoretical models with the communication theory and research techniques presented in JMC 3230/ JMC 8236 and 2) to apply professional judgment to the public relations problem-solving process through the development of structured analysis of historical cases. (Cross-listed with JMC 8246).

Prerequisite(s)/Corequisite(s): JMC 3230; JMC 3350; and minimum overall GPA of 2.25

JMC 4250 STRATEGIC WRITING FOR PUBLIC RELATIONS AND ADVERTISING (3 credits)

This is an advanced skills course that combines theory and practical application in writing for public relations and advertising. Students will plan and execute strategy and tactics to craft and deliver a persuasive message to a variety of audiences.

Prerequisite(s)/Corequisite(s): JMC 3500 & JMC 3230, minimum overall GPA of 2.25 Not open to non-degree graduate students.

JMC 4260 MEDIA RELATIONS (3 credits)

This course focuses on the communication tools used in media relations, the nuances of working with reporters from press and various media, news writing, news judgment, strategic planning, and the application of communication theories in understanding the relationship between news organizations and media relations representatives for organizations and corporations. (Cross-listed with JMC 8266).

Prerequisite(s)/Corequisite(s): JMC 3230; JMC 3350; junior standing; and minimum cumulative GPA of 2.25.

JMC 4310 MEDIA & POLITICS (3 credits)

An in-depth study of the impact of the media on political communication. This course will explore the symbiotic relationship of media and political communication, including the influence of traditional mass media, digital media, and social media on the political communication process. Students will delve into media theories and critically examine the influence of the media on the political communication process. (Cross-listed with JMC 8316).

Prerequisite(s)/Corequisite(s): Junior standing, ENGL 1160 and JMC 3350, and cumulative GPA 2.25

JMC 4340 SPORTS BROADCASTING AND PRODUCTION (3 credits)

Students will learn to distinguish between the differences between sports production and sports performance. Students will also learn to broadcast a variety of sports using multiple platforms. Accuracy and immediacy are vital skills that students will be expected to develop. Students will learn and understand the importance and process of preparing for play-by-play and color commentary.

Prerequisite(s)/Corequisite(s): JMC 2100 and JMC 2104; JMC 2200; JMC 2300; JMC 2370; sophomore status; and minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

JMC 4370 COMMUNICATION WORKSHOP (3 credits)

A workshop to explore communication theory and processes and to develop skills in their application. (Cross-listed with JMC 8376).

Prerequisite(s)/Corequisite(s): Junior standing, ENGL1160, permission of instructor, and minimum overall GPA of 2.25

JMC 4380 FILM THEORY AND CRITICISM (3 credits)

Study of major trends in film criticism and theory in (primarily) Europe and America, with concentrated analysis of selected films. (Cross-listed with JMC 8386).

Prerequisite(s)/Corequisite(s): JMC 1050/THEA 1050; ENGL 1160; JMC 3350; junior standing; and minimum overall GPA of 2.25

JMC 4390 MEDIA ENTREPRENEURSHIP (3 credits)

4390 Media Entrepreneurship explores new and emerging media business models from local, national and global perspectives. Students learn about and work within the start-up economy and entrepreneurial approaches. The course offers professional and critical perspectives. (Cross-listed with JMC 8396, ENTR 4390).

Prerequisite(s)/Corequisite(s): Minimum cumulative GPA- 2.25; Junior standing, ENGL 1160 or equivalent, or instructor permission.

JMC 4400 MASS MEDIA ETHICS (3 credits)

The course examines ethical standards and practices of the media - print, electronic and online media, as well as advertising, public relations and entertainment media. It includes development of ethical decision-making skills. (Cross-listed with JMC 8406).

Prerequisite(s)/Corequisite(s): Junior standing; ENGL 1160; JMC 3350; and minimum overall GPA of 2.25

JMC 4410 COMMUNICATION LAW AND POLICY (3 credits)

Communication practitioners need to understand legal protections and constraints. This course explores legal concepts, frameworks and principles to understand constitutional, statutory, regulatory and case law and policies. The student must have a basic understanding of government, social studies and human rights principles. The First Amendment and international law provide a framework for exploring current cases and issues. (Cross-listed with JMC 8416).

Prerequisite(s)/Corequisite(s): Junior and ENGL1160 and minimum overall GPA of 2.25

JMC 4420 SPORTS WRITING (3 credits)

Students will learn all aspects of the specialized aspect of sports media communication. Areas covered will include writing, interviewing, storytelling, using multiple media platforms and the ethics of sports reporting. Various writing experiences across the media spectrum, from traditional media to the new forms of online journalism, will be addressed. (Cross-listed with JMC 8426).

Prerequisite(s)/Corequisite(s): JMC 2100, JMC 2104; JMC 2200; JMC 2300; JMC 2370; sophomore status; and minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

JMC 4430 GLOBAL MEDIA COMMUNICATION (3 credits)

In-depth study of global media communication systems. This course will examine cultural influence of dominant global media, the changing global media climates, information flow, regulation and censorship of media worldwide. Students will look at the various aspects of mass communication including advertising, public relations, broadcasting, movies and social media. There will be an emphasis on global communication theories and on critical examinations of media systems. (Cross-listed with COMM 8436).

Prerequisite(s)/Corequisite(s): Junior standing, ENGL 1160 and permission of instructor, minimum overall GPA of 2.25.

JMC 4450 JOURNALISM AND MEDIA COMMUNICATION CAPSTONE I (3 credits)

Students will work in a professional environment to produce content for various School of Communication media outlets. This brings together the skills and theory they have learned throughout their coursework.

Prerequisite(s)/Corequisite(s): Minimum cumulative GPA of 2.25. Senior standing. JMC 2300; instructor permission. A portfolio of work must be submitted for admission to the class, which may not be taken concurrently with JMC 4460. Not open to non-degree graduate students.

JMC 4460 JOURNALISM AND MEDIA COMMUNICATION CAPSTONE II (3 credits)

This advanced course provides students with professional development opportunities to polish their skills. Students will continue to create content for the School of Communication's media outlets and will assume mentoring and leadership roles under the supervision of instructors of the capstone classes.

Prerequisite(s)/Corequisite(s): Minimum cumulative GPA of 2.25. JMC 4450; This class may not be taken concurrently with JMC 4450. Not open to non-degree graduate students.

JMC 4500 MASS COMMUNICATION AND PUBLIC OPINION (3 credits)

This class represents a study of the philosophy, process and effects of mass communication; the relationship between the mass media and public opinion and propaganda; and the nature, function and measurement of public opinion. (Cross-listed with JMC 8506).

Prerequisite(s)/Corequisite(s): Junior standing; ENGL 1160; JMC 3350; and minimum overall GPA of 2.25

JMC 4810 DIGITAL LITERACIES FOR TECHNICAL COMMUNICATORS (3 credits)

This course addresses emerging issues in digital literacies such as the rhetoric of technology, technological competency, technology and information ecologies, critical awareness of technology and human interactions, judicious application of technological knowledge, user-centered design, networking and online communities, ethics and technology, and culture and technology. (Cross-listed with ENGL 4810, ENGL 8816, JMC 8816).

Prerequisite(s)/Corequisite(s): ENGL 1160 and CMST 1110 or permission of instructor.

JMC 4820 POLITICS AND FILM (3 credits)

This course introduces students to the analysis of politics and film, focusing on how politics is portrayed in film and the politics of film making. (Cross-listed with PSCI 4820, JMC 8826, PSCI 8826).

JMC 4830 TECHNICAL COMMUNICATION (3 credits)

Technical Communication introduces students to the field of technical communication. Students will study the development of print and electronic genres common to industry settings, the design and production of technical documents, the writing processes and work practices of professional technical communicators, and the roles of technical communicators in organizational contexts. (Cross-listed with ENGL 4830, ENGL 8836, JMC 8836).

Prerequisite(s)/Corequisite(s): ENGL 1160 and CMST 1110 and minimum overall GPA of 2.25

JMC 4850 INFORMATION DESIGN FOR TECHNICAL COMMUNICATORS (3 credits)

This course introduces students to strategies for integrating visual and textual elements of technical documents. Instruction will focus on design theory and application through individual and collaborative projects. Students will develop the professional judgment necessary for making and implementing stylistic choices appropriate for communicating technical information to a lay audience. (Cross-listed with ENGL 4850, ENGL 8856, JMC 8856).

Prerequisite(s)/Corequisite(s): JMC 4810 or JMC 4830 or permission of instructor

JMC 4870 TECHNICAL EDITING (3 credits)

This course introduces students to the roles and responsibilities of technical editors: the editorial decision-making processes for genre, design, style, and production of technical information; the communication with technical experts, writers, and publishers; the collaborative processes of technical editing; and the techniques technical editors use during comprehensive, developmental, copyediting, and proofreading stages. (Cross-listed with ENGL 4870, ENGL 8876, JMC 8876).

Prerequisite(s)/Corequisite(s): ENGL 1160 or permission of the instructor

JMC 4890 CAPSTONE COURSE IN TECHNICAL COMMUNICATION (3 credits)

In this capstone course, students will extend foundational skills learned in previous technical communication courses. Students will demonstrate their competency in the technical documentation process in organizational environments, the issues important to the technical communication profession, and the practices of writing and creating complex technical documents for specific purpose and audience. (Cross-listed with ENGL 4890, ENGL 8896, JMC 8896).

Prerequisite(s)/Corequisite(s): JMC 4810, JMC 4830, JMC 4870, JMC 4850 or permission of instructor

JMC 4900 SEMINAR MASS COMMUNICATION (3 credits)

A senior seminar applying historical and theoretical perspective to current issues and developments in mass communications. (Cross-listed with JMC 8906).

Prerequisite(s)/Corequisite(s): Junior standing and (Communication Studies or Journalism and Media Communication major) and ENGL 1160 and minimum overall GPA of 2.25

JMC 4920 MEDIA LITERACY (3 credits)

An advanced seminar on the study of media and information literacy through deconstruction of mass communication content, meaning construction, framing analyses and critical/cultural approaches. (Cross-listed with JMC 8926).

Prerequisite(s)/Corequisite(s): Junior standing; JMC 3350; and minimum GPA of 2.25

JMC 4960 INTERNSHIP AND CAREER PREPARATION SEMINAR (1 credit)

This course will prepare students for doing an internship in a communication-related field by addressing such topics as writing resumes and cover letters, interviewing for jobs, and organizing a professional portfolio of their work. The topics covered also will assist with general career preparation. (Cross-listed with CMST 4960).

Prerequisite(s)/Corequisite(s): Sophomore standing; School of Communication major or minor; and minimum cumulative GPA of 2.25.

JMC 4970 INTERNSHIP EXPERIENCE (1 credit)

This course will provide students professional communication-related experience in an internship approved and supervised by the School of Communication. (Cross-listed with CMST 4970).

Prerequisite(s)/Corequisite(s): JMC 4960, CMST 4960; junior standing; School of Communication major or minor; instructor permission; and minimum cumulative GPA of 2.25.

JMC 4980 INDEPENDENT STUDY IN COMMUNICATION (1-3 credits)

Specialized studies in communication supplementing regular courses: readings; research; tutorial.

Prerequisite(s)/Corequisite(s): Junior standing and (Communication Studies or Journalism and Media Communication major) and minimum overall GPA of 2.25

JMC 4990 ADVANCED COMMUNICATION PRACTICUM (1-3 credits)

Special practicum experience in an area of communication.

Prerequisite(s)/Corequisite(s): Junior standing and (Communication Studies major or Journalism and Media Communication major)

Communication Studies, Bachelor of Arts

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

Second Field of Study for BSC Degree for Communication Studies Majors

A second field of study is required for the Bachelor of Science in Communication (BSC) degree. Communication studies majors pursuing the BSC should complete 15 hours of courses (including at least six hours of 3000- to 4000-level courses) in one department or academic program, or inter-related courses from various departments or academic programs other than communication studies. Communication studies majors may have a *second field of study* in journalism and media communication by completing 12 hours of courses in JMC (six hours of which must be at the 3000- or 4000-level), in addition to the JMC courses already required for the communication studies major. Communication studies majors may have a *minor* in journalism and media communication by completing 15 hours of JMC offerings (12 hours of which must be upper level) in addition to the JMC courses already required for the communication studies major. All courses in the minor must be completed with a grade of "C" or higher.

 Required: CMST 2120, 4110, 4120, JMC 4310; plus 6 hours electives (can use JMC 4500, 4920, 4240, or 4260)

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements:
 The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams:
 For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

Communication Studies Minor Requirements

Students may earn a minor in communication studies. To fulfill the minor, students whose major is outside the School of Communication must complete 18 hours in communication studies courses, including 12 hours of upper-level (3000- and 4000-level) courses. All CMST classes except the course used to fulfill the general education oral communication competency (CMST 1110 or CMST 2120) may count toward the minor in communication studies. Cross-listed courses with CMST courses may also count. Journalism and media communication majors may minor in communication studies by taking 12 hours of upper-level (3000- and 4000-level) courses in addition to the six hours of CMST courses already required for journalism and media communication majors, for a total of 18 hours. All courses in the minor must be completed with a grade of "C" or higher.

¹ CMST 2010 and 1310 are required for the major and count as Social Science General Education Courses

Journalism and Media Communication, Bachelor of Arts

¹ JMC 1500 is a major requirement but also fulfills Social Science requirement
First foreign language class also works as a Humanities/Fine Arts & Global Diversity course

² JMC 2100 & JMC 2104 is JMC's 3rd writing requirement and a major requirement

³ CMST Electives (CMST 1310, CMST 2010, CMST 2410) could also work as a Humanities/Fine Arts course

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual

sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements:

The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams:

For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements: 2.25 cumulative GPA

		6
Sequences		
Select one of three concentratins		24
Additional Bachelor of Science Requirement		
Second Field of Study (see below)		15
Total Credits		72

¹ This class may also be used for social science credits.

Second Field of Study for BSC Degree for Journalism and Media Communication Majors

A second field of study is required for the Bachelor of Science in communication degree. Journalism and media communication majors pursuing the BSC should complete 15 hours of courses (including at least six hours of 3000- or 4000-level courses) in one department or academic program, or related courses from various departments or academic programs other than journalism and media communication. Journalism and media communication majors may have a second field of study in communication studies by completing 12 hours of CMST courses (six hours of which must be at the 3000- or 4000-level), in addition to the six hours of CMST courses already required for the journalism and media communication major. The course used to fulfill the general education oral communication competency (CMST 1110 or CMST 2120) cannot count toward the second field of study in communication studies.

JMC Advanced Elective (JMC 3030, 3400, 3410, 4040, 4220, 4390, 4220, 4990)		3
JMC Critical Thinking		3
Elective		3
	Minor/2nd Field of Study	3
Elective		2

Credits **14**

Total Credits **120**

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements: 2.25 cumulative GPA

Journalism and Media Communication Minor

Requirements

Students may earn a minor in journalism and media communication with courses to be chosen from JMC offerings. To fulfill the minor, students whose major is outside the School of Communication must complete 18 hours in JMC offerings, including 12 hours of upper-level (3000- and 4000-level) courses. Within the journalism and media communication major, students may not have a minor in another sequence besides the primary sequence they have selected for their major. For example, students following the journalism sequence cannot minor in the creative media sequence. Communication studies majors may have a minor in journalism and media communication by completing 15 hours of JMC offerings (12 hours of which must be upper level) in addition to the JMC courses already required for the communication studies major. All courses in the minor must be completed with a grade of "C" or higher.

Visual Communication and Culture Minor

Requirements

Students may earn a minor in visual communication and culture by taking 18 hours in classes approved by an adviser to align with the underlying philosophy of the minor. Six of the hours must include Introduction to Visual Communication and Culture (JMC 3700) and Visual Communication and Culture Capstone (JMC 4200). The remaining 12 credits will come from both within the School of Communication (at least six credits/two classes) and outside the school (at least six credits/two classes). Nine of the total hours in the minor must be at the 3000-4000 level.

Courses may not be used for both the VCC minor and other major or minor programs, without approval from both VCC and major advisors. For students who are majoring in the School of Communication, courses may be used for the VCC minor and a student's general education requirements. School of Communication classes that journalism and media communication majors apply toward the VCC minor must come from communication studies. School of Communication classes that communication studies majors apply toward the minor must come from journalism and media communication. All courses in the minor must be completed with a grade of "C" or higher.

School of Music

The School of Music is one of three schools within the College of Communication, Fine Arts, and Media. It is located in the newly renovated Janet A. and Willis S. Strauss Performing Arts Center, which is nestled near the focal point of the campus, a campanile that houses a carillon of forty-seven bells. The complex itself boasts a tunable 420 seat concert hall and 100 seat recital hall, impressive acoustic isolation, recording studio, and well-equipped classrooms and rehearsal spaces. The center serves as a nexus of musical activity not only for the university, but for the city of Omaha as well.

The School of Music has a faculty of 45 full and part time members and is a fully accredited member of the National Association of Schools of Music (NASM). Degrees offered include the Bachelor of Music degree in performance, the Bachelor of Music with K-12 certification and the Bachelor of Arts in Music degree with concentrations in music studies, jazz studies, music technology, and entrepreneurial studies in music.

Other Information

All students wishing to declare a major in music must be accepted by audition. Audition requirements can be accessed at music.unomaha.edu

(<http://music.unomaha.edu>). Students who are interested in the Music Technology or Music Entrepreneurial Studies track within the BA program may substitute a portfolio examination and interview in lieu of an audition. Prospective majors should contact the Coordinator of Music Outreach and Recruitment at 402.554.2177 to discuss audition requirements.

For students who are not music majors, the School of Music offers many courses that will satisfy the general education requirements for Humanities/Fine Arts as well as Cultural Diversity. Click here (<https://www.unomaha.edu/general-education/overview/distribution-requirements.php>) for a list of music courses that are approved for general education. Additionally, the School of Music has numerous ensembles that are open to both majors and non-majors. Some ensembles require acceptance by audition. Auditions for select ensembles occur during the week before the semester begins. Information on all ensembles can be found online (<https://www.unomaha.edu/college-of-communication-fine-arts-and-media/music/student-involvement/>)

Information for All Students

The specific requirements for the degrees in music are listed below. In addition to the specific music requirements, all students are required to complete the general education requirements found here (<https://www.unomaha.edu/general-education/>)

Contact

402.554.3411

Website (<https://www.unomaha.edu/college-of-communication-fine-arts-and-media/music/>)

Degrees Offered

- Music, Bachelor of Arts (p. 446)
- Music Performance, Bachelor of Music (p. 453)
- Music, Bachelor of Music, K-12 Certification (p. 461)

Writing in the Discipline

As part of the fundamental academic requirements for the university, all students are required to take a writing in the discipline course within their major. The course for students in the Bachelor of Music or Bachelor of Arts in Music track is WRWS 3500. Students in the music education track (Bachelor of Music, K-12) take TED 2100.

Bachelor of Music

The professional program in music provides a comprehensive music education that prepares students with the technical skills, historical context, and theoretical knowledge to create meaningful musical contributions.

Students in the music performance track are prepared for advanced graduate study in music while students in the music education track pursue teacher certification to apply their musical skills in the K-12 classroom.

Performance

- Studio musician
- Concert musician
- Tutor/instructor
- Director
- National guard member
- Accompanist

Music, K-12 Education

- Elementary music educator
- Secondary music educator
- Tutor/instructor

Bachelor of Arts in Music

The Bachelor of Arts degrees allow students to develop advanced musical skills within a comprehensive liberal arts degree. Concentrations in instrumental, keyboard, or voice studies train students in classical music repertoire to prepare them for careers in a music field outside the concert hall or classroom. Jazz studies is similar, but focuses specifically on jazz and commercial applications of music. The concentration in music technology prepares students for audio recording, sound editing, and other computer-based applications of music. Finally, the concentration in Entrepreneurial Studies brings skills of innovation and application of business principles in a musical setting.

Jazz Studies

- Recording musician
- Concert musician
- Instructor
- Music librarian
- Composer/arranger

Music Technology

- Audio engineer
- Music producer
- Sound mixing artist
- Broadcast technician
- Multimedia specialist
- Foley artist
- Engraving technician

Entrepreneurial Studies

- Arts administrator
- Music/licensing publisher
- Event planner
- Development specialist
- Publicist

Music Studies

- Music librarian
- Music director
- Entertainment/music attorney
- Critic
- Music therapist

MUS 115A APPLIED BASSOON (1-2 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 115B APPLIED CELLO (1-2 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115C APPLIED CLARINET (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 115D APPLIED DOUBLE BASS (1-2 credits)

This course provides individual weekly instruction on bass. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required. The primary goal of the bass student is to develop the highest level of technical and musical proficiency on his/her instrument. Through weekly applied lessons and personal practice time, it is intended that the student will gain the tools necessary to become a more mature musician.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115E APPLIED EUPHONIUM (1-2 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115F APPLIED FLUTE (1-2 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Students enrolled in this course must also enroll in an instrumental ensemble. Music majors must be concurrently enrolled in MUS 1000-001 and MUS 1000-007.

MUS 115G APPLIED FRENCH HORN (1-2 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115H APPLIED GUITAR (1-2 credits)

This course provides individual weekly instruction on guitar. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115I APPLIED HARP (1-2 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115J APPLIED OBOE (1-2 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 115K APPLIED PERCUSSION (1-2 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the percussion faculty. Music majors must attend the weekly masterclass.

MUS 115L APPLIED PIANO (1-2 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 115M APPLIED PIPE ORGAN (1-2 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 115N APPLIED SAXOPHONE (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 115O APPLIED TROMBONE (1-2 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115P APPLIED TRUMPET (1-2 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115Q APPLIED TUBA (1-2 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115R APPLIED VIOLA (1-2 credits)

This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115S APPLIED VIOLIN (1-2 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (violin majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115T APPLIED VOICE (1-2 credits)

This course provides individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one credit hour (non music majors) or two credit hours (voice music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the voice faculty. Students must also enroll in a choral ensemble MUS 2700/MUS 4100 and attend the weekly masterclass. MUS 115T students are also required to attend Freshman Voice Seminar.

MUS 115U APPLIED CARILLON (1-2 credits)

This course provides individual weekly instruction on carillon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the keyboard faculty.

MUS 167B APPLIED CLASS - PIANO (1 credit)

Basic reading of treble and bass clef are a prerequisite for this course. Beginning with learning correct posture, hand position and technique, a deeper understanding of key musical elements such as key signatures, dynamic markings, time signatures, rhythmic values, and musical terminology will begin the coursework. Reading, coordination, rhythm, scales, improvisation, technology, duet and solo repertoire will be used to strengthen both keyboard and overall musical skills. *This is a sequential course whereby all students must pass the fall semester before enrolling in spring semester.

MUS 167C APPLIED CLASS - VOICE I (1 credit)

This course provides class instruction in the development of elementary basic skills in applied voice.

MUS 169D APPLIED CLASS JAZZ PIANO (1 credit)

This course will consist of class instruction designed to teach students basic jazz piano skills.

Prerequisite(s)/Corequisite(s): MUS 1420 or MUS 2430

MUS 215A APPLIED BASSOON (1-2 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 215B APPLIED CELLO (1-2 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 115B. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of cello and attend the weekly masterclass.

MUS 215C APPLIED CLARINET (1-2 credits)

This course provides individual weekly instruction on clarinet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 215D APPLIED DOUBLE BASS (1-2 credits)

This course provides individual weekly instruction on double bass. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 115D. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of double bass and attend the weekly masterclass.

MUS 215E APPLIED EUPHONIUM (1-2 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215F APPLIED FLUTE (1-2 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition for & approval by the woodwind faculty, OR successful completion of 4 hours of MUS 115F. Students must also enroll in an instrumental ensemble. Music majors must be concurrently enrolled in MUS 1000-001 & 1000-007.

MUS 215G APPLIED FRENCH HORN (1-2 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215H APPLIED GUITAR (1-2 credits)

This course provides individual weekly instruction on guitar. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 215I APPLIED HARP (1-2 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 115I. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of harp and attend the weekly masterclass.

MUS 215J APPLIED OBOE (1-2 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 215K APPLIED PERCUSSION (1-2 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the percussion faculty. Music majors must attend the weekly masterclass.

MUS 215L APPLIED PIANO (1-2 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 215M APPLIED PIPE ORGAN (1-2 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 215N APPLIED SAXOPHONE (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 215O APPLIED TROMBONE (1-2 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215P APPLIED TRUMPET (1-2 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215Q APPLIED TUBA (1-2 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215R APPLIED VIOLA (1-2 credits)

This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 115R. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of viola and attend the weekly masterclass.

MUS 215S APPLIED VIOLIN (1-2 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 115S. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of violin and attend the weekly masterclass.

MUS 215T APPLIED VOICE (1-2 credits)

This course provides individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one credit hour (non music majors) or two credit hours (voice music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for and approved by the voice faculty. All enrolled students must also enroll in a choral ensemble (MUS 2700, MUS 4100). All students must attend the weekly masterclass.

MUS 315A APPLIED BASSOON (1-2 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 315B APPLIED CELLO (1-2 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 215B. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of cello and attend the weekly masterclass.

MUS 315C APPLIED CLARINET (1-2 credits)

This course provides individual weekly instruction on clarinet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 315D APPLIED DOUBLE BASS (1-2 credits)

This course provides individual weekly instruction on double bass. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 215D. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of double-bass and attend the weekly masterclass.

MUS 315E APPLIED EUPHONIUM (1-2 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315F APPLIED FLUTE (1-2 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Audition for & approval by woodwind faculty OR successful completion of 4 hrs of MUS 215F and a "PASS" in the Sophomore Continuation Jury. Concurrent enrollment in an instrumental ensemble. Music majors: Concurrent enrollment in MUS 1000-001 & 1000-007.

MUS 315G APPLIED FRENCH HORN (1-2 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315H APPLIED GUITAR (1-2 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 215H. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of guitar and attend the weekly masterclass.

MUS 315I APPLIED HARP (1-2 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 215I. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of harp and attend the weekly masterclass.

MUS 315J APPLIED OBOE (1-3 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 315K APPLIED PERCUSSION (1-2 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the percussion faculty. Music majors must attend the weekly masterclass.

MUS 315L APPLIED PIANO (1-2 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 315M APPLIED PIPE ORGAN (1-3 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 315N APPLIED SAXOPHONE (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 315O APPLIED TROMBONE (1-2 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315P APPLIED TRUMPET (1-2 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315Q APPLIED TUBA (1-2 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315R APPLIED VIOLA (1-2 credits)

This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 215R. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of viola and attend the weekly masterclass.

MUS 315S APPLIED VIOLIN (1-2 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 215S. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of violin and attend the weekly masterclass.

MUS 315T APPLIED VOICE (1-2 credits)

This course provides individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one credit hour or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for and approved by the voice faculty. All enrolled students must also enroll in a choral ensemble (MUS 2700, MUS 4100). All students must attend the weekly masterclass.

MUS 415A APPLIED BASSOON (1-2 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 415B APPLIED CELLO (1-2 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 315B. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of cello and attend the weekly masterclass.

MUS 415C APPLIED CLARINET (1-2 credits)

This course provides individual weekly instruction on clarinet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 415D APPLIED DOUBLE BASS (1-2 credits)

This course provides individual weekly instruction on double bass. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 315D. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of double bass and attend the weekly masterclass.

MUS 415E APPLIED EUPHONIUM (1-2 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. This level of applied study provides instruction on fundamental brass playing concepts. Weekly assignments can include technical studies, scale exercises, tone and articulation studies, breathing exercises, solo and orchestral repertoire, chamber music, etc.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415F APPLIED FLUTE (1-2 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition for & approval by the woodwind faculty, OR successful completion of 4 credit hours of MUS 315F. Students must also enroll in an instrumental ensemble. Music majors must be concurrently enrolled in MUS 1000-001 & 1000-007.

MUS 415G APPLIED FRENCH HORN (1-2 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415H APPLIED GUITAR (1-2 credits)

This course provides individual weekly instruction on the guitar. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 315H. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of guitar and attend the weekly masterclass.

MUS 415I APPLIED HARP (1-2 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 315I. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of harp and attend the weekly masterclass.

MUS 415J APPLIED OBOE (1-2 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 415K APPLIED PERCUSSION (1-2 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the percussion faculty. Music majors must attend the weekly masterclass.

MUS 415L APPLIED PIANO (1-2 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 415M APPLIED PIPE ORGAN (1-3 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 415N APPLIED SAXOPHONE (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 415O APPLIED TROMBONE (1-2 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415P APPLIED TRUMPET (1-2 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415Q APPLIED TUBA (1-2 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415R APPLIED VIOLA (1-2 credits)

This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 315R. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of viola and attend the weekly masterclass.

MUS 415S APPLIED VIOLIN (1-2 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 215S. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of violin and attend the weekly masterclass.

MUS 415T APPLIED VOICE (1-2 credits)

This course is a continuation of the applied music sequence of study for music majors. This course provides individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one credit hour or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s)/Corequisite(s): This course requires successful completion of MUS 315T. This course requires an audition performed for and approved by the voice faculty. All enrolled students must also enroll in a choral ensemble (MUS 2700, MUS 4100) and attend the weekly masterclass.

MUS 1000 APPLIED MUSIC LABORATORY RECITAL (0 credits)

This course is a weekly meeting of all music majors which provides students with performance opportunities for themselves as well as recitals and lectures by guest artists.

Prerequisite(s)/Corequisite(s): Music majors only.

MUS 1010 MUSIC TECHNOLOGY NOW (0 credits)

This course is a weekly meeting of all music technology majors. The course includes presentations of ongoing student projects, lectures by resident and visiting music technologists, audio engineering training and practicum opportunities, and critical listening experiences.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

MUS 1050 MUSIC OF THE PEOPLE: THE BEATLES (3 credits)

The Beatles are arguably the most influential and important rock band in history. Their music influenced not only the shape of popular music but youth culture. Course objectives are to learn the history of the music of the Beatles from their early influences and formation to their break-up and legacy; to understand the relationship of this music to larger cultural, political, and economic formations; to become familiar with aspects of the diverse musical structures used in their music; and to become familiar with the advances in sound and recording technology their music spawned and influenced innovation to music today.

Distribution: Humanities and Fine Arts General Education course

MUS 1070 MUSIC OF THE PEOPLE: ROCK AND POP (3 credits)

The objectives of this course are 1) to learn the history of rock music from its beginnings in earlier forms of popular music to the beginning of the 21st century 2) to understand the relationship of this music to larger cultural, political, and economic formations; and 3) to become familiar with aspects of musical structure which have been used in rock music.

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

MUS 1080 MUSIC OF THE PEOPLE: THE WORLD (3 credits)

A study of music of various cultures throughout the world practiced primarily by individuals who produce music as a part of their everyday life. Using music as a window into various cultures the course gives students an insight into cultures that may vary from their own.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

MUS 1090 MUSIC APPRECIATION (3 credits)

A listening course for the non-music major designed to promote a better understanding of noteworthy compositions from various periods and styles. Lab fee required.

Distribution: Humanities and Fine Arts General Education course

MUS 1100 MUSIC OF THE PEOPLE: JAZZ (3 credits)

In this course, the history of jazz will be traced from its origins up to the present. Designed primarily for non-music majors, the course will chronicle the development of various stylistic trends which characterize jazz and discuss the prominent musical artists that influenced each style period within the history of jazz. Lab fee required.

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

MUS 1170 FOUNDATIONS OF MUSIC TECHNOLOGY (3 credits)

This course addresses the foundational people, concepts, and terms of music technology. The course covers a broad spectrum of themes including acoustics, psychoacoustics, microphones, Musical Instrument Digital Instrument (MIDI), synthesis, computer music, notation, and sampling. Intended for students pursuing a Bachelor of Arts with a concentration in Music Technology.

MUS 1390 BASIC MUSICIANSHIP (3 credits)

This course is designed to develop basic music reading skills through experiential learning that promotes music literacy skills of note reading, rhythmic reading, key signatures, and simple meter. It is designed for students interested in music degree tracks who have limited understanding of music theory.

Prerequisite(s)/Corequisite(s): Music major or permission of the instructor. Not open to non-degree graduate students.

MUS 1400 MUSIC FUNDAMENTALS (3 credits)

Introduction to Music Studies will cover the basics of music including music reading in multiple clefs, scales, key signatures, meter signatures, rhythm, triads, seventh chords, and elementary aural and singing skills. The primary purpose of the course is to prepare students for further study in music at the college level.

Prerequisite(s)/Corequisite(s): Music major or permission of instructor. Not open to non-degree graduate students.

MUS 1410 MUSIC CORE CURRICULUM I (4 credits)

The study of basic elements of music and their application to musical performance, education, and analysis.

Prerequisite(s)/Corequisite(s): Music Major or permission from the instructor. Successful completion of 1400 (C or better). Not open to non-degree graduate students.

MUS 1420 MUSIC CORE CURRICULUM II (4 credits)

The study of basic elements of music and their application to musical performance, education, and analysis.

Prerequisite(s)/Corequisite(s): Completion of MUS 1410 with the grade C or better or permission of the instructor. Not open to non-degree graduate students.

MUS 1430 COMMERCIAL MUSIC THEORY I (3 credits)

This course will integrate Roman Numeral, Lead Sheet, and Nashville notations through realization and analysis. It will also combine Common Practice Period music theory with Jazz theory in an effort to promote practical usage of theoretical systems in performance and practice.

Prerequisite(s)/Corequisite(s): Prerequisites include MUS 1390 and MUS 1400.

MUS 1600 INTRODUCTION TO MUSIC EDUCATION (1 credit)

This course is designed to provide an overview of the music education profession. It will focus on the history, philosophy, and fundamentals of music education in the United States.

MUS 1640 DICTION FOR SINGERS I (1 credit)

A study of the International Phonetic Alphabet (IPA) and the rules of pronunciation as applied to vocal literature of the English and Italian languages.

Prerequisite(s)/Corequisite(s): Music major

MUS 1660 DICTION FOR SINGERS II (1 credit)

A study of the rules and guidelines of pronunciation as applied to vocal literature of German and French languages.

Prerequisite(s)/Corequisite(s): Successful completion of MUS 1640

MUS 1690 KEYBOARD SKILLS I (1 credit)

Instruction in this course will prepare students for keyboard skills for continued success as a professional musician, teacher or music educator. An emphasis will be placed on the following skills: scales/chords, sight reading, SATB reading, open score reading, improvisation, basic accompaniment, continued development of technical skills through individual piano selections and exciting project using contemporary music. Arrangements of popular music, chord charts and stylistic awareness in regards to the piano will be developed throughout the course. Beginning skills of ensemble playing will be encouraged throughout the semesters. This is a sequential course whereby all students must enroll in fall semester and pass before enrolling in spring semester.

Prerequisite(s)/Corequisite(s): MUS 167B (Piano) or equivalent. Permission.

MUS 2200 AUDIO RECORDING TECHNIQUES I (3 credits)

This course provides students with basic instruction in analog and digital audio recording. Topics include hardware, software, microphones, and basic production. Upon completion of the course students will have the skills and the knowledge to do basic audio recording such as recording live concerts and simple multi-track recording.

Prerequisite(s)/Corequisite(s): MUS 1170 OR permission of the instructor. Not open to non-degree graduate students.

MUS 2410 MUSIC CORE CURRICULUM III (4 credits)

The study of intermediate elements of music and their application to musical performance, education, and analysis.

Prerequisite(s)/Corequisite(s): MUS 1420 or permission. Not open to non-degree graduate students.

MUS 2420 MUSIC CORE CURRICULUM IV (4 credits)

The study of advanced elements of music and their application to musical performance, education, and analysis.

Prerequisite(s)/Corequisite(s): MUS 2410 or permission. Not open to non-degree graduate students.

MUS 2430 COMMERCIAL MUSIC THEORY 2 (3 credits)

As a continuation of MUS 1430, this course will integrate Roman Numeral, Lead Sheet, and Nashville notations through realization and analysis. It will also combine Common Practice Period music theory with Jazz theory in an effort to promote practical usage of theoretical systems in performance and practice.

Prerequisite(s)/Corequisite(s): MUS 1390, MUS 1400, and MUS 1430

MUS 2480 CLASS APPLIED JAZZ IMPROVISATION (2 credits)

This course is intended for the serious music student who wishes to gain basic knowledge and skills in the area of jazz improvisation. The course will emphasize beginning improvisation skills, basic jazz literature, chord scale relationships, melodic concepts, ear training, and analysis of improvised solos.

Prerequisite(s)/Corequisite(s): MUS 1420 or MUS 2430

MUS 2550 MUSIC HISTORY I (3 credits)

This course is intended for music majors who wish to undertake a study of music literature and history of the Ancient, Medieval, Renaissance, and Baroque eras. The objective of the course is to illustrate the musical concepts, styles and performance practices through composers, individual works and scores that typify these eras and the cultural context surrounding them. Outside listening, reading, musical analysis and discussion will supplement lectures.

MUS 2560 MUSIC HISTORY II (3 credits)

This course is intended for music majors who wish to undertake a study of music literature and history of the Pre-Classical, Classical, Romantic, and Modern eras. The objective of the course is to illustrate the musical concepts, styles and performance practices through composers, individual works and scores that typify these eras and the cultural context surrounding them. Outside listening, reading, musical analysis and discussion will supplement lectures.

MUS 2600 FUNDAMENTALS OF CONDUCTING (2 credits)

The purpose of this course is to provide a basic foundation of conducting skills.

Prerequisite(s)/Corequisite(s): This course is limited to music majors. Students must have successfully completed MUS 1410, MUS 1420. Not open to non-degree graduate students.

MUS 2610 ADVANCED PIANO TECHNIQUES I (1 credit)

Instruction in this course will prepare piano majors with advanced keyboard techniques for continued success as a professional musician or private instructor. An emphasis will be placed on the following skills: sight reading, SATB reading, open score reading, improvisation, intermediate/advanced accompaniment, and continued crafting of personal skill sets. Students will arrange contemporary music. Intermediate to advanced skills of ensemble playing will be cultivated throughout the semesters. This is a sequential course whereby all students must enroll in fall semester and pass before enrolling in spring semester.

Prerequisite(s)/Corequisite(s): Piano Major

MUS 2620 ADVANCED PIANO TECHNIQUES II (1 credit)

Instruction in this course will prepare piano majors with advanced keyboard techniques for continued success as a professional musician or private instructor. An emphasis will be placed on the following skills: sight reading, SATB reading, open score reading, improvisation, intermediate/advanced accompaniment, and continued crafting of personal skill sets. Students will arrange contemporary music. Advanced skills of ensemble playing will be cultivated throughout the semester. This is a sequential course whereby all students must enroll in fall semester and pass before enrolling in spring semester.

Prerequisite(s)/Corequisite(s): Piano Major; Successful completion of MUS 2610. Not open to non-degree graduate students.

MUS 2690 KEYBOARD SKILLS II (1 credit)

Continuation of keyboard skills curriculum for continued success and independent thinking allowing students skill level for the following: scales/chords, sight reading, SATB reading, open score reading, improvisation, basic accompaniment, continued development of technical skills through individual piano selections and exciting project using contemporary music. Advanced arrangements of popular music, chord charts and stylistic awareness continue to develop throughout the course. Advanced skills of ensemble playing and experience will be a part of the curriculum. Class instruction in advanced development of keyboard skills including sight reading, harmonization, open score reading, accompaniments and facility.

Prerequisite(s)/Corequisite(s): MUS 1690 or equivalent. Permission.

MUS 2700 UNIVERSITY CHORUS (0-1 credits)

University Chorus is an ensemble open to all University students, faculty and staff. No audition necessary. All styles of music, including popular. Students wanting humanities/fine arts general education credit must register for 1 credit hour.

Prerequisite(s)/Corequisite(s): University Chorus participants need to be aware of the importance of rehearsals and concerts, and commit to those times in their schedule. Student must seek approval from the Director of Choral Activities in order to take this course for 0 credits.

Distribution: Humanities and Fine Arts General Education course

MUS 2730 CHAMBER ORCHESTRA (0-1 credits)

A string orchestra with selected winds performing symphonic repertoire. Public performance. Open to all students and members of the greater metropolitan community.

Prerequisite(s)/Corequisite(s): Audition is required.

MUS 2740 CHAMBER MUSIC (0-1 credits)

Specialized chamber music groups from the string, wind, percussion, or technology area. Literature will be chosen from the extensive materials available for these combinations of instruments.

Prerequisite(s)/Corequisite(s): Audition and permission.

MUS 2750 MARCHING BAND (0 credits)

Open to all full and part-time UNO students during the fall semester only. No audition is required. K-12 instrumental music education majors are required to enroll in Marching Band for two semesters.

MUS 2760 UNIVERSITY CONCERT BAND (0-1 credits)

University Band is a performing ensemble that is open to all UNO students, staff, and faculty. The band has varied programming of contemporary and classical works. There is no audition necessary.

Prerequisite(s)/Corequisite(s): There are no prerequisites for University Band, but participants need to be aware of the importance of rehearsals and concerts and commit to those times in their schedules.

Distribution: Humanities and Fine Arts General Education course

MUS 2770 JAZZ ENSEMBLE (0-1 credits)

A select ensemble performing jazz literature from all periods. Open to all full- and part-time UNO students. An audition is required with the director.

Prerequisite(s)/Corequisite(s): Acceptance into jazz ensemble is by audition only. Students must demonstrate technical command of their instrument, sightreading skills in multiple jazz styles and ability to demonstrate credible jazz improvisation skills.

MUS 2790 COLLABORATIVE PIANO (1 credit)

This course is designed to develop skills useful for pianists to learn to collaborate with vocalists, instrumentalists and ensembles. Individual class times will also accompany rehearsals with designated collaborative partners. The vast repertoire and stylistic knowledge for areas such as musical theater, voice, choral, strings, brass, orchestra and wind ensemble set the beginning of exciting partnerships throughout a musical career.

Prerequisite(s)/Corequisite(s): Completion of MUS 167B, MUS 1690, MUS 2690. Permission. Not open to non-degree graduate students.

MUS 2800 SOUND REINFORCEMENT (3 credits)

This course provides students with basic instruction in the fundamental knowledge and techniques of live sound production. Topics include equipment, processes, and systems used in a variety of scenarios with emphasis on practical, hands-on production. Upon completion of the course students will have the skills and the knowledge to provide basic sound reinforcement.

Prerequisite(s)/Corequisite(s): Activities include on-location sound reinforcement, written live sound observations, in-class practicum, and electronics labs. Not open to non-degree graduate students.

MUS 3100 MUSIC INFORMATICS (3 credits)

Surveys the use of digital music data in the study, composition, performance, analysis, storage, and dissemination of music. Various computational approaches and technologies in music informatics including music information retrieval will be explored and implemented by students. (Cross-listed with ITIN 3100)

Prerequisite(s)/Corequisite(s): Successful completion of one of the following three courses satisfies the prerequisite requirement: CIST 1300 or MUS 3170 or MUS 3180. Not open to non-degree graduate students.

MUS 3170 EXPLORING MUSIC TECHNOLOGY (3 credits)

An overview of computers and music. The course will focus on broad themes of people, procedures, data structures, software, hardware, and computer music environments. Intended for students with limited music or computer backgrounds.

MUS 3180 DIGITAL SYNTHESIS (3 credits)

An exploration of the potentials of computer music synthesis. Concepts of music synthesis are presented through the use of a computer, keyboard, and appropriate software. Students create assignments that demonstrate the application of basic techniques. (Cross-listed with ITIN 3180)

MUS 3190 JUNIOR/NON DEGREE RECITAL (1 credit)

This course is designed for all undergraduate performance music majors performing a junior or any student who wants to perform a non-degree recital.

Prerequisite(s)/Corequisite(s): Applied Music (MUS 1150-3150) and/or permission of applied instructor. Payment of Recital Fee (Conductors' fees are automatically waived). Not open to non-degree graduate students.

MUS 3200 JAZZ PEDAGOGY (1 credit)

Course includes middle school and high school instrumental jazz literature, basic improvisation, rhythm section techniques and laboratory ensemble experiences.

Prerequisite(s)/Corequisite(s): MUS 2410 or MUS 2430

MUS 3210 AUDIO RECORDING TECHNIQUES II (3 credits)

This course provides students with advanced instruction in sound recording and digital audio production. Topics include microphone technique, analog audio hardware, digital audio software, and advanced production techniques.

Prerequisite(s)/Corequisite(s): MUS 2200

MUS 3400 FORM AND ANALYSIS (2 credits)

The study of musical forms and their application to musical arranging for choir, band, and orchestra.

Prerequisite(s)/Corequisite(s): MUS 2420

MUS 3400 COMPOSITION I (1 credit)

Individualized applied study of the basic craft of musical composition in small media and various styles.

Prerequisite(s)/Corequisite(s): MUS 2420 and written permission. Not open to non-degree graduate students.

MUS 3480 CLASS APPLIED JAZZ IMPROVISATION II (2 credits)

This course is intended for the serious music student who wishes to gain advanced knowledge and skills in the area of jazz improvisation. This course will emphasize advanced improvisation skills, standard jazz literature, advanced jazz harmony, chord/scale relationships, melodic concepts, ear training, and analysis of improvised solos.

Prerequisite(s)/Corequisite(s): MUS 2480

MUS 3600 MUSIC EDUCATION CORE I - ELEMENTARY (5 credits)

Methods and materials for teaching elementary (K-6) general, instrumental and choral music.

Prerequisite(s)/Corequisite(s): Students must be accepted to the College of Education, Health and Human Sciences (CEHHS) Teacher Preparation Program and have completed MUS 1600 and MUS 1410 with a C or better; Music Education Majors only. Not open to non-degree graduate students.

MUS 3610 MUSIC EDUCATION CORE II - MIDDLE SCHOOL/JUNIOR HIGH SCHOOL (5 credits)

Course includes brass and percussion pedagogy, middle school instrumental and choral literature and techniques, general music, conducting, and laboratory ensemble experiences.

Prerequisite(s)/Corequisite(s): MUS 3600 or permission.

MUS 3630 MUSIC EDUCATION CORE III - HIGH SCHOOL METHODS (5 credits)

This course explores all aspects of administering high school vocal and instrumental music programs as well as prepares the student for clinical teaching and the job search process.

Prerequisite(s)/Corequisite(s): MUS 3600 and MUS 3610 or permission, 2.75 NU GPA, Passing Praxis Core scores

MUS 3640 MUSIC EDUCATION FINAL PRACTICUM (2 credits)

This course is designed to link theoretical concepts learned in the classroom to the practical application of "real world" situations and to familiarize students with the profession of music education. Hours completed in this course count as the final practicum as specified by the College of Education Teacher Preparation Program and required by the Nebraska Department of Education for teacher certification.

Prerequisite(s)/Corequisite(s): MUS 3630, 2.75 NU GPA, Passing Praxis Core scores. Not open to non-degree graduate students.

MUS 3650 INTERNSHIPS IN MUSIC (0-3 credits)

A course designed to link theoretical concepts learned in the classroom to the practical application of "real world" situations and to familiarize students with attitudes, operations and programs of various musical organizations.

Prerequisite(s)/Corequisite(s): Junior standing or permission of Music Department Chair. Not open to non-degree graduate students.

MUS 3660 ADVANCED CONDUCTING (2 credits)

An advanced course in conducting for music majors. This course will provide a theoretical and practical study of various materials and methods as they relate to conducting score study, gestures, rehearsal strategy and related performance practices.

Prerequisite(s)/Corequisite(s): Successful completion of MUS 2420.

MUS 4000 SPECIAL STUDIES IN MUSIC (1-3 credits)

Seminars or workshops in Theory, History, Performance, and Music Education designed to meet specific interests and needs of students. Topics and number of credits for each specific offering will be announced during the prior semester. (Cross-listed with MUS 8006).

MUS 4100 CONCERT CHOIR (0-1 credits)

A select choral ensemble specializing in outstanding examples of music of all styles and from all periods. Public performance. Open to all University students.

Prerequisite(s)/Corequisite(s): The prerequisite for Concert Choir is an audition. Student must seek approval from the Director of Choral Activities in order to take this course for 0 credit.

MUS 4120 CHAMBER CHOIR (0-1 credits)

A select choral ensemble of 20-32 singers, specializing in outstanding examples of a cappella choral music. Preparation and performance of all styles of music. Appearances in concerts throughout the year, on campus; in the metropolitan area; and occasionally, in various other regions of Nebraska and the world.

Prerequisite(s)/Corequisite(s): Auditions at start of each semester - solo, sight-sing, range check, & group audition to match voice qualities. Must seek approval from Director of Choral Activities to take course for 0 credits. Not open to non-degree graduate students.

MUS 4130 UNIVERSITY ORCHESTRA (0-1 credits)

Heartland Philharmonic Orchestra is a full symphony orchestra performing symphonic repertoire. Public performance. Open to all students and members of the greater metropolitan community. Repertoire is drawn from the four periods of music associated with symphonic literature: Baroque, Classical, Romantic, and Modern.

Prerequisite(s)/Corequisite(s): Audition and permission.

MUS 4160 SYMPHONIC WIND ENSEMBLE (0-1 credits)

The Symphonic Wind Ensemble performs the finest concert band literature at four campus concerts, professional conferences, and tours. Open to all full- and part-time students.

Prerequisite(s)/Corequisite(s): Audition is required for membership in the Symphonic Wind Ensemble.

MUS 4190 RECITAL (1 credit)

This course is designed for all undergraduate students performing a senior recital. All recitals are to be one half hour to one hour depending on the student's degree requirements.

Prerequisite(s)/Corequisite(s): Recital fee payment (conductor's fees waived) & applied instructor's permission. BM-Education & BA Students: 4 semesters of appropriate Applied Music (MUS 1150-3150). BM-Performance: MUS 3190; 7 semesters of appropriate Applied Music (MUS 1150-3150).

MUS 4220 AUDIO RECORDING TECHNIQUES III (3 credits)

This course provides students with advanced instruction in sound mixing, digital audio editing, audio post-production and mastering. Topics include advanced digital audio editing, audio signal processing techniques, analog signal processing hardware, automation, and final product authoring and mastering.

Prerequisite(s)/Corequisite(s): MUS 3170, MUS 4200 & MUS 4210. Not open to non-degree graduate students.

MUS 4240 ADVANCED AUDIO RECORDING TECHNIQUES (3 credits)

This course provides students with advanced instruction in sound mixing, digital audio editing, audio post-production and mastering. Topics include advanced digital audio editing, audio signal processing techniques, analog signal processing hardware, automation, and final product authoring and mastering. (Cross-listed with MUS 8246).

Prerequisite(s)/Corequisite(s): MUS 3170, MUS 4200 & MUS 4210. Not open to non-degree graduate students.

MUS 4280 ADVANCED TOPICS IN MUSIC TECHNOLOGY (3 credits)

A seminar in Music Technology on an advanced or emerging topic in the field. The topic for each offering will be announced the prior semester.

Prerequisite(s)/Corequisite(s): Permission of department.

MUS 4290 MUSIC CAPSTONE PROJECT (1 credit)

This course is to serve as a capstone project for students in the Bachelor of Arts in Music degree. Projects must be approved by the faculty and a member of the faculty will be assigned to advise on the project.

Prerequisite(s)/Corequisite(s): Senior standing and successful completion of MUS 1420 or MUS 1430. Not open to non-degree graduate students.

MUS 4300 BUSINESS OF MUSIC (3 credits)

An overview of the global music industry as practiced in the United States, this course will provide insights into a number of key areas of business related to music. Students will also explore a diversity of music industry career paths in areas such as arts management, music products & merchandizing, public relations, music production & recording, publishing, and online music distribution.

Prerequisite(s)/Corequisite(s): Students must be enrolled as music majors, or by permission of instructor.

MUS 4400 ADVANCED COMPOSITION (1 credit)

Individualized applied study of the craft of musical composition in larger media and various styles.

Prerequisite(s)/Corequisite(s): MUS 3440 and written permission. Not open to non-degree graduate students.

MUS 4430 ARRANGING FOR JAZZ ENSEMBLE (3 credits)

Techniques of writing for jazz ensembles of various combinations of instruments. (Cross-listed with MUS 8436).

Prerequisite(s)/Corequisite(s): MUS 2480 or MUS 2420

MUS 4440 MUSIC SINCE 1945 (3 credits)

This course covers important developments in music in the United States and Europe since 1945. (Cross-listed with MUS 8446).

Prerequisite(s)/Corequisite(s): Completion of MUS 3420 or permission of instructor.

MUS 4450 ORCHESTRATION (2 credits)

Basics of instrumentation and scoring for band and orchestra.

Prerequisite(s)/Corequisite(s): Completion of MUS 2420 with a C or better. Not open to non-degree graduate students.

MUS 4530 HISTORY OF WESTERN OPERA (3 credits)

This course will consist of significant music theater works in the Western world from 1600 to the present. (Cross-listed with MUS 8536).

Prerequisite(s)/Corequisite(s): MUS 2550 and MUS 2560, Junior standing.

MUS 4540 RENAISSANCE MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature c. 1350-1600. (Cross-listed with MUS 8546).

Prerequisite(s)/Corequisite(s): MUS 2550, MUS 2560, and MUS 2570. Not open to non-degree graduate students.

MUS 4550 BAROQUE MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from c. 1600-1750. (Cross-listed with MUS 8556).

Prerequisite(s)/Corequisite(s): MUS 2550 and MUS 2560.

MUS 4560 CLASSICAL MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from c. 1750-1815. (Cross-listed with MUS 8566).

Prerequisite(s)/Corequisite(s): MUS 2550, MUS 2560, and MUS 2570.

MUS 4570 ROMANTIC MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of Music literature from c. 1815-1912. (Cross-listed with MUS 8576).

Prerequisite(s)/Corequisite(s): MUS 2550 and MUS 2560.

MUS 4580 MUSIC FROM 1900 - 1945 (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from the post-romantic period to 1945. The objective will be to provide the student with a broad overview with special attention given to composers and individual works which typify a style or form. (Cross-listed with MUS 8586).

Prerequisite(s)/Corequisite(s): MUS 2560.

MUS 4590 AFRICAN-AMERICAN POPULAR MUSIC FROM BEBOP TO HIP-HOP (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of African-American popular music literature from c. 1900-present. The objective will be to provide the student with a broad overview with special attention given to musicians and individual works which typify a style or form. Listening assignments will be an integral part of the course, and attendance at live performances will supplement the lectures, discussions and readings. (Cross-listed with MUS 8596, BLST 8596, BLST 4590).

Prerequisite(s)/Corequisite(s): Junior or Senior standing in the UNO School of Music

MUS 4600 PIANO PEDAGOGY (3 credits)

This course is a survey of the art of teaching the piano. Course content will include a survey of beginning and intermediate piano methods, literature for the beginning/intermediate piano student, studio business practice, professional organizations, and group piano instruction pedagogy. (Cross-listed with MUS 8606).

Prerequisite(s)/Corequisite(s): Permission of instructor.

MUS 4610 VOICE PEDAGOGY (3 credits)

This course is a study of the physiological and acoustical properties of the vocal mechanism and of the various techniques used in developing the singing voice. Also, it will apply knowledge acquired about the voice through studio teaching and observations of other voice teachers. (Cross-listed with MUS 8616).

Prerequisite(s)/Corequisite(s): Voice Music Major or permission of instructor.

MUS 4620 INSTRUMENTAL PEDAGOGY (3 credits)

This course is a study of the physiological and acoustical properties of various instruments and of techniques used in developing instrumental technique. Also, it will apply knowledge acquired about the instrument through studio teaching and observations of other instrumental teachers.

MUS 4660 HEALTH AND WELLNESS FOR MUSICIANS (3 credits)

Health and Wellness for Musicians gives an overview of the dimensions of wellness and common health/wellness challenges for musicians. The course provides students with a toolbox of ideas and strategies for the development, design, and implementation of a music wellness campaign for non-musicians and individualized wellness plans for specific instruments and voice types. (Cross-listed with MUS 8696).

MUS 4720 CHORAL LITERATURE (3 credits)

A survey course in the study of significant choral genre of the various periods of music from plain song to contemporary music. (Cross-listed with MUS 8726).

Prerequisite(s)/Corequisite(s): MUS 2570 and MUS 3640. Junior music major standing or permission of the instructor.

MUS 4730 KEYBOARD LITERATURE (3 credits)

This course will examine literature written for keyboard (piano) from the 16th century to the present. Emphasis will be placed on solo literature of the Baroque, Classic, Romantic, and Contemporary periods. Included are keyboard concertos with orchestra and works for four hands and two pianos. (Cross-listed with MUS 8736).

Prerequisite(s)/Corequisite(s): Permission of instructor.

MUS 4740 VOICE LITERATURE (3 credits)

This course is a study of the development of art song in Europe and America. Emphasis will be given to German and French song literature and their influence on English and American song. (Cross-listed with MUS 8746)

Prerequisite(s)/Corequisite(s): Junior voice or permission of instructor.

MUS 4750 INSTRUMENTAL LITERATURE (3 credits)

This course is a study of the development of instrumental (brass, winds, strings, percussion) literature in Europe and America.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Total Credits		119

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

¹ MUS 1080 – offered online every semester

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

School of the Arts

Founded in 2015, the School of the Arts is one of three within the College of Communication, Fine Arts and Media. Comprised of Art & Art History (p. 470), Theatre (p. 499), and the Writer's Workshop (p. 506), the school fosters probing inquiry of the world and develops in the scholar-artist powers of observation, creativity, reflection, and critical analysis.

Located in the award-winning Weber Fine Arts Building, completed in 1992 and designed to be an "inhabited sculpture on campus," the school's facilities include the UNO Art Gallery, dedicated studio spaces for art-making, acting, directing, theatrical design and construction, a Black Box Theatre, computer labs, traditional lecture and seminar rooms, and informal gathering spaces.

Enriched by the cultural diversity of our metropolitan home, the School of the Arts' 44 faculty members are dedicated to helping students understand the relationship between the arts and our communities' well-being, seeing expression as a means to connect diverse ideas and people.

Art and Art History

Art & Art History educates artists, scholars and teachers by fostering creative expression, visual literacy, and critical thinking through practice and research. By developing mastery of various disciplines in art, students are prepared to become leaders in their chosen careers and make positive contributions to the world. Art & Art History is fully accredited by the National Association of Schools of Art and Design (NASAD).

Contact Information

For more information, contact Art & Art History at 402.554.2420.

Website (<http://www.unomaha.edu/college-of-communication-fine-arts-and-media/art-and-art-history/>)

Admissions

Any student enrolled in the College of Communication, Fine Arts and Media may declare a major in Art & Art History. To advance to upper level courses, students working on their BASA must pass a portfolio review (ART 2000), which is normally conducted after a student has completed the Studio Core I courses, or the equivalents.

Degrees Offered

- Art History, Bachelor of Arts (p. 476)
- Studio Art, Bachelor of Arts (p. 480)
- Studio Art, Bachelor of Fine Arts (p. 488)

Writing in the Discipline

Writing in the discipline course: All students are required to take a writing in the discipline course within their major. For Art & Art History this is WRWS 3500 or another approved course.

Minors Offered

- Art History Minor (p. 479)
- Studio Art Minor (p. 496)

Art History

Art History is an interdisciplinary field that studies the most significant artists and artworks in human history and emphasizes the role of visual culture from the past to the present. Students majoring in Art History at UNO can prepare for advanced graduate study in art history as well as careers in museum studies or art administration.

- Art law/anti-forgery specialist
- Interior designer
- Art conservationist/restorer
- Museum curator
- Gallerist
- Art/estate appraiser
- Exhibit installation technician

Studio Art

The programs in studio art provide a comprehensive art education that prepares students with the technical skills, historical context, and theoretical knowledge to create meaningful artistic contributions. Visual imagery created through painting, drawing, printmaking, book arts, ceramics, sculpture, graphic design, media arts, or game design are emphasized in this program. Additionally, students can also pursue teacher certification to apply their artistic skills in the K-12 classroom.

2D

- Artist
- Fashion illustrator
- Comic illustrator
- Storyboarder
- Medical illustrator
- Art therapist
- Concept artist
- Art educator

3D

- Sculptor
- Art educator
- Special effects artist
- 3D animator

Graphic Design

- Corporate graphic designer
- Web designer
- Marketing/advertising artist
- UX/UI designer

Media Arts (Intermedia and Digital Art/Game Design)

- Concept/character artist
- Photographer
- 3D Animator
- UX/UI designer
- Game art director
- Environmental design artist

Art, K-12 Education

- Elementary art educator
- Secondary art educator
- Tutor

ART 1010 ART APPRECIATION (3 credits)

This course is designed as an introductory-level art history for the non-art major. It surveys the aesthetic principles of the visual arts and their interpretation in a socio-historical context. (May not be taken for major credit.) Lab fee required.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

ART 1040 CROSS-CULTURAL SURVEY OF ART (3 credits)

This is an introductory course that explores the painting, sculpture and decorative arts of five cultures: Mesoamerican, Native American, Asian, European and African. Typical of art history introductory courses, it surveys several cultures and time periods. Students explore reasons for making art and its relationship to the religion, politics and everyday life of the cultures. This course also explores the influence of these various cultures on contemporary American art. Lab fee required.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

ART 1100 FOUNDATION: DRAWING (3 credits)

This course is an introduction to the essential tools of art making through an active exploration of drawing mediums and design concepts. The focus is on the development of conceptual and technical skills used in contemporary studio practice. The course will have a strong emphasis on learning to see in the context of an observational studio practice.

Prerequisite(s)/Corequisite(s): Lab fee required.

ART 1110 FOUNDATION: 3D DESIGN (3 credits)

This course is an introduction to the technical and conceptual aspects of three dimensional design, focusing on drawing and sculpture problems. Students will develop an understanding of 3-D design components and principles, learn handmade and shop oriented technologies, and explore analytical and conceptual drawing. They will also address critical skills and the cultural analysis of art practice.

Prerequisite(s)/Corequisite(s): Lab fee required.

ART 1210 FOUNDATION: 2-D DESIGN (3 credits)

This course is an introduction to the elements and principles of design utilizing a variety of 2-D media and formats. These will be investigated through compositional strategies, studio techniques, gestalt understanding, critical thinking and concepts of contemporary methodologies in art making. Lab fee required.

ART 1220 FOUNDATION: DIGITAL MEDIA (3 credits)

An introduction to digital art and design skills, nomenclature, and practice while learning aesthetics and art and design history. Students learn to balance practical knowledge with visual, theoretical, and historical frameworks, and they complete digital skills exercises that incorporate art and design history. These digital skills are then practiced and reinforced with more in-depth art and design projects.

Prerequisite(s)/Corequisite(s): Lab fee required.

ART 1810 WATERCOLOR I (3 credits)

This course cover beginning watercolor techniques with basic water media skills taught in the class. No experience is necessary for students enrolled in 1810.

ART 1820 WATERCOLOR II (3 credits)

This course will review fundamental methods and techniques associated with watercolor painting and will introduce more advanced techniques. Advanced watercolor students submit a written contract for their semester plan which includes the concept or content and approximate number of paintings. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 credit hours.)

Prerequisite(s)/Corequisite(s): ART 1810

ART 2000 CORE ONE PORTFOLIO REVIEW (0 credits)

ART 2000 Core One Portfolio Review is a zero credit hour course offered every Fall and Spring semester. All BASA majors on the 2013-14 catalog year and after must complete the ART 2000 Core I Portfolio review to graduate with the BASA or BFA major. ART 2000 will usually be completed during the sophomore year; i.e. between 27 and 57 credit hours, but may be completed later.

Prerequisite(s)/Corequisite(s): Students must complete ART 1100; ART 1110; ART 1210; ART 1220. Not open to non-degree graduate students.

ART 2050 SURVEY OF WESTERN ART HISTORY I (3 credits)

A survey of the major developments in painting, sculpture and architecture from Paleolithic cave paintings through the Middle Ages.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

ART 2060 SURVEY OF WESTERN ART HISTORY II (3 credits)

This course is a survey of the major developments in painting, sculpture and architecture from the Renaissance to the 20th century. Lab fee required.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

ART 2070 ART OF INDIA AND SOUTHEAST ASIA (3 credits)

A study of the arts of India and cultures under its influence, with attention to religious and philosophical background. Lab fee required.

Prerequisite(s)/Corequisite(s): Sophomore standing. Not open to non-degree graduate students.

ART 2080 ART OF CHINA AND JAPAN (3 credits)

This course is a study of the arts of China and Japan, with attention to religious and philosophical backgrounds. Lab fee required.

Prerequisite(s)/Corequisite(s): Sophomore standing . Not open to non-degree graduate students.

ART 2100 LIFE DRAWING I (3 credits)

Life Drawing I is an introduction to drawing the human form. The goal of the course is to introduce drawing media and relate them to the problems of drawing the figure. Both perceptual and conceptual skill building are emphasized. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 1110 and ART 1210.

ART 2110 LIFE DRAWING II (3 credits)

Life Drawing II is an expansion of the instruction and skill set obtained during Life Drawing I. This course continues to assist the student become aware of unfamiliar forms in the figure. Perceptual and conceptual skill building is again emphasized. Lab Fee required.

Prerequisite(s)/Corequisite(s): ART 2100

ART 2200 TYPEFACE DESIGN AND TYPOGRAPHY (3 credits)

Typeface Design and Typography is foundational to the practice of graphic design and the Graphic Design Concentration sequence. This intensive studio course focuses on the skills, theory, history and practice of typeface design as well as the theory and practice of typography and layout.

Prerequisite(s)/Corequisite(s): ART 1220 ART 3130

ART 2300 WEB DESIGN (3 credits)

This course is an introduction to basic web design skills and topics, with an emphasis on design and visual communication.

Prerequisite(s)/Corequisite(s): ART 1220. Not open to non-degree graduate students.

ART 2600 SURVEY OF COMICS: MORE THAN CAPES AND TIGHTS (3 credits)

This course is a survey of the history of the Western comic from its earliest days to the modern era.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ART 2610 EXPLORATION OF GLOBAL COMICS (3 credits)

This course is a survey of the history, influences and evolution of comics from countries around the world such as France, Italy, the Middle East, Japan, South America and Africa. Students will come to understand how comics grew and evolved under different social, political and cultural climates around the world.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

ART 3000 MEDIA ARTS 1 (3 credits)

This course is an introduction and overview to the concentration of Media Arts. The curriculum is designed to provide a basic knowledge of electronic imaging and production techniques for students wishing to continue in digital media or those working with media production artists. Areas introduced will be Digital Image Production, Digital Video Production, and Animation.

Prerequisite(s)/Corequisite(s): Art 1220 or permission of instructor

ART 3100 ADVANCED DRAWING I (3 credits)

Instruction in drawing at an advanced level to develop practical skills and techniques through directed classroom projects.

Prerequisite(s)/Corequisite(s): ART 1110

ART 3110 ADVANCED DRAWING II (3 credits)

Instruction in drawing at an advanced level to develop practical skills and techniques through directed classroom projects. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.)

Prerequisite(s)/Corequisite(s): ART 1110 and ART 2110 and ART 3100

ART 3120 MEDIA ARTS 2 (3 credits)

Advanced overview of Intermedia and digital production as well as critical theory for artists. The course includes both fine art and applied uses of Intermedia and digital art through the development of individual and group projects using digital and electronic media means.

Prerequisite(s)/Corequisite(s): Art 3000 or permission of instructor.

ART 3130 GRAPHIC DESIGN 1 (3 credits)

The first course in the Graphic Design sequence, Graphic Design I is an upper division course focusing on the essential elements of Graphic Design as a discipline and practice. Working individually, students learn the tools, terminology, theory, and history of Graphic Design as a professional and artistic practice. Focused attention and time is spent learning conceptualization skills, digital skills, design practice and the relationship between the designer and their social and historical context.

Prerequisite(s)/Corequisite(s): ART 1220, or permission of instructor

ART 3140 COMPUTER GENERATED IMAGERY (3 credits)

The goal of this course is to introduce students to basic principles and aesthetic considerations of computer generated imagery and interactive virtual spaces (such as game mods and second life). The course will focus on the use of computers as a tool to generate three dimensional forms and create spaces and navigable worlds. The course exposes students to a variety of theoretical and aesthetic positions and encourages them to think of CGI and virtual space building as an art making process. Students will produce art works through the acquisition of technical skills and the exploration of creative uses within the medium.

Prerequisite(s)/Corequisite(s): ART 1220 or permission of the instructor

ART 3150 VIDEO ART (3 credits)

An introduction to video art production and critical theory for artists. The course exposes students to a variety of theoretical and aesthetic positions and encourages them to think of video as an art making process rather than mass media product. Students are required to produce a number of video art works. Production rather than consumption is stressed as a pedagogical mode.

Prerequisite(s)/Corequisite(s): ART 3000 or permission of instructor

ART 3160 GAME DESIGN AS ART (3 credits)

This course will encompass theory and practice of game development, game creation as an art process, and an exploration of the work of artists who have created game based work. Areas of study during the course will include game design and mechanics, explorations of theory, narrative and storytelling with game paradigms, social and ethical concerns of gaming and gaming as cultural resistance.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students

ART 3170 DIGITAL GAME DESIGN (3 credits)

This course provides an introduction to digital game development. It will explore all aspects of creating 2d games. Students will work on individual and team projects. Students will learn to do concept art, pre-production planning, prototyping and testing, all working towards creating completed games.

Prerequisite(s)/Corequisite(s): Non-degree graduate students not allowed.

ART 3200 THE HAND PRODUCED BOOK I: TYPOGRAPHY AND BOOK DESIGN (3 credits)

This course is an introduction to the typographic principles and fundamental letterpress techniques as applied to printed books. Each student learns hand typesetting and letterpress procedures, then designs and prints a small edition of their selected text. Lab fee required.

ART 3210 COLOR THEORY (3 credits)

Instruction in the study of color through directed classroom assignments.

Prerequisite(s)/Corequisite(s): ART 1110 and ART 1210

ART 3220 HAND PRODUCED BOOK II: LETTERPRESS PRINTING (3 credits)

Continuing work in typography and book design with an emphasis on book illustration, multi-color printing, and the standardization and control of edition work. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required.

Prerequisite(s)/Corequisite(s): ART 3200

ART 3230 BOOK STRUCTURES: INTRODUCTION TO BOOKBINDING (3 credits)

This course investigates basic approaches to bookbinding, introducing students to the history, tools and techniques of the discipline. In addition to the concertina structure and simple presentation wrappers, students execute a variety of non-adhesive bindings, both Western and Japanese, and learn basic case-binding methods. Lab fee required.

ART 3250 PATTERNED PAPER (3 credits)

This course examines various techniques employed in the creation of decorative patterned papers traditionally used in bookbinding for both cover material and/or end sheets. The emphasis of the course will be on effective pattern design, the mastery of pattern paper production methods, and fine craft standards. Lab fee required.

ART 3300 ELEMENTARY ART METHODS (3 credits)

Study of the theory, methods, curriculum and recent research affecting art education with emphasis on the elementary art program. Lab fee required.

Prerequisite(s)/Corequisite(s): TED 2400 & Praxis Core, K-12 ART/ED majors only. Junior standing. Lab fee required.

ART 3304 ELEMENTARY ART FIELD EXPERIENCE (0 credits)

ART 3304 is an in-school practicum taken in conjunction with ART 3300.

Candidates must demonstrate competencies related to performance in their assigned classroom. This is the first of two required art practicum experiences prior to the clinical practice semester.

Prerequisite(s)/Corequisite(s): EDUC 2520 or TED 2400; Co-requisite ART 3300. Not open to non-degree graduate students.

ART 3310 ELEMENTARY SCULPTURE (3 credits)

This course begins the exploration of the 3-dimensional artistic form which can be constructed using a variety of materials including clay, plaster, wood, steel and new media. Lab fee required..

Prerequisite(s)/Corequisite(s): ART 1220

ART 3320 INTERMEDIATE SCULPTURE (3 credits)

Intermediate Sculpture continues and expands upon the elementary level of sculpture and builds upon methods, technologies, problem solving and professional practice. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 3310

ART 3330 ART IN PUBLIC PLACES (3 credits)

The goal of this course is to introduce students to the concepts and practice related to displaying artwork in public places. Following a thorough examination of the history of public art, the course will focus on the various visual languages and iconography appropriate for public venues. The course emphasizes building original artwork using both traditional and digital technologies, displaying work in public spaces, artist responsibilities and related professional practice.

Prerequisite(s)/Corequisite(s): ART 1110

ART 3340 DIGITAL SCULPTURE - DESIGN AND BUILD TECHNOLOGIES (3 credits)

The goal of this course is to introduce students to the methods of designing objects in a digital environment and realizing them as objects in the physical world. Students will learn to create forms using a variety of 3D modeling software and scanning technologies. The course will introduce students to the Autodesk suite of programs, including 3D Studio Max, Maya Inventor, 123D Catch, as well as Zbrush. Once students have achieved a high level of competency on the computer, the class will begin exploring systems for building their creations. Using Make 123D, Pepakura and Makerware students will fabricate objects in plastic, cardboard and wood. Additionally, the class will address both the artistic and functional applications of these methods.

Prerequisite(s)/Corequisite(s): ART 1110

ART 3360 APPLIED ART & DESIGN (3 credits)

This course is designed to present an opportunity for education and other undergraduate students to develop basic skills, knowledge and appreciation of the arts and crafts of our culture and other world cultures. The course content will be individualized for the purposes of adapting methods, values, content, and media for students working with special populations or in special settings. Lab fee required.

Prerequisite(s)/Corequisite(s): Sophomore.

ART 3370 TECHNOLOGY IN ARTS EDUCATION (3 credits)

This course is specifically designed for pre-service art teachers to learn how to integrate media arts, visual and instructional technology, and digital visual culture into arts curriculum appropriate for application to K-12 contexts. Students will critically examine digital arts, digital art media and technology, and digital visual culture environments and address pedagogical and implementation issues as they simultaneously create their own digital art and digital visual culture. Lab fee required.

Prerequisite(s)/Corequisite(s): Prereq: TED 2400 and Praxis Core; K-12 ART/ED majors only. Coreq: ART 3300. Or with permission of the instructor. Junior standing. Lab fee required. Not open to non-degree graduate students.

ART 3410 ELEMENTARY PAINTING (3 credits)

Instruction in oil painting permits each student the time and environment to work and develop individually. Perceptual and conceptual skill building emphasized. Knowledge of contemporary painting integral to painting practice. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 1110 and ART 1210

ART 3420 INTERMEDIATE PAINTING (3 credits)

Instruction in oil painting permits each student the time and environment to work and develop individually. Emphasis on developing cohesive body of work in context of experimentation. Knowledge of contemporary painting integral to painting practice. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 3410

ART 3510 ELEMENTARY PRINTMAKING (3 credits)

This is an introductory course to the history and studio practices of printmaking. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 1110 and ART 1210

ART 3520 PHOTOGRAPHIC DIGITAL PRINTMAKING (3 credits)

Introduction to photographic and digital printmaking technologies including pre-press and printing techniques. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 1110 and ART 1210

ART 3530 PAPERMAKING (3 credits)

This course examines the history and techniques of classic papermaking, sheet formation and producing edition sheets. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 1110 and ART 1210

ART 3610 ELEMENTARY CERAMICS (3 credits)

This course is an introduction to the medium of ceramics. The focus of this course will be the use of clay as a sculptural medium with the emphasis on various, basic techniques for creating objects in clay. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 1220

ART 3620 INTERMEDIATE CERAMICS (3 credits)

This course is a continuation of processes covered in the Elementary Ceramics course with basic pottery techniques utilizing the wheel, hand building, object prototyping and advanced mold making. Additional emphasis will be on scale and completion of mid-to large size projects.

Prerequisite(s)/Corequisite(s): ART 3610. Lab fee required.

ART 3700 INTRODUCTION TO ANCIENT ART (3 credits)

This course provides an introduction into the art and cultures of the ancient Mediterranean areas. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 2050 or permission of instructor. Not open to non-degree graduate students.

ART 3710 EGYPTIAN ART (3 credits)

This course will examine ancient Egyptian culture through its art and architecture. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of Art 2050 & Art 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3720 GREEK ART (3 credits)

This course will immerse students in the art and culture of ancient Greece. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3730 ETRUSCAN & ROMAN ART (3 credits)

This course provides an in-depth investigation of Etruscan and Roman civilizations. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3750 AMERICAN ART (3 credits)

This course provides a study of art, architecture, and material culture produced in the United States approached through varied contexts (artistic, religious, political, economic, etc.) and methodologies. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3760 ART HISTORY SEMINAR (3 credits)

This class prepares students for advanced level art history courses as well as a career in art history and/or related fields. Basic skills such as critical thinking, analytical reading, traditional and innovative research methods, writing, and public speaking will be emphasized.

Prerequisite(s)/Corequisite(s): ART 2050 and ART 2060

ART 3770 HISTORY OF ARCHITECTURE TO 1850 (3 credits)

A survey of the history, aesthetics and technical developments in architecture from ancient times to the middle of the 19th century. Lab fee required.

Prerequisite(s)/Corequisite(s): None. Recommended: ART 2050 or ART 2060 (prereq or coreq).

ART 3780 HISTORY OF ARCHITECTURE SINCE 1850 (3 credits)

This course is a survey of the history of architecture since the coming of the industrial age, including the major schools and movements in architecture of the 20th century.

Prerequisite(s)/Corequisite(s): None. Recommended: ART 2050 or ART 2060. Lab fee required.

ART 3800 HISTORY OF DESIGN (3 credits)

The history of modern global design movements, primarily 1851 to present. The movements cover a range of media, from graphic arts and industrial design to furnishing and interior design.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 3830 HISTORY OF PHOTOGRAPHY (3 credits)

This course provides an introduction to the history of photography from its earliest forms to that of contemporary society and culture. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 3860 WOMEN IN ANCIENT AND MEDIEVAL ART (3 credits)

The purpose of this course is to provide an introduction of women through the art and culture of the ancient Mediterranean and western Middle Ages.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3870 GENDER & SEXUALITY IN MODERN ART (3 credits)

This course provides an introduction to topics of gender and sexuality in modern art, from 1860 to the present.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 3910 INTERMEDIATE PRINTMAKING (3 credits)

Intermediate Printmaking expands upon basic printmaking concepts and techniques and includes monotype variations, intaglio techniques, Moku Hanga woodcuts and other woodcut processes. Students will be involved with drawing, creating, problem solving and understanding the printmaking studio and its processes.

Prerequisite(s)/Corequisite(s): ART 3510. Not open to non-degree graduate students.

ART 4000 SPECIAL SEMINARS IN ART EDUCATION (1-3 credits)

A series of intensive courses in the history and theory of art education designed specifically for elementary and secondary school art teachers. These courses are scheduled as special seminars or workshops according to purpose. (Cross-listed with ART 8006.)

Prerequisite(s)/Corequisite(s): Junior and Department Permission

ART 4010 SPECIAL TOPICS IN STUDIO ART (3 credits)

This course concerns itself with a variety of limited topics in the field of Studio Art. At times this course is coordinated with an external event such as a visiting artist, exhibition or study trip. It may also be considered a testing ground for acceptance and interest in a relatively new topic in Studio Arts. Exact content will be determined by the offering instructor.

Prerequisite(s)/Corequisite(s): Prerequisites of each 4010 course will be determined by the instructor and therefore will require special permission.

ART 4020 PROFESSIONAL STUDIO PRACTICES (3 credits)

This is a capstone course for the Studio Arts area that includes book arts, ceramics, drawing, painting, printmaking, sculpture and media (2D, 3D, and Media). During the semester, students will learn the administrative component that is essential for cultivating and maintaining a sustainable studio practice in art. Activities include writing artist statements, an artist curriculum vitae alongside participating in the simulated arts activities of applying for an exhibition and artist grant and understanding the benefits and liabilities of social media.

Prerequisite(s)/Corequisite(s): Students must be of Junior standing. Not open to non-degree graduate students.

ART 4130 MEDIA ART III (3 credits)

This is a digital studio course for students interested in exploring interactive digital projects using current or emerging technologies. The course includes both fine art and applied uses of digital art through the development of individual and group projects using digital and electronic media means. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.)

Prerequisite(s)/Corequisite(s): ART 3120 or permission of instructor.

ART 4140 COMPUTER GENERATED IMAGERY II (3 credits)

This course is a continuation of principles and practices introduced in ART 3140. The goal of this course is intended for experienced students to create projects that explore advanced principles and aesthetic considerations of computer generated imagery and interactive 3d virtual spaces.

Prerequisite(s)/Corequisite(s): ART 3140 or permission of the instructor.

ART 4150 GRAPHIC DESIGN 2 (3 credits)

A continuation of the Graphic Design sequence, Graphic Design 2 is an advanced course utilizing the knowledge and skills acquired in Graphic Design 1. In Graphic Design 2 students apply acquired knowledge and skills to solve design problems for more complex systems. Intermediate digital skills are paired with intermediate production and materials problems as students complete product and package design systems. These design systems are then paired with companion web and video components. Additionally, students continue their study of professional practices and presentation skills.

Prerequisite(s)/Corequisite(s): ART 3130, or permission of instructor.

ART 4160 GRAPHIC DESIGN 3 (3 credits)

A continuation of the Graphic Design sequence, Graphic Design 3 is an advanced, professional simulation course utilizing the knowledge and skills acquired in Graphic Design 1 and 2. Working individually and in teams, students create large-scale design systems over multiple communications channels for consumer product or services. The course culminates in a thesis presentation with accompanying brand book.

Prerequisite(s)/Corequisite(s): ART 4150, or permission of instructor.

ART 4170 GRAPHIC DESIGN STUDIO (3 credits)

A continuation of the Graphic Design sequence, Design Studio is an advanced, capstone course utilizing the knowledge and skills acquired in Graphic Design 1, 2, and 3. Working individually and in teams, students design thesis research projects, create professional portfolios, present their work to the public, and work on client projects for on and off-campus organizations.

Prerequisite(s)/Corequisite(s): ART 4160, or permission of instructor.

ART 4180 ADVANCED DIGITAL GAME DESIGN (3 credits)

This course provides an advanced experience to digital game development. It explores all aspects of creating 3d games. Students will work on individual and team projects and will learn concept art, pre-production planning, prototyping and testing while working towards creating completed games using a three dimensional platform.

Prerequisite(s)/Corequisite(s): ART 3140, ART 4140, or permission of the instructor. Not open to non-degree graduate students.

ART 4190 GAME DESIGN STUDIO (3 credits)

This course provides a capstone study in game development. It explores game design, game prototyping, finalization, distribution and promotion. Students will work in teams to conceptualize, pitch, prototype, and present an audience ready game. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.)

Prerequisite(s)/Corequisite(s): ART 4180, or permission of instructor. Not open to non-degree graduate students.

ART 4210 PRINTED BOOKS (3 credits)

This course covers the invention of moveable type through the refinement in printing styles and technology to the present age.

Prerequisite(s)/Corequisite(s): ART 3220 and ART 3230 or permission of instructor.

ART 4300 SECONDARY ART METHODS (3 credits)

This course is the study of theory, methods, art curriculum content, and recent research in art education relative to art education in middle and high school settings. Lab fee required

Prerequisite(s)/Corequisite(s): TED 2400 & Praxis Core; K-12 ART/ED majors only. Junior standing.

ART 4310 ADVANCED SCULPTURE (3 credits)

Advanced work in area of student's choice with facilities for oxyacetylene welding, arc welding and wood working. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 8316.)

Prerequisite(s)/Corequisite(s): ART 3310

ART 4320 BACHELOR OF FINE ARTS INDEPENDENT STUDY I (3 credits)

This course is an advanced individualized study in studio art concentration area of Ceramics, Drawing, Hand Produced Book, Sculpture, Painting, Printmaking or Graphic Design.

Prerequisite(s)/Corequisite(s): Advanced level courses in area of concentration, and permission of instructor.

ART 4330 BACHELOR OF FINE ARTS INDEPENDENT STUDY II (3 credits)

BFA II is the second semester of an advanced individualized study in a studio art concentration area of Ceramics, Drawing, Hand Produced Book, Sculpture, Painting, Printmaking or Graphic Design. Lab fee required.

Prerequisite(s)/Corequisite(s): Completion of ART 4320 (BFA I) in the area of emphasis.

ART 4340 BACHELOR OF FINE ARTS INDEPENDENT STUDY III (3 credits)

This course is the continuation of BFA II for the advanced individualized study in studio art concentration area of Ceramics, Drawing, Hand Produced Book, Sculpture, Painting, Printmaking or Graphic Design. This course is only used if, for some reason the student is unable to proceed to BFA Thesis after completing BFA II. Lab fee required.

Prerequisite(s)/Corequisite(s): Completion of ART 4320 and 4330 and permission of instructor as this course is only used when the student is unable to proceed to the BFA Thesis.

ART 4350 TRENDING TOPICS IN ART EDUCATION (3 credits)

This is a series of intensive courses dealing with the theory and practice of current trends in art education designed specifically for pre-service art teachers. These courses are scheduled as special seminars or workshops according to purpose. Lab fee may be required.

Prerequisite(s)/Corequisite(s): Prereq: TED 2400 and Praxis Core; K-12 ART/ED majors only. Junior standing or to be determined by the instructor based upon the preparation required for an adequate understanding of the material of the course.

ART 4410 ADVANCED PAINTING (3 credits)

Advanced instruction in oil painting permits students the time and environment to work and develop individually. Emphasis on developing cohesive body of work as continuation from work done in Intermediate painting. Knowledge of contemporary painting integral to painting practice. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 8416.)

Prerequisite(s)/Corequisite(s): ART 3420

ART 4420 BACHELOR OF FINE ARTS THESIS (3 credits)

This course is the culmination of the BFA process with an individually designed study in studio art concentration area of Ceramics, Drawing, Hand Produced Book, Sculpture, Painting, Printmaking or Graphic Design. A faculty committee and thesis exhibition are required for completion of this course. Lab fee required.

Prerequisite(s)/Corequisite(s): Completion of ART 4320 and ART 4330 and permission of instructor.

ART 4440 INDEPENDENT STUDY IN STUDIO ART (1-3 credits)

This course is an independent study with variable credit for studio art students who have already taken the most advanced level course in their chosen degree program.

Prerequisite(s)/Corequisite(s): This course requires permission from instructor.

ART 4510 ADVANCED TECHNIQUES IN PRINTMAKING (3 credits)

This course allows students to develop their skills in both lithography and intaglio and the color processes for each printmaking technique. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 8516.)

Prerequisite(s)/Corequisite(s): ART 3510

ART 4530 ART INTERNSHIP (1-3 credits)

A tutored internship at a local arts institution that will introduce students to following areas of concentration: Curatorial Collections Research, Education Outreach, and Preparation/Installation. Working as an Artist's Studio Assistant or in the areas of Web page design or graphic design are also appropriate internship projects. Ideally, the internship should provide the student with an opportunity to gain pre-professional experiences and skills. It should also increase his or her awareness of current issues and practices within the field of art.

Prerequisite(s)/Corequisite(s): Reserved for studio art (BASA & BFA), Art Education, or Art History majors; junior standing & min GPA of 3.0. Permission of Faculty Advisor & Intern Sponsor required. Advanced art history, art education, or studio courses may be required.

ART 4610 ADVANCED CERAMICS (3 credits)

This course will consist of advanced work on the potter's wheel, casting and preparations in glaze composition, as well as loading and firing of a high-fire kiln. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 8616.)

Prerequisite(s)/Corequisite(s): ART 3610

ART 4730 CLASSICAL ART HISTORY (3 credits)

This course is a study of painting, sculpture, architecture and minor arts of the classical world beginning with Cycladic art and including Minoan, Mycenaean, Greek, Etruscan and Roman art through 300 A.D. Lab fee required. (Cross-listed with ART 8736.)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4750 LATE ROMAN AND BYZANTINE ART HISTORY (3 credits)

A study of painting, sculpture and architecture of the Eastern Roman Empire from the founding of Constantinople, and of Western Europe from the time of Constantine to the dissolution of the Western Roman Empire. Lab fee required. (Cross-listed with ART 8756.)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4770 EARLY MEDIEVAL ART (3 credits)

This course provides a study of painting, sculpture and architecture of Western Medieval Art. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4780 LATE MEDIEVAL ART HISTORY (3 credits)

This course is a study of painting, sculpture and architecture of the European Middle Age periods of Romanesque and Gothic Art. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 4810 NORTHERN EUROPEAN RENAISSANCE ART HISTORY (3 credits)

This course is a study of the paintings, sculpture and architecture during the 14th, 15th and 16th centuries in France, the Low Countries, Germany, Spain and England. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 4830 ITALIAN RENAISSANCE ART HISTORY (3 credits)

Study of painting, sculpture and architecture in Italy during the 14th, 15th and 16th centuries. Lab fee required. (Cross-listed with ART 8836.)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4850 BAROQUE AND ROCOCO ART HISTORY (3 credits)

This course is a study of painting, sculpture and architecture in Europe during the 17th and 18th centuries. Lab fee required. (Cross-listed with ART 8856.)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4880 MODERN ART I (ART OF EUROPE AND THE AMERICAS, 1850-1920) (3 credits)

A study of the most significant developments in European art and architecture dating from the early Modern period and examined in varied contexts (artistic, religious, political, economic, etc.). (Cross-listed with ART 8886.)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 plus junior standing. For non-majors, junior standing and permission of the instructor are required. Lab fee required.

ART 4890 MODERN ART II (ART OF EUROPE AND THE AMERICAS, 1918-1968) (3 credits)

This course explores the major artistic movements and artists active in Europe and the Americas between the end of WWI and the Vietnam Era circa 1968. (Cross-listed with ART 8896.)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of Art 2050 & Art 2060 plus junior standing. For non-majors, junior standing and permission of the instructor are required. Lab fee required.

ART 4900 CONTEMPORARY ART HISTORY SINCE 1968 (3 credits)

This course introduces contemporary visual arts in a global context from 1968 to the present with topics of discussion including art, aesthetics, politics, gender and sexuality, race and economics. (Cross-listed with ART 8906.)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of Art 2050 & Art 2060 plus junior standing. For non-majors, junior standing and permission of the instructor are required. Lab fee required.

ART 4910 INDEPENDENT STUDY IN ART HISTORY (1-3 credits)

This course is an independent research project under the direct supervision of the sponsoring faculty member, generally involving the writing of a paper. Lab fee required.

Prerequisite(s)/Corequisite(s): Art History major in upper division and permission of instructor.

ART 4920 ART IN THEORY AND IN PRACTICE SINCE 1900 (3 credits)

This course introduces BFA students to the essential theories and critical positions that have shaped the practice of contemporary art in the West since 1900. It also addresses the purpose and nature of the artist's statement, the studio critique, the exhibition, and professionally written art criticism.

Prerequisite(s)/Corequisite(s): Acceptance in BFA program, ART 2050 & ART 2060, & ART 4890 or ART 4900. Other students will need instructor's permission. Students not meeting the min qualifications or instructor's permission will be dropped. Not open to non-degree graduate students.

ART 4930 SPECIAL TOPICS IN ART HISTORY (3 credits)

These illustrated lecture courses deal with a limited topic in the field of art history. The course may be coordinated with an external event such as an exhibition, publication or study trip. Lab fee required. (Cross-listed with ART 8936)

Prerequisite(s)/Corequisite(s): ART 2060 or instructor permission.

ART 4940 ART HISTORY METHODS (3 credits)

This is a seminar course surveying major developments in aesthetics and selected problems in the discipline of Art History. Required for art history majors. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), and preferably, one other art history course.

ART 4950 ART CRITICISM (3 credits)

A study of art criticism from antiquity to the present. Students will both engage art critical writing as a creative and analytical tool.

Prerequisite(s)/Corequisite(s): Senior standing in Art History and completion of or concurrent enrollment in ART 3760 or ART 4940) plus the approval of the Art History faculty.

ART 4990 ART HISTORY THESIS (1 credit)

Art History majors will revise a scholarly paper from an upper-level Art History course in order to obtain a well-written and thoroughly researched paper (20 pages) to submit as part of a graduate school application. Students will also give a required 20-minute oral presentation.

Prerequisite(s)/Corequisite(s): Senior standing in Art History and completion of or concurrent enrollment in ART 3760 (Art History Seminar) or ART 4940 (Art History Methods) plus the approval of the Art History faculty.

Art History, Bachelor of Arts

The Bachelor of Arts in Art History offers an interdisciplinary approach to the history, technique, and theory of art, architecture, and material and visual culture. The program provides two paths of study in art history. Option A prepares students for graduate study in art history while Option B prepares students for careers in the fields of Museum Studies and Arts Administration. The Bachelor of Arts in Art History requires a minimum of 120 credit hours of course work.

Requirements

In addition to the University General Education requirements, art history majors are required to complete courses listed below. Courses used to fulfill University General Education requirements, if they are applicable, may be used to satisfy art history specific requirements.

Code	Title	Credits

ART 4950	ART CRITICISM	
Art History Focus Items		
Art History majors follow one of two options below:		10-11
Option A - Graduate Study Path:		
In addition to the Art and Art History Core and Art History Options students complete:		
Studio Art or Art History Electives ¹		
Art History Thesis		
Option B - Museum Studies/Art Administration Path:		
In addition to the Art and Art History Core and Art History Options, students complete course work offered through the American Humanics Certificate Program (School of Public Administration) and a directed internship at a regional arts institution or museum. Students must complete:		
ART 4530	ART INTERNSHIP	
PA 3500	NONPROFIT ORGANIZATIONS AND MANAGEMENT	
PA 4500	NONPROFIT FUNDRAISING	
Select one of the following courses:		
PA 4100	MARKETING IN PUBLIC, NON-PROFIT AND AVIATION ORGANIZATIONS	
PA 4590	TECHNIQUES TOPICS IN NONPROFIT MANAGEMENT	
MKT 3200	BUSINESS COMMUNICATIONS	
MGMT 3490	MANAGEMENT	
Foreign Languages		
Minimum of two academic years of the same college level foreign language (or the high school equivalent as determined by the Department of Foreign Languages). Students interested in graduate study in art history must take college-level language courses, and additional course work is advised		16-20
Total Credits		62-67

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

Studio Art, Bachelor of Arts

The Bachelor of Arts in studio art (BASA) requires a minimum of 120 credit hours of course work.

The BASA provides a general liberal arts degree program with specialization in studio art. For the BASA, 54 of the required 120 credit hours are in ART courses.

Requirements

In addition to the university General Education requirements, Studio art majors are required to complete courses listed below. Courses used to fulfill university General Education requirements, if they are applicable, may be used to satisfy studio art specific requirements.

General Electives

As needed to meet 120 credit hour minimum requirement.

Concentration in Studio Arts

There are four studio concentrations available in the studio art BASA degree program: 1) two dimensional arts, 2) three dimensional arts, 3) graphic design, and 4) media arts.

Code	Title	Credits
All BASA degrees will require Core I required studio courses and Art History Core required courses.

ART 3210	COLOR THEORY	
ART 3310	ELEMENTARY SCULPTURE	
ART 3330	ART IN PUBLIC PLACES	
ART 3530	PAPERMAKING	
ART 3610	ELEMENTARY CERAMICS	

Group C:		
ART 2300	WEB DESIGN	
ART 4010	SPECIAL TOPICS IN STUDIO ART	
ART 4130	MEDIA ART III	
ART 4530	ART INTERNSHIP	
ART 4920	ART IN THEORY AND IN PRACTICE SINCE 1900	

Graphic Design Concentration		
ART 2200	TYPEFACE DESIGN AND TYPOGRAPHY	3
ART 3130	GRAPHIC DESIGN 1	3
ART 4150	GRAPHIC DESIGN 2	3
ART 4160	GRAPHIC DESIGN 3	3
ART 4170	GRAPHIC DESIGN STUDIO	3

BASA Capstone		
ART 4170	GRAPHIC DESIGN STUDIO	3
or ART 4020	PROFESSIONAL STUDIO PRACTICES	

In addition to Art History Core & Electives stated earlier, Graphic Design majors are required to take in place of one elective:

ART 3800	HISTORY OF DESIGN	
----------	-------------------	--

Total Credits 36

Concentration in Media Arts

additional requirements

Note: Art History Core & Electives for Media Arts total 12 credit hours instead of 15.

Code	Title	Credits
Studio Core II		
ART 2100	LIFE DRAWING I	3

Select one course from each group: 6

Group A:		
ART 1810	WATERCOLOR I	
ART 2110	LIFE DRAWING II	
ART 3100	ADVANCED DRAWING I	

ART 3410	ELEMENTARY PAINTING	
ART 3510	ELEMENTARY PRINTMAKING	
Group B:		
ART 3200	THE HAND PRODUCED BOOK I: TYPOGRAPHY AND BOOK DESIGN	
ART 3250	PATTERNED PAPER	
ART 3310	ELEMENTARY SCULPTURE	
or ART 3330	ART IN PUBLIC PLACES	
ART 3530	PAPERMAKING	
ART 3610	ELEMENTARY CERAMICS	
Studio Core II Elective to be taken in either Two Dimensional or Three Dimensional concentration.		
Art Elective		3
Media Art Concentration		
Students will choose from two Media Arts Concentrations:		21
Option A (Game Design) or Option B (Intermedia and Digital Art), Both with 21 credit hrs.		
Option A: Game Design		
ART 3140	COMPUTER GENERATED IMAGERY	
ART 3160	GAME DESIGN AS ART	
ART 3170	DIGITAL GAME DESIGN	
ART 4140	COMPUTER GENERATED IMAGERY II	
ART 4180	ADVANCED DIGITAL GAME DESIGN	
ART 4190	GAME DESIGN STUDIO	
Art Elective		
Option B:		
ART 3000	MEDIA ARTS 1	
ART 3120	MEDIA ARTS 2	
ART 3150	VIDEO ART	
ART 4130	MEDIA ART III	
Art Elective		
Art Elective		
Art Elective		
BASA Capstone		
ART 4020	PROFESSIONAL STUDIO PRACTICES	3
Total Credits		36

Studio Art with K-12 Certification Requirements

Studio Core I (12 hrs.), Studio Core II (18 hrs.), Art History Core (9 hrs.) and Art History Elective (3 hrs.) courses are the same as in the BASA with a concentration in Two Dimensional or Three Dimensional Arts.

The following courses are required:

Code	Title	Credits
Studio Core I		
ART 1100	FOUNDATION: DRAWING	3
ART 1110	FOUNDATION: 3D DESIGN	3
ART 1210	FOUNDATION: 2-D DESIGN	3
ART 1220	FOUNDATION: DIGITAL MEDIA	3
ART 2000	CORE ONE PORTFOLIO REVIEW	0
Studio Core II		
ART 2100	LIFE DRAWING I	3
ART 3310	ELEMENTARY SCULPTURE	3
ART 3410	ELEMENTARY PAINTING	3
ART 3510	ELEMENTARY PRINTMAKING	3
or ART 3520	PHOTOGRAPHIC DIGITAL PRINTMAKING	

ART 3610	ELEMENTARY CERAMICS	3
Art History Core		
ART 2050	SURVEY OF WESTERN ART HISTORY I	3
ART 2060	SURVEY OF WESTERN ART HISTORY II	3
Select one course from each of the following two groups:		6
Group A - Modern History:		
ART 3780	HISTORY OF ARCHITECTURE SINCE 1850	
ART 3830	HISTORY OF PHOTOGRAPHY	
ART 4880	MODERN ART I (ART OF EUROPE AND THE AMERICAS, 1850-1920)	
ART 4890	MODERN ART II (ART OF EUROPE AND THE AMERICAS, 1918-1968)	
ART 4900	CONTEMPORARY ART HISTORY SINCE 1968	
Group B - Pre-Modern History:		
ART 3700	INTRODUCTION TO ANCIENT ART	
ART 3710	EGYPTIAN ART	
ART 3720	GREEK ART	
ART 3730	ETRUSCAN & ROMAN ART	
ART 4770	EARLY MEDIEVAL ART	
ART 4780	LATE MEDIEVAL ART HISTORY	
ART 4810	NORTHERN EUROPEAN RENAISSANCE ART HISTORY	
ART 4830	ITALIAN RENAISSANCE ART HISTORY	
ART 4850	BAROQUE AND ROCOCO ART HISTORY	
Plus one Art History Elective approved by advisor		3
K-12 Art Concentration		
ART 3300	ELEMENTARY ART METHODS ¹	3
ART 3370	TECHNOLOGY IN ARTS EDUCATION	3
ART 4300	SECONDARY ART METHODS ¹	3
ART 4350	TRENDING TOPICS IN ART EDUCATION	3
Studio Emphasis		
A student must work with a faculty advisor to select coursework for an emphasis which must include an intermediate and advanced level class from the following:		6
ART 1820	WATERCOLOR II	
ART 2110	LIFE DRAWING II	
ART 3000	MEDIA ARTS 1	
ART 3100	ADVANCED DRAWING I	
ART 3110	ADVANCED DRAWING II	
ART 3120	MEDIA ARTS 2	
ART 3130	GRAPHIC DESIGN 1	
ART 3140	COMPUTER GENERATED IMAGERY	
ART 3170	DIGITAL GAME DESIGN	
ART 3200	THE HAND PRODUCED BOOK I: TYPOGRAPHY AND BOOK DESIGN	
ART 3210	COLOR THEORY	
ART 3220	HAND PRODUCED BOOK II: LETTERPRESS PRINTING	
ART 3230	BOOK STRUCTURES: INTRODUCTION TO BOOKBINDING	
ART 3320	INTERMEDIATE SCULPTURE	
ART 3360	APPLIED ART & DESIGN	
ART 3420	INTERMEDIATE PAINTING	
ART 3520	PHOTOGRAPHIC DIGITAL PRINTMAKING	
ART 3530	PAPERMAKING	
ART 3620	INTERMEDIATE CERAMICS	
ART 4140	COMPUTER GENERATED IMAGERY II	

ART 4150	GRAPHIC DESIGN 2	
ART 4180	ADVANCED DIGITAL GAME DESIGN	
ART 4310	ADVANCED SCULPTURE	
ART 4410	ADVANCED PAINTING	
ART 4510	ADVANCED TECHNIQUES IN PRINTMAKING	
ART 4610	ADVANCED CERAMICS	
BASA Capstone Course		
ART 4020	PROFESSIONAL STUDIO PRACTICES	3
College of Education Art Education Requirements²		
TED 2100	EDUCATIONAL FOUNDATIONS	3
TED 2200	HUMAN RELATIONS FOR BIAS-FREE CLASSROOMS	3
TED 2300	HUMAN GROWTH AND LEARNING	3
SPED 3800	DIFFERENTIATION AND INCLUSIVE PRACTICES	3
TED 2400	PLANNING FOR EFFECTIVE TEACHING	6
TED 4640	K-12 CLINICAL PRACTICE AND SEMINAR ELEMENTARY/SECONDARY	12
Total Credits		93

¹ It is highly recommended that ART 3300 and ART 4300 be taken in the year just prior to student teaching.

² Pursuit of the K-12 certification requires admission to the Teacher Preparatory Program through the College of Education and a successfully completed PPST.

Students who complete a degree or certificate program from Metropolitan Community College in *Design, Interactivity & Media Arts (DIMA), or *Photography, Video/Audio Communications Arts upon successfully completing the ART 2000 CORE I Portfolio Review, can transfer up to 18 semester hours of their specific MCC concentration coursework to be applied in the Media Arts Concentration area. If transfer hours are accepted for the Media Arts Concentration, additional hours to complete the requirement will be advanced UNO coursework selected in consultation with a UNO CFAM advisor.

Concentration in Two Dimensional Arts

Freshman

Fall		Credits
ART 1100	FOUNDATION: DRAWING	3

Total Credits 121

¹ *This course is repeatable

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

* For a comprehensive list of elective courses please consult your advisor.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

Students in the BASA w/ PK-12 Certification program must complete the Praxis Core Academic Skills test by the completion of TED 2400. Prior to the completion of Clinical Practice students must successfully complete the Praxis II Art Content Knowledge exam. More information on both exams can be found at <https://www.unomaha.edu/college-of-education/student-services/academics/required-exams.php>

GPA Requirements: BASA w/ PK-12 students must have at least a 2.5 GPA at the time of applying for the Pre-Professional Education Core classes (TED 2100 and TED 2200). By the time students formally apply to the College of Education (TED 2300 and TED 2400) student GPA must be 2.75.

Graduation Requirements: Should students unsuccessfully complete their Clinical Practice or choose to not move forward with the PK-12 Art Certification, students may still graduate with a BASA degree.

Studio Art, Bachelor of Fine Arts

The Bachelor of fine arts (BFA) each requires a minimum of 120 credit hours of course work.

The BFA provides a more extensive, well-rounded, performance-oriented art background which prepares students for a professional life in fine arts and post graduate study. For the BFA, 66 of the required 120 credit hours are ART classes.

To be admitted to the BFA program, a student must have declared an applicable studio art concentration or K-12 certification and meet other eligibility requirements (see the Department website (<http://www.unomaha.edu/college-of-communication-fine-arts-and-media/art-and-art-history/undergraduate-programs/bfa-studio-art.php>) or a Art & Art History advisor for details).

NOTE: In order for BFA students to graduate in 120 total credit hours, the 6 hours used to fulfill the university diversity requirement must be courses which also fulfill university General Education distribution requirements.

Requirements

In addition to the university General Education requirements, Studio art majors are required to complete courses listed below. Courses used to fulfill university General Education requirements, if they are applicable, may be used to satisfy Art & Art History specific requirements.

General Electives

As needed to meet 120 credit hour minimum requirement.

To obtain the BFA, students complete requirements for the Bachelor of Arts in studio art (BASA), with a concentration in either two dimensional arts, three dimensional arts, graphic design and media arts.

All BFA degrees will require Core I required studio courses and Art History Core required courses.

ART 4920	ART IN THEORY AND IN PRACTICE SINCE 1900	3
----------	--	---

Studio Art K-12 Certification/Bachelor of Arts in Fine Arts Two or Three Dimensional Dual Degree, BFA Requirements

Students earning the BASA with K-12 certification can earn the dual degree of BFA with Two Dimensional Arts or Three Dimensional Arts concentration. The dual degree requires a minimum of 150 credit hours of course work. In addition to fulfilling the requirements for the BASA with K-12 certification, the dual degree of BFA with Two Dimensional Arts or Three Dimensional Arts concentration requires the student to apply to the BFA program (see the Art and Art History Unit website (<http://www.unomaha.edu/college-of-communication-fine-arts-and-media/art-and-art-history/undergraduate-programs/bfa-studio-art.php>) or faculty advisor for details). Once accepted into the BFA Program, students must successfully complete the following BFA sequence of courses:

Code	Title	Credits
BFA Sequence		
ART 4320	BACHELOR OF FINE ARTS INDEPENDENT STUDY I	3
ART 4330	BACHELOR OF FINE ARTS INDEPENDENT STUDY II	3
ART 4420	BACHELOR OF FINE ARTS THESIS	3
ART 4920	ART IN THEORY AND IN PRACTICE SINCE 1900	3
ART Elective		
	One elective course from Two Dimensional Arts or Three Dimensional Arts "Advanced work" course list. Course to be determined in consultation with a Department faculty advisor.	3
Total Credits		15

Total ART Credit Hours: 75

Once a student enters the BFA program, they are carefully monitored to remain focused on their skillset and artwork. If a student fails a BFA semester, they must retake that semester and may not advance to the next BFA level until they have mastered the previous course.

Occasionally a professor may request a student to take an additional semester of BFA (BFA III or ART 4340) before entering their Thesis semester. This additional semester gives the student an opportunity to enhance their growth and development prior to their Thesis semester. This additional semester would add 3 additional hours to the BFA sequence.

Students who completing complete a degree or certificate program from Metropolitan Community College in *Design, Interactivity & Media Arts (DIMA), or *Photography, Video/Audio Communications Arts upon successfully completing the ART 2000 CORE I Portfolio Review, can transfer up to 18 semester hours of their specific MCC concentration coursework to be applied in the Media Arts Concentration area. If transfer hours are accepted for the Media Arts Concentration, additional hours to complete the requirement will be advanced UNO coursework selected in consultation with a UNO CFAM advisor.

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

* For a comprehensive list of elective courses please consult your advisor.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

Students in the BASA w/ PK-12 Certification program must complete the Praxis Core Academic Skills test by the completion of TED 2400. Prior to the completion of Clinical Practice students must successfully complete the Praxis II Art Content Knowledge exam. More information on both exams can be found at <https://www.unomaha.edu/college-of-education/student-services/academics/required-exams.php>

GPA Requirements: BASA w/ PK-12 students must have at least a 2.5 GPA at the time of applying for the Pre-Professional Education Core classes (TED 2100 and TED 2200). By the time students formally apply to the College of Education (TED 2300 and TED 2400) student GPA must be 2.75.

Graduation Requirements: Should students unsuccessfully complete their Clinical Practice or choose to not move forward with the PK-12 Art Certification, students may still graduate with a BASA degree.

Studio Art Minor

Studio Art with K-12 Certification, Bachelor of Arts

This option gives students the opportunity to teach K-12 art or the capacity to pursue graduate level work in an M.A. or M.Ed. program in art education.

The BASA with K-12 certification requires a minimum of 134 credit hours of which 63 are in ART and 30 are from the College of Education.

Requirements

Studio Core I (12 hrs.), Studio Core II (18 hrs.), Art History Core (9 hrs.) and Art History Elective (3 hrs.) courses are the same as in the BASA with a concentration in Two Dimensional or Three Dimensional Arts.

The following courses are required:

Code	Title	Credits
Studio Core I		
ART 1100	FOUNDATION: DRAWING	3
ART 1110	FOUNDATION: 3D DESIGN	3
ART 1210	FOUNDATION: 2-D DESIGN	3

2100 and TED 2200). By the time students formally apply to the College of Education (TED 2300 and TED 2400) student GPA must be 2.75.

Graduation Requirements: Should students unsuccessfully complete their Clinical Practice or choose to not move forward with the PK-12 Art Certification, students may still graduate with a BASA degree.

Studio Art K12 Certification/ Bachelor of Arts in Fine Arts Two or Three Dimensional Dual Degree, BFA

Requirements

Students earning the BASA with K-12 certification can earn the dual degree of BFA with Two Dimensional Arts or Three Dimensional Arts concentration. The dual degree requires a minimum of 150 credit hours of course work. In addition to fulfilling the requirements for the BASA with K-12 certification, the dual degree of BFA with Two Dimensional Arts or Three Dimensional Arts concentration requires the student to apply to the BFA program (see the Art and Art History Unit website (<http://www.unomaha.edu/college-of-communication-fine-arts-and-media/art-and-art-history/undergraduate-programs/bfa-studio-art.php>) or faculty advisor for details). Once accepted into the BFA Program, students must successfully complete the following BFA sequence of courses:

Code	Title	Credits
BFA Sequence		
ART 4320	BACHELOR OF FINE ARTS INDEPENDENT STUDY I	3
ART 4330	BACHELOR OF FINE ARTS INDEPENDENT STUDY II	3
ART 4420	BACHELOR OF FINE ARTS THESIS	3
ART 4920	ART IN THEORY AND IN PRACTICE SINCE 1900	3
ART Elective		
	One elective course from Two Dimensional Arts or Three Dimensional Arts "Advanced work" course list. Course to be determined in consultation with a Department faculty advisor.	3
Total Credits		15

Total ART Credit Hours: 75

Once a student enters the BFA program, they are carefully monitored to remain focused on their skillset and artwork. If a student fails a BFA semester, they must retake that semester and may not advance to the next BFA level until they have mastered the previous course.

Occasionally a professor may request a student to take an additional semester of BFA (BFA III or ART 4340) before entering their Thesis semester. This additional semester gives the student an opportunity to enhance their growth and development prior to their Thesis semester. This additional semester would add 3 additional hours to the BFA sequence.

Theatre

Theatre coursework is designed to provide students well-rounded experiences encompassing the varied components that work together to create the theatre experience. These areas include performance (acting/directing), production design (scenic, costume, lighting, sound), box office, publicity, house management, dramaturgy, stage management, and much more. Above all, we're committed to each student's individual development toward artistic and cultural maturity and growth that cultivates global diversity and service to our community. Through in-class and production

work, students gain valuable life skills including discipline, collaboration, communication, research, planning, achieving deadlines and problem-solving.

The unit's mission is to ignite in the student, teacher and community: critical thinking, compassionate feeling, collaborative vision and the capacity to delight.

Other Information

The general areas of study in theatre are acting, directing, design, dramatic literature, theatre history and criticism and design/production including stagecraft, stage lighting, scene design, costume and makeup. Beyond the general theatre core, students are able to pursue a concentration in a specialized area such as acting, musical theatre, design, production, technology, stage management, or theatre scholarship.

Theatre majors are required to participate actively and consistently in productions sponsored by the department. The department stages a minimum of four major productions per academic year. These productions encompass the breadth and vitality of live theatre, from musicals to classics to new plays. A variety of production opportunities are also offered in the Studio theatre space.

Writing in the Discipline

Students deepen their knowledge and understanding of Theatre, as well as developing their academic writing abilities by completing one of the approved upper division Theatre History courses, that include THEA 3710 or THEA 4780 or THEA 4790.

Contact Information

For more information contact Theatre at 402.554.2406

Website (<http://www.unomaha.edu/college-of-communication-fine-arts-and-media/theatre/>)

Degrees Offered

- Theatre, Bachelor of Arts (p. 502)

Minors Offered

- Theatre Minor (p. 506)

THEA 1000 THEATRE PRACTICUM (1 credit)

Lecture, discussion, and experience in theatre production concepts and techniques. One hour formal meeting each week and an average of two-four hours per week in an assigned technical production area based on your interests and skills. Required of Theatre majors and may be taken by all other students. May be repeated eight times.

THEA 1010 THEATRE APPRECIATION (3 credits)

A survey course designed to introduce students to all areas of theatre practice and study. Several major periods of theatre art and practice will be explored and, depending on the instructor, emphasis may include acting, playwriting, design and theatre technology, and or theatre literature.

Prerequisite(s)/Corequisite(s): None. Not recommended for Theatre Majors

Distribution: Humanities and Fine Arts General Education course

THEA 1050 FILM HISTORY AND APPRECIATION (3 credits)

A journey through one of many different possible worlds of film. Students will learn about various dimensions of filmmaking—historical development, cinematography, editing, screenwriting, and so much more. Exposure to critical perspectives on the genre(s) under consideration. Includes regular viewing of excerpts and full-length films. (Cross-listed with JMC 1050).

Distribution: Humanities and Fine Arts General Education course

THEA 1200 SINGING TECHNIQUE FOR ACTORS (1 credit)

This course provides instruction in singing technique from the perspective of the actor and musical theatre repertoire. It is designed for students to develop their individual vocal skills and to practice the concepts of vocal health, resonance, breath support, knowledge of voice types, knowledge of their own voice type and ranges as well as specific elements of musicianship such as good intonation, rhythm, and phrasing. Different from applied vocal study within the School of Music curriculum, this course focuses on the needs of actors in musical theatre. Specifically, it utilizes repertoire for non-classical styles of singing and uses different criteria than the School of Music to meet the different backgrounds of theatre students.¿

THEA 1210 VOICE FOR THE ACTOR (3 credits)

This course is a comprehensive exploration of the actor's voice and speech. The student gains a detailed understanding of breath, tension and relaxation, resonance, articulation, textual interpretation, and learns to combine movement and voice, enhancing creativity in vocal expression. The focus is freeing the unique vocal potential of each student, and on training the voice for performance.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Distribution: Humanities and Fine Arts General Education course

THEA 1300 ACTING I (3 credits)

The basic acting class, for majors and non-majors. Emphasis on freeing oneself as a preparation for basic character and scene work using exercises for relaxation, energy generation, concentration and group interaction. Three relationships basic to the actor are explored: to oneself, to another actor, to the ensemble.

Distribution: Humanities and Fine Arts General Education course

THEA 1500 FOUNDATIONS OF PRODUCTION DESIGN (3 credits)

An introductory course introducing students to the omnipresence and role of design in contemporary society; and to fundamental elements and principles of analysis, conceptualization, and visual interpretation, as they apply to the production design process.

THEA 1600 FOUNDATIONS OF SCENIC PRODUCTION (3 credits)

An introduction to scenic production class designed to develop the skills, knowledge, theories and materials of professional designers and craftspersons, as well as developing a working knowledge of the practices in the business of technical theatre.

THEA 1610 SCENIC PRODUCTION LABORATORY (1-3 credits)

Directed, practical experiences in scenic production skills.

THEA 1650 COSTUME AND MAKEUP FOR THEATRE (3 credits)

An introductory course covering foundational vocabulary, skills, materials, tools, and processes used for costume construction and makeup application specifically for the theatre.

THEA 1700 SCRIPT ANALYSIS (3 credits)

This course introduces a variety of approaches for analyzing plays and other dramatic works, especially as they are employed by actors, directors, designers, dramaturgs, and other theatre artists. There will be multiple opportunities to apply these methods of analysis through class discussion and written work. Script analysis will be explored with an eye toward theatrical production, recognizing each playscript as the blueprint for a potential production. Particular attention will be paid to genre, structure, style, character, theme, language, imagery, and dramatic action. The focus will be on traditional dramatic structure, though some attention/discussion will be given to less traditional/non-linear works.

THEA 2000 THEATRE PRACTICUM II (2 credits)

Lecture, discussion, and experience in theatre production concepts and techniques. One hour formal meeting each week with Instructor, and an average of two-four Lab hours per week (or more) in an assigned technical production area based on your interests and skills. Lab hours will be established with the lab supervisor. Required of Theatre majors and may be taken by all other students. May be repeated for credit.

Prerequisite(s)/Corequisite(s): Four semesters of THEA 1000.

THEA 2020 THEATRE FOR YOUNG AUDIENCES (3 credits)

A course that introduces the theories and practices of using theatre and drama, as an educational and social tool, as well as creating theatre for and with youth. Includes opportunities to create and utilize techniques in both performance and the learning environment.

Prerequisite(s)/Corequisite(s): THEA 1010 Theatre Appreciation or THEA 1300 Acting I or THEA 1600 Foundation: Scenic Production

THEA 2030 INTERNSHIP I (1-6 credits)

This course provides an opportunity for the student to participate in a professional summer theatre company and receive course credit. The course will involve practical application. Areas of study might include artistic direction, direction, dramaturgy, arts management, production management, design and technology, or performance. Assignments are made according to the individual interests and skills of the student as they match available opportunities and needs in the industry.

Prerequisite(s)/Corequisite(s): THEA 1000 Theatre Practicum (2 credits). Permission of instructor.

THEA 2200 MUSICAL THEATRE AND OPERA WORKSHOP (1 credit)

THEA 2200 Musical Theatre and Opera Workshop is a performance lab course offered during fall semester that integrates singing, movement and acting through rehearsal, individual coaching and group exercises. It is designed for performance based students in opera and musical theatre and develops equally the skill sets required for each discipline. It is the primary workshop for the development of singing/moving actor skills at UNO. The workshop utilizes rehearsal, exercise, ensemble and individual coaching to challenge and benefit students of all grade and experience levels. It is recommended and beneficial that performance students in both opera and musical theatre take THEA 2200 multiple times.

THEA 2300 MOVEMENT FOR THE ACTOR (3 credits)

Discovery and training of the human body as a technical instrument and as one of the key expressive elements of any performance-oriented medium.

Prerequisite(s)/Corequisite(s): THEA 1300 Acting I

THEA 2400 STAGE MANAGEMENT (3 credits)

This fundamental course investigates theater-making from the point of view of a stage manager. Through the exploration of a theatre production process, students learn the artistic and organizational techniques needed to professionally stage-manage traditional and non-traditional productions. Integrated management theory allows each student to identify how their practice can be informed by theory and to begin cultivating their individual stage management style.

Prerequisite(s)/Corequisite(s): Permission of instructor

THEA 2500 DRAWING FOR THE THEATRE (3 credits)

Drawing for the Theatre is a course that introduces students to the visual language of drawing through observation, exercises and most importantly, evaluations and critiques. In addition to traditional drawing techniques, this course will cover color theory and figure drawing. The course develops insights into the mechanisms of visual perception, how the individual components of the drawing relate to the whole and compositional organization. Each student develops observational skills rooted in traditional drawing media while striving to develop critical thinking and research skills.

Prerequisite(s)/Corequisite(s): THEA 1500 or THEA 1510 Foundations of Production Design, THEA 1700 Script Analysis

THEA 2600 COSTUME PATTERNING AND DRAPING (3 credits)

Exploration of the creation of patterns for theatrical costumes. Techniques include flat patterning, draping and development of historical patterns. Specific attention is given to period silhouette and detail and theatrical costume production conventions.

Prerequisite(s)/Corequisite(s): THEA 1650 or THEA 1550 or permission of instructor.

THEA 3000 SPECIAL TOPICS IN THEATRE (3 credits)

This course utilizes a topical approach that explores various aspects of theatre that are outside the set Theatre curriculum. Topics and disciplines will vary from term to term. Course description will be announced in advance. It is repeatable for credit if content differs.

THEA 3010 ADVANCED PROJECTS IN THEATRE: INDEPENDENT STUDY (1-3 credits)

Special projects in theatre supplementing regular courses; individual research projects; combined study and practicum. (Cross-listed with THEA 8015).

Prerequisite(s)/Corequisite(s): THEA 1000 Theatre Practicum, THEA 1700 Script Analysis

THEA 3200 MUSICAL THEATRE ENSEMBLE (1 credit)

THEA 3200 Musical Theatre Ensemble is a performance lab course that utilizes rehearsal and in person or virtual video performance to develop group and individual skills. Students are accepted into the class via auditions. Each semester a new collection of musical theatre ensemble repertoire is chosen to teach group movement, scene work and vocal musicianship. The first half of the semester is devoted to teaching rehearsal, staging and preparation skills and the second half of the semester consists of performance opportunities that are scheduled by the instructor. Additionally, performing members of the class are given instruction in auditioning and work on solo repertoire for their individual musical theatre voice categories. (e.g.: belt, belt mix, soprano mix, tenor, baritenor, etc.) The course provides opportunities and training in rehearsal accompaniment and musical direction, stage management, scheduling and promotion, choreography and directing.

Prerequisite(s)/Corequisite(s): Prerequisites: THEA 1200 Singing Technique and Musicianship For Actors or Applied Voice. Co-requisites: THEA 2200 Opera and Musical Theatre Studio. Invitation to enroll by audition for instructor.

THEA 3300 ACTING II (3 credits)

Incorporating skills and awareness developed in Acting I, this class moves toward examining various tools for character development by oneself, in large group improvisations and with written scripts. Specific scene work leads to a final scene presented both for the class and for all interested persons.

Prerequisite(s)/Corequisite(s): THEA 1300 Acting I

THEA 3400 DIRECTING I (3 credits)

Directing I examines the development of the role of director in Western Theatre; provides practice in the directing process including script analysis, dramaturgical research, staging visual composition, collaboration with designers and performers; considers alternative approaches to directing and encourages students to begin to develop a personal directing style. (Cross-listed with THEA 8435)

Prerequisite(s)/Corequisite(s): THEA 1300, THEA 1500, THEA 1600, THEA 1700, THEA 3300

THEA 3410 HUMAN DYNAMICS IN THE ARTS (3 credits)

Human Dynamics in the Arts is a practical course for students who aspire to become effective leaders, managers, and directors of arts, nonprofit, education and business organizations. Students will gain a deeper understanding of how to strengthen organizations by recognizing the complex interplay of individual motivation, personal growth and develop, effective communication, and organizational goals. Students will learn to apply specific communication techniques that will enable them to recognize patterns of behavior that reflect underlying emotional needs critical to motivation and workplace productivity. They will use these techniques to build trust, foster positive working relationships, maximize talents, and develop more effective, productive, and dynamic organizations. Students will also gain an understanding of the importance of developing an entrepreneurial mindset critical to success in a rapidly changing workplace. They will learn to recognize opportunities, identify solutions, and develop clear, effective strategies for moving their organizations forward.

Prerequisite(s)/Corequisite(s): CMST 1110 and Junior Standing

THEA 3500 COLLABORATIVE DESIGN STUDIES (3 credits)

Collaborative Design Studies explores the integration and process of theatrical production including scenery, lighting, costume, projection and sound. It chronicles their individual and collective impact on storytelling. While developing the skills of the Scenographer, students will work collaboratively as they foster their individual artistic design talents, and recognize the impact of design on society through storytelling. (Cross-listed with THEA 8615).

Prerequisite(s)/Corequisite(s): THEA 1500/THEA 1510, THEA 1600/THEA 1630, THEA 1700

THEA 3660 STAGE AND TV LIGHTING (3 credits)

Characteristics and control of light and color and their application to the theatre and television; elementary electricity; lens systems; reflectors; lamps; control systems; automation. (Cross-listed with THEA 8665).

Prerequisite(s)/Corequisite(s): THEA 1630 or permission of instructor.

THEA 3700 THEATRE HISTORY AND LITERATURE: CONTEMPORARY (3 credits)

This course offers a brief survey of European and world theatre from the emergence of post-modernism to the present time. It also focuses especially on theatre for social change, community development, and the community-based theatre movement. It will include a service-learning component with one or more regional social-service or similar agencies.

Prerequisite(s)/Corequisite(s): ENGL 1160, THEA 1700

THEA 3710 THEATRE HISTORY AND LITERATURE: MODERN / 1850-2000 (3 credits)

This course is a survey of both western European and world theatre from the emergence of modernism to 1980, about the time of the emergence of post-modernism.

Prerequisite(s)/Corequisite(s): ENGL 1160, THEA 1700

THEA 3720 THEATRE AND SOCIAL JUSTICE (3 credits)

This service-learning course will combine both research and practice in theatre that involves social change. Students will study the history of such theatre, with special focus on developments in the 20th century. All research will be accompanied by several community-based projects whereby students will create theatre with specific populations (schools, community centers, health centers, senior homes, etc.). (Cross-listed with THEA 8755).

Prerequisite(s)/Corequisite(s): ENGL 1160, THEA 1700

THEA 4000 SUMMER THEATRE WORKSHOP (3 credits)

Intensive supervised workshop experience involving significant overall contribution(s) to the summer theatre program.

THEA 4020 ADVANCED PROJECTS IN THEATRE (1-3 credits)

Special projects in theatre supplementing regular courses; individual research projects; combined study and practicum. (Cross-listed with THEA 8026)

Prerequisite(s)/Corequisite(s): 9 hours of theatre in the general area to be studied and permission of the instructor.

THEA 4030 INTERNSHIP II (1-6 credits)

This course provides an opportunity for the student to participate in a professional summer theatre company and receive course credit. The course will involve practical application. Areas of study might include artistic direction, direction, dramaturgy, arts management, production management, design and technology, or performance. Assignments are made according to the individual interests and skills of the student as they match available opportunities and needs in the industry.

Prerequisite(s)/Corequisite(s): THEA 1000 Practicum, THEA 2000 Practicum II or Permission of Instructor

THEA 4050 SHAKESPEARE ON FILM: THE ART OF INTERPRETATION (3 credits)

Study how Shakespeare's plays are interpreted for performance. Explore how production shapes our understanding of the text. Understand how the change of medium from page to stage to screen reveals meaning in unique ways. Experience a dynamic way of making the most extraordinary plays your own. Classes will feature readings, lecture, class discussion, and film screenings of different cinematic interpretations of several of Shakespeare's plays. Previous study of Shakespeare is helpful but not required.

Prerequisite(s)/Corequisite(s): Junior standing or permission of instructor.

Distribution: Humanities and Fine Arts General Education course

THEA 4310 ADVANCED ACTING: POST REALISM (3 credits)

Advanced work in the technical skills of voice, speech, movement and textual analysis needed for post-realist material. (Cross-listed with THEA 8316)

Prerequisite(s)/Corequisite(s): THEA 2310 or THEA 1300 and THEA 2320 or THEA 3300 and Junior standing.

THEA 4320 ADVANCED ACTING: GREEKS TO RESTORATION (3 credits)

The fundamental theories and practices of major styles of acting from ancient Greece to the Restoration, including interpretation of outstanding dramatic literature. (Cross-listed with THEA 8326).

Prerequisite(s)/Corequisite(s): THEA 2310 or THEA 1300 and THEA 2320 or THEA 3300 and Junior standing.

THEA 4330 ADVANCED ACTING: ENSEMBLE PLAY PRODUCTION (3 credits)

In-depth exploration of a play or playwright's work to connect acting class with performance. Special emphasis on creating a working process that allows the ensemble to emerge. The class will culminate in public performance. (Cross-listed with THEA 8336).

Prerequisite(s)/Corequisite(s): THEA 2310 or THEA 1300 and THEA 2320 or THEA 3300 and Junior standing.

THEA 4340 ADVANCED ACTING: AUDITIONING (3 credits)

An acting class designed to develop auditioning skills and material as well as cultivate a working knowledge of the business of acting. (Cross-listed with THEA 8346)

Prerequisite(s)/Corequisite(s): THEA 2310 or THEA 1300 and THEA 2320 or THEA 3300 and Junior standing.

THEA 4400 DIRECTING II (3 credits)

A practicum in play selection, analysis, casting, rehearsing and performing. (Cross-listed with THEA 8446)

Prerequisite(s)/Corequisite(s): THEA 1300/THEA 2310, THEA 1500/THEA 1510, THEA 1600/THEA 1630, THEA 1700, THEA 3300/THEA 2320, THEA 3400/THEA 4430

THEA 4500 CHALLENGES IN PRODUCTION DESIGN (3 credits)

Evaluation and exploration of the world of theatrical storytelling using line, texture, contrast, theme, metaphor and symbolism. Students will work collaboratively as they foster their individual artistic talents, and recognize the impact of design on society through storytelling. (Cross-listed with THEA 8506).

Prerequisite(s)/Corequisite(s): THEA 1500/THEA 1510 and THEA 1700 or permission of instructor.

THEA 4510 CHALLENGES IN PRODUCTION DESIGN (3 credits)

Evaluation and exploration of the world of theatrical story telling using line, texture, contrast, theme, metaphor and symbolism. Students will work collaboratively as they foster their individual artistic talents, and recognize the impact of design on society through story telling. (Cross-listed with THEA 8516)

Prerequisite(s)/Corequisite(s): THEA 1510 and THEA 3610.

THEA 4550 PERIOD STYLES IN DRESS AND DECOR (3 credits)

An historical survey course introducing students to the major periods and iconic styles and trends in western architecture, dress and interior decor of the past 2000 years; and to the social, cultural and technological influences on those trends, particularly as they relate to theatrical and production design. (Cross-listed with THEA 8556).

Prerequisite(s)/Corequisite(s): THEA 1700 and THEA 3700/THEA 3770, THEA 3710/THEA 3760, THEA 4710 or THEA 4720 or by permission of instructor.

THEA 4610 SCENE DESIGN (3 credits)

Principles of composition, perspective and color for the stage; the designer's approach to the play, production of ground plans, elevations and sketches. (Cross-listed with THEA 8616)

Prerequisite(s)/Corequisite(s): THEA 1010 and THEA 1630 and THEA 2630 and Junior standing.

THEA 4780 THEATRE HISTORY AND LITERATURE: CLASSICAL TO 1500 (3 credits)

This course is a survey of both western European and early Asian theatre and the related theatre literature in ancient Greece and Rome, India, and medieval Europe from the fifth century BCE to the beginning of the European renaissance.

Prerequisite(s)/Corequisite(s): ENGL1160 and Junior standing

THEA 4790 THEATRE HISTORY AND DRAMATIC LITERATURE: RENAISSANCE TO 1800 (3 credits)

This course is a survey of primarily western European theatre and the related theatre literature from the Renaissance until the English sentimental comedy.

Prerequisite(s)/Corequisite(s): ENGL1160 and Junior standing or Permission of the Instructor.

THEA 4900 ADVANCED PROJECTS - CAPSTONE (3 credits)

Demonstration of mastery in a specific area of theatre through an advanced project in acting, musical theatre, directing, design/technical theatre, playwriting, or dramaturgy. This will serve as an end of career course designed to evaluate the student's competency and knowledge of theatre practice.

Prerequisite(s)/Corequisite(s): THEA 1000 Practicum, THEA 2000 Practicum, and permission of the instructor

Theatre, Bachelor of Arts

The Bachelor of Arts in theatre degree offers students a broad-based liberal arts foundation in combination with rigorous and disciplined professional training.

Students may elect to pursue either a general major OR a concentration in acting, musical theatre, stage management, design or technology.

Students seeking a theatre major concentration must meet with the undergraduate theatre faculty adviser prior to applying. An application will be provided. Once the application is completed and returned, a decision on admittance will be made by the faculty. A portfolio or audition may be required.

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

Theatre Minor

The theatre minor offers students a broad-based liberal arts foundation in combination with rigorous and disciplined professional training, in all aspects of theatre and the wider liberal arts. In completing the requirements for the minor, students must have 9 credits of upper-division coursework.

Total Credits	18

Writer's Workshop: Creative Writing

The Writer's Workshop mission is to offer creative writing students an apprenticeship with professional writers. We prepare students to read closely, think critically, write professionally and find their voices in poetry, fiction, creative nonfiction, and screenwriting. Students will also sharpen their capacity for empathy, opening themselves to diverse cultural points of view.

Other Information

Thesis Option

Students whose work is above average and who are considering doing graduate work in creative writing may apply after one Advanced Studio to pursue the BFA with Senior Thesis. The result is a book-length manuscript of original work in the student's area of concentration (e.g. a collection of poems, a collection of short stories, a novel, a collection of essays, or a screenplay), prepared during the last year of study while working one-on-one with a WRWS faculty member. To earn this special designation on their official transcripts, candidates for the degree must take two semesters of WRWS 4990.

Writing in the Discipline

WRWS 2050 or WRWS 2060 Fundamentals of Fiction or Fundamentals of Poetry

Student Groups

The Crop Literary Club
13th Floor Literary Magazine

For More Information on Creative Writing

Contact the Department of Writer's Workshop at 402.554.2406

Website (<https://www.unomaha.edu/college-of-communication-fine-arts-and-media/writers-workshop/>)

Degrees Offered

- Creative Writing, Bachelor of Fine Arts (p. 508)

Minors Offered:

- Creative Writing Minor (p. 511)
- Screenwriting Minor (p. 511)

WRWS 1010 CONTEMPORARY WRITERS:IN PERSON IN PRINT (3 credits)

An introduction to reading contemporary literature by studying the ways in which a writer shapes a poem or tale to communicate with an audience. Emphasizes the most contemporary prose and poetry and includes a series of readings and classroom visits by guest writers whose books are the texts for the class.

Prerequisite(s)/Corequisite(s): ENGL1160 or equivalent. Not open to non-degree graduate students.

WRWS 1500 INTRODUCTION TO CREATIVE WRITING (3 credits)

An introduction for non-majors in creative writing to the art and craft of writing fiction, poetry, and creative nonfiction. Follows a workshop format based on individual and group critique of students' writing, discussion of principles and techniques of the craft, and reading and analysis of instructive literary examples.

Prerequisite(s)/Corequisite(s): ENGL1160

Distribution: Humanities and Fine Arts General Education course

WRWS 2000 SPECIAL STUDIES IN WRITING (3 credits)

Offers varying subjects in writing and reading for the basic study of special forms, structures and techniques of imaginative literature. Consult the current class schedule for the semester's subject. May be repeated for credit with change of subject.

Prerequisite(s)/Corequisite(s): ENGL 1160. Not open to non-degree graduate students.

WRWS 2050 FUNDAMENTALS OF FICTION WRITING (3 credits)

A study of the ways in which writers confront the technical choices of their craft, this course introduces students to the major elements of fiction in order to increase their critical awareness both as readers and writers and to prepare them for work in succeeding fiction studios.

Prerequisite(s)/Corequisite(s): Prerequisite(s)/Corequisite(s): ENGL1160 or equivalent.

WRWS 2060 FUNDAMENTALS OF POETRY WRITING (3 credits)

This beginning writing course in poetry emphasizes the manner in which poets meet and deal with the technical choices confronting them in the making of a poem. Written work introduces students to a number of established forms in order to increase an understanding of the elements of a successful poem.

Prerequisite(s)/Corequisite(s): ENGL1160 or equivalent. Not open to non-degree graduate students.

WRWS 2100 BASIC FICTION STUDIO (4 credits)

A basic workshop course in fiction writing, studying the shapes and techniques of composing complete fictions. This is the first of four fiction studios.

Prerequisite(s)/Corequisite(s): WRWS2050

WRWS 2200 BASIC POETRY STUDIO (4 credits)

This beginning level studio explores different poetic forms and encourages the development of the writer's voice.

Prerequisite(s)/Corequisite(s): WRWS 2060

WRWS 2300 BASIC CREATIVE NONFICTION STUDIO (4 credits)

A beginning studio in various forms and craft techniques of creative nonfiction. Students study and practice writing such forms as the personal essay, the memoir, the adventure narrative, the essay of issues, etc.

Prerequisite(s)/Corequisite(s): WRWS 2050 or 2060. Not open to non-degree graduate students.

WRWS 2400 FOUNDATIONS OF SCREENWRITING (3 credits)

This course introduces the student to the foundational elements of screenwriting. The student will learn and practice the techniques of conveying a story in images and sound, creating characters with human motives and conflicts, editing for economy and thematic significance. Proper script formatting will be taught and expected.

Prerequisite(s)/Corequisite(s): English 1160 or equivalent.

Distribution: Humanities and Fine Arts General Education course

WRWS 2600 BASIC SCREENWRITING AND TELEVISION WRITING STUDIO (4 credits)

This studio introduces the fundamentals of screenwriting. The student will produce a pitch, outline and completed industry-standard screenplay that conveys a story, creates characters, and is edited for economy and theme. Proper script formatting will be taught and expected.

Prerequisite(s)/Corequisite(s): WRWS 2050, or WRWS 2060. Not open to non-degree graduate students.

WRWS 3000 SELECTED TOPICS IN WRITING (1-3 credits)

This course presents selected theoretical and practical approaches to crafting one or more the following genres: poetry, fiction, creative nonfiction, screenwriting, young adult literature, the video game narrative, or the graphic novel. Specific topics for the course will vary from semester to semester. Consult current class scheduled for the semester's topic(s). This course may be repeated for credit as a different course under a new topic
Prerequisite(s)/Corequisite(s): Vary according to specific topics being offered

WRWS 3010 LITERARY MAGAZINE (APPLIED) (3 credits)

This course provides hands-on editorial experience by reading submitted manuscripts, maintaining correspondence with prospective contributors, and shaping the contents of UNO's literary journal, 13th Floor. May be repeated up to six hours.

Prerequisite(s)/Corequisite(s): Sophomore and/or permission of magazine faculty advisor.

WRWS 3030 ADVANCED CONTEMPORARY WRITERS (3 credits)

This advanced course explores contemporary literature by studying the ways in which writers in multiple genres shape their work to communicate with an audience. It emphasizes the most contemporary prose and poetry and includes a series of readings and classroom visits by guest writers whose books are the texts for the class.

Prerequisite(s)/Corequisite(s): ENGL 1160 or equivalent.

WRWS 3100 INTERMEDIATE FICTION STUDIO (4 credits)

An intermediate course in fiction writing. Emphasis on developing complete short stories or constructing a novel.

Prerequisite(s)/Corequisite(s): WRWS 2100 or permission of instructor. Not open to non-degree graduate students.

WRWS 3200 INTERMEDIATE POETRY STUDIO (4 credits)

An intermediate course in the making of poetry, this class will focus on the study of traditional and contemporary models, as well as crafting original poems.

Prerequisite(s)/Corequisite(s): WRWS 2200. Not open to non-degree graduate students.

WRWS 3300 INTERMEDIATE CREATIVE NONFICTION STUDIO (4 credits)

An intermediate-level studio course in forms and crafting techniques of creative nonfiction. Students study and practice writing within such forms as the literary essay, the essay of issues, historical nonfiction, the nonfiction novel, etc.

Prerequisite(s)/Corequisite(s): WRWS 2300 or permission of instructor. Not open to non-degree graduate students.

WRWS 3500 CREATIVE WRITING FOR THE ARTS (3 credits)

An introduction to the art and craft of writing fiction, poetry, creative nonfiction, and analyses of works in art, music, and journalism/political rhetoric. Intended for non-majors in creative writing, and tailored to the needs of other arts disciplines, notably those in CFAM, the course will follow a workshop format based on individual and group critique of students' writing, discussion of principles and techniques of craft and selected literary readings. Students will also experience and analyze other arts forms, which may include exhibits of visual and performance art, journalistic essays and/or political speeches.

Prerequisite(s)/Corequisite(s): ENGL 1160 or equivalent.

Distribution: Humanities and Fine Arts General Education course and Writing in the Discipline Single Course

WRWS 3600 INTERMEDIATE SCREENWRITING STUDIO (4 credits)

This course will build on the foundation established in the Beginning Screenwriting Studio (2600). The student will complete and revise the first draft of a feature-length screenplay. The student will also pitch, note-card, and begin writing a speculation script for television. The class will attend Film Streams once a month to view the current independent offering. There will be lectures and assigned reading. The course will culminate in the student beginning work on a second feature-length screenplay.

Prerequisite(s)/Corequisite(s): WRWS 2600. Not open to non-degree graduate students.

WRWS 3800 THE WRITER'S VOICE: AUTHORS ON THE PAGE AND AT THE PODIUM (3 credits)

This course will serve as an introduction to the art and craft of fiction, poetry, and creative nonfiction, as well as to analyses of written and publicly performed works of creative writing. This course is open to students who are not creative writing majors, and it is tailored to the needs of other arts disciplines, notably those in CFAM. WRWS 3800 will involve students crafting reflective, analytical, and creative writing based on the texts and video recorded public readings of visiting authors.

Prerequisite(s)/Corequisite(s): ENGL 1160 or equivalent

Distribution: Writing in the Discipline Single Course

WRWS 3990 INDEPENDENT STUDIES (3-6 credits)

For the writing major who has need of work not currently available in program offerings and who has demonstrated a capacity for working independently. Emphasis on in-depth study in some specific aspect of writing.

Prerequisite(s)/Corequisite(s): Permission of instructor. Not open to non-degree graduate students.

WRWS 4000 FORM AND THEORY (3 credits)

Advanced study of varying forms, structures, and techniques in creative writing. Specific topics of study may change each semester, and students may repeat the course under a new topic. Consult current class schedule.

Prerequisite(s)/Corequisite(s): Completion of WRWS 2100 or 2200 or 2300, varies according to specific topics offered.

WRWS 4100 ADVANCED FICTION STUDIO II (4 credits)

An advanced course in fiction in which students write and edit the most fully-developed short stories and/or novel sections of their college career, as well as read, analyze, and discuss assigned texts. Students examine the techniques of fiction writing, use the vocabulary and perspective they have gained so far to discuss their and others' work. They draw upon aspects of the self, the senses, imagination and memory to produce texts unique to their own voice and experience. (Cross-listed with WRWS 4110, WRWS 8116)

Prerequisite(s)/Corequisite(s): WRWS 3100 or permission of instructor. Not open to non-degree graduate students.

WRWS 4110 ADVANCED FICTION STUDIO II (4 credits)

An advanced course in fiction in which students write and edit the most fully-developed short stories and/or novel sections of their college career, as well as read, analyze, and discuss assigned texts. Students examine the techniques of fiction writing, use the vocabulary and perspective they have gained so far to discuss their and others' work. They draw upon aspects of the self, the senses, imagination and memory to produce texts unique to their own voice and experience. (Cross-listed with WRWS 4100, WRWS 8116)

Prerequisite(s)/Corequisite(s): WRWS 3100 or permission of instructor. Not open to non-degree graduate students.

WRWS 4200 ADVANCED POETRY STUDIO I (4 credits)

An advanced course in poetry writing. Emphasis on refining poetic technique. (Cross-listed with WRWS 8206)

Prerequisite(s)/Corequisite(s): WRWS 3200 or WRWS 4210 or permission of instructor. Not open to non-degree graduate students.

WRWS 4210 ADVANCED POETRY STUDIO II (4 credits)

An advanced course in poetry writing with an emphasis on refining poetic technique and expression.

Prerequisite(s)/Corequisite(s): WRWS 3200 or WRWS 4200 or permission of instructor. Not open to non-degree graduate students.

WRWS 4300 ADVANCED CREATIVE NONFICTION STUDIO (4 credits)

An advanced studio course in writing creative nonfiction. The course provides a context in which the student continues to practice techniques of literary nonfiction through the process of writing and rewriting.

Prerequisite(s)/Corequisite(s): WRWS 3300 or permission of instructor. Not open to non-degree graduate students.

WRWS 4310 ADVANCED CREATIVE NONFICTION STUDIO II (4 credits)

An advanced studio course in writing creative nonfiction. The course provides a context in which the student continues to practice techniques of literary nonfiction through the process of writing and rewriting.

Prerequisite(s)/Corequisite(s): WRWS 2300 and WRWS 3300, or permission of instructor. Not open to non-degree graduate students.

WRWS 4600 ADVANCED SCREENWRITING STUDIO I (4 credits)

This class will focus on the craft of screenwriting: plot, format, substance, style, scene development, film structure (both independent and main stream), three dimensional characters, and precise, professional dialogue.

The student will complete a feature-length screenplay over course of the semester. There will be lectures and assigned reading. Once a month the student will view the current independent offering at Film Streams. This class will guide the student in completing a work portfolio, querying agents, applying to internships, and preparing for a career in film and television. (Cross-listed with WRWS 8606).

Prerequisite(s)/Corequisite(s): WRWS 2600 and WRWS 3600.

WRWS 4610 ADVANCED SCREENWRITING STUDIO II (4 credits)

This class will build on the knowledge gained in Beginning Screenwriting Studio (WRWS 2600) and Intermediate Screenwriting Studio (WRWS 3600).

The student will complete a second feature-length screenplay and an original pilot for television. There will be lectures and assigned reading. Once a month the student will view the current independent offering at Film Streams. This class will guide the student in completing a work portfolio, querying agents, applying to internships, and preparing for a career in film and television after graduation.

Prerequisite(s)/Corequisite(s): WRWS 2600 and WRWS 3600. Not open to non-degree graduate students.

WRWS 4990 SENIOR THESIS (3-6 credits)

An option for the writing majors in their last year of study to enable them to prepare a body of original work in their areas of concentration for judging by a committee of faculty.

Prerequisite(s)/Corequisite(s): Permission of department chair and thesis advisor. Not open to non-degree graduate students.

Creative Writing, Bachelor of Fine Arts

Requirements Bachelor of Fine Arts

The Writer's Workshop offers a major leading to the Bachelor of Fine Arts (BFA) degree, with concentrations in Poetry, Fiction, Creative Nonfiction, and Screenwriting

Writer's Workshop Core Requirements

Code	Title	Credits
Literature and Theory Core		9
WRWS 1010	CONTEMPORARY WRITERS:IN PERSON IN PRINT	
WRWS 4000	FORM AND THEORY (two times) ¹

or		
WRWS 3010 & WRWS 4000	LITERARY MAGAZINE (APPLIED) and FORM AND THEORY ⁵	
Foreign Language		8-10
Select 8-10 hours ²		
Lower Level Literature		9

Select three (3) 2000-level literature courses from any discipline offering a course in a primary source of literature; WRWS Special Topics courses (2000) included. Of the 3 courses, at least 1 must be from the following:³

ENGL 2310	INTRODUCTION TO BRITISH LITERATURE I
ENGL 2320	INTRODUCTION TO BRITISH LITERATURE II
ENGL 2450	AMERICAN LITERATURE I
ENGL 2460	AMERICAN LITERATURE II
ENGL 2500	LITERATURE OF WESTERN CIVILIZATION: THE ANCIENT WORLD
ENGL 2510	GLOBAL EXPLORATIONS: MEDIEVAL TO EARLY MODERN WORLD
ENGL 2520	LITERATURE OF WESTERN CIVILIZATION: THE MODERN WORLD

Upper Level Literature

ENGL 4340	SHAKESPEARE	3
-----------	-------------	---

Select five (5) additional 3000- or 4000-level literature classes from any language or discipline (in consultation with faculty adviser) offering a course in a primary source of literature.⁴

Total Credits	44-46
----------------------	--------------

- Two semesters of WRWS 4000 required for core. Students may enroll a third time in WRWS 4000 for literature credit. Must be different topics each time. Prerequisites for WRWS 4000 Form and Theory: one Studio in appropriate genre.
- Minimum of one academic year of the same college-level foreign language or ASL. High school equivalent of foreign-language fluency is not acceptable for this requirement.
- Two WRWS Special Topics courses (2000) may be included, for no more than a total of 2 Special Topics courses in all categories.
- Two WRWS Special Topics course (3000) may be included, for no more than a total of 2 Special Topics courses in all categories.
- Literary Magazine (Applied) (3010) may be taken as either upper-division literature course, or as a Form and Theory (4000). WRWS 3010 cannot apply for both a literature course and a Form and Theory.

A Creative Writing Minor

May be obtained by successful completion of 18 credits of course work.

¹ If student enters UNO with AP Comp credit, they can take Comp II in Freshman Fall semester, and Fundamentals of Fiction/Poetry in Freshman Spring semester.

² *Fundamentals of Fiction or Poetry is, on rare occasion, accepted from another institution.

**Fundamentals fulfills the Writing in the Discipline requirement

³ Most pre-reqs for CNF and Screenwriting Electives overlap with WRWS required courses; however, the pre-reqs for a few CNF/Screenwriting Electives adds 3-6 hours to the Road Map.

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements: Students must successfully complete all major courses with a grade of "C" (2.0) or better.

Graduation Requirements: The BFA in Creative Writing requires a minimum of 75 semester hours of major coursework designated by the candidate's area of emphasis (Fiction, Poetry, Creative Nonfiction or Screenwriting) in consultation with the student's program advisor. The degree requires 120 total credit hours of coursework.

Creative Writing Minor

Requirements

Select an Emphasis.

Code	Title	Credits
Emphasis in Fiction		
WRWS 2050	FUNDAMENTALS OF FICTION WRITING	3
WRWS 2060	FUNDAMENTALS OF POETRY WRITING	3
WRWS 2100	BASIC FICTION STUDIO	4
WRWS 3100	INTERMEDIATE FICTION STUDIO	4
WRWS 4100	ADVANCED FICTION STUDIO I	4
Total Credits		18

Code	Title	Credits
Emphasis in Poetry		
WRWS 2050	FUNDAMENTALS OF FICTION WRITING	3
WRWS 2060	FUNDAMENTALS OF POETRY WRITING	3
WRWS 2200	BASIC POETRY STUDIO	4
WRWS 3200	INTERMEDIATE POETRY STUDIO	4
WRWS 4200	ADVANCED POETRY STUDIO I	4
Total Credits		18

Code	Title	Credits
Emphasis in Creative Non-Fiction		
WRWS 2050	FUNDAMENTALS OF FICTION WRITING	3
or WRWS 2060	FUNDAMENTALS OF POETRY WRITING	
WRWS 2300	BASIC CREATIVE NONFICTION STUDIO	4
WRWS 3300	INTERMEDIATE CREATIVE NONFICTION STUDIO	4
WRWS 4300	ADVANCED CREATIVE NONFICTION STUDIO	4

or JMC 3400	MAGAZINE ARTICLE WRITING	
Total Credits		18

Screenwriting Minor

Requirements

Screenwriting minor purpose: to meet students' needs to prepare for the job market. Also, the Screenwriting minor offers students the option of enhancing their major field of study with a minor that offers an introduction to the craft of screenwriting and an entrée to a career in film.

Code	Title	Credits
Required Courses:		
WRWS 2050	FUNDAMENTALS OF FICTION WRITING	3
or WRWS 2060	FUNDAMENTALS OF POETRY WRITING	
WRWS 2600	BASIC SCREENWRITING AND TELEVISION WRITING STUDIO	4
WRWS 3600	INTERMEDIATE SCREENWRITING STUDIO	4
WRWS 4600	ADVANCED SCREENWRITING STUDIO I	4
Select one elective from the following list or other film-related courses from other departments, per approval of WRWS academic advisor:		
WRWS 3000	SELECTED TOPICS IN WRITING	
THEA 3000	SPECIAL TOPICS IN THEATRE (Script Analysis)	
THEA 3300	ACTING II	
THEA 4020	ADVANCED PROJECTS IN THEATRE	
THEA 4050	SHAKESPEARE ON FILM: THE ART OF INTERPRETATION	
JMC 3320	VIDEO FIELD AND STUDIO PRODUCTION	
JMC 4380	FILM THEORY AND CRITICISM	
JMC 4810	DIGITAL LITERACIES FOR TECHNICAL COMMUNICATORS	
JMC 4820	POLITICS AND FILM	
ART 3140	COMPUTER GENERATED IMAGERY	
Total Credits		18

College of Education, Health, and Human Sciences

Mission/Vision

The College of Education, Health, and Human Science's philosophy and purpose are grounded in the central principles identified by the faculty for preparing graduates who are dedicated practitioners, reflective scholars, and responsible citizens. The outcomes/goals related to the principles focus on the knowledge, skills, and disposition espoused by the faculty and are built on the fundamental belief that all children can learn. The full text of the conceptual framework may be found here (<https://www.unomaha.edu/college-of-education-health-and-human-sciences/>)

Please note the information contained in this portion of the catalog is general information for the College of Education, Health, and Human Sciences. For more specific details please consult information specific to your intended department.

General Information

Overview of degree programs

The College of Education, Health, and Human Sciences is comprised of six academic units; the Departments of Counseling; Educational Leadership; Special Education and Communication Disorders; Teacher Education; Biomechanics, and Health and Kinesiology. Through its departments and school, the college seeks to prepare individuals for careers in a variety of

fields including teaching, educational administration, counseling, public health, athletic training, exercise science, library science, special education, sign language interpreting, biomechanics, early childhood inclusive education and communication disorders. The college offers programs at the undergraduate and graduate levels. This catalog describes only those programs at the undergraduate level.

The college offers the following undergraduate degrees: Bachelor of Science in Education, Bachelor of Science in Biomechanics, and Bachelor of Science in Public Health. Some programs must be completed in conjunction with one (or more) other programs. Educator preparation programs lead to state certification. Additionally, the college offers a number of special course sequences which do not result in a degree but which result in added teaching endorsements.

All students in a degree program in the college must meet the university general education requirements. Additional information on these requirements can be found at the University General Education website (<https://www.unomaha.edu/general-education/>). Please contact an academic advisor for recommended choices for the major.

Certain majors/programs in the College of Education, Health, and Human Sciences require specifically related content coursework. For further information, and to view the requirements for specific majors/programs, visit the college website (<https://www.unomaha.edu/college-of-education/>) or contact an academic advisor.

Accreditation Information

The following programs in the College of Education, Health, and Human Sciences are accredited by:

Major	Degree	Accreditation Body
Athletic Training	MA	Commission on Accreditation of Athletic Training Education (CAATE)
Counseling: Concentration in Community Counseling	MA MS	Council for Accreditation of Counseling and Related Educational Programs (CACREP)
Counseling: Concentration in School Counseling K-12	MA MS	- Council for Accreditation of Counseling and Related Educational Programs (CACREP) - Nebraska Department of Education
Educational Leadership	MS Ed.S. Ed.D	- National Council for Accreditation of Teacher Education (NCATE) - Nebraska Department of Education
Elementary Education	BSED	- National Council for Accreditation of Teacher Education (NCATE) - Nebraska Department of Education
Public Health	BS	- Council on Education for Public Health (CEPH)

School Library	MS/Endorsement	- National Council for Accreditation of Teacher Education (NCATE) - Nebraska Department of Education and National Recognition by the American Library Association (ALA) and the American Association of School Librarians (AASL)
Secondary Education	BSED	- National Council for Accreditation of Teacher Education (NCATE) - Nebraska Department of Education
Special Education	BSED	- National Council for Accreditation of Teacher Education (NCATE) - Nebraska Department of Education
Speech-Language Pathology	MS	- Council of Academic Accreditation of the American Speech-Language-Hearing Association (ASHA) - Nebraska Department of Education

All preparation programs within the college adhere to the national standards promulgated by their respective professional organizations.

Choice of Catalog Policy

Students maintaining continuous enrollment follow the requirements outlined by the Catalog in effect when they first enroll in the University of Nebraska at Omaha. The Catalog of the term of admission prescribes, at minimum, the General Education curriculum and the set of academic policies that govern progress toward completion of a degree. The Catalog of the term of admission also describes the program requirements of the student's major(s), minors, endorsements, and concentrations. Alternatively, a student may choose to follow **all** of the program and policy requirements outlined by any single Catalog in effect during subsequent terms of continuous enrollment. If a student elects to move to another catalog, the change of catalog must be noted in MavTracks and Degreeworks by the advisor. Each student is responsible for knowing and abiding by the policies described in the Catalog chosen.

For interruptions in enrollment of more than one semester, individuals will be held to the requirements of the catalog of the year when they re-enter the College.

Program Website (<http://www.unomaha.edu/college-of-education/>)

Admission Requirements

Prospective students may apply for admission to the college by indicating their preference on the University Application for Admission.

Deadlines for UNO undergraduate admission to the College of Education, Health, and Human Sciences are:

- August 1 for fall semester
- December 1 for spring semester
- June 1 for summer sessions

Admission to the College of Education, Health, and Human Sciences does not guarantee admission to a specific program. Certain programs, such as educator preparation, require a separate application and admission process. Specific admission requirements for programs within the College of Education, Health, and Human Sciences are noted in the departments'/school's section of this catalog or on the college website.

Academic Requirements for the College Degrees

Number of Hours to Graduate

The bachelor's degrees (BS in Education, BS in Biomechanics and BS in Public Health) require a minimum of 120 credit hours; 30 of the last 36 hours must be taken in residence. University General Education requirements apply to all programs. The College of Education, Health, and Human Sciences will accept toward a degree program those courses for which credit by examination is given (up to 30 hours) and recommended by the respective departments within the college of the university. Up to eight credit hours of elective credit may be allowed for military service.

Program specifications and expectations are noted in the departments'/school's sections of this catalog or on the college website (<https://www.unomaha.edu/college-of-education/>). Candidates in educator preparation programs must also complete all requirements in the professional education sequence, and the requirements for their teaching certification and endorsements/emphasis area(s). Students in non-educator preparation programs must complete all the requirements of the particular program.

Minimum GPA/Additional Requirements

Students in the College of Education, Health, and Human Sciences must maintain a 2.5 cumulative grade point average. This GPA is calculated based on all courses taken in the University of Nebraska system (UNL, UNO, UNK). The cumulative GPA determines eligibility for professional coursework.

Individual major programs within the College of Education, Health, and Human Sciences can require students to maintain higher GPA standards to remain in good standing. In addition, course prerequisites may require higher GPA to enter upper-level coursework.

College Requirements, BA/BS Requirements

For specific program requirements, see the department/school section of this catalog or the college website.

Transfer Credit Policy

Students may transfer into the college from other institutions by completing the application process and meeting the minimum cumulative grade point average GPA of 2.5 (on a 4.0 scale).

Transfer credit from outside the NU system can be applied to course requirements, but outside credit does not affect the NU system GPA or a student's good standing in the college. Transfer GPA is only considered before a student has earned 12 or more hours in the NU system. In this time period, students may be permitted into courses or accepted to professional programs based on their transfer cumulative GPA. Once

students complete 12 credits or more in the NU system, the NU system GPA will be used to measure quality of work.

Official transcripts must be sent to the UNO Office of Admissions from each previous college or university attended whether credit was earned or not. Hand-carried or student-submitted transcripts are not acceptable. Only 64 credit hours can be transferred from an approved 2-year institution.

Only credits earned at accredited institutions will be accepted by the college. In accordance with University policies, the college will accept, for transfer, grades of "C- or better for University General Education courses. Credits earned at an institution which is part of the Nebraska Network of Community Colleges will be accepted by the college provided the grades are the equivalent of a "C-" or better for University General Education courses. Credits from institutions seeking regional accreditation (but not yet accredited) may be accepted after 30 hours of work are satisfactorily completed at UNO. Acceptance of any transfer credits by the college does not ensure application to a particular program or endorsement.

Determination of applicability is the responsibility of the specific department/school. Departments within the college and programs will determine applicability of transfer credits and of grades to meet specific requirements. The University accepts "C-" grades, but programs may have a higher standard of applicability of transfer credits. For specific program requirements, see the department/school section of this catalog or the college website.

Individuals with degrees in education, transferring to the College of Education, Health, and Human Sciences for teacher certification only, must successfully complete all program requirements prior to clinical practice. (The program coursework for any endorsement must total a minimum of 12 hours, six of which are in the major area.)

Special Note: Transfer Admission from Colleges within UNO

Students transferring from another college on the UNO campus to the College of Education, Health, and Human Sciences must meet the minimum cumulative GPA requirement of 2.5.

Unacceptable Credits

Professional education courses will be accepted only from institutions which are accredited for teacher education by the national, state and/or regional accrediting agency and those classes are good for a 10 year period. Education courses will not be accepted from two-year institutions or other institutions unless the college has a specific articulation agreement with that institution or the course has received departmental approval.

Retroactive Credit Policy >> (p. 29)

Advanced Placement Credits >> (p. 29)

Military Credit >> (p. 29)

IB Credit >> (p. 29)

Placement Exams and Credit by Examinations Policies/Practices >> (p. 64)

Residency Requirement

The bachelor's degrees (BS in Education, BS in Biomechanics and BS in Public Health) require a minimum of 120 credit hours; 30 of the last 36 hours must be taken in residence.

Quality of Work

The following quality of work standards apply to all individuals in the college.

- Maintain a cumulative GPA of 2.5 or higher for admission to the College of Education, Health, and Human Sciences. For specific program requirements, see the department/school section of this catalog or the college website.

- Maintain a 2.5 cumulative grade point average to remain in good standing with the College of Education, Health, and Human Sciences. This GPA is calculated based on all courses taken in the University of Nebraska system (UNL, UNO, UNK). The cumulative GPA determines eligibility for professional coursework.
- Individual major programs within the College of Education, Health, and Human Sciences can require students to maintain higher GPA standards to remain in good standing. In addition, course prerequisites may require a higher GPA to enter upper-level coursework. For specific program requirements, see the department/school section of this catalog or the college website.
- Individuals are expected to progress steadily toward the degree. Majors will complete work for the degree according to the requirements of the catalog of the year in which they entered the college. For interruptions in enrollment of more than one semester, individuals will be held to the requirements of the catalog of the year when they re-enter the college.

NOTE: Please see departments'/school's sections for information on programs, lists of courses, and additional academic performance requirements

General Education courses

Per General Education policy, College of Education, Health, and Human Sciences general education courses meeting Humanities/ Fine Arts, Social Science or Natural Science requirements are exempt from the repeat policy and students do not need to meet the minimum CEHHS 2.5 NU GPA requirement to take courses filling these distribution requirements.

Courses that meet only U.S. or Global Diversity requirements may enforce prerequisites of the program or department.

For undergraduate CEHHS courses that have no listed pre-requisite, any UNO student is eligible to enroll.

A minimum grade of "C-" must be earned in all coursework in the university general education requirements to be applied to a College of Education, Health, and Human Sciences degree.

Good Academic Standing Policy >> (p. 30) Credit/No Credit (CR/NC) Grades >> (p. 30)

Completion of Incomplete Grade

Under certain circumstances, a student may be eligible for an "I" grade in a course. Please see information in the grades information section of the [catalog \(p. 30\)](#).

Questions about the procedures to follow in the college should be directed to the respective department chair or school director.

Students who do receive a grade of "I" in a course with a department prefix of BMCH, CDIS, COUN, HEKI, KINS, PHHB, SPED, or TED may not enroll in any course for which the "I" course is a prerequisite until the "I" grade has been removed and replaced with a passing grade.

Repeatable Grades/Courses

For a general education course offered by the College of Education, Health, and Human Sciences, any student may repeat this course.

A College of Education, Health, and Human Sciences student in an educator preparation program, non-certification concentration, Library Science, Communication Disorders or Sign Language Interpreting concentration who receives a grade below "C" or a "W" (Withdraw) in any undergraduate course with a department prefix of BMCH, CDIS, COUN, HEKI, KINS, PHHB, SPED, or TED may re-enroll in that course for one additional time for a total of two attempts. For exceptions to this rule, please review program-specific requirements.

A College of Education, Health, and Human Sciences student in Biomechanics, Kinesiology, or Public Health who receives a grade below "C-" or a "W" (Withdraw) in any undergraduate course with a department prefix of BMCH, CDIS, COUN, HEKI, KINS, PHHB, SPED, or TED may re-enroll in that course for one additional time for a total of two attempts. For exceptions to this rule, please review program-specific requirements.

A candidate who is removed from, withdraws from, or receives a grade of "I" in field, internship, clinical, practicum, or clinical practice experience, regardless of reason, must appeal to the Academic Review Committee (ARC) to be allowed to repeat the experience. If the appeal is granted, the candidate must reapply for a placement. A candidate may repeat such experiences only once

See also "Completion of Incomplete Grade" for additional information.

Appeal Process >> (p. 30) Grade Appeal Policy

Individuals who believe that their grade in a particular course does not properly reflect their performance, or that the instructor acted in an arbitrary or capricious manner in determining the grade, should first contact the instructor to determine the rationale for the grade or if there was an error in reporting. Consultation with the instructor should take place before taking any formal action in regard to a grade appeal.

After the instructor has provided the rationale for the grade in question and has indicated that no error in reporting was made, the individual may then wish to petition the department/school for reconsideration. In such instances, the student should contact the department chair/school director to obtain information on the procedures to follow in requesting an appeal at the department/school level.

If an individual believes that the department/school action did not comply with the due process procedures or did not provide legitimate relief, he/she may petition the Student Affairs Committee of the College of Education, Health, and Human Sciences. This committee is the appellate body for grade appeals after a student has received a decision at the department/school level. Students wishing to appeal a grade to the Student Affairs Committee should contact the Dean's Office (Roskens Hall 211) to obtain the procedures to follow in filing an appeal.

Academic Amnesty

Individuals without a previous degree who are currently enrolled in the College of Education, Health, and Human Sciences, and who have successfully completed one full year of coursework at UNO, may petition to have all coursework taken during all or part of their first two years removed for the purpose of computing grade point average. One full year of successful coursework at UNO shall be defined as 24 consecutive hours with a grade point average of at least 2.5.

Deletion of previous coursework shall be by entire semester(s), or year(s) as the case may be and the student must be at least four years removed from the semester or year to be deleted. Individuals who apply under this rule may not be considered for degrees with honors at graduation.

The petition for academic amnesty is submitted in accordance with the following guidelines:

1. After consultation with an academic advisor, the individual is responsible for initiating the petition.
2. The petition should be addressed to the dean of the college. It should include the individual's name, identification number, and address, as well as identification of the specific semesters for which removal is being requested.
3. The petition should be submitted to the Dean's Office, Roskens Hall 211.

4. The individual is advised in writing regarding the dean's decision. Copies of the decision are sent to the individual's advisor and the registrar.

Note: Application of the College of Education, Health, and Human Science's amnesty policy for students in other colleges at UNO is possible under the following circumstances:

1. The individual meets the cumulative hour and GPA requirements of the College of Education, Health, and Human Science's amnesty policy.
2. The individual must have "assured" admission status. (See general information section of the undergraduate catalog for a description of the admission categories.)
3. The application of the College of Education, Health, and Human Sciences policy will raise the cumulative GPA to the required 2.5 overall average.

Academic Probation and Suspension

Students whose GPA fall below 2.5 on a 4.0 scale will be placed on academic probation with the College of Education, Health, and Human Sciences for one semester. During the probationary semester, students may enroll in a voluntary support program and make efforts to raise the cumulative GPA.

During a probation semester, CEHHS students are allowed to repeat College of Education, Health, and Human Sciences courses in which they did not earn a passing grade (see program requirements for minimum passing grade). Students who want to repeat a course with field or practicum requirements must appeal and/or seek permission in accordance with departmental guidelines to be allowed to repeat the experience.

Students are encouraged to repeat courses in which they earned below the minimum passing grade to return to good standing in the College of Education, Health, and Human Sciences. Per Office of the University Registrar policy, when an undergraduate course is repeated, only the most recent grade will be calculated into the GPA.

Students whose cumulative GPA remains below the 2.5 minimum for the second consecutive semester are ineligible to remain in the College of Education, Health, and Human Sciences and must change their major and college. Such students may re-enter the College of Education, Health, and Human Sciences should they repair their cumulative GPA to the standard required for their program.

Students whose GPAs fall below 2.0 on a 4.0 scale may be subject to suspension based on the Office of the University Registrar's posted guidelines. (<https://www.unomaha.edu/registrar/faculty-and-staff/additional-information/probation-suspension-deans-list.php>)

Reinstatement Policy Following Academic Suspension >> (p. 30)

Academic Advising

Working in partnership with academic advisors is key to student success. Programs in the College of Education, Health, and Human Sciences are carefully sequenced. To move through these programs in a timely manner, students must plan carefully and regularly consult their advisors. In addition to program requirements, academic advisors assist students in exploring and defining an academic career, life goals, and pathways for success. Advisors will assist in developing problem-solving and decision-making skills through a collaborative and process-oriented advising approach. Advisors provide information about university requirements; discuss career goals, graduate or professional programs, or licensure requirements; and refer to campus resources that improve students' academic experiences. The Roskens Hall 204 academic advising office serves Pre-Elementary, Elementary, Pre-Secondary, Secondary, Pre-Early Childhood Inclusive, Early Childhood Inclusive, Pre-Special Education, Special Education, Library Science, and Communication Disorders majors. The Health and Kinesiology advising office is located in 207 in the H&K building and serves pre-Athletic

Training, Biomechanics, Kinesiology, and Public Health majors. Students are expected to meet with their advising partners every semester.

Mission of College of Education, Health, and Human Sciences Academic Advising

Our mission is to empower students to explore and achieve their educational goals through intentional partnerships.

Vision of College of Education, Health, and Human Sciences Academic Advising

College of Education, Health, and Human Sciences advisors help students make the most of their education. We support the personal and professional growth of the whole student with the goal of promoting persistence and success.

Values of College of Education, Health, and Human Sciences Academic Advising

As advisors, we value engaged student learning. We believe high expectations and consistent support are key to helping emerging professionals navigate the university curriculum. We work in our college and on our campus to advocate for student success.

Advising Holds >> (p. 23)

Student Holds >> (p. 23)

Senior Check

Senior checks are completed in conjunction with academic advisors. For specific program requirements, see the department/school section of this catalog or the college website.

Application for Degree

All students graduating from UNO must file an "Application for Degree" with the Records and Registration Office and pay the required fee at the beginning of the semester in which they will graduate and not later than the date listed in the university calendar. Failure to file for the degree by this deadline may postpone a student's graduation date. Applications are available online via MavLink. After applying for the degree, students should visit the UNO Bookstore as soon as possible to order the cap and gown and graduation announcements. For more information click [here](https://www.unomaha.edu/registrar/students/graduation-and-diplomas/graduation-general-information.php) (<https://www.unomaha.edu/registrar/students/graduation-and-diplomas/graduation-general-information.php>).

Biomechanics

The mission of the Department of Biomechanics is to provide a new understanding of the dynamical aspects of human movement via multidisciplinary approaches. In particular, we aim to achieve the following specific objectives:

1. Quantitatively characterize the complex behavior in healthy and abnormal movement patterns via innovative analyses.
2. Educate and train students, clinicians, and basic scientists so they may apply concepts of human movement variability in their careers as educators and researchers.
3. Improve our understanding of basic healthy and abnormal movement patterns using an interdisciplinary approach in clinically oriented research.
4. Develop new diagnostic and prognostic tests and related biotechnology for a variety of movement disorders and aging.
5. Provide biomechanically related services to interested parties as well as to University and community partners.
6. Participate in community outreach activities that involve biomechanically related educational opportunities.

Biomechanics is the study of forces that act on the body and the effects they produce. It is an intersection of biology, physiology, anatomy, physics,

mathematics, and chemistry. Biomechanics is a rapidly growing discipline that has many applications in robotics, forensics, ergonomics, clinical assessment and rehabilitation of movement disorders, design of prosthetics, sports performance, sports equipment design, safety, etc.

The B.S. in Biomechanics is an excellent choice for students planning to a) pursue graduate education and careers in research, b) work in biomechanically related industry and hospital laboratories, and c) pursue graduate education in professional schools for physical therapy, occupational therapy, medicine and other science-based programs.

The Minor in Biomechanics is ideal for those students who have a major outside of Biomechanics and would benefit from learning the basic principles of Biomechanics.

Other Information

Once students are admitted to the Bachelor of Science in Biomechanics they will be in the College of Education, Health, and Human Services and will be required to maintain a cumulative college GPA of 2.5/4.0 scale and grades of "C-" or better in the core courses to remain in good standing in the College of Education, Health, and Human Services.

The department highly encourages students to engage in undergraduate research with a faculty mentor. A list of Biomechanics faculty can be found on our website (<http://www.unomaha.edu/college-of-education/biomechanics-core-facility/about-us/directory/>). There are also many undergraduate volunteer and student worker opportunities available in the Department.

Fast Track Program

The Department of Biomechanics has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BS in Biomechanics desiring to pursue a MS in Biomechanics.
- Students must have completed no less than 60 undergraduate hours
- Students must have a minimum undergraduate GPA of 3.0
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their undergraduate advisor to register for the graduate courses
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - Applicants for this program are highly encouraged to pursue research opportunities in the Department of Biomechanics or comparable programs.
 - The admit term must be after the completion term of the undergraduate degree.

All 8000 level BMCH courses are eligible for students part of the Fast Track program.

Contact Information

Biomechanics Research Building
402.554.3228
unobiomechanics@unomaha.edu

Website (<https://www.unomaha.edu/college-of-education/biomechanics-core-facility/>)

Degrees Offered

- Biomechanics, Bachelor of Science (p. 517)

Writing in the Discipline

BMCH 4200 Methods in Biomechanics I, BMCH 4210 Methods in Biomechanics II, BMCH 4980 Capstone Design in Biomechanics I, BMCH 4990 Capstone Design in Biomechanics II.

- Biomechanics Minor (p. 519)

Biomechanics is the study of the mechanical laws that create human and animal motion. Biomechanics applies principles from engineering, mechanics, physics, and biology to study human and animal movement. Biomechanics majors have the ability to pursue a wide variety of careers. These careers range from being technologically centered to human health centered.

Potential career opportunities/settings:

- Physical and Occupational Therapy*
 - Physical Therapist
 - Occupational Therapist
- Prosthetics and Orthotics*
 - Prosthetist
- Medical Device Design
 - Research Scientist
- Clinical Research
 - Gait Analysis Biomechanist
- Robotics
 - Field Application Engineer
 - Robotics Technician
- Ergonomics
 - Ergonomist
- Medicine* (Orthopedics, Cardiology, Neurology)
 - Orthopedic Surgery
 - Sports Medicine
- Athletic Training*
 - Athletic Trainer
- Sports Performance
 - Footwear Material Developer
 - Footwear Research and Development

*Requires graduate study

BMCH 1000 INTRODUCTION TO BIOMECHANICS (3 credits)

This is an introductory course in biomechanics that provides a brief history, an orientation to the profession, and explores the current trends and problems and their implications for the discipline.

Distribution: Social Science General Education course

BMCH 1100 ETHICS OF SCIENTIFIC RESEARCH (3 credits)

This course is a survey of the main ethical issues in scientific research.

Distribution: Humanities and Fine Arts General Education course

BMCH 2200 ANALYTICAL METHODS IN BIOMECHANICS (3 credits)

Through this course, students will learn the fundamentals of programming and problem solving for biomechanics with Matlab and Excel. Students will also learn the attributes and uses of other programming languages.

BMCH 2400 HUMAN PHYSIOLOGY & ANATOMY I (4 credits)

The study of the structure and function of the systems of the body with an emphasis on the skeletal, muscular, cardiovascular and respiratory systems.

Distribution: Natural/Physical Sci General Education lecture&lab

BMCH 2500 HUMAN PHYSIOLOGY AND ANATOMY II (4 credits)

The study of the structure and function of the systems of the body with an emphasis on the nervous system, special senses, digestive system, endocrine system, metabolism and body temperature regulation, lymphatic system, and urinary system.

Prerequisite(s)/Corequisite(s): PE 2400 or BMCH 2400 with a grade of C- or better.

BMCH 3000 BIOMECHANICAL STATICS & DYNAMICS (3 credits)

This course is the study and exploration of the effect of forces on biological systems, mainly the human body, during static and dynamic situations.

Prerequisite(s)/Corequisite(s): PHYS 2110, PHYS 1154

BMCH 4000 BIOMATERIALS (3 credits)

Students will learn the classification, properties, characterization methods, body interactions, applications, and design principles of biomaterials.

(Cross-listed with BMCH 8006).

BMCH 4100 BIOINSPIRED ROBOTICS (3 credits)

The goal of the course is to involve students in an interdisciplinary vision of biomechanics, biology, engineering and architecture by learning how humans and other animals function in their environment. These design principles from nature can be translated into novel devices, structures, and robots. (Cross-listed with BMCH 8106).

BMCH 4200 METHODS IN BIOMECHANICS I (3 credits)

In this course students learn about the methods and equipment used in biomechanics as well as the analysis of data collected from those methods. Course experiences include both lecture and lab based learning. (Cross-listed with BMCH 8206).

Prerequisite(s)/Corequisite(s): BMCH 3000, BMCH 2200 with a grade of C- or better or department permission.

BMCH 4210 METHODS IN BIOMECHANICS II (3 credits)

In this course students learn about advanced methods and equipment used in biomechanics, as well as the analysis of data collected from those methods. Course experiences include both lecture and lab based learning. This course builds on the experience gained in BMCH 4200/8206, Methods in Biomechanics I. (Cross-listed with BMCH 8216).

Prerequisite(s)/Corequisite(s): BMCH 4200 with a grade of C- or better or department permission.

BMCH 4630 BIOMECHANICS (3 credits)

A study of the forces that act on a human body and the effects that they produce.

Prerequisite(s)/Corequisite(s): BMCH 2400 [previously PE 2400] or PE 2880 or BIOL 2740 or equivalent, AND PHYS 1110 and PHYS 1154 OR MATH 1950 to be taken concurrently or completed previously with a grade of C- or better.

BMCH 4640 ORTHOPEDIC BIOMECHANICS (3 credits)

Orthopedic Biomechanics focuses on the use of biomechanical principles and scientific methods to address clinical questions that are of particular interest to professionals such as orthopedic surgeons, physical therapists, rehabilitation specialists, and others. (Cross-listed with BMCH 8646).

Prerequisite(s)/Corequisite(s): BMCH 4630 or department permission.

BMCH 4650 NEUROMECHANICS OF HUMAN MOVEMENT (3 credits)

A study of basic principles of neural process as they relate to human voluntary movement. Applications of neural and mechanical principles through observations and assessment of movement, from learning to performance, as well as development. (Cross-listed with NEUR 4650).

Prerequisite(s)/Corequisite(s): BMCH 1000 or PE 2430.

BMCH 4660 CLINICAL IMMERSION FOR RESEARCH AND DESIGN (3 credits)

This course will involve exposure to current clinical practices, identification of unmet clinical needs, and information regarding future career options. In this course, students will be matched with local clinical sites to provide a unique opportunity for innovative and interdisciplinary approaches to problem solving subject to practical constraints. Concepts in clinical rehabilitation, integrated assessments, regulation of medical devices in health care will be covered. This course will review the latest research efforts for rehabilitation in the context of device design and implementation. (Cross-listed with BMCH 8666).

Prerequisite(s)/Corequisite(s): BMCH 4630 or equivalent and Instructor Permission. Not open to non-degree graduate students.

BMCH 4670 INTRODUCTION TO MECHANICS OF BIOMATERIALS (3 credits)

In this course students will learn how to analyze the stresses and strains in different structures under complex loading conditions with extensive examples from biomaterials and materials generally used in the medical device field. (Cross-listed with BMCH 8676).

Prerequisite(s)/Corequisite(s): BMCH 3000 or Department Permission

BMCH 4680 SPORTS BIOMECHANICS (3 credits)

This course is intended to provide students with a foundational knowledge on how to analyze sport movements through biomechanical analytical methods. Students will utilize foundational biomechanical principles and apply them to a variety of sports and associated movements. (Cross-listed with BMCH 8686).

Prerequisite(s)/Corequisite(s): BMCH 4630

BMCH 4980 CAPSTONE DESIGN IN BIOMECHANICS I (4 credits)

Teams of senior-level students work with sponsors and faculty advisers to develop solutions to real problems in the biomechanics and health-care related fields.

Prerequisite(s)/Corequisite(s): Department Permission.

BMCH 4990 CAPSTONE DESIGN IN BIOMECHANICS II (4 credits)

Teams of senior-level students work with sponsors and faculty advisers to develop solutions to real problems in the biomechanics and health-care related fields. The Capstone Design II course is intended to further develop and validate the concept direction chosen during Capstone Design I by designing the specific details necessary to build and test a proof-of-concept prototype.

Prerequisite(s)/Corequisite(s): BMCH 4980, or department permission.

Biomechanics, Bachelor of Science

University General Education Requirements

Code	Title	Credits
Fundamental Academic Skills		
ENGL 1150	ENGLISH COMPOSITION I	3
ENGL 1160	ENGLISH COMPOSITION II	3
MATH 1220	COLLEGE ALGEBRA	3
CMST 1110	PUBLIC SPEAKING FUNDS	3
or CMST 2120	ARGUMENTATION AND DEBATE	
Writing in the Discipline in the Major (0 credit hours) This requirement is satisfied by writing required in:		
BMCH 4200	METHODS IN BIOMECHANICS I	3
BMCH 4210	METHODS IN BIOMECHANICS II	3
BMCH 4980	CAPSTONE DESIGN IN BIOMECHANICS I	4
BMCH 4990	CAPSTONE DESIGN IN BIOMECHANICS II	4

Distribution Requirements

Natural & Physical Sciences (minimum 7 credit hours from at least two different disciplines and with at least one laboratory course)	7
Humanities and Fine Arts (9 credit hours taken from at least two different disciplines/curriculum designations)	9
Social and Behavioral Sciences (9 credit hours taken from at least two different disciplines/curriculum designations)	9
Cultural Diversity	
Cultural Diversity coursework may satisfy distribution requirements in Humanities/Fine Arts or in Social/Behavioral Sciences:	6
Global (minimum 3 credit hours)	
US (minimum 3 credit hours)	
Total Credits	57

NOTE: 14 hours from the professional core fulfilling the University General Education requirements include: eight hours in natural/physical sciences, three hours in mathematics (MATH 1320 will supersede MATH 1220), and three hours in the social/behavioral sciences (PSYC 1010). The 120 hour degree also assumes that students select coursework in humanities/fine arts area and the social/behavioral sciences area that satisfy requirements for U.S. diversity and global diversity.

Required Professional Core Courses

¹ BIOL2740 and BIOL2840 can be taken in place of BMCH 2400 and 2500

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

Biomechanics Minor

Total Credits 19

Health and Kinesiology

Our Mission

The School of Health and Kinesiology (H&K) is committed to excellence and the faculty is dedicated to teaching, scholarly activity, and service. The primary mission of the School of H&K is to prepare students for successful careers or advanced academic studies in kinesiology, public health, and physical education. The faculty shares a common sense of purpose to provide the knowledge, resources, and opportunities that will enable students to possess the skills and dispositions necessary to become dedicated practitioners, reflective scholars, and responsible citizens.

Accreditation

The teacher educator programs in Health and Physical Education are accredited by the National Council for Accreditation of Teacher Education (NCATE) and the Nebraska Department of Education.

The Bachelor of Science in Public Health program is accredited by the Council on Education for Public Health (CEPH).

Contact

School of Health and Kinesiology
6323 Maverick Plaza
Omaha, NE 68182
402.554.2670

Website (<https://www.unomaha.edu/college-of-education/health-kinesiology/>)

Admissions

Public Health Admission Information

Students must have a cumulative and major GPA of at least 2.5.

Kinesiology Admission Information

Students must have a cumulative and major GPA of at least 2.5.

Physical Education and Health Education Educator Preparation Program Admission Information

The college offers educator preparation programs at the following levels: elementary education, middle level, and secondary education. For a complete listing of the endorsement areas at each level can be found here (<https://www.unomaha.edu/college-of-education/student-services/certification/endorsements.php>).

Degrees Offered

- Bachelor of Science in Public Health (BSPH) (p. 529)
- Bachelor of Science in Education, Kinesiology (BSED) (p. 531)

Writing in the Discipline

Public Health majors fulfill the Writing in the Discipline requirement through the completion of PHHB 4960

Kinesiology majors fulfill the Writing in the Discipline requirement through the completion of KINS 4010, KINS 4940, and BMCH 4630

Minors Offered

- Human Performance Minor (p. 533)
- Public Health Minor (p. 533)
- Sports Medicine Minor (p. 533)
- Worksite Wellness Minor (p. 533)

Endorsements Offered

- Physical Education (PK-12) and Health Education (p. 573)
- Physical Education (7-12) and Health Education (7-12) (p. 575)
- Coaching (7-12) (p. 583)

Public Health, Bachelor of Science

A degree in Public Health prepares students to become professionals who promote the health of the general public through education and skills for individuals and communities. Public Health professionals are leaders who engage in advocacy for policies that enhance and ensure healthy populations.

Potential Career Opportunities/settings and examples:

- Government agencies
 - Centers for Disease Control and Prevention (CDC)
 - Department of Health and Human Services
 - State, Regional, County, and City Health Departments
 - Legislative bodies

- Housing Authority
- Peace Corps
- School Systems
 - Primary – 12 education
 - Colleges/Universities
 - Administration
- Non-profit organizations
 - American Red Cross
 - American Cancer Society
 - Women's Center for Advancement
 - Diabetes Educational Center of the Midlands
 - Planned Parenthood
 - Multiple Sclerosis Society
 - Wellness Council of the Midlands
- Non-Governmental Organizations (Global Health)
 - World Food Program
 - CARE International
 - International Red Cross
 - OxFam
 - Catholic Relief Services
 - World Vision
- Foundations
 - Buffett Foundation
 - Gates Foundation
- Hospitals
- Corporations

Kinesiology, Bachelor of Science in Education

The Kinesiology program is designed to prepare students to assume positions as fitness or health promotion directors and exercise consultants.

Potential Career Opportunities/settings:

- Biomechanist
- Community Fitness Specialist
- Exercise Physiologist
- Fitness Club Management
- Hospital Based Fitness & Wellness Specialist
- Laboratory Technician
- Personal Trainer
- Physical Activity Specialist
- Physical Therapy Aid or Technician
- Sports Industry/Equipment Exercise Science Specialist
- Strength & Conditioning Specialist
- Worksite Fitness/Wellness Specialist

Physical Education Teaching Preparation

The Physical Education Teaching program prepares students to become certified physical educators in the state of Nebraska. Students may select an endorsement that includes Physical Education PK-6 and 7-12 dual endorsement or Physical Education 7-12 and Health Education 7-12 dual endorsement. The program includes hands on field experience in both urban and suburban schools beginning with observations and culminating with student teaching the final semester.

Potential Career Opportunities/settings:

- Elementary School
- Middle School
- High School

**Requires additional degrees/certifications.*

HEKI 2000 MEDICAL TERMINOLOGY (1 credit)

This course provides students the foundation for understanding medical language and terminology used in health-related careers. Students will gain an understanding of the basic elements used to build and analyze medical terms used to describe the human body. Utilizing the body systems approach, students will learn correct pronunciation, definitions, and spelling used to describe the human body, pathological processes, procedures, as well as conditions and diseases that affect it.

HEKI 2100 STATISTICS IN HEALTH AND KINESIOLOGY (3 credits)

This class is designed to present an introduction to statistical evaluation of testing and measurement techniques commonly used in health and kinesiology. Appropriate test selection, administration, and the interpretation of results with fundamental statistical methods will be emphasized.

Prerequisite(s)/Corequisite(s): MATH 1220, or ACT Math sub score of at least 23, or Accuplacer score of at least 4, or Math SAT score of at least 540

HEKI 2400 HEALTH ED. & PHYSICAL ED. FOR THE ELEMENTARY SCHOOL TEACHER (3 credits)

This course is designed to aid the classroom teacher in developing and implementing health education and physical education programs in the elementary school curriculum.

Prerequisite(s)/Corequisite(s): TED 2300

HEKI 3090 APPLIED NUTRITION (3 credits)

The purpose of this course is to provide candidates with information from which to make informed decisions about their own personal nutrition and to apply nutritional concepts to the design of interventions in health, exercise science, physical education, and athletic training.

KINS 1010 INTRODUCTION TO SPORTS MEDICINE (1 credit)

The primary purpose of this course is to allow students to explore a variety of professions related to the field of sports medicine and how they work together to ensure safe participation in physical activity. Topics such as basic injury pathology, safe participation in sports, communication, and legal and ethical issues will be reviewed.

KINS 1500 FUNDAMENTALS OF GROUP EXERCISE (1 credit)

This course is designed to provide students with the knowledge and skills to perform fundamental exercises associated with a variety of group exercise formats (e.g. bootcamp, kickboxing, yoga, indoor cycling, step, etc.). Students will also learn proper technique, transitions, progressions/regressions, modification, and sequencing to create a safe and inclusive class environment.

Prerequisite(s)/Corequisite(s): Kinesiology majors, Pre-AT, Exploratory H&K, or PE Teaching majors

KINS 1600 FUNDAMENTALS OF RESISTANCE TRAINING (1 credit)

This class is designed to provide each student with the knowledge needed to understand how to properly perform basic weight training movements for each muscle group. Students will understand and learn the importance of keeping good body positioning, technique, spotting, breathing and safety procedures with free weights and machine weights as well learning to developing basic weight-training programs and understanding basic training principles.

Prerequisite(s)/Corequisite(s): Kinesiology majors, Pre-AT, Exploratory H&K, or PE Teaching majors. Not open to non-degree graduate students.

KINS 1800 FITNESS FOR LIVING (3 credits)

This course is aimed at exploring the values of physical activity, assessing fitness needs and prescribing appropriate activities. The course will be taught as a lecture lab.

KINS 2130 LIFEGUARDING (3 credits)

This course is designed to prepare candidates in assuming the duties and responsibilities of a lifeguard. The main focus will be accident prevention in and around the water. Also stressed will be the recognition of a person in distress and a drowning victim. The development of an emergency plan and the articulation with the emergency rescue service will also be key elements in this course.

KINS 2140 WATER SAFETY INSTRUCTORS COURSE (3 credits)

This is a course in water safety instruction. The purpose of this course is to teach those enrolled how to teach the various swimming skills. This would include teaching beginning swimming through emergency water safety. Candidates who satisfactorily complete the course will be issued a Water Safety Instructor Certificate.

Prerequisite(s)/Corequisite(s): Seventeen years of age and possession of current Advanced Lifesaving or Emergency Water Safety Certificate

KINS 2210 GROUP EXERCISE LEADERSHIP (2 credits)

This course is designed to provide students with competencies in the theory, concepts, and skills related to group exercise instruction and leadership. Students will explore both the dynamics of group participation and instructions across various modalities including; step, hi-low aerobics, cardio kickboxing, water aerobics, dance fitness, sports conditioning, indoor cycling, yoga, Pilates, and barre.

Prerequisite(s)/Corequisite(s): PE 1800 or KINS 1800 with a grade of C- or better, School of H&K majors, Secondary Education majors with endorsements in Health/PE 7-12, and PE Pk-6th and 7-12

KINS 2220 THEORY AND PRACTICE OF TEACHING RESISTANCE TRAINING (2 credits)

This course is designed for the college student majoring in Exercise Science, Physical Education and related degrees to develop leadership skills necessary to teach safe and effective resistance training programs.

Prerequisite(s)/Corequisite(s): PE 1800 or KINS 1800 with a grade of C- or better, School of H&K majors, Secondary Education majors with endorsements in Health/PE 7-12, and PE Pk-6th and 7-12

KINS 2310 TEACHING GAMES 1 (3 credits)

The purpose of this course is to help preservice physical education teachers facilitate enhanced performance, analysis, and tactical understanding of invasion games and field run/score games (e.g. basketball, soccer, team handball, football, speedball, ultimate Frisbee, hockey, softball, cricket, and modified kickball).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

KINS 2320 TEACHING GAMES 2 (3 credits)

The purpose of this course is to help preservice physical education teachers facilitate enhanced performance, analysis, and tactical understanding of net/wall games and lifetime activities (e.g. volleyball, badminton, tennis, racquetball, golf, archery, pickleball, table tennis).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

KINS 2330 OUTDOOR/ADVENTURE ACTIVITIES (3 credits)

The course will address the basic requirements for living comfortably and traveling in wilderness areas. Basic orienteering skills, team building activities, identifying and minimizing risks associated with outdoor pursuits, and environmental safety issues will be included.

Prerequisite(s)/Corequisite(s): SED or ELED major, HED 3030 or PHHB 3030. Not open to non-degree graduate students.

KINS 2430 FOUNDATIONS IN KINESIOLOGY (3 credits)

This is an introductory course in kinesiology that includes an orientation to the profession and a consideration of current trends, problems and issues and their implications for the field of kinesiology. The course also examines the relationship of kinesiology to other cultures, general education, and global perspective.

Distribution: Social Science General Education course

KINS 2700 FUNDAMENTALS OF ATHLETIC TRAINING (3 credits)

An introduction to the field of athletic training as well as injury prevention and basic athletic training skills in wound care, taping/bracing, evaluation, and treatment.

Prerequisite(s)/Corequisite(s): PE 1010 or KINS 1010, BMCH 2400, BMCH 2500 and admission into the Athletic Training Program. Not open to non-degree graduate students.

KINS 2800 MOTOR LEARNING (3 credits)

This course is the study of motor development, and the conditions and factors that influence the normal development and the learning of motor skills. Emphasis is placed upon normal developmental patterns and behaviors and learning principles throughout the life-span as it relates to a diverse American culture.

Prerequisite(s)/Corequisite(s): PE 2430/KINS 2430 with a grade of C- or better, or ATHT majors, or permission of instructor

KINS 3000 SPECIAL PROJECTS (1-3 credits)

Conducted as short course, seminar, workshop or special project.

Prerequisite(s)/Corequisite(s): The prerequisite for the special project will be determined by the instructor.

KINS 3010 SCIENTIFIC PRINCIPLES OF COACHING (3 credits)

Designed for coaches and potential coaches who are not physical education majors. Covers basic information to include kinesiology, physiology of exercise and behavioral aspects of coaching.

Prerequisite(s)/Corequisite(s): For non physical education majors.

KINS 3040 PREVENTION AND CARE OF ATHLETIC INJURIES (3 credits)

This course covers selected topics related to the prevention and care of athletic related injuries. Emphasis will be placed on injury prevention through proper training, conditioning, nutrition and hydration strategies. Basic evaluation and treatment of athletic related injuries and legal aspects will also be covered.

Prerequisite(s)/Corequisite(s): PE3010/KINS 3010, or BMCH 2400 or BIOL 2740, and HED3030/PHHB 3030 or current CPR certification and First Aid certification.

KINS 3060 METHODS OF PRESCHOOL AND PRIMARY SCHOOL PHYSICAL EDUCATION (3 credits)

The study of current methodology in developmentally appropriate preschool and primary school physical education. Candidates will use the assessment, planning, implementation and evaluation model in developing physical education programs for this age group.

Prerequisite(s)/Corequisite(s): KINS 2800, EDUC 2510 or EDUC 2520 or TED 2400, 2.75 NU GPA and must have passed Praxis Core (Math, Reading, and Writing)

KINS 3110 INTRODUCTION TO DANCE (3 credits)

This course provides an introduction to dance as a performing art focusing on the choreographer, the dancer, the audience, the different dance genres and dance as a means of communication and expression.

KINS 3120 DANCE SOMATICS: AN INTEGRATED APPROACH TO UNDERSTANDING THE BODY IN MOTION (3 credits)

This course explores the body in motion through the lenses of various dance and movement theories, as well as self-reflection. Students will learn to move in an embodied way and understand the physiological, developmental, and psychological foundation of movement for dance.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

KINS 3130 CHOREOGRAPHY 1: INTRODUCTION TO CHOREOGRAPHIC TOOLS, ARTISTIC AESTHETICS, & PERFORMANCE ELEMENTS (3 credits)

This course explores the act of choreography as a medium for artist expression through improvisation, choreographic constructs, and content themes. Students will learn how to build ideas into choreographic dances through experimentation, structured frameworks, and feedback. Students will also present their work in a small performance at the conclusion of the semester.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

KINS 3140 SPORTS OFFICIATING (3 credits)

The general principles, basic guidelines, philosophy, mechanics and rules of officiating several team and individual sports will be covered.

KINS 3300 TEACHING DANCE IN THE SCHOOLS (3 credits)

The course is designed for physical education pedagogy majors, elementary teachers, and recreation leaders who are interested in obtaining the fundamentals of a variety of rhythmic and creative dance activities and their teaching methods for preschool through twelfth grade.

Prerequisite(s)/Corequisite(s): EDUC 2010 or TED 2300 or permission of instructor

KINS 3350 TEACHING & CURRICULUM DEVELOPMENT IN ELEMENTARY PHYSICAL EDUCATION (3 credits)

The study of teaching methodology and curriculum development in the elementary schools. Particular attention will be given to meeting the motor needs and interests of children aged 9-12. Assessing children's motor performance, prescribing activities, and evaluating the program effectiveness will be addressed.

Prerequisite(s)/Corequisite(s): KINS 3060, KINS 3300, KINS 2310, TED 2400, 2.75 NU GPA

KINS 3480 ORGANIZATION AND ADMINISTRATION OF ATHLETICS (3 credits)

A study of the organization and administration of athletics in the secondary schools.

Prerequisite(s)/Corequisite(s): Sophomore

KINS 3710 SWIMMING COACHING THEORY AND PRACTICE (3 credits)

This course is designed to develop the competencies essential to the successful coaching of swimming at all levels. The focus is on theory, swimming techniques, rules, safety, and coaching methods of competitive swimming.

KINS 3720 SOCCER COACHING THEORY & PRACTICE (3 credits)

A course of study designed to develop the competencies essential to the successful coaching of soccer. The focus is on conditioning training activities, coaching techniques, competition strategies, equipment selection, and modern coaching theories specific to the sport of soccer.

KINS 3730 SOFTBALL COACHING THEORY AND PRACTICE (3 credits)

A course of study designed to develop the competencies essential to the successful coaching of fast pitch softball. The course will encompass the philosophy of coaching, coaching techniques, conditions/training activities and the analysis and correction of skills.

KINS 3740 VOLLEYBALL COACHING THEORY AND PRACTICE (3 credits)

A course of study designed to develop the competencies essential to the successful coaching of volleyball. The focus is on conditioning training activities, coaching techniques, competition strategies, equipment selection and modern coaching theories.

KINS 3750 WRESTLING COACHING THEORY AND PRACTICE (3 credits)

A course of study designed to develop the competencies essential to the successful coaching of wrestling. The focus is on conditioning/training activities, coaching techniques, competition strategies, equipment selection and modern coaching theories specific to the sport of wrestling.

KINS 3760 BASEBALL COACHING THEORY AND PRACTICE (3 credits)

A course of study designed to develop knowledge in all phases of the game. Special focus is on fundamentals, drills, managing and psychology of coaching.

KINS 3770 FOOTBALL COACHING THEORY AND PRACTICE (3 credits)

A course of study designed to develop the competencies essential to the successful coaching of football on all levels. The focus is on theory, history and origin, conditioning, safety techniques, coaching techniques, strategy, equipment selection and modern coaching theories.

KINS 3780 TRACK AND FIELD COACHING THEORY AND PRACTICE (3 credits)

A course of study designed to develop the competencies essential to the successful coaching of track and field. The focus is on conditioning training activities, coaching techniques, competition strategies, equipment selection and modern coaching theories specific to the sport of track and field.

KINS 3790 BASKETBALL COACHING THEORY AND PRACTICE (3 credits)

A course of study designed to develop the competencies essential to the successful coaching of basketball. The focus is on conditioning training activities, coaching techniques, competition strategies, equipment selection and modern coaching theories specific to the sport of basketball.

KINS 3800 HOCKEY COACHING THEORY (3 credits)

An introductory course in the developing the desirable attributes of hockey players, rules of the game, fundamental skills and systems of ice hockey as well as the study of key principles in successful players. Basic offensive and defensive strategies will be discussed. Also discussed will be the evolution of the sport and its equipment.

KINS 3900 MOTIVATION FOR PHYSICAL ACTIVITY (3 credits)

The central purpose of this course is to examine the psychological basis of exercise and physical activity. The majority of the course will focus on traditional theories principles of psychology as they relate to exercise. Emphasis is placed on understanding the motives underlying involvement in exercise and physical activity and the psychological benefits derived from acute and chronic involvement in an exercise program. Throughout the course, consideration will be given to theoretical models, research findings, and practical application of the concepts to a variety of performance settings.

Prerequisite(s)/Corequisite(s): PSYC 1010 with a grade of C- or better.

KINS 4000 TEACHING & CURRICULUM DEVELOPMENT IN SECONDARY PHYSICAL EDUCATION (3 credits)

This course is designed to develop candidates' competencies in physical education instructional methodology and curriculum development. Analysis of teacher behavior and selection of content and materials will be examined. Candidates will be introduced to and will implement various methods of teaching physical education at the secondary level so as to develop the skills to become an effective teacher.

Prerequisite(s)/Corequisite(s): KINS 2310, KINS 2320, KINS 2330, KINS 3300, TED 2400, 2.75 NU GPA, and must have passed Praxis Core (Math, Reading, and Writing)

KINS 4010 LABORATORY METHODS IN EXERCISE SCIENCE (6 credits)

This course will provide students an opportunity to achieve competency in operating various pieces of equipment typically used in biomechanics and exercise physiology laboratories. The students will gain experience in interpreting the results of the tests administered, and writing exercise prescriptions based upon those results. Students must have current CPR certification.

Prerequisite(s)/Corequisite(s): BMCH 2500 or BIOL 2840, BMCH 4630, PE 4940 or KINS 4940, CPR certification, department consent; must be School of H&K major or ATHT major. Students cannot complete KINS 4010 and KINS 4800 in the same term.

KINS 4050 EXERCISE AND SPORT NUTRITION (3 credits)

This course presents an overview of the principles of nutrition and the relationship between nutrition and health, fitness, and sports performance. It is designed to provide students with the knowledge and skills necessary to assess nutritional status, improve overall health, and enhance sports performance. (Cross-listed with KINS 8056).

Prerequisite(s)/Corequisite(s): HEKI 3090

KINS 4070 OPTIMIZING SPORTS PERFORMANCE (3 credits)

The course is designed for coaches, athletes and physically active people, and allied health professionals. Course content emphasizes integration of several disciplines in sports medicine aimed at preparing one for optimal sports performance. Topics include peaking, detraining, overuse injury, efficiency, special foods and nutritional requirements, genetics and trainability, and designing of multi-year training schedules. (Cross-listed with KINS 8076).

Prerequisite(s)/Corequisite(s): PE 4940/KINS 4940 with a grade of C- or better.

KINS 4080 CLINICAL EXERCISE PHYSIOLOGY (3 credits)

This course will offer students the knowledge, skills, and abilities to take the American College of Sports Medicine's health fitness instructor certification exam. This course will emphasize health risk assessment, exercise testing, and exercise prescription for healthy and clinical populations. (Cross-listed with KINS 8086).

Prerequisite(s)/Corequisite(s): PE 4940/KINS 4940 with a grade of C- or better.

KINS 4100 APPLIED KINESIOLOGY (3 credits)

This course will introduce students to the use of basic theories and principles of movement analysis from a kinesiological perspective. Students will apply anatomical knowledge to break down movement from a broad spectrum of activities.

Prerequisite(s)/Corequisite(s): BMCH 2400 or PE 2880 or BIOL 2740 or equivalent

Distribution: Writing in the Discipline Sequenced Course

KINS 4150 ADAPTED PHYSICAL ACTIVITY THEORY AND PRACTICE (3 credits)

A study of problems as they relate to philosophy, procedures and practices, and organization and administration of physical education & physical activity programs for exceptional students. This course surveys societal issues surrounding adaptive sports and recreation along with movement problems associated with specific disabilities. This course also provides the student with an opportunity to work with an individual who has a disability.

Prerequisite(s)/Corequisite(s): PE 2800 or KINS 2800 with a grade of C- or better and Jr Standing and PYED major or Secondary Education major with endorsement codes: 0802S or 0802C or 1913S

Distribution: U.S. Diversity General Education course

KINS 4200 PLANNING WORKSITE WELLNESS PROGRAMS (3 credits)

This course will focus on the planning of quality worksite wellness programs utilizing standards established by the Association for Worksite Health Promotion. Steps in the planning process such as needs assessment, strategic planning, implementation, and evaluation will be taught with special application to the worksite. Critical issues involving worksite programs will also be addressed such as upper management support, program standards, corporate culture, competencies for worksite health promotion professionals, economic benefits, behavioral theories, legal issues, and the integration of worksite wellness programs and health care. (Cross-listed with KINS 8206).

Prerequisite(s)/Corequisite(s): Junior standing.

KINS 4310 LOWER EXTREMITY EVALUATION (3 credits)

This course is designed to provide the candidate with knowledge and skill in the area of advanced athletic injury assessment. The candidate will be exposed to current methodology in the field of orthopedic assessment, pathophysiology of orthopedic injury, and application of current research in injury evaluation. The candidate will receive practical experience in the management of athletic injuries. This course will focus on the low back, hip, and lower extremities. (Cross-listed with KINS 8316).

Prerequisite(s)/Corequisite(s): PE 2700 or KINS 2700 and PE 4710 or KINS 4710. Not open to non-degree graduate students.

KINS 4320 UPPER EXTREMITY EVALUATION (3 credits)

This course is designed to provide the candidate with knowledge and skill in the area of advanced athletic injury assessment. The candidate will be exposed to current methodology in the field of orthopedic assessment, pathophysiology of orthopedic injury, and application of current research in injury evaluation. The candidate will receive practical experience in the management of athletic injuries. This course will focus on the head, neck, thorax, and upper extremities. (Cross-listed with KINS 8326).

Prerequisite(s)/Corequisite(s): PE 4310/KINS 4310, PE 4330/KINS 4330, and PE 4720/KINS 4720. Not open to non-degree graduate students.

KINS 4330 ATHLETIC THERAPEUTIC MODALITIES (3 credits)

This course will cover the theory, physiology and application of physical agents used in the treatment of injuries and illness. Students will gain practical experience utilizing selected agents to treat injuries and illnesses. (Cross-listed with KINS 8336).

Prerequisite(s)/Corequisite(s): PE 2700 or KINS 2700 and PE 4710 or KINS 4710. Not open to non-degree graduate students.

KINS 4350 ORGANIZATION AND ADMINISTRATION OF ATHLETIC TRAINING (3 credits)

Administration of athletic training programs including the use of records and forms, budgets, facility design and legal concerns. (Cross-listed with KINS 8356).

Prerequisite(s)/Corequisite(s): PE 4340/KINS 4340, PE 4320/KINS 4320

KINS 4360 ORTHOPEDIC AND MEDICAL ASPECTS OF ATHLETIC TRAINING (3 credits)

This course will enhance the candidate's knowledge of orthopedic and medical aspects of athletic training. Involves directed observation, experiential learning, literature review and hands-on experience under the supervision of local medical professionals in various settings. The student will be exposed to advanced evaluation and treatment skills, including imaging techniques and surgical procedures, rehabilitation and athletic training management.

Prerequisite(s)/Corequisite(s): PE 4320/KINS 4320 and PE 4340/KINS 4340

KINS 4500 BEHAVIORAL ASPECTS OF COACHING (3 credits)

This course is designed to provide the physical education teacher and athletic coach with an overview of the behavioral aspects of coaching athletes. The course will provide information which will enable the coach to enhance as well as orchestrate performance of elementary, junior high, senior high, college, and post-college athletes. (Cross-listed with KINS 8506).

KINS 4700 FITNESS MANAGEMENT (3 credits)

This course is an introduction to management concepts for fitness professionals such as human resource management, financial management, marketing, and facility risk management. Assessment, development, prescription, implementation, and evaluation strategies will be presented for each management concept. Students will develop the knowledge and skills necessary to orchestrate and manage high quality programs in various fitness settings.

KINS 4710 CLINICAL PRACTICUM IN ATHLETIC TRAINING I (1 credit)

Clinical Practicum in Athletic Training I is the first course in the Clinical Practica series for students admitted to the Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills. Students will demonstrate skills and proficiencies in emergency procedures and the basic therapeutic modalities.

Prerequisite(s)/Corequisite(s): Formal admission to the Athletic Training Program, instructor permission, & continued compliance w/published Athletic Training Program Technical Standards for Admission. Co-requisite: PE 2700/KINS 2700. Not open to non-degree graduate students.

KINS 4720 CLINICAL PRACTICUM IN ATHLETIC TRAINING II (1 credit)

Clinical Practicum in Athletic Training II is the second course in the Clinical Practica series for students admitted to the Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills. Students will demonstrate advanced proficiencies in emergency procedures and initial proficiencies in lower extremity evaluation and application of therapeutic modalities.

Prerequisite(s)/Corequisite(s): Formal admission to Athletic Training Program, PE 4710/KINS 4710, instructor permission, compliance w/published Athletic Training Program Technical Standards for Admission. Co-requisite: PE 4310/KINS 4310 & PE 4330/KINS 4330

KINS 4730 CLINICAL PRACTICUM IN ATHLETIC TRAINING III (1 credit)

Clinical Practicum in Athletic Training III is the third course in the Clinical Practica series for students admitted to the Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills. Emphasis on mastery of skills and proficiencies in lower extremity care and initial proficiency in upper extremity evaluation and care.

Prerequisite(s)/Corequisite(s): Formal admission to Athletic Training, PE 4720/KINS 4720, instructor permission, compliance w/published Athletic Training Technical Standards for Admission. Co-requisite: PE 4320/KINS 4320 & PE 4340/KINS 4340. Not open to non-degree graduate students.

KINS 4740 CLINICAL PRACTICUM IN ATHLETIC TRAINING IV (1 credit)

Clinical Practicum in Athletic Training IV is the fourth course in the Clinical Practica series for students admitted to the Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills. Emphasis on mastery of upper extremity evaluation and care and skills in medical exam techniques, pharmacology and interviewing.

Prerequisite(s)/Corequisite(s): Formal admission to Athletic Training Program, PE 4730/KINS 4730, instructor permission, & compliance with published Athletic Training Program Technical Standards for Admission. Co-requisite: PE 4360/KINS 4360. Not open to non-degree graduate students.

KINS 4750 CLINICAL PRACTICUM IN ATHLETIC TRAINING V (1 credit)

Clinical Practicum in Athletic Training V is the fifth course in the Clinical Practica series for students admitted to the Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills. Emphasis on mastery of skills in medical examination techniques and administrative tasks.

Prerequisite(s)/Corequisite(s): Formal admission to the Athletic Training Program, PE 4740/KINS 4740, instructor permission, & compliance w/published Athletic Training Program Technical Standards for Admission. Co-requisite: PE 4350/KINS 4350. Not open to non-degree graduate students.

KINS 4800 KINESIOLOGY PRACTICUM (3 credits)

This practicum places the candidate in the role of an exercise leader in a Fitness for Living class. During this experience the candidate will participate in a seminar which will meet three days a week. Responsibilities in the role of an exercise leader will include: direct contact with students enrolled in this class during all lectures and activities and exercise leadership and supervision, fitness testing, and class presentations. During the seminar sessions the candidates will participate in discussions, group activities, and share experiences relative to their exercise leadership roles. Candidates must have current CPR certification.

Prerequisite(s)/Corequisite(s): PE 2210/KINS 2210, PE 2220/KINS 2220, BMCH 2500 or BIOL 2840, BMCH 4630, PE 4940/KINS 4940, CPR certification and department consent. Students cannot complete KINS 4010 and KINS 4800 in the same term.

KINS 4850 CARDIOVASCULAR DISEASE PREVENTION AND REHABILITATION (3 credits)

The purpose of this course is to provide candidates with an introduction to the theories and practices involved in all phases of cardiac rehabilitation. (Cross-listed with KINS 8856).

Prerequisite(s)/Corequisite(s): PE 2500/KINS 2500 with a grade of C- or better or BIOL 2840 with a grade of C- or better, PE 4940/KINS 4940 with a grade of C- or better

KINS 4910 INTERNSHIP IN EXERCISE SCIENCE (6 credits)

This course is a supervised, educational work experience of at least 300 clock hours over at least a ten week period at an approved worksite offering programs and experiences in fitness development and health promotion.

Prerequisite(s)/Corequisite(s): PE 4800 or KINS 4800, 2.5 GPA, CPR Certification, and department consent

KINS 4930 MEASUREMENT AND EVALUATION IN KINESIOLOGY (3 credits)

This course is designed to present the theory and application of measurement and evaluation techniques commonly used in physical education, exercise science, physical activity, and health promotion.

Appropriate test selection, administration, and the interpretation of results with fundamental statistical methods will be emphasized. Students will participate in selected practical testing and measurement procedures.

Prerequisite(s)/Corequisite(s): PE 4940 or KINS 4940 with a grade of C- or better

KINS 4940 PHYSIOLOGY OF EXERCISE (3 credits)

A study of the major physiological systems of the human body and its acute and chronic responses to exercise. Includes application of physiological concepts to physical training and conditioning.

Prerequisite(s)/Corequisite(s): BMCH 2400 or BIOL 2740 with a grade of C- or better, and School of H&K majors only.

Distribution: Writing in the Discipline Sequenced Course

KINS 4960 TOPICS IN SPORTS MEDICINE (3 credits)

This course covers selected topics regarding the science and medicine of sports participation. Some areas to be covered include the medical supervision of the athlete, special populations, conditioning, environmental concerns and sports nutrition.

Prerequisite(s)/Corequisite(s): PE 4340/KINS 4340, PE 4350/KINS 4350, and PE 4730/KINS 4370; or instructor permission

KINS 4970 PROBLEMS OF PHYSICAL EDUCATION (1-3 credits)

This course is designed to provide an opportunity for individuals or groups to study problems in physical education.

Prerequisite(s)/Corequisite(s): Permission of instructor

KINS 4980 COACHING PRACTICUM (1 credit)

This course is designed to give the candidate practical experiences in the coaching of specific sports.

Prerequisite(s)/Corequisite(s): Junior standing and related coaching methods course. Permission of instructor

KINS 4990 INTERNSHIP IN ATHLETIC TRAINING (6 credits)

This course is a supervised, educational work experience of at least 300 clock hours over a minimum of a 10-week period at an approved athletic training worksite.

Prerequisite(s)/Corequisite(s): 90 hours completed, 2.5 GPA and department consent

PEA 111A RACQUETBALL (1 credit)

This course is designed to develop the fundamental skills and knowledge of the sport of racquetball.

PEA 111B TENNIS (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of tennis. Included will be the fundamental skills and strategies of playing the game.

PEA 111C GOLF (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of golf.

PEA 111D JUDO (1 credit)

A basic judo course designed primarily for men and women students with limited experience in judo. The course includes techniques of falling, self-balance, body management, disturbing opponent's balance, throwing techniques, techniques of pins, recognition of choking and armlocks, and judo principles for self-defense and individual sport techniques.

PEA 111E SELF-DEFENSE (1 credit)

This is a self defense course designed primarily for men and women students with little experience in self defense.

PEA 111F TAEKWONDO (1 credit)

Originally designed as a means of self-defense. Taekwondo is also excellent for physical conditioning, increasing agility, and building self-confidence. The purpose of the course is to introduce the student to the basic techniques and philosophies of Taekwondo.

PEA 111G BASIC HAPKIDO (1 credit)

In addition to the kicks and strikes normally associated with Oriental martial arts, Hapkido adds throws, take-downs, and restraint and submission holds. Hapkido is also excellent for physical conditioning, increasing agility, and building self-confidence. The purpose of the course is to introduce the student to the basic techniques and philosophies of Hapkido.

PEA 111H WEIGHT TRAINING/BODY CONDITIONING (1 credit)

The course is designed to develop the skills and knowledge necessary to begin and participate in a program of weight lifting as a lifelong activity.

PEA 111I ADVANCED WEIGHT TRAINING (1 credit)

The course is designed to enhance weightlifting and conditioning skills to an advanced level from skills already possessed by the student.

PEA 111N KICKBOXING (1 credit)

The course is a combination of boxing and kicking techniques and total body conditioning. It will focus on low, moderate, and/or high impact movements. The course will concentrate on safe and effective exercises that will develop the aerobic endurance and strength of the student. Students will utilize hand-wraps, gloves, focus mitts, and kicking shields during the course.

PEA 111O MULTICULTURAL DANCE (1 credit)

This course is designed to provide students with an introduction to dances from Europe, Asia, Africa, and North and South America.

PEA 111P MODERN DANCE (1 credit)

This course for men and women students is designed to develop technique in modern dance and acquire a brief knowledge, understanding, appreciation of modern dance, its history, and composition.

PEA 111Q BALLET (1 credit)

The course introduces the student to basic ballet technique and fosters an appreciation for ballet as an art form.

PEA 111R JAZZ I (1 credit)

The course is designed to introduce the student to various fundamental techniques in jazz dance and to incorporate these techniques into dance sequences.

PEA 111S RELAXATION TECHNIQUES (1 credit)

This course involves discussion about stress and its health related aspects. The focus is on demonstration and practice of selected stress management skills.

PEA 111T YOGA I (1 credit)

This course actively covers the scope of hatha yoga through both demonstration and participation as well as historical review of yoga.

PEA 111U YOGA II (1 credit)

This course actively continues to cover the scope of hatha yoga through both demonstration and participation as well as historical review of yoga.

PEA 111V BEGINNING/INTERMEDIATE SWIMMING (1 credit)

This course in Beginning and Intermediate Swimming is designed to expose the student to the basic skills involved in safe and efficient aquatics practices. Skills and information dealing with general water safety will be covered in order to create an awareness of the cause and prevention of water accidents, to develop a desire to be safe and to encourage healthy and safe water recreation.

PEA 111W SCUBA (1 credit)

This course in Beginning Scuba is designed to expose the student to the skills and equipment necessary to explore the world below the surface of the water through the use of a mask, fins, snorkel and compressed air tanks.

Prerequisite(s)/Corequisite(s): Swimming 50 yds. using two basic strokes; basic water adjustment; underwater swim at least 15 feet; treading water for two minutes; demonstrate two surface dives

PEA 111X BASKETBALL (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of basketball.

PEA 111Z BACKPACKING & CAMPING (1 credit)

This course is designed to introduce the student to backpacking and orienteering in order to provide the students with an appreciation for the outdoor environment.

PEA 112A SWIM CONDITIONING (1 credit)

This course in Swim Conditioning is designed to expose the participants to the benefits and variety of swimming as a lifetime fitness exercise.

Prerequisite(s)/Corequisite(s): Participants should have the ability to continuously swim 25 yards.

PEA 112C POWER YOGA (1 credit)

This course provides an exercise program based on traditional yoga poses (asanas) in a continuous series of exercises. The course will concentrate on safe, effective, exercise that will develop the cardiovascular fitness, muscular strength, endurance and flexibility of the student.

PEA 112D PILATES MATWORK (1 credit)

This course is based on a method of exercise develop by Joseph H. Pilates. The course will concentrate on safe, effective exercise that will develop the cardiorespiratory fitness, muscular strength, endurance and flexibility of the student.

PEA 112E JAZZ II (1 credit)

The course is designed to build upon the techniques learned in Jazz Dance I.

Prerequisite(s)/Corequisite(s): PEA 111R or permission of instructor

PEA 112F ROCK CLIMBING (1 credit)

This class focuses on the basic knowledge and skills necessary for the sport of rock climbing. Topics covered will include protecting the climber from falling, movement on the rock, rappelling, and an introduction to anchor setting and ethics. Each topic will emphasize risk management and current accepted technique in the field.

PEA 112G BALLET II (1 credit)

The course builds on the work introduced in Ballet I. While still basic, there is increased complexity as the student begins to demonstrate greater ability.

Prerequisite(s)/Corequisite(s): PEA 111Q or permission of instructor

PEA 112H BALLROOM DANCE I (1 credit)

This course is designed to introduce the student to various fundamental techniques in Ballroom social dance and to incorporate these into basic Ballroom, Latin, and Swing dances.

PEA 112I TAI CHI FOR MOVEMENT IMPROVEMENT (1 credit)

This course is designed to teach students various forms of T'ai Chi. There will be emphasis on balance, coordination, flexibility, relaxation, and strength. It is designed for all levels of ability.

PEA 112J MODERN DANCE 2 (1 credit)

The course is designed to further the student's study of modern dance techniques.

Prerequisite(s)/Corequisite(s): PEA 111P or permission of instructor. Not open to non-degree graduate students.

PEA 112K SOCCER (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of soccer.

PEA 112L WALKING/JOGGING (1 credit)

This course is designed to help the students improve personal fitness through walking and jogging.

PEA 112M VOLLEYBALL (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of volleyball.

PEA 112N ZUMBA (1 credit)

Zumba is a fitness program inspired by Latin dance. Zumba combines Latin rhythms (salsa, bachata, merengue, and chachacha.) with cardiovascular exercise to create an aerobic routine that is fun and easy to follow.

PEA 112O BALLROOM DANCE II (1 credit)

The course is designed to further the student's study of Ballroom Dance techniques.

Prerequisite(s)/Corequisite(s): PEA 112H or permission of instructor

PEA 112P INDOOR CYCLING (1 credit)

This activity course is an indoor stationary cycling program. It is a high intensity, cardiovascular fitness program designed to promote lifetime fitness.

PEA 112Q HIP HOP (1 credit)

This course is designed to give students a beginning understanding and appreciation of hip hop dance.

PEA 112R NET GAMES (1 credit)

This course is designed to teach students the fundamental skills and rules of Badminton, Tennis, Pickleball, and Table Tennis.

PEA 112S CROSS-TRAINING (1 credit)

This course is designed to develop the technique, fitness level and knowledge base to effectively participate in cross-training activities. Individuals will be exposed to a variety of methods such as, but not limited to, plyometrics, agility training, kettlebells, and core training.

PEA 112T ADVANCED MARTIAL ARTS (1 credit)

The purpose of this course is to expand upon the basic techniques and philosophies presented in the UNO Martial Arts Introductory classes. The class will review the basic concepts and techniques taught in the intro classes which may be new to the student depending on the introductory class experience of the student.

Prerequisite(s)/Corequisite(s): PEA 111G, PEA 111F, or PEA 111D; or instructor consent.

PEA 112U QI GONG (1 credit)

This course actively covers the scope of Qi Gong through demonstration and participation as well as through a systematic elucidation of the history and theoretical underpinnings of Qi Gong.

PEA 112V MINDFULNESS MEDITATION (1 credit)

This course actively covers the scope of Meditation practices, including Mindfulness, through demonstration, lecture, discussion, and participation. Various methods will be taught, as well as the history, philosophy and practices of meditation. Contemporary research will also be discussed.

PEA 112W TAP I (1 credit)

The course is designed to introduce the student to various fundamental techniques in tap dance and to incorporate these techniques into dance sequences.

PEA 112X BARRE FITNESS (1 credit)

This is a fitness course that utilizes safe barre exercises to develop muscular endurance, flexibility, and neuromotor training. The course will concentrate on integrating the use of the ballet barre, light weights, and various props.

PEA 113A BEGINNING ICE SKATING (1 credit)

This course is designed for beginning ice skaters. Instructional emphasis will be placed on safely learning the life-long activity of ice skating. Students will develop an understanding of the basic principles and terminology of the sport of ice skating, improve on any current ice skating skills, and develop new skills such as forward and backward skating, crossovers, turns, and stops.

PEA 1130 ADAPTED PHYSICAL EDUCATION (1 credit)

This course is designed to provide an opportunity for independent physical education activity for a disabled person.

Prerequisite(s)/Corequisite(s): A disability which does not allow participation in regularly scheduled physical education activity courses.

PHHB 1500 FOUNDATIONS IN PUBLIC HEALTH (3 credits)

An introductory course for public health majors and other interested students, that examines the foundations of public health. The course includes an orientation to the process and the professions of public health and a consideration of current trends, problems and issues and their implications for public health professionals. The course will help candidates develop the knowledge, skills, competencies, and attitudes necessary to orchestrate an environment for positive public health.

Distribution: Social Science General Education course

PHHB 2070 DRUG AWARENESS (3 credits)

An introduction to the effects and rationales of drug use, misuse, and abuse. Included are the physiological, psychological, sociological, pharmacological, and legal aspects of drugs in a culturally diverse United States and abroad.

PHHB 2310 HEALTHFUL LIVING (3 credits)

A study of selected health problems and issues in our society as related to knowledge, attitudes, and behaviors necessary for healthful living in a culturally diverse society.

PHHB 2850 STRESS MANAGEMENT (3 credits)

The health-related aspects of stress will be the focus of this course. Selected techniques for the self-regulation of stress will be demonstrated, practiced, and analyzed. Pressures from the culturally diverse United States and implications of a global society will be analyzed. Students will develop skills and competencies necessary to create a learning environment conducive to reducing stress.

PHHB 3000 SPECIAL PROJECTS (1-3 credits)

This course is designed to provide an opportunity to study a topic in public health through short course, seminar, workshop, or special project.

Prerequisite(s)/Corequisite(s): The prerequisite for the special project will be determined by the instructor.

PHHB 3030 FIRST AID (3 credits)

Designed to give students knowledge and skill in implementing immediate, temporary treatment in case of injury or sudden illness before the services of a physician. Upon successful completion of the course, a student will receive a standard first aid and cardiopulmonary resuscitation certificate.

PHHB 3060 PROMOTING POSITIVE HEALTH (3 credits)

The focus of this team taught, experiential course will be assisting individual students: a) determine what wellness and mindfulness changes they wish to make in their lives; b) assisting them in acquiring the skills and learning about theories of how to effectuate change, and c) assisting them in making the change.

Prerequisite(s)/Corequisite(s): HPER 3090/HEKI 3090, HPER 2850/HEKI 2850, and Holistic Health - Eastern Perspectives. At least two of the following: PEA 111T, PEA 112I, PEA 112U, or PEA 112V One additional PEA course (may not be from the previous category or basketball or volleyball)

PHHB 3070 DEATH AND DYING (3 credits)

An interdisciplinary survey of literature in the field of thanatology, with an emphasis on working with the older patient and his or her family. (Cross-listed with GERO 3070).

PHHB 3080 HEALTH CONCEPTS OF SEXUAL DEVELOPMENT (3 credits)

An examination of factors influencing sexual development. Emphasis is given to topics pertinent to healthful living in today's culturally diverse, global society. (Cross-listed with WGST 3080).

PHHB 3310 INJURY PREVENTION IN PUBLIC HEALTH (3 credits)

This course is designed to explore public health strategies for the development and maintenance of safe physical environments with a focus on prevention of intentional and unintentional injuries. It explores a multitude of safety programs for school, business, recreation, transportation, and the home.

PHHB 4000 METHODS AND MATERIALS IN HEALTH EDUCATION (3 credits)

This course will provide an opportunity to study, develop and use different materials and equipment in public health. Various methods of teaching health will be practiced and evaluated. Candidates will be able to gain classroom and field experience (service-learning) in planning lessons and presentations.

Prerequisite(s)/Corequisite(s): Junior standing, HED 1500 or PHHB 1500

PHHB 4040 EPIDEMIOLOGY & PREVENTION OF DISEASE (3 credits)

The course is designed for public health students and others who are interested in public health. The cause, prevention, treatment and control of prevalent communicable and non-communicable disease in a culturally diverse and global society will be emphasized. Special emphasis will be given to diseases and health problems that can be prevented or controlled through public health initiatives.

Prerequisite(s)/Corequisite(s): HED 1500 or PHHB 1500

PHHB 4050 INTRODUCTION TO RESEARCH IN PUBLIC HEALTH (3 credits)

This course will assist students to develop the basic skills to read and evaluate applied research to address contemporary problems in public health. The course will provide an introduction to proposal writing, data collection, research design, statistical analysis, and computer application. Unique problems associated with data collection in public health settings such as public health departments, neighborhood health centers, and community based organizations will be addressed.

Prerequisite(s)/Corequisite(s): Junior standing

PHHB 4060 SCHOOL HEALTH PROGRAMS (3 credits)

The purpose of this course is to provide information and strategies for planning, implementing, and evaluating Coordinated School Health Programs (CSHP) for diverse cultural groups. Content includes an overview of school health programs, the essential functions of each of the eight components, the role of national and state organizations in working with local agencies and school districts in promoting the development of comprehensive school health programs.

Prerequisite(s)/Corequisite(s): HED 1500 or PHHB 1500

PHHB 4130 COMMUNITY HEALTH (3 credits)

A survey course of community health issues. The basics of epidemiology/statistical sciences, environmental health, managerial/administrative sciences, and behavioral/social sciences for community health are examined. Public health candidates will gain skills needed to develop and manage community health programs.

Prerequisite(s)/Corequisite(s): HED 1500 or PHHB 1500

PHHB 4200 A PUBLIC HEALTH APPROACH TO MENTAL HEALTH (3 credits)

This public health course will help students think critically about the prevention, identification, and treatment of mental illness in the United States. Students will be introduced to concepts from the disciplines of public health, psychology and sociology to understand mental health disorders and their impact on population health. Students will explore health disparities through the lens of cultural, social, behavioral, psychological, and economic factors. Students will recognize that mental health exists on a continuum and develop skills to address environmental influences on behavior. (Cross-listed with PHHB 8206).

PHHB 4280 SOCIAL MARKETING FOR PUBLIC HEALTH (3 credits)

This course will introduce students to current theory, practices and resources in the field of social marketing as it relates to public health. Students will analyze and implement social marketing techniques.

Prerequisite(s)/Corequisite(s): HED 1500/PHHB 1500, HED 4040/PHHB 4040 and HED 4050/PHHB 4050

PHHB 4400 HEALTH LITERACY (3 credits)

This course is designed to provide students with the competencies to reduce problems associated with low health literacy. The two primary foci will be strategies to help patients and other health consumers improve their health literacy, and strategies to help health providers and health educators communicate in a manner that can be understood by all persons regardless of their health literacy

Prerequisite(s)/Corequisite(s): HED 1500 or PHHB 1500

PHHB 4420 PUBLIC HEALTH INFORMATICS (3 credits)

Students will learn the implementation, operation, and application of health information systems. Students will explore the legal and ethical issues surrounding health informatics and patient records, management and communication in health informatics, and social and organizational issues pertaining to health informatics.

Prerequisite(s)/Corequisite(s): HED 1500 or PHHB 1500

PHHB 4550 HEALTH ASPECTS OF AGING (3 credits)

This course emphasizes health promotion for older adults. Special health needs of older Americans are compared and contrasted with health needs for other age groups. Prevention or delaying of chronic diseases and disorders are emphasized. (Cross-listed with GERO 4550 and GERO 8556 and PHHB 8556 and WGST 4550).

PHHB 4650 GLOBAL HEALTH (3 credits)

This course will explore contemporary health problems around the world with particular emphasis being placed on problems experienced by developing countries. The political, economic, social, geographical, biological aspects of the problems and possible solutions will be addressed.

Prerequisite(s)/Corequisite(s): Junior standing

Distribution: Global Diversity General Education course

PHHB 4700 WOMEN'S HEALTH AND ISSUES OF DIVERSITY (3 credits)

This course provides a critical understanding of the inter-relationship between socio-cultural, economic, and political factors and women's physical and mental health. The aim is to provide an overview of the experience with the health care system. Emphasis will be on critically examining recent scholarship from a sociological, behavioral, health policy perspective. (Cross-listed with PHHB 8706, SOC 4700, SOC 8706).

Prerequisite(s)/Corequisite(s): Junior Standing or permission of the instructor.

Distribution: U.S. Diversity General Education course

PHHB 4880 PUBLIC HEALTH POLICY (3 credits)

This course provides an overview of the U.S. health system, and an introduction to the skills necessary to address health policy issues. Students will develop a working knowledge of health services terminology, recognize basic health care concepts, distinguish between various components of the health care delivery system and be able to apply concepts learned in the analysis of a public health problem.

Prerequisite(s)/Corequisite(s): HED 1500 or PHHB 1500

PHHB 4950 PUBLIC HEALTH LEADERSHIP AND ADVOCACY (3 credits)

This course reviews public health leadership concepts and practices that prepare candidates to fulfill professional roles as advocates and leaders in the health field. Politics and power structure in communities and organizations are addressed. The processes through which changes in the political, economic, organizational, and physical environment related to health status and health behavior are brought about will be addressed. Media advocacy, the legislative process, community organization, and coalition development will be explored as means of environmental change.

Prerequisite(s)/Corequisite(s): HED 1500 or PHHB 1500

PHHB 4960 PUBLIC HEALTH - PLANNING AND ORGANIZATION (3 credits)

The course is designed to provide public health students an understanding of planning and organization in public health. The use of planning tools including social assessment methods, epidemiological methods, behavioral methods, organizational methods, administrative methods and evaluation procedures for public health initiatives will be included. Grant writing components will be emphasized.

Prerequisite(s)/Corequisite(s): HED 1500 or PHHB 1500, Senior standing

PHHB 4970 PROBLEMS OF HEALTH EDUCATION (1-3 credits)

This course is designed to provide an opportunity for individuals or groups to study problems in health education.

Prerequisite(s)/Corequisite(s): Permission of instructor.

PHHB 4990 INTERNSHIP IN PUBLIC HEALTH (6 credits)

This internship provides on-the-job training for public health students in a cooperative program with state and local health departments or other appropriate community and public health agencies. Direct field experience is completed by the student under the supervision of an experienced practitioner in an approved public health agency.

Prerequisite(s)/Corequisite(s): Completion of or current enrollment in core courses, GPA of 2.5 or above in required courses, and no grade below C in required courses, and permission of instructor.

RLS 2440 FOUNDATIONS OF RECREATION AND LEISURE (3 credits)

A survey approach to the recreation, leisure services, parks professional field to include the historical philosophical bases of the overall profession. Provides the necessary foundational knowledge for majors as well as candidates within other areas of study.

RLS 2500 OUTDOOR RECREATION (3 credits)

A survey of the dynamics of outdoor recreation in American life. Designed to guide candidates through a learning experience that results in an introduction to and a broad-based understanding and appreciation of outdoor recreation.

RLS 3100 SOCIAL ASPECTS OF SPORT AND LEISURE (3 credits)

A critical examination of the function and significance of sports within the overall leisure behavior patterns of Western society. Recreational sport, sport spectatorship, and competitive athletics are considered from the dominant theoretical perspectives within sociology.

Prerequisite(s)/Corequisite(s): Six hours of social science or permission.

RLS 3500 FOUNDATIONS OF RECREATION THERAPY (3 credits)

An introduction to therapeutic recreation services as a specialized field within recreation. Course content touches on the majority of the special populations recognized within American society. An in-depth survey approach is utilized.

RLS 4070 CAMPUS RECREATION MANAGEMENT (3 credits)

A review of the knowledge, skills, and abilities required for the management of typical campus recreation programs and facilities. This course will prepare students for entry level positions managing campus recreation employees, programs, facilities and services. (Cross-listed with RLS 8076)

RLS 4100 FACILITY DESIGN AND MANAGEMENT (3 credits)

This course is designed to acquaint the recreation major or practitioner with the knowledge and certifications necessary to maintain and operate a recreation building including all major activity areas using the latest standards and technology. Attention will be devoted to the design and management process, including terminology, court specifications, handicapped accessibility, and swimming pool operation.

RLS 4240 RECREATION ADMINISTRATION (3 credits)

Designed to provide a background of information on public, private, and commercial recreation with special attention to organization, promotion, and development from the administrative aspect. (Cross-listed with RLS 8246)

Prerequisite(s)/Corequisite(s): RLS Major and Senior status

RLS 4300 RECREATION PROGRAMMING AND LEADERSHIP (3 credits)

An advanced study of recreational programming and leadership through practical applications. Emphasis is placed upon understanding proven programming and leadership knowledge and skills; understanding participant leisure behavior; understanding participant leisure needs; and skill development in ways through which organization, agencies and businesses create services to respond to the leisure needs of the consumer. (Cross-listed with RLS 8306)

Prerequisite(s)/Corequisite(s): Junior, Senior or Graduate Standing

RLS 4400 TRAVEL AND TOURISM (3 credits)

This course is designed to provide the recreation major or practitioner, and other interested candidates, with an awareness of the major components of the travel and tourism industry, including its costs and benefits to a resident community. (Cross-listed with RLS 8406)

Prerequisite(s)/Corequisite(s): Junior Standing.

RLS 4420 RECREATION FOR THE AGING (3 credits)

Role of leisure services as related to understanding and working with elders. Emphasis on recreation programming as a mode of intervention. Analysis and study of the phases of aging, with reference to psychomotor, affective, and cognitive changes; introduction to the theories of aging and how they relate to the lifestyle of this population; recreational therapy intervention, activity adaptation and program design; leisure education and issues and trends. (Cross-listed with RLS 8426, GERO 4420, GERO 8426)

RLS 4550 PRACTICUM I (6 credits)

Practical learning experience in leisure service delivery under close University and agency supervision.

Prerequisite(s)/Corequisite(s): Senior, 2.5 GPA and department consent.

RLS 4560 PRACTICUM II (6 credits)

Practical learning experience in leisure service delivery under close University and agency supervision.

Prerequisite(s)/Corequisite(s): Senior, 2.5 GPA and department consent.

RLS 4970 PROBLEMS OF RECREATION (1-3 credits)

The purpose of this course is to provide an opportunity for candidates to participate in special conferences on problems in the field of recreation and to further professional improvement and growth beyond the normal four-year undergraduate program.

Prerequisite(s)/Corequisite(s): Permission of instructor.

Public Health, Bachelor of Science

Degree Description

The public health program prepares students to become professionals who promote the health of local, national, and global populations through

education and skills for individuals and communities. A degree in public health prepares students to think critically about societal issues through a justice-based framework, and public health professionals engage in advocacy for policies that ensure and support healthy populations. Students who graduate with a degree in public health pursue careers in a variety of fields, including health administration; health promotion, and behavior; epidemiology; and environmental health. Students are also prepared to pursue graduate degrees in public health or related fields.

Admissions

Students must have a cumulative and major GPA of at least 2.5.

Fast Track Program

The School of Health and Kinesiology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BS in Public Health major desiring to pursue a MS in Health & Kinesiology with a Health Behavior concentration, or those pursuing a BS in Kinesiology major desiring to pursue a MS in Health & Kinesiology with an Exercise Science concentration.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Requirements

Courses Required for Major (core curriculum)

Students must meet the general education requirements. Additionally students must complete the public health program requirements:

Code	Title	Credits
CMST 2410	SMALL GROUP COMMUNICATION AND LEADERSHIP	3
PSYC 3130	STATISTICS FOR THE BEHAVIORAL SCIENCES	3
or SOC 2130	SOCIAL STATISTICS	
or HEKI 2100	STATISTICS IN HEALTH AND KINESIOLOGY	
BIOL 1330	ENVIRONMENTAL BIOLOGY	3
PHHB/SOC 4700	WOMEN'S HEALTH AND ISSUES OF DIVERSITY	3

JMC 1500	INTRODUCTION TO JOURNALISM AND MEDIA COMMUNICATION	3
PSYC 1010	INTRODUCTION TO PSYCHOLOGY I	3
Students must complete the following 60 hours of public health courses:		
PHHB 1500	FOUNDATIONS IN PUBLIC HEALTH	3
PHHB 4000	METHODS AND MATERIALS IN HEALTH EDUCATION	3
PHHB 4040	EPIDEMIOLOGY & PREVENTION OF DISEASE	3
PHHB 4050	INTRODUCTION TO RESEARCH IN PUBLIC HEALTH	3
PHHB 4060	SCHOOL HEALTH PROGRAMS	3
PHHB 4130	COMMUNITY HEALTH	3
PHHB 4200	A PUBLIC HEALTH APPROACH TO MENTAL HEALTH	3
PHHB 4280	SOCIAL MARKETING FOR PUBLIC HEALTH	3
PHHB 4400	HEALTH LITERACY	3
PHHB/GERO/WGST 4550	HEALTH ASPECTS OF AGING	3
PHHB 4650	GLOBAL HEALTH	3
PHHB 4880	PUBLIC HEALTH POLICY	3
PHHB 4950	PUBLIC HEALTH LEADERSHIP AND ADVOCACY	3
PHHB 4960	PUBLIC HEALTH - PLANNING AND ORGANIZATION	3
PHHB 4990	INTERNSHIP IN PUBLIC HEALTH	6
PA 2170	INTRODUCTION TO PUBLIC ADMINISTRATION	3
KINS 3900	MOTIVATION FOR PHYSICAL ACTIVITY	3
Select two of the following:		6
PHHB 2070	DRUG AWARENESS	
PHHB 2850	STRESS MANAGEMENT	
PHHB/WGST 3080	HEALTH CONCEPTS OF SEXUAL DEVELOPMENT	
PHHB 3310	INJURY PREVENTION IN PUBLIC HEALTH	
HEKI 3090	APPLIED NUTRITION	
Select electives as needed to meet 120 hours minimum for the degree.		
Total Credits		78

Students must complete all required coursework, both general and professional, with a minimum GPA of 2.5 before applying for their practicum experiences. Prior to graduation, all public health coursework must be completed with a least a 2.5 overall GPA and no grade below "C-".

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

Kinesiology, Bachelor of Science in Education

Degree Description

The kinesiology major is designed to prepare students to assume positions as fitness or health promotion directors and exercise consultants in private or public agencies, health centers, cardiac rehabilitation programs, as well as corporate fitness programs. This major is also well-suited as a pre-professional program for students interested in further pursuing a career in athletic training, physical therapy, occupational therapy, nursing, physician assistant, and other medical fields. Additionally, the kinesiology major will prepare students for research intensive graduate programs in exercise physiology, biomechanics, physical activity, and others.

Admissions

Students must have a cumulative and major GPA of at least 2.5.

Fast Track Program

The School of Health and Kinesiology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time

frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BS in Public Health major desiring to pursue a MS in Health & Kinesiology with a Health Behavior concentration, or those pursuing a BS in Kinesiology major desiring to pursue a MS in Health & Kinesiology with an Exercise Science concentration.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Alternative Entry into the MA in Athletic Training from the BS in Kinesiology

The School of Health and Kinesiology offers an alternative entry into the MA in Athletic Training, which allows outstanding students to complete the BS in Education undergraduate Kinesiology degree and the MA in Athletic Training graduate degree. The alternative entry program is designed for dedicated students who are motivated and willing to take on early the challenges relating to graduate education. Interested students are encouraged to meet with their academic advisor for more information about this program.

Requirements

Courses Required for Major (Core Curriculum)

In addition to the general education requirements, the following courses must be taken:

Code	Title	Credits
KINS 1800	FITNESS FOR LIVING	3
HEKI 2100	STATISTICS IN HEALTH AND KINESIOLOGY	3
KINS 2210	GROUP EXERCISE LEADERSHIP	2
KINS 2220	THEORY AND PRACTICE OF TEACHING RESISTANCE TRAINING	2
BMCH 2400	HUMAN PHYSIOLOGY & ANATOMY I	4
BMCH 2500	HUMAN PHYSIOLOGY AND ANATOMY II	4
KINS 2430	FOUNDATIONS IN KINESIOLOGY	3
KINS 2800	MOTOR LEARNING	3
KINS 3040	PREVENTION AND CARE OF ATHLETIC INJURIES	3
KINS 3900	MOTIVATION FOR PHYSICAL ACTIVITY	3

KINS 4010	LABORATORY METHODS IN EXERCISE SCIENCE	6
KINS 4150	ADAPTED PHYSICAL ACTIVITY THEORY AND PRACTICE	3
BMCH 4630	BIOMECHANICS	3
KINS 4800	KINESIOLOGY PRACTICUM	3
KINS 4910	INTERNSHIP IN EXERCISE SCIENCE	6
KINS 4940	PHYSIOLOGY OF EXERCISE	3
HEKI 3090	APPLIED NUTRITION	3
PHHB 3030	FIRST AID	3
PHHB 4550	HEALTH ASPECTS OF AGING	3
PHYS 1110 & PHYS 1154	GENERAL PHYSICS I WITH ALGEBRA and GENERAL PHYSICS LABORATORY I	5
CHEM 1010	CHEMISTRY IN THE ENVIRONMENT AND SOCIETY	3
PSYC 1010	INTRODUCTION TO PSYCHOLOGY I	3
Select 4 hours of physical activity from the following:		4
PEA 111P	MODERN DANCE	
PEA 111Q	BALLET	
PEA 111T	YOGA I	
PEA 111S	RELAXATION TECHNIQUES	
PEA 111V	BEGINNING/INTERMEDIATE SWIMMING	
PEA 111Z	BACKPACKING & CAMPING	
PEA 112D	PILATES MATWORK	
PEA 112H	BALLROOM DANCE I	
PEA 112I	TAI CHI FOR MOVEMENT IMPROVEMENT

Teacher Education

Teacher Education at UNO is dedicated to your success and the success of our region's children and teens. As an undergraduate student you will receive one-on-one guidance from an instructional coach who will give you meaningful feedback on your skills as you practice teaching in one of our many partner schools. This process will prepare you for the clinical practice experience and the real world of teaching upon graduation. As a graduate student in one of our award-winning programs, you'll experience blended learning with distance friendly classes taught by professors with PK-12 classroom experience.

Whether you want to teach kindergarten or high school math, whether you are a first-year student or an experienced educator seeking more skills, you will benefit from the unique network of support offered by our department, UNO and the schools of our city. You will receive the opportunities you need and the support you can rely on to become a dedicated practitioner, a reflective scholar and a responsible citizen.

Accreditation

The Educator Preparation Programs are accredited by the National Council for Accreditation of Teacher Education (NCATE) and the Nebraska State Department of Education. The program will seek Council for the Accreditation of Educator Preparation (CAEP) accreditation upon the next review cycle. The Library Science/School Librarian Program is nationally recognized by the American Association of School Librarians (AASL) / American Library Association (ALA).

Other Information

Praxis II Content Test:

All educator preparation candidates seeking certification are required to take a Praxis II content test in each endorsement area of their preparation prior to being awarded initial teacher certification through the Nebraska Department of Education (NDE). It is recommended that candidates take the Praxis II content test the semester prior to their clinical practice semester.

This link (<http://www.ets.org/praxis/ne/requirements/>) will take you to the ETS website page for the Nebraska Department of Education requirements. The page lists the Nebraska requirements for each endorsement area.

Professional Education Sequence

All candidates in programs leading to teacher certification must complete the courses that constitute the professional education sequence. The professional education sequence is composed of 15 credit hours organized into four courses of three credits each: TED 2100, TED 2200, TED 2300 or TED 2380 and TED 2400.

TED 2100 and TED 2200 (Pre-professional Education Core) are open to all students on the UNO campus with a cumulative 2.5 GPA. TED 2200 meets the Nebraska Department of Education requirement for human relations.

To enroll in the other professional education sequence courses (TED 2300 or TED 2380 and TED 2400), candidates must have successfully applied to the Educator Preparation Program and must satisfy any other prerequisites listed for the course. Candidates who receive a grade below "C", "I" (incomplete), or a "W" (Withdraw) in a professional education sequence course may not continue in the professional course sequence until that grade is removed.

TED 2300 must be completed satisfactorily with a "C" or better prior to enrollment in TED 2400.

Note: Candidates, who receive a grade below "C" or an "I"; or who voluntarily withdraw from any practicum or field experience after being identified as a student in jeopardy; or who are withdrawn from any practicum or field experience must petition to continue in the program.

Professional Dispositions Statement

Teaching is a profession that requires its potential candidates to be individuals of integrity. Prospective teachers must be able to demonstrate they are individuals of strong moral character who can make mature decisions for themselves and for the students whom they will teach. Teachers are responsible for the education, safety, and well-being of anyone in their charge. The University of Nebraska at Omaha College of Education, Health, and Human Sciences prepares future teachers who show a high degree of moral character and the ability to act responsibly inside and outside the classroom. These individuals must be able to serve as representatives of the College and the University and must demonstrate the personal and professional dispositions of the teaching profession.

Inappropriate behaviors on the part of the candidates, which in the College's reasonable judgment, violate the University's Student Code of Conduct, establish a lack of integrity or moral/ethical character, or demonstrate conduct or patterns of behavior inconsistent with the personal and professional dispositions expected in the teaching profession, shall be sufficient grounds for 1) denial of admission to or enrollment in educator preparation programs, 2) dismissal or removal from programs, courses, observations, field experiences, practica, clinical practice, and similar field-based experiences, and 3) withholding institutional recommendation for certification. Such behaviors could be evidenced within the University or PK-12 school environment, outside the University or PK-12 school environment, and/or in an electronic or digital context. Displays or patterns of behaviors may be established by any credible means including, but not limited to, the facts surrounding a record of arrests or convictions or information obtained by the University directly from a school or district official. Teacher candidates should note that the College of Education, Health, and Human Sciences must provide a recommendation for certification in order for a student to obtain his/her teaching certificate. Accordingly, inappropriate behaviors by candidates could jeopardize not only their educational goals at UNO but also their professional goals including the ability to become a certified teacher.

Candidates who exhibit inappropriate behaviors may be referred for a Conference of Concern to formally identify the unsuitable behaviors, recommend corrective action(s), and determine the candidate's suitability for continuing in educator preparation. Candidates who have convictions outlined in the Nebraska Department of Education's Rule 20, Section 005.07A, will be allowed to continue in the educator preparation program or referred for certification only through an appeal to the Commissioner or State Board of Education.

Note: In accordance with the Nebraska Department of Education, Rule 20, the following information must be provided to all persons who apply for admission to programs leading to teacher certification: *Persons who have felony convictions or misdemeanor convictions involving abuse, neglect or sexual misconduct are automatically rejected by the Nebraska Department of Education for certification.*

Field/Clinical/Practicum/Clinical Practice Experiences

As part of their educator preparation program, candidates are required to complete various field, clinical, practicum, and clinical practice experiences.

In accordance with policies and procedures of the Nebraska Department of Education, and in compliance with the requests of cooperating school districts, no candidate will be permitted to participate in PK-12 classroom-based experiences (including clinical practice) until a signed statement of personal and professional fitness to teach has been completed. The statement of personal and professional fitness is required as part of the admission application to an educator preparation program.

Clinical Practice Policies

All candidates for Elementary, Middle level, Special education, or Secondary teacher certification will be required to complete one semester of full-day clinical practice for a total of 12 credit hours. Candidates seeking an additional endorsement to the basic certificate will be required to complete additional clinical practice experiences in their endorsement area(s). Clinical practice experiences will be completed in identified, local, metropolitan, area schools where placement and supervision are arranged through the College of Education, Health, and Human Sciences.

Admission to clinical practice is by application only. Application for clinical practice must be made in the fall or spring term preceding the clinical practice semester. Applicants cannot be considered for placement unless all application materials are submitted by the announced deadline:

September 15 for spring clinical practice and February 1 for fall clinical practice.

Candidates must have satisfactorily completed all required coursework prior to clinical practice.

A minimum grade of "C" must be earned in all certification requirements, endorsements, and concentrations. All grades of incomplete and any grades below "C" in these specific requirements must be removed prior to clinical practice. Candidates are responsible for contacting their advisor regarding said grades.

Candidates must have a minimum cumulative GPA of 2.75 or higher in order to be eligible for clinical practice.

Special Note: Candidates who are withdrawn from any clinical practice experience, or who voluntarily withdraw after being identified as a candidate in jeopardy, must petition if they wish to continue in their professional preparation program.

Certification

Upon successful completion of all coursework and clinical practice, candidates are eligible to apply and may be recommended for a State of Nebraska teaching certificate. Candidates should apply for the certificate in the semester they graduate. Information on application procedures can be obtained in the Office of Academic Advising and Field Experiences, Roskens Hall 204. You may also email unocertification@unomaha.edu

Contact:

212 Roskens Hall
6001 Dodge Street
Omaha, NE 68182-0163

Website (<http://www.unomaha.edu/college-of-education/teacher-education/>)

Students interested in becoming teachers must formally apply for admission to the Educator Preparation Program (EPP).

Admission policies can be found on the college website (<https://www.unomaha.edu/college-of-education/student-services/academics/admissions-teacherprep.php>). Deadlines for applying are October 1 for spring semester; and March 1 and June 1 for fall semester.

All students accepted into the Educator Preparation Program (EPP) must complete a background check. The background check must be conducted in the time frame and by the vendor determined by the College of Education, Health, and Human Sciences. The student is responsible for the cost of the background check.

Upon initial admission to educator preparation, all students are required to purchase LiveText, a web-based interface that documents progress in regard to program standards.

Application for Admission to Educator Preparation Program (EPP)

Step 1:

The following requirements must be met prior to submitting an **Initial Application** to the Educator Preparation Program (EPP).

- Admission to UNO
- Completion of UNO's General Education Fundamental Academic requirements, or their transfer equivalents. These include English Composition I (ENGL 1150 (<https://catalog.unomaha.edu/search/?P=ENGL%201150>) or ENGL 1154 (<https://catalog.unomaha.edu/search/?P=ENGL%201154>)), ENGL Composition II (ENGL 1160 (<https://catalog.unomaha.edu/search/?P=ENGL%201160>) or ENGL 1164 (<https://catalog.unomaha.edu/search/?P=ENGL%201164>)), Communication Studies (CMST 1110 (<https://catalog.unomaha.edu/search/?P=CMST%201110>) or CMST 2120 (<https://catalog.unomaha.edu/search/?P=CMST%202120>)), and Quantitative Literacy (MATH 1120 (<https://catalog.unomaha.edu/search/?P=MATH%201120>), MATH 1130, MATH 1220 (<https://catalog.unomaha.edu/search/?P=MATH%201220>), STAT 1530, or STAT 1100) or placement beyond through the Math Placement Examination or Math ACT score.
- Established cumulative University of Nebraska System GPA of 2.50 or higher (12+ credit hours in the NU system)
- Completion, or in progress at the time of application, of TED 2100 (<https://catalog.unomaha.edu/search/?P=TED%202100>), TED 2200 (<https://catalog.unomaha.edu/search/?P=TED%202200>).

Grades must be posted before the application packet is submitted: fall semester grades for March 1 deadline, spring semester grades for June 1 deadline, and summer semester grades for October 1 deadline.

NOTE: The Praxis CORE Academic Skills for Educators test is strongly recommended but not required for **Initial** Application to EPP.

Step 2:

The following requirements must be met for **Formal Admission** to the Educator Preparation Program (EPP).

- Established cumulative University of Nebraska System GPA of 2.75 or higher
- Completion of TED 2100 (<https://catalog.unomaha.edu/search/?P=TED%202100>), TED 2200 (<https://catalog.unomaha.edu/search/?P=TED%202200>), TED 2300 (<https://catalog.unomaha.edu/search/?P=TED%202300>) or TED 2380 and TED 2400 (<https://catalog.unomaha.edu/search/?P=TED%202400>) with a grade of "C" or better
- Meet or exceed the minimum Nebraska state score requirements on all sections of the Praxis I-CORE Academic Skills for Educators Test. (Reading – 156, Writing – 162, Mathematics -150)

NOTE: The official Praxis CORE scores must be on file in the College of Education, Health, and Human Sciences Office of Academic Advising at the time of Formal Admission. The Formal Admission deadlines are: May 30 and November 30.

The Office of Academic Advising will verify GPA requirements, Praxis CORE scores and passing grades for coursework. Students who are admitted to the Educator Preparation Program, but do not pass TED 2100 (<https://catalog.unomaha.edu/search/?P=TED%202100>) and TED 2400 (<https://catalog.unomaha.edu/search/?P=TED%202400>) with a grade of "C" or better and/or the Praxis CORE, will not be permitted to continue in the Educator Preparation Program course sequence until such grade(s) and score(s) are received.

GPA Requirements (UNO Students)

- Currently enrolled UNO students with 12 or more credit hours in the Nebraska System (UNK, UNL, UNO) must have a minimum cumulative GPA of 2.50 for Initial Application and a minimum cumulative GPA of 2.75 for Formal Admission.
- GPA Requirements (Transfer Students): Transfer students with 12 or more credit hours in the Nebraska System (UNL, UNK, UNO) must have a minimum cumulative **NU system** GPA of 2.50 for all attempted coursework for initial application and a minimum cumulative **NU system** GPA of 2.75 for formal admission.

Degrees Offered

- Education, Bachelor of Science

Programs

- Elementary Education (p. 544)
- Library Science (p. 552)
- Secondary Education (p. 553)
- Early Childhood Inclusive (p. 541)

Writing in the Discipline

Writing Student Learning Objectives for all ECI, ELED and SED majors are all addressed in TED 2100 Ed Foundations. Writing Student Learning Objectives for all library science majors are all addressed in TED 4800 Leadership and Management in Library and Information Agencies.

Secondary Education Concentration

For more information...

and a complete listing of program requirements visit the College of Education, Health, and Human Sciences website at <http://www.unomaha.edu/college-of-education/teacher-education/>

Endorsements Offered

Candidates seeking 6-12, 7-12 or PK-12 certification must complete one of the endorsements below.

- Art (PK-12) Endorsement (p. 558)
- Biology (7-12) Endorsement (p. 559)
- Business, Marketing, Information Technology (BMIT) (6-12) Endorsement (p. 560)
- Chemistry (7-12) Endorsement (p. 561)
- English Language Arts (7-12) Endorsement (p. 563)
- Secondary English (7-12) with ESL Supplemental Endorsement (p. 564)
- Secondary English (7-12) with Additional Subject Endorsement (p. 565)
- World Language - French (7-12) Endorsement (p. 565)
- World Language - German (7-12) Endorsement (p. 567)
- Mathematics (6-12) Endorsement (p. 568)
- Middle Level (5-9) Endorsement (p. 569)
- Music (PK-12) Endorsement (p. 572)
- Physics (7-12) Endorsement (p. 572)
- Physical Education (PK-12) Endorsement (p. 573)
- Physical Education (7-12) and Health (7-12) Endorsement (p. 575)
- Science (7-12) Endorsement (p. 576)
- Social Science (7-12) Endorsement (p. 578)
- World Language - Spanish (7-12) Endorsement (p. 579)

Dual Endorsement Programs Offered

Candidates may elect to complete a second endorsement as part of their secondary education program. These dual endorsements require two semesters of clinical practice (student teaching) and result in two teaching

endorsements on the Nebraska teaching certificate. The following dual endorsements are available.

- Deaf/Hard of Hearing (7-12) Endorsement (p. 581)
- Special Education (7-12) Endorsement (p. 582)

Supplemental Endorsements Offered

Supplemental endorsements are content areas which can be added to a Nebraska teaching certificate in the presence of other earned endorsements. A supplemental endorsement cannot stand alone on an initial teaching certificate. The following supplemental endorsements are available.

- English as a Second Language (7-12) Endorsement (p. 583)
- Coaching (7-12) Endorsement (p. 583)
- Information Technology (PK-12) (p. 583) Endorsement (p. 583)

For more information and a complete listing of program requirements visit the College of Education, Health, and Human Sciences website (<https://www.unomaha.edu/college-of-education/student-services/certification/endorsements.php>)

Education - Early Childhood Inclusive, Bachelor of Science

The early childhood inclusive education major is designed for students seeking Nebraska certification to teach in Birth - age 3 or age 3 through third grade in elementary schools. This major allows students to learn more about early childhood education policy, social-cultural understanding and the well-being of infants and toddlers.

Potential Career Opportunities/settings:

- Preschool Teacher or Preschool Special Educator
- Infant/Toddler teacher
- Kindergarten – Grade 3 Teacher
- Special Education Teacher (Kindergarten – Grade 3)
- Early intervention home visitor
- Head Start family educator

Education - Elementary Education, Bachelor of Science

The elementary education major is designed for students seeking Nebraska certification to teach in K-6 elementary schools. This major allows students to explore developmental issues of children, learning theory, elementary school content, and teaching methods. One of the strengths of the preparation program is the field experiences with local school districts.

Potential Career Opportunities/settings:

- Public School systems
- Private School systems

Education - Secondary Education, Bachelor of Science

The secondary education major is designed for students seeking Nebraska certification to teach in secondary content areas in grades 7-12, or in PK-12 settings in the areas of Art, Music, or Physical Education. This major allows students to explore developmental issues of children, learning theory, secondary content area(s), and teaching methods. One of the strengths of the preparation program is the field experiences with local school districts.

Potential Career Opportunities/settings:

- Public School systems
- Private School systems

Education – School Library concentration, Bachelor of Science

UNO's College of Education, Health, and Human Sciences offers two undergraduate degree programs in Elementary Education and Secondary Education with School Library concentrations. This program allows candidates to acquire an elementary or secondary teaching certificate with a school library concentration.

Potential Career Opportunities/settings:

- Special libraries
- Public libraries

Education - Library Science, Bachelor of Science

UNO's College of Education, Health, and Human Sciences offers an undergraduate degree in Library Science that provides credentials and continuing education for those seeking employment in 21st Century library and information agencies.

Potential Career Opportunities/settings:

- Special libraries
- Public libraries
- Academic libraries
- Information Management

TED 1010 INTRODUCTION TO EDUCATION (3 credits)

The course will provide an introduction to the education profession through career exploration and initial exposure to the dynamics of PK-12 classroom teaching. The course will provide an overview of ethics and professionalism, pre-service preparation, societal influences, classroom practices, and the governance structures which impact teachers and schools. The course has a required field experience.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

TED 1100 INQUIRY-BASED THINKING IN STEM (3 credits)

This course provides students with hands-on science content experiences that model the inquiry-based thinking used in science, technology, engineering and mathematics careers. Students will undertake interdisciplinary science modules to understand prairie ecosystems and to study how living things (such as animals, plants, and microbes) interact with non-living things (such as water, soil, and energy) within a dynamic system. Students will study the prairie at UNO's Glacier Creek Preserve facility from an interdisciplinary perspective, investigating the geology, biology and chemistry of the prairie environment, while using information science to analyze data and model prairie systems.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Distribution: Natural/Physical Science General Education course

TED 2050 INTRODUCTION TO TEACHING ENGLISH AS A SECOND LANGUAGE (3 credits)

This course offers teacher candidates an introduction to the linguistic, social, political, and cultural factors that impact the teaching of English Language Learners (ELLs) entering the United States school system. As dedicated practitioners, reflective scholars, and responsible citizens, undergraduate students will study best practices for ELLs in the mainstream classroom that promotes language and cultural understanding among students and teachers.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

TED 2060 EQUITY, LANGUAGE, AND CULTURAL LITERACY (3 credits)

This course explores the relationship among equity, language, and cultural literacy and its implications for programming and advocacy within school and community contexts. As dedicated practitioners, reflective scholars, and responsible citizens, undergraduate students study the impact these relationships have for historically underrepresented groups in the United States.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

TED 2100 EDUCATIONAL FOUNDATIONS (3 credits)

The course will provide prospective teacher candidates with the philosophical, ethical, historical, and social foundations that will enable them to understand their role as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. Also, the prospective teacher candidates will study and understand the national and state standards relevant to P-12 education and to teacher preparation in the USA. Each prospective candidate will acquire competency in using educational technologies such as Internet based course delivery systems, database software, and digital portfolios.

Prerequisite(s)/Corequisite(s): 2.50 GPA

Distribution: Writing in the Discipline Single Course

TED 2160 INTRODUCTION TO LIBRARY SERVICES (3 credits)

This course introduces students to the discipline and profession of library and information science and to the wide array of information organizations whose purpose is to gather, organize, and transfer information to patrons in a diverse society.

TED 2200 HUMAN RELATIONS FOR BIAS-FREE CLASSROOMS (3 credits)

This course is designed to increase multicultural knowledge and positively impact the diversity disposition of prospective teacher candidates. It is also designed to help them become more aware of ways to motivate and positively impact the youths they will encounter in their future classrooms. Prospective teacher candidates will examine existing attitudes toward various groups by race, ethnicity, age, gender, disability, and social class with the goal of becoming dedicated practitioners, reflective scholars, and responsible citizens who can meet their professional responsibilities.

Prerequisite(s)/Corequisite(s): 2.50 GPA

Distribution: U.S. Diversity General Education course

TED 2250 INTRODUCTION TO EARLY CHILDHOOD EDUCATION (3 credits)

This course provides an overview of early childhood education from theoretical, historical, and contemporary perspectives. Particular emphasis in the course is placed on key approaches to early childhood education, research on how children learn, and developmentally appropriate practice for children in the birth-to-age-five range. Observations are required as part of the course and will be conducted outside of class time.

TED 2300 HUMAN GROWTH AND LEARNING (3 credits)

This course will examine human growth and learning from conception through adolescence. It will focus on how current educational practices and theories of development and learning impact and influence each other. The course includes field-based and laboratory experiences for the students.

Prerequisite(s)/Corequisite(s): Admission to Teacher Preparation. Not open to non-degree graduate students.

TED 2310 FAMILY-CENTERED PARTNERSHIPS (3 credits)

This course will examine the purposes and methods for developing family-centered partnerships for young children. Candidates will develop the skills necessary for the planning, designing, implementing, and evaluating effective family engagement in early childhood settings. Candidates will also explore characteristics of diverse families by engaging in service learning and exploring diverse settings in the community.

Prerequisite(s)/Corequisite(s): TED 2250

TED 2350 PLAY IN EARLY CHILDHOOD INCLUSIVE EDUCATION (3 credits)

The purpose of this course is to provide theoretical and empirical bases for observing and understanding children in play; an understanding of cognitive, social, and communicative stages related to developmental theory through play; and opportunity to consider biological, cultural, and environmental influences on children's play and development, as well as, plan play experiences for young children. This course is designed primarily to prepare early childhood inclusive education teachers to develop the knowledge, skills, and dispositions to understand and use play as part of early childhood education and care programming for all young children.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

TED 2360 CHILDREN'S LITERATURE (3 credits)

This course focuses on children's literature as a significant component of a 21st Century educational environment through the use of multiple literacies, e.g., cultural, information, visual, and digital literacy strategies. An emphasis will be based on research-based literacy strategies and literature that supports culturally relevant teaching.

Prerequisite(s)/Corequisite(s): Admission to Teacher Preparation Program

TED 2370 THE CREATIVE ARTS IN EARLY CHILDHOOD EDUCATION (3 credits)

This course prepares the early childhood teacher candidate to implement and use the creative and expressive arts in the classroom and to develop and assess conceptual understanding and building the vocabulary of children.

Prerequisite(s)/Corequisite(s): Admission to the Early Childhood Inclusive major program and TED 2250. Not open to non-degree graduate students.

TED 2380 DEVELOPMENT AND LEARNING IN ADOLESCENCE (3 credits)

This course will examine human growth and learning from early through late adolescence, to help students gain an understanding of the biological, social, and cultural influences on the developing child in the second decade of life. The class will focus on how current educational practices and theories of development and learning impact and influence each other. The course will include field-based experiences.

Prerequisite(s)/Corequisite(s): Prerequisites of TED 2100 and TED 2200. Not open to non-degree graduate students.

TED 2390 SOCIOCULTURAL UNDERSTANDINGS OF INFANTS AND TODDLERS (3 credits)

This course will examine socio-cultural conceptions of infant and toddler-aged children. The influences of culture and social context on parental and center-based goals, beliefs and practices will also be covered.

Prerequisite(s)/Corequisite(s): Admission to the Early Childhood Inclusive major program and TED 2250. Not open to non-degree graduate students.

TED 2400 PLANNING FOR EFFECTIVE TEACHING (6 credits)

The course provides an initial overview of lesson planning through an introduction to the concepts of standards, objectives, anticipatory sets, instructional strategies, assessments, and closure. The course also introduces culturally responsive teaching practices which are intentionally supportive of English Language Learners, students with disabilities, and students who live in poverty or other difficult circumstances. A practicum completed outside of scheduled class time is required. The practicum includes coaching support for the candidates.

Prerequisite(s)/Corequisite(s): ELED, ELED SPED and ECI majors have a prerequisite of TED 2300. SED majors will be permitted only with TED 2380 as a corequisite. Not open to non-degree graduate students.

TED 2500 DIGITAL CITIZENSHIP (3 credits)

The course is an introduction to the basic tenets of digital citizenship including legalities, ethics, privacy and security. The course fosters an awareness of digital citizenship as a topic that impacts pedagogy and programming and reflects best practice in all types of learning communities.

TED 2800 SCIENCE EXPERIMENTATION AND ENGINEERING DESIGN (4 credits)

Science Experimentation and Engineering Design (SEED) is a general science course that introduces STEM (Science, Technology, Engineering, and Mathematics) concepts and their applications through student-developed experiments using high-altitude balloon platforms. The Scientific Method and Engineering Design Process are central to the students' experiences and work in this course, as the course models the interdisciplinary connectedness of academic fields. Students will study and work in active, experiential learning environments through all phases of the near-space experiments: conceptualization, design, launch, data analysis, and reporting. (Cross-listed with STEM 2800).

Distribution: Natural/Physical Sci General Education lecture&lab

TED 3000 SPECIAL PROJECTS (1-3 credits)

This course allows offerings with a broad (PK-12) multigrade application. Study is often field-based and is conducted as a short course, seminar, or special project.

TED 3050 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)

This course is designed to enhance candidates' understanding of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs) in the U.S. context. As dedicated practitioners, reflective scholars, and responsible citizens, students will have knowledge of factors that contribute to an effective multicultural and multilingual learning environment. TED 3050 includes an in school, guided practicum. Candidates must demonstrate competencies related to teaching English Learners (ELs) in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education. (Cross-listed with TED 8055).

Prerequisite(s)/Corequisite(s): TED 2300 (EDUC 2010) OR TED 2380; and TED 2050.

TED 3350 TEACHING AND ASSESSING READING IN ELEMENTARY SCHOOLS (6 credits)

This course provides an introduction to reading theories, foundational principles such as phonemic awareness, phonics, vocabulary, comprehension, fluency, effective instructional practices, and reading assessment and evaluation as they relate to improving K-6 student learning. It includes consideration of emergent and content area literacy, and students' learning needs and cultures.

Prerequisite(s)/Corequisite(s): EDUC 2510 or EDUC 2520 or TED 2400; co-requisites of TED 4330 and TED 4340, 2.75 NU GPA and passing Praxis Core scores (Math, Reading, and Writing)

TED 3550 SECONDARY CLASSROOM MANAGEMENT (3 credits)

This is a general methods course required of all candidates preparing to teach at the secondary level. Candidates will apply educational sequence competencies in understanding the characteristics of effective teachers by learning how to apply the three components of effective pedagogy: 1) use of instructional strategies, 2) use of classroom management strategies, and 3) effective classroom curriculum design. Candidates will also examine the changing role of the secondary school and selected professional issues in secondary education and be able to apply key ideas of classroom management. Candidates must demonstrate competencies related to performance in 7-12 classrooms. This is the third in a series of four required practicum experiences prior to the clinical practice semester.

Prerequisite(s)/Corequisite(s): EDUC 2510 or EDUC 2520 or TED 2400; co-requisite TED 3690, 2.75 NU GPA and passing Praxis Core scores (Math, Reading, and Writing)

TED 3690 LITERACY AND LEARNING (3 credits)

This course examines ways in which reading and writing can facilitate student learning in content areas studies (e.g., science, social studies, physical education, art, music, and math). The main focus is on teaching practices that engage students and contribute to their learning, integrating their background knowledge and cultural experiences with content area literacy. (Cross-listed with TED 8695).

Prerequisite(s)/Corequisite(s): EDUC 2510 or EDUC 2520 or TED 2400; co-requisite TED 3550. 2.75 NU GPA and passing Praxis Core scores (Math, Reading, and Writing)

TED 3750 TEACHING GRAMMAR IN CONTEXT (3 credits)

This course is an analysis of the integration of grammar throughout the writing process and the most effective contexts for and means for teaching grammar. The emphasis is on the application in the secondary school English classroom, on the development of teaching materials for the classroom, and on appropriate methodology for grammar instruction.

Prerequisite(s)/Corequisite(s): EDUC 2510 or EDUC 2520 or TED 2400.

TED 3760 ADULT SERVICES, PROGRAMMING, AND OUTREACH IN LIBRARIES (3 credits)

This course examines best practices related to serving adult populations in 21st Century libraries and information agencies. Candidates will examine the characteristics of diverse adult populations and design resources, programming, and services to meet their personal and professional needs.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

TED 4000 SPECIAL METHODS IN THE CONTENT AREA (3 credits)

This course is designed to develop knowledge, skills, and dispositions requisite of teachers. Course content is determined by the discipline area. For some content areas a field experience will be required. This is an in-school, guided practicum completed in conjunction with TED 4000 math, science, language arts, world languages, Business, Information Technology, ESL and social studies sections. Candidates must demonstrate competencies related to performance in 7-12 classrooms. This is the final practicum experience prior to the clinical practice semester. (Cross-listed with TED 8006).

Prerequisite(s)/Corequisite(s): TED 3690 and TED 3550. 2.75 NU GPA and passing Praxis Core scores (Math, Reading, and Writing).

TED 4120 READING & WRITING IN ELEMENTARY CONTENT AREAS (3 credits)

This course is designed to enhance candidates' knowledge of best practices in teaching reading and writing in the content areas (science, social studies, math, art, music). Candidates will learn about teaching practices that engage elementary students and contribute to their learning, integrating their background knowledge and cultural experiences with content area literacy. This course will inform candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

Prerequisite(s)/Corequisite(s): EDUC 2510 or EDUC 2520 or TED 2400.

TED 4220 FINAL PRACTICUM IN EARLY CHILDHOOD EDUCATION (3 credits)

TED 4220 is an in-school guided practicum taken at the end of ECE program coursework. Candidates must demonstrate competencies related to performance in pre-kindergarten education. This is the last practicum course prior to the clinical practice semester.

Prerequisite(s)/Corequisite(s): Completion of ELEM/ECE undergraduate courses: TED 2250, TED 2310, TED 4250, TED 4260, TED 4280, TED 4290. 2.75 NU GPA and passing Praxis Core scores (Math, Reading, and Writing). Not open to non-degree graduate students.

TED 4250 GUIDANCE OF YOUNG CHILDREN (3 credits)

This course will provide an overview of social and emotional development of the young child and an investigation of effective and appropriate guidance techniques as they relate to ages three to eight. Candidates will explore relationship-based approaches to guiding children and building caring and trusting classroom communities.

Prerequisite(s)/Corequisite(s): TED 2250 and TED 2300 (EDUC 2010), 2.75 NU GPA and passing Praxis Core scores (Math, Reading, and Writing)

TED 4260 LANGUAGE AND LITERACY IN EARLY CHILDHOOD EDUCATION (3 credits)

This course is designed for teacher candidates who are preparing to teach children from three to eight years of age, with particular emphasis on the language and literacy development of the young child and appropriate curriculum. Particular attention will be given to the role of the teacher as a dedicated practitioner in the early learning environment.

Prerequisite(s)/Corequisite(s): TED 2250 and TED 2300 or EDUC 2010. 2.75 NU GPA and passing Praxis Core scores (Math, Reading, and Writing). Not open to non-degree graduate students.

TED 4290 INQUIRY IN EARLY CHILDHOOD SCIENCE AND MATHEMATICS EDUCATION (3 credits)

This course is designed to educate teacher candidates about developing early mathematics and science foundations in young children (ages 3-8) with emphasis on inquiry-based teaching, learning, and assessing strategies.

Prerequisite(s)/Corequisite(s): TED 2250 and TED 2300 or EDUC 2010. 2.75 NU GPA and passing Praxis Core scores (Math, Reading, and Writing). Not open to non-degree graduate students.

TED 4310 ASSESSMENT AND CLASSROOM MANAGEMENT FOR THE ELEMENTARY TEACHER (3 credits)

TED 4310 studies assessment and classroom management principles, effective practices, and assessment and classroom management processes through the elementary curriculum. A practicum completed outside of scheduled class time is required.

Prerequisite(s)/Corequisite(s): TED 3350, TED 4330 and TED 4340; Co-requisites: TED 4320 and TED 4350. 2.75 NU GPA and passing Praxis Core scores (Math, Reading, and Writing). Not open to non-degree graduate students.

TED 4320 TEACHING OF SOCIAL STUDIES: ELEMENTARY (3 credits)

This course is designed to prepare elementary teacher candidates with an introduction to the issues and methods related to teaching social studies to elementary students. An in-school guided practicum is associated with this course. Candidates must demonstrate instructional and professional competencies related to performance in PK-6 classrooms. This is the final practicum experience prior to the clinical practice semester.

Prerequisite(s)/Corequisite(s): TED 3350, TED 4330 and TED 4340; co-requisite TED 4350, 2.75 NU GPA and passing Praxis Core scores (Math, Reading, and Writing)

TED 4330 TEACHING OF MATHEMATICS: ELEMENTARY (3 credits)

This course is designed to prepare elementary teacher candidates as mathematics education professionals at the elementary level. The course utilizes "hands-on" discussion and laboratory oriented activities where participants actively practice instructional topics and techniques related to the learning of mathematics at the elementary level. The course will further prepare pre-service elementary teachers to be dedicated practitioners, reflective scholars, and responsible citizens, who can meet the instructional challenges of their profession, as it relates to the student learning of mathematics in a modern and changing world.

Prerequisite(s)/Corequisite(s): MTCH 2000 and MTCH 2010; Co-requisite TED 4340 and TED 3350. 2.75 NU GPA and passing Praxis Core scores (Math, Reading, and Writing)

TED 4340 TEACHING OF SCIENCE: ELEMENTARY (3 credits)

This course is designed to give the undergraduate elementary education candidate a survey of the content of science in the elementary and middle school and a study of the methods and techniques of teaching science.

Prerequisite(s)/Corequisite(s): EDUC 2510 or EDUC 2520 or TED 2400; Co-requisite TED 4330 and 3350. 2.75 NU GPA and passing Praxis Core scores (Math, Reading, and Writing)

TED 4350 TEACHING OF READING AND LANGUAGE ARTS (6 credits)

This course is designed to prepare elementary teacher candidates as educators of reading and the other language arts. Teacher candidates will implement appropriate strategies and assessments in a practicum experience that demonstrate knowledge and dispositions appropriate for teaching reading and language arts to all students. This course will prepare pre-service elementary teacher candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

Prerequisite(s)/Corequisite(s): TED 3350, 4330 and 4340; co-requisite of TED 4320, 2.75 NU GPA and passing Praxis Core scores (Math, Reading, and Writing)

TED 4370 TEACHING AT THE MIDDLE LEVEL (3 credits)

This course will provide candidates with a variety of middle level teaching techniques and strategies in their classrooms that have been identified in current research literature as appropriate for the middle level. This course is designed to introduce candidates to the unique characteristics of the middle student, school, curriculum, history, and philosophy. (Cross-listed with TED 8376).

Prerequisite(s)/Corequisite(s): TED 2300 or EDUC 2010 or TED 2380.

TED 4570 LIBRARY SCIENCE CAPSTONE (3 credits)

Candidates will gain direct experience and an understanding of the theories, concepts and activities integral to public services, technical services, and the administration in a 21st Century library and information agency at an assigned field site. Candidates will demonstrate the ability to plan, develop, and implement programming and services for patrons and diverse learners in their public, academic and special libraries.

Prerequisite(s)/Corequisite(s): There are no specific course prerequisites for the Capstone Practicum but students must be in the final two semesters of their Library Science Education Program.

TED 4590 TEACHING AND LEARNING IN DIGITAL ENVIRONMENTS (3 credits)

This course provides foundational knowledge about tools and technologies for use with all types of educational scenarios. Course content will include information about many different types of learners and literacies and will explore instructional tools and strategies that enhance dissemination of digital information and digital instruction.

TED 4600 CLINICAL PRACTICE AND SEMINAR: ELEMENTARY OR SECONDARY LEVEL (12 credits)

A supervised teaching experience under the direction of university faculty/supervisor and a classroom teacher in the candidate's teaching area.

Prerequisite(s)/Corequisite(s): Candidates must complete all course work, have a minimum cumulative GPA of 2.75, passing Praxis Core scores (Math, Reading, and Writing), and be accepted into Clinical Practice.

TED 4610 TEACHING OF WRITING THROUGHOUT THE CURRICULUM (3 credits)

This course is designed to enhance candidates' knowledge of best practices in teaching writing. Candidates will learn about research supported appropriate writing instruction strategies and assessments. Candidates will be writing extensively throughout the course as they examine the varied ways writing extends throughout the curriculum. This course will inform candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

Prerequisite(s)/Corequisite(s): EDUC 2510 or EDUC 2520 or TED 2400.

TED 4630 INSERVICE STUDENT TEACHING: ELEMENTARY AND SECONDARY (3 credits)

Designed as an additional student teaching experience for in service teachers and students seeking certain additional certificates. Candidates must successfully complete an intermediate level field experience prior to student teaching.

Prerequisite(s)/Corequisite(s): Permission. Application is made in the Office of Student Services.

TED 4640 K-12 CLINICAL PRACTICE AND SEMINAR ELEMENTARY/SECONDARY (12 credits)

A supervised teaching experience designed for students seeking certification in art, music, physical education, and library media in the K-12 preparatory program.

Prerequisite(s)/Corequisite(s): Candidates must complete all course work and obtain a minimum overall (cumulative) consistent GPA of 2.75, passing Praxis Core scores (Math, Reading, and Writing) and be accepted into student teaching.

TED 4644 CLINICAL PRACTICE ORIENTATION (0 credits)

This experience provides an introduction to clinical practice.

Prerequisite(s)/Corequisite(s): Candidates must have complete all course work, obtained a minimum overall (cumulative) consistent GPA of 2.75, and been accepted into Clinical Practice.

TED 4650 CLINICAL PRACTICE AND SEMINAR: ELEMENTARY OR SECONDARY LEVEL (6 credits)

A supervised teaching experience under the direction of university faculty/supervisor and a cooperating teacher in the candidate's teaching area.

Prerequisite(s)/Corequisite(s): Candidates must complete all course work, have a minimum cumulative GPA of 2.75, passing Praxis Core scores (Math, Reading, and Writing) and be accepted into Clinical Practice. Co-requisite of the course SPED 4700.

TED 4660 YOUNG ADULT LITERATURE (3 credits)

This course extends candidates' knowledge of literature for young adults. The course addresses current trends in the genre and engages candidates in activities that support pedagogies in basic, visual, information and cultural literacies.

TED 4700 EDUCATION CAPSTONE (3-6 credits)

This course is designed to provide individual and experiential learning in a supervised setting of a selected educational environment outside of the traditional P-12 classroom setting. The candidate will be introduced to the educational practices and roles in an environment that allows for integration of educational theory and practice.

Prerequisite(s)/Corequisite(s): Completion of, or current enrollment in, Professional Education Core courses, GPA of 2.5, no grade below a C in required courses, and permission of Teacher Education Department Chair.

TED 4710 RESEARCH AND INQUIRY (3 credits)

Candidates will demonstrate an understanding of the theories, concepts and activities integral to reference resources and services in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of effective search strategies and efficient use of both print and digital resources, design and promote information literacy instruction that is developmentally appropriate, and understand the legal and ethical responsibilities integral to positive and proactive reference services for patrons and diverse learners.

TED 4720 SPECIAL LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the major types of 21st Century special libraries and information agencies. Candidates will demonstrate an understanding of social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the special libraries and information agencies. (Cross-listed with TED 8726).

TED 4740 MANAGEMENT OF INFORMATION RESOURCES IN LIBRARIES (3 credits)

This course addresses basic theory and best practice in collection management, descriptive and subject cataloging, and classification of information resources using national standards and resources. Course will address the theories, concepts and activities integral to proactive collection development in 21st Century libraries. Candidates will demonstrate understanding of the legal and ethical aspects of the collection and organization of information resources by appropriately applying the standards of their discipline to ensure access to information and ideas for all patrons.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

TED 4760 MANAGING COLLECTIONS IN LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the theories, concepts and activities integral to proactive collection management in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of community analysis, collection analysis, and the ability to conduct critical evaluations of a diverse array of information resources.

TED 4800 LEADERSHIP AND MANAGEMENT IN LIBRARIES (3 credits)

The course introduces concepts for effective leadership and management for 21st Century libraries of all kinds (special, public, academic, and school). Candidates will be introduced to vocabulary, philosophies, and processes involved in administration of libraries in support of ensuring quality service to all library patrons. Candidates will be introduced to professional ethics and principles and will be made aware of best practices in management of library services and facilities.

Distribution: Writing in the Discipline Single Course

TED 4810 PRINCIPLES AND PHILOSOPHY OF INTEGRATING CAREER AND ACADEMIC EDUCATION (3 credits)

This course presents the philosophies and principles/practices underlying how schools can better prepare students for the workplaces of the future with emphasis on the integration of career education within broader academic preparation. The roles and responsibilities of teachers, counselors, and administrators in implementing integrated approaches will be examined. (Cross-listed with TED 8816).

TED 4850 COORDINATION TECHNIQUES IN WORK-BASED LEARNING (3 credits)

This course reviews responsibilities and techniques of coordination for the work-based learning teacher-coordinator and/or work-based learning coordinator, with special emphasis on administration of the part-time cooperative program and analysis of the laws and regulations governing this program. (Cross-listed with TED 8856).

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change.

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year. Information based on 2021-2022 University of Nebraska at Omaha undergraduate catalog.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

2.5 minimum GPA to remain in College of Education, 2.5 minimum GPA to apply to Educator Preparation Program, 2.75 minimum GPA to progress in Educator Preparation Program

Professional education course: a grade of C or higher is required to pass the class

Graduation Requirements: 2.75 minimum NU GPA

Education - Elementary Education, Bachelor of Science

Candidates completing the elementary education program are eligible for initial teacher certification and endorsement to teach in K-6 classrooms. The program of study is divided into five areas: General Education, Professional Education Sequence, Related Content Courses, Elementary Professional requirements, and a concentration area. The concentrations enhance the knowledge, skills, and marketability of the prospective teacher.

Requirements

Courses Required for Major (Core Curriculum)

Code	Title	Credits
Related Content Courses		
Candidates must complete coursework in the following related content courses:		
MTCH 2000	MATHEMATICS FOR ELEMENTARY TEACHERS I	3
MTCH 2010	MATHEMATICS FOR ELEMENTARY TEACHERS II	3
Professional Education Sequence		
TED 2100	EDUCATIONAL FOUNDATIONS	3
TED 2200	HUMAN RELATIONS FOR BIAS-FREE CLASSROOMS	3
TED 2300	HUMAN GROWTH AND LEARNING	3
TED 2400	PLANNING FOR EFFECTIVE TEACHING	6

Elementary Professional Requirements

Candidate for a degree or teaching endorsement must complete the following Elementary Professional requirements:

SPED 3800	DIFFERENTIATION AND INCLUSIVE PRACTICES	3
HEKI 2400	HEALTH ED. & PHYSICAL ED. FOR THE ELEMENTARY SCHOOL TEACHER	3
TED 2360	CHILDREN'S LITERATURE	3
TED 3350	TEACHING AND ASSESSING READING IN ELEMENTARY SCHOOLS	6
TED 4310	ASSESSMENT AND CLASSROOM MANAGEMENT FOR THE ELEMENTARY TEACHER	3
TED 4320	TEACHING OF SOCIAL STUDIES: ELEMENTARY	3
TED 4330	TEACHING OF MATHEMATICS: ELEMENTARY	3
TED 4340	TEACHING OF SCIENCE: ELEMENTARY	3
TED 4350	TEACHING OF READING AND LANGUAGE ARTS	6
TED 4600	CLINICAL PRACTICE AND SEMINAR: ELEMENTARY OR SECONDARY LEVEL	12

Concentration Area

Select a concentration area 12-17

Optional Endorsement

A candidate in elementary education may elect to complete an additional endorsement program, instead of or in addition to a concentration.

English as a Second Language Concentration

Code	Title	Credits
TED 2050	INTRODUCTION TO TEACHING ENGLISH AS A SECOND LANGUAGE	3
TED 2060	EQUITY, LANGUAGE, AND CULTURAL LITERACY	3

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year. Information based on 2021-2022 University of Nebraska at Omaha undergraduate catalog.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

2.5 minimum GPA to remain in College of Education, 2.5 minimum GPA to apply to Educator Preparation Program, 2.75 minimum GPA to progress in Educator Preparation Program

Professional education course: a grade of C or higher is required to pass the class

Graduation Requirements: 2.75 minimum NU GPA

Family and Community (non-certification education option)

Freshman

Fall

ENGL 1150	ENGLISH COMPOSITION I	3
CMST 1110 or CMST 2120	PUBLIC SPEAKING FUNDS or ARGUMENTATION AND DEBATE	3
MATH 1220 or MATH 1530 or MATH 1120 or MATH 1130	COLLEGE ALGEBRA or INTRODUCTION TO APPLIED PROBABILITY AND STATISTICS or INTRODUCTION TO MATHEMATICAL AND COMPUTATIONAL THINKING or QUANTITATIVE LITERACY	3
Social Science		3
Humanities and Fine Arts		3
Attend welcome events; other campus events		
Advising appointment for spring: Sept. - Oct.		
Credits		15

Spring

ENGL 1160	ENGLISH COMPOSITION II	3
TED 2250	INTRODUCTION TO EARLY CHILDHOOD EDUCATION	3
Social Science		3
Natural/Physical Science with Lab		4
Global Diversity		3
Advising appointment for fall: February - March		
Join student group		
Given number of elective hours needed, explore adding minor to degree; this is a chance for a student to customize their program of study to their career goals.		
Credits		16

Sophomore

Fall

SPED 1500	INTRODUCTION TO SPECIAL EDUCATION	3
TED 2100	EDUCATIONAL FOUNDATIONS	3
TED 2200	HUMAN RELATIONS FOR BIAS-FREE CLASSROOMS	3
Natural/Physical Science without Lab		4
Social Science		3
Advising appointment for spring: Sept. - Oct.		
Gain employment or volunteer work with populations that serve children, families, youth, individuals with disabilities, etc. in the community/nonprofit sector.		
Apply to Family & Community, non-teacher certification program by fall deadline; Oct. 1.		
Credits		16

Spring

TED 2300	HUMAN GROWTH AND LEARNING	3
TED 2310	FAMILY-CENTERED PARTNERSHIPS	3
TED 2050	INTRODUCTION TO TEACHING ENGLISH AS A SECOND LANGUAGE	3

Humanities and Fine Arts		3
Elective #1 to reach 120 credit hours		3
Advising appointment for fall: February – March.		
Credits		6
Junior		
Fall		
SPED 4010	MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS	3
TED 2060	EQUITY, LANGUAGE, AND CULTURAL LITERACY	3
TED 2350	PLAY IN EARLY CHILDHOOD INCLUSIVE EDUCATION	3
Family & Community Core course. Pick from approved list. #1 of 5 ¹		3
Elective #2 to reach 120 credit hours		3
Advising appointment for spring: Sept. - Oct.		
Visit Academic & Career Development Center for resume/cover letter building and editing		
Begin to identify where you would like your community internship to be.		
Credits		15
Spring		
TED 2500	DIGITAL CITIZENSHIP	3
Family & Community Core course. Pick from approved list. #2 of 5 ¹		3
Family & Community Core course. Pick from approved list. #3 of 5 ¹		3
Elective #3 to reach 120 credit hours		3
Elective #4 to reach 120 credit hours		2
Advising appointment for fall: February – March		
IF applying to graduate school, prepare to apply to graduate schools in summer prior to senior year: Take GRE exam junior summer, write personal statement, update resume, get application process organized, and think about who would write letters of recommendation.		
Credits		14
Senior		
Fall		
SPED 4800 or COUN 2020	SOCIAL AND EMOTIONAL DEVELOPMENT OF CHILDREN AND YOUTH or INTRODUCTION TO COUNSELING THEORY AND PSYCHOTHERAPY	3
Family & Community Core course. Pick from approved list. #4 of 5 ¹		3
Elective #5 to reach 120 credit hours		3
Elective #6 to reach 120 credit hours		3
Advising appointment for spring: Sept. - Oct.		
Submit internship application by September 15. Must have internship finalized and internship forms signed and submitted to advising office (Roskens Hall 204) by November 1st.		
Attend internship orientation in late November/early December.		

IF applying to a graduate program, prepare to submit graduate school applications by December or prior to university deadline. Ask for letters of recommendation in October.

Credits		12
Spring		
TED 4700	EDUCATION CAPSTONE	6
Family & Community Core course. Pick from approved list. #5 of 5 ^{3 1}		3
Elective #7 reach 120 credit hours		3
Apply for graduation by deadline.		
Credits		12
Total Credits		121

¹ Family & Community Core Classes (pick 5 from list) : HEKI 2400, HEKI 3090, PHHB 4650, PHHB 3310, ACCT 2000, CMST 2010 or CMST 2410, CMST 4150, CMST 4160, SOWK 1500, PA 3500, COUN 2020

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

The BS in Elementary Education – Family & Community Concentration does not lead to teacher certification. Students in the Teacher Education Department have the flexibility to earn an education degree without pursuing teacher certification. Students will complete 120 credit hours of coursework including a capstone course with 270-hour internship (TED 4700 Education Capstone). Flexibility exists for minor programs and elective credits. For list of approved Family & Community concentration courses, view the current degree worksheet and program website here: <https://www.unomaha.edu/college-of-education/student-services/certification/non-cert-education.php>

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year. Information based on 2021-2022 University of Nebraska at Omaha undergraduate catalog.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>
**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements: 2.5 cumulative and major GPA

Graduation Requirements: Students must have a cumulative and major GPA of at least 2.5, no grade lower than "C" in required courses, and no incomplete in required courses to be recommended for graduation.

Education - Library Science, Bachelor of Science

The library science program is designed to prepare candidates for employment in 21st century public, academic and special libraries, and information agencies. The library science courses engage candidates in classroom, field site, and service experiences that support the development of the personal, professional and technical skills and dispositions required to work effectively with patrons in today's diverse communities.

This roadmap is a suggest, * plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change.

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year. Information based on 2021-2022 University of Nebraska at Omaha undergraduate catalog.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

2.5 minimum GPA to remain in College of Education
Professional education course: a grade of C or higher is required to pass the class

Graduation Requirements: 2.5 minimum NU GPA

Education - Secondary Education, Bachelor of Science

The program in secondary education is designed to prepare candidates to meet Nebraska requirements for a related (5-9, 6-12 or 7-12) level teaching certificate or a PK-12 teaching certificate. The coursework for a Secondary Education Endorsement is divided into four areas: General Education, Endorsement Content, Professional Education Sequence, and Secondary Professional requirements. Secondary candidates must select one of the approved endorsement areas.

Requirements

A candidate for a degree and/or teaching endorsement in grades 6-12 or 7-12 must complete the following course requirements:

Code	Title	Credits
TED 3550	SECONDARY CLASSROOM MANAGEMENT	3
TED 3690	LITERACY AND LEARNING	3
TED 4000	SPECIAL METHODS IN THE CONTENT AREA	3
TED 4600	CLINICAL PRACTICE AND SEMINAR: ELEMENTARY OR SECONDARY LEVEL	12

Total Credits 21

Courses Required for Major (Core Curriculum)

Code	Title	Credits
Professional Education Sequence		
TED 2100	EDUCATIONAL FOUNDATIONS	3
TED 2200	HUMAN RELATIONS FOR BIAS-FREE CLASSROOMS	3
TED 2400	PLANNING FOR EFFECTIVE TEACHING	6

TED 2380	DEVELOPMENT AND LEARNING IN ADOLESCENCE	3
----------	---	---

Total Credits 15

A candidate for a degree and/or teaching endorsement in grades K-12 must complete the following course requirements:

Code	Title	Credits
SPED 3800	DIFFERENTIATION AND INCLUSIVE PRACTICES	3
TED 4640	K-12 CLINICAL PRACTICE AND SEMINAR ELEMENTARY/SECONDARY	12
TED 4650	CLINICAL PRACTICE AND SEMINAR: ELEMENTARY OR SECONDARY LEVEL ¹	6

Methods within their content area

Total Credits 21

¹ Must take with SPED 4700.

Inclusive Practices

Code	Title	Credits
SPED 4010	MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS	3
SPED 4150	READING AND WRITING INSTRUCTION FOR STUDENTS WITH DISABILITIES	3
SPED 4710	INTERACTIONS AND COLLABORATION	3
SPED 4810	BEHAVIOR INTERVENTIONS AND SUPPORTS	3

Total Credits 12

Middle Level 4-9

Candidates are required to complete two teaching content areas as part of the middle grades endorsement program. Candidates must select their two content subjects from the areas of: mathematics, science, social studies, and language arts. **One of the choices must be either mathematics or science.** All content areas will be a minimum of 24 credit hours each. (See an academic adviser for a listing of the required courses for each teaching content area.) Each content area will also include a course in methods for that particular discipline. Clinical Practice is required and will be completed in a middle grades setting.

Code	Title	Credits

PSYC 4640	PERSONNEL PSYCHOLOGY	

Total Credits 63

Endorsements Offered

Candidates seeking 5-9, 6-12, 7-12 or PK-12 certification must complete one of the endorsements below.

- Art (PK-12) Endorsement (p. 558)
- Biology (7-12) Endorsement (p. 559)
- Business, Marketing, Information Technology (BMIT) (6-12) Endorsement (p. 560)
- Chemistry (7-12) Endorsement (p. 561)

- Secondary English (7-12) with ESL Supplemental Endorsement (p. 564)
- Secondary English (7-12) with Additional Subject Endorsement (p. 565)
- World Language - French (7-12) Endorsement (p. 565)
- World Language - German (7-12) Endorsement (p. 567)
- Language Arts/English (7-12) Endorsement (p. 563)
- Mathematics (6-12) Endorsement (p. 568)
- Middle Level (5-9) Endorsement (p. 569)
- Music (PK-12) Endorsement (p. 572)
- Physics (7-12) Endorsement (p. 572)
- Physical Education (PK-12) Endorsement (p. 573)
- Physical Education (7-12) and Health (7-12) Endorsement (p. 575)
- Science (7-12) Endorsement (p. 576)
- Social Science (7-12) Endorsement (p. 578)
- World Language - Spanish (7-12) Endorsement (p. 579)

Dual Endorsement Programs Offered

Candidates may elect to complete a second endorsement as part of their secondary education program. These dual endorsements require two semesters of clinical practice (student teaching) and result in two teaching endorsements on the Nebraska teaching certificate. The following dual endorsements are available.

- Deaf/Hard of Hearing (7-12) Endorsement (p. 581)

Supplemental Endorsements Offered

Supplemental endorsements are content areas which can be added to a Nebraska teaching certificate in the presence of other earned endorsements. A supplemental endorsement cannot stand alone on an initial teaching certificate. The following supplemental endorsements are available.

- Coaching (7-12) Endorsement (p. 583)
- English as a Second Language (7-12) Endorsement (p. 583)
- Information Technology (PK-12) Endorsement (p. 583)

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan: The BS in Secondary Education – Youth & Training Concentration does not lead to teacher certification. Students in the Teacher Education Department have the flexibility to earn an education degree without pursuing teacher certification. Students will complete 120 credit hours of coursework including a capstone course with 270-hour internship. Flexibility exists for minor programs and elective credits. For list of approved Youth & Training concentration courses, view the current degree worksheet and program website here: <https://www.unomaha.edu/college-of-education/student-services/certification/non-cert-education.php>

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. Fall		Credits
ENGL 1150	ENGLISH COMPOSITION I	3
MATH 1220	COLLEGE ALGEBRA	3
BIOL 1450	BIOLOGY I	5
Social Science		3
Attend Welcome Week events; other campus events		
Advising appointment for spring: Sept. - Oct.		
Note: ENGL 1150, ENGL 1160, CMST 1110 or 2120, and approved math (Quantitative Literacy) course should be taken and passed in the first academic year		
	Credits	14

Spring

ENGL 1160	ENGLISH COMPOSITION II	3
CMST 1110	PUBLIC SPEAKING FUNDS	3
BIOL 1750	BIOLOGY II	5
Humanities and Fine Arts		3
Advising appointment for fall: February - March		
Join a student organization		
Make a plan to take the Praxis Core		
	Credits	14

Sophomore

Fall		Credits
TED 2100	EDUCATIONAL FOUNDATIONS	3

CHEM 1140	FUNDAMENTALS OF COLLEGE CHEMISTRY	4
CHEM 1144	FUNDAMENTALS OF COLLEGE CHEMISTRY LABORATORY	1
BIOL 2740	HUMAN ANATOMY AND PHYSIOLOGY I	4
Social Science		3
Advising appointment for spring: Sept. - Oct.		
Identify professional organization to get involved with. Begin resume development.		
	Credits	15

Spring

TED 2200	HUMAN RELATIONS FOR BIAS-FREE CLASSROOMS	3
BIOL 2140	GENETICS	4
CHEM 2210	FUNDAMENTALS OF ORGANIC CHEMISTRY	4
CHEM 2214	FUNDAMENTALS OF ORGANIC CHEMISTRY LABORATORY	1
Humanities and Fine Arts		3
Advising appointment for fall: February - March		
Apply to Educator Preparation Program March 1 or June 1 deadline		
	Credits	15

Junior

Fall		Credits
TED 2380	DEVELOPMENT AND LEARNING IN ADOLESCENCE	3
TED 2400	PLANNING FOR EFFECTIVE TEACHING	6
BIOL 4230	EVOLUTION	3
BIOL 3020	MOLECULAR BIOLOGY OF THE CELL	3
or BIOL 3340	or ECOLOGY	
Advising appointment for spring: Sept. - Oct.		
MUST pass PRAXIS Core by Nov 30th and have 2.75 minimum NU GPA to progress in Educator Preparation Program.		
	Credits	15

Spring

TED 3550	SECONDARY CLASSROOM MANAGEMENT	3
TED 3690	LITERACY AND LEARNING	3
BIOL 3830	BIOLOGY OF PATHOGENIC MICROORGANISMS	3
PHYS 1050	INTRODUCTION TO PHYSICS	4
PHYS 1054	INTRODUCTION TO PHYSICS LABORATORY	1
Advising appointment for fall: February - March		
	Credits	14

Summer

Social Science		3
Electives Required for Degree*		5
Advising appointment for spring: Sept. - Oct.		
MUST pass PRAXIS Core by Nov 30th and have 2.75 minimum NU GPA to progress in Educator Preparation Program.		
^May be taken in summers or other semesters before Clinical Practice. Talk to your advisor about how many credit hours of electives you need for your degree.		
	Credits	8

Senior		
Fall		
TED 4000	SPECIAL METHODS IN THE CONTENT AREA	3
GEOL 1170	INTRODUCTION TO PHYSICAL GEOLOGY	4
Humanities/Fine Arts (Global Diversity)		3
SPED 3800	DIFFERENTIATION AND INCLUSIVE PRACTICES	3
Take Praxis II- Biology: Content Knowledge #5235		
Advising appointment for spring: Sept. - Oct.		
Apply for clinical practice at beginning of fall term.		
Credits		13
Spring		
Clinical Practice		12
Apply for graduation		
Credits		12
Total Credits		120

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year. Information based on the 2021-2022 catalog.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

2.5 minimum GPA to remain in College of Education, 2.5 minimum GPA to apply to Educator Preparation Program, 2.75 minimum GPA to progress in Educator Preparation Program

Professional education course: a grade of C or higher is required to pass the class

Graduation Requirements: 2.75 minimum NU GPA

Business, Marketing, Information Technology (BMIT) (6-12) Endorsement

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change.

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year. Information based on 2021-2022 University of Nebraska at Omaha undergraduate catalog.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

2.5 minimum GPA to remain in College of Education, 2.5 minimum GPA to apply to Educator Preparation Program, 2.75 minimum GPA to progress in Educator Preparation Program

Professional education course: a grade of C or higher is required to pass the class

Graduation Requirements: 2.75 minimum NU GPA

World Language - German (7-12) Endorsement

Professional education course: a grade of C or higher is required to pass the class

Graduation Requirements: 2.75 minimum NU GPA

Middle Level (5-9) Endorsement

Candidates are required to complete two teaching content areas as part of the middle grades endorsement program. Candidates must select their two content subjects from the areas of: mathematics, science, social studies, and language arts. **One of the choices must be either mathematics or science.** All content areas will be a minimum of 24 credit hours each. (See an academic adviser for a listing of the required courses for each teaching content area.) Each content area will also include a course in methods for that particular discipline. Clinical Practice is required and will be completed in a middle grades setting.

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year. Information based on the 2021-2022 University of Nebraska at Omaha undergraduate catalog.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found

at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements: Cumulative 2.5 GPA for Educator Preparation Program initial acceptance, cumulative 2.75 GPA for formal admission and graduation.

#Professional education course: a grade of C or higher is required to pass the class.

Graduation Requirements: Students must have a cumulative GPA of at least 2.75, no grade lower than "C" in required courses, and no incomplete in required courses to be recommended for graduation.

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change.

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year. Information based on 2021-2022 University of Nebraska at Omaha undergraduate catalog.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

2.5 minimum GPA to remain in College of Education, 2.5 minimum GPA to apply to Educator Preparation Program, 2.75 minimum GPA to progress in Educator Preparation Program

Professional education course: a grade of C or higher is required to pass the class

Graduation Requirements: 2.75 minimum NU GPA

World Language - Spanish (7-12) Endorsement

Special Education and Communication Disorders

The mission of the Special Education and Communication Disorders department is to prepare dedicated practitioners, reflective scholars, and responsible citizens who are unique in their ability to facilitate, design, implement, and evaluate programs for individuals with disabilities. This is accomplished by creating opportunities for the acquisition and maintenance of knowledge, skills, and dispositions as prescribed by the Council for Exceptional Children, the Council on Academic Accreditation in Audiology and Speech-Language Pathology (for graduate program only), and state and federal regulations.

Undergraduate candidates follow a course of study with accompanying practical experiences that are grounded in theory, research, evidence-based practice, and experience. Our candidates develop essential interpersonal skills that make them valued members of collaborative, interdisciplinary teams in a variety of settings. Thus, each program of study is designed to promote problem solving skills that enable candidates to continue to broaden their skills and enhance their expertise throughout their professional career. These skills facilitate the recognition and integration of professional ethics with the individual needs and values of the communities they serve.

Accreditation

The Special Education and Communication Disorders programs are accredited by the National Council for Accreditation of Teacher Education (NCATE) and the Nebraska State Department for Education.

The undergraduate degree in communication disorders provides the fundamental prerequisite knowledge necessary for pursuing a graduate degree. The graduate degree is the minimal requirement for employment as a speech-language pathologist in Nebraska. The speech-language pathology graduate program provides candidates with the opportunity to acquire and maintain the knowledge, skills, and dispositions as prescribed by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CFCC), by the Nebraska Department of Education, by Nebraska Health and Human Services, and the National Council for Accreditation of Teacher Education (NCATE).

Students interested in becoming special education teachers must formally apply for admission to the Educator Preparation Program (EPP).

In order to be formally admitted to a program in special education and remain in good standing, a candidate must maintain an overall GPA of 2.75 or better. No grade below a "C" will be accepted in any professional education course, or any course in the specialization area.

- Application instructions (p. 535) for the Educator Preparation Program.

Requirements for Formal Admission to Communication Disorders Undergraduate Program:

Candidates interested in becoming speech-language pathologists (SLPs) or audiologists must apply for admission to the pre-professional preparation program. Application for admission and acceptance into the pre-professional program is required for continuation in preparation to become a Speech-Language Pathologist.

Minimum Requirements must be met prior to applying to the undergraduate Communication Disorders Pre-Professional Program:

- Admission to UNO and the College of Education, Health, and Human Sciences.
- Completion of the university General Education Fundamental Skills requirements (ENGL 1150, ENGL 1160, MATH 1220, CMST 1110 or CMST 2120), with a grade of "C-" or higher.
- Completion of the college requirements TED 2100 AND CDIS 4550 with a grade of "C" or higher.
- Minimum cumulative University of Nebraska system gpa of 3.0.
- Meet or exceed the minimum score requirements on all sections of the Praxis I – CORE Academic Skills for Educators Test. These are reading-156, writing-162, and mathematics-150.
- Completion of the following communication disorders courses: SPED 1500, CDIS 1400, CDIS 4380, and CDIS 4420 with a minimum gpa average of 3.0 with no grade lower than "C".

Application Procedures

Candidates meeting the above criteria must formally apply for admission to the pre-professional preparation program. Formal admission policies can be found on the website. (<https://www.unomaha.edu/college-of-education/special-education-communication-disorders/undergraduate/speech-language-pathology.php>) Deadline for applying is June 1.

Candidates planning to transfer to the communication disorders program from another college within UNO must meet all of the conditions and formally apply for admission to the communication disorders program.

Degrees Offered

- Education, Bachelor of Science (p. 589)

Programs

- Deaf/Hard Hearing (p. 593)
- Early Childhood Inclusive (p. 541)
- Special Education Dual Endorsement with Elementary Education or Secondary Education (p. 584)
- Special Education (p. 589)
- Communication Disorders (Pre-Professional Program)

Writing in the Discipline

For Writing in the Discipline, Special Education majors complete TED 2100, Communication Disorders majors complete CDIS 3200, students in the Sign

Language Interpreting concentration complete ENGL 2400, and students in the Deaf/Hard of Hearing endorsement complete TED 2100.

Education - Special Education Dual Endorsement with Elementary Education or Secondary Education, Bachelor of Science

This program is designed for candidates preparing for careers serving children and youth with disabilities. This program is part of the educator preparation program at either the elementary or secondary level. In the educator preparation program candidates must complete a dual endorsement in special education and elementary or secondary education. The preparation meets or exceeds the Council for Exceptional Children (CEC) initial level special educator preparation standards for special education teachers.

Education - Special Education, Bachelor of Science

The BSED degree certificate in Special Education allows UNO to recommend graduates for Nebraska licensure in special education.

Potential Career Opportunities/settings:

- Public School systems
- Private School systems

SPED 1110 AMERICAN SIGN LANGUAGE I (3 credits)

This is the beginning course in a five course series teaching American Sign Language. Candidates will be introduced to use of body language/mime, basic sentence types, manual alphabet, manual numbers/number systems, basic vocabulary (n=300).

Prerequisite(s)/Corequisite(s): co-requisite SPED 1114

SPED 1114 AMERICAN SIGN LANGUAGE I LAB (1 credit)

This is the co-requisite lab course for SPED 1110, American Sign Language I. Students will complete a minimum of 10 hours in the ASL Lab interacting in a small group setting with a Deaf mentor.

Prerequisite(s)/Corequisite(s): Co-requisite: SPED 1110

SPED 1120 AMERICAN SIGN LANGUAGE II (3 credits)

This is the second course in a five course series teaching American Sign Language. Candidates will continue to develop the use of body language/mime, basic sentence types, manual alphabet, manual numbers/number systems, and intermediate vocabulary (n=300).

Prerequisite(s)/Corequisite(s): Co-requisite: SPED 1124; SPED 1110 and SPED 1114 with a grade of C or higher.

SPED 1124 AMERICAN SIGN LANGUAGE II LAB (1 credit)

This is the co-requisite lab course for SPED 1120, American Sign Language II. Students will complete a minimum of 10 hours in the ASL Lab interacting in a small group setting with a Deaf mentor.

Prerequisite(s)/Corequisite(s): SPED 1110 and SPED 1114 with a grade of C or higher; Co-requisite: SPED 1120.

SPED 1500 INTRODUCTION TO SPECIAL EDUCATION (3 credits)

This course is designed to help students explore issues and perspectives related to children, adolescents, and young adults with a variety of ability and disability experiences. It provides an introduction to the historical factors, legislation, terminology, etiology, characteristics that are commonly encountered when addressing the needs of diverse students with disabilities ranging from mild, moderate to severe.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course and U.S. Diversity General Education course

SPED 2100 PROFESSIONALISM & ETHICS OF INTERPRETING (3 credits)

This survey course provides an introduction to the profession and ethics of sign language interpreting. The student learns what is expected of an interpreter (roles, functions, responsibilities) and applies this knowledge to a variety of settings. Information about the history of the profession, professional organizations, and settings where interpreters work is presented. Students will be introduced to Demand/Control Schema as a foundation for assessment ethical scenarios.

Prerequisite(s)/Corequisite(s): Minimum 2.75 GPA and/or special permission from the instructor.

SPED 2110 AMERICAN SIGN LANGUAGE III (3 credits)

This is the third course in a five course series teaching American Sign Language (ASL). Candidates will continue to develop the use of body language/mime, sentence types, and advanced-intermediate vocabulary (n=300).

Prerequisite(s)/Corequisite(s): Minimum 2.75 GPA; SPED 1120 and SPED 1124 with a grade of C or higher; co-requisite: SPED 2114.

SPED 2114 AMERICAN SIGN LANGUAGE III LAB (1 credit)

This is the co-requisite lab course for SPED 2110, American Sign Language III. Students will complete a minimum of 10 hours in the ASL Lab interacting in a small group setting with a Deaf mentor.

Prerequisite(s)/Corequisite(s): Minimum 2.75 GPA; SPED 1120 and SPED 1124 with a grade of C or higher; co-requisite: SPED 2110.

SPED 2120 AMERICAN SIGN LANGUAGE IV (3 credits)

This is the fourth course in a five course series teaching American Sign Language (ASL). Candidates will continue to develop the use of body language/mime, sentence types, and advanced vocabulary (n=300).

Prerequisite(s)/Corequisite(s): Minimum 2.75 GPA; SPED 2110 and SPED 2114 with a grade of C or higher; co-requisite: SPED 2124.

SPED 2124 AMERICAN SIGN LANGUAGE IV LAB (1 credit)

This is the co-requisite lab course for SPED 2120, American Sign Language IV. Students will complete a minimum of 10 hours in the ASL Lab interacting in a small group setting with a Deaf mentor.

Prerequisite(s)/Corequisite(s): Co-requisite SPED 2120, minimum , cumulative 2.75 GPA, SPED 2110 and SPED 2114 with a grade of C or higher, or comparable coursework and/or demonstrated proficiency.

SPED 2200 HISTORY, PSYCHOLOGY AND SOCIOLOGY OF DEAFNESS (3 credits)

This is an introductory course which surveys historical, psychological, and sociological aspects of deafness. This course introduces students to aspects of Deaf Culture and the Deaf Community. It will also examine current issues and trends and future directions in the education of children who are deaf or hard of hearing. Basic concepts, theories, research, and philosophical debates are explored through assigned readings, independent work, and classroom activities.

Prerequisite(s)/Corequisite(s): Minimum 2.75 GPA.

Distribution: U.S. Diversity General Education course

SPED 2300 SPECIAL EDUCATION LAW & INDIVIDUAL EDUCATION PROGRAMS (3 credits)

This course provides an overview of special education policy and law with an emphasis on components of individual education programs (IEPs), the special education referral process, and preparing for IEP meetings. Content knowledge will include IEP components and their function. Students will apply this knowledge to IEP component writing and development practice.
Prerequisite(s)/Corequisite(s): SPED 1500

SPED 3000 SPECIAL STUDIES (1-3 credits)

This course is designed to allow candidates to pursue independent study of a topic under the direction and guidance of a faculty member. Topics studied and the nature of the learning activities is mutually agreed upon by the candidate and instructor.

Prerequisite(s)/Corequisite(s): Permission by instructor

SPED 3020 DATA COLLECTION TECHNIQUE: ROLE IN TEACHING LEARNING PROCESS (3 credits)

This is a course on formal and informal assessment for Special Education. Candidates will learn how to collect assessment data to be used for data based decision making.

Prerequisite(s)/Corequisite(s): SPED 1500 and TED 2400, Co-requisite SPED 4640 & SPED 4000 and 2.75 NU GPA and passing Praxis Core scores (Math, Reading and Writing)

SPED 3100 ENGLISH/ASL COMPARATIVE LINGUISTICS (3 credits)

This course offers a study of the fundamental concepts of linguistics and its application to the study of American Sign Language. Candidates will compare and contrasting English and American Sign Language structure. Focus will be on the fundamental areas of linguistic inquiry, which include phonology, morphology, syntax, semantics, and the use of language. Using current research, candidates will begin to think critically about the structure of ASL and its recognition as a language. Candidates will be expected to translate between English and signed languages to deepen understanding the study of linguistics. A video will supplement the textbook by providing examples of signs/concepts discussed in the course.

Prerequisite(s)/Corequisite(s): Minimum 2.75 GPA; SPED 2120 ASL IV or comparable course work, or demonstrated proficiency.

SPED 3110 AMERICAN SIGN LANGUAGE V (3 credits)

This is the fifth course in a series teaching American Sign Language. Focus will be on cognitive processing, fingerspelling and communicating personal experiences. Students will develop translations between English and ASL to demonstrate knowledge and understanding of both languages. This course is one of many that prepares candidates to be dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world.

Prerequisite(s)/Corequisite(s): Minimum 2.75 GPA; SPED 2120 and SPED 2124 with a grade of C or higher; co-requisite: SPED 3114.

SPED 3114 AMERICAN SIGN LANGUAGE V LAB (1 credit)

This is the fifth lab course in a series teaching American Sign Language. The lab course will focus on aspects of receptive and expressive fingerspelling, numeral incorporation and classifiers of ASL. Students will demonstrate conversational skills incorporating ASL representative, descriptive and instrumental classifiers. Students will complete a minimum of 10 hours in the ASL Lab interacting in a small group setting with a Deaf mentor.

Prerequisite(s)/Corequisite(s): Minimum cumulative 2.5 GPA and SPED 2120, SPED 2124, or permission of instructor. Not open to non-degree graduate students.

SPED 3120 ACADEMIC INTERPRETING (3 credits)

In this course candidates will focus on skills required for interpreting in a variety of academic settings. Candidates will learn to produce appropriate and equivalent interpreted messages between signed and spoken communication. Candidates will observe and analyze spoken and signed language used in the classroom and in extracurricular activities. Candidates will understand the interpreter's role as part of the educational team and how that impacts their work with students. Also included will be review and deeper exploration of communication styles, modes and language used by children.

Prerequisite(s)/Corequisite(s): Minimum 2.75 GPA; SPED 3110 or special permission from the instructor. Not open to non-degree graduate students.

SPED 3130 COMMUNITY INTERPRETING (3 credits)

In this course students will learn skills in producing equivalent ASL and/or English messages in both consecutive and simultaneous interpreting. Students will interpret for adults and children moving from monologues to dialogues developing fluency, speed and accuracy. Students will continue to develop their English vocabulary, ASL vocabulary, interpreting analysis skills and strategies for team interpreting within the genres of medical and mental health, employment and vocational settings, social services, business and insurance.

Prerequisite(s)/Corequisite(s): GPA 2.75 or better and SPED 3110, or special permission from the instructor.

SPED 3140 DISCOURSE ANALYSIS AND SOCIOLINGUISTICS FOR INTERPRETERS (3 credits)

During the course students will analyze language use in spoken English and American Sign Language (ASL) so that features of language use rise to the level of explicit awareness. Students collect, transcribe, and analyze various speech activities while reading and discussing theoretical notions underlying language use.

Prerequisite(s)/Corequisite(s): Minimum 2.75 GPA; SPED 2110 and SPED 2114 or special permission from the instructor. Not open to non-degree graduate students.

SPED 3150 COGNITIVE PROCESSING IN ASL AND ENGLISH (3 credits)

This course presents practice of cognitive skills used in the process of interpreting. Skills include visualization, prediction, listening, memory, abstracting, closure, dual tasking, and processing time. Integration and application of these skills will lead to a self-monitoring process that will allow for self-assessment and commentaries on work performed. This course will prepare candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world.

Prerequisite(s)/Corequisite(s): Minimum cumulative 2.75 GPA, and SPED 2110 and SPED 2114 or instructor permission. Not open to non-degree graduate students.

SPED 3800 DIFFERENTIATION AND INCLUSIVE PRACTICES (3 credits)

This course is designed to examine characteristics of students with various learning needs and how to apply principles of Universal Design for Learning (UDL) to meet their needs in an inclusive environment. This course will expand the special education content knowledge of general education teachers so they can meet the needs of all students by planning lessons using the UDL framework. The purpose of this course is for general education teacher candidates to gain content knowledge about special education policies and procedures to utilize various educational, emotional, and social accommodations necessary to provide unique and effective educational or alternative responses for students with various learning needs.

Prerequisite(s)/Corequisite(s): TED 2400 or EDUC 2520; Minimum 2.75 GPA. Not open to non-degree graduate students.

SPED 4000 PRACTICUM IN SPECIAL EDUCATION (3 credits)

This practicum will examine special education methods, techniques and strategies used with children and youth with disabilities in a variety of K-12 school settings. Classroom practice and application of instructional planning and implementation, assessment techniques and behavior management will be emphasized. Collaboration and consultation models will also be included in this experience.

Prerequisite(s)/Corequisite(s): EDUC 2510 & EDUC 2520 or SPED 1500 & TED 2400; GPA 2.75 or higher. Co-requisites: SPED 3020 & SPED 4640. Not open to non-degree graduate students.

SPED 4010 MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS (3 credits)

This course explores the role that educators and school mental health professionals play in identifying the risk factors and warning signs of children and youth with mental health concerns. Students will understand the risk and protective factors at the individual, family, school, and community level as related to children and youth's mental health.

The course will provide an overview of externalizing and internalizing disorders as well as school-based and community-based treatments and interventions. (Cross-listed with COUN 4010, COUN 8016, SPED 8016).

Prerequisite(s)/Corequisite(s): SPED 1500 or EDUC 2510, TED 2300, Minimum 2.75 GPA. Not open to non-degree graduate students.

SPED 4040 WORKSHOP IN SPECIAL EDUCATION OR SPEECH-LANGUAGE PATHOLOGY (1-6 credits)

The purpose of this course is to provide workshops or special seminars in the area of special education and communication disorders. This course will prepare graduate candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. (Cross-listed with SPED 8046).

SPED 4110 SIGNED ENGLISH AND OTHER SYSTEMS (3 credits)

This course examines the communication methods and modes used in educational settings with people who are deaf or hard of hearing. Candidates will gain understanding and specific skills in the Auditory-Verbal approach, Total Communication, Signing Exact English, Cued Speech, Conceptually Accurate Signed English, and Oral Transliteration. Information will be shared about the latest technology and resources available to aid communication in the classroom.

Prerequisite(s)/Corequisite(s): Minimum 2.75 GPA; SPED 3110 or special permission from the instructor.

SPED 4150 READING AND WRITING INSTRUCTION FOR STUDENTS WITH DISABILITIES (3 credits)

This course is designed to provide preservice teacher candidates skills and strategies for instructing students with high incidence disabilities that struggle to acquire literacy skills. Emphasis is placed on diagnosis and assessment of specific reading and writing difficulties to determine effective instructional strategies. Instructional strategies will address modifications directed at teaching oral language, reading, writing, and spelling skills.

Prerequisite(s)/Corequisite(s): SPED 1500 and TED 2400 and 2.75 NU GPA and passing Praxis Core scores (Math, Reading and Writing). Not open to non-degree graduate students.

SPED 4180 INTERPRETING IN SPECIALIZED SETTINGS (3 credits)

This course focuses on interpreting/transliterating for special populations in a variety of specialized settings. Video relay, Deaf-Blind, Mental Health, Legal, Religious, Multi-cultural and Theatrical settings are among the specialized settings in which interpreting students will participate in additional training.

Prerequisite(s)/Corequisite(s): GPA 2.75 or better and SPED 3110 or special permission from the instructor. Not open to non-degree graduate students.

SPED 4220 TEACHING SPEECH TO THE DEAF/HARD OF HEARING (3 credits)

This course will provide an investigation of the speech skills of the deaf/hard of hearing child, preschool through high school. Current theories and practices in teaching speech will be examined. This course will also present methods for assessing speech problems in deaf/hard of hearing children, making the necessary adaptations and modifications, and integrating technology.

Prerequisite(s)/Corequisite(s): Minimum 2.75 GPA; EDUC 2510 or SPED 1500 or permission of the instructor.

SPED 4230 LANGUAGE DEVELOPMENT AND DISORDERS FOR TEACHERS (3 credits)

This course is designed to introduce the candidate to the nature and structure of language, current theories of language, normal first and second language development, language disorders, multicultural issues in language assessment, and contemporary classroom management of language deficits. The topics will be examined from an educational perspective to enhance the teachers knowledge of language and to facilitate classroom management of language deficits exhibited by exceptional children in grades pre-K through 12. (Cross-listed with SPED 8236).

Prerequisite(s)/Corequisite(s): Minimum 2.75 GPA; SPED 1500 or ECI major; TED 2300 or TED 2380 or permission of the instructor

SPED 4240 TEACHING/INTERPRETING LANGUAGE TO DEAF/HARD OF HEARING (5 credits)

This course is designed for candidates seeking to be teachers of the Deaf/Hard of Hearing or sign language interpreters. It will examine specific programs, methods, and techniques employed in fostering literacy and signacy with D/HH children from primary through secondary levels. Current theories and practices in reading and language arts instruction will be examined. This course will also present methods for assessing reading and writing, differentiating instruction, integrating technology, and collaborating with families.

Prerequisite(s)/Corequisite(s): D/HH Endorsement: minimum 2.75 GPA; SPED 2110; EDUC 2510 or SPED 1500; TED 2400. Sign Language Interpreting Concentration: minimum 2.75 GPA; SPED 2110; or permission of the instructor.

SPED 4280 TEACHING AMERICAN SIGN LANGUAGE AS A WORLD LANGUAGE (3 credits)

This course provides a hands-on experience in the design and implementation of ASL instruction and curriculum. The course will address methods, materials, program evaluation, and teaching approaches for preparing professional instructors of ASL.

Prerequisite(s)/Corequisite(s): Min 2.75 GPA & proficiency in ASL. Prof shown by one of the following: complete ASL I-V courses, personal interview w/instructor, or a min level of 3 on ASL Proficiency Interview or Sign Comm Proficiency Interview. Not open to non-degree grad students.

SPED 4310 VOICE-TO-SIGN (3 credits)

This course begins consecutively interpreting monologues from the source language (English) to the target language (ASL). Students will listen to entire English monologues, process them, analyze them, and then choose appropriate ASL to match the message. The course provides instruction on refining and enhancing voice-to-sign skills, specifically simultaneously producing equivalent ASL messages from spoken English source messages. Students will learn to sign simultaneously and consecutively when viewing video or listening to audio of native English speakers from a variety of settings.

Prerequisite(s)/Corequisite(s): Minimum GPA 2.75 or better, and SPED 3110 or special permission from the instructor.

SPED 4320 SIGN-TO-VOICE (3 credits)

This course provides instruction on refining and enhancing sign-to-voice skills, specifically simultaneous sign-to-voice transliterating and interpreting. Students will learn to voice simultaneously and consecutively when viewing video of native signers who use a variety of signing modalities to communicate. Students will develop the ability to produce an equivalent English message from ASL source messages.

Prerequisite(s)/Corequisite(s): Minimum 2.75 GPA; SPED 3110 or special permission from the instructor.

SPED 4350 TEACHING CONTENT SUBJECTS TO DEAF/HARD OF HEARING (4 credits)

This course will describe, investigate, and put into practice instructional strategies employed in developing knowledge and concepts in social studies, science, and mathematics. The scope of the course will be preschool through high school. Curricula and materials used with K-12 students who are deaf or hard of hearing will be reviewed and evaluated.

Prerequisite(s)/Corequisite(s): Minimum 2.75 GPA; EDUC 2510 or SPED 1500; TED 2400 or permission of the instructor.

SPED 4640 METHODS AND MATERIALS IN SPECIAL EDUCATION (3 credits)

This course is designed to describe the various instructional methods that have been used successfully in supporting students with disabilities in a variety of settings. This course is also intended to provide pre-service and in-service candidates with knowledge and evidence-based teaching strategies essential for modifying the learning environment and individualizing instruction for students with disabilities. In addition, teaching methods will focus on academic curriculum lesson planning, development of IEPs, selection of instructional methods and materials, and universal design for learning (UDL). (Cross-listed with SPED 8646).

Prerequisite(s)/Corequisite(s): SPED 1500, TED 2400 and 2.75 NU GPA and passing Praxis Core scores (Math, Reading and Writing); Co-requisite courses SPED 3020 & SPED 4000. Not open to non-degree graduate students.

SPED 4650 TRANSITION PLANNING (3 credits)

Curriculum oriented for teachers and related professionals to work with the career development and transition of individuals with disabilities within a multicultural and global society. Includes information for elementary through adulthood with emphasis on transition from high school to community living. (Cross-listed with SPED 8656)

Prerequisite(s)/Corequisite(s): SPED 1500. Not open to non-degree graduate students.

SPED 4700 CLINICAL PRACTICE IN SPECIAL EDUCATION (6 credits)

This course provides candidates with experience teaching students with exceptionalities. Observation, participation, and actual teaching in an individually selected placement will be a part of the candidate's involvement in this course. This course is intended for candidates who are completing a dual endorsement program (special education and another endorsement).

Prerequisite(s)/Corequisite(s): GPA minimum of 2.75 and completion of all required coursework in special education. Co-Requisite: TED 4650. Not open to non-degree graduate students.

SPED 4710 INTERACTIONS AND COLLABORATION (3 credits)

This course is offered to investigate the building blocks of collaboration. Effective interpersonal communication and collaboration skills are presented as the foundation necessary to build relationships among school personnel, families and community members. (Cross-listed with SPED 8716).

Prerequisite(s)/Corequisite(s): SPED 1500 and TED 2400 and 2.75 NU GPA and passing Praxis Core scores (Math, Reading and Writing)

SPED 4720 CLINICAL PRACTICE IN SPECIAL EDUCATION (12 credits)

This course provides candidates with a practical experience teaching students with disabilities. Observation, participation, and actual teaching in an individually selected placement will be a part of the candidate's involvement in this course.

Prerequisite(s)/Corequisite(s): GPA minimum of 2.75, Completion of all required course work in special education.

SPED 4724 SPECIAL EDUCATION CLINICAL TEACHING ORIENTATION (0 credits)

This course is the special education clinical teaching orientation that is paired with the Clinical Teaching in Special Education course.

Prerequisite(s)/Corequisite(s): GPA = 2.75 or better, Completion of all required course work in special education. Co-requisite SPED 4720 or SPED 4730

SPED 4730 ADVANCED CLINICAL PRACTICE IN SPECIAL EDUCATION (3 credits)

A second semester of special education clinical practice experience in a placement working with exceptional children. Observation, participation and actual teaching will be part of the candidate's experience.

Prerequisite(s)/Corequisite(s): GPA minimum of 2.75; SPED 4720 and permission

SPED 4740 EDUCATIONAL INTERPRETING PRACTICUM AND SEMINAR (6 credits)

The practicum candidate will work with a mentor to begin developing professional relationships while developing the ability to interpret simultaneously signed and spoken messages. Candidates will also share experiences in seminars with an instructor where discussion will focus on linguistic issues in interpretation, ethical dilemmas, and situational concerns.

Prerequisite(s)/Corequisite(s): GPA minimum of 2.75, Completion of SPED 3120, SPED 3130, SPED 4180, and SPED 4240

SPED 4760 COMMUNITY INTERPRETING PRACTICUM AND SEMINAR (6 credits)

The practicum candidate will work with a mentor in various community settings to begin developing professional relationships while developing the ability to interpret simultaneously signed and spoken messages. Candidates will also share experiences in seminars with an instructor where discussion will focus on linguistic issues in interpretation, ethical dilemmas, and situational concerns.

Prerequisite(s)/Corequisite(s): GPA minimum of 2.75, Completion of SPED 3120, SPED 3130, SPED 4180, and SPED 4240. Not open to non-degree graduate students.

SPED 4800 SOCIAL AND EMOTIONAL DEVELOPMENT OF CHILDREN AND YOUTH (3 credits)

This course is designed to prepare teacher candidates and graduate candidates with the understanding of the psychological, biological and environmental factors that affect the social-emotional development of children and adolescents. Emphasis is placed on the interaction of these factors for children with exceptional learning needs and the implications for the learning environment. (Cross-listed with SPED 8806).

Prerequisite(s)/Corequisite(s): SPED 1500 or EDUC 2510, TED 2300, Minimum 2.75 GPA

SPED 4810 BEHAVIOR INTERVENTIONS AND SUPPORTS (3 credits)

This course introduces a variety of practical interventions that teachers may use to support the positive classroom behavior of all students within a tiered model. Universal, targeted, and individualized strategies are presented. (Cross-listed with SPED 8816).

Prerequisite(s)/Corequisite(s): SPED 1500 and TED 2400 and 2.75 NU GPA and passing Praxis Core scores (Math, Reading and Writing)

SPED 4820 EARLY CHILDHOOD INCLUSIVE EDUCATION SYSTEMS, POLICY, AND ADVOCACY (1 credit)

The purpose of this course is to provide an overview of the history and perspectives of key developmental theories, laws, and policies related to inclusive early childhood education. Particular attention will be paid to culturally responsive approaches to ECIE, local, state, federal, and global policy, professional roles, ethics, and advocacy. Emphasis is on current research, theory, and evidence-based practice.

Prerequisite(s)/Corequisite(s): TED 2250. Not open to non-degree graduate students.

SPED 4830 ASSESSMENT IN EARLY CHILDHOOD INCLUSIVE EDUCATION (3 credits)

This course is designed to help students develop skills for effective and culturally responsive assessment and evaluation of infants, toddlers, and young children. Such assessment is vital for understanding developmental needs of young children, planning appropriate curriculum and interventions, identifying children's special needs, evaluating early childhood programs, and providing accountability information to funders and stakeholders.

Prerequisite(s)/Corequisite(s): Admission to Educator Preparation program, TED 2250. Not open to non-degree graduate students.

SPED 4850 HEALTH AND WELL-BEING OF INFANTS AND TODDLERS (3 credits)

This course is designed to help students gain knowledge and skills that will enable them to promote the healthy development of infants and young children. There will be an emphasis on effective and culturally responsive collaboration with families and caregivers.

Prerequisite(s)/Corequisite(s): Admission to the Educator Preparation program and TED 2250. Not open to non-degree graduate students.

SPED 4860 RESPONSIVE AND REFLECTIVE TEACHING IN EARLY CHILDHOOD (3 credits)

This course will prepare early childhood inclusive education majors to plan and deliver supports to a diverse array of young children (birth to age 8) and their families. Candidates will be trained in evidence-based practices used for promoting language, problem-solving, motor skills, adaptive behavior, play, and social/emotional growth in young children. There is an emphasis on anti-bias approaches to education, as well as educators' reflections upon their practices.

Prerequisite(s)/Corequisite(s): Admission to the Educator Preparation program, TED 2250. Not open to non-degree graduate students.

SPED 4870 PRACTICUM WITH INFANTS AND TODDLERS (3 credits)

This advanced practicum is a guided experience for candidates pursuing an emphasis in the area of Early Childhood Inclusive Education (ECIE) birth through age 3. Candidates will be required to demonstrate competencies related to promoting the development of infants and toddlers, and the skills and confidence of their families/caregivers. This is the last practicum course prior to the clinical practice semester.

Prerequisite(s)/Corequisite(s): Completion of ECIE undergraduate courses: TED 2250, TED 2350, SPED 4230, TED 4250, SPED 4830, SPED 4860; GPA 2.75 or higher. Co-requisites: TED 4210 and SPED 4850. Not open to non-degree graduate students.

Education - Special Education, Bachelor of Science

This program is designed for candidates preparing for careers serving children and youth with disabilities. This program prepares candidates to be special education teachers at the elementary or secondary level. The preparation meets or exceeds the Council for Exceptional Children (CEC) initial level special educator preparation standards for special education teachers.

Other Information**Praxis II Content Test**

All educator preparation candidates are required to receive a passing score on the Praxis II content test in each endorsement area of their preparation prior to being awarded initial teacher certification through the Nebraska Department of Education (NDE).

This link (<http://www.ets.org/praxis/ne/requirements/>) will take you to the ETS website page for the Nebraska Department of Education requirements. The page lists the Nebraska requirements for each endorsement area.

Student Organizations

Student Council for Exceptional Children (SCEC) is an organization that is dedicated to improving the educational success of individuals with disabilities. The student chapter is associated with the International Council for Exceptional Children. For more information contact Dr. Lisa Epp at lepp@unomaha.edu or Dr. Beth Leader-Janssen at eleaderjanssen@unomaha.edu.

Grade requirements in Sign Language Interpreting program

Grade of "C-" or better required in General Education Courses and electives. "C" or better is required in Related Coursework, ASL Development and Interpreting Development. The advanced writing course also requires a "C" or better.

GPA requirements in Sign Language Interpreting Program

Students must maintain a 2.5 minimum GPA to remain in the major. Once students pass ASL 2, SPED 1120/SPED 1124, a 2.5 GPA is required to meet course prerequisites.

Education - Special Education Bachelor of Science

Freshman

Fall		Credits
ENGL 1150	ENGLISH COMPOSITION I	3
MATH 1120 or MATH 1220	INTRODUCTION TO MATHEMATICAL AND COMPUTATIONAL THINKING or COLLEGE ALGEBRA	3
CMST 1110	PUBLIC SPEAKING FUNDS	3
Social Science		3
Attend Welcome Week events; other campus events		
Advising appointment for spring: Sept. - Oct.		

Note: ENGL 1150, ENGL 1160, CMST 1110 or 2120, and approved math (Quantitative Literacy) course should be taken and passed in the first academic year

		Credits	12
Spring			
ENGL 1160	ENGLISH COMPOSITION II	3	
Natural/Physical Science with Lab		4-5	
SPED 1500	INTRODUCTION TO SPECIAL EDUCATION	3	
Humanities and Fine Arts		3	
Humanities and Fine Arts		3	
Advising appointment for fall: February - March			
Join a student organization. Consider joining Student Council for Exceptional Children.			
Make a plan to take the Praxis Core			
MUST establish 2.5+ NU GPA (by end of summer courses) in order to enroll in TED 2100 & TED 2200 for fall semester			
		Credits	16-17
Sophomore			
Fall			
TED 2100	EDUCATIONAL FOUNDATIONS	3	
TED 2200	HUMAN RELATIONS FOR BIAS-FREE CLASSROOMS	3	
Social Science		3	
Humanities and Fine Arts with Global Diversity		3	
Elective for Degree		3	
Advising appointment for spring: Sept. - Oct.			
Identify professional organization to get involved with. Begin resume development.			
Apply to Educator Preparation Program Oct. 1 deadline			
		Credits	15
Spring			
TED 2300	HUMAN GROWTH AND LEARNING	3	
MTCH 2000	MATHEMATICS FOR ELEMENTARY TEACHERS I	3	
Natural/Physical Science		3	
*Elective for Degree		3	
*May be taken any summer or semester before clinical practice			
Advising appointment for fall: February - March			
Elective for Degree		2	
		Credits	14
Junior			
Fall			
TED 2400	PLANNING FOR EFFECTIVE TEACHING	6	
MTCH 2010	MATHEMATICS FOR ELEMENTARY TEACHERS II	3	
SPED 2300	SPECIAL EDUCATION LAW & INDIVIDUAL EDUCATION PROGRAMS	3	
KINS 4150	ADAPTED PHYSICAL ACTIVITY THEORY AND PRACTICE	3	
SPED 4230	LANGUAGE DEVELOPMENT AND DISORDERS FOR TEACHERS	3	
Advising appointment for spring: Sept. - Oct.			
MUST pass PRAXIS Core by Nov 30th and have 2.75 minimum NU GPA to progress in Educator Preparation Program.			
		Credits	18

Spring			
SPED 3020	DATA COLLECTION TECHNIQUE: ROLE IN TEACHING LEARNING PROCESS	3	
SPED 4640	METHODS AND MATERIALS IN SPECIAL EDUCATION	3	
SPED 4000	PRACTICUM IN SPECIAL EDUCATION	3

TED 4330	TEACHING OF MATHEMATICS: ELEMENTARY	3	
TED 4340	TEACHING OF SCIENCE: ELEMENTARY	3	
SPED 4150	READING AND WRITING INSTRUCTION FOR STUDENTS WITH DISABILITIES	3	
SPED 4010	MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS	3	
Take Praxis II- SPED #5354			
Advising appointment for spring: Sept. - Oct.			
Apply for clinical practice at beginning of fall term.			
		Credits	18
Spring			
SPED 4720	CLINICAL PRACTICE IN SPECIAL EDUCATION	12	
Apply for graduation			
		Credits	12
		Total Credits	120-121

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance. This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year. Information based on 2021-2022 University of Nebraska at Omaha undergraduate catalog.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

2.5 minimum GPA to remain in College of Education, 2.5 minimum GPA to apply to Educator Preparation Program, 2.75 minimum GPA to progress in Educator Preparation Program

Professional education course: a grade of C or higher is required to pass the class

Graduation Requirements: 2.75 minimum NU GPA

Sign Language Interpreter

Road Map designed to start in odd year (2021, 2023, etc.). Road Map will be different if starting in even year (2022, 2024, etc.)

Graduation Requirements: 2.75 minimum NU GPA

Education - Deaf/Hard of Hearing Program

This program is designed for candidates preparing for careers serving individuals who are deaf/hard of hearing. This program is part of the educator preparation program. Candidates must complete a dual endorsement program with the deaf/hard of hearing and a major in elementary or secondary education. The preparation meets the standards of the Council for Exceptional Children (CEC) for teachers of the deaf/hard of hearing.

Additional Information

Praxis II Content Test

All educator preparation candidates are required to receive a passing score on the Praxis II content test in each endorsement area of their preparation prior to being awarded initial teacher certification through the Nebraska Department of Education (NDE). This link (<http://www.ets.org/praxis/ne/requirements/>) will take you to the ETS website page for the Nebraska Department of Education requirements. The page lists the Nebraska requirements for each endorsement area.

Student Organizations

Allies for Sign Language is an organization that unites members and the Deaf / Hard of Hearing community for fellowship, friendship, and academic achievement. Allies for Sign Language promotes further the understanding of Deaf culture throughout the world. Several academic, volunteer, and social activities related to the current trends and issues in D/HH education and sign language interpreting are organized each semester for UNO students and members of the signing community. For more information, contact Dr. Julie Delkammer jdellkamiller@unomaha.edu or Mr. Jonathan Scherling, jscherling@unomaha.edu.

Total Credits		65

¹ SPED 4650 For 7-12 only.

² SPED 4720 is required for clinical practice.

Communication Disorders

The undergraduate degree in communication disorders provides the fundamental, prerequisite knowledge necessary for pursuing a graduate degree. The graduate degree is the minimal requirement for employment as a speech-language pathologist in Nebraska.

Other Information

Majors in communication disorders must maintain an overall cumulative GPA of 3.0 or better. No courses taken on a Credit/No Credit basis will be accepted for the purpose of fulfilling any of the required content, professional, or major speech-language pathology coursework. A minimum grade of "C" must be earned in all professional courses required for the Communication Disorders major. All grades of incomplete and any grades below "C" in these specific requirements must be removed. Candidates are responsible for contacting their advisor regarding said grades.

Essential skills and abilities for communication disorders majors must be demonstrated throughout the program. These include adequate vision, hearing, speech, spoken and written language, behavior/social skills, and critical thinking skills.

All candidates accepted into the communication disorders program must complete a background check. The background check must be conducted in the time frame and by the vendor determined by the College of Education, Health, and Human Sciences. The candidate is responsible for the cost of the background check.

The undergraduate degree in communication disorders is a pre-professional degree which does not lead to a certificate or endorsement in speech-language pathology to work in Nebraska schools or a license to work in Nebraska health care settings. A master's degree is required for both certification and licensure in Nebraska. Admission to a graduate program is a separate, selective process. Completion of the UNO undergraduate program does not guarantee admission to the UNO graduate program.

Student Organization

The UNO chapter of the National Student Speech-Language-Hearing Association (NSSLHA) is a pre-professional membership association for candidates interested in the study of communication sciences and disorders. For membership information, contact Mitzi Ritzman, PhD at mritzman@unomaha.edu.

Requirements

Code	Title	Credits
Content Coursework		
Candidates in speech-language pathology must take the following content coursework:		
BIOL 1020	PRINCIPLES OF BIOLOGY	4
PSYC 1010	INTRODUCTION TO PSYCHOLOGY I	3
PSYC 1020	INTRODUCTION TO PSYCHOLOGY II	3
Select one of the following:		4-5
PHYS 1110	GENERAL PHYSICS I WITH ALGEBRA	
PHYS 1050	INTRODUCTION TO PHYSICS	
CHEM 1140 & CHEM 1144	FUNDAMENTALS OF COLLEGE CHEMISTRY and FUNDAMENTALS OF COLLEGE CHEMISTRY LABORATORY	
Select one of the following:		3
PSYC 3130	STATISTICS FOR THE BEHAVIORAL SCIENCES	
STAT 3000	STATISTICAL METHODS I	
Professional Coursework		
Candidates must take the following professional education courses:		
PSYC 2500	LIFESPAN PSYCHOLOGY	3
TED 2100	EDUCATIONAL FOUNDATIONS	3
CDIS 4550	CULTURAL COMPETENCE IN SERVICE DELIVERY	3
Required Major Coursework		
Required courses for the speech-language pathology Major are:		
CDIS 1400	INTRODUCTION TO COMMUNICATION DISORDERS	3
SPED 1500	INTRODUCTION TO SPECIAL EDUCATION	3
CDIS 4380	ANATOMY AND PHYSIOLOGY	3

CDIS 4420	EARLY LANGUAGE DEVELOPMENT IN CHILDREN	3
CDIS 4390	HEARING SCIENCE	3
CDIS 4450	PHONETICS	3
CDIS 4460	LATER LANGUAGE DEVELOPMENT IN CHILDREN	3
CDIS 3200	WRITING FOR THE PROFESSION OF SPEECH-LANGUAGE PATHOLOGY	3
CDIS 4430	ARTICULATION AND PHONOLOGICAL DISORDERS	3
CDIS 4750	INTRODUCTION TO CHILDHOOD LANGUAGE DISORDERS	3
CDIS 4480	RESEARCH METHODS IN COMMUNICATION DISORDERS	3
CDIS 4490	INTRODUCTION TO PROFESSIONAL PRACTICES	3
CDIS 4500	PRINCIPLES OF ASSESSMENT AND INTERVENTION	3
CDIS 4370	BASIC AUDIOLOGY	3
CDIS 4330	AURAL REHABILITATION	3
CDIS 4470	NEUROPHYSIOLOGY OF SPEECH AND LANGUAGE	3

Elective Coursework

There is a six to nine hour requirement for hours in related elective coursework. Any related elective coursework must have adviser approval. ¹ 6-9

SPED 1110 & SPED 1114	AMERICAN SIGN LANGUAGE I and AMERICAN SIGN LANGUAGE I LAB	
SPED 1120 & SPED 1124	AMERICAN SIGN LANGUAGE II and AMERICAN SIGN LANGUAGE II LAB	
SPED 2110 & SPED 2114	AMERICAN SIGN LANGUAGE III and AMERICAN SIGN LANGUAGE III LAB	
SPED 3110 & SPED 3114	AMERICAN SIGN LANGUAGE V and AMERICAN SIGN LANGUAGE V LAB	
SPED 2200	HISTORY, PSYCHOLOGY AND SOCIOLOGY OF DEAFNESS	
GERO 2000	INTRODUCTION TO GERONTOLOGY	
GERO 3070	DEATH AND DYING	
PSYC 4020	LEARNING	
PSYC 4310	PSYCHOLOGICAL AND EDUCATIONAL TESTING	
TED 4590	TEACHING AND LEARNING IN DIGITAL ENVIRONMENTS	
TED 2500	DIGITAL CITIZENSHIP	
Electives required for admission to SLP/EPP Program		
CDIS 4510	BASIC CLINICAL PRACTICUM IN SPEECH-LANGUAGE PATHOLOGY	
TED 2360	CHILDREN'S LITERATURE	
SPED 4010	MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS	
SPED 4800	SOCIAL AND EMOTIONAL DEVELOPMENT OF CHILDREN AND YOUTH	
SPED 4810	BEHAVIOR INTERVENTIONS AND SUPPORTS	

Total Credits **80-84**

¹ NOTE: One of these electives may include CDIS 4510. Pre-professional preparation program candidates may apply to take CDIS 4510 in their senior year. Admission is selective and requires application to and permission of instructor.

College of Engineering

DESCRIPTION

Lance C. Pèrez, Ph.D., Dean

Sohrab Asgarpour, Ph.D., Associate Dean for Undergraduate Programs

Engineering Student Services

107 Peter Kiewit Institute

1110 South 67th Street
Omaha, NE 68182
402.554.3562

Website: <https://engineering.unl.edu/>

ROLE AND MISSION

The College of Engineering improves the lives of every Nebraskan. We pursue this vision through our shared values of Community, Impact, and Inclusion. These values are embedded in and strengthened by the academic ideals of the university, the ethos of Nebraskans, and the principles of the entire Nebraska Engineering Community.

Our mission is to drive economic development in the state and region while solving problems of global importance. The College of Engineering will fulfill this mission through our deep commitment to engineering, computing and construction education, research, and engagement. As the only engineering college in Nebraska, we have a particularly strong mandate to the state to ensure our resources and opportunities are accessible to all Nebraskans.

An essential and distinctive pillar of our mission is the notion of the Complete Engineer®. At its most fundamental, the Complete Engineer® is a commitment by the college to the development of every student, staff member, and faculty member in technical, professional, and personal dimensions. It enables each individual to become the best version of themselves in support of the fulfillment of the college's mission and reinforces the values of Community, Impact, and Inclusion.

ADMINISTRATIVE STRUCTURE

The College of Engineering is located on three campuses (Lincoln City Campus, Lincoln East Campus, and Scott Campus in Omaha) and has two Dean's Offices, 114 Othmer Hall (OTHM) in Lincoln and 100 Peter Kiewit Institute (PKI) in Omaha. The College is subdivided into units, each under the leadership of a chairperson, department head, or director.

ADMISSION

College Entrance Requirements

Students must have high school credit for (one unit is equal to one high school year):

1. Mathematics - 4 units: 2 of algebra, 1 of geometry, and 1 of precalculus and trigonometry
2. English - 4 units
3. Natural sciences - 3 units that must include 1 unit of physics and 1 unit of chemistry (chemistry requirement waived for students in construction management)
4. Foreign language - 2 units of a single foreign language

5. Social studies - 3 units

6. Students having a composite ACT score of 28 or greater (or equivalent SAT score) will be admitted to the College of Engineering even if they lack any one of the following: trigonometry, chemistry, or physics.

A total of 16 units is required for admission.

Students must have an ACT (enhanced) score of 24 or greater (or equivalent SAT). Students who lack entrance requirements may be admitted based on ACT scores, high school rank and credits, or may be admitted to pre-engineering status. Pre-engineering students are advised within the College of Engineering.

Students for whom English is not their language of nurture must meet the minimum English proficiency requirements of the University.

Students who lack entrance units may complete precollege training by Independent Study through the University of Nebraska-Lincoln Office of On-line and Distance Education, in summer courses, or as a part of their first or second semester course loads while in the Academic and Career Development Center at the University of Nebraska Omaha.

Students should consult their advisor, their department chair, or Engineering Student Services if they have questions on current policies.

Other Admission Requirements

Students who transfer to the University of Nebraska Omaha from other accredited colleges or universities and wish to be admitted to the College of Engineering (COE) must meet COE freshman entrance requirements, have a minimum cumulative GPA of 2.5 and be calculus-ready. Students not meeting all of these requirements must enroll in another University college until they meet COE admission requirements. Students transferring from UNO, UNL, or UNK to the College of Engineering must be in good academic standing with their institution.

The COE accepts courses for transfer from which a C or better grade was received. Although University of Nebraska-Lincoln and University of Nebraska Omaha accept D grades from the University of Nebraska Kearney, Omaha, and -Lincoln, not all majors in the COE accept such low grades. Students must conform to the requirements of their intended major and, in any case, are strongly encouraged to repeat courses with a grade of C- or less.

All transfer students must adopt the curricular requirements of the undergraduate catalog current at the time of transfer to the COE - not that in use when they entered the University of Nebraska Omaha. Upon admission to Nebraska, students wishing to pursue degree programs in the COE will be classified and subject to the policies defined in the subsequent section.

Students who were previously admitted to COE and are returning to the College of Engineering must demonstrate a cumulative GPA of 2.5 in order to be readmitted to COE.

ADVISING

Academic Advising

Advisors assigned to students are either part of the Engineering Student Services, located in 107 PKI, or are in the student's major department.

Student Responsibility

Application for the Diploma

Each student who expects to receive a diploma must file an application of candidacy for the diploma on-line on MavLINK. Announcements about deadline dates are posted on the University of Nebraska Omaha's (UNO) Academic Calendar webpage, Maverick Weekly email to students, and by an email sent by the UNO Registrar's office.

It is the responsibility of the students to inform the Registrar's Office of their graduation plans including their mailing address and the manner in which they are completing their requirements.

Failure to meet these stipulations may necessitate postponement of graduation until the next semester.

ACADEMIC PROGRAMS & POLICIES

Honors Program

Honors Societies

These recognize students who excel in scholarship and give promise of being leaders in professional areas. They are branches of national societies and are generally open upon invitation to juniors and seniors: Alpha Epsilon (agricultural engineering), Chi Epsilon (civil engineering), Eta Kappa Nu (electrical engineering), Pi Tau Sigma (mechanical engineering), Sigma Lambda Chi (construction management), Sigma Xi (scientific, all colleges), Tau Alpha Pi (engineering technology), and Tau Beta Pi (all engineering).

Student Recognition

Graduation with Distinction

GPA requirements for engineering students to graduate with levels of distinction are:

Distinction: 3.750-3.849

High Distinction: 3.850-3.949

Highest Distinction: 3.950-4.000

For engineering students to graduate with Distinction, High Distinction, or Highest Distinction, they must meet the GPA levels listed above, and be approved by a majority vote of the faculty in the department offering their respective academic program.

Student Standing/Classification/Professional Admission

Professional admission to a student's degree program is a requirement for graduation from that program.

Pre-Professionally Admitted COE Students. These are students who have been admitted to the College of Engineering and are in the process of establishing their academic credentials and confirming their choice of major. Transfer students from other colleges and universities or from the Academic and Career Development Center (ACDC) will be classified as pre-professionally admitted for at least one semester (12 credits) while they confirm their career path and establish their academic credentials (see Professional Admission). Most students are in pre-professionally admitted status for one to four semesters. Pre-professionally admitted students may enroll in upper level engineering courses provided they meet the prerequisites, space is available, and no departmental restrictions exist.

Professionally Admitted COE Students. These students may register in engineering courses where they meet all prerequisites or have permission. A professionally admitted student who wishes to transfer from one COE major to another must re-apply for Professional Admission to gain professionally admitted status in the new major, subject to the admission criteria of the new major.

Students who are enrolled in the Academic and Career Development Center or in other colleges may enroll in any engineering courses for which they have met the prerequisites. Those with greater than a 2.5 cumulative GPA may register in upper-level engineering courses, but only on a space-available basis in courses where they meet all prerequisites and have permission from the department. These students may retake an engineering course for C-, D, and F removal no more than once, on a space-available basis and with permission. They may repeat courses with a previous withdrawal (W) only once.

Professional Admission must be earned by a student in order to move from pre-professionally admitted status to professionally admitted status within the College of Engineering. Review of the student's academic history is completed by the department of the student's intended major after the student has completed at least 43 credit hours within his or her intended degree program. Additional review criteria are based on the individual degree program and can be found under that major's information in the undergraduate catalog.

A student may be reviewed up to two times for Professional Admission in a single major. If the student is rejected for Professional Admission on the second review, the student will not be allowed to continue in that major. The student may choose to pursue a new College of Engineering major, but will be subject to the review criteria of the new major. If the student is rejected for Professional Admission by the new major, the student will be dismissed from the College of Engineering. Further reviews for Professional Admission will not be allowed and the student will no longer be eligible to enroll in College of Engineering courses.

College Probation. A student who receives a cumulative grade point average (GPA) of less than a 2.4 will be placed on college probation.

The student will remain on probation until a semester is completed with a cumulative GPA at or above 2.4. Any student with three sequential semesters on college probation will be dismissed from the College of Engineering

The first semester of probation is defined as the semester in which failure to meet a cumulative or semester GPA threshold, a course failure or withdrawal, or a code of conduct violation occurs.

Completion of the following semester (12 credits) with a semester GPA above 2.4 is required for a student to be removed from the college probation. Students may be placed on college probation (or dismissed) for violation of the UNO Student Code of Conduct at any time. A student cannot graduate from the College of Engineering while on college probation.

College Dismissal. A student will be dismissed from the College of Engineering at the end of any semester in which:

- The student has been placed on college probation for three sequential semesters.
- The student is dismissed by UNO.

Students may also be dismissed for violating the University of Nebraska Omaha Student Code of Conduct at any time. College dismissal will cause an administrative change in the student's matriculation to the Academic and Career Development Center or to a college indicated by the student. Students who have been dismissed from the College of Engineering may be readmitted (one time only) provided they have removed all academic deficiencies that led to dismissal.

General College Policies

These policies are applicable to all students in the College of Engineering.

- Student priority for entrance into classes for which demand exceeds available class space will be based on cumulative GPA. This priority will be applied at the end of early registration (when applicable).
- Students may withdraw from a maximum of four engineering courses. Students may withdraw from any one engineering course a maximum of one time.
- Students may repeat a maximum of three engineering courses. Students may complete any one engineering course a maximum of two times.
- All students must have a College of Engineering advisor's, chairperson's or dean's signature on all worksheets, enrollment and drop-add forms. Any subsequent changes on these forms, or in enrollment from those courses previously approved, must also be approved by an advisor, chairperson or dean.

- At least 30 of the last 36 credits needed for a degree must be registered for and completed at UNO or UNL while identified with the College of Engineering. This means that, practically speaking, the last year of a student's work must be spent in residence. Credit earned during education abroad may be used toward degree requirements if students participate in prior approved programs and register through the University of Nebraska Omaha (see <https://www.unomaha.edu/international-studies-and-programs/study-abroad/index.php> (<https://www.unomaha.edu/international-studies-and-programs/study-abroad/>))
- Effective with the Fall semester 2011, students entering a baccalaureate program in the College of Engineering on the Omaha campus must satisfy the Achievement Centered Education (ACE) requirements of the University of Nebraska-Lincoln as part of their degree requirements.
- Credit/No Credit courses: Students in the College of Engineering must take ENGR 100 Freshman Engineering Seminar, ENGR 200 Sophomore Engineering Seminar, and ENGR 4000 Professional Ethics and Social Responsibilities with the grading option Credit/No Credit. In addition, students may take up to 12 credit hours of courses utilized for ACE 5, 6, 7, 8, or 9 on a Credit/No Credit basis, unless specified otherwise by the degree program. Students in the College of Engineering may not take any other required courses or technical elective courses with the grading option of Credit/No Credit.
- Credits for "Intensive English Program" at UNL and "English as a Second Language" at UNO are not applicable to degree programs in the College of Engineering.
- Students who enroll at UNL, UNO, or UNK under the academic year (Fall, Spring, Summer) of this catalog must fulfill the requirements stated in this University of Nebraska Omaha catalog or in any other University catalog which is published while they are enrolled in the College, provided that the catalog is no more than 10 years old at the time of graduation. A student must, however, meet the graduation requirements from one catalog only. A student may not choose a portion from one catalog and the remainder from another catalog.
- Subject to space availability, any student with a cumulative GPA less than 2.40 may enroll in AREN 1010, CNST 1310, CIVE 112, CONE 1030 and ECEN 2250 providing they have permission from the College of Engineering and their enrollment does not violate course repeat policies of the College of Engineering. Similarly, students who have College of Engineering permission, do not violate College of Engineering course repeat policies, have the appropriate course prerequisites and whose cumulative GPA is above 2.0 may enroll in, MECH 2200, MECH 3240, and ENGR 3000.

Regulations

The college and its various divisions and departments reserve the right to change the rules governing admission to, instruction in, and graduation from the college or its various divisions.

Such regulations are operative whenever the college authorities deem necessary and apply not only to prospective students but also to those currently enrolled in the college. The college also reserves the right to withdraw courses and to reassign instructors.

Prerequisites for courses offered in the college are effective even if they are not listed in the schedule. A maximum amount of credit that a student may enroll in during any semester is 18 credit hours without the Dean's permission to override the maximum.

Undergraduate Seminars. Freshmen engineering students are required to attend ENGR 100, a 0 credit course. The Freshman Engineering Seminar provides information on engineering disciplines, resources and tools available to students at the University of Nebraska Omaha, and opportunities to meet engineering faculty members. Sophomore engineering students are required to attend ENGR 200, a 0 credit course. The Sophomore Engineering Seminar provides information on

career planning, interviewing, resumé preparation, and coop/internship opportunities.

Design Requirement. All engineering majors require a minimum of 48 credit hours of engineering topics (engineering topics include subjects in the engineering sciences or engineering design). Engineering design is the process of devising a system, component, or process to meet desired needs. Engineering design work may be done by individual; however, team efforts are encouraged where appropriate. Engineering majors are provided an integrated engineering design experience throughout the curriculum. In addition, all engineering programs include a meaningful major design experience that builds upon the fundamental concepts of mathematics, basic sciences, humanities, social sciences, engineering topics, and communication skills.

CATALOG TO USE

Students must fulfill the requirements stated in the catalog for the academic year in which they are first admitted into the College of Engineering. In consultation with advisors, a student may choose to follow a subsequent catalog for any academic year in which they are admitted to and enrolled as a degree-seeking student at Nebraska in the College of Engineering. Students must complete all degree requirements from a single catalog year. The catalog which a student follows for degree requirements may not be more than 10 years old at the time of graduation.

COLLEGE DEGREE REQUIREMENTS

Appeals

Grade Appeals

In the event of a dispute involving any college policies or grades, the student should appeal to his/her instructor, and appropriate department chair or school director (in that order). If a satisfactory solution is not achieved, the student may appeal his/her case through the College Academic Appeals Committee on his/her campus.

Academic Amnesty and Appeals

The following policies shall apply for academic amnesty, appeals of course grades, and appeals of academic suspension.

Academic Amnesty

A student may remove one or more full semesters of work from degree consideration by applying to the Office of the Dean after either completing a minimum of 15 simultaneous or sequential credit hours with at least a 3.0 grade point average or 30 hours with at least a 2.5 grade point average at the University of Nebraska Omaha following the semester(s) the student wishes to remove. The application will be forwarded to the campus College Academic Appeals Committee for review and approval, if appropriate.

Appeals of Academic Suspension

Appeals of academic suspension must be filed in writing with the Office of the Dean within 21 days after official electronic notification/posting of the grades by the Registrar for the semester at the end of which the suspension was invoked. Suspended students who have filed a notice of appeal may apply to the Office of the Dean for a temporary release from suspension pending the final disposition of their appeal by the Academic Appeals Committee of the College of Engineering.

DEGREES & MAJORS

Engineering

To meet the need for innovative engineers, the College's programs offer broad education in the physical sciences, social sciences, mathematics, information sciences, and humanities. This education is complemented by study of engineering methods of modeling, analysis, synthesis, and design in students' areas of specialization. In addition to preparing students for careers in engineering, the College's bachelors degree programs provide excellent preparation for graduate study in those fields.

Construction Management

This profession is allied with architecture, engineering, and business. Construction managers coordinate people, machines, and materials to produce (within the constraints of budget and time) buildings, highways, bridges, dams, and other structures essential to modern society. The College's construction management program provides a solid technical background, develops business knowledge and considers ethical issues of the profession.

Undergraduate Programs

Engineering. The College offers bachelor of science degree programs in each of the following engineering fields: agricultural engineering (Lincoln only), architectural engineering (Omaha only), biological systems engineering (Lincoln only), chemical engineering (Lincoln only), civil engineering, computer engineering, construction engineering, electrical engineering, mechanical engineering (Lincoln only), and software engineering (Lincoln only). Over 85 percent of all the engineering degrees granted in the United States during the last five years were granted in these fields. Students with interests in specialty fields such as aerospace, environmental, or biomedical engineering should seek advice in the Engineering Student Services Center on how to incorporate such emphases into the above degree programs.

Construction Management. The College offers a bachelor of science degree program in construction management.

Dual Degrees. Students can major in two departments in the college by consulting their advisors (one from each department) and completing all the requirements for the departmental majors.

ACCREDITATION

The agricultural engineering, biological systems engineering, chemical engineering, civil engineering (Lincoln and Omaha), computer engineering (Lincoln and Omaha), construction engineering (Lincoln and Omaha), electrical engineering (Lincoln and Omaha), and mechanical engineering programs are accredited by the Engineering Accreditation Commission (EAC) of ABET, <http://www.abet.org>.

The construction management program (Lincoln and Omaha) is accredited by the American Council for Construction Education and the Applied and Natural Science Accreditation Commission (ANSAC) of ABET.

MINORS & AREAS OF SPECIALIZATION OFFERED

College faculty encourage students to minor in a discipline outside the College of Engineering to further develop critical thinking skills, curiosity, understanding of the connections between engineering and the social or natural sciences and fine arts, and sensitivity to ethical issues.

Policies

1. A minor will not reduce or alter the existing course or degree requirements for students electing to pursue a minor.
2. A student's minor program(s) must be reviewed by an advisor prior to the submission of the senior check to the department chair or head. It is the responsibility of the student to determine that all requirements for the minor are met.
3. The minor(s) must be approved by the cognizant program offering the minor(s).
4. Departments may restrict students in the major(s) from obtaining certain minor(s) at their discretion; see the catalog entry for individual majors for details.

OTHER

Dean's List

The College recognizes students for academic achievement during the fall and spring semesters by placement on the College Dean's List. To qualify

for the College of Engineering Dean's List, students must complete 12 credit hours of graded coursework (courses must be started and completed in one semester) by the census date of the grade reports and attain a minimum semester grade point average of 3.500. The following do not qualify as part of the 12 credit hours: Credit/No Credit credit, transfer hours, removals of incompletes, and grade changes submitted after the census grade reports.

Professional Licensure

The college encourages professional licensure. The majority of the College's engineering seniors take the Fundamentals of Engineering (FE) examination prior to graduation. This examination is administered by the Nebraska Board of Engineers and Architects, a state agency, and the first step in the process of becoming a licensed professional engineer. To become a licensed professional engineer, one must pass the FE exam, have four years of experience, and pass a professional practice examination. Students may take the FE exam in the last semester of their baccalaureate program.

Practical Training

For a student who anticipates pursuing a career as a practicing engineer, it is strongly recommended that the student engage in an internship or equivalent practical training experience.

Scholarships and Financial Aid

Each year the College awards scholarships to freshmen and upperclassmen worth more than \$750,000. Scholarship awards are made possible through generous gifts of alumni and friends, as well as local and national organizations. Contact the Office of the Dean or the Office of Scholarships and Financial Aid for information regarding these awards and for other financial assistance.

Application for the University of Nebraska Omaha freshmen scholarships automatically makes you eligible for College of Engineering scholarships, as well as other university awards such as the Regents scholarships. You must submit the UNO application form (due January 15, prior to the beginning of the next academic year) to be eligible.

A significant number of entering students have academic records that qualify them for university-wide scholarship awards. Each year, about 25 percent of the freshman Regent Scholarship recipients are engineering students.

A large number of students are able to find part-time employment in fields related to their interests.

Technical Societies

The technical student societies help develop a greater personal and professional interest and understanding in engineering, computer science, and construction management. Student branches of the major national technical and scientific societies are sponsored by the academic programs and departments.

Scott Campus (Omaha). Acoustical Society of America; American Society of Heating, Refrigeration and Air-conditioning Engineers; Architectural Engineering Institute; Architectural Engineering Student Leadership and Advisory Committee; Associated General Contractors of America; Earthquake Engineering Research Institute; Emerging Green Builders; Illuminating Engineering Society of North America; Mechanical Electrical Specialty Contractors; National Association of Home Builders Student Chapter; American Society of Civil Engineers; American Water Works Association/Water Environment Federation; Engineers Without Borders; Institute for Transportation Engineers; Structural Engineering Association of Nebraska; and Institute of Electrical & Electronics Engineers.

Life-Long Learning

The education of professionals in engineering and construction management is a continuing process. The groundwork in both technical and nontechnical studies is laid while in college, but education continues after graduation. For a professional, education will continue not only in the

technical areas but in areas that relate to human and social concerns. A professional may expect to take a leadership role in the community and must have a broad awareness of human and social accomplishments, needs, values, and a willingness to take the responsibility for meeting these needs. For these reasons, an integrated program of coursework in the humanities and social sciences is part of the educational requirements.

College Entrance Requirements

Students must have high school credit for (one unit is equal to one high school year):

1. Mathematics - 4 units: 2 of algebra, 1 of geometry, and 1 of precalculus and trigonometry
2. English - 4 units
3. Natural sciences - 3 units that must include 1 unit of physics and 1 unit of chemistry (chemistry requirement waived for students in construction management)
4. Foreign language - 2 units of a single foreign language
5. Social studies - 3 units
6. Students having a composite ACT score of 28 or greater (or equivalent SAT score) will be admitted to the College of Engineering even if they lack any one of the following: trigonometry, chemistry, or physics.

A total of 16 units is required for admission.

Students must have an ACT (enhanced) score of 24 or greater (or equivalent SAT). Students who lack entrance requirements may be admitted based on ACT scores, high school rank and credits, or may be admitted to pre-engineering status. Pre-engineering students are advised within the College of Engineering.

Students for whom English is not their language of nurture must meet the minimum English proficiency requirements of the University.

Students who lack entrance units may complete precollege training by Independent Study through the University of Nebraska-Lincoln Office of On-line and Distance Education, in summer courses, or as a part of their first or second semester course loads while in the Academic and Career Development Center at the University of Nebraska Omaha.

Students should consult their advisor, their department chair, or Engineering Student Services if they have questions on current policies.

Other Admission Requirements

Students who transfer to the University of Nebraska Omaha from other accredited colleges or universities and wish to be admitted to the College of Engineering (COE) must meet COE freshman entrance requirements, have a minimum cumulative GPA of 2.5 and be calculus-ready. Students not meeting all of these requirements must enroll in another University college until they meet COE admission requirements. Students transferring from UNO, UNL, or UNK to the College of Engineering must be in good academic standing with their institution.

The COE accepts courses for transfer from which a C or better grade was received. Although University of Nebraska-Lincoln and University of Nebraska Omaha accept D grades from the University of Nebraska Kearney, Omaha, and -Lincoln, not all majors in the COE accept such low grades. Students must conform to the requirements of their intended major and, in any case, are strongly encouraged to repeat courses with a grade of C- or less.

All transfer students must adopt the curricular requirements of the undergraduate catalog current at the time of transfer to the COE - not that in use when they entered the University of Nebraska Omaha. Upon admission to Nebraska, students wishing to pursue degree programs in the

COE will be classified and subject to the policies defined in the subsequent section.

Students who were previously admitted to COE and are returning to the College of Engineering must demonstrate a cumulative GPA of 2.5 in order to be readmitted to COE.

College of Engineering Programs

Architectural Engineering

- B.S. Degree Program (p. 600)

Civil Engineering

- B.S. Degree Program (p. 603)

Computer Engineering

- B.S. Degree Program (p. 615)

Construction Engineering

- B.S. Degree Program (p. 629)

Construction Management

- B.S. Degree Program (<https://catalog.unomaha.edu/undergraduate/college-engineering/construction/construction-management-bs/>)

Electrical Engineering

- B.S. Degree Program (p. 617)

First two years of:

- Agricultural Engineering (p. 623)
- Biological Systems Engineering (p. 624)
- Mechanical Engineering (p. 625)

Graduate Programs

A variety of graduate programs in engineering and construction management are available. For details on programs leading to masters and doctorate degrees, including the application process, individuals should contact the appropriate department or office of the dean in the College of Engineering. Application forms are available at <http://www.unl.edu/gradstudies> (<http://www.unl.edu/gradstudies/>).

Minors & Areas of Specializations Offered

College faculty encourage students to minor in a discipline outside the College of Engineering to further develop critical thinking skills, curiosity, understanding of the connections between engineering and the social or natural sciences and fine arts, and sensitivity to ethical issues.

Policies

1. A minor will not reduce or alter the existing course or degree requirements for students electing to pursue a minor.
2. A student's minor program(s) must be reviewed by an advisor prior to the submission of the senior check to the department chair or head. It is the responsibility of the student to determine that all requirements for the minor are met.
3. The minor(s) must be approved by the cognizant program offering the minor(s).
4. Departments may restrict students in their major(s) from obtaining certain minor(s) at their discretion; see the catalog entry for individual majors for details.

Architectural Engineering, Bachelor of Science

The architectural engineering (BSAE) undergraduate program is a four-year program requiring 129 credit hours. A one-year Master of Architectural Engineering (MAE) program of 36 credits is also offered. The MAE degree is accredited by the Engineering Accreditation Commission (EAC) of ABET, and almost all of our BSAE graduates continue to complete the MAE degree.

Educational Objectives

The following are the BSAE/MAE program educational objectives (PEOs):

1. **Professional Accomplishment:** The AE program will prepare graduates to become licensed professional engineers a few years after graduation.
2. **Career Accomplishment:** The AE program will prepare graduates to contribute to society by working in an occupation related to the built environment a few years after graduation.

Architectural engineering (AE) is the engineering design of buildings. Students have the option to specialize in either the design of:

1. building structural systems;
2. building mechanical systems and acoustics; or
3. building lighting and electrical systems.

The first three years are common to all three fields of specialization and include the math and science courses common to all engineering programs. Students take an introductory course in AE in their first semester where the students learn about the materials and systems that comprise a building, visit a construction site, and interact with their industry mentors. It provides a preview of the work they can expect to perform after graduation. This introductory course helps students decide if AE is the career path they wish to pursue.

In the second semester, the AE student begins the first of a four-course sequence of courses in AE Design and Simulation Studio. These courses familiarize the engineering student with building information technology (BIM), building systems, and how they support the design process of architects. The AE degree is keenly focused on integrating engineering concepts with architectural features to deliver aesthetic and high performing buildings. Exposure to construction is an important part of the AE student's education. It develops creativity and constructability where AE graduates enjoy a special ability to work effectively with all professionals on the design and construction team.

The AE program develops breadth and depth by requiring a good understanding of all the systems that comprise a building while also providing a specialized education in one of the areas listed above. Breadth is provided in the fifth and sixth semesters, where all students take courses in each of the three areas of specialization. Depth is provided in the seventh and eighth semesters where courses are taken primarily in one of the three specialization tracks.

A one-year master of architectural engineering degree follows the four-year undergraduate program. This fifth year continues the specialized education in each of the three option areas and provides the professional practice topics that architectural engineers need later in their careers.

The MAE year features a major interdisciplinary design project. The project requires the student to practice the design skills and understanding of building systems previously developed. Student teams complete a significant building design in a manner that closely simulates professional practice. Industry and faculty members serve as consultants to the students. Typically, students enter this design into the national Architectural Engineering Institute competition. Traditionally, our students do very well at this competition.

Career Opportunities

Architectural engineering graduates normally enter the building design industry and become registered professional engineers. There are about 20 accredited architectural engineering programs in the country, so there is a large unfulfilled demand for engineers educated in building design. In Nebraska, the home of several large architectural and engineering design firms, this is especially true.

Architectural engineering is accredited by the EAC-ABET, Inc. The accreditation is attached to the one-year master of architectural engineering degree.

Major Department Admission

Students must complete at least 43 credit hours in the AE program before applying for professional admission to the degree program in AE. Transfer students must have all transfer hours accepted before applying for professional admission. The students must have a minimum of 3.0 GPA over a pre-determined set of 43 credit hour freshman and sophomore level courses to be professionally admitted to the AE program and continue to take 3000-level AREN courses. A spreadsheet for calculation of AE professional admittance GPA is provided on The Durham School AE website. The number of admitted students will depend on the availability of space, faculty, and other academic resources. Students are not permitted to register for more than 61 credit hours of courses listed in the AE curriculum until they have been accepted into the degree program.

Learning Outcomes

Graduates of architectural engineering will develop:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The above student outcomes have been approved by the ABET EAC for use beginning with the 2019-20 academic year, and have been adopted by the faculty of the Department of Architectural Engineering.

Catalog to Use

Because of rapid technical developments, the AE curriculum is continually reviewed and upgraded. Currently enrolled students are expected to modify their programs to take advantage of such revisions. Students who do not maintain continuous progress toward the degree through enrollment in applicable coursework will be considered as new students upon re-entering the program and will be subject to the requirements of the undergraduate catalog current at the time of their re-entry.

Grade Rule

C- and D grades

Architectural engineering students must earn a grade of C or better in math, science, computer programming, and engineering courses to obtain credit for that course toward graduation. Additionally, all courses that are prerequisites for engineering courses must be passed with a grade of C or better.

ACE Requirements

The AE program follows the University of Nebraska–Lincoln Achievement Centered Education (ACE) requirements. Because of the specific needs of the program, most of these courses are specified in the curriculum.

Please contact Melissa Hoffman at melissa.hoffman@unl.edu or 402.554.4482 if you are interested in more information about this program.

Requirements

Course	Title	Credits
First Semester		
AREN 1010	INTRODUCTION TO ARCHITECTURAL ENGINEERING	1
CMST 1110	PUBLIC SPEAKING FUNDS	3

AREN 1000 DURHAM SCHOOL OF ARCHITECTURAL ENGINEERING AND CONSTRUCTION SEMINAR (0 credits)

Presentation of professional problems and practices by students, faculty, and professionals associated with careers in the Durham School of Architectural Engineering and Construction

AREN 1010 INTRODUCTION TO ARCHITECTURAL ENGINEERING (1 credit)

An overview of architectural engineering. Descriptions of structural, lighting and electrical, and mechanical engineered systems in buildings. Design and measurement exercises. Field visits to buildings.

AREN 1030 DESIGN AND SIMULATION STUDIO I (3 credits)

Focus on virtual modeling in the context of conceptual design. Study of fundamentals of Building Information Modeling (BIM), iterative design processes, early design analysis techniques, and technical problem-solving processes. Development of modeling skills in various software programs including Autodesk Revit, Formit, Dynamo, and Trimble Sketchup.

AREN 2010 ARCHITECTURAL ENGINEERING SEMINAR (1 credit)

This course will inform students about careers in Architectural Engineering and about non-technical issues of engineering practice. It will include visits to offices and job sites, and talks by practicing professionals. Professional, ethical, social, and environmental issues will be addressed. Students will gain experience in teamwork, and in presentation of information.

Prerequisite(s)/Corequisite(s): AREN 1010 or AE 1010; 30 credit hours completed

AREN 2030 DESIGN AND SIMULATION STUDIO II (3 credits)

Focus on building systems as integral elements in architecture, building and construction assemblies, materials and methods, fabrication, and tectonic exploration using building information modeling (BIM) processes. Exposure to building construction systems, stereotomic and tectonic construction assemblies, and fundamentals of the architectural design process.

Prerequisite(s)/Corequisite(s): AREN 1030 or AE 1030 Design and Simulation Studio I

AREN 2110 THERMODYNAMICS FOR ARCHITECTURAL ENGINEERING (3 credits)

First and Second Laws of Thermodynamics, properties of gases and vapors. Sources of energy and its conversion to work. Applications on Architectural Engineering and Construction.

Prerequisite(s)/Corequisite(s): MATH 1960, PHYS 2110. Not open to non-degree graduate students.

AREN 2250 CONSTRUCTION GRAPHICS AND DESIGN PROCESS (3 credits)

Introduction to typical computer-graphics and calculation applications used in a contemporary architectural engineering design office. Extensive use of CADD and electronic spreadsheet software to solve typical analysis and design problems. Fundamentals of descriptive geometry and two and three-dimensional drawing systems. Use of drawing conventions common to construction design. Basics of personal computer applications. Conceptual review of engineering design and technical problem solving processes.

AREN 2400 BUILDING SYSTEMS (3 credits)

Building systems as integral elements in architecture; building assemblies and materials; building system relationships; communication of ideas between design professionals, clients, contractors and manufacturers; construction drawings and specifications.

Prerequisite(s)/Corequisite(s): AREN 2250 or AE 2250

AREN 3030 AE DESIGN AND SIMULATION STUDIO III (3 credits)

A comprehensive focus on building design and construction through integrating program, structure, site, and enclosure aligned with architectural engineering. Topics include structure and construction assemblies; envelope performance; and whole building organization and space-making using BIM processes.

Prerequisite(s)/Corequisite(s): AREN 2030 or permission of instructor

AREN 3070 MECHANICS OF MATERIALS LAB (1 credit)

Introduction to the behavior and testing of various building materials. The concepts of axial stress and strain, flexural stress and strain, beam deflections and column buckling.

Prerequisite(s)/Corequisite(s): Coreq: MECH 3250.

AREN 3100 HVAC FUNDAMENTALS (3 credits)

Topics will include an introduction to the types of air conditioning systems; the properties of moist air, psychometric processes in HVAC equipment; indoor air quality; thermal comfort; heat transmission in buildings; solar radiation; and the calculation of building infiltration rates, space heating loads and space cooling loads.

Prerequisite(s)/Corequisite(s): MECH 2000 or MENG 2000; corequisite AREN 4040

AREN 3120 MECHANICAL SYSTEMS FOR BUILDINGS (3 credits)

Fluid flow, pumps, and piping design; space air diffusion; fans, ducts, and building air distribution; refrigeration equipment.

Prerequisite(s)/Corequisite(s): AREN 3100 or AE 3100 and CIVE 310 and CIVE 319

AREN 3130 HVAC LAB (1 credit)

Conduct experiments and prepare written reports involving fluid flow, pumps, fans, ducts, piping; basic heat transfer and thermodynamic principles.

Prerequisite(s)/Corequisite(s): AREN 3100 or AE 3100 and CIVE 310 and CIVE 319

AREN 3200 LIGHTING I: FUND FOR DESIGN (3 credits)

Introduction to illumination engineering for building interiors. Topics include the fundamentals of light and vision, lighting equipment, requirements for building lighting, and basic illuminating engineering design methods.

Prerequisite(s)/Corequisite(s): ECEN 2110

AREN 3220 ELECTRICAL SYSTEMS FOR BUILDINGS I (3 credits)

Study of basic design of building electrical systems including circuit design, power distribution and service equipment, communications systems, and special electrical systems.

Prerequisite(s)/Corequisite(s): ECEN 2110

AREN 3230 LIGHTING AND ELECTRICAL SYSTEMS LAB (1 credit)

General introduction to lighting and electrical systems in building interiors, through hands-on exercises using a range of currently available lighting and electrical technologies. Topics include: principles of object modeling, lamp and luminaire workshops, field measurements of lighting and electrical systems, motor workshop, power consumption and power factor workshops.
Prerequisite(s)/Corequisite(s): AREN 3200 or AE 3200; coreq AREN 3220

AREN 3300 BUILDING ACOUSTICS FUNDAMENTALS (3 credits)

An introduction to the acoustics of buildings. Topics include the fundamentals of sound generation, propagation, and measurement; human hearing; acoustic properties of materials and constructions; basic room acoustics; and noise control.

Prerequisite(s)/Corequisite(s): PHYS 2120

AREN 3770 GLOBAL EXPERIENCES IN ARCHITECTURAL ENGINEERING (1-3 credits)

Individual or group educational experience in Architectural Engineering that combine classrooms, lectures, discussions, and/or seminars with field and/or classroom studies in a foreign country. Choice of subject matter and coordination of on- and off-campus activities are at the discretion of the instructor.

AREN 3920 INDIVIDUAL INSTRUCTION IN ARCHITECTURAL ENGINEERING III (1-3 credits)

Individual instruction in Architectural Engineering at the junior level in a selected area, under the supervision and guidance of an Architectural Engineering faculty member.

AREN 3940 SPECIAL TOPICS IN ARCHITECTURAL ENGINEERING III (3 credits)

Special topics in Architectural Engineering at the junior level that are not yet covered in other courses in the Architectural Engineering curriculum.

Prerequisite(s)/Corequisite(s): Permission of instructor.

AREN 4020 ARCHITECTURAL ENGINEERING SENIOR DESIGN PROJECT IN LIGHTING (4 credits)

Senior design project that integrates lighting design and illuminating engineering through a semester long design problem. A self-directed execution of the lighting design process culminating with a professional design solution.

Prerequisite(s)/Corequisite(s): AREN 3220 or AE 3220; AREN 4200 or AE 4200

AREN 4030 AE DESIGN AND SIMULATION STUDIO IV (3 credits)

Advanced topics in Building Information Modeling (BIM) are presented including modeling tools and processes for building engineers, designers, contractors, and operators. BIM management throughout the building lifecycle, technical engineering use cases, and specific topics in virtual reality, simulation, augmented reality, and graphical programming environments are covered. Advanced topics relevant to all AE fields include collaborative design and interoperability.

Prerequisite(s)/Corequisite(s): AREN 3030

AREN 4040 BUILDING ENVELOPES (3 credits)

Design and analysis of building envelopes is an important and interdisciplinary topic within the Architectural Engineering field that relates to all AE subdisciplines (lighting, electrical systems, structures, mechanical systems, and acoustics). This introductory Building Envelopes course is created to supplement the sub-discipline specific introductory courses as well as combine some of these topics under the umbrella of building envelopes. It aims to fill an important gap in the BSAE curriculum and cover a comprehensive introduction to the processes of Building Energy Modeling.

Prerequisite(s)/Corequisite(s): MECH 2000 or MENG 2000; junior standing; corequisite: AREN 3100

AREN 4120 BUILDING ENERGY II: PRIMARY AND SECONDARY SYSTEMS (3 credits)

Analysis and design of building air distribution systems, fans, pumps, piping, space air diffusion and heat exchangers.

Prerequisite(s)/Corequisite(s): AREN 3100 or AE 3100; CIVE 310

AREN 4150 HVAC DESIGN (4 credits)

Develop and design the mechanical system for an actual building, from the programming phase to the final construction documents.

Prerequisite(s)/Corequisite(s): AREN 4120 or AE 4120. Not open to non-degree graduate students.

AREN 4200 LIGHTING II: THEORY, DESIGN & APPLICATION (3 credits)

Design and analysis of lighting systems; the emphasis is on the integration between the lighting design process and the technical foundations for building lighting; topics include design criteria; lighting design procedures, lighting modes and subjective effects; calculation tools. Lab sessions include photometric measurements and computer applications. (Cross-listed with AREN 8206).

Prerequisite(s)/Corequisite(s): AREN 3200 or AE 3200

AREN 4250 LIGHTING DESIGN (4 credits)

Advanced design and analysis of lighting systems. Application of the lighting design process for advanced interior applications such as multimedia facilities, and outdoor applications such as sports lighting. (Requires the initiation of the design process, proceeding in a self-directed manner through intermediate steps, and producing professional lighting design solutions.)

Prerequisite(s)/Corequisite(s): AREN 4200 or AE 4200. Not open to non-degree graduate students.

AREN 4300 ADVANCED NOISE CONTROL (3 credits)

Characterization of acoustic sources; use and measurement of sound power and intensity; sound-structure interaction; acoustic enclosures and barriers; muffling devices; vibration control; and active noise control. (Cross-listed with AREN 8306).

Prerequisite(s)/Corequisite(s): AREN 3300 or AE 3300

AREN 4600 SMART BUILDING SENSORS AND PROGRAMMING (3 credits)

Principles of modeling, interfacing, and signal conditioning of sample building sensors, and acquisition and analysis of data utilizing engineering programming language such as LabVIEW. Overview of current sensing technology and control in buildings.

Prerequisite(s)/Corequisite(s): CIST 1400

AREN 4620 MEMS SENSORS DYNAMICS (3 credits)

Study of the dynamics of Microelectromechanical system (MEMS) beam-structures. Modeling principles and data analysis from different types of MEMS will be explained along with deep theoretical and experimental investigation of nonlinear MEMS dynamics. Learn to conduct experiments using state-of-the-art MEMS characterization tools. (Cross-listed with AREN 8626).

Prerequisite(s)/Corequisite(s): Instructor Permission

AREN 4920 INDIVIDUAL INSTRUCTION IN ARCHITECTURAL ENGINEERING IV (1-3 credits)

Individual instruction in Architectural Engineering at the senior level in a selected area, under the supervision and guidance of an Architectural Engineering faculty member.

Prerequisite(s)/Corequisite(s): Instructor Permission

AREN 4940 SPECIAL TOPICS IN ARCHITECTURAL ENGINEERING IV (3 credits)

Special topics in Architectural Engineering at the senior level that are not yet covered in other courses in the Architectural Engineering curriculum.

Prerequisite(s)/Corequisite(s): Permission of instructor.

Civil Engineering, Bachelor of Science

The Department of Civil Engineering offers a complete undergraduate program to University of Nebraska students on City Campus in Lincoln and Scott Campus in Omaha. Curriculum requirements are nearly identical on both campuses. The goal is to prepare students for entry into the civil

engineering profession immediately after graduation or to pursue graduate-level studies.

Website (<https://engineering.unl.edu/civil/>)

The general educational objectives of the University of Nebraska–Lincoln (UNL) civil engineering undergraduate program are to prepare our graduates so that, with a UNL BSCE degree, a few years beyond graduation:

1. Graduates are employed in civil and environmental engineering or a closely related field; or, graduates are pursuing an advanced degree in civil and environmental engineering or a closely related field.
2. Graduates contribute to society and address societal and environmental needs through engagement in professional, community, or service organizations.
3. Graduates agree that the Civil and Environmental Engineering program prepared them for success in their careers in terms of knowledge and skillsets as embodied in the program and the Complete Engineer(TM) Initiative.

As a professional discipline, civil engineering is closely related to the total human environment. In all professional endeavors, the civil engineer must consider ecological effects as well as the social, economic, and political needs of people. The civil engineer designs systems to control and manage our water resources to provide electric power, agricultural irrigation, flood control, recreation, water supplies and wastewater treatment systems for our urban and industrial needs.

The civil engineer plans, designs, and constructs our transportation systems including highways, railroads, waterways, and airports to connect rural, urban, and industrial areas. The civil engineer also designs and constructs housing and facilities for recreational, industrial, and commercial complexes, which comprise the urban environment. It is the responsibility of civil engineering to minimize air, water, and land pollution and protect the environment.

Instructional emphasis is placed on fundamental engineering principles derived from mathematics, chemistry, physics, and engineering science. These subjects provide a sound background for the subsequent introductory courses in environmental, geotechnical, structural, transportation, and water resources engineering. Students are introduced to design concepts in the freshman year. Design is incorporated throughout the curriculum that culminates in two senior-level courses, CIVE 385 Professional Practice and Management in Civil Engineering and CIVE 489 Senior Design Project.

Instructional laboratories in environmental engineering, hydraulics, geotechnical engineering, structures, and surveying provide each student with an opportunity to learn, through individual participation, the operation of the testing equipment used to establish engineering design criteria and to monitor and model engineering facilities such as water and wastewater treatment plants, highway systems, river control systems, and structural systems.

Some students may desire to obtain a degree in construction management in addition to the degree in civil engineering. Because some civil engineering courses require prerequisites beyond those required for similar construction management courses, students should obtain the civil engineering degree first. Advising will be done by a civil engineering faculty member familiar with the construction management curriculum. After completing the civil engineering degree, the student will move to the construction management department to complete requirements for the second undergraduate degree in construction management.

The Departments of Civil Engineering and Architecture have a joint program awarding licensing degrees in both fields of study. A bachelors degree in civil engineering and masters degree in architecture are awarded, after approximately seven years of study. The departments work with individual

students in tailoring a joint degree program. More information can be obtained from either department office.

Learning Outcomes

Graduates of the civil engineering program will have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Professional Admission to Civil Engineering Criteria for Professional Admission to the Civil Engineering Degree Program

Pre-professionally admitted College of Engineering students majoring in civil engineering must have their academic records reviewed for professional admission to the Civil Engineering Degree Program during the fall, spring or summer immediately following the term in which:

- At least 12 credits (one semester) have been completed after admission to the College of Engineering;
- At least 43 credits applicable to the degree have been earned; and
- PHYS 2110 General Physics I, MECH 2230 Engineering Statics, MECH 3730 Mechanics of Elastic Bodies and MECH 3250 Engineering Dynamics have been completed.

Additionally, the student can have no more than two declined professional admission requests to other engineering majors. It is likely a student may need to complete four full semesters of credits applying to the Program before these requirements are able to be completed.

Professional admission approval to the Civil Engineering Degree Program also requires that all of the following Departmental-specific criteria must be met:

- Earn a C letter grade or better in PHYS 2110, MECH 2230, MECH 3730, AND MECH 3250
- Earn a cumulative grade point average of 2.4 or greater; and
- Earn a C letter grade or better in ALL math, science and engineering courses required for the bachelor of science in civil engineering degree if the cumulative grade point average is less than 2.700.

Students approved for professional admission to the Program are then allowed to take 400-level civil engineering courses to complete their degree.

Requirements

(City Campus in Lincoln and Scott Campus in Omaha)

Students must have completed the equivalent of the fourth semester before admission to the civil engineering program. Transfer students must have all transfer hours accepted before being considered for the degree program.

Degree Requirements - 130 hours

Course	Title	Credits
First Semester		
CIVE 112	INTRODUCTION TO CIVIL ENGINEERING	1
CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I	3
ENGR 100	FRESHMAN ENGINEERING SEMINAR	0
CHEM 1180	GENERAL CHEMISTRY I	3
CHEM 1184	GENERAL CHEMISTRY I LABORATORY	1
MATH 1950	CALCULUS I	5
ACE Elective ¹		3
Credits		16
Second Semester		
CIVE 130	COMPUTER-AIDED DESIGN	2
CIVE 221	GEOMETRIC CONTROL SYSTEMS	3
MATH 1960	CALCULUS II	5
PHYS 2110	GENERAL PHYSICS I - CALCULUS LEVEL	4
ACE Elective ¹		3
Credits		17
Third Semester		
ENGR 200	SOPHOMORE ENGINEERING SEMINAR	0
ENGL 3980	TECHNICAL WRITING ACROSS THE DISCIPLINES ⁵	3
MATH 1970	CALCULUS III	4
MECH 2230	ENGINEERING STATICS	3
PHYS 2120 or CHEM 1190	GENERAL PHYSICS-CALCULUS LEVEL ³ or GENERAL CHEMISTRY II	4
ACE Elective ¹		3
Credits		17
Fourth Semester		
CIVE 361	HIGHWAY ENGINEERING	3
CMST 3130	SPEECH COMMUNICATION IN BUSINESS AND THE PROFESSIONS	3
MATH 2350	DIFFERENTIAL EQUATIONS	3
MECH 3250	MECHANICS OF ELASTIC BODIES	3
MECH 3730	ENGINEERING DYNAMICS	3
Credits		15
Fifth Semester		
CIVE 310/MECH 3100	FLUID MECHANICS	3
CIVE 319	HYDRAULICS LAB	1
CIVE 326	INTRODUCTION TO ENVIRONMENTAL ENGINEERING	3
CIVE 327	ENVIRONMENTAL ENGINEERING LABORATORY	1
CIVE 341	INTRODUCTION TO STRUCTURAL ENGINEERING	4
STAT 3800 or MECH 3210	APPLIED ENGINEERING PROBABILITY AND STATISTICS or ENGINEERING STATISTICS AND DATA ANALYSIS	3
Credits		15
Sixth Semester		
CIVE 334	INTRODUCTION TO GEOTECHNICAL ENGINEERING	4
CIVE 352	INTRODUCTION TO WATER RESOURCES ENGINEERING	3
CIVE 378	MATERIALS OF CONSTRUCTION	3

CIVE 385	PROFESSIONAL PRACTICE AND MANAGEMENT IN CIVIL ENGINEERING	3
ACE Elective ¹		3

Credits 16**Seventh Semester**

Technical Elective		3
CIVE Design electives		6
ACE Elective ¹		3
Science Elective		4

Credits 16**Eighth Semester**

CIVE 489	SENIOR DESIGN PROJECT	3
CIVE Design Elective		3
Technical Electives		9
Professional Development Electives ¹		3

Credits 18**Total Credits 130**

- ACE elective: Choose one course from each ACE Student Learning Outcome (SLO) 5,6,7,8 and 9 elective courses.
- Computer Aided Design: AE 2250 or equivalent.
- PHYS 2120: CHEM 1190 & CHEM 1194 is an acceptable substitute.
- CIVE 221: CONE 2210 is acceptable substitute.
- ENGL 3980: ENGR 3000 is acceptable substitute.
- Professional Development Elective: The Department has a list of acceptable courses.
- Technical elective: The department has a list of acceptable courses.

CIVE Design Electives

CIVE Design Electives: Nine (9) credits must be taken from courses designated as Design Electives. CIVE Design electives must be taken from at least two sub-disciplines.

Code	Title	Credits
CIVE 419	FLOW SYSTEMS DESIGN	3
CIVE 425	PROCESS DESIGN IN WATER SUPPLY AND WASTEWATER TREATMENT	3
CIVE 426	DESIGN OF WATER TREATMENT FACILITIES	3
CIVE 427	DESIGN OF WASTEWATER TREATMENT AND DISPOSAL FACILITIES	3
CIVE 436	FOUNDATION ENGINEER	3
CIVE 440	REINFORCED CONCRETE DESIGN I	3
CIVE 441	STEEL DESIGN I	3
CIVE 452	WATER RESOURCES DEVELOPMENT	3
CIVE 462	HIGHWAY DESIGN	3
CIVE 463	TRAFFIC ENGINEERING	3

Civil Engineering Technical Electives

Technical Electives: Technical electives will be selected by the student in consultation with his/her adviser to formulate a coherent program in civil engineering. Two technical electives (up to six credits) can be taken from MECH 2000, ECEN 2110, CONE 2060 or any approved course in science, mathematics, or other engineering areas approved by the department. The department has an approved list.

Code	Title	Credits
CIVE 421	HAZARDOUS WASTE MANAGEMENT AND TREATMENT	3
CIVE 422	POLLUTION PREVENTION: PRINCIPLES AND PRACTICES	3

CIVE 424	SOLID WASTE MANAGEMENT ENGINEERING	3
CIVE 430	FUNDAMENTALS OF WATER QUALITY MODELING	3
CIVE 431	SMALL TREATMENT SYSTEMS	3
CIVE 432	BIOREMEDIATION OF HAZARDOUS WASTES	3
CIVE 434	SOIL MECHANICS II	3
CIVE 443	ADVANCED STRUCTURAL ANALYSIS	3
CIVE 444	STRUCTURAL DESIGN AND PLANNING	3
CIVE 446	STEEL DESIGN II	3
CIVE 447	REINFORCED CONCRETE II	3
CIVE 452	WATER RESOURCES DEVELOPMENT	3
CIVE 454	HYDRAULIC ENGINEERING	3
CIVE 455	NONPOINT SOURCE POLLUTION CONTROL ENGINEERING	3
CIVE 456	SURFACE WATER HYDROLOGY	3
CIVE 458	GROUNDWATER ENGINEERING	3
CIVE 459	RELIABILITY OF STRUCTURES	3
CIVE 461	URBAN TRANSPORTATION PLANNING	3
CIVE 468	AIRPORT PLANNING AND DESIGN	3
CIVE 472	PAVEMENT DESIGN AND EVALUATION	3
CIVE 475	WATER QUALITY STRATEGY	3
CIVE 481	COMPUTATIONAL PROBLEM SOLVING IN CIVIL ENGINEERING	3
CIVE 498	SPECIAL TOPICS IN CIVIL ENGINEERING	1-6

For more information, call 402-554-2462 or visit
www.engineering.unl.edu/civil/ (<http://www.engineering.unl.edu/civil/>)

CIVE 112 INTRODUCTION TO CIVIL ENGINEERING (1 credit)

Introduction to civil engineering as a career by use of case studies; alternate approaches to engineering designs illustrated by use of engineering principles.

CIVE 130 COMPUTER-AIDED DESIGN (2 credits)

Use of computer-aided design software to communicate engineering ideas. Specifications, dimensioning, tolerancing, 2- and 3-D model development, topographic mapping, and process layout with environmental, bioprocess, and biomedical emphases.

Prerequisite(s)/Corequisite(s): CIVE112, not open to nondegree students

CIVE 221 GEOMETRIC CONTROL SYSTEMS (3 credits)

Introduction to the theory and application of mensuration and geometric information processing in civil engineering. Measurement of distance, direction, elevation and location using mechanical, electronic and satellite systems. Collection of field data and error propagation. Elementary geometric data bases for design, construction, operation and control of civil works.

Prerequisite(s)/Corequisite(s): MATH 1950

CIVE 252 CONSTRUCTION MATERIALS LAB (1 credit)

Introduction to ASTM and AASHTO standard procedures used to measure soil and concrete properties; common modifications to soil and concrete mixes are discussed and analyzed.

Prerequisite(s)/Corequisite(s): MATH1950 and CNST2510 coreq

CIVE 310 FLUID MECHANICS (3 credits)

Fluid statics, equations of continuity, momentum, and energy; dimensional analysis and dynamic similitude. Applications to: flow meters; fluid pumps and turbines; viscous flow and lubrication; flow in closed conduits and open channels. Two-dimensional potential flow.

Prerequisite(s)/Corequisite(s): MATH 2350; and MENG 3730 or EMEC 3730.

CIVE 319 HYDRAULICS LAB (1 credit)

Hydraulic experiments and demonstrations. Velocity, pressure and flow measurements; pipe flow, open channel flow; hydraulic structures and machinery, hydrologic and sediment measurement and student projects.

Prerequisite(s)/Corequisite(s): CIVE310 pre/coreq

CIVE 326 INTRODUCTION TO ENVIRONMENTAL ENGINEERING (3 credits)

Introduction to the principles of environmental engineering, including water quality, atmospheric quality, pollution prevention, and solid and hazardous wastes engineering. Design of water, air, and waste management systems.

Prerequisite(s)/Corequisite(s): MATH 2350, and CHEM 1180 and CHEM 1184, or CHEM 1190 and CHEM 1194

CIVE 327 ENVIRONMENTAL ENGINEERING LABORATORY (1 credit)

Environmental engineering experiments, demonstrations, field trips, and projects. Experiments include the measurement and determination of environmental quality parameters such as solids, dissolved oxygen, biochemical and chemical oxygen demand, and alkalinity.

Prerequisite(s)/Corequisite(s): Pre or Coreq: CIVE 326.

CIVE 328 CONCRETE MATERIALS (2 credits)

Physical properties of cement and concrete. Sampling, testing, inspection. Design of mixtures. Factors affecting strength. Specifications. Building forms and placing concrete.

Prerequisite(s)/Corequisite(s): MENG 2230 and CHEM 1180. Not open to non-degree graduate students.

CIVE 334 INTRODUCTION TO GEOTECHNICAL ENGINEERING (4 credits)

Soil composition, structure and phase relationships; soil classification. Principles of effective stress; loading induced subsurface stresses; load history; deformation and failure of soils. Elastic and limit analysis with applications to design for bearing capacity, settlement, retaining walls and slope stability. Steady state seepage.

Prerequisite(s)/Corequisite(s): EMEC 3250 or MENG 3250; Coreq: CIVE 310.

CIVE 341 INTRODUCTION TO STRUCTURAL ENGINEERING (4 credits)

Introduction to the analysis and design of structural systems. Introduction to the analysis and design of structural systems. Analyses of determinate and indeterminate trusses, beams, and frames, and design philosophies for structural engineering. Laboratory experiments deal with the analysis of determinate and indeterminate structures.

Prerequisite(s)/Corequisite(s): MENG 3250

CIVE 352 INTRODUCTION TO WATER RESOURCES ENGINEERING (3 credits)

Introduction to water resources engineering design and planning, surface hydrology, groundwater hydraulics, reservoirs and other control structures. Introduction to field measurement and computational methods in water resources.

Prerequisite(s)/Corequisite(s): CIVE310 or MENG3100

CIVE 361 HIGHWAY ENGINEERING (3 credits)

Introduction to the principles of highway engineering and traffic operations and control.

Prerequisite(s)/Corequisite(s): MENG 2230; and CIVE 221 or CONE 2210.

CIVE 378 MATERIALS OF CONSTRUCTION (3 credits)

Introduction to the behavior, testing and design of soil, portland cement concrete, steel, wood and composites. Experiments covering the concepts of stress and strain under axial, torsional, shear and flexural loading conditions. Common ASTM laboratory test procedures and specifications, field quality control tests and statistical applications.

Prerequisite(s)/Corequisite(s): MENG 3250

CIVE 385 PROFESSIONAL PRACTICE AND MANAGEMENT IN CIVIL ENGINEERING (3 credits)

Basic elements of civil engineering practice. Roles of all participants in the process-owners, designers, architects, contractors, and suppliers. Basic concepts in business management, public policy, leadership, and professional licensure. Professional relations, civic responsibilities, and ethical obligations for engineering practice. Project management, contracts, allocation of resources, project estimating, planning, and controls.

Prerequisite(s)/Corequisite(s): Junior standing and CIVE major. Not open to non-degree graduate students.

CIVE 419 FLOW SYSTEMS DESIGN (3 credits)

Application of hydraulic principles to the design of water distribution systems, wastewater and stormwater collection systems, channelized flow systems and treatment facilities. (Cross-listed with CIVE 819)

Prerequisite(s)/Corequisite(s): CIVE 326 or CIVE 327; CIVE 352 coreq.

CIVE 421 HAZARDOUS WASTE MANAGEMENT AND TREATMENT (3 credits)

Survey of the hazardous waste management system in the USA. State and federal hazardous waste regulations. Chemical characteristics of hazardous waste and unit operations and processes used for treatment of soil, water, and air. (Cross-listed with CIVE 821).

Prerequisite(s)/Corequisite(s): CIVE 326.

CIVE 422 POLLUTION PREVENTION: PRINCIPLES AND PRACTICES (3 credits)

Introduction to pollution prevention (P2) and waste minimization methods. Practical applications to small businesses and industries. Legislative and historical development of P2 systems analysis, waste estimation, P2 methods, P2 economics, and sources of P2 information. (Cross-listed with CIVE 822).

Prerequisite(s)/Corequisite(s): Permission

CIVE 424 SOLID WASTE MANAGEMENT ENGINEERING (3 credits)

Planning design and operation of solid and waste collection processing, treatment, and disposal systems including materials, resources and energy recovery systems. (Cross-listed with CIVE 824).

Prerequisite(s)/Corequisite(s): CIVE 326 and CIVE 334

CIVE 425 PROCESS DESIGN IN WATER SUPPLY AND WASTEWATER TREATMENT (3 credits)

Design of unit operations and processes associated with drinking water and wastewater treatment facilities.

Prerequisite(s)/Corequisite(s): CIVE 326 and CIVE 310

CIVE 426 DESIGN OF WATER TREATMENT FACILITIES (3 credits)

Analyses of water supplies and design of water treatment and distribution systems. (Cross-listed with CIVE 826).

Prerequisite(s)/Corequisite(s): CIVE425

CIVE 427 DESIGN OF WASTEWATER TREATMENT AND DISPOSAL FACILITIES (3 credits)

Analysis of systems for wastewater treatment and disposal. (Cross-listed with CIVE 827).

Prerequisite(s)/Corequisite(s): CIVE 425

CIVE 430 FUNDAMENTALS OF WATER QUALITY MODELING (3 credits)

Comprehensive study of water quality and the effects of various water pollutants on the aquatic environment; modeling of water quality variables. (Cross-listed with CIVE 830).

Prerequisite(s)/Corequisite(s): CIVE 326

CIVE 431 SMALL TREATMENT SYSTEMS (3 credits)

Design of small and decentralized waste water management systems. (Cross-listed with CIVE 831.)

Prerequisite(s)/Corequisite(s): CIVE 326 or permission. Not open to non-degree graduate students.

CIVE 432 BIOREMEDIATION OF HAZARDOUS WASTES (3 credits)

Principles, applications, and limitations of bioremediation of hazardous wastes and design of some bioremediation systems.

Prerequisite(s)/Corequisite(s): CIVE 326 and (CIVE 310 or MENG 3100)

CIVE 434 SOIL MECHANICS II (3 credits)

Application of the effective stress principle to shear strength of cohesive soils; analysis of stability of slopes. Development of continuum relationships for soils; solutions for stresses and displacements for an elastic continuum. Solution of the consolidation equation for various initial and boundary conditions.

Prerequisite(s)/Corequisite(s): CIVE 334

CIVE 436 FOUNDATION ENGINEER (3 credits)

Subsoil exploration and interpretation; selection of foundation systems; determination of allowable bearing capacity and settlement; design of deep foundations; pile driving analysis; control of groundwater.

Prerequisite(s)/Corequisite(s): CIVE 334

CIVE 439 INTRODUCTION TO BRIDGE ENGINEERING (3 credits)

Structural types, bridge loads, design of bridge slabs, steel girder bridges, and prestressed concrete girder bridges. Evaluation of existing bridges. Problems related to fatigue and corrosion. Field testing of bridges. (Cross-listed with CIVE839)

Prerequisite(s)/Corequisite(s): CIVE440 or CIVE441 or CIVE840

CIVE 440 REINFORCED CONCRETE DESIGN I (3 credits)

Introduction to the design concepts of reinforced concrete building components. The design of flexural and compression members, simple walls, foundations, and floor systems using the latest American Concrete Institute (ACI) design requirements.

Prerequisite(s)/Corequisite(s): CIVE 341

CIVE 441 STEEL DESIGN I (3 credits)

Introduction to the design concepts for structural steel building components. Design of tension members, bolted and welded connections, column members, and beam members. Limit states design concepts used throughout, and emphasis on behavior of members and code design procedures.

Prerequisite(s)/Corequisite(s): CIVE 341

CIVE 443 ADVANCED STRUCTURAL ANALYSIS (3 credits)

Matrix analysis methods and computer solutions for indeterminate structures. Additional topics: static condensation, shear deformations, and non-prismatic members in matrix-based analyses, moment distribution method, load cases and load combinations for buildings and bridges, and influence lines and analysis for moving loads. (Cross-listed with CIVE 843)

Prerequisite(s)/Corequisite(s): CIVE 341. Not open to non-degree graduate students.

CIVE 444 STRUCTURAL DESIGN AND PLANNING (3 credits)

Principles of design of steel and reinforced concrete structural building systems, planning of building vertical and horizontal load resisting systems, and bridge systems. Several design projects involve indeterminate analysis and design concepts for both steel and reinforced concrete. (Cross-listed with CIVE 844).

Prerequisite(s)/Corequisite(s): CIVE 440 and CIVE 441

CIVE 446 STEEL DESIGN II (3 credits)

A continuation of the topics covered in CIVE 441. The principles and procedures used in design of steel buildings, design of plate girders, design and analysis of building systems, design and analysis of composite steel-concrete building systems, innovative building systems, and introduction to seismic design of steel buildings. Plate buckling, beam, column, and beam-column design, and frame stability. Introduction to connection design.

Prerequisite(s)/Corequisite(s): CIVE 441

CIVE 447 REINFORCED CONCRETE II (3 credits)

Shear friction theory, strut-and-tie modeling, anchorage, deflection, slender and bi-axially loaded members, torsion, two-way action and punching shear, and footing design. Excel spreadsheets are developed and used for various design tasks. (Continuation of topics covered in CIVE 440/CIVE 840.) (Cross-listed with CIVE 847).

Prerequisite(s)/Corequisite(s): CIVE 440 or CIVE 840

CIVE 451 INTRODUCTION TO FINITE ELEMENT ANALYSIS (3 credits)

Matrix methods of analysis. The finite element stiffness method. Computer programs. Applications to structures and soils. Introduction to finite element analysis of fluid flow. (Cross-listed with CIVE 851)

CIVE 452 WATER RESOURCES DEVELOPMENT (3 credits)

Theory and application of systems engineering with emphasis on optimization and simulation techniques for evaluating alternatives in water resources developments related to water supply, flood control, hydroelectric power, drainage, water quality, water distribution, irrigation and water measurement. (Cross-listed with CIVE 852).

Prerequisite(s)/Corequisite(s): CIVE 352

CIVE 454 HYDRAULIC ENGINEERING (3 credits)

Fundamentals of hydraulics with applications of mechanics of solids, mechanics of fluids, and engineering economics to the design of hydraulic structures. Continuity, momentum, and energy principles are applied to special problems from various branches of hydraulic engineering. (Cross-listed with CIVE 854).

Prerequisite(s)/Corequisite(s): CIVE 352

CIVE 455 NONPOINT SOURCE POLLUTION CONTROL ENGINEERING (3 credits)

Identification, characterization, and assessment of nonpoint source pollutants; transport mechanisms and remediation technologies; design methodologies and case studies. (Cross-listed with CIVE 855).

Prerequisite(s)/Corequisite(s): CIVE 326 and CIVE 352

CIVE 456 SURFACE WATER HYDROLOGY (3 credits)

Stochastic analysis of hydrological data and processes including rainfall, runoff, infiltration, temperature, solar radiation, wind, and non-point pollution. Space-time hydrologic modeling with emphasis on the application of techniques in the design of engineering projects. (Cross-listed with CIVE 856).

Prerequisite(s)/Corequisite(s): CIVE 352 or permission

CIVE 458 GROUNDWATER ENGINEERING (3 credits)

Application of engineering principles to the movement of groundwater. Analysis and design of wells, well fields, and artificial recharge. Analysis of pollutant movement. (Cross-listed with CIVE 858).

Prerequisite(s)/Corequisite(s): CIVE 352.

CIVE 459 RELIABILITY OF STRUCTURES (3 credits)

Fundamental concepts related to structural reliability, safety measures, load models, resistance models, system reliability, optimum safety levels, and optimization of design codes.

Prerequisite(s)/Corequisite(s): CIVE 341.

CIVE 461 URBAN TRANSPORTATION PLANNING (3 credits)

Development of urban transportation planning objectives and goals. Data collection procedures, land use and travel forecasting techniques, trip generation, trip distribution, modal choice analysis, and traffic assignment. Site development and traffic impact analysis. (Cross-listed with CIVE 861).

Prerequisite(s)/Corequisite(s): CIVE 361

CIVE 462 HIGHWAY DESIGN (3 credits)

Design of roadways, intersections, interchanges, parking facilities, and land development site access and circulation. Emphasis on design projects. (Cross-listed with CIVE862)

Prerequisite(s)/Corequisite(s): CIVE361

CIVE 463 TRAFFIC ENGINEERING (3 credits)

Design of signalized intersections, arterial street and network signal systems, and freeway control systems. Emphasis on design projects. (Cross-listed with CIVE863)

Prerequisite(s)/Corequisite(s): CIVE361

CIVE 468 AIRPORT PLANNING AND DESIGN (3 credits)

Planning and design of general aviation and air-carrier airports. Land-side components include vehicle ground access systems, vehicle circulation parking and terminal buildings. Air-side components include aircraft apron-gate area, taxi-way system, runway system and air traffic control facilities and airspace. Emphasis on design projects. (Cross-listed with CIVE868)

Prerequisite(s)/Corequisite(s): CIVE 361

CIVE 471 BITUMINOUS MATERIALS AND MIXTURES (3 credits)

Understanding of the physical, chemical, geometrical, and mechanical characteristics and practical applications of bituminous materials and mixtures. Fundamental mechanics for elastic and inelastic materials and basic theories associated with mechanical data analyses and designs. Recent advances and significant research outcomes for further discussions. Applications of theories to laboratory and field testing. (Cross-listed with CIVE 871)

Prerequisite(s)/Corequisite(s): CIVE 378. Not open to non-degree graduate students.

CIVE 472 PAVEMENT DESIGN AND EVALUATION (3 credits)

Thickness design of flexible and rigid pavement systems for highways and airports; design of paving materials; evaluation and strengthening of existing pavements. (Cross-listed with CIVE 872).

Prerequisite(s)/Corequisite(s): CIVE 334

CIVE 475 WATER QUALITY STRATEGY (3 credits)

Holistic approach to the selection and analysis of planning strategies for protecting water quality from nonpoint sources of contamination. Introduction to the use of methods of analyzing the impact of strategies on whole systems and subsystems for selecting strategies; and for evaluating present strategies.

Prerequisite(s)/Corequisite(s): Senior standing

CIVE 476 CONSTRUCTION COST CONTROLS (3 credits)

Development of cost accounting principles and financial controls appropriate for construction contractors. Includes purchasing policies and procedure, labor and equipment cost reporting techniques, accounting procedures for control of materials and supplies, billing methods, principles of financial reporting and analysis.

Prerequisite(s)/Corequisite(s): ACCT 2010 and ACCT 2020.

CIVE 481 COMPUTATIONAL PROBLEM SOLVING IN CIVIL ENGINEERING (3 credits)

Introduction of numerical methods to solve problems in civil engineering, including finding roots of equations, solving linear algebra equations, optimization, curve fitting, numerical differentiation and integration, and finite difference method. Computational methods in numerical integration, matrix operations and ordinary differential equations as they apply to civil engineering problems. (Cross-listed with CIVE 881)

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

CIVE 489 SENIOR DESIGN PROJECT (3 credits)

Requires the formulation and completion of a civil engineering design project. Course provides senior civil engineering students with the opportunity to apply engineering concepts and principles to a comprehensive design project of multiple sub-disciplinary nature. The principal objectives are for students to develop an understanding of the entire life-cycle of civil engineering projects with emphasis on the development of a unified and sustainable design that addresses the client's needs; project team work; strong engineer-client relationships; and effective project communications.

Prerequisite(s)/Corequisite(s): Senior standing and CIVE 385

CIVE 498 SPECIAL TOPICS IN CIVIL ENGINEERING (1-6 credits)

Special problems, topics, or research in civil engineering. (Cross-listed with CIVE 898).

Prerequisite(s)/Corequisite(s): Permission.

Electrical & Computer Engineering

The mission of the department of Electrical & Computer Engineering (ECE) at the University of Nebraska is to provide undergraduate and graduate level education in electrical and computer engineering, perform research and other scholarly activities, and furnish service to the state, nation, industry, and the profession. To fulfill this mission, the ECE department offers the degrees of Bachelor of Science in Electrical Engineering and in Computer Engineering, as well as several graduate programs. The faculty takes pride in its high level of interaction with both undergraduate and graduate students.

General Requirements

The following sections apply to the electrical engineering and computer engineering programs. For more details visit the ECE department's website (<https://engineering.unl.edu/ece/>)

Advisement

Upon entry into the curriculum, each student will be assigned an academic advisor. It is required that each student meet with the advisor prior to each class registration period and that all courses to be applied toward the degree be selected with the advice and approval of the advisor.

The student is expected to have his/her academic records reviewed and approval obtained from the ECE department prior to application to the University registrar for awarding of a degree in order to ensure that all curricular requirements have been satisfied by the time of the student's intended graduation.

Curriculum

Because of the rapid developments in the fields of electrical and computer engineering, the curricular requirements are continually reviewed and updated to reflect technological advances. Curricular sequence and course descriptions contained herein are intended to serve as general guidelines. Contact the ECE department for information on any changes to the requirements that are currently in effect but not listed in this catalog.

Students who do not maintain continuous progress toward a degree through enrollment in applicable course work will be considered as new students upon reentering the electrical or computer engineering curricular sequence and will be subject to the requirements of the curriculum current at the time of their reentry. Certain courses may not be valid as prerequisites or as credit toward the degree after two academic years; the student's academic advisor should be consulted regarding applicability. The applicable University catalogs and college academic policies must be followed to ensure the student satisfies all of the Achievement Centered Education (ACE) requirements.

Special Interest Areas

Opportunities are provided for the development of areas of special interest through enrollment in the individual study courses which are offered at the freshman through senior level for the student who may wish to develop a topic under the guidance of a department faculty member. Enrollment is by permission after a written proposal has been approved. Special topics courses are also offered by the department as the need arises. Academic advisers should be consulted regarding the particular topics to be covered and the necessary prerequisites for each offering of this course. Students who expect to continue their education at the graduate level after the award

of the baccalaureate degree should consult their advisors regarding course selections that would enhance that objective.

Students are encouraged to develop their professional and leadership potential through participation in student chapters of related professional organizations and in University extracurricular activities. Participation in the University Honors Program is encouraged for those who qualify.

Transfer Course Work

The applicability of transfer course work with engineering content toward credit in the curriculum is determined on a case-by-case basis by the department.

Financial Aid

Numerous opportunities exist for students to obtain financial aid during the course of their academic work at the university. The office of the dean of the college and the campus financial aid office should be consulted to determine the availability of such assistance.

Degrees Offered

- Electrical Engineering (p. 617)
- Computer Engineering (p. 615)

ECEN 1030 ELECTRICAL AND COMPUTER ENGINEERING FUNDAMENTALS (4 credits)

Introduction to DC circuit analysis and digital logic. Topics include Ohm's and Kirchoff's laws, mesh and nodal analysis, Boolean algebra, logic gates, minimization, counters and flip-flops. Uses of computer based resources for data analysis and report generation. Use of internet to locate and retrieve engineering resources.

Prerequisite(s)/Corequisite(s): MATH 1950 (pre or coreq)

ECEN 1060 MICROPROCESSOR APPLICATIONS (3 credits)

Introduction to assembly language programming of microprocessors/microcontrollers, assemblers, and debugging tool utilization. Microprocessor system hardware components, control signals, and 'C' language micro-controller programming.

Prerequisite(s)/Corequisite(s): ECEN 1030, CIST 1400

ECEN 1234 INTRODUCTION TO ELECTRICAL AND COMPUTER ENGINEERING (1 credit)

Laboratory design projects introducing some basic concepts and skills needed in electrical and computer engineering.

Prerequisite(s)/Corequisite(s): Coreq: CIST 1400. Open to first year students only or by permission.

ECEN 1920 INDIVIDUAL STUDY IN COMPUTER AND ELECTRONICS ENGINEERING I (1-3 credits)

Individual study at the freshman level in a selected electrical, computer, or electronics engineering area under the supervision and guidance of an electrical and computer engineering faculty member.

Prerequisite(s)/Corequisite(s): Departmentally approved proposal

ECEN 1940 SPECIAL TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING I (1-4 credits)

Special topics in the emerging areas of electrical, computer and electronics engineering which may not be covered in the other courses in the electrical and computer engineering curriculum.

Prerequisite(s)/Corequisite(s): Freshman standing or permission.

ECEN 1980 SPECIAL TOPICS IN ELECTRICAL ENGINEERING I (1-6 credits)

Offered as the need arises to treat electrical engineering topics for first-year students not covered in other courses.

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

ECEN 2110 ELEMENTS OF ELECTRICAL ENGINEERING (3 credits)

Basic circuit analysis including direct and alternating currents and operational amplifiers. Digital signals and circuits. Not for electrical engineering majors.

Prerequisite(s)/Corequisite(s): MATH 1960 and PHYS 2110

ECEN 2130 ELECTRICAL CIRCUITS I (3 credits)

Electrical circuit theory, Kirchoff's and Ohm's laws, circuit analysis theorems, Norton and Thevenin equivalence. The analysis of resistor circuits, with capacitors and inductors, in DC and AC steady state. Transients and variable frequency response are studied, including computer solutions to circuit problems.

Prerequisite(s)/Corequisite(s): ECEN 1030 and ECEN 2250. MATH 2350 prior to or concurrent.

ECEN 2140 ELECTRICAL CIRCUITS II (3 credits)

Introduction to the analysis of electrical circuits in sinusoidal steady states. The concepts of impedance, phasors, power, frequency response, resonance, magnetic circuits and two-part networks. Transform techniques for circuit analysis.

Prerequisite(s)/Corequisite(s): ECEN 2130 and ECEN 2184. Pre or Corequisite: MATH 2050.

ECEN 2150 ELECTRONICS AND CIRCUITS I (3 credits)

Introduction to electrical engineering circuit theory. Kirchoff's law and circuit analysis theorem applied to steady state DC resistive circuits. Analysis of transient RLC and sinusoidal steady-state circuits. Modern computer methods are employed.

Prerequisite(s)/Corequisite(s): Co-Req; MATH 1970

ECEN 2160 ELECTRONICS AND CIRCUITS II (3 credits)

Steady-state power calculations for sinusoidal single-phase and balanced three-phase circuits. Mutual inductance. Frequency response. Introduction to the fundamentals of semiconductor theory and their applications to P-N junction devices. Kirchoff's laws and circuit analysis theorems applied to steady-state diode circuits. Modern computer methods employed.

Prerequisite(s)/Corequisite(s): ECEN 2150 with grade of C or higher. Coreq: MATH 2350.

ECEN 2170 ELECTRICAL CIRCUITS III (1 credit)

Analysis of first and second order RLC circuits using differential equations and Laplace transforms. Variable frequency network performance analysis. This course is for computer engineering majors only.

Prerequisite(s)/Corequisite(s): ECEN 2130. Not open to non-degree graduate students.

ECEN 2184 ELECTRICAL CIRCUITS LABORATORY I (1 credit)

The use of laboratory tools for measurement and verification of electrical concepts. Experiments using both passive and semiconductor devices at audio frequencies. Analysis verification with computer simulation.

Prerequisite(s)/Corequisite(s): Coreq: ECEN 2130.

ECEN 2200 INTRODUCTION TO EMBEDDED SYSTEMS (3 credits)

Basic hardware and software concepts of embedded microprocessor systems and interfacing with other hardware components. Simple circuits are designed and drivers to run these circuits are written. Design and build hardware and write drivers in assembly language.

Prerequisite(s)/Corequisite(s): CSCI 1200 or working knowledge of C programming. Not open to non-degree graduate students.

ECEN 2220 ELECTRONIC CIRCUITS I (4 credits)

Analysis and design of modern electronic circuits. Diode circuits, bipolar and field effect transistor switching and amplifier circuits, and operational amplifier circuits.

Prerequisite(s)/Corequisite(s): ECEN 2130 with grade of C or better, and ECEN 2184.

ECEN 2240 INTRODUCTION TO SIGNAL PROCESSING (4 credits)

This course demonstrates the use of mathematical and digital computation tools key to engineering applications. Auditory and visual senses are used in the presentation and study of sinusoidal signals, sampling, frequency response and filtering theory.

Prerequisite(s)/Corequisite(s): ECEN 1060, CIST 1400, MATH 1960.

ECEN 2250 ELECTRICAL AND COMPUTER ENGINEERING SEMINAR (1 credit)

An overview of electrical, computer, electronics and telecommunication fields. There will be information on professional careers available upon graduation. Professionalism and ethics are addressed as well as the need for lifelong learning experiences.

Prerequisite(s)/Corequisite(s): ECEN 1030 or parallel

ECEN 2310 ELECTRICAL ENGINEERING LABORATORY (1 credit)

Laboratory accompanying ECEN 2110.

Prerequisite(s)/Corequisite(s): Coreq: ECEN 2110. Not open to non-degree graduate students.

ECEN 2350 INTRODUCTORY ELECTRICAL LABORATORY I (1 credit)

Laboratory accompanying ECEN 2150.

Prerequisite(s)/Corequisite(s): Coreq: ECEN 2150.

ECEN 2360 INTRODUCTORY ELECTRICAL LABORATORY II (1 credit)

Laboratory accompanying ECEN 2160

Prerequisite(s)/Corequisite(s): ECEN 2350, Coreq: ECEN 2160.

ECEN 2920 INDIVIDUAL STUDY IN ELECTRICAL AND COMPUTER ENGINEERING II (1-3 credits)

Individual study in a selected electrical, computer or electronics engineering area under the supervision and guidance of a electrical and computer engineering faculty member.

Prerequisite(s)/Corequisite(s): Sophomore Standing, ECE departmentally approved proposal.

ECEN 2940 SPECIAL TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING II (1-4 credits)

Special topics in the emerging areas of electrical, computer and electronics engineering at the sophomore level which may not be covered in the other courses in the electrical and engineering curriculum.

Prerequisite(s)/Corequisite(s): Sophomore standing or permission.

ECEN 3040 SIGNALS AND SYSTEMS I (3 credits)

Mathematical modeling of physical systems and signals. Representation of signals in terms of basic functions. Fourier Series expansion, Fourier Transforms, Laplace and Z-Transforms. Input-output relations, convolution. Transfer functions. System Stability. Poles/zeros and s- and z-plane methods. Applications.

Prerequisite(s)/Corequisite(s): ECEN 2140 or ECEN 2160 with a grade of C or better and MATH 2350.

ECEN 3050 PROBABILITY THEORY AND STATISTICS FOR ELECTRICAL AND COMPUTER ENGINEERS (3 credits)

Random experiment model, random variables, functions of random variables, and introduction to random processes; statistics and practical data analysis.

Prerequisite(s)/Corequisite(s): MATH 1970/(UNL)MATH 208

ECEN 3060 ELECTROMAGNETIC FIELD THEORY (3 credits)

Complex vectors, Maxwell's equations. Uniform plane waves. Wave reflection and transmission at interfaces. Waveguides and resonators. Transmission line principles. Antennas. Topics in waves.

Prerequisite(s)/Corequisite(s): ECEN 2150 or ECEN 2130 with grade of C or better, PHYS 2120, MATH 1970, MATH 2350., not open to non-degree graduate students.

ECEN 3074 ELECTRICAL ENGINEERING LABORATORY I (2 credits)

Laboratory work on circuits and systems, digital and analog electronic circuits.

Prerequisite(s)/Corequisite(s): ECEN 1060; ECEN 2220 or ECEN 2360; Coreq: ECEN 3130 or ECEN 3700; Admission to College of Engineering; not open to non-degree graduate students.

ECEN 3100 DIGITAL DESIGN AND INTERFACING (4 credits)

Digital design from both the circuit and system perspectives. Topics include the structure and analysis of digital integrated circuits, interface signal integrity, Field Programmable Gate Array (FPGA) design and synthesis, software simulation. Lab exercises provide hands-on experience with design tools and the design process.

Prerequisite(s)/Corequisite(s): ECEN 2220. Prereq or coreq: ECEN 3130.

ECEN 3130 SWITCHING CIRCUITS THEORY (4 credits)

Combinational circuit analysis and design. State machine analysis and design. Includes synchronous/clock mode circuits and asynchronous sequential circuits. Minimization, race and hazard elimination are covered. Circuits are implemented in discrete logic and in CPLD and FPGA devices. VHDL hardware description language is used to describe circuits. Circuits are implemented in discrete logic and in CPLD/FPGA devices.

Prerequisite(s)/Corequisite(s): ECEN 1060.

ECEN 3160 ELECTRONICS AND CIRCUITS III (3 credits)

Kirchhoff's laws and circuit analysis theorems applied to steady state transistor circuits. Frequency response of filters and amplifiers. Basic power amplifier types. Advanced operational amplifier circuits. Introduction to the fundamentals of semiconductor theory and their application to p-n junction and field devices.

Prerequisite(s)/Corequisite(s): ECEN 2160 with grade of C or better.

ECEN 3174 ELECTRICAL ENGINEERING LABORATORY II (2 credits)

Lab work on electromagnetic fields and waves, solid state devices, discrete systems, control systems, and communications.

Prerequisite(s)/Corequisite(s): ECEN 3040, ECEN 3074 Coreq: ECEN 3060, ECEN 3160, not open to non-degree graduate students.

ECEN 3250 COMMUNICATIONS SYSTEMS (4 credits)

Relevant communication systems; principles of transmission and reception; amplitude; frequency and phase modulation. Sampling theorem, pulse-code modulation and delta modulation.

Prerequisite(s)/Corequisite(s): ECEN 2220; ECEN 3050.

ECEN 3274 DISCRETE SYSTEMS LABORATORY (1 credit)

Laboratory work on discrete systems.

Prerequisite(s)/Corequisite(s): ECEN 1060 or ECEN 2200 and ECEN 3074

ECEN 3280 APPLIED FIELDS AND LINES I (3 credits)

Transmission lines. Discontinuities, different termination, and matching methods. Application of vector analysis to Maxwell's equations. Uniform plane waves including reflection/transmission. S-parameters. Principles of antennas. LW, MW, SW, USW propagation.

Prerequisite(s)/Corequisite(s): MATH 1970 and MATH 2350

ECEN 3290 APPLIED FIELDS AND LINES II (3 credits)

Metallic waveguides with rectangular, circular and coaxial cross section, antennas, free space, propagation in free space, applications.

Prerequisite(s)/Corequisite(s): ECEN 3280.

ECEN 3320 ASSEMBLY LANGUAGE PROGRAMMING (1 credit)

Architecture and assembly language programming of 8-bit and 32-bit microcontrollers.

Prerequisite(s)/Corequisite(s): ECEN 1060

ECEN 3380 INTRODUCTION TO POWER AND ENERGY SYSTEMS (3 credits)

Energy sources, environmental impacts, power systems principles, three phase circuits, transmission lines, transformers, per unit analysis, generators, loads, and power system modeling.

Prerequisite(s)/Corequisite(s): ECEN 2160 or ECEN 2140 with grade of C or better. Not open to non-degree graduate students.

ECEN 3450 MOBILE ROBOTICS I (4 credits)

Introduction to the primary issues spanning the field of mobile robotics, including robotics history, robot components (sensors, actuators), robot system design considerations, low-level control (feedback control) and robotics control architectures. The lab focuses on the practical implementation of autonomous robot control on a real mobile robot using behavior-based methods in the C language.

Prerequisite(s)/Corequisite(s): ECEN 1060, ECEN 2130.

ECEN 3474 ELECTRICAL ENGINEERING LABORATORY II (1 credit)

Lab work on electromagnetics, fields and waves, solid state devices and control systems.

ECEN 3500 ELECTRICAL ENGINEERING INTERNSHIP OR COOPERATIVE EDUCATION (1-3 credits)

Approval of faculty sponsor prior to the internship or Co-op is required. For Internships or Cooperatives primarily technical in nature lasting 4.5 months or greater. Weekly communication and/or final report required. Must be taken during or after the semester in which the Internship/Co-op occurs.

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

ECEN 3520 ELECTRONIC CIRCUITS II (4 credits)

Operational amplifier circuit design and analysis with emphasis on feedback and stability. Design and analysis of large signal power amplifiers. Other integrated devices such as regulators, comparators, Schmitt triggers, oscillators and active filters.

Prerequisite(s)/Corequisite(s): ECEN 2220

ECEN 3550 SIGNALS AND LINEAR SYSTEMS (3 credits)

Continuous and discrete time representations of signals. System modeling and analysis using differential and difference equations. Fourier, Laplace and z transforms. State description of continuous and discrete time transfer functions. The primary mathematical tools used in the analysis of continuous and discrete time systems.

Prerequisite(s)/Corequisite(s): ECEN 2140

ECEN 3610 ADVANCED ELECTRONICS AND CIRCUITS (3 credits)

Analog and digital electronics for discrete and integrated circuits. Multistage amplifiers, frequency response, feedback amplifiers, simple filters and amplifiers MOS and bipolar logic gates and families A/D and D/A converters.

Prerequisite(s)/Corequisite(s): ECEN 3160; not open to non-degree graduate students.

ECEN 3620 DATA AND TELECOMMUNICATIONS TRANSCEIVERS (4 credits)

Noise and signal distortions in communication systems, impedance matching techniques, high frequency measurement techniques, design of high frequency amplifiers and oscillators, PLL and frequency synthesizers, data synchronization and multiplexing techniques, Antennas and their arrays.

Prerequisite(s)/Corequisite(s): ECEN 3520; Pre or Coreq.: ECEN 3250, ECEN 3280

ECEN 3700 DIGITAL LOGIC DESIGN (3 credits)

Combinational and sequential logic circuits. MSI chips, programmable logic devices (PAL, ROM, PLA) used to design combinational and sequential circuits. CAD tools. LSI and PLD components and their use. Hardware design experience.

Prerequisite(s)/Corequisite(s): ECEN 1210, not open to non-degree graduate students.

ECEN 3920 INDIVIDUAL STUDY IN ELECTRICAL AND COMPUTER ENGINEERING III (1-3 credits)

Individual study in a selected electrical, computer or electronics engineering area under the supervision and guidance of a electric and computer engineering faculty member.

Prerequisite(s)/Corequisite(s): Junior standing and ECE departmentally approved proposal.

ECEN 3940 SPECIAL TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING III (1-4 credits)

Special topics in the emerging areas in electrical, computer and electronics engineering which may not be covered in the other courses in the Electrical and Computer engineering curriculum.

Prerequisite(s)/Corequisite(s): Junior standing or permission.

ECEN 3980 SPECIAL TOPICS ELECTRICAL ENGINEERING III (1-6 credits)

Offered as the need arises to treat electrical engineering topics for third-year students not covered in other courses.

Prerequisite(s)/Corequisite(s): Permission. Not open to nondegree students.

ECEN 3990 UNDERGRADUATE RESEARCH (1-3 credits)

Research accompanied by a written report.

Prerequisite(s)/Corequisite(s): Electrical engineering seniors or permission., not open to non-degree graduate students

ECEN 4000 ELECTRONIC INSTRUMENTATION (3 credits)

Applications of analog and digital devices to electronic instrumentation. Includes transducers, instrumentation amplifiers, mechanical and solid state switches, data acquisition systems, phase-lock loops, and modulation techniques. Demonstrations with working circuits and systems. (Cross-listed with ECEN 8006)

Prerequisite(s)/Corequisite(s): Senior Standing in Engineering or Permission. Not open to non-degree graduate students.

ECEN 4060 POWER SYSTEMS ANALYSIS (3 credits)

Symmetrical components and fault calculations, power system stability, generator modeling (circuit view point), voltage control system, high voltage DC transmission, and system protection. (Cross-listed with ECEN 8066)

Prerequisite(s)/Corequisite(s): ECEN 3380, not open to non-degree graduate students.

ECEN 4070 POWER SYSTEMS PLANNING (3 credits)

Economic evaluation, load forecasting, generation planning, transmission planning, production simulation, power plant reliability characteristics, and generation system reliability. (Cross-listed with ECEN 8076)

Prerequisite(s)/Corequisite(s): ECEN 3050, not open to non-degree graduate students.

ECEN 4080 ENGINEERING ELECTROMAGNETICS (3 credits)

Applied electromagnets: Transmission lines in digital electronics and communication. The quasistatic electric and magnetic fields; electric and magnetic circuits and electromechanical energy conversion. Guided waves; rectangular and cylindrical metallic waveguides and optical filters. Radiation and antennas; line and aperture antennas and arrays. (Cross-listed with ECEN 8086)

Prerequisite(s)/Corequisite(s): ECEN 3060, not open to non-degree graduate students.

ECEN 4100 MULTIVARIATE RANDOM PROCESSES (3 credits)

Probability space, random vectors, multivariate distributions, moment generating functions, conditional expectations, discrete and continuous-time random processes, random process characterization and representation, linear systems with random inputs. (Cross-listed with ELEC 8106)

Prerequisite(s)/Corequisite(s): ECEN 3050. Not open to non-degree graduate students.

ECEN 4160 MATERIALS AND DEVICES FOR COMPUTER MEMORY, LOGIC, AND DISPLAY (3 credits)

Survey of fundamentals and application of devices used for memory, logic, and display. Magnetic, superconductive, semi-conductive, and dielectric materials. (Cross-listed with ECEN 8166)

Prerequisite(s)/Corequisite(s): PHYS 2120, not open to non-degree graduate students.

ECEN 4170 SEMICONDUCTOR FUNDAMENTALS II (3 credits)

Analysis of BJT's and MOSFET's from a first principle materials viewpoint. Statics and dynamic analysis and characterization. Device fabrication processes. (Cross-listed with ECEN 8176)

Prerequisite(s)/Corequisite(s): ECEN 4210 or ECEN 8216. Not open to non-degree graduate students.

ECEN 4200 PLASMA PROCESSING OF SEMICONDUCTORS (3 credits)

Physics of plasmas and gas discharges developed. Includes basic collisional theory, the Boltzman equation and the concept of electron energy distribution. Results are related to specific gas discharge systems used in semiconductor processing, such as sputtering, etching, and deposition systems. (Cross-listed with ECEN 8206)

Prerequisite(s)/Corequisite(s): Senior or graduate standing. Not open to non-degree graduate students.

ECEN 4210 PRINCIPLES OF SEMICONDUCTOR MATERIALS AND DEVICES I (3 credits)

Introduction to semiconductor fundamentals, charge carrier concentration and carrier transport, energy bands, and recombination. PN junction, static and dynamic, and special PN junction diode devices. (Cross-listed with ECEN 8216)

Prerequisite(s)/Corequisite(s): PHYS 2130. Not open to non-degree graduate students.

ECEN 4240 DIGITAL SIGNAL PROCESSING (3 credits)

The temporal and spectral analysis of digital signals and systems, the design of digital filters and systems, and advanced systems including multi-rate digital signal processing techniques. (Cross-listed with ECEN 8246)

Prerequisite(s)/Corequisite(s): ECEN 3550

ECEN 4280 POWER ELECTRONICS (3 credits)

Basic analysis and design of solid-state power electronic devices and converter circuitry. (Cross-listed with ECEN 8286)

Prerequisite(s)/Corequisite(s): ECEN 3040, ECEN 3160.

ECEN 4300 WIND ENERGY (3 credits)

This broad multidisciplinary course will combine engineering principles of both the mechanical/aerodynamical and electrical components and systems, along with economic and environmental considerations for siting and public policy, to appropriately cover the relevant topics associated with all scales of wind energy implementations. (Cross-listed with ECEN 8306)

Prerequisite(s)/Corequisite(s): Senior standing or permission.

ECEN 4330 MICROPROCESSOR SYSTEM DESIGN (4 credits)

Microprocessor based systems. Architecture; design and interfacing. Memory design, input/output ports, serial communications, and interrupts. Generating assembly ROM code, assembly/C firmware generation, and designing device drivers. (Cross-listed with ECEN 8336)

Prerequisite(s)/Corequisite(s): ECEN 3100 with grade of C or better and ECEN 3320 with grade of C or better.

ECEN 4350 EMBEDDED MICROCONTROLLER DESIGN (4 credits)

Microcontroller architecture: design, programming, and interfacing for embedded systems. Timing issues, memory interfaces, serial and parallel interfacing, and functions for common microcontrollers. (Cross-listed with ECEN 8356)

Prerequisite(s)/Corequisite(s): ECEN 4330/ECEN 8336 with grade of C or better, STAT 3800.

ECEN 4360 ELECTRIC MACHINES (3 credits)

Provides a solid background in electric machine analysis, covering fundamental concepts, techniques, and methods for analysis and design. Discussion of transformers and presentation of some new systems and applications. (Cross-listed with ECEN 8366)

Prerequisite(s)/Corequisite(s): PHYS 2120 and ECEN 2160

ECEN 4370 PARALLEL AND DISTRIBUTED PROCESS (3 credits)

Parallel and Distributed Processing concepts, principles, techniques and machines. (Cross-listed with ECEN 8376).

Prerequisite(s)/Corequisite(s): ECEN 4350 or ECEN 8356

ECEN 4420 BASIC ANALYTICAL TECHNIQUES IN ELECTRICAL ENGINEERING (3 credits)

Applications of partial differential equations, matrices, vector analysis, complex variables, and infinite series to problems in electrical engineering. (Cross-listed with ECEN 8426)

Prerequisite(s)/Corequisite(s): MATH 2350. Not open to non-degree graduate students.

ECEN 4440 LINEAR CONTROL SYSTEMS (3 credits)

Classical (transfer function) and modern (state variable) control techniques. Both time domain and frequency domain techniques are studied. Traditional, lead, lag, and PID compensators are examined, as well as state variable feedback. (Cross-listed with ECEN 8446)

Prerequisite(s)/Corequisite(s): ECEN 3040. Not open to non-degree graduate students.

ECEN 4480 DECISION ANALYSIS (3 credits)

Principles of engineering economy including time value of money, net present value, and internal rate of return. Use of influence diagram and decision tree to structure and analyze decision situations under uncertainty including use of stochastic dominance, value of information, and utility theory. Fundamentals of two-person matrix games including Nash equilibrium. (Cross-listed with ECEN 8486)

Prerequisite(s)/Corequisite(s): ECEN 3050 or STAT 3800.

ECEN 4500 BIOINFORMATICS (3 credits)

This course examines how information is organized in biological sequences such as DNA and proteins and will look at computational techniques which make use of this structure. During this class various biochemical processes that involve these sequences are studied to understand how these processes effect the structure of these sequences. In the process bioinformatics algorithms, tools, and techniques which are used to explore genomic and amino acid sequences are also introduced. (Cross-listed with ECEN 8506)

Prerequisite(s)/Corequisite(s): Computer programming language and ECEN 3050 or STAT 3800 or equivalent.

ECEN 4510 INTRODUCTION TO VLSI SYSTEM DESIGN (3 credits)

The concepts, principles, and methodology at all levels of digital VLSI system design and focused on gate-level VLSI implementation. (Cross-listed with ECEN 8516).

Prerequisite(s)/Corequisite(s): ECEN 3100

ECEN 4520 INTRODUCTION TO COMPUTER-AIDED DIGITAL DESIGN (3 credits)

The concepts, simulation techniques and methodology in computer-aided digital design at system and logic levels. (Cross-listed with ECEN 8526)

Prerequisite(s)/Corequisite(s): ECEN 3100

ECEN 4530 COMPUTATIONAL AND SYSTEMS BIOLOGY (3 credits)

Provides the required biology primer and covers functional genomics, transcriptomics, differential expression, clustering, classification, prediction, biomarker discovery, pathway analysis and network based approaches to high throughput biological data analysis. Includes the development of databases, algorithms, web-based and other tools regarding management and analysis of life science data. Areas of study include DNA, RNA, and protein sequence analysis, functional genomics and proteomics, 3D macromolecule structure prediction, and systems/network approach. (Cross-listed with ECEN 8536).

Prerequisite(s)/Corequisite(s): By permission.

ECEN 4540 POWER SYSTEMS OPERATION AND CONTROL (3 credits)

Characteristics and generating units. Control of generation, economic dispatch, transmission losses, unit commitment, generation with limited supply, hydrothermal coordination, and interchange evaluation and power pool. (Cross-listed with ECEN 8546)

Prerequisite(s)/Corequisite(s): ECEN 3380 or ECEN 8385. Not open to non-degree graduate students.

ECEN 4600 LABVIEW PROGRAMMING (3 credits)

Labview as a programming language and for applications to acquire data, to access the network, control lab instruments, and for video and sound applications. (Cross-listed with ECEN 8606)

Prerequisite(s)/Corequisite(s): Prior programming experience.

ECEN 4610 DIGITAL COMMUNICATIONS MEDIA (4 credits)

Topics related to the transport of bit streams from one geographical location to another over various physical media such as wire pairs, coaxial cable, optical fiber, and radio waves. Transmission characteristics, media interfacing, delay, distortion, noise, and error detection and correction techniques. (Cross-listed with ECEN 8616)

Prerequisite(s)/Corequisite(s): ECEN 3250 or ECEN 4620

ECEN 4620 COMMUNICATION SYSTEMS (3 credits)

Mathematical descriptions of signals in communication systems. Principles of analog modulation and demodulation. Performance analysis of analog communication systems in the presence of noise. (Cross-listed with ECEN 8626)

Prerequisite(s)/Corequisite(s): ECEN 3040 and ECEN 3050. Not open to non-degree graduate students.

ECEN 4630 DIGITAL SIGNAL PROCESSING (3 credits)

Discrete system analysis using Z-transforms. Analysis and design of digital filters. Discrete Fourier transforms. (Cross-listed with ECEN 8636)

Prerequisite(s)/Corequisite(s): ECEN 3040. Not open to non-degree graduate students.

ECEN 4640 DIGITAL COMMUNICATION SYSTEMS (3 credits)

Principles of digital transmission of information in the presence of noise. Design and analysis of baseband PAM transmission systems and various carrier systems including ASK, FSK, PSK. (Cross-listed with ECEN 8646)

Prerequisite(s)/Corequisite(s): ECEN 4620. Not open to non-degree graduate students.

ECEN 4650 INTRODUCTION TO DATA COMPRESSION (3 credits)

Introduction to the concepts of Information Theory and Redundancy removal. Simulation of various data compression schemes such as Delta Modulation, Differential Pulse Code Modulation, Transform Coding and Runlength Coding. (Cross-listed with ECEN 8656)

Prerequisite(s)/Corequisite(s): ECEN 3050. Not open to non-degree graduate students.

ECEN 4660 TELECOMMUNICATION ENGINEERING I (4 credits)

Standard telecommunications protocols, architecture of long distance integrated data networks, local area networks, wide area networks, radio and satellite networks. Network management, internetworking, system modeling and performance analysis. (Cross-listed with ECEN 8666)

Prerequisite(s)/Corequisite(s): ECEN 3620; ECEN 4610/ECEN 8616 prior to or concurrent.

ECEN 4670 ELECTROMAGNETIC THEORY AND APPLICATION (3 credits)

Engineering application of Maxwell's equations. Fundamental Parameters of Antennas, Radiation analysis, and synthesis of antenna arrays. Aperture Antennas. (Cross-listed with ECEN 8676)

Prerequisite(s)/Corequisite(s): ECEN 3060. Not open to non-degree graduate students.

ECEN 4680 MICROWAVE ENGINEERING (3 credits)

Applications of active and passive devices to microwave systems. Includes impedance matching, resonators, and microwave antennas. (Cross-listed with ECEN 8686)

Prerequisite(s)/Corequisite(s): ECEN 3060. Not open to non-degree graduate students.

ECEN 4690 ANALOG INTEGRATED CIRCUITS (3 credits)

Analysis and design of analog integrated circuits both bipolar and MOS. Basic circuit elements such as differential pairs, current sources, active loads, output drivers used in the design of more complex analog integrated circuits. (Cross-listed with ECEN 8696)

Prerequisite(s)/Corequisite(s): ECEN 3610. Not open to non-degree graduate students.

ECEN 4700 DIGITAL AND ANALOG VLSI DESIGN (3 credits)

Introduction to VLSI design techniques for analog and digital circuits. Fabrication technology and device modeling. Design rules for integrated circuit layout. LSI design options with emphasis on the standard cell approach of digital and analog circuits. Lab experiments, computer simulation and layout exercises. (Cross-listed with ECEN 8706)

Prerequisite(s)/Corequisite(s): ECEN 3610. Not open to non-degree graduate students.

ECEN 4710 COMPUTER COMMUNICATION NETWORKS (4 credits)

This course investigates the standard protocols and hardware solutions defined by the International Standard Organization (ISO) and Institute of Electrical and Electronics Engineers (IEEE) for the computer communications networks. Included are ISO OSI model, IEEE 802.X (Ethernet, token bus, token ring) and Asynchronous Transfer Modals (ATM) networks. (Cross-listed with ECEN 8716)

Prerequisite(s)/Corequisite(s): ECEN 3250

ECEN 4730 MOBILE AND PERSONAL COMMUNICATIONS (4 credits)

This course provides basic concepts on mobile and personal communications. Concepts on mobile and personal communications. Modulation techniques for mobile radio, equalization, diversity, channel coding, and speech coding. (Cross-listed with ECEN 8736)

Prerequisite(s)/Corequisite(s): ECEN 3250

ECEN 4740 DIGITAL SYSTEMS (3 credits)

Synthesis using state machines; design of digital systems; micro programming in small controller design; hardware description language for design and timing analysis. (Cross-listed with ECEN 8746)

Prerequisite(s)/Corequisite(s): ECEN 3700. Not open to non-degree graduate students.

ECEN 4750 SATELLITE COMMUNICATIONS (4 credits)

The fundamental concepts of satellite communications. Orbits, launching satellites, modulation and multiplexing, multiple access, earth stations, coding, interference and special problems in satellite communications. (Cross-listed with ECEN 8756)

Prerequisite(s)/Corequisite(s): ECEN 3250

ECEN 4760 WIRELESS COMMUNICATIONS (3 credits)

The fundamental concepts of wireless communications. Basic communications concepts such as multiple access, and spectrum. Propagation, radio, standards, and internetworking. Current issues in wireless communications. (Cross-listed with ECEN 8766)

Prerequisite(s)/Corequisite(s): ECEN 3250 or ECEN 4620 prior to or concurrent

ECEN 4770 DIGITAL SYSTEMS ORGANIZATION AND DESIGN (3 credits)

Hardware development languages, hardware organization and realization, microprogramming, interrupt, intersystem communication, and peripheral interfacing. (Cross-listed with ECEN 8776)

Prerequisite(s)/Corequisite(s): ECEN 4740 or ECEN 8746. Not open to non-degree graduate students.

ECEN 4790 OPTICAL FIBER COMMUNICATIONS (4 credits)

Fundamentals of lightwave communication in optical fiber waveguides, physical description of fiber optic systems. Properties of the optical fiber and fiber components. Electro-optic devices: light sources and modulators, detectors and amplifiers; optical transmitter and receiver systems. Fiber optic link design and specification; fiber optic networks. (Cross-listed with ECEN 8796)

Prerequisite(s)/Corequisite(s): ECEN 4630.

ECEN 4800 INTRODUCTION TO LASERS AND LASER APPLICATIONS (3 credits)

Physics of electronic transition production stimulated emission of radiation. Threshold conditions for laser oscillation. Types of lasers and their applications in engineering. (Cross-listed with ECEN 8806)

Prerequisite(s)/Corequisite(s): PHYS 2130

ECEN 4820 ANTENNAS AND RADIO PROPAGATION FOR WIRELESS COMMUNICATIONS (4 credits)

Fundamental theory of antennas and radio propagation for wireless communications. Basic antenna characteristics and various antennas and antenna arrays. Basic propagation mechanisms and various channel models, such as Friis free space model, Hata model, lognormal distribution, and multipath model. Includes practical antenna design for high radio frequency (RF) with modeling software tools such as Numerical Electromagnetic Code (NEC) and ADvanced Design System (ADS). Design projects will be assigned as the main part of course. (Cross-listed with ECEN 8826)

Prerequisite(s)/Corequisite(s): ECEN 3280

ECEN 4840 NETWORK SECURITY (4 credits)

Network security and cryptographic protocols. Classical encryption techniques, block ciphers and stream cyphers, public-key cryptography, authentications digital signatures, key management and distributions, network vulnerabilities, transport-level security, IP security. (Cross-listed with ECEN 8846)

Prerequisite(s)/Corequisite(s): ECEN 3250

ECEN 4860 APPLIED PHOTONICS (3 credits)

Introduction to the use of electromagnetic radiation for performing optical measurements in engineering applications. Basic electromagnetic theory and light interaction with matter are covered with corresponding laboratory experiments conducted. (Cross-listed with ECEN 8866)

Prerequisite(s)/Corequisite(s): ECEN 3060 or permission. Not open to non-degree graduate students.

ECEN 4880 WIRELESS SECURITY (4 credits)

A comprehensive overview on the recent advances in wireless network and system security. Covers security issues and solutions in emerging wireless access networks and systems as well as multihop wireless networks. (Cross-listed with ECEN 8886)

Prerequisite(s)/Corequisite(s): ECEN 3250

ECEN 4910 SPECIAL TOPICS IN ELECTRIC AND COMPUTER ENGINEERING IV (1-4 credits)

Special topics in the emerging areas of electrical, computer and electronics engineering which may not be covered in the other courses in the electrical, and computer engineering curriculum. (Cross-listed with ECEN 8916)

Prerequisite(s)/Corequisite(s): Senior standing

ECEN 4920 INDIVIDUAL STUDY IN ELECTRICAL AND COMPUTER ENGINEERING IV (1-3 credits)

Individual study in a selected electrical, computer or electronics engineering area under the supervision and guidance of a Electrical and Computer Engineering faculty member. (Cross-listed with ECEN 8926).

Prerequisite(s)/Corequisite(s): Senior or graduate standing and departmentally approved proposal.

ECEN 4940 ELECTRICAL ENGINEERING CAPSTONE I (2 credits)

A substantial design project that allows application of electrical engineering skills to a multidisciplinary project. Requires project definition, planning and scheduling, effective written and oral communication of technical ideas, incorporation of realistic constraints and engineering standards, functioning effectively on a multidisciplinary team, and applying new ideas as needed to meet project goals. The first in a two semester electrical engineering capstone senior design course sequence.

Prerequisite(s)/Corequisite(s): ECEN 2220, ECEN 3040, ECEN 3060, ECEN 3130, and (UNO) ENGL 1160. The ECE department changed its English composition requirements to ENGL 1160 (UNO); ENGL 1160 is required, not technical writing.

ECEN 4950 ELECTRICAL ENGINEERING CAPSTONE II (3 credits)

A substantial design project that allows application of electrical engineering skills to a multidisciplinary project. Requires project definition, planning and scheduling, effective written and oral communication of technical ideas, incorporation of realistic constraints and engineering standards, functioning effectively on a multidisciplinary team and applying new ideas as needed to meet project goals.

Prerequisite(s)/Corequisite(s): ECEN 4940

ECEN 4960 COMPUTER ENGINEERING CAPSTONE I (2 credits)

A substantial design project that allows application of computer engineering skills to a multidisciplinary project. Requires project definition, planning and scheduling, effective written and oral communication of technical ideas, incorporation of realistic constraints and engineering standards, functioning effectively on a multidisciplinary team, and applying new ideas as needed to meet project goals. The first in a two semester computer engineering capstone senior design course sequence.

Prerequisite(s)/Corequisite(s): ECEN 4330; (UNO) ENGL 1160. The ECE department changed its English composition requirements to ENGL 1160 (UNO); ENGL 1160 is required, not technical writing.

ECEN 4980 SPECIAL TOPICS IN ELECTRICAL ENGINEERING IV (1-6 credits)

Offered as the need arises to meet electrical engineering topics for fourth-year and graduate students not covered in other courses. (Cross-listed with ECEN 8986)

Prerequisite(s)/Corequisite(s): Permission. Not open to non-degree graduate students.

ECEN 4990 COMPUTER ENGINEERING CAPSTONE II (3 credits)

Requires the completion of a design project that demonstrates the ability to combine knowledge from individual courses in the program to complete a design task. The capstone design course for the B.S. in computer engineering, electrical engineering and electronics engineering.

Prerequisite(s)/Corequisite(s): ECEN 4960. Not open to non-degree graduate students.

Computer Engineering, Bachelor of Science

The 124 credit hour program in computer engineering leads to the Bachelor of Science degree in Computer Engineering. Thirty-two (32) hours of mathematics and physics and 9 hours of computer science complement the required 44 hours of work in the computer engineering area. Six (6) hours in written and oral communications, 15 hours in the humanities and social sciences, and 18 hours of engineering electives provide the opportunity for the student to acquire a general educational background and gain the cultural attributes associated with a university education.

The individual holding this degree will have advanced knowledge in his or her field of engineering interest and in addition will have a university educational background involving mathematics, the physical sciences, and the humanities and social sciences. Completion of this curriculum will enable the graduate to enter employment in positions involving computer hardware design and applications, computer software design and development, microcomputer based applications, and computer networking. The program also leads to the preparation for graduate work in computer engineering, computer science or electrical engineering.

Accreditation

The Electrical and Computer Engineering (ECE) department's Computer Engineering Program (CENG) is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org/>)

Program Educational Objectives

The department's Program Educational Objectives are a statement of what graduates are doing, or are capable of doing, three to five years after graduation. The students in the Computer Engineering program receive a strong foundation in engineering science and design that not only enables them to pursue productive careers in the computer engineering field but that can be used as the foundation for careers in other areas, such as business, management, and medicine. Typical industries in which Computer Engineering graduates are employed include microprocessor/embedded system design, digital design, hardware/software integration, and computer architecture and parallel processing.

The Computer Engineering program prepares graduates for their professional careers with the objective that within five years after graduation they will be:

- Employed in business, academia, or government.
- Successful engineers who have established productive careers in their field and have contributed to improve and provide innovative and effective solutions in computer engineering or related fields.
- Demonstrating technical and decision-making processes and the human interactions necessary to produce viable, responsible, and sustainable technological solutions.
- Engaging in lifelong learning, which may include postgraduate education, to successfully adapt to technological, industry specific, and cultural changes and to foster adept functioning in society.
- Performing engineering practice in a context that reflects awareness of the ethics of their profession and of the impacts of their work on the profession and society at large.

These Program Educational Objectives were developed with input from the program's educational objectives constituency, consisting of employers (including the Industry Advisory Board), graduates of the program, and faculty of the department.

Learning Outcomes

Learning Outcomes are those abilities that a graduate of the Computer Engineering program will have attained so that he/she can meet the educational objectives established for the program.

At the time of graduation, students in the ECE Computer Engineering program will have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Professional Admission Requirements

Pre-professionally admitted College of Engineering students majoring in computer engineering will be granted profession admission into the computer engineering program if the students have:

- maintained a cumulative GPA of at least 2.4 and is in good standing in the College of Engineering, and
- completed ECEN 2130 Electrical Circuits I or ECEN 2150 Electronics and Circuits I and ECEN 3130 Switching Circuit Theory or ECEN 3700 Digital Logic Design with a grade of C or better.

A transfer student will be admitted if he/she has:

- completed courses equivalent to ECEN 2130 or ECEN 2150 and ECEN 3130 or ECEN 3700 at other institutions with acceptable transfer grades of C or better, and
- earned a GPA of 2.4 or better during their first 12 credit hours in computer engineering course work at UNL/UNO.

Transfer students will be able to appeal to the College's Academic Appeals Committee for admission for an additional semester if they fail to meet the GPA requirement.

See the College of Engineering section of the catalog for details on admission to the college.

Total Credits		124

¹ ACE elective: Choose one course from each ACE Student Learning Outcome (SLO) 5,6,7 and 9 elective course. ENGR 4690 satisfies ACE SLO 8.

² Students may substitute ENGR 1000 for CMST 1110

³ Engineering electives may be selected from ECE junior and senior or approved sophomore level courses. Three hours of engineering electives may be selected from an approved list of non-ECE courses.

Engineering Electives

The computer engineering program requires 18 hours of engineering electives. These consist of at least 15 hours of any ECEN course at the junior or senior level. Students can substitute three (3) of these hours with a course from the following list.

Computer Science (CSCI) Courses:

4150/8156	Graph Theory and Applications
4220/8226	Programming Languages
4300/8306	Deterministic Operations Research Models
4310/8316	Probabilistic Operations Research Models
4440/8446	Introduction to Parallel Computing
4450/8456	Introduction to Artificial Intelligence
4470/8476	Pattern Recognition
4500/8506	Operating Systems
4510/8516	Advanced Operating Systems
4620/8626	Computer Graphics
4660/8666	Automata, Computability and Formal Languages
4760/8766	Topics in Modeling

4830/8836 Introduction to Software Engineering

4850/8856 Database Management Systems

Math (MATH) Courses:

4150/8156 Graph Theory and Applications

4300/8306 Deterministic Operations Research Models

4310/8316 Probabilistic Operations Research Models

4660/8666 Automata, Computability and Formal Languages

4760/8766 Topics in Modeling

Electrical Engineering, Bachelor of Science

The Department of Electrical and Computer Engineering offers a complete electrical engineering undergraduate program to students on the City (Lincoln) and Scott (Omaha) campuses of the University of Nebraska. Curriculum requirements for the electrical engineering major are nearly identical on both campuses and students can complete all degree requirements on either campus.

Electrical engineering is concerned with the production, transmission, and utilization of electrical energy and the creation, transmission and processing of information. This includes power generation and transmission systems, motors, batteries and control systems, as well as radio frequency (RF) systems, telecommunications, remote sensing, signal processing, digital circuits, instrumentation, audio, video and opto-electronics. Employment opportunities for electrical engineers cover a wide spectrum of activities including design, development, research, sales, and management. These activities are carried on in industrial organizations, public and private utilities, the communications and computer industry, governmental and educational institutions, and consulting engineering firms. The objective of this major is to offer students an education to become productive electrical engineers and be active, contributing citizens of the nation and the world.

This department has over 40 faculty involved in research related to electronic materials, nanotechnology, optical systems, communications, biomedical applications, signal processing, microelectronics design, energy systems, and electromagnetics. Students are encouraged to participate in research activities, and have opportunities to travel and present their work at research conferences.

The department has extensive research facilities for all areas including state of the art computing facilities, integrated circuits and systems research facilities, communications and signal processing laboratories, applied electromagnetics research, solid state laboratories, nanostructures research, electro-optics research and energy systems laboratories.

The curriculum is designed to provide a broad education in fundamental principles and laboratory applications, and an awareness of the socioeconomic impact of technology. Technical electives are normally selected from advanced courses in electrical engineering to provide for specialization in selected areas as well as breadth and depth of knowledge. However, technical electives can also be selected from courses offered by other departments of the College of Engineering or from appropriate courses in physics, chemistry, mathematics, and biological sciences.

Accreditation

The Electrical and Computer Engineering (ECE) department's Electrical Engineering Program (EE) is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org/>)

Program Educational Objectives

The Program Educational Objectives (PEOs) for the electrical engineering program are a statement of what its graduates are doing or are capable of doing three to five years after graduation. Electrical engineering is concerned with the production, transmission, and utilization of electrical energy and the transmission and processing of information. Employment opportunities for electrical engineers cover a wide spectrum of activities including design, development, research, sales, and management. These activities are carried on in industrial organizations, public and private utilities, the communications and computer industry, governmental and educational institutions, and consulting engineering firms. Careers may encompass electronic materials, nanotechnology, optical systems, communications, biomedical applications, signal processing, microelectronics design, energy systems, and electromagnetics. The objective of this program is to offer students an education to become productive electrical engineers and be active, contributing citizens of the nation and the world.

The Program Educational Objectives for the electrical engineering program are that graduates will be:

- Employed in business, academia, or government.
- Successful engineers who have established productive careers in their field and have contributed to improve and provide innovative and effective solutions in electrical engineering or related fields.
- Demonstrating technical and decision-making processes and the human interactions necessary to produce viable, responsible, and sustainable technological solutions.
- Engaging in lifelong learning, which may include postgraduate education, to successfully adapt to technological, industry specific, and cultural changes and to foster adept functioning in society.
- Performing engineering practice in a context that reflects awareness of the ethics of their profession and of the impacts of their work on the profession and society at large.

These Program Educational Objectives were developed with input from the program's educational objectives constituency, consisting of employers (including the Industry Advisory Board), graduates of the program, and faculty of the department.

Student Outcomes

Student Outcomes are those abilities that a graduate of the Electrical Engineering program will have attained so that he/she can meet the educational objectives established for the program.

At the time of graduation, students in the ECE Electrical Engineering program will have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Professional Admission Requirements

Pre-professionally admitted College of Engineering students majoring in electrical engineering will be granted profession admission into the electrical engineering program if the students have:

- maintained a cumulative GPA of at least 2.4 and is in good standing in the College of Engineering, and
- completed ECEN 2130 Electrical Circuits I or ECEN 2150 Electronics and Circuits I and ECEN 2140 Electrical Circuits II or ECEN 2160 Electronics and Circuits II with a grade of C or better.

A transfer student will be admitted if he/she has:

- completed courses equivalent to ECEN 2130 or ECEN 2150 and ECEN 2140 or ECEN 2160 at other institutions with acceptable transfer grades of C or better, and
- earned a GPA of 2.4 or better during their first 12 credit hours in electrical engineering course work at UNL/UNO.

Transfer students will be able to appeal to the College's Academic Appeals Committee for admission for an additional semester if they fail to meet the GPA requirement.

See the College of Engineering section of the catalog for details on admission to the college.

Students graduating with a Bachelor of Science in Electrical Engineering degree must successfully complete 125 credit hours as follows:

Code	Title	Credits
	Required electrical engineering courses	41
	Required math and science courses	32
	Technical electives ¹	27

¹ Of the 27 credit hours of technical electives, at least 12 credit hours must be taken as electrical engineering (ECEN) courses, which are referred to as "EE Option Technical Electives." The remaining 15 credit hours of technical electives which are referred to as "EE or Other Technical Electives" may be taken from any 300 or 400 level course offering (with some exceptions) in the department of Electrical and Computer Engineering or in any other engineering department within the College of Engineering, or in the departments of Biological Sciences, Chemistry, Computer Science and Engineering, Mathematics, Statistics, or Physics and Astronomy at UNL or UNO.

- ³ The department maintains of approved list of technical electives (within and outside of ECE) on the department website.

Total Credit Hours Required for Graduation - **125 Hours**

Technical Electives

Each EE undergraduate student must choose one of the emphasis areas listed below for the EE technical electives.

Electrical Engineering Emphasis Areas

Communications and Signal Processing

Electromagnetic Fields and Optics

Electronics

Energy and Power Systems

Materials and Devices

Bioengineering

Modeling and Simulation

Telecommunications

Electives

There are 27 credit hours of technical electives required. Of these 27 credit hours, at least 12 credit hours must be taken in one of the electrical engineering (ECEN) emphasis areas. Below is a list of courses in each emphasis area.

Communications & Signal Processing

ECEN 4100	Multivariate Random Processes
ECEN 3250/ECEN 4620 core	Communications Systems/
Communications Systems	
ECEN 4240/ECEN 4630 core	Digital Signal Processing/Digital
Signal Processing	
ECEN 4610/ECEN 4640	Digital Communications Media/
Digital Communication Systems	
ECEN 4650	Intro Data Compression

Electromagnetic Fields and Optics

ECEN 4080 core	Engineering Electromagnetics
ECEN 4670	Electromagnetic Theory and
Applications	
ECEN 4680	Microwave Engineering
ECEN 4790	Optical Fiber Communications
ECEN 4800	Introduction to Lasers and Laser
applications	
ECEN 4860	Applied Photonics

Electronics

ECEN 3100/ ECEN 4740 core	Digital Design and Interfacing/ Digital Systems
ECEN 3520/ECEN 3610 core	Electronic Circuits II/Advanced Electronics and Circuits
ECEN 3620	Data and Telecommunications Transceivers
ECEN 4690	Analog Integrated Circuits
ECEN 4700	Digital and Analog VLSI Design
Energy and Power Systems	
ECEN 3380 core	Intro Power and Energy Systems
ECEN 4060	Power Systems Analysis
ECEN 4280 core	Power Electronics
ECEN 4300	Wind Energy
ECEN 4360	Electric Machines
ECEN 4440	Linear Control Systems
ECEN 4980 X	Solar Energy
Materials and Devices	
ECEN 4170	Semiconductor Fundamentals II
ECEN 4200	Plasma Processing of
Semiconductors	
ECEN 4210 core	Principles of Semiconductor
Materials and Devices I	
ECEN 4220	Introduction to Physics and
Chemistry of Solids	
Bioengineering	
ECEN 4500 core	Bioinformatics
ECEN 4600	Labview Programming
ECEN 4530	Computational and Systems
Biology	
ECEN 4980 S	Bioengineering Image and Signal
Processing	
Modeling and Simulation

Telecommunications Engineering

Of the 12 credit hours required in an emphasis area which are referred to as "EE Option Technical Electives", 6 credit hours must be taken from one of the eight EE emphasis areas listed. This must include at least one Core Course in that area.

In addition, at least one 3 credit hour course from a different EE emphasis area must be taken. The remaining 3 credits may be satisfied by any non-required 3000- or 4000-level ECEN course except ECEN 3990 Undergraduate Research.

The remaining 15 credit hours of technical electives which are referred to as "EE or other Technical Electives" may be taken from any 3000- or 4000-level course offering (with the exception of those listed below) in the Department of Electrical and Computer Engineering or in any other engineering department within the College of Engineering at UNL, or in the UNO Departments of Biology, Chemistry, Computer Science, Mathematics, or Physics or in the UNL Departments of Biological Sciences, Chemistry, Computer Science and Engineering, Mathematics, Statistics, or Physics and Astronomy.

Not Allowed 300- and 400-Level Technical Electives

ENGR 4690 Technology, Science and Civilization

BIOL 3500 Biological Principles of Aging

BIOL 3660 Introduction to Sustainable Landscape Design

CSCI 3710 Introduction to Digital Design and Computer Organization

STAT 3000 Statistical Methods I

UNL BIOS 310 School of Biological Sciences Seminar

UNL IMSE 305 Introduction to Engineering Management

MATH 4980 Seminar or UNL MATH 495 (<http://bulletin.unl.edu/undergraduate/courses/MATH/495/>) Seminar

UNL MATH 496 (<http://bulletin.unl.edu/undergraduate/courses/MATH/496/>) Seminar in Mathematics

or any other seminar-type courses.

Allowed 100 and 200 Level Technical Electives

UNL AGEN 225 (<http://bulletin.unl.edu/undergraduate/courses/AGEN/225/>) Engineering Properties of Biological Materials (BSEN 225 (<http://bulletin.unl.edu/undergraduate/courses/BSEN/225/>))

PHYS 4350 Astrophysics or ASTR 204 Introduction to Astronomy & Astrophysics

UNL ASTR 224 (<http://bulletin.unl.edu/undergraduate/courses/ASTR/224/>) Astronomy & Astrophysics Lab

BIOL 2140 Genetics or UNL BIOS 206 (<http://bulletin.unl.edu/undergraduate/courses/BIOS/206/>) General Genetics

BIOL 2740 Human Physiology and Anatomy I or UNL BIOS 213 (<http://bulletin.unl.edu/undergraduate/courses/BIOS/213/>) Human Physiology

CHEM 1190 General Chemistry II and CHEM 1194 General Chemistry II Laboratory or UNL CHEM 110 (<http://bulletin.unl.edu/undergraduate/courses/CHEM/110/>) General Chemistry II

CHEM 1190 General Chemistry II or UNL CHEM 114 (<http://bulletin.unl.edu/undergraduate/courses/CHEM/114/>) Fundamental Chemistry II

Any 2000 level chemistry course or UNL CHEM 2xx

CSCI 1620 Introduction to Computer Science II or UNL CSCE 156 (<http://bulletin.unl.edu/undergraduate/courses/CSCE/156/>) Computer Science II

MATH 2030 Discrete Mathematics or UNL CSCE 235 (<http://bulletin.unl.edu/undergraduate/courses/CSCE/235/>) Introduction to Discrete Structures

UNL CSCE 251 (<http://bulletin.unl.edu/undergraduate/courses/CSCE/251/>) Unix Programming Environment

UNL MATL 260 (<http://bulletin.unl.edu/undergraduate/courses/MATL/260/>) Elements of Materials Science

UNL MATL 262 (<http://bulletin.unl.edu/undergraduate/courses/MATL/262/>) Materials Lab I

MECH 2230 or UNL MECH 200 Engineering Statics

MECH 2500 or UNL MECH 250 Mechanics

MECH 2000 or UNL MECH 200 Engineering Thermodynamics

No more than a total of 3 credit hours may be taken in ECEN 3990 or similar offerings from other departments.

However, students can choose a "Research Option." The purpose of research option is to provide research experiences and offer opportunities for students to work with a faculty advisor on a specific research topic. A certificate of completion of thesis will be awarded to the students, and outstanding thesis awards will be presented at the end of semester functions. Requirements for the research option are listed below.

Research Option

1. Selection of a faculty advisor (ECE department faculty), research topic, and thesis committee (at least one other faculty).
2. Registration for 6 credit hours of undergraduate research (ECEN 3990) over at least two consecutive semesters on the same research topic.
3. GPA of above 3.0.
4. Write an undergraduate thesis or report and make an oral presentation to be graded by thesis committee members.

Science Electives

BIOL 1450 BIOLOGY I (5 cr) or UNL LIFE 120 and LIFE 120L FUNDAMENTALS OF BIOLOGY I

CHEM 1180 (3 cr) and CHEM 1184 (1 cr) or UNL CHEM 109 or CHEM 111 or CHEM 113

PHYS 2130 (4 cr) or UNL PHYS 213

Engineering Leadership Minor

Overview and Purpose

The engineering leadership minor provides students an opportunity to focus on building leadership, management, and interpersonal skills needed to solve many of our societal challenges. Students complete a series of leadership, project management and interpersonal skills courses using

experiential learning strategies and combine subject area knowledge gained in courses from their majors with strategies and skills to effectively lead in the engineering profession.

Courses included in the minor are leadership courses developed for the minor and focus on leadership, management and interpersonal skill needs of engineering students as well as courses lead by the faculty in the Department of Agricultural Leadership, Education and Communication.

This minor is intended to serve students in the College of Engineering. The minor contributes to the National Academy of Engineers call to expose engineering students to formal studies of leadership development (NAE, 2004) and the College of Engineering's mission to graduate the "Complete Engineer."

Eligibility

Open to students in the College of Engineering only.

Requirements

The engineering leadership minor is an interdisciplinary program; providing course offerings through the College of Engineering (COE) and the Department of Agricultural Leadership, Education and Communication (ALEC) at the University of Nebraska - Lincoln (UNL). To successfully complete the minor, students are required to complete 18 credit hours in leadership and professional development; 9 of which come from engineering leadership and management courses. Many of the ALEC courses are available as online courses. All ALEC courses are taught at the UNL.

Courses

Code	Title	Credits
ENGR Leadership & Management Courses (9 credit hours required)		
ENGR 1000	INTERPERSONAL SKILLS FOR ENGINEERING LEADERS (ACE 2)	3
ENGR 2000	PROFESSIONALISM & GLOBAL PERSPECTIVE (ACE 6 & 9)	3
ENGR 3200	LEADERSHIP, MANAGEMENT, AND ETHICS (ACE 6 & 8)	3
Leadership Courses (9 credit hours required)		9
Select one or two theory-based courses from the following:		
ALEC 202	FOUNDATION OF LEADERSHIP THEORY & PRACTICE	
ALEC 302	DYNAMICS OF EFFECTIVE LEADERSHIP IN ORGANIZATIONS	
ALEC 455	DYNAMICS OF EFFECTIVE LEADERSHIP IN GROUPS & TEAMS ¹	
ALEC 477	LEADERSHIP & MOTIVATION	
Select one or two application courses from the following:		
ALEC 407	SUPERVISORY LEADERSHIP	
ALEC 410	ENVIRONMENTAL LEADERSHIP ¹	
ALEC 422	FACILITATION & PROJECT PLANNING ¹	
ALEC 466	LEADERSHIP & DIVERSITY IN ORGANIZATIONS & COMMUNITIES ¹	
Experiential Learning in Leadership (0 -3 cr hrs)		
ALEC 337	INSTRUCTIONAL INTERNSHIP IN LEADERSHIP DEVELOPMENT ²	
Total Credits		18

¹ Note that junior standing is required for these courses.
² Credit received for being an undergraduate teaching assistant at the selection of the instructor.

Additional Minor Requirements

All courses must be completed with a Pass, or grade of C or higher.

Up to 6 credit hours may be taken as Pass/No Pass.

ENGR 100 FRESHMAN ENGINEERING SEMINAR (0 credits)

Overview of the engineering field as well as major specific information. Information will be provided to help with transitional needs to UNL and the college of engineering (time management, study skills, and resources), involvement opportunities (student organizations, research, and study abroad, tours of engineering facilities for experiential learning, and interactive learning to increase business knowledge and skills.

Prerequisite(s)/Corequisite(s): First year College of Engineering students. Not open to non-degree graduate students.

ENGR 150 SPATIAL VISUALIZATION TRAINING (0 credits)

Develop and improve spatial visualization skills.

ENGR 200 SOPHOMORE ENGINEERING SEMINAR (0 credits)

Overview of career opportunities in engineering and construction management. Emphasizes internships, cooperative education and career placement.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ENGR 1000 INTERPERSONAL SKILLS FOR ENGINEERING LEADERS (3 credits)

Establishes a foundation in communication and leadership skills that is needed for engineering students to be successful in their academic endeavors and future career opportunities. Introduction to the principles and practices of positive interpersonal relationships for leadership development. Self-awareness, awareness of others, effective interpersonal communication, and the building of trust relationships as a basis for understanding and developing leadership.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ENGR 1010 INTRODUCTION TO ENGINEERING (3 credits)

Students will examine relevant and practical industrial and commercial engineering applications to gain necessary engineering skills that will help them succeed as a student as well as a professional engineer. A variety of engineering disciplines will be highlighted and discussed, as well as topics in the underlying physical, chemical, and biological scientific principles and processes related to each topic. The class will use a specified focus area that involves real world applications to aid in the conceptualization and learning of the course material. Students will develop engineering problem solving skills; gain expertise and experience using modern engineering and computational tools; and emulate an engineering team atmosphere - each of which can be applied to a profession engineering environment.

ENGR 1910 FRESHMAN ENGINEERING SPECIAL TOPICS (1-3 credits)

Topics vary.

ENGR 2000 PROFESSIONALISM & GLOBAL PERSPECTIVE (3 credits)

Enhance essential professional skills for personal and team success through investigating issues in a global context. Explore in-demand professional aptitudes (self-awareness, emotional intelligence, teamwork, communication, and workplace interaction expectations). Through industry/community interaction, explore cultural and business norms and the application of broader perspectives to identify issues/solutions responsive and adaptive to their global context.

ENGR 2500 ENGINEERING COOPERATIVE EDUCATION (1-12 credits)

Cooperative education work in a regularly established cooperative education work-study program in any engineering curriculum. Special approval is required to take course for credit hours. C/N only.

Prerequisite(s)/Corequisite(s): Sophomore standing; permission of College of Engineering Dean's Office and department chair of student's engineering major. All engineering students participating in cooperative education must register each term prior to commencing work.

ENGR 2910 SOPHOMORE ENGINEERING SPECIAL TOPICS (1-3 credits)

Topics vary.

ENGR 3000 CREATIVITY AND WRITING FOR ENGINEERS (3 credits)

Writing technical engineering reports; creative thinking and brainstorming applied to a real engineering problem with individual solutions submitted in report form.

Prerequisite(s)/Corequisite(s): ENGL 1160 and Sophomore

ENGR 3010 INTRODUCTION TO NUCLEAR AND RADIATION ENGINEERING CONCEPTS (1 credit)

History of nuclear development, basic concepts of radiation and radioactivity, radioactive waste management, global warming, and the impact of nuclear power plants. Industrial applications, health, and nuclear medicine. Job opportunities at power plants, graduate school, and national laboratories. Tour of the University of Texas nuclear research reactor and demonstration experiments. (Requires off-campus travel.)

Prerequisite(s)/Corequisite(s): Not open to nondegree students

ENGR 3100 UTILIZATION OF NUCLEAR TECHNOLOGIES IN SOCIETY (3 credits)

The applications of nuclear science to society and the fundamental radiation principles utilized in these applications.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ENGR 3200 LEADERSHIP, MANAGEMENT, AND ETHICS (3 credits)

Explore professional leadership, ethics, project management tools and skills, and how to successfully implement and respond to change. In a team based environment, enhance essential professional skills for personal and team success by developing and presenting a responsive proposal considering: client needs, basic project controls and scheduling. Learn about personal styles, motivation and effectively implementing change. Examine ethical dilemmas regarding principles, stewardship, and civics from ethical, legal, and expediency perspectives.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ENGR 3500 ENGINEERING COOPERATIVE EDUCATION (0-12 credits)

Cooperative education work in a regularly established cooperative education work-study program in any engineering curriculum. Special approval is required to take course for credit hours. C/N only.

Prerequisite(s)/Corequisite(s): Junior standing; permission of College of Engineering Dean's Office and department chair of student's engineering major. All engineering students participating in cooperative education must register each term prior to commencing work.

ENGR 3910 JUNIOR ENGINEERING SPECIAL TOPICS (1-3 credits)

Topics vary

ENGR 3950 ENGINEERING INTERNSHIP (0-1 credits)

Provides an opportunity to reflect on experience gained through an internship related to the major field of study and an integral or important part of their program of study. Develop non-technical professional skills through reflective writing assignments. May be repeated.

Prerequisite(s)/Corequisite(s): Undergraduate major in the College of Engineering; sophomore standing; permission from instructor.

ENGR 4000 PROFESSIONAL ETHICS AND SOCIAL RESPONSIBILITY (1 credit)

Discussions on professionalism and ethics of engineering practice; problems encountered by new graduates.

Prerequisite(s)/Corequisite(s): Senior

ENGR 4020 ENERGY SYSTEMS AND RESOURCES (3 credits)

Energy as a critical component of civilization. The critical role of energy from the economic and political point of view world wide. Energy resources available, the technology to use the resources, the economics of energy production, the environmental consequences of energy use, and energy policy.

Prerequisite(s)/Corequisite(s): ENGR 3010, not open to nondegree students

ENGR 4070 PROJECT MANAGEMENT (3 credits)

Project development, role of the project manager, project selection, project planning, budgeting and cost estimation, project scheduling, and project termination.

ENGR 4100 RADIATION PROTECTION AND SHIELDING (3 credits)

Basic principles and concepts of radiation protection and shield design. Dosi-metric units and response functions, hazards of radiation doses, radiation sources, basic methods for dose evaluation, and shielding design techniques for photons and neutrons.

Prerequisite(s)/Corequisite(s): MENG 4010, MECH 4010 MENG 8016, MECH 8016 or ENGR 4210

ENGR 4110 NUCLEAR REACTOR THEORY (3 credits)

Introduction to neutron diffusion theory, neutron moderation, neutron thermalization, and criticality condition of nuclear reactor.

Prerequisite(s)/Corequisite(s): ENGR 3100, not open to nondegree students

ENGR 4120 NUCLEAR REACTOR ANALYSIS (3 credits)

Group diffusion method, multiregional reactors, heterogeneous reactors, reactor kinetics, and change in reactivity.

Prerequisite(s)/Corequisite(s): ENGR 4110, not open to nondegree students

ENGR 4150 COGNITIVE ERGONOMICS (3 credits)

Human factors affecting work. Focus on humans: energy requirements, lighting, noise, monotony and fatigue, learning, simulations versus sequential tasks. Experimental evaluation of concepts.

Prerequisite(s)/Corequisite(s): ENGR 4300 or permission.

ENGR 4160 PHYSICAL ERGONOMICS (3 credits)

Human performance in work. Human response to various environmental and task-related variables with emphasis on physical and physiological effects.

Prerequisite(s)/Corequisite(s): ENGR 4300 or permission

ENGR 4170 OCCUPATIONAL SAFETY HYGIENE ENGINEERING (3 credits)

Introduction to occupational hygiene engineering with emphasis on workplace environmental quality. Heat, illumination, noise, and ventilation.

Prerequisite(s)/Corequisite(s): Senior standing or permission

ENGR 4200 NUCLEAR REACTOR ENGINEERING (3 credits)

The physics governing nuclear reactors and the design principles for commercial nuclear power plants. Reactor designs currently operating in the power industry.

ENGR 4210 ELEMENTS OF NUCLEAR ENGINEERING (3 credits)

Survey of nuclear engineering concepts and applications. Nuclear reactions, radioactivity, radiation interaction with matter, reactor physics, risk and dose assessment, applications in medicine, industry, agriculture, and research. (Cross-listed with MECH 4210).

Prerequisite(s)/Corequisite(s): MATH 1970, PHYS 2120, and (ENGR 3010 or ENGR 3100)

ENGR 4500 ENGINEERING COOPERATIVE EDUCATION (0-12 credits)

Cooperative education work in a regularly established cooperative education work-study program in any engineering curriculum. Special approval is required to take course for credit hours. C/N only.

Prerequisite(s)/Corequisite(s): Senior standing; permission of College of Engineering Dean's Office and department chair of student's engineering major. All engineering students participating in cooperative education must register each term prior to commencing work.

ENGR 4600 PACKAGING ENGINEERING (3 credits)

Investigation of packaging processes, materials, equipment and design. Container design, material handling, storage, packing and environmental regulations, and material selection.

Prerequisite(s)/Corequisite(s): CONE 2060; MENG 3210 or MECH 3210; MENG 3730 or MECH 3730

ENGR 4610 RFID SYSTEMS IN THE SUPPLY CHAIN (3 credits)

Foundations of Radio Frequency Identification Systems (RFID). The fundamentals of how RFID components of tag, transponder, and antennae are utilized to create RFID systems. Best practices for implementation of RFID systems in common supply operations.

ENGR 4690 TECHNOLOGY, SCIENCE AND CIVILIZATION (3 credits)

(Lect 2 Dis. 2) This course studies the development of technology as a trigger of change upon humankind, from the earliest tools of Homo Habilis to the advent of the radio telescope in exploring the creation of the universe. The course traces the paths from early science to development of the sciences and technologies that will dominate the new millennium. (8696 is for non SET students) (Cross-listed with ENGR 8696).

Prerequisite(s)/Corequisite(s): Senior or permission.

ENGR 4810 SUPPLY CHAIN OPTIMIZATION (3 credits)

Foundations of supply chain network modeling. The concepts that support the economic and service trade-offs in supply chain and logistics management. Using decision support system (DSS) to design optimal logistics network models given data requirements and operational parameters. Using leading software packages to model problems arising in strategic management of logistics networks.

ENGR 4830 LOGISTICS IN THE SUPPLY CHAIN (3 credits)

The process of planning, implementing and controlling the efficient, effective flow and storage of goods, services and related information from the point of origin to the point of consumption. Domestic transportation systems, distribution centers and warehousing, international logistics, logistic system controls, and reengineering logistics systems.

ENGR 4900 GLOBAL EXPERIENCES IN ENGINEERING (1-3 credits)

Individual or group educational experience combining classroom lectures, discussions, and/or seminars with field and/or classroom studies in a foreign country. Choice of subject matter and coordination of on- and off-campus activities are at the discretion of the instructor.

ENGR 4910 SENIOR ENGINEERING SPECIAL TOPICS (1-3 credits)

Topics vary.

Environmental Engineering Minor

Grade Rules**C- and D Grades**

All courses must be completed with a grade of D- or higher.

Pass/No Pass Limits

No course taken Pass/No Pass will be counted toward the minor.

Code	Title	Credits
CIVE 326	INTRODUCTION TO ENVIRONMENTAL ENGINEERING	3
CIVE 352	INTRODUCTION TO WATER RESOURCES ENGINEERING	3
CIVE 425	PROCESS DESIGN IN WATER SUPPLY AND WASTEWATER TREATMENT	3

15-21

Pre-Engineering

Two years of course work applicable to Bachelor of Science degrees in Agricultural Engineering, Biological Systems Engineering, and Mechanical Engineering are provided on the Scott Campus in Omaha.

The courses listed under each pre-engineering program are similar in content to equivalent courses at the University of Nebraska-Lincoln, allowing for maximum transferability of credit.

Students should select courses at UNO that meet degree requirements as stated in the Catalog of the institution to which they plan to transfer.

For more information, please call 402.554.3562

Programs Offered

- Pre-Agricultural Engineering (p. 623)
- Pre-Biological Systems Engineering (p. 624)
- Pre-Mechanical Engineering (p. 625)

Pre-Agricultural Engineering

Agricultural engineering (AGEN) is one of two engineering degree programs offered in the Department of Biological Systems Engineering at UNL. AGEN students emphasize coursework in one of three engineering areas: machine design, test, or soil and water resources. Thus, some agricultural engineers are involved in the analysis and design of field machinery systems and machine components through study of the principles of mechanical design, joining techniques, hydraulics, controls, ergonomics, and safety. Others are evaluating machine or mechanical system functional performance based on study of test procedure standards, measurements, data acquisition, electronic communication and statistics, and practical experience gained at the Nebraska Tractor Test Laboratory. Still others are analyzing and designing soil and water management-related infrastructure as aided through study of irrigation, drainage, erosion and runoff control techniques, crop tillage and cultivation practices, and natural resources management. Job opportunities for graduates are available in industry, public agencies, consulting, and private practice.

Students choosing the pre-agricultural engineering program on the Scott Campus in Omaha should be aware that there are five courses in the first two years (AGEN 100, AGEN 112, AGEN 225, AGEN 260, and MSYM 232); 12 total credit hours) for which there are no equivalents on the Scott Campus. However, substitutions for AGEN 100 may be available on a case-by-case basis.

Pre-Biological Systems Engineering

Biological Systems Engineering (BSEN) brings engineering to life by working with living systems and applying engineering, biology, and mathematics to improve lives and our world. Biological systems engineers are trained to solve problems in biomedical engineering, environmental and water resources engineering, and food and bioprocess engineering. Students who

choose pre-biological systems engineering on the Scott Campus in Omaha, should be aware that there are three courses in the first two years (BSEN 100, BSEN 112, BSEN 225; nine total credit hours) for which there are no equivalents on the Scott Campus. However, substitutions for BSEN 100 may be available on a case by case basis.

Pre-Mechanical Engineering

Mechanical engineers are considered the “general practitioners” of engineering because their education is extremely broad and their services span many interdisciplinary technical, social environmental and economic problems. These engineers deal with a wide realm of motion, all forms of energy conversion and transmission; the flow of fluids and heat; the development, design and operation of machinery and equipment; material structure and properties; and transportation processes. Here, you’ll choose among three major areas: thermal-fluid science engineering, systems and design engineering, and materials science engineering. Your career could include research and development, design of equipment and systems, testing, plant and sales engineering, and management.

Robotics Engineering Minor

Description

Chair and Advisor: Justin Bradley (CSE)

The robotics engineering minor is jointly administered by the Departments of:

- Electrical & Computer Engineering (ECE)
- Computer Science and Engineering (CSE)
- Mechanical and Materials Engineering (MME)

Requirements

This minor is available to all majors. Consult with your advisor before declaring this minor.

The robotics engineering minor consists of three core courses and three elective courses. When selecting electives, the student must take two courses outside of their major area of study. For example, a student in mechanical engineering might take an elective from the Department of Computer Science and Engineering and one from the Department of Electrical Engineering.

Code	Title	Credits
Core Requirements		
Select one course from each of the three following topic areas:		9
Topic Area: Core Programming		
CSC 155	COMPUTER SCIENCE I (version A or E)	
CSC 156	COMPUTER SCIENCE II	
CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I (UNO course) ¹	
Topic Area: Controls		
MECH 3500	INTRODUCTION TO DYNAMIC AND CONTROL OF ENGINEERING SYSTEMS	
ECEN 4440	LINEAR CONTROL SYSTEMS	
ECEN 2200	INTRODUCTION TO EMBEDDED SYSTEMS	
ECEN 4910	SPECIAL TOPICS IN ELECTRIC AND COMPUTER ENGINEERING IV	
Topic Area: Embedded Systems		
ECEN 1060	MICROPROCESSOR APPLICATIONS	
CSC 336	EMBEDDED SYSTEMS	
MECH 457	MECHATRONIC SYSTEMS	
Elective Requirements		

Select three of the following; two must be outside your department:

ECEN 4000	ELECTRONIC INSTRUMENTATION
ECEN 4280	POWER ELECTRONICS
ECEN 4440	LINEAR CONTROL SYSTEMS
ECEN 4600	LABVIEW PROGRAMMING
ECEN 4620	COMMUNICATION SYSTEMS
ECEN 4980	SPECIAL TOPICS IN ELECTRICAL ENGINEERING IV
CSCE 436	ADVANCED EMBEDDED SYSTEMS
CSCE 439	ROBOTICS ALGORITHMS APPLICATIONS
CSCE 473	COMPUTER VISION
CSCE 476	INTRODUCTION TO ARTIFICIAL INTELLIGENCE ¹
CSCE 4XX	(SPECIAL TOPICS COURSES ON ROBOTICS)
ECEN 3450	MOBILE ROBOTICS I
ECEN 4330	MICROPROCESSOR SYSTEM DESIGN
ECEN 4350	EMBEDDED MICROCONTROLLER DESIGN
MECH 3420	KINEMATICS AND DYNAMICS OF MACHINERY
MECH 4500	MECHANICAL ENGINEERING CONTROL SYSTEMS DESIGN
MECH 4420	INTERMEDIATE KINEMATICS
MECH 4440	INTERMEDIATE DYNAMICS OF MACHINERY
MECH 4490	ADVANCED DYNAMICS
MECH 4530	ROBOTICS: KINEMATICS & DESIGN
MECH 4580	DIGITAL CONTROL OF MECHANICAL SYSTEMS
MECH 4880	KINEMATICS AND MACHINE DESIGN LABORATORY

Total Credits **18**

¹ On the Scott Campus in Omaha, similar courses being offered by CIST could be substituted.

Construction

Construction Degrees

The Charles W. Durham School of Architectural Engineering and Construction offers students an education that opens up a full range of professional opportunities in the construction industry. The two bachelor's degree options, Construction Engineering and Construction Management, are found under the Majors tab.

Degrees Offered

- Construction Engineering, Bachelor of Science (p. 629)
- Construction Management, Bachelor of Science (p. 631)

CNST 1120 CONSTRUCTION COMMUNICATIONS (3 credits)

Development of communication skills including understanding of contract documents, working drawings, technical terminology, graphic symbols, and abbreviations. Fundamentals of drafting principles, sketching, and dimensioning techniques.

CNST 1310 INTRODUCTION TO THE CONSTRUCTION INDUSTRY (1 credit)

Introduction to basic management principles and practices for labor, materials, machinery, and budgets.

9 CNST 2250 INTRODUCTION TO BUILDING INFORMATION MODELING (3 credits)

Introduction to Building Information Modeling (BIM) concepts and techniques. Explore the use of the Revit Architecture platform to create detailed 3D models of construction projects and other BIM-related topics such as clash detection and point-cloud models.

Prerequisite(s)/Corequisite(s): CNST 1120

CNST 2410 HORIZONTAL CONSTRUCTION (3 credits)

Introduction to earthmoving equipment and methods, labor, productivity, and economic aspects of excavation, material transportation, and fill work. Introduction to the financial principles of equipment ownership and operation.

Prerequisite(s)/Corequisite(s): MATH 1950

CNST 2420 VERTICAL CONSTRUCTION (3 credits)

Focus on vertical structures, from grade to topping out, with an emphasis on materials and material handling equipment. Includes the assembly process for a variety of applications including cast-in-place concrete, steel erection, wood framing, precast concrete, masonry structural elements, and material finishing.

Prerequisite(s)/Corequisite(s): MATH 1950

CNST 2510 CONSTRUCTION MATERIALS AND SPECIFICATIONS (3 credits)

Introduction to construction materials and proper methods of specifying to achieve design and construction goals, safety and inspection, and to meet zoning code and environmental requirements. Physical, mechanical and aesthetic properties of soils, concrete, masonry, metals, plastics and other materials will be studied as they relate to in-service conditions, acceptability, and performance.

Prerequisite(s)/Corequisite(s): MATH 1950

CNST 2520 CONSTRUCTION MATERIALS AND TESTING (3 credits)

Introduction to basic materials used in construction. Laboratory testing and evaluation of material properties of soil, aggregate, and concrete.

Prerequisite(s)/Corequisite(s): MATH 1950; parallel registration in CNST 2410 is recommended. Laboratory testing procedures emphasizing testing of aggregates, soil, and concrete.

CNST 3050 BUILDING ENVIRONMENTAL TECHNICAL SYSTEMS I (3 credits)

Characteristics and performance of buildings with respect to thermal and psychometric environment in buildings related to human comfort, heat gain/heat loss, ventilation, natural energy systems and sustainable design principles, and plumbing and life safety systems in the built environment.

Prerequisite(s)/Corequisite(s): PHYS 1050

CNST 3060 ELECTRICAL SYSTEMS (3 credits)

Fundamentals of electric power generation and distribution, service, and circuits in buildings with an emphasis on electrical equipment and systems, lighting principles and applications, and fire protection systems. Review of National Electric Code.

Prerequisite(s)/Corequisite(s): MATH 1950, PHYS 1050.

CNST 3310 STRUCTURAL MECHANICS (3 credits)

Introduction to various external force systems, and their resulting internal forces and deformations, which act on structural elements.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

CNST 3320 STRUCTURAL OPTIMIZATION (3 credits)

Optimization of key properties of elements and systems of building structures: force, geometric, and material.

Prerequisite(s)/Corequisite(s): CNST 3310. Not open to non-degree graduate students.

CNST 3780 CONSTRUCTION ESTIMATING I (3 credits)

Preparation of detailed cost estimates based on contract documents. Identify and analyze cost components of building and site scopes of work to perform detailed quantity take-offs. Apply labor, material, and equipment pricing from RS Means. Use production rates and quantity takeoffs to prepare a preliminary construction schedule. Complete quantity takeoffs from 2D plans and from 3D BIM software models. (Cross-listed with CONE 3780).

Prerequisite(s)/Corequisite(s): CNST 1120.

CNST 3790 CONSTRUCTION ESTIMATING II (3 credits)

Continuation of CNST 3780 with emphasis on the determination of total project cost and preparation of complete bid proposals for self-performed and subcontracted commercial projects. Evaluation and analysis of subcontractor bids to determine overall project costs by completing a hard bid simulation scenario. Exploration of contract delivery methods and their effect on overall project cost.

Prerequisite(s)/Corequisite(s): CNST 3780

CNST 4050 MECHANICAL ESTIMATING (3 credits)

Application of estimating principles, quantity take-off, bidding strategies, and computerization to the specialty field of mechanical construction.

Prerequisite(s)/Corequisite(s): CNST3050 and CNST3060 and CNST3790

CNST 4060 ELECTRICAL ESTIMATING (3 credits)

Application of estimating principles, quantity take-off, bidding strategies, and computerization to the specialty field of electrical construction.

Prerequisite(s)/Corequisite(s): CNST 3050, CNST 3060 and 3790.

CNST 4110 PROJECT ADMINISTRATION (3 credits)

Ownership and administration of companies focusing on documentation and specifications, contracts, take-offs, estimating, bidding, bonds, insurance, project management and administration, scheduling, time and cost management, labor law and labor relations, and project safety. (Crosslisted with CNST 8116).

Prerequisite(s)/Corequisite(s): CNST 3790. Not open to non-degree graduate students.

CNST 4150 MECHANICAL/ELECTRICAL PROJECT MANAGEMENT (3 credits)

Fundamentals of project management within the mechanical and electrical contracting industry. Codes, contract documents, productivity, coordination, project control and administration, scheduling, safety, and project closeout, from a specialty contracting perspective. (Cross-listed with CNST8156)

Prerequisite(s)/Corequisite(s): CNST 3050, CNST 3060 and CNST 3790. CNST 4050 and CNST 4060 are recommended.

CNST 4200 PROFESSIONAL PRACTICE AND ETHICS (3 credits)

Examination of professional practice considering the perspectives of designers and the contractors and their respective relationships to society, specific client types, and other collaborators in the design and construction fields. Focus on ethics, professional communication and responsibility, professional organization, office management, environmental stewardship, professional registration, and owner-designer-contractor relationships. (Cross-listed with CNST 8206).

Prerequisite(s)/Corequisite(s): CNST 3790, LAWS 3930. Not open to non-degree graduate students.

CNST 4250 ALTERNATIVE PROJECT DELIVERY METHODS (3 credits)

Historical and current project delivery methods (PDM) are explored. Procurement strategies, contractual arrangements, and compensation methods are also discussed in conjunction with risks, costs, and legal and ethical issues that need to be considered when determining which system is best for a particular project. (Cross-listed with CNST 8256)

Prerequisite(s)/Corequisite(s): CNST 3790. Not open to non-degree graduate students.

CNST 4340 THE DESIGN-BUILD PROJECT DELIVERY SYSTEM (3 credits)

The organizational, managerial, ethical and legal principles involved in design-build as a project delivery system. Advantages and disadvantages, growth, merits, and criticism of the design-build system. (Cross-listed with CNST 8346)

Prerequisite(s)/Corequisite(s): CNST 3790. Not open to non-degree graduate students.

CNST 4360 INTENT AND APPLICATION OF INTERNATIONAL BUILDING CODE (3 credits)

Fundamentals of how to research, interpret, and apply building code requirements to the design and construction of both new and renovated structures. (Cross-listed with CNST 8366)

Prerequisite(s)/Corequisite(s): CNST 3790. Not open to non-degree graduate students.

CNST 4400 BUILDING INFORMATION MODELING (BIM) II (3 credits)

Advance topics in building information modeling, including structural and MEP modeling, 4/5 dimensional construction animations and visualization. Good knowledge of Revit Architectural Modeling and knowledge of construction estimating and scheduling is required before registering in this class. (Cross-listed with CNST 8406)

Prerequisite(s)/Corequisite(s): CNST 2250 and CNST 3780.

CNST 4440 CONSTRUCTION SITE SAFETY MANAGEMENT (3 credits)

Introduction to safety management for project engineers, project managers, safety teams, and company safety officers. Addresses basic accident and injury models, human accident costs, safety behavior, ethical issues in safety, workers' compensation and EMR, job safety analysis (JSA), project site safety audits, safety promotion and training, emergency planning and response, safety management programs and training, and OSHA record-keeping and reporting. (Cross-listed with CNST 8446).

Prerequisite(s)/Corequisite(s): CNST 2410 or CONE 3190. Not open to non-degree graduate students.

CNST 4760 PROJECT BUDGETS AND CONTROLS (3 credits)

The basic systems related to revenues and expenses associated with record keeping of construction contracts. Managerial accounting related to planning and control of construction projects.

Prerequisite(s)/Corequisite(s): CNST 3780 and CONE 2060.

CNST 4800 PRODUCTIVITY AND HUMAN FACTORS IN CONSTRUCTION (3 credits)

Motivation and productivity improvement methods for management in typical job environments. Methods to improve working environments in the field and office. Procedures and mechanisms to implement human behavior and ergonomics concepts for enhanced productivity and safety. (Cross-listed with CNST 8806).

Prerequisite(s)/Corequisite(s): CNST 3780, MGMT 3490. Not open to non-degree graduate students.

CNST 4820 HEAVY AND/OR CIVIL CONSTRUCTION (3 credits)

History, theory, methods, and management principles of planning and executing heavy and/or civil projects. Emerging and new equipment capabilities. Economical use of equipment and management of costs associated with production. (Cross-listed with CNST 8826, CONE 4820, CONE 8826).

Prerequisite(s)/Corequisite(s): CNST 3790. Not open to non-degree graduate students.

CNST 4850 CONSTRUCTION PLANNING, SCHEDULING, AND CONTROLS (3 credits)

Planning and scheduling a project using the critical path methods (CPM) with computer applications. Project pre-planning, logic networks, precedence diagrams, time estimates, critical path, float time, crash programs, scheduling, short interval schedules, pull planning, and monitoring project activities. (Cross-listed with CNST 8856, CONE 4850, CONE 8856)

Prerequisite(s)/Corequisite(s): CNST 3780. Not open to non-degree graduate students.

CNST 4860 CONSTRUCTION MANAGEMENT SYSTEMS (3 credits)

Application of selected topics in systems analysis (operations research). Simulation, mathematical optimization, queuing theory, Markov decision processes, econometric modeling, neural networks, data envelopment analysis, decision analysis, and analytic hierarchy processes as used in the industry. (Cross-listed with CNST 8866).

Prerequisite(s)/Corequisite(s): CNST 3790. Not open to non-degree graduate students.

CNST 4880 RESIDENTIAL CONSTRUCTION AND REAL ESTATE DEVELOPMENT (3 credits)

Application of various strategies to real estate development including community and residential design, planning, site selection, land development, marketing and customer service. Methods used by construction companies to analyze, bid, and market their developments to customers through the preconstruction and bidding process. (Cross-listed with CNST 8886)

Prerequisite(s)/Corequisite(s): CNST 3790.

CNST 4890 SENIOR CONSTRUCTION PROJECT (3 credits)

Execution of a project from conceptual design and location through estimating, bidding, site layout, planning and scheduling, cost control, records management, and project completion and documentation. Capstone course.

Prerequisite(s)/Corequisite(s): CNST 3790; CNST 4200; CNST 4760 ; CNST 4850. Pre/Coreq: CNST 4800.

CNST 4950 INTERNSHIP (3 credits)

Participation in a full-time summer internship associated with a construction-related entity. Includes weekly assignments and a final presentation designed to foster interactions between the intern and the business side of the entity. General topics include personnel and time management, structuring business plans, scheduling work, finance and budgets, marketing plans, contracts, risk analysis, and communication and leadership. (Cross-listed with CONE 4950).

Prerequisite(s)/Corequisite(s): Permission of instructor, Letter of application, Letter of agreement from industry mentor. Not open to non-degree graduate students.

CNST 4980 SPECIAL TOPICS IN CONSTRUCTION MANAGEMENT (1-6 credits)

Individual or small group study of special topics in construction management. Topic varies. A signed student-instructor learning contract is required. (Cross-listed with CNST 8986, CONE 4980).

CONE 1030 INTRODUCTION TO CONSTRUCTION ENGINEERING (1 credit)

Introduction to the organization and terminology of construction engineering. Overview of technical and management skills required to succeed in the construction engineering profession.

CONE 2060 ENGINEERING ECONOMICS (3 credits)

Introduction to methods of economics comparisons of engineering alternatives: time value of money, depreciation, taxes, concepts of accounting, activity-based costing, ethical principles, civics and stewardship, and the importance to society.

Prerequisite(s)/Corequisite(s): Sophomore Standing.

CONE 2110 CONSTRUCTION BUSINESS METHODS (3 credits)

Business concepts and practices used by construction contractors. The construction industry, management principles, forms of business ownership, company organization, construction contracts, estimating and bidding, business ethics, bonds and insurance, financial statements, cost accounting, equipment management, planning and scheduling, labor relations and personnel management.

Prerequisite(s)/Corequisite(s): CONE 1030 or CNST 1310 or AE 1010

CONE 2210 GEOMETRIC CONTROL SYSTEMS (3 credits)

Introduction to the theory and application of mensuration and geometric information processing in civil engineering. Measurement of distance, direction, elevation and location using mechanical, electronic and satellite systems. Collection of field data and error propagation. Elementary geometric data bases for design, construction, operation and control of civil works.

Prerequisite(s)/Corequisite(s): MATH 1950

CONE 3190 CONSTRUCTION METHODS AND EQUIPMENT (3 credits)

Characteristics, capabilities and selection of equipment and methods used in the building construction industry. Estimating job production, equipment production rates, machine operating costs, earth-moving equipment, hoisting equipment, operations analysis, and use of various other construction methods and equipment.

Prerequisite(s)/Corequisite(s): CONE 2060

CONE 3780 CONSTRUCTION ESTIMATING I (3 credits)

Preparation of detailed cost estimates based on contract documents. Identify and analyze cost components of building and site scopes of work to perform detailed quantity take-offs. Apply labor, material, and equipment pricing from RS Means. Use production rates and quantity takeoffs to prepare a preliminary construction schedule. Complete quantity takeoffs from 2D plans and from 3D BIM software models. (Cross-listed with CNST 3780).

Prerequisite(s)/Corequisite(s): CNST 1120.

CONE 4140 ACCIDENT PREVENTION IN CONSTRUCTION (3 credits)

Safety practices in the construction industry and the national safety and health standards of the Occupational Safety and Health Administration (OSHA). The theory of accidents; personal attitudes; statistics and environment; accident occurrence; prevention and inspection in connection with the construction of buildings, highways, and associated heavy facilities. Nationally accepted safety codes and their relationship to accepted practices in the industry.

Prerequisite(s)/Corequisite(s): Senior standing and CONE 2110 and CONE 3190

CONE 4160 WOOD/CONTEMPORARY MATERIALS DESIGN (3 credits)

Design of structural timber, beams, columns, and connections. Introduction to applicable design philosophies and codes. Overview of materials design. Masonry, aluminum, and contemporary materials such as plastics and fiber reinforced systems and composite material groups. Design considerations, cost and constructability analysis. (Cross-listed with CONE 8166)

Prerequisite(s)/Corequisite(s): CIVE 341

CONE 4170 FORMWORK SYSTEMS (3 credits)

Design of structural timber, beams, columns, and connections. Introduction to applicable design philosophies and codes. Overview of materials design, masonry, aluminum, and contemporary materials such as plastics and fiber reinforced systems and composite material groups. Design considerations, cost and constructability analysis. (Cross-listed with CONE 8176)

Prerequisite(s)/Corequisite(s): CONE 4160; Pre/Co-req.: CIVE 441

CONE 4500 SUSTAINABLE CONSTRUCTION (3 credits)

Sustainable construction and its application to the green building industry. Topics include: the LEED certification process, sustainable building site management, efficient wastewater applications, optimizing energy performance, indoor environmental issues, performance measurement/verification, recycled content and certified renewable materials. (Cross-listed with CONE 8506.)

Prerequisite(s)/Corequisite(s): Senior standing

CONE 4590 INTRODUCTION TO BUILDING INFORMATION MODELING (3 credits)

This course instructs CAD users on the effective use of Building Information Model (BIM) for integration of design, document and construction estimate. Topics include: model-based 3D design, file formats, interoperability, and MEP modeling. (Cross-listed with CONE 8596)

Prerequisite(s)/Corequisite(s): CNST 1120, or Graduate standing in AE, CIVE, CNST or CONE.

CONE 4660 HEAVY AND/OR CIVIL ESTIMATING (3 credits)

Estimating techniques and strategies for heavy and/or civil construction. Unit pricing, heavy and civil construction takeoffs and estimating, equipment analysis, overhead cost and allocations, estimating software and government contracts. (Cross-listed with CONE 8666).

Prerequisite(s)/Corequisite(s): CONE 3190 and CONE 3780 and CONE 4850

CONE 4760 PROJECT BUDGETS AND CONTROLS (3 credits)

The basic systems related to revenues and expenses associated with record keeping of construction contracts. Managerial accounting related to planning and control of construction projects.

Prerequisite(s)/Corequisite(s): CNST 3780 and CONE 2060.

CONE 4810 HIGHWAY & BRIDGE CONSTRUCTION (3 credits)

The methods and equipment required in the construction of roads and bridges. Methods and equipment necessary for roads and bridges. Substructure and superstructures, precast and cast-in-place segments, and standard and specialized equipment. (Cross-listed with CONE 8816)

Prerequisite(s)/Corequisite(s): CONE 3190 or CNST 2410

CONE 4820 HEAVY AND/OR CIVIL CONSTRUCTION (3 credits)

History, theory, methods, and management principles of planning and executing heavy and/or civil projects. Emerging and new equipment capabilities. Economical use of equipment and management of costs associated with production. (Cross-listed with CNST 4820, CNST 8826, CONE 8826).

Prerequisite(s)/Corequisite(s): CNST 3790. Not open to non-degree graduate students.

CONE 4830 SUPPORT OF EXCAVATION (3 credits)

The design and placement of excavation supports according to OSHA requirements and industry standards. A variety of routine to moderately complex support systems. Open excavations, sheet piling and cofferdams. Soil mechanics, lateral loads, hydrology, and pumping methods. (Cross-listed with CONE 8836)

Prerequisite(s)/Corequisite(s): CET 2180 and CET 3290

CONE 4850 CONSTRUCTION PLANNING, SCHEDULING, AND CONTROLS (3 credits)

Planning and scheduling a project using the critical path methods (CPM) with computer applications. Project pre-planning, logic networks, precedence diagrams, time estimates, critical path, float time, crash programs, scheduling, short interval schedules, pull planning, and monitoring project activities. (Cross-listed with CNST 4850, CNST 8856, CONE 8856)

Prerequisite(s)/Corequisite(s): CNST 3780. Not open to non-degree graduate students.

CONE 4890 CONSTRUCTION ENGINEERING CAPSTONE (3 credits)

CONE 4890 embodies the cumulative CONE experience in a project format and uses teams to simulate actual construction enterprises operating in cooperative and competitive situations which replicate the construction industry. An integrated, comprehensive project; to be taken in the term prior to graduation.

Prerequisite(s)/Corequisite(s): Senior standing

CONE 4950 INTERNSHIP (3 credits)

Participation in a full-time summer internship associated with a construction-related entity. Includes weekly assignments and a final presentation designed to foster interactions between the intern and the business side of the entity. General topics include personnel and time management, structuring business plans, scheduling work, finance and budgets, marketing plans, contracts, risk analysis, and communication and leadership. (Cross-listed with CNST 4950).

Prerequisite(s)/Corequisite(s): Permission of instructor, Letter of application, Letter of agreement from industry mentor. Not open to non-degree graduate students.

CONE 4980 SPECIAL TOPICS IN CONSTRUCTION MANAGEMENT (1-6 credits)

Individual or small group study of special topics in construction management. Topic varies. A signed student-instructor learning contract is required. (Cross-listed with CNST 4980, CNST 8986)

Construction Engineering, Bachelor of Science

Description

Construction engineering (CONE) is a program of the Charles W. Durham School of Architectural Engineering and Construction. The construction engineering major integrates engineering, construction and management courses. This program is designed for persons fulfilling the construction industry's need for licensed professional engineers. It resembles the construction management program but provides a greater emphasis on engineering, scientific, and technical courses to meet requirements for licensure as a professional engineer. The courses focus on the application of engineering principles to solve real-world construction problems. They include instruction in civil engineering, structural principles, material testing and evaluation, project management, computer-assisted design, 3D animation, sustainability, and graphic communication.

Program Educational Objectives (PEOs)

1. Professional Achievement: The Construction Engineering program prepares graduates to become Licensed Professional Engineers and Certified Professional Constructors.
2. Career Achievement: The Construction Engineering program prepares graduates to contribute to society by working in an occupation related to the architecture-engineering-construction industry.

Under the stimulus of increasing demand for global services, many Nebraska companies have expanded their reach well beyond U.S. borders. This demand gives the construction engineering graduate an unprecedented number of opportunities for employment—locally, nationally and internationally—and for pursuing an advanced degree at the University of Nebraska—Lincoln or elsewhere.

Construction engineers participate in the preparation of engineering and architectural documents, including specifications, which they translate into finished projects such as buildings for housing, commerce and industry, highways, railroads, waterways, airports, power plants, energy distribution systems, military bases and space center complexes. These projects involve thousands of details shared by a team of owners, architects, engineers, general constructors, specialty constructors, manufacturers, material suppliers, equipment distributors, regulatory bodies and agencies, labor resources and others. The constructor assumes responsibility for delivery of the completed project at a specified time and cost and also accepts associated legal, financial and management obligations. Because of the broad scope of the construction engineer's project responsibility, they must assure the project's constructability as well as its capability to be operated and maintained.

Construction engineering students are required to enroll in a set of courses specifically designed for a general construction education. Each student selects, with the guidance of an advisor, a set of approved electives. The program outlined below leads to the bachelor of science degree in construction engineering.

Professional Admission Requirements

In order to be professionally admitted into the construction engineering program, students must complete at least 43 credit hours of courses listed in the first two years of the required curriculum with a minimum GPA of 2.5 for those major courses (not necessarily the cumulative GPA).

Learning Outcomes

Graduates of the construction engineering program will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The above student outcomes have been approved by the ABET Engineering Area Delegation for use beginning with the 2019-20 academic year, and have been adopted by the faculty of the Charles W. Durham School of Architectural Engineering and Construction.

Requirements

Students are required to enroll in a predetermined set of courses specifically designed for general construction education. Each student selects, with the approval of their advisor, a set of approved electives.

Course	Title	Credits
First Semester		
CHEM 1180	GENERAL CHEMISTRY I	3
CHEM 1184	GENERAL CHEMISTRY I LABORATORY	1
CMST 1110	PUBLIC SPEAKING FUNDS	3
CONE 1030	INTRODUCTION TO CONSTRUCTION ENGINEERING	1
CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I	3
ENGR 100	FRESHMAN ENGINEERING SEMINAR	0
MATH 1950	CALCULUS I	5
Credits		16
Second Semester		
CNST 1120	CONSTRUCTION COMMUNICATIONS	3
MATH 1960	CALCULUS II	5
PHYS 2110	GENERAL PHYSICS I - CALCULUS LEVEL	4
PHYS 1154	GENERAL PHYSICS LABORATORY I ¹	1
ACE Elective ²		3
Credits		16
Third Semester		
CONE 2210	GEOMETRIC CONTROL SYSTEMS	3
ENGR 200	SOPHOMORE ENGINEERING SEMINAR	0
ENGL 3980	TECHNICAL WRITING ACROSS THE DISCIPLINES	3
MATH 1970	CALCULUS III	4
MECH 2230	ENGINEERING STATICS	3
PHYS 2120	GENERAL PHYSICS-CALCULUS LEVEL	4
Credits		17

Fourth Semester

CONE 2060	ENGINEERING ECONOMICS	3
CNST 2250	INTRODUCTION TO BUILDING INFORMATION MODELING	3
MATH 2350	DIFFERENTIAL EQUATIONS	3
MECH 3250	MECHANICS OF ELASTIC BODIES	3
MECH 3730	ENGINEERING DYNAMICS	3
Credits		15

Fifth Semester

ECEN 2110	ELEMENTS OF ELECTRICAL ENGINEERING	3
CIVE 341	INTRODUCTION TO STRUCTURAL ENGINEERING	4
CONE 3190	CONSTRUCTION METHODS AND EQUIPMENT	3
CONE/CNST 3780	CONSTRUCTION ESTIMATING I	3
CIVE 310/MECH 3100	FLUID MECHANICS	3
Credits		16

Sixth Semester

CIVE 334	INTRODUCTION TO GEOTECHNICAL ENGINEERING	4
CIVE 378	MATERIALS OF CONSTRUCTION	3
ECON 2200	PRINCIPLES OF ECONOMICS (MICRO) ³	3
STAT 3800	APPLIED ENGINEERING PROBABILITY AND STATISTICS	3
ACE Elective ²		3
Credits		16

Seventh Semester

CIVE 440	REINFORCED CONCRETE DESIGN I	3
CNST 4440	CONSTRUCTION SITE SAFETY MANAGEMENT	3
CONE/CNST 4760	PROJECT BUDGETS AND CONTROLS	3
CONE/CNST 4850	CONSTRUCTION PLANNING, SCHEDULING, AND CONTROLS	3
Technical elective ⁴		3
Credits		15

Eighth Semester

CIVE 441	STEEL DESIGN I	3
CONE 4890	CONSTRUCTION ENGINEERING CAPSTONE	3
CNST 4200	PROFESSIONAL PRACTICE AND ETHICS	3
Design elective ⁴		3
ACE Elective ²		3
Credits		15
Total Credits		126

¹ PHYS 1154: PHYS 1164 is an acceptable substitute if taken with PHYS 2120.

² ACE elective: Choose one course from each ACE Student Learning Outcome (SLO) 5, 7 or 9 elective courses.

³ ECON 2200 satisfies SLO area 6.

⁴ See tables below for Design and Technical Elective options.

Additional Major Requirements

Grade Rules

C- and D Grades

All coursework must be of C grade level or higher to be credited toward graduation requirements or to be valid as a prerequisite for another course.

Electives

Students are required to enroll in a predetermined set of courses specifically designed for general construction education. Each student selects, with the approval of his/her advisor, a set of approved electives.

Technical electives are selected from the following list. One (3 credit hour) of the required two electives needs to be considered a design technical elective.

Code	Title	Credits
Design Electives		
CONE 4160	WOOD/CONTEMPORARY MATERIALS DESIGN	3
CONE 4170	FORMWORK SYSTEMS	3
CONE 4810	HIGHWAY & BRIDGE CONSTRUCTION	3
CONE 4830	SUPPORT OF EXCAVATION	3
CIVE 443	ADVANCED STRUCTURAL ANALYSIS	3
CIVE 444	STRUCTURAL DESIGN AND PLANNING	3
CIVE 446	STEEL DESIGN II	3
CIVE 447	REINFORCED CONCRETE II	3

Code	Title	Credits
Technical Electives		
All previously listed Design Electives		
CNST 3790	CONSTRUCTION ESTIMATING II	3
CNST 4340	THE DESIGN-BUILD PROJECT DELIVERY SYSTEM	3
CONE 4500	SUSTAINABLE CONSTRUCTION	3
CONE 4660	HEAVY AND/OR CIVIL ESTIMATING	3
CONE 4980	SPECIAL TOPICS IN CONSTRUCTION MANAGEMENT	1-6
MECH 4200	HEAT TRANSFER	3

ACE Requirements

The CONE program follows the University's ACE general education requirements. Because of the specific needs of the program, several of these courses are specified in the curriculum. Please contact Melissa Hoffman at melissa.hoffman@unl.edu or 402.554.4482, if you are interested in more information about this program.

Construction Management, Bachelor of Science

Construction Management

Construction management (CNST) is a complete undergraduate degree program available to students within the Charles W. Durham School of Architectural Engineering and Construction located at Nebraska Hall on the Lincoln City Campus and at the Peter Kiewit Institute (PKI) in Omaha. Construction is one of the largest and most diversified industries in the country, accounting for approximately four percent of the U.S. gross domestic product (GDP). The key professional in this vast enterprise is the "constructor," a term given to leaders and managers in the construction industry who are responsible for planning, scheduling, and building the projects designed by architects and engineers. These highly-specialized efforts are indispensable in meeting the country's growing need for new structures, infrastructure, and environmental controls that are of high quality and are cost effective, efficient, and sustainable.

Construction firms vary in size from large corporations to small proprietorships and partnerships. These are often classified according to the kind of construction work they do: general contractors, heavy and highway contractors, specialty contractors—including mechanical and

electrical—and residential builders and developers. Many firms engage in more than one category of work. Some larger companies incorporate the architectural and engineering design functions as part of their role as a design/build firm. Collectively, constructors manufacture our entire built environment—buildings for housing, commerce and industry, highways, railroads, waterways, airports, power plants, energy distribution systems, military bases, and space center complexes. Thus, the construction management field is broad, requiring a unique educational background for its professional practitioners.

Although the range of construction activities appears wide and diverse, the general educational requirements for construction management are universal regardless of a particular firm's area of specialization. Since construction is primarily a business enterprise, the graduate must have a sound background in business management and administration, as well as an understanding of the fundamentals of architecture and engineering as they relate to project design and the actual construction process in the field. Professional expertise lies in the fields of construction science, methods, and management. A working knowledge of structural design, mechanical and electrical systems, methods and materials, soil mechanics, and construction equipment is also essential.

The construction management curriculum embraces a course of study in:

1. construction project management from pre-design through commissioning;
2. project life-cycle and sustainability;
3. health and safety, accident prevention, and regulatory compliance;
4. law, contract documents administration, and dispute prevention and resolution;
5. materials, labor, and methods of construction;
6. finance and accounting principles;
7. planning and scheduling;
8. cost management including plan reading, quantity take offs, and estimating;
9. project delivery methods;
10. leadership and managing people;
11. business and communication skills.

Learning Outcomes

Graduates of the construction management program will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The above student outcomes have been approved by the ABET Engineering Area Delegation for use beginning with the 2019-20 academic year, and have been adopted by the faculty of the Charles W. Durham School of Architectural Engineering and Construction.

Program Educational Objectives

The following is a list of the Construction Management Program Educational Objectives (PEO) that graduates are expected to attain within a few years of graduation:

1. Develop construction project objectives and plans including delineation of scope, budget, and schedule.
2. Select project participants and set performance requirements.
3. Maximize resource efficiency through judicious procurement and management of labor, materials, and equipment.
4. Implement and complete construction activities through coordination and control of scheduling, contracting, estimating, and cost control.
5. Develop effective communication protocols and mechanisms for resolving conflicts associated with the construction process.
6. Ensure quality and safety through design, measurement, analysis, and control.

Educational standards and criteria were established by The Charles W. Durham School of Architectural Engineering and Construction and approved by ABET, the accrediting agency for the construction management program at the University of Nebraska–Lincoln.

Grade Rules

C- and D Grades

All required and elective courses must be passed with a grade of C or better to be included in the 120 credit hours needed for degree completion.

ACE Requirements

The CNST program follows the UNL ACE general education requirements. Because of the specific needs of the program, most of these courses are specified in the curriculum. Please contact Melissa Hoffman at melissa.hoffman@unl.edu or 402.554.4482, if you are interested in more information about this program.

¹ ACE elective: Choose one course from not yet satisfied ACE outcomes 5, 7, or 9

² Additional placement and/or prerequisites may apply

Achievement-Centered Education Electives

Engineering majors who will complete their undergraduate degree program on the UNL (City or East Campus in Lincoln) or Scott Campus in Omaha must satisfy the general education requirements of the Achievement Centered Education (ACE) program at UNL. The ACE program contains 4 Institutional Objectives with 10 Student Learning Outcomes (SLO). ACE electives are associated with SLO 5 through 9, and consists of course work primarily from the humanities, fine arts, social sciences, civics, ethics, human and cultural diversity areas. A minimum of one 3-credit hour course is to be selected from each of the following listed SLO areas to satisfy student learning outcomes 5 through 9. Although some courses are listed in more than one area, no individual course can be utilized to satisfy more than one SLO area.

Program Specific Notes

Please read the description under your specific major to find out more about flexible ACE requirements

Architectural Engineering

- Flexible ACE electives **include 5, 6, 7 and 9**
- Students **must complete one from each category**; for a total of four courses
- PSYC 1010 ust be the ACE 6 if completing the **Lighting and Electrical** option
- Students must complete **ART 3770 (ACE 5 or 7) or 3780 (ACE 7)** as either an **ACE 5 or 7**, then must complete **one more course to fulfill the missing elective**

Civil and Electrical Engineering

- Flexible ACE electives include **5, 6, 7, 8, and 9**
- Students must complete **one from each category**; for a total of five courses

Computer Engineering

- Flexible ACE electives **include 5, 6, 7 and 9**
- Students **must complete one from each category**; for a total of four courses
- Students must complete **ENGR 4690** as their **ACE 8**

Construction Engineering and Management

- Flexible ACE electives include **5, 7, and 9**
- Students **must complete one from each category**; for a total of three courses
- Students must complete **ECON 2200** to fulfill the **ACE 6** elective
- Students must complete **CONE 2060** to fulfill the **ACE 8** elective

Pre-Programs (Mechanical, Agricultural, and Biological Systems)

- Flexible ACE electives **include 5, 6, 7 and 9**
- Students **must complete one from each category**; for a total of four courses
- Students must complete **CONE 2060** to fulfill the **ACE 8** elective

SLO - Area 5

College of Information Science & Technology

The College of Information Science and Technology (IS&T) was established on July 1, 1996 and represents the joint efforts of the University of Nebraska, the State of Nebraska, and private industry to address the growing global need for knowledgeable professionals in the area of information technology.

The College of IS&T's overarching philosophy is exemplified by the value statement, "No student will go unassisted or unchallenged."

Our Vision

We will be a premier college with excellence in education, research, and service in the disciplines necessary to meet the needs of our students and the communities we serve.

Our Mission

We deliver student-focused education and perform cutting-edge research, preparing professionals and developing solutions that benefit the world. (We do cool stuff.)

In order to accomplish the College of IS&T's vision and mission, the faculty and staff strive to achieve the following three strategic goals:

1. Keep students at the center of all College of IS&T efforts;
2. Strive to achieve the highest academic excellence; and

3. Actively lead and collaborate with academic, business, and community entities on various projects related to information science and technology.

The College of IS&T is focused on reaching the next level of information technology innovation through collaboration. This collaboration is fostered by the presence of the College in the Peter Kiewit Institute and is visible in the form of research, teaching, and service/outreach initiatives in partnership with our public and private stakeholders in the community, other academic units across the University of Nebraska at Omaha, and the rest of the University of Nebraska system.

General Information

Overview of Degree Programs

The College of IS&T at UNO offers a top-notch education as a means of producing highly competent information specialists for leading technology, business, and engineering firms. Students will be prepared to enter the IT industry, apply technology in organizational environments, embrace life-long learning, and contribute to their communities.

The College is organized into three major units that manage the degree programs: the Department of Computer Science (CS), the Department of Information Systems and Quantitative Analysis (ISQA), and the School of Interdisciplinary Informatics (Si2).

Degrees

The College of IS&T offers five undergraduate degree programs:

1. BS in Bioinformatics (BSBI)
2. BS in Computer Science (BSCS)
3. BS in Cybersecurity (BSIA)
4. BS in Information Technology Innovation (BITI)
5. BS in Management Information Systems (BIS)

Minors

The College of IS&T also offers a minor in each of its five undergraduate degree programs.

Concentrations

The College of IS&T offers optional concentrations in Information Assurance and Internet Technologies to students pursuing undergraduate degrees in Management Information Systems (MIS) or Computer Science (CS); the concentrations are designed to provide students an opportunity to add a more technical or applied dimension to their respective programs of study.

The ISQA Department offers additional optional concentrations to MIS degree-seeking students in the following areas: IT Audit and Control; i-Business Application Development and Management; and Global IT Leadership and Management.

The Computer Science Department offers two additional optional concentrations: one in Game Programming and Design, and one in Artificial Intelligence.

Certificates

The College of IS&T currently offers three undergraduate certificate options to all students enrolled in the College. Students who hold an associate's degree from a community college in Information Technology or a related area may also enroll in one of these certificate programs:

1. Data Management Certificate
2. Systems Development Certificate
3. Information Technology Administration Certificate

Cyber Operations Track

The University of Nebraska at Omaha's undergraduate Cybersecurity degree program is one of the few National Security Agency (NSA) certified

National Centers of Academic Excellence in Cyber Operations (CAE-CO) in the country. As a result, UNO's College of IS&T is able to offer undergraduate students majoring in Cybersecurity the option to pursue a specialized Cyber Operations (CO) track and complete the requirements set out by the NSA's CAE-CO program.

Fast Track

The College of Information Science & Technology (CIST) has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate credit hours towards the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate CIST area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any CIST undergraduate degree (computer science, management information systems, bioinformatics, cybersecurity, IT innovation) desiring to pursue an MS in either the same or a related CIST program.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0, with the exception of the computer science MS which requires a minimum undergraduate GPA of 3.5.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS program. The application fee will be waived, the applicant must contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - For all CIST degrees, if a student successfully completes their undergraduate BS degree with a cumulative GPA of 3.0 (3.5 for computer science) and all graduate courses with a 3.0 or better, they will be recommended for admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Honors Program

The College of Information Science and Technology actively supports the University of Nebraska at Omaha's University Honors Program. For more information, please visit the Honors Program's website [here \(https://www.unomaha.edu/honors-program/\)](https://www.unomaha.edu/honors-program/).

The Honors Program office is located in 208 Kayser Hall.
Phone: 402.554.2696

Accreditation Information

Major	Degree	Accreditation Body
Computer Science	BSCS	ABET
Management Information Systems	BIS	ABET

The College of IS&T's degree programs in Computer Science and Management Information Systems have been accredited by the Computing Accreditation Commission of ABET, Inc., the recognized accrediting body of college and university programs in applied science, computing, engineering, and technology. ABET accreditation demonstrates a program's commitment to providing its students with a quality education.

More information about the College's accreditation and educational objectives for specific ABET accredited programs in Computer Science and Management Information Systems can be found [here \(https://www.unomaha.edu/college-of-information-science-and-technology/academics/abet-accreditation.php\)](https://www.unomaha.edu/college-of-information-science-and-technology/academics/abet-accreditation.php).

All IS&T programs are also accredited as part of UNO's accreditation by the North Central Association/Higher Learning Commission.

Choice of Catalog Policy

A student registering in the College of IS&T for the first time will work with an advisor to develop a matriculation form based on the current online catalog. The matriculation form is used to establish a plan of study for students in the College and will be the primary source for a student's most current academic plan, provided the student has continuous enrollment.

It is the responsibility of each student admitted to the College of Information Science & Technology to become familiar with the procedures and regulations in the undergraduate catalog for their degree program. The College of Information Science & Technology reserves the right, after due notice during the course of a student's work toward a degree, to institute and make effective any new ruling which may be necessary for the general good of the College and to substitute courses for those no longer offered.

Admission Requirements for the College of IS&T

Application deadlines for the College of Information Science & Technology are as follows:

Fall Semester - First day of fall semester classes
 Spring Semester - First day of spring semester classes
 Summer Sessions - July 1

Students may apply for entrance to the College of IS&T during initial registration by indicating their preference in the appropriate place on the University Application for Admission form. A minimum ACT score of 24 or an SAT score of 1110 (Verbal/Math) or a ranking in the top third of a graduating high school class is required for all incoming freshmen to be admitted to the College.

Transfer admission from other colleges or universities: Students may transfer into the College of Information Science & Technology from other institutions by completing the application process described above and

meeting the minimum cumulative grade point average (GPA) of 2.5 (on a 4.00 scale) with a minimum of 12 credit hours.

Academic Requirements for Degrees in the College of IS&T

Number of Hours to Graduate

A minimum of 120 credit hours is required for a Bachelor of Science degree in the College of IS&T. A maximum enrollment of 17 credit hours is allowed per semester. For the summer term, a maximum enrollment of 12 credit hours is allowed.

Minimum GPA

A GPA of 2.5 or higher is required to graduate with a Bachelor of Science degree from the College of IS&T.

College of IS&T Bachelor of Science Requirements

Please see individual College of IS&T degree subsections for specific Bachelor of Science requirements.

Transfer Credit Policy

A maximum of 64 credit hours are accepted from an accredited community college. A minimum grade of C- is required to transfer credits toward College of IS&T degree programs with the exception of business courses and the equivalent of UNO's CIST 1400 and CSCI 1620, which require a grade of C or better.

Unacceptable Credits

Courses such as ENGL 1090, ENGL 1100, MATH 1210, and orientation courses in other colleges or divisions may not be counted as part of the minimum 120 credit hours for College of IS&T degree programs. The course, US 1010 Critical Thinking and Problem Solving Skills for the Modern Day Student, can, however, be counted as elective credit if taken within the first 30 hours of the degree program. A maximum of four credit hours of different Physical Education Activities (PEA) courses may be applied toward the general elective area.

Retroactive Credit Policy

<https://nextcatalog.unomaha.edu/undergraduate/transfer-credit/> (p. 29)

Advanced Placement Credits

<https://nextcatalog.unomaha.edu/undergraduate/transfer-credit/> (p. 29)

Military Credit

<https://nextcatalog.unomaha.edu/undergraduate/transfer-credit/> (p. 29)

International Baccalaureate (IB) Credit

Placement Exams and Credit by Examinations Policies/Practices

<https://nextcatalog.unomaha.edu/undergraduate/student-life-support-services/testing-center/> (p. 64)

Residency Requirement

Thirty of the last 36 credit hours must be University of Nebraska at Omaha courses.

Quality of Work

Students must obtain a grade of C- or better in each class for the purpose of meeting General Education, College of Information Science & Technology (IS&T), and Departmental requirements for College of IS&T degrees with

the exception of CIST 1400 and CSCI 1620, which require a minimum grade of C. A grade of C or better is also required for some courses taken in the College of Business Administration (CBA).

Good Academic Standing Policy

A minimum cumulative grade point average (GPA) of 2.5 is required by the College of Information Science & Technology.

Credit/No Credit (CR/NC) Grades

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

Completion of an Incomplete Grade

To receive an incomplete, students must contact their instructor prior to the end of the semester, request a grade of incomplete, and make arrangements to complete the work. The rules which govern the issuance of an incomplete are as follows:

1. The grade "I" is used by an instructor at the end of a semester or summer session to designate incomplete work in a course. It is given when a student, due to circumstances such as illness, military service, hardship, or death in the immediate family, is unable to complete the requirements of the course in the term in which the student is registered for credit. Incompletes will only be given if the student has already substantially completed the major requirements of the course.
2. Each instructor will judge each situation. The instructor will also indicate by a departmental record with a copy to the student how the incomplete is to be removed. If the instructor is at the University at the time of removal, they will supervise the makeup work and report the permanent grade.
3. In the event the instructor is not available at the time of the student's application for removal of an incomplete, the department chairperson will supervise the removal of the incomplete and turn in the permanent grade for the student.
4. A student shall have no longer than the end of the next regular semester following receipt of the "I" to remove the incomplete. After that time, the "I" will automatically become a "W," or such other grade specified by the instructor depending on the amount and quality of the coursework previously completed. Exceptions to this rule will be permitted if initiated by the student and approved by the instructor, department chairperson, and dean. Exceptions to this rule will be made only in response to circumstances over which the student has no control, and these must be detailed.
5. In registering for courses, students receiving one or more "I" grades from the previous semester should take into account the time needed to complete the required work and plan their schedules accordingly.

Repeatable Grades/Courses

A repeated course may count only once for graduation. Exceptions are internships, independent studies, physical education activity courses, and special topic courses.

For students repeating any Computer Science course (CSCI 1xxx-4xxx):

1. A formal warning shall be conveyed to the student upon receiving a grade below C- in CSCI courses (or a grade below C in the case of CSCI 1620) for a second time.
2. The student shall not be allowed to enroll in the course after receiving a grade below C- for the third time.

Attendance Policy for Computer Science Courses

1. A formal warning shall be conveyed to the student upon the second instance (first instance for summer sessions) of unexcused absence from a class.

2. The student shall be withdrawn from the class after the third instance (second instance for summer sessions) of unexcused absence from the class.

Grade Appeal Policy and Process

Students who wish to appeal a grade which they feel was erroneously given shall first discuss the matter with the course instructor. If a satisfactory agreement cannot be reached, the student may submit a written appeal to the department chairperson within 30 days of receipt of the grade report from the Registrar's Office. If a satisfactory agreement still cannot be reached, the Academic Evaluation Committee of the College of Information Science & Technology will hold a hearing to make a final determination based on the facts presented. The most current College of IS&T undergraduate grade appeal policy can be found here (<https://www.unomaha.edu/college-of-information-science-and-technology/student-resources/grade-appeal-policy.php>):

Academic Amnesty

A student who did not perform well during one or two consecutive semesters (not necessarily the first and second ones) at the University of Nebraska Omaha (UNO), the University of Nebraska-Lincoln (UNL), or the University of Nebraska Kearney (UNK) may petition the College of IS&T for academic amnesty to have either one or both semesters' grades removed from their cumulative grade point average (GPA). To petition for academic amnesty, a student must have completed 24 semester hours (12 semester hours if the student is part-time) of coursework at UNO, UNL, or UNK with a GPA of 2.5 or better subsequent to the semester or semesters in question.

In addition, a minimum of four years is required between the semester(s) being considered for amnesty and the petition for academic amnesty.

If the Academic Amnesty Committee agrees, those courses that were completed with a C- or better (or a C grade or better in the case of some College of Business Administration courses or CIST 1400 and CSCI 1620 beginning in the Fall 2019 semester) during the academic amnesty semester or semesters may still count toward graduation. Students who are granted academic amnesty may not graduate with academic honors.

Academic Probation and Suspension

Probation

Probation constitutes a period of formal warning that a student is doing unsatisfactory work. A student whose cumulative grade point average is below 2.0 after having attempted six or more semester hours of study will be placed on probation. Probationary status will remain in effect as long as the student's cumulative grade point average (GPA) remains below 2.0. No student will be allowed to enroll for any course on a Pass/Fail or Credit/No Credit basis while on probation.

The student is encouraged to use every opportunity while on probation to seek counsel and guidance from various university agencies which have been established to offer assistance and academic support. For information on such services, the student should consult with their academic advisor or counselor.

Suspension

Students who are on probation will be suspended at the end of the spring semester if their semester grade point average is lower than 2.0 and their cumulative grade point average (GPA) falls below the following standards:

Hours Attempted	Cumulative GPA
0-12	No Suspension
13-45	1.75
46 or more	2.00

Academic suspension under these conditions will be automatic and will be for a minimum period of one year.

Students placed on suspension will be notified by the College of Information Science & Technology and given instructions on how to appeal, should they choose to do so, as well as any applicable deadlines associated with an appeal.

Appeals properly filed shall delay implementation of the suspension until the appropriate appeal committee has ruled on the appeal. However, if the appeal is denied, the student shall be disenrolled and tuition shall be refunded.

Students will only be suspended at the end of the spring term. This rule applies to all UNO colleges, including the Division of Continuing Studies and all University of Nebraska-Lincoln Omaha-based programs in the Colleges of Architecture, Agriculture, Education and Human Resources, and Engineering.

Reinstatement Policy Following Academic Suspension

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

Academic Advising

The College of IS&T's undergraduate academic advisors recognize that students have individual academic, career, and personal needs that may require special assistance. Below are some guidelines on how academic advisors help ensure success. Students are strongly encouraged to meet with their advisor regularly.

What do IS&T academic advisors do?

IS&T academic advisors explain the rules and requirements of College of IS&T programs and help students understand how they apply to individual situations. The advisors prepare each student record so that students meet all the requirements for the degree in the final audit process. In addition, advisors provide advice about which degree-program specific courses and scheduling will be most helpful. They can also help with difficult situations such as concerns about grades, course instruction, time management, scheduling conflicts, or other academic issues.

When should I see an academic advisor?

During freshman and sophomore year, students in the College of IS&T are required to meet with an advisor every semester. Juniors and seniors in good academic standing are strongly encouraged, though not required, to continue to meet with an advisor at least once per semester to plan their classes, to make sure all records are up-to-date, and to catch any problems early. All seniors are required to schedule a meeting for a senior check when they reach 91 earned hours. Students majoring in IT Innovation are required to meet with an academic advisor every semester.

Any student whose GPA falls below 2.5 will be required to meet with an academic advisor regardless of class standing.

Advising Holds

Advising holds are automatically placed each semester for freshmen, sophomores, all IT Innovation students, and for any student whose GPA is below a 2.5.

Student Holds

<https://nextcatalog.unomaha.edu/undergraduate/enrollment/enrollment/> (p. 23)

Senior Check

When students reach 91 hours of completed coursework, they must request a senior check to be done by an academic advisor. Assuming satisfactory completion of all approved courses and degree requirements, this process will assure the student's graduation date. Should this procedure not be followed, responsibility for meeting graduation requirements falls to the student and may prevent graduation on the anticipated date.

Application for Degree

Each student who expects to receive a diploma must file an Application for Degree whether or not that student plans to attend the commencement ceremony. The Application for Degree is available online by logging in to MavLINK. Announcements about deadlines are also posted in MavLINK.

It is the responsibility of the student to inform the Registrar's Office of his or her graduation plans and to provide a diploma mailing address. Failure to meet these stipulations may necessitate postponement of graduation until the following semester.

Computer Science

The Computer Science program provides a firm foundation in the theory and application of computing while allowing for additional concentration in areas of choice, such as information systems, mainframe computing, computer networking, telecommunications, data and knowledge engineering, and software development. This discipline is based on building software tools that make computers useful.

Mission and Vision

The **mission** of the Department is

- to provide outstanding undergraduate and graduate education in computer science;
- to conduct research that advances the state of the art in computer science, to integrate our educational, research, and service activities with other programs in the College of Information Science and Technology, the University of Nebraska at Omaha, and the communities we serve to reflect the role of computer science in information science and technology, and
- to ensure our efforts are of value and relevance to those we serve by continual assessment and improvement.

The **vision** of the Department is to be recognized nationally and internationally for delivering outstanding computer science education and conducting research of high distinction, both of value and relevance to the communities we serve.

Accreditation

The Computer Science program is accredited by the Computing Accreditation Commission of ABET, Inc., which is the recognized accreditor of college and university programs in applied science, computing, engineering, and engineering technology. ABET accreditation demonstrates a program's commitment to providing its students with a quality education.

Bachelor of Science in Computer Science (BSCS)

The Bachelor of Science in Computer Science provides students with a solid background in the fundamentals of computing and prepares each individual for employment in a wide variety of positions and for graduate study in computer science. The content of the Department's courses is continually monitored to ensure they are consistent with the fast-changing developments in the discipline. Appropriate university and departmental computing resources are available to students taking computer sciences courses.

A minimum of 120 credit hours is required for a Bachelor of Science degree in Computer Science (BSCS). Thirty of the last 36 hours must be University of Nebraska at Omaha courses. Registering for courses without having taken the stated prerequisites could result in administrative withdrawal. Students must have a C or better grade in CIST 1400 and CSCI 1620 to serve as the prerequisite for all subsequent Computer Science (CSCI) courses. For all other courses applied towards the major, a grade of C- or better will meet the prerequisite and degree requirements.

Second Bachelor's Degree

General Requirements

Students who have satisfied the requirements for a first bachelor's degree other than computer science at the University of Nebraska at Omaha must complete a **minimum** of 30 additional semester hours at the University for a second bachelor's degree.

To obtain computer science as a second bachelor's degree, students must complete academic requirements for the degree which include **18 credit hours of IS&T core courses, 27 credit hours of computer science core courses, 21 credit hours of a computer science core extension, and 16 credit hours of Mathematics courses**, provided that the first bachelor's degree is not in computer science. Students who are admitted to a second-degree program in Computer Science must meet with an academic advisor in the College of IS&T before beginning the degree to make a plan of study. Some transfer coursework may apply; however, 30 of the last 36 hours must be University of Nebraska at Omaha courses.

Repeatable Grades/Courses

A repeated course may count only once for graduation. Exceptions are internships, independent studies, physical education activities courses, and special topic courses.

For students repeating any Computer Science courses (CSCI 1xxx-4xxx):

1. A formal warning shall be conveyed to the student upon receiving a grade below C- in CSCI courses for a second time.
2. The student shall not be allowed to enroll in the course after receiving a grade below C- for the third time.

Attendance Policy for Computer Science Courses

1. A formal warning shall be conveyed to the student upon the second instance (first instance for summer session) of unexcused absence from a class.
2. The student shall be withdrawn from the class after the third instance (second instance for summer session) of unexcused absence from the class.

Contact

For more information, contact the College of IS&T Academic Advising Office at 402.554.3819.

Website (<http://www.unomaha.edu/college-of-information-science-and-technology/academics/computer-science.php>)

Degrees Offered

- Computer Science, Bachelor of Science (p. 644)

Writing in the Discipline

All UNO students are required to take a writing-in-the-discipline course within their major. Computer Science degree students must take CIST 3000.

Minors Offered

- Computer Science Minor (p. 650)

Computer Science Minor

A minor in computer science may be earned by completing 12 hours of core courses (CIST 1400, CSCI 1620, CSCI 2030 and CSCI 3320), including 6 hours of computer science at the 3000 level or above.

Students are accountable for prerequisite courses.

Computer Science is the study of computers and what they can do. Our ABET-accredited program in Computer Science covers the entire spectrum

of CS-related fields, from understanding the theory of computation to the design and construction of real-world software systems. With our Computer Science degree, we aim to do our part in developing a high tech workforce for 21st century careers.

Careers Options:

Computer Science majors have gone on to become the following and more. We will prepare you for jobs that do not even exist yet.

- Software Engineers and Programmers
- Web and Mobile Application Developers
- Enterprise Architect
- Project Managers
- Network and Cloud Architects
- Database Developers
- Game Developers
- User Experience Designers
- Data Scientists
- Artificial Intelligence Engineers

CSCI 1200 COMPUTER SCIENCE PRINCIPLES (3 credits)

This course introduces students to the foundational principles of computer science. It aims to help students learn the essential thought processes used by computer scientists to solve problems, expressing those solutions as computer programs. The exercises and projects make use of mobile devices and other emerging platforms.

Prerequisite(s)/Corequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or equivalent with C- or better, or permission of the instructor

Distribution: Natural/Physical Sci General Education lecture

CSCI 1204 COMPUTER SCIENCE PRINCIPLES LABORATORY (1 credit)

This is a laboratory course for students enrolled in CSCI 1200. It consists of programming exercises designed to help students practice computational thinking and apply computational solutions to practical problems. The exercises make use of mobile devices and other emerging platforms.

Prerequisite(s)/Corequisite(s): CSCI 1200, prior or concurrent.

Distribution: Natural/Physical Sci General Education lab course

CSCI 1280 INTRODUCTION TO COMPUTATIONAL SCIENCE (3 credits)

Introduction to Computational Science explores the role of computer science in scientific inquiry. Through the construction and analysis of block-based visual artifacts (e.g., pixel art and geometric patterns), this course aims to help students learn the essential thought processes used by computer scientists to solve problems, expressing those solutions as computer programs. When executed, these computer programs produce visual artifacts that can be displayed and interacted with using a variety of tools/software including LEGO Digital Designer, Minecraft, LDraw, 3D Builder, and Virtual Reality systems such as the HTC Vive.

Prerequisite(s)/Corequisite(s): Math 1220 (or equivalent)

Distribution: Natural/Physical Sci General Education lecture and Natural/Physical Science General Education course

CSCI 1620 INTRODUCTION TO COMPUTER SCIENCE II (3 credits)

Advanced topics in programming; topics in data representation and manipulation, data structures, problem solving and algorithm design. This course has a required laboratory component; students must register for a laboratory section when enrolling in lecture.

Prerequisite(s)/Corequisite(s): (CIST 1400 with grade of C or better) AND (MATH 1930 or MATH 1950 with grade of C- or better)

CSCI 2030 MATHEMATICAL FOUNDATIONS OF COMPUTER SCIENCE (3 credits)

This course introduces discrete mathematics concepts that are foundational for the study of computer science such as functions, relations, and sets, basic logic, methods of proof, mathematical induction, computational complexity, recursion, counting, recurrences, and relations.

Prerequisite(s)/Corequisite(s): (CIST 1400 with grade of C or better) AND (MATH 1930 or MATH 1950 with grade of C- or better)

CSCI 2240 INTRODUCTION TO C PROGRAMMING (3 credits)

Programming in 'C' in a UNIX operating system environment; algorithm and program development and file manipulation using 'C'; UNIX-like utility development.

Prerequisite(s)/Corequisite(s): CSCI 1620 with grade of C or better

CSCI 2310 VIDEO GAME DESIGN (3 credits)

The course will cover game design and theory techniques used by the gaming industry. This course is designed for students who have gone through the introductory programming course and have an interest in what it takes to design current games.

Prerequisite(s)/Corequisite(s): CIST 1400 with grade of C or better.

CSCI 2410 INTRODUCTION TO DATA ANALYTICS USING PYTHON (3 credits)

This course is an introduction to the basic concepts and principles of data analytics using the Python programming language. The first part of the course covers major Python language topics including procedures and functions, iteration, recursion, arrays and matrices, strings, operational model of procedure and function calls, algorithms, exceptions, object-oriented programming, and file input/output. The coverage of Python language features are aimed mainly at the data analytics studies of this course. The second part of the course emphasizes applying Python and its rich functional libraries and special software packages to data munging, analysis, mining, and visualization, and machine learning techniques including statistical analysis, parameter estimation, regression, classification, predictive modeling construction, etc.

Prerequisite(s)/Corequisite(s): (CSCI 1620 with grade of C or better) AND (CIST 2500 or equivalent statistics course with grade of C- or better).

Not open to non-degree graduate students.

CSCI 2510 INTRODUCTION TO GAME PROGRAMMING (3 credits)

The course will cover programming and development techniques used in a game programming environment. The course is designed for students who have an interest in game programming to be eased into the concepts in a familiar environment.

Prerequisite(s)/Corequisite(s): CSCI 2240 with C- or better. Not open to non-degree graduate students.

CSCI 2620 2D GRAPHICS: IMAGE PROCESSING (3 credits)

This class introduces the 2D graphics area of image processing, which takes an image, creates an internal model of the image, modifies it using a computer program, and produces a new image. Specific techniques covered in this course include color spaces, image transformations, edge detection, file formats, object tracking, and background removal.

Prerequisite(s)/Corequisite(s): CSCI 1620 with grade of C or better

CSCI 2840 C++ & OBJECT-ORIENTED PROGRAMMING (3 credits)

C++ and Object Oriented Programming (OOP) is taught in the UNIX environment. Topics include C++ as a 'Better C,' OOP with C++, classes and data abstraction, operator overloading, inheritance, virtual functions and polymorphism, C++ stream I/O.

Prerequisite(s)/Corequisite(s): CSCI 2240; High-level programming language like Pascal, Java, or C++; solid understanding of pointers & scope; ability to design & implement solutions to modest problems (with C- or better).

CSCI 2850 PROGRAMMING ON THE INTERNET (3 credits)

This course is an introduction to and overview of Internet-based application development focusing on the use of Java, Perl and other server-based programming languages. Software development in the context of the World Wide Web and other Internet services will be emphasized. Internet application development will also be discussed. Other techniques will be covered.

Prerequisite(s)/Corequisite(s): CSCI 1620 or CSCI 1840.

CSCI 2980 TOPICS IN COMPUTER SCIENCE (3 credits)

A variable topic course in computer science at the sophomore level. Topics not covered in the computer science degree program, but suitable for sophomore-level students.

Prerequisite(s)/Corequisite(s): CSCI 1620. Permission of instructor. Additional prerequisites may be required for particular topic offerings with C- or better.

CSCI 3100 APPLIED COMBINATORICS (3 credits)

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with CSCI 8105, MATH 3100, MATH 8105).

Prerequisite(s)/Corequisite(s): MATH 2030, MATH 2040, MATH 2230, or CSCI 2030 all with a C- or better. Mathematical logic; Set theory; Relations; Functions; Congruences; Inductive and recursive definitions; Discrete probability; sets, graphs, trees, & matrices

CSCI 3300 NUMERICAL METHODS (3 credits)

This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 8305, MATH 3300, MATH 8305).

Prerequisite(s)/Corequisite(s): MATH 1960 with a C- or better or permission of instructor

CSCI 3320 DATA STRUCTURES (3 credits)

This is a core that will cover a number of data structures such as tree, hashing, priority queues and graphs as well as different algorithm design methods by examining common problem-solving techniques. (Cross-listed with CSCI 8325)

Prerequisite(s)/Corequisite(s): CSCI 1620 and CSCI 2030 or MATH 2030. Programming Languages: Java or C++ Topics: Arrays, Pointers, Introductory Lists, Storage Allocation (with C- or better).

CSCI 3450 NATURAL LANGUAGE PROCESSING (3 credits)

The course will provide overview of the topics in natural language processing such as word and sentence tokenization, syntactic parsing, semantic role labeling, text classification. We will discuss fundamental algorithms and mathematical models for processing natural language, and how these can be used to solve practical problems. We will touch on such applications of natural language processing technology as information extraction and sentiment analysis. (Cross-listed with CYBR 3450).

Prerequisite(s)/Corequisite(s): Prereq: CSCI 2030 with C- or better; Co-req: CSCI 3320 with C- or better; Students should be comfortable w/ scripting (Python is the language extensively used in natural language processing tools including NLTK). Not open to non-degree graduate students.

CSCI 3470 FUNDAMENTALS AND ALGORITHMS OF MACHINE LEARNING (3 credits)

This course discusses the fundamentals and algorithms of machine learning and contains both theory and application. Machine learning, as a subset of artificial intelligence, is the scientific study of models that computer systems use to perform a specific task without explicit instructions. Topics in this course will include supervised learning such as Decision Tree, Perceptron, Support Vector Machine, Naive Bayes, and Regression, unsupervised learning such as clustering, dimensionality reduction, kernel methods, learning theory such as bias/variance trade-offs, Generalization and Overfitting and large margins. Other crucial topics will include discussions such as Stacking, Semi-Supervised Learning and Interactive Learning. This course will also discuss a few applications in problem domains such as in computer vision.

Prerequisite(s)/Corequisite(s): CSCI 2410 or instructor permission. Not open to non-degree graduate students.

CSCI 3510 ADVANCED GAME PROGRAMMING (3 credits)

This course is intended for those with an interest in video game programming. This course introduces the advanced concepts of game programming including 3D programming, game networking, and development of a multiplayer, networked game by learning and using the XNA environment.

Prerequisite(s)/Corequisite(s): CSCI 2510 and CSCI 3320 with C- or better, or Instructor permission. Not open to non-degree graduate students.

CSCI 3550 COMMUNICATION NETWORKS (3 credits)

This course is designed to bring students up to the state of the art in networking technologies with a focus on Internet. It will cover the principles of networking with an emphasis on protocols, implementations and design issues. (Cross-listed with CSCI 8555).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 with C- or better. Data structures and algorithms. C or C++ programming.

CSCI 3660 THEORY OF COMPUTATION (3 credits)

The course is intended to introduce the students to the theory of computation in a fashion that emphasizes breadth and away from detailed analysis found in a normal undergraduate automata course. The topics covered in the course include methods of proofs, finite automata, non-determinism, regular expressions, context-free grammars, pushdown automata, no-context free languages, Church-Turing Thesis, decidability, reducibility, and space and time complexity.

Prerequisite(s)/Corequisite(s): CSCI 3320

CSCI 3710 INTRODUCTION TO DIGITAL DESIGN AND COMPUTER ORGANIZATION (3 credits)

The course is intended to introduce the students to the topics found in introductory digital design and computer organization classes.

Prerequisite(s)/Corequisite(s): CSCI 3320 (could be taken concurrently)

CSCI 3830 ADVANCED JAVA PROGRAMMING (3 credits)

This course teaches students web application development using advanced concepts in the Java programming language. It introduces students to distributed computing models such as the client-server model and how it is implemented in web applications using modern Java technology stacks.

Prerequisite(s)/Corequisite(s): (CSCI 1620 with C or better) AND (CSCI 3320 with C- or better (can be taken as a co-requisite)) AND (basic knowledge of HTML and SQL)

CSCI 3850 FOUNDATIONS OF WEB SEARCH TECHNOLOGIES (3 credits)

This course provides students a basic understanding of how search and information flow works on the web. Main topics include: document representation, inverted indexing, ranking of web search results, vector-space model, web graph, PageRank, search-based advertising, information cascades, and web crawling.

Prerequisite(s)/Corequisite(s): CSCI 2030 and CSCI 2850 with C- or better, or instructor Approval. Not open to non-degree graduate students.

CSCI 4000 ASSESSMENT (0 credits)

This course provides various resources to students about to graduate, and provides a mechanism that guarantees these students complete the final assessments required to maintain the currency and quality of the program. It is intended for undergraduate computer science majors in their last semester prior to graduation. It is required for all students entering after the spring 2004 semester. All degree requirements should be completed by the end of the semester during which this course is taken. Students taking this course will be expected to file an application for graduation during the semester.

Prerequisite(s)/Corequisite(s): All degree requirements should be completed by the end of the semester during which this course is taken. Students taking this course will be expected to file an application for graduation during the semester. Not open to non-degree graduate students.

CSCI 4010 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with MATH 4010, MATH 8016, CSCI 8016).

Prerequisite(s)/Corequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

CSCI 4100 INTRODUCTION TO ALGORITHMS (3 credits)

The course provides students a basic understanding of algorithm analyses. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, sorting and its lower bounds, dynamic programming, greedy algorithms, and graph traversal.

Prerequisite(s)/Corequisite(s): CSCI 3320 with C- or better.

CSCI 4150 GRAPH THEORY & APPLICATIONS (3 credits)

Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 8156, MATH 4150, MATH 8156).

Prerequisite(s)/Corequisite(s): CSCI 2030 with a C- or better, or MATH 2030 with a C- or better, or MATH 2230 with a C- or better, or permission of instructor.

CSCI 4220 PRINCIPLES OF PROGRAMMING LANGUAGES (3 credits)

This course covers the foundational concepts and principles underlying the design and implementation of programming languages. Language constructs including assignment, equality, references, aggregations, scope, encapsulation, and parameter passing are discussed. A central theme is how a particular language construct relates to the concept of equational reasoning (referential transparency). Formal notations for describing syntax and semantics are presented.

Prerequisite(s)/Corequisite(s): CSCI 3320 and CSCI 3660 with C- or better.

CSCI 4250 HUMAN COMPUTER INTERACTION (3 credits)

Human computer interaction is concerned with the joint performance of tasks by humans and machines; human capabilities to use machines (including learnability of interfaces); algorithms and programming of the interface; engineering concerns that arise in designing and building interfaces; the process of specification, design, and implementation of interfaces; and design trade-offs. (Cross-listed with CSCI 8256).

Prerequisite(s)/Corequisite(s): Either CSCI 3320 or ITIN 3330 with a grade of C- or better.

CSCI 4260 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 8266, ITIN 4260, ITIN 8266).

Prerequisite(s)/Corequisite(s): Required: C- or better in CIST 2500 and junior standing, or by permission of instructor. Recommended: C- or better in CSCI 4250 or ITIN 3330.

CSCI 4300 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 8306, MATH 4300, MATH 8306).

Prerequisite(s)/Corequisite(s): MATH 2050 with a C- or better or permission of instructor.

CSCI 4310 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 8316, MATH 4310, MATH 8316).

Prerequisite(s)/Corequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

CSCI 4350 COMPUTER ARCHITECTURE (3 credits)

The course deals with: Computer evolution, top view of processor design, cache memory and organization, hierarchical memory design and management, performance metrics, RISC versus CISC architecture, and pipeline computer design and architecture. The course also covers analytic design alternatives as needed.

Prerequisite(s)/Corequisite(s): CSCI 3710, CSCI 3320 or CSCI 8325 with C- or better.

CSCI 4380 DIGITAL FORENSICS (3 credits)

Digital forensics involves the preservation, identification, extraction, analysis and documentation of digital evidence stored on a variety of electronic devices. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a forensics investigation. Topics include: an introduction to digital forensics, data acquisition, first response, memory forensics, operating system forensics, and network forensics. Students will be required to perform several forensics analyses in a controlled lab environment, including acquiring forensically sound hard drive images, memory images and analyzing these using industry standard tools, such as Forensic Toolkit (FTK). The Digital Forensics class is designed for Cybersecurity, Computer Science and other qualified students to learn what actions are both appropriate and required for preserving, collecting and analyzing digital evidence in cases of intrusion, data theft or other cybercrimes. (Cross-listed with CYBR 4380).

Prerequisite(s)/Corequisite(s): The student must take the following before enrolling: CYBR 3600 or CIST 3600, CSCI 3550 or ISQA 3400, CYBR 3370, CYBR 3350. Alternatively, instructor permission can be sought for students who have not met all of the above requirements.

CSCI 4430 QUANTUM COMPUTING AND CRYPTOGRAPHY (3 credits)

The course builds an understanding of exciting concepts behind quantum computing and quantum cryptography. In doing so it will introduce the principles of qubits, superposition, entanglement, teleportation, measurement, quantum error correction, quantum algorithms such as quantum Fourier transformation, Shor's algorithm and Grover's algorithm, quantum key exchange, quantum encryption, and secure quantum channels that are built using these principles. It will also discuss advantages of quantum computing and cryptography over classical computing and cryptography and limitations thereof. The students will come out with a working understanding of the field of quantum computing and quantum cryptography. During the course, students will also implement several of the quantum algorithms. (Cross-listed with CYBR 8436, CYBR 4430).

Prerequisite(s)/Corequisite(s): Co-requisites: CYBR 3570 or CSCI 4560; or Instructor permission.

CSCI 4440 INTRODUCTION TO PARALLEL COMPUTING (3 credits)

Need for higher-performance computers. Topics discussed include: classification of parallel computers; shared-memory versus message passing matchings; for ms of parallelism, measure of performance; designing parallel algorithms; parallel programming and parallel languages; synchroization constructs; and operating systems for parallel computers. (Cross-listed with CSCI 8446)

Prerequisite(s)/Corequisite(s): CSCI 4500 which may be taken concurrently.

CSCI 4450 INTRODUCTION TO ARTIFICIAL INTELLIGENCE (3 credits)

An introduction to artificial intelligence. The course will cover topics such as machine problem solving, uninformed and informed searching, propositional logic, first order logic, approximate reasoning using Bayesian networks, temporal reasoning, planning under uncertainty and machine learning. (Cross-listed with CSCI 8456).

Prerequisite(s)/Corequisite(s): CSCI 3320 with C- or better.

CSCI 4470 PATTERN RECOGNITION (3 credits)

Structures and problems of pattern recognition. Mathematics model of statistical pattern recognition, multivariate probability, Bay's decision theory, maximum likelihood estimation, whitening transformations. Parametric and non-parametric techniques, linear discriminant function, gradient-descent procedure, clustering and unsupervised learning, and feature selection algorithms. (Cross-listed with CSCI 8476).

Prerequisite(s)/Corequisite(s): CSCI 1620 with C- or better, and MATH 2050. Recommended: MATH 4740/8746 or STAT 3800/8805.

CSCI 4480 ALGORITHMS FOR ROBOTICS (3 credits)

This course provides an introduction to software techniques and algorithms for autonomously controlling robots using software programs called controllers. Students will be taught how to program and use software controllers on simulated as well as physical robots. (Cross-listed with CSCI 8486).

Prerequisite(s)/Corequisite(s): CSCI 3320 with C- or better. CSCI 4450/8456 is a recommended but not essential pre-requisite.

CSCI 4500 OPERATING SYSTEMS (3 credits)

Operating system principles. The operating system as a resource manager; I/O programming, interrupt programming and machine architecture as it relates to resource management; memory management techniques for uni-multiprogrammed systems; process description and implementation; processor management (scheduling); I/O device, controller, and channel management; file systems. Operating system implementation for large and small machines. (Cross-listed with CSCI 8506).

Prerequisite(s)/Corequisite(s): CSCI 3710, CSCI 3320/8325, MATH 1950, and CSCI 4350/8356 with C- or better.

CSCI 4510 ADVANCED OPERATING SYSTEMS (3 credits)

State-of-the art techniques for operating system structuring and implementation. Special purpose operating systems. Pragmatic aspects of operating system design, implementation and use.

Prerequisite(s)/Corequisite(s): CSCI 4500

CSCI 4560 NUMBER THEORY & CRYPTOGRAPHY (3 credits)

An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 8566, MATH 4560, MATH 8566).

Prerequisite(s)/Corequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

CSCI 4620 COMPUTER GRAPHICS (3 credits)

An introduction to the acquisition, manipulation and display of graphical information using digital techniques. Topics include discussion of the various hardware devices used for input and output, the classical algorithms and data structures used in manipulation of graphical objects, the user interface to the graphics system, and applicable standards. (Cross-listed with CSCI 8626).

Prerequisite(s)/Corequisite(s): ISQA 3300 or CSCI 3320

CSCI 4660 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)

This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation, and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 8666, MATH 4660, MATH 8666).

Prerequisite(s)/Corequisite(s): MATH 2030. Recommended: CSCI 3320/ CSCI 8325.

CSCI 4700 COMPILER CONSTRUCTION (3 credits)

Assemblers, interpreters and compilers. Compilation of simple expressions and statements. Analysis of regular expressions. Organization of a compiler, including compile-time and run-time symbol tables, lexical scan, syntax scan, object code generation and error diagnostics. (Cross-listed with CSCI 8706).

Prerequisite(s)/Corequisite(s): CSCI 3320 and CSCI 4220 with C- or better. Recommended: CSCI 4500.

CSCI 4760 TOPICS IN MODELING (3 credits)

Selection of such topics as formulation and analysis of various models involving Markov chains, Markov processes (including birth and death processes), queues, cellular automata, difference and differential equations, chaotic systems and fractal geometries. (Cross-listed with CSCI 8766).

Prerequisite(s)/Corequisite(s): MATH 2350 and MATH 4740 or MATH 8746.

CSCI 4830 INTRODUCTION SOFTWARE ENGINEERING (3 credits)

Basic concepts and major issues of software engineering, current tools and techniques providing a basis for analyzing, designing, developing, maintaining and evaluating the system. Technical, administrative and operating issues. Privacy, security and legal issues. (Cross-listed with CSCI 8836).

Prerequisite(s)/Corequisite(s): CSCI 3320 with C- or better.

CSCI 4850 DATABASE MANAGEMENT SYSTEMS (3 credits)

Basic concepts of data base management systems (DBMSs). The relational, hierarchical and network models and DBMSs which use them. Introduction to data base design. (Cross-listed with CSCI 8856).

Prerequisite(s)/Corequisite(s): CSCI 3320 or equivalent with C- or better.

CSCI 4890 DATA WAREHOUSING AND DATA MINING (3 credits)

This course provides students with a theoretical foundation and practical methods for designing and constructing data warehouse and implementing data mining. After covering the essential concepts, issues, techniques to build an effective data warehouse, this course emphasizes the various techniques of data mining, such as association, classification, clustering and prediction for on-line analyses within the framework of data warehouse architectures. This course gives students an opportunity to undertake a real-life data analysis project. (Cross-listed with ISQA 4890).

Prerequisite(s)/Corequisite(s): ISQA 3310 or CSCI 4850

CSCI 4900 INTERNET SYSTEMS DEVELOPMENT (3 credits)

This course focuses on contemporary techniques and technologies in the design, development, and integration of web-enabled information systems. This is a rapidly moving, hands-on course that mirrors real-world development of internet-based applications.

Prerequisite(s)/Corequisite(s): CSCI 1620, CSCI 2850, (recommended) CSCI 3830, CSCI 4830 with C- or better.

CSCI 4950 INTERNSHIP IN COMPUTER SCIENCE (1-3 credits)

The purpose of this course is to provide students with opportunities to apply their academic studies in non-academic environments such as those found in business, industry and other non-academic organizations. The student interns will sharpen their academic focus and develop better understanding of non-academic application areas. The course is intended primarily for juniors and seniors in computer science.

Prerequisite(s)/Corequisite(s): Permission of the computer science program chair.

CSCI 4970 CAPSTONE PROJECT (3 credits)

The Capstone Project completes a Computer Science student's undergraduate experience. Students will work on a team-based real-world project, practicing software engineering skills and applying fundamental computer science principles acquired throughout their undergraduate study.

Prerequisite(s)/Corequisite(s): CSCI 4830 with C- or better; Senior standing in Computer Science. Not open to non-degree graduate students.

CSCI 4980 TOPICS IN COMPUTER SCIENCE (1-3 credits)

A variable topic course in computer science at the senior level. Topics not normally covered in the computer science degree program, but suitable for senior-level students. (Cross-listed with CSCI 8986).

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

CSCI 4990 INDEPENDENT STUDIES (1-3 credits)

A variable credit course for the junior or senior who will benefit from independent reading assignments and research type problems. Independent study makes available courses of study not available in scheduled course offerings. The student wishing to take an independent study course should find a faculty member willing to supervise the course and then submit, for approval, a written proposal (including amount of credit) to the Computer Science Undergraduate Program Committee at least three weeks prior to registration.

Prerequisite(s)/Corequisite(s): Written permission required. Independent study proposals must be approved by the Undergraduate Program Committee.

Computer Science, Bachelor of Science

The Bachelor of Science in Computer Science provides students with a solid background in the fundamentals of computing and prepares them for employment in a wide variety of positions and for graduate study in computer science. The content of the department's courses is continually monitored to ensure they are consistent with fast-changing developments in the discipline. Courses are offered in the day, evening, and some online sections for the convenience of our students. Appropriate university and

departmental computing resources are available to students taking computer science courses.

Student Group

The Association of Computer Machinery (ACM) (<https://www.acm.org/>) is a major force in advancing the skills of information technology professionals and students worldwide, providing the industry's leading portal to computing literature and more.

Requirements

A minimum of 120 credit hours is required for a Bachelor of Science degree in Computer Science (BSCS). Thirty of the last 36 hours must be University of Nebraska at Omaha courses. Registering for courses without having taken the stated prerequisites could result in administrative withdrawal. Students must have a C or better grade in CIST 1400 and CSCI 1620 to serve as the prerequisite for all subsequent Computer Science (CSCI) courses. For all other courses applied towards the major, a grade of C- or better will meet the prerequisite and degree requirements.

To obtain a BSCS, a student must fulfill the University General Education, College, and Departmental requirements. Some courses may satisfy requirements in more than one area, but credit is awarded only once, thereby reducing the total number of credit hours for the degree to 120. (This total does not include prerequisites.)

Code	Title	Credits
46 hours of University General Education courses (13 hours of which can be satisfied by courses in the required areas below)		33
18 hours of College of IS&T Core courses		18
16 hours of Mathematics courses		16
27 hours of Computer Science Core courses		27
21 hours of Computer Science Core Extension courses		21
5 hours of elective/prerequisite courses		5
Total Credits		120

Code	Title	Credits
Electives/Prerequisites		
Select one of the following:		3-4
CSCI 1200 & CSCI 1204	COMPUTER SCIENCE PRINCIPLES and COMPUTER SCIENCE PRINCIPLES LABORATORY ¹	
CSCI 1280	INTRODUCTION TO COMPUTATIONAL SCIENCE	
CIST 1300	INTRODUCTION TO WEB DEVELOPMENT	

College of IS&T Core Courses for Computer Science Majors

The College of IS&T has developed a series of courses that are required for students wishing to obtain a degree from the College. The development and implementation of this core curriculum is unique; it serves as a basis for preparing students to enter more advanced courses. The core curriculum is as follows (students are accountable for prerequisite courses):

CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I	3
CSCI 1620	INTRODUCTION TO COMPUTER SCIENCE II	3
CSCI 2240	INTRODUCTION TO C PROGRAMMING	3
CIST 2100	ORGANIZATIONS, APPLICATIONS AND TECHNOLOGY ²	3
CIST 2500	INTRODUCTION TO APPLIED STATISTICS FOR IS&T	3
CIST 3110	INFORMATION TECHNOLOGY ETHICS ³	3

Mathematics Courses

MATH 1950	CALCULUS I	5
MATH 1960	CALCULUS II	5
CSCI 2030	MATHEMATICAL FOUNDATIONS OF COMPUTER SCIENCE	3
MATH 2050	APPLIED LINEAR ALGEBRA	3

**Department Requirements for the BSCS Degree
Computer Science Required Courses**

CSCI 3320	DATA STRUCTURES	3
CSCI 3550	COMMUNICATION NETWORKS	3
CSCI 3660	THEORY OF COMPUTATION	3
CSCI 3710	INTRODUCTION TO DIGITAL DESIGN AND COMPUTER ORGANIZATION	3
CSCI 4220	PRINCIPLES OF PROGRAMMING LANGUAGES	3
CSCI 4350	COMPUTER ARCHITECTURE	3
CSCI 4500	OPERATING SYSTEMS	3
CSCI 4830	INTRODUCTION SOFTWARE ENGINEERING	3
CSCI 4970	CAPSTONE PROJECT	3
CSCI 4000	ASSESSMENT (MFT) ⁴	0

Computer Science Core Extension Courses

See "Computer Science Core Extension Courses" below. 21

Total Credits 85-86

¹ NOTE: CSCI 1200, CSCI 1204 and CSCI 1280 count toward the Natural and Physical Sciences requirement.

² NOTE: CIST 2100 counts toward Social Science requirement.

³ NOTE: CIST 3110 counts toward Humanities requirement.

⁴ **MFT- Major Field Test** - The Computer Science Department uses the MFT to statistically compare our graduates to graduates from other institutions of higher education nationwide. The test consists of 60 multiple-choice questions. Individual scores on the MFT give an effective metric to measure levels of achievement and allow students to compare their scores with national comparative data. The Computer Science Department uses the scores to assist in its ongoing, detailed curriculum review and evaluation. All results are confidential.

⁵ Note: MATH 1950 is required for this degree program. This course will also satisfy UNO's General Education Quantitative Literacy requirement. Students who do not place into MATH 1950 are responsible for prerequisite courses MATH 1220, MATH 1320, and MATH 1330. MATH 1120/STEM 1120, MATH 1130, and STAT 1530 will not serve as prerequisites for MATH 1950. These courses will satisfy the General Education Quantitative Literacy requirement; however, they do not satisfy the Math requirement for the degree program. Students are highly encouraged to consult with their academic advisor before enrolling in a particular course.

Computer Science Core Extension Courses (21 hours)

Various core extensions and areas of emphasis for the Computer Science Core Extension may be taken to form an area of specialization, such as the Information Systems Engineering track. A core extension of at least 21 semester hours must be completed to obtain a Bachelor of Science degree in Computer Science. At least 12 of the 21 hours selected must be approved upper-division computer science courses (courses with numbers of 3000 or higher). The remaining hours must be in an area of emphasis consistent with the computer science degree. They may include additional upper division computer science courses or courses selected from a different academic area.

- 12 credit hours must be upper-division (3000+) Computer Science courses

- 9 credit hours must be related courses and can be selected from 2000 to 4000 level courses

Computer Science Upper-Division Courses (12 hours)

Code	Title	Credits
CSCI/MATH 3100	APPLIED COMBINATORICS	3
CSCI/MATH 3300	NUMERICAL METHODS	3
CSCI 3510	ADVANCED GAME PROGRAMMING	3
CSCI/CYBR 3450	NATURAL LANGUAGE PROCESSING	3
CSCI 3470	FUNDAMENTALS AND ALGORITHMS OF MACHINE LEARNING	3
CSCI 3830	ADVANCED JAVA PROGRAMMING	3
CSCI 3850	FOUNDATIONS OF WEB SEARCH TECHNOLOGIES	3
CSCI/MATH 4010	INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS	3
CSCI 4100	INTRODUCTION TO ALGORITHMS	3
CSCI/MATH 4150	GRAPH THEORY & APPLICATIONS	3
CSCI 4250	HUMAN COMPUTER INTERACTION	3
CSCI 4260	USER EXPERIENCE DESIGN	3
CSCI/MATH 4300	DETERMINISTIC OPERATIONS RESEARCH MODELS	3
CSCI/MATH 4310	PROBABILISTIC OPERATIONS RESEARCH MODELS	3
CSCI/CYBR 4380	DIGITAL FORENSICS	3
CSCI 4430	QUANTUM COMPUTING AND CRYPTOGRAPHY	3
CSCI 4440	INTRODUCTION TO PARALLEL COMPUTING	3
CSCI 4450	INTRODUCTION TO ARTIFICIAL INTELLIGENCE	3
CSCI 4470	PATTERN RECOGNITION	3
CSCI 4480	ALGORITHMS FOR ROBOTICS	3
CSCI 4510	ADVANCED OPERATING SYSTEMS	3
CSCI/MATH 4560	NUMBER THEORY & CRYPTOGRAPHY	3
CSCI 4620	COMPUTER GRAPHICS	3
CSCI/MATH 4660	AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES	3
CSCI 4700	COMPILER CONSTRUCTION	3
CSCI 4850	DATABASE MANAGEMENT SYSTEMS	3
CSCI 4890	DATA WAREHOUSING AND DATA MINING	3
CSCI 4900	INTERNET SYSTEMS DEVELOPMENT	3
CSCI 4950	INTERNSHIP IN COMPUTER SCIENCE	1-3
CSCI 4980	TOPICS IN COMPUTER SCIENCE	1-3
CSCI 4990	INDEPENDENT STUDIES	1-3

Additional Computer Science Core Extension Courses (9 hours)

Code	Title	Credits
CSCI 2310	VIDEO GAME DESIGN	3
CSCI 2410	INTRODUCTION TO DATA ANALYTICS USING PYTHON	3
CSCI 2510	INTRODUCTION TO GAME PROGRAMMING	3
CSCI 2620	2D GRAPHICS: IMAGE PROCESSING	3
CSCI 2840	C++ & OBJECT-ORIENTED PROGRAMMING	3

CSCI 2850	PROGRAMMING ON THE INTERNET	3
CSCI 2980	TOPICS IN COMPUTER SCIENCE	1-3

Writing in the Discipline

All UNO students are required to take a writing-in-the-discipline course within their major. Computer Science degree students must take CIST 3000

Computer Science Elective Tracks and Concentrations

Students may incorporate one of the elective tracks or one of the concentrations below as their Core Extension focus.

Computer Science (CSCI) Tracks

- Software Engineering Track (p. 647)
- Computer Networking and Communications Track (p. 648)
- Information Systems Engineering Track (p. 648)
- Internet and Intranet Software Application Development Track (p. 648)

Core Extension Elective Tracks from Other Academic Areas. From the following selected tracks, a maximum of 9 hours can be applied towards the core extension area:

- Cybersecurity (CYBR) Track (p. 678)
- Bioinformatics (BIOI) Track (p. 673)
- IT Innovation (ITIN) Track (p. 684)
- Information Systems & Quantitative Analysis (ISQA) Track (p. 648)
- Mathematics (MATH) Track (p. 648)
- Computer and Electronics Engineering (ECEN) Track (p. 648)

Other Elective Areas

Other elective areas may be acceptable. The entire core extension must be approved by the Computer Science Undergraduate Program Committee (UPC), and should be submitted at the end of the sophomore year. Completed core extension proposals should be turned into the IS&T Undergraduate Advising Office in PKI 170. Allow at least one month to receive a response from the UPC.

Optional Concentrations or Electives (*some courses may apply towards the CS core extension area)

See your advisor for more information on this option.

- Artificial Intelligence Concentration (p. 649)
- Game Programming Concentration (p. 649)
- Internet Technologies (iT) Concentration for Computer Science Majors (p. 650)
- Information Assurance Concentration (p. 650)

¹ MATH 1950 - Satisfies General Education Quantitative Literacy requirement

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change.

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific degree program to determine all requirements for the program. In order to graduate on time (four years for an undergraduate degree), you need to take 30 credit hours each year.

Placement Exams: For Math, English, and Foreign Languages, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

Please note that transfer credit or placement exam scores may change a suggested plan of study.

Software Engineering Track

This track will provide students with knowledge of software development methods and techniques including planning, managing, developing, implementing, testing and documenting a large project.

Code	Title	Credits
CSCI 4850	DATABASE MANAGEMENT SYSTEMS	3
CSCI 4980	TOPICS IN COMPUTER SCIENCE	1-3
CSCI 4250	HUMAN COMPUTER INTERACTION	3
CSCI 4260	USER EXPERIENCE DESIGN	3
Total Credits		10-12

Computer Networking and Communications Track

This track will provide students with knowledge of networking computers in different network topologies such as local and wide area networks, the OSI model, data communication hardware, software and applications, network protocols and standards, performance analysis, etc.

Code	Title	Credits
CSCI/MATH 4150	GRAPH THEORY & APPLICATIONS	3
CSCI/MATH 4300	DETERMINISTIC OPERATIONS RESEARCH MODELS	3
CSCI/MATH 4310	PROBABILISTIC OPERATIONS RESEARCH MODELS	3
CSCI 4440	INTRODUCTION TO PARALLEL COMPUTING	3
Total Credits		12

Information Systems Engineering Track

This track will provide students with the knowledge to identify IS problems, decompose problems, communicate concepts, develop alternative solutions, evaluate alternatives, conceptualize designs and build, test, validate and deliver information systems.

Code	Title	Credits
CSCI 4250	HUMAN COMPUTER INTERACTION	3
CSCI 4850	DATABASE MANAGEMENT SYSTEMS	3
Total Credits		6

Internet and Intranet Software Application Development Track

This track will provide students with methods and techniques for developing software application systems on the Internet and intranet.

Code	Title	Credits
CSCI 2850	PROGRAMMING ON THE INTERNET	3
CSCI 4250	HUMAN COMPUTER INTERACTION	3
CSCI 4260	USER EXPERIENCE DESIGN	3
Total Credits		9

Mathematics (MATH) Track

Code	Title	Credits
MATH 1970	CALCULUS III	4
MATH 2350	DIFFERENTIAL EQUATIONS	3
MATH/CSCI 3100	APPLIED COMBINATORICS ¹	3
MATH 3230	INTRODUCTION TO ANALYSIS	3
Total Credits		13

¹ MATH 3100: A course cross listed with CSCI cannot be used as both upper-division computer science and elective credit.

Other mathematics electives are acceptable. Currently, MATH 1970 and 3000/4000 level courses constitute acceptable MATH Core Extension Elective Track choices.

Computer and Electronics Engineering (CEEN) Track

Code	Title	Credits
Select nine hours of acceptable ECEN electives from the following:		9
ECEN 2130	ELECTRICAL CIRCUITS I	
ECEN 2140	ELECTRICAL CIRCUITS II	
ECEN 2184	ELECTRICAL CIRCUITS LABORATORY I	
ECEN 2220	ELECTRONIC CIRCUITS I	
ECEN 2920	INDIVIDUAL STUDY IN ELECTRICAL AND COMPUTER ENGINEERING II	
ECEN 2940	SPECIAL TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING II	
ECEN 3100	DIGITAL DESIGN AND INTERFACING	
ECEN 3130	SWITCHING CIRCUITS THEORY	
ECEN 3250	COMMUNICATIONS SYSTEMS	
ECEN 3280	APPLIED FIELDS AND LINES I	
ECEN 3290	APPLIED FIELDS AND LINES II	
ECEN 3520	ELECTRONIC CIRCUITS II	
ECEN 3550	SIGNALS AND LINEAR SYSTEMS	
ECEN 3620	DATA AND TELECOMMUNICATIONS TRANSCIVERS	
ECEN 3920	INDIVIDUAL STUDY IN ELECTRICAL AND COMPUTER ENGINEERING III	
ECEN 3940	SPECIAL TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING III	
ECEN 4610	DIGITAL COMMUNICATIONS MEDIA	
ECEN 4710	COMPUTER COMMUNICATION NETWORKS	
ECEN 4760	WIRELESS COMMUNICATIONS	
ECEN 4790	OPTICAL FIBER COMMUNICATIONS	
ECEN 4920	INDIVIDUAL STUDY IN ELECTRICAL AND COMPUTER ENGINEERING IV	
Total Credits		9

Information Systems & Quantitative Analysis (ISQA) Track

Code	Title	Credits
Select nine hours of acceptable ISQA electives from the following:		9
ISQA 2000	SPECIAL TOPICS IN INFORMATION SYSTEMS AND QUANTITATIVE ANALYSIS	
ISQA 3310	MANAGING THE DATABASE ENVIRONMENT	
ISQA 3520	GRAPHICAL USER INTERFACE DESIGN	
ISQA 3900	WEB APPLICATION DEVELOPMENT	
ISQA 3910	INTRODUCTION TO PROJECT MANAGEMENT	
ISQA 4000	SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS	
ISQA 4010	BUSINESS INTELLIGENCE	

ISQA 4100	INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION
ISQA 4110	INFORMATION SYSTEMS ANALYSIS
ISQA 4120	SYSTEM DESIGN AND IMPLEMENTATION
ISQA 4130	INFORMATION TECHNOLOGY FOR DEVELOPMENT
ISQA 4150	ADVANCED STATISTICAL METHODS FOR IS&T
ISQA 4160	INTRODUCTION TO ENTERPRISE RESOURCE PLANNING
ISQA 4180	ELECTRONIC COMMERCE
ISQA 4190	PROCESS REENGINEERING WITH INFORMATION TECHNOLOGY
ISQA 4200	INFORMATION AND DATA QUALITY MANAGEMENT
ISQA 4300	DATABASE ADMINISTRATION
ISQA 4380	DISTRIBUTED TECHNOLOGIES AND SYSTEMS
ISQA 4500	SPECIAL PROBLEMS IN INFORMATION SYSTEMS AND QUANTITATIVE ANALYSIS
ISQA 4730	DECISION SUPPORT SYSTEMS
ISQA/ITIN 4880	SYSTEMS SIMULATION AND MODELING
ISQA 4900	FULL STACK DEVELOPMENT

Total Credits 9

¹ These courses cannot be accepted if courses with similar names are used in the 12 CSCI upper division electives.

Artificial Intelligence Concentration

The Artificial Intelligence concentration is intended to enable students to learn about the principal technologies and methods for programming autonomous behavior on software agents and robots as well as learn about the computational approaches towards solving problems that deemed to require human intelligence. Students will gain knowledge about the reasoning, planning and learning techniques and algorithms used by software agents for natural language understanding, and by robots and game-avatars for problem solving, mobility, and strategic decision making. Taking courses in this track will provide students the essential skills for writing programs for real-world problems that require software programs and robots to mimic human behavior and assist humans in performing complex, risky and tedious tasks. Students will also have an opportunity to participate in national and international AI and game programming competitions and do capstone course projects to explore selective topics in more in-depth manner.

Requirements

Code	Title	Credits
Required		
CSCI 3450	NATURAL LANGUAGE PROCESSING	3
CSCI 4450	INTRODUCTION TO ARTIFICIAL INTELLIGENCE	3
Electives		
Select 4 courses from the following		12
PHIL 2010	SYMBOLIC LOGIC	
CSCI 2410	INTRODUCTION TO DATA ANALYTICS USING PYTHON	
CSCI 2510	INTRODUCTION TO GAME PROGRAMMING	
CSCI 3510	ADVANCED GAME PROGRAMMING	

CSCI 3850	FOUNDATIONS OF WEB SEARCH TECHNOLOGIES
CSCI 4100	INTRODUCTION TO ALGORITHMS
CSCI 4150	GRAPH THEORY & APPLICATIONS
CSCI 4250	HUMAN COMPUTER INTERACTION
CSCI 4470	PATTERN RECOGNITION
CSCI 4480	ALGORITHMS FOR ROBOTICS
CSCI 4760	TOPICS IN APPLIED MATHEMATICS
CSCI 4850	DATABASE MANAGEMENT SYSTEMS
CSCI 4890	DATA WAREHOUSING AND DATA MINING
ISQA 4010	BUSINESS INTELLIGENCE
MATH 4450	INTRODUCTION TO MACHINE LEARNING AND DATA MINING

Total Credits 18

Game Programming Concentration

The game programming concentration provides students with the basic concepts involved in the video game development process. The required courses give the student an introductory knowledge of both 2D and 3D game programming, as well as resource management, concepts of designing games, and general graphics theory. The elective courses allow the student to focus on a particular aspect of game development: game design, game/player interaction, game programming, or graphics. This concentration is only open to undergraduate Computer Science majors in the College of IS&T.

Requirements

Code	Title	Credits
Required Courses		
CSCI 2510	INTRODUCTION TO GAME PROGRAMMING	3
CSCI 3510	ADVANCED GAME PROGRAMMING	3
CSCI 4620	COMPUTER GRAPHICS	3
Elective Courses ¹		
Select 9 hours from the following (limit of 1 non-CSCI course):		9
CSCI 1280	INTRODUCTION TO COMPUTATIONAL SCIENCE	
CSCI 2310	VIDEO GAME DESIGN	
CSCI 2620	2D GRAPHICS: IMAGE PROCESSING	
CSCI 4250	HUMAN COMPUTER INTERACTION	
CSCI 4260	USER EXPERIENCE DESIGN	
CSCI 4450	INTRODUCTION TO ARTIFICIAL INTELLIGENCE	
CSCI 4480	ALGORITHMS FOR ROBOTICS	
CSCI/MATH 4660	AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES	
CSCI 4850	DATABASE MANAGEMENT SYSTEMS	
ART 3140	COMPUTER GENERATED IMAGERY	
ART 3160	GAME DESIGN AS ART	

Total Credits 18

¹ NOTE: This list of electives is not exhaustive. Students can take other courses as electives under approval of the UPC.

Internet Technologies (iT) Concentration for Computer Science Majors

The internet technologies (iT) concentration supplements the Computer Science (CS) curriculum by focusing on the concepts and technologies needed to implement modern web applications. The concentration is designed to supplement the CS core curriculum by introducing the programming aspects as well as the theoretical concepts needed to build the infrastructure for web systems such as search engines, social networking sites, etc. The iT concentration provides extensive hands-on, project-based experience for students.

Prerequisite Course

(NOTE: This is in addition to the prerequisite courses that accompany each of the courses in the concentration.)

Code	Title	Credits
CIST 1300	INTRODUCTION TO WEB DEVELOPMENT	3

Requirements

Code	Title	Credits
Required Courses		
CSCI 2850	PROGRAMMING ON THE INTERNET	3
CSCI 3830	ADVANCED JAVA PROGRAMMING	3
CSCI 3850	FOUNDATIONS OF WEB SEARCH TECHNOLOGIES	3

Elective Courses ¹

Select 9 hours from the following:		Credits
CSCI/CYBR 3450	NATURAL LANGUAGE PROCESSING	9
CSCI 4100	INTRODUCTION TO ALGORITHMS	
CSCI/MATH 4150	GRAPH THEORY & APPLICATIONS	
CSCI 4250	HUMAN COMPUTER INTERACTION	
CYBR 4460	NETWORK-BASED VULNERABILITY DISCOVERY	
CSCI 4900	INTERNET SYSTEMS DEVELOPMENT	
CSCI 4470	PATTERN RECOGNITION	
CSCI 4850	DATABASE MANAGEMENT SYSTEMS	
CSCI 4890	DATA WAREHOUSING AND DATA MINING	

Total Credits **18**

¹ The list of electives is not exhaustive. Students can take other relevant courses as electives under the approval of the computer science undergraduate program committee.

Rationale for Courses

The iT concentration is aimed at providing students the knowledge of fundamental concepts underlying the World Wide Web infrastructure. CSCI 2850 focuses on software development on the Web and internet application development. CSCI 3830 focuses on client-server and distributed architectures. CSCI 3850 provides students with the basic concepts underlying internet search engines, page ranking, and advertising on the internet. The elective courses allow the student to gain broad knowledge in related technologies that leverage the capabilities afforded by the web, such as database and data mining techniques, security on the internet, understanding the semantics of text documents, etc. While students have the flexibility to pick and choose among these courses, there are some logical groupings that advisors can recommend to students based on their interests. For example, CSCI 3450, CSCI 4150, and CSCI 4100 courses build on the CSCI 3850 course by introducing students the

advanced concepts in text processing, efficient algorithms that drive the internet, and graph-theoretic analysis of web-based relationships. By choosing CSCI 4250, CYBR 4460, and CSCI 4900, students will be able to build secure and user-friendly open source web-based applications. Taking 3 courses out of CSCI 3450, CSCI 4470, CSCI 4850, and CSCI 4890 provides students an understanding of big data-related analysis capabilities, including unstructured text processing, data mining, and machine learning concepts needed to build services that utilize the vast amount of data on the web.

Information Assurance Concentration

The information assurance concentration is intended for students who wish to specialize in the security aspects of the computer science field. The concentration focuses on fundamental principles, worked examples, theory, and skills necessary to analyze, design, and construct secure information systems. The courses in this concentration address fundamental technologies, security policy, assurance, and ethics involved in the protection of the information systems. Hands-on experience is gained through numerous programming exercises associated with each course.

Code	Title	Credits
Required Courses		
CYBR 3600	INFORMATION SECURITY POLICY AND AWARENESS	3
CYBR 4360	FOUNDATIONS OF CYBERSECURITY	3
CSCI/CYBR 4380	DIGITAL FORENSICS	3
Electives Courses ¹		
Select 9 hours from the following:		9
CYBR 2600	SYSTEM ADMINISTRATION	18
CYBR 4450	HOST-BASED VULNERABILITY DISCOVERY	
CYBR 4460	NETWORK-BASED VULNERABILITY DISCOVERY	
CIST/CYBR 4540	COMPUTER SECURITY MANAGEMENT	
CSCI/MATH 4560 or CYBR 3570	NUMBER THEORY & CRYPTOGRAPHY CRYPTOGRAPHY	

¹ This list of electives is not exhaustive. Students can take other relevant courses as electives with the approval of the Computer Science Undergraduate Program Committee.

Note: CSCI majors may complete the above concentration and apply selected courses toward the computer science core extension requirement.

Computer Science Minor

Requirements

A minor in computer science can be obtained by completing the following 18 hours:

Code	Title	Credits
Core Courses		
CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I	3
CSCI 1620	INTRODUCTION TO COMPUTER SCIENCE II	3
CSCI 2030	MATHEMATICAL FOUNDATIONS OF COMPUTER SCIENCE	3
CSCI 3320	DATA STRUCTURES	3

Elective Computer Science Courses

Select 6 hours at the 3000 level or above (see below) 6

Total Credits 18**Electives Courses – 3000 Level or above (6 hours)**

Code	Title	Credits
CSCI 3100	APPLIED COMBINATORICS	
CSCI 3300	NUMERICAL METHODS

CSCI 4970	CAPSTONE PROJECT	

CSCI 4980 TOPICS IN COMPUTER SCIENCE

CSCI 4990 INDEPENDENT STUDIES

In all cases, students are responsible for completing any courses identified as prerequisites or co-requisite for the courses in the minor.

In addition, students must have a grade of C- or better in any prerequisite for a CSCI course.

Information Systems and Quantitative Analysis

The study of Information Systems and Quantitative Analysis involves application of computers, mathematics, statistics, and other quantitative techniques in the solutions of a wide variety of business problems. While computer science often concentrates on building the computer tools which make computers useful, it is information systems and quantitative analysis that specifically focus on effectively applying these tools in the solutions of everyday business problems.

Accreditation Information

The Bachelor of Science in Management Information Systems (MIS) has been accredited by the Computing Accreditation Commission of ABET, Inc., the recognized accreditor of college and university programs in applied science, computing, engineering, and technology. ABET accreditation demonstrates a program's commitment to providing its students with a quality education.

General information about the College of IS&T's accreditation as well as specific educational objectives for its ABET accredited program in Management Information Systems can be found h (<https://www.unomaha.edu/college-of-information-science-and-technology/academics/abet-accreditation.php>)ere (<https://www.unomaha.edu/college-of-information-science-and-technology/academics/abet-accreditation.php>).

Bachelor of Science in Management Information Systems

The Bachelor of Science in Management Information Systems (BIS) degree will provide students with the educational background for pursuing an exciting career in applying information technology in business and government to process data and solve a wide variety of business problems.

Managers can be more effective and efficient when assisted by computer-based information systems. The student will learn how information technology can be applied to produce information both for controlling the day-to-day operations of a business and for planning for the future of that business. Information systems and quantitative analysis provide the educational background appropriate for pursuing career opportunities in business data management, management information systems, information centers, systems analysis, systems design, decision support, information security, electronic commerce, and other related areas.

A minimum of 120 credit hours is required for the degree. Thirty of the last 36 hours must be University of Nebraska at Omaha courses. Registering for courses without having taken the stated prerequisites may result in administrative withdrawal. To obtain a BIS, a student must fulfill certain University, College and Departmental requirements.

Second Bachelor's Degree

General Requirements

Students who have satisfied the requirements for a first bachelor's degree, other than one in Management Information Systems (MIS) at the University of Nebraska at Omaha or another academic institution, must complete a **minimum** of 30 additional semester hours at the University for a second bachelor's degree.

To obtain an MIS degree as a second bachelor's degree, students must complete academic requirements for the degree which include **15 credit hours of IS&T core courses, 24 credit hours of MIS core courses, 12 credit hours of specialization courses, 6 credit hours of mathematics and applied statistics courses, and 15 hours of business co-requisite courses.** International students may be required to complete nine hours of English composition courses and any relevant pre-requisites as determined by the English Placement and Proficiency Exam (EPPE). Students who are admitted to a second degree program in MIS must meet with an academic advisor in the College of IS&T before beginning the degree to make a plan of study. Some transfer coursework may apply; however, 30 of the last 36 hours must be University of Nebraska at Omaha courses.

Student Groups

The Management Information Systems Student Organization (MISSO), was founded in 1999 and has been an active part of UNO ever since. MISSO regularly hosts guest speakers from a variety of information systems-related companies and organizations. MISSO also sponsors field trips, workshops, and a variety of social events.

MISSO's goals are:

- To provide a sense of community and camaraderie among students enrolled in and/or interested in the MIS program.
- To provide MIS students with career development advice and contacts through professional and social events.
- To provide students with presentations by professionals and valuable contacts in business and industry.

MISSO has a general meeting once a month, featuring a guest speaker or other activities. MISSO membership and attendance at MISSO meetings is open to all UNO and UNL students in all majors who are interested in the field of information systems. Learn more about MISSO here (<https://www.unomaha.edu/college-of-information-science-and-technology/information-systems-and-quantitative-analysis/student-involvement/>).

Contact

For more information about the MIS undergraduate program, contact the academic advising office at 402.554.3819.

Website (<https://www.unomaha.edu/college-of-information-science-and-technology/academics/management-information-systems.php>)

Degrees Offered: Bachelor of Science in Management Information Systems

The discipline of Management Information Systems (MIS) includes the acquisition, deployment, and management of information systems resources. MIS encompasses the development, implementation, and management of computers, communications, and data for organization-wide systems as well as departmental and individual technology systems. It also includes the responsibility for acquiring new information technology and incorporating it in the organization's strategy, planning, and practices.

MIS also includes the development and evolution of organizational infrastructure and systems to support organizational processes by applying methods, techniques, and technology. The creation of information systems requires innovative and quality human-machine systems and also involves recognition of socio-technical design issues and change management.

- Management Information Systems, Bachelor of Science (p. 655)

Writing in the Discipline

All UNO students are required to take a writing-in-the-discipline course within their major. Management Information Systems degree students must take CIST 3000.

Minors Offered

- Minor in Management Information Systems (p. 659)
- Minor in Enterprise Resource Planning (ERP) Systems (p. 660)

Minor in Management Information Systems

A minor in Management Information Systems may be obtained by completing ISQA 3310, ISQA 3910 and ISQA 4110, plus six hours of upper-division Information Systems and Quantitative Analysis (ISQA) courses. A grade of "C-" or better is required in each course applied toward this minor in Management Information Systems. (Note: Some ISQA elective courses may have prerequisites that require a grade of "C" or better.)

Minor in Enterprise Resource Planning (ERP) Systems

Enterprise Resource Planning (ERP) systems such as SAP, PeopleSoft or Oracle are used to integrate internal and external management of information across an entire organization, including finances, accounting, manufacturing, sales and service, customer relationship management, etc. The purpose of ERP is to facilitate the flow of information between all business functions inside the boundaries of the organization and to manage the connections to outside stakeholders. The College of IS&T offers courses that utilize ERP systems as a technology platform to apply course concepts.

Certificates Offered

- Data Management Certificate (p. 660)
- Systems Development Certificate (p. 660)
- Information Technology Administration Certificate (p. 661)

Undergraduate certificates allow the College of IS&T to offer a path for individuals who do not hold a bachelor's degree to advance their education along a focused, profession-oriented course of study and to have those studies acknowledged, documented, and later, should the student so desire, applied to a related bachelor's degree program.

The goal of the certificate is to provide non-traditional and traditional students an opportunity to take a focused set of undergraduate courses and earn a certificate of completion. For prospective certificate students already in the workforce who have earned an associate's degree, such certifications may fit with organizational professional development requirements and could be used, at the discretion of the organization, as professional development units (PDUs).

Data Management

Data Management (DM) is the practice of managing data-related issues for an organization. Data management practitioners seek to optimize the design, storage, and use of organizational data.

Systems Development

The Systems Development certificate courses focus on the optimization of the design, implementation, and use of information systems for organizational purposes.

Information Technology Administration

The undergraduate certificate in Information Technology (IT) Administration is designed for students who are interested in managing the complex technical infrastructure of today's organizations. The certificate is offered in partnership with the University of Agder in Norway (UiA), a sister university to UNO. The certificate consists of 12 credit hours of courses covering such areas as systems administration, network administration, database administration, security administration, and distributed systems. All courses are offered online. Students will take courses taught by both UNO and UiA instructors and will have the opportunity to work with students residing in a country other than their own.

The Bachelor of Science in Management Information Systems degree will provide students with the educational background to solve problems using technology for businesses, government, and nonprofit organizations.

Computers are incredible tools for reaching customers, automating tasks, processing data, and helping people make good decisions. A major in Management Information Systems prepares students to be leaders in employing technology to support decisions and drive business operations, and in managing the technological decisions and projects in an organization.

Career Options:

- Business Process Analyst
- Chief Information Officer
- Data Scientist
- Database Administrator
- Information Systems Manager
- IT Consultant
- IT Security Manager
- IT Technical Support Officer
- Network Architect
- Quality Assurance Specialist
- Software Engineer
- Systems Analyst

ISQA 2000 SPECIAL TOPICS IN INFORMATION SYSTEMS AND QUANTITATIVE ANALYSIS (1-5 credits)

The course content and topic will vary. Please contact the ISQA department office for specific course offerings.

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 2620 EVALUATING AND CLEANING DATA (1 credit)

Evaluating and cleaning data sets for analysis is a core skill for professionals in data analytics and other technical fields. The course will enable students to assess the state of existing data sets, identify appropriate remediation strategies to prepare data for analysis, and perform common data cleaning procedures.

Prerequisite(s)/Corequisite(s): ISQA 2610

ISQA 3150 PRINCIPLES OF QUANTITATIVE ANALYSIS (3 credits)

An introduction to structuring real-life situations into mathematical models. The class covers four groups of decision making models: decision trees, inventory, linear programming, network planning, and winning strategy. A number of the existing commercial computer software packages will be used in the course.

Prerequisite(s)/Corequisite(s): CIST 2500

ISQA 3310 MANAGING THE DATABASE ENVIRONMENT (3 credits)

Introduction to business database design and management functions. The focus is on the use of current database management systems (DBMS) to support the data management function of an organization. Topics include data modeling, database design, SQL, data management and database administration. Hands-on experience in database design, creation, and use is provided.

Prerequisite(s)/Corequisite(s): CIST 2100.

ISQA 3340 SQL FOR DATA ANALYTICS (1 credit)

Using the Structured Query Language (SQL) to access and manipulate data is a core competency in data management, data analytics, data science, and other data-intensive fields. Starting with an overview of the relational model of database systems, the course will enable students use SQL to create database tables, and store, retrieve, and manipulate data at both basic and advanced levels.

ISQA 3400 INFORMATION TECHNOLOGY INFRASTRUCTURE (3 credits)

This course provides an introduction to IT infrastructure issues. It covers topics related to both computer and systems architecture and communication networks, with an overall focus on the services and capabilities that IT infrastructure solutions enable in an organizational context.

Prerequisite(s)/Corequisite(s): CIST 2100

ISQA 3420 MANAGING IN A DIGITAL WORLD (3 credits)

This course introduces the fundamentals of information systems/technology (IS/T) management. Students are introduced to the various roles, responsibilities, skills, and concepts essential to successful management of IS/T in the context of a dynamic environment of technology workforce diversity, a global economy, and concern for ethics and social responsibility in the development of systems.

Prerequisite(s)/Corequisite(s): CIST 2100

Distribution: Global Diversity General Education course

ISQA 3520 GRAPHICAL USER INTERFACE DESIGN (3 credits)

This course is an introduction to interaction design with a primary emphasis on designing usable and useful computer interfaces. Students will learn the principles of interface design grounded in a fundamental understanding of human cognitive processes. They will learn how end-users develop and use mental models of interaction and will apply this knowledge to the design of interfaces for real-world applications. A design project will challenge students to plan their own designs, to develop interfaces and to integrate them into a working application prototype, to test their application with real users, and to effectively communicate the overall results. (Cross-listed with ISQA 8525)

Prerequisite(s)/Corequisite(s): CIST 1300

ISQA 3900 WEB APPLICATION DEVELOPMENT (3 credits)

This course focuses on contemporary techniques and technologies in the design, development, and integration of web-enabled information systems. Topics include: Multi-tiered systems architecture; agile application development; object-oriented analysis and design; prototyping; testing, verification, and validation; lifecycle models; and component-based development. This is a rapidly moving, hands-on course that mirrors real-world development.

Prerequisite(s)/Corequisite(s): CIST 1300 or CSCI 2850, CIST 1400, ISQA 3310 or CSCI 4850 (or concurrent enrollment)

ISQA 3910 INTRODUCTION TO PROJECT MANAGEMENT (3 credits)

This course will cover the basics of project planning, scheduling and control. Earned value management techniques and project quality will be covered. Risk management will also be covered. The student will be introduced to the IEEE Standards for Project Management. The purpose of the course is to provide students with an introduction to the tools and techniques used to manage projects to achieve successful completion. The project management methods taught are suitable for a wide variety of project types such as software development or engineering projects (e.g. construction).

Prerequisite(s)/Corequisite(s): CIST 2100; or equivalent.

ISQA 4000 SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS (1-5 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ISQA 8086)

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 4010 BUSINESS INTELLIGENCE (3 credits)

The course focuses on the various topics on knowledge management by utilizing both behavioral approaches and information technology tools. It includes data collection and analysis, intelligent agents, business concerns on data warehousing and data mining, customer relationship management. The course will also cover information overload, human expert systems vs. artificial intelligent systems and intelligent decision making.

Prerequisite(s)/Corequisite(s): CIST 1400; CIST 2500

ISQA 4100 INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION (3 credits)

This course examines the frameworks and tools used to develop an organization's information system architecture. It provides the analytical skills and conceptual frameworks with which to make recommendations and decisions regarding the integration of information technology components into an information system architecture. (Cross-listed with ISQA 8106)

Prerequisite(s)/Corequisite(s): CIST 2100 and ISQA 3310

ISQA 4110 INFORMATION SYSTEMS ANALYSIS (3 credits)

This course examines and applies the principles of information systems analysis, following a structured systems development methodology. It surveys project management, feasibility and analysis and systems requirement definition using modern systems analysis techniques and automated tools. Course utilizes a case approach where students initiate the analysis and logical design of a limited-scope information system.

Prerequisite(s)/Corequisite(s): CIST 2100, ISQA 3910, and ISQA 3310; only ISQA 3310 can be taken concurrently.

ISQA 4120 SYSTEM DESIGN AND IMPLEMENTATION (3 credits)

This is the second course in a sequence in computer information systems analysis, design, and implementation. This course extends the basic foundations of systems development started in ISQA 4110 and examines the activities comprising the design, construction and implementation of information systems.

Prerequisite(s)/Corequisite(s): ISQA 3310 and ISQA 4110

ISQA 4130 INFORMATION TECHNOLOGY FOR DEVELOPMENT (3 credits)

Information Technology for Development (ITD) is the implementation and evaluation of information technology infrastructures to stimulate economic, social and human development. In this service-learning course, students will learn and apply ITD concepts for developing and adding value through IT by working with small business entrepreneurs in Omaha or rural Nebraska. Students will evaluate micro-business technology needs, prepare business technology plans, provide training, and implement appropriate solutions, to the extent possible within a semester class. (Cross-listed with ISQA 8136)

Prerequisite(s)/Corequisite(s): Though not required, the following courses or their equivalent would provide the necessary background : CIST 1100, CIST 1300, ISQA 3210, ISQA 3310, ISQA 3400. Not open to non-degree graduate students.

ISQA 4150 ADVANCED STATISTICAL METHODS FOR IS&T (3 credits)

This course emphasizes the application and interpretation of statistical methods including design of experiments, analysis of variance, multiple regression, and nonparametric procedures and the use of statistical computer packages. The intent is to develop quantitative abilities needed for quantitatively intensive jobs and for advanced study in management information systems, computer science and information technology. (Cross-listed with ISQA 8156)

Prerequisite(s)/Corequisite(s): CIST 2500 or equivalent (at least one course in statistics)

ISQA 4160 INTRODUCTION TO ENTERPRISE RESOURCE PLANNING (3 credits)

Introduction to Enterprise Resource Planning (ERP) is designed to expose students to the primary enterprise application that forms the information systems (IS) infrastructure for most large organizations today. The primary purpose of this course is for students to gain an understanding of the enterprise wide, cross functional nature of ERP software. In the process of learning about ERPs, the students develop "hands on" experience with the largest and most well-known ERP application, SAP. (Cross-listed with ISQA 8166, SCMT 4160)

Prerequisite(s)/Corequisite(s): CIST 2100 or equivalent. Not open to non-degree graduate students.

ISQA 4180 ELECTRONIC COMMERCE (3 credits)

Critical examination of the issues, technologies, standards and business and social implications of electronic commerce in Cyberspace.

Prerequisite(s)/Corequisite(s): ISQA 3400 or equivalent.

ISQA 4190 PROCESS REENGINEERING WITH INFORMATION TECHNOLOGY (3 credits)

Business process reengineering issues are examined. Reengineering concepts and methods are introduced. Additional special project(s) are required. SAP will be introduced. (Cross-listed with ISQA 8196.)

Prerequisite(s)/Corequisite(s): CIST 2500; prerequisite/co-requisite ISQA 4110.

ISQA 4200 INFORMATION AND DATA QUALITY MANAGEMENT (3 credits)

The course primarily focuses on developing an in-depth understanding of Data and Information Quality (DQ and IQ) concepts and issues. On completing this course students will be able to understand and use DQ and IQ Concepts in Information Systems projects, be able to recognize various patterns of Data and Design Deficiencies in Systems and be able to suggest appropriate DQ and IQ improvement plans in light of known deficiencies in systems. (Cross-listed with ISQA 8206)

Prerequisite(s)/Corequisite(s): CIST 2500 and CIST 2100.

ISQA 4300 DATABASE ADMINISTRATION (3 credits)

This course is designed to give students an applied, practical introduction to database administration. Students will gain an understanding of the functioning of a database management system and its relationship to the computing environment in which it runs. They will learn the concepts, principles, and techniques necessary to carry out such functions as database object creation, storage management, capacity planning, performance tuning, backup and recovery, and security management. Each semester the course will focus on one commercial database management system (DBMS), such as Oracle. (Cross-listed with ISQA 8306)

Prerequisite(s)/Corequisite(s): ISQA 3310 or CSCI 4850. Not open to non-degree graduate students.

ISQA 4380 DISTRIBUTED TECHNOLOGIES AND SYSTEMS (3 credits)

The course introduces students to concepts, issues and tools needed to develop distributed computing systems. Topics include distributed systems architecture, middleware, Internet-based systems development, security and performance. Hands-on systems development using current technologies is provided.

Prerequisite(s)/Corequisite(s): ISQA 3310 or equivalent and knowledge of database design and SQL.

ISQA 4500 SPECIAL PROBLEMS IN INFORMATION SYSTEMS AND QUANTITATIVE ANALYSIS (2-3 credits)

Individual investigation of specific problems in information systems and quantitative analysis and related areas.

Prerequisite(s)/Corequisite(s): Senior standing and permission of program chair.

ISQA 4510 INFORMATION SYSTEMS INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application of their academic studies in the business world to help prepare them for their professional career and to provide a view of the challenges they will face.

Prerequisite(s)/Corequisite(s): Junior/senior standing and permission of department.

ISQA 4590 IT AUDIT AND CONTROL (3 credits)

This course explores organizational and managerial issues relevant to planning and conducting IT audit and control activities. The course covers the following conceptual areas: business risks and the management of business risk, IT risk as a component of business risk, the need to manage IT risks, and the basic type of controls required in a business system in order to control IT risks. Issues associated with new risks created by the use of the internet for business applications and electronic business are also covered. (Cross-listed with ISQA 8596)

Prerequisite(s)/Corequisite(s): A solid understanding of business foundations such as accounting and introductory auditing and exposure to the IS discipline is essential for success in this course. Permission of instructor is required to enroll.

ISQA 4730 DECISION SUPPORT SYSTEMS (3 credits)

This course examines a set of information systems which specifically support managerial decision makers: Decision Support Systems, Group Decision Support Systems, Executive Information Systems, Data Warehouses, Expert Systems, and Neural Networks. This course explores the development, implementation, and application of these systems, how these systems can be applied to current business problems, as well as how organizational issues impact the implementation and usage of these systems. (Cross-listed with ISQA 8736)

Prerequisite(s)/Corequisite(s): CIST 2100 or equivalent.

ISQA 4880 SYSTEMS SIMULATION AND MODELING (3 credits)

The course provides an introduction to the modeling and simulation with special emphasis on decision-theoretic models and rational decision-making. The ability to make good decisions is key to individuals and organizations and studying, understanding and improving decisions is vital to success. Students are given a background into systematic decision-making processes, and then are introduced to formal methods for decision modeling and analysis. Building on these foundational models, students learn how to perform process modeling and optimization. Finally, the course concludes with a look at psychological biases and traps that may affect decision-makers. (Cross-listed with ITIN 4880)

Prerequisite(s)/Corequisite(s): CIST 1400 and CIST 2500 or equivalent

ISQA 4890 DATA WAREHOUSING AND DATA MINING (3 credits)

This course provides students with a theoretical foundation and practical methods for designing and constructing data warehouse and implementing data mining. After covering the essential concepts, issues, techniques to build an effective data warehouse, this course emphasizes the various techniques of data mining, such as association, classification, clustering and prediction for on-line analyses within the framework of data warehouse architectures. This course gives students an opportunity to undertake a real-life data analysis project. (Cross-listed with CSCI 4890).

Prerequisite(s)/Corequisite(s): ISQA 3310 or CSCI 4850

ISQA 4900 FULL STACK DEVELOPMENT (3 credits)

Full stack development is the development of both client side and server side portions of web applications. Most organizations go beyond simply using HTML web pages with a small amount of JavaScript in applications and have moved to developing modern web applications with backend APIs and frontend JavaScript frameworks such as Vue.js. Students will learn how to build a backend application and REST APIs. Students will take that backend framework knowledge and learn to securely integrate these backend APIs with frontend JavaScript frameworks to build single page apps and hybrid mobile applications.

Prerequisite(s)/Corequisite(s): CIST 1300 - Web Development or CSCI 2850 Programming on the Internet ISQA 3310 Managing the Database Environment or CSCI 4850 Database Management ISQA 3900 Web Application Development or equivalent

Management Information Systems, Bachelor of Science

The Bachelor of Science in Management Information Systems (BIS) degree provides students with the educational background for pursuing an exciting career in applying computers in business and government to process data and solve a wide variety of business problems.

The computer is an important tool, which processes information for management decision making. Managers can be more effective and efficient when assisted by computer-based information systems. Students pursuing a degree in Management Information Systems will learn how the computer can be applied to produce information both for controlling the day-to-day operations of a business and for planning for the future of that business. With a Management Information Systems degree, the study of information systems and quantitative analysis prepares students for pursuing career opportunities in business data management, management

information systems, systems analysis, systems design, decision support, information security, electronic commerce, and other related areas.

Website (<http://www.unomaha.edu/college-of-information-science-and-technology/academics/management-information-systems.php>)

Student Group

MIS Student Organization: MISSO

The Management Information Systems Student Organization (MISSO) (<https://www.unomaha.edu/college-of-information-science-and-technology/information-systems-and-quantitative-analysis/student-involvement/>) was founded in 1999 and has been an active part of UNO ever since.

Requirements

A minimum of 120 credit hours is required for a Bachelor of Science degree in Management Information Systems (BIS). Thirty of the last 36 hours must be University of Nebraska at Omaha (UNO) courses. Registering for courses without having taken the stated prerequisites could result in administrative withdrawal.

To obtain a BIS, a student must fulfill the University, College and Departmental requirements. Some courses may satisfy requirements in more than one area, but credit is awarded only once, thereby reducing the total number of credit hours for the degree to 120. (This total does not include prerequisites; students are accountable for all prerequisite courses.)

Code	Title	Credits
46 hours of University General Education courses (18 hours of which can be satisfied by courses in the required areas below)		28
15 hours of College of IS&T Core courses for MIS majors		15
24 hours of MIS Core courses		24
6 hours of Mathematics and Statistics courses		6
15 hours of Co-Requisite Business courses		15
12 hours of upper-level Specialization courses		12
20 hours of elective/prerequisite and optional concentration courses		20
Total Credits		120

College of IS&T Core Courses for MIS Majors (15 hours)

The College of IS&T has developed a series of courses that are required for students wishing to obtain a Management Information Systems degree from the College. The development and implementation of this core curriculum is unique and serves as a basis for preparing students to enter more advanced courses. The core curriculum is as follows:

Code	Title	Credits
CYBR 1100	INTRODUCTION TO INFORMATION SECURITY ¹	3
CIST 1300	INTRODUCTION TO WEB DEVELOPMENT	3
CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I ²	3
CIST 2100	ORGANIZATIONS, APPLICATIONS AND TECHNOLOGY ³	3
CIST 3110	INFORMATION TECHNOLOGY ETHICS ⁴	3
Total Credits		15

¹ NOTE: CYBR 1100 counts toward the Global Diversity requirement.

² NOTE: A minimum grade of C is required for CIST 1400 (and CSCI 1620) as a prerequisite for all subsequent CSCI courses.

³ NOTE: CIST 2100 counts toward a Social Science requirement.

⁴ NOTE: CIST 3110 counts toward a Humanities requirement.

MIS Core Courses (24 hours)

Code	Title	Credits
ISQA 3310	MANAGING THE DATABASE ENVIRONMENT	3
ISQA 3400	INFORMATION TECHNOLOGY INFRASTRUCTURE	3
ISQA 3420	MANAGING IN A DIGITAL WORLD	3
ISQA 3900	WEB APPLICATION DEVELOPMENT	3
ISQA 3910	INTRODUCTION TO PROJECT MANAGEMENT	3
ISQA 4110	INFORMATION SYSTEMS ANALYSIS	3
ISQA 4120	SYSTEM DESIGN AND IMPLEMENTATION	3
ISQA 4900	FULL STACK DEVELOPMENT ¹	3

¹ Students may substitute CSCI 1620 for ISQA 4900.
NOTE: A minimum grade of C is required for CSCI 1620 as a prerequisite for all subsequent CSCI courses.

Math and Statistics Courses (6 hours)

Code	Title	Credits
MATH 1930	CALCULUS FOR THE MANAGERIAL, LIFE, AND SOCIAL SCIENCES ¹	3
CIST 2500	INTRODUCTION TO APPLIED STATISTICS FOR IS&T	3

¹ NOTE: MATH 1930 is required for this degree program. This course will also satisfy UNO's General Education Quantitative Literacy requirement. Students who do not place into MATH 1930 are responsible for prerequisite courses MATH 1220 and MATH 1320. MATH 1120/STEM 1120, MATH 1130, and MATH 1530 will not serve as prerequisites for MATH 1930. These courses will satisfy the General Education Quantitative Literacy requirement; however, they do not satisfy the Math requirement for the MIS degree program. Students are highly encouraged to consult with their academic advisor before enrolling in a particular course.

Co-Requisite Courses from the College of Business Administration (15 hours)

The Management Information Systems degree is cross-disciplinary in nature; students therefore need to have an understanding of economics, accounting, and business functions. These areas are covered by required co-requisite courses offered through the College of Business Administration (CBA). All CBA courses require a grade of C or better.

Code	Title	Credits
ACCT 2010	PRINCIPLES OF ACCOUNTING I	3
ACCT 2020	PRINCIPLES OF ACCOUNTING II	3
ECON 2200	PRINCIPLES OF ECONOMICS (MICRO) ¹	3
ECON 2220	PRINCIPLES OF ECONOMICS (MACRO) ¹	3

¹ NOTE: ECON 2200/ECON 2220 count toward Social Science requirements.

Upper-Level Business Courses: Select three credit hours from the following:

Code	Title	Credits
ACCT 3080	ACCOUNTING INFORMATION SYSTEMS	3
ECON 3200	ECONOMIC THEORY: MICRO	3
ECON 3220	ECONOMIC THEORY: MACRO	3
ENTR 3710	ENTREPRENEURIAL FOUNDATIONS	3
FNBK 3250	PRINCIPLES OF FINANCIAL MANAGEMENT	3
MKT 3310	PRINCIPLES OF MARKETING	3

MGMT 4030	HUMAN RESOURCE MANAGEMENT	3
MGMT/ITIN 4090	PRINCIPLES OF COLLABORATION	3

Upper-Level Specialization Courses: Select 12 credit hours from the following:

Code	Title	Credits
CYBR 3600	INFORMATION SECURITY POLICY AND AWARENESS	3
CYBR 4360	FOUNDATIONS OF CYBERSECURITY	3
CYBR/CIST 4540	COMPUTER SECURITY MANAGEMENT	3
ISQA 3520	GRAPHICAL USER INTERFACE DESIGN	3
ISQA 4000	SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS ¹	1-5
ISQA 4010	BUSINESS INTELLIGENCE	3
ISQA 4100	INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION	3
ISQA 4130	INFORMATION TECHNOLOGY FOR DEVELOPMENT	3
ISQA 4150	ADVANCED STATISTICAL METHODS FOR IS&T	3
ISQA 4160	INTRODUCTION TO ENTERPRISE RESOURCE PLANNING	3
ISQA 4180	ELECTRONIC COMMERCE	3
ISQA 4190	PROCESS REENGINEERING WITH INFORMATION TECHNOLOGY	3
ISQA 4200	INFORMATION AND DATA QUALITY MANAGEMENT	3
ISQA 4300	DATABASE ADMINISTRATION	3
ISQA 4380	DISTRIBUTED TECHNOLOGIES AND SYSTEMS	3
ISQA 4500	SPECIAL PROBLEMS IN INFORMATION SYSTEMS AND QUANTITATIVE ANALYSIS	2-3
ISQA 4510	INFORMATION SYSTEMS INTERNSHIP	1-3
ISQA 4590	IT AUDIT AND CONTROL	3
ISQA 4730	DECISION SUPPORT SYSTEMS	3
ISQA 4880	SYSTEMS SIMULATION AND MODELING	3
ISQA 4890	DATA WAREHOUSING AND DATA MINING	3

¹ NOTE: ISQA 4000 covers different topics each semester. This course may be repeated, but no topic may be taken more than once. Check the class schedule for specific topics offered during a particular semester.

Optional Concentrations

The Management Information Systems (MIS) degree includes 20 credit hours that can be used for prerequisite classes, free-choice elective classes, optional minors, optional MIS concentrations and certificates, or a combination of any of the aforementioned areas.

Upper-division Information Systems and Quantitative Analysis (ISQA) courses that are not part of the MIS core requirements and satisfy MIS concentration requirements also satisfy upper-level Specialization Courses required for the MIS degree. CYBR 3600, CYBR 4360, and CYBR/CIST 4540, which are required for the optional Information Assurance concentration, may also satisfy upper-level Specialization Course requirements for the MIS degree.

Internet Technologies Concentration for MIS Majors (18 Hours)

The Internet Technologies (IT) concentration is only available to Management Information Systems (MIS) majors and supplements the MIS curriculum by focusing on the expertise needed to implement solutions that involve contemporary internet technologies and software applications. The

concentration is designed to accommodate the differing backgrounds of MIS students, while providing the necessary knowledge to pursue the IT concentration. The IT concentration provides extensive hands-on, project-based experience for students.

Students are responsible for completing the prerequisites for all courses taken for the Internet Technologies concentration.

Requirements

Code	Title	Credits

Total Credits		18

¹ NOTE: The ISQA 4000 topic MUST be related to Internet Technologies. Approval from the Undergraduate Program Committee is required prior to taking this course.

Global IT Leadership and Management (18 Hours)

The education and training of globally savvy professionals in science, engineering and information technology (IT) are important for the long-term viability of many American firms today. Future business leaders must:

- appreciate the challenges and opportunities of IT management in the context of 21st century global organizations.
- understand the international aspects of IT leadership and management as a basis for integrating a global and multi-cultural view.
- learn about the various roles, responsibilities, skills, and concepts essential to being a successful IT manager in the context of a dynamic technological environment, a diverse workforce, a global economy, and a concern for ethics and social responsibility in the development and deployment of systems.

The College of Information Science and Technology (CIST) and UNO's International Studies (INST) have collaborated to offer an interdisciplinary Global IT Leadership and Management (GITLM) concentration in both the International Studies undergraduate program and the CIST undergraduate program in Management Information Systems (MIS). The GITLM concentration also fosters the integration of technology and internationalization through an interdisciplinary program offered through inter-campus collaboration with UNO's sister universities in Norway, India, Germany, Austria, and China. GITLM brings a global perspective to the

Information Technology (IT) curriculum and adds a technology component to the International Studies major.

Students are responsible for completing the prerequisites for all courses taken for the Global IT Leadership and Management concentration.

Prerequisite Courses ¹

Code	Title	Credits
CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I	3
CIST 2100	ORGANIZATIONS, APPLICATIONS AND TECHNOLOGY	3
CIST 3110	INFORMATION TECHNOLOGY ETHICS	3

Capstone Course		
ISQA 4500	SPECIAL PROBLEMS IN INFORMATION SYSTEMS AND QUANTITATIVE ANALYSIS	3
Total Credits		18

¹ NOTE: For students unable to study abroad, ISQA 4130 should be substituted.

i-Business Application Development and Management

The i-Business Application Development and Management concentration is only available to Management Information Systems (MIS) majors and provides students with the technical, organizational, and managerial background to plan, develop, and manage internet-based applications. The concentration includes courses that give students an understanding of the issues, concepts, and technologies involved in establishing and implementing a corporate strategy for electronic businesses. These courses address issues of organizational strategy, process re-engineering, and information systems architecture support. Students will also learn and apply technical skills needed to develop internet-based distributed applications.

Students are responsible for completing the prerequisites for all courses taken for the I-Business Application Development and Management concentration.

Requirements

Code	Title	Credits
Core Courses		
ISQA 3910	INTRODUCTION TO PROJECT MANAGEMENT	3
ISQA 4180	ELECTRONIC COMMERCE	3

ISQA 4380	DISTRIBUTED TECHNOLOGIES AND SYSTEMS	3
Total Credits		18

¹ NOTE: The ISQA 4000 topic MUST be related to i-Business. Approval from the Undergraduate Program Committee is required prior to taking this course.

Information Assurance Concentration for MIS Majors (18 Hours)

The Information Assurance concentration is only available to Management Information Systems (MIS) majors and supplements and extends the MIS curriculum by focusing on the foundational principles, worked examples, theory, and skills necessary to analyze, design, and construct secure information systems. The courses in the concentration address the fundamental technologies, policies, assurance, and ethics involved in the protection of information systems. Hands-on experience is gained through laboratory exercises associated with courses.

Students are responsible for completing the prerequisites for all courses taken for the Information Assurance concentration.

Requirements

Code	Title	Credits

Total Credits		18

IT Audit and Control (18 Hours)

The IT Audit and Control concentration is only available to Management Information Systems (MIS) majors. It provides students with the technical, organizational, accounting/auditing, and managerial background to plan and conduct IT audit and control activities. The concentration covers the following conceptual areas: business risks and the management of business risk, IT risk as a component of business risk, the need to manage IT risks, basic types of controls required in a business system to control IT risks, controls associated with top management, system development, quality assurance, boundary controls, and communications. Issues associated with

new system control risks created by the use of the internet for business applications and electronic business will also be covered in one or more courses. Students learn to apply and integrate the technical, managerial, and conceptual skills needed to plan and conduct IT audits and to establish appropriate controls.

Students are responsible for completing the prerequisites for all courses taken for the IT Audit and Control concentration.

¹ MATH 1930 - Satisfies General Education Quantitative Literacy requirement

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change.

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific degree program to determine all requirements for the program. In order to graduate on time (four years for an undergraduate degree), you need to take 30 credit hours each year.

Placement Exams: For Math, English, and Foreign Languages, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

Please note that transfer credit or placement exam scores may change a suggested plan of study.

Management Information Systems Minor

Requirements

A grade of "C-" or better is required in each course applied toward the minor in Management Information Systems (MIS). Students are responsible for completing the prerequisites for all courses taken for the minor in MIS.

A minor in Management Information Systems may be obtained by completing the following courses:

Requirements

Code	Title	Credits
Core Courses		
ISQA 3310	MANAGING THE DATABASE ENVIRONMENT	3
ISQA 3910	INTRODUCTION TO PROJECT MANAGEMENT	3
ISQA 4110	INFORMATION SYSTEMS ANALYSIS	3
Electives		
Select 6 hours from the following:		6
ISQA 3400	INFORMATION TECHNOLOGY INFRASTRUCTURE	
ISQA 3420	MANAGING IN A DIGITAL WORLD	
ISQA 3520	GRAPHICAL USER INTERFACE DESIGN	
ISQA 3900	WEB APPLICATION DEVELOPMENT	
ISQA 4000	SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS	
ISQA 4010	BUSINESS INTELLIGENCE	
ISQA 4100	INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION	
ISQA 4120	SYSTEM DESIGN AND IMPLEMENTATION	
ISQA 4130	INFORMATION TECHNOLOGY FOR DEVELOPMENT	
ISQA 4150	ADVANCED STATISTICAL METHODS FOR IS&T	
ISQA 4160	INTRODUCTION TO ENTERPRISE RESOURCE PLANNING	
ISQA 4180	ELECTRONIC COMMERCE	
ISQA 4200	INFORMATION AND DATA QUALITY MANAGEMENT	

ISQA 4300	DATABASE ADMINISTRATION
ISQA 4380	DISTRIBUTED TECHNOLOGIES AND SYSTEMS
ISQA 4730	DECISION SUPPORT SYSTEMS
ISQA 4880	SYSTEMS SIMULATION AND MODELING
ISQA/CSCI 4890	DATA WAREHOUSING AND DATA MINING
CIST 4910	SYSTEMS DEVELOPMENT IN OPEN SOURCE COMMUNITIES

Enterprise Resource Planning (ERP) Systems Minor

Requirements

Enterprise Resource Planning (ERP) systems such as SAP, PeopleSoft and Oracle are used to integrate internal and external management of information across an entire organization and encompass finances, accounting, manufacturing, sales and service, customer relationship management, etc. The purpose of ERP is to facilitate the flow of information between all business functions inside the boundaries of the organization and to manage the connections to outside stakeholders. The College of IS&T offers a variety of courses that use ERP systems as technology platforms to apply course concepts.

A grade of "C-" or better is required in each course applied toward the minor in Enterprise Resource Planning Systems with the exception of courses offered through the College of Business Administration, which require a grade of "C" or better.

Students are responsible for completing the prerequisites for all courses taken for the minor in ERP Systems.

A minor in ERP Systems may be obtained by completing the following courses:

Prerequisite Courses

Code	Title	Credits
CIST 2500	INTRODUCTION TO APPLIED STATISTICS FOR IS&T	3
or BSAD 2130	PRINCIPLES OF BUSINESS STATISTICS	
Select one of the following:		3
CIST 2100	ORGANIZATIONS, APPLICATIONS AND TECHNOLOGY	
MGMT 3100	MANAGEMENT INFORMATION SYSTEMS	
ACCT 3080	ACCOUNTING INFORMATION SYSTEMS	

Requirements

Code	Title	Credits
Core Courses

ISQA 4160	INTRODUCTION TO ENTERPRISE RESOURCE PLANNING	3
ISQA 4000	SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS (ERP Configuration Using SAP) ¹	3
ISQA 4200	INFORMATION AND DATA QUALITY MANAGEMENT	3
Elective Courses		
Select 3 hours from the following:		3
ISQA 3910	INTRODUCTION TO PROJECT MANAGEMENT	

CYBR 3600	INFORMATION SECURITY POLICY AND AWARENESS
ISQA 4000	SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS ²
ISQA 4190	PROCESS REENGINEERING WITH INFORMATION TECHNOLOGY
Total Credits	15

¹ ISQA 4000: Topic must be ERP Configuration Using SAP.

² ISQA 4000: Topic must be related to ERP but not special topic ERP Configuration Using SAP.

Data Management Certificate

Data Management (DM) is the practice of managing data-related issues for an organization. Data management practitioners seek to optimize the design, storage, and use of organizational data.

The certificate in Data Management is open to anyone with an associate's or bachelor's degree in IT. UNO students enrolled in the Division of Continuing Studies' Bachelor of Multidisciplinary Studies degree program with an IT-related concentration and students in any of the College of IS&T undergraduate degree programs are also eligible to enroll in this certificate program.

Students are responsible for completing the prerequisites for all courses taken for the Data Management Certificate.

Prerequisite Courses

Code	Title	Credits
CIST 2500	INTRODUCTION TO APPLIED STATISTICS FOR IS&T (or equivalent)	3

ISQA 4380	DISTRIBUTED TECHNOLOGIES AND SYSTEMS	
ISQA 4730	DECISION SUPPORT SYSTEMS	

Total Credits **15**

Systems Development Certificate

Systems development practitioners seek to optimize the design, implementation, and use of information systems for organizational purposes.

The certificate in Systems Development is open to anyone with an associate's or bachelor's degree in IT. UNO students enrolled in the Division

of Continuing Studies' Bachelor of Multidisciplinary Studies degree program with an IT-related concentration and students in any of the College of IS&T undergraduate degree programs are also eligible to enroll in this certificate program.

Students are responsible for completing the prerequisites for all courses taken for the Systems Development Certificate.

Code	Title	Credits

Total Credits		15

¹ Note: One semester of programming (in addition to CIST 1300) or equivalent work experience is required.

Information Technology Administration Certificate

The undergraduate certificate in Information Technology (IT) Administration is designed for students who are interested in managing the complex technical infrastructure of today's organizations. The certificate is offered in partnership with the University of Agder in Norway (UiA), a sister university to UNO. The certificate consists of 12 credit hours of courses covering such areas as systems administration, network administration, database administration, security administration, and distributed systems. All courses are offered online. Students will take courses taught by both UNO and UiA instructors and will have the opportunity to work with students residing in a country other than their own.

The certificate in Information Technology (IT) Administration is open to anyone with an associate's or bachelor's degree in IT. UNO students enrolled in the Division of Continuing Studies' Bachelor of Multidisciplinary Studies degree program with an IT-related concentration and students in any of the College of IS&T undergraduate degree programs are also eligible to enroll in this certificate program.

Students are responsible for completing the prerequisites for all courses taken for the IT Administration Certificate.

Code	Title	Credits

 IS 309 (UiA) Advanced Database Systems (3 hours) in place of ISQA 4300 (<http://catalog.unomaha.edu/search/?P=ISQA%204300>).
 IS 213 (UiA) Open Source (3 hours) in place of CYBR 2600.

Interdisciplinary Informatics (Si2)

The mission of the School of Interdisciplinary Informatics (Si2) is to provide students and faculty the opportunity to pursue their passions, to use technology in all its facets, and to be transformative. We collaborate to deliver individualized education, world class research, and immersive experiences to create and harmonize knowledge from multiple disciplines.

The School of Interdisciplinary Informatics is a key driver in taking the College of Information Science & Technology (IS&T) to the next level. The School is a hub for technology innovation for undergraduate and graduate students. It provides opportunities for collaboration with other disciplines through sharing curriculum and collaborative applied research.

The School is also an "IT solution-finding" resource for our community partners in the areas of cybersecurity, healthcare, bioinformatics, public health informatics, business, and government.

The School provides a unique opportunity for undergraduate students to integrate education, research, and outreach into their college experience. For example, many students have been involved in a public health informatics project that focuses on providing an emergency response system for public health laboratories. Students are able to earn academic credit working on this project and also have opportunities to do research and publish papers.

Faculty also engage students with community partners through our service learning initiatives. Students have worked with the Douglas County Correctional Center, KIDS Can! Alegent Health, Douglas County Health Services, and Nebraska Family and Children Services, to name a few.

These initiatives are a win/win situation for everyone involved: the students, the community partners, and the schools. Ultimately, they have a positive economic impact that flows throughout the community and the state.

The School of Interdisciplinary Informatics reflects the role and mission of UNO's College of Information Science & Technology, The Peter Kiewit Institute, and the University of Nebraska at Omaha in a number of ways. It is a direct response to the opportunities and challenges presented by information technology as it relates to economic growth for the state and region in applied IT areas such as medical informatics and cybersecurity. The School encourages the enhancement and fostering of new educational, research and creative activities by bringing together practitioners, researchers and students in interdisciplinary fields of importance to the state and the University. The School is unique in the country and leads to increased national visibility of the University of Nebraska in the area of interdisciplinary applications of information technology.

The School of Interdisciplinary Informatics addresses the following needs and demands of our academic, business, and community stakeholders:

1. Promotion of growth of interdisciplinary areas;
2. Facilitation of innovative partnerships with external constituents, including leveraging the expertise of the local community;

3. Diversity of personnel;
4. Reduction of barriers to collaboration;
5. Flexible and agile structure for quick response to opportunities;
6. Solidification of regional and national recognition as an important resource for the study and advancement of IT in the domain of healthcare, biosciences, and information security;
7. Visibility of the college and its interdisciplinary focus;
8. A magnet for collaborative external funding;
9. Development of the next generation workforce to address local, regional and national needs in exciting, new interdisciplinary domains.

Second Bachelor's Degree for Bioinformatics

General Requirements

Students who have satisfied the requirements for a first bachelor's degree other than Bioinformatics at the University of Nebraska at Omaha must complete a **minimum** of 30 additional semester hours at the University for a second bachelor's degree.

Bioinformatics Requirements (89 hours)

To obtain Bioinformatics as a second bachelor's degree, students must complete academic requirements for the degree which include 24 credit hours of IS&T core courses, 11 credit hours of Math courses, 16 credit hours of Biology courses, 14 credit hours of Chemistry courses, and 24 credit hours of Bioinformatics courses. Students must consult an academic advisor in the College of IS&T prior to starting this program. Some transfer coursework may apply; however, 30 of the last 36 hours for the degree must be University of Nebraska at Omaha courses.

Second Bachelor's Degree for Cybersecurity

General Requirements

Students who have satisfied the requirements for a first bachelor's degree other than Cybersecurity at the University of Nebraska at Omaha must complete a **minimum** of 30 additional semester hours at the University for a second bachelor's degree.

Cybersecurity Requirements (83 hours)

To obtain Cybersecurity (CYBR) as a second Bachelor's degree, students must complete academic requirements for the degree, which include 9 credit hours of IS&T core courses, 21 credit hours of required Computer Science core courses, 27 credit hours of required Cybersecurity core courses, and 8 hours of Mathematics courses. Students must also complete 18 credit hours of required Cybersecurity electives. Students must consult an academic advisor in the College of IS&T prior to starting this program. Some transfer coursework may apply; however, 30 of the last 36 hours for the degree must be University of Nebraska at Omaha courses.

Second Bachelor's Degree for IT Innovation

General Requirements

Students who have satisfied the requirements for a first bachelor's degree other than IT Innovation (ITIN) at the University of Nebraska at Omaha must complete a **minimum** of 30 additional semester hours at the University for a second bachelor's degree.

IT Innovation Requirements (87 hours)

To obtain IT Innovation as a second Bachelor's degree, students must complete academic requirements for the degree which include 6 credit hours of Mathematics courses, 48 credit hours of required IS&T core courses, and 33 credit hours of area of emphasis courses. (Approval of the area of emphasis courses by the ITIN Undergraduate Program Committee is required prior to course enrollment.) Students must consult an academic advisor in the College of IS&T prior to starting this program. Some transfer

coursework may apply; however, 30 of the last 36 hours for the degree must be University of Nebraska at Omaha courses.

Contact

For more information, contact the College of IS&T Academic Advising Office at 402.554.3819.

Website (<http://www.unomaha.edu/college-of-information-science-and-technology/school-of-interdisciplinary-informatics/>)

Degrees Offered

The three degrees offered by the School are:

- Bioinformatics, Bachelor of Science (p. 668)
- Cybersecurity, Bachelor of Science (p. 673)
- Information Technology (IT) Innovation, Bachelor of Science (p. 679)

The three degrees above all have three very important common characteristics:

First, they each have interdisciplinary components in their curriculum.

Second, they rely on working collaboratively with other disciplines and the community.

Third, according to the Bureau of Labor Statistics, all of these career areas have tremendous growth potential over the next ten years.

Writing in the Discipline

All UNO students are required to take a writing-in-the-discipline course within their major. Students must take CIST 3000.

Minors Offered

- IT Innovation Minor (p. 684)
- Cybersecurity Minor (p. 678)
- Bioinformatics Minor (p. 672)

IT Innovation (ITIN) Minor

The objective of the IT innovation (ITIN) minor is to provide students across the university with a substantive qualification in information technology to augment their respective majors and allow them to be even more innovative as to the application of IT to their learning and career choices.

Cybersecurity (CYBR) Minor

Cybersecurity is the practice of managing information-related risks by ensuring confidentiality, integrity, and availability of information. The minor will provide students across the University with an opportunity to earn credits in CYBR, and it will enable them to understand the nuances of everyday cybersecurity issues. The CYBR minor will also provide students an opportunity to strengthen their portfolio, resulting in increased job opportunities.

Bioinformatics Minor

Bioinformatics is a rapidly expanding interdisciplinary field focused on collecting, processing, and analyzing vast amounts of biological and biomedical data and has become an indispensable component of biomedical research. The minor in Bioinformatics offers an opportunity for students majoring in other disciplines to acquire the foundations of the field and add in-demand skills to their portfolio.

Bachelor of Science in Bioinformatics

Graduates from UNO's Bioinformatics (BIOI) program in the College of IS&T will be able to use their preparation to apply and investigate technology to solve bioinformatics problems in a comprehensive, competitive and effective way. Students with an undergraduate degree in bioinformatics can expect

to have a foundational knowledge in computer science, biology, statistics, and database administration.

The job outlook for Bioinformatics majors is excellent. Versatile and greatly in demand, our graduates have gone on to become programmers, data analysts, and senior-level scientists. Employment is available with private and public industries, research institutions, government institutions, non-profits, and universities around the globe. The Bioinformatics degree can also serve as a springboard to graduate work, opening the door to academic careers and other careers that require informatics skills coupled with biological background.

Careers Options:

- Bioinformatics Scientist/Analyst
- Scientific Curator
- Computational Biologist
- Database Programmer
- Database Administrator
- Software Developer
- Consultant
- Network Analyst
- Structural Analyst
- Biostatistician
- Software Engineer
- Research Scientist
- Data Scientist
- Biotech Entrepreneur

Bachelor of Science in Cybersecurity

Cybersecurity (or CYBR for short) is a rapidly expanding field focused on keeping critical infrastructure, systems, and users safe. From phishing attacks on individuals to large-scale attacks on facilities like power plants, government systems, and industrial control systems, threats abound in the 21st century global economy. Adapting to these changing threat environments is a continual activity that companies, and governments must engage with. These organizations rely on cybersecurity practitioners to identify threats, determine risk, and implement mitigating protections in their software, hardware, and online systems - such as those on mobile, web and Internet of Things (IoT) platforms. It is also important to build protections into new software and hardware during the design and development process, track and monitor developed systems for on-going risk, and assess them forensically when something goes wrong. The CYBR degree program at UNO focuses on technical curricula that prepare students for pathways into a range of careers that address these topics.

Careers Options:

- Entry Level
 - Cybersecurity Specialist/Technician
 - Cyber Crime Analyst/Investigator
 - Incident Analyst / Responder
 - IT Auditor
 - Secure Applications Developer
- Mid-Level
 - Cybersecurity Analyst
 - Cybersecurity Consultant
 - Penetration and Vulnerability Tester
 - Secure Systems Integrator
 - Cybersecurity Lead Programmer
- Advanced level
 - Cybersecurity Manager/Administrator
 - Cybersecurity Engineer
 - Cybersecurity Architect
 - Chief Information Security Officer

Bachelor of Science in Information Technology (IT) Innovation

The IT Innovation (ITIN) major involves the study of entrepreneurship as it relates to IT and an individual field of interest.

Careers Options:

In addition to more general IT professions, students in the IT Innovation program have found employment in the IT Innovation field as:

- Applications Designer
- Digital Artist
- Founder
- Graphics/Web Designer
- Innovation Consultant
- Innovation Evangelist
- IT Applications Consultant
- New Product Designer/Developer
- New Ventures Specialist
- Product Innovation Specialist
- User Experience Designer
- Video Game Designer

Bioinformatics

BIOI 1000 INTRODUCTION TO BIOINFORMATICS (3 credits)

Bioinformatics is a scientific discipline that integrates mathematical and computational techniques with biological knowledge to develop and use computational tools to extract, organize and interpret information from genetic sequence data. The field is growing rapidly with the advancement in molecular technology to sequence the genomes of many different organisms. This course will provide an introduction to the field and will examine some of the problems of interest to bioinformaticians and how these relate to biology, computer science, mathematics and engineering. Topics will include an overview of the biology, mathematics and computer science needed to understand these and tools.

Distribution: Natural/Physical Science General Education course

BIOI 2000 FOUNDATIONS OF BIOINFORMATICS (3 credits)

Bioinformatics is a new scientific discipline that integrates mathematical and computational techniques with biological knowledge to develop and use computational tools to extract, organize and interpret information from genetic sequence data. The field is growing quickly due to rapid advances in sequencing and other biological techniques that allow the genomes of different organisms to be easily sequenced. This course provides an overview of the field and covers the chemical, biological, mathematical and computational foundations of bioinformatics upon which later courses will depend. In addition, it introduces problems of interest to bioinformaticians and the methods and tools used to address them.

Prerequisite(s)/Corequisite(s): BIOI 1000 or BIOL 1450

BIOI 3000 APPLIED BIOINFORMATICS (3 credits)

This course will provide students with the practical skills needed for the analysis of -omics data. Topics covered will include biological databases, molecular biology tools (e.g., primer design, contig assembly), gene prediction and mining, database searches, genome comparison, sequence alignments, phylogenetic inference, gene expression data analyses, functional annotation of protein sequences, protein structure and modeling. Specialized software (e.g., Vector NTI) and widely used web-based computation tools (e.g., Entrez, BLAST, ClustalX, Phylip, PyMOL, and SwissPDBviewer) will be illustrated. Multiple approaches for solving particular problems will be presented.

Prerequisite(s)/Corequisite(s): BIOI 2000 and CIST 1400; or permission of instructor.

BIOI 3500 ADVANCED BIOINFORMATICS PROGRAMMING (3 credits)

Because of the volume and complexity of biological data, advanced programming skills are required for researchers in order to get the most out of their data analyses. This course will provide the expanded programming skills necessary to develop software that can exploit the complex information landscape of bioinformatics. Specific topics covered will include molecular biology basics, Unix/Linux shell programming, Perl and BioPerl, databases and using the Perl DBI, and data visualization.

Prerequisite(s)/Corequisite(s): BIOI 3000 and CSCI 1620; or permission of instructor. CSCI 3320 is strongly recommended but not required.

BIOI 4500 INDEPENDENT STUDY (1-3 credits)

This course allows students to research a topic of their interest that is not available in a formal course. The topic to be studied must be agreed upon by the student and the instructor.

Prerequisite(s)/Corequisite(s): Junior or Senior within the Bioinformatics undergraduate program. Not open to non-degree graduate students.

BIOI 4510 BIOINFORMATICS INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the Bioinformatics undergraduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s)/Corequisite(s): Junior/Senior standing and permission of Director of the School of Interdisciplinary Informatics. Not open to non-degree graduate students.

BIOI 4860 BIOINFORMATICS ALGORITHMS (3 credits)

The main objective of this course is to provide an organized forum for students to learn recent developments in Bioinformatics, particularly, from the algorithmic standpoint. The course will present basic algorithmic concepts in Bioinformatics and show how they are connected to molecular biology and biotechnology. Standard topics in the field such as restriction mapping, motif finding, sequence comparison, and database search will be covered. The course will also address problems related to Bioinformatics like next generation sequencing, DNA arrays, genome rearrangements and biological networks. (Cross-listed with BMI 8866).

Prerequisite(s)/Corequisite(s): CSCI 3320 and BIOL 1450; Or permission of instructor.

BIOI 4870 DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS (3 credits)

This required course for undergraduate bioinformatics majors provides foundational knowledge on database aspects used in the field and an overview of their applications in bioinformatics, biomedical informatics, and health/clinical informatics. The course begins with a brief review of key concepts in computational molecular biology related to database search/development, database management systems, the difference between primary and secondary databases, and bioinformatics-related aspects of modeling and theory in computer science. The major focus is on the multiple challenges and aspects of bio-database development, search, and pattern discovery. The course uses problem-based learning to help students develop database management skills as they apply to high throughput "-omics." data, the basics of data management, data provenance and governance, standards, and analysis through KDD-based workflows. This course will also consider the fundamentals of artificial intelligence and machine learning as they pertain to bioinformatics, from the perspective of database storage, I/O, and analysis. (Cross-listed with CSCI 8876).

Prerequisite(s)/Corequisite(s): CSCI 4850 or permission of instructor. Not open to non-degree graduate students.

BIOI 4890 COMPUTERIZED GENETIC SEQUENCE ANALYSIS (3 credits)

The goal of this course is to introduce students to major topics in computerized analysis of genetic sequences. In particular the class will allow students to become familiar with the computational tools and software that aid in the modern molecular biology experiments and analysis of experimental results. Following the completion of this course, it is expected that the students will have a basic understanding of the theoretical foundations of the sequence analysis tools and develop competence in evaluating the output from these tools in a biological context. This course will emphasize hands-on experience with the programs for nucleotide and amino acid sequence analysis and molecular phylogeny.

Prerequisite(s)/Corequisite(s): Junior or senior-level standing in the Bioinformatics program or permission from the instructor. Not open to nondegree students.

BIOI 4950 SPECIAL TOPICS IN BIOINFORMATICS (3 credits)

This course is intended to provide a mechanism for offering instruction in subject areas that are not covered in other regularly scheduled courses. In general, courses offered under the BIOI 4950 designation will focus on evolving subject areas in bioinformatics.

Prerequisite(s)/Corequisite(s): Prerequisites of a specific offering of BIOI 4950 will be determined by the supervising faculty member and identified in the course proposal. It is anticipated that permission of the faculty member teaching the course will be required for registration.

BIOI 4970 SENIOR PROJECT IN BIOINFORMATICS I (1 credit)

This course is the first part of a two-part series that allows students to work on a guided research project on a specific topic in bioinformatics. The goal of this course is for the student to decide on a research topic and to write a detailed proposal based on this topic that outlines the goals and objectives of the proposed research. The topic and proposal will be approved by the supervising faculty member.

Prerequisite(s)/Corequisite(s): BIOI 4860 and BIOI 4870; BIOI 4870 can be taken concurrently. Senior level status in the Bioinformatics program. Not open to nondegree students.

BIOI 4980 SENIOR PROJECT IN BIOINFORMATICS II (2 credits)

This course is the second part of a two-part series that allows the student to work on a guided research project on a specific topic in bioinformatics. The goal of this course is for the student to perform the research proposed in Part I of the course and to present the results of his or her work. Presentations will be made in the form of a report, written as a scientific research paper, and an oral defense.

Prerequisite(s)/Corequisite(s): Junior or senior-level standing in the Bioinformatics program or permission from the instructor.

BIOI 4990 INDEPENDENT STUDY IN BIOINFORMATICS (1-3 credits)

This is a variable-credit course designed for the junior or senior bioinformatics major who would benefit from independent reading assignments and research-type problems. Independent study enables coverage of topics not taught in scheduled course offerings.

Prerequisite(s)/Corequisite(s): Junior/senior standing, permission of supervising faculty member & approval of Bioinformatics UG Prog Comm Chair. A formal description of the problem area to be investigated, the resources to be used, & the results to be produced must be prepared.

Cybersecurity**CYBR 1100 INTRODUCTION TO INFORMATION SECURITY (3 credits)**

This course emphasizes our current dependence on information technology and how its security in cyberspace (or lack thereof) is shaping the global landscape. Several historical and contemporary global events that have been influenced by the exploitation of information technology motivates topics on cyber crime, malware, intrusion detection, cryptography, among others, and how to secure one's own data and computer system. Several aspects of this course are geared towards developing an understanding of the "cyberspace" as a new medium that breaks all geographical boundaries, while highlighting noticeable influences on it from social, political, economic and cultural factors of a geographical region.

Distribution: Global Diversity General Education course

CYBR 2250 LOW-LEVEL PROGRAMMING (3 credits)

This course will teach the cybersecurity (CYBR) students low-level programming in the 'C' and assembly languages, and the interrelationship between these two programming paradigms. The student will learn the various control structures in 'C' and how they are implemented in machine code, memory allocation and management, and the basics of allocation classes such as static versus automatic variables. The students will also learn assembly language in the 'C' environment and will be able to write useful, functional, stand-alone assembly language programs with no help from external libraries.

Prerequisite(s)/Corequisite(s): CSCI 1620. Not open to non-degree graduate students.

CYBR 2600 SYSTEM ADMINISTRATION (3 credits)

This course covers topics a system administrator would encounter in their profession. The student will learn how a system administrator fulfills various computer management requirements using both Windows and Linux operating systems on both physical and virtual machines. Topics include installation, creating and maintaining file systems, user and group administration, backup and restore processes, network configuration, system services, virtualization, and security administration.

Prerequisite(s)/Corequisite(s): CIST 1400 or Instructor Permission

CYBR 2980 SPECIAL TOPICS IN CYBERSECURITY (1-3 credits)

The course provides a format for exploring subject areas in Cybersecurity and related fields for sophomore undergraduate students. Specific topics vary, in keeping with research interests of faculty and students. Examples include network configuration, network security, forensics, regulatory compliance, web services and applications, vulnerability assessments, cloud computing security, and other issues in Cybersecurity.

Prerequisite(s)/Corequisite(s): Instructor permission required. Not open to non-degree graduate students.

CYBR 3350 SECURITY ADMINISTRATION - LINUX (3 credits)

This course covers topics a system administrator would encounter in their profession. The student will learn how a system administrator fulfills various organizational information resource management requirements using the a Linux-based Operating System. Topics will include; installation; creating and maintaining file systems; user and group administration; backup and restore processes; network configuration; various system services; simple security administration; and updating and maintaining the system.

Prerequisite(s)/Corequisite(s): CSCI 1620 or CSCI 1840 or Instructor Permission.

CYBR 3370 SECURITY ADMINISTRATION - WINDOWS (3 credits)

This course covers topics a system administrator would encounter in their profession. The student will learn how a system administrator fulfills various organizational information resource management requirements using the Windows Operating System. Topics will include; installation; creating and maintaining file systems; user and group administration; backup and restore processes; network configuration; various system services; simple security administration; and updating and maintaining the system.

Prerequisite(s)/Corequisite(s): CSCI 1620 or CSCI 1840 or Instructor Permission

CYBR 3450 NATURAL LANGUAGE PROCESSING (3 credits)

The course will provide overview of the topics in natural language processing such as word and sentence tokenization, syntactic parsing, semantic role labeling, text classification. We will discuss fundamental algorithms and mathematical models for processing natural language, and how these can be used to solve practical problems. We will touch on such applications of natural language processing technology as information extraction and sentiment analysis. (Cross-listed with CSCI 3450).

Prerequisite(s)/Corequisite(s): Prereq: CSCI 2030 with C- or better; Co-req: CSCI 3320 with C- or better; Students should be comfortable w/ scripting (Python is the language extensively used in natural language processing tools including NLTK). Not open to non-degree graduate students.

CYBR 3570 CRYPTOGRAPHY (3 credits)

The course will provide a broad overview of the concepts, fundamental ideas, vocabulary, and literature base central to the study and development of cryptography and cryptanalysis. This course will explore historical development of cryptography, as well as methods used to defeat it. In addition, the course will cover the mathematical foundations of cryptography today, as well as some current uses of such cryptography, such as public key infrastructures, the Internet Key Exchange protocol, and more.

Prerequisite(s)/Corequisite(s): CSCI 3320 or ISQA 3300. Not open to non-degree graduate students.

CYBR 3600 INFORMATION SECURITY, POLICY AND AWARENESS (3 credits)

This course will cover the planning and development for information governance, security policies and procedures, and security awareness. (Cross-listed with CIST 3600)

Prerequisite(s)/Corequisite(s): CIST 2100; CIST 3110, which may be taken concurrently.

CYBR 4000 CENTER OF ACADEMIC EXCELLENCE-CYBER OPERATIONS COMPLETION CERTIFICATE (0 credits)

This course is utilized to provide a specific designation for students that have completed the Center of Academic Excellence - Cyber Operations coursework. It is a zero credit hour class used to designate the completion of this focus area in the cybersecurity curriculum.

Prerequisite(s)/Corequisite(s): Instructor Permission. The program committee will work w/ the UG advisors to verify that the student has fulfilled the requirements for this designation. If the student has fulfilled (or will soon) all the requirements, they may register for this class.

CYBR 4360 FOUNDATIONS OF CYBERSECURITY (3 credits)

Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 8366, CSCI 8366).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CYBR 4380 DIGITAL FORENSICS (3 credits)

Digital forensics involves the preservation, identification, extraction, analysis and documentation of digital evidence stored on a variety of electronic devices. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a forensics investigation. Topics include: an introduction to digital forensics, data acquisition, first response, memory forensics, operating system forensics, and network forensics. Students will be required to perform several forensics analyses in a controlled lab environment, including acquiring forensically sound hard drive images, memory images and analyzing these using industry standard tools, such as Forensic Toolkit (FTK). The Digital Forensics class is designed for Cybersecurity, Computer Science and other qualified students to learn what actions are both appropriate and required for preserving, collecting and analyzing digital evidence in cases of intrusion, data theft or other cybercrimes. (Cross-listed with CSCI 4380).

Prerequisite(s)/Corequisite(s): The student must take the following before enrolling: CYBR 3600 or CIST 3600, CSCI 3550 or ISQA 3400, CYBR 3370, CYBR 3350. Alternatively, instructor permission can be sought for students who have not met all of the above requirements.

CYBR 4390 MOBILE DEVICE FORENSICS (3 credits)

Mobile device forensics is the science of recovering digital evidence from a mobile device under forensically sound conditions using accepted methods. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a mobile device forensics investigation. Topics include: an introduction to digital and mobile device forensics, mobile forensics standards, acquisition methods (manual, logical, physical and provider-side), Android and iOS filesystem analysis, decoding approaches, application data analysis, and report writing. Students will be required to perform several investigations in a controlled lab environment, including acquiring forensically sound evidence and analyzing these using industry standard tools. (Cross-listed with CYBR 8396).

Prerequisite(s)/Corequisite(s): CYBR 4380/8386 - Computer and Network Forensics or Instructors Permission

CYBR 4430 QUANTUM COMPUTING AND CRYPTOGRAPHY (3 credits)

The course builds an understanding of exciting concepts behind quantum computing and quantum cryptography. In doing so it will introduce the principles of qubits, superposition, entanglement, teleportation, measurement, quantum error correction, quantum algorithms such as quantum Fourier transformation, Shor's algorithm and Grover's algorithm, quantum key exchange, quantum encryption, and secure quantum channels that are built using these principles. It will also discuss advantages of quantum computing and cryptography over classical computing and cryptography and limitations thereof. The students will come out with a working understanding of the field of quantum computing and quantum cryptography. During the course, students will also implement several of the quantum algorithms. (Cross-listed with CYBR 8436, CSCI 4430).

Prerequisite(s)/Corequisite(s): Co-requisites: CYBR 3570 or CSCI 4560; or Instructor permission.

CYBR 4440 INDUSTRIAL CONTROL SYSTEM SECURITY (3 credits)

The objective of this course is to research vulnerabilities into, and provide guidance for securing, industrial control systems (ICS). ICS is a general term that encompasses several types of control systems, including supervisory control and data acquisition (SCADA) systems, distributed control systems (DCS), and other control system items such as Programmable Logic Controllers (PLC). The student will learn to identify network and device vulnerabilities and potential countermeasures to these weaknesses. (Cross-listed with CYBR 8446)

Prerequisite(s)/Corequisite(s): CSCI 3550.

CYBR 4450 HOST-BASED VULNERABILITY DISCOVERY (3 credits)

The class will cover security issues at an implementation and hardware level. The students will learn assembly language and the use of a reverse assembler and debugger. This will allow the student to analyze various "packing" algorithms for computer viruses, the viruses themselves, operating system "hooking", "fuzzing", and other machine code, host-based exploits. The class will be using both Windows and Linux as operating systems. (Cross-listed with CYBR 8456.)

Prerequisite(s)/Corequisite(s): CSCI 3710 and CYBR 2250

CYBR 4460 NETWORK-BASED VULNERABILITY DISCOVERY (3 credits)

The course is an advanced class in which the students learn various techniques for testing for and identifying security flaws in network software and web applications. Internet technologies such as HTTP, DNS, DHCP, and others are examined in the context of cyber security. Students are expected to participate in numerous hands-on experiments related to Information Assurance with respect to web technologies. (Cross-listed with CYBR 8466)

Prerequisite(s)/Corequisite(s): CSCI 3550

CYBR 4540 COMPUTER SECURITY MANAGEMENT (3 credits)

The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST 4540, CYBR 8546, ISQA 8546)

Prerequisite(s)/Corequisite(s): IASC 4360 or permission of the instructor.

CYBR 4580 CERTIFICATION AND ACCREDITATION OF SECURE SYSTEMS (CAPSTONE) (3 credits)

This is the BSIA capstone course where students extend and apply their knowledge in defining, implementing, and assessing secure information systems. Students will demonstrate their ability to specify, apply, and assess different types of countermeasures at different points in the enterprise with a special focus on system boundaries. Students will complete and defend a Certification and Accreditation package.

Prerequisite(s)/Corequisite(s): CIST 3600 or CYBR 3600; CIST 4360; CYBR 3350 or CYBR 3370; and CIST 4540 or CYBR 4540 may be taken prior to or concurrently. Not open to non-degree graduate students.

CYBR 4950 INTERNSHIP IN CYBERSECURITY (1-3 credits)

The course provides a format for a student to work with a local or national industry partner in a cyber-security oriented position, and to receive credit for this practical experience. The internship may or may not be a paid position, but will definitely be directly related to the Cybersecurity degree program. The class is proposed and organized by the student, with participating faculty supervising and input provided by the industry partner.

Prerequisite(s)/Corequisite(s): Instructor Permission

CYBR 4980 SPECIAL TOPICS IN INFORMATION ASSURANCE (1-3 credits)

The course provides a format for exploring advanced research areas for undergraduate students in Information Assurance and related fields. Specific topics vary, in keeping with research interests of faculty and students. Examples include applied data mining, mobile security, web services and applications, vulnerability assessments, cloud computing security, and other issues in Information Assurance research. (Cross-listed with CYBR 8986)

Prerequisite(s)/Corequisite(s): Instructor Permission.

CYBR 4990 INDEPENDENT STUDY IN INFORMATION ASSURANCE (1-3 credits)

The course provides a format for exploring advanced research areas for undergraduate students in Information Assurance and related fields. The class is designed for students that would like to explore specific Information Assurance topics at a greater depth, or topics which are not currently a part of the IA curriculum. The class is proposed and organized by the student, with participating faculty mentoring.

Prerequisite(s)/Corequisite(s): Instructor Permission

IT Innovation**ITIN 1010 ACTIVATING INNOVATION IN SOCIETY (3 credits)**

This course surveys and applies the use of qualitative methods, especially interview-based research, in order to maximize the insight that informs and activates the innovation process, with emphasis on technological innovation.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

ITIN 1110 INTRODUCTION TO IT INNOVATION (3 credits)

In almost every modern human endeavor, creativity and Information Technology are essential. In the Internet age, information has become a commodity that is available to everyone. Similarly, current technology has largely become commoditized. Therefore, creating new value is becoming the basis for successful professionals. This course introduces students to tools, techniques, and methods for generating innovative information technology ideas and solutions. It teaches them to think about future possibilities and equips them with the ability to critically evaluate proposed innovations and ideas. The goal of the course is to increase students' ability to creatively solve challenging problems in new ways using information technology. This class is inherently interdisciplinary as IT now touches every aspect of modern academic pursuits.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ITIN 2150 AUDIO FOR MULTIMEDIA (3 credits)

This course provides an overview of audio production techniques as they pertain to multimedia.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ITIN 2220 APPLIED IT INNOVATION (3 credits)

The course extends the concepts learned in the Introduction to IT Innovation course and focuses on market dynamics and monetizing innovations. It moves past idea generation and focuses on identifying and gathering resources, innovation implementation, sustainable innovation models and how ideas can be monetized. The goal is for students to take their original ideas from concept to initial implementation with thoughts towards commercialization. Upon completing the course, students will have created at least a rudimentary implementation of an original idea and have a defensible plan for how the idea can be monetized.

Prerequisite(s)/Corequisite(s): ITIN 1110 & CIST 1400. Not open to non-degree graduate students.

ITIN 2990 IT INNOVATION SYMPOSIUM (1 credit)

The seminar exposes students to information technology innovators from multiple industries and varied backgrounds. It teaches the practical aspects of IT Innovation from those that have done it and are doing it in both research and practice. The purpose is to cause students to reflect on applying innovation to the real-world, connect them to the innovation community and to equip them with best practices and tools to make their innovations a reality.

Prerequisite(s)/Corequisite(s): Enrollment in the IT Innovation Major or IT Innovation Minor. Not open to non-degree graduate students.

ITIN 3100 MUSIC INFORMATICS (3 credits)

Surveys the use of digital music data in the study, composition, performance, analysis, storage, and dissemination of music. Various computational approaches and technologies in music informatics including music information retrieval will be explored and implemented by students. (Cross-listed with MUS 3100).

Prerequisite(s)/Corequisite(s): Successful completion of one of the following three courses satisfies the prerequisite requirement: CIST 1300 or MUS 3170 or MUS 3180. Not open to non-degree graduate students.

ITIN 3180 DIGITAL SYNTHESIS (3 credits)

An exploration of the potentials of computer music synthesis. Concepts of music synthesis are presented through the use of a computer, keyboard, and appropriate software. Students create assignments that demonstrate the application of basic techniques. (Cross-listed with MUS 3180).

ITIN 3330 PRODUCT DESIGN AND DEVELOPMENT (3 credits)

This course will cover elements and principles of excellent product design and development. The history of design will be reviewed and overarching tenets of design will be introduced. The course will particularly focus on innovation and students will be expected to develop an original concept and create quality designs and low-fidelity prototype implementations of their unique idea. The proposed solutions must be novel and meet a real-world market need. This course will be hands-on and will examine developmental models for innovation.

Prerequisite(s)/Corequisite(s): ITIN 2220. Not open to non-degree graduate students.

ITIN 4000 SPECIAL TOPICS IN IT INNOVATION (1-6 credits)

This course is designed to acquaint students with issues which are current to the field or emerging trends in the IT Innovation area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ITIN 8006).

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ITIN 4090 PRINCIPLES OF COLLABORATION (3 credits)

Students will work with techniques for team leadership, interpersonal collaboration, consensus-building, creative problem solving, negotiation, facilitation, group process design, collaborative workspace design, and collaboration engineering. Students will gain hands-on experience with collaboration technologies. (Cross-listed with BSAD 8096, MGMT 4090).

Prerequisite(s)/Corequisite(s): Junior standing or permission of instructor.

ITIN 4260 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, CSCI 8266, ITIN 8266).

Prerequisite(s)/Corequisite(s): Required: C- or better in CIST 2500 and junior standing, or by permission of instructor. Recommended: C- or better in CSCI 4250 or ITIN 3330.

ITIN 4440 AGILE DEVELOPMENT METHODS (3 credits)

The course presents an introduction to agile development methods for IT application development. Students will also learn Unified Modeling Techniques as they go through the agile iterations. This course is a foundation course for the IT Innovation capstone course.

Prerequisite(s)/Corequisite(s): CSCI 4850 or ISQA 3310. Not open to non-degree graduate students.

ITIN 4500 INDEPENDENT STUDIES (1-3 credits)

A variable credit course for the junior or senior who will benefit from independent reading assignments and research type problems. Independent study makes available courses of study not available in scheduled course offerings. The student wishing to take an independent study course should find a faculty member willing to supervise the course and then submit, for approval, a written proposal (including amount of credit) to the IT Innovation Undergraduate Program Committee at least three weeks prior to registration.

Prerequisite(s)/Corequisite(s): Written permission required.

ITIN 4510 INFORMATION TECHNOLOGY INNOVATION INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the ITIN undergraduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by professionals in the workplace.

Prerequisite(s)/Corequisite(s): Junior/Senior standing and permission of School of interdisciplinary Informatics Director. Not open to non-degree graduate students.

ITIN 4720 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with BSAD 8726, ENTR 4720, ITIN 8256, MGMT 4720, MKT 4720).

Prerequisite(s)/Corequisite(s): ITIN 1110 and junior standing or above or by instructor permission.

ITIN 4880 SYSTEMS SIMULATION AND MODELING (3 credits)

The course provides an introduction to the modeling and simulation with special emphasis on decision-theoretic models and rational decision-making. The ability to make good decisions is key to individuals and organizations and studying, understanding and improving decisions is vital to success. Students are given a background into systematic decision-making processes, and then are introduced to formal methods for decision modeling and analysis. Building on these foundational models, students learn how to perform process modeling and optimization. Finally, the course concludes with a look at psychological biases and traps that may affect decision-makers. (Cross-listed with ISQA 4880).

Prerequisite(s)/Corequisite(s): CIST 1400, CIST 2500, or equivalent.

ITIN 4980 INFORMATION TECHNOLOGY INNOVATION CAPSTONE PROJECT I (3 credits)

This course serves as Part 1 of the capstone project for the Information Technology Innovation program. As such the student will design a prototype of an IT product or service as well as a business case pertaining to what is required to launch their project commercially. This effort will be under the guidance of an advisory committee.

Prerequisite(s)/Corequisite(s): ITIN 4440. ITIN 4980 is for seniors who are enrolled in the BS in IT innovation degree. Before enrolling in ITIN 4980, a student must gain approval, from the ITIN Program Committee, of their Area of Emphasis. Not open to non-degree graduate students.

ITIN 4990 INFORMATION TECHNOLOGY INNOVATION CAPSTONE PROJECT PART II (3 credits)

This course serves as Part 2 of the capstone project for the Information Technology Innovation program. Following the designs and business plan developed in Part I ITIN 4980, the student will create a prototype of an IT product or service as well as refine and implement the required business aspects involved in launching their project commercially. This effort will be under the guidance of an advisory committee.

Prerequisite(s)/Corequisite(s): ITIN 4980. This course is for seniors who are enrolled in the BS in IT Innovation degree. Not open to non-degree graduate students.

Bioinformatics, Bachelor of Science (College of Information Science & Technology)

Bioinformatics is an exciting and rapidly-growing field that uses techniques from the computer and information sciences to interrogate biological systems. It is an interdisciplinary science, bringing together aspects of computer science, molecular biology, chemistry, and mathematics. Specifically, it is the science of developing and utilizing computer databases and algorithms to facilitate and expedite biological research, particularly in the areas of genomics, transcriptomics, proteomics, and more.

The Bioinformatics program in the College of Information Science and Technology (IS&T) specifically equips students with a strong foundation in computer science, scripting/programming, algorithms, database development, data management, and reproducible workflow implementation. In addition, fundamental courses in biology, genetics,

molecular biology, chemistry, statistics, and discrete mathematics provide students with the ability to analyze and interpret many different types of data. The program curriculum aims to align with and meet the current demand for professionals equipped with bioinformatics computing skills. The national demand for bioinformatics professionals exceeds current supply, and individuals with the interdisciplinary training that a bioinformatics degree provides are in high demand.

Graduates of our IS&T Bioinformatics degree program go on to careers in software development and engineering, database development and implementation, and positions in the agricultural sector, among other career pathways; our graduates also pursue graduate research and other professional degrees, including medical school (with the addition of only a few courses). The interdisciplinary nature of our program also allows our graduates to transition easily into informatics-adjacent careers in health informatics, public health, and health information technology. Students also have the opportunity to take up to nine graduate credits toward a College of IS&T Master's degree in Biomedical Informatics through our Fast Track program.

Program Educational Objectives

The goals of the Bioinformatics program in the College of IS&T are stated as Program Educational Objectives (PEOs) and are based on the needs of the program's constituencies. PEOs describe the career and professional accomplishments that our program is preparing graduates to achieve. PEOs are used to align the program with the requirements of accrediting bodies such as the Higher Learning Commission (HLC) and Accreditation Board for Engineering and Technology (ABET), which accredits programs in applied science, computing, engineering, and technology.

Graduates of the UNO IS&T Bachelor of Science in Bioinformatics program will:

1. Prepare a portfolio demonstrating strong analytic, problem solving, and critical thinking skills.
2. Apply the scientific method to draw evidence-based conclusions in digital health and biosystems-related areas.
3. Demonstrate proficiency in communication of digital health and biosystems-related topics in both written and oral formats.
4. Exhibit commitment to strong ethical and moral standards in the field.
5. Demonstrate professional competency on current real-world digital health and biosystems-related perspectives.
6. Demonstrate ability to design, implement, deliver, and manage technical solutions to digital health and biosystems-related problems.
7. Apply skills such as reading primary literature, developing testable hypotheses, designing experiments, and analyzing algorithms.
8. Demonstrate proficiency in statistical and quantitative methods in the field.

Student Research and Teaching Opportunities

The College of IS&T Bioinformatics (BIOI) and Biomedical Informatics (BMI) faculty, staff, and students are invited to participate in a weekly professional journal club and research group meeting, the BIOI Research Group. The BIOI Research Group meets year round and sustains our UNO Bioinformatics community with components of a typical journal club, including research dissemination, practice of student science communication skills, discussion of current events, and planning of social events. Overall, this meeting serves as a venue for support and collaboration between the UNO IS&T Bioinformatics group members.

All Bioinformatics and Biomedical Informatics faculty in the College of IS&T regularly provide opportunities for students to perform research in their respective areas of expertise.

Students in the Bioinformatics degree program are also encouraged to participate in K-12 student mentorship and teaching opportunities through our outreach activities. Our faculty and staff have been involved

in outreach activities facilitated by the College of IS&T for many years and continue to participate in them year round to encourage awareness of the Bioinformatics and Biomedical Informatics disciplines. These activities include but are not limited to CodeCrush, iSTEM Afterschool Program, and our Summer Internship Program.

Student Group

The Mav Club for Bioinformatics (MCBI) provides students with a space to participate in their local UNO community, build fellowship, and support one another in a more informal way. The Club has a student president and a faculty advisor who work together to offer monthly academic seminars as well as recreational events and opportunities for students to socialize informally.

Writing in the Discipline

All UNO students are required to take a writing-in-the-discipline course within their major. Bioinformatics degree students must take CIST 3000 (<https://catalog.unomaha.edu/search/?P=CIST%203000>).

Degree Requirements

A minimum of 120 credit hours is required for a Bachelor of Science degree in Bioinformatics (BSBI). Thirty of the last 36 hours must be University of Nebraska at Omaha courses. Registering for courses without having taken the stated prerequisites could result in administrative withdrawal.

To obtain a BSBI, a student must fulfill the University, College and Departmental requirements. Some courses may satisfy requirements in more than one area, but credit is awarded only once, thereby reducing the total number of credit hours for the degree to 120. (This total does not include prerequisites.)

Code	Title	Credits
46 hours of University General Education courses (13 hours of which can be satisfied by courses also required by the degree in the areas below; students take 6 hours of coursework that satisfy both the US and global diversity and distribution requirements)		27
24 hours of College of IS&T Core courses		24
24 hours of Bioinformatics courses		24
11 hours of Mathematics courses		11
16 hours of Biology courses		16
14 hours of Chemistry courses		14
4 hours of elective/prerequisite credits		4
Total Credits		120

Code	Title	Credits
Elective/Prerequisite		
Select one of the following:		3-4

CSCI 1200 & CSCI 1204	COMPUTER SCIENCE PRINCIPLES and COMPUTER SCIENCE PRINCIPLES LABORATORY	
CIST 1300	INTRODUCTION TO WEB DEVELOPMENT	

College of IS&T Core Courses for Bioinformatics Majors

CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I ¹	3
CSCI 1620	INTRODUCTION TO COMPUTER SCIENCE II ¹	3
CIST 2500	INTRODUCTION TO APPLIED STATISTICS FOR IS&T	3
CIST 3110	INFORMATION TECHNOLOGY ETHICS ²	3
CSCI 3320	DATA STRUCTURES	3
CSCI 4830	INTRODUCTION SOFTWARE ENGINEERING	3

CSCI 4850	DATABASE MANAGEMENT SYSTEMS	3
Select one of the following:		3

CSCI/MATH 4150	GRAPH THEORY & APPLICATIONS	
ISQA/CSCI 4890	DATA WAREHOUSING AND DATA MINING	

Mathematics Courses

MATH 1950	CALCULUS I ³	5
MATH 2030 or CSCI 2030	DISCRETE MATHEMATICS MATHEMATICAL FOUNDATIONS OF COMPUTER SCIENCE	3
ISQA 4150	ADVANCED STATISTICAL METHODS FOR IS&T	3

Bioinformatics Courses

BIOI 1000	INTRODUCTION TO BIOINFORMATICS ⁴	3
BIOI 2000	FOUNDATIONS OF BIOINFORMATICS	3
BIOI 3000	APPLIED BIOINFORMATICS	3
BIOI 3500	ADVANCED BIOINFORMATICS PROGRAMMING	3
BIOI 4860	BIOINFORMATICS ALGORITHMS	3
BIOI 4870	DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS	3

BIOL 1450	BIOLOGY I	5
BIOL 2140	GENETICS	4
BIOL 3020	MOLECULAR BIOLOGY OF THE CELL	3
BIOL 4130 or BIOL 4140	MOLECULAR GENETICS CELLULAR BIOLOGY	4

Chemistry Courses ⁵

CHEM 1140 & CHEM 1144	FUNDAMENTALS OF COLLEGE CHEMISTRY and FUNDAMENTALS OF COLLEGE CHEMISTRY LABORATORY ⁶	5
CHEM 2210 & CHEM 2214	FUNDAMENTALS OF ORGANIC CHEMISTRY and FUNDAMENTALS OF ORGANIC CHEMISTRY LABORATORY	5
CHEM 3650 & CHEM 3654	FUNDAMENTALS OF BIOCHEMISTRY and FUNDAMENTALS OF BIOCHEMISTRY LABORATORY	4

Total Credits		92-93
----------------------	--	--------------

¹ NOTE: A minimum grade of C is required for CIST 1400 and CSCI 1620 as a prerequisite for all subsequent CSCI courses.

² NOTE: CIST 3110 counts toward a Humanities requirement.

³ NOTE: MATH 1950 is required for this degree program. This course will also satisfy UNO's General Education Quantitative Literacy requirement. Students who do not place into MATH 1950 are responsible for prerequisite courses MATH 1220, MATH 1320, and MATH 1330. MATH 1120/STEM 1120, MATH 1130, and STAT 1530 will not serve as prerequisites for MATH 1950. These courses will satisfy the General Education Quantitative Literacy requirement; however, they do not satisfy the Math requirement for the degree program. Students are highly encouraged to consult with their academic advisor before enrolling in a particular course.

⁴ NOTE: BIOI 1000 counts toward a Natural and Physical Sciences requirement.

⁵ NOTE: Students pursuing the pre-med requirements for the Bioinformatics degree take CHEM 2250, CHEM 2260 and CHEM 2274 in place of CHEM 2210 and CHEM 2214. Pre-Med majors also take either CHEM 4610 Biochemistry of Metabolism or two semesters of Biochemistry and the accompanying labs (CHEM 4650, CHEM 4654, CHEM 4660, and CHEM 4664) in place of CHEM 3650 and CHEM 3654 to satisfy the chemistry requirements for the BIOI major.

⁶ NOTE: CHEM 1140 and CHEM 1144 count toward the Natural and Physical Sciences lecture and lab requirement.

Minor Offered:

- Bioinformatics Minor (p. 672)

¹ MATH 1950 - Satisfies General Education Quantitative Literacy requirement

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change.

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific degree program to determine all requirements for the program. In order to graduate on time (four years for an undergraduate degree), you need to take 30 credit hours each year.

Placement Exams: For Math, English, and Foreign Languages, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

Please note that transfer credit or placement exam scores may change a suggested plan of study.

Overview

Graduates of UNO's Bioinformatics (BIOI) program in the College of Information Science & Technology (IS&T) will be able to use their degree to investigate and apply technology to solve bioinformatics problems effectively. Due to a great demand for experts in bioinformatics, the job outlook for those with appropriate training is excellent. The Bioinformatics degree can also serve as a springboard to graduate work or other careers requiring informatics skills coupled with a biological background.

In Nebraska, many current careers in Bioinformatics are classified by the Nebraska Department of Labor as H3 jobs (High Wage, High Skill, High Demand). According to their website, "Occupations are high wage when at least half of their wage measures are at or above the regional average for all occupations. Occupations that require some college, no degree, or a higher level of educational attainment are high skill, as well as occupations that require a high school diploma or equivalent plus long-term on-the-job training, an apprenticeship, or internship/residency. The number of annual openings, net change in employment, and growth rate determine whether an occupation is high demand. An occupation must be High Wage, High Skill, and High Demand to be an H3 occupation."

Jobs in software development and engineering, biostatistics, and bioinformatics are all currently qualified as H3 jobs in Nebraska. Nationally, the need for people with degrees in Bioinformatics is even more apparent, with institutions such as the National Institutes of Health (NIH) integrating the large need for a trained and competent biomedical data science workforce as a central theme in their current strategic plan. The College of IS&T's Bioinformatics degree program is one of the only programs in the Midwest that provides this type of preparation at the undergraduate level.

Examples of careers for graduates of our undergraduate Bioinformatics degree program include:

- Bioinformatics Specialist *
- Statistician/Biostatistician*
- Software Application Developer*
- Bioinformatics Scientist/Analyst
- Scientific Curator
- Computational Biologist
- Database Programmer
- Database Administrator*
- Consultant
- Data Scientist/Wrangler
- Software Engineer
- Research Scientist*
- Biotech Entrepreneur
- Professor

*Classified by the Nebraska Department of Labor as an H3 Career

Bioinformatics Curriculum Advisory Committee

The College of IS&T's Bioinformatics (BIOI) and Biomedical Informatics (BMI) faculty hosts an annual BIOI/BMI Curriculum Advisory Committee (CAC) meeting. The CAC is designed to involve alumni and community stakeholders from industry, academia, government, and non-profit organizations to aid the BIOI Undergraduate Program Committee (UPC), BMI Graduate Program Committee (GPC), and BMI Doctoral Program Committee (DPC) in decisions regarding curriculum for each committee's respective program. The CAC's objectives are:

- To review the program curriculum and provide recommendations on how to develop or change programs to address the needs of students in making them "workforce ready."
- To discuss opportunities and potential pathways for students to transition into the workforce through formal (internships, apprenticeships) and informal means.

- To provide input to curriculum committees on how to manage or improve student recruitment to our programs.
- To provide input to curriculum committees on how to manage or improve student retention in our programs.
- To support and encourage involvement of the Omaha metropolitan community in our BIOI/BMI programs.

BIOI 1000 INTRODUCTION TO BIOINFORMATICS (3 credits)

Bioinformatics is a scientific discipline that integrates mathematical and computational techniques with biological knowledge to develop and use computational tools to extract, organize and interpret information from genetic sequence data. The field is growing rapidly with the advancement in molecular technology to sequence the genomes of many different organisms. This course will provide an introduction to the field and will examine some of the problems of interest to bioinformaticians and how these relate to biology, computer science, mathematics and engineering. Topics will include an overview of the biology, mathematics and computer science needed to understand these and tools.

Distribution: Natural/Physical Science General Education course

BIOI 2000 FOUNDATIONS OF BIOINFORMATICS (3 credits)

Bioinformatics is a new scientific discipline that integrates mathematical and computational techniques with biological knowledge to develop and use computational tools to extract, organize and interpret information from genetic sequence data. The field is growing quickly due to rapid advances in sequencing and other biological techniques that allow the genomes of different organisms to be easily sequenced. This course provides an overview of the field and covers the chemical, biological, mathematical and computational foundations of bioinformatics upon which later courses will depend. In addition, it introduces problems of interest to bioinformaticians and the methods and tools used to address them.

Prerequisite(s)/Corequisite(s): BIOI 1000 or BIOL 1450

BIOI 3000 APPLIED BIOINFORMATICS (3 credits)

This course will provide students with the practical skills needed for the analysis of -omics data. Topics covered will include biological databases, molecular biology tools (e.g., primer design, contig assembly), gene prediction and mining, database searches, genome comparison, sequence alignments, phylogenetic inference, gene expression data analyses, functional annotation of protein sequences, protein structure and modeling. Specialized software (e.g., Vector NTI) and widely used web-based computation tools (e.g., Entrez, BLAST, ClustalX, Phylip, PyMOL, and SwissPDBviewer) will be illustrated. Multiple approaches for solving particular problems will be presented.

Prerequisite(s)/Corequisite(s): BIOI 2000 and CIST 1400; or permission of instructor.

BIOI 3500 ADVANCED BIOINFORMATICS PROGRAMMING (3 credits)

Because of the volume and complexity of biological data, advanced programming skills are required for researchers in order to get the most out of their data analyses. This course will provide the expanded programming skills necessary to develop software that can exploit the complex information landscape of bioinformatics. Specific topics covered will include molecular biology basics, Unix/Linux shell programming, Perl and BioPerl, databases and using the Perl DBI, and data visualization.

Prerequisite(s)/Corequisite(s): BIOI 3000 and CSCI 1620; or permission of instructor. CSCI 3320 is strongly recommended but not required.

BIOI 4500 INDEPENDENT STUDY (1-3 credits)

This course allows students to research a topic of their interest that is not available in a formal course. The topic to be studied must be agreed upon by the student and the instructor.

Prerequisite(s)/Corequisite(s): Junior or Senior within the Bioinformatics undergraduate program. Not open to non-degree graduate students.

BIOI 4510 BIOINFORMATICS INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the Bioinformatics undergraduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s)/Corequisite(s): Junior/Senior standing and permission of Director of the School of Interdisciplinary Informatics. Not open to non-degree graduate students.

BIOI 4860 BIOINFORMATICS ALGORITHMS (3 credits)

The main objective of this course is to provide an organized forum for students to learn recent developments in Bioinformatics, particularly, from the algorithmic standpoint. The course will present basic algorithmic concepts in Bioinformatics and show how they are connected to molecular biology and biotechnology. Standard topics in the field such as restriction mapping, motif finding, sequence comparison, and database search will be covered. The course will also address problems related to Bioinformatics like next generation sequencing, DNA arrays, genome rearrangements and biological networks. (Cross-listed with BMI 8866).

Prerequisite(s)/Corequisite(s): CSCI 3320 and BIOL 1450; Or permission of instructor.

BIOI 4870 DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS (3 credits)

This required course for undergraduate bioinformatics majors provides foundational knowledge on database aspects used in the field and an overview of their applications in bioinformatics, biomedical informatics, and health/clinical informatics. The course begins with a brief review of key concepts in computational molecular biology related to database search/development, database management systems, the difference between primary and secondary databases, and bioinformatics-related aspects of modeling and theory in computer science. The major focus is on the multiple challenges and aspects of bio-database development, search, and pattern discovery. The course uses problem-based learning to help students develop database management skills as they apply to high throughput "-omics." data, the basics of data management, data provenance and governance, standards, and analysis through KDD-based workflows. This course will also consider the fundamentals of artificial intelligence and machine learning as they pertain to bioinformatics, from the perspective of database storage, I/O, and analysis. (Cross-listed with CSCI 8876).

Prerequisite(s)/Corequisite(s): CSCI 4850 or permission of instructor. Not open to non-degree graduate students.

BIOI 4890 COMPUTERIZED GENETIC SEQUENCE ANALYSIS (3 credits)

The goal of this course is to introduce students to major topics in computerized analysis of genetic sequences. In particular the class will allow students to become familiar with the computational tools and software that aid in the modern molecular biology experiments and analysis of experimental results. Following the completion of this course, it is expected that the students will have a basic understanding of the theoretical foundations of the sequence analysis tools and develop competence in evaluating the output from these tools in a biological context. This course will emphasize hands-on experience with the programs for nucleotide and amino acid sequence analysis and molecular phylogeny.

Prerequisite(s)/Corequisite(s): Junior or senior-level standing in the Bioinformatics program or permission from the instructor. Not open to nondegree students.

BIOI 4950 SPECIAL TOPICS IN BIOINFORMATICS (3 credits)

This course is intended to provide a mechanism for offering instruction in subject areas that are not covered in other regularly scheduled courses. In general, courses offered under the BIOI 4950 designation will focus on evolving subject areas in bioinformatics.

Prerequisite(s)/Corequisite(s): Prerequisites of a specific offering of BIOI 4950 will be determined by the supervising faculty member and identified in the course proposal. It is anticipated that permission of the faculty member teaching the course will be required for registration.

BIOI 4970 SENIOR PROJECT IN BIOINFORMATICS I (1 credit)

This course is the first part of a two-part series that allows students to work on a guided research project on a specific topic in bioinformatics. The goal of this course is for the student to decide on a research topic and to write a detailed proposal based on this topic that outlines the goals and objectives of the proposed research. The topic and proposal will be approved by the supervising faculty member.

Prerequisite(s)/Corequisite(s): BIOI 4860 and BIOI 4870; BIOI 4870 can be taken concurrently. Senior level status in the Bioinformatics program. Not open to nondegree students.

BIOI 4980 SENIOR PROJECT IN BIOINFORMATICS II (2 credits)

This course is the second part of a two-part series that allows the student to work on a guided research project on a specific topic in bioinformatics. The goal of this course is for the student to perform the research proposed in Part I of the course and to present the results of his or her work. Presentations will be made in the form of a report, written as a scientific research paper, and an oral defense.

Prerequisite(s)/Corequisite(s): Junior or senior-level standing in the Bioinformatics program or permission from the instructor.

BIOI 4990 INDEPENDENT STUDY IN BIOINFORMATICS (1-3 credits)

This is a variable-credit course designed for the junior or senior bioinformatics major who would benefit from independent reading assignments and research-type problems. Independent study enables coverage of topics not taught in scheduled course offerings.

Prerequisite(s)/Corequisite(s): Junior/senior standing, permission of supervising faculty member & approval of Bioinformatics UG Prog Comm Chair. A formal description of the problem area to be investigated, the resources to be used, & the results to be produced must be prepared.

Bioinformatics Minor

Bioinformatics is a rapidly expanding interdisciplinary field focused on collecting, processing, and analyzing vast amounts of biological and biomedical data, and it has become an indispensable component of biomedical research. The Minor in Bioinformatics offers an opportunity for students majoring in other disciplines to acquire the foundations of the field and add in-demand skills to their portfolio.

Students are responsible for completing the prerequisites for all courses taken for the Bioinformatics minor.

Cybersecurity, Bachelor of Science

Bachelor of Science in Cybersecurity

Cybersecurity (CYBR) is an emerging, rapidly expanding science that addresses problems in the fundamental understanding of the design, development, implementation and lifecycle support of secure information systems. The need for secure information systems has become a paramount concern as the computer-enabled, internet-connected, digital-based global society of the 21st century continues to emerge. The lack of adequately secure information systems has been cited as one of the likely impediments to the emergence of the digital society.

Cyber Operations Track (Optional)

The University of Nebraska at Omaha's undergraduate Cybersecurity degree program is one of the few National Security Agency (NSA) certified National Centers of Academic Excellence in Cyber Operations (CAE-CO). As a result, UNO's College of Information Science and Technology (IS&T) is able to offer undergraduate students majoring in Cybersecurity the option to pursue a specialized Cyber Operations (CO) track and complete the requirements set out by the NSA's CAE-CO program. Students already enrolled in the Bachelor of Science in Cybersecurity degree program have

very few additional requirements to meet in order to complete the Cyber Operations track.

Writing in the Discipline

All UNO students are required to take a writing-in-the-discipline course within their major. Cybersecurity degree students must take CIST 3000.

Student Groups

NULLify is UNO's student-led computer security group. Contact the group at unonullify@gmail.com.

Visit NULLify on Facebook at [nullifyuno](https://www.facebook.com/nullifyuno).

Degree Requirements

Bachelor of Science in Cybersecurity

A minimum of 120 credit hours is required for a Bachelor of Science degree in Cybersecurity (BSIA). Thirty of the last 36 hours must be University of Nebraska at Omaha courses. Registering for courses without having taken the stated prerequisites could result in administrative withdrawal.

To obtain a Bachelor of Science in Cybersecurity, a student must fulfill the University General Education, College, and Departmental requirements. Some courses may satisfy requirements in more than one area, but credit is awarded only once, thereby reducing the total number of credit hours for the degree to 120. (This total does not include prerequisites.)

Code	Title	Credits

¹ NOTE: CSCI 1200 and CSCI 1204 count toward the Natural and Physical Sciences requirement.

² NOTE: CIST 2100 counts toward Social Science requirement.

³ NOTE: CIST 3110 counts toward Humanities requirement.

⁴ NOTE: CYBR 1100 counts toward Global Diversity requirement.

⁵ Note: MATH 1950 is required for this degree program. This course will also satisfy UNO's General Education Quantitative Literacy requirement. Students who do not place into MATH 1950 are responsible for prerequisite courses MATH 1220, MATH 1320, and MATH 1330. MATH 1120/STEM 1120, MATH 1130, and STAT 1530 will not serve as prerequisites for MATH 1950. These courses will satisfy the General Education Quantitative Literacy requirement; however, they do not satisfy the Math requirement for the degree program. Students are highly encouraged to consult with their academic advisor before enrolling in a particular course.

Cyber Operations Track (Optional)

Students already enrolled in the Bachelor of Science in Cybersecurity degree have the following additional requirements to meet in order to complete the Cyber Operations track:

- PSCI 4250 Intelligence and National Security*
- PSCI 4260 International Law*
- CSCI 3660 Theory of Computation *
- CYBR 8410 Distributed Systems and Network Security**
- CYBR 8420 Software Assurance **
- CSCI 8620 Mobile Computing and Wireless Networking**
- CYBR 8480 Secure Mobile and Internet of Things Development**
- CYBR 8000 Center of Academic Excellence -Cyber Operations Completion Certificate**

*These courses also apply towards the Cybersecurity elective requirements.

**Graduate level courses required for Cyber Operations track. Graduate level courses can be taken with special permission.

¹ MATH 1950 - Satisfies General Education Quantitative Literacy requirement

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change.

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific degree program to determine all requirements for the program. In order to graduate on time (four years for an undergraduate degree), you need to take 30 credit hours each year.

Placement Exams: For Math, English, and Foreign Languages, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

Please note that transfer credit or placement exam scores may change a suggested plan of study.

CYBR 1100 INTRODUCTION TO INFORMATION SECURITY (3 credits)

This course emphasizes our current dependence on information technology and how its security in cyberspace (or lack thereof) is shaping the global landscape. Several historical and contemporary global events that have been influenced by the exploitation of information technology motivates topics on cyber crime, malware, intrusion detection, cryptography, among others, and how to secure one's own data and computer system. Several aspects of this course are geared towards developing an understanding of the "cyberspace" as a new medium that breaks all geographical boundaries, while highlighting noticeable influences on it from social, political, economic and cultural factors of a geographical region.

Distribution: Global Diversity General Education course

CYBR 2250 LOW-LEVEL PROGRAMMING (3 credits)

This course will teach the cybersecurity (CYBR) students low-level programming in the 'C' and assembly languages, and the interrelationship between these two programming paradigms. The student will learn the various control structures in 'C' and how they are implemented in machine code, memory allocation and management, and the basics of allocation classes such as static versus automatic variables. The students will also learn assembly language in the 'C' environment and will be able to write useful, functional, stand-alone assembly language programs with no help from external libraries.

Prerequisite(s)/Corequisite(s): CSCI 1620. Not open to non-degree graduate students.

CYBR 2600 SYSTEM ADMINISTRATION (3 credits)

This course covers topics a system administrator would encounter in their profession. The student will learn how a system administrator fulfills various computer management requirements using both Windows and Linux operating systems on both physical and virtual machines. Topics include installation, creating and maintaining file systems, user and group administration, backup and restore processes, network configuration, system services, virtualization, and security administration.

Prerequisite(s)/Corequisite(s): CIST 1400 or Instructor Permission

CYBR 2980 SPECIAL TOPICS IN CYBERSECURITY (1-3 credits)

The course provides a format for exploring subject areas in Cybersecurity and related fields for sophomore undergraduate students. Specific topics vary, in keeping with research interests of faculty and students. Examples include network configuration, network security, forensics, regulatory compliance, web services and applications, vulnerability assessments, cloud computing security, and other issues in Cybersecurity.

Prerequisite(s)/Corequisite(s): Instructor permission required. Not open to non-degree graduate students.

CYBR 3350 SECURITY ADMINISTRATION - LINUX (3 credits)

This course covers topics a system administrator would encounter in their profession. The student will learn how a system administrator fulfills various organizational information resource management requirements using the a Linux-based Operating System. Topics will include; installation; creating and maintaining file systems; user and group administration; backup and restore processes; network configuration; various system services; simple security administration; and updating and maintaining the system.

Prerequisite(s)/Corequisite(s): CSCI 1620 or CSCI 1840 or Instructor Permission.

CYBR 3370 SECURITY ADMINISTRATION - WINDOWS (3 credits)

This course covers topics a system administrator would encounter in their profession. The student will learn how a system administrator fulfills various organizational information resource management requirements using the Windows Operating System. Topics will include; installation; creating and maintaining file systems; user and group administration; backup and restore processes; network configuration; various system services; simple security administration; and updating and maintaining the system.

Prerequisite(s)/Corequisite(s): CSCI 1620 or CSCI 1840 or Instructor Permission

CYBR 3450 NATURAL LANGUAGE PROCESSING (3 credits)

The course will provide overview of the topics in natural language processing such as word and sentence tokenization, syntactic parsing, semantic role labeling, text classification. We will discuss fundamental algorithms and mathematical models for processing natural language, and how these can be used to solve practical problems. We will touch on such applications of natural language processing technology as information extraction and sentiment analysis. (Cross-listed with CSCI 3450).

Prerequisite(s)/Corequisite(s): Prereq: CSCI 2030 with C- or better; Co-req: CSCI 3320 with C- or better; Students should be comfortable w/ scripting (Python is the language extensively used in natural language processing tools including NLTK). Not open to non-degree graduate students.

CYBR 3570 CRYPTOGRAPHY (3 credits)

The course will provide a broad overview of the concepts, fundamental ideas, vocabulary, and literature base central to the study and development of cryptography and cryptanalysis. This course will explore historical development of cryptography, as well as methods used to defeat it. In addition, the course will cover the mathematical foundations of cryptography today, as well as some current uses of such cryptography, such as public key infrastructures, the Internet Key Exchange protocol, and more.

Prerequisite(s)/Corequisite(s): CSCI 3320 or ISQA 3300. Not open to non-degree graduate students.

CYBR 3600 INFORMATION SECURITY, POLICY AND AWARENESS (3 credits)

This course will cover the planning and development for information governance, security policies and procedures, and security awareness. (Cross-listed with CIST 3600)

Prerequisite(s)/Corequisite(s): CIST 2100; CIST 3110, which may be taken concurrently.

CYBR 4000 CENTER OF ACADEMIC EXCELLENCE-CYBER OPERATIONS COMPLETION CERTIFICATE (0 credits)

This course is utilized to provide a specific designation for students that have completed the Center of Academic Excellence - Cyber Operations coursework. It is a zero credit hour class used to designate the completion of this focus area in the cybersecurity curriculum.

Prerequisite(s)/Corequisite(s): Instructor Permission. The program committee will work w/ the UG advisors to verify that the student has fulfilled the requirements for this designation. If the student has fulfilled (or will soon) all the requirements, they may register for this class.

CYBR 4360 FOUNDATIONS OF CYBERSECURITY (3 credits)

Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 8366, CSCI 8366).

Prerequisite(s)/Corequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CYBR 4380 DIGITAL FORENSICS (3 credits)

Digital forensics involves the preservation, identification, extraction, analysis and documentation of digital evidence stored on a variety of electronic devices. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a forensics investigation. Topics include: an introduction to digital forensics, data acquisition, first response, memory forensics, operating system forensics, and network forensics. Students will be required to perform several forensics analyses in a controlled lab environment, including acquiring forensically sound hard drive images, memory images and analyzing these using industry standard tools, such as Forensic Toolkit (FTK). The Digital Forensics class is designed for Cybersecurity, Computer Science and other qualified students to learn what actions are both appropriate and required for preserving, collecting and analyzing digital evidence in cases of intrusion, data theft or other cybercrimes. (Cross-listed with CSCI 4380).

Prerequisite(s)/Corequisite(s): The student must take the following before enrolling: CYBR 3600 or CIST 3600, CSCI 3550 or ISQA 3400, CYBR 3370, CYBR 3350. Alternatively, instructor permission can be sought for students who have not met all of the above requirements.

CYBR 4390 MOBILE DEVICE FORENSICS (3 credits)

Mobile device forensics is the science of recovering digital evidence from a mobile device under forensically sound conditions using accepted methods. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a mobile device forensics investigation. Topics include: an introduction to digital and mobile device forensics, mobile forensics standards, acquisition methods (manual, logical, physical and provider-side), Android and iOS filesystem analysis, decoding approaches, application data analysis, and report writing. Students will be required to perform several investigations in a controlled lab environment, including acquiring forensically sound evidence and analyzing these using industry standard tools. (Cross-listed with CYBR 8396).

Prerequisite(s)/Corequisite(s): CYBR 4380/8386 - Computer and Network Forensics or Instructors Permission

CYBR 4430 QUANTUM COMPUTING AND CRYPTOGRAPHY (3 credits)

The course builds an understanding of exciting concepts behind quantum computing and quantum cryptography. In doing so it will introduce the principles of qubits, superposition, entanglement, teleportation, measurement, quantum error correction, quantum algorithms such as quantum Fourier transformation, Shor's algorithm and Grover's algorithm, quantum key exchange, quantum encryption, and secure quantum channels that are built using these principles. It will also discuss advantages of quantum computing and cryptography over classical computing and cryptography and limitations thereof. The students will come out with a working understanding of the field of quantum computing and quantum cryptography. During the course, students will also implement several of the quantum algorithms. (Cross-listed with CYBR 8436, CSCI 4430).

Prerequisite(s)/Corequisite(s): Co-requisites: CYBR 3570 or CSCI 4560; or Instructor permission.

CYBR 4440 INDUSTRIAL CONTROL SYSTEM SECURITY (3 credits)

The objective of this course is to research vulnerabilities into, and provide guidance for securing, industrial control systems (ICS). ICS is a general term that encompasses several types of control systems, including supervisory control and data acquisition (SCADA) systems, distributed control systems (DCS), and other control system items such as Programmable Logic Controllers (PLC). The student will learn to identify network and device vulnerabilities and potential countermeasures to these weaknesses. (Cross-listed with CYBR 8446)

Prerequisite(s)/Corequisite(s): CSCI 3550.

CYBR 4450 HOST-BASED VULNERABILITY DISCOVERY (3 credits)

The class will cover security issues at an implementation and hardware level. The students will learn assembly language and the use of a reverse assembler and debugger. This will allow the student to analyze various "packing" algorithms for computer viruses, the viruses themselves, operating system "hooking", "fuzzing", and other machine code, host-based exploits. The class will be using both Windows and Linux as operating systems. (Cross-listed with CYBR 8456.)

Prerequisite(s)/Corequisite(s): CSCI 3710 and CYBR 2250

CYBR 4460 NETWORK-BASED VULNERABILITY DISCOVERY (3 credits)

The course is an advanced class in which the students learn various techniques for testing for and identifying security flaws in network software and web applications. Internet technologies such as HTTP, DNS, DHCP, and others are examined in the context of cyber security. Students are expected to participate in numerous hands-on experiments related to Information Assurance with respect to web technologies. (Cross-listed with CYBR 8466)

Prerequisite(s)/Corequisite(s): CSCI 3550

CYBR 4540 COMPUTER SECURITY MANAGEMENT (3 credits)

The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST 4540, CYBR 8546, ISQA 8546)

Prerequisite(s)/Corequisite(s): IASC 4360 or permission of the instructor.

CYBR 4580 CERTIFICATION AND ACCREDITATION OF SECURE SYSTEMS (CAPSTONE) (3 credits)

This is the BSIA capstone course where students extend and apply their knowledge in defining, implementing, and assessing secure information systems. Students will demonstrate their ability to specify, apply, and assess different types of countermeasures at different points in the enterprise with a special focus on system boundaries. Students will complete and defend a Certification and Accreditation package.

Prerequisite(s)/Corequisite(s): CIST 3600 or CYBR 3600; CIST 4360; CYBR 3350 or CYBR 3370; and CIST 4540 or CYBR 4540 may be taken prior to or concurrently. Not open to non-degree graduate students.

CYBR 4950 INTERNSHIP IN CYBERSECURITY (1-3 credits)

The course provides a format for a student to work with a local or national industry partner in a cyber-security oriented position, and to receive credit for this practical experience. The internship may or may not be a paid position, but will definitely be directly related to the Cybersecurity degree program. The class is proposed and organized by the student, with participating faculty supervising and input provided by the industry partner.

Prerequisite(s)/Corequisite(s): Instructor Permission

CYBR 4980 SPECIAL TOPICS IN INFORMATION ASSURANCE (1-3 credits)

The course provides a format for exploring advanced research areas for undergraduate students in Information Assurance and related fields. Specific topics vary, in keeping with research interests of faculty and students. Examples include applied data mining, mobile security, web services and applications, vulnerability assessments, cloud computing security, and other issues in Information Assurance research. (Cross-listed with CYBR 8986)

Prerequisite(s)/Corequisite(s): Instructor Permission.

CYBR 4990 INDEPENDENT STUDY IN INFORMATION ASSURANCE (1-3 credits)

The course provides a format for exploring advanced research areas for undergraduate students in Information Assurance and related fields. The class is designed for students that would like to explore specific Information Assurance topics at a greater depth, or topics which are not currently a part of the IA curriculum. The class is proposed and organized by the student, with participating faculty mentoring.

Prerequisite(s)/Corequisite(s): Instructor Permission

Information Technology (IT) Innovation, Bachelor of Science

The IT Innovation (ITIN) program involves the study of entrepreneurship as it relates to IT and an individual field of interest. Courses in this degree program are listed in the catalog as IT Innovation (ITIN).

Why major in IT Innovation?

- To have flexibility in designing your own curriculum
- To be able to take more courses that are aligned with your career goals
- To be prepared to be an entrepreneur (an ambitious leader who combines his/her ideas with labor and capital to create and market new goods or services)
- To be prepared to be an intrapreneur (using entrepreneurial skills as an employee within an established organization)
- To have a degree that appeals to a wide variety of potential employers

The IT Innovation degree has three simple but distinguishing features:

1. You pick 33 credit hours from anywhere on campus that line up with your career goals.
2. You participate in seminars, workshops, and conferences on entrepreneurship.
3. You take a solid core of IT courses, plus a two-semester senior capstone course where:
 - You have an idea for a new IT product or service.
 - You document your idea's technical and market feasibility.
 - You carry your idea through to prototype stage.

Career outcomes from the IT Innovation program

In addition to the more general IT professions, students in the IT Innovation program have found employment in the more specific field of IT Innovation such as a(an) applications designer, digital artist, founder, graphics/web designer, innovation consultant, innovation evangelist, IT applications consultant, new product designer/developer, new ventures specialist, user experience designer, video game designer, and other similar fields.

Writing in the Discipline

All UNO students are required to take a writing-in-the-discipline course within their major. ITIN degree students must take CIST 3000.

Student Groups

UNO's IT Innovation students are invited to join the Information Technology Innovation Group (IT Inc.) (<https://www.unomaha.edu/college-of-information-science-and-technology/school-of-interdisciplinary-informatics/student-involvement/>)

Requirements

A minimum of 120 credit hours is required for a Bachelor of Science degree in IT Innovation (BITI). Thirty of the last 36 hours must be University of Nebraska at Omaha (UNO) courses. Registering for courses without having taken the stated prerequisites could result in administrative withdrawal.

To obtain a BITI, a student must fulfill the university, college and departmental requirements. Some courses may satisfy requirements in more than one area, but credit is awarded only once, thereby reducing the total number of credit hours for the degree to 120. (This total does not include prerequisites.)

Code	Title	Credits
46 hours of University General Education courses (16 hours of which can be satisfied by courses in the required areas below)		26
48 hours of College of IS&T Core courses		48
33 Area of Emphasis hours		33
6 hours of Mathematics courses (The specific math courses that are required depend on which track the student selects.) See Math Tracks.		6
5-7 hours of elective/prerequisite courses		5-7
Total Credits		120

Math Tracks

Each ITIN student must fulfill requirements for one of the following **math tracks**. Each **math track** corresponds to an **ITIN track**. The three tracks are Software Development, Analytics and Statistics and Digital Humanities. Note about the three math tracks and the three corresponding ITIN tracks: when a student selects one of the three math tracks, a student must also fulfill requirements for the corresponding ITIN track of the same name (see the three **ITIN tracks** below).

Software Development Track

Code	Title	Credits
MATH 1930	CALCULUS FOR THE MANAGERIAL, LIFE, AND SOCIAL SCIENCES	3
or MATH 1950	CALCULUS I	
CIST 2500	INTRODUCTION TO APPLIED STATISTICS FOR IS&T	3

Data Analytics and Statistics Track

ITIN 4440	AGILE DEVELOPMENT METHODS	3
ITIN 4980	INFORMATION TECHNOLOGY INNOVATION CAPSTONE PROJECT I	3
ITIN 4990	INFORMATION TECHNOLOGY INNOVATION CAPSTONE PROJECT PART II	3

Area of Emphasis*

Approval of ITIN Undergraduate Program Committee members required prior to enrollment in courses 33

Total Credits 78-79

ITIN Tracks

In addition to the above IS&T courses, ITIN core courses, and the Area of Emphasis courses, all of which are required of all ITIN majors, each ITIN major must also select a track (below). Each track has separate additional course requirements. The three tracks are Software Development, Analytics and Statistics and Digital Humanities. Note about the three tracks and math requirements: when a student selects one of the three tracks below, a student must also fulfill requirements for the corresponding math requirement track of the same name (see math requirements above).

Software Development ITIN Track

Code	Title	Credits
CSCI 1620	INTRODUCTION TO COMPUTER SCIENCE II	3
CSCI 2240	INTRODUCTION TO C PROGRAMMING	3

Data Analytics and Statistics ITIN Track

Code	Title	Credits
CIST 2500	INTRODUCTION TO APPLIED STATISTICS FOR IS&T	3
CIST 1600	INTRODUCTION TO PROGRAMMING USING PRACTICAL SCRIPTING	3

Digital Humanities ITIN Track

Code	Title	Credits
CIST 2500	INTRODUCTION TO APPLIED STATISTICS FOR IS&T	3
ISQA 4900	FULL STACK DEVELOPMENT	3

Total Credits with Elected Track

84–85

¹ NOTE: CSCI 1200 and CSCI 1204 count toward the Natural and Physical Sciences requirement.

² NOTE: CYBR 1100 counts toward Global Diversity requirement.

³ NOTE: CIST 2100 and ITIN 1010 counts toward Social Sciences requirement.

⁴ NOTE: CIST 3110 counts toward Humanities requirement.

⁵ ITIN 2990 is normally a 1 credit course that is taken three times, for a total of 3 credits

* Students are encouraged to submit their area of emphasis proposal at the end of their sophomore year and/or after they complete or are about to complete ITIN 2220. Proposed courses for the area of emphasis cannot include courses that are already part of the required core curriculum for ITIN and the required core curriculum for all IS&T majors (including prerequisites like IS&T 1300, etc.). In addition, the student cannot include a course that is already being used to satisfy general education requirements. The Program Committee expects courses to be mostly upper level, although it is understood that, sometimes, lower level courses are appropriate (because they may be the only place where necessary skills can be learned, or they may be required prerequisites for necessary upper level courses, or they are sufficiently rigorous despite their lower level designation).

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

ITIN 1010 ACTIVATING INNOVATION IN SOCIETY (3 credits)

This course surveys and applies the use of qualitative methods, especially interview-based research, in order to maximize the insight that informs and activates the innovation process, with emphasis on technological innovation.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

ITIN 1110 INTRODUCTION TO IT INNOVATION (3 credits)

In almost every modern human endeavor, creativity and Information Technology are essential. In the Internet age, information has become a commodity that is available to everyone. Similarly, current technology has largely become commoditized. Therefore, creating new value is becoming the basis for successful professionals. This course introduces students to tools, techniques, and methods for generating innovative information technology ideas and solutions. It teaches them to think about future possibilities and equips them with the ability to critically evaluate proposed innovations and ideas. The goal of the course is to increase students' ability to creatively solve challenging problems in new ways using information technology. This class is inherently interdisciplinary as IT now touches every aspect of modern academic pursuits.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ITIN 2150 AUDIO FOR MULTIMEDIA (3 credits)

This course provides an overview of audio production techniques as they pertain to multimedia.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ITIN 2220 APPLIED IT INNOVATION (3 credits)

The course extends the concepts learned in the Introduction to IT Innovation course and focuses on market dynamics and monetizing innovations. It moves past idea generation and focuses on identifying and gathering resources, innovation implementation, sustainable innovation models and how ideas can be monetized. The goal is for students to take their original ideas from concept to initial implementation with thoughts towards commercialization. Upon completing the course, students will have created at least a rudimentary implementation of an original idea and have a defensible plan for how the idea can be monetized.

Prerequisite(s)/Corequisite(s): ITIN 1110 & CIST 1400. Not open to non-degree graduate students.

ITIN 2990 IT INNOVATION SYMPOSIUM (1 credit)

The seminar exposes students to information technology innovators from multiple industries and varied backgrounds. It teaches the practical aspects of IT Innovation from those that have done it and are doing it in both research and practice. The purpose is to cause students to reflect on applying innovation to the real-world, connect them to the innovation community and to equip them with best practices and tools to make their innovations a reality.

Prerequisite(s)/Corequisite(s): Enrollment in the IT Innovation Major or IT Innovation Minor. Not open to non-degree graduate students.

ITIN 3100 MUSIC INFORMATICS (3 credits)

Surveys the use of digital music data in the study, composition, performance, analysis, storage, and dissemination of music. Various computational approaches and technologies in music informatics including music information retrieval will be explored and implemented by students. (Cross-listed with MUS 3100).

Prerequisite(s)/Corequisite(s): Successful completion of one of the following three courses satisfies the prerequisite requirement: CIST 1300 or MUS 3170 or MUS 3180. Not open to non-degree graduate students.

ITIN 3180 DIGITAL SYNTHESIS (3 credits)

An exploration of the potentials of computer music synthesis. Concepts of music synthesis are presented through the use of a computer, keyboard, and appropriate software. Students create assignments that demonstrate the application of basic techniques. (Cross-listed with MUS 3180).

ITIN 3330 PRODUCT DESIGN AND DEVELOPMENT (3 credits)

This course will cover elements and principles of excellent product design and development. The history of design will be reviewed and overarching tenets of design will be introduced. The course will particularly focus on innovation and students will be expected to develop an original concept and create quality designs and low-fidelity prototype implementations of their unique idea. The proposed solutions must be novel and meet a real-world market need. This course will be hands-on and will examine developmental models for innovation.

Prerequisite(s)/Corequisite(s): ITIN 2220. Not open to non-degree graduate students.

ITIN 4000 SPECIAL TOPICS IN IT INNOVATION (1-6 credits)

This course is designed to acquaint students with issues which are current to the field or emerging trends in the IT Innovation area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ITIN 8006).

Prerequisite(s)/Corequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ITIN 4090 PRINCIPLES OF COLLABORATION (3 credits)

Students will work with techniques for team leadership, interpersonal collaboration, consensus-building, creative problem solving, negotiation, facilitation, group process design, collaborative workspace design, and collaboration engineering. Students will gain hands-on experience with collaboration technologies. (Cross-listed with BSAD 8096, MGMT 4090).

Prerequisite(s)/Corequisite(s): Junior standing or permission of instructor.

ITIN 4260 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, CSCI 8266, ITIN 8266).

Prerequisite(s)/Corequisite(s): Required: C- or better in CIST 2500 and junior standing, or by permission of instructor. Recommended: C- or better in CSCI 4250 or ITIN 3330.

ITIN 4440 AGILE DEVELOPMENT METHODS (3 credits)

The course presents an introduction to agile development methods for IT application development. Students will also learn Unified Modeling Techniques as they go through the agile iterations. This course is a foundation course for the IT Innovation capstone course.

Prerequisite(s)/Corequisite(s): CSCI 4850 or ISQA 3310. Not open to non-degree graduate students.

ITIN 4500 INDEPENDENT STUDIES (1-3 credits)

A variable credit course for the junior or senior who will benefit from independent reading assignments and research type problems. Independent study makes available courses of study not available in scheduled course offerings. The student wishing to take an independent study course should find a faculty member willing to supervise the course and then submit, for approval, a written proposal (including amount of credit) to the IT Innovation Undergraduate Program Committee at least three weeks prior to registration.

Prerequisite(s)/Corequisite(s): Written permission required.

ITIN 4510 INFORMATION TECHNOLOGY INNOVATION INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the ITIN undergraduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by professionals in the workplace.

Prerequisite(s)/Corequisite(s): Junior/Senior standing and permission of School of interdisciplinary Informatics Director. Not open to non-degree graduate students.

ITIN 4720 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with BSAD 8726, ENTR 4720, ITIN 8256, MGMT 4720, MKT 4720).

Prerequisite(s)/Corequisite(s): ITIN 1110 and junior standing or above or by instructor permission.

ITIN 4880 SYSTEMS SIMULATION AND MODELING (3 credits)

The course provides an introduction to the modeling and simulation with special emphasis on decision-theoretic models and rational decision-making. The ability to make good decisions is key to individuals and organizations and studying, understanding and improving decisions is vital to success. Students are given a background into systematic decision-making processes, and then are introduced to formal methods for decision modeling and analysis. Building on these foundational models, students learn how to perform process modeling and optimization. Finally, the course concludes with a look at psychological biases and traps that may affect decision-makers. (Cross-listed with ISQA 4880).

Prerequisite(s)/Corequisite(s): CIST 1400, CIST 2500, or equivalent.

ITIN 4980 INFORMATION TECHNOLOGY INNOVATION CAPSTONE PROJECT I (3 credits)

This course serves as Part 1 of the capstone project for the Information Technology Innovation program. As such the student will design a prototype of an IT product or service as well as a business case pertaining to what is required to launch their project commercially. This effort will be under the guidance of an advisory committee.

Prerequisite(s)/Corequisite(s): ITIN 4440. ITIN 4980 is for seniors who are enrolled in the BS in IT innovation degree. Before enrolling in ITIN 4980, a student must gain approval, from the ITIN Program Committee, of their Area of Emphasis. Not open to non-degree graduate students.

ITIN 4990 INFORMATION TECHNOLOGY INNOVATION CAPSTONE PROJECT PART II (3 credits)

This course serves as Part 2 of the capstone project for the Information Technology Innovation program. Following the designs and business plan developed in Part I ITIN 4980, the student will create a prototype of an IT product or service as well as refine and implement the required business aspects involved in launching their project commercially. This effort will be under the guidance of an advisory committee.

Prerequisite(s)/Corequisite(s): ITIN 4980. This course is for seniors who are enrolled in the BS in IT Innovation degree. Not open to non-degree graduate students.

IT Innovation Minor

The objective of the IT innovation (ITIN) minor is to provide students with a substantive qualification in information technology to augment their respective major and allow them to be even more innovative as to the application of IT to their learning and career choices.

The ITIN minor will serve all students that have a desire to pursue their academic major and wish to supplement it with an innovative approach of IT to that major.

Requirements

A minor in IT innovation may be earned by completing the following **18 hours**:

Code	Title	Credits
Core ITIN 1110	INTRODUCTION TO IT INNOVATION	3
ITIN 2220	APPLIED I.T. INNOVATION	3

CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I	3
-----------	------------------------------------	---

Electives

Select 9 hours of 3000 level or above from the following		9
CIST 3110	INFORMATION TECHNOLOGY ETHICS	
ITIN/MUS 3100	MUSIC INFORMATICS	
ITIN 3330	PRODUCT DESIGN AND DEVELOPMENT	
ITIN 4090	PRINCIPLES OF COLLABORATION	
ITIN 4440	AGILE DEVELOPMENT METHODS

College of Public Affairs and Community Service

Mission

The College of Public Affairs and Community Service (CPACS) was established in 1973 to ensure university responsiveness to the critical social needs of the community and state. The college was charged with the mission of providing educational programs of the highest caliber to prepare students for leadership in public service and reaching out to the community to help solve public problems.

The mission of the College of Public Affairs and Community Service is to:

1. Foster a learning environment in which undergraduate students, graduate students, adult learners and both traditional and nontraditional students can gain a comprehensive and quality education helpful in preparing for careers in their respective fields;
2. Conduct research, especially as it relates to concerns of local and statewide constituencies; and,
3. Offer professional services to the community, including continuing education opportunities designed to further personal, professional, organizational, and community improvement goals.

General Information

The College of Public Affairs and Community Service (CPACS) offers undergraduate coursework leading to the Bachelor of Science Degree in aviation, criminology and criminal justice, gerontology, social work, and emergency management. The Division of Continuing Studies administers the Bachelor of Multidisciplinary Studies (BMS) Degree. In addition to its undergraduate degree programs, CPACS offers courses in urban studies, nonprofit management, and public administration; the Goodrich Scholarship Program, a specialized program for students with marked financial need; and particular areas of independent study developed in conjunction with other UNO colleges or governmental units.

The College of Public Affairs and Community Service strives to make available to students an interdisciplinary education based on classroom learning, research, and community service. Students are expected to participate in each of these activities.

Goodrich Scholarship Program

The Goodrich Scholarship Program is designed to provide scholarship funds and supportive services for students with financial need. The overall intent of the program is to provide a college education for persons who might otherwise find college difficult to afford, while offering them a broad and meaningful experience in general education. The program has a three-pronged approach. It provides 1) financial aid in the form of tuition and general fees toward a bachelor's degree; 2) a specialized curriculum emphasizing the humanities and the social sciences via a multicultural perspective; and, 3) a comprehensive program of academic support, counseling, and related student services.

Admission to the Goodrich Scholarship Program

A composite of selection criteria is used to evaluate both merit and financial need. Criteria include the individual's application data, financial analysis, academic record, in-person interview, English Placement/Proficiency Exam (EPPE), personal life-experience essay, and references. For more information, contact the Goodrich Scholarship Program:

Goodrich Scholarship Program
123 College of Public Affairs and Community Service
University of Nebraska at Omaha
6001 Dodge Street
Omaha, NE 68182
Phone – 402.554.2274

Website (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/goodrich-scholarship-program/>)

Center for Public Affairs Research

The Center for Public Affairs Research (CPAR) is a research and engagement unit in the College of Public Affairs and Community Service. The Center conducts research on a broad range of policy issues at the local, regional, state, and national level and widely disseminates demographic and socio-economic data through their website dashboards, including, the new project-governing.unomaha.edu. The data that CPAR houses and shares can be used for a wide array of student-initiated research projects.

The William Brennan Institute for Labor Studies

The William Brennan Institute for Labor Studies provides continuing education for a specialized audience. The Institute serves the labor movement state-wide by helping develop citizenship and leadership. Through educational programs, workers gain knowledge and skills to be effective leaders in a democratic labor movement in a democratic society.

University Honors Program

The University Honors Program provides expanded educational opportunities for highly motivated students who have demonstrated outstanding academic achievement. Students entering or enrolled in any CPACS undergraduate program may apply for membership in UNO's Honors Program. For more information, contact the CPACS Honors Coordinator in the CPACS Dean's Office or a CPACS academic advisor.

Dean's List

Students enrolled in the College of Public Affairs and Community Service who maintain a GPA of 3.5 or better while carrying 12 hours or more of graded course work will earn the distinction of being placed on the Dean's Honor List at the end of each semester. Part-time students must earn a GPA of 3.5 or better for courses taken at UNO on a continuous part-time basis. These students may be placed on the Dean's List when they complete course work in 12 semester hour blocks at UNO (i.e., 12, 24, 48, etc.). Continuous part-time basis is defined as taking one or more courses totaling 1-11 semester hours during each fall and spring semester each academic year.

Accreditation Information

Major	Degree	Accreditation Body
Aviation: Specialization in Air Transport Administration	BS	Aviation Accreditation Board, International (AABI)
Public Administration	MPA	Network of Schools of Public Policy, Affairs and Administration (NASPAA)
Social Work	BSSW MSW	Council on Social Work Education (CSWE)

Choice of Catalog Policy

A student registering in the College of Public Affairs and Community Service for the first time may, except for the limitations described below, complete work for the degree according to the requirements of the catalog in effect the year the student enters the college or the catalog current at the time the student applies for the degree.

Students entering the college for the first time in the summer will be subject to the catalog for the academic year immediately following. Failure to complete the requirements for the degree within seven years after the date the student first enters the college will subject the student to graduation under the requirements of a later catalog to be approved by the Dean. CPACS reserves the right to institute and make effective, after due notice, during the course of a student's work toward a degree, any new ruling which may be necessary for the general good of the college and to substitute courses currently offered for those no longer offered. Contact a DCS academic advisor for Bachelor of Multidisciplinary Studies Degree catalog information.

College Website (<http://cpacs.unomaha.edu>)

Admission to the College of Public Affairs and Community Service

Students who have been admitted to the University of Nebraska at Omaha may apply for admission into the College of Public Affairs and Community Service by indicating their preference in the appropriate place on the university application for admission. Refer to the section “Division of Continuing Studies” for DCS and Bachelor of Multidisciplinary Studies Degree admission requirements.

Students who wish to transfer into CPACS from another college or school within UNO must request permission from the department offering the student’s intended major.

A minimum cumulative grade point average (GPA) of 2.5 is required to transfer into CPACS.

The College of Public Affairs and Community Service does not accept undeclared students. Exceptions to this rule are made when the student can demonstrate (by written request) substantial reasons for the undeclared status. Permission is granted by the CPACS Dean.

Academic Requirements for the College Degrees

Number of Hours to Graduate

Each candidate must present a total of at least 120 credit hours of college credit to meet graduation requirements.

Minimum GPA/Additional Requirements

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

College Requirements, BA/BS Requirements

Major Field

Each student must present a major including at least 15 credit hours of upper division work designated as appropriate by the faculty of the department in which enrolled. A candidate meeting the requirements of each of two fields may present a double major in these fields. Individual departments should be consulted for the number of upper division hours required.

Requirements for the Bachelor of Multidisciplinary Studies Degree

Refer to the section “Division of Continuing Studies” for Bachelor of Multidisciplinary Studies (BMS) Degree requirements.

Prerequisite Courses

Completion of a course within the major with a grade below a “C-” will not be considered as having fulfilled prerequisite requirements for additional courses taken in the major field of study. A higher grade may be designated by the department/unit.

General Education Requirements

All students in a CPACS degree program must meet the university general education requirements. Certain majors/programs in the College of Public Affairs and Community Service require specific foundational coursework that may also count for general education requirements. For more information on the foundational coursework, contact the department academic advisor.

Transfer Credit Policy

All questions concerning the acceptability or transferability of credits earned at other institutions or via programs such as cooperative education and credit by examination should be directed to the department in which

enrolled. Credit earned in courses below the 1000 level may not be applied toward the degree offered by the College of Public Affairs and Community Service.

Unacceptable Credits

Remedial, developmental, or technical coursework may not be used toward the fulfillment of the 120 credit hour requirement.

Courses taken at a community college that are upper-division level courses in the College of Public Affairs and Community Service may not be counted as equivalent to upper-division College of Public Affairs and Community Service courses. At the discretion of the advisor and the department, these courses may be used toward required or elective coursework but may not be used to meet upper-division requirements.

Technical credit may be awarded to students in the Division of Continuing Studies. Please see a DCS academic advisor for more information.

Retroactive Credit Policy

<https://nextcatalog.unomaha.edu/undergraduate/transfer-credit/> (p. 29)

Advanced Placement Credits

<https://nextcatalog.unomaha.edu/undergraduate/transfer-credit/> (p. 29)

Military Credit

<https://nextcatalog.unomaha.edu/undergraduate/transfer-credit/> (p. 29)

IB Credit

<https://nextcatalog.unomaha.edu/undergraduate/transfer-credit/> (p. 29)

Placement Exams and Credit by Examinations Policies/Practices

<https://nextcatalog.unomaha.edu/undergraduate/student-life-support-services/testing-center/> (p. 64)

Residency Requirement

Thirty of the last 36 hours required for the degree must be registered for and carried within the University of Nebraska System.

Quality of Work

Each candidate for the degree must attain a cumulative GPA of at least 2.0 (“C”). A grade of at least “C-” must be earned in all required courses within the major, unless a higher grade is designated by the department/unit. All grades reported by the faculty to the registrar become a part of the student’s permanent record and are included in the computation of the grade point average, even though some of these grades may be for work done in excess of the 120 hours required for graduation.

Good Academic Standing Policy

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

Credit/No Credit (CR/NC) Grades

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

Completion of Incomplete Grade

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

Repeatable Grades/Courses

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

Appeal Process

Students who wish to appeal a grade they believe was capriciously or prejudicially given shall first discuss the matter with the instructor within 30 days of the final course grade being posted. If the matter is not resolved, the student must then meet with the department/school chair or director. If a satisfactory agreement cannot be reached, the student must then appeal, in writing, to the department/school curriculum committee. If a satisfactory agreement cannot be reached, the student may submit a written appeal to the CPACS Dean's Office within 20 working days of the exhaustion of departmental procedures.

The Committee on Academic Standards and Curriculum for the College of Public Affairs and Community Service is the official body for handling the appeal.

In the event the instructor is unavailable for handling a grade complaint, the student will meet with the department chair and the Dean to determine the most appropriate course of action agreeable to all parties.

Academic Amnesty

A student who didn't perform well during one or two consecutive semesters at UNO, UNL, or UNK, may petition for academic amnesty. Removal of grades will be done for the entire semester or students may choose to keep courses taken during those semesters in which a minimum grade of "C-" or better was earned. If a student chooses to keep courses, they will count toward degree requirements and contribute to the cumulative GPA. The petition is subject to the following stipulations:

- The student shall be at least three years removed from the semester(s) to be removed.
- The student must complete 24 consecutive semester hours with a GPA of 2.5 or above.
- The student is responsible for initiation of the petition.
- Individuals who apply under this rule may not be considered for degrees with Honors at graduation.
- There shall be no physical obliteration of any part of the student's record.

Academic Probation and Suspension

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

Reinstatement Policy Following Academic Suspension

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 30)

Academic Advising

The purpose of academic advising within the College of Public Affairs and Community Service is to provide guidance and support to students striving to meet degree requirements. CPACS academic advising is provided at the departmental level. Students are encouraged to communicate with an academic advisor prior to registration each semester and should contact an advisor with any academic program questions. It is especially important for students nearing graduation to consult with an academic advisor to ensure all program requirements are met.

Advising Holds

Advising holds vary by academic unit. Please see your academic advisor for more information.

Student Holds

<https://nextcatalog.unomaha.edu/undergraduate/enrollment/enrollment/> (p. 23)

Senior Check

The College of Public Affairs and Community Service expects that students are working with their academic advisor throughout the course of their program. Once 91 credit hours are achieved, we encourage you to schedule

an appointment with your academic advisor to ensure there is a graduation plan in place to complete your requirements.

Aviation

College Vision Statement

Mission/Vision

The mission of the Aviation Institute is to:

- provide an environment where students are supported and challenged as they develop the skills, knowledge, and experiences that prepare them for personally and professionally rewarding careers in aviation and transportation;
- conduct research that enhances the safety, security, efficiency, reliability, and sustainability of aviation and transportation services, and improves mobility and quality of life for the citizens of the State of Nebraska;
- engage the community through partnerships and other collaborative initiatives that improve the lives of the citizens of the State of Nebraska and others through innovative education, training, research, and service projects; and
- maintain the highest standards of integrity and transparency in the conduct of the Institute's business and the management and stewardship of its resources.

Accreditation Information

One of the concentrations in the Bachelor of Science in Aviation, the Air Transport Administration Specialization, is accredited by the Aviation Accreditation Board, International

General Information

Maximum/Minimum Credits

Students are required to complete a minimum of 120 credit hours to complete a Bachelor of Science in Aviation.

Residency Requirement

Quality of Work

For purposes of meeting general education requirements, distribution requirements, and prerequisite requirements for courses, a grade of "C-" performs the role of a grade of "C", and a grade of "D-" performs the role of a grade of "D". A minimum grade of "C" (2.0) must be earned in each of the required courses within the major area of study.

Completion of Incomplete Grade

Students who receive instructor permission to take an incomplete must have the incomplete resolved the following semester or the incomplete changes to withdraw. If a student has a question in regard to this policy, they should see their academic adviser for clarification

Academic Advising

The Aviation Institute offers both academic and career advising to students. The academic advisor is available to assist students in meeting their career requirements and to interpret Institute and University policies regarding academic requirements. Students are encouraged to contact their advisor whenever questions arise concerning their academic program. As a minimum, students should see an advisor before registering for the next semester and review their academic progress, when choosing an area of specialty, and prior to registering for their senior year. The Aviation Institute faculty are also available to discuss career planning, opportunities, and advising. The faculty have a strong connection to the aviation industry and students are encouraged to use the faculty as a resource in determining their career goals. Students are encouraged to make an appointment as a freshman or sophomore with the Aviation Institute faculty to discuss their career path. For more information or to setup and appointment contact the Aviation Institute.

Senior Check

See your Academic Advisor

Application for Degree

Students apply for graduation through MavLINK.

Scholarship and Internship Opportunities

There are several scholarship and internship opportunities available to students within the Aviation Institute. Scholarships for current UNOAI students are awarded annually through an application process. The applications for these scholarships are available in November and are awarded at the Aviation Institute's annual honors convocation in April. Close partnerships with a number of Omaha metro organizations allow for several internship opportunities to current Aviation Institute students each semester. To apply for an internship, students must contact the internship coordinator, CPACS 120. A list of all UNOAI scholarships and internships can be found on the Aviation Institute Website (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/aviation/academics/>).

Advanced Simulation Facility

Flight students will use the Advanced Simulation Facility on a regular basis. Simulator fees are built into their student fees and are paid directly to the University of Nebraska at Omaha. The amount of time a student spends in the simulator will vary per semester depending on the flight lab requirements. Students will need to work with the Flight Training Coordinator to provide all necessary TSA documentation in order to use the flight simulators. The Aviation Institute currently has two Redbird MCX Simulators, one motion, one non-motion.

Aviation Resource Center

The Aviation Resource Center is available to all Aviation students. In the Aviation Resource Center, students can utilize the many resources offered to help them achieve academic success. Resources available are: computers for research, testing, and personal use, printing services, FAA Practical Test Study Guides, Gleim Test Prep Software, Jeppesen Study Materials, King CD-Rom Study Courses, free use of PC-ATD simulator, Current Trade Magazines and Publications, Complete AOPA Air Facts DVD Series, Sporty's

Training DVDs, ASA Study Guides, complete collections of Jeppesen Training Videos, current copies of FAA's FAR/AIM, tutoring, various aviation related referencing textbooks, ASA-JSCH PP2 headsets, Garmin 396, and a Garmin 295.

In addition, the Aviation Resource Center is a certified FAA Testing Center, where students can take FAA Practical Exams.

Financial Aid

Students should apply for financial aid as directed by the Office of Financial Support and Scholarships and at the beginning of each calendar year thereafter. Priority is given to applicants who apply early. Additional financial aid may be available to qualified students to pay for the added cost of flight training. See the Aviation Institute academic advisor for information regarding additional financial aid for flight training. Flight training is optional and not required for students working toward the Air Transport Administration or Unmanned Aircraft Systems concentrations.

Language Fluency

International and other students enrolling in the Aviation Institute for whom English is not their primary language will be required to be sufficiently fluent in English as a second language. This requirement is particularly critical for successfully completing the flight training portion of the Institute's curriculum.

Program Contact Information

unoaviation@unomaha.edu

Program Website (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/aviation/academics/>)

Admission Requirements

Incoming students who are not considered transfer students are guaranteed admission to the Bachelor of Science in Aviation program upon admission to the University of Nebraska at Omaha. Transfer students who want to complete the Bachelor of Science in Aviation Program must have a cumulative GPA of 2.5 to be accepted into the College of Public Affairs and Community Service. Current UNO students accepted for admission to any of the University's colleges may enroll in the Institute's aviation courses for elective credit.

Degrees Offered

- Aviation, Bachelor of Science (p. 693)

Writing in the Discipline

The writing in the discipline course in aviation is: AVN 3060 Writing in Aviation

Overview of Degree Programs

Air Transport Administration Concentration

The Air Transport Administration area of concentration is conferred under the Bachelor of Science in Aviation degree program. This option is oriented toward the public/private sector interface of individuals looking for administration careers. Potential career opportunities exist within the Federal Aviation Administration, Transportation Security Administration, National Transportation Safety Board, state aviation organizations, local and regional aviation organizations, airport administration, fixed-based operators, aviation consulting firms, airline operations, flight department operations, aircraft manufacturing companies, aviation marketing firms, and non-profit organizations such as Aircraft Owners and Pilot Association, National Business Aviation Association, and the Experimental Aircraft Association. The Air Transport Administration specialization gives the student the opportunity to gain knowledge in several aspects of the aviation and aerospace industry. Students will take specific classes in areas of

general aviation, airport planning, statistical analysis, security, and airline operations. Students will also have the opportunity to become involved in an internship or cooperative education experience. This experience will expose students to working in an area that relates to their potential career path; both local and national programs are available. Students who are looking to work in these highly competitive and regulated areas should choose the Air Transport Administration specialization program for their course of study.

Professional Flight Concentration

The Aviation Institute offers flight training from private pilot to certified flight instructor. Flight training is closely coordinated through local flight schools. Students who successfully complete any of the training under UNO requirements courses will receive appropriate academic credit. The Aviation Institute's Professional Flight curriculum is approved by the FAA to grant the Restricted Airline Transport Pilot (R-ATP) authorization to graduates. With the R-ATP, a pilot can be hired by a FAA Part 121 scheduled airline at age 21 with 1,000 flight hours versus at age 23 and 1,500 flight hours. Students who plan on enrollment in a flight training course should be able to successfully complete a first class aviation medical examination conducted by an FAA designated Aviation Medical Examiner accordance with Federal Aviation Regulation Part 67, *Medical Standards and Certification*. **Flight costs are paid directly to the flight provider where you conduct your training and are in addition to regular University tuition and fees.** Approximate costs for flight training are available in the Aviation Student Handbook. Costs for each training phase are based on the average number of hours required by the FAA for that particular phase. If a student requires additional flying or ground training to complete a particular training phase course, the student will be obligated to pay for the extra training. Additional financial aid is available for flight training, but does not cover 100% of flight training costs.

Flight training schedules are arranged by the student and flight instructor at each flight center. Students are responsible for contacting the flight training provider and establishing a schedule that will allow for completion of course requirements within the time allowed. It is suggested that students plan to fly three times a week. Instructors are available day, night, and weekends. For a current list of flight providers, see the Aviation Institute Web site at ai.unomaha.edu (<http://ai.unomaha.edu>). Consult with an aviation academic adviser for additional information.

Unmanned Aircraft Systems Operations Concentration

The Unmanned Aircraft Systems Operations area of concentration is conferred under the Bachelor of Science in Aviation degree program. This concentration will prepare a student for a career in operating unmanned aircraft as well as management and operations of a company or organization that utilizes unmanned aircraft.

Minor in Aviation

An aviation minor is available to students who are interested in achieving an associated aviation background to supplement their major area of study. The aviation minor has been developed as an interdisciplinary program to broaden the educational opportunities for UNO students. Consistent with the current and future demands of the aviation industry is the need for quality educated and trained professionals from a variety of disciplines. This program will provide the aviation foundation to prepare a student from any major to meet those needs as a professional in an aviation-related field.

A minor in aviation requires a minimum of 18 credit hours, including AVN 1000, AVN 1040, three credits of lower division credit and at least nine hours of upper-level aviation courses. A minimum grade of "C-" is required in each course. The minor can complement any major at the University of Nebraska at Omaha and has been a popular choice among students in criminology and criminal justice, computer science, international studies, geography, public administration, management and marketing.

For the minor to appear on the student's transcript, it must be declared by completing the minor application at the Aviation Institute. To obtain additional information about the minor options and to develop a

plan of study, students should contact an academic adviser from the Aviation Institute, Room 120, CPACS Building, 402.554.3424 or email unoaviation@unomaha.edu.

Bachelor of Science in Aviation-Air Transport Administration Concentration

The Bachelor of Science in Aviation-Air Transport Administration prepares students for careers in airport administration, corporate and general aviation, operations management, airline operations, consulting and federal government opportunities.

Career Opportunities

- Airline Management
- Airline Operations
- Airport Management
- Airport Operations
- Airport Planning
- Government (FAA, TSA, NTSB)
- Corporate Aviation Management
- Client Services
- Fleet Planning
- Safety & Security
- Aircraft Sales/Aviation Parts & Avionics Sales
- FBO Operations
- FBO Management

Bachelor of Science in Aviation-Professional Flight Specialization

The Bachelor of Science in Aviation-Professional Flight is designed for students interested in becoming a professional pilot. The program will prepare the student with a comprehensive general education program, aviation core of classes and take them through their Private, Instrument, Commercial, Certified Flight Instructor and Multi Engine Ratings. Graduates of this program will qualify for the Restricted Airline Transport Pilot program through the FAA.

Career Opportunities

- Airline Pilot
- Corporate Pilot
- Cargo Pilot
- Charter Pilot
- Certified Flight Instructor

Bachelor of Science in Aviation-Unmanned Aircraft Systems Operations Specialization

The Bachelor of Science in Aviation-Unmanned Aircraft Systems Operations is designed for students who would like to build a career in the new and developing world of UAS Operations. Courses will include a comprehensive general education curriculum, aviation core classes and concentrated areas in unmanned aircrafts. Students will not only focus on flying unmanned aircraft, but also developing the skills to manage a full operation and learn to utilize the data and imagery collected.

Career Opportunities

- Drone Operator
- Agriculture
- Aerial Systems Logistics
- Emergency Management
- Photography/Videography

- Transportation Industry (Aviation, Rail, etc.)
- Real Estate

AVN 1000 INTRODUCTION TO AVIATION AND AEROSPACE (3 credits)

This course provides a broad understanding of all aspects of the air transportation and aerospace industries. Lectures will cover what has happened in the industry to date, with emphasis on present and future developments in air transportation. The course will include the impact the airline industry is making on airports and other segments of aviation and aerospace.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

AVN 1020 PRIVATE PILOT THEORY (3 credits)

This course will familiarize the student with theories associated with flight. These include aerodynamics, weather, FAA regulations, navigation, airports, airspace and aviation safety. There is no flight requirement associated with this course.

AVN 1024 PRIVATE PILOT FLIGHT LABORATORY (1 credit)

This laboratory course is designed for students pursuing flight requirements for the FAA private pilot certificate. The student will complete all flight requirements for solo flight. Course will include flight in aircraft simulators and single-engine aircraft. Class is conducted off campus. Special fees apply.

Prerequisite(s)/Corequisite(s): Completion of or concurrent enrollment in AVN 1020, or successful completion of the FAA Private Knowledge Test.

AVN 1030 PRIVATE PILOT FLIGHT CERTIFICATE (2 credits)

This course will prepare the student for the FAA practical flight examination for the private pilot certificate. Course involves flight in personal computer assisted training device and single-engine aircraft. Student is required to successfully complete all FAA certification requirements and obtain a private pilot certificate. Classes will be conducted off campus. Special fees apply.

Prerequisite(s)/Corequisite(s): AVN 1020 and AVN 1024.

AVN 1040 HISTORY OF AVIATION AND AEROSPACE (3 credits)

The course introduces students to the history of aviation and aerospace with emphasis on the evolution of technologies, policies, business models, and transportation.

Distribution: Social Science General Education course

AVN 1160 AVIATION SAFETY (3 credits)

This course provides the student with a detailed introduction to aspects of aviation safety as well as the associated components of flight human factors, aircraft technology, weather related accidents and accident investigation.

Prerequisite(s)/Corequisite(s): AVN 1000

AVN 1500 INTRODUCTION TO UNMANNED AIRCRAFT SYSTEMS (3 credits)

This course is an introductory overview of Unmanned Aircraft Systems including the regulatory process, history, application and career opportunities, ethical concerns, and safety management of UAS operations.

Prerequisite(s)/Corequisite(s): AVN 1000 and AVN 1020. Not open to non-degree graduate students.

AVN 2020 AIRLINE OPERATIONS (3 credits)

The purpose of this course is to introduce the student to operational aspects of airline management. Topics to be covered include management, leadership, labor relations, marketing, forecasting, and fleet planning.

Prerequisite(s)/Corequisite(s): AVN 1000

AVN 2050 INTRODUCTION TO AIRPORT ADMINISTRATION (3 credits)

This course examines airport operations, safety and security, various administrative roles within the airport community, and the impact airports can have on local and regional economies. Students will explore the unique role public airports play as an interface between the traveling public and private airlines.

Prerequisite(s)/Corequisite(s): AVN 1000

AVN 2100 FLIGHT TEAM (1 credit)

Students will learn and master the skills associated with the 9 different events associated with the National Intercollegiate Flying Association Regional and National Safety and Flight Evaluation Conferences or SAFECONs. The events include: Computer Accuracy, Simulated Comprehensive Aircraft Navigation (SCAN), Aircraft Recognition, Preflight Inspection, Ground Trainer, Message Drop, Navigation, Short-Field Landing, and Power-Off Landing.

Prerequisite(s)/Corequisite(s): Permission of the Flight Team Advisor is required

AVN 2104 INSTRUMENT RATING 1 (2 credits)

The student will complete approximately 25 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator and FAA-approved Advanced Aviation Training Devices on the UNO Main Campus; objective is to complete the first portion of training needed for the FAA Instrument Rating. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s)/Corequisite(s): Concurrent enrollment in AVN 2170 or instructor permission. Not open to non-degree graduate students.

AVN 2114 INSTRUMENT RATING 2 (1 credit)

The student will complete approximately 20 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator; objective is to complete the final portion of training needed for the FAA Instrument Rating. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s)/Corequisite(s): AVN 2170 and AVN 2104 or instructor permission. Not open to non-degree graduate students.

AVN 2124 COMMERCIAL PILOT CERTIFICATE 1 (2 credits)

The student will complete approximately 40 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator and FAA-approved Advanced Aviation Training Devices on the UNO Main Campus; objective is to complete the first of three sections of training needed for the FAA Commercial Pilot Certificate. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s)/Corequisite(s): Concurrent enrollment in AVN 2180 or instructor permission. Not open to non-degree graduate students.

AVN 2134 COMMERCIAL PILOT CERTIFICATE 2 (2 credits)

The student will complete approximately 40 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator; objective is to complete the second of three sections of training needed for the FAA Commercial Pilot Certificate. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s)/Corequisite(s): AVN 2124 or instructor permission. Not open to non-degree graduate students.

AVN 2144 COMMERCIAL PILOT CERTIFICATE 3 (2 credits)

The student will complete approximately 40 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator; objective is to complete the final third of training needed for the FAA Commercial Pilot Certificate. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s)/Corequisite(s): AVN 2134 or instructor permission. Not open to non-degree graduate students.

AVN 2164 PROFESSIONAL PILOT DEVELOPMENT (2 credits)

This course is intended to supplement the Instrument Rating and Commercial Certificate courses by providing flight experience and simulator training in the areas of instrument flying, complex airplane/multiengine operations, abnormal and emergency situations, and crew resource management.

Prerequisite(s)/Corequisite(s): AVN 1030 or hold a valid US Private Pilot Certificate.

AVN 2170 INSTRUMENT FLIGHT THEORY (3 credits)

This course provides the student with an understanding of the theories and regulations involved in instrument flight. Course will include a strong foundation in attitude instrument flying and instrument navigation to prepare the student for the FAA Instrument Rating Knowledge Test. There is no flight training involved in this course.

Prerequisite(s)/Corequisite(s): AVN 1030 or hold a valid U.S. Private Pilot Certificate; or instructor permission.

AVN 2180 COMMERCIAL PILOT THEORY (3 credits)

This course provides the student with an understanding of the theories involved in flight at the commercial level. Course will include extensive review and study of VFR and IFR cross-country procedures and night flight procedures to prepare the student for the FAA commercial Pilot Knowledge Test. There is no flight training involved in this course.

Prerequisite(s)/Corequisite(s): AVN 1030 or possess a U.S. FAA issued Private Pilot Certificate; or instructor permission. Strongly recommended that student possess a U.S. instrument rating.

AVN 2500 UNMANNED AIRCRAFT SYSTEMS FLIGHT OPERATIONS (3 credits)

This course will give students hands-on flight training experience with small unmanned aircraft including mission planning, operational control, and working with different types of payloads.

Prerequisite(s)/Corequisite(s): AVN 1500 and FAA Remote Pilot Certificate. Not open to non-degree graduate students.

AVN 2510 DIVERSITY IN AVIATION (3 credits)

This course provides an overview of the contributions women and minorities have made to the field of aviation. Emphasis is placed on past, present and future roles of women and minorities in aviation. The course includes other topics such as international aspects and issues of aviation.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

AVN 2750 AVIATION METEOROLOGY (3 credits)

An introductory study of the key elements of the atmosphere's structure from the earth's surface to the upper levels; weather systems and hazards to aviation operations plus impact of adverse weather on aeronautical operations. Course will include review of air mass characteristics, frontal weather, and pressure system structure.

Prerequisite(s)/Corequisite(s): AVN 1020, and MATH 1310 or MATH 1220 or equivalent.

AVN 2900 INDEPENDENT STUDY IN GENERAL AVIATION (3 credits)

This course will cover various topics in aviation to be determined with the instructor and student. Possible topics include Ground Instructor Ratings, crew resource management, airline airport analysis, military history, effects of privatization, etc.

AVN 3000 BUSINESS AND CORPORATE AVIATION (3 credits)

This course will provide a broad understanding of aspects related to the field of business and corporate aviation. Information that will be covered includes: the history of business and corporate aviation; regulations and associations; the value of using business aircraft; aircraft selection; the differences between corporate flight department, fractional ownership, and charter departments; insurance requirements; and safety and security issues.

Prerequisite(s)/Corequisite(s): AVN 1000 and Junior or Senior standing

AVN 3040 HUMAN FACTORS IN AVIATION SAFETY (3 credits)

The purpose of this course is to provide students with an understanding of human factors as it applies to pilots and administrators. Topics will include pilot physiological and psychological issues, work station design, crew resource management, and related public sector issues for managers.

Prerequisite(s)/Corequisite(s): AVN 1160

AVN 3050 UNMANNED AIRCRAFT SYSTEM DESIGN, DEVELOPMENT, AND MAINTENANCE (3 credits)

This course offers students theoretical knowledge and hands-on experience with small unmanned aircraft system design, development, and maintenance. Students will learn principles of UAS design, development, and maintenance, and will apply interdisciplinary knowledge to build small UAS.

Prerequisite(s)/Corequisite(s): AVN 2500. Not open to non-degree graduate students.

AVN 3060 WRITING IN AVIATION (3 credits)

This course will further develop the communication skills of aviation students through various forms of writing. Students will compose a research paper and other writing assignments.

Prerequisite(s)/Corequisite(s): ENGL 1160 and AVN 1000

AVN 3070 AIR TRAFFIC CONTROL (3 credits)

The purpose of this course is to introduce students to the Federal Aviation Administration (FAA) Air Traffic Control system. Elements and requirements of the course will include: basic air traffic control procedures for pilots, navigation aids, control tower operations, radar approach and departure regulations, and airport traffic control (ATC).

AVN 3090 AIRPORT ADMINISTRATION AND PLANNING (3 credits)

This course covers the nation's airspace design, navigation and air traffic systems and their effect on airport capacity. Additionally, the national airport system will be investigated as well as airport design and development parameters, fiscal processes, and management considerations. (Cross-listed with AVN 8095)

Prerequisite(s)/Corequisite(s): AVN 2050

AVN 3150 AVIATION LAW (3 credits)

The purpose of this course is to increase the student's knowledge of aviation law and regulations. Particular attention will focus on the American legal system; important legal concepts, regulators of the industry and international aviation law. Case studies will be discussed throughout the course. (Cross-listed with AVN 8155).

Prerequisite(s)/Corequisite(s): AVN 1000 and junior standing.

AVN 3190 CERTIFIED FLIGHT INSTRUCTOR THEORY (3 credits)

Provide the student with an understanding of the theories involved in flight instruction. Course will include extensive oral presentation of complex aeronautical information and use of the personal computer assisted training device. Students are expected to pass FAA Fundamentals of Instructing and FAA Flight Ground Instructor Knowledge tests. There is no flight training in this course.

Prerequisite(s)/Corequisite(s): AVN 2184 and SPCH 1110.

AVN 3194 CERTIFIED FLIGHT INSTRUCTOR I (2 credits)

This course consists of approximately 25 hours of flight training in flight instruction procedures required to obtain the FAA flight instructor certificate. Special Fees apply.

Prerequisite(s)/Corequisite(s): AVN 3190 (may enroll concurrently).

AVN 3200 COOPERATIVE EDUCATION IN AVIATION (1-6 credits)

This course will complement course work with a relevant professional work experience or practicum in aviation. The practicum/field experience may be a special project in an aviation organization to be coordinated by the instructor. Offered as a credit/no-credit course.

Prerequisite(s)/Corequisite(s): AVN 3060, aviation major, junior/senior standing, and instructor permission.

AVN 3304 CERTIFIED FLIGHT INSTRUCTOR II (2 credits)

This course consists of approximately 10 hours of flight training in instructing in instrument procedures and approaches in preparation for FAA certified flight instructor-instrument rating. Class is conducted off campus. Special fees apply.

Prerequisite(s)/Corequisite(s): AVN 3300 or concurrent enrollment.

AVN 3400 MULTI-ENGINE CERTIFICATION (2 credits)

Course consists of ground and flight training in multi-engine aircraft procedures. Student will meet all flight requirements for the FAA multi-engine rating. Training will include use of the Personal Computer Assisted Training Device. Class is conducted off campus. Special fees apply.

Prerequisite(s)/Corequisite(s): AVN 2184 or concurrent enrollment or instructor permission.

AVN 3500 RESEARCH METHODS IN AVIATION (3 credits)

An introductory research methods course focused on contemporary as well as historical aviation problems and topics, but from an investigative perspective. The primary focus will be the preparation of standard research documents and the use of traditional statistical methods to evaluate various data sources.

Prerequisite(s)/Corequisite(s): 60 hours of undergraduate credit and AVN 3060 completed or in progress.

AVN 3510 AEROSPACE SCIENCES (3 credits)

This introductory course will provide pre-service teacher candidates, aviation students, and students at large the opportunity for a science oriented general education course. The curriculum will be focused in the areas of earth and space science, geospatial technology, and aeronautics. Key topics for this course will include the geoscience practice of Geographic Information Systems, Global Positioning System, and the NASA Jet Propulsion Laboratory/ UNO designed Data-Slate remote sensing program. Also included will be space sciences focused solar system exploration, satellite technology, and astronautics. Students will engage in aeronautic science topics inclusive of the study of aerodynamics of flight, meteorological science and weather, and flight technology. All students will be provided opportunity to apply concepts of flight in the Aviation Institute's Advanced Simulation Facility.

AVN 3600 INTERNATIONAL AVIATION (3 credits)

This course examines global air transport and its impact on the development of the global economy. Lectures and readings will provide a solid foundation of historical knowledge about international air transport and its development in various countries, before exploring current policy debates about liberalization, global alliances, and other critical issues. (Cross-listed with AVN 8605)

Prerequisite(s)/Corequisite(s): AVN 2020

AVN 3700 TRANSPORTATION ANALYSIS (3 credits)

This course is an extension of introductory financial courses; special emphasis on service characteristics of air carriers. Review of airline revenue and expense streams, pricing and fares, fiscal market segmentation, and fleet planning. Focused approach to understanding the monetary forces that underlie the business practices of domestic and international passenger and cargo airlines.

Prerequisite(s)/Corequisite(s): ECON1200 or higher and junior standing

AVN 4000 INDEPENDENT RESEARCH IN AVIATION (1-3 credits)

The purpose of this course is to provide the aviation student an opportunity to complete an in-depth analysis of a specific aviation topic. Examples: aerodynamics, airports rates/charges analysis, cost-allocation for airside/landside, aviation marketing relating to aircraft manufacturing, airline promotion, flight component, off-airport subjects, comprehensive regional planning, environmental subject, etc.

Prerequisite(s)/Corequisite(s): Aviation major, senior standing, and written permission of the instructor.

AVN 4010 AERODYNAMICS AND AIRCRAFT PERFORMANCE (3 credits)

Provides the student with an understanding of the factors affecting aircraft performance during various phases of flight. Topics will include aircraft performance requirements outlined in the Federal Aviation Administration Regulations, use of performance charts and tables, runway airport analysis, and climb cruise descent performance.

Prerequisite(s)/Corequisite(s): AVN 1000, 2184, MATH 1320 or instructor permission.

AVN 4020 AIRCRAFT SYSTEMS (3 credits)

Provides the student with an understanding of systems employed on technologically advanced, sophisticated aircraft. Systems covered will include electrical, hydraulic, engines, flight control and pneumatic systems.

Prerequisite(s)/Corequisite(s): AVN 1000 and AVN 2184 or instructor permission.

AVN 4050 GENERAL AVIATION OPERATIONS (3 credits)

Organization and operation of general aviation facilities to include administration, aircraft maintenance considerations, flight line operations, and decision making.

Prerequisite(s)/Corequisite(s): AVN 1000

AVN 4060 ADVANCED AIR TRANSPORT FLIGHT OPERATIONS (3 credits)

The course will be a capstone event in the professional pilot sequence. Specific emphasis will be on the pre-flight planning and execution of air carrier flight operations. Additional instructional segments will cover regional and corporate flight operations.

Prerequisite(s)/Corequisite(s): AVN 4020 or instructor permission.

AVN 4080 AIRPORT SAFETY AND SECURITY (3 credits)

This course will explore the role of airports in relation to safety and security. Topics will include regulations, responsibilities, security issues, ramp safety, disaster preparedness, and emergency management. (Cross-listed with AVN 8086).

Prerequisite(s)/Corequisite(s): Junior standing and AVN 1000

AVN 4200 INTERNSHIP IN AVIATION (1-6 credits)

This course is designed to provide direct hands-on experience in the aviation industry for selected students. Students will be selected for internships competitively by a panel of Aviation Institute faculty and industry representatives from companies providing the internships. This experience will be in a full-time, preferably paid position in a highly structured environment using a syllabus designated by the faculty and industry committee.

Prerequisite(s)/Corequisite(s): AVN 3060, junior/senior standing, aviation major, instructor permission.

AVN 4500 ADVANCED UNMANNED AIRCRAFT SYSTEMS PROCEDURES (3 credits)

This course will provide students with scenario based training sessions that focus on emergency procedures for inflight operations, risk assessment and mitigation tactics, and advanced communications procedures.

Prerequisite(s)/Corequisite(s): AVN 2500. Not open to non-degree graduate students.

AVN 4900 SPECIAL TOPICS IN AVIATION (1-3 credits)

This course will discuss various topics in the Aviation Industry determined each time the course is offered. Possible topics include International Aviation, Current Issues, and Cockpit Resource Management along with other topics. (Cross-listed with AVN 8906)

Prerequisite(s)/Corequisite(s): AVN 1000 and junior standing

AVN 4990 AIR TRANSPORTATION (3 credits)

This course fulfills the Aviation Institute capstone projects for undergraduates. Lectures and readings will cover contemporary issues and problems in air transportation, as well as material related to research design and implementation. (Cross-listed with AVN 8996).

Prerequisite(s)/Corequisite(s): AVN 3700, junior or senior standing, or instructor permission.

Aviation, Bachelor of Science

Bachelor of Science in Aviation, Air Transport Administration Concentration:

The curriculum includes the University of Nebraska at Omaha's (UNO) general education requirements, departmental requirements, a core of aviation classes and specialized courses in air transport administration. All students in a degree program in the aviation department must meet the university general education requirements. Additional information on these requirements can be found in this catalog and on the University General Education website (<https://www.unomaha.edu/general-education/>). Please contact an academic advisor for recommended choices for the major. Certain majors/programs in the Aviation Institute require specific foundational coursework that may also count for General Education requirements. For further information and details, contact an academic advisor.

Bachelor of Science in Aviation, Professional Flight Concentration:

The curriculum includes the UNO's general education requirements, departmental requirements, a core of aviation classes and specialized courses in professional flight. All students in a degree program in the aviation department must meet the university general education requirements. Additional information on these requirements can be found in this catalog and on the University General Education website (<https://www.unomaha.edu/general-education/>). Please contact an academic advisor for recommended choices for the major. Certain majors/programs in the Aviation Institute require specific foundational coursework that may also count for General Education requirements. For further information and details, contact an academic advisor.

Bachelor of Science in Aviation, Unmanned Aircraft Systems Operations Concentration:

The curriculum includes the UNO's general education requirements, departmental requirements, a core of aviation classes and specialized courses in unmanned aircraft systems. All students in a degree program in the aviation department must meet the university general education requirements. Additional information on these requirements can be found in this catalog and on the University General Education website (<https://www.unomaha.edu/general-education/>). Please contact an academic advisor for recommended choices for the major. Certain majors/programs in the Aviation Institute require specific foundational coursework that may also count for General Education requirements. For further information and details, contact an academic advisor.

Requirements

A minimum of 120 credit hours is required for a Bachelor of Science in Aviation. Thirty of the last 36 hours must be courses taken from the University of Nebraska at Omaha (UNO). Registering for courses without having taken the stated prerequisites could result in administrative withdrawal.

To obtain a BSA, a student must fulfill the University, College, and Program requirements. Some courses may satisfy requirements in more than one area, but credit is awarded only once. Grades of C- or better are required in the University General Education courses and in the program, major and concentration hours.

- 40 to 46 hours of University General Education courses
- 19 hours of Program Requirements, courses can meet general education requirements
- 24 hours of Major Requirements
- 27-43 hours in required concentration
- Elective hours as needed to reach 120 total credit hours

TOTAL HOURS: 120

Writing in the Discipline Courses:

The writing in the discipline course in aviation is:

¹ Student could potentially test out of Math 1220 or based off testing need a lower level math course.

² It is highly recommended that a student consider a Minor to fill open Electives

³ Aviation Electives are classes a student chooses within the aviation department based on their specified interests. Each Administration student must complete 6 credit hours.

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

Criminology and Criminal Justice

Mission

The School of Criminology and Criminal Justice offers high quality educational programming to support students in gaining the knowledge and skills necessary for a successful career in criminology and criminal justice or related social services fields. Students can participate in scholarly and applied research projects that involve collaborative partnerships with local and federal agencies. Students learn about emerging technologies as a means of improving and advancing criminology and criminal justice. We provide opportunities for students to connect with professionals in the classroom as well as through extracurricular events. Students are strongly

encouraged to complete an internship to gain field experience prior to their graduation.

Student Learning Outcomes

- Demonstrate mastery of core content areas in criminology and criminal justice.
- Locate, integrate and use information from varied sources to effectively communicate in writing and other mediums.
- Apply specialized knowledge through field-based learning experiences, civic and/or community engagement activities, and/or policy analysis.
- Explain diverse positions, including those representing different cultural, economic, and geographic interests in the context of criminology and criminal justice.

Academic Advising

All CRCJ majors are strongly advised to schedule an appointment with our advising staff each semester. Advisors provide assistance with degree planning and course scheduling. They are also available to answer questions your major/minors, academic performance, and SCCJ policies or procedures. Omaha students may schedule an advising appointment via MavTRACK (<https://www.unomaha.edu/my/advising-system-mavtrack.php>) or by calling 402.554.2610. Lincoln students can make an appointment via MYPLAN (<https://myplan.unl.edu/welcome-myplan/>) or by calling 402.472.3677.

Transferring to Criminology and Criminal Justice

Students wishing to transfer from another institution or department within the University of Nebraska must have a 2.0 cumulative grade point average to be admitted into the criminology and criminal justice program. Contact the school for more details on the transfer policy.

Degree Requirements

- A minimum of 30 of the last 36 semester credit hours must be earned by the student in residence in the University of Nebraska System. (Summer independent study courses are not considered in residence.)
- At least 21 hours of criminal justice must be taken at the University of Nebraska, on either the Omaha or Lincoln campus.
- A minimum of 33 credit hours must be earned in upper division (3000/4000-level) courses. At least 21 of these upper division hours must be taken in the School of Criminology and Criminal Justice courses, and 12 hours of 3000/4000 level courses are required in a concentration/minor (see course requirements section).
- A maximum of 12 credit hours of departmental independent study or internship courses may be applied toward the BCCJ degree. Of these, no more than six hours can come from one department and no more than six hours from another institution.
- A maximum of 30 hours from any one department may be applied toward the BCCJ degree.
- A maximum of 24 hours may be taken pass/no pass and none of the 39 hours required for the criminology and criminal justice major may be taken pass/no pass (excluding CRCJ 3970).
- Six hours of credit for basic military training may be applied to the BCCJ degree. Credit from an institution that is not regionally accredited cannot be applied to the BCCJ degree.

Fast Track

The School of Criminology and Criminal Justice has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BS in Criminology and Criminal Justice desiring to pursue either an MA or MS in Criminology and Criminal Justice.
- Students must have completed no less than 90 undergraduate credit hours
- Students must have a minimum undergraduate GPA of 3.5
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their academic advisor to register for the graduate courses
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program but successful completion of the graduate courses will be a significant consideration in admission to the MA or MS in Criminology and Criminal Justice program.
 - The admit term must be after the completion term of the undergraduate degree.

Course Information:

Eligible students may enroll in any 8000 level CRCJ course approved by the SCCJ program advisor.

Contact

The UNO School of Criminology and Criminal Justice offers courses on the Omaha and Lincoln campuses. The Omaha office is located in the College of Public Affairs and Community Service Building (CPACS), Room 218. Our office can be reached by phone at 402.554.2610. The Lincoln office is located in Nebraska Hall, Room 310 and can be reached by phone at 402.472.3677. Events for both campus locations are regularly posted on our Website (<http://www.unomaha.edu/college-of-public-affairs-and-community-service/criminology-and-criminal-justice/>), Facebook page #unosccj, Twitter feed @unosccj, and Instagram @unosccj1.

Degrees Offered

- Criminology & Criminal Justice (BCCJ), Bachelor of Science (p. 702)

**Criminal justice courses are offered on the Omaha and Lincoln campuses of the University of Nebraska. The BCCJ degree can be earned in its entirety on the Lincoln campus; however, the degree is conferred by the University of Nebraska at Omaha.

Minors Offered

- Criminology & Criminal Justice Minor (p. 704)
- V (p. 704)ictimology and Victim Services Minor (p. 704)

If you seek a career such as a police officer, DEA agent, probation officer or correctional counselor, a Bachelor of Science degree in Criminology and Criminal Justice is a key step towards turning that aspiration into reality. The CRCJ program at UNO provides undergraduates an excellent foundation in the theories of crime and the criminal justice response to crime while also introducing students to criminological research methods.

Law Enforcement

- Alcohol, Tobacco, & Firearms (ATF)
- Drug Enforcement Agency (DEA)
- FBI Agent
- Federal Protective Service Officer
- IRS Agent
- Military Police
- Postal Inspector
- Secret Service Agent
- United States Marshal
- Nonprofit Management
- Animal Control
- Police Officer
- Arson Investigation
- Campus Police
- Deputy Sheriff
- Fish & Game Officer
- Highway Patrol

Probation

- Diversion Program Coordinator
- Pretrial Services Officer
- Probation Officer (Juvenile/Adult)

Corrections

- Corrections Counselor
- Corrections Officer
- Juvenile Corrections
- Parole Officer (Juvenile/Adult)
- Prerelease Counselor
- Recreation Leader
- Warden

Courts/Law

- Bailiff
- Court Administrator
- Court Reporter
- Investigator for law offices
- Lawyer
- Legal Researcher
- Paralegal/Legal Assistant

Homeland Security

- Customs Inspector
- Emergency Management
- Coordinator
- Federal Air Marshal
- FEMA Positions
- Intelligence Analyst

- Investigative Specialist
- Immigration Inspector
- Linguists
- Surveillance Specialist
- TSA Officer
- Border Patrol Agent

Private Security

- Security Director
- Loss Prevention Specialist
- Private Security Officer
- Credit Investigator
- Bank Fraud Investigator
- Legal Researcher

Juvenile Services

- Aftercare Counselor
- Child Protective Services Worker
- Detention Counselor
- Group Home Worker
- Rehabilitation Coordinator
- Runaway Counselor
- School Attendance Officer
- Youth Advocate

Victim Services

- Caseworker
- Child Support Agency Worker
- Crisis Center Coordinator
- Crisis Counselor
- Domestic Violence
- Advocate/Counselor
- Social Worker
- Victim/Witness Service Coordinator

Research

- Legislative Assistant
- Professor
- Research Analyst

Course Descriptions (Per Subject)

CRCJ 1010 SURVEY OF CRIMINAL JUSTICE (3 credits)

This course is designed to provide an overview of the justice process and the criminal justice system in general. Concepts of crime and justice are discussed as well as the rights of individuals in a democratic society. The law enforcement, judicial, juvenile justice, and corrections systems are explored.

Distribution: Social Science General Education course

CRCJ 2030 POLICE AND SOCIETY (3 credits)

This course is designed to explore the role of the police in American society. Attention is given to the origins of policing, the nature of police organizations and police work, and patterns of relations between the police and the public. The values of a democratic society as they affect the law enforcement role are discussed.

Prerequisite(s)/Corequisite(s): CRCJ 1010, or permission

CRCJ 2110 CRIMINAL COURT SYSTEM (3 credits)

The purpose of this course is to give you a greater understanding of the U.S. criminal courts system. In this course we will cover topics such as judges, lawyers, litigants, criminal and civil procedure, state and federal courts, and theories of judicial decision making. We will analyze these concepts, actors and institutions from a variety of perspectives. The course will include discussions of the constitutional rules and case law as they apply to the courts process.

Prerequisite(s)/Corequisite(s): CRCJ 1010, or permission

CRCJ 2210 SURVEY OF CORRECTIONS (3 credits)

This course provides an overview of the American criminal justice system correctional responses to criminal offending. We explore the history, philosophy, and law underlying corrections. We will focus on understanding risks and needs of offenders, treatment options and types of correctional sanctions in the U.S. These include, but are not limited to probation, jail, intermediate sanction, prison and the death penalty.

Prerequisite(s)/Corequisite(s): CRCJ 1010, or permission

CRCJ 2220 COMMUNITY-BASED CORRECTIONS (3 credits)

This course is designed to familiarize the student with the most recent developments in community-based corrections. Discussion will focus on the issues related to implementation, management, effectiveness and challenges of community-based programs. Students will be provided a broad overview of the structure and functions of Community-based Corrections. By the end of the course, students should expect to understand the best practices in community corrections.

Prerequisite(s)/Corequisite(s): CRCJ 1010, or permission

CRCJ 2410 CRIMINAL PROCEDURE (3 credits)

This course deals with the legal aspects of the investigation, arrest processes, and criminal trial proceedings, as well as the rules governing the admissibility of evidence in criminal court proceedings.

Prerequisite(s)/Corequisite(s): CRCJ 1010, or permission

CRCJ 2510 RESEARCH METHODS (3 credits)

The primary goal of this course is to facilitate your growth as both consumers and producers of research. We will explore a variety of methodologies (e.g., survey research/self-report, official stats/secondary data, quasi-experimental design, etc.) used in criminological and criminal justice research. Further, we will evaluate these methodologies within the context of design concerns such as: research purpose, operationalization, validity, reliability, and ethics.

Prerequisite(s)/Corequisite(s): CRCJ 1010, or permission

CRCJ 3000 APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR (3 credits)

A course on the use of data and statistical methods to explore and make inferences about society, while critically considering the influence of context and the powers and limitations of quantitative evidence. (Cross-listed with PA 3000, SOWK 3000).

Prerequisite(s)/Corequisite(s): ACT of 19 or higher or successful completion of MATH 1120, MATH 1130 or MATH 1210 with a C- or higher

CRCJ 3010 PHILOSOPHY OF CRIMINAL JUSTICE (3 credits)

This course is a philosophical examination of justice and its administration. It provides the student with a richer understanding of the conceptual foundations of justice.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 3100 WRITING FOR CRIMINAL JUSTICE (3 credits)

This is a writing course for all Criminology and Criminal Justice majors. Students will learn how to write effective cover letters, incident reports, position papers, and executive summaries.

Prerequisite(s)/Corequisite(s): ENGL 1150, ENGL 1160, and CRCJ 1010. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

CRCJ 3310 CRIMINAL LAW (3 credits)

This course will examine the development of the criminal law, the elements and types of criminal offenses, as well as principles of criminal culpability.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 3350 CRIMINOLOGY (3 credits)

This course is about facts and frameworks. The facts that we are interested in are facts about criminal behavior and the frameworks are theories that organize these facts in a coherent fashion. As we learn about criminological facts and the theories that organize these facts we will pay attention to research so that we understand how these facts are developed and how these theories are tested. We will also try to draw out the policy implications of the various facts and theories that we address.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 3370 JUVENILE DELINQUENCY AND JUVENILE JUSTICE (3 credits)

This course has been designed to provide and expose students to a broad base of information about juveniles, youth in need of supervision, youth crime and how these areas are handled within the juvenile justice system in the United States. This course will examine the juvenile justice system and the role of family, peers, school, courts, law enforcement, corrections, and the broader community as it pertains to the life of a juvenile.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 3380 RACE, ETHNICITY, AND CRIMINAL JUSTICE (3 credits)

This course provides a survey of minority groups and their experiences with regard to crime and criminal justice in the United States. This course will focus on racial and ethnic minorities as victims, as offenders, as defendants, and as criminal justice professionals.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

Distribution: U.S. Diversity General Education course

CRCJ 3390 WOMEN, CRIME AND JUSTICE (3 credits)

This course focuses on women's experiences in the criminal justice system. The course will examine women's experiences as victims of crime, as offenders, as prisoners, and as criminal justice professionals. (Cross-listed with WGST 3390)

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

Distribution: U.S. Diversity General Education course

CRCJ 3410 LAW AND THE BLACK COMMUNITY (3 credits)

Law and the Black Community provides an in-depth examination of the racialized American legal process as it pertains to and affects African Americans in the U.S. From the formation of the U.S. Constitution to present day, this course analyzes intersections of race, law, politics and culture, and explores the administration of justice and Black experiences through a critical legal perspective. (Cross-listed with BLST 3410) (<https://catalog.unomaha.edu/search/?P=BLST%203410>).

Prerequisite(s)/Corequisite(s): BLST 1000 OR CRCJ 1010 OR Junior standing OR instructor permission.

CRCJ 3970 INTERNSHIP IN CRIMINAL JUSTICE (3 credits)

A minimum of 160 hours of experiential learning with criminal justice agencies. The internship program integrates learning with service. It allows students to learn occupational skills and competencies and develop professional relationships with organizations involved in the criminal justice sector, at the same time, students will apply criminological theories to their work. The internship prepares students to demonstrate the integration of professional ethics and values, knowledge and skills, and the capacity to think critically and constructively.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, 75 credit hours completed, GPA of 2.5, and permission of instructor.. Not open to non-degree graduate students.

CRCJ 4000 MENTAL HEALTH & CRIMINAL JUSTICE (3 credits)

This course focuses on the intersection of individuals with mental health, substance abuse, and/or severe and persistent mental illness diagnoses and the criminal justice system. Students will examine how individuals become involved in the criminal justice system and how the criminal justice system and other social services respond to their involvement.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4030 CRIMINAL JUSTICE ORGANIZATION AND ADMINISTRATION (3 credits)

This course covers contemporary concepts, principles and theories of organization and administration as they relate to criminal justice agencies. The historical development and modern principles of policy administration are also contrasted. The primary goal of this course is to identify the basic structure and function of criminal justice organizations, while paying particular attention to how criminal justice organizations are managed and led.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4060 CRIMINAL JUSTICE ETHICS (3 credits)

This course is designed to examine ethical issues that arise in the three major areas of criminal justice: police; courts; and corrections. The course explores general philosophical theories of ethics as well as Codes of Ethics that operate to control the institutional and personal behavior of police, court, and correctional systems.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4110 BIOSOCIAL CRIMINOLOGY (3 credits)

This course is designed to acquaint students with the biological, genetic, and environmental origins to criminal and antisocial behavior. Toward this end, we will examine an array of topics including personality development, brain functioning, and the biosocial basis of crime. Discussion will also center on the manner in which various environmental influences operate

through biological mechanisms to influence criminal behavior across different stages of the life course. Particular emphasis will be placed on using empirical-based research to understand the etiology of antisocial and criminal conduct and issues pertaining to the criminal justice system.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4130 SOCIOLOGY OF DEVIANT BEHAVIOR (3 credits)

This course is designed to investigate the etiology of many forms of norm-violating conduct. Emphasis will be placed on rule-breaking behavior as defined in the criminal statutes. (Cross-listed with CRCJ 8136).

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4210 INSTITUTIONAL CORRECTIONS (3 credits)

The course presents an in-depth analysis of the history and operation of prisons and jails in the United States and other countries. The course covers the management and operation of prisons and jails from the perspective of both employees and incarcerated persons.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4400 DOMESTIC VIOLENCE (3 credits)

This course examines the criminal justice system response to domestic violence/intimate partner violence. A focus on the interactions between battered victims and components of the criminal justice system, as well as the role of the community in addressing and preventing this violence serves as the foundation for this course. Students will also gain insight into factors contributing to the incidence of intimate partner violence, explore the background/history of domestic violence.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4410 VICTIMOLOGY (3 credits)

This course has been taught several times as a special topics course with good enrollment each time. Victimology is a necessary component of a comprehensive Criminology & Criminal Justice curriculum. Whereas criminology is the study of criminal behavior and criminal justice is the study of the system's response, both interact with victims. That is, most crimes have victims and it is important for students to understand the characteristics of victims and how the criminal justice system responds to victims.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4420 CHILD ABUSE AND NEGLECT (3 credits)

This course addresses issues related to child abuse and neglect investigation, intervention and prevention efforts facilitated through criminal justice system processes. Course content discusses the history of child maltreatment, definitional challenges, statistical trends, physical and behavioral indicators, mandatory reporting, investigative processes, intervention strategies and prevention efforts.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4230 HUMAN TRAFFICKING (3 credits)

This course is designed to provide students with a systematic introduction to the study of human trafficking. Students will learn about what constitutes human trafficking, theories of victimization as they apply to trafficking,

debates about the language and definitions surrounding sex trafficking and prostitution. Students will discuss the prevalence, predictors, and consequences of various forms of trafficking and critically assess efforts related to measurement, intervention, and prevention.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4440 VICTIMS' RIGHTS AND SERVICES (3 credits)

This course focuses on the experiences of victims of crime through the criminal justice system, from reporting the crime to case closure. Students will learn about the types of victim services and advocacy throughout various points of the criminal justice system (e.g., police, courts, corrections), as well as about the history of victims' rights and the development of victim services over time.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4510 VIOLENCE (3 credits)

This course is a survey of the nature and extent of violence. The focus is on patterns of violence across social groups, the causes and correlates of violence and violent behavior, and programs/policies geared toward violence prevention and reduction. Also of interest is the relationship between theory and violence research. (Cross-listed with CRCJ 8516).

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4520 DRUGS AND CRIME (3 credits)

Drugs and Crime is an introduction course to the major facts and issues concerning criminal justice and drug-taking behavior in America. It is specifically designed to provide the means for understanding (1) the multiple challenges that drug abuse brings to our society, (2) the drug control policies we have enacted to meet those challenges, (3) the range of international and domestic law enforcement efforts and drug control strategy, and (4) the systems of criminal justice that have been established to deal with the prosecution of drug law offenders.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4550 GANGS AND GANG CONTROL (3 credits)

This course will examine criminal street gangs, including these gangs' members, activities, underlying dynamics, and the roles that drugs and sex trafficking play in gang activity. We will consider the history and proliferation of gangs in the United States, common characteristics of U.S. gangs across different regions, how gangs obtain their power and the connection between street gangs and prison gangs. Lastly, we will evaluate multiple methods employed by communities and law enforcement to control and defeat criminal street gangs.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4560 HOMICIDE INVESTIGATIONS (3 credits)

This course is designed to present an overview of the crime of homicide. Attention is given to homicide data, theories of why homicides occur, types of homicide, investigating/solving homicides, prosecuting homicide cases, and the impact on co-victims and society as a whole. Students will use critical thinking skills while exploring various investigative techniques.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4710 COMPARATIVE CRIMINAL JUSTICE SYSTEMS: ENGLAND (3 credits)

This is a specialized course which provides a comparison of the criminal justice systems of the United States and the United Kingdom. The design of the course allows for an exploration of how the American system developed from the British system and why social and cultural factors influenced the differences/similarities in their development.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours and instructor permission

CRCJ 4750 INTERNATIONAL CRIMINOLOGY AND CRIMINAL JUSTICE (3 credits)

This course analyzes the dynamics of criminality and the social response to criminality across countries. Differences in crime and justice between developed and developing countries and between socialist and capitalist nations are emphasized.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

Distribution: Global Diversity General Education course

CRCJ 4760 TERRORISM (3 credits)

This course is designed to assist the student in developing an understanding of terrorism as a political crime. It includes an examination of the social, political and psychological aspects of this behavior.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

Distribution: Global Diversity General Education course

CRCJ 4770 ORGANIZED CRIME (3 credits)

A course designed to trace the origins and historical development of the activities that have come to be known as organized crime. These crimes are some of the most dangerous to American society and range from the commonly known offenses of gambling, shylocking and narcotics trafficking to the more subtle and sophisticated, less understood but equally serious, crimes of extortion, commercial bribery and political corruption.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4780 WHITE COLLAR CRIME (3 credits)

This course is designed to examine those illegal acts committed by non-physical means and by concealment or guile, to obtain money or property, to avoid the payment or loss of money or property, or to obtain business or personal advantage.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4800 SPECIAL TOPICS (1-3 credits)

This course is a topical approach that explores various aspects of Criminology and Criminal Justice. Topics and disciplines will vary from term to term. Course description will be announced in advance. This course will be devoted to the exploration and analysis of contemporary problems in the criminal justice system. On occasion the course will be offered in three one-credit hour modules and students may register for one, two or three credit hours.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4950 INDEPENDENT STUDY (1-3 credits)

Faculty-guided research in an area of mutual interest to the student and his instructor. Students are responsible for selecting the area of inquiry prior to contacting the instructor. May be repeated to a maximum of six hours.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4960 ISSUES IN CRIME AND JUSTICE (3 credits)

This is a capstone course that will focus on contemporary issues of crime and justice. It will examine the justice process and the general operations of the criminal justice system. Concepts of crime and deviance, rights and discrimination in a democratic society will be reviewed and critiqued against the backdrop of contemporary issues. The law enforcement, judicial, juvenile justice, and corrections subsystems will be explored, and a number of reform proposals presented and considered.

Prerequisite(s)/Corequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; or permission

CRCJ 4970 SENIOR HONORS PROJECT/THESIS (3-6 credits)

An independent research project supervised by School faculty. The senior honors project must be approved by the CPACS Honors Coordinator.

CRCJ 4990 APPLIED SENIOR ASSESSMENT (1 credit)

This course is intended to give students an opportunity to reflect on their curricular and personal development during their undergraduate career. Students will have the opportunity to develop several career development artifacts. It is also used as a tool to help monitor progress toward the SCCJ's student learning outcomes (SLOs) and identify needed changes.

Prerequisite(s)/Corequisite(s): Students must register for CRCJ 4990 in the term in which they plan to graduate. Not open to non-degree graduate students.

Criminology & Criminal Justice, Bachelor of Science

The Bachelor of Science in Criminology and Criminal Justice (BCCJ) degree requires the completion of 120 credit hours with a cumulative grade point average (GPA) of 2.0. Core major requirements are guided by a series of student learning outcomes and include criminology and criminal justice electives.

Student Learning Outcomes

- Demonstrate mastery of core areas in criminology and criminal justice.
- Locate, integrate and use information from varied sources to effectively communicate in writing and other mediums.
- Apply specialized knowledge through field-based learning experiences, civic and/or community engagement activities, and/or policy analysis.
- Explain diverse positions, including those representing different cultural, economic, and geographic interests in the context of criminology and criminal justice.

Code	Title	Credits
UNO General Education Requirements		40
CRCJ Courses Required for Major		43
	Student Learning Outcome 1 (15 credits)	
	Student Learning Outcome 2 (6 credits)	
	Student Learning Outcome 3 (6 credits)	
	Student Learning Outcome 4 (4 credits)	
	CRCJ Electives (12 credits)	

Area of Concentration or Major	18
General Electives	19

Requirements**1. UNO General Education Requirements (40 credits).**

All Bachelor of Science Students in the School of Criminology and Criminal Justice must complete the **UNO General Education Curriculum**. Some general education may overlap with the CRCJ requirements - see your advisor for more details.

2. CRCJ Courses Required for Major (43 credits)

The CRCJ major requirements are separated out under a series of student learning outcomes. A minimum grade of "C-" is required in courses used to fulfill the 43-credit CRCJ requirement.

SLO 1 (15) + SLO 2 (6) + SLO 3 (6) + SLO 4 (4) + CRCJ Electives (12) = 43 credits

Code	Title	Credits
SLO 1: Demonstrate mastery of core areas in criminology and criminal justice (15 credits).		
CRCJ 1010	SURVEY OF CRIMINAL JUSTICE	3
Select a minimum of 6 credits of the following:		6
CRCJ 2030	POLICE AND SOCIETY	
CRCJ 2110	CRIMINAL COURT SYSTEM	
CRCJ 2210	SURVEY OF CORRECTIONS	
CRCJ 2220	COMMUNITY-BASED CORRECTIONS

CRCJ 3100	WRITING FOR CRIMINAL JUSTICE ^{Counts} towards UNO Gen Ed's Writing in the Discipline	3

Code	Title	Credits
SLO 3: Explain diverse positions, including those representing different cultural, economic, and geographic interests in the context of criminology and criminal justice (6 credits). These are required in addition to the UNO general education diversity requirements		
Select a minimum of 6 credits of the following:		6
CRCJ 3390	WOMEN, CRIME AND JUSTICE	
CRCJ 3380	RACE, ETHNICITY, AND CRIMINAL JUSTICE	
CRCJ 3410	LAW AND THE BLACK COMMUNITY	
CRCJ 4750	INTERNATIONAL CRIMINOLOGY AND CRIMINAL JUSTICE	
CRCJ 4760	TERRORISM	

Code	Title	Credits
SLO 4: Apply specialized knowledge through field-based learning experiences, civic, and/or community-engaged activities, and/or policy analysis (4 credits).		
Select a minimum of 3 credits of the following:		3

CRCJ 3970	INTERNSHIP IN CRIMINAL JUSTICE Students may take up to 6 credits of internship	
CRCJ 4710	COMPARATIVE CRIMINAL JUSTICE SYSTEMS: ENGLAND	
CRCJ 4960	ISSUES IN CRIME AND JUSTICE	
*OR any CRCJ course with a service-learning designation		
CRCJ 4990	APPLIED SENIOR ASSESSMENT	1

Code	Title	Credits
CRCJ Electives		
3000/4000 CRCJ Courses		12

To enroll in upper-level CRCJ coursework, you must first complete CRCJ 1010, ENGL 1160 and 45 credit hours

3. Area of Concentration or Minor (18 credits)

The area of concentration must contain at least 18 credit hours chosen in consultation with the CRCJ academic adviser. At least 12 of the 18 credits must be taken at the 3000/4000 level. In certain instances, a minor can fulfill the area of concentration requirement. Please meet with a CRCJ academic adviser for specific guidelines.

4. General Electives (19 credits)

The remaining 19 hours of coursework can be completed with courses of the student's choosing, in consultation with an academic advisor.

Common Substitutions

The following sociology courses may be substituted for equivalent criminal justice courses and applied toward the 39 hour major: SOC 3510 for CRCJ 2510 and SOC 4130 for CRCJ 4130. Further, all students must take a writing discipline course within their major. CRCJ 3100 fulfills this requirement but does not count towards the 43 required criminal justice course requirement. ENGL 2400, ENGL 3980 or MKT 3200 may be substituted for CRCJ 3100. Statistics is required for the CRCJ major. PSYC 3130, SOC 2130 or STAT 1530 may be substituted for CRCJ 3000. Credit toward the degree will not be allowed for multiple courses which are considered equivalent.

Total Credits **120**

- 1 A score of "ENGL 5" on the English Placement Exam is needed in order to enroll in ENGL 1150
- 2 Natural & Physical Science courses must be selected from this list: <https://www.unomaha.edu/general-education/approved-courses/natural-and-physical-sciences.php>
- 3 Social Science courses must be selected from this list: <https://www.unomaha.edu/general-education/approved-courses/social-sciences.php>
- 4 CMST 1110 or CMST 2120 may be taken towards the Public Speaking Requirement
- 5 Humanities & Fine Arts courses must be selected from this list: <https://www.unomaha.edu/general-education/approved-courses/humanities-and-fine-arts.php>
- 6 Math ACT 0-18 must take MATH 1120 or MATH 1130, MATH ACT 19+ may take an elective
- 7 Statistics requires Math ACT 19+ or completion of MATH 1120 or MATH 1130
- 8 ENGL 2400, ENGL 3980 or MKT 3200 may be substituted for CRCJ 3100
- 9 An area of concentration or a minor is required for all CRCJ majors. The area of concentration must contain at least 18 credit hours chosen in consultation with the CRCJ academic advisor
- 10 Select any courses in the 3000 or 4000 levels of CRCJ for CRCJ 3000/4000
- 11 CRCJ 4999 must be taken during graduating semester

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

Under Construction

Criminology & Criminal Justice Minor

Requirements

The requirements to earn a minor in criminology and criminal justice will consist of a minimum of 18 credit hours to include:

Code	Title	Credits
CRCJ 1010	SURVEY OF CRIMINAL JUSTICE	3
Select a minimum of two of the following:		6
CRCJ 2030	POLICE AND SOCIETY	
CRCJ 2110	CRIMINAL COURT SYSTEM	
CRCJ 2210	SURVEY OF CORRECTIONS	
CRCJ 2220	COMMUNITY-BASED CORRECTIONS	

Select a minimum of 9 credit hours of upper level (3000/4000) criminology and criminal justice courses (excluding CRCJ 3000).

An overall "C" average in courses applied to the minor is required and all courses applied to the minor must be taken for letter grade (not CR/NC). In addition, all nine credit hours of upper division course work must be taken in residence at the University of Nebraska.

Victimology and Victim Services Minor

Code	Title	Credits
CRCJ 4410	VICTIMOLOGY	3
CRCJ 4440	VICTIMS' RIGHTS AND SERVICES	3
CRCJ 4000	MENTAL HEALTH AND THE CRIMINAL JUSTICE SYSTEM	3

Electives - Victimology courses (select 2) - Limit non-SCCJ courses to 3 hours **6**

CRCJ 3390	WOMEN, CRIME AND JUSTICE	
CRCJ 4400	DOMESTIC VIOLENCE	
CRCJ 4420	CHILD ABUSE AND NEGLECT	
CRCJ 4510	VIOLENCE	
CRCJ 4430	HUMAN TRAFFICKING	

CRCJ 4450	SEXUAL VIOLENCE
SOWK 4830	CRISIS INTERVENTION
SOWK 4620	TRAUMA AND RESILIENCE
SOWK 4640	SOCIAL WORK IN CHILD WELFARE
SOWK 4650	SOCIAL WORK IN MENTAL HEALTH

Total Credits**15**

Division of Continuing Studies

Division of Continuing Studies

For over 80 years, the Division of Continuing Studies (DCS) has been dedicated exclusively to the needs of adult and contemporary learners by *meeting students where they are*. DCS works to elevate the adult student voice across the institution to foster a culture of inclusion. Although the higher education landscape has changed, our core beliefs and guiding principles have not. Since our beginning, we've worked to raise awareness of the characteristics and circumstances of adult learners, illustrate the value that our multigenerational students bring to UNO, and provide opportunities for undergraduate degree attainment that honors their unique and diverse needs.

DCS was founded with an entrepreneurial spirit and has sustained a culture of resilience, adaptability, and innovation. The nontraditional design of our unit and degree program is what has allowed us, and in turn, our students, to thrive. Our expertise is in serving the needs of adult and contemporary learners. Our commitment is to helping our students realize their academic goals by honoring their unique needs and circumstances. Our passion is in advocating for a diverse population of learners who do not fit the first-time, full-time mold for whom much of higher education has been designed.

Our Program

We offer one degree with multiple Concentrations. The Bachelor of Multidisciplinary Studies (BMS) degree program is available online, on-campus, or through a combination of online and on-campus classes. Awarded to over 26,000 students since 1951, it is one of the nation's oldest multidisciplinary degrees and is part of UNO's longstanding, rich tradition of serving military and veteran students.

Campus Locations/Services

UNO Campus Location

DCS is located on the second floor of the College of Public Affairs and Community Service (CPACS 207) on UNO's Dodge Street campus. This location serves as the headquarters of our operations. In order to provide high touch services to our students and to accommodate their busy lives, students are able to meet with staff over the phone, online, and in person. In addition to the normal 8-5 weekday business hours, students are able to meet with our professional advisors in the evening, three nights per week.

Offutt Air Force Base

A branch of DCS is located at Offutt AFB in Building C, Room 222. UNO/DCS at Offutt, in partnership with the Offutt AFB Education Office, offers a wide array of services to increase educational opportunities for active duty military, as well as the larger Offutt AFB community. DCS also oversees the testing center at Offutt, offering CLEP, DSST, and Accuplacer proctoring services. The testing center is located in Building C, Room 204.

Student-Centered Service

Through a holistic approach to student success, DCS works to support, empower and advocate for the needs of adult and contemporary learners. DCS practices an assigned advising model in order to build relationships and offer personalized guidance to students from pre-admission exploration through graduation celebration. Our students take varied pathways and

thus require individualized attention to create a smooth transition through their University experience.

Civility Statement

Student learning is a priority in the Division of Continuing Studies (DCS). We value the inherent worth and dignity of every person, and work to foster a community of mutual respect. We believe that in order to achieve these ideals, all DCS students are expected, while in the role of student or representative of the University, to exhibit, and practice civil behaviors that exemplify:

- Respecting faculty, staff, fellow students, guests, and all University property, policies, rules, and regulations;
- Taking responsibility for one's choices and actions;
- Accepting the consequences of one's inappropriate choices and actions;
- Communicating in a professional and courteous manner in all forms, and all times, whether verbal, non-verbal, or written.

Behavior that is contradictory to the above and to the standards outlined in the UNO Student Code of Conduct (p. 35) will be taken seriously and appropriately reported.

Goals

DCS provides educational experiences, both curricular and co-curricular, for students to develop and enhance the skills, abilities, and perspectives to be self-directed, lifelong learners. DCS supports holistic growth and development; shaping the contribution our students and graduates make to their lives, their profession, and to society.

The following [Program Goals & Graduate Expectations](#) guide our programs and services:

- To ACT Responsibly
- To COMMUNICATE Effectively
- To CONNECT Meaningfully
- To LEARN Continuously
- To THINK Independently

Student Groups

Alpha Sigma Lambda Honor Society

Contact Information

- Main Campus | CPACS 207 | 402.554.2370 | unodcs@unomaha.edu
- Offutt Air Force Base | Building C | Room 222 | 402.595.2371 | unooffutt@unomaha.edu

Admission Requirements

The minimum age for admission to the Division of Continuing Studies is normally 21 years of age. However, students under the age of 21 pursuing an undergraduate degree who do not meet the definition of a "traditional" college student may also be eligible for admission to the BMS degree program. Examples may include military-affiliated students; students who are on the path to an alternate UNO academic degree/department/college; and students pursuing an area of study not represented by another UNO degree program.

In order to be considered for admission to DCS, applicants must submit the following:

- Completed UNO application for admission
- Application fee (applicants may request a fee waiver)
- Official high school transcript or high school equivalency examination (GED)
- Official transcripts from post-secondary institutions (colleges and/or universities, including CCAF and DLJ)

Although not required at the time of application, we recommend that students also submit documentation of credit for prior learning for a comprehensive credit evaluation. These documents may demonstrate college-level learning outside of the traditional classroom and may shorten the time to degree completion. Documents include:

- Official standardized examination scores (e.g., CLEP, DSST)
- Military training and education transcripts (Joint Services Transcript)
- Official transcripts from nationally accredited institutions
- Transcripts documenting evaluated non-college programs (e.g., American Council on Education, National College Credit Recommendation Service)

Degrees Offered

- Bachelor of Multidisciplinary Studies (p. 706)

The diverse, multigenerational student population enrolled in the Bachelor of Multidisciplinary Studies (BMS) degree program have varied prior learning experiences, personal interests, and career goals. BMS graduates pursue a wide range of careers in many fields depending on their selected content areas, previous work and life experiences, as well as the selection of courses taken within their program of study. As part of the Bachelor of Multidisciplinary Studies degree students choose the content they want to study and are able to explain their unique expertise and learning to potential employers.

BMS graduates stand out to employers for their wide range of perspectives and viewpoints, real-world life and work experiences, and transferrable skills developed in the degree program that are beneficial in the workplace and changing world, including:

- Critical thinking and problem solving
- Collaboration and connection
- Ethical judgement and decision making
- Adaptability and flexibility

The more than 25,000 graduates of our program have:

- Advanced in their current career
- Transitioned to new career fields
- Refreshed skills and knowledge
- Pursued graduate degrees
- Achieved personal fulfillment

Our academic advisors take a student-centered approach to advising. With a holistic and student-goal-oriented model of advising, we work with you to identify a degree program that best fits your reason for attending and completing your degree.

Note: Not all students pursue a Bachelors of Multidisciplinary Studies for career reasons.

Bachelor of Multidisciplinary Studies

Bachelor of Multidisciplinary Studies

The Bachelor of Multidisciplinary Studies (BMS) degree offers a distinct multidisciplinary learning opportunity that allows students to pursue areas of study that may be unrelated, cultivates an approach to problem-solving that appreciates and utilizes diverse perspectives and knowledge, and fosters an appreciation and thirst for lifelong learning. Recognizing the diverse needs, interests and experiences of our multigenerational learners, the BMS program allows for flexibility in acceptance of transfer credit and other college-level learning outside the traditional classroom. The

curriculum complements and connects prior learning and the discipline-specific learning students select as part of their degree program.

The BMS curriculum intentionally develops both intellectual and practical skills that enable students to be successful in the 21st Century.

A multidisciplinary approach to learning enhances our students' abilities to:

- Cope with uncertainty and ambiguity
- Adapt to different contexts and environments in a complex, fast-changing world
- Appreciate and understand multiple perspectives & viewpoints
- Look across disciplinary boundaries to consider other viewpoints
- Develop deeper evaluation skills
- Draw on different frames of reference to identify solutions

Student Learning Outcomes

The BMS curriculum is intentionally designed to observe, develop, and enrich program outcomes in our students. Throughout the program, students shape, articulate, and document their progress towards achievement of each Goal and Learning Outcome, independent of where, when, or how the learning was acquired.

All BMS students upon completion of the program will:

- Understand the interconnectedness of real-world issues and assess their own ethical values and responsibility.
- Demonstrate effective, context-appropriate communication.
- Apply and connect knowledge from multiple sources to collaboratively explore complex, real-world issues.
- Value and justify the importance of continuous development and lifelong learning and accurately appraise their capabilities and achievements.
- Utilize creative and independent thinking to ask questions, construct knowledge, and express their distinctive voice.

To learn more about the Bachelor of Multidisciplinary Studies Degree, visit (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/division-of-continuing-studies/>) or schedule a meeting with an academic advisor at one of our two Division of Continuing Studies locations:

- CPACS 207 | 402.554.2370 | unodcs@unomaha.edu
- Office at Offutt Air Force Base | 402.595.2371 | unooffutt@unomaha.edu

Bachelor of Multidisciplinary Studies Requirements

To obtain a BMS, students must fulfill the university, college, and program requirements, including:

- A minimum of 120 credit hours is required, with at least 24 of the last 48 hours earned at UNO
- A minimum of 30 credit hours in upper level (3000- or 4000-level) coursework; at least 12 credit hours in the major must be earned at UNO
- Overall cumulative GPA of at least 2.00, calculated based on all courses in the University of Nebraska (NU) system
- Grades of C- or better are required in the University General Education courses and in major coursework

TOTAL HOURS (MINIMUM): 120

Multidisciplinary Studies Major Core

The Multidisciplinary Core consists of three (15-hour) blocks of credit and is designed to combine two or more areas of study, allowing students the opportunity to explore and connect varying perspectives and viewpoints. The Bachelor of Multidisciplinary Studies degree can be constructed in the following ways:

Multidisciplinary Studies with Concentration

- University General Education courses (40-46 hours)
- MLTI 3000: Multidisciplinary Foundations Seminar (3 hours)
- Blocks 1 & 2: Concentration (30 hours)
 - Concentrations can be content-focused (focus on an area of study) or cross-discipline (combine different areas of study)
 - Some Concentrations may require more than 30 hours
 - At least 12 hours must be Upper Division (3000- or 4000-level) completed at UNO
- Block 3: (15 hours)
 - Comprised of a complementary or separate area of study than the Concentration (Blocks 1 & 2)
- MLTI 4000: Multidisciplinary Capstone Seminar (3 hours)
- Elective hours as needed to reach 120 total credit hours
- At least 30 hours must be Upper Division

Multidisciplinary Studies without Concentration:

- University General Education courses (40-46 hours)
- MLTI 3000: Multidisciplinary Foundations Seminar (3 hours)
- Block 1: 15 hours
 - At least 6 hours must be Upper Division (3000- to 4000-level coursework) completed at UNO
- Block 2: 15 hours
 - At least 6 hours must be Upper Division (3000- to 4000-level coursework) completed at UNO
- Block 3: 15 hours
- MLTI 4000: Multidisciplinary Capstone Seminar (3 hours)
- Elective hours as needed to reach 120 total credit hours
- At least 30 hours must be Upper Division

Pathway Concentration Option

The Pathway concentration is for students who wish to move to another degree program at UNO, but do not currently meet entry requirements for that program. Students work with UNO academic advisors to navigate the transition pathway to their program of choice. Students may not earn a degree through the Pathway concentration, however, may ultimately choose to complete their degree through the BMS program by selecting a Multidisciplinary Studies program of study.

Degree Policies

Second Degree

Students seeking a second degree must complete a NEW 30 hours at UNO, regardless of how many previous hours they have earned, in order to meet requirements of the additional degree. Students are required to complete the requirements for the Concentration (Blocks 1 & 2) and any required prerequisite coursework. A BGE/BGS/BMS graduate cannot earn a second BMS degree.

Double Area of Concentration

Students pursuing two Areas of Concentration may "double-count" courses to satisfy requirements for both concentrations. It is a students' responsibility to declare both concentrations.

Simultaneous Degrees

Students may simultaneously pursue two different degrees from UNO. The Registrar's Office requires students to complete a minimum of 150 hours for two degrees. Students do not have to receive both degrees at the

same time - the Registrar's office will confer the second degree when the requirements are met. Students may not earn two of the same degree nor two of the same concentration/major (e.g., BMS with History concentration and a BA in History, BMS with General Administration concentration and a BSBA).

Academic Amnesty

Academic amnesty gives students the opportunity to rebuild their University of Nebraska system cumulative grade point average (GPA). Students must have been out of the Nebraska system for at least one year to be eligible for academic amnesty and only 'F' and 'D' grades earned within the University of Nebraska system (UNO, UNL, UNK, UNMC) prior to the year out will be included in the amnesty. All UNO colleges will accept the results of the DCS amnesty. Consult a DCS academic advisor to learn more.

Credit/No Credit (CR/NC) Grades

DCS students may elect to receive a grade of Credit (CR) or No Credit (NC) in lieu of a letter grade. A student earns a CR with a C- grade or higher. Please see University policy regarding eligibility (<https://catalog.unomaha.edu/undergraduate/grades/#text>). In the Bachelor of Multidisciplinary Studies a maximum of 24 hours may be taken on a Credit/No Credit basis, of which six hours maximum is allowed in the Multidisciplinary Core (Block 1, 2, 3).

Credit for Prior Learning

The DCS office determines how Credit for Prior Learning (CPL) credits are applied toward graduation requirements in accordance with the policies of the institution, college, and program. Duplicate credit for the same learning is not awarded. For example, students who may have previously taken and passed an English Composition I course at two prior institutions will only get credit for the most recent course taken and passed.

Learning experiences vary, and as such, academic credit for prior learning is highly individualized and must be determined on a case-by-case basis. Many adult and contemporary learners apply some method of CPL towards their BMS degree. Our professional academic advisors work closely with you to determine how the credits may apply to your program of study and your future goals.

All modalities outlined are currently available only to degree-seeking students enrolled in the BMS program. Students enrolled in UNO programs outside of DCS should adhere to the policies established by the respective program and college. Due to the nature of our student population, the BMS program provides the broadest and most flexible CPL policy at UNO. As such, students who change to a non-BMS program at UNO may find that CPL credits do not apply to their new program in the same manner. Students are encouraged to work closely with a DCS academic advisor to determine if CPL is an option.

Students may apply a maximum of 64 credit hours from two-year institutions and a maximum of 65 credit hours from evaluated non-college programs and standardized exams towards their BMS degree. The Division of Continuing Studies does not offer portfolio evaluation of students' life experiences.

Standards for Assessing Learning

Since 1974 the Council for Adult and Experiential Learning (CAEL) has worked with colleges and universities in both the public and private sectors to support the learning goals of adults. CAEL has created standards for assessing CPL. The Division of Continuing Studies has adopted CAEL's ten standards for assessing learning: <https://www.cael.org/ten-standards-for-assessing-learning> (<https://www.cael.org/ten-standards-for-assessing-learning/>)

1. Credit or competencies are awarded only for evidence of learning, not for experience or time spent.

2. Assessment is integral to learning because it leads to and enables future learning.
3. Assessment is based on criteria for outcomes that are clearly articulated and shared among constituencies.
4. The determination of credit awards and competence levels are made by appropriate subject matter and credentialing experts.
5. Assessment advances the broader purpose of equity and access for diverse individuals and groups.
6. Institutions proactively provide guidance and support for learners' full engagement in the assessment process.
7. Assessment policies and procedures are the result of inclusive deliberation and are shared with all constituencies.
8. Fees charged for assessment are based on the services performed in the process rather than the credit awarded.
9. All practitioners involved in the assessment process pursue and receive adequate training and continuing professional development for the functions they perform.
10. Assessment programs are regularly monitored, evaluated and revised to respond to institutional and learner needs.

Transfer Credits from Postsecondary Institutions (Colleges and Universities)

In order to determine if coursework taken at a postsecondary institution other than UNO is eligible for transfer and how it applies to BMS curriculum, DCS relies on the recommendations of the Joint Statement on the Transfer and Award of Credit (AACRAO, CHEA, & ACE, 2017 (<https://www.acenet.edu/Documents/Joint-Statement-on-the-Transfer-and-Award-of-Credit.pdf>)). The three considerations that determine the transferability of credit includes:

1. The educational quality of the institution;
2. The comparability of nature, content, and level of the course that is to be transferred to UNO and applied to the BMS program;
3. The appropriateness and applicability of the credit in relation to BMS plan of study.

Institutional Accreditation

Accreditation serves as the basic indicator that an institution meets certain minimum standards in order to give students and policymakers confidence in the effectiveness of academic quality. As such, DCS recognizes the value of accreditation and has outlined a process for identifying postsecondary credit that may transfer to the BMS program.

Regionally Accredited Institutions

Coursework of comparable content and scope to the UNO and BMS curriculum will generally be transferred if it was completed at colleges and universities accredited by one of the six regional accrediting agencies recognized by the Council for Higher Education Accreditation (CHEA) and the U.S. Department of Education (USDE). Courses must be successfully completed with a grade of C- or better. The six regional accrediting agencies that operate in the U.S. are:

- Middle States Commission on Higher Education
- New England Association of Schools and Colleges
- North Central Association of Colleges and Schools
- Northwest Commission on Colleges and Universities
- Southern Association of Colleges and Schools
- Western Association of Schools and Colleges

Nationally Accredited Institutions

DCS recognizes that institutions may offer programs that are recognized by programmatic or specialized accrediting agencies. Students who have successfully completed coursework at colleges and universities that do not hold regional accreditation may request evaluation of credit for applicability of transfer. As a general rule, DCS requires that the institution and/or program be recognized by an accrediting body that is recognized by both CHEA and USDE during the time period of attendance.

Non-U.S. Tertiary Institutions

UNO takes great pride in the diversity of our student population and welcomes students who have completed postsecondary coursework outside of the U.S. higher education system. Due to the diversity of languages, curriculum, structure and grading schema of non-U.S. colleges and universities, UNO requires a certified translation to accompany transcripts not issued in English by World Education Services, www.wes.org (<http://www.wes.org>), or Educational Credential Evaluators, www.ece.org (<http://www.ece.org>). The translation should be literal and not interpretive. In many cases, international credits will be converted to the U.S. semester system. A DCS academic advisor can provide a list of organizations that provide transcript translation services.

Coursework Not Accepted for Transfer Credit

The following coursework will not be accepted for transfer credit and will not count toward a degree at UNO:

- Courses in which the grade earned is below a C- on 4.0 grading scale (except from the NU system).
- Courses identified by UNO as remedial, such as remedial English, Mathematics and developmental reading.
- Portfolio-based experiential credits awarded by another institution.

Standardized Exams

Standardized examinations are available in disciplines from physics to studio art, from computer science to foreign language. Typically, DCS awards credit for introductory-level courses; although, some students use examinations to demonstrate advanced knowledge.

Eligible Exams

Credit may be earned by successfully completing eligible examinations:

- Advanced Placement Exams (AP): <https://apcentral.collegeboard.com>
- International Baccalaureate Exams (IB): <https://ibo.org>
- College Level Exam Program (CLEP): <https://clep.collegeboard.org/>
- DANTES Subject Standardized Test (DSST) (formerly DANTES): <https://www.getcollegecredit.com/>

Note: AP and IB examinations are normally completed as part of a high school curriculum.

Course and Credit Equivalencies

Course and credit equivalencies for AP, IB, CLEP, and DSST examinations are regularly evaluated and updated. Be advised that examinations accepted for credit, the minimum score required and hours/courses awarded are subject to change by UNO and DCS at any time without notice. A maximum of 30 hours of exam credit can be applied to the BMS degree.

Course and credit equivalencies for AP, IB, CLEP, and DSST are posted on the UNO website (<https://www.unomaha.edu/registrar/students/before-you-enroll/transfer-credit/clep-credit.php>). Courses not listed on the articulation guide may be eligible for transfer and fulfillment of general elective requirements in the BMS degree program.

Evaluated Non-College Programs

Adult and contemporary learners can demonstrate college-level knowledge and competencies gained from courses, examinations and certifications offered by employers, federal agencies, professional associations, apprenticeship programs, online education providers and other organizations. Courses and training are rigorously reviewed by a team of faculty experts who make recommendations for course-level and credit-hour equivalencies.

Eligible Credit Recommendations

Credit may be awarded for learning assessed by the following organizations:

- American Council on Education (ACE)**
 ACE's College Credit Recommendation Service (CREDIT) has reviewed over 35,000 courses, exams, and learning experiences for academic credits since it was founded in 1974. For more information, visit <http://www.acenet.edu/nationalguide> (<http://www.acenet.edu/nationalguide/>).
- National College Credit Recommendation Service (NCCRS)**
 Formerly known as National PONS, the NCCRS has been evaluating training and education programs for college credit equivalencies since 1973. For more information, visit <http://www.nationalccrs.org/course-credit-directory> (<http://www.nationalccrs.org/course-credit-directory/>).
- DCS Faculty Academic Policy Committee (FAPC)**
 The FAPC provides academic guidance and oversight for the BMS program. In conjunction with UNO faculty, the committee is responsible for reviewing and approving select nontraditional college credit recommendations that may be applied to the BMS program. The committee does not evaluate individual credit requests on an ad hoc basis.

Military Training and Experience

DCS is dedicated to bridging military service with undergraduate curriculum. As part of this commitment, we award academic credit for military training and learning experiences from all branches of the U.S. Armed Forces. As with all methods of CPL, credit awards are at the full discretion of the DCS Office.

- Army, Coast Guard, Marine Corps and Navy**
 In 2013, the Army, Coast Guard, Marine Corps and Navy transitioned to the Joint-Services Transcript (JST) for active-duty, reserve and veteran members. JST replaced the following systems: AARTS (Army), SMART (Navy and Marines), CGI (Coast Guard) and Form DD-295 (all branches). JST CPL credits are posted as other institutional credits, rather than transfer credits. For instructions on how to order a JST, visit <https://jst.doded.mil/faq.html>.
- Air Force**
 Air Force training is certified by the Community College of the Air Force (CCAF). CCAF is regionally accredited by the Southern Association of Colleges and Schools through Air University, therefore, CCAF courses are considered transfer credits at UNO. For instructions on how to order CCAF transcripts, visit <https://www.airuniversity.af.edu/Barnes/CCAF/Display/Article/803247/community-college-of-the-air-force-transcripts/>.
- Defense Language Institute (DLI)**
 Operated by the U.S. Department of Defense (DoD), DLI provides linguistic and cultural instruction to members of the DoD and federal agencies. DLI courses are considered transfer credits at UNO as it is regionally-accredited by the Western Association of Schools and Colleges. For instructions on how to order an official transcript, visit www.dliflc.edu (<http://www.dliflc.edu>).

Bachelor of Multidisciplinary Studies Degree Concentrations

The curriculum of each BMS Concentration is determined by the faculty of the respective academic department(s). Concentration curricular revisions are made in partnership with academic departments.

Applied Leadership

Requirements: (30 hours)

For the Applied Leadership Area of Concentration, students will complete 15 semester hours towards a 5-C's of Leadership Block and 15 semester hours towards an Applied Workplace Toolbox Block. Courses may only be counted once towards the Applied Leadership concentration requirements (courses may not double-count).

PHHB 4960	PUBLIC HEALTH - PLANNING AND ORGANIZATION

Measurement

PSYC 3130	STATISTICS FOR THE BEHAVIORAL SCIENCES
PSYC 3140	RESEARCH METHODS IN PSYCHOLOGY

Biology**Requirements: (36 hours)**

Code	Title	Credits
BIOL 1450	BIOLOGY I	5
BIOL 1750	BIOLOGY II	5
Additional 26 hours from the Department of Biology (BIOL)		26

Required supporting coursework in Physics: (5-10 hours) 5-10

PHYS 1050 & PHYS 1054	INTRODUCTION TO PHYSICS and INTRODUCTION TO PHYSICS LABORATORY	
OR		
PHYS 1110 & PHYS 1154	GENERAL PHYSICS I WITH ALGEBRA and GENERAL PHYSICS LABORATORY I	
AND		
PHYS 1120 & PHYS 1164	GENERAL PHYSICS and GENERAL PHYSICS LABORATORY II	
OR		
PHYS 2110 & PHYS 1154	GENERAL PHYSICS I - CALCULUS LEVEL and GENERAL PHYSICS LABORATORY I	
AND		
PHYS 2120 & PHYS 1164	GENERAL PHYSICS-CALCULUS LEVEL and GENERAL PHYSICS LABORATORY II	

Required supporting coursework in Chemistry (14-16 hours) 14-16

Choose either Pre-Health or Pre-Med focus:

Pre-Health

CHEM 1140 & CHEM 1144	FUNDAMENTALS OF COLLEGE CHEMISTRY and FUNDAMENTALS OF COLLEGE CHEMISTRY LABORATORY
CHEM 2210 & CHEM 2214	FUNDAMENTALS OF ORGANIC CHEMISTRY and FUNDAMENTALS OF ORGANIC CHEMISTRY LABORATORY

CHEM 3650 & CHEM 3654	FUNDAMENTALS OF BIOCHEMISTRY and FUNDAMENTALS OF BIOCHEMISTRY LABORATORY
-----------------------	--

Pre-Med

CHEM 1180 & CHEM 1184	GENERAL CHEMISTRY I and GENERAL CHEMISTRY I LABORATORY
CHEM 1190 & CHEM 1194	GENERAL CHEMISTRY II and GENERAL CHEMISTRY II LABORATORY
CHEM 2250	ORGANIC CHEMISTRY I
CHEM 2260 & CHEM 2274	ORGANIC CHEMISTRY II and ORGANIC CHEMISTRY LABORATORY

Communication Studies**Requirements: (30 hours)**

Code	Title	Credits
CMST 2010 or CMST 2410	INTERPERSONAL COMMUNICATION or SMALL GROUP COMMUNICATION AND LEADERSHIP	3
CMST 4510	PERSUASION AND SOCIAL INFLUENCE	3
Select one from the following:		3
CMST 3130	SPEECH COMMUNICATION IN BUSINESS AND THE PROFESSIONS	
CMST 3140	ADVANCED PUBLIC SPEAKING	
CMST 3520	INTERVIEWING	
CMST 3150	INTERCOLLEGIATE FORENSIC ACTIVITIES	
Additional 21 hours from Communication Studies (CMST)		21
An optional allied field of up to 9 hours may be taken from Journalism and Media Communication (JMC)		9

Computer Science**Requirements: (30 hours)**

Code	Title	Credits
CSCI 1200 or CIST 1300	COMPUTER SCIENCE PRINCIPLES or INTRODUCTION TO WEB DEVELOPMENT	3
CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I	3
CSCI 1620	INTRODUCTION TO COMPUTER SCIENCE II	3
CSCI 2240	INTRODUCTION TO C PROGRAMMING	3
CSCI 2030	MATHEMATICAL FOUNDATIONS OF COMPUTER SCIENCE	3
CSCI 3320	DATA STRUCTURES	3
Select two from the following: (6 hours)		6
CSCI 3550	COMMUNICATION NETWORKS	
CSCI 3710	INTRODUCTION TO DIGITAL DESIGN AND COMPUTER ORGANIZATION	
CSCI 4220	PRINCIPLES OF PROGRAMMING LANGUAGES	
CSCI 4350	COMPUTER ARCHITECTURE	
CSCI 4500	OPERATING SYSTEMS	
CSCI 4830	INTRODUCTION SOFTWARE ENGINEERING	
Additional 6 upper level hours from Department of Computer Science (CSCI)		6
Required coursework in Math (12 hours minimum)		12
MATH 1950	CALCULUS I	

MATH 2050	APPLIED LINEAR ALGEBRA
Statistics course recommended, but not required	

Criminology and Criminal Justice

Requirements: (30 hours)

30 hours from the School of Criminology and Criminal Justice (CRCJ)

An optional allied field of up to 9 hours may be taken in one of the following College/departments:

College of Business Administration
Political Science
Psychology
Public Administration
Sociology

Cross Sector Leadership

Requirements: (30 hours)

Code	Title	Credits
MGMT 3800	CROSS-SECTOR COLLABORATIVE LEADERSHIP	3
or PA 3800	CROSS-SECTOR COLLABORATIVE LEADERSHIP	
MGMT 1500	INTRODUCTION TO BUSINESS	3
ACCT 2000	ACCOUNTING BASICS FOR NON-BUSINESS MAJORS	3
PA 2000	LEADERSHIP & ADMINISTRATION	3
PA 2170	INTRODUCTION TO PUBLIC ADMINISTRATION	3
PA 3200	PROGRAM PLANNING AND EVALUATION	3
PA 3700	FINANCIAL MANAGEMENT FOR NONPROFITS	3
PA 4960	CROSS-SECTOR COLLABORATIVE LEADERSHIP CAPSTONE	3
Select two from the following:		6
ENTR 3710	ENTREPRENEURIAL FOUNDATIONS	
PA 3500	NONPROFIT ORGANIZATIONS AND MANAGEMENT	
PA 4440	ORGANIZATIONAL DEVELOPMENT AND CHANGE	
PA 4530	STRATEGIC PLANNING	

Cybersecurity

Requirements: (30 hours)

Code	Title	Credits
CSCI 2240	INTRODUCTION TO C PROGRAMMING	3
or CYBR 2250	LOW-LEVEL PROGRAMMING	
CIST 3110	INFORMATION TECHNOLOGY ETHICS	3
CYBR 2600	SYSTEM ADMINISTRATION	3
CYBR 3600	INFORMATION SECURITY POLICY AND AWARENESS	3
CYBR 4360	FOUNDATIONS OF CYBERSECURITY	3
CIST 4540	COMPUTER SECURITY MANAGEMENT	3
ISQA 3400	INFORMATION TECHNOLOGY INFRASTRUCTURE	3
or CSCI 3550	COMMUNICATION NETWORKS	
CSCI 2030	MATHEMATICAL FOUNDATIONS OF COMPUTER SCIENCE	3
or MATH 2030	DISCRETE MATHEMATICS	
Additional 6 upper level course from Cybersecurity (CYBR)		6

CSCI 4830	INTRODUCTION SOFTWARE ENGINEERING
CSCI/MATH 4560	NUMBER THEORY & CRYPTOGRAPHY
ISQA 3310	MANAGING THE DATABASE ENVIRONMENT
ISQA 3910	INTRODUCTION TO PROJECT MANAGEMENT

Emergency Management

Requirements: (30 hours)

Code	Title	Credits
EMGT 1000	INTRODUCTION TO EMERGENCY MANAGEMENT	3
EMGT 2020	EMERGENCY MANAGEMENT STRATEGIES AND COMMUNICATION	3
EMGT 2050	POLITICAL AND LEGAL FOUNDATIONS IN EMERGENCY SERVICES	3
PA 2170	INTRODUCTION TO PUBLIC ADMINISTRATION	3
PA/CRCJ/SOWK 3000	APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR	3
EMGT 3040	PREPAREDNESS/PLANNING AND RISK MITIGATION	3
EMGT 3080	AGENCY COLLABORATION DURING DISASTERS	3
EMGT 4060	DISASTER RESPONSE AND RECOVERY	3
Additional 6 hours from the following courses:		6
AVN 3150	AVIATION LAW	
AVN 4080	AIRPORT SAFETY AND SECURITY	
CRCJ 2030	POLICE AND SOCIETY	
CRCJ 4760	TERRORISM	
EMGT 2500	DISASTERS AND VULNERABLE POPULATIONS	
EMGT 3020	FEDERAL/TRIBAL GOVERNMENT TO GOVERNMENT RELATIONS	
EMGT 4020	PROTECTING AND SUSTAINING TRIBAL ECONOMIES	
EMGT 4050	INTEGRATION OF CONTEMPORARY ISSUES IN TRIBAL EMERGENCY MANAGEMENT	
FSMT 2200	CODES AND INSPECTIONS	
FSMT 2410	STRATEGIES AND TACTICS IN FIRE AND EMERGENCY SERVICES	
FSMT 3350	FIRE PREVENTION, ORGANIZATION, AND MANAGEMENT	
FSMT 3680	ANALYTICAL APPROACHES TO PUBLIC FIRE PROTECTION	
FSMT 4450	FIRE AND EMERGENCY SERVICES ADMINISTRATION	
GEOG 3530 & GEOG 3540	CARTOGRAPHY AND DATA VISUALIZATION and FUNDAMENTALS OF GEOSPATIAL DATA SCIENCE	
GEOG 4120	URBAN GEOGRAPHY	
GEOG 3510	METEOROLOGY	
GEOG 4160	URBAN SUSTAINABILITY	
GERO 4460	PSYCHOLOGY OF ADULT DEVELOPMENT AND AGING	
GERO 4670	PROGRAMS AND SERVICES FOR THE ELDERLY	

ISQA 3310	MANAGING THE DATABASE ENVIRONMENT
ISQA 3420	MANAGING IN A DIGITAL WORLD
ISQA 3910	INTRODUCTION TO PROJECT MANAGEMENT
MGMT 3490	MANAGEMENT
MKT 3310	PRINCIPLES OF MARKETING
PHHB 4040	EPIDEMIOLOGY & PREVENTION OF DISEASE
PHHB 4130	COMMUNITY HEALTH
PHHB 4880	PUBLIC HEALTH POLICY
PSCI 2110	INTRODUCTION TO PUBLIC POLICY
PSCI 3260	UNITED STATES FOREIGN POLICY
PSCI 4250	INTELLIGENCE AND NATIONAL SECURITY
PA 3500	NONPROFIT ORGANIZATIONS AND MANAGEMENT
PA 3600	PERSONNEL AND VOLUNTEER MANAGEMENT IN NONPROFITS
PA 3700	FINANCIAL MANAGEMENT FOR NONPROFITS
PA 4100	MARKETING IN PUBLIC, NON-PROFIT AND AVIATION ORGANIZATIONS
PA 4300	SEMINAR IN PUBLIC POLICY
PA 4390	PUBLIC BUDGETING
PA 4500	NONPROFIT FUNDRAISING
PA 4530	STRATEGIC PLANNING

English

Requirements: (30 hours)

30 hours from the Department of English (ENGL) beyond ENGL 1160/ENGL 1164 English Composition II or equivalent.

Strongly recommended courses:

ENGL 2410 or ENGL 2420
ENGL 4790
ENGL 4800
ENGL 4990

An optional allied field of up to 9 hours may be taken in one of the following departments:

Black Studies
Communication Studies
Foreign Language
History
Journalism & Media Communication
Library Science
Native American Studies
Philosophy
Religion
Sociology
Theatre
Writers Workshop
Women's and Gender Studies

Environmental Sciences

Requirements: (30 hours)

Code	Title	Credits
ENVN 2010	ENVIRONMENTAL PROBLEMS AND SOLUTIONS	1
BIOL 1330	ENVIRONMENTAL BIOLOGY	3

CHEM 1010 & CHEM 1014	CHEMISTRY IN THE ENVIRONMENT AND SOCIETY and CHEMISTRY IN THE ENVIRONMENT AND SOCIETY LABORATORY	4
GEOL 1010	ENVIRONMENTAL GEOLOGY	3
GEOG 1030	INTRODUCTION TO PHYSICAL GEOGRAPHY	4

Additional 15 hours selected from the curriculum of one of the Environmental Sciences options:

Analytic	
Earth Science	
Geography & Planning	
Life Science	

Courses for each of the Environmental Sciences options can be found through the College of Arts & Science Environmental Science academic catalog pages, linked here: Analytic (<https://catalog.unomaha.edu/undergraduate/college-arts-sciences/environmental-studies/environmental-sciences-environmental-studies-bs-analytical-sciences-concentration/>), Earth Science (<https://catalog.unomaha.edu/undergraduate/college-arts-sciences/environmental-studies/environmental-sciences-environmental-studies-bs-earth-sciences-concentration/>), Geography & Planning (<https://catalog.unomaha.edu/undergraduate/college-arts-sciences/environmental-studies/environmental-sciences-environmental-studies-bs-geography-and-planning-concentration/>), and Life Science (<https://catalog.unomaha.edu/undergraduate/college-arts-sciences/environmental-studies/environmental-sciences-environmental-studies-bs-geography-and-planning-concentration/>).

Fine Arts

Requirements: (30 hours)

30 credit hours from Fine Arts content areas: Art and Art History (ART), Creative Writing (WRWS), Music (MUS), Theatre (THEA), comprised of two 15-hour blocks. The blocks may be in one content area (i.e., 30 hours in Music) or two content areas (e.g., 15 hours in Theatre, 15 hours in Art).

General Administration

Requirements: (30 hours)

30 hours of Accounting (ACCT), Economics (ECON), Entrepreneurship (ENTR), Finance and Banking (FNBK), Business Administration (BSAD), Law and Society (LAWS), Management (MGMT), Marketing (MKT), Real Estate (RELU), Supply Chain Management (SCMT) and Public Administration (PA).

An optional allied field of up to 9 hours may be taken in Political Science.

NOTE: Due to the UNO College of Business' AACSB accreditation, students in the Division of Continuing Studies are permitted to use only 30 hours of UNO business credit towards their Bachelor of Multidisciplinary Studies degree. Students need to plan their 30 hours of UNO business courses carefully to make the best use of these hours. Exceptions are granted on a case-by-case basis, please check with your academic advisor.

General Science

Requirements: (49-50 hours)

Code	Title	Credits
CHEM 1180 & CHEM 1184	GENERAL CHEMISTRY I and GENERAL CHEMISTRY I LABORATORY	4
CHEM 1190 & CHEM 1194	GENERAL CHEMISTRY II and GENERAL CHEMISTRY II LABORATORY	4
Select one of the following:		5
PHYS 1110 & PHYS 1154	GENERAL PHYSICS I WITH ALGEBRA and GENERAL PHYSICS LABORATORY I	

PHYS 2110 & PHYS 1154	GENERAL PHYSICS I - CALCULUS LEVEL and GENERAL PHYSICS LABORATORY I	
Select one of the following:		5
PHYS 1120 & PHYS 1164	GENERAL PHYSICS and GENERAL PHYSICS LABORATORY II	
PHYS 2120 & PHYS 1164	GENERAL PHYSICS-CALCULUS LEVEL and GENERAL PHYSICS LABORATORY II	
Select one of the following:		5-6
MATH 1950 or MATH 1930	CALCULUS I CALCULUS FOR THE MANAGERIAL, LIFE, AND SOCIAL SCIENCES	
MATH 1930 & MATH 1530	CALCULUS FOR THE MANAGERIAL, LIFE, AND SOCIAL SCIENCES and INTRODUCTION TO APPLIED PROBABILITY AND STATISTICS	
BIOL 1450	BIOLOGY I	5
BIOL 1750	BIOLOGY II	5
GEOL 1170	INTRODUCTION TO PHYSICAL GEOLOGY	4
Additional 12 hours of electives at the 2000 level or higher in at least two of the following disciplines: Biology (BIOL), Chemistry (CHEM), Physics (PHYS), Geology (GEOL), Geography (GEOG). Geography courses must be from a physical science perspective.		12

Geography

Requirements: (30 hours)

30 hours from the Department of Geography (GEOG). Students should take one course from the following Geography Diversity Groups: Physical Geography, Human Geography, and Global Perspectives.

Code	Title	Credits
Physical Geography		3
GEOG 1030	INTRODUCTION TO PHYSICAL GEOGRAPHY	
GEOG 3440	NEBRASKA NATURAL RESOURCES MANAGEMENT	
GEOG 3510 & GEOG 3514	METEOROLOGY and INTRODUCTION TO METEOROLOGY LABORATORY	
GEOG 4010	CONSERVATION OF NATURAL RESOURCES	
GEOG 4040	GEOARCHAEOLOGY	
GEOG 4100	BIOGEOGRAPHY	
GEOG 4260	PROCESS GEOMORPHOLOGY	
GEOG 4320	CLIMATOLOGY	
GEOG 4330	SOIL GENESIS, MORPHOLOGY AND CLASSIFICATION	
GEOG 4340	WATER RESOURCES	
GEOG 4610	ENVIRONMENTAL MONITORING AND ASSESSMENT	
Human Geography		3
GEOG 1020	INTRODUCTION TO HUMAN GEOGRAPHY	
GEOG 3130	ECONOMIC GEOGRAPHY	
GEOG 3930	POLITICAL GEOGRAPHY	
GEOG 4010	CONSERVATION OF NATURAL RESOURCES	
GEOG 4120	URBAN GEOGRAPHY	
GEOG 4150	GEOGRAPHY, GENDER AND ENTREPRENEURSHIP	
GEOG 4160	URBAN SUSTAINABILITY	

GEOG 4170	ADVANCED CULTURAL GEOGRAPHY	
GEOG 4550	GEOGRAPHY OF ECONOMIC GLOBALIZATION	
GEOG 4820	INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS	
Global & North American Perspectives		3
GEOG 1000	FUNDAMENTALS OF WORLD REGIONAL GEOGRAPHY	
GEOG 3000	TRAVEL STUDY IN GEOGRAPHY	
GEOG 3030	GEOGRAPHY OF AFRICA	
GEOG 3050	GEOGRAPHY IN FILM	
GEOG 3070	GEOGRAPHY OF LATIN AMERICA	
GEOG 3080	EAST & SOUTHEAST ASIA	
GEOG 3230	GEOGRAPHY OF EUROPE	
GEOG 3240	GEOGRAPHY OF RUSSIA AND ITS NEIGHBORS	
GEOG 3330	UNITED STATES & CANADA	
GEOG 4230	GREAT PLAINS & NEBRASKA	
GEOG 4530	HISTORICAL GEOGRAPHY OF THE UNITED STATES	
Additional 21 hours from Geography (GEOG)		21

Gerontology

Requirements: (30 hours)

Code	Title	Credits
GERO 2000	INTRODUCTION TO GERONTOLOGY	3
GERO 4460	PSYCHOLOGY OF ADULT DEVELOPMENT AND AGING	3
GERO 3000	COMMUNITY RESOURCES FOR OLDER ADULTS	3
or GERO 4670	PROGRAMS AND SERVICES FOR THE ELDERLY	
Additional 21 hours from the Department of Gerontology (GERO)		21
An optional allied field of up to 9 hours may be taken from one of the following departments:		9
Public Administration		
Social Work		
Transferable Nursing coursework		

A Certificate in Gerontology may be completed as part of Gerontology Concentration coursework. The Gerontology Certificate (p. 736) requires a total of 18 hours (15 hours in GERO coursework based on career objectives and interest areas and 3 hours of GERO 4940 Practicum). Please consult with an academic advisor when planning coursework.

Healthcare Administration

Requirements: (30 hours)

Code	Title	Credits
PA 2170	INTRODUCTION TO PUBLIC ADMINISTRATION	3
PA 3500	NONPROFIT ORGANIZATIONS AND MANAGEMENT	3
PA 4206	INTRODUCTION TO HEALTH CARE SYSTEMS	3
GERO 4510	LONG-TERM CARE ADMINISTRATION	3
Select one from the following:		3
CMST 3130	SPEECH COMMUNICATION IN BUSINESS AND THE PROFESSIONS	
CMST 4150	CORPORATE TRAINING AND DEVELOPMENT	

CMST 4170	ORGANIZATIONAL COMMUNICATION	
CMST 4180	COMMUNICATION LEADERSHIP AND POWER AND ORGANIZATIONS	
MKT 3200	BUSINESS COMMUNICATIONS	
Additional 15 hours from the following list of courses:		15

Organizational Development and Planning

ACCT 2000	ACCOUNTING BASICS FOR NON-BUSINESS MAJORS	
CIST 2100	ORGANIZATIONS, APPLICATIONS AND TECHNOLOGY	
CIST 3110	INFORMATION TECHNOLOGY ETHICS	
GERO 2000	INTRODUCTION TO GERONTOLOGY	
GERO 3000	COMMUNITY RESOURCES FOR OLDER ADULTS	
or GERO 4670	PROGRAMS AND SERVICES FOR THE ELDERLY	
GERO 4520	SENIOR HOUSING	
GERO 4690	WORKING WITH MINORITY ELDERLY	
GERO 4720	BABY BOOMERS AND THE 21ST CENTURY	
ISQA 3400	INFORMATION TECHNOLOGY INFRASTRUCTURE	
ISQA 3910	INTRODUCTION TO PROJECT MANAGEMENT	
MGMT 3490	MANAGEMENT	
MGMT 4100	ORGANIZATION CHANGE AND DESIGN	
PA 3000	APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR	
PA 3200	PROGRAM PLANNING AND EVALUATION	
PA 4440	ORGANIZATIONAL DEVELOPMENT AND CHANGE	
PA 4530	STRATEGIC PLANNING	
PSYC 3450	SOCIAL PSYCHOLOGY	

Management/Leadership

BSAD 2600	ETHICS IN ORGANIZATIONS	
CMST 3520	INTERVIEWING	
CMST 4220	HEALTH COMMUNICATION	
CMST 4560	COMMUNICATION, TEAMWORK, & FACILITATION	
CMST 4800	ADVANCED CONFLICT MEDIATION	
GERO 4350	ISSUES IN AGING (Topic: Management and Administration of Aging Programs)	
GERO 4350	ISSUES IN AGING (Topic: Financial Management in Long-Term Care)	
GERO 4500	LEGAL ASPECTS OF AGING	
GERO 4940	PRACTICUM	
PHHB 1500	FOUNDATIONS IN PUBLIC HEALTH	
PHHB 4420	PUBLIC HEALTH INFORMATICS	
PHHB 4950	PUBLIC HEALTH LEADERSHIP AND ADVOCACY	
MGMT 3490	MANAGEMENT	
MGMT 4030	HUMAN RESOURCE MANAGEMENT	
MGMT 4040	ORGANIZATIONAL BEHAVIOR	
MGMT 4050	MANAGERIAL DECISION MAKING	
MGMT 4220	EMPLOYMENT LAW	
PA 3600	PERSONNEL AND VOLUNTEER MANAGEMENT IN NONPROFITS	
PA 3700	FINANCIAL MANAGEMENT FOR NONPROFITS	

PA 4950	INTERNSHIP	
PSYC 4630	ORGANIZATIONAL PSYCHOLOGY	
PSYC 4640	PERSONNEL PSYCHOLOGY	
PSYC 4800	LAW & PSYCHOLOGY: ETHICS, RESEARCH & SERVICE	

Organizational Security

EMGT 1000	INTRODUCTION TO EMERGENCY MANAGEMENT	
EMGT 2020	EMERGENCY MANAGEMENT STRATEGIES AND COMMUNICATION	
EMGT 2050	POLITICAL AND LEGAL FOUNDATIONS IN EMERGENCY SERVICES	
EMGT 3040	PREPAREDNESS/PLANNING AND RISK MITIGATION	
EMGT 3080	AGENCY COLLABORATION DURING DISASTERS	
EMGT 4060	DISASTER RESPONSE AND RECOVERY	
FSMT 1600	FUNDAMENTALS OF FIRE SCIENCE	
FSMT 2200	CODES AND INSPECTIONS	
FSMT 3140	FIRE RELATED HUMAN BEHAVIOR	

History**Requirements: (30 hours)**

30 hours from the Department of History (HIST)

An optional allied field of up to 9 hours may be taken in one of the following departments:

Art History
Economics
English Literature
Geography
Literature in a Foreign Language
Philosophy
Political Science
Religion
Sociology

Industrial Distribution & Logistics

Code	Title	Credits
Required Courses (15 credit hours)		
MKT 3200	BUSINESS COMMUNICATIONS	3
MGMT 3490	MANAGEMENT	3
SCMT 3410	SUSTAINABLE SUPPLY CHAIN MANAGEMENT	3
SCMT 4350	GLOBAL SOURCING AND INNOVATION	3
SCMT 4380	INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT	3
Elective Courses (15 credit hours)		15
ACCT 2000	ACCOUNTING BASICS FOR NON-BUSINESS MAJORS	
ACCT 3000	MANAGERIAL ACCOUNTING FOR SUPPLY CHAIN MANAGEMENT	
AVN 3700	TRANSPORTATION ANALYSIS	
BSAD 2130	PRINCIPLES OF BUSINESS STATISTICS	
CMST 2010	INTERPERSONAL COMMUNICATION	
CMST 2410	SMALL GROUP COMMUNICATION AND LEADERSHIP	
CMST 4170	ORGANIZATIONAL COMMUNICATION

Additional 21 hours (15 of which must be upper level) to be selected from approved Women's and Gender Studies (WGST) courses. 21

Emergency Management and Disaster Science

Emergency Management and Disaster Science offers a Bachelor of Science in Emergency Management as well as minors in Emergency Management, Fire Service Management, and Tribal Management and Emergency Services. The program also offers an undergraduate certificate in Tribal Management and Emergency Services. Emergency Management and Disaster Science was developed over a two year period by an interdisciplinary group composed of faculty from diverse University departments and programs, as well as community and public safety leaders in related professions. The program was approved in the summer of 2012. The curriculum developed is intended to provide an education that encompasses the broad array of knowledge and experience necessary to conduct emergency services and emergency administration, and to meet the demand for Emergency Management professionals at the federal, state, and local government levels, in the business community, and within the nonprofit organizations active in disasters.

The Mission of Emergency Management and Disaster Science is to:

- Develop student talents, wisdom, and experiences in a supportive yet demanding academic environment that prepares them for a personally rewarding successful professional career in Emergency Management.
- Initiate and lead superior research initiatives while supporting continuous improvements in efficiency, reliability, safety, and sustainability for provision of emergency services in the State of Nebraska and beyond.
- Foster cooperative relationships with neighboring communities, state and federal agencies, and private enterprise through collaborative education, training, and service projects that enhance performance and productivity.
- Set, preserve, and promote the utmost standards of honesty, integrity, and transparency through the teaching of and adherence to ethical conduct and open dialogue while ensuring good stewardship and management of program resources

Emergency Management and Disaster Science is a division of the School of Public Administration in the College of Public Affairs and Community Service (CPACS).

Transfer Credit

Sixty-four credit hours from regionally accredited two-year institutions may be applied toward the degree. Twelve credit hours of American Council on Education (ACE) approved military credit may be applied toward electives in the BSEM degree. Credit from an institution that is not regionally accredited cannot be applied to the BSEM degree.

Fast Track

The School of Public Administration has developed a Fast-Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing the BS in Emergency Management desiring to pursue a MS in Urban Studies or the MPA degree.
- Students should have senior status (91 hours) and must be within at least 30 undergraduate credits yet to complete their undergraduate degree. Exceptional students who do not meet this requirement may be considered.

- Students must have a minimum undergraduate GPA of 3.5.
- Students must complete the Fast-Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor and consult with the graduate advisor prior to enrollment in one of the courses listed below.
- A minimum cumulative GPA of 3.5 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - For this program, if students maintain at least a grade of B+ in courses taken, they will be recommended for admission to the MSUS or MPA program.
 - The admit term must be after the completion term of the undergraduate degree.

The following MS in Urban Studies courses may be taken under the Fast-Track program:

- UBNS 8000, Seminar in Urban Studies
- UBNS 8060, Introduction to Urban Planning
- UBNS 8020, Race, Ethnicity and American Urban Culture**
- UBNS 8200, Community Organizing and Development**
- PA 8010, The Public Economy (Must have completed or be concurrently enrolled in UBNS 8000)

The following MPA courses may be taken under the Fast-Track program:

- PA 8050, Foundations of Public Service
- PA 8090, Organizational Theory and Behavior
- PA 8100, Advanced Management and Leadership for Public and Nonprofit Organizations (Note: This course may only be taken if both PA 8050 and PA 8090 are completed).

Academic Advising

Academic Advising is provided for all students. The program recommends advising each semester to ensure degree completion. The academic advisor assists students with goal setting, degree planning, course scheduling, addressing any questions or concerns regarding major/minor, academic performance, and/or policies and procedures. The faculty in Emergency Management and Disaster Science are also available to speak with students regarding careers and mentoring. To contact an advisor, visit 114 CPACS, email unoemgt@unomaha.edu, or call 402.554.4900.

Student Group

Emergency Management Student Association (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/emergency-management-and-disaster-science/student-involvement/>)

Contact

Emergency Management and Disaster Science is located in the College of Public Affairs and Community Service in room 114. The office can be reached by phone at 402.554.4900 or by email at unoemgt@unomaha.edu.

Website (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/emergency-services-program/>)

Admissions

Readmit students and students wishing to transfer from another institution or department within the University of Nebraska must have a 2.5 cumulative grade point average. Students with a GPA of 2.0 to 2.49 may be admitted to the Pre-Emergency Management program. Once students have achieved a 2.5 cumulative grade point average or better, they will be admitted to the BSEM program.

Degrees Offered

- Emergency Management (BSEM), Bachelor of Science (p. 724)

Writing in the Discipline

The writing in the discipline courses for emergency management are:

- AVN 3060 Writing in Aviation
- CRCJ 3100 Writing for Criminal Justice
- CIST 3000 Advanced Composition for IS&T
- ENGL 2400 Advanced Composition
- ENGL 3050 Writing for the Workplace
- ENGL 3980 Technical Writing Across the Disciplines
- MKT 3200 Business Communications
- or a course approved by the Academic Advisor.

Minors Offered

- Emergency Management Minor (p. 729)
- Fire Service Management Minor (p. 729)
- Tribal Management and Emergency Services Minor (p. 730)

Certificates Offered:

- Tribal Management and Emergency Services Certificate (p. 730)

Emergency Management is the profession of individuals who focus on helping communities prior to, during, and following natural and manmade disasters to minimize risk and vulnerability. Emergency Managers plan and direct disaster response or crisis management activities, provide disaster preparedness training, and prepare emergency plans and procedures for natural (tornadoes, floods) and manmade (technological, terrorism) disasters, as well as public health epidemics. Our program meets the demand for professionals at the federal, state, and local levels, and the business community.

Emergency Managers can work in many different industries including federal, state, county, and city governments, educational institutions, hospitals and public health agencies, nonprofits and community/international relief organizations, private industry, transportation, the military, and many others.

- Disaster Recovery Manager
- Emergency Management Specialist
- Emergency Management Coordinator
- Emergency Preparedness Specialist
- Emergency Response Coordinator
- Emergency Services Director
- Safety Manager
- Public Information Officer

Aviation Administration

- Federal Aviation Administration (FAA)
- Airport Security

- Commercial Aviation Companies
- Department of Transportation

Criminology and Criminal Justice

- Law Enforcement Officer
- Federal Agencies such as the FBI, ATF, DIA, DHS, etc.
- Corrections
- Homeland Security Officer
- Security Director

Fire Service Management

- City Firefighter
- Wildland Firefighter
- Commend Level Supervisor
- Fire Prevention Specialist

Geospatial Science

- Search and Rescue
- GIS Administrator, Analyst, Coordinator, or Manager
- Transportation Planner
- Data Collection for Drones

Gerontology

- Public Policy and Education
- Hospitals, Nursing and Assisted Living Homes
- Housing and Home Modification
- Evacuation Specialist

Information Technology and Communication

- Emergency Communication Specialist
- Information Security Analyst
- Information Security Director

Intelligence and Security

- Intelligence Analyst
- State, Federal and Local Government: FBI, CIA, DIA, DHS
- Military Intelligence

Logistics Management

- Logistics Engineer
- Transportation Manager
- Distribution Manager
- Transportation companies

Natural Disasters

- Environmental Protection Specialist
- Urban/Regional Planner
- Soil and Water Conservationist

Nonprofit Management

- Volunteer Coordinator/Manager
- Community Development Planner/Director
- Grant/Fundraising Manager

Planning and Preparing for Urban Hazards

- Urban/Regional Planner
- Community Development Planner
- Housing Department Specialist

Private Sector Management

- Business Continuity Planner
- Emergency Preparedness Planner
- Media Communications Specialist

Public Administration and Management

- City, Urban and Regional Planning
- City/County Government
- Policy/Budget Analyst
- School/University Emergency Manager

Public Health

- Public Health Preparedness
- Community Health Education Specialist
- Biopreparedness Coordinator
- Public Health Specialist
- Hospital/Public Health Administrators
- Hospital Emergency Preparedness Coordinator

Tribal Management and Emergency Services

- Tribal Emergency Manager
- Tribal Government
- Tribal Law

Unmanned Aircraft Systems (Drones)

- Unmanned Aircraft Systems Pilot
- Unmanned Aircraft Systems Operator
- Unmanned Aircraft Systems Management

EMGT 1000 INTRODUCTION TO EMERGENCY MANAGEMENT (3 credits)

This course is an introduction to the National Response Framework (NRF) and the National Incident Management System (NIMS) and their influence on modern community Emergency Management and Homeland Security. The course conceptually introduces the four phases of Emergency Management: Mitigation, Preparedness, Response, and Recovery.

Distribution: Social Science General Education course

EMGT 1150 INTRODUCTION TO TRIBAL MANAGEMENT AND EMERGENCY SERVICES (3 credits)

This course is an introduction to how Tribal history and contemporary governance affect the delivery of emergency management services on Tribal lands as well as how the National Response Framework (NRF) and the National Incident Management System (NIMS) are integrated to provide emergency services. The course focuses on the challenges of implementing the five mission areas of Emergency Management: Mitigation, Preparedness, Prevention, Response, and Recovery for Native American Communities.

Distribution: Social Science General Education course and U.S. Diversity General Education course

EMGT 2020 EMERGENCY MANAGEMENT STRATEGIES AND COMMUNICATION (3 credits)

This course covers tactical issues, current communication methods, and critical information channels utilized during actual disaster and emergency management field operations. Topics include inter-agency linkages, command and control tactics, National Incident Management System and the Incident Command System, (NIMS-ICS) and other crucial management requirements for successful disaster planning, mitigation, and recovery operations.

Prerequisite(s)/Corequisite(s): EMGT 1000 or concurrent.

EMGT 2050 POLITICAL AND LEGAL FOUNDATIONS IN EMERGENCY SERVICES (3 credits)

The provision of Emergency Services in contemporary society occurs within an environment of legal requirements and community resource allocation that often requires difficult administrative and political decisions. Successful professionals who control, manage, and operate these services must understand and adhere to the demand and intent of the law. Also, they must master the practical art of politics related to the various community constituents and shareholders who fund and support them, staff them, and utilize them. This course examines the legal aspects and social consequences of emergency management provision. Environmental issues and Occupational Health and Safety policy and programs affecting emergency services are also examined.

Prerequisite(s)/Corequisite(s): EMGT 1000 or taken concurrently with EMGT 1000.

EMGT 2060 FOUNDATIONAL INDIAN LAW & POLICY ISSUES (3 credits)

This course provides an examination of the federal and tribal legal cases and policies that affect the delivery of critical services on tribal lands. The course will also examine how such case law and resulting policy affects current U.S./Tribal/State relationship, specifically in the area of sovereignty and regulatory jurisdiction of emergency management principles. The student will gain an understanding of the legal obligations of Tribal Government and the emergency manager with regard to disaster response within the legal context of tribal law and policy.

Prerequisite(s)/Corequisite(s): EMGT 1150 (can be taken currently with EMGT 1150 with instructor approval).

EMGT 2500 DISASTERS AND VULNERABLE POPULATIONS (3 credits)

This course is an introduction to the sociological examination of disasters. In the course students will learn about vulnerability in terms of social, economic, political, geographical and cultural factors. Students will investigate how vulnerable groups such as children, elderly, racial and ethnic minorities, and low income, are affected and cope before, during and after hazardous events. Other topics covered include: disaster warning responses, evacuation behavior, survival behavior, roles of volunteers, and disaster impacts.

Distribution: U.S. Diversity General Education course and Social Science General Education course

EMGT 3020 FEDERAL/TRIBAL GOVERNMENT TO GOVERNMENT RELATIONS (3 credits)

This course will introduce the Federal/Tribal government to government relationship that has evolved through U.S. Supreme Court case law; federal Indian policy; and through the Indian Self Determination and Education Assistance Act of 1975. Specifically, this course will focus on overcoming the challenges of implementing Emergency Management principles between the U. S. and Tribal governments by understanding how the government to government relationship works.

Prerequisite(s)/Corequisite(s): EMGT 1150; (can be taken currently with EMGT 1150 with instructor approval).

EMGT 3040 PREPAREDNESS/PLANNING AND RISK MITIGATION (3 credits)

Provision of emergency and management of emergency services is dependent on extensive planning and preparedness. This process aids in the reduction of loss of property and life in extreme circumstances, even when confronted with a variety of environmental and politically motivated risks. An open society, which becomes ever more highly technological, demonstrates new sources of stress, complicated threats, and complex inter-relationships. Together, these factors present a significant challenge to those tasked with preventing and managing emergencies and disasters. This course provides a theoretical framework for the understanding of the ethical, sociological, organizational, political, and legal components of community risk analysis and mitigation, and a methodology for the development of comprehensive community risk preparedness planning.

Prerequisite(s)/Corequisite(s): EMGT 2020, EMGT 2050, PA 3000 / CRCJ 3000 or concurrent.

EMGT 3080 AGENCY COLLABORATION DURING DISASTERS (3 credits)

Federal, state, and local agency cooperation and interoperability in the provision of emergency management will be studied in this course. Federal, state, and local government authority and roles will be explored in concert with collaborative management programs. The origins of collaborative partnerships will be presented along with introduction of the Emergency Management Assistance Compact, development of volunteer networks, and formation of partnerships with the Citizen Corps, Community emergency Response Teams, the Medical Reserve Corps and Mercy Medical Airlift, and other groups that have the potential to contribute to the emergency management and response effort.

Prerequisite(s)/Corequisite(s): EMGT 2020, EMGT 2050, PA 3000 / CRCJ 3000 or concurrent.

EMGT 4020 PROTECTING AND SUSTAINING TRIBAL ECONOMIES (3 credits)

This course provides an understanding of unique tribal economies and how they operate under tribal law, constitutions and federal legislation, as well as an appreciation of how vulnerable tribal economies are to man-made and natural disasters. This course will also introduce Emergency Management principles and practices designed to assist tribal governments in protecting and sustaining their economies during crisis events.

Prerequisite(s)/Corequisite(s): EMGT 1150 Introduction to Tribal Management and Emergency Services

EMGT 4050 INTEGRATION OF CONTEMPORARY ISSUES IN TRIBAL EMERGENCY MANAGEMENT (3 credits)

This course covers application and integration of Tribal Management and Emergency Service (TMES) principles and practices, as well as contemporary issues affecting Tribal nations and their citizens; recent federal/tribal TMES legislation and case law; Federal/Tribal agency collaborative efforts; TMES Tribal Code development and implementation; and TMES funding resources such as PL 93-638 Contracts, grants and tribal taxation.

Prerequisite(s)/Corequisite(s): EMGT 1150

EMGT 4060 DISASTER RESPONSE AND RECOVERY (3 credits)

This course examines concepts and principles of: 1) community risk assessment, 2) disaster recovery planning, 3) responses specific to fires and natural and man-made disasters, 3) National Incident Management System and the Incident Command System (NIMS ICS), 4) mutual aid and automatic response, 5) training and preparedness, 6) communications, 7) civil disturbances, 8) terrorist threats/incidents, 9) hazardous materials planning, 10) mass casualty incidents, 11) earthquake preparedness, and 12) disaster mitigation and recovery.

Prerequisite(s)/Corequisite(s): EMGT 3040 (May be taken concurrently or by instructor's permission)

EMGT 4200 INTERNSHIP IN EMERGENCY MANAGEMENT (3 credits)

This course is designed to provide direct work experience in the emergency management field for selected students. This experience will be in a full-time or part-time, preferably paid position, in a highly structured environment. Student will be selected following formal job placement procedures and screening by Emergency Management Faculty and the participating organization. This course is intended for upper level, Emergency Management majors who have been selected following an application and interview process approved by both the School of Public Administration and the intern provider.

Prerequisite(s)/Corequisite(s): PA 3000 / CRCJ 3000; EMGT 3040, EMGT 3080, EMGT 4060; Instructor's Permission Required.

EMGT 4800 SPECIAL READING IN EMERGENCY MANAGEMENT (3 credits)

This course is intended for upper-level Emergency Management degree students who are pursuing advanced specialized areas of knowledge in Emergency Management. The course is conducted under an independent study format, and subject matter will vary based on the interests of the student. Learning outcome objectives will be established by the instructor and shall remain consistent with Emergency Management curriculum goals. Faculty approval is required prior to registration.

Prerequisite(s)/Corequisite(s): Prerequisites will be established by the coordinating instructor to meet the foundational knowledge requirements for the area being studied. Not open to non-degree or non-degree graduate students. Students will need faculty approval.

EMGT 4900 SPECIAL TOPICS IN EMERGENCY MANAGEMENT (3 credits)

This course is meant to provide upper-level EMGT students with an in-depth look at current and future issues affecting the Emergency Management industry and industry professionals. Possible topics include disaster case studies, comparative international studies, issues in federalism, and Continuity of Operations (COOP). Subject matter will vary by student interest and by faculty preference. Students may repeat the course for additional academic credit as long as the course topic is not duplicated.

Prerequisite(s)/Corequisite(s): Prerequisites will be established by the coordinating instructor to meet the foundational knowledge requirements for the area being studied. Not open to non-degree or non-degree graduate students. Students will need faculty approval.

EMGT 4990 CAPSTONE PROJECT IN EMERGENCY MANAGEMENT (3 credits)

This course fulfills the Emergency Management Capstone senior project demonstrating expertise on a specific issue area and/or problem in emergency management. The student will be required to construct and execute a research project analyzing a contemporary operational, economic, or managerial issue within emergency management utilizing an appropriate research or analytical methodology. Both a written report and PowerPoint presentation will be presented as part of the course requirements.

Prerequisite(s)/Corequisite(s): PA 3000 / CRCJ 3000; EMGT 3040, EMGT 3080, EMGT 4060; Writing in the Discipline course; all with a C- or better; Instructor's Permission Required.

FSMT 1600 FUNDAMENTALS OF FIRE SCIENCE (3 credits)

Fundamentals of Fire Science is an applied science which focuses on basic understanding of the chemical and physical nature of fire. Students will learn about common fire hazards, extinguishing agent properties, as well as fire ignition and growth phenomena.

Distribution: Natural/Physical Science General Education course

FSMT 2200 CODES AND INSPECTIONS (3 credits)

Fire protection requirements, including zoning laws and primary access routes for flammable and explosive materials will be discussed. Major considerations and rationales employed in the formulation and creation of zoning and building codes are examined and exploration and understanding of local, state and national codes are also introduced. Safety education program development and implementation, fire inspection techniques and fire investigation procedures are additionally covered.

Prerequisite(s)/Corequisite(s): EMGT 1000 or concurrent.

FSMT 2300 FIRE INVESTIGATION (3 credits)

The origin and cause of fire and explosion incidents will be explored. Fire and arson investigation procedures such as on-site investigations and inspections, documentation, and fact gathering, collection of witness statements and canvassing, and procedures for gathering and storage of critical evidence will be presented. Legal and jurisdictional issues affecting fire investigation will also be discussed.

Prerequisite(s)/Corequisite(s): EMGT 1000 or concurrent

FSMT 2310 FIRE PROTECTION SYSTEMS (3 credits)

A study of the procedures necessary to evaluate the firefighting requirements and how these needs drive the design and utilization of various types of fire protection equipment, including design of structural protection systems and associated construction materials, fire detection technology and fire suppression systems.

Prerequisite(s)/Corequisite(s): EMGT 1000 or concurrent

FSMT 2410 STRATEGIES AND TACTICS IN FIRE AND EMERGENCY SERVICES (3 credits)

This course will provide examples of strategic and tactical considerations that members of the emergency services can employ during structure fires to include residential, commercial, high-rise, special hazard structures, and other types of emergencies like hazardous materials incidents, mass casualty emergencies, and technical rescues.

Prerequisite(s)/Corequisite(s): EMGT 1000

FSMT 2510 BUILDING CONSTRUCTION FOR THE FIRE SERVICE (3 credits)

The visible and hidden dangers inherently involved with fighting structural fires are examined in this course. Characteristics of construction materials, construction types, fire protection systems, smoke development, fire containment, high rise construction and many other topics relevant to firefighter life safety as related to building construction issues will be studied and evaluated.

Prerequisite(s)/Corequisite(s): EMGT 1000 or concurrent.

FSMT 3020 FIRE DYNAMICS (3 credits)

This course examines the underlying principles involved in structural fire protection systems, building furnishings, and fire protection systems including water-based fire suppression systems, fire alarm and detection systems, special hazard suppression systems, and smoke management systems.

Prerequisite(s)/Corequisite(s): Students must have completed FSMT 1600.

FSMT 3140 FIRE RELATED HUMAN BEHAVIOR (3 credits)

The goal of Fire Related Human Behavior is to provide students with knowledge about how humans respond to fire and how that knowledge has been integrated into life safety systems design and development.

Prerequisite(s)/Corequisite(s): FSMT 2200

FSMT 3350 FIRE PREVENTION, ORGANIZATION, AND MANAGEMENT (3 credits)

This course examines the factors that shape fire risk and the tools for fire prevention, including risk reduction education, codes and standards, inspection and plans review, fire investigation, research, master planning, various types of influences, and strategies.

Prerequisite(s)/Corequisite(s): FSMT 2200

FSMT 3680 ANALYTICAL APPROACHES TO PUBLIC FIRE PROTECTION (3 credits)

This course examines rational decision making tools and techniques that can be used in Fire and Emergency Services agencies, including data collection, statistics, probability, decision analysis, utility modeling, resource allocation, and cost-benefit analysis.

Prerequisite(s)/Corequisite(s): FSMT 2200.

FSMT 4300 ADVANCED PRINCIPLES OF FIRE AND EMERGENCY SERVICES SAFETY AND SURVIVAL (3 credits)

This course introduces the basic principles and history related to the national firefighter life safety initiatives, focusing on the need for cultural and behavioral change within the emergency services industry relating to safety, incorporating leadership, supervision, accountability, and personal responsibility. Instruction utilizes the lessons learned from case studies and other investigations that support cultural change throughout emergency services administration.

Prerequisite(s)/Corequisite(s): FSMT 2410.

FSMT 4450 FIRE AND EMERGENCY SERVICES ADMINISTRATION (3 credits)

This course provides students with the knowledge to understand how to help the fire and emergency services administrator perform as an effective risk manager by recognizing legal and political issues affecting public safety, finding and applying appropriate legal rules and/or political constructs, and articulating supportable conclusions and recommendations.

Prerequisite(s)/Corequisite(s): FSMT 2410.

FSMT 4800 SPECIAL READINGS IN FIRE SERVICE MANAGEMENT (3 credits)

This course is intended for upper-level Fire Service Management degree students who are pursuing specialized areas of knowledge in Fire Services. The course is conducted under an independent study format, and subject matter will vary based on the interests of the student and learning outcome objectives established by the instructor. Faculty approval is required prior to registration.

Prerequisite(s)/Corequisite(s): Prerequisites will be established by the coordinating instructor to meet the foundational knowledge requirements for the area being studied. Not open to non-degree graduate students. EMGT students will need faculty approval.

FSMT 4860 APPLICATIONS OF FIRE RESEARCH (3 credits)

This course examines the basic principles of research and methodology for analyzing current fire-related research. The student will be able to understand the rationale that fire research organizations use for conducting fire-related research and evaluation.

Prerequisite(s)/Corequisite(s): FSMT 2410.

FSMT 4900 SPECIAL TOPICS IN FIRE SERVICE MANAGEMENT (3 credits)

This course is meant to provide upper-level FSMT students with an in-depth look at current and future issues affecting the Fire Services industry and industry professionals. Possible topics include fire case studies, comparative international studies, issues in federalism, fire education, and fiscal administration. Subject matter will vary by student interest and by faculty preference. Students may repeat the course for additional academic credit as long as the course topic is not duplicated.

Prerequisite(s)/Corequisite(s): Prerequisites will be established by the coordinating instructor to meet the foundational knowledge requirements for the area being studied. Not open to non-degree graduate students. EMGT students will need faculty approval.

Emergency Management (BSEM), Bachelor of Science

The Bachelor of Science in Emergency Management includes an interdisciplinary curriculum focusing on emergency management. The core coursework provides an overview of emergency management and the concentration areas sharpen student exposure to key areas of concern for disaster preparedness, hazard mitigation, response, and recovery. A minimum cumulative GPA of 2.0 is required to graduate.

The program prepares students academically for all levels of government employment as well as in nonprofit and private companies. Students will become adept at performing risk management, emergency preparedness planning and mitigation to support continuity of operations (COO), and sustainability of communities. Students will gain a thorough understanding of interagency cooperation, public/private partnership coordination, and communication as well as administrative issues involving policies and procedures, labor relations, and fiscal matters.

Requirements

A minimum of 120 credit hours is required for a Bachelor of Science in Emergency Management (BSEM). Thirty of the last 36 hours must be courses taken from the University of Nebraska at Omaha (UNO).

Registering for courses without having taken the stated prerequisites could result in administrative withdrawal.

To obtain a BSEM, a student must fulfill the University, College, and Program requirements. Some courses may satisfy requirements in more than one area, but credit is awarded only once. Grades of C- or better are required in the University General Education courses and in the 60 core hours.

- 40 to 46 hours of University General Education courses
- 30 hours of Emergency Management Core courses
- 30 hours in two 15-hour areas of concentration
- Elective hours as needed to reach 120 total credit hours

TOTAL HOURS: 120

Writing in the Discipline Courses:

The writing in the discipline courses for emergency management are:

Code	Title	Credits
AVN 3060	WRITING IN AVIATION	3
CRCJ 3100	WRITING FOR CRIMINAL JUSTICE	3
CIST 3000	ADVANCED COMPOSITION FOR IS&T	3
ENGL 2400	ADVANCED COMPOSITION	3
ENGL 3050	WRITING FOR THE WORKPLACE	3
ENGL 3980	TECHNICAL WRITING ACROSS THE DISCIPLINES	3
MKT 3200	BUSINESS COMMUNICATIONS	3

or a course approved by the academic advisor.

Courses Required for Major (Core Curriculum)

Code	Title	Credits
Emergency Management Core		
EMGT 1000	INTRODUCTION TO EMERGENCY MANAGEMENT	3
EMGT 2020	EMERGENCY MANAGEMENT STRATEGIES AND COMMUNICATION	3
EMGT 2050	POLITICAL AND LEGAL FOUNDATIONS IN EMERGENCY SERVICES	3
PA 2170	INTRODUCTION TO PUBLIC ADMINISTRATION	3
PA/SOWK/CRCJ 3000	APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR	3
EMGT 3040	PREPAREDNESS/PLANNING AND RISK MITIGATION	3
EMGT 3080	AGENCY COLLABORATION DURING DISASTERS	3
EMGT 4060	DISASTER RESPONSE AND RECOVERY	3
EMGT 4200	INTERNSHIP IN EMERGENCY MANAGEMENT	3
EMGT 4990	CAPSTONE PROJECT IN EMERGENCY MANAGEMENT	3
Total Credits		30

Concentration Areas (two 15-hour concentrations with 9 upper level hours in each)

- Aviation Administration
- Criminology and Criminal Justice
- Fire Service Management
- Gerontology
- Geospatial Science
- Information Technology and Communication

- Intelligence and Security
- Logistics Management
- Natural Disasters
- Nonprofit Management
- Planning and Preparing for Urban Hazards
- Private Sector Management
- Public Administration and Management
- Public Health
- Tribal Management and Emergency Services
- Unmanned Aircraft Systems

Aviation Administration

An emphasis on threats related to air travel, airport security, and disaster response.

Code	Title	Credits
Required Courses:		
AVN 1000	INTRODUCTION TO AVIATION AND AEROSPACE	3
AVN 2020	AIRLINE OPERATIONS	3
or AVN 2050	INTRODUCTION TO AIRPORT ADMINISTRATION	
AVN 4080	AIRPORT SAFETY AND SECURITY	3
Select six credit hours at the upper level from the following:		6
AVN 3000	BUSINESS AND CORPORATE AVIATION	
AVN 3150	AVIATION LAW	
AVN 3090	AIRPORT ADMINISTRATION AND PLANNING	
AVN 3600	INTERNATIONAL AVIATION	
AVN 3700	TRANSPORTATION ANALYSIS	
AVN 4050	GENERAL AVIATION OPERATIONS	
Total Credits		15

Criminology and Criminal Justice

An emphasis on the role of law enforcement in emergency situations and threat management, and emergencies in prison/institutional settings.

Code	Title	Credits
Required Course:		
CRCJ 1010	SURVEY OF CRIMINAL JUSTICE	3
Select 12 credit hours, 9 at the upper-level, from the following:		12
CRCJ 2030	POLICE AND SOCIETY	
CRCJ 2110	CRIMINAL COURT SYSTEM	
CRCJ 2210	SURVEY OF CORRECTIONS	
CRCJ 2220	COMMUNITY-BASED CORRECTIONS	
CRCJ 3350	CRIMINOLOGY	
CRCJ 3370	JUVENILE DELINQUENCY AND JUVENILE JUSTICE	
CRCJ 3380	RACE, ETHNICITY, AND CRIMINAL JUSTICE	
CRCJ 3390	WOMEN, CRIME AND JUSTICE	
CRCJ 4060	CRIMINAL JUSTICE ETHICS	
CRCJ 4210	INSTITUTIONAL CORRECTIONS	
CRCJ 4410	VICTIMOLOGY	
CRCJ 4520	DRUGS AND CRIME	
CRCJ 4550	GANGS AND GANG CONTROL	
CRCJ 4760	TERRORISM	
CRCJ 4790	CYBER & COMPUTER CRIMES	
Total Credits		15

Fire Service Management

An emphasis on fire safety and technology and the role of fire and rescue services in emergency and disaster situations.

Code	Title	Credits
Required Courses:		
FSMT 2200	CODES AND INSPECTIONS	3
FSMT 2410	STRATEGIES AND TACTICS IN FIRE AND EMERGENCY SERVICES	3
FSMT 3350	FIRE PREVENTION, ORGANIZATION, AND MANAGEMENT	3
FSMT 3680	ANALYTICAL APPROACHES TO PUBLIC FIRE PROTECTION	3
FSMT 4450	FIRE AND EMERGENCY SERVICES ADMINISTRATION	3
Total Credits		15

Gerontology

An emphasis on the physical, psychological, and social aspects of aging with special attention to protecting this population in times of disaster.

Code	Title	Credits
Required Courses:		
GERO 2000	INTRODUCTION TO GERONTOLOGY	3
GERO 4460	PSYCHOLOGY OF ADULT DEVELOPMENT AND AGING	3
GERO 4670	PROGRAMS AND SERVICES FOR THE ELDERLY	3
Select six credit hours from the following:		6
GERO 4350	ISSUES IN AGING ¹	
GERO/PSYC 4470	MENTAL HEALTH AND AGING	
GERO 4500	LEGAL ASPECTS OF AGING	
GERO/PA 4510	LONG-TERM CARE ADMINISTRATION	
GERO/PHHB/WGST 4550	HEALTH ASPECTS OF AGING	
GERO 4690/SOWK 4040	WORKING WITH MINORITY ELDERLY	
GERO 4940	PRACTICUM	
Total Credits		15

¹ GERO 4350 (*Topic must be approved by academic advisor*)

Geospatial Science

An emphasis on the use of Geographic Information Systems, Remote Sensing, Global Positioning and Cartography, to understand people, places and their relative position on earth's surface, which aids in planning, preparedness and assistance in emergency situations.

Code	Title	Credits
Select one course from the following:		3
GEOG 1000	FUNDAMENTALS OF WORLD REGIONAL GEOGRAPHY	
GEOG 1020	INTRODUCTION TO HUMAN GEOGRAPHY	
GEOL 1010	ENVIRONMENTAL GEOLOGY	
Select one course from the following:		4
GEOG 1030	INTRODUCTION TO PHYSICAL GEOGRAPHY	
GEOG 1050	HUMAN-ENVIRONMENT GEOGRAPHY	
GEOG 1090	INTRODUCTION TO GEOSPATIAL SCIENCES	

Select courses from the following to reach a 15 hour minimum: 8

GEOG 3530 & GEOG 3540	CARTOGRAPHY AND DATA VISUALIZATION and FUNDAMENTALS OF GEOSPATIAL DATA SCIENCE	
GEOG 4020	SPATIAL ANALYSIS IN GEOGRAPHY	
GEOG 4030	COMPUTER MAPPING AND VISUALIZATION	
GEOG 4050	GEOGRAPHIC INFORMATION SYSTEMS I	
GEOG 4630	ENVIRONMENTAL REMOTE SENSING	
GEOG 4660	GEOGRAPHIC INFORMATION SYSTEMS II	
Total Credits		15

Information Technology and Communication

An emphasis on communication systems, information sharing and access, and threats to information assurance and security.

Code	Title	Credits
Required Courses:		
CYBR 1100	INTRODUCTION TO INFORMATION SECURITY	3
CIST 2100	ORGANIZATIONS, APPLICATIONS AND TECHNOLOGY	3
ISQA 3420	MANAGING IN A DIGITAL WORLD	3
Select six credit hours at the upper level, from the following:		6
CIST 3110	INFORMATION TECHNOLOGY ETHICS	
ISQA 3910	INTRODUCTION TO PROJECT MANAGEMENT	
CIST/CYBR 3600	INFORMATION SECURITY POLICY AND AWARENESS	
CYBR 4360	FOUNDATIONS OF CYBERSECURITY	
ISQA 3310	MANAGING THE DATABASE ENVIRONMENT	
ISQA 3400	INFORMATION TECHNOLOGY INFRASTRUCTURE	
ISQA/ITIN 4880	SYSTEMS SIMULATION AND MODELING	
Total Credits		15

Intelligence and Security

An emphasis on intelligence gathering and analysis and the role of politics in the formation of national and international security programs.

Code	Title	Credits
Required Courses:		
PSCI 2210	INTRODUCTION TO INTERNATIONAL RELATIONS	3
PSCI 3260	UNITED STATES FOREIGN POLICY	3
PSCI 4250	INTELLIGENCE AND NATIONAL SECURITY	3
Select six credit hours, 3 at the upper level, from the following:		6
PSCI 2500	INTRODUCTION TO COMPARATIVE POLITICS	
PSCI 3220	INTERNATIONAL ORGANIZATIONS	
PSCI 3250	GLOBAL SECURITY ISSUES	
PSCI 3500	EUROPEAN POLITICS	
PSCI 3580	GOVERNMENT AND POLITICS OF RUSSIA AND THE POST-SOVIET STATES	
PSCI 3640	GOVERNMENT AND POLITICS OF CHINA AND EAST ASIA	

PSCI/LLS 3680	GOVERNMENT AND POLITICS OF LATIN AMERICA
PSCI 3700	GOVERNMENT AND POLITICS OF THE MIDDLE EAST
PSCI 4200	INTERNATIONAL RELATIONS OF EAST ASIA
PSCI 4210	INTERNATIONAL RELATIONS OF THE MIDDLE EAST
PSCI 4240	INTERNATIONAL CONFLICT RESOLUTION
PSCI 4260	INTERNATIONAL LAW
PSCI/ENVN 4270	GLOBAL ENVIRONMENTAL POLITICS
PSCI/LLS 4280	INTERNATIONAL RELATIONS OF LATIN AMERICA
PSCI 4620	ISLAM AND POLITICS
PSCI 4500	GOVERNMENT AND POLITICS OF GREAT BRITAIN
PSCI 4520	POLITICS OF FRANCE

Total Credits 15

Logistics Management

An emphasis on management and coordination of resources to support government and private sector operations in normal and emergency situations.

Code	Title	Credits
Required Courses:		
SCMT 3410	SUSTAINABLE SUPPLY CHAIN MANAGEMENT	3
SCMT 4380	INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT	3
Nine credit hours from the following: 9		
ACCT 2000	ACCOUNTING BASICS FOR NON-BUSINESS MAJORS	
ACCT 2010	PRINCIPLES OF ACCOUNTING I	
ACCT 2020	PRINCIPLES OF ACCOUNTING II	
ECON 1200	AN INTRODUCTION TO THE U.S. ECONOMY	
ECON 2200	PRINCIPLES OF ECONOMICS (MICRO)	
ECON 2220	PRINCIPLES OF ECONOMICS (MACRO)	
MGMT 3490	MANAGEMENT	
SCMT 2000	SURVEY OF SUPPLY CHAIN MANAGEMENT	
SCMT 3000	MANAGERIAL ACCOUNTING FOR SUPPLY CHAIN MANAGEMENT	
SCMT 3500	OPERATIONS MANAGEMENT	
SCMT/ISQA 4160	INTRODUCTION TO ENTERPRISE RESOURCE PLANNING	
SCMT 4330	PROJECT MANAGEMENT	
SCMT 4350	GLOBAL SOURCING AND INNOVATION	
SCMT 4370	SUPPLY CHAIN ANALYTICS	
SCMT 4450	MANAGERIAL NEGOTIATION STRATEGIES	
SCMT 4540	SUPPLY CHAIN MANAGEMENT INTERNSHIP	

Total Credits 15

Natural Disasters

An emphasis on naturally occurring disasters and their scientific nature including prediction, preparedness and response.

Code	Title	Credits
Select two courses from the following: 7-8		
GEOG 1030	INTRODUCTION TO PHYSICAL GEOGRAPHY	
GEO 1010	ENVIRONMENTAL GEOLOGY	
GEOG 1050	HUMAN-ENVIRONMENT GEOGRAPHY	
Select two courses from the following to reach a 15 hour minimum: 7-8		
GEOG 3510 & GEOG 3514	METEOROLOGY and INTRODUCTION TO METEOROLOGY LABORATORY	
GEOG 3440	NEBRASKA NATURAL RESOURCES MANAGEMENT	
GEOG 4010	CONSERVATION OF NATURAL RESOURCES	
GEOG 4260	PROCESS GEOMORPHOLOGY	
GEOG 4320	CLIMATOLOGY	
GEOG 4330	SOIL GENESIS, MORPHOLOGY AND CLASSIFICATION	
GEOG 4340	WATER RESOURCES	
GEOG 4350	GLOBAL CLIMATE CHANGE	

Total Credits 14-16

Nonprofit Management

An emphasis on the role of nonprofit organizations during times of disaster including foundational knowledge of financial management, community change, marketing and managing volunteer and staff within the organization.

Code	Title	Credits
Required Courses:		
PA 3500	NONPROFIT ORGANIZATIONS AND MANAGEMENT	3
PA 4500	NONPROFIT FUNDRAISING	3
PA 3600	PERSONNEL AND VOLUNTEER MANAGEMENT IN NONPROFITS	3
PA 3700	FINANCIAL MANAGEMENT FOR NONPROFITS	3
PA 4100	MARKETING IN PUBLIC, NON-PROFIT AND AVIATION ORGANIZATIONS	3

Total Credits 15

Planning and Preparing for Urban Hazards

An emphasis on geography including human populations and their impact on dealing with urban hazards, such as natural or manmade disasters.

Code	Title	Credits
Select two courses from the following: 6-7		
GEOG 1000	FUNDAMENTALS OF WORLD REGIONAL GEOGRAPHY	
GEOG 1020	INTRODUCTION TO HUMAN GEOGRAPHY	
GEOG 1030	INTRODUCTION TO PHYSICAL GEOGRAPHY	
GEOG 1050	HUMAN-ENVIRONMENT GEOGRAPHY	
UBNS/PA 1010	INTRODUCTION TO URBAN STUDIES	
Select courses from the following to reach a 15 hour minimum: 9		
GEOG/ECON 3130	ECONOMIC GEOGRAPHY	
GEOG 3930	POLITICAL GEOGRAPHY	
GEOG 4120	URBAN GEOGRAPHY	

GEOG 4160	URBAN SUSTAINABILITY	
Total Credits		15-16

Private Sector Management

Emphasis on business principles including business continuity planning, sustainability and resiliency.

Code	Title	Credits
Required Courses:		
ACCT 2000	ACCOUNTING BASICS FOR NON-BUSINESS MAJORS	3
or ACCT 2020	PRINCIPLES OF ACCOUNTING II	
ECON 2200	PRINCIPLES OF ECONOMICS (MICRO)	3
MKT 3310	PRINCIPLES OF MARKETING	3
MGMT 3490	MANAGEMENT	3
ENTR 3710	ENTREPRENEURIAL FOUNDATIONS	3
Total Credits		15

Public Administration and Management

An emphasis on budgeting, organizational structure, human resources, and planning

Code	Title	Credits
Required Courses:		
PA 4300	SEMINAR IN PUBLIC POLICY	3
PA 4390	PUBLIC BUDGETING	3
PA 4410	PUBLIC PERSONNEL MANAGEMENT	3
Select six credit hours from the following:		6
PA 2000	LEADERSHIP & ADMINISTRATION	
PA 4430	MUNICIPAL ADMINISTRATION	
PA 4440	ORGANIZATIONAL DEVELOPMENT AND CHANGE	
PA 4530	STRATEGIC PLANNING	
Total Credits		15

Public Health

Emphasis on the role of healthcare in disaster situations including epidemics, pandemics, bio-terrorism and other public health issues.

Code	Title	Credits
Required Courses:		
PHHB 1500	FOUNDATIONS IN PUBLIC HEALTH	3
PHHB 4130	COMMUNITY HEALTH	3
PHHB 4880	PUBLIC HEALTH POLICY	3
Select six credit hours from the following:		6
PHHB 3310	INJURY PREVENTION IN PUBLIC HEALTH	
PHHB 4040	EPIDEMIOLOGY & PREVENTION OF DISEASE	
PHHB 4950	PUBLIC HEALTH LEADERSHIP AND ADVOCACY	
PHHB 4960	PUBLIC HEALTH - PLANNING AND ORGANIZATION	
Total Credits		15

Tribal Management and Emergency Services

Emphasis on the knowledge of tribal government and law as well as how tribal governments interface with the local, state and federal government.

Code	Title	Credits
Required Courses:		
EMGT 1150	INTRODUCTION TO TRIBAL MANAGEMENT AND EMERGENCY SERVICES	3
EMGT 2060	FOUNDATIONAL INDIAN LAW & POLICY ISSUES	3
EMGT 2500	DISASTERS AND VULNERABLE POPULATIONS	3
EMGT 3020	FEDERAL/TRIBAL GOVERNMENT TO GOVERNMENT RELATIONS	3
EMGT 4050	INTEGRATION OF CONTEMPORARY ISSUES IN TRIBAL EMERGENCY MANAGEMENT	3
Total Credits		15

Unmanned Aircraft Systems

Emphasis on flying unmanned aircraft and the skills to manage a full operation and utilize the data an imagery collected.

Code	Title	Credits
Required Courses:		
AVN 1020	PRIVATE PILOT THEORY	3
AVN 1500	INTRODUCTION TO UNMANNED AIRCRAFT SYSTEMS	3
AVN 2500	UNMANNED AIRCRAFT SYSTEMS FLIGHT OPERATIONS	3
AVN 4500	ADVANCED UNMANNED AIRCRAFT SYSTEMS PROCEDURES	3
Select one course from the following:		3
AVN 3040	HUMAN FACTORS IN AVIATION SAFETY	
AVN 3700	TRANSPORTATION ANALYSIS	
AVN 4990	AIR TRANSPORTATION	
AVN 4200	INTERNSHIP IN AVIATION	
ENTR 3710	ENTREPRENEURIAL FOUNDATIONS	
GEOG 3510	METEOROLOGY	
GEOG 4050	GEOGRAPHIC INFORMATION SYSTEMS I	
GEOG 4630	ENVIRONMENTAL REMOTE SENSING	
Total Credits		15

¹ For more information on Concentration requirements, please see academic advisor.

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

- A 2.0 GPA is required to graduate.
- Grades of C- or better are required for general education, major and concentration courses.

Graduation Requirements:

- 120 credit hours with a cumulative GPA of 2.0 or better
- 30 of the last 36 hours must be UNO courses

Emergency Management Minor

A minor in emergency management is designed for students with an interest in applying emergency management principles to their area of study. The minor provides an in depth cross-section of the emergency management profession. Students will gain valuable information that will enhance their primary field of study as well as their marketability in the public, private, and nonprofit sectors.

Requirements

The minor requires the following 18 credit hours with grades of C- or better:

Code	Title	Credits
EMGT 1000	INTRODUCTION TO EMERGENCY MANAGEMENT	3
EMGT 2020	EMERGENCY MANAGEMENT STRATEGIES AND COMMUNICATION	3
EMGT 2050	POLITICAL AND LEGAL FOUNDATIONS IN EMERGENCY SERVICES	3
EMGT 3040	PREPAREDNESS/PLANNING AND RISK MITIGATION	3
EMGT 3080	AGENCY COLLABORATION DURING DISASTERS	3
EMGT 4060	DISASTER RESPONSE AND RECOVERY	3

Total Credits 18

Fire Service Management Minor

A minor in fire service management provides an in depth cross-section of the fire service profession. The minor provides expertise in emergency fire response, and prepares students for the management of fire service

and public safety personnel, physical and financial resources, and risk identification. The minor is a stepping-stone for those interested in careers related to fire.

Requirements

The minor requires the following 18 credit hours with grades of C- or better:

Code	Title	Credits
EMGT 1000	INTRODUCTION TO EMERGENCY MANAGEMENT	3
FSMT 2200	CODES AND INSPECTIONS	3
FSMT 2410	STRATEGIES AND TACTICS IN FIRE AND EMERGENCY SERVICES	3
FSMT 3350	FIRE PREVENTION, ORGANIZATION, AND MANAGEMENT	3
FSMT 3680	ANALYTICAL APPROACHES TO PUBLIC FIRE PROTECTION	3
FSMT 4450	FIRE AND EMERGENCY SERVICES ADMINISTRATION	3
Total Credits		18

Tribal Management and Emergency Services Minor

Tribal management and emergency services provides an in depth cross-section of the tribal management and emergency services profession. At present, there are more than 575 recognized U.S. Tribal Nations. Each of these nations possess inherent rights of self-governance that are expected to simultaneously conduct governmental tribal functions while cooperating and complying with many local, state, and federal government regulations and laws.

This complex system of administration presents many challenges for Native Governments, particularly when faced with natural or man-made disasters that threaten tribal lands and interests. These threats to tribal communities are often compounded by lack of resources existing in reservation populations. Understanding the complex legal, historical, and cultural issues affecting tribal government management and provision of crisis response is essential to provide routine and emergency services to native communities.

Requirements

The minor requires the following 18 credit hours with grades of C- or better:

Code	Title	Credits
EMGT 1150	INTRODUCTION TO TRIBAL MANAGEMENT AND EMERGENCY SERVICES	3
EMGT 2060	FOUNDATIONAL INDIAN LAW & POLICY ISSUES	3
EMGT 2500	DISASTERS AND VULNERABLE POPULATIONS	3
EMGT 3020	FEDERAL/TRIBAL GOVERNMENT TO GOVERNMENT RELATIONS	3
EMGT 4020	PROTECTING AND SUSTAINING TRIBAL ECONOMIES	3
EMGT 4050	INTEGRATION OF CONTEMPORARY ISSUES IN TRIBAL EMERGENCY MANAGEMENT	3
Total Credits		18

Tribal Management and Emergency Services Certificate

Tribal management and emergency services provides an in depth cross-section of the tribal management and emergency services profession. At present, there are more than 575 recognized U.S. Tribal Nations. Each of these nations possess inherent rights of self-governance that are expected to simultaneously conduct governmental tribal functions while cooperating and complying with many local, state, and federal government regulations and laws.

This complex system of administration presents many challenges for Native Governments, particularly when faced with natural or man-made disasters that threaten tribal lands and interests. These threats to tribal communities are often compounded by lack of resources existing in reservation populations. Understanding the complex legal, historical, and cultural issues affecting tribal government management and provision of crisis response is essential to provide routine and emergency services to native communities.

Requirements

The certificate requires 15 credit hours of the following with grades of C- or better.

Code	Title	Credits
EMGT 1150	INTRODUCTION TO TRIBAL MANAGEMENT AND EMERGENCY SERVICES	3
EMGT 2060	FOUNDATIONAL INDIAN LAW & POLICY ISSUES	3
EMGT 3020	FEDERAL/TRIBAL GOVERNMENT TO GOVERNMENT RELATIONS	3
EMGT 4020	PROTECTING AND SUSTAINING TRIBAL ECONOMIES	3
EMGT 4050	INTEGRATION OF CONTEMPORARY ISSUES IN TRIBAL EMERGENCY MANAGEMENT	3
Total Credits		15

Gerontology

Mission:

We develop knowledge and inspire future leaders to positively influence the aging process and to advocate for older adults, their caregivers, and the communities in which they live.

General Information

Overview of Degree Programs

Bachelor of Science in Gerontology

The Bachelor of Science in Gerontology requires completion of 120 credit hours with a cumulative GPA of 2.0. Admission into the program requires a 2.50 GPA. The Bachelor of Science in Gerontology can be completed online with an Administration concentration or with certain minors.

Double Major or Double Degree in Gerontology

Due to the multidisciplinary nature of Gerontology, a double major or double degree may be applicable to many programs. Admission into the program requires a 2.50 GPA. A double major requires 42 credit hours.

Double Degree in Gerontology

Students must complete all general education, college requirements and major requirements for two programs with a minimum of 150 credit hours. Students will receive two diplomas and must meet the University Double Degree requirements outlined in the catalog.

Maximum/Minimum Credit Hours

Bachelor of Science in Gerontology – 120 credit hours
 Certificate in Gerontology – 18 credit hours (15 credit hours of coursework, 3 credit hours of practicum)
 Minor in Gerontology – 18 credit hours (at least 9 credits must be upper division)

Residency Requirement

Bachelor of Science in Gerontology:

Thirty out of the last thirty-six credit hours must be taken within the University of Nebraska System.

Twenty-one credit hours of Gerontology Core and Gerontology Electives must be taken at UNO or UNL.

Transfer Credit Policy

Transfer courses from other institutions must be a “C-” or higher.

Transfer coursework will only be accepted from regionally accredited institutions.

Bachelor of Science in Gerontology:

Sixty-four credit hours from regionally accredited two-year institutions may be applied toward the degree.

Twelve credit hours of military training can be applied to the degree.

Unacceptable Credits

Gerontology coursework from UNO, UNL and other institutions over 10 years old will be reviewed on an individual basis. Depending on current course content and updated research, older courses may not be applicable to the program.

Credit from technical programs such as Certificate Nursing Assistant (CNA) and Medical Assistant (MA) do not apply to Gerontology programs. Clinical hours from Nursing programs (RN, BSN & LPN) do not apply. Students with these types of transfer credits should consider the Gerontology concentration in the Division of Continuing Studies as an alternative.

Quality of Work

A 2.50 GPA is required for admission to any program.

Bachelor of Science in Gerontology:

All Gerontology coursework must be completed with a “C-” or higher.

Students must maintain a 2.0 GPA to be in good academic standing with the University.

Certificate in Gerontology:

All Gerontology courses must be completed with a “C” (2.0 GPA) average.

Minor in Gerontology:

All Gerontology courses must be completed with a “C” (2.0 GPA) average.

Completion of Incomplete Grade

Coursework must be completed by the end of the following semester, per University guidelines.

Repeating Courses

Allowed with no limit.

Administration of the Program

The Bachelor of Science is available on the UNO campus only (or online). The minor is available on the UNL and UNO campuses.

The UNO Department of Gerontology administers the Certificate in Gerontology program for all campuses of the University of Nebraska under an agreement approved by the Board of Regents in 1977. Students at UNL, UNO, UNK, and UNMC are thus able to earn the certificate as part of their academic work at the University of Nebraska.

In addition to undergraduate and graduate courses, the Department of Gerontology conducts research, community service, and provides educational programming for the community.

Student Group

Sigma Phi Omega

Academic Advising

Academic advising is provided for all students. The program recommends advising each semester to ensure degree completion. The academic advisor assists students with degree planning, course scheduling, addressing any questions or concerns regarding major/minor/certificate, academic performance, and/or policies and procedures. To contact an advisor, visit CPACS 210A, email hford@unomaha.edu or call 402.554.2114.

Contact Information

Department of Gerontology
 211 CPACS
 402.554.2272
unogero@unomaha.edu

Gerontology Department Website (<http://www.unomaha.edu/gero/>)

Admission Requirements

All undergraduate Gerontology programs require a 2.50 GPA to be admitted. Students should consult with their academic advisor on the best program to fit their needs. To set up an appointment, students should contact the academic advisor directly.

Degrees Offered

- Gerontology, Bachelor of Science (p. 734)

Code	Title	Credits
Gerontology Core ¹		
GERO 2000	INTRODUCTION TO GERONTOLOGY	3
GERO 3000	COMMUNITY RESOURCES FOR OLDER ADULTS	
or GERO 4670	PROGRAMS AND SERVICES FOR THE ELDERLY	
GERO 3070	DEATH AND DYING	3
GERO 3500	BIOLOGICAL PRINCIPLES OF AGING	3
GERO 4460	PSYCHOLOGY OF ADULT DEVELOPMENT AND AGING	3
GERO 4470	MENTAL HEALTH & AGING	3
GERO 4550	HEALTH ASPECTS OF AGING	3
GERO 4690	WORKING WITH MINORITY ELDERLY	3
Gerontology Electives ¹		
Select an additional 9 credit hours of Gerontology coursework, based on interests and career objectives.		9
Gerontology Practicum ²		
GERO 4940	PRACTICUM ^{3,4}	3

Statistics

Each student must complete three credit hour course in basic statistics. Acceptable courses include statistics courses include: 3

PA/CRCJ/SOWK 3000	APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR
STAT 3000	STATISTICAL METHODS I
SOC 2130	SOCIAL STATISTICS
STAT 1530	ELEMENTARY STATISTICS
PSYC 3130	STATISTICS FOR THE BEHAVIORAL SCIENCES

Other statistics courses may be approved by academic advisors.

Research Methods

Each student must complete three credit hour course in basic research methods. Acceptable courses include: 3

CRCJ 2510	RESEARCH METHODS
SOC 3510	RESEARCH METHODS

Other research methods courses may be approved by academic advisors.

Area of Concentration or Minor

Select an "Area of Concentration or Minor" 18

Total Credits 57

- Each course must be completed with a "C-" or higher. No CR/NC can be applied.
- Course must be completed with a "C" or higher. No CR/NC can be applied.
- Pre-requisite: 9 credit hours in Gerontology, 2.50 GPA
- To facilitate important real-world experience before graduation, all students will complete 156 hours in a practicum site of their choice.

Writing in the Discipline

Students must complete a writing in the discipline course to demonstrate further development of the writing skills learned in foundational composition courses, to engage the major discipline's research practices, and to demonstrate command of the major discipline's discourse practices, vocabulary, and style. Approved writing in the discipline course are MKT 3200 Managerial Communication, ENGL 2400 Advanced Composition, ENGL 3980 Technical Writing, and ENGL 3050 Writing for the Workplace.

Double Major in Gerontology

Students who choose a double major in gerontology will earn one diploma and will complete all general education, college requirements and major requirements for one program, while completing only Gerontology major coursework for their second major.

Minors Offered

- Gerontology Minor (p. 737)

Certificates Offered

- Gerontology Certificate (p. 736)

Gerontology is the study of the physical, psychological, and social aspects of aging. It also includes the built environment such as homes, buildings, streets, open spaces, and infrastructure. The field of aging is multidisciplinary. Because of this, the gerontology degree allows students to have flexibility with coursework and is tailored to each student's needs and goals. Students will choose a concentration within the major including pre-health, administration, or healthy aging. Students will complete a practicum in the community, providing students with invaluable real-world experience to prepare them to work with aging adults and their families. A degree in

Gerontology can also easily be integrated with majors and minors in other disciplines to expand into many various career opportunities.

- Adult Day Program Director
- Aging Services Administrator
- Program Specialist/Director
- Social Services Coordinator
- Life Enrichment Coordinator
- Activity Director
- Information and Referral Specialist
- Volunteer coordinator/manager
- Geriatric Case Manager
- Long Term Care Administrator
- Adult Protective Services worker
- Advocate/Ombudsman
- Research/Data Analysis
- Professional programs including nursing, medicine, physical therapy, occupational therapy, law, interior design, etc.

GERO 2000 INTRODUCTION TO GERONTOLOGY (3 credits)

An introduction to social gerontology and human development in later life; emphasis is on important elements of aging, such as socialization, family interaction, retirement, physical and psychological aging, and perceptions of older persons in contemporary society.

Distribution: Social Science General Education course and U.S. Diversity General Education course

GERO 3000 COMMUNITY RESOURCES FOR OLDER ADULTS (3 credits)

This course is designed to introduce the student to community resources for older adults, to identify the organizations and individuals in the public and private sectors that help support aging in place, and to examine the impact of the efforts on older adults at the national, state and local levels.

Prerequisite(s)/Corequisite(s): Completion of GERO 2000. Not open to non-degree graduate students.

GERO 3070 DEATH AND DYING (3 credits)

An interdisciplinary survey of literature in the field of thanatology, with an emphasis on working with the older patient and his or her family. (Cross-listed with PHHB 3070).

GERO 3500 BIOLOGICAL PRINCIPLES OF AGING (3 credits)

The Biological Bases of Aging Course provides a survey of the primary topics in the biology of aging field for undergraduate students. This a required course for the Gerontology major. By the end of the course, students will understand major theories, biological methods, and seminal research studies in the biology of aging field. Furthermore, students will learn how to critically analyze and interpret primary research about biological aging. This course provides preparation for students considering graduate school in gerontology or biology, geriatric nursing and social work, geriatric medicine, neuroscience, psychology, and exercise science. (Cross-listed with BIOL 3500, NEUR 3500)

Prerequisite(s)/Corequisite(s): Sophomore/Junior/Senior Standing. Not open to non-degree graduate students.

GERO 4050 ADVANCED BIOLOGY OF AGING (3 credits)

This course covers biological aging topics at an advanced level, and is designed for undergraduate and graduate students who have some prior knowledge about biology or aging. The course will be interdisciplinary in nature and focus on topics relevant to gerontology, biology, psychology, and exercise science. Students will learn how to think critically about primary research in the biology of aging. Furthermore, they will apply their knowledge of the biology of aging field by creating a handbook of healthy aging for older adults. (Cross-listed with GERO 8056, NEUR 4050).

GERO 4100 EDUCATIONAL GERONTOLOGY (3 credits)

An introduction to the field of education for and about the aging. The institutions and processes of education will be analyzed to determine their relationships and value to persons who are now old and those who are aging. (Cross-listed with GERO 8106).

Prerequisite(s)/Corequisite(s): Students must have a junior, senior or graduate student status.

GERO 4200 VOLUNTEER MANAGEMENT (3 credits)

The purpose of this course is to equip managers of volunteers in aging services to develop, maintain, assess impact and evaluate a sustainable volunteer program that will provide reliable and necessary services to older adults and further to be embraced as a valuable asset by professionals working in the field of aging. (Cross-listed with GERO 8206).

Prerequisite(s)/Corequisite(s): Junior or Senior Standing

GERO 4350 ISSUES IN AGING (3 credits)

This course is intended for students in gerontology and in other fields who are interested in a humanistic approach to understanding significant issues which affect the lives of older people. (Cross-listed with GERO 8356).

GERO 4420 RECREATION FOR THE AGING (3 credits)

Role of leisure services as related to understanding and working with elders. Emphasis on recreation programming as a mode of intervention. Analysis and study of the phases of aging, with reference to psychomotor, affective, and cognitive changes; introduction to the theories of aging and how they relate to the lifestyle of this population; recreational therapy intervention, activity adaptation and program design; leisure education and issues and trends. (Cross-listed with GERO 8426, RLS 4420, RLS 8426).

GERO 4460 PSYCHOLOGY OF ADULT DEVELOPMENT AND AGING (3 credits)

The focus of this course is on the major social and psychological changes that occur as a function of aging. Both normal and abnormal patterns of developmental change are examined, along with their implications for behavior. (Cross-listed with PSYC 4460, GERO 8466).

Prerequisite(s)/Corequisite(s): Junior or senior.

GERO 4470 MENTAL HEALTH & AGING (3 credits)

The goal of this course is to survey the mental health needs of older adults. Consideration is given to identifying both positive mental health and pathological conditions. Treatment interventions effective with older adults and their families are also discussed. (Cross-listed with GERO 8476, PSYC 4470, PSYC 8476).

Prerequisite(s)/Corequisite(s): Junior or senior.

GERO 4480 GLOBAL AGING (3 credits)

The study of aging around the world by a comparative method in a cross-cultural and cross-national framework. An explanation of some practical experiences and developments in Europe, Asia and Africa will be examined. (Cross-listed with GERO 8486).

GERO 4500 LEGAL ASPECTS OF AGING (3 credits)

This course centers on the legal concerns likely to arise as people age. We will discuss the American legal system with an emphasis on underlying legal concepts and issues of special importance to older persons. Some of the topics include guardianship, finances in retirement, abuse and neglect, Social Security, and Medicare and Medicaid. Consideration of the legal concerns which are likely to arise as people age. Includes introduction to American legal system, and emphasis on underlying legal concepts and issues of special importance to older persons. (Cross-listed with GERO 8506).

GERO 4510 LONG-TERM CARE ADMINISTRATION (3 credits)

An investigation of the broad range of policy issues, theoretical concerns and practical management strategies influencing the design, organization and delivery of long-term care services. (Cross-listed with GERO 8516, PA 4510, PA 8516).

GERO 4520 SENIOR HOUSING (3 credits)

The senior housing course is designed to provide students with an in-depth understanding of the various housing options available to older adults including aging in place to hospice. At the end of the course students will have a working knowledge of the needs of older adults and how this is used in making decisions about housing. (Cross-listed with GERO 8526).

Prerequisite(s)/Corequisite(s): Junior/Senior Standing

GERO 4550 HEALTH ASPECTS OF AGING (3 credits)

This course emphasizes health promotion for older adults. Special health needs of older Americans are compared and contrasted with health needs for other age groups. Prevention or delaying of chronic diseases and disorders are emphasized. (Cross-listed with GERO 8556, PHHB 4550, PHHB 8556, WGST 4550).

GERO 4560 NUTRITION AND AGING (3 credits)

The goal of this course is to provide an understanding of the relationship between nutrition and successful or usual aging. This course will review the basics of good nutrition and relate them to the usual food intake of older adults. It will identify the impact of poor nutrition. This course will also look at the role nutrition plays in various disease processes that are associated with aging. It will provide information about support services that are available to assure good nutrition into old age for those living independently. (Cross-listed with GERO 8566).

Prerequisite(s)/Corequisite(s): Junior Standing.

GERO 4670 PROGRAMS AND SERVICES FOR THE ELDERLY (3 credits)

This course is provided to give the student an historical overview of programs for the elderly; examine the national policy process as it relates to the older American; and review the principles and practices relative to the existing national programs for the aged. (Cross-listed with GERO 8676, PA 8676).

Prerequisite(s)/Corequisite(s): Junior or senior. Not open to non-degree graduate students.

GERO 4690 WORKING WITH MINORITY ELDERLY (3 credits)

This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 8696, SOWK 4040, SOWK 8046).

GERO 4720 BABY BOOMERS AND THE 21ST CENTURY (3 credits)

Marketing decisions and strategies apply to all businesses and are influenced by the target market. The economic realities and the character of America will change due to shifting demographics of baby boomers. Businesses that understand the power of the baby boomers will succeed; failure to understand that power may lead to economic consequences. Students from many disciplines will benefit from this cross-referenced course blending the realities of gerontology with the predictions of baby boomer behavior and the resulting impact to all businesses. (Cross-listed with GERO 8726).

Prerequisite(s)/Corequisite(s): Junior, Senior or Graduate Level Standing.

GERO 4750 MID-LIFE, CAREER CHANGE, PRERETIREMENT PLANNING (3 credits)

This course is designed to involve candidates in the exploration of the developmental tasks of mid-life, myths and realities related to career change as well as the implication of preretirement planning. Factual information, as well as model examination and evaluation are presented to aid the candidate in becoming better equipped to understand some of the forces which affect the well-being of middle aged persons as they prepare for the later years. (Cross-listed with COUN 8756, GERO 8756).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

GERO 4850 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)

This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 8856, SOWK 4850, SOWK 8856.)

GERO 4920 SPECIAL STUDIES IN GERONTOLOGY (1-3 credits)

Special studies designed around the interests and needs of the individual student in such areas as the psychology, sociology, economics or politics of aging, as well as operation of various service systems. The studies may be either a literature review project or a field project in which experience is gained in the community identifying and analyzing needs and services related to older people.

Prerequisite(s)/Corequisite(s): Six hours in gerontology or permission.

GERO 4940 PRACTICUM (3 credits)

This course provides the opportunity to students to share field experiences; to obtain guidance concerning various relationships with agency, staff and clients; and to develop a broadly based perspective of the field of aging.

Prerequisite(s)/Corequisite(s): Nine hours in gerontology and permission. Students must be enrolled in the GERO program and have a minimum GPA of 2.5. Not open to non-degree graduate students.

GERO 4950 PALLIATIVE CARE: MENTORING A HEALTHCARE APPROACH OF PATIENT-CENTERED CARE WITH FOCUS ON WELL-BEING (3 credits)

This course provides a foundation for the recognition of the need to implement palliative medical care. Using current texts and literature, video and podcast lectures by colleagues, and review of cases and topics, a student will understand the definitions, purposes, and benefits of palliative medical care. The student will learn the avenues and ways to implement palliative care to provide care that promotes well-being. (Cross-listed with GERO 8956).

Prerequisite(s)/Corequisite(s): Junior, senior, graduate standing

GERO 4970 SENIOR HONORS PROJECT/THESIS (3 credits)

An independent research project supervised by gerontology department/school faculty. The senior honors project must be approved by the University Honors Program.

Prerequisite(s)/Corequisite(s): Senior in the University Honors Program.

GERO 4980 COUNSELING SKILLS IN GERONTOLOGY (3 credits)

This course is intended to help develop basic counseling skills for application in gerontology. (Cross-listed with COUN 8986, GERO 8986).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

¹ Gerontology students must choose an 18 credit concentration in Healthy Aging, Administration, Pre-Health OR any university minor.

² Gerontology students must take a total of 9 credits of elective courses from within the Gerontology department.

³ Approved Writing in the Discipline courses are MKT 3200, ENGL 2400, ENGL 3980 and ENGL 3050

⁴ To complete the practicum a student must have a 2.5 GPA.

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements:

The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams:

For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

GERO courses must be a C- or higher

General Education must be a C- or higher

Gerontology Concentration courses must be C- or higher.

Graduation Requirements:

120 Credits and a 2.0 GPA is required to graduate from UNO.

Gerontology Certificate

The certificate in gerontology requires completion of 18 credit hours and a cumulative GPA of 2.0 for all gerontology coursework. Admission into the program requires a 2.50 GPA. The requirements for the certificate can be completed online or on campus.

Gerontology Coursework

(15 credit hours, an overall average of 2.0, no CR/NC can be applied.)

Students choose coursework based on career objectives and interest areas and should consult with a gerontology academic advisor for a plan of study.

Strongly recommended courses for all students: GERO 2000, GERO 4460 and GERO 4670

Strongly recommended course for Pre-Health: GERO 4550

Gerontology Practicum

(3 credit hours, course must be complete with a "C-" or higher. No CR/NC can be applied.)

To facilitate important real-world experience before graduation, all students will complete 156 hours in a practicum site of their choice.

GERO 4940: Practicum (Pre-requisite: 9 credit hours in gerontology, 2.50 GPA. No CR/NC can be applied.)

The certificate program may be used as a minor or a concentration within other degrees. Students should consult with their major/college academic advisor to determine how the certificate applies to their degree program. Students who wish to work toward the certificate must meet with an academic advisor in the Department of Gerontology to apply.

Gerontology Minor

Requirements

The minor in gerontology requires completion of 18 credit hours with a cumulative GPA of 2.0 for all gerontology coursework. Nine of these credits must be upper division. Admission into the program requires a 2.50 GPA. The requirements for the minor can be completed online or on campus.

¹ An overall average of 2.0.

For students pursuing a career path in the Pre-Health, GERO 4550 is strongly recommended.

GERO 4670 may be taken online in place of GERO 3000.

BSSW Program

The Bachelor of Science in Social Work (BSSW) program has received continuous accreditation from the Council on Social Work Education since 1975. The mission of the Grace Abbott School of Social Work is to educate students to become highly qualified social workers who serve people of all ages and influence the systems that affect them, to advance knowledge through teaching and research, and to engage with diverse communities to promote socially just societies.

The BSSW program prepares graduates for beginning social work practice within a variety of social service settings. This degree qualifies graduates to receive the Certified Social Worker credential (CSW) in the state of Nebraska. Other states with licensure and certification of BSSW level social workers will also recognize this degree for licensure or certification. It also prepares students for advanced graduate social work education (the MSW degree).

Website

Admission to the BSSW Program

Upon completion of approximately 50 credit hours, the student may apply for formal admission into the BSSW degree program. The deadline for application is February 15th for admission for the following fall semester. Admission to the BSSW Program is competitive, based on a combination of the following criteria:

- Completion of pre-professional courses (to include UNO Fundamental Academic Skills) with a cumulative Grade Point Average of 2.50 or higher.
- Successful performance in the two pre-professional social work courses (SOWK 1000 and SOWK 1500) with a grade of B or better.
- Positive references and a well written personal statement evidencing potential for successful practice in the field of Social Work.

Degrees Offered

- Social Work, Bachelor of Science (p. 740)

Writing in the Discipline

SOWK 3890 Writing for Social Work

Social Work is a profession for those with a strong desire to help improve people's lives. Social workers fight for social justice, build community, and strengthen those who are vulnerable, oppressed, or living in poverty. Social work is a versatile career choice. Social workers can specialize in service to a particular population, work in a certain setting, or focus on research, social welfare planning and policy development. Social work is one of the fastest growing professions in the United States.

Social workers are employed in hospitals and health care settings, community mental health and private practice clinics, child welfare agencies, criminal justice and corrections programs, elementary, and secondary schools, crisis and homeless shelters, drug and alcohol treatment centers, as well as local, state, and federal government agencies.

SOWK 1000 SOCIAL WORK AND SOCIAL WELFARE (3 credits)

This course is designed for the student who wants to learn about social welfare and to explore a possible major in social work. The student examines historical and current issues in social welfare, social services, and the social work profession. The course focuses on values, beliefs, and goals of social services and social work, and provides a historical perspective for present activities.

Distribution: Social Science General Education course and U.S. Diversity General Education course

SOWK 1500 SOCIAL WORK AND CIVIC ENGAGEMENT (3 credits)

This course is designed to acquaint the student with the social work profession, professional roles and functions, and social services delivery systems. Students will have an opportunity to observe and participate in social services activities within Nebraska and Iowa communities incorporated with didactic experiences. Students will also have an opportunity to explore their vocational aptitude for social work practice via interactive encounters with clients and helping professionals.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

SOWK 2120 RACE, CLASS AND GENDER IN THE UNITED STATES (3 credits)

This course examines the effects of race, class, and gender on social policy and social injustice. The focus is on how institutional manifestations of racism, classism, and sexism, and how these are interconnected and are mutually reinforcing. The consequences of institutionalized oppressions are examined at the individual, group, family, and societal levels.

Distribution: U.S. Diversity General Education course

SOWK 3000 APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR (3 credits)

A course on the use of data and statistical methods to explore and make inferences about society, while critically considering the influence of context and the powers and limitations of quantitative evidence. (Cross-listed with CRCJ 3000, PA 3000).

Prerequisite(s)/Corequisite(s): MATH 1120 or 1130 or 1220, or an ACT of 19, or above or permission from the department.

SOWK 3010 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT I (3 credits)

This course is the first part of a two-semester sequence within the Bachelor of Science in Social Work (BSSW) required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan, particularly infancy through adolescence, within the social environment at the micro- and macro-level (e.g., individuals, families, groups, organizations, institutions, and communities), as they relate to effective social work generalist practice.

Prerequisite(s)/Corequisite(s): PSYC 1010, SOC 1010, BIOL 1020, and admission to the BSSW program. Not open to non-degree graduate students.

SOWK 3020 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT II (3 credits)

This course is the second part of a two-semester sequence within the Bachelor of Science in Social Work (BSSW) required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the life span – particularly during young, middle, and late adulthood – within the social environment at the micro- and macro-level social systems (e.g., individuals, families, groups, institutions, organizations, and communities), as they relate to effective social work generalist practice.

Prerequisite(s)/Corequisite(s): SOWK 3010. Not open to non-degree graduate students.

SOWK 3110 SOCIAL WELFARE POLICY (3 credits)

This course is an introduction to social welfare policy analysis. It informs the Bachelor of Science in Social Work (BSSW) student about the history of professional social work, the development of social services in the United States, and the values, beliefs, ethics and social welfare theory that frames professional policy practice. The course examines social welfare policy taking into account historical, political, economic, social, and cultural perspectives.

Prerequisite(s)/Corequisite(s): PSCI 1000, ECON 1200, HIST 1120, and admission to the BSSW program

SOWK 3320 SOCIAL WORK PRACTICE I (3 credits)

This course introduces students to the values, ethics, knowledge, and skills of generalist social work practice. Using constructs from the Generalist Intervention Model, systems theory, and the strengths-based perspective, students learn about engagement, assessment, planning and contracting, intervention, evaluation, and termination. Diversity and case management are emphasized as part of bringing planned change to client systems, including individuals and families.

Prerequisite(s)/Corequisite(s): PSYC 1010, SOC 1010, and admission to the BSSW program.

SOWK 3350 SOCIAL WORK PRACTICE II (3 credits)

This course reinforces the values, ethics, knowledge, and skills of generalist social work practice. Students gain specific knowledge and skills in assessing, intervening and terminating with families. Students will learn about the process of development and implementation of groups.

Prerequisite(s)/Corequisite(s): SOWK 3320.

SOWK 3890 WRITING FOR SOCIAL WORK (3 credits)

This course emphasizes the process of critical thinking and analysis and the process of effective professional writing as required for generalist social work practice. Students will apply selected generalist social work concepts to prepare writing samples such as research/term papers, client progress/ psychosocial reports, analytical reviews, professional development papers, business communications, and grant proposals. Research and writing skills emphasized are: conducting electronic literature searches, outlining, paragraph and sentence structure, revising, using APA format, and proofreading for correct grammar, word usage, and punctuation.

Prerequisite(s)/Corequisite(s): ENGL 1150, ENGL 1160, and admission to the BSSW program.

SOWK 4010 SOCIAL WORK WITH AMERICAN INDIANS (3 credits)

This course provides the student with a broad study of the origins, influences and issues of the American Indian which affect social work practice. The usefulness of established social work generalist methods is explored. Alternative methods applicable to culturally diverse people across the lifespan are presented. This is a Service Learning class. (Cross-listed with SOWK 8016).

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

SOWK 4020 SOCIAL WORK WITH THE AFRICAN AMERICAN FAMILY (3 credits)

This course seeks to develop in students an awareness and understanding of some of the social and psychological/cognitive realities influencing the behavior of African American youth and families across the lifespan. The content draws upon theories, research and social work practice skills relevant to African American youth and families, as well as the cognitive process and social systems which impact African youth and families. (Cross-listed with SOWK 8026)

Prerequisite(s)/Corequisite(s): Admitted to the BSSW program or permission of the school.

SOWK 4040 WORKING WITH MINORITY ELDERLY (3 credits)

This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 4690, GERO 8696, SOWK 8046).

Prerequisite(s)/Corequisite(s): Admitted to the BSSW program or [SOWK 1000, junior or senior standing, and permission of the School

SOWK 4050 ETHNIC DIVERSITY AND SOCIAL WORK PRACTICE (3 credits)

This course focuses on effective generalist social work practice with clients of ethnic diversity. (Cross-listed with SOWK 8056)

Prerequisite(s)/Corequisite(s): Admission to BSSW or permission of the school.

SOWK 4360 SOCIAL WORK PRACTICE III (3 credits)

This course is an introduction to a goal-oriented planned change process with an emphasis on task groups, organizations, and communities.

Prerequisite(s)/Corequisite(s): SOWK 2120, SOWK 3110, and SOWK 3350.

SOWK 4400 RESEARCH METHODS IN SOCIAL WORK PRACTICE (3 credits)

Focus will be on the scientific method as it is applied to social work research. The purpose of all social work research is to answer questions or solve problems. The six phases of the research process will be identified and the basic tasks to be accomplished in each phase will be learned. Special attention will be given to evaluating social work practice.

Prerequisite(s)/Corequisite(s): Prior or concurrent STAT 1530, CRCJ 3000, PA 3000, PSYC 3130, SOWK 3000, or STAT 3000

SOWK 4410 GENERALIST SOCIAL WORK PRACTICUM I (5 credits)

This course is designed to provide supervised, individual and experiential learning offered within the setting of a selected social service agency. The student will be introduced to a variety of social work practice roles, develop professional relationships with client systems and learn to apply a number of interventive modalities to effect change across the life span. In order to facilitate integration of classroom theory with practice, students will attend a seven-week practicum seminar (2 hours per week).

Prerequisite(s)/Corequisite(s): Prior: SOWK 2120, SOWK 3020, SOWK 3350. Prior to or concurrent: SOWK 4360.

SOWK 4420 GENERALIST SOCIAL WORK PRACTICUM II (5 credits)

This course is designed to provide supervised, individual and experiential learning offered within the setting of a social service agency, typically the same agency as in SOWK 4410. This course builds upon opportunities provided and competence achieved in Generalist Social Work Practicum I.

Prerequisite(s)/Corequisite(s): SOWK 4410 prior or concurrent.

SOWK 4450 SOCIAL WORK CAREER PREP (1 credit)

This course is intended as an integrating senior seminar designed to be taken with the final course of practicum. It facilitates the transition from student to professional social worker through the use of specific assignments focused on areas of resume development, continuation of research, awareness of continuing education needs, issues of licensure, and exposure to social work professionals.

Prerequisite(s)/Corequisite(s): SOWK 4410 prior or concurrent.

SOWK 4510 TREATMENT ISSUES IN CHEMICAL DEPENDENCY (3 credits)

This course addresses chemical dependency treatment issues including denial, minimization, relapse and its prevention, resistance, family dynamics, poly-substance abuse, co-occurring disorders, spirituality and the influence of self-help groups. The education will include the clinical treatment needs of individuals suffering from chemical dependency, taking into consideration diversity, gender, culture and lifestyle. (Cross-listed with COUN 4510, COUN 8516, SOWK 8516).

Prerequisite(s)/Corequisite(s): Admission to counseling program or social work programs or permission of instructor. Not open to non-degree graduate students.

SOWK 4530 SCHOOL SOCIAL WORK (3 credits)

This course explores the field of social work practice in school settings, including the history of social work practice in schools, school environment, roles of school social workers, mandated foundations for school social work services, eligibility for special education and 504 plans, theories of practice that include school and community based models, and interventions for target populations in schools. (Cross-listed with SOWK 8536).

Prerequisite(s)/Corequisite(s): Admission to MSW program OR permission of the school. Not open to non-degree graduate students.

SOWK 4620 TRAUMA AND RESILIENCE (3 credits)

This course provides an overview of issues related to trauma including: the factors related to development of trauma, definitions of trauma, the impact of trauma on individuals, families and communities, and the programs and practices that are most effective and appropriate regarding the social work role in responding to trauma. (Cross-listed with SOWK 8626)

Prerequisite(s)/Corequisite(s): SOWK 3320

SOWK 4640 SOCIAL WORK IN CHILD WELFARE (3 credits)

This course examines the history, challenges, and issues of governmental intervention in families to protect at-risk children. The course concentrates on the effects of the 1980 federal legislation (PL 96-272) on child welfare delivery systems and practice. It provides a comprehensive overview of child welfare services, including child protective services, in-home services, foster care, group care, intergenerational childcare, and adoption. It also provides an overview of the juvenile justice system and its impact on children and their families.

Prerequisite(s)/Corequisite(s): Admission to the Bachelor of Science in Social Work (BSSW) program or permission of the Grace Abbott School of Social Work.

SOWK 4650 SOCIAL WORK IN MENTAL HEALTH (3 credits)

This is an introductory course to develop basic knowledge and skills of mental health concepts, interventions, and services for social workers. The focus is on history, contemporary trends, legal and practice implications, human rights, social justice, assessment and delivery of culturally competent social services.

Prerequisite(s)/Corequisite(s): Admission to the Bachelor of Science in Social Work (BSSW) program or permission of the Grace Abbott School of Social Work.

SOWK 4660 SOCIAL WORK WITH INDIVIDUALS WITH DISABILITIES (3 credits)

This is an introductory course to increase awareness of intellectual and developmental disability issues across the lifespan that affect social work practice. The focus is on history, contemporary trends, legal and practice implications, human rights, social justice, assessment, and delivery of culturally competent services.

SOWK 4680 MEDICAL AND PSYCHOSOCIAL ASPECTS OF ALCOHOL/ DRUG USE AND ADDICTION (3 credits)

This course introduces students to substance abuse disorders and their impact on the individual, family, and society. It covers psychopharmacology, alcohol and drug interactions, drug classifications, theories of chemical dependency, various models of treatment, vulnerable populations, and ethical and legal issues. (Cross-listed with SOWK 8686, COUN 4680, COUN 8686).

SOWK 4690 ASSESSMENT AND CASE MANAGEMENT IN SUBSTANCE ABUSE (3 credits)

This course focuses on assessment of clients and their environment, and diagnosis and referral for substance abuse treatment. Emphasis is given to assessment instruments, treatment levels, treatment planning, case management, and social justice. (Cross-listed with COUN 4690, COUN 8696, SOWK 8696).

SOWK 4800 SOCIAL WORK AND THE LAW (3 credits)

This course presents the fundamental principles of criminal and civil law that have relevance to the practice of social work. Topics include: the legal system, legal research methods, professional ethical/legal responsibilities and liabilities, family law, elder law, criminal law, juvenile law, personal injury law, employment discrimination law, capacity to make contracts and wills, rights of institutionalized patients, and rights of handicapped children to an education. (Cross-listed with SOWK 8806).

Prerequisite(s)/Corequisite(s): SOWK 3110

SOWK 4810 SPIRITUALITY AND SOCIAL WORK PRACTICE (3 credits)

Social work literature defines spirituality as the human striving for a sense of meaning, purpose, values, and fulfillment. Spirituality is expressed through diverse forms throughout a client's lifespan; it is central to clients' understanding of suffering and their attempts to resolve it. This course examines major issues pertaining to spiritually-sensitive social work practice with clients of diverse religious and non-religious (i.e., outside sectarian institutional contexts) perspectives. (Cross-listed with SOWK 8816)

Prerequisite(s)/Corequisite(s): Admission to BSSW program or permission of the school

SOWK 4820 GLOBAL ENGAGEMENT: A SOCIAL WORK PERSPECTIVE (3 credits)

This course prepares students to work in a global setting. Students examine theories, concepts, and skills related to social development, cross-cultural engagement, and issues related to particular countries. The course is designed with two elements: 1) On-campus classroom learning focused on global social work knowledge, and, 2) Field-based labs that involve direct engagement with an international population. Students select one lab: i) faculty-led trip to China for two-weeks, ii) refugee resettlement service-learning project in Omaha. (Cross-listed with SOWK 8826).

SOWK 4830 CRISIS INTERVENTION (3 credits)

The prevalence of crisis experiences within our society and lifespan development necessitates that social workers acquire a knowledge and skill-base for effective and professional crisis intervention practice. Students will study the ABC Model of Crisis Intervention and how to ethically practice with diverse and vulnerable populations. Students will apply crisis intervention theory and models of intervention to various concern areas including but not limited to: suicide, sexual assault, domestic violence, substance abuse, grief and loss, and violence. A systems, strengths, and cultural emphasis will be applied to the various crisis situations covered. (Cross-listed with SOWK 8836)

Prerequisite(s)/Corequisite(s): SOWK 3320

SOWK 4850 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)

This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 4850, GERO 8856, SOWK 8856.)

Prerequisite(s)/Corequisite(s): Admission to BSSW or permission of the school

SOWK 4880 TOPICAL SEMINAR IN SOCIAL WORK (3 credits)

Specific seminar topics will focus on advanced content in social work theory and practice. The course description will be announced when a specific topical seminar is proposed. The topics selected will be consistent with Grace Abbott School of Social Work program objectives, faculty expertise, and student needs. (Cross-listed with SOWK 8886)

Prerequisite(s)/Corequisite(s): Admission to BSSW or permission of the school.

SOWK 4890 SPECIAL STUDIES IN SOCIAL WORK (1-4 credits)

This independent study course allows students to pursue a special selected area or topic within social welfare in order to deepen knowledge and/or skills in that particular area.

Prerequisite(s)/Corequisite(s): Admission to BSSW program or permission of the school.

SOWK 4980 SENIOR HONORS PROJECT/THESIS (3-6 credits)

An independent research project supervised by an approved faculty member. The senior honors project must be approved by the CPACS Honors Coordinator.

Prerequisite(s)/Corequisite(s): Senior in Honors Program and permission of the School.

Social Work, Bachelor of Science

Requirements

The social work program is divided into two segments – pre-professional coursework and the professional BSSW program. Students also have room for general electives to further pursue their interests. The number of general electives required varies for each student (12-18 credit hours).

Pre-Professional Social Work Courses

Students are required to complete some university general education courses and social work specific requirements prior to admission into the Professional Social Work Program.

1. UNO General Education (43 credit hours) - all BSSW students must complete the UNO General Education Curriculum. Some general education courses may overlap with social work requirements – see your advisor for more details.
2. Social Work Pre-requisite Course Requirements (21 credit hours) – a variety of courses are designated as pre-requisites to the social work program. These courses are intended to provide a foundation of understanding in a variety of areas relevant to social work.

Professional BSSW Program

Students who apply and are accepted into the BSSW program complete a sequence of professional social work courses as well as a practicum experience and social work specific electives (44 credit hours).

Code	Title	Credits
Social Work Pre-requisite Courses:		
SOWK 1000	SOCIAL WORK AND SOCIAL WELFARE	3
SOWK 1500	SOCIAL WORK AND CIVIC ENGAGEMENT	3

¹ Must receive a grade of B or better in SOWK 1000

² Must receive a grade of B or better in SOWK 1500

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

Students can apply for the professional social work program in the spring semester of their sophomore year given that the proper pre-requisite courses will be complete by the end of the sophomore spring term. Students must have a minimum cumulative GPA at or above 2.5 in order to apply for and begin the professional social work courses in their junior and senior year. Students must maintain a minimum GPA of 2.5 in order to continue in the professional social work program.

Cross-Sector Collaborative Leadership Minor

The Need

Many societal challenges are complex in nature, with a variety of interdependent causal factors that cannot be addressed independently by public sector, private sector, or non-profit sector organizations working in isolation. Yet, through collaboration across those sectors, significant impact is possible.

The Goal

The goal of this cross-sector collaborative leadership minor is to prepare graduates to lead and serve effectively in such cross-sector collaborative initiatives.

Skills Acquired

Students who successfully complete the cross-sector collaborative leadership minor will have gained knowledge and experiences that will enable them to:

- Understand and apply collaborative leadership across the public, nonprofit and business sectors.
- Effectively approach and communicate with cross-sector partners.

- Analyze issues and challenges from the perspectives of all three sectors.
- Recognize the interconnectedness of all three sectors.
- Demonstrate cultural understanding.
- Develop and evaluate cross-sector collaboration initiatives.
- Apply strategic and project management skills.

Interdisciplinary

This interdisciplinary minor will prepare students to collaboratively address complex cross-sector challenges. Students will develop their leadership skills through developing and leading a collaborative cross-sector project and collaborating with private, nonprofit and public sectors.

Contact

To learn more about the cross-sector collaborative leadership minor, contact:

Dr. Meagan Van Gelder | Cross-Sector Collaborative Leadership Minor Advisor | mvangelder@unomaha.edu | 402.554.3480

18 credit hours of courses completed with grades of C- or better are required for the minor.

Code	Title	Credits
Required Courses		
PA/MGMT 3800	CROSS-SECTOR COLLABORATIVE LEADERSHIP	3
PA 2000	LEADERSHIP & ADMINISTRATION	3
PA 4960	CROSS-SECTOR COLLABORATIVE LEADERSHIP CAPSTONE	3
9 hours from one of the below		9
Total Credits		18

Code	Title	Credits
Bachelor of Science in Business Administration (BSBA) majors are required to take the following three courses (9 credit hours):		
PA 2170	INTRODUCTION TO PUBLIC ADMINISTRATION	9
PA 3700	FINANCIAL MANAGEMENT FOR NONPROFITS	
or PA 4390	PUBLIC BUDGETING	
PA 3200	PROGRAM PLANNING AND EVALUATION	9
or PA 4440	ORGANIZATIONAL DEVELOPMENT AND CHANGE	
or PA 4530	STRATEGIC PLANNING	

Political Science undergraduate majors and Public Administration undergraduate minors are required to take the following three courses (9 credit hours):

MGMT 1500	INTRODUCTION TO BUSINESS	9
ACCT 2000	ACCOUNTING BASICS FOR NON-BUSINESS MAJORS	
or ENTR 3710	ENTREPRENEURIAL FOUNDATIONS	
PA 3200	PROGRAM PLANNING AND EVALUATION	9
or PA 4440	ORGANIZATIONAL DEVELOPMENT AND CHANGE	
or PA 4530	STRATEGIC PLANNING	

Other UNO undergraduate majors are required to take the following three courses (9 credit hours):

MGMT 1500	INTRODUCTION TO BUSINESS	9
PA 2170	INTRODUCTION TO PUBLIC ADMINISTRATION	
or PA 3500	NONPROFIT ORGANIZATIONS AND MANAGEMENT	

PA 3200	PROGRAM PLANNING AND EVALUATION
or PA 4440	ORGANIZATIONAL DEVELOPMENT AND CHANGE
or PA 4530	STRATEGIC PLANNING

PA 3600	PERSONNEL AND VOLUNTEER MANAGEMENT IN NONPROFITS
PA 3700	FINANCIAL MANAGEMENT FOR NONPROFITS
PA 4100	MARKETING IN PUBLIC, NON-PROFIT AND AVIATION ORGANIZATIONS
PA 4300	SEMINAR IN PUBLIC POLICY
PA 4410	PUBLIC PERSONNEL MANAGEMENT
PA 4440	ORGANIZATIONAL DEVELOPMENT AND CHANGE
PA 4530	STRATEGIC PLANNING
PA 4950	INTERNSHIP

Total Credits **18**

Nonprofit Management Minor

As UNO continues to serve as the Nebraska's premiere metropolitan university, the nonprofit management minor exemplifies UNO's metropolitan and collaborative extension to the community.

Our Mission

Along with the University of Nebraska at Omaha's (UNO) strategic plan, the School of Public Administration upholds the esteemed pleasure of placing students first and achieving academic excellence all while engaging with the community.

By entrusting students with the necessary information to lead, manage, and ignite change within the nonprofit sector, our university continues to rise to the forefront of community engagement.

Skills Acquired

Upon completion of the nonprofit management minor, students will have the necessary skills needed to work in the nonprofit field.

- To equip students with the knowledge and competencies to successfully manage and lead organizations in the nonprofit sector.
- To provide a foundation in financial management, facilitating community change, marketing, and managing volunteers and staff with a nonprofit organization.
- To complement a wide variety of majors across the university system.

Student-Centered

The nonprofit sector is on the rise, with wages and employment exceeding both private and government entities the past decade. With 1.6 million registered nonprofits in the U.S., the need to educate and empower UNO students with the skills to lead the nonprofit sector in the Omaha metro is crucial. As interest in the nonprofit sector continues to climb, so will the need to service the Omaha community and the State of Nebraska in its effort to meet the needs of its growing population. The nonprofit management minor is open to students in any discipline area at UNO.

Contact

To learn more about the nonprofit management minor, contact:

Meagan Van Gelder | Nonprofit Management Minor Advisor | mvangelder@unomaha.edu | 402.554.3480

Requirements

The minor requires the following 18 credit hours with grades of C- or better:

Code	Title	Credits
Required Nonprofit Management Minor Courses (must complete all)		
PA 2170	INTRODUCTION TO PUBLIC ADMINISTRATION	3
PA 3500	NONPROFIT ORGANIZATIONS AND MANAGEMENT	3
PA 4500	NONPROFIT FUNDRAISING	3
Elective Nonprofit Management Minor Courses		
Select three of the following:		9
PA 2000	LEADERSHIP & ADMINISTRATION	

Public Administration Minor

As UNO continues to serve as the Nebraska's premiere metropolitan university, the public administration minor exemplifies UNO's metropolitan and collaborative extension to the community.

Our Mission

Along with the University of Nebraska at Omaha's (UNO) strategic plan, the School of Public Administration upholds the esteemed pleasure of placing students first and achieving academic excellence all while engaging with the community.

By entrusting students with the necessary information to lead, manage, and ignite change within the public sector, our university continues to rise to the forefront of community engagement.

Skills Acquired

Upon completion of the public administration minor, students will have the necessary skills needed to work in the public sector. The minor is designed to accomplish the following:

- Describe the political context of public administration as well as the historical development and evolution of these institutions of the United States;
- Explain the role of public administrators in policy development and policy implementation;
- Empower future leaders to serve communities, to advance the common good and to effect positive change; and
- Develop students to become professionals who are equipped with the skills needed to manage at all levels of government (local, state and federal) as well as nonprofit organizations.

Student-Centered

To continue the momentum of serving the UNO campus, the greater Omaha community and beyond, there is a great need to empower our students and the knowledge, skills and abilities necessary to lead the future of the public sector and public service. The public administration minor is open to students in any discipline area at UNO.

Goodrich Scholarship Program

The Goodrich Scholarship Program, established by the Nebraska legislature in 1972, is an academic unit of the College of Public Affairs and Community Service. The program offers a merit-and-need-based scholarship for Nebraska residents who qualify through the Goodrich scholarship application process. The program provides financial aid in the form of tuition and general fees for up to 135 credit hours or until graduation (whichever comes first). The Goodrich scholarship is designed for full-time students at UNO only. The program offers a special humanities/social science curriculum (which is also a part of UNO's General Education Curriculum); this Goodrich curriculum emphasizes intellectual and cultural diversity at local and global levels. Goodrich programming includes a comprehensive menu of academic and non-academic support services and activities that enhance or advance student success.

Mission

The mission of the Goodrich Scholarship Program is to offer affordable quality undergraduate education to eligible low-income Nebraska residents who qualify through the Goodrich scholarship application process.

Other Information

Strategic Goals

The Goodrich Scholarship Program's strategic goals are consistent with CPACS and the University of Nebraska at Omaha's strategic goals of being student-centered, academic excellence-centered, and community-engaged.

Program Goals

- To provide scholars opportunities for sound and innovative educational experiences;
- To enable scholars to connect with each other, with faculty, with the university, and with the community at large;
- To empower scholars to build strong positive self-concepts – and
- To equip scholars with skills that will enable them to assume leadership roles.

Scholarship Note

Applicants who receive tuition scholarships, including but not limited to Regents, Chancellor's, Dean's and Buffett Foundation, cannot combine or stack any of those awards with a Goodrich scholarship. For more information about stacking scholarships, please contact UNO's Office of Financial Support and Scholarships at 402.554.2327.

Student Group

The Goodrich Organization (GO!), Goodrich's student body, opens up leadership opportunities. GO!'s many activities include fundraising and community engagement with organizations such as P4K and BBBS. For suggestions or more specific GO! information, contact GO! faculty advisers Dr. Carolina Hotchandani at 402.554.2274 or Dr. Stevie Seibert Desjarlais 402.554.6302.

Contact

Goodrich Scholarship Program
University of Nebraska at Omaha

Omaha, NE 68182
Phone: 402.554.2274

Website (<http://www.unomaha.edu/college-of-public-affairs-and-community-service/goodrich-scholarship-program/>)

Admissions

Goodrich uses a composite of selection criteria to evaluate both merit and financial need. Criteria include the individual's application data, financial analysis, academic record, interview, English Placement/Proficiency Exam (EPPE), personal life-experience essay, and references. Note that applicants who will have earned more than 31 college credits by May of the application year are not eligible. For more information, contact the Goodrich Scholarship Program.

Accounting (ACCT)

ACCT 2000 ACCOUNTING BASICS FOR NON-BUSINESS MAJORS (3 credits)

This course is designed to provide non-business students with an understanding of basic accounting terms and concepts, an understanding of the usefulness of accounting data for decision-making by internal and external business stakeholders, and the skills to actually use accounting data in decision-making.

Prerequisite(s)/Corequisite(s): Student must be a non-business student. ENGL 1150 and MATH 1310 or MATH 1220 with 'C'-(2.0) or better. Not open to non-degree graduate students

Distribution: Social Science General Education course

ACCT 2010 PRINCIPLES OF ACCOUNTING I (3 credits)

Basic concepts and assumptions underlying financial accounting; basic structure of accounting; the accounting cycle; external financial statements of the enterprise with emphasis on the corporation; income determination; accounting for and reporting of assets, liabilities and owners' equity; analysis and reporting of cash flows; financial statement analysis.

Prerequisite(s)/Corequisite(s): ENGL 1150 with a 'C' (2.0) or better, a GPA of 2.5 or higher, and MATH 1370 or MATH 1930 with a 'C' (2.0) or better or concurrent enrollment in MATH 1370 or MATH 1930

ACCT 2020 PRINCIPLES OF ACCOUNTING II (3 credits)

A study of techniques and concepts affecting internal accounting in a business organization. These include budgeting in general, costing systems, variance analysis and generating reports for management decision-making. Special topics include segment reporting, control of decentralized operations, capital budgeting, and service department cost allocations.

Prerequisite(s)/Corequisite(s): ACCT 2010, ENGL 1150, and MATH 1370 or MATH 1930, each with a C (2.0) or better, and a GPA of 2.5 or higher.

ACCT 3000 MANAGERIAL ACCOUNTING FOR SUPPLY CHAIN MANAGEMENT (3 credits)

This course highlights the important role of a managerial accountant in managing a global supply chain and covers the key accounting techniques for supply chain management. (Cross-listed with SCMT 3000)

Prerequisite(s)/Corequisite(s): ACCT 2020 with a grade of C (2.0) or better or ACCT 2000 with a grade of C (2.0) or better and cumulative GPA of 2.5 or higher. ENGL 1160 with a grade of 'C' (2.0) or better or concurrent enrollment in ENGL 1160. Not open to non-degree graduate students.

ACCT 3020 BASIC FEDERAL INCOME TAXATION (3 credits)

This course provides an introduction to the basic concepts and principles of federal income tax with an emphasis on concepts unique to individual taxpayers.

Prerequisite(s)/Corequisite(s): ACCT 2020, ENGL 1150, ECON 2200 and ECON 2220 with a 'C' (2.0) or better in each course. Cumulative GPA of at least 2.5.

ACCT 3030 INTERMEDIATE FINANCIAL ACCOUNTING I (3 credits)

A more intensive study of basic accounting theory and principles learned in ACCT 2010. Topics include a conceptual framework of accounting, net income concepts, financial statements, present value applications, revenue recognition, current assets, plant assets, and intangible assets.

Prerequisite(s)/Corequisite(s): ACCT 2020, ECON 2200, and ECON 2220, with a grade of 'C' (2.0) or better in each course and a 2.5 GPA. ENGL 1160 with a grade of 'C' (2.0) or better or concurrent enrollment in ENGL 1160.

ACCT 3040 INTERMEDIATE FINANCIAL ACCOUNTING II (3 credits)

This is the second of two courses in intermediate financial accounting. This course focuses on financial reporting issues relating investments, debt financing, leases, contingencies, cash flows reporting and income taxes.

Prerequisite(s)/Corequisite(s): ACCT 3030 and ENGL 1160, each with a 'C' (2.0) or better.

ACCT 3050 INTERMEDIATE MANAGERIAL ACCOUNTING (3 credits)

The objective of managerial accounting is to provide management with relevant and timely information to aid economic decision making. This course analyzes numerous economic decisions and identifies what information is relevant. Special attention is given to how different cost accumulation systems and different cost accounting and estimating techniques can aid the decision-making process.

Prerequisite(s)/Corequisite(s): ACCT 2020, ECON 2200, ECON 2220, and BSAD 2130, BSAD 3140 or BSAD 3160, with a "C" (2.0) or better in each. Cumulative GPA of at least 2.5. ENGL 1160 with a grade of 'C' (2.0) or better or concurrent enrollment in ENGL 1160.

ACCT 3080 ACCOUNTING INFORMATION SYSTEMS (3 credits)

Introduction to professional accounting information systems, including information systems concepts, accounting and database software and research tools to provide a foundation for subsequent accounting courses.

Prerequisite(s)/Corequisite(s): ACCT 2020, ECON 2200 and ECON 2220, with "C" (2.0) or better in each. Cumulative GPA of at least 2.5. ENGL 1160 with a grade of 'C' (2.0) or better or concurrent enrollment in ENGL 1160.

ACCT 4010 ADVANCED FINANCIAL ACCOUNTING (3 credits)

Specialized issues in financial accounting. Principal topics include business combinations and consolidated financial statements, partnership accounting, translation of foreign currency financial statements, accounting for foreign currency denominated transactions, and SEC reporting requirements. (Cross-listed with ACCT 8016)

Prerequisite(s)/Corequisite(s): ACCT 3030 and ACCT 3040 with "C+" (2.33) or better in each and ENGL 1160 with "C" (2.0) or better. Cumulative GPA of at least 2.5. Cumulative upper-division Accounting GPA of at least 2.5. Not open to non-degree graduate students.

ACCT 4020 ANALYTICS FOR ACCOUNTING (3 credits)

Students develop an Analytics Mindset for the accounting profession, which includes the crossover competencies of accounting and business knowledge, data modeling and analytic abilities, and communication skills. Principal topics include fundamentals of data capture and cleansing, database development and implementation, visualization and presentation of information, and the use of accounting information for business decisions. (Cross-listed with ACCT 8026).

Prerequisite(s)/Corequisite(s): ACCT 3030, ACCT 3080, and ENGL 1160 each with C (2.0) or better. Cumulative GPA of at least 2.5. Cumulative upper-division Accounting GPA of at least 2.5. Not open to non-degree graduate students.

ACCT 4040 ADVANCED FEDERAL INCOME TAXATION (3 credits)

Analysis of various advanced tax issues, such as accounting methods, property transactions, and formation, operation, and liquidation of C-corporations, S-corporations and partnerships. (Cross-listed with ACCT 8046.)

Prerequisite(s)/Corequisite(s): ACCT 3020, ACCT 3030, and ENGL 1160, each with a "C" (2.0) or better. Cumulative GPA of at least 2.5. Cumulative upper-division Accounting GPA of at least 2.5. Not open to non-degree graduate students.

ACCT 4060 ADVANCED MANAGERIAL ACCOUNTING (3 credits)

Intensive study and discussion of the responsibilities of managerial accountants in the decision-making process in organizations and the consequences of the manner in which they use cost accounting information in decision-making. (Cross-listed with ACCT 8066.)

Prerequisite(s)/Corequisite(s): ACCT 3050, ACCT 3030, and ENGL 1160, each with "C" (2.0) or better. Cumulative GPA of at least 2.5. Cumulative upper-division Accounting GPA of at least 2.5. Not open to non-degree graduate students.

ACCT 4070 GOVERNMENTAL/NONPROFIT ACCOUNTING AND AUDITING (3 credits)

Study of budgeting, accounting, financial reporting and auditing in governmental and nonprofit entities. (Cross-listed with ACCT 8076.)

Prerequisite(s)/Corequisite(s): ACCT 3030 and ENGL 1160, each with a "C" (2.0) or better. Cumulative GPA of at least 2.5. Cumulative upper-division accounting GPA of at least 2.5. Not open to non-degree graduate students.

ACCT 4080 PRINCIPLES OF AUDITING (3 credits)

An introduction to auditing, Standards, responsibilities, professional ethics, the audit framework, evidence and reports are studied.

Prerequisite(s)/Corequisite(s): ACCT 3030, ACCT 3080, ENGL 1160, and BSAD 2130 or BSAD 3160, with a "C" (2.0) or better in each. Cumulative GPA of at least 2.5. Cumulative upper-division Accounting GPA of at least 2.5.

ACCT 4090 INFORMATION SYSTEMS AUDITING (3 credits)

This course will provide an introduction of auditing an advanced accounting information system. Content studied will include professional standards, guidelines, and procedures promulgated by the Information Systems Audit and Control Association. Accounting information systems control and security practices, and their assessment, will be discussed in the areas of operations, physical and logical access, systems, networks, development and applications, and incorporating hands-on exposure to automated evaluation tools.

Prerequisite(s)/Corequisite(s): ACCT 4080 with a grade of C (2.0) or better. Cumulative GPA of at least 2.5. Cumulative upper-division Accounting GPA of at least 2.5.

ACCT 4500 INDEPENDENT STUDY (1-3 credits)

Individual investigation of specific problems in the field of accounting.

Prerequisite(s)/Corequisite(s): Must have permission of the School of Accounting director.

ACCT 4510 ACCOUNTING INTERNSHIP (1-3 credits)

A course for junior or senior accounting students to apply their academic accounting knowledge to accounting practice in an employment situation. A student report on the internship experience and an employer's evaluation of the student's performance are course requirements. Can be applied to free electives, but not accounting specialization electives. (Maximum of 3 hours)

Prerequisite(s)/Corequisite(s): ACCT 3030 and ENGL 1160, each with a C (2.0) or better, and permission of internship coordinator.

Aerospace Studies (AERO)

AERO 1010 LEADERSHIP LABORATORY (0 credits)

AERO 1010, "Leadership Laboratory" (LLAB) augments the Air Force ROTC academic curriculum by providing prospective Air Force officers opportunities and feedback needed to develop leadership, managerial, and supervisory skills. Applications include a study of Air Force customs and courtesies, drill and ceremonies, problem solving, communication, and learning about career opportunities available to commissioned officers. During the junior and senior year, LLABs consist of activities classified as leadership and management experiences. Instruction is conducted within the framework of an organized cadet corps with a progression of experiences designed to develop leadership potential.

Prerequisite(s)/Corequisite(s): Corequisite - Students need to register for respective year-level equivalent Aerospace Studies Course (AERO 1310/1320, AERO 2310/2320, AERO 3110/3120, AERO 4110/4120)

AERO 1310 U.S. AIR FORCE HERITAGE AND VALUES I (1 credit)

AERO 1310, "Air Force Heritage and Values I," is a survey course designed to introduce students to the United States Air and Space Forces. It provides an overview of the basic characteristics, missions, and organization of the Air and Space Forces. As a foundational course, the topics covered in AERO 1310 will include Air Force Core Values, Formation of the Air Force, Customs and Courtesies, Writing and Verbal Communications, Benefits of Services as well as Introduction to Leadership to name a few. For students who continue in the Air Force ROTC (AFROTC) program, this course will be the foundation for becoming an Air or Space professional by outlining our heritage and values. Leadership Laboratory (AERO 1010) is mandatory for AFROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Fall)

Prerequisite(s)/Corequisite(s): Corequisite - AERO 1010

AERO 1320 U.S. AIR FORCE HERITAGE AND VALUES II (1 credit)

AERO 1320, "Air Force Heritage and Values II," is a survey course designed to introduce students to the United States Air and Space Forces. It provides an overview of the basic characteristics, missions, and organization of the Air and Space Forces. As a foundational course, the topics covered in AERO 1320 will include What is War?, Evolution of the Air Force, Principles of War and Tenets of Airpower, Ethical Decision-Making as well as Air Force Major Commands to name a few. For students who continue in the Air Force ROTC (AFROTC) program, this course will be the foundation for becoming an Air or Space professional by outlining our heritage and values. Leadership Laboratory (AERO 1010) is mandatory for AFROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Spring)

Prerequisite(s)/Corequisite(s): Corequisite - AERO 1010

AERO 2310 TEAM AND LEADERSHIP FUNDAMENTALS I (1 credit)

AERO 2310, "Team and Leadership Fundamentals I," is designed to provide students the foundation for both leadership and team building. The topics covered will include Listening, Followership, Problem Solving, Motivation as well as Standards and Accountability to name a few. All these concepts will be applied during activities and class discussions. Students will also practice and apply their verbal and written communication skills throughout the course. The lessons and course flow are designed to prepare students for field training and leadership positions in the detachment. Leadership Laboratory (AERO 1010) is mandatory for AFROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Fall)

Prerequisite(s)/Corequisite(s): Corequisite - AERO 1010, Prerequisite - AERO 1310/1320 or permission from instructor

AERO 2320 TEAM AND LEADERSHIP FUNDAMENTALS II (1 credit)

AERO 2320, "Team and Leadership Fundamentals II," is designed to provide students the foundation for both leadership and team building. The topics covered will include Team Building, Human Relations, Conflict Management, Stress Management and Resiliency as well as Ethical Decision Making to name a few. All these concepts will be applied during activities and class discussions. Students will also practice and apply their verbal and written communication skills throughout the course. The lessons and course flow are designed to prepare students for field training and leadership positions in the detachment. Leadership Laboratory (AERO 1010) is mandatory for Air Force ROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Spring)

Prerequisite(s)/Corequisite(s): Corequisite - AERO 1010, Prerequisite - AERO 1310/1320/2310 or permission from instructor

AERO 3110 LEADING PEOPLE AND EFFECTIVE COMMUNICATION I (3 credits)

AERO 3110, "Leading People/Effective Communication I," focuses on the development of advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership and communication skills through case studies and practical application. The topics covered will include Critical Thinking, Change Management, Effective Supervision, Ethical Decision Making as well as Bias to name a few. As cadet officers in the Air Force ROTC program, students have an opportunity to apply these leadership and management techniques in a supervised environment. Leadership Laboratory (AERO 1010) is mandatory for Air Force ROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Fall)
Prerequisite(s)/Corequisite(s): Corequisite - AERO 1010, Prerequisite - AERO 1310/1320/2310/2320 or permission from instructor

AERO 3120 LEADING PEOPLE AND EFFECTIVE COMMUNICATION II (3 credits)

AERO 3120, "Leading People/Effective Communication II," focuses on the development of advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership and communication skills through case studies and practical application. The topics covered will include Leadership Theory, Mentoring, Professionalism, Self-Awareness, Organizational Climate as well as Establishing Expectations to name a few. As cadet officers in the Air Force ROTC program, students have an opportunity to apply these leadership and management techniques in a supervised environment. Leadership Laboratory (AERO 1010) is mandatory for Air Force ROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Spring)

Prerequisite(s)/Corequisite(s): Corequisite - AERO 1010, Prerequisite - AERO 1310/1320/2310/2320 or permission from instructor

AERO 4110 NATIONAL SECURITY AND COMMISSIONING PREPARATION I (3 credits)

AERO 4110, "National Security and Commissioning Preparation I," is designed for college seniors and gives them the foundation to understand their role as Air or Space Force officers and how they are directly tied to our National Security Strategy. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The topics covered will include Civilian Control of the Military, National Security Strategy, the Department of Defense, Joint Operations, Unified Combatant Commands, How the Department of the Air Force Deploys as well as the Law of War to name a few. Leadership Laboratory (AERO 1010) is mandatory for Air Force ROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Fall)

Prerequisite(s)/Corequisite(s): Corequisite - AERO 1010, Prerequisites - AERO 1310/1320/2310/2320/3110/3120 or permission from instructor

AERO 4120 NATIONAL SECURITY AND COMMISSIONING PREPARATION II (3 credits)

AERO 4120, "National Security and Commissioning Preparation II," is designed for college seniors and gives them the foundation to understand their role as Air or Space Force officers. The topics covered will include Base Agencies, Ethical Decision-Making, Leadership Authority and Responsibility, Officer and Enlisted Evaluations Systems as well as Career Progression to name a few. As cadet officers in the Air Force ROTC program, students have an opportunity to apply these leadership and management techniques in a supervised environment. Leadership Laboratory (AERO 1010) is mandatory for Air Force ROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Fall)

Prerequisite(s)/Corequisite(s): Corequisite - AERO 1010, Prerequisite - AERO 1310/1320/2310/2320/3110/3120/4110

Anthropology (ANTH)

ANTH 1050 INTRODUCTION TO ANTHROPOLOGY (3 credits)

Anthropology is the humanistic and scientific study of humans, past and present. This course will present an overview of the four subdisciplines of anthropology: sociocultural, archaeological, biological, and linguistic.
Distribution: Social Science General Education course

ANTH 2000 ETHNOGRAPHY (1-4 credits)

This is a self-paced course in which the student views films and reads books and articles regarding a specific culture. Each culture will be a one (1) credit hour module. The intent is to acquaint the student in some depth with other cultures in the world.

Prerequisite(s)/Corequisite(s): One course in the social sciences and the instructor's permission.

ANTH 2990 GUIDED READING (1-6 credits)

The course is designed to allow the student enrolled in an anthropology course to pursue a specialized interest or topic in greater depth than is or was possible for the other course as a whole.

Prerequisite(s)/Corequisite(s): Concurrent enrollment in an anthropology course or enrollment in an anthropology course in the immediately preceding semester and permission of instructor.

ANTH 3210 CULTURES OF AFRICAN PEOPLE (3 credits)

An introduction to cultures and societies of Africa. Analysis of kinship systems; political, economic and religious institutions; social change. Emphasis on the dynamics of social organization of African people.

Prerequisite(s)/Corequisite(s): Sophomore or above with one three-hour introductory social science course

ANTH 3220 PEOPLES AND CULTURES OF NATIVE NORTH AMERICA (3 credits)

A survey of the Native peoples and cultures of North America, past and present. Topics covered include: economics, religion, social organization, kinship, political organization, material culture, gender and culture change through time.

Prerequisite(s)/Corequisite(s): ANTH 1050 or permission of Instructor

ANTH 3260 WORLD CULTURES AND PEOPLES (3 credits)

This course utilizes ethnography to examine human cultures in a specific geographic context. The area approach in cultural anthropology reveals how the physical environment shapes culture and how those cultures, in turn, shape their environments. This course will also examine the larger social milieu and cultural change over time. The specific area will be announced each time the course is offered.

Prerequisite(s)/Corequisite(s): ANTH 1050 or permission of instructor.

ANTH 3910 INTRODUCTION TO PHYSICAL ANTHROPOLOGY (3 credits)

An introduction to physical anthropology through an examination of theories and techniques used to investigate human origins; the relationship between humans and their physical environment; human variation, growth and development; and the evolution of human diseases.

Prerequisite(s)/Corequisite(s): ANTH 1050 or High School Biology recommended.

Distribution: Natural/Physical Science General Education course

ANTH 3920 ESSENTIALS OF ARCHAEOLOGY (3 credits)

This course introduces students to the essentials of scientific archaeology. Topics addressed include the history of archaeology, site survey, mapping, testing, excavation, laboratory methods, analysis, interpretation, and documentation. Scientific archaeology focuses upon the use of empirical data to test or evaluate our interpretations of past human behavior.

Prerequisite(s)/Corequisite(s): Anthropology 1050 or permission of instructor.

ANTH 4210 CULTURAL ANTHROPOLOGY (3 credits)

Cultural Anthropology is the sub-discipline of Anthropology that systematically considers cultural diversity (similarities and differences) in all known human societies. The scope of cultural anthropology is one of the broadest in the social sciences and includes the study of subsistence strategies and economies, kinship and social organization, political organization, religion, gender, language, expressive arts, human-environment relationships, and globalization. (Cross-listed with ANTH 8216).

Prerequisite(s)/Corequisite(s): Junior or senior with a minimum of six hours of social science.

ANTH 4220 NORTH AMERICAN ARCHAEOLOGY (3 credits)

This course explores more than 20,000 years of Native American culture and lifeways in North America. Indigenous peoples faced numerous challenges throughout this vast and diverse continent. Hunters, gatherers, fishers, and horticulturalists adapted to all regions of North America. Students will be introduced to a range of archaeological concepts, methods and theoretical perspectives central to learning about this rich heritage of American archaeology. (Cross-listed with ANTH 8226).

Prerequisite(s)/Corequisite(s): ANTH 1050 or ANTH 4210.

ANTH 4230 ETHNOMEDICINES OF THE AMERICAS (3 credits)

An anthropological approach to the study of the cultural systems of specific American ethnomedicines (traditional medicines) of North, Central and South America. For each ethnomedicine, the historical context, philosophy, practice, therapeutics, and utilization will be examined to understand how and why each ethnomedicine has survived despite tremendous extermination pressure. (Cross-listed with ANTH 8236).

Prerequisite(s)/Corequisite(s): ANTH 1050

ANTH 4240 MEDICAL ANTHROPOLOGY (3 credits)

Medical anthropology is the cross-cultural study of human culture, health and illness. Using multiple theoretical perspectives, this course examines how cultural, social, environmental, and biological factors interact to produce patterns of health and illness in past and present human societies. (Cross-listed with ANTH 8246)

Prerequisite(s)/Corequisite(s): ANTH 1050 and junior or senior standing; or permission of the instructor.

ANTH 4250 ENVIRONMENTAL ANTHROPOLOGY AND NATIVE PEOPLES OF THE GREAT PLAINS (3 credits)

Environmental anthropology seeks to understand the interrelationships between human societies and their biophysical and social environments. This course introduces students to basic concepts and theories used by anthropologists to study environmental influences upon both past and present Native American societies on the North American Great Plains. Particular attention will be given to the rapid and dramatic environmental changes that continue to challenge Native Americans in the Great Plains today. (Cross-listed with ANTH 8256)

Prerequisite(s)/Corequisite(s): Anthropology 1050 and junior standing; or permission of instructor.

ANTH 4260 TOPICS IN CULTURAL ANTHROPOLOGY (3 credits)

Cultural Anthropology (Ethnology) is the comparative study of cultures. Each semester the course is offered, one topic will be selected from the subfield of Cultural Anthropology, such as: Applied Anthropology, Economic Anthropology, Political Anthropology, Visual Anthropology, Anthropology of Gender and Sexualities, Comparative Analysis of Kinship, or the Anthropology of Religion. Since the topic will vary, students may elect to take this course more than once.

Prerequisite(s)/Corequisite(s): ANTH 1050 or permission of instructor.

ANTH 4920 SEMINAR IN ANTHROPOLOGY (3 credits)

This course reviews research and writing in an area of current interest in the field of anthropology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with ANTH 8926).

Prerequisite(s)/Corequisite(s): ANTH 1050 or permission of instructor

ANTH 4940 ARCHAEOLOGICAL FIELD METHODS (3 credits)

This course introduces students to the field methods of scientific archaeology. These field methods include map reading, use of satellite and aerial photographs, instrument survey and mapping, pedestrian survey or reconnaissance, site survey data collection, identification of artifacts (stone tools, ceramics, etc.) and ecofacts (animal remains, macrobotanicals, etc.), systematic artifact collection and documentation, soil probes and coring methods, GPS-based mapping, excavation methods, and data recording. Additional topics include laboratory methods (artifact and ecofact analysis, interpretation, and documentation). This field course ultimately focuses upon the use of empirical data to test or evaluate our interpretations of past human behavior.

Prerequisite(s)/Corequisite(s): ANTH 1050 and Junior standing. Not open to non-degree graduate students.

ANTH 4990 INDEPENDENT STUDY IN ANTHROPOLOGY (1-3 credits)

Guided readings and/or independent research in a special anthropological topic under the supervision of an Anthropology faculty member. A formal contract specifying the nature of the work to be completed must be signed before enrolling in the course. May be taken for a maximum of six hours.

Prerequisite(s)/Corequisite(s): Permission of instructor.

Architectural Engineering (AREN)

AREN 1000 DURHAM SCHOOL OF ARCHITECTURAL ENGINEERING AND CONSTRUCTION SEMINAR (0 credits)

Presentation of professional problems and practices by students, faculty, and professionals associated with careers in the Durham School of Architectural Engineering and Construction

AREN 1010 INTRODUCTION TO ARCHITECTURAL ENGINEERING (1 credit)

An overview of architectural engineering. Descriptions of structural, lighting and electrical, and mechanical engineered systems in buildings. Design and measurement exercises. Field visits to buildings.

AREN 1030 DESIGN AND SIMULATION STUDIO I (3 credits)

Focus on virtual modeling in the context of conceptual design. Study of fundamentals of Building Information Modeling (BIM), iterative design processes, early design analysis techniques, and technical problem-solving processes. Development of modeling skills in various software programs including Autodesk Revit, Formit, Dynamo, and Trimble Sketchup.

AREN 2010 ARCHITECTURAL ENGINEERING SEMINAR (1 credit)

This course will inform students about careers in Architectural Engineering and about non-technical issues of engineering practice. It will include visits to offices and job sites, and talks by practicing professionals. Professional, ethical, social, and environmental issues will be addressed. Students will gain experience in teamwork, and in presentation of information.

Prerequisite(s)/Corequisite(s): AREN 1010 or AE 1010; 30 credit hours completed

AREN 2030 DESIGN AND SIMULATION STUDIO II (3 credits)

Focus on building systems as integral elements in architecture, building and construction assemblies, materials and methods, fabrication, and tectonic exploration using building information modeling (BIM) processes. Exposure to building construction systems, stereotomic and tectonic construction assemblies, and fundamentals of the architectural design process.

Prerequisite(s)/Corequisite(s): AREN 1030 or AE 1030 Design and Simulation Studio I

AREN 2110 THERMODYNAMICS FOR ARCHITECTURAL ENGINEERING (3 credits)

First and Second Laws of Thermodynamics, properties of gases and vapors. Sources of energy and its conversion to work. Applications on Architectural Engineering and Construction.

Prerequisite(s)/Corequisite(s): MATH 1960, PHYS 2110. Not open to non-degree graduate students.

AREN 2250 CONSTRUCTION GRAPHICS AND DESIGN PROCESS (3 credits)

Introduction to typical computer-graphics and calculation applications used in a contemporary architectural engineering design office. Extensive use of CADD and electronic spreadsheet software to solve typical analysis and design problems. Fundamentals of descriptive geometry and two and three-dimensional drawing systems. Use of drawing conventions common to construction design. Basics of personal computer applications. Conceptual review of engineering design and technical problem solving processes.

AREN 2400 BUILDING SYSTEMS (3 credits)

Building systems as integral elements in architecture; building assemblies and materials; building system relationships; communication of ideas between design professionals, clients, contractors and manufacturers; construction drawings and specifications.

Prerequisite(s)/Corequisite(s): AREN 2250 or AE 2250

AREN 3030 AE DESIGN AND SIMULATION STUDIO III (3 credits)

A comprehensive focus on building design and construction through integrating program, structure, site, and enclosure aligned with architectural engineering. Topics include structure and construction assemblies; envelope performance; and whole building organization and space-making using BIM processes.

Prerequisite(s)/Corequisite(s): AREN 2030 or permission of instructor

AREN 3070 MECHANICS OF MATERIALS LAB (1 credit)

Introduction to the behavior and testing of various building materials. The concepts of axial stress and strain, flexural stress and strain, beam deflections and column buckling.

Prerequisite(s)/Corequisite(s): Coreq: MECH 3250.

AREN 3100 HVAC FUNDAMENTALS (3 credits)

Topics will include an introduction to the types of air conditioning systems; the properties of moist air, psychometric processes in HVAC equipment; indoor air quality; thermal comfort; heat transmission in buildings; solar radiation; and the calculation of building infiltration rates, space heating loads and space cooling loads.

Prerequisite(s)/Corequisite(s): MECH 2000 or MENG 2000; corequisite AREN 4040

AREN 3120 MECHANICAL SYSTEMS FOR BUILDINGS (3 credits)

Fluid flow, pumps, and piping design; space air diffusion; fans, ducts, and building air distribution; refrigeration equipment.

Prerequisite(s)/Corequisite(s): AREN 3100 or AE 3100 and CIVE 310 and CIVE 319

AREN 3130 HVAC LAB (1 credit)

Conduct experiments and prepare written reports involving fluid flow, pumps, fans, ducts, piping; basic heat transfer and thermodynamic principles.

Prerequisite(s)/Corequisite(s): AREN 3100 or AE 3100 and CIVE 310 and CIVE 319

AREN 3200 LIGHTING I: FUND FOR DESIGN (3 credits)

Introduction to illumination engineering for building interiors. Topics include the fundamentals of light and vision, lighting equipment, requirements for building lighting, and basic illuminating engineering design methods.

Prerequisite(s)/Corequisite(s): ECEN 2110

AREN 3220 ELECTRICAL SYSTEMS FOR BUILDINGS I (3 credits)

Study of basic design of building electrical systems including circuit design, power distribution and service equipment, communications systems, and special electrical systems.

Prerequisite(s)/Corequisite(s): ECEN 2110

AREN 3230 LIGHTING AND ELECTRICAL SYSTEMS LAB (1 credit)

General introduction to lighting and electrical systems in building interiors, through hands-on exercises using a range of currently available lighting and electrical technologies. Topics include: principles of object modeling, lamp and luminaire workshops, field measurements of lighting and electrical systems, motor workshop, power consumption and power factor workshops.

Prerequisite(s)/Corequisite(s): AREN 3200 or AE 3200; coreq AREN 3220

AREN 3300 BUILDING ACOUSTICS FUNDAMENTALS (3 credits)

An introduction to the acoustics of buildings. Topics include the fundamentals of sound generation, propagation, and measurement; human hearing; acoustic properties of materials and constructions; basic room acoustics; and noise control.

Prerequisite(s)/Corequisite(s): PHYS 2120

AREN 3770 GLOBAL EXPERIENCES IN ARCHITECTURAL ENGINEERING (1-3 credits)

Individual or group educational experience in Architectural Engineering that combine classrooms, lectures, discussions, and/or seminars with field and/or classroom studies in a foreign country. Choice of subject matter and coordination of on- and off-campus activities are at the discretion of the instructor.

AREN 3920 INDIVIDUAL INSTRUCTION IN ARCHITECTURAL ENGINEERING III (1-3 credits)

Individual instruction in Architectural Engineering at the junior level in a selected area, under the supervision and guidance of an Architectural Engineering faculty member.

AREN 3940 SPECIAL TOPICS IN ARCHITECTURAL ENGINEERING III (3 credits)

Special topics in Architectural Engineering at the junior level that are not yet covered in other courses in the Architectural Engineering curriculum.

Prerequisite(s)/Corequisite(s): Permission of instructor.

AREN 4020 ARCHITECTURAL ENGINEERING SENIOR DESIGN PROJECT IN LIGHTING (4 credits)

Senior design project that integrates lighting design and illuminating engineering through a semester long design problem. A self-directed execution of the lighting design process culminating with a professional design solution.

Prerequisite(s)/Corequisite(s): AREN 3220 or AE 3220; AREN 4200 or AE 4200

AREN 4030 AE DESIGN AND SIMULATION STUDIO IV (3 credits)

Advanced topics in Building Information Modeling (BIM) are presented including modeling tools and processes for building engineers, designers, contractors, and operators. BIM management throughout the building lifecycle, technical engineering use cases, and specific topics in virtual reality, simulation, augmented reality, and graphical programming environments are covered. Advanced topics relevant to all AE fields include collaborative design and interoperability.

Prerequisite(s)/Corequisite(s): AREN 3030

AREN 4040 BUILDING ENVELOPES (3 credits)

Design and analysis of building envelopes is an important and interdisciplinary topic within the Architectural Engineering field that relates to all AE subdisciplines (lighting, electrical systems, structures, mechanical systems, and acoustics). This introductory Building Envelopes course is created to supplement the sub-discipline specific introductory courses as well as combine some of these topics under the umbrella of building envelopes. It aims to fill an important gap in the BSAE curriculum and cover a comprehensive introduction to the processes of Building Energy Modeling.

Prerequisite(s)/Corequisite(s): MECH 2000 or MENG 2000; junior standing; corequisite: AREN 3100

AREN 4120 BUILDING ENERGY II: PRIMARY AND SECONDARY SYSTEMS (3 credits)

Analysis and design of building air distribution systems, fans, pumps, piping, space air diffusion and heat exchangers.

Prerequisite(s)/Corequisite(s): AREN 3100 or AE 3100; CIVE 310

AREN 4150 HVAC DESIGN (4 credits)

Develop and design the mechanical system for an actual building, from the programming phase to the final construction documents.

Prerequisite(s)/Corequisite(s): AREN 4120 or AE 4120. Not open to non-degree graduate students.

AREN 4200 LIGHTING II: THEORY, DESIGN & APPLICATION (3 credits)

Design and analysis of lighting systems; the emphasis is on the integration between the lighting design process and the technical foundations for building lighting; topics include design criteria; lighting design procedures, lighting modes and subjective effects; calculation tools. Lab sessions include photometric measurements and computer applications. (Cross-listed with AREN 8206).

Prerequisite(s)/Corequisite(s): AREN 3200 or AE 3200

AREN 4250 LIGHTING DESIGN (4 credits)

Advanced design and analysis of lighting systems. Application of the lighting design process for advanced interior applications such as multimedia facilities, and outdoor applications such as sports lighting. (Requires the initiation of the design process, proceeding in a self-directed manner through intermediate steps, and producing professional lighting design solutions.)

Prerequisite(s)/Corequisite(s): AREN 4200 or AE 4200. Not open to non-degree graduate students.

AREN 4300 ADVANCED NOISE CONTROL (3 credits)

Characterization of acoustic sources; use and measurement of sound power and intensity; sound-structure interaction; acoustic enclosures and barriers; muffling devices; vibration control; and active noise control. (Cross-listed with AREN 8306).

Prerequisite(s)/Corequisite(s): AREN 3300 or AE 3300

AREN 4600 SMART BUILDING SENSORS AND PROGRAMMING (3 credits)

Principles of modeling, interfacing, and signal conditioning of sample building sensors, and acquisition and analysis of data utilizing engineering programming language such as LabVIEW. Overview of current sensing technology and control in buildings.

Prerequisite(s)/Corequisite(s): CIST 1400

AREN 4620 MEMS SENSORS DYNAMICS (3 credits)

Study of the dynamics of Microelectromechanical system (MEMS) beam-structures. Modeling principles and data analysis from different types of MEMS will be explained along with deep theoretical and experimental investigation of nonlinear MEMS dynamics. Learn to conduct experiments using state-of-the-art MEMS characterization tools. (Cross-listed with AREN 8626).

Prerequisite(s)/Corequisite(s): Instructor Permission

AREN 4920 INDIVIDUAL INSTRUCTION IN ARCHITECTURAL ENGINEERING IV (1-3 credits)

Individual instruction in Architectural Engineering at the senior level in a selected area, under the supervision and guidance of an Architectural Engineering faculty member.

Prerequisite(s)/Corequisite(s): Instructor Permission

AREN 4940 SPECIAL TOPICS IN ARCHITECTURAL ENGINEERING IV (3 credits)

Special topics in Architectural Engineering at the senior level that are not yet covered in other courses in the Architectural Engineering curriculum.

Prerequisite(s)/Corequisite(s): Permission of instructor.

Architecture (ARCH)

ARCH 1060 INTRODUCTION TO DESIGN (3 credits)

Investigations into architecture, interior design and related design fields. The forces that shape these fields and the process of production they rely upon. (Cross-listed with IDSG 1060).

ARCH 1400 VISUAL LITERACY LECTURE I (1 credit)

Introduction to critical and analytical skills in a variety of contexts. Focus on understanding modes of visual language as they relate to descriptive and analytical understanding modes of visual language as they relate to descriptive and analytical process, drawing upon contemporary and historical works and issues. Cross-listed with IDSG 1400.

Prerequisite(s)/Corequisite(s): Admission to the College of Architecture and Parallel ARCH 1404.

ARCH 1404 VISUAL LITERACY LAB I (4 credits)

Development of creative and perceptual skills through problem solving in drawing and design with emphasis on composition, analysis, and perceptual drawing. (Lab rotations consist of analysis/composition and perceptual drawing.) Cross-listed with IDSG 1404.

Prerequisite(s)/Corequisite(s): Admission to the College of Architecture and Parallel ARCH 1400.

ARCH 1410 VISUAL LITERACY LECTURE II (1 credit)

Introduction to critical and analytical skills in a variety of contexts. Focus on understanding modes of visual language as they relate to descriptive and analytical understanding modes of visual language as they relate to descriptive processes and color theory application, drawing upon contemporary and historic works and issues. Cross-listed with IDSG 1410.

Prerequisite(s)/Corequisite(s): Admission to the College of Architecture and Parallel ARCH 1414.

ARCH 1414 VISUAL LITERACY LAB II (4 credits)

Development of creative and perceptual skills through problem solving in drawing and design with emphasis on composition, color theory application and drawing. (Lab rotations consist of color theory application and speculative drawing.) Cross-listed with IDSG 1414.

Prerequisite(s)/Corequisite(s): Admission to the College of Architecture and Parallel ARCH 1410.

ARCH 2100 ELEMENTS OF ARCHITECTURAL DESIGN I (3 credits)

Exploration of the controls that determine abstract form. Exercises in two- and three-dimensional composition. Introduction to the design vocabulary and elements of visual organization. (Cross-listed with IDSG 2100).

Prerequisite(s)/Corequisite(s): Pre-architecture and pre-interior design majors only. ARCH 1400/ARCH 1404 or by permission. Parallel: ARCH 2200.

ARCH 2110 ELEMENTS OF ARCHITECTURAL DESIGN II (3 credits)

Basic design concepts as applied to the design of architectural space and form. Human scale, natural light, and structure as for determinants. Design parameters initially considered as isolated entities and then synthesized into mutually reinforcing totalities. (Cross-listed with IDSG 2110).

Prerequisite(s)/Corequisite(s): Pre-architecture and pre-interior design majors only, and ARCH 2100, ARCH 2200. Parallel: ARCH 2210.

ARCH 2200 GRAPHIC COMMUNICATIONS I (2 credits)

(Lect 1, Studio 4) Representation of depth, movement, and structure through use of line, tone, and transparency. Perspective drawings of interior and exterior architectural space. Projects emphasizing pencil and pen and ink as presentation tools. (Cross-listed with IDSG 2200).

Prerequisite(s)/Corequisite(s): Pre-architecture and pre-interior design majors only and ARCH 1400/1404, ARCH 1410/1414 or by permission. Parallel: Arch 2100.

ARCH 2210 GRAPHIC COMMUNICATIONS II (2 credits)

(Lect 1, Studio 4) Introduction to theory and effects of color. Representation of depth, movement, and structure through use of color. Perspective drawing interior and exterior architectural space in color. (Cross-listed with IDSG 2210).

Prerequisite(s)/Corequisite(s): Pre-architecture and pre-interior design majors only, and ARCH 2100, 2200. Parallel: ARCH 2110.

ARCH 2230 COMPUTER APPLICATIONS IN ARCHITECTURAL AND INTERIOR DESIGN I (3 credits)

The architecture student will be provided with a basic understanding of the wide range of man-machine relationships that apply to the profession of architecture. Emphasis will be directed toward introducing the student to the operational procedure and usage of computer programs that exist in the architecture computer program library. Upon completion of this course, the student should be able to make effective use of the computer facilities. Cross-listed with IDSG 2230.

Prerequisite(s)/Corequisite(s): Pre-architecture and pre-interior design majors only.

Art (ART)**ART 1010 ART APPRECIATION (3 credits)**

This course is designed as an introductory-level art history for the non-art major. It surveys the aesthetic principles of the visual arts and their interpretation in a socio-historical context. (May not be taken for major credit.) Lab fee required.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

ART 1040 CROSS-CULTURAL SURVEY OF ART (3 credits)

This is an introductory course that explores the painting, sculpture and decorative arts of five cultures: Mesoamerican, Native American, Asian, European and African. Typical of art history introductory courses, it surveys several cultures and time periods. Students explore reasons for making art and its relationship to the religion, politics and everyday life of the cultures. This course also explores the influence of these various cultures on contemporary American art. Lab fee required.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

ART 1100 FOUNDATION: DRAWING (3 credits)

This course is an introduction to the essential tools of art making through an active exploration of drawing mediums and design concepts. The focus is on the development of conceptual and technical skills used in contemporary studio practice. The course will have a strong emphasis on learning to see in the context of an observational studio practice.

Prerequisite(s)/Corequisite(s): Lab fee required.

ART 1110 FOUNDATION: 3D DESIGN (3 credits)

This course is an introduction to the technical and conceptual aspects of three dimensional design, focusing on drawing and sculpture problems. Students will develop an understanding of 3-D design components and principles, learn handmade and shop oriented technologies, and explore analytical and conceptual drawing. They will also address critical skills and the cultural analysis of art practice.

Prerequisite(s)/Corequisite(s): Lab fee required.

ART 1210 FOUNDATION: 2-D DESIGN (3 credits)

This course is an introduction to the elements and principles of design utilizing a variety of 2-D media and formats. These will be investigated through compositional strategies, studio techniques, gestalt understanding, critical thinking and concepts of contemporary methodologies in art making. Lab fee required.

ART 1220 FOUNDATION: DIGITAL MEDIA (3 credits)

An introduction to digital art and design skills, nomenclature, and practice while learning aesthetics and art and design history. Students learn to balance practical knowledge with visual, theoretical, and historical frameworks, and they complete digital skills exercises that incorporate art and design history. These digital skills are then practiced and reinforced with more in-depth art and design projects.

Prerequisite(s)/Corequisite(s): Lab fee required.

ART 1810 WATERCOLOR I (3 credits)

This course cover beginning watercolor techniques with basic water media skills taught in the class. No experience is necessary for students enrolled in 1810.

ART 1820 WATERCOLOR II (3 credits)

This course will review fundamental methods and techniques associated with watercolor painting and will introduce more advanced techniques. Advanced watercolor students submit a written contract for their semester plan which includes the concept or content and approximate number of paintings. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 credit hours.)

Prerequisite(s)/Corequisite(s): ART 1810

ART 2000 CORE ONE PORTFOLIO REVIEW (0 credits)

ART 2000 Core One Portfolio Review is a zero credit hour course offered every Fall and Spring semester. All BASA majors on the 2013-14 catalog year and after must complete the ART 2000 Core I Portfolio review to graduate with the BASA or BFA major. ART 2000 will usually be completed during the sophomore year; i.e. between 27 and 57 credit hours, but may be completed later.

Prerequisite(s)/Corequisite(s): Students must complete ART 1100; ART 1110; ART 1210; ART 1220. Not open to non-degree graduate students.

ART 2050 SURVEY OF WESTERN ART HISTORY I (3 credits)

A survey of the major developments in painting, sculpture and architecture from Paleolithic cave paintings through the Middle Ages.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

ART 2060 SURVEY OF WESTERN ART HISTORY II (3 credits)

This course is a survey of the major developments in painting, sculpture and architecture from the Renaissance to the 20th century. Lab fee required.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

ART 2070 ART OF INDIA AND SOUTHEAST ASIA (3 credits)

A study of the arts of India and cultures under its influence, with attention to religious and philosophical background. Lab fee required.

Prerequisite(s)/Corequisite(s): Sophomore standing. Not open to non-degree graduate students.

ART 2080 ART OF CHINA AND JAPAN (3 credits)

This course is a study of the arts of China and Japan, with attention to religious and philosophical backgrounds. Lab fee required.

Prerequisite(s)/Corequisite(s): Sophomore standing . Not open to non-degree graduate students.

ART 2100 LIFE DRAWING I (3 credits)

Life Drawing I is an introduction to drawing the human form. The goal of the course is to introduce drawing media and relate them to the problems of drawing the figure. Both perceptual and conceptual skill building are emphasized. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 1110 and ART 1210.

ART 2110 LIFE DRAWING II (3 credits)

Life Drawing II is an expansion of the instruction and skill set obtained during Life Drawing I. This course continues to assist the student become aware of unfamiliar forms in the figure. Perceptual and conceptual skill building is again emphasized. Lab Fee required.

Prerequisite(s)/Corequisite(s): ART 2100

ART 2200 TYPEFACE DESIGN AND TYPOGRAPHY (3 credits)

Typeface Design and Typography is foundational to the practice of graphic design and the Graphic Design Concentration sequence. This intensive studio course focuses on the skills, theory, history and practice of typeface design as well as the theory and practice of typography and layout.

Prerequisite(s)/Corequisite(s): ART 1220 ART 3130

ART 2300 WEB DESIGN (3 credits)

This course is an introduction to basic web design skills and topics, with an emphasis on design and visual communication.

Prerequisite(s)/Corequisite(s): ART 1220. Not open to non-degree graduate students.

ART 2600 SURVEY OF COMICS: MORE THAN CAPES AND TIGHTS (3 credits)

This course is a survey of the history of the Western comic from its earliest days to the modern era.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

ART 2610 EXPLORATION OF GLOBAL COMICS (3 credits)

This course is a survey of the history, influences and evolution of comics from countries around the world such as France, Italy, the Middle East, Japan, South America and Africa. Students will come to understand how comics grew and evolved under different social, political and cultural climates around the world.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

ART 3000 MEDIA ARTS 1 (3 credits)

This course is an introduction and overview to the concentration of Media Arts. The curriculum is designed to provide a basic knowledge of electronic imaging and production techniques for students wishing to continue in digital media or those working with media production artists. Areas introduced will be Digital Image Production, Digital Video Production, and Animation.

Prerequisite(s)/Corequisite(s): Art 1220 or permission of instructor

ART 3100 ADVANCED DRAWING I (3 credits)

Instruction in drawing at an advanced level to develop practical skills and techniques through directed classroom projects.

Prerequisite(s)/Corequisite(s): ART 1110

ART 3110 ADVANCED DRAWING II (3 credits)

Instruction in drawing at an advanced level to develop practical skills and techniques through directed classroom projects. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.)

Prerequisite(s)/Corequisite(s): ART 1110 and ART 2110 and ART 3100

ART 3120 MEDIA ARTS 2 (3 credits)

Advanced overview of Intermedia and digital production as well as critical theory for artists. The course includes both fine art and applied uses of Intermedia and digital art through the development of individual and group projects using digital and electronic media means.

Prerequisite(s)/Corequisite(s): Art 3000 or permission of instructor.

ART 3130 GRAPHIC DESIGN 1 (3 credits)

The first course in the Graphic Design sequence, Graphic Design I is an upper division course focusing on the essential elements of Graphic Design as a discipline and practice. Working individually, students learn the tools, terminology, theory, and history of Graphic Design as a professional and artistic practice. Focused attention and time is spent learning conceptualization skills, digital skills, design practice and the relationship between the designer and their social and historical context.

Prerequisite(s)/Corequisite(s): ART 1220, or permission of instructor

ART 3140 COMPUTER GENERATED IMAGERY (3 credits)

The goal of this course is to introduce students to basic principles and aesthetic considerations of computer generated imagery and interactive virtual spaces (such as game mods and second life). The course will focus on the use of computers as a tool to generate three dimensional forms and create spaces and navigable worlds. The course exposes students to a variety of theoretical and aesthetic positions and encourages them to think of CGI and virtual space building as an art making process. Students will produce art works through the acquisition of technical skills and the exploration of creative uses within the medium.

Prerequisite(s)/Corequisite(s): ART 1220 or permission of the instructor

ART 3150 VIDEO ART (3 credits)

An introduction to video art production and critical theory for artists. The course exposes students to a variety of theoretical and aesthetic positions and encourages them to think of video as an art making process rather than mass media product. Students are required to produce a number of video art works. Production rather than consumption is stressed as a pedagogical mode.

Prerequisite(s)/Corequisite(s): ART 3000 or permission of instructor

ART 3160 GAME DESIGN AS ART (3 credits)

This course will encompass theory and practice of game development, game creation as an art process, and an exploration of the work of artists who have created game based work. Areas of study during the course will include game design and mechanics, explorations of theory, narrative and storytelling with game paradigms, social and ethical concerns of gaming and gaming as cultural resistance.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students

ART 3170 DIGITAL GAME DESIGN (3 credits)

This course provides an introduction to digital game development. It will explore all aspects of creating 2d games. Students will work on individual and team projects. Students will learn to do concept art, pre-production planning, prototyping and testing, all working towards creating completed games.

Prerequisite(s)/Corequisite(s): Non-degree graduate students not allowed.

ART 3200 THE HAND PRODUCED BOOK I: TYPOGRAPHY AND BOOK DESIGN (3 credits)

This course is an introduction to the typographic principles and fundamental letterpress techniques as applied to printed books. Each student learns hand typesetting and letterpress procedures, then designs and prints a small edition of their selected text. Lab fee required.

ART 3210 COLOR THEORY (3 credits)

Instruction in the study of color through directed classroom assignments.

Prerequisite(s)/Corequisite(s): ART 1110 and ART 1210

ART 3220 HAND PRODUCED BOOK II: LETTERPRESS PRINTING (3 credits)

Continuing work in typography and book design with an emphasis on book illustration, multi-color printing, and the standardization and control of edition work. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required.

Prerequisite(s)/Corequisite(s): ART 3200

ART 3230 BOOK STRUCTURES: INTRODUCTION TO BOOKBINDING (3 credits)

This course investigates basic approaches to bookbinding, introducing students to the history, tools and techniques of the discipline. In addition to the concertina structure and simple presentation wrappers, students execute a variety of non-adhesive bindings, both Western and Japanese, and learn basic case-binding methods. Lab fee required.

ART 3250 PATTERNED PAPER (3 credits)

This course examines various techniques employed in the creation of decorative patterned papers traditionally used in bookbinding for both cover material and/or end sheets. The emphasis of the course will be on effective pattern design, the mastery of pattern paper production methods, and fine craft standards. Lab fee required.

ART 3300 ELEMENTARY ART METHODS (3 credits)

Study of the theory, methods, curriculum and recent research affecting art education with emphasis on the elementary art program. Lab fee required.

Prerequisite(s)/Corequisite(s): TED 2400 & Praxis Core, K-12 ART/ED majors only. Junior standing. Lab fee required.

ART 3304 ELEMENTARY ART FIELD EXPERIENCE (0 credits)

ART 3304 is an in-school practicum taken in conjunction with ART 3300. Candidates must demonstrate competencies related to performance in their assigned classroom. This is the first of two required art practicum experiences prior to the clinical practice semester.

Prerequisite(s)/Corequisite(s): EDUC 2520 or TED 2400; Co-requisite ART 3300. Not open to non-degree graduate students.

ART 3310 ELEMENTARY SCULPTURE (3 credits)

This course begins the exploration of the 3-dimensional artistic form which can be constructed using a variety of materials including clay, plaster, wood, steel and new media. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 1220

ART 3320 INTERMEDIATE SCULPTURE (3 credits)

Intermediate Sculpture continues and expands upon the elementary level of sculpture and builds upon methods, technologies, problem solving and professional practice. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 3310

ART 3330 ART IN PUBLIC PLACES (3 credits)

The goal of this course is to introduce students to the concepts and practice related to displaying artwork in public places. Following a thorough examination of the history of public art, the course will focus on the various visual languages and iconography appropriate for public venues. The course emphasizes building original artwork using both traditional and digital technologies, displaying work in public spaces, artist responsibilities and related professional practice.

Prerequisite(s)/Corequisite(s): ART 1110

ART 3340 DIGITAL SCULPTURE - DESIGN AND BUILD TECHNOLOGIES (3 credits)

The goal of this course is to introduce students to the methods of designing objects in a digital environment and realizing them as objects in the physical world. Students will learn to create forms using a variety of 3D modeling software and scanning technologies. The course will introduce students to the Autodesk suite of programs, including 3D Studio Max, Maya Inventor, 123D Catch, as well as Zbrush. Once students have achieved a high level of competency on the computer, the class will begin exploring systems for building their creations. Using Make 123D, Pepakura and Makerware students will fabricate objects in plastic, cardboard and wood. Additionally, the class will address both the artistic and functional applications of these methods.

Prerequisite(s)/Corequisite(s): ART 1110

ART 3360 APPLIED ART & DESIGN (3 credits)

This course is designed to present an opportunity for education and other undergraduate students to develop basic skills, knowledge and appreciation of the arts and crafts of our culture and other world cultures. The course content will be individualized for the purposes of adapting methods, values, content, and media for students working with special populations or in special settings. Lab fee required.

Prerequisite(s)/Corequisite(s): Sophomore.

ART 3370 TECHNOLOGY IN ARTS EDUCATION (3 credits)

This course is specifically designed for pre-service art teachers to learn how to integrate media arts, visual and instructional technology, and digital visual culture into arts curriculum appropriate for application to K-12 contexts. Students will critically examine digital arts, digital art media and technology, and digital visual culture environments and address pedagogical and implementation issues as they simultaneously create their own digital art and digital visual culture. Lab fee required.

Prerequisite(s)/Corequisite(s): Prereq: TED 2400 and Praxis Core; K-12 ART/ED majors only. Coreq: ART 3300. Or with permission of the instructor. Junior standing. Lab fee required. Not open to non-degree graduate students.

ART 3410 ELEMENTARY PAINTING (3 credits)

Instruction in oil painting permits each student the time and environment to work and develop individually. Perceptual and conceptual skill building emphasized. Knowledge of contemporary painting integral to painting practice. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 1110 and ART 1210

ART 3420 INTERMEDIATE PAINTING (3 credits)

Instruction in oil painting permits each student the time and environment to work and develop individually. Emphasis on developing cohesive body of work in context of experimentation. Knowledge of contemporary painting integral to painting practice. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 3410

ART 3510 ELEMENTARY PRINTMAKING (3 credits)

This is an introductory course to the history and studio practices of printmaking. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 1110 and ART 1210

ART 3520 PHOTOGRAPHIC DIGITAL PRINTMAKING (3 credits)

Introduction to photographic and digital printmaking technologies including pre-press and printing techniques. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 1110 and ART 1210

ART 3530 PAPERMAKING (3 credits)

This course examines the history and techniques of classic papermaking, sheet formation and producing edition sheets. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 1110 and ART 1210

ART 3610 ELEMENTARY CERAMICS (3 credits)

This course is an introduction to the medium of ceramics. The focus of this course will be the use of clay as a sculptural medium with the emphasis on various, basic techniques for creating objects in clay. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 1220

ART 3620 INTERMEDIATE CERAMICS (3 credits)

This course is a continuation of processes covered in the Elementary Ceramics course with basic pottery techniques utilizing the wheel, hand building, object prototyping and advanced mold making. Additional emphasis will be on scale and completion of mid-to large size projects.

Prerequisite(s)/Corequisite(s): ART 3610. Lab fee required.

ART 3700 INTRODUCTION TO ANCIENT ART (3 credits)

This course provides an introduction into the art and cultures of the ancient Mediterranean areas. Lab fee required.

Prerequisite(s)/Corequisite(s): ART 2050 or permission of instructor. Not open to non-degree graduate students.

ART 3710 EGYPTIAN ART (3 credits)

This course will examine ancient Egyptian culture through its art and architecture. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of Art 2050 & Art 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3720 GREEK ART (3 credits)

This course will immerse students in the art and culture of ancient Greece. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3730 ETRUSCAN & ROMAN ART (3 credits)

This course provides an in-depth investigation of Etruscan and Roman civilizations. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3750 AMERICAN ART (3 credits)

This course provides a study of art, architecture, and material culture produced in the United States approached through varied contexts (artistic, religious, political, economic, etc.) and methodologies. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3760 ART HISTORY SEMINAR (3 credits)

This class prepares students for advanced level art history courses as well as a career in art history and/or related fields. Basic skills such as critical thinking, analytical reading, traditional and innovative research methods, writing, and public speaking will be emphasized.

Prerequisite(s)/Corequisite(s): ART 2050 and ART 2060

ART 3770 HISTORY OF ARCHITECTURE TO 1850 (3 credits)

A survey of the history, aesthetics and technical developments in architecture from ancient times to the middle of the 19th century. Lab fee required.

Prerequisite(s)/Corequisite(s): None. Recommended: ART 2050 or ART 2060 (prereq or coreq).

ART 3780 HISTORY OF ARCHITECTURE SINCE 1850 (3 credits)

This course is a survey of the history of architecture since the coming of the industrial age, including the major schools and movements in architecture of the 20th century.

Prerequisite(s)/Corequisite(s): None. Recommended: ART 2050 or ART 2060. Lab fee required.

ART 3800 HISTORY OF DESIGN (3 credits)

The history of modern global design movements, primarily 1851 to present. The movements cover a range of media, from graphic arts and industrial design to furnishing and interior design.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 3830 HISTORY OF PHOTOGRAPHY (3 credits)

This course provides an introduction to the history of photography from its earliest forms to that of contemporary society and culture. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 3860 WOMEN IN ANCIENT AND MEDIEVAL ART (3 credits)

The purpose of this course is to provide an introduction of women through the art and culture of the ancient Mediterranean and western Middle Ages.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3870 GENDER & SEXUALITY IN MODERN ART (3 credits)

This course provides an introduction to topics of gender and sexuality in modern art, from 1860 to the present.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 3910 INTERMEDIATE PRINTMAKING (3 credits)

Intermediate Printmaking expands upon basic printmaking concepts and techniques and includes monotype variations, intaglio techniques, Moku Hanga woodcuts and other woodcut processes. Students will be involved with drawing, creating, problem solving and understanding the printmaking studio and its processes.

Prerequisite(s)/Corequisite(s): ART 3510. Not open to non-degree graduate students.

ART 4000 SPECIAL SEMINARS IN ART EDUCATION (1-3 credits)

A series of intensive courses in the history and theory of art education designed specifically for elementary and secondary school art teachers. These courses are scheduled as special seminars or workshops according to purpose. (Cross-listed with ART 8006.)

Prerequisite(s)/Corequisite(s): Junior and Department Permission

ART 4010 SPECIAL TOPICS IN STUDIO ART (3 credits)

This course concerns itself with a variety of limited topics in the field of Studio Art. At times this course is coordinated with an external event such as a visiting artist, exhibition or study trip. It may also be considered a testing ground for acceptance and interest in a relatively new topic in Studio Arts. Exact content will be determined by the offering instructor.

Prerequisite(s)/Corequisite(s): Prerequisites of each 4010 course will be determined by the instructor and therefore will require special permission.

ART 4020 PROFESSIONAL STUDIO PRACTICES (3 credits)

This is a capstone course for the Studio Arts area that includes book arts, ceramics, drawing, painting, printmaking, sculpture and media (2D, 3D, and Media). During the semester, students will learn the administrative component that is essential for cultivating and maintaining a sustainable studio practice in art. Activities include writing artist statements, an artist curriculum vitae alongside participating in the simulated arts activities of applying for an exhibition and artist grant and understanding the benefits and liabilities of social media.

Prerequisite(s)/Corequisite(s): Students must be of Junior standing. Not open to non-degree graduate students.

ART 4130 MEDIA ART III (3 credits)

This is a digital studio course for students interested in exploring interactive digital projects using current or emerging technologies. The course includes both fine art and applied uses of digital art through the development of individual and group projects using digital and electronic media means. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.)

Prerequisite(s)/Corequisite(s): ART 3120 or permission of instructor.

ART 4140 COMPUTER GENERATED IMAGERY II (3 credits)

This course is a continuation of principles and practices introduced in ART 3140. The goal of this course is intended for experienced students to create projects that explore advanced principles and aesthetic considerations of computer generated imagery and interactive 3d virtual spaces.

Prerequisite(s)/Corequisite(s): ART 3140 or permission of the instructor.

ART 4150 GRAPHIC DESIGN 2 (3 credits)

A continuation of the Graphic Design sequence, Graphic Design 2 is an advanced course utilizing the knowledge and skills acquired in Graphic Design 1. In Graphic Design 2 students apply acquired knowledge and skills to solve design problems for more complex systems. Intermediate digital skills are paired with intermediate production and materials problems as students complete product and package design systems. These design systems are then paired with companion web and video components. Additionally, students continue their study of professional practices and presentation skills.

Prerequisite(s)/Corequisite(s): ART 3130, or permission of instructor.

ART 4160 GRAPHIC DESIGN 3 (3 credits)

A continuation of the Graphic Design sequence, Graphic Design 3 is an advanced, professional simulation course utilizing the knowledge and skills acquired in Graphic Design 1 and 2. Working individually and in teams, students create large-scale design systems over multiple communications channels for consumer product or services. The course culminates in a thesis presentation with accompanying brand book.

Prerequisite(s)/Corequisite(s): ART 4150, or permission of instructor.

ART 4170 GRAPHIC DESIGN STUDIO (3 credits)

A continuation of the Graphic Design sequence, Design Studio is an advanced, capstone course utilizing the knowledge and skills acquired in Graphic Design 1, 2, and 3. Working individually and in teams, students design thesis research projects, create professional portfolios, present their work to the public, and work on client projects for on and off-campus organizations.

Prerequisite(s)/Corequisite(s): ART 4160, or permission of instructor.

ART 4180 ADVANCED DIGITAL GAME DESIGN (3 credits)

This course provides an advanced experience to digital game development. It explores all aspects of creating 3d games. Students will work on individual and team projects and will learn concept art, pre-production planning, prototyping and testing while working towards creating completed games using a three dimensional platform.

Prerequisite(s)/Corequisite(s): ART 3140, ART 4140, or permission of the instructor. Not open to non-degree graduate students.

ART 4190 GAME DESIGN STUDIO (3 credits)

This course provides a capstone study in game development. It explores game design, game prototyping, finalization, distribution and promotion. Students will work in teams to conceptualize, pitch, prototype, and present an audience ready game. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.)

Prerequisite(s)/Corequisite(s): ART 4180, or permission of instructor. Not open to non-degree graduate students.

ART 4210 PRINTED BOOKS (3 credits)

This course covers the invention of moveable type through the refinement in printing styles and technology to the present age.

Prerequisite(s)/Corequisite(s): ART 3220 and ART 3230 or permission of instructor.

ART 4300 SECONDARY ART METHODS (3 credits)

This course is the study of theory, methods, art curriculum content, and recent research in art education relative to art education in middle and high school settings. Lab fee required

Prerequisite(s)/Corequisite(s): TED 2400 & Praxis Core; K-12 ART/ED majors only. Junior standing.

ART 4310 ADVANCED SCULPTURE (3 credits)

Advanced work in area of student's choice with facilities for oxyacetylene welding, arc welding and wood working. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 8316.)

Prerequisite(s)/Corequisite(s): ART 3310

ART 4320 BACHELOR OF FINE ARTS INDEPENDENT STUDY I (3 credits)

This course is an advanced individualized study in studio art concentration area of Ceramics, Drawing, Hand Produced Book, Sculpture, Painting, Printmaking or Graphic Design.

Prerequisite(s)/Corequisite(s): Advanced level courses in area of concentration, and permission of instructor.

ART 4330 BACHELOR OF FINE ARTS INDEPENDENT STUDY II (3 credits)

BFA II is the second semester of an advanced individualized study in a studio art concentration area of Ceramics, Drawing, Hand Produced Book, Sculpture, Painting, Printmaking or Graphic Design. Lab fee required.

Prerequisite(s)/Corequisite(s): Completion of ART 4320 (BFA I) in the area of emphasis.

ART 4340 BACHELOR OF FINE ARTS INDEPENDENT STUDY III (3 credits)

This course is the continuation of BFA II for the advanced individualized study in studio art concentration area of Ceramics, Drawing, Hand Produced Book, Sculpture, Painting, Printmaking or Graphic Design. This course is only used if, for some reason the student is unable to proceed to BFA Thesis after completing BFA II. Lab fee required.

Prerequisite(s)/Corequisite(s): Completion of ART 4320 and 4330 and permission of instructor as this course is only used when the student is unable to proceed to the BFA Thesis.

ART 4350 TRENDING TOPICS IN ART EDUCATION (3 credits)

This is a series of intensive courses dealing with the theory and practice of current trends in art education designed specifically for pre-service art teachers. These courses are scheduled as special seminars or workshops according to purpose. Lab fee may be required.

Prerequisite(s)/Corequisite(s): Prereq: TED 2400 and Praxis Core; K-12 ART/ED majors only. Junior standing or to be determined by the instructor based upon the preparation required for an adequate understanding of the material of the course.

ART 4410 ADVANCED PAINTING (3 credits)

Advanced instruction in oil painting permits students the time and environment to work and develop individually. Emphasis on developing cohesive body of work as continuation from work done in Intermediate painting. Knowledge of contemporary painting integral to painting practice. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 8416.)

Prerequisite(s)/Corequisite(s): ART 3420

ART 4420 BACHELOR OF FINE ARTS THESIS (3 credits)

This course is the culmination of the BFA process with an individually designed study in studio art concentration area of Ceramics, Drawing, Hand Produced Book, Sculpture, Painting, Printmaking or Graphic Design. A faculty committee and thesis exhibition are required for completion of this course. Lab fee required.

Prerequisite(s)/Corequisite(s): Completion of ART 4320 and ART 4330 and permission of instructor.

ART 4440 INDEPENDENT STUDY IN STUDIO ART (1-3 credits)

This course is an independent study with variable credit for studio art students who have already taken the most advanced level course in their chosen degree program.

Prerequisite(s)/Corequisite(s): This course requires permission from instructor.

ART 4510 ADVANCED TECHNIQUES IN PRINTMAKING (3 credits)

This course allows students to develop their skills in both lithography and intaglio and the color processes for each printmaking technique. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 8516.)

Prerequisite(s)/Corequisite(s): ART 3510

ART 4530 ART INTERNSHIP (1-3 credits)

A tutored internship at a local arts institution that will introduce students to following areas of concentration: Curatorial Collections Research, Education Outreach, and Preparation/Installation. Working as an Artist's Studio Assistant or in the areas of Web page design or graphic design are also appropriate internship projects. Ideally, the internship should provide the student with an opportunity to gain pre-professional experiences and skills. It should also increase his or her awareness of current issues and practices within the field of art.

Prerequisite(s)/Corequisite(s): Reserved for studio art (BASA & BFA), Art Education, or Art History majors; junior standing & min GPA of 3.0. Permission of Faculty Advisor & Intern Sponsor required. Advanced art history, art education, or studio courses may be required.

ART 4610 ADVANCED CERAMICS (3 credits)

This course will consist of advanced work on the potter's wheel, casting and preparations in glaze composition, as well as loading and firing of a high-fire kiln. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 8616.)

Prerequisite(s)/Corequisite(s): ART 3610

ART 4730 CLASSICAL ART HISTORY (3 credits)

This course is a study of painting, sculpture, architecture and minor arts of the classical world beginning with Cycladic art and including Minoan, Mycenaean, Greek, Etruscan and Roman art through 300 A.D. Lab fee required. (Cross-listed with ART 8736.)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4750 LATE ROMAN AND BYZANTINE ART HISTORY (3 credits)

A study of painting, sculpture and architecture of the Eastern Roman Empire from the founding of Constantinople, and of Western Europe from the time of Constantine to the dissolution of the Western Roman Empire. Lab fee required. (Cross-listed with ART 8756.)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4770 EARLY MEDIEVAL ART (3 credits)

This course provides a study of painting, sculpture and architecture of Western Medieval Art. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4780 LATE MEDIEVAL ART HISTORY (3 credits)

This course is a study of painting, sculpture and architecture of the European Middle Age periods of Romanesque and Gothic Art. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 4810 NORTHERN EUROPEAN RENAISSANCE ART HISTORY (3 credits)

This course is a study of the paintings, sculpture and architecture during the 14th, 15th and 16th centuries in France, the Low Countries, Germany, Spain and England. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 4830 ITALIAN RENAISSANCE ART HISTORY (3 credits)

Study of painting, sculpture and architecture in Italy during the 14th, 15th and 16th centuries. Lab fee required. (Cross-listed with ART 8836.)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4850 BAROQUE AND ROCOCO ART HISTORY (3 credits)

This course is a study of painting, sculpture and architecture in Europe during the 17th and 18th centuries. Lab fee required. (Cross-listed with ART 8856.)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4880 MODERN ART I (ART OF EUROPE AND THE AMERICAS, 1850-1920) (3 credits)

A study of the most significant developments in European art and architecture dating from the early Modern period and examined in varied contexts (artistic, religious, political, economic, etc.). (Cross-listed with ART 8886.)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 plus junior standing. For non-majors, junior standing and permission of the instructor are required. Lab fee required.

ART 4890 MODERN ART II (ART OF EUROPE AND THE AMERICAS, 1918-1968) (3 credits)

This course explores the major artistic movements and artists active in Europe and the Americas between the end of WWI and the Vietnam Era circa 1968. (Cross-listed with ART 8896.)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of Art 2050 & Art 2060 plus junior standing. For non-majors, junior standing and permission of the instructor are required. Lab fee required.

ART 4900 CONTEMPORARY ART HISTORY SINCE 1968 (3 credits)

This course introduces contemporary visual arts in a global context from 1968 to the present with topics of discussion including art, aesthetics, politics, gender and sexuality, race and economics. (Cross-listed with ART 8906.)

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of Art 2050 & Art 2060 plus junior standing. For non-majors, junior standing and permission of the instructor are required. Lab fee required.

ART 4910 INDEPENDENT STUDY IN ART HISTORY (1-3 credits)

This course is an independent research project under the direct supervision of the sponsoring faculty member, generally involving the writing of a paper. Lab fee required.

Prerequisite(s)/Corequisite(s): Art History major in upper division and permission of instructor.

ART 4920 ART IN THEORY AND IN PRACTICE SINCE 1900 (3 credits)

This course introduces BFA students to the essential theories and critical positions that have shaped the practice of contemporary art in the West since 1900. It also addresses the purpose and nature of the artist's statement, the studio critique, the exhibition, and professionally written art criticism.

Prerequisite(s)/Corequisite(s): Acceptance in BFA program, ART 2050 & ART 2060, & ART 4890 or ART 4900. Other students will need instructor's permission. Students not meeting the min qualifications or instructor's permission will be dropped. Not open to non-degree graduate students.

ART 4930 SPECIAL TOPICS IN ART HISTORY (3 credits)

These illustrated lecture courses deal with a limited topic in the field of art history. The course may be coordinated with an external event such as an exhibition, publication or study trip. Lab fee required. (Cross-listed with ART 8936)

Prerequisite(s)/Corequisite(s): ART 2060 or instructor permission.

ART 4940 ART HISTORY METHODS (3 credits)

This is a seminar course surveying major developments in aesthetics and selected problems in the discipline of Art History. Required for art history majors. Lab fee required.

Prerequisite(s)/Corequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), and preferably, one other art history course.

ART 4950 ART CRITICISM (3 credits)

A study of art criticism from antiquity to the present. Students will both engage art critical writing as a creative and analytical tool.

Prerequisite(s)/Corequisite(s): Senior standing in Art History and completion of or concurrent enrollment in ART 3760 or ART 4940) plus the approval of the Art History faculty.

ART 4990 ART HISTORY THESIS (1 credit)

Art History majors will revise a scholarly paper from an upper-level Art History course in order to obtain a well-written and thoroughly researched paper (20 pages) to submit as part of a graduate school application. Students will also give a required 20-minute oral presentation.

Prerequisite(s)/Corequisite(s): Senior standing in Art History and completion of or concurrent enrollment in ART 3760 (Art History Seminar) or Art 4940 (Art History Methods) plus the approval of the Art History faculty.

Aviation (AVN)

AVN 1000 INTRODUCTION TO AVIATION AND AEROSPACE (3 credits)

This course provides a broad understanding of all aspects of the air transportation and aerospace industries. Lectures will cover what has happened in the industry to date, with emphasis on present and future developments in air transportation. The course will include the impact the airline industry is making on airports and other segments of aviation and aerospace.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

AVN 1020 PRIVATE PILOT THEORY (3 credits)

This course will familiarize the student with theories associated with flight. These include aerodynamics, weather, FAA regulations, navigation, airports, airspace and aviation safety. There is no flight requirement associated with this course.

AVN 1024 PRIVATE PILOT FLIGHT LABORATORY (1 credit)

This laboratory course is designed for students pursuing flight requirements for the FAA private pilot certificate. The student will complete all flight requirements for solo flight. Course will include flight in aircraft simulators and single-engine aircraft. Class is conducted off campus. Special fees apply.

Prerequisite(s)/Corequisite(s): Completion of or concurrent enrollment in AVN 1020, or successful completion of the FAA Private Knowledge Test.

AVN 1030 PRIVATE PILOT FLIGHT CERTIFICATE (2 credits)

This course will prepare the student for the FAA practical flight examination for the private pilot certificate. Course involves flight in personal computer assisted training device and single-engine aircraft. Student is required to successfully complete all FAA certification requirements and obtain a private pilot certificate. Classes will be conducted off campus. Special fees apply.

Prerequisite(s)/Corequisite(s): AVN 1020 and AVN 1024.

AVN 1040 HISTORY OF AVIATION AND AEROSPACE (3 credits)

The course introduces students to the history of aviation and aerospace with emphasis on the evolution of technologies, policies, business models, and transportation.

Distribution: Social Science General Education course

AVN 1160 AVIATION SAFETY (3 credits)

This course provides the student with a detailed introduction to aspects of aviation safety as well as the associated components of flight human factors, aircraft technology, weather related accidents and accident investigation.

Prerequisite(s)/Corequisite(s): AVN 1000

AVN 1500 INTRODUCTION TO UNMANNED AIRCRAFT SYSTEMS (3 credits)

This course is an introductory overview of Unmanned Aircraft Systems including the regulatory process, history, application and career opportunities, ethical concerns, and safety management of UAS operations.

Prerequisite(s)/Corequisite(s): AVN 1000 and AVN 1020. Not open to non-degree graduate students.

AVN 2020 AIRLINE OPERATIONS (3 credits)

The purpose of this course is to introduce the student to operational aspects of airline management. Topics to be covered include management, leadership, labor relations, marketing, forecasting, and fleet planning.

Prerequisite(s)/Corequisite(s): AVN 1000

AVN 2050 INTRODUCTION TO AIRPORT ADMINISTRATION (3 credits)

This course examines airport operations, safety and security, various administrative roles within the airport community, and the impact airports can have on local and regional economies. Students will explore the unique role public airports play as an interface between the traveling public and private airlines.

Prerequisite(s)/Corequisite(s): AVN 1000

AVN 2100 FLIGHT TEAM (1 credit)

Students will learn and master the skills associated with the 9 different events associated with the National Intercollegiate Flying Association Regional and National Safety and Flight Evaluation Conferences or SAFECONs. The events include: Computer Accuracy, Simulated Comprehensive Aircraft Navigation (SCAN), Aircraft Recognition, Preflight Inspection, Ground Trainer, Message Drop, Navigation, Short-Field Landing, and Power-Off Landing.

Prerequisite(s)/Corequisite(s): Permission of the Flight Team Advisor is required

AVN 2104 INSTRUMENT RATING 1 (2 credits)

The student will complete approximately 25 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator and FAA-approved Advanced Aviation Training Devices on the UNO Main Campus; objective is to complete the first portion of training needed for the FAA Instrument Rating. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s)/Corequisite(s): Concurrent enrollment in AVN 2170 or instructor permission. Not open to non-degree graduate students.

AVN 2114 INSTRUMENT RATING 2 (1 credit)

The student will complete approximately 20 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator; objective is to complete the final portion of training needed for the FAA Instrument Rating. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s)/Corequisite(s): AVN 2170 and AVN 2104 or instructor permission. Not open to non-degree graduate students.

AVN 2124 COMMERCIAL PILOT CERTIFICATE 1 (2 credits)

The student will complete approximately 40 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator and FAA-approved Advanced Aviation Training Devices on the UNO Main Campus; objective is to complete the first of three sections of training needed for the FAA Commercial Pilot Certificate. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s)/Corequisite(s): Concurrent enrollment in AVN 2180 or instructor permission. Not open to non-degree graduate students.

AVN 2134 COMMERCIAL PILOT CERTIFICATE 2 (2 credits)

The student will complete approximately 40 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator; objective is to complete the second of three sections of training needed for the FAA Commercial Pilot Certificate. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s)/Corequisite(s): AVN 2124 or instructor permission. Not open to non-degree graduate students.

AVN 2144 COMMERCIAL PILOT CERTIFICATE 3 (2 credits)

The student will complete approximately 40 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator; objective is to complete the final third of training needed for the FAA Commercial Pilot Certificate. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s)/Corequisite(s): AVN 2134 or instructor permission. Not open to non-degree graduate students.

AVN 2164 PROFESSIONAL PILOT DEVELOPMENT (2 credits)

This course is intended to supplement the Instrument Rating and Commercial Certificate courses by providing flight experience and simulator training in the areas of instrument flying, complex airplane/multiengine operations, abnormal and emergency situations, and crew resource management.

Prerequisite(s)/Corequisite(s): AVN 1030 or hold a valid US Private Pilot Certificate.

AVN 2170 INSTRUMENT FLIGHT THEORY (3 credits)

This course provides the student with an understanding of the theories and regulations involved in instrument flight. Course will include a strong foundation in attitude instrument flying and instrument navigation to prepare the student for the FAA Instrument Rating Knowledge Test. There is no flight training involved in this course.

Prerequisite(s)/Corequisite(s): AVN 1030 or hold a valid U.S. Private Pilot Certificate; or instructor permission.

AVN 2180 COMMERCIAL PILOT THEORY (3 credits)

This course provides the student with an understanding of the theories involved in flight at the commercial level. Course will include extensive review and study of VFR and IFR cross-country procedures and night flight procedures to prepare the student for the FAA commercial Pilot Knowledge Test. There is no flight training involved in this course.

Prerequisite(s)/Corequisite(s): AVN 1030 or possess a U.S. FAA issued Private Pilot Certificate; or instructor permission. Strongly recommended that student possess a U.S. instrument rating.

AVN 2500 UNMANNED AIRCRAFT SYSTEMS FLIGHT OPERATIONS (3 credits)

This course will give students hands-on flight training experience with small unmanned aircraft including mission planning, operational control, and working with different types of payloads.

Prerequisite(s)/Corequisite(s): AVN 1500 and FAA Remote Pilot Certificate. Not open to non-degree graduate students.

AVN 2510 DIVERSITY IN AVIATION (3 credits)

This course provides an overview of the contributions women and minorities have made to the field of aviation. Emphasis is placed on past, present and future roles of women and minorities in aviation. The course includes other topics such as international aspects and issues of aviation.

Prerequisite(s)/Corequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

AVN 2750 AVIATION METEOROLOGY (3 credits)

An introductory study of the key elements of the atmosphere's structure from the earth's surface to the upper levels; weather systems and hazards to aviation operations plus impact of adverse weather on aeronautical operations. Course will include review of air mass characteristics, frontal weather, and pressure system structure.

Prerequisite(s)/Corequisite(s): AVN 1020, and MATH 1310 or MATH 1220 or equivalent.

AVN 2900 INDEPENDENT STUDY IN GENERAL AVIATION (3 credits)

This course will cover various topics in aviation to be determined with the instructor and student. Possible topics include Ground Instructor Ratings, crew resource management, airline airport analysis, military history, effects of privatization, etc.

AVN 3000 BUSINESS AND CORPORATE AVIATION (3 credits)

This course will provide a broad understanding of aspects related to the field of business and corporate aviation. Information that will be covered includes: the history of business and corporate aviation; regulations and associations; the value of using business aircraft; aircraft selection; the differences between corporate flight department, fractional ownership, and charter departments; insurance requirements; and safety and security issues.

Prerequisite(s)/Corequisite(s): AVN 1000 and Junior or Senior standing

AVN 3040 HUMAN FACTORS IN AVIATION SAFETY (3 credits)

The purpose of this course is to provide students with an understanding of human factors as it applies to pilots and administrators. Topics will include pilot physiological and psychological issues, work station design, crew resource management, and related public sector issues for managers.

Prerequisite(s)/Corequisite(s): AVN 1160

AVN 3050 UNMANNED AIRCRAFT SYSTEM DESIGN, DEVELOPMENT, AND MAINTENANCE (3 credits)

This course offers students theoretical knowledge and hands-on experience with small unmanned aircraft system design, development, and maintenance. Students will learn principles of UAS design, development, and maintenance, and will apply interdisciplinary knowledge to build small UAS.

Prerequisite(s)/Corequisite(s): AVN 2500. Not open to non-degree graduate students.

AVN 3060 WRITING IN AVIATION (3 credits)

This course will further develop the communication skills of aviation students through various forms of writing. Students will compose a research paper and other writing assignments.

Prerequisite(s)/Corequisite(s): ENGL 1160 and AVN 1000

AVN 3070 AIR TRAFFIC CONTROL (3 credits)

The purpose of this course is to introduce students to the Federal Aviation Administration (FAA) Air Traffic Control system. Elements and requirements of the course will include: basic air traffic control procedures for pilots, navigation aids, control tower operations, radar approach and departure regulations, and airport traffic control (ATC).

AVN 3090 AIRPORT ADMINISTRATION AND PLANNING (3 credits)

This course covers the nation's airspace design, navigation and air traffic systems and their effect on airport capacity. Additionally, the national airport system will be investigated as well as airport design and development parameters, fiscal processes, and management considerations. (Cross-listed with AVN 8095)

Prerequisite(s)/Corequisite(s): AVN 2050

AVN 3150 AVIATION LAW (3 credits)

The purpose of this course is to increase the student's knowledge of aviation law and regulations. Particular attention will focus on the American legal system; important legal concepts, regulators of the industry and international aviation law. Case studies will be discussed throughout the course. (Cross-listed with AVN 8155).

Prerequisite(s)/Corequisite(s): AVN 1000 and junior standing.

AVN 3190 CERTIFIED FLIGHT INSTRUCTOR THEORY (3 credits)

Provide the student with an understanding of the theories involved in flight instruction. Course will include extensive oral presentation of complex aeronautical information and use of the personal computer assisted training device. Students are expected to pass FAA Fundamentals of Instructing and FAA Flight Ground Instructor Knowledge tests. There is no flight training in this course.

Prerequisite(s)/Corequisite(s): AVN 2184 and SPCH 1110.

AVN 3194 CERTIFIED FLIGHT INSTRUCTOR I (2 credits)

This course consists of approximately 25 hours of flight training in flight instruction procedures required to obtain the FAA flight instructor certificate. Special Fees apply.

Prerequisite(s)/Corequisite(s): AVN 3190 (may enroll concurrently).

AVN 3200 COOPERATIVE EDUCATION IN AVIATION (1-6 credits)

This course will complement course work with a relevant professional work experience or practicum in aviation. The practicum/field experience may be a special project in an aviation organization to be coordinated by the instructor. Offered as a credit/no-credit course.

Prerequisite(s)/Corequisite(s): AVN 3060, aviation major, junior/senior standing, and instructor permission.

AVN 3304 CERTIFIED FLIGHT INSTRUCTOR II (2 credits)

This course consists of approximately 10 hours of flight training in instructing in instrument procedures and approaches in preparation for FAA certified flight instructor-instrument rating. Class is conducted off campus. Special fees apply.

Prerequisite(s)/Corequisite(s): AVN 3300 or concurrent enrollment.

AVN 3400 MULTI-ENGINE CERTIFICATION (2 credits)

Course consists of ground and flight training in multi-engine aircraft procedures. Student will meet all flight requirements for the FAA multi-engine rating. Training will include use of the Personal Computer Assisted Training Device. Class is conducted off campus. Special fees apply.

Prerequisite(s)/Corequisite(s): AVN 2184 or concurrent enrollment or instructor permission.

AVN 3500 RESEARCH METHODS IN AVIATION (3 credits)

An introductory research methods course focused on contemporary as well as historical aviation problems and topics, but from an investigative perspective. The primary focus will be the preparation of standard research documents and the use of traditional statistical methods to evaluate various data sources.

Prerequisite(s)/Corequisite(s): 60 hours of undergraduate credit and AVN 3060 completed or in progress.

AVN 3510 AEROSPACE SCIENCES (3 credits)

This introductory course will provide pre-service teacher candidates, aviation students, and students at large the opportunity for a science oriented general education course. The curriculum will be focused in the areas of earth and space science, geospatial technology, and aeronautics. Key topics for this course will include the geoscience practice of Geographic Information Systems, Global Positioning System, and the NASA Jet Propulsion Laboratory/ UNO designed Data-Slate remote sensing program. Also included will be space sciences focused solar system exploration, satellite technology, and astronautics. Students will engage in aeronautic science topics inclusive of the study of aerodynamics of flight, meteorological science and weather, and flight technology. All students will be provided opportunity to apply concepts of flight in the Aviation Institute's Advanced Simulation Facility.

AVN 3600 INTERNATIONAL AVIATION (3 credits)

This course examines global air transport and its impact on the development of the global economy. Lectures and readings will provide a solid foundation of historical knowledge about international air transport and its development in various countries, before exploring current policy debates about liberalization, global alliances, and other critical issues. (Cross-listed with AVN 8605)

Prerequisite(s)/Corequisite(s): AVN 2020

AVN 3700 TRANSPORTATION ANALYSIS (3 credits)

This course is an extension of introductory financial courses; special emphasis on service characteristics of air carriers. Review of airline revenue and expense streams, pricing and fares, fiscal market segmentation, and fleet planning. Focused approach to understanding the monetary forces that underlie the business practices of domestic and international passenger and cargo airlines.

Prerequisite(s)/Corequisite(s): ECON1200 or higher and junior standing

AVN 4000 INDEPENDENT RESEARCH IN AVIATION (1-3 credits)

The purpose of this course is to provide the aviation student an opportunity to complete an in-depth analysis of a specific aviation topic. Examples: aerodynamics, airports rates/charges analysis, cost-allocation for airside/ landside, aviation marketing relating to aircraft manufacturing, airline promotion, flight component, off-airport subjects, comprehensive regional planning, environmental subject, etc.

Prerequisite(s)/Corequisite(s): Aviation major, senior standing, and written permission of the instructor.

AVN 4010 AERODYNAMICS AND AIRCRAFT PERFORMANCE (3 credits)

Provides the student with an understanding of the factors affecting aircraft performance during various phases of flight. Topics will include aircraft performance requirements outlined in the Federal Aviation Administration Regulations, use of performance charts and tables, runway airport analysis, and climb cruise descent performance.

Prerequisite(s)/Corequisite(s): AVN 1000, 2184, MATH 1320 or instructor permission.

AVN 4020 AIRCRAFT SYSTEMS (3 credits)

Provides the student with an understanding of systems employed on technologically advanced, sophisticated aircraft. Systems covered will include electrical, hydraulic, engines, flight control and pneumatic systems.

Prerequisite(s)/Corequisite(s): AVN 1000 and AVN 2184 or instructor permission.

AVN 4050 GENERAL AVIATION OPERATIONS (3 credits)
