This course is designed for graduate candidates enrolled in the Literacy MS or reading specialist endorsement program. The purpose of this course is to develop an understanding of theory and research as it relates to assessment, evaluation and instructional approaches that support Pk-12 reading development. This knowledge is applied through a practicum experience with Pk-12 students in which candidates integrate knowledge and practices related to assessment and evaluation of readers' strengths and needs.

Prerequisite(s): Graduate Standing

TED 8410 IMPROVEMENT OF INSTRUCTION: SPECIAL TOPICS (3 credits)

This course provides an in-depth study of instructional theory, research, and methodology designed to extend teachers' professional knowledge base and enhance their pedagogical skills. When offered, a course may be limited to improvement of instruction in a selected subject area. (Cross-listed with STEM 8410).

Prerequisite(s): Graduate standing.

TED 8420 TRENDS AND TEACHING STRATEGIES IN SCIENCE EDUCATION (3 credits)

This course is designed for the graduate candidate in the Department of Teacher Education whose study program emphasis is in the area of science education. The course will describe and analyze past and present trends in science education, including curricula, teaching-learning strategies, the laboratory and instructional materials. The course focus will be K-12 and as such is meant to serve both elementary and secondary graduate candidates. (Cross-listed with STEM 8420).

TED 8430 SCHOOL CURRICULUM PLANNING (3 credits)

This course is designed to provide advanced degree candidates with an understanding of the theory, principles, and practices utilized in curriculum planning in American schools. This course focuses on the principles and practices of effective curriculum planning and teachers' part in these processes as curriculum developers. (Cross-listed with STEM 8430).

TED 8470 TEACHING THE LANGUAGE ARTS (3 credits)

This course is designed to enhance candidates' knowledge of best practices in teaching reading, writing, listening, and speaking. Candidates will learn about research supported appropriate language arts instruction strategies and assessments. This course will inform graduate students as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

TED 8480 FOUNDATIONS OF BILINGUAL EDUCATION (3 credits)

This course is designed to give future and current teachers a thorough understanding of the theoretical, political, historical, and practical foundations of bilingual/multicultural education in the United States. As dedicated practitioners, reflective scholars, and responsible citizens, graduate students will have knowledge of factors that contribute to effective multilingual and multicultural learning environments that promote individual and societal bilingualism. Advanced Spanish language proficiency required.

Prerequisite(s): Graduate status

TED 8490 SPANISH LANGUAGE ARTS (3 credits)

This course is designed to reinforce first and second language acquisition theory as it relates to dual immersion settings. Best practices for developing and reinforcing bilingualism and biliteracy are presented and used for planning and delivering instruction. Spanish fluency is required for the course.

Prerequisite(s): Graduate status required for graduate students pursuing the bilingual education endorsement and concentration (does not lead to a Nebraska Department of Education teaching endorsement). Advanced Spanish language proficiency required.

TED 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)

This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with AVN 8510, STEM 8510).

Prerequisite(s): Graduate standing.

TED 8520 SCHOOL LIBRARY PRACTICUM (3 credits)

Candidates will gain direct experience and an understanding of the theories, concepts and activities integral to public services, technical services, and the administration in a 21st Century library and information agency at an assigned field site. Candidates will demonstrate the ability to plan, develop, and implement programming and services for patrons and diverse learners in their schools and communities.

Prerequisite(s): Candidates must be in the final 2 semesters of their school library program & must complete an application for the Practicum the semester prior to their practicum. Not open to non-degree graduate students.

TED 8530 INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS (3 credits)

This course is designed to provide graduate candidates with the opportunity to enhance interdisciplinary instructional strategies, curricular understanding, and lesson preparation in the areas of science, technology, engineering, the arts, and mathematics (STEAM) through analysis and reflective practices in STEAM. This course provides hands-on experiences that model STEAM integration techniques, including how to effectively engage with community agencies and partners to bring STEAM into the classroom. This course emphasizes not only the technical aspects of STEM, but also the creativity and innovation that arts integration can add to enhance STEM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. (Cross-listed with STEM 8530).

Prerequisite(s): This course includes both teacher education and STEAM related topics and therefore fits into both TED and STEM program coursework.

TED 8540 DIGITAL CITIZENSHIP (3 credits)

The course explores key concepts of Digital Citizenship pertaining to digital law, digital ethics, digital interaction, digital literacy, and cyber-security. The course addresses an educator's role as technology leader in both policy and practice to establish a responsible and robust digital learning community in P-12 schools.

Prerequisite(s): Graduate Standing/Status

TED 8550 TECHNOLOGY FOR CREATIVE AND CRITICAL THINKING (3 credits)

Technology for Creativity and Critical Thinking investigates the use of visual media tools in P-12 digital learning environments. This course provides candidates an opportunity to develop leadership skills and dispositions relevant to advocacy initiatives addressing policy and best practice in the use of technology in P-12 schools. The course encourages educators to critically evaluate and analyze digital tools supporting creativity and critical thinking through research and project development.

TED 8560 TECHNOLOGY FOR DIVERSE LEARNERS (3 credits)

This course will explore categories of diverse learners and how to effectively research and implement assistive technology, software, and tools to enhance their learning opportunities. Candidates will learn how to facilitate the use of instructional technology, pedagogy, and strategies to better meet the needs of diverse learners. With a focus on Universal Design for Learning paired with technology resources, candidates will become proficient in their ability to create learning activities that increase student learning outcomes. Throughout the course, candidates will be challenged as a leader to connect professionally, locally, and nationally to learn and share from professional peers.

TED 8570 INTERNET IN THE LEARNING PROCESS (3 credits)

This course is designed to help educators actively explore instructional implementations of Internet use appropriate for use in K-12 classrooms, successful diffusion of Internet innovations in educational environments, and emerging multicultural "breaking down the walls of the classroom" concepts available to educators through Internet use.

TED 8580 ONLINE TEACHING AND LEARNING (3 credits)

Online Teaching and Learning is a course for education professionals that investigates the use of online tools for planning, preparing and assessing student learning in an online teaching and learning environment. The course will prepare candidates to provide leadership for online teaching and learning initiatives within learning organizations. The course encourages education professionals to explore methods of virtual lesson delivery and online assessment through direct instruction, discussion, and project development.

Prerequisite(s): Graduate Admissions status

TED 8590 TEACHING AND LEARNING IN DIGITAL ENVIRONMENTS (3 credits)

This course is an introduction to future-ready information, digital learning environments, and instructional technologies for use with children and youth. Course will cover a diverse array of technical literacies that serve as content and skill goals for today's children and youth in P-12 schools and other learning environments.

TED 8610 TEACHING OF WRITING THROUGHOUT THE CURRICULUM (3 credits)

This course will develop candidates' understanding of the various aspects of writing to integrate throughout the content areas. Candidates will acquire and apply a common language for teaching and assessing student writing and investigate the varied ways writing genres extend throughout the curriculum. Candidates will examine research-supported writing instruction and the role write-to-learn strategies play in supporting diverse students in accessing and understanding content-specific information.

Prerequisite(s): Graduate status.

TED 8640 OPEN EDUCATIONAL RESOURCES FOR P-12 TEACHERS (3 credits)

TED 8640 Open Educational Resources for P-12 Teachers affords opportunities to study, evaluate, plan, and implement the open educational resources (OERs) to meet state, district, or diocese content standards and support equitable remote learning experiences. Graduate candidates will develop respective P-12 grade- and/or content-appropriate content/curriculum utilizing OERs focused on STEM (Science, Technology, Engineering, and Mathematics) education and the use of technology integration to foster effective teaching and learning.

TED 8650 CHILDREN'S LITERATURE AND EDUCATION (3 credits)

Candidates in this graduate course will explore story, poetry, drama, and informational materials for elementary students with an emphasis on methods for including literature in school curricula with an awareness of diverse children's lives, discourses, and understandings. Examines current issues, recent materials, and the theoretical and research base of this field to develop meaningful and creative learning, literacy, and library experiences for children.

TED 8660 YOUNG ADULT LITERATURE (3 credits)

This course extends candidates' knowledge of literature for young adults. The course addresses current trends in the genre and engages candidates in activities that support pedagogies in basic, visual, information and cultural literacies.

Prerequisite(s): Graduate status

TED 8695 LITERACY AND LEARNING (3 credits)

This course examines ways in which reading and writing can facilitate student learning in content areas studies (e.g., science, social studies, physical education, art, music, and math). The main focus is on teaching practices that engage students and contribute to their learning, integrating their background knowledge and cultural experiences with content area literacy. (Cross-listed with TED 3690).

TED 8700 ELEMENTARY EDUCATION CAPSTONE (3 credits)

This course is designed as a required, final capstone course for Elementary Education graduate students to be taken in the last nine hours of the Master of Science program. A grade of B or better must be received in TED 8700 to show satisfactory completion of the course and for program completion.

Prerequisite(s): Permission of the Elementary Education Program Chair. Not open to non-degree graduate students.

TED 8710 RESEARCH AND INQUIRY (3 credits)

The purpose of this course is for candidates to gain an overview and understanding of questioning, inquiry, and research strategies used in future ready P-12 libraries in order to ensure access to reference services and resources in a variety of formats and to design and support information literacy and inquiry-based instruction for all members of the learning community.

TED 8720 INTRODUCTION TO INSTRUCTIONAL COACHING IN PK-12 EDUCATION (3 credits)

This course examines the prominent coaching models used in PK-12 schools (i.e. teacher-centered coaching, student-centered coaching, cognitive coaching, transformational coaching). Candidates completing this course will be able to: develop an understanding of best practices in coaching, create a common lexicon for the role of an instructional coach, engage in the coaching cycle, and create a personal vision for their work as a coach. Candidates will engage in a field based experience to apply their learning.

Prerequisite(s): Graduate Status

TED 8726 SPECIAL LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the major types of 21st Century special libraries and information agencies. Candidates will demonstrate an understanding of social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the special libraries and information agencies. (Cross-listed with TED 4720).

TED 8730 PK-12 CAPSTONE (3 credits)

The PK-12 Graduate Capstone course provides candidates with an opportunity to apply the knowledge, skills, and dispositions acquired during their program to content specific synthesis activities in their respective disciplines. Students will demonstrate their ability to integrate information from program coursework in the design, development and presentation of a final capstone project related to teaching and learning.

Prerequisite(s): Graduate standing. Limited to those in online pathways. Not open to non-degree graduate students.

TED 8740 ORGANIZATION OF INFORMATION (3 credits)

Candidates will demonstrate the ability to integrate the legal and ethical standards of their discipline in ensuring access to information and ideas for a diverse array of learners in schools and communities. This course also addresses current theory and best practice in descriptive and subject cataloging and classification of information resources that align with school library standards and guidelines.

TED 8746 ORGANIZATION OF INFORMATION (3 credits)

Candidates will demonstrate a basic understanding of the theories, concepts and activities of descriptive and subject cataloging and classification procedures of information resources in 21st Century libraries and information agencies.

TED 8750 OXBOW WRITING PROJECT (3 credits)

Oxbow Writing Project summer institute immerses K-16 educators in writing pedagogy via their own writing, presentations about writing and pedagogy, reading and discussing professional literature, designing and implementing an in-depth inquiry project, and developing leadership strengths. Oxbow is a National Writing Project Site. (Cross-listed with ENGL 8750).

Prerequisite(s): Acceptance into Oxbow Writing Project Summer Institute

TED 8760 MANAGING COLLECTIONS IN LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the theories, concepts and activities integral to proactive collection management in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of community analysis, collection analysis, and the ability to conduct critical evaluations of a diverse array of information resources.

TED 8770 INTEGRATING TECHNOLOGY INTO INSTRUCTIONAL DESIGN (3 credits)

The purpose of this course is to introduce participants to effective methods for the integration of educational media into instructional design and provides participants (1) knowledge of broad instructional design theories and models with a concentration on constructivism, (2) experience in designing instruction that effectively integrates technology into the teaching-learning process, and (3) experience in producing instructional media. The course is intended to provide fundamentals in the selection, evaluation, production, application and utilization of educational media. This course is designed for in-service library media or instructional technology specialists as well as regular classroom teachers.

Prerequisite(s): Graduate status

TED 8780 FOUNDATIONAL SKILLS OF EARLY LITERACY (3 credits)

This course builds knowledge and instructional practices focused on early literacy foundational skills. With a focus on the components of foundational skills: (print concepts, phonological awareness, phonics and word recognition, and fluency) candidates will be able to identify concrete strategies to support Pk-3 student learning and practice. The course helps to build knowledge and skills of evidence-based early literacy instruction and provides resources to support teachers' planning and instruction.

Prerequisite(s): Graduate Standing

TED 8800 MULTICULTURAL LITERATURE FOR CHILDREN AND YOUTH (3 credits)

This is designed as a graduate-level course dealing with utilization of literary materials representing authors and content from multiple perspectives, particularly authors whose cultural and ethnic backgrounds differ from the mainstream.

TED 8810 STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH (3 credits)

This course will explore theoretical and foundational pedagogical strategies in early childhood education used to deliver integrative STEM education in the preK-12 setting. In order to understand the research and practice of STEM disciplines in preK-12, it is necessary to examine the social, cultural, political, and functional aspects that influence them. Candidates will investigate the nature of STEM education, Early Childhood Education (ECE) pedagogy and perspectives of learning, content knowledge and dispositions for educators of STEM topics, and issues of access and equity for STEM education through literature, discussion, and practice. This course includes a community outreach component in which candidates will use qualitative methods to observe class topics in public settings. (Cross-listed with STEM 8810)

Prerequisite(s): Graduate status

TED 8816 PRINCIPLES AND PHILOSOPHY OF INTEGRATING CAREER AND ACADEMIC EDUCATION (3 credits)

This course presents the philosophies and principles/practices underlying how schools can better prepare students for the workplaces of the future with emphasis on the integration of career education within broader academic preparation. The roles and responsibilities of teachers, counselors, and administrators in implementing integrated approaches will be examined. (Cross-listed with TED 4810).

TED 8820 CAPSTONE IN STEM EDUCATION (3 credits)

This course will prepare graduate students for the integration, articulation, and differentiation of curriculum and instruction in and between the STEM core areas of Science, Technology, Engineering, and Mathematics. Special emphasis will be on using the STEM core content to help provide applications and context to existing science and mathematics curriculum and instruction and on providing leadership in developing curriculum for mathematics and science dependent courses in engineering and technology.

Prerequisite(s): The student must be enrolled in one of the following concentrations: STEM, mathematics, science, technology; and be enrolled in the last six hours of their program of study. Not open to non-degree graduate students.

TED 8830 LEADERSHIP AND MANAGEMENT IN SCHOOL LIBRARIES (3 credits)

The course explores best practice for effective leadership and management of 21st Century school libraries. Candidates will gain a comprehensive knowledge of the theories, policies and processes involved in directing a school library in support of the personal and academic success of P-12 students. Candidates will explore and employ ethical codes of conduct in their profession to ensure school libraries meet the needs of their diverse array of patrons.

TED 8840 ENGINEERING EDUCATION EXTERNSHIP (3 credits)

This graduate course will address the best practice of effective teaching and learning in Engineering Education through professional collaboration between K-12 STEM (Science, Technology, Engineering, and Mathematics) teachers and practicing engineering professionals. K-12 STEM teachers, as graduate students in the course, will learn about and address real-world applications and career opportunities in STEM education through the externship. K-12 STEM teachers will research and develop authentic, experiential learning opportunities and projects for the classroom through course supports associated with lecture, discussion, and partnerships with practicing engineering professionals. The externship will be integral to the K-12 STEM teachers' experiences and work in this course, as the course models effective professional collaboration founded on experience, knowledge, and skills to achieve a curriculum enhancement goal. (Cross-listed with STEM 8840).

Prerequisite(s): Graduate status. Not open to non-degree graduate students.

TED 8850 PROFESSIONAL COLLABORATION (3 credits)

This course is designed to prepare candidates to work in collaboration with other professionals and parents to create a learning environment that enhances the potential for academic success and improvement of instructional practices. The focus will be on collaborative problem solving. (Cross-listed with SPED 8980).

Prerequisite(s): Admission to Graduate College.

TED 8856 COORDINATION TECHNIQUES IN WORK-BASED LEARNING (3 credits)

This course reviews responsibilities and techniques of coordination for the work-based learning teacher-coordinator and/or work-based learning coordinator, with special emphasis on administration of the part-time cooperative program and analysis of the laws and regulations governing this program. (Cross-listed with TED 4850).

TED 8860 INVENTION & INNOVATION IN ENGINEERING EDUCATION (3 credits)

This course will address emerging trends in STEM education for in-service K-12 STEM teachers with a focus on the use of engineering education practices in teaching and learning content. STEM teachers will receive applicable, hands-on, classroom-ready experiences through lecture, professional instruction, and projects that will emphasize product design and creation through the Engineering Design Process. The Engineering Design Process will be central to the candidates' experiences in this course and will be used by the candidates to develop curriculum utilizing emerging trends to supplement current course content and standards. Interdisciplinary planning will be central to the course. (Cross-listed with STEM 8860).

Prerequisite(s): Graduate status is required.

TED 8880 LEADERSHIP IN EARLY CHILDHOOD EDUCATION (3 credits)

This course seeks to prepare candidates with leadership skills in the early childhood field that will empower them to initiate and implement changes in programs serving young children and families. Candidates will explore and apply frameworks of leadership and analyze policy, governance, and power structures that can impact change. Candidates will also learn effective advocacy skills to positively influence policies and practices in program and governance structures. Lastly, candidates will examine approaches for developing new leaders in early childhood education through reflective supervision and mentorship.

Prerequisite(s): Graduate status.

TED 8900 SECONDARY EDUCATION GRADUATE CAPSTONE (3 credits)

The Secondary Education Graduate Capstone course provides candidates with an opportunity to apply the knowledge, skills, and dispositions acquired during their program to content specific synthesis activities in their respective disciplines. Candidates will demonstrate their ability to integrate information from program coursework in the design, development and presentation of a final capstone project related to teaching and learning in 21st Century educational environments.

Prerequisite(s): 30 credit hours towards degree completion; Permission required by Program Advisor. Not open to non-degree graduate students.

TED 8970 INDEPENDENT STUDY (1-3 credits)

This is a specially designed course taken under the supervision of a graduate faculty member to accommodate the student who has identified a focus of study not currently available in the departmental offerings and who has demonstrated capability for working independently.

Prerequisite(s): Permission of Department and Graduate Faculty member.

TED 8980 PRACTICUM: VARIOUS CONTENT AREAS (1-6 credits)

This course is designed to provide school professionals with a guided, supervised, field experience that will develop and enhance the knowledge, skills, and dispositions requisite of a successful educational practitioner.

Prerequisite(s): Prerequisites for the course will vary, depending on the content/discipline area. See syllabus for specific discipline area.

TED 8990 THESIS (1-6 credits)

This course is an independent research project completed under the direction of a thesis advisor and required of all candidates pursuing a Master of Science with Thesis option.

Prerequisite(s): Completion of Selective Retention and approval of advisor. Not open to non-degree graduate students.

TED 9100 THEORIES, MODELS, AND PRACTICES OF LITERACY (3 credits)

This course helps candidates develop a framework about the theories, models, practices, processes, and related research associated with literacy. The content looks across grade levels and student populations, and across social and cultural contexts in an examination of factors that impact theories and processes of literacy.

Prerequisite(s): Graduate status.

TED 9110 PRINCIPLES AND PRACTICES FOR TEACHING READERS (3 credits)

This foundational reading course is to provide candidates with a broad understanding of the core reading principles (phonological awareness, phonemic awareness, fluency, vocabulary and comprehension) as they relate to research, evidence-based practices and diverse students' literacy development. Candidates will also explore educational trends and shifts in literacy policies and approaches, and the impact these trends and shifts have on PK-12 classroom practices.

TED 9120 GRADUATE IN-SERVICE TEACHING (3 credits)

This is a graduate experience for in-service teachers pursuing teacher certification. Candidates must successfully complete a minimum of 100 hours (or per program of study) of field experience prior to completing their in-service teaching experience.

Prerequisite(s): Graduate standing. Permission. Applications go to the Office of Field Experiences. Not open to non-degree graduate students.

TED 9130 ASSESSMENTS AND INTERVENTIONS - ELEMENTARY (3 credits)

This course is designed for graduate candidates enrolled in the Literacy Masters or Reading Specialist endorsement program. The purpose of this course is to develop an understanding of theory and research as it relates to assessment and evaluation and instructional approaches that support reading development. This knowledge is applied through a practicum experience with elementary students in which candidates integrate knowledge and practices related to assessment and evaluation of readers' strengths and needs.

TED 9140 ASSESSMENT AND INTERVENTION - SECONDARY (3 credits)

This course is designed for graduate candidates in literacy endorsement and Master's programs. The purpose of this course is to develop an understanding of the theory and research driving assessment and evaluation and instructional approaches as they relate to reading differences for middle and high school students. Included in this course is knowledge about the role and responsibility of a literacy leader with regard to coaching, mentoring, supervision, and evaluation of a reading program. Application of this information is demonstrated through a practicum experience with middle and high school students.

Prerequisite(s): TED 9100; TED 9110 concurrent with, or prior to TED 9140.

TED 9180 LITERACY RESEARCH SEMINAR (3 credits)

This course will enhance candidates' understanding and ability to critically examine, apply, and conduct current literacy research by developing understandings of how to (1) discuss historical trends in literacy research, (2) critically evaluate the designs, theories, methods and tools of literacy research, and (3) develop understandings of action research to plan and implement a preliminary literacy research study in their own context. Candidates will develop a research proposal that is grounded in theory and action research methods within their own learning context.

TED 9190 LITERACY GRADUATE CAPSTONE (3 credits)

The Literacy Program Graduate Capstone course provides candidates with an opportunity to synthesize the knowledge, skills, and dispositions acquired during their program to honor the interrelationships among classroom, school, sociocultural, and community contexts as they relate to diverse students' literacy development. Candidates will demonstrate their ability to integrate information from program coursework in the design, development, and presentation of a final capstone project related to teaching, learning, and literacy advocacy in 21st Century educational environments.

Prerequisite(s): This course is designed as a capstone event. Accordingly, students must have no more than 6 additional remaining credit hours of coursework. Permit to enroll required.

TED 9200 CRITICAL PEDAGOGY: TEACHING FOR SOCIAL JUSTICE (3 credits)

This course examines ways in which ideology, power, and culture intersect in P-12 educational settings. Undemocratic, inequitable, and oppressive structures are identified. Possibilities for democratic, equitable transformations are proposed.

Prerequisite(s): Graduate status

STEM 8030 EVOLUTION: FROM GENOMES TO ECOSYSTEMS (3 credits)

This course will prepare students to evaluate and discuss evolution as an underlying concept in all of biology. Further, it will provide a comprehensive overview of evolutionary processes related to the evolution of genomes, development, physiology, morphology, behavior, and ecosystems. (Cross-listed with BIOL 8030).

Prerequisite(s): Courses for graduate admission or equivalent, or with permission of instructor.

STEM 8040 TOPICS IN MATHEMATICAL COMPUTING (3 credits)

This course focuses on the current state-of-the-art technology that is either designed for or is uniquely suitable for teaching mathematics. (Cross-listed with MTCH 8040)

Prerequisite(s): MATH 2200 or equivalent or approval of instructor.

STEM 8050 DATA-DRIVEN DECISION MAKING FOR EDUCATORS (3 credits)

This course provides graduate students with hands-on experiences that model data-driven decision making for educational success in today's classroom. Students will learn how to create valid and reliable assessments; interpret standardized test data; build data models that identify student, classroom, program, and school needs; and in general, to systematically enhance educational decision making from a base of carefully collected information. Graduate students will also explore data collection and analysis strategies associated with technologies such as cloud computing, tablet computers, and smart phones. In addition, they will experience data-driven decision-making models that can be integrated into student lessons to not only teach more effectively with data-driven decisions, but also to help teach students about data-driven decision-making. The course will use real data sets and cases, in interesting, hands on and technology-rich activities, to help educators learn how to find the "educational story" represented by a set of carefully collected data points. (Cross-listed with TED 8050).

Prerequisite(s): Graduate Standing.

STEM 8170 ECOSYSTEM ANALYSIS FOR EDUCATORS (3 credits)

This course is designed for education graduate students who wish to take a field-based biology course that uses an interdisciplinary approach to understanding the ecosystem of the tallgrass prairie. This course engages graduate students in methods reflecting multidisciplinary STEM strategies (e.g. scientific inquiry, modeling, geographic information system mapping, etc.) associated with research taking place at the Glacier Creek Preserve. Graduate students completing this course will develop advanced knowledge of ecology, restoration ecology, and monitoring of prairie habitat restoration. Graduate students will focus on the technical, biogeochemical, ecological and cultural aspects of analyzing and restoring the prairie ecosystem and its various habitats. (Cross-listed with BIOL 8170)

Prerequisite(s): Graduate Standing or Permission from the Instructor.

STEM 8300 STEM TEACHING METHODS FOR DEVICE DESIGN (3 credits)

STEM Teaching in Biomechanics focuses on principles in teaching including teaching models (Problem-Based, Team-Based, Inquiry-Based teaching), student assessment, classroom logistics/organization, and device design through a mentorship project. (Cross-listed with BMKI 9301, BMCH 8300).

STEM 8370 DATA VISUALIZATION AND MODELING FOR EDUCATORS (3 credits)

In the growing context of data informed decisions there is a need to answer "what if" questions in a variety of decision-making situations, as well as to display data both visually and interactively. This course will provide foundational skills in data visualization and modeling for educational decision making and instruction. It draws upon key fundamentals in data visualization (representing data trends visually) as well as key strategies in data modeling (interactive representations to explore possible outcomes). The course also explores the use of visualization and modeling technologies as well as assisting student learning with these tools. (Cross-listed with TED 8370).

STEM 8410 IMPROVEMENT OF INSTRUCTION: SPECIAL TOPICS (3 credits)

This course provides an in-depth study of instructional theory, research, and methodology designed to extend teachers' professional knowledge base and enhance their pedagogical skills. When offered, a course may be limited to improvement of instruction in a selected subject area. (Cross-listed with TED 8410).

STEM 8420 TRENDS AND TEACHING STRATEGIES IN SCIENCE EDUCATION (3 credits)

This course is designed for the graduate candidate in the Department of Teacher Education whose study program emphasis is in the area of science education. The course will describe and analyze past and present trends in science education, including curricula, teaching-learning strategies, the laboratory and instructional materials. The course focus will be K-12 and as such is meant to serve both elementary and secondary graduate candidates. (Cross-listed with TED 8420).

Prerequisite(s): Graduate standing.

STEM 8430 SCHOOL CURRICULUM PLANNING (3 credits)

This course is designed to provide advanced degree candidates with an understanding of the theory, principles, and practices utilized in curriculum planning in American schools. This course focuses on the principles and practices of effective curriculum planning and teachers' part in these processes as curriculum developers. (Cross-listed with TED 8430).

STEM 8450 BIOLOGY EDUCATION RESEARCH METHODS (3 credits)

In this course, students will learn the methods of conducting pedagogical research in Biology, understand how people learn the concepts, practices, and ways of thinking in science and engineering; understand the nature and development of expertise in a discipline; help identify and measure appropriate learning objectives and instructional approaches that advance students toward those objectives; contribute to the knowledge base in a way that can guide the translation of statistical findings to classroom practice; and identify approaches to make science and engineering education broad and inclusive. Students will work with live data sets to evaluate effective pedagogical approaches in the biology classroom of various audiences (K-16).

STEM 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)

This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with TED 8510, AVN 8510)

Prerequisite(s): Graduate standing.

STEM 8530 INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS (3 credits)

This course is designed to provide graduate candidates with the opportunity to enhance interdisciplinary instructional strategies, curricular understanding, and lesson preparation in the areas of science, technology, engineering, the arts, and mathematics (STEAM) through analysis and reflective practices in STEAM. This course provides hands-on experiences that model STEAM integration techniques, including how to effectively engage with community agencies and partners to bring STEAM into the classroom. This course emphasizes not only the technical aspects of STEM, but also the creativity and innovation that arts integration can add to enhance STEM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. (Cross-listed with TED 8530)

Prerequisite(s): This course includes both teacher education and STEAM related topics and therefore fits into both TED and STEM program coursework.

STEM 8810 STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH (3 credits)

This course will explore theoretical and foundational pedagogical strategies in early childhood education used to deliver integrative STEM education in the preK-12 setting. In order to understand the research and practice of STEM disciplines in preK-12, it is necessary to examine the social, cultural, political, and functional aspects that influence them. Candidates will investigate the nature of STEM education, Early Childhood Education (ECE) pedagogy and perspectives of learning, content knowledge and dispositions for educators of STEM topics, and issues of access and equity for STEM education through literature, discussion, and practice. This course includes a community outreach component in which candidates will use qualitative methods to observe class topics in public settings. (Cross-listed with TED 8810)

Prerequisite(s): Graduate status

STEM 8840 ENGINEERING EDUCATION EXTERNSHIP (3 credits)

This graduate course will address the best practice of effective teaching and learning in Engineering Education through professional collaboration between K-12 STEM (Science, Technology, Engineering, and Mathematics) teachers and practicing engineering professionals. K-12 STEM teachers, as graduate students in the course, will learn about and address real-world applications and career opportunities in STEM education through the externship. K-12 STEM teachers will research and develop authentic, experiential learning opportunities and projects for the classroom through course supports associated with lecture, discussion, and partnerships with practicing engineering professionals. The externship will be integral to the K-12 STEM teachers' experiences and work in this course, as the course models effective professional collaboration founded on experience, knowledge, and skills to achieve a curriculum enhancement goal. (Cross-listed with TED 8840).

Prerequisite(s): Graduate status. Not open to non-degree graduate students.

STEM 8860 INVENTION & INNOVATION IN ENGINEERING EDUCATION (3 credits)

This course will address emerging trends in STEM education for in-service K-12 STEM teachers with a focus on the use of engineering education practices in teaching and learning content. STEM teachers will receive applicable, hands-on, classroom-ready experiences through lecture, professional instruction, and projects that will emphasize product design and creation through the Engineering Design Process. The Engineering Design Process will be central to the candidates' experiences in this course and will be used by the candidates to develop curriculum utilizing emerging trends to supplement current course content and standards. Interdisciplinary planning will be central to the course. (Cross-listed with TED 8860)

Prerequisite(s): Graduate status is required.

STEM 8910 CAPSTONE IN CS EDUCATION (3 credits)

This course will allow graduate students, as an individual or as part of a group, to study and analyze specific problems related to teaching computing in schools. Projects will be concerned with the curriculum and/or instruction of computing and should address a broad scope of application rather than a specific level. (Cross-listed with CSTE 8910).

Prerequisite(s): Student must have completed 21 hours in the Masters of CS Education program.

Social Work

Degree Programs Offered

- Social Work, MSW (p. 1400)
- Social Work, MSW and Criminology and Criminal Justice, MS (MSW/CRCJ) (p. 1145)
- Public Administration, MPA and Social Work, MSW (MPA/MSW) (p. 1375)
- Social Work, MSW and Public Health, MPH (MSW/MPH) (p. 1407)

Certificates Offered

- Managing Juvenile and Adult Populations Certificate (p. 1147)

SOWK 8016 SOCIAL WORK WITH AMERICAN INDIANS (3 credits)

This course provides the student with a broad study of the origins, influences and issues of the American Indian which affect social work practice. The usefulness of established social work generalist methods is explored. Alternative methods applicable to culturally diverse people across the lifespan are presented. This is a Service Learning class. (Cross-listed with SOWK 4010).

Prerequisite(s): SOWK 8130 prior to or concurrent, or BSSW degree. Not open to non-degree graduate students.

SOWK 8026 SOCIAL WORK WITHIN THE AFRICAN AMERICAN COMMUNITY (3 credits)

This course seeks to develop in students an awareness and understanding of some of the social and psychological/cognitive realities influencing the behavior of African American youth and families across the lifespan. The content draws upon theories, research and social work practice skills relevant to African American youth and families, as well as the cognitive process and social systems which impact African youth and families. (Cross-listed with SOWK 4020).

Prerequisite(s): SOWK 8130 or admitted as Advanced Standing

SOWK 8036 SOCIAL WORK WITH LATINOS (3 credits)

The purpose of this course is to study and analyze cross-cultural social work practice with Latino populations. Students will learn what factors impact Latino communities and what skill sets are essential for diverse social work practice. (Cross-listed with SOWK 4030).

Prerequisite(s): Admitted to the BSSW program or SOWK 8130.

SOWK 8046 WORKING WITH MINORITY ELDERLY (3 credits)

This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 4690, GERO 8696, SOWK 4040).

SOWK 8056 ETHNIC DIVERSITY AND SOCIAL WORK PRACTICE (3 credits)

This course focuses on effective generalist social work practice with clients of ethnic diversity. (Cross-listed with SOWK 4050)

Prerequisite(s): Admission to the MSW program or permission of the Grace Abbott School of Social Work

SOWK 8066 MEDICAL SOCIAL WORK (3 credits)

This course is an introduction to medical social work. BSSW and MSW students will focus on the knowledge base and practice skills needed to assess the holistic care of patients and their families. This course prepares students to 1) understand healthcare disparities and needs of individuals and their family, 2) apply theory and models of patient-centered care delivery, 3) develop skills for working on interprofessional teams, 4) formulate ideas for addressing barriers and improving health care access. (Cross-listed with SOWK 4060).

Prerequisite(s): SOWK 8130 prior to or concurrent, or BSW degree

SOWK 8070 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT I (3 credits)

This course is the first part of a two-semester sequence within the Master of Social Work required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan, particularly infancy through adolescence, within the social environment at the micro- and macro-level (e.g., individuals, families, groups, organizations, institutions, and communities), as they relate to effective social work generalist practice.

Prerequisite(s): Undergraduate Human Biology course (prior to or concurrent) and admission to the Master of Social Work program.

SOWK 8080 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT II (3 credits)

This course is the second part of a two-semester sequence within the Master of Social Work required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan—particularly during young, middle, and late adulthood—within the social environment at the micro- and macro-level (e.g., individuals, families, groups, organizations, institutions, and communities), as they relate to effective social work generalist practice.

Prerequisite(s): SOWK 8070

SOWK 8090 SOCIAL WELFARE POLICY (3 credits)

This course is an introduction to social welfare policy analysis. The course examines social welfare policy taking into account historical, political, economic, social, and cultural perspectives. Basic concepts and choices are examined in relation to values, ethics, context, social functioning and social consequences.

Prerequisite(s): Admission to the Master of Social Work program or permission of the Grace Abbott School of Social Work.

SOWK 8110 INSTITUTIONAL OPPRESSION (3 credits)

This course is about institutional racism, sexism and classism as it relates to social policy and social injustice. The focus is on how institutional oppressions are related and are mutually reinforcing. The consequences of institutional racism, sexism and classism are examined at the individual, group, family, and agency levels.

Prerequisite(s): Admission to the Master of Social Work program or permission of the Grace Abbott School of Social Work.

SOWK 8130 GENERALIST PRACTICE I (3 credits)

This course provides an introduction to the values, ethics, knowledge, and skills of generalist social work practice. Using constructs from the Generalist Intervention Model, systems theory, and the strengths-based perspective, students learn about engagement, assessment, planning and contracting, intervention, evaluation, and termination. Diversity and case management are emphasized as part of bringing planned change to client systems, including individuals and families..

Prerequisite(s): SOWK 8070 prior or concurrent.

SOWK 8150 GENERALIST PRACTICE II (3 credits)

This practice course is an introduction to a goal-oriented planned change process with an emphasis on educational, support, and task groups, organizations, and communities. The focus is on building knowledge and developing indirect practice skills in collaboration, planning, empowerment, and advocacy to effect social change using the Generalist Intervention Model.

Prerequisite(s): SOWK 8130 prior, and SOWK 8080 prior or concurrent

SOWK 8160 GENERALIST SOCIAL WORK PRACTICUM I (3 credits)

This course is designed to provide supervised, individual and experiential learning offered within the setting of a selected social service agency. The student will be introduced to a variety of social work practice roles, develop professional relationships with client systems and learn to apply different interventions to effect change across the life span. In order to facilitate integration of classroom theory with practice, students will attend a seven-week practicum seminar (2 hours per week).

Prerequisite(s): Prior: Human Biology, Research Methods, and Statistics deficiencies complete; Prior or Concurrent: SOWK 8070, SOWK 8090, SOWK 8130; Not open to non-degree graduate students.

SOWK 8170 GENERALIST SOCIAL WORK PRACTICUM II (3 credits)

This course is designed to provide supervised, individual, experiential learning offered within the setting of a social service agency, typically the same agency as in SOWK 8160. This course builds upon opportunities provided and competence achieved in Generalist Social Work Practicum I.

Prerequisite(s): Prior or Concurrent: SOWK 8160, SOWK 8080, SOWK 8110, and SOWK 8150. Not open to non-degree graduate students.

SOWK 8190 RESEARCH & COMPUTER APPLICATIONS (3 credits)

This course focuses on the use of research and computer programs in social work practice. Social and behavioral science research methods are reviewed. Students learn to analyze existing data using SPSS and to write an empirical research report. The use of Microsoft Word, Excel, and PowerPoint in social work practice are explored.

Prerequisite(s): Admission to the Master of Social Work program.

SOWK 8220 CLINICAL SOCIAL WORK WITH INDIVIDUALS (3 credits)

This advanced course provides an in-depth study of several theories of personality and behavior, and of therapeutic approaches derived from the theories. Major focus is on therapy with individuals across the life span, but application to family systems is also considered, as well as the fit of each theory within the broader social systems framework.

Prerequisite(s): SOWK 8170 prior to or concurrent; SOWK 8160 or admitted with advanced standing.

SOWK 8230 CLINICAL SOCIAL WORK WITH GROUPS (3 credits)

This advanced course provides knowledge of and experience in working with groups as systems. It includes both assessment of dynamics as well as developing skills in intervention modalities appropriate for working with various types of groups.

Prerequisite(s): SOWK 8220; SOWK 8170 or admitted to the Master of Social Work program with advanced standing.

SOWK 8240 SOCIAL WORK PRACTICE WITH CHILDREN (3 credits)

This advanced practice course provides an overview of several social work interventions used with children and adolescents. A brief review of normal child development and the family life cycle is the context for presenting a range of children's problems and special needs. The course will cover several intervention models and address their application in various service settings and in individual, family, group, and social action formats. Children in diverse family settings, institutions, and in minority families and cultures are considered to understand unique therapeutic issues present for them.

Prerequisite(s): SOWK 8220

SOWK 8250 SOCIAL WORK PRACTICE WITH FAMILIES (3 credits)

This course considers the family context as a system for therapeutic intervention. The family unit and its diverse forms are defined; theories for assessment and understanding family's interactions across the lifespan are considered, and the alternative modalities useful for treating family dysfunction are presented. As a practice-oriented course, it emphasizes the development of professional skills in working with the family across the lifespan.

Prerequisite(s): SOWK 8220; SOWK 8170 or admitted to the Master of Social Work program with advanced standing.

SOWK 8260 SOCIAL WORK PRACTICE WITH OLDER ADULTS (3 credits)

This course is part of the advanced MSW curriculum and focuses on micro- and macro-level practice skills essential to competent and effective social work practice with diverse older adults. This course emphasizes clinical and complimentary/ alternative interventions (particularly creativity programming) that focus on individuals and small groups as well as community practice skills that involve social marketing and community organizing, networking, and collaborating with inter-professional community practitioners.

Prerequisite(s): SOWK 8220 and SOWK 8170 or admitted as Advanced Standing

SOWK 8270 SOCIAL WORK PRACTICE WITH SEXUAL CONCERNS (3 credits)

This course provides a survey of the current knowledge base, theory and research in human sexuality with a focus on advanced practice intervention and prevention approaches for a variety of sexuality issues faced by individuals, couples, and families throughout the lifespan.

Prerequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing, and SOWK 8220.

SOWK 8280 SOCIAL WORK PRACTICE WITH COUPLES AND CHANGING FAMILY STRUCTURES (3 credits)

This is an advanced practice course designed to prepare students to provide therapy for couples and families at all life stages who are experiencing problems in intimacy, marital, divorce, or remarriage adjustment.

Prerequisite(s): SOWK 8220

SOWK 8290 SOCIAL WORK PRACTICE IN HEALTH AND MENTAL HEALTH (3 credits)

This course emphasizes the development of advanced level clinical and social work practice skills for working with selected acute and chronic health and mental health conditions affecting individuals across the life cycle.

Prerequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing, and SOWK 8220. Not open to non-degree graduate students.

SOWK 8400 ADVANCED SOCIAL WORK PRACTICUM I (3 credits)

This course is designed to provide supervised, individual professional learning experiences offered within the setting of a selected social service agency in the student's chosen concentration. The student will be introduced to a variety of advanced direct and indirect social work practices. The Dual Degree Program is a part of Integrated Practice. Dual Degree students may take SOWK 8400 as their administrative practicum. If so, then PA 8010, 8050 and 8090 must be taken prior to and one course from concentration prior to or concurrently.

Prerequisite(s): SOWK 8190 (prior to), SOWK 8220 (prior to), SOWK 8230 (prior to or concurrent). Not open to non-degree graduate students.

SOWK 8410 ADVANCED SOCIAL WORK PRACTICUM II (3 credits)

This course is designed to provide supervised, individual professional learning experiences offered within the setting of a social service agency in the student's chosen concentration, typically the same agency as in SOWK 8400. This course builds upon opportunities provided and competence achieved in Advanced Social Work Practicum I.

Prerequisite(s): SOWK 8400 (prior or concurrent), SOWK 8290 (prior or concurrent). Not open to non-degree graduate students.

SOWK 8420 ADVANCED SOCIAL WORK PRACTICUM III (1-3 credits)

This course is designed to provide a third supervised, individual professional learning experience offered within the setting of a social service agency in the student's chosen concentration. This course builds upon opportunities provided and competence achieved in Advanced Social Work Practicum II.

Prerequisite(s): SOWK 8410 prior to or concurrent, and permission of the Grace Abbott School of Social Work.

SOWK 8510 SOCIAL WORK LEADERSHIP (3 credits)

This course provides social work students with the knowledge and skills to be leaders in their organizations and communities. This course will explore leadership models and theories, and their usefulness in diverse settings, including social work leadership ethics. Students will also learn models and theories related to general supervision, power, and authority in public and nonprofit organizations. Useful skills covered include conflict management and evidence-informed decision-making. Students will also learn about care of self and others, especially as it relates to resiliency and vicarious trauma.

Prerequisite(s): SOWK 8160 or admitted to the Master of Social Work program with advanced standing.

SOWK 8516 TREATMENT ISSUES IN CHEMICAL DEPENDENCY (3 credits)

This course addresses chemical dependency treatment issues including denial, minimization, relapse and its prevention, resistance, family dynamics, poly-substance abuse, co-occurring disorders, spirituality and the influence of self-help groups. The education will include the clinical treatment needs of individuals suffering from chemical dependency, taking into consideration diversity, gender, culture and lifestyle. (Cross-listed with COUN 4510, COUN 8516, SOWK 4510).

Prerequisite(s): Admission to counseling program or social work programs or permission of instructor. For social work students, SOWK 8686 or COUN 8696 and SOWK 8696 or COUN 8696 must be taken prior to COUN 8516 or SOWK 8516. Not open to non-degree graduate students.

SOWK 8536 SCHOOL SOCIAL WORK (3 credits)

This course explores the field of social work practice in school settings, including the history of social work practice in schools, school environment, roles of school social workers, mandated foundations for school social work services, eligibility for special education and 504 plans, theories of practice that include school and community based models, and interventions for target populations in schools. (Cross-listed with SOWK 4530).

Prerequisite(s): SOWK 3320 or SOWK 8130. Not open to non-degree graduate students.

SOWK 8540 PLANNING FOR SOCIAL CHANGE (3 credits)

This course takes an in-depth look at the framework of macro-level problem solving and its application to all areas of social work practice. Focus will be placed on the critical exploration of social problems, their causes, and their potential solutions from a lens of broader social inequity.

Prerequisite(s): SOWK 8160 or admitted to the Master of Social Work (MSW) program with advanced standing. Not open to non-degree graduate students.

SOWK 8550 SOCIAL JUSTICE AND SOCIAL ADVOCACY (3 credits)

This course provides a perspective on national and international social and economic injustices experienced by people under corporate globalization. Practice implications for social workers are addressed.

Prerequisite(s): SOWK 8130 or admitted as Advanced Standing. Not open to non-degree graduate students.

SOWK 8560 ADVANCED COMMUNITY PRACTICE (3 credits)

This course is an elective macro course in the MSW curriculum. The course is designed to help students develop an analytical and empirical approach to empowering communities. The course builds on the social work "person-in-environment" perspective by focusing on the client system and its environmental contexts as a partner in practice. This course is particularly relevant to direct practice with and advocacy for diverse disempowered groups in society. The course may use a community-based service-learning pedagogy.

Prerequisite(s): SOWK 8170 or Master of Social Work student admitted with advanced standing or permission of the Grace Abbott School of Social Work. Not open to non-degree graduate students.

SOWK 8570 ADMINISTRATION OF SOCIAL WELFARE AGENCIES (3 credits)

This course focuses on the knowledge and skills needed by administrative leaders of social welfare agencies. Students will learn about resource issues, including grant writing, fundraising, budgeting, and financial management. Acknowledging political contexts and shaping organizational culture will also be covered. In addition, they will learn about personnel and managerial issues related to collaboration, human relations, governing/advisory boards, and strategic planning.

Prerequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing.

SOWK 8600 PERMANENCE FOR CHILDREN (3 credits)

This course is about the child welfare system and focuses on policies, laws, and agency structures designed to help abused and neglected children and their families.

Prerequisite(s): SOWK 8130 or admitted as Advanced Standing

SOWK 8610 FAMILY AND COMMUNITY VIOLENCE (3 credits)

This course covers family and community violence across the life span with an emphasis on gaining knowledge of the issue, skills in policy analysis, and a broad framework for developing effective services in various service settings.

Prerequisite(s): SOWK 8130 or admitted as Advanced Standing

SOWK 8626 TRAUMA AND RESILIENCE (3 credits)

This course provides an overview of issues related to trauma including: the factors related to development of trauma, definitions of trauma, the impact of trauma on individuals, families and communities, and the programs and practices that are most effective and appropriate regarding the social work role in responding to trauma. (Cross-listed with SOWK 4620)

Prerequisite(s): SOWK 8070 and SOWK 8080 or Advanced Standing

SOWK 8650 HEALTH/MENTAL HEALTH POLICIES FOR SOCIAL WORK (3 credits)

This course emphasizes the development of health and mental health policy analysis skills and knowledge for social work students. Major topics include government response to health care, cultural and historical perspectives, service provision, and epidemiological trends across the life span. It provides a framework for clinical interventions in a variety of health and mental health settings.

Prerequisite(s): SOWK 8090 or admitted to the Master of Social Work program with advanced standing.

SOWK 8686 MEDICAL AND PSYCHOSOCIAL ASPECTS OF SUBSTANCE USE DISORDERS (3 credits)

This course introduces students to substance use disorders and their impact on the individual, family, and society. It covers psychopharmacology, alcohol and drug interactions, drug classifications, theories of substance use disorders, various models of treatment, vulnerable populations, and ethical and legal issues. (Cross-listed with SOWK 4680, COUN 4680, COUN 8686)

Prerequisite(s): Admission to counseling program or social work program or permission of instructor.

SOWK 8696 ASSESSMENT AND CASE MANAGEMENT IN SUBSTANCE USE DISORDERS (3 credits)

This course focuses on assessment of clients and their environment, and diagnosis and referral for substance use disorder treatment. Emphasis is given to assessment instruments, treatment levels, treatment planning, case management, and social justice. (Cross-listed with COUN 4690, COUN 8696, SOWK 4690).

Prerequisite(s): Admission to MSW program or permission of the School and SOWK 8686 or COUN 8686 (or equivalent course) prior to or concurrent.

SOWK 8806 SOCIAL WORK AND THE LAW (3 credits)

This course presents the fundamental principles of criminal and civil law that have relevance to the practice of social work. Topics include: the legal system, legal research methods, professional ethical/legal responsibilities and liabilities, family law, elder law, criminal law, juvenile law, personal injury law, employment discrimination law, capacity to make contracts and wills, rights of institutionalized patients, and rights of handicapped children to an education. (Cross-listed with SOWK 4800)

Prerequisite(s): SOWK 8130 or admitted as Advanced Standing

SOWK 8816 SPIRITUALITY AND SOCIAL WORK PRACTICE (3 credits)

Social work literature defines spirituality as the human striving for a sense of meaning, purpose, values, and fulfillment. Spirituality is expressed through diverse forms throughout a client's lifespan; it is central to clients' understanding of suffering and their attempts to resolve it. This course examines major issues pertaining to spiritually-sensitive social work practice with clients of diverse religious and non-religious (i.e., outside sectarian institutional contexts) perspectives. (Cross-listed with SOWK 4810)

Prerequisite(s): SOWK 8130 or admitted as Advanced Standing

SOWK 8826 GLOBAL ENGAGEMENT: A SOCIAL WORK PERSPECTIVE (3 credits)

This course prepares students to work in a global setting. Students examine theories, concepts, and skills related to social development, cross-cultural engagement, and issues related to particular countries. The course is designed with two elements: 1) On-campus classroom learning focused on global social work knowledge, and, 2) Field-based labs that involve direct engagement with an international population. Students select one lab: i) faculty-led trip to China for two-weeks, ii) refugee resettlement service-learning project in Omaha. (Cross-listed with SOWK 4820).

Prerequisite(s): Admitted to Graduate College. Travel overseas early summer-course lab. Passport, visa-China, travel insurance-UNO, immunizations and registration (International Studies) required to travel abroad. Faculty member leading trip to provide further info.

SOWK 8836 CRISIS INTERVENTION (3 credits)

The prevalence of crisis experiences within our society and lifespan development necessitates that social workers acquire a knowledge and skill-base for effective and professional crisis intervention practice. Students will study the ABC Model of Crisis Intervention and how to ethically practice with diverse and vulnerable populations. Students will apply crisis intervention theory and models of intervention to various concern areas including but not limited to: suicide, sexual assault, domestic violence, substance abuse, grief and loss, and violence. A systems, strengths, and cultural emphasis will be applied to the various crisis situations covered. (Cross-listed with SOWK 4830)

Prerequisite(s): SOWK 8130 or admitted as Advanced Standing

SOWK 8856 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)

This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 4850, GERO 8856, SOWK 4850.)

Prerequisite(s): SOWK 8130 or advanced standing

SOWK 8880 TOPICAL SEMINAR IN SOCIAL WORK (3 credits)

Specific seminar topics will focus on advanced content in social work theory and practice. The course description will be announced when a specific topical seminar is proposed. The topics selected will be consistent with School of Social Work program objectives, faculty expertise, and student needs. This course may be repeated for up to nine hours credit.

SOWK 8886 TOPICAL SEMINAR IN SOCIAL WORK (3 credits)

Specific seminar topics will focus on advanced content in social work theory and practice. The course description will be announced when a specific topical seminar is proposed. The topics selected will be consistent with Grace Abbott School of Social Work program objectives, faculty expertise, and student needs. (Cross-listed with SOWK 4880)

Prerequisite(s): Admission to the Master of Social Work (MSW) program or permission of the Grace Abbott School of Social Work (GASSW).

SOWK 8900 SPECIAL STUDIES IN SOCIAL WELFARE (1-3 credits)

This independent study course allows students to pursue a special selected area or topic within social welfare in order to deepen knowledge and/or skills in that particular area.

Prerequisite(s): Permission of the Grace Abbott School of Social Work (GASSW). Not open to non-degree graduate students.

SOWK 8940 EVALUATION OF SOCIAL PROGRAMS (3 credits)

This is an advanced research course in the evaluation of social programs and social agencies which focuses on agency organizational structure, program design and effectiveness, and social impact.

Prerequisite(s): SOWK 8190

SOWK 8950 RESEARCH METHODS IN CLINICAL PRACTICE (3 credits)

This course provides a study of the issues involved in clinical research methodology. Students are introduced to the tools for documenting the effects of clinical practice interventions for individuals, couples, families and groups (including qualitative and quantitative methodologies: single-case design, standardized measurement, self-report data, self-monitoring, case study, grounded theory etc.).

Prerequisite(s): SOWK 8190 and SOWK 8220

SOWK 8960 RESEARCH OTHER THAN THESIS (3 credits)

This course enables students, under faculty supervision, to prepare a research proposal, carry out the study, and prepare a detailed report of the purpose, design, outcome, and significance of the study.

Prerequisite(s): SOWK 8190 and permission of the Grace Abbott School of Social Work

SOWK 8990 MASTER'S THESIS (3-6 credits)

The Master's thesis provides students the opportunity to acquire first-hand experience in research methods under faculty direction. With the guidance of the thesis coordinator and a supervisory committee, the student prepares a research proposal, conducts the proposed study, and prepares a detailed report of the purpose, design, results, and implications of the findings.

Prerequisite(s): SOWK 8190 and permission of the Grace Abbott School of Social Work (GASSW)

Social Work, MSW

Grace Abbott School of Social Work, College of Public Affairs & Community Service

Vision Statement

The mission of the Grace Abbott School of Social Work is to educate students to become highly qualified social workers who serve people of all ages and influence the systems that affect them, to advance knowledge through teaching and research, and to engage with diverse communities to promote socially just societies.

Other Program Related Information

The MSW program has received continuous accreditation from the Council on Social Work Education since 1940. The MSW program prepares students to provide a variety of advanced social work services with individuals, families, groups, organizations, and communities. The MSW degree is recognized for licensure for independent social work practice in the United States. More information regarding licensure and certification can be found on local Department of Health and Human Services websites.

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024 and Fall 2024)

- Spring Admission : October 15
 - Spring Admission to the School of Social Work is limited to students who have already completed or will be completing a BSSW (Bachelor of Science in Social Work) prior to beginning the MSW and are applying to the Advanced Standing MSW program. Students who have earned or will be earning a degree other than a BSSW must apply for fall admission.
- Fall Admission: February 15
 - Students who have earned or will be earning a BSSW or any undergraduate degree may apply for fall admission.

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.

- Internet-based TOEFL: 85, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** The statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, in no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.
 - If you have a compelling autobiographical story relevant to your application, but that falls outside of the items addressed within the statement, you may add a letter to the Admissions Committee. Your letter will be considered, but will not be scored.
- What type of work are you planning to engage with once you attain your MSW degree? Specifically, what are the issues, populations, and levels of practice you hope to work with after graduate school?
- The social work profession is rooted in social justice. Social workers adopt a stance of cultural humility and strive towards cultural awareness. Discuss a time when you realized that one of your personal or cultural identities influenced your reaction to a social situation. Reflecting on that experience, how might it influence your future social work practice?
- Social workers are self-reflective, strengths-based, and growth-oriented. Identify a strength that you possess and an area for growth. Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.
- Social work is a values-based profession dedicated to mitigating inequality and enhancing human wellbeing, especially for vulnerable, marginalized, and oppressed populations. From the core values and ethical principles identified in the NASW Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>), identify and discuss one that resonates with you and one that may challenge you.
- Why have you chosen social work? Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.
- **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:
 - Educational experiences since high school
 - List start and end dates with month and year
 - Identify whether the position is part or full-time
 - Identify whether the position is paid or volunteer
 - Field placements, internships or practicums
 - Honors or distinctions received
 - Professional experiences, especially in human services
- **Letters of Recommendation:** Three letters of recommendation are required, the recommendation requests are generated from your online application. These recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past two years, it is suggested that at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends,

personal therapists, or other non-professional/academic sources will not be scored.

The MSW **Foundation Program** is a 63 credit hour program available to applicants who do **not** hold a BSSW degree from an accredited school of social work within the last 10 years.

The MSW **Advanced Standing Program** is a 39 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work within the last 10 years.

Social Work, MSW and Criminology and Criminal Justice, MS (MSW/CRCJ)

Grace Abbott School of Social Work, School of Criminology & Criminal Justice, College of Public Affairs & Community Service

Vision Statement

The MSW/MSRCRJ dual degree program is a collaborative effort between the University of Nebraska at Omaha, Grace Abbott School of Social Work and the School of Criminology and Criminal Justice. The MSW/MSRCRJ

offers interdisciplinary preparation in the fields of social work and criminal justice leading to the master of social work and the master of criminal justice degrees, with fewer required credit hours than it would take to obtain these degrees independently.

This dual degree program prepares students to provide a range of advanced social work services for individuals, families, groups, organizations, and communities and assume leadership in the field of criminal justice and social work. Graduates with a dual MSW/MSRCRJ are prepared to respond to the needs of the community by working with delinquent and criminal populations and the systems that impact these populations.

Students beginning the MSW/MSRCRJ program at the MSW Foundation level must complete 81 credit hours total. Students beginning the MSW/MSRCRJ program at the Advanced Standing level, must complete 57 credit hours total.

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024 and Fall 2024)

- Spring: October 15
 - Foundation MSW/MSRCRJ students (those who do not have an undergraduate degree in social work, BSSW) admitted for the spring term are limited to only the MSRCRJ coursework in spring and summer terms. The MSW coursework will be added in the fall term.
 - Advanced MSW/MSRCRJ students (those with an undergraduate degree in social work, BSSW) can begin both MSRCRJ and MSW coursework in the spring term.
- Fall: February 15
 - Students admitted as either Foundation MSW/MSRCRJ or Advanced MSW/MSRCRJ can begin both MSW and MSRCRJ coursework in the fall term.

Other Requirements

- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined

country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.

- Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

- **Statement of Purpose:** The statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, in no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.

- If you have a compelling autobiographical story relevant to your application, but that falls outside of the items addressed within the statement, you may add a letter to the Admissions Committee. Your letter will be considered, but will not be scored.
- What type of work are you planning to engage with once you attain your MSW degree? Specifically, what are the issues, populations, and levels of practice you hope to work with after graduate school?
- The social work profession is rooted in social justice. Social workers adopt a stance of cultural humility and strive towards cultural awareness. Discuss a time when you realized that one of your personal or cultural identities influenced your reaction to a social situation. Reflecting on that experience, how might it influence your future social work practice?
- Social workers are self-reflective, strengths-based, and growth-oriented. Identify a strength that you possess and an area for growth. Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.
- Social work is a values-based profession dedicated to mitigating inequality and enhancing human wellbeing, especially for vulnerable, marginalized, and oppressed populations. From the core values and ethical principles identified in the NASW Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>), identify and discuss one that resonates with you and one that may challenge you.
- Why have you chosen social work? Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.

- **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:

- Educational experiences since high school
 - List start and end dates with month and year
 - Identify whether the position is part or full-time
 - Identify whether the position is paid or volunteer
 - Field placements, internships or practicums
 - Honors or distinctions received
 - Professional experiences, especially in human services

- **Letters of Recommendation:** Three letters of recommendation are required, the recommendation requests are generated from your online application. These recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past two years, it is suggested that at least one reference should be from a faculty member who can speak directly

to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.

- The MS application for criminology and criminal justice is completed online adhering to the same admission criteria for the MSW degree. The personal statement and letters of recommendation for admission to the MSW degree will be used by the School of Criminology and Criminal Justice to admit students.

The MSW/CRCJ **Foundation Program** is a 81 credit hour program available to applicants who do **not** hold a BSSW degree from an accredited school of social work within the last 10 years.

The MSW/CRCJ **Advanced Standing Program** is a 57 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work within the last 10 years.

Total Credits 57

¹ A student must receive a grade of "B" or higher in practicum courses (SOWK 8400 and SOWK 8410).

² Courses not selected from among the three listed may be used as an elective.

Exit Requirements

- CRCJ 8970 Capstone course is offered in the fall and spring semesters. Once all required coursework has been completed, the student can register to take the capstone course. The course will require students to engage in a problem-solving project involving group work, which culminates in a written report and oral presentation.
- Satisfactory completion with a grade of B or better in SOWK 8400 and SOWK 8410

Academic Policies and Standards

- The MSW Student Handbook can be found here (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/social-work/student-resources/>).

Public Administration, MPA and Social Work, MSW (MPA/MSW)

School of Public Administration and Grace Abbott School of Social Work, College of Public Affairs & Community Service

Vision Statement

The MPA/MSW dual degree program is a collaborative effort between the University of Nebraska at Omaha (UNO), Grace Abbott School of Social Work and the School of Public Administration. This program offers interdisciplinary preparation in the fields of social work and public administration leading to the master of social work and the master of public administration degrees, with fewer required credit hours than it would take to obtain these degrees independently.

The program prepares students to provide a variety of advanced level micro, mezzo, and macro social work services to individuals, families, groups, organizations, and communities; and assume leadership in the public service sector, specifically in administrative and policy work with governmental units and nonprofit organizations.

Students beginning the MPA/MSW program at the MSW Foundation level must complete 81 credit hours total. Students beginning the MPA/MSW

program at the Advanced Standing level must complete 57 credit hours total.

Other Program Related Information

- Master's level social workers are employed in public and private agencies, including medical settings, schools, residential treatment centers, court and correctional agencies, and community planning and development agencies.
- The MSW degree at the Grace Abbott School of Social Work is accredited by the Council on Social Work Education (CSWE), the national accrediting body for all social work education.
- Information on certification and licensure is available on the Nebraska Department of Health and Human Services website (<http://dhhs.ne.gov/Pages/default.aspx>).

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024 and Fall 2024)

- Spring: October 15
 - Foundation MPA/MSW students (those who do not have an undergraduate degree in social work, BSSW) admitted for the spring term are limited to only the MPA coursework in spring and summer terms. The MSW coursework will be added in the fall term.
 - Advanced MPA/MSW students (those with an undergraduate degree in social work, BSSW) can begin both MPA and MSW coursework in the spring term.
- Fall: February 15
 - Students admitted as either Foundation MPA/MSW or Advanced MPA/MSW can begin both MSW and MPA coursework in the fall term.

Note: If admitted to the Master of Social Work program and you wish to become a dual degree MSW/MPA student you will need to adhere to the MPA deadline date which is **June 1**(fall) or **October 1** (spring).

Other Requirements

- The general prerequisite for admission to the program is a four-year bachelors' degree with a minimum of a 3.0 GPA (on a 4.0 scale) in the junior and senior years (last 50-60 hours).
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL, 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** Two statements of purpose are required; one for the School of Public Administration and one for the Grace Abbott School of Social Work
 - For Social Work, the statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, and should be no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.
 - Why have you chosen social work? Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.
 - Social work is a values-based profession dedicated to mitigating inequality and enhancing human wellbeing, especially for vulnerable, marginalized, and oppressed populations. From the core values and ethical principles identified in the NASW Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>), identify and discuss one that resonates with you and one that may challenge you.
 - Social workers are self-reflective, strengths-based, and growth-oriented. Identify a strength that you possess and an area for growth. Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.
 - The social work profession is rooted in social justice. Social workers adopt a stance of cultural humility and strive towards cultural awareness. Discuss a time when you realized that one of your personal or cultural identities influenced your reaction to a social situation. Reflecting on that experience, how might it influence your future social work practice?
 - If you have a compelling autobiographical story relevant to your application, but that falls outside of the items addressed within the statement, you may add a letter to the Admissions Committee. Your letter will be considered, but will not be scored.
 - For Public Administration, the essay should answer the following questions:
 - Please tell us about the factors in your background that will help us understand your interest in a profession in the public or nonprofit sectors.
 - What are your professional goals? Ten years from now, what do you hope to be doing professionally?
 - How can this dual degree from UNO help you achieve these goals?

- **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:
 - Educational experiences since high school
 - List start and end dates with month and year
 - Identify whether the position is part or full-time
 - Identify whether the position is paid or volunteer
 - Field placements, internships or practicums
 - Honors or distinctions received
 - Professional experiences, especially in human services
- **Letters of Recommendation:** Three letters of recommendation are required. Recommendation requests are generated from your online application. The recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past three years, at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.

The MSW **Foundation Program** is a 63 credit hour program available to applicants who do **not** hold a BSSW degree from an accredited school of social work within the last 10 years.

The MPA/MSW **Advanced Standing Program** is a 57 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work within the last 10 years.

- Master's-level social workers are employed in public and private agencies, including medical settings, schools, residential treatment centers, court and correctional agencies, and community planning and development agencies.
- The MSW degree at the Grace Abbott School of Social Work is accredited by the Council on Social Work Education (CSWE), the national accrediting body for all social work education.
- Information on certification and licensure is available on the Nebraska Department of Health and Human Services' website (<http://dhhs.ne.gov/Pages/default.aspx>)

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Fall 2024)

- Fall Start: February 15 (MSW), June 1 (MPH)
- The MPH application is completed online (<http://www.unmc.edu/publichealth/admissions/mphdualdegree/mph-msw.html>) through the College of Public Health at the University of Nebraska Medical Center.
 - The MSW Admissions Committee decides on admission to the MSW program; the MPH Admissions Committee decides on admission to the MPH program. A student not admitted to both programs may pursue the other degree if admitted.

MSW Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** The statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, in no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should

be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.

- If you have a compelling autobiographical story relevant to your application, but that falls outside of the items addressed within the statement, you may add a letter to the Admissions Committee. Your letter will be considered, but will not be scored.
- What type of work are you planning to engage with once you attain your MSW degree? Specifically, what are the issues, populations, and levels of practice you hope to work with after graduate school?
- The social work profession is rooted in social justice. Social workers adopt a stance of cultural humility and strive towards cultural awareness. Discuss a time when you realized that one of your personal or cultural identities influenced your reaction to a social situation. Reflecting on that experience, how might it influence your future social work practice?
- Social workers are self-reflective, strengths-based, and growth-oriented. Identify a strength that you possess and an area for growth. Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.
- Social work is a values-based profession dedicated to mitigating inequality and enhancing human wellbeing, especially for vulnerable, marginalized, and oppressed populations. From the core values and ethical principles identified in the NASW Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>), identify and discuss one that resonates with you and one that may challenge you.
- Why have you chosen social work? Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.
- **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:
 - Educational experiences since high school
 - List start and end dates with month and year
 - Identify whether the position is part or full-time
 - Identify whether the position is paid or volunteer
 - Field placements, internships or practicums
 - Honors or distinctions received
 - Professional experiences, especially in human services
- **Letters of Recommendation:** Three letters of recommendation are required, the recommendation requests are generated from your online application. These recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past two years, it is suggested that at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.

MPH Other Requirements

- GRE

The MSW/MPH **Foundation Program** is a 78 credit hour program available to applicants who do not hold a BSSW degree from an accredited school of social work within the last 10 years.

The MSW/MPH **Advanced Standing Program** is a 54 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work within the last 10 years.

Other Program Related Information:

Note: This certificate can be obtained entirely online. All courses for the certificate will be offered online in a two-year rotation. Elective courses in criminology and criminal justice are also offered in the spring, summer and fall semesters.

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

- Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- GPA of 2.75 or higher

- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Paper-based TOEFL: 588, Internet-based TOEFL: 95 with a minimum of 21 in each of the four areas, IELTS: 7.5 (8.0 preferred), PTE: 76, Duolingo: 115
 - All ESL students are required to take a proficiency assessment examination at UNO upon admission, which will be used to determine if further assistance is required.
- Statement of Purpose:** The statement should include how the certificate will help you achieve your professional goals.
- Resume**

Sociology

Degree Programs Offered

- Sociology, MA (p. 1412)

Certificate Programs Offered

- Sociology, Graduate Certificate (p. 1414)

SOC 8010 CLASSICAL SOCIOLOGICAL THEORY (3 credits)

This course surveys the nineteenth century writers whose ideas have had a strong influence on the development of contemporary sociology and sociological theories. It examines work in such areas as: structural functionalism; conflict theory; rationalism; and the beginnings of modern symbolic interaction, feminist, and race theory. The course emphasizes a close reading of original texts, as well as seminar-style class discussions. **Prerequisite(s):** Graduate; permission of instructor if outside Sociology MA program.

SOC 8020 CONTEMPORARY SOCIOLOGICAL THEORY (3 credits)

This course reviews some of the most important developments in contemporary sociological theory. It examines work in such areas as: symbolic interactionism, phenomenology and ethnomethodology; dramaturgical analysis; functionalism and neo-functionalism; structuralism, post-structuralism and postmodernity; postcolonial and subaltern studies; neo-marxism; critical theory; critical race studies; feminist theory; cultural theory; and world systems and globalization theory. The course emphasizes a close reading of original texts, as well as seminar-style class discussions. **Prerequisite(s):** Graduate; permission of instructor if outside Sociology MA program.

SOC 8030 SOCIOLOGICAL INQUIRY & RESEARCH DESIGN (3 credits)

This course focuses on the research design process from a sociological perspective. It gives broad, intermediate-level coverage to social science research methodology, with an emphasis on the logic of research procedures. Topics covered include the relationship of theory and research, causal analysis, sampling, and quantitative and qualitative design approaches.

Prerequisite(s): Graduate; undergraduate course in research methods; permission of instructor if outside Sociology MA program.

SOC 8040 SOCIOLOGICAL STATISTICS (3 credits)

This course focuses on intermediate statistics and data analysis as applied to social research. Topics include descriptive statistics, probability, significance tests, multiple regression, and more advanced topics as time permits. Students will also learn how to utilize computer software packages to perform statistical analyses.

Prerequisite(s): Graduate; undergraduate statistics course; permission of instructor if outside Sociology MA program.

SOC 8050 SEMINAR ON TEACHING: PEDAGOGICAL THEORY AND PRACTICE (3 credits)

A survey of various approaches to teaching at the college level (including critical, feminist, and other pedagogical theories) as well as strategies that can be employed in teaching. Topics include: syllabus and course design, evaluation and assessment strategies, developing a teaching style and philosophy, and the scholarship of teaching and learning. Emphasis is on preparing new teachers in sociology, but the course is intended for any graduate student who may already be teaching or anticipates teaching in the future.

Prerequisite(s): Enrollment in the graduate program in sociology or permission of the instructor.

SOC 8060 QUALITATIVE METHODS (3 credits)

This course familiarizes students with contemporary qualitative methodologies and techniques by which the social sciences explore social and cultural relations in natural settings. Students will conduct individual and or group field projects.

Prerequisite(s): Graduate standing or permission of the instructor.

SOC 8100 SOCIAL INEQUALITY (3 credits)

This course examines social inequality from a sociological vantage point. Students will review theoretical frameworks for studying social inequality, processes that result in the unequal distributions of individual resources, empirical analyses of inequality, and the consequences of various inequalities for intergenerational social mobility. While the course focuses on inequality in the United States, global and international dimensions of social inequality are also covered.

Prerequisite(s): Graduate; permission of instructor if outside of Sociology MA program

SOC 8136 SOCIOLOGY OF DEVIANCE (3 credits)

This course introduces students to the sociological study of behaviors that have been labeled as "deviant" because they presumably violate social norms. The course takes a constructionist approach, critically analyzing how deviance is socially defined, organized, and managed. Students will be challenged to see the diversity and pervasiveness of deviance in society and to question the labelling of behaviors, individuals, and powerless groups as deviant. We will explore the social processes, powerful actors, and social institutions that create deviance as well as efforts to resist definitions of deviance. (Cross-listed with SOC 4130).

Prerequisite(s): Graduate standing.

SOC 8146 URBAN SOCIOLOGY (3 credits)

This course examines classical and contemporary sociological theories on city formation, the urbanization process, and the interaction of society and the built environment. Topics covered include suburbanization, gentrification, residential segregation, social networks, crime, housing, city culture, and public policy. The focus is on U.S. cities with selected comparisons to other world regions. Students will also get basic knowledge and exposure to research methods to study urban areas locally. (Cross-listed with SOC 4140).

Prerequisite(s): Graduate standing, or permission of instructor

SOC 8156 AMERICAN FAMILY PROBLEMS (3 credits)

This course explores the problems and issues faced by contemporary American families, such as racism and sexism; the challenges of childhood and adolescence; divorce and remarriage; work and family conflict; and family violence. The difficulty of defining both "family" and "problems" is addressed throughout the course. (Cross-listed with SOC 4150)

Prerequisite(s): Not open to non-degree graduate students.

SOC 8176 SOCIOLOGY OF FATHERHOOD (3 credits)

This course examines the existing social science research on fatherhood, exploring topics such as the evolution, history, demography, and politics of fatherhood; father involvement and its relationship to both children's and men's well-being; the effects of diversity and family structure on fatherhood; and public policy surrounding fatherhood. (Cross-listed with SOC 4170)

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

SOC 8186 OCCUPATIONS & CAREERS: FULFILLMENT AND CHALLENGES AT WORK (3 credits)

This course examines what makes individuals and groups happy and satisfied with their jobs, and the factors that can turn "a dead-end job" into a meaningful pursuit that lasts decades. The course utilizes a life course approach and covers early socialization experiences to retirement transitions. It also employs a sociological lens to explore how individual experiences in the work realm are affected by stratification (such as race/ethnicity, gender, sexuality, social class, and parental status) and as well as by occupational norms and structures, workplace relationships, and culture and practices at the organizational and societal levels. (Cross-listed with SOC 4180).

Prerequisite(s): Enrollment in sociology graduate program or permission of the instructor.

SOC 8200 HEALTH & SOCIETY (3 credits)

The course provides a critical sociological understanding of health, illness, healing, and medical care within a social context. The focus ranges from examining health and illness behavior and patient-provider interaction to issues addressing the social organization of health care and medicine.

Prerequisite(s): Graduate standing.

SOC 8216 DISABILITY AND SOCIETY (3 credits)

This course takes a sociologically grounded but interdisciplinary look at the past, present, and potential future of disability. Along the way, competing models and theories of disability are critically explored and substantive issues pertaining to the social experiences and social responses to people with disabilities are discussed. (Cross-listed with SOC 4210)

Prerequisite(s): SOC 1010 and junior or senior standing; or permission of instructor. Not open to non-degree graduate students.

SOC 8246 SOCIAL TRANSFORMATIONS IN LATIN AMERICA (3 credits)

The course reviews the main social, economic, and political forces that have shaped Latin American societies, and the sociological theories used to understand Latin American development and underdevelopment. Race, ethnicity, gender and class in Latin America, as well as the region's position in the global economy are examined. (Cross-listed with SOC 4240, LLS 4240, LLS 8246).

Prerequisite(s): Graduate standing or permission of instructor.

SOC 8256 CRISSCROSSING THE CONTINENT: LATIN AMERICAN MIGRATIONS (3 credits)

In this course we will use an interdisciplinary lens to study the changes and continuities of migration in the Americas. The course starts with an overview of immigration to the Americas during the first era of mass migration (1850-1920) to explore the relevance of European migrations for national and identity constructions in the Southern Cone of America. Students then will be introduced to the impacts of social and political change on emigration flows, both regionally and beyond the region. They will also explore migration related policies at the national and regional level. We will also study the changes and continuities in the migration system of the Americas. Lastly, we will analyze the new North-South migration, as well as immigration to Latin America from Asia (recent and historical), Europe, and Africa. (Cross-listed with SOC 4250, LLS 4250, LLS 8256).

Prerequisite(s): Graduate standing

SOC 8316 SOCIOLOGY OF SEXUALITIES (3 credits)

This class focuses on the social construction of sexualities - especially heterosexual sexualities, bisexual sexualities, and homosexual sexualities. A primary focus of the class will be LGBT/Queer Studies. The class examines how sexual desires/identities/orientations vary or remain the same in different places and times, and how they interact with other social and cultural phenomenon such as government, family, popular culture, scientific inquiry, and race, gender, and class. (Cross-listed with SOC 4310)

Prerequisite(s): Not open to non-degree graduate students.

SOC 8356 WORK & FAMILY (3 credits)

This course examines the contemporary problems that individuals, families and communities in the U.S. have in integrating work and family/personal life. (Cross-listed with SOC 4350)

SOC 8446 HUMAN CONNECTION, LONELINESS, & HEALTH (3 credits)

This course examines the "loneliness epidemic" through a sociological perspective and is based on the premise that loneliness is a public health issue, as research consistently shows it is associated with a vast array of physical and mental health outcomes. After discussing the extent of loneliness and how to define it by distinguishing it from other types of social pain, the course covers: 1) the extent and nature of loneliness and its cultural/social sources; 2) the pathways from loneliness to health outcomes; and 3) possible interventions to reduce loneliness and improve public health. (Cross-listed with SOC 4440).

Prerequisite(s): Graduate standing.

SOC 8476 SOUTH AFRICA & THE SOCIO POLITICS OF APARTHEID (3 credits)

South Africa and the Socio Politics of Apartheid examines the lived experiences of South African people under the Apartheid system, and their long struggle against European colonial oppression and racial segregation throughout the 20th century. Students will examine the laws, tools, and strategies that developed and sustained Apartheid, and the anti-Apartheid movements and international pressure that led to its repeal and South African democratic elections. (Cross-listed with BLST 8476, BLST 4470, PSCI 8476, PSCI 4470, SOC 4470).

Prerequisite(s): Graduate standing

SOC 8500 COMPLEX ORGANIZATIONS (3 credits)

This graduate seminar provides an overview focused on the understanding and analysis of intricate internal and external organizational forces such as organizational bureaucracy, organizational culture, autonomy and control systems, which affect performance of organizational members as well as influence organizational survival. (Cross-listed with CACT 8500)

Prerequisite(s): Graduate enrollment or permission of class instructor.

SOC 8550 ORGANIZATIONAL CULTURE (3 credits)

This course will discuss the various dimensions of organizational cultures and their consequences to organizational life. Emphasis will be placed on the significance of culture to human behavioral patterns, and the analysis of how organizational cultures shape the behavior and performance of organizational members. The course will prepare students for leadership success in organizations using advanced knowledge of organizational culture.

Prerequisite(s): Graduate standing or permission of instructor.

SOC 8556 ORGANIZATIONAL DIVERSITY AND INCLUSION (3 credits)

This course provides advanced-level knowledge of the structural understanding, assessment, analysis, and management of social diversity as well as successful inclusion strategies in the workplace. Concepts and theories dealing with structural basis of the creation of difference, consequences of difference, inclusion, affirmative action, and diversity consulting skills are fully examined in this course. This course will prepare students for successful leadership in diverse organizational environments. (Cross-listed with SOC 4550)

Prerequisite(s): Graduate standing or permission of instructor.

SOC 8600 SEMINAR IN SOCIAL ORGANIZATION (3 credits)

Graduate seminar on the sociological analysis of organizational fields and an in-depth study of one organizational system, such as decision-making, authority, communication, change, supervision, technology, bureaucracy, and reward system, in one organizational type within one organizational field. As seminar topics change, this course may be repeated twice in a student's program without implying duplication.

Prerequisite(s): Graduate standing and SOC 4620/8626; or permission of instructor.

SOC 8626 APPLIED FORMAL ORGANIZATIONS (3 credits)

An advanced-level applied organizational sociology course that uses organizational theory, concepts, research, and practice to examine the structural bases of organizational effectiveness, efficiency, survival, and actions of organizational members. The course is designed to prepare students for organizational leadership using advanced knowledge and skills of organizational sociology. (Cross-listed with SOC 4620).

Prerequisite(s): Graduate standing or permission of instructor.

SOC 8706 WOMEN'S HEALTH AND ISSUES OF DIVERSITY (3 credits)

This course provides a critical understanding of the inter-relationship between socio-cultural, economic, and political factors and women's physical and mental health. The aim is to provide an overview of the experience with the health care system. Emphasis will be on critically examining recent scholarship from a sociological, behavioral, health policy perspective. (Cross-listed with SOC 4700, PHHB 4700, PHHB 8706)

Prerequisite(s): Graduate standing.

SOC 8746 SOCIAL JUSTICE AND SOCIAL CHANGE (3 credits)

This course investigates the economic, political and social constraints on equality present in local, national and global arrangements. Students will gain a theoretical understanding of these conditions as well as those that lead to social change, spanning from day-to-day resistance techniques to large scale social movements. Students will participate in a service learning or applied project as they explore contemporary social justice issues and learn both theoretical and practical tools needed to become successful change makers, activists, or community organizers. Examples of social justice movements or campaigns form the basis for understanding injustice at a local, national, and global level. (Cross-listed with SOC 4740)

Prerequisite(s): SOC 1010 and junior standing; or permission of instructor.

SOC 8766 ENVIRONMENTAL SOCIOLOGY (3 credits)

This course is an introduction to environmental sociology, a field of sociology that explores the interaction between the environment and society. Environmental sociologists consider how political, social, and economic factors have come to shape our patterns of interaction with the natural and built environment. Students will be expected to use the sociological perspective to understand the landscape of environmental problems, focusing on such issues as environment and health, disaster, environmental policy, climate change, environmental risk, human and animal interactions, sustainability, environmental justice and social movements. (Cross-listed with SOC 4760).

SOC 8776 POLITICAL SOCIOLOGY (3 credits)

This course explores political sociology, focusing on political processes and power. Political sociologists investigate relationships between political institutions and various other institutions, including but not limited to the economy, education, media, and religion, and the impacts that these relationships have on society and the individuals that comprise the society. This course will explore the concepts, theories, and knowledge that comprise this field such as power, legitimacy, the state, networks, stratification, and collective action. (Cross-listed with PSCI 4770, PSCI 8776, SOC 4770).

Prerequisite(s): Graduate standing

SOC 8786 URBAN LATIN AMERICA (3 credits)

This course examines the experience of Latin American urbanization, attending to its contributions to urban sociology, social movements, and policymaking. Topics include urban transitions (e.g. pre-Hispanic to colonial, post-colonial to industrial, and the neoliberal turn), socio-spatial configurations (e.g. plazas, squatter settlements), urban marginality debates, urban politics, and planning as well as governance innovations (e.g. bus rapid transit systems, participatory budgeting). Students will compare city case studies across the region and to urban life in the United States. (Cross-listed with SOC 4780, LLS 4780, LLS 8786, CACT 8186).

Prerequisite(s): Graduate standing or permission of instructor

SOC 8806 CONTEMPORARY TOPICS IN SOCIOLOGY (3 credits)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 4800)

Prerequisite(s): Sociology major; or permission of instructor.

SOC 8836 SOCIOLOGY OF MENTAL HEALTH & ILLNESS (3 credits)

This course will apply the sociological perspective to various topics regarding mental health and illness. The course will cover topics such as the social construction of mental illness, the social epidemiology of mental illness, labeling and stigma of those with a mental illness, and mental health policy/treatment. (Cross-listed with SOC 4830)

Prerequisite(s): SOC 1010, and junior standing; or permission of the instructor.

SOC 8856 SOCIOLOGY OF RELIGION (3 credits)

This course looks at religion as a social and cultural phenomenon, examining how religious beliefs, practices, institutions and movements shape and are shaped by their social context. Topics include: sociological theories and explanations of religion and spirituality; definitions of religion and the distinction between religion and other ideologies or worldviews; the measurement of religiosity and the scientific study of religion; trends in religiosity, spirituality, and the religious landscape historically and globally; sociological insights gained from the study of new religions, secularization, fundamentalism, and other issues related to contemporary religious experience. (Cross-listed with SOC 4850)

Prerequisite(s): SOC 1010 and junior standing; or permission of instructor

SOC 8886 CONTEMPORARY TOPICS IN SOCIOLOGY (1 credit)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 4880).

Prerequisite(s): Graduate standing or permission of instructor.

SOC 8896 CONTEMPORARY TOPICS IN SOCIOLOGY (2 credits)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 4890).

Prerequisite(s): Graduate standing or permission of instructor.

SOC 8950 PRACTICUM IN APPLIED SOCIOLOGY (3 credits)

A practical work experience under supervision that provides opportunity for applying principles from the student's academic area of concentration.

Prerequisite(s): Graduate sociology major. Not open to non-degree graduate students.

SOC 8960 APPLIED PROJECT (1-6 credits)

This capstone experience in the applied project option is an independent research project conducted in an applied setting under the supervision of a graduate faculty member in the department..

Prerequisite(s): Graduate sociology major; permission of the graduate program chair. Not open to non-degree graduate students.

SOC 8980 INDEPENDENT STUDY IN SOCIOLOGY (1-3 credits)

Guided reading or independent research in special topics in Sociology under the supervision of a member of the Sociology faculty. This course is designed primarily for the student interested in topics not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated once for credit.

Prerequisite(s): Permission of the instructor. Not open to non-degree graduate students.

SOC 8990 THESIS (1-6 credits)

A research project, written under the supervision of a graduate advisor in the Department of Sociology & Anthropology, in which the student designs, conducts, and completes an original, independent, scholarly investigation at a graduate level. The research topic and the completed project must be approved by the student's departmental committee.

Prerequisite(s): Permission from Graduate Chair. Not open to non-degree graduate students.

SOC 9110 THEORIES OF AGING (3 credits)

An overview of social gerontology with an emphasis on the interplay between social, psychological and physical elements in later life. Restricted to graduate students only; required of gerontology students. (Cross-listed with GERO 9110)

Prerequisite(s): Graduate.

Sociology, MA

Department of Sociology & Anthropology, College of Arts & Sciences

Vision Statement

This innovative degree program provides students with advanced knowledge in sociological theory, methods, and research. The flexible and interdisciplinary nature of the program allows students to focus on an additional academic specialty area within or outside of sociology. Department faculty members have strengths in several areas, including families and gender, health, inequality and social justice, work and organizations, race and ethnicity, and anthropology. The department also has close connections to the Office of Latino/Latin American Studies, Native American Studies, and Women's and Gender Studies.

Other Program Related Information

Fast Track Program

The Department of Sociology & Anthropology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BA/BS in Sociology who are desiring to pursue an MA in Sociology.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0 and a GPA of 3.3 in SOC and ANTH courses.
- Students must complete the Fast Track Approval form, obtain all signatures, and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
 - ANTH 1050, SOC 1010, SOC 2120, SOC 2130, SOC 2134 should be completed before enrolling in the first graduate course.
 - SOC 3510 and SOC 3514 should be taken before or concurrently with enrollment in the first graduate course.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status, including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
- Admission to Fast Track does NOT guarantee admission to the graduate program.
- The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024 and Fall 2024)

- Fall: April 15
- Spring: November 15

If you are applying for a **graduate assistantship**, both admissions and assistantship application materials should be completed by **February 15** (for Fall Semester). Review of materials begins soon after February 15 and continues until the graduate assistantship position is filled.

Other Requirements

- Baccalaureate degree or previous master's degree with a minimum 3.0 GPA.
- Applicants for admission to the graduate program in sociology should present a minimum of 15 undergraduate credit hours in the following social science courses:

- Statistics, research methods, and social theory
- A minimum of six additional hours of sociology or other social science courses
- Undergraduate courses in statistics, research methods, and social theory are required before the student can enroll in the graduate courses in the same areas.
 - Students without the specific prerequisite courses may be admitted provisionally, but deficiencies should be removed in the first year of graduate study.
 - All prerequisite courses must be passed with a grade of "B" (3.0 on a 4.0 scale) or better.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80 (no sub-score under 15), IELTS: 6.5, PTE: 53, Duolingo: 110
 - Passing with a minimum score does not guarantee admission into the program.
- **Statement of Purpose:** Outline your career goals, why a graduate degree in Sociology will help you attain these goals, and why the UNO MA in sociology is a good fit. Make sure your statement includes the following components:
 - Discuss how your academic goals fit into the Department of Sociology & Anthropology's strengths and areas of research.
 - Detail your research interests and how these interests are sociological.
 - Provide a brief (1-2 paragraph) personal statement regarding the development of your academic interest in Sociology.
- **Writing Sample:** Submission of an academic, research-based writing sample. The sample must be written in English, include citations, and be a minimum of five pages in length. This writing sample can be a previous assignment. If no such paper exists, the applicant should contact the graduate program chair for an alternative assignment.
- **Resume:** The resume should highlight the education and employment experiences that are especially relevant to graduate work in sociology.
- **Letters of Recommendation:** Two letters of recommendation from a former or current professor (preferred), supervisor, or individual that can speak to one's academic potential in a graduate program. If students have recently graduated from UNO with a major in Sociology, it is expected that one of the letters will be from a faculty member in the UNO Sociology & Anthropology Department.
- GRE scores are not required for admission; however, students are welcome to submit them.

Degree Requirements

Code	Title	Credits
Required Courses		
SOC 8030	SOCIOLOGICAL INQUIRY & RESEARCH DESIGN	3
SOC 8040	SOCIOLOGICAL STATISTICS	3
SOC 8060	QUALITATIVE METHODS	3
SOC 8100	SOCIAL INEQUALITY	3
Select one from the following:		3
SOC 8010	CLASSICAL SOCIOLOGICAL THEORY	
SOC 8020	CONTEMPORARY SOCIOLOGICAL THEORY	

Electives

Elective courses will be chosen in consultation with the GPC and/or your advisor. The department offers a rotating selection of elective courses based on faculty specialty areas. Students in the thesis option (see below) may take up to six hours of electives outside of sociology; students pursuing the applied project or non-thesis option (comprehensive exams) may take up to nine hours outside of sociology. All outside courses must be relevant to the student's interest area within sociology and should be approved by the GPC and/or advisor.

9-21

Exit Requirements:

All students begin this program as a comprehensive exam student. Students who would like to complete a thesis or applied project may apply to do so after completing 9 credit hours, but at least one term before they plan on starting their thesis or applied project. To apply to change out of the comprehensive exam track, a student must request an application form and submit it to the graduate program chair during the time specified above. The graduate program chair will then meet with the student and discuss which degree completion pathway might be best. If denied, a student may appeal once in a following term by going through the same process. During an appeal, the graduate program committee will review the application.

Comprehensive Exam Exit Requirement

The non-thesis, comprehensive exam option is recommended for students who wish to maximize their exposure to coursework in sociology and related disciplines. Students must complete a minimum of 36 credit hours of approved graduate work in sociology and related disciplines.

The comprehensive examination focuses on the student's coursework, particularly the topical focus area developed by the student. Students will answer one of two questions on sociological theory, one of two questions on research methods, and one of two questions from the focus area.

The exam is a one-week take-home exam to be scheduled in consultation with the Graduate Program Chair. Students will work with the Graduate Program Chair to select two readers for each section (theory, research methods, focus area). Each of the three sections of the exam will be evaluated separately on the following basis:

- high pass
- pass
- conditional pass
- or fail

In the case of a conditional pass in a section or sections, the students will have an opportunity to revise their answers for reevaluation by the faculty readers.

In the case of a failing evaluation in a section or sections, the student will have one more opportunity per section to re-take the exam. The student will answer the other of the two questions they were originally presented with for each failing section. Both readers will evaluate the new answer(s), with conditional pass available as a possible recommendation.

Applied Project Exit Requirement

The capstone experience in this program option is a research project conducted in an applied setting. Students will use the skills and knowledge they have acquired in the program to conduct a project and produce a report for a "client" in the community (or elsewhere). Students may seek out their own project site or choose from among the community organizations with which the department already has relationships. Examples of potential projects include evaluating program effectiveness, assessing community needs, or designing training programs for employees.

This option is recommended for students who plan to enter the job market immediately after completion of the MA degree; would like to gain a better idea of the type of employment for which they are qualified with an MA in

sociology; and/or are already working in a setting amenable to a project of this nature.

Students must complete a minimum of 30 credit hours of approved graduate work in sociology and related disciplines, plus six hours of applied project credit, for a total of 36 credit hours.

Code	Title	Credits
SOC 8960	APPLIED PROJECT	6

Students will form an applied project committee that consists of:

- a committee chair from within the department
- a representative from the project site
- at least one other faculty member from the university with expertise or interest in the project

Prior to beginning the project, students must have their proposal formally approved by the project committee. Students must also have their final project report approved. While the project site representative must sign off on the proposal approval form, only the UNO faculty members will be responsible for approving the final project. Please refer to the graduate catalog's exit requirements for more detailed information.

Thesis Exit Requirement

This option is recommended for students who wish to pursue the PhD degree after completing their MA and/or who wish to gain research and writing experience through the thesis process.

Students must complete a minimum of 24 credit hours of approved graduate work in sociology and related disciplines, plus six hours of thesis credit, for a total of 30 credit hours.

Code	Title	Credits
SOC 8990	THESIS	6

Students will form a thesis committee of UNO faculty members who are knowledgeable about the thesis topic. The committee will consist of at least three members, all of whom must be graduate faculty, and at least one of whom must be a sociologist:

- a committee chair from within the department
- at least one additional member from within the department
- at least one outside member from another academic department

Prior to beginning the thesis, students must have their project formally approved by the thesis committee. Students must pass an oral defense structured around the thesis to complete the degree requirements. Please refer to the graduate catalog's exit requirements for more detailed information.

Total Credit Hours

Non-Thesis Option: 36

Applied Project Option: 36

Thesis Option: 30

Sociology Certificate

Department of Sociology & Anthropology, College of Arts & Sciences

Vision Statement

The graduate certificate in sociology is a flexible 18 credit hour program. It is ideal for educators and other degree-holding professionals who want to enhance their sociological knowledge and gain insight into our present-day world. It is designed to meet the needs of:

- High school educators who seek credentials to teach dual enrollment in sociology and are required to have 18 graduate credit hours in the discipline to be eligible;
- Part-time and full-time UNO graduate students in related fields;
- Professionals, especially those employed in social services and non-profits who engage in research/evaluation, who strive to complement and expand their knowledge of social inequality and its implications.###

This certificate can be earned independently of the MA in sociology or in conjunction with it.

Special Education

Degree Programs Offered

- Special Education, MS (p. 1418)

Certificate Offered

- Dyslexia Specialist Certificate (p. 1421)

SPED 8000 SPECIAL PROJECTS (1-3 credits)

This course is designed to allow graduate candidates to pursue independent study of a topic under the direction and guidance of a faculty member. Topics studied and the nature of the learning activities is mutually agreed upon by the candidate and instructor.

Prerequisite(s): Permission by the instructor. Not open to non-degree graduate students.

SPED 8016 MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS (3 credits)

This course explores the role that educators and school mental health professionals play in identifying the risk factors and warning signs of children and youth with mental health concerns. Students will understand the risk and protective factors at the individual, family, school, and community level as related to children and youth's mental health. The course will provide an overview of externalizing and internalizing disorders as well as school-based and community-based treatments and interventions. (Cross-listed with COUN 4010, COUN 8016, SPED 4010).

Prerequisite(s): Not open to non-degree graduate students.

SPED 8030 TEACHING STUDENTS WITH EXCEPTIONALITIES (3 credits)

This course is designed to describe the characteristics and learning styles of students with various exceptional learning needs. This course also is intended to provide candidates with a knowledge base for the foundation of special education including the basic procedural flow of referral, identification and instruction and strategies for modifying the learning environment and individualizing instruction.

Prerequisite(s): Graduate standing.

SPED 8046 WORKSHOP IN SPECIAL EDUCATION OR SPEECH-LANGUAGE PATHOLOGY (1-6 credits)

The purpose of this course is to provide workshops or special seminars in the area of special education and communication disorders. This course will prepare graduate candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. (Cross-listed with SPED 4040).

Prerequisite(s): Must have graduate status and permission.

SPED 8080 SPECIAL EDUCATION FIELD EXPERIENCE SEMINAR (1 credit)

This course is designed to support special education teacher candidates as they begin to put into practice those principles, skills, and procedures that will be presented in their advanced courses. This course will offer 5 seminars throughout the semester that will provide an overview of the field experience, an explanation of the Council for Exceptional Children (CEC) Professional Ethical Principles, knowledge related to direct explicit instruction, evidence-based intervention, the Individual Education Program, lesson planning, and progress monitoring.

Prerequisite(s): Admitted to the Accelerated Special Education Program. Not open to non-degree graduate students.

SPED 8100 RESEARCH PROJECTS (1-3 credits)

The purpose of this course is to allow candidates to participate in research activities other than those related to the thesis. Specific course content and type of research will be dependent on the nature of the intended research and must be approved by the supervising advisor and Department Chair prior to registration.

Prerequisite(s): Graduate standing and admitted into a special education or speech-language pathology program of study.

SPED 8120 HIGH INCIDENCE DISABILITIES (3 credits)

This introductory course is designed to examine characteristics of learners with high incidence disabilities and the impact of those characteristics on learning. The focus will be on the manifestation of disabilities including learning disabilities, behavior disorders, mild to moderate intellectual disabilities, speech and language disorders, attention-deficit hyperactivity disorders, and autism spectrum disorders. Response to intervention procedures, and how they align with special education processes will be taught.

Prerequisite(s): Graduate Standing.

SPED 8236 LANGUAGE DEVELOPMENT AND DISORDERS FOR TEACHERS (3 credits)

This course is designed to introduce the candidate to the nature and structure of language, current theories of language, normal first and second language development, language disorders, multicultural issues in language assessment, and contemporary classroom management of language deficits. The topics will be examined from an educational perspective to enhance the teachers knowledge of language and to facilitate classroom management of language deficits exhibited by exceptional children in grades pre-K through 12. (Cross-listed with SPED 4230).

Prerequisite(s): Admission to Graduate College

SPED 8250 LITERACY ASSESSMENT AND INTERVENTIONS FOR STUDENTS WITH DISABILITIES (3 credits)

This course is designed to provide graduate candidates skills and strategies for instructing students with high incidence disabilities, including dyslexia, that struggle to acquire literacy skills. Emphasis is placed on diagnosis and assessment of specific reading and writing difficulties to determine effective instructional strategies. Instructional strategies will address modifications directed at teaching oral language, reading, writing, and spelling skills.

Prerequisite(s): Admission to the Master of Science degree program in special education or permission of the instructor. Not open to non-degree graduate students.

SPED 8260 DYSLEXIA: FOUNDATIONS & SCIENCE OF READING (3 credits)

This course will address the critical components of language and literacy development and will introduce graduate students to the nature and needs of students with dyslexia. The course will focus on what dyslexia is, characteristics of children and youth with dyslexia and other learning disabilities, and the effects of dyslexia on learning to read and write. The course will also discuss important historical developments in the field, relevant laws, the science of reading, and policies as they relate to dyslexia.

Prerequisite(s): Admittance to Dyslexia certificate program/cohort OR Admittance to Special Education graduate program. Not open to non-degree graduate students.

SPED 8300 READINGS IN SPECIAL EDUCATION (1-3 credits)

Reading and discussion of current methodological developments, research, and innovations in special education.

Prerequisite(s): Admission to the graduate program in special education. Not open to non-degree graduate students.

SPED 8360 DYSLEXIA: LANGUAGE ESSENTIALS (3 credits)

This course is designed to address the neurobiological elements and origins of dyslexia. This includes its effect on language and literacy development, and variations in the processing and development of language, and literacy elements for students with and without dyslexia. This course will also address linguistic structures of and historical influences on the English language.

Prerequisite(s): Admittance to Dyslexia certificate program/cohort OR Admittance to special education graduate program AND SPED 8260. Not open to non-degree graduate students.

SPED 8580 INSTRUCTIONAL METHODS AND INTERVENTIONS IN SPECIAL EDUCATION (3 credits)

This course is designed to describe the various instructional methods that have been used successfully in supporting students with disabilities in a variety of settings. This course is intended to provide students with knowledge and evidence-based teaching strategies essential for modifying the learning environment and individualizing instruction for students with disabilities. In addition, teaching methods will focus on academic curriculum lesson planning, development of IEPs, selection of instructional methods and materials, explicit instruction, and universal design for learning (UDL).

Prerequisite(s): Admission into a Special Education Master's program and SPED 8120. Not open to non-degree graduate students.

SPED 8656 TRANSITION PLANNING (3 credits)

Curriculum oriented for teachers and related professionals to work with the career development and transition of individuals with disabilities within a multicultural and global society. Includes information for elementary through adulthood with emphasis on transition from high school to community living. (Cross-listed with SPED 4650).

Prerequisite(s): SPED 1500. Not open to non-degree graduate students.

SPED 8660 DYSLEXIA: ASSESSMENT FOR INSTRUCTIONAL PLANNING (3 credits)

This course is designed to address the principles and practices of effective assessment for students with dyslexia. This course will include the various purposes of assessment, the psychometric properties of high-quality assessment tools used to identify and support students with dyslexia, and important issues related to test administration. Graduate students will identify effective assessment tools appropriate for use with students with dyslexia, develop informal assessment procedures and plans, and interpret assessment data to design appropriate interventions for students with dyslexia.

Prerequisite(s): Admittance to Dyslexia certificate program/cohort OR Admittance to special education graduate program AND SPED 8260 & SPED 8360. Not open to non-degree graduate students.

SPED 8670 MATH INTERVENTIONS (3 credits)

The purpose of this course is to prepare graduate candidates to teach, co-teach or consult in the area of mathematics interventions. Graduate candidates will examine and apply the existing research in mathematics instruction for students with exceptional needs.

Prerequisite(s): Admission to the graduate program in Special Education. Not open to non-degree graduate students.

SPED 8690 DYSLEXIA: STRUCTURED LITERACY INSTRUCTION (3 credits)

This course is designed to address the principles and components of evidence-based literacy interventions for students with dyslexia. This will include the stages of literacy development, the characteristics and challenges of PK-12 students as they develop literacy skills, effective interventions in specific components of literacy, principles of structured literacy, direct instruction, and multisensory instruction, and the issues involved in designing comprehensive literacy interventions and programs for students with dyslexia.

Prerequisite(s): Admittance to Dyslexia certificate program/cohort OR Admittance to Special Education graduate program AND SPED 8260, SPED 8360 & SPED 8660. Not open to non-degree graduate students.

SPED 8700 SEMINAR IN SPECIAL EDUCATION (3 credits)

The seminar in Special Education is designed to be one of the very last courses taken by a master's degree candidate. Content covers a wide range of topics such as: 1) continuum of care; 2) educational and community service systems; 3) legislation; 4) family concerns; and 5) comparative special education. Each candidate develops a teaching module on one of the course topics, which is discussed and evaluated in class.

Prerequisite(s): Graduate standing.

SPED 8716 INTERACTIONS AND COLLABORATION (3 credits)

This course is offered to investigate the building blocks of collaboration. Effective interpersonal communication and collaboration skills are presented as the foundation necessary to build relationships among school personnel, families and community members. (Cross-listed with SPED 4710).

Prerequisite(s): Admission to Graduate College

SPED 8720 GRADUATE PRACTICUM IN SPECIAL EDUCATION (3 credits)

This graduate special education practicum course provides candidates with either inservice experience or placement in a school program for students with exceptionalities at an academic level commensurate with the candidate's desired level of the special education generalist endorsement (K- 6 or 7-12).

Prerequisite(s): Admission to the graduate program in the desired endorsement, completion of 30 hours of required course work, and permission. Not open to non-degree graduate students.

SPED 8730 ADVANCED GRADUATE PRACTICUM IN SPECIAL EDUCATION (3 credits)

This course provides candidates with a second semester of classroom experience teaching students with disabilities. This experience is for graduate candidates who are extending their endorsement. For students seeking an additional endorsement as a Special Education Generalist, this course would prepare them for endorsement in grades K-6 or 7-12. For students seeking an additional endorsement in Behavior Intervention Specialist, this course would prepare them for endorsement in grades PK-6 or 7-12.

Prerequisite(s): Admission to the graduate program in the desired endorsement and completion of SPED 8720, SPED 8830 or SPED 8840. Not open to non-degree graduate students.

SPED 8760 DYSLEXIA: PRACTICUM (3 credits)

This course is designed to integrate the knowledge and theoretical study of dyslexia, including assessment and intervention information, with the application of these components in authentic settings. In this course, students will apply the knowledge of dyslexia, the principles of effective assessment and intervention and implement evidence-based practices for students with dyslexia through a supervised practicum experience.

Prerequisite(s): Admittance to Dyslexia certificate program/cohort OR Admittance to Special Education graduate program. Not open to non-degree graduate students.

SPED 8790 DYSLEXIA: ADVANCED PRACTICUM (3 credits)

This course is designed as a continued practicum experience to integrate the knowledge and theoretical study of dyslexia over a longer-period of time (e.g., 20+ weeks), including assessment and intervention information, with the application of these components in authentic settings. In this course, students will apply the knowledge of dyslexia, the principles of effective assessment and intervention and implement evidence-based practices for students with dyslexia through an extended supervised practicum experience. This practicum experience is a required experience for students pursuing national certification through the Center for Effective Reading Instruction (CERI).

Prerequisite(s): Admittance to Dyslexia certificate program/cohort AND successful completion of SPED 8760. Not open to non-degree graduate students.

SPED 8806 SOCIAL AND EMOTIONAL DEVELOPMENT OF CHILDREN AND YOUTH (3 credits)

This course is designed to prepare teacher candidates and graduate candidates with the understanding of the psychological, biological and environmental factors that affect the social-emotional development of children and adolescents. Emphasis is placed on the interaction of these factors for children with exceptional learning needs and the implications for the learning environment. (Cross-listed with SPED 4800).

SPED 8810 RESEARCH METHODS IN SPECIAL EDUCATION (3 credits)

This course is designed to provide an examination of the theoretical approaches to conducting educational research, research design and analysis, and interpretation and evaluation of existing research in special education and related fields.

Prerequisite(s): SPED 8120 or permission from the instructor. Not open to non-degree graduate students.

SPED 8816 BEHAVIOR INTERVENTIONS AND SUPPORTS (3 credits)

This course introduces a variety of practical interventions that teachers may use to support the positive classroom behavior of all students within a tiered model. Universal, targeted, and individualized strategies are presented. (Cross-listed with SPED 4810).

SPED 8820 CHARACTERISTICS OF EMOTIONAL AND BEHAVIORAL DISORDERS (3 credits)

This course is designed to assess and examine the causes and characteristics of behavioral disorders, which constitute internalizing, externalizing, and pervasive developmental disorders. Extensive use of the case study method will be used.

Prerequisite(s): Admission to the Master of Science degree program in special education.

SPED 8830 GRADUATE PRACTICUM IN BEHAVIOR INTERVENTION SPECIALIST (3 credits)

This course provides candidates with either an in-service experience or placement in a school program in which the candidate works with students with emotional and behavioral disorders at an academic level commensurate with the candidate's desired level of endorsement (PK-9, or 7-12).

Prerequisite(s): Admission to the graduate program in special education with an emphasis in behavior intervention specialist, completion of 30 hours of the required coursework, and permission by the department. Not open to non-degree graduate students.

SPED 8840 ADVANCED PRACTICUM IN BEHAVIOR INTERVENTION SPECIALIST (3 credits)

This course provides candidates with additional experiences in working with students with disabilities who present challenging behaviors, including emotional disturbance and autism. This course is designed for graduate students who are already endorsed in special education.

Prerequisite(s): Behavior Intervention Specialist program and permission. Not open to non-degree graduate students.

SPED 8850 INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH EMOTIONAL AND BEHAVIORAL DISORDERS (3 credits)

The focus of the course will be on instruction and interventions that are effective for students with behavior disorders such as explicit instruction, social skills support, supporting executive functions, and cognitive strategy instruction.

Prerequisite(s): Graduate standing and successful completion of SPED 8820, not open to non-degree students.

SPED 8860 BEHAVIOR MODIFICATION (3 credits)

This course is designed to equip candidates with the skills necessary to assess, modify, and evaluate behavior in accordance with best practice and research-based approaches. In addition, this course will train candidates on how to conduct a functional behavioral assessment and create behavioral intervention plans in accordance with IDEA.

Prerequisite(s): Admission to the graduate program in special education. Not open to non-degree graduate students.

SPED 8870 AUTISM SPECTRUM DISORDERS: BEHAVIORAL SUPPORT AND INTERVENTIONS (3 credits)

This course is designed to provide information on the behavioral characteristics, instructional needs and necessary curriculum development specifically for children and youth with autism spectrum disorder (ASD).

Prerequisite(s): Admission to the graduate program in special education. Not open to non-degree graduate students.

SPED 8900 SPECIAL EDUCATION LAW (3 credits)

The purpose of this course is to research and explore legal and policy issues affecting special education within our schools. Case law will be examined to ensure effective special education programs for children and youth with disabilities. (Cross-listed with EDL 8900).

Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

SPED 8910 ASSESSMENT IN SPECIAL EDUCATION (3 credits)

This course provides an overview of measurement and evaluation concepts, strategies, and techniques that are appropriate for students with special needs. Graduate candidates will implement and analyze formal and informal assessments using a systematic and comprehensive approach. Emphasis is placed on those assessment strategies that yield objective data regarding individual learning characteristics that provide a basis for educational decision making.

Prerequisite(s): Graduate standing and SPED 8120

SPED 8920 SPECIAL EDUCATION LEADERSHIP (3 credits)

The purpose of this course is to examine special education administration and leadership issues. This course will focus on policies and procedures necessary to effectively provide leadership to programs for children and youth with disabilities.

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

SPED 8930 INCLUSION/COLLABORATION PRACTICUM (3 credits)

This course provides candidates with a practicum experience in the inclusion/collaboration specialty area with emphasis across PK-12 settings.

Prerequisite(s): Admission to the graduate program in inclusion/collaboration and permission by the department. Not open to non-degree graduate students.

SPED 8960 ADVANCED ASSESSMENT AND INTERVENTION (3 credits)

This course provides graduate candidates with in-depth practicum experiences in the administration and interpretation of standardized academic achievement measures, criterion-referenced tests, informal assessments, and progress monitoring with children experiencing learning difficulties. Emphasis is placed on utilizing assessment information in order to develop and monitor intervention plans.

Prerequisite(s): Admission to the Master of Science degree program in special education; SPED 8910, SPED 8646, SPED 8156, and SPED 8970; or have permission from the instructor. Not open to non-degree graduate students.

SPED 8970 INSTRUCTIONAL STRATEGIES (3 credits)

This course is designed to prepare graduate candidates with in-depth information regarding effective teaching strategies for students with high-incidence disabilities. Primary emphasis is placed on providing students with theoretical and practical foundations in the design and implementation of cognitive strategy instruction and the use of evidence-based practices and the selection and monitoring of individualized interventions.

Prerequisite(s): Admission to the Master of Science degree in special education, SPED 8120, SPED 8646 or equivalent or permission of the instructor. Not open to non-degree graduate students.

SPED 8980 PROFESSIONAL COLLABORATION (3 credits)

This course is designed to prepare candidates to work in collaboration with other professionals and parents to create a learning environment that enhances the potential for academic success and improvement of instructional practices. The focus will be on collaborative problem solving. (Cross-listed with TED 8850).

Prerequisite(s): Admission to Graduate College.

SPED 8990 THESIS (1-6 credits)

This course is intended for all graduate candidates in the Department of Special Education and Communication Disorders who are seeking a Master of Arts degree. The candidate is expected to generate and complete an independent research project under the guidance of a thesis advisor.

Prerequisite(s): Permission of Thesis Committee Chair and TED 8010. Not open to non-degree graduate students.

SPED 9140 ASSESSMENT AND TREATMENT OF AUTISM SPECTRUM DISORDERS (3 credits)

The purpose of this course is to familiarize students with the diagnosis, assessment, and treatment of autism spectrum disorders (ASD). (Cross-listed with PSYC 9140).

Prerequisite(s): Not open to non-degree graduate students.

Special Education, MS

Department of Special Education, College of Education, Health, and Human Sciences

Vision Statement

The mission of the Department of Special Education and Communication Disorders is to prepare dedicated practitioners, reflective scholars, and responsible citizens who are unique in their ability to facilitate, design, implement, and evaluate programs for individuals with disabilities. This is accomplished by creating opportunities for the acquisition and maintenance of knowledge, skills, and dispositions as prescribed by the Council for Exceptional Children, the Council on Academic Accreditation in Audiology and Speech-Language Pathology (for graduate program only), and state and federal regulations.

Graduate candidates follow a course of study with accompanying practical experiences that are grounded in learned society theory, research, evidence-based practice, and experience. Our candidates develop essential interpersonal skills that make them valued members of collaborative, interdisciplinary teams in a variety of settings. Thus, each program of study is designed to promote problem-solving skills that enable candidates to continue to broaden their skills and enhance their expertise throughout their professional career. These skills facilitate the recognition and integration of professional ethics with the individual needs and values of the communities they serve.

Program Contact Information

Shari DeVeney, PhD, Graduate Program Chair (GPC)
512 Roskens Hall (RH)
402.554.2993
sdeveney@unomaha.edu

Program Website (<http://www.unomaha.edu/college-of-education/special-education-communication-disorders/graduate/special-education.php>)

Other Program Related Information

Candidates seeking a master's degree in special education must meet the criteria for admission to the Graduate College and the department. Graduate-level hours taken as a non-degree student may be subsequently included in a program of study at the discretion of the graduate program committee and the dean for graduate studies. The department adheres to all restrictions on non-degree students. No student with non-degree status may enroll in a practicum course. Candidates completing the degree program meet the academic requirements for PK-6, K-6 or 7-12 endorsement by the Nebraska Department of Education. Candidates may complete practicum experiences at both the K-6 and 7-12 levels. One of these practicum experiences may be completed in the candidate's classroom. The other must be completed outside the candidate's classroom.

Initial Certification

The accelerated special education concentration (AC-SEP) is an accelerated program that is designed for individuals with a baccalaureate degree or higher who wish to earn an Initial Teaching Certificate issued by the Nebraska Department of Education to teach special education (K-6 or 7-12). Students who successfully complete the qualifications MS in special education with the accelerated special education concentration will be eligible for Nebraska certification in special education.

Initial certification requires completion of 100 hours of practicum experience.

Praxis I Core - Student must attempt the Praxis I Core while enrolled in the AC-SEP program. A passing score on the Praxis I Core is required to be fully certified by the Nebraska Department of Education.

Unclassified Students

Students who are not planning to pursue a program leading to a graduate certificate or a master's degree can be admitted to the special education program as unclassified students. Candidates holding a previous master's degree in education who are seeking additional teaching endorsements may wish to choose an unclassified status. Unclassified students are allowed to take courses for which they meet the prerequisite. Successful completion of graduate courses as an unclassified student does not obligate the department to accept those courses for credit toward the fulfillment of degree requirements. Formal advisement in an endorsement area is required.

Praxis II Content Test Information

All candidates seeking an endorsement in special education (special education generalist, 33-hour behavior intervention specialist and accelerated SPED) for the first time, are required to receive **a passing score** on the **Praxis II** content test in each endorsement area of their preparation prior to the endorsement being recommended. This link (<http://www.ets.org/praxis/ne/requirements/>) will take you to the ETS website page for the Nebraska Department of Education requirements, which lists the Nebraska requirements for each endorsement area.

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

- Fall: August 1
- Spring: December 1
- Summer: May 1

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** Include a formal written statement, at least one page in length, of why you want to pursue a master's degree in special education. Explain your current job/position, career goals and additional experiences with individuals with disabilities.
- **Letters of Recommendation:** Two letters of professional/academic recommendation are required. These recommenders should be able to speak to the graduate's undergraduate academic work, the applicant's potential to do graduate work, and/or the applicant's professional competence.
- Copy of teaching certificate (except for the Accelerated Program for Special Education concentration)
- All candidates must have completed TED 2300 Human Growth and Learning, SPED 1500 Introduction to Special Education or SPED 8030 Teaching Students with Exceptionalities (or an equivalent to any of these), and methods courses in reading and math.

Degree Requirements

Code	Title	Credits
Concentration		
Select an area of concentration:		
	Accelerated Program for Special Education	
	Behavior Intervention Specialist	
	Dyslexia Specialist	
	Special Education Generalist	

Exit Requirements

Once course work is completed candidates must successfully pass a comprehensive examination or write a thesis to receive a Master of Science degree.

Code	Title	Credits
	Comprehensive Examination	
SPED 8990	THESIS	6

All candidates should carefully review the Graduate College requirements for forming the Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of the thesis.

All candidates must complete 6 credit hours in SPED 8990 in order to receive a Master's of Science degree in special education.

Graduate-Level Practicums

All candidates must obtain the permission of their academic advisor prior to applying for and registering for practicums. All candidates who are adding an endorsement must complete one (or more) practicum experience(s) as part of their preparation. At least one of these experiences must be an all-day, 16-week experience in the endorsement area. **Applications will not be considered unless all materials are submitted by September 15 for spring practicum and February 1 for fall practicum.**

The department will issue a permit that allows the candidate to enroll in the appropriate practicum course. It is the candidate's responsibility to apply for the proper course. Professional seminars are required as part of the experience and attendance is mandatory.

Candidates may be removed from their placement at the request of the candidate, department, or school district/community agency.

SPED/COUN 8656	TRANSITION PLANNING
SPED 8820	CHARACTERISTICS OF EMOTIONAL AND BEHAVIORAL DISORDERS
SPED 8850	INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH EMOTIONAL AND BEHAVIORAL DISORDERS
SPED 8870	AUTISM SPECTRUM DISORDERS: BEHAVIORAL SUPPORT AND INTERVENTIONS

Or other course as approved by your advisor

7-12 Option:

SPED/COUN 8656	TRANSITION PLANNING
Select two of the following (3 hours out of the 6 hours required must be graduate only - 8xx0):	
SPED/COUN 8016	MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS
SPED 8820	CHARACTERISTICS OF EMOTIONAL AND BEHAVIORAL DISORDERS
SPED 8850	INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH EMOTIONAL AND BEHAVIORAL DISORDERS
SPED 8870	AUTISM SPECTRUM DISORDERS: BEHAVIORAL SUPPORT AND INTERVENTIONS

Or other course(s) approved by your advisor

Total Credits

36-39

A student can enroll only twice in each graduate course included on a plan of study. If the course is not successfully completed on the second attempt, the student will be dismissed from the program. An enrollment is defined as being enrolled in the course after the last day to withdraw via MavLINK and receive a 100% refund. The last day to withdraw will be stated in the current academic calendar. (<https://www.unomaha.edu/registrar/academic-calendar.php>) In addition to the Quality of Work Standards established by the Graduate College, students may only repeat a graduate level course on a plan of study one time in which they receive any grade, including "W" or "I".

Dyslexia Specialist Certificate

Department of Special Education, College of Education, Health, and Human Sciences

Vision Statement

This graduate certificate program aims to provide advanced training on dyslexia. The scope of this certificate program will provide students with a combination of advanced content and pedagogical knowledge about dyslexia and the science of reading, as well as supervised application opportunities during a practicum experience. This program will also support interested participants in preparing their application for national certification from the Center for Effective Reading Instruction (CERI).

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Fall 2024)

- Fall: March 1

Other Requirements

- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Statement of Purpose:** Include a formal written statement, at least one page in length, explaining why you want to obtain the dyslexia specialist certificate. Provide information regarding your current job/position, career goals and additional experiences with individuals with disabilities.

This certificate program is a 15-credit hour program with a set course sequence. There will be an option for a subset of students interested in applying for national certification to take one additional 3 credit hour practicum course to fulfill national certification standards. Students will take all courses in a prescribed sequence designed to introduce, scaffold, and reinforce content knowledge across courses. The scope and sequence of the program, and all course objectives, have been designed to align with the *Knowledge and Practice Standards for Teachers of Reading* published by the International Dyslexia Association.

Speech-Language Pathology, MS

Department of Special Education, College of Education, Health, and Human Sciences

Vision Statement

The mission of the Department Special Education and Communication Disorders is to prepare dedicated practitioners, reflective scholars, and

responsible citizens who are unique in their ability to facilitate, design, implement, and evaluate programs for individuals with disabilities. This is accomplished by creating opportunities for the acquisition and maintenance of knowledge, skills, and dispositions as prescribed by the Council for Exceptional Children, the Council on Academic Accreditation in Audiology and Speech-Language Pathology, and state and federal regulations.

Other Program Related Information

Program Description

The graduate program in speech-language pathology is designed to prepare speech-language pathologists for Nebraska teacher certification, state licensure, and certification by the American Speech-Language-Hearing Association.

The Master of Science (MS) program in speech-language pathology at University of Nebraska at Omaha is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (<https://caa.asha.org/>) (CAA) of the American Speech-Language-Hearing Association (<https://www.asha.org/>), 2200 Research Boulevard #310, Rockville, Maryland 20850, 800.498.2071 or 301.296.5700.

The next CAA re-accreditation on-site review will be in 2028.

The program also is accredited by the Nebraska Department of Education and the Council for the Accreditation of Educator Preparation (CAEP).

Fast Track Program

The Department of Special Education and Communication Disorders has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to six graduate hours toward the completion of their undergraduate program as well as the graduate program.

Program Specifics:

- This program is available for undergraduate students pursuing a Bachelor of Science in Education in communication disorders desiring to pursue a MS in Speech-Language Pathology (SLP) at UNO.
- Students must submit the departmental application to be considered for the Fast Track program.
 - Complete the department application in March of the junior year (no less than 60 undergraduate hours). Application requirements are:
 - Successfully completed CDIS 2420, CDIS 2550, CDIS 3450, CDIS 3460, CDIS 3370, CDIS 3390
 - 3.5 undergraduate GPA
 - Resume
 - Statement of Purpose (Please include the following in your response: Your aptitude and motivation for graduate study in speech-language pathology; your preparation for this field of study; your viewpoint on the value of diversity, equity, and inclusion in the field of speech-language pathology; your

academic plans or research interests; and why would UNO be a good intellectual fit for you?)

- If the departmental application is approved, students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses (for a total of six [6] graduate credit hours).
 - During the fall semester of the senior year, students will register for CDIS 8200 and CDIS 8560
 - During the spring semester of the senior year, students will register for CDIS 8500-1
- A minimum cumulative GPA of 3.0 is required for the graduate course work to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all the rights and privileges granted undergraduate status including financial aid.
- Formal application to the graduate program is required by January 15 of the student's senior year. The application fee will be waived, the applicant must contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does not guarantee admission to the graduate program.
 - Fast Track students must successfully complete their undergraduate BS degree with a minimum cumulative GPA of 3.5 and all graduate courses with a minimum of 3.0 or better, be in good standing, and complete formal graduate admission application to be considered for full admission into the speech-language pathology graduate program.
 - The official admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Fall 2024)

- Fall: January 15 for all application materials

Other Requirements

- A bachelor's degree in speech-language pathology or communication disorders; or if bachelor's degree in another field, must have completed the following undergraduate courses in communication disorders: Early Language Development CDIS 2420, Later Language Development CDIS 3460, Child Language Disorders CDIS 4750, Phonetics CDIS 3450, Articulation & Phonology CDIS 3430, Basic Audiology CDIS 3370, Aural Rehabilitation CDIS 3330, Hearing Science CDIS 3390, Intro to Professional Practice CDIS 4490, Principles of Intervention CDIS 4500, Anatomy & Physiology CDIS 2380, Neurophysiology CDIS 4470, Research Methods CDIS 4480, and a chemistry or physics, statistics, biological sciences (e.g., biology, human anatomy or physiology), social/behavioral sciences (e.g., psychology, sociology, anthropology or public health) courses.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** Address the following (not to exceed two pages):

- Please describe your aptitude and motivation for graduate study in speech-language pathology.
- Your preparation for this field of study.
- Your view point on the value of diversity, equity, and inclusion in the field of speech-language pathology.
- Your academic plans or research interests.
- Why would UNO be a good intellectual fit for you?
- **Letters of Recommendation:** Two letters from references who are familiar with your strengths and weaknesses in respect to academic work, and motivation to complete a graduate degree in speech-language pathology, and are competent to judge your probability of success in graduate school.
- **Resume**
- The program may conduct applicant interviews.

Degree Requirements

- In addition to satisfactory academic and clinical aptitude, candidates are expected to demonstrate Essential Skills and Abilities. These skills include academic and non-academic components necessary for graduate study and professional practice. Candidates must demonstrate skills and attributes in five areas: communication, motor, intellectual-cognitive, sensory-observational, and behavioral-social. These essential skills enable candidates to meet graduate and professional requirements as measured by state licensure and national certification. Candidates will review the Essential Skills and Abilities during orientation, mid-term of first semester and then on an as needed basis. (Council of Academic Programs in Communication and Sciences and Disorders, 2007).
- Candidates must successfully complete the following within the **first 30 days** of enrollment:
 - The Praxis I-CORE Academic Skills for Educators test per NDE requirements. Scores must be sent to UNO directly from ETS, using code RA6420.
 - A background check and Nebraska Adult and Child Abuse & Neglect Registry Release prior to enrollment and prior to each clinical field placement (externship). The background check must be conducted in the time frame and by the vendor determined by the College of Education, Health, and Human Sciences. The candidate is responsible for the costs associated.
 - A ten-panel drug screen prior to medical clinical field placement (externship). The drug screen must be completed in the time frame established by the program and results must be submitted directly to the program. The candidate is responsible for the costs associated.
- Academic integrity is expected for all interactions and requirements. This includes, but is not limited to: original work on exams, accountability and completion of requirements, maintenance of confidentiality for individuals and class discussions when appropriate, and accurate citation for original work. Plagiarism will result in an automatic failing grade for the assignment. Please refer to the UNO Academic Integrity Policy for more specific descriptions of academic integrity violations.
- Each candidate must take the Praxis II - Subject Assessment test. Scores must be submitted prior to applying for graduation. Scores must be sent to UNO directly from ETS, using code RA0174.

¹ CDIS 8500 (register three times)

² CDIS 8510 (Schools). Placements for this practicum is made as space permits.

Code	Title	Credits
Required Courses		
CDIS 8200	ADVANCED STUDY OF PEDIATRIC SPEECH SOUND DISORDERS	2

³ CDIS 8520 (Hospitals; Rehabilitation Centers). Placements for this practicum is made as space permits.

⁴ CDIS 8510 and CDIS 8520 each will be taken once for four credit hours each. Students must earn a grade of "B" or better in each of these courses, as students may not retake either course. Failure to achieve a grade of "B" or better in either course will result in automatic dismissal from the program. Withdrawal from 8510 or 8520 is contingent upon written permission of the advisor and current grade of B or better at the time of requested withdrawal. These varied practica are designed to provide the candidate with a wide range of clinical experiences with individuals across the age span, cultural backgrounds, cognitive levels, and disability categories.

*****All student clinicians need to earn a B or higher in order to pass externships. Externships may not be retaken.***

Exit Requirements

- Complete a minimum of 400 clinical clock hours.
- Successfully complete the Clinical Cumulative Evaluation.
- Completion of the Praxis II exam.

Non-Thesis Option

- Successfully complete the comprehensive exam.

Thesis Option

- Complete 6 credit hours of SPED 8990

Speech-Language Pathology Intervention Policy for Content and Clinicals

Every course/clinic assignment in the speech-language pathology program is connected to the Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC) along with the Council on Academic Accreditation Standards (CAA). CFCC and CAA standards are found in each course syllabus and must be successfully met for the course to count toward certification by the American Speech-Language-Hearing Association (ASHA). Please refer to ASHA's website for more information on CFCC and CAA standards (links below).

2020 Standards for the Certificate of Clinical Competence in Speech-Language Pathology

2017 Council on Academic Accreditation Standards for Graduate Programs

Graduate Intervention Policy (<https://www.unomaha.edu/college-of-education-health-and-human-sciences/special-education-communication-disorders/graduate/slp-intervention-policy.pdf>)

Essential Skills and Abilities

CDIS 8200 ADVANCED STUDY OF PEDIATRIC SPEECH SOUND DISORDERS (2 credits)

The purpose of this course is to expand student understanding and application of clinical practices for pediatric speech sound disorders with varying etiologies by building on concepts related to identification, assessment, and treatment introduced at the undergraduate level. Students will learn and apply relevant, theory-driven, and evidence-based practices related to pediatric speech sound disorder management. Assessment and treatment practices will be discussed along with their basis in theoretical perspectives related to motor learning, linguistics, and psycholinguistics. Speech production characteristics associated with cleft palate, childhood dysarthria, and childhood apraxia of speech will be discussed. Students will also address the speech-language pathologist's role in determining speech sound production differences relative to cultural-linguistic diversity and dialectical variations as well as navigate ethical considerations related to clinical decision making.

Prerequisite(s): Graduate standing in Speech-Language Pathology

CDIS 8240 LANGUAGE DISORDERS IN SCHOOL-AGE CHILDREN (3 credits)

This course focuses on the relationship between spoken and written language and its role in language-based learning disabilities in school-age students. It addresses the characteristics of language and reading impairments; the subtypes of these disorders including dyslexia; and the different diagnostic strategies, assessment tools, and intervention approaches used with them. Various models of language and reading as they relate to development and disorders will be reviewed.

Prerequisite(s): Graduate standing in Speech-Language Pathology and a course in later (school age) language development. Not open to non-degree graduate students.

CDIS 8310 ADVANCED AUDIOLOGY FOR THE SPEECH-LANGUAGE PATHOLOGIST (1 credit)

The purposes of Advanced Audiology for Speech-Language Pathologists are to ensure all graduate candidates possess fundamental knowledge in the area of audiology and aural rehabilitation. Candidates will competently complete basic audiological screening, and be competent in reading audiological evaluations, understanding and discussing types of hearing loss, and amplification. Instruction will introduce auditory skills, language development for children who are Deaf/hard-of-hearing, and aural rehabilitation programs for children and adults. Topics related to hearing loss including educational considerations and the Deaf culture will be covered. The course will also provide hands-on experiences with audiology-related and aural rehabilitation tasks a speech-language pathologist will encounter in a real-life work setting. These practical experiences will prepare students for encounters they will have in any work setting as a speech-language pathologist.

Prerequisite(s): Graduate standing in speech-language pathology

CDIS 8396 HEARING SCIENCE (3 credits)

This course is designed for undergraduate majors in speech-language pathology and audiology and for graduate candidates in education of the deaf/hard of hearing. The course will include basic terminology, anatomy and physiology of the hearing mechanism, acoustics and physics of sound, the processes of human hearing, elements of basic hearing measurements, psychophysics. This course will prepare speech-language pathology candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. (Cross-listed with CDIS 4390).

Prerequisite(s): Admission to Graduate College

CDIS 8410 MOTOR SPEECH DISORDERS (3 credits)

This course is designed to integrate background information from neurophysiology related to motor speech disorders (MSD). The term motor speech disorders refers to speech deficits and differences resulting from injury to the human nervous system. This course will focus on acquired movement-based disorders of speech production that impact one or more of the following subsystems of speech: respiration, phonation, resonance, and/or articulation, including the dysarthrias and apraxia of speech. This course will entail clinical description and characteristics of the impairments as well as on the psychosocial changes in life activities and participation of individuals who live with MSD.

Prerequisite(s): SPED 4470/CDIS 4470 or SPED 8470/CDIS 8470 or equivalent; graduate standing in Speech-Language Pathology. Not open to non-degree graduate students.

CDIS 8420 VOICE DISORDERS (3 credits)

The purpose of this course is to provide candidates the opportunity to study the disorders of voice in depth so that they are able to effectively orchestrate caseloads including this disorder type. Voice disorders of both organic and functional etiology will be studied. Candidates will have opportunities to conduct instrumental voice evaluation techniques. The disorders will be discussed to cover the range of topics including etiology, symptomology, assessment and diagnosis, prognosis, and treatment, both medical and non-medical.

Prerequisite(s): Graduate standing in Speech-Language Pathology. Not open to non-degree graduate students.

CDIS 8430 FLUENCY DISORDERS (3 credits)

This course examines the types and causes of rate, rhythm, and stress pattern differences as they relate to child, adolescent, and adult fluency disorders. Theory, current research, and contemporary practice information will constitute the foundation within which to address issues of identification, general assessment, differential assessment, prescription, and the implementation and evaluation of treatment strategies. The course is intended for graduate students in speech-language pathology.

Prerequisite(s): Graduate standing in Speech-Language Pathology. Not open to non-degree graduate students.

CDIS 8440 APHASIA (3 credits)

The purpose of this course is to provide the requisite knowledge and prepare future clinicians to assess, diagnose, and treat acquired language disorders associated with focal lesions as well degenerative processes to the left hemisphere. Following the World Health Organization - International Classification of Functioning, Disability and Health, known more commonly as ICF (WHO-ICF) framework, students will learn assessment, differential diagnosis as well as management of the aphasia syndromes and primary progressive aphasia. The course is designed to help future clinicians understand the theoretical bases and etiologies of acquired language disorders, the principles and best practices for assessment and intervention. After completing this course, students will understand how to evaluate different types and severities of aphasia and develop goals and plans for intervention based on individual assessment.

Prerequisite(s): Admission to the Speech-Language Pathology Graduate Program AND CDIS 8470/4470 (Neurophysiology). Not open to non-degree graduate students.

CDIS 8460 COGNITIVE-LINGUISTIC DISORDERS RELATED TO DEMENTIA (1 credit)

The purpose of this course is to provide the requisite knowledge and prepare future clinicians to assess, diagnose, and treat individuals with cognitive-linguistic impairments due to dementia, a general term for loss of memory, language, problem-solving and other thinking abilities that are severe enough to interfere with daily life. Following the World Health Organization - International Classification of Functioning, Disability and Health, known more commonly as ICF (WHO-ICF) framework, students will learn assessment, differential diagnosis as well as management of mild cognitive impairment as well as the different types of dementia. The course is designed to help future clinicians understand the theoretical bases and etiologies of neurocognitive degenerative disorders, the principles and best practices for assessment and intervention. After completing this course, students will understand how to evaluate different types and severities of dementia and develop goals and plans for intervention based on individual assessment.

Prerequisite(s): Admission to the Speech-Language Pathology Graduate Program AND CDIS 8470/4470 (Neurophysiology).

CDIS 8470 NEUROPHYSIOLOGY OF SPEECH AND LANGUAGE (3 credits)

The purpose of this course is to provide speech-language pathology graduate candidates an introduction to human neuroanatomy and neurophysiology of the speech, language and hearing mechanisms, across the lifespan. Emphasis is placed on developing an understanding of the neurophysiological underpinnings of human communication and its disorders. Ultimately, the course will prepare speech-language pathology graduate candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world.

Prerequisite(s): Graduate Standing Speech-Language Pathology Majors in the CDIS 4380 or equivalency. Not open to non-degree graduate students.

CDIS 8486 RESEARCH METHODS IN COMMUNICATION DISORDERS (3 credits)

This course will provide candidates with an introductory set of skills to interpret and evaluate research in communication disorders and closely related fields. In addition, this course will provide candidates with basic knowledge regarding research designs and analyses commonly used in communication disorders and related fields. The content addressed in this course will prepare candidates to judiciously evaluate evidence-based practice and apply the scientific method to clinical decision-making. It offers an opportunity to cultivate critical thinking skills imperative to becoming dedicated practitioners, reflective scholars, and responsible citizens who can adeptly meet the ever-evolving challenges of their profession.

Prerequisite(s): This course is designed for graduate and undergraduate students majoring in speech-language pathology and is a required course for speech-language pathology candidates.

CDIS 8490 COGNITIVE-COMMUNICATION DISORDERS RELATED TO RIGHT HEMISPHERE BRAIN DAMAGE & TRAUMATIC BRAIN INJURY (2 credits)

The purpose of this course is to provide the requisite knowledge and prepare future clinicians to assess, diagnose, and treat individuals with cognitive-communication impairments due to right hemisphere brain damage (RHD) and traumatic brain injury (TBI). Following the World Health Organization - International Classification of Functioning, Disability and Health, known more commonly as ICF (WHO-ICF) framework, students will learn assessment, differential diagnosis as well as management of cognitive-communication disorders related to right hemisphere damage and traumatic brain injury. The course is designed to help future clinicians understand the theoretical bases, etiologies, and the principles and best practices for assessment and intervention.

Prerequisite(s): Neurophysiology, CDIS 8470/4470 and Aphasia, CDIS 8440

CDIS 8500 BASIC CLINICAL PRACTICUM IN SPEECH-LANGUAGE PATHOLOGY (2 credits)

These courses are designed to provide the speech-language pathology candidate clinicians with diverse clinical experiences prior to full-semester clinical externships in the educational, and medical settings.

Prerequisite(s): Graduate standing in Speech-Language Pathology Program, completed any previous semester of 8500 with a B or above, currently maintain at least a 3.0 GPA overall. Permission from program faculty. Not open to non-degree graduate students.

CDIS 8510 EDUCATIONAL EXTERNSHIP IN COMMUNICATION DISORDERS (4 credits)

This course is designed to provide the speech-language pathology candidate with experiences of a clinical nature in educational settings. The purpose of the course is to advance the candidate's skills in the evaluation and management of communication and swallowing disorders.

Prerequisite(s): Successful completion of "Foundation Block" (CDIS 4550/8556; SPED 8030, 8120 or equivalent) and three semesters of SPED 8500/CDIS 8500 unless otherwise indicated. Permission required. Not open to non-degree graduate students.

CDIS 8520 MEDICAL EXTERNSHIP IN COMMUNICATION DISORDERS (4 credits)

This course is designed to provide the speech-language candidate with experiences of a clinical nature in medical settings. The purpose is to advance the candidates' skills in the evaluation and management of communication and swallowing disorders.

Prerequisite(s): Three semesters of SPED 8500/CDIS 8500 unless otherwise indicated plus permission. Not open to non-degree students.

CDIS 8530 SEMINAR IN SPEECH-LANGUAGE PATHOLOGY (3 credits)

This course is designed to provide intensive discussion of research or problems of current professional interest based on current literature in speech-language pathology. This course will prepare candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world.

Prerequisite(s): Graduate standing

CDIS 8540 AUTISM SPECTRUM DISORDER (2 credits)

This course is designed to familiarize candidates with the features of, and interventions for, individuals with autism spectrum disorder. The course will emphasize evidence-based practices when utilizing various methodologies for supporting social and communication skills.

Prerequisite(s): Co-requisite: CDIS 8560. Admission to the Graduate College. Not open to non-degree graduate students.

CDIS 8556 SPECIAL NEEDS STUDENTS FROM DIVERSE COMMUNITIES (3 credits)

The purpose of this course is to study the impact of cultural and linguistic diversity on communication, learning, and behavior. The contrast between what is considered 'normal' language / learning development and in the presence of culturally and linguistically diverse (CLD) P-12 students will receive special emphasis.

CDIS 8560 AUGMENTATIVE & ALTERNATIVE COMMUNICATION (2 credits)

This course is designed to introduce students to the nature and process of augmentative and alternative communication (AAC), current theories and models of AAC, basic elements of AAC systems, and contemporary AAC clinical practices and principles. Topics will be examined from educational and rehabilitation perspectives as they relate to assessment, prescription, implementation and evaluation. The course will emphasize practical solutions in AAC for children and adults using both high technology and other less-complex communication strategies. Students will explore high-tech, low-tech, and no-tech options of AAC and gain knowledge of and experience with assessment of clients for AAC needs, prescription of an appropriate level of AAC, practice with implementing various AAC systems, and on-going evaluation of the AAC system's effectiveness with clients.

Prerequisite(s): Graduate standing in Speech-Language Pathology program

CDIS 8570 DYSPHAGIA (3 credits)

This course is designed to integrate background information from neurophysiology to dysphagia. The term dysphagia refers to swallowing disorders resulting from congenital birth anomalies (i.e., cleft palate, cerebral palsy, etc.) as well as acquired injury to the central nervous system (i.e., stroke, head injury, etc.). This course will introduce candidates to bedside, radiographic, and endoscopic assessment procedures as well as direct, indirect, and medical management techniques of dysphagia. Additionally, this course will provide clinical description and characteristics of swallowing impairments as well as on the psychosocial changes in life activities and participation of individuals who live with dysphagia.

Prerequisite(s): SPED 4470/CDIS 4470 or equivalent, graduate standing in speech-language pathology. Not open to non-degree graduate students.

CDIS 8590 EARLY INTERVENTION: BIRTH TO FIVE (2 credits)

This course is designed to provide candidates with knowledge about supporting communicative disorders in young children, and their families, within a multicultural and global framework. It will cover assumptions underlying current approaches to the evaluation and treatment in the developing child.

Prerequisite(s): CDIS 4420 or equivalent. Admission to Graduate Program in Speech-Language Pathology. Not open to non-degree graduate students.

CDIS 8680 SPEECH-LANGUAGE GLOBAL INTERPROFESSIONAL CLINICAL EXPERIENCE (3 credits)

The purpose of this course is to help students develop cultural competency and a practice of cultural humility in providing culturally responsive care. Students will expand their knowledge and skills through cross-cultural experiences focusing on the aspects of speech language therapy treatment. A major focus of the class will be exploration of the role of speech language therapy and collaboration with other health care providers working in an underserved population. Students will engage in cultural exploration providing assessment, therapy and recommendations.

Prerequisite(s): Students will apply for the course. Selected students will be given permission for the course. Not open to non-degree graduate students.

Urban Studies

Degree Programs Offered

- Urban Studies, MS (p. 1427)

Certificates Offered

- Urban Leadership Certificate (p. 1428)

UBNS 8000 SEMINAR IN URBAN STUDIES (3 credits)

This course provides an interdisciplinary overview of the forces influencing and influenced by urbanization and urbanism. (Cross-listed with GEOG 8830)

Prerequisite(s): Not open to non-degree graduate students.

UBNS 8020 RACE, ETHNICITY, AND AMERICAN URBAN CULTURE (3 credits)

This course explores two central themes, race and ethnicity, which have played a dominant role in the shaping of American society and American culture. (Cross-listed with BLST 8020).

Prerequisite(s): BLST 1000, BLST 1100, or permission by the instructor.

UBNS 8060 INTRODUCTION TO URBAN PLANNING (3 credits)

This course is an introduction to the development of urban planning as it has shaped and reacted to major trends in U.S. history. It provides students with major themes and traditions in the field of planning and includes planning practice, planning procedures and methods and contemporary issues in the field.

Prerequisite(s): Not open to non-degree graduate students.

UBNS 8200 COMMUNITY ORGANIZING & SOCIAL CHANGE (3 credits)

This course focuses on various theories and applications of organizing communities and neighborhoods to effect change. Of particular interest is the role of engaging citizens in improving their communities. (Cross-listed with PA 8200).

Prerequisite(s): Not open to non-degree graduate students.

UBNS 8400 URBAN LEADERSHIP (3 credits)

UBNS 8400 is an introduction to leadership in an urban setting. The course focuses on both theoretical and applied cases and strategies of effective urban leadership in a diverse society. Topics include leadership strategies for community engagement, neighborhood development, and nonprofit leadership. Profiles of urban leaders provide an applied setting for the course.

Prerequisite(s): Graduate student standing, but open to non-degree seeking students with Bachelor's degree; open to certificate students.

UBNS 8500 URBAN POLICY (3 credits)

Seminar on urban policies and policymaking. Attention is given to various current urban issues and the policy options surrounding them. Policy theories, policy processes, and the institutions of policymaking in cities are covered. Topics of focus include policies related to policing, economic development, land use, transportation, education, poverty, housing, and ordinances.

Prerequisite(s): Graduate student standing, but open to non-degree seeking students with Bachelor's degree; open to certificate students

UBNS 8820 COMPARATIVE URBAN STUDIES (3 credits)

Emphasis is upon contrasting the cities of the developed and developing areas of the world

Prerequisite(s): Not open to non-degree graduate students.

UBNS 8940 DIRECTED RESEARCH IN URBAN STUDIES (3 credits)

The course is intended for advanced graduate students in urban studies or geography. It is especially suited for those in-career students who have had their internships waived and who might profit more by in-depth research on a problem of urban studies rather than additional classroom courses. (Cross-listed with GEOG 8840).

Prerequisite(s): Completed 9 graduate hours in Urban Studies. Permission from the School. For Geography students, GEOG 8126 (Urban Geography) or permission from the School.

Urban Studies, MS

School of Public Administration, College of Public Affairs & Community Service

Vision Statement

Our graduates are social entrepreneurs, urban thinkers and agents of change. The Master of Science in urban studies is the degree for individuals desiring to make a difference in urban areas. UNO's urban studies program is a professional degree that trains leaders to critically analyze urban problems and engage residents in the creation of innovative solutions to conditions in the human community, built environment and natural systems.

Other Program Related Information

Fast Track Program

The Master of Science in urban studies program has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following who wish to pursue a MS in urban studies:
 - BS in emergency management
 - BS in black studies
 - Bachelor of Multidisciplinary Studies.
- Students must be within at least 30 undergraduate credits yet to complete their undergraduate degree. Exceptional students who do not meet this requirement may be considered.
- Students must have a minimum undergraduate GPA of 3.5.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their undergraduate advisor to register for the graduate courses.
- Students must consult with the urban studies advisor prior to enrollment in one of the courses listed below.
- A minimum cumulative GPA of 3.5 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the MS in urban studies program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - For this program, if students maintain at least a grade of B+ in courses taken, they will be recommended for admission to the MS in urban studies.
 - The admit term must be after the completion term of the undergraduate degree.

The following courses may be taken under the Fast Track program

- BLST 8886:Seminar on Black Leadership
- UBNS 8000:Seminar in Urban Studies
- UBNS 8060:Introduction to Urban Planning
- UBNS 8020:Race, Ethnicity and American Urban Culture**
- UBNS 8200:Community Organizing and Development**
 - PA 8010:The Public Economy (Must have completed or be concurrently enrolled in UBNS 8000)

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- The general prerequisite for admission to the urban studies program is a four-year bachelors' degree with a minimum grade point average of 3.0 in the junior and senior years combined (last 50-60 credit hours). Under extenuating circumstances an average below 3.0 will be considered.
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a pre-determined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
- Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Statement of Purpose: A two-page typed essay on how the MS in urban studies will further the applicant's career objectives must be included with the application for admission
- Resume
- Letters of Recommendation: Two letters of recommendation are required

Degree Requirements

Table with 3 columns: Code, Title, Credits. Rows include Required Courses (UBNS 8000, PA 8120, PA 8010, UBNS/BLST 8020, GEOG 8056, UBNS 8200) and Electives.

Urban studies (UBNS) is an interdisciplinary field. The UBNS strives to expose students to courses taught by faculty in the School of Public Administration who have expertise in urban studies, as well as faculty in other academic units. Students select five elective courses with the approval of the UBNS chair from the following list based on interests in the human community, built environment or natural systems. This is subject to change depending on course availability, and prospective as well as current students should check the program's website periodically for updates approved by the director of urban studies. Electives are intended to give students knowledge and skills that prepare them to manage projects and organizations. Electives currently include, but are not limited to the following:

Table with 3 columns: Code, Title, Credits. Rows include various courses like PA 8030, CACT 8326, ENVN/CACT 8316, GEOG 8126, GEOG 8166, GEOG 8210, GEOG/GEOL 8616, PHHB 8360, PSCI 8015, PA 8436, PA/BIOL/GEOG 8826, PA/AVN 8896, SOC 8100, SOC 8146, SOC 8200, SOC 8746, UBNS 8400, UBNS 8060, UBNS 8500, UBNS 8820, Exit Requirement (PA 8990), and a Total Credits row.

Internship
Students who have not had at least two years full-time professional experience in the public or nonprofit sector (experience must have been in the sector of the student's primary future career interest) are encouraged to complete an internship. The internship may be given as a supervised course of three credit hours as part of the 37 hours required in the urban studies program. The internship is taken following completion of preparatory coursework as determined by the director of the urban studies program.

Urban Leadership Certificate
School of Public Administration, College of Public Affairs & Community Service; Department of Black Studies and Department of Political Science, College of Arts and Sciences; School of Communication, College of Communication, Fine Arts and Media

Vision Statement
The graduate certificate in urban leadership is an interdisciplinary certificate program that provides current and future urban leaders with the skills and training necessary to lead and communicate in diverse urban settings effectively and ethically.

Writing, MFA

Writer's Workshop Department, College of Communication, Fine Arts & Media

Vision Statement

The MFA in Writing is a two-year program of focused instruction for creative writers who are committed to a literary career. The program comprises four 16-week distance writing seminars and five 10-day, conference-style Nebraska residency sessions. The seminars and residencies are integrated to help those who need to hone their writing and critical thinking in order to participate competitively in the wider domain of contemporary American letters. In a two-year course of study, the student earns 60 credit hours toward a Masters of Fine Arts degree in one of six genres: fiction, creative nonfiction, poetry, young adult, playwriting, or screenwriting.

Program Contact Information

Kevin Clouter, Program Coordinator
221 Weber Fine Arts Building (WFAB)
402.554.5987
kclouter@unomaha.edu

Program Website (<http://www.unomaha.edu/unmfaw/>)

Other Program Related Information

- The MFA in Writing is low-residency.
- Upon acceptance, a \$500 non-refundable deposit is required to hold the student's place in the program. This deposit is applied toward the first residency's meals and lodging fee.

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024, and Fall 2024)

- Fall: June 1
- Spring: November 1

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf>) must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** A one- to two-page single-spaced self-assessment of your background in writing, reasons for wanting to enter the MFA program, and your goals as a writer.
 - For **fiction, creative nonfiction, poetry, and young adult** include any other experience you have in the wider community of literature (e.g. organizing or participating in workshops, attending conferences, working for literary magazines, etc.).
 - For **playwriting and screenwriting**, include any specific experience as it pertains to screenwriting or to full-length plays, one-act plays, and ten-minute plays, as well as any experience in other areas of film or theatre.
- **Writing Sample:** A manuscript representing your best work in the genre track (fiction, creative nonfiction, poetry, young adult, playwriting, or screenwriting) for which you are applying.

- 15 pages of poetry
- 15-20 pages of playwriting
- 30 pages of screenwriting
- 30-40 pages of fiction, creative nonfiction, or young adult
- **Letters of Recommendation:** Two letters of recommendation from persons who can attest to your ability to complete a course of graduate study, the ability to work independently, and/or the quality of your prior literary achievements.

NOTE: Your statement of purpose and your writing sample must be submitted in your online application in .pdf format. Manuscripts should be in 12-point typeface with 1" margins. Prose should be double-spaced; poetry may be single-spaced. Playwriting submissions should follow standard playwriting format; screenwriting submissions should follow standard screenwriting format. Material in genres other than the one in which you are applying will not be read. For specific information, as well as current residency dates for the program, please consult the program website (<https://www.unomaha.edu/college-of-communication-fine-arts-and-media/writers-workshop/mfa-program/>).

Degree Requirements

PATHWAY 1 Traditional MFA in Writing

Currently enrolled and new students are automatically enrolled in this pathway, unless otherwise approved.

PATHWAY 2 Partial Substitution of Credit Hours Already Earned

Students who have successfully completed graduate-level coursework at UNO or any accredited institution can reduce costs by requesting that up to 18 hours of previously earned credit be applied to the UNO MFA in Writing degree. Subject to individual approval.

PATHWAY 3 Partial Substitution of Credit Hours Earned Through Additional Coursework

Students have the option to enroll in a limited number of approved courses offered online or on any University of Nebraska campus and have those credits substituted for required MFA degree credit hours. Subject to individual approval.

Required Residency Session

Code	Title	Credits
MFAW 8700	RESIDENCY SESSION	3

Register for one 3-hour session per semester (4 semesters)

Residencies are conference-style sessions (10 days) consisting of workshops of student writing, craft and theory classes, individual conferences with mentoring faculty, and readings.

Writing Options (choose one)

Seminars

Seminars are semester-long (16 weeks) supervised distance studies in writing, during which the student corresponds regularly with a faculty mentor on the work that was proposed during the preceding residency session. At least four times a semester, the student must submit creative and critical writing to the faculty mentor. The mentor will respond with revisions, suggestions for further readings, and discussion. Students must register for one 12-hour seminar session per semester for four semesters.

Code	Title	Credits

MFAW 8820	POETRY SEMINAR	12
-----------	----------------	----

Exit Requirements

MFAW 8710	GRADUATING RESIDENCY SESSION	0
-----------	------------------------------	---

Total Credit Hours: 60

MFAW 8700 RESIDENCY SESSION (3 credits)

A ten-day colloquium presenting lectures, classes, workshops, readings and individual conferences with seminar faculty. Taken 4 times, the Residency Session ends one seminar session and begins the next. The session affords students intensive contact with faculty and peers before returning to their writing projects.

Prerequisite(s): Admission to MFA in Writing program. Permission of the Program Director. Not open to non-degree graduate students.

MFAW 8710 GRADUATING RESIDENCY SESSION (0 credits)

The Graduation Residency Session is the final residency for MFA students who have successfully completed their seminars and creative thesis. In the ten days of this residency, students will give a graduating lecture, "mentor" new students in their first residency, and give a reading from their thesis. A graduating ceremony will cap their activities during this session.

MFAW 8720 ENRICHMENT RESIDENCY SESSION (2 credits)

An eight-day creative writing symposium-style course presenting lectures, workshops, readings and individual conferences with faculty. The Enrichment Residency affords advanced writing students additional intensive contact with published and apprentice writers to reinforce and enrich their life-long commitment to the art of writing and to the continuing development of their craft.

Prerequisite(s): MFA Program Director's permission. Must have completed MFA/PhD with writing emphasis. Writers with MA in English and emphasis in writing, or writers with an extensive background in writing may also be considered. Not open to non-degree graduate students.

MFAW 8820 POETRY SEMINAR (6-12 credits)

An individualized course in poetry writing. Taken 4 times, the required seminar offers practical instruction in writing and criticism. Using distance technology, student and instructor work through independent projects designed to sharpen the student's writing skills. Each student will compose both original poetry and critical analyses of poetry by other writers preparatory to submitting an original book-length manuscript of publishable quality by the final semester.

Prerequisite(s): Acceptance into the MFA in Writing Program and permission of the MFA Program Coordinator. Not open to non-degree graduate students.

MFAW 8830 FICTION SEMINAR (6-12 credits)

An individualized course in fiction writing. Taken four times, the seminar offers practical instruction in fiction writing and criticism. Using distance technology, student and instructor work through individualized writing projects designed to sharpen the student's writing skills to a professional edge. Students will compose both original fiction and critical analyses of fiction preparatory to submitting an original book-length manuscript of publishable quality by their final semester's work.

Prerequisite(s): Permission of Program Director. Not open to non-degree graduate students.

MFAW 8840 NONFICTION SEMINAR (6-12 credits)

An individualized course in nonfiction writing. Taken 4 times, the seminar offers practical instruction in writing and criticism. Students will compose both original nonfiction and critical analyses of nonfiction.

Prerequisite(s): Permission of Program Director. Not open to non-degree graduate students.

MFAW 8850 PLAYWRITING AND SCREENWRITING SEMINAR (6-12 credits)

An individualized seminar in playwriting or screenwriting. Taken 4 times, the seminar offers practical instruction in playwriting/screenwriting and criticism. Using distance technologies, student and instructor work through independent projects designed to sharpen the student's writing. Each student will compose both original scripts and critical analyses of scripts by other playwrights or screenwriters preparatory to submitting at minimum a full-length script, a one-act script, and a ten-minute script by the final semester.

Prerequisite(s): Acceptance into the MFA in Writing Program and permission of the MFA Program Coordinator. Not open to non-degree graduate students.

MFAW 8870 ENRICHMENT SEMINAR IN WRITING (6 credits)

An advanced writing semester for those who want assistance launching a new writing project or have a degree in one genre and want to pursue study of another, such as fiction, creative nonfiction, poetry, young adult, playwriting, or screenwriting.

Prerequisite(s): Corequisite: MFAW 8720. Permission from Program Coordinator required.

Graduate Certificates

- Advanced Writing (p. 1223)
- Applied Behavior Analysis (p. 1363)
- Artificial Intelligence (p. 1123)
- Biomedical Science (p. 1039)
- Business for Bioscientists (p. 1040)

Ancient Mediterranean Studies Minor

Departments of History, English, Religious Studies, Philosophy, Political Science, and Art and Art History

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Courses Available for the Minor (listed by department)

Code	Title	Credits
Art and Art History		
ART 8736	CLASSICAL ART HISTORY	3
ART 8756	LATE ROMAN AND BYZANTINE ART HISTORY	3
ART 8936	SPECIAL TOPICS IN ART HISTORY (Gender and Sexuality in Antiquity, The Hellenistic World, Pop Antiquity, Ancient Egypt)	3
English		
ENGL 8800	SEMINAR: TOPICS IN ENGLISH LANGUAGE AND LITERATURE	3
History		
HIST 8826	MESOPOTAMIA AND PRE-ISLAMIC PERSIA	3
HIST 8846	ALEXANDER THE GREAT AND THE MACEDONIAN ORIGIN	3
HIST 8916	TOPICS IN HISTORY (Roman Republic, Ancient Rome AD 284-641, The Roman Family, Roman Paganism)	3
HIST 9100	SEMINAR IN HISTORY (Argead Macedonia to Philip II, Greek Religion & Mystery Cults)	3
HIST 9200	COLLOQUIUM (Greek Military History; Race, Gender and Sex in Ancient Greece, Ancient Roman Religion, The Age of Caesar, Ancient Rome: the Urban Experience, Imperial Rome)	3
Philosophy		
PHIL 8900	READINGS IN PHILOSOPHY	3
Political Science		
PSCI 8316	CLASSICAL POLITICAL THOUGHT	3
Religion		
RELI 8900	READINGS IN RELIGION (Qumran and the Dead Sea Scrolls, Women and the Bible)	1-6

Anthropology Minor Requirements

Code	Title	Credits
Select nine hours from the following		9
ANTH 8216	CULTURAL ANTHROPOLOGY	
ANTH 8226	NORTH AMERICAN ARCHAEOLOGY	
ANTH 8236	ETHNOMEDICINES OF THE AMERICAS	
ANTH 8246	MEDICAL ANTHROPOLOGY	
ANTH 8256	ENVIRONMENTAL ANTHROPOLOGY AND NATIVE PEOPLES OF THE GREAT PLAINS	
ANTH 8276	DECOLONIZING NATIVE AMERICAN HEALTH	
ANTH 8926	SEMINAR IN ANTHROPOLOGY	
ANTH 8980	INDEPENDENT STUDY IN ANTHROPOLOGY	

If a student has taken the 4000 level equivalent of an 8xx6 course, the 8xx6 course cannot count toward the minor.

Art History Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Black Studies Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Business Administration Minor

Graduate students may complete a graduate minor in business administration. The minor requires the approval of the MBA advisor, completion of the MBA foundation courses, and the completion of a minimum of nine (9) graduate credit hours of BSAD courses, at least six (6) of which are in BSAD courses open only to graduate students (8000-level or higher), excluding courses which are foundation courses for any degree program. BSAD 8060 cannot be counted toward the minor. A grade of "B" (3.0 on a 4.0 scale) must be earned in each course counting toward the minor. All hours counting toward the minor must be earned at UNO.

Criminology and Criminal Justice Minor Requirements

Code	Title	Credits

CRCJ 9150	SPECIAL TOPICS IN CRIMINAL JUSTICE RESEARCH
CRCJ 9160	SEMINAR IN COMMUNITY-BASED CORRECTIONS
CRCJ 9170	SEMINAR ON INSTITUTIONAL CORRECTIONS
CRCJ 9200	SEMINAR ON VIOLENT CRIME AND CRIMINAL BEHAVIOR

Total Credits**9**

Economics Minor

The Department of Economics offers a graduate minor to students pursuing a graduate degree in other programs. The requirement for the minor is that the student completes a minimum of three graduate courses (9 hours) in economics with grades of "B" or better (3.0 on a 4.0 scale) in each course. The courses to be taken for the minor are to be approved by both the student's advisor in the student's major subject and by the Graduate Program Chair (GPC) of economics.

English Minor

With the approval of the student's advisor and the English graduate program committee, a student may include a minor as part of their plan of study. A minor requires nine (9) hours of approved coursework.

French Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Geography Minor Requirements

Code	Title	Credits
GEOG 8000	HISTORY AND PHILOSOPHY OF GEOGRAPHY	3
Additional geography courses selected in consultation with the graduate program chair		6
Total Credits		9

German Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Gerontology Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

History Minor

(9 hours)

To earn a graduate minor in history, a student must complete 9 hours of graduate-level history courses with the grade of a "B" (3.0 on a 4.0 scale) or better.

Management Information Systems Minor

(9 hours)

The Management Information Systems area offers a graduate minor to students pursuing graduate degrees in other programs at UNO. The requirements for the minor are that the student completes a minimum of three graduate courses (nine semester hours ending in 0), receiving a grade of "B" (3.0 on a 4.0 scale) or better in each course. The courses to be taken for the minor are to be approved by the student's advisor in the student's major subject and by the Graduate Program Chair (GPC) in management information systems. For declaring a MIS minor, a minimum TOEFL score of 550 is required and a GPA of 3.0 or better in current graduate program are required.

Mathematics Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours of MATH or STAT prefixed courses, with at least a B average. At least six of the nine graduate credit hours must be from courses ending in zero. Note that MATH 8880 cannot be used to satisfy the requirements of a mathematics minor. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Medieval/Renaissance Studies Minor

NOTE: The preceding list does not include the various departmental numbers for graduate directed readings courses, even though these highly individualized reading and research classes may be applied to the requirements for the minor. This list also does not include the various special topics courses in individual departments which may be taken for graduate credit.

Native American Studies Minor

(9 hours)

The minimum requirement for the graduate minor is 9 credits taken at the 8000 and/or 9000 levels.

A student's program will be planned in consultation with the Native American Studies (NAS) Graduate advisor, who will hold graduate faculty status. This cross-disciplinary minor will include choices among approved graduate lecture courses, seminars, and directed reading courses.

Three (3) hours of thesis can be counted toward the minimum requirement of 9 credits, but only in the graduate advisor and the thesis committee members agree that the topic is related to Native American studies.

Students must complete each course of their 9-credit minor with a grade of "B" (3.0 on a 4.0 scale) or better.

No comprehensive exam will be required after completion of the three required courses for the minor.

Political Science Minor

Students outside of political science may earn a political science minor in conjunction with their graduate program by taking 9 credit hours/3 seminars in political science. At least 3 credit hours/1 seminar must include a political science subfield of: American government, political theory, comparative politics, or international relations. Students must earn a B or above in all political science courses taken for the minor. Students must apply for this minor through the proper procedures.

Code	Title	Credits
Required: At least 3 credit hours/1 seminar in the political science subfields listed below:		3
PSCI 8040	SEMINAR IN AMERICAN GOVERNMENT AND POLITICS	
PSCI 8250	SEMINAR IN INTERNATIONAL RELATIONS	
PSCI 8300	SEMINAR IN POLITICAL THEORY	
PSCI 8500	SEMINAR IN COMPARATIVE POLITICS	
Electives: The remaining 6 credit hours/2 seminars may include any remaining seminars listed above as well as those listed below:		6
PSCI 8100	SEMINAR IN POLITICAL ECONOMY	
PSCI 8120	SEMINAR IN LEADERSHIP	
PSCI 8150	SEMINAR IN CONSTITUTIONAL LAW	
PSCI 8200	SEMINAR IN FOREIGN POLICY AND NATIONAL SECURITY	
PSCI 8220	SEMINAR ON INTERNATIONAL LEADERSHIP AND STRATEGY	
PSCI 8920	SEMINAR IN SPECIAL TOPICS IN POLITICAL SCIENCE	

Religious Studies Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Sociology Minor Requirements

Accounting (ACCT)

Accounting Graduate Courses

ACCT 8016 ADVANCED FINANCIAL ACCOUNTING (3 credits)

Specialized issues in financial accounting. Principal topics include business combinations and consolidated financial statements, partnership accounting, translation of foreign currency financial statements, accounting for foreign currency denominated transactions, and SEC reporting requirements. (Cross-listed with ACCT 4010).

Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3030 and ACCT 3040 with a grade of "C+" (2.33) or better in each. Not open to non-degree graduate students.

ACCT 8046 ADVANCED FEDERAL INCOME TAXATION (3 credits)

Analysis of various advanced tax issues, such as accounting methods, property transactions, and formation, operation, and liquidation of C-corporations, S-corporations and partnerships. (Cross-listed with ACCT 4040).

Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3020 with a grade of "C" (2.0) or better. Not open to non-degree graduate students.

ACCT 8050 FINANCIAL STATEMENT ANALYSIS (3 credits)

Using the financial statement and supplemental information as inputs, this course utilizes a systematic fundamental analysis approach across a variety of decision-making contexts to understand how a business generates value for shareholders.

Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 3040 with a "C" (2.0) or better. Not open to non-degree graduate students.

ACCT 8066 ADVANCED MANAGERIAL ACCOUNTING (3 credits)

Intensive study and discussion of the responsibilities of managerial accountants in the decision-making process in organizations and the consequences of the manner in which they use cost accounting information in decision-making. (Cross-listed with ACCT 4060).

Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3050 with a grade of "C" (2.0) or better. Not open to non-degree graduate students.

ACCT 8076 GOVERNMENTAL/NONPROFIT ACCOUNTING AND AUDITING (3 credits)

Study of budgeting, accounting, financial reporting and auditing in governmental and nonprofit entities. (Cross-listed with ACCT 4070).

Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3030 with a grade of "C" (2.0) or better. Not open to non-degree graduate students.

ACCT 8080 CURRENT TECHNOLOGY USE IN ACCOUNTING (3 credits)

This course will cover tools and methods that facilitate business analytic techniques, with a focus on current and emerging technology. This may include tools for databases, spreadsheets, robotic process automation, data mining, artificial intelligence, and others.

Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. Successful completion of BSAD 8110, ACCT 2020, or equivalent. Not open to non-degree graduate students.

ACCT 8090 INFORMATION SYSTEMS AUDITING (3 credits)

This course presents a broad overview of the professional practice of information systems audit, emphasizing control and audit procedures related to security along with Information Technology General Controls. Content studied will include professional standards, guidelines, and procedures promulgated by the Information Systems Audit and Control Association.

Prerequisite(s): ACCT 4080 with a grade of C (2.0) or better. Admission to MAcc or MBA program or permission of instructor. Not open to non-degree graduate students.

ACCT 8210 FINANCIAL ACCOUNTING THEORY (3 credits)

The development of accounting, current accounting theory and present controversies and suggested theory and practice.

Prerequisite(s): ACCT 3040. Not open to non-degree graduate students.

ACCT 8220 GRADUATE TOPICS IN INCOME TAXATION (3 credits)

This course will discuss commonly encountered tax issues such as gift and estate taxation, income taxation of estates and trusts, and exempt organizations, as well discuss current events while introducing the student to practitioner-oriented research publications.

Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 4040 or ACCT 8046 with a "C" (2.0) or better, or concurrent enrollment in ACCT 4040 or ACCT 8046. Not open to non-degree students.

ACCT 8230 MANAGEMENT ACCOUNTING ISSUES (3 credits)

An analysis of information to assist managers in determining successful strategies, developing those strategies into plans and controlling operating activities to achieve strategic goals.

Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 3050 or BSAD 8210 with a "C" (2.0) or better. Not open to non-degree graduate students.

ACCT 8250 SEMINAR IN ACCOUNTING (3 credits)

A study of a specific area within the accounting discipline. Possible areas include: auditing, financial, managerial, systems and tax. May be repeated, but no area can be taken more than once.

Prerequisite(s): Admission to MAcc or MBA programs or permission of instructor. Not open to non-degree students.

ACCT 8260 FEDERAL TAX RESEARCH AND PLANNING (3 credits)

This course is intended to provide students with a working knowledge of the primary and secondary tax resources used in practice to solve tax problems, as well as basic tax planning concepts.

Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 4040 or ACCT 8046 with a "C" (2.0) or better. Not open to non-degree students.

ACCT 8280 SEMINAR IN ACCOUNTING INFORMATION SYSTEMS (3 credits)

This course examines current topics in Accounting Information Systems (AIS), how AIS contributes to business effectiveness and ineffectiveness, and the interaction between AIS and human decision-makers.

Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. Successful completion of BSAD 8110, ACCT 2020, or equivalent. Not open to non-degree graduate students.

ACCT 8290 ADVANCED FINANCIAL AUDITING (3 credits)

This course will provide students with an intense study of financial auditing in accordance with generally accepted auditing standards.

Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 4080 with a grade of "C" (2.0) or better.

ACCT 8900 INDEPENDENT RESEARCH (1-3 credits)

This is an independent research course in which the student completes a focused project, typically individual research, under faculty supervision to supplement graduate study in a specific area within the Accounting discipline.

Prerequisite(s): Completed contract and permission needed from director of MAcc program. Not open to non-degree graduate students.

ACCT 8910 SPECIAL TOPICS IN ACCOUNTING (3 credits)

A variable content course with accounting topics based on student and faculty interest. May be repeated to a maximum of six (6) hours.

Prerequisite(s): Admission to MAcc program and permission of instructor. Not open to non-degree graduate students.

Anthropology (ANTH)

Anthropology Graduate Courses

ANTH 8216 CULTURAL ANTHROPOLOGY (3 credits)

Cultural Anthropology is the sub-discipline of Anthropology that systematically considers cultural diversity (similarities and differences) in all known human societies. The scope of cultural anthropology is one of the broadest in the social sciences and includes the study of subsistence strategies and economies, kinship and social organization, political organization, religion, gender, language, expressive arts, human-environment relationships, and globalization. (Cross-listed with ANTH 4210).

Prerequisite(s): ANTH 1050 or permission of Instructor

ANTH 8226 NORTH AMERICAN ARCHAEOLOGY (3 credits)

This course explores more than 20,000 years of Native American culture and lifeways in North America. Indigenous peoples faced numerous challenges throughout this vast and diverse continent. Hunters, gatherers, fishers, and horticulturalists adapted to all regions of North America. Students will be introduced to a range of archaeological concepts, methods and theoretical perspectives central to learning about this rich heritage of American archaeology. (Cross-listed with ANTH 4220).

Prerequisite(s): ANTH 1050 or permission of instructor

ANTH 8236 ETHNOMEDICINES OF THE AMERICAS (3 credits)

An anthropological approach to the study of the cultural systems of specific American ethnomedicines (traditional medicines) of North, Central and South America. For each ethnomedicine, the historical context, philosophy, practice, therapeutics, and utilization will be examined to understand how and why each ethnomedicine has survived despite tremendous extermination pressure. (Cross-listed with ANTH 4230).

Prerequisite(s): ANTH 1050 or permission of the instructor.

ANTH 8246 MEDICAL ANTHROPOLOGY (3 credits)

Medical anthropology is the cross-cultural study of human culture, health and illness. Using multiple theoretical perspectives, this course examines how cultural, social, environmental, and biological factors interact to produce patterns of health and illness in past and present human societies. (Cross-listed with ANTH 4240)

Prerequisite(s): Junior standing or the permission of the instructor

ANTH 8256 ENVIRONMENTAL ANTHROPOLOGY AND NATIVE PEOPLES OF THE GREAT PLAINS (3 credits)

Environmental anthropology seeks to understand the interrelationships between human societies and their biophysical and social environments. This course introduces students to basic concepts and theories used by anthropologists to study environmental influences upon both past and present Native American societies on the North American Great Plains. Particular attention will be given to the rapid and dramatic environmental changes that continue to challenge Native Americans in the Great Plains today. (Cross-listed with ANTH 4250)

ANTH 8276 DECOLONIZING NATIVE AMERICAN HEALTH (3 credits)

This course will utilize an interdisciplinary lens to interrogate Native American health and wellness grounded in the decolonizing theoretical and methodological tools drawn from Medical Anthropology and Native American Studies. Topics covered will include: Health Disparities, Federal Indian Health Policy, Historical Trauma, Medical Mistrust, Traditional Healing, Food Sovereignty and Research Ethics. (Cross-listed with ANTH 4270, NAMS 4270, NAMS 8276).

ANTH 8926 SEMINAR IN ANTHROPOLOGY (3 credits)

This course reviews research and writing in an area of current interest in the field of anthropology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with ANTH 4920).

Prerequisite(s): Graduate standing or permission of instructor

ANTH 8946 ARCHAEOLOGICAL FIELD METHODS (3 credits)

This course introduces students to the field methods of scientific archaeology. These field methods include map reading, use of satellite and aerial photographs, instrument survey and mapping, pedestrian survey or reconnaissance, site survey data collection, identification of artifacts (stone tools, ceramics, etc.) and ecofacts (animal remains, macrobotanicals, etc.), systematic artifact collection and documentation, soil probes and coring methods, GPS-based mapping, excavation methods, and data recording. Additional topics include laboratory methods (artifact and ecofact analysis, interpretation, and documentation). This field course ultimately focuses upon the use of empirical data to test or evaluate our interpretations of past human behavior. (Cross-listed with ANTH 4940).

ANTH 8980 INDEPENDENT STUDY IN ANTHROPOLOGY (1-3 credits)

This course is guided reading or independent research in special topics in Anthropology under the supervision of a member of the Anthropology faculty. This course is designed primarily for the student interested in topics not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated once for credit.

Prerequisite(s): Permission of the instructor. Not open to non-degree graduate students.

Architectural Engineering (AREN)

Architectural Engineering Graduate Courses

AREN 8000 ARCHITECTURAL ENGINEERING GRADUATE SEMINAR (1 credit)

Literature Review, reading and evaluation of technical publications concerned with theory and/or experimental data in various areas of Architectural Engineering, attendance at Architectural Engineering Graduate Project and Team Design presentations, preparation of the Master of Architectural Engineering graduate project proposal, assignments related to improving written and oral communication skills.

AREN 8010 GRADUATE DESIGN PROJECT I (3 credits)

Requires a professionally written report and oral presentation that demonstrates both mastery of the subject and a high level of writing and oral communication skills. Perform a detailed investigation in the option area of the master of architectural engineering degree. Students are permitted to enroll in this course twice. Those who fail to earn a passing grade after enrolling in this course a second time will be referred to the AE Graduate Committee, and may result in termination of their program of graduate studies.

Prerequisite(s): AREN 8000 or AE 8000; AREN 1010, AE 4010, AREN 4020, AE 4020 or CIVE 314; permission. Not open to non-degree graduate students.

AREN 8020 GRADUATE DESIGN PROJECT II (1 credit)

Second of two-course capstone design project for the MAE degree. Requires a professionally written report and oral presentation that demonstrates both mastery of the subject and a high level of writing and oral communication skills.

Prerequisite(s): AREN 8010 or AE 8010; permission. Not open to non-degree graduate students.

AREN 8030 INTERDISCIPLINARY TEAM DESIGN PROJECT I (4 credits)

This course is the first semester of the capstone design sequence in architectural engineering. Develop and design the electrical, lighting, mechanical, and structural systems for a building, from programming through design development phase, as an interdisciplinary team effort.

Prerequisite(s): (Acoustics/Mechanical option) AREN 4150 or AE 4150, AREN 4300 or AE 4300; (Electrical/Lighting option) AREN 4250 or AE 4250, AREN 8220 or AE 8220; (Structural option) CIVE 444. Not open to non-degree graduate students.

AREN 8040 INTERDISCIPLINARY TEAM DESIGN 2 (3 credits)

Is the second semester of the capstone design sequence in architectural engineering. Develop and design the electrical, lighting, mechanical, and structural systems for a building, from the design development phase through construction documents, as an interdisciplinary team effort. This course is intended to be taken the semester following AREN 8030/AE 8030.

Prerequisite(s): AREN 8030 or AE 8030. Not open to non-degree graduate students.

AREN 8050 INTERNSHIP IN ARCHITECTURAL ENGINEERING (3 credits)

This course requires participation in a full time summer internship associated with an Architectural Engineering related entity. The course includes weekly assignments and a final presentation designed to create interaction between the AE entity and the intern associated with the business side of the entity. General topics include Business Plans, Marketing, Finance and Budgets, Contacts, Legal issues and professionalism.

Prerequisite(s): Not open to non-degree graduate students.

AREN 8060 ARCHITECTURAL ENGINEERING PROFESSIONAL PRACTICE I (3 credits)

Investigation of issues related to the integration of building design processes with professional architectural engineering practice. Aspects of building design project finance, budgets, contracts, legal issues, professional licensure, and professional responsibility. The perspective of life-cycle costing. Professional ethics will be thoroughly integrated with all course topics.

Prerequisite(s): ISMG 2060 or CONE 2060.

AREN 8070 ARCHITECTURAL ENGINEERING PROFESSIONAL PRACTICE II (3 credits)

Continuation of investigation of issues related to the integration of building design processes with professional architectural engineering design practice. Building design specifications, estimating, bidding, building construction contract negotiations, building design project management, project team personnel management, project risk, and key regulatory measures.

Prerequisite(s): ISMG 2060; AREN 8060 or AE 8060

AREN 8080 APPLIED EXPERIMENTAL DESIGN AND STATISTICAL ANALYSIS (3 credits)

Overview of advanced experimental design methods and statistical analysis techniques. Application of these to the planning, execution, analysis, and description of research in architectural engineering.

Prerequisite(s): STAT 3800

AREN 8090 SUSTAINABLE BUILDING DESIGN (3 credits)

Integrates building design with the principles of minimum resource use, energy conservation, and healthy indoor environments.

Prerequisite(s): CIVE 341 and (AREN 3100, AE 3100, AREN 8410 or AE 8410). Not open to non-degree graduate students.

AREN 8110 INDOOR AIR QUALITY ENGINEERING (3 credits)

Indoor air quality, codes, standards, HVAC equipment, commissioning, operation, maintenance, investigation, and remediation.

Prerequisite(s): AREN 3100 or AE 3100

AREN 8120 BUILDING CONTROL AND AUTOMATION SYSTEMS (3 credits)

Fundamental concepts of building control theory and automation. Building control: state-variable plant and closed-loop system representation, time and frequency response, stability, root-locus methods and design of building control systems. Automation: thermostats, dampers, valves, direct digital control, control of air handling units, terminal units, primary building systems, supervisory control and system optimization, communication systems, BACnet, and DDC system design and implementation.

AREN 8140 BUILDING ENERGY III: ADVANCED BUILDING ENERGY SYSTEM MODELING (3 credits)

Advanced Analysis, Modeling, Dynamics and Optimization of Building Energy Systems. Be familiar with Engineering Equation Solver (EES) Programming; Be able to build models for Air Handling Unit Systems and Vapor Compression Cycle Equipment; Be able to analyze building operating efficiency and identify faulty operating conditions; Be able to conduct retrofit energy efficiency analysis and feasibility study.

Prerequisite(s): AREN 3100 or AE 3100; AREN 4120 or AE 4120; or instructor permission.

AREN 8150 BUILDING ENERGY SIMULATION AND PERFORMANCE CONTRACTING (3 credits)

Integrated approach to deliver energy improvement retrofit projects that provide economical and ecological benefits. Proficiency in EnergyPlus or DOE-2 and in retrofit cost estimation will be attained and integrated into an engineering economic analysis. Partnering configurations, contracts, financing, and measurement and verification. Concepts applied to a practical class project.

AREN 8170 THEORY AND APPLICATION OF THERMAL SYSTEMS MEASUREMENT (3 credits)

Analysis, theory, and methods of instrumentation for thermal system energy consumption measurement and scientific research testing. Emphasis placed on sensors, transducers, and error analysis.

Prerequisite(s): STAT 8805 or equivalent.

AREN 8180 INDOOR AIR QUALITY DESIGN (3 credits)

Engineering approach to indoor air quality design. Topics include modeling and calculation methods to predict and design for acceptable indoor air quality.

Prerequisite(s): (AREN 3120 or AE 3120) and (AREN 4110, AE 4110, AREN 8110 or AE 8110)

AREN 8206 LIGHTING II: THEORY, DESIGN & APPLICATION (3 credits)

Design and analysis of lighting systems; the emphasis is on the integration between the lighting design process and the technical foundations for building lighting; topics include design criteria; lighting design procedures, lighting modes and subjective effects; calculation tools. Lab sessions include photometric measurements and computer applications. (Cross-listed with AREN 4200).

Prerequisite(s): AREN 3200 or AE 3200

AREN 8210 LIGHTING III: ADVANCED DESIGN PRACTICE (3 credits)

Design and analysis of lighting for outdoor sports, floodlighting and interior applications; economic analysis; modeling algorithms; advanced photometrics.

Prerequisite(s): AREN 8206 or AE 8206.

AREN 8220 ELECTRICAL SYSTEMS FOR BUILDINGS II (3 credits)

Power systems analysis and design, integration of electrical system components into functional, safe, and reliable power distribution systems for commercial and industrial facilities. Per Unit Analysis, Fault Analysis, Power Quality, Grounding, Overcurrent Protection Coordination, Complete power system design.

Prerequisite(s): AREN 3220 or AE 3220

AREN 8230 LIGHT SOURCES (3 credits)

Fundamental science and principles of light generation in modern electric light sources; characteristics that influence applications of light sources.

Prerequisite(s): AREN 8206 or AE 8206.

AREN 8240 LIGHTING METRICS (3 credits)**AREN 8250 DAYLIGHTING (3 credits)**

Use of natural light in building design. Solar position, sky luminance, distribution models, daylighting equipment, calculation methods, and psychological concepts. Extensive use of computer modeling and scale models.

Prerequisite(s): AREN 4200, AE 4200, AREN 8206 or AE 8206

AREN 8260 BUILDING COMMUNICATION SYSTEMS (3 credits)

Integration of voice, data and video systems into overall building design. Topics include: scalability, wireless systems; interference; project management; current industry standards and protocols.

Prerequisite(s): AREN 3220 or AE 3220. Not open to non-degree graduate students.

AREN 8306 ADVANCED NOISE CONTROL (3 credits)

Characterization of acoustic sources; use and measurement of sound power and intensity; sound-structure interaction; acoustic enclosures and barriers; muffling devices; vibration control; and active noise control. (Cross-listed with AREN 4300).

Prerequisite(s): AREN 3300 or AE 3300

AREN 8330 ADVANCED ARCHITECTURAL ACOUSTICS (3 credits)

Advanced study of the behavior of sound in rooms. Design of acoustical spaces; physical and computational modeling; measurement techniques; and introduction to sound reinforcement in rooms.

Prerequisite(s): AREN 3300 or AE 3300

AREN 8350 ELECTROACOUSTICS (3 credits)

Electrical-mechanical-acoustical circuit analogies; transducers, loudspeakers, microphones, and accelerometers; directivity; calibration techniques; and sound reinforcement systems in rooms.

AREN 8426 HEALTHCARE DESIGN AND CONSTRUCTION (3 credits)

Introduction to the design and construction of healthcare facilities. Healthcare regulations and standards, infection control, interim life safety measures, code requirements, medical equipment selection and coordination, healthcare design and construction techniques, and best practices will be addressed. Provides guidance in preparation for the Certified Healthcare Constructor credential offered by the American Healthcare Association. (Cross-listed with AREN 4420, CNST 842, CNST 442).

Prerequisite(s): Senior or graduate standing

AREN 8510 MASONRY AND TIMBER DESIGN (3 credits)

Masonry as a structural material, unreinforced masonry design, reinforced masonry design, state-of-the-art assessment methods for existing masonry structures, timber as a structural material, timber design.

Prerequisite(s): CIVE 440 and CIVE 441 or equivalents

AREN 8600 SMART BUILDING SENSORS AND PROGRAMMING (3 credits)

Principles of modeling, interfacing, and signal conditioning of sample building sensors, and acquisition and analysis of data utilizing engineering programming language such as LabVIEW. Overview of current sensing technology and control in buildings.

Prerequisite(s): CIST 1400

AREN 8626 MEMS SENSORS DYNAMICS (3 credits)

Study of the dynamics of Microelectromechanical system (MEMS) beam-structures. Modeling principles and data analysis from different types of MEMS will be explained along with deep theoretical and experimental investigation of nonlinear MEMS dynamics. Learn to conduct experiments using state-of-the-art MEMS characterization tools. (Cross-listed with AREN 4620).

Prerequisite(s): Instructor Permission

AREN 8800 GRADUATE SEMINAR IN ARCHITECTURAL ENGINEERING AND CONSTRUCTION (1 credit)

The objectives of this course are to broaden student knowledge on engineering topics, improve presentation and professional skills, as well as learn about professional development resources available on campus. To pass the course, a student must attend a minimum of 15 Durham School Graduate Student Seminars, MAE project presentations, and/or MS/PhD thesis presentations in the College of Engineering. The student must also present one seminar within the Durham School Graduate Student Seminar series, prior to the final oral examination. All MS and PhD graduate students in architectural engineering must enroll within their first 3 semesters of matriculation.

Prerequisite(s): Not open to non-degree graduate students.

AREN 8920 INDIVIDUAL INSTRUCTION IN ARCHITECTURAL ENGINEERING (1-3 credits)

Individual instruction in Architectural Engineering at the graduate level in a selected area, under the supervision and guidance of an Architectural Engineering faculty member.

AREN 8940 SPECIAL TOPICS IN ARCHITECTURAL ENGINEERING (3 credits)

Special topics in Architectural Engineering at the graduate level that are not yet covered in other courses in the Architectural Engineering curriculum.

Prerequisite(s): Permission.

AREN 8950 INDIVIDUAL INSTRUCTION IN ARCHITECTURAL ENGINEERING (1-3 credits)

Individual instruction in Architectural Engineering at the graduate level in a selected area, under the supervision and guidance of an Architectural Engineering faculty member.

AREN 8990 MASTER'S THESIS (1-10 credits)

Masters Thesis.

Prerequisite(s): Admission to Architectural Engineering masters degree program and permission of major advisor. Not open to non-degree graduate students.

AREN 9160 BUILDING ENERGY SYSTEMS MODELING, CONTROL, AND OPTIMIZATION (3 credits)

Modeling, control and optimization of the secondary building energy systems; building envelope, room comfort zones, air handling units, cooling and heating water loops.

Prerequisite(s): AREN 4100, AE 4100, AREN 8120 or AE 8120

AREN 9180 COMPUTATIONAL FLUID DYNAMICS MODELING OF INDOOR ENVIRONMENTS (3 credits)

Application of computational fluid dynamics software to modeling of indoor environments. Topics include turbulence modeling, boundary conditions, natural and forced convection flows, species transport, and fire modeling.

Prerequisite(s): AREN 4110, AE 4110, AREN 8116 or AE 8116

AREN 9200 COLOR THEORY (3 credits)

Theories of color vision; theoretical and mathematical basis for chromaticity, color temperature, color rendering metrics, color matching functions, and color spaces; spectral weighting functions; measurement of color.

Prerequisite(s): AREN 4200, AE 4200, AREN 8206 or AE 8206

AREN 9210 CURRENT RESEARCH IN ILLUMINATING ENGINEERING (3 credits)

Examination of the most current research in illuminating engineering. Study of experimental methodologies and research practices. Analysis of technical papers from current lighting journals.

Prerequisite(s): Graduate standing and permission of instructor.

AREN 9220 BEHAVIORAL SCIENCES FOR LIGHTING RESEARCH (3 credits)

Overview of experimental design methods and statistical analysis techniques, specifically as these are applied to the planning, execution, analysis and description of lighting experiments.

AREN 9300 CURRENT TOPICS IN ARCHITECTURAL ACOUSTICS (3 credits)

A review of current topics in architectural acoustics. Subjects may include objective versus subjective measures in performance spaces, electronic enhancement of rooms, advanced computational modeling techniques, and auralization.

Prerequisite(s): AREN 8330 or AE 8330

AREN 9970 RESEARCH OTHER THAN THESIS (1-6 credits)

Supervised non-thesis research and independent study.

AREN 9980 SPECIAL TOPICS (1-3 credits)

Advanced topics in architectural engineering not covered in other 9000 level courses.

AREN 9990 DOCTORAL DISSERTATION (1-24 credits)

(1-24 credits, max 55)

Prerequisite(s): Admission to doctoral degree program and permission of supervisory committee chair

Art (ART)

Art Graduate Courses

ART 8006 SPECIAL SEMINARS IN ART EDUCATION (1-3 credits)

A series of intensive courses in the history and theory of art education designed specifically for elementary and secondary school art teachers. These courses are scheduled as special seminars or workshops according to purpose. (Cross-listed with ART 4000)

ART 8316 ADVANCED SCULPTURE (3 credits)

Advanced work in area of student's choice with facilities for oxyacetylene welding, arc welding and wood working. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 4310)

ART 8416 ADVANCED PAINTING (3 credits)

Advanced instruction in oil painting permits students the time and environment to work and develop individually. Emphasis on developing cohesive body of work as continuation from work done in Intermediate painting. Knowledge of contemporary painting integral to painting practice. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 4410)

ART 8516 ADVANCED TECHNIQUES IN PRINTMAKING (3 credits)

This course allows students to develop their skills in both lithography and intaglio and the color processes for each printmaking technique. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 4510)

ART 8616 ADVANCED CERAMICS (3 credits)

This course will consist of advanced work on the potter's wheel, casting and preparations in glaze composition, as well as loading and firing of a high-fire kiln. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 4610)

ART 8736 CLASSICAL ART HISTORY (3 credits)

This course is a study of painting, sculpture, architecture and minor arts of the classical world beginning with Cycladic art and including Minoan, Mycenaean, Greek, Etruscan and Roman art through 300 A.D. Lab fee required. (Cross-listed with ART 4730)

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 8756 LATE ROMAN AND BYZANTINE ART HISTORY (3 credits)

A study of painting, sculpture and architecture of the Eastern Roman Empire from the founding of Constantinople, and of Western Europe from the time of Constantine to the dissolution of the Western Roman Empire. Lab fee required. (Cross-listed with ART 4750)

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 8836 ITALIAN RENAISSANCE ART HISTORY (3 credits)

A study of painting, sculpture and architecture in Italy during the 14th, 15th and 16th centuries. Lab fee required. (Cross-listed with ART 4830)

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 8856 BAROQUE AND ROCOCO ART HISTORY (3 credits)

This course is a study of painting, sculpture and architecture in Europe during the 17th and 18th centuries. Lab fee required. (Cross-listed with ART 4850)

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 8886 MODERN ART I (ART OF EUROPE AND THE AMERICAS, 1850-1920) (3 credits)

A study of the most significant developments in European art and architecture dating from the early Modern period and examined in varied contexts (artistic, religious, political, economic, etc.). (Cross-listed with ART 4880)

ART 8896 MODERN ART II (ART OF EUROPE AND THE AMERICAS, 1918-1968) (3 credits)

This course explores the major artistic movements and artists active in Europe and the Americas between the end of WWI and the Vietnam Era circa 1968. (Cross-listed with ART 4890)

ART 8906 CONTEMPORARY ART HISTORY SINCE 1968 (3 credits)

This course introduces contemporary visual arts in a global context from 1968 to the present with topics of discussion including art, aesthetics, politics, gender and sexuality, race and economics. (Cross-listed with ART 4900)

ART 8910 INDEPENDENT STUDY IN ART HISTORY (3 credits)

Independent research under the direct supervision of the sponsoring faculty member, generally involving the writing of a paper. The topic of the research and the expectations for credit should be jointly agreed upon in writing by the student and the faculty member at the beginning of the semester.

Prerequisite(s): Permission of instructor and graduate standing.

ART 8936 SPECIAL TOPICS IN ART HISTORY (3 credits)

These illustrated lecture courses deal with a limited topic in the field of art history. The course may be coordinated with an external event such as an exhibition, publication or study trip. Lab fee required. (Cross-listed with ART 4930)

Prerequisite(s): ART 2050 or ART 2060 or instructor permission.

Athletic Training (ATHT)

ATHT 8110 ATHLETIC TRAINING TECHNIQUES (2 credits)

Overview course including basic components of the athletic training profession including the prevention, recognition, evaluation and immediate care of athletic injuries. Medical terminology, tissue healing, taping procedures, and professional considerations will be covered.

Prerequisite(s): Admission to the Master of Arts in Athletic Training. Not open to non-degree graduate students.

ATHT 8120 EMERGENCY MANAGEMENT OF INJURY AND ILLNESS (2 credits)

The purpose of this course is to prepare students to respond to emergent conditions that affect patients involved in physical activity. Students will learn to recognize the signs and symptoms of acute injury and illness, assess patients using evidence-based methods, apply appropriate treatments, make appropriate referral decisions, and implement effective prevention strategies to reduce the risk of injury and illness.

Prerequisite(s): Admission to the Master of Arts in Athletic Training program. Not open to non-degree graduate students.

ATHT 8130 THERAPEUTIC INTERVENTIONS I (2 credits)

This course will cover the pathophysiology of musculoskeletal injuries as well as the theory, physiology and application of physical agents used in the treatment of these injuries. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.

Prerequisite(s): Not open to non-degree graduate students.

ATHT 8230 THERAPEUTIC INTERVENTIONS II (2 credits)

This course will introduce students to the use of basic theories and principles of athletic injury rehabilitation including therapeutic exercise. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.

Prerequisite(s): ATHT 8130/HEKI 8130. Not open to non-degree graduate students.

ATHT 8240 ORTHOPEDIC ASSESSMENT I (2 credits)

The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the lower extremity. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the foot, ankle, lower leg, knee, thigh and hip. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.

Prerequisite(s): Admission to the Master of Arts in Athletic Training Program. Not open to non-degree graduate students.

ATHT 8250 CLINICAL PRACTICUM IN ATHLETIC TRAINING I (2 credits)

Clinical Practicum in Athletic Training I is the first course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.

Prerequisite(s): Admission to the MA in Athletic Training program, instructor permission, & compliance with published Athletic Training Program Technical Standards for Admission. Not open to non-degree graduate students.

ATHT 8330 THERAPEUTIC INTERVENTIONS III (2 credits)

This course will introduce students to the use of basic theories and principles of physical agents and manual therapies. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.

Prerequisite(s): ATHT 8230/HEKI 8230. Not open to non-degree graduate students.

ATHT 8340 ORTHOPEDIC ASSESSMENT II (2 credits)

The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the upper extremity. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the shoulder, elbow, wrist, hand and fingers. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.

Prerequisite(s): ATHT 8240/HEKI 8240. Not open to non-degree graduate students.

ATHT 8350 CLINICAL PRACTICUM IN ATHLETIC TRAINING II (2 credits)

Clinical Practicum in Athletic Training II is the second course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills.

Prerequisite(s): ATHT 8250/HEKI 8250 Clinical Practicum I. Not open to non-degree graduate students.

ATHT 8360 ADVANCED ORTHOPEDIC & MEDICAL ASPECTS OF ATHLETIC TRAINING (3 credits)

This course will provide the student with knowledge and skill in the area of orthopedic and medical aspects of athletic training. Students will gain this knowledge through directed observation, experiential learning, literature review, and hands-on experience under the supervision of local medical professionals. The student will be exposed to advanced evaluation of medical conditions, systemic diseases, and other disorders; observe common surgical procedures for orthopedic conditions; and medical management of patients and physically active populations in conjunction with other healthcare providers.

Prerequisite(s): Admission to Master of Arts in Athletic Training Program

ATHT 8410 ATHLETIC TRAINING ADMINISTRATION (2 credits)

This course will introduce students to administrative topics related to athletic training. Management strategies for financial resources, personnel, facilities, medical records, and third-party reimbursement will be covered. Additionally, legal and ethical professional practice standards will be introduced.

Prerequisite(s): Not open to non-degree graduate students.

ATHT 8450 INTERNSHIP IN ATHLETIC TRAINING (2 credits)

This course is designed to provide an immersive athletic training clinical experience for students. The internship is a supervised, educational clinical work experience of at least 300 hours over a minimum of 4-weeks during a single semester. This experience will allow the student the opportunity to take more responsibility for the care, prevention, and rehabilitation of athletic injuries with a particular team or group of patients, as well as help plan and provide daily coverage for practices or clinical appointments.

Prerequisite(s): Permission from the instructor or program director. Not open to non-degree graduate students.

ATHT 8530 THERAPEUTIC INTERVENTIONS IV (2 credits)

This course will introduce students to the use of basic theories and principles of athletic training related to pharmacology, nutrition and psychosocial wellness. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.

Prerequisite(s): ATHT 8330/HEKI 8330. Not open to non-degree graduate students.

ATHT 8540 ORTHOPEDIC ASSESSMENT III (2 credits)

The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the head, face and spine. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the head, face and spine. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.

Prerequisite(s): ATHT 8340/HEKI 8340. Not open to non-degree graduate students.

ATHT 8550 CLINICAL PRACTICUM IN ATHLETIC TRAINING III (2 credits)

Clinical Practicum in Athletic Training III is the third course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.

Prerequisite(s): ATHT 8350/HEKI 8350 Clinical Practicum II. Not open to non-degree graduate students.

ATHT 8650 CLINICAL PRACTICUM IN ATHLETIC TRAINING IV (2 credits)

Clinical Practicum in Athletic Training IV is the fourth course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.

Prerequisite(s): ATHT 8550/HEKI 8550 Clinical Practicum III

ATHT 8900 ATHLETIC TRAINING PROGRAM COMPREHENSIVE ASSESSMENT (0 credits)

This zero-credit-hour course is used to assess the knowledge and skills that students accumulate over the course of the CAATE-accredited entry-level graduate Athletic Training Program. Students must enroll in this course in their final semester in the program to take and pass the comprehensive examination. The exam assesses the student on their knowledge of the domains of athletic training and preparedness to sit for and take the national Board of Certification exam. Students will receive a pass/fail grade for this course.

Prerequisite(s): Requires departmental approval. Not open to non-degree graduate students.

Aviation (AVN)

Aviation Graduate Courses

AVN 8086 AIRPORT SAFETY AND SECURITY (3 credits)

This course will explore the role of airports in relation to safety and security. Topics will include regulations, responsibilities, security issues, ramp safety, disaster preparedness, and emergency management. (Cross-listed with AVN 4080).

Prerequisite(s): AVN 1000 or its equivalent or permission of the instructor.

AVN 8480 SEMINAR IN PUBLIC FINANCIAL ADMINISTRATION (3 credits)

The study of public finance administration policy and technique areas. Emphasis is placed on the technical aspects of public finance administration with particular emphasis on the purposes, processes, and issues associated with particular techniques or technique areas.

Prerequisite(s): PA 8050 or permission of department.

AVN 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)

This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with TED 8510, STEM 8510).

Prerequisite(s): Graduate standing.

AVN 9900 ADVANCED TOPICS (3 credits)

This course provides a format for exploration of topics of interest to advanced students in public administration. Topics covered will change periodically in keeping with the interests of faculty and students. (Cross-listed with PA 9900).

Prerequisite(s): Admission to PhD program in Public administration or permission of instructor. Not open to non-degree graduate students.

Bioinformatics (BIOI)

Bioinformatics Graduate Courses

BIOI 8850 SPECIAL TOPICS IN BIOINFORMATICS (3 credits)

This course is intended to provide a mechanism for offering instruction in subject areas that are not covered in other regularly scheduled courses. In general, courses offered under the BIOI 8850 designation will focus on evolving subject areas in bioinformatics.

Prerequisite(s): Course prerequisites of a specific offering of BIOI 8850 will be determined by the supervising faculty member and will be identified in the course proposal. It is anticipated that permission of the faculty member teaching the course will be required.

Biology (BIOL)

Biology Graduate Courses

BIOL 8010 SEMINAR IN BIOLOGY (1 credit)

A study of current research in any of the divisions of biology. Graduate students will complete this course once for credit.

Prerequisite(s): Graduate student in biology and written permission of graduate faculty supervisor. Not open to non-degree graduate students.

BIOL 8020 INDEPENDENT RESEARCH IN BIOLOGY (1-6 credits)

Research work under supervision of a member of the graduate faculty. May be taken more than once for credit; up to 4 credits for thesis option of M.S. degree and up to 6 credits for the non-thesis option of the M.S. degree.

Prerequisite(s): Graduate student in biology and written permission of graduate faculty supervisor. Not open to non-degree graduate students.

BIOL 8030 EVOLUTION: FROM GENOMES TO ECOSYSTEMS (3 credits)

This course will prepare students to evaluate and discuss evolution as an underlying concept in all of biology. Further, it will provide a comprehensive overview of evolutionary processes related to the evolution of genomes, development, physiology, morphology, behavior, and ecosystems. (Cross-listed with STEM 8030).

Prerequisite(s): Courses for graduate admission or equivalent, or with permission of instructor.

BIOL 8036 SPECIAL TOPICS IN BIOLOGY (3 credits)

A lecture and/or laboratory course for biology majors pertaining to a specific biological topic not available in the regular curriculum. Topics will be developed by individual faculty members reflecting their special interests and expertise. The course may be repeated for credit. (Cross-listed with BIOL 4030).

Prerequisite(s): Graduate standing.

BIOL 8040 TOPICS IN BIOLOGY (1 credit)

Lecture courses for graduate students designed to provide exposure to biological specialties not offered in the regular curriculum.

Prerequisite(s): Graduate and permission. Not open to nondegree students. Not open to non-degree graduate students.

BIOL 8046 SPECIAL TOPICS IN BIOLOGY-LAB (1 credit)

A laboratory course for biology majors pertaining to a specific biological topic not available in the regular curriculum, paired with a BIOL 8036/4030 Special Topics lecture course. Topics will be developed by individual faculty members reflecting their special interests and expertise. The course may be repeated for credit. (Cross-listed with BIOL 4034).

Prerequisite(s): Graduate standing.

BIOL 8060 ADVANCED TOPICS IN BIOLOGY (3 credits)

Lecture and/or laboratory courses for graduate students designed to provide exposure to biological specialties not offered in the regular curriculum.

Prerequisite(s): Graduate and permission. Not open to nondegree students.

BIOL 8070 ADVANCED READINGS IN BIOLOGY (1-3 credits)

An in-depth study of the literature in a limited segment of the biological sciences under the supervision of a graduate faculty member. May be taken more than once for credit up to a total of six credits.

Prerequisite(s): Graduate student in biology and written permission of graduate faculty supervisor. Not open to non-degree graduate students.

BIOL 8106 BIOGEOGRAPHY (3 credits)

This course is intended as an introduction to biogeography, the study of the distribution and evolution of organisms across space and through time. Usually offered every year. (Cross-listed with BIOL 4100, GEOG 4100, GEOG 8106, GEOL 4100, GEOL 8106)

Prerequisite(s): BIOL 1450 and 1750 or GEOL 3100 or BIOL 3100, junior-senior.

BIOL 8116 STATISTICS FOR BIOLOGICAL SCIENCES (4 credits)

Introduction to statistical methods and software used to display, summarize, analyze, and interpret biological and medical data. (Cross-listed with BIOL 4110)

BIOL 8126 CONSERVATION BIOLOGY (3 credits)

Study of biological diversity at the genetic, species and ecosystem levels, its values, and the factors that threaten it. We will explore the scientific basis of conservation biology and how it can be applied to the maintenance of biological diversity. Usually offered every year. (Cross-listed with BIOL 4120).

Prerequisite(s): Graduate student in Biology. Not open to non-degree graduate students.

BIOL 8136 MOLECULAR GENETICS (4 credits)

A lecture and lab course that explores the frontiers of molecular genetics research. Topics addressed will include DNA replication, gene function, gene expression, genetic manipulation, cloning, mutational analysis, genome sequencing, and epigenetics. Research techniques will include DNA/RNA isolation, PCR, cloning, gel electrophoresis, transgene generation, data analysis, and quantitative rtPCR. Students will get a solid grounding in scientific writing and presentations, as well as reading and assessing primary scientific literature. Lecture, discussion, and laboratory. Usually offered fall semester. (Cross-listed with BIOL 4130)

Prerequisite(s): BIOL 2140, 3020 and CHEM 2210 or 2260 or their equivalents. Not open to nondegree students.

BIOL 8146 CELLULAR BIOLOGY (4 credits)

This course is a modern study of mammalian cell function. Focus will be placed on developing skills in experimental cellular biology. Material covered will include tissue culture techniques, cell staining applications, fluorescent microscopy, determination of gene expression, and high-throughput assay design. (Cross-listed with BIOL 4140)

Prerequisite(s): BIOL 2140, 3020 and CHEM 2210 or 2250. Junior or senior undergraduate standing or graduate standing. Must enroll in laboratory section and lecture for this course. Not open to non-degree graduate students.

BIOL 8150 PROFESSIONAL DEVELOPMENT IN BIOLOGY (2 credits)

This course focuses on developing the skills needed for becoming a successful professional biologist. Students actively participate in developing key research and teaching skills including: developing and writing grant proposals and papers, communicating science to the general public and to professional audiences through oral and poster presentations, constructive reviews of the work of others in the context of teaching and as a working professional, and development of teaching materials and assessments. Professional and ethical norms in research and teaching are discussed throughout the course. By the end of the course, students will be able to evaluate alternative career paths within biology and devise development plans appropriate for those careers.

Prerequisite(s): Graduate student in biology and permission of graduate program chair.

BIOL 8156 CANCER BIOLOGY (3 credits)

The etiology of cancers, differences between types of malignancies, oncogenes and genetic modifiers, treatments, susceptibility, and tumor-induced immunosuppression are discussed. This is an active course focused on inquiry-based learning and the purpose of this course is to provide students a foundation in cancer biology while applying tools learned through cell biology, genetics, and immunology courses. (Cross-listed with BIOL 4150).

BIOL 8166 BIOINFORMATICS FOR BIOLOGISTS (3 credits)

This course intends to introduce fundamental concepts in bioinformatics with an emphasis on how to use biological databases and computational tools to solve common bioinformatics problems in biology and biomedicine. The topics consist of sequence database access and searching, sequence alignment and phylogeny, functional prediction of DNA and protein sequences, and genome sequencing and annotation. Students are expected to learn fundamental concepts in bioinformatics and gain extensive experience with the use of bioinformatics analysis tools. (Cross-listed with BIOL 4160).

Prerequisite(s): BIOL 2140 Genetics; BIOL 3020 Molecular Biology of the Cell; Or Permission of instructor

BIOL 8170 ECOSYSTEM ANALYSIS FOR EDUCATORS (3 credits)

This course is designed for education graduate students who wish to take a field-based biology course that uses an interdisciplinary approach to understanding the ecosystem of the tallgrass prairie. This course engages graduate students in methods reflecting multidisciplinary STEM strategies (e.g. scientific inquiry, modeling, geographic information system mapping, etc.) associated with research taking place at the Glacier Creek Preserve. Graduate students completing this course will develop advanced knowledge of ecology, restoration ecology, and monitoring of prairie habitat restoration. Graduate students will focus on the technical, biogeochemical, ecological and cultural aspects of analyzing and restoring the prairie ecosystem and its various habitats. (Cross-listed with STEM 8170)

Prerequisite(s): Graduate Standing or Permission from the Instructor.

BIOL 8186 FRESHWATER ECOLOGY (4 credits)

A study of the physical, chemical and biological relationships that serve to establish and maintain plant and animal communities in freshwater environments. (Cross-listed with BIOL 4180, ENVN 4180).

Prerequisite(s): Prerequisites: BIOL 1450 and BIOL 1750, junior-senior, or permission of instructor. Registration requirements: Must enroll in lab. Not open to non-degree graduate students.

BIOL 8190 COMMUNITIES AND ECOSYSTEMS (3 credits)

Advanced study of populations, communities and ecosystems; may require overnight weekend field trips.

Prerequisite(s): BIOL 3340/8345, graduate in biology. Not open to nondegree students.

BIOL 8200 PLANT ECOLOGY (4 credits)

Advanced study of plant communities and of individual plant species including relationships with the environment and vegetative dynamics. Emphases on methods of evaluation and analysis. May require overnight field trips.

Prerequisite(s): BIOL 3340/8345, graduate in biology. Recommended: BIOL 3530/8535.

BIOL 8216 FIRE ECOLOGY (3 credits)

Study of fire in ecosystems including characteristics of fire, effects on flora, fauna and the abiotic environment, and use in maintaining native ecosystems. May include two weekend field exercises. (Cross-listed with BIOL 4210)

Prerequisite(s): BIOL 3340; junior, senior, or graduate student

BIOL 8226 POPULATION BIOLOGY (4 credits)

Population biology takes a conceptual approach to study the dynamics, ecology, genetics, and evolution of populations. Topics include the growth and regulation of populations, population interactions, selection on individuals and groups, mating systems, and life history evolution. Implications of these topics for areas such as the ecology and evolution of disease, conservation, and resource management will be highlighted. Concepts are reinforced through labs emphasizing interpretation of results from population simulations and the relationship between theory and experimentation in population biology. Usually offered in alternate years. (Cross-listed with BIOL 4220).

Prerequisite(s): Graduate student in Biology or permission of instructor

BIOL 8236 EVOLUTION (3 credits)

The course emphasizes the general principles of evolution, particularly focusing on evolutionary changes and the mechanisms of evolution (natural selection, gene flow, mutation and genetic drift) that apply to all or most organisms. The course covers micro- and macroevolution, speciation, and human evolution. Students will discover how scientists can learn about what has happened in the evolutionary past and the most common patterns of change (i.e., changes that have characterized various groups of organisms). (Cross-listed with BIOL 4230).

Prerequisite(s): Prerequisites are BIOL 2140, junior or senior undergraduate status, Biology graduate status, or permission by the instructor. Not open to non-degree graduate students.

BIOL 8246 MARINE BIOLOGY (3 credits)

An introduction to the marine environment, this course explores physical conditions of the ocean including ocean chemistry, salinity, waves and currents, and tides as well as the ecology of planktonic, nektonic and benthic organisms— their communities and environments. Impacts of humans on the marine environment will also be covered. (Cross-listed with BIOL 4240)

Prerequisite(s): BIOL 1750

BIOL 8250 STATISTICAL ANALYSIS AND DESIGN FOR BIOLOGICAL RESEARCH (4 credits)

This course examines the statistical aspects of the design and analysis of laboratory and field experiments in biology. Basic statistical methods are reviewed and advanced methods presented. Lectures focus on an introduction to the theory behind experimental design and statistical analysis. Labs focus on how to properly complete and interpret statistical analyses, and also focus on how to use the R statistical computer package.

Prerequisite(s): Undergraduate course in statistics is recommended. Non-degree students must gain permission of the instructor before enrolling. Not open to non-degree graduate students.

BIOL 8256 FIELD MARINE BIOLOGY (1 credit)

This lab is a hands-on introduction to the marine environment using a field trip to the Gulf Coast. Students will observe first-hand examples of local marine habitats and organisms. Students will be required to take a trip to the Gulf Coast of Texas, Louisiana, Mississippi, and Alabama during Spring Break. Students will be required to provide their own basic camping and snorkeling gear. (Cross-listed with BIOL 4250)

Prerequisite(s): BIOL 1750, previous or concurrent enrollment in BIOL 4240 and permission of instructor.

BIOL 8266 BEHAVIORAL ECOLOGY (3 credits)

Behavioral ecology is the study of behavior from an evolutionary and ecological point of view. Through the integration of research at different organizational levels and the use of many different organisms, behavioral ecology is one of the most integrative fields in biological sciences. This course will provide an introduction to the basic concepts of behavioral ecology and the integrative approaches used in behavioral ecology. Further, the course will train students in critical reading and discussion of primary literature in writing and in an oral setting. (Cross-listed with BIOL 4260)

Prerequisite(s): Admission into the graduate college. Not open to non-degree graduate students.

BIOL 8276 ANIMAL BEHAVIOR (3 credits)

Behavior of diverse animals for the understanding of the relationships between nervous integration and the behavior manifested by the organism, as well as the evolution and adaptive significance of behavior as a functional unit. (Cross-listed with BIOL 4270, PSYC 4270, PSYC 8276)

Prerequisite(s): BIOL 1750 and PSYC 1010 or permission of instructor, junior-senior.

BIOL 8286 ANIMAL BEHAVIOR LABORATORY (3 credits)

Laboratory and field studies of animal behavior with an ethological emphasis. Classical laboratory experiences and independent studies will be conducted. (Cross-listed with BIOL 4280, PSYC 4280, PSYC 8286)

Prerequisite(s): PSYC 4270 or BIOL 4270 or PSYC 8276 or BIOL 8273. Not open to non-degree graduate students.

BIOL 8296 NEUROETHOLOGY (3 credits)

In the field of Neuroethology a major goal is to understand the neural bases of animal behaviors in a natural context. In this course students will investigate how behaviors are generated and modulated by the nervous system in organisms ranging from insects to mammals. We will explore the neural mechanisms underlying a variety of animal behaviors as they interact with their natural environment ranging from sensory perception of the world (e.g. echolocation, electrolocation), to locomotor movements (e.g. flying, swimming), to more complex behaviors (e.g. learning, memory). (Cross-listed with BIOL 4290, NEUR 4290, NEUR 8296, PSYC 8296).

Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

BIOL 8326 HORMONES & BEHAVIOR (3 credits)

In this course, students will examine the interaction between hormones, chemical messengers released from endocrine glands, and behavior in both human and animal systems. Methods for studying hormonal issues on behavior will be addressed. This course will provide students in psychology, biology, and related disciplines an understanding of how hormones affect sensory processing, motor activities, and processing of information in the central nervous system. (Cross-listed with BIOL 4320, PSYC 4320, PSYC 8326)

Prerequisite(s): Admission to graduate level PSYC program or permission of dept. Not open to non-degree graduate students.

BIOL 8345 ECOLOGY (4 credits)

Study of interrelationships between organisms and their biotic and abiotic environment; includes the physical environment, population biology, community dynamics, biotic interactions and evolution. Usually offered Fall, Spring, Summer. (Cross-listed with BIOL 3340).

Prerequisite(s): Prerequisites are BIOL 1450 and BIOL 1750; junior-senior or Biology graduate student; or permission by instructor. Not open to non-degree graduate students.

BIOL 8416 WETLAND ECOLOGY AND MANAGEMENT (3 credits)

This course will examine the principles and theory of wetland ecology with application towards wetland management and regulation. An interdisciplinary overview of physical, biological and regulatory aspects of wetlands will allow students to synthesize information from their backgrounds in geography, geology and ecology. Definitions, classifications, natural processes and functions of wetland environments will be presented. Labs concentrate on field techniques used to assess specific plant, animal, soil, and hydrological characteristics of wetlands. (Cross-listed with ENVN 4410 and BIOL 4410)

Prerequisite(s): BIOL 3340 or instructor permission.

BIOL 8426 RESTORATION ECOLOGY (3 credits)

Restoration Ecology examines how people assist with the recovery of ecosystems that have been degraded. The course will examine the theory and application of restoration ecology through lecture, discussion, field trips, and development of a restoration management plan for a degraded ecosystem near Omaha. The course will provide information and resources used by restoration and land management professionals to plan, implement, and manage restorations. (Cross-listed with BIOL 4420, ENVN 4420)

Prerequisite(s): Graduate standing.

BIOL 8446 PLANT PHYSIOLOGY (4 credits)

A study of plant processes and functions with emphasis on photosynthesis, growth and development, metabolism and mineral nutrition. (Cross-listed with BIOL 4440)

Prerequisite(s): BIOL1450, BIOL1750, and CHEM 2210 or CHEM 2250; or permission of instructor.

BIOL 8450 BIOLOGY EDUCATION RESEARCH METHODS (3 credits)

In this course, students will learn the methods of conducting pedagogical research in Biology, understand how people learn the concepts, practices, and ways of thinking in science and engineering; understand the nature and development of expertise in a discipline; help identify and measure appropriate learning objectives and instructional approaches that advance students toward those objectives; contribute to the knowledge base in a way that can guide the translation of statistical findings to classroom practice; and identify approaches to make science and engineering education broad and inclusive. Students will work with live data sets to evaluate effective pedagogical approaches in the biology classroom of various audiences (K-16).

BIOL 8454 VIROLOGY LABORATORY (1 credit)

A laboratory to accompany virology lecture. This course enables students to work with viruses in the laboratory and to conduct experiments using viral systems. Experimental design, data gathering, data analysis and manuscript writing will be integral parts of the course. The experiments include host cell characterization, viral infection, virus purification from infected cells, viral genome isolation and viral transfection. Sequence analysis and sequence comparison will also be introduced. Laboratory exercises will emphasize fundamental molecular biology techniques and instrumentation. Usually offered in Fall semester. (Cross-listed with BIOL 4454)

BIOL 8456 VIROLOGY (3 credits)

A comprehensive course about viruses. The course will address principles of viral infection, virus-host interaction, viral evolution and viral disease processes. Cellular and molecular aspects of viral infection will be the primary focus. This will include examination of viral particles, viral multiplication cycles, regulation of gene expression, viral assembly and viral escape. Viral immunology, viral defenses, viral vaccines and antiviral compounds will also be addressed. Emerging viruses and current viral topics will be a major part of the course. Usually offered in Fall semester. (Cross-listed with BIOL 4450)

BIOL 8466 COMPARATIVE IMMUNOLOGY (4 credits)

This course is an exploration of comparative immunology across kingdoms. There will be a strong focus on human as well as mouse immunology. Laboratory sessions require dissections to determine lymphoid anatomy of representative organisms. Samples will be prepared and analyzed using immunological techniques such as flow cytometry. (Cross-listed with BIOL 4460).

Prerequisite(s): Two classroom sessions and one laboratory session per week. Graduate standing. Not open to non-degree graduate students.

BIOL 8496 MEDICINAL USES OF PLANTS (3 credits)

A scientific study of the biochemical properties and physiological effects of medicinal plants, including their historical uses, current applications to varying systems of the human body, and pathways by which today's potent drugs have transitioned from wild flora. Usually offered Fall semesters of even-numbered years. (Cross-listed with BIOL 4490)

BIOL 8535 FLORA OF THE GREAT PLAINS (4 credits)

A study of common vascular plants found in the Great Plains region, including identification, description, and classification techniques and an introduction to the plant communities of Nebraska. Usually offered every Fall and Summer. (Cross-listed with BIOL 3530.)

Prerequisite(s): BIOL 1450-1750. Not open to nondegree students.

BIOL 8606 GIS APPLICATIONS FOR ENVIRONMENTAL SCIENCE (1 credit)

This course introduces the use of geographic information systems (GIS) and other geospatial tools for work in the fields of environmental science, ecology, and natural resource management. The course will develop a working knowledge of the common software and hardware tools used by ecologists through hands-on projects. (Cross-listed with BIOL 4600, ENVN 4600)

Prerequisite(s): BIOL 3340 or permission of instructor.

BIOL 8645 MOLECULAR MICROBIOLOGY LAB (1 credit)

This course will train students to perform techniques commonly used in microbiology labs, such as isolation of bacteria, staining of bacterial cells, use of different media, antibiotic susceptibility tests, polymerase chain reactions, and enzymatic assays. (Cross-listed with BIOL 4644).

Prerequisite(s): Prerequisites of BIOL 2140 and BIOL 3020 and either BIOL 3830/8835 or BIOL 4640/8646 prior or concurrent.

BIOL 8646 MOLECULAR MICROBIOLOGY (3 credits)

This course will cover the diversity observed in genomes, molecules, structures, metabolism, and regulation observed in microorganisms with a focus on bacteria and Archaea. Usually offered Fall semesters. (Cross-listed with BIOL 4640).

Prerequisite(s): Prerequisites are BIOL 2140 and BIOL 3020 or equivalents. Not open to non-degree graduate students.

BIOL 8654 BIOCHEMISTRY I LABORATORY (1 credit)

A laboratory course to help integrate the concepts learned in biochemistry lecture with the development of biochemical laboratory skills including experimental design, data analysis, presentation of results and communication of scientific information, with a focus on formal instruction in journal-style writing and notebook skills. There is an emphasis on protein properties, including enzyme activity. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. (Fall) (Cross-listed with BIOL 4654, CHEM 4654, CHEM 8654).

BIOL 8656 BIOCHEMISTRY I (3 credits)

A comprehensive introduction to biochemistry emphasizing: structure-function relationships for proteins, carbohydrates, lipids, and nucleic acids; protein purification; enzyme kinetics and mechanisms; membranes and membrane transport; carbohydrate metabolism including glycolysis, the citric acid cycle and oxidative phosphorylation; and important applications of thermodynamics and the properties of water to living systems. (Fall) (Cross-listed with BIOL 4650, CHEM 4650, CHEM 8656).

Prerequisite(s): CHEM 2260 and CHEM 2274; and either CHEM 2400 or BIOL 3020, all with a C- or better. Other comparable courses taken at accredited colleges or universities are acceptable. BIOL 8654 must be taken concurrently.

BIOL 8664 BIOCHEMISTRY II LABORATORY (1 credit)

A laboratory course to help integrate the concepts learned in Biochemistry II lecture with the development of biochemical laboratory skills, to gain practical experience in experimental design, data analysis, presentation of results and communication of scientific information, with a focus on formal instruction in journal-style writing and notebook skills. There is an emphasis on nucleic acid properties. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. (Spring) (Cross-listed with BIOL 4664, CHEM 4664, CHEM 8664).

BIOL 8666 BIOCHEMISTRY II (3 credits)

A continuation of the study of the structure and function of biomolecules and biochemical reactions with an emphasis on metabolism of carbohydrates, lipid, amino acids and nucleotides, and the chemistry of signal transduction and genetic information transfer. (Spring) (Cross-listed with BIOL 4660, CHEM 4660, CHEM 8666).

Prerequisite(s): CHEM 8656 and CHEM 8654 or BIOL 8656 and BIOL 8654 with a grade of B- or better. BIOL 8664 must be taken concurrently.

BIOL 8685 BIOLOGY OF AFRICA (3 credits)

Biology of Africa (3) Introduction to the plants, animals, and habitats of Africa. Although other groups are included, this course will focus on the large mammals of east Africa and will pay particular attention to elephant reproduction and biology. Other topics include Serengeti migrations, hippos, lions and other large cats, reptiles, and human evolution. Usually offered alternate Spring semesters. (Cross-listed with BIOL 3680).

BIOL 8695 BIOLOGY OF AFRICA LAB (1 credit)

BIOL 3690/8695 Biology of Africa (1) A Hands-on introduction to the major plants and animals of east Africa using a field trip to South Africa. Students will observe, first hand, examples of the flora and fauna of the African savannah, partake in research on elephant reproductive biology, and observe historic African tribal culture. Students will be required to take a trip to South Africa including Johannesburg, Hoedspruit, Kruger National Park, and Skukuza. Students will be required to register their travel plans through Education Abroad. Usually offered alternate Summer semesters. Students enrolled in this course must have taken BIOL 3680/8685 during the spring semester immediately prior to this class, or have taken it some semester prior. (Cross-listed with BIOL 3690).

Prerequisite(s): Previous or concurrent enrollment in BIOL 3680/BIOL 8685 lecture.

BIOL 8716 TOXICOLOGY (3 credits)

An overview of the fundamentals of toxicology. Concepts include the dose-response relationship, absorption, distribution and excretion of toxicants, and the biotransformation of xenobiotics. Emphasis will be given to metals, pesticides, pharmaceutical compounds, chemical carcinogenesis and endocrine disruption. Usually offered Fall. (Cross-listed with BIOL 4710)

Prerequisite(s): CHEM 2210 or 2260 and BIOL 1750, BIOL 3020 or equivalent.

BIOL 8735 FAUNA OF THE GREAT PLAINS (3 credits)

A survey of the common animal groups found in the Great Plains, including their evolution, ecology, distribution and specific adaptations to the environment of the temperate North American grasslands.

Prerequisite(s): BIOL 1750. Not open to nondegree students.

BIOL 8736 VERTEBRATE ENDOCRINOLOGY (4 credits)

An overview of the fundamentals of vertebrate endocrinology. Concepts include: the mammalian hypothalamus-pituitary system, the endocrinology of mammalian reproduction, the mammalian adrenal glands, endocrine disruption, endocrinology and metabolism. (Cross-listed with BIOL 4730)

Prerequisite(s): BIOL 1750, BIOL 3020 or equivalent. Not open to non-degree graduate students.

BIOL 8746 ANIMAL PHYSIOLOGY (3 credits)

An overview of the fundamentals of animal physiology. Concepts include: the physiology of nerve and muscle function, endocrine function, cardiovascular and respiratory function, oxygen and carbon dioxide delivery by the blood, and osmoregulation and excretion. The course is comparative in nature, including examples from humans, mammals, vertebrates and invertebrate animals. Usually offered Spring. (Cross-listed with BIOL 4740.)

BIOL 8760 CLINICAL REASONING (3 credits)

This is an intensive class in which students will translate biological concepts into solving case-based scenarios in clinical medicine. Relevant readings will prepare students to address these challenges in small-group settings. Intended as an advanced preparatory course for healthcare professionals or students desiring exposure to clinical decision-making. Usually offered during Summer semester.

Prerequisite(s): Molecular Biology; Microbiology or Immunology; plus instructor approval.

BIOL 8766 GENOME TECHNOLOGY AND ANALYSIS (3 credits)

This course will introduce the latest genome sequencing technologies and their broad applications in biology and medicine. Students will learn how genome sequencing is conducted by different platforms and obtain practical experience of how to use bioinformatics tools for genome analysis. Students are expected to be able to perform sequence analysis efficiently and interpret the results properly. (Cross-listed with BIOL 4760)

Prerequisite(s): BIOL2140 Genetics; or Permission of instructor

BIOL 8770 CLINICAL READINGS (3 credits)

This course is a rigorous study of current biomedical, translational, and clinical primary literature spanning a wide range of human health and disease.

Prerequisite(s): Graduate and written permission of graduate faculty member.

BIOL 8786 VERTEBRATE ZOOLOGY (4 credits)

A study of the general biology of the subphylum vertebrata including the morphology, anatomy, physiology and ecology of vertebrate representatives. (Cross-listed with BIOL 4780)

Prerequisite(s): Prerequisites are BIOL 1450, BIOL 1750, and Junior or Senior standing.

BIOL 8796 MAMMALOGY (4 credits)

The biology of mammals, including their evolution, functional morphology, physiology, ecology, zoogeography, behavior, classification and identification, with emphasis on North American groups. Field trips. Usually offered in alternate years. (Cross-listed with BIOL 4790)

Prerequisite(s): BIOL 1450, BIOL 1750, junior or senior standing. Must enroll in laboratory section.

BIOL 8826 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

Seminar on environmental law and regulation. The course will address federal regulations, implementing instructions, legal principles and requirements. The major federal environmental laws, air and water quality, solid and hazardous waste, and pollution prevention and remediation will be discussed. Usually offered Fall semesters.

Prerequisite(s): Junior-senior and permission.

BIOL 8835 BIOLOGY OF PATHOGENIC MICROORGANISMS (3 credits)

This course will cover diseases commonly caused by microorganisms and the features of the microorganisms that cause those diseases. The course will also cover terms used to describe infections, their transmission and their occurrence, and the defenses of humans against infections. The goal of the course is to provide students with the knowledge to be able to diagnose common infectious diseases based on symptoms and test results. Usually offered in Spring semesters. (Cross-listed with BIOL 3830).

Prerequisite(s): BIOL 2140 or BIOL 2440 or BIOL 3240 or the equivalent, or by instructor permission. Not open to non-degree graduate students.

BIOL 8836 DEVELOPMENTAL GENETICS (2 credits)

This course considers experimental approaches in developmental genetics and provides students with first-hand experience in laboratory techniques used in developmental genetics. (Cross-listed to BIOL 4830)

Prerequisite(s): This course considers experimental approaches in developmental genetics and provides students with first-hand experience in laboratory techniques used in developmental genetics.

BIOL 8846 HERPETOLOGY (4 credits)

The biology of amphibians and reptiles, including their evolution, classification, anatomy, physiology, ecology, distribution and identification, with emphasis on North American groups. Methods for studying herptiles are examined. Usually offered in Spring semesters of even years. (Cross-listed with BIOL 4840).

Prerequisite(s): Prerequisites are BIOL 1450, BIOL 1750 and Junior-Senior standing. Must enroll in lab. Not open to non-degree graduate students.

BIOL 8856 DEVELOPMENTAL BIOLOGY (3 credits)

This course explores principles underlying the development of multicellular organisms, stressing the environmental, genetic, molecular, cellular, tissue, and evolutionary mechanisms of animal development. Usually offered once per year. (Cross-listed with BIOL 4850)

BIOL 8866 COMPARATIVE GENOMICS (3 credits)

This course will introduce fundamental concepts in genomics and genome comparison. Students will learn how genomes are constructed, how they evolve, how individual genomes are unique, and what genomic knowledge means in terms of human health and medicine. (Cross-listed with BIOL 4860)

BIOL 8876 MOLECULAR AND CELLULAR NEUROBIOLOGY (3 credits)

This course presents foundational topics in molecular and cellular neurobiology in the context of how the nervous system is functionally organized. Topics include: nervous system cell types and their subcellular organization; electrical properties of neurons and glia; energy metabolism and biochemistry of the brain; intra- and intercellular neuronal signaling; the regulation of gene expression in neuronal cells; synaptic plasticity; and how these are altered in disease. (Cross-listed with BIOL 4870, NEUR 4870, NEUR 8876).

Prerequisite(s): NEUR 1500, or both NEUR 1520 and NEUR 1540, or BIOL 3020, or permission of instructor.

BIOL 8896 GENES, BRAIN, AND BEHAVIOR (3 credits)

This course will evaluate the complex interaction between an organism's genome and neural activity pattern in the nervous system as related to behavior. In this course students will explore how changes in gene expression (allelic variants, epigenetics, differential regulation) and gene networks within neural tissue can reciprocally influence behaviors such as communication, foraging, reproduction, and cognition. (Cross-listed with BIOL 4890, NEUR 4890, NEUR 8896, PSYC 8896)

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

BIOL 8946 ENTOMOLOGY (4 credits)

The study of insects; their classification, morphology, physiology, behavior, life histories, ecology and evolution. (Cross-listed with BIOL 4940)

Prerequisite(s): BIOL 1450, BIOL 1750. Junior or Senior standing.

BIOL 8966 ADVANCED GENETICS (3 credits)

An in-depth consideration of topics in genetics, including the conceptual and molecular definition of a gene, cytogenetics, mutation, population genetics, developmental genetics, gene regulation and the application of genetics to other areas of biology. (Cross-listed with BIOL 4960).

Prerequisite(s): BIOL 2140 and BIOL 3020 and concurrent enrollment or completion of either CHEM 3650 or CHEM 4610 or CHEM 4650 or BIOL 4650, or permission of the instructor.

BIOL 8976 ADVANCED BOTANY (4 credits)

Advanced Botany examines plant structures (cells, tissues, and organs) and their connections with plant functions (growth, reproduction, photosynthesis, respiration, and dispersal). Topics covered include energy metabolism, development and morphogenesis, genetics, ecology, and the latest in plant taxonomy and phylogeny, keeping students on the forefront of cutting-edge botanical research. In lab, students conduct activities such as dissecting plant organs, making microscope slides, and conducting plant-based experiments, using plants from the local area, from native Great Plains collections, and from around the world and grown in the greenhouse. Students compare and contrast both physiological and morphological adaptations to varying environments. (Cross-listed with BIOL 4970, ENVN 4970).

Prerequisite(s): Graduate Standing

BIOL 8986 ORNITHOLOGY (4 credits)

An introduction to the general biology of birds, including their anatomy, physiology, behavior, ecology, classification and identification with emphasis on North American groups. Usually offered in alternate years. (Cross-listed with BIOL 4980)

Prerequisite(s): BIOL 1750.

BIOL 8990 THESIS (1-6 credits)

An original and independent research project written under the supervision of a faculty thesis advisory committee.

Prerequisite(s): Graduate student in biology and written permission of graduate faculty supervisor. Not open to non-degree graduate students.

Biomechanics (BMCH)

Biomechanics Graduate Courses

BMCH 8000 SEMINAR IN BIOMECHANICS (0 credits)

Required non-credit course for graduate students in biomechanics. Intended to familiarize the graduate student with current ongoing biomechanical research at UNO and other institutions. The seminar will additionally include topics focusing on professional development, job and educational opportunities, and biomechanical methodologies.

Prerequisite(s): Must be a student in BMCH graduate program. Not open to non-degree graduate students.

BMCH 8006 BIOMATERIALS (3 credits)

Students will learn the classification, properties, characterization methods, body interactions, applications, and design principles of biomaterials. (Cross-listed with BMCH 4000).

BMCH 8030 BIOSTATISTICS IN BIOMECHANICS I (3 credits)

The focus of the course is to prepare students to understand and apply research and biostatistical methods needed in the design and analysis of biomechanical investigations. The major topics to be covered include research design and multiple linear regression. (Cross-listed with BMKI 9031)

Prerequisite(s): Graduate Standing in Biomechanics program or Department Permission.

BMCH 8100 NONLINEAR ANALYSIS FOR MOVEMENT STUDIES (3 credits)

This course is to introduce different nonlinear methods for the analysis of biological and movement time series. Emphasis will be given on understanding the algorithms behind each nonlinear method. (Cross-listed with BMKI 9101).

Prerequisite(s): Instructor Permission.

BMCH 8106 BIOINSPIRED ROBOTICS (3 credits)

The goal of the course is to involve students in an interdisciplinary vision of biomechanics, biology, engineering and architecture by learning how humans and other animals function in their environment. These design principles from nature can be translated into novel devices, structures, and robots. (Cross-listed with BMCH 4100).

BMCH 8200 MATLAB FOR MOVEMENT SCIENCES (3 credits)

Introduction to Matlab software, plotting data, spectral analysis and the Fourier transform, data smoothing, and image analysis of movement related data. All topics will be implemented using Matlab. (Cross-listed with BMKI 9201).

Prerequisite(s): Instructor permission.

BMCH 8206 METHODS IN BIOMECHANICS I (3 credits)

In this course students learn about the methods and equipment used in biomechanics as well as the analysis of data collected from those methods. Course experiences include both lecture and lab based learning. (Cross-listed with BMCH 4200).

Prerequisite(s): Department Permission

BMCH 8216 METHODS IN BIOMECHANICS II (3 credits)

In this course students learn about advanced methods and equipment used in biomechanics, as well as the analysis of data collected from those methods. Course experiences include both lecture and lab based learning. This course builds on the experience gained in BMCH 4200/8206, Methods in Biomechanics I. (Cross-listed with BMCH 4210).

Prerequisite(s): BMCH 8206 or Department Permission

BMCH 8220 METHODS IN CARDIOVASCULAR BIOMATERIALS RESEARCH (3 credits)

This course contains lecture and lab components focused on cardiovascular biomaterial development and characterization methods used in academia and industry. The lecture component will provide the necessary clinical background of cardiovascular diseases and the theoretical background of cardiovascular biomaterials and state-of-the-art research methods. The lab component will provide practical experience focused on cardiovascular biomaterial design, manufacturing, and characterization methods. (Cross-listed with BMKI 9221).

BMCH 8300 STEM TEACHING METHODS FOR DEVICE DESIGN (3 credits)

STEM Teaching in Biomechanics focuses on principles in teaching including teaching models (Problem-Based, Team-Based, Inquiry-Based teaching), student assessment, classroom logistics/organization, and device design through a mentorship project. (Cross-listed with BMKI 9301, STEM 8300).

BMCH 8400 MOTOR LEARNING I (3 credits)

Discussion and analysis of scientific principles related to the learning of motor skills; review related literature and research in motor learning. The focus of the course is on recent theories of how movements are acquired and performed, and on factors that have implications for motor learning throughout the life span. (Cross-listed with BMKI 9401).

Prerequisite(s): Department Permission.

BMCH 8410 MOTOR CONTROL I (3 credits)

The focus of the course is to explore the study of the conditions and factors that influence the control and performance of motor skills from both neurophysiological and psychobiological perspectives. (Cross-listed with BMKI 9411).

Prerequisite(s): Department Permission. Not open to non-degree graduate students.

BMCH 8420 MOTOR DEVELOPMENT (3 credits)

This course focuses on the study of motor development, the processes that underlie this development and the factors that influence it. Students will gain an understanding of the major theoretical perspectives of motor development across the life span with special emphasis given in child development. (Cross-listed with BMKI 9421).

Prerequisite(s): Department Permission.

BMCH 8450 ADVANCED BIOMECHANICS (3 credits)

The course will address the biomechanical basis of human performance including mechanical analysis of human gait, fundamental movement patterns and techniques used for collecting biomechanical data. (Cross-listed with BMKI 9451).

Prerequisite(s): BMCH 4630 (Biomechanics) [previously PE 4630] or Instructor Permission.

BMCH 8646 ORTHOPEDIC BIOMECHANICS (3 credits)

Orthopedic Biomechanics focuses on the use of biomechanical principles and scientific methods to address clinical questions that are of particular interest to professionals such as orthopedic surgeons, physical therapists, rehabilitation specialists, and others. (Cross-listed with BMCH 4640).

Prerequisite(s): Department Permission

BMCH 8666 CLINICAL IMMERSION FOR RESEARCH AND DESIGN (3 credits)

This course will involve exposure to current clinical practices, identification of unmet clinical needs, and information regarding future career options. In this course, students will be matched with local clinical sites to provide a unique opportunity for innovative and interdisciplinary approaches to problem solving subject to practical constraints. Concepts in clinical rehabilitation, integrated assessments, regulation of medical devices in health care will be covered. This course will review the latest research efforts for rehabilitation in the context of device design and implementation. (Cross-listed with BMCH 4660).

Prerequisite(s): Instructor Permission. Not open to non-degree graduate students.

BMCH 8676 INTRODUCTION TO MECHANICS OF BIOMATERIALS (3 credits)

In this course students will learn how to analyze the stresses and strains in different structures under complex loading conditions with extensive examples from biomaterials and materials generally used in the medical device field. (Cross-listed with BMCH 4670).

Prerequisite(s): BMCH 3000 or Department Permission

BMCH 8686 SPORTS BIOMECHANICS (3 credits)

This course is intended to provide students with a foundational knowledge on how to analyze sport movements through biomechanical analytical methods. Students will utilize foundational biomechanical principles and apply them to a variety of sports and associated movements. (Cross-listed with BMCH 4680).

Prerequisite(s): BMCH 4630

BMCH 8690 MATHEMATICS OF BIOMECHANICAL DATA PROCESSING (3 credits)

Biomechanics is a rapidly changing and technologically dependent field of study. A thorough understanding of the factors influencing outcome measures is critical to correctly interpreting results. Students will be exposed to various data acquisition systems, approaches, and choices required to assess the computational aspects of biomechanical data critically. This course will equip students to complete independent processing from raw data to 3D joint angles and forces. (Cross-listed with BMKI 9691).

Prerequisite(s): Departmental Permission

BMCH 8696 CARDIOVASCULAR BIOMECHANICS (3 credits)

This course will introduce students to cardiovascular biomechanics, emphasizing the integration of analytical and experimental methods to better understand the mechanobiology of tissues. (Cross-listed with BMCH 4690).

Prerequisite(s): BMCH 3000, BMCH 4670, or Department Permission

BMCH 8900 INDEPENDENT RESEARCH IN BIOMECHANICS (1-6 credits)

In this course individuals or groups will conduct research projects for the study and analysis of biomechanical topics.

Prerequisite(s): Permission of the Department and approval by Faculty Advisor. Not open to non-degree graduate students.

BMCH 8910 INDEPENDENT STUDY IN BIOMECHANICS (1-6 credits)

This is a variable credit course designed for graduate students in Biomechanics who would benefit from independent reading assignments and problems. Independent study enables individual students or a small group of students to focus on topics typically not explored in other offerings or to explore topics currently offered in further depth. (Cross-listed with BMKI 9911).

Prerequisite(s): Graduate student in BMCH and approval by Faculty Advisor. Not open to non-degree graduate students.

BMCH 8990 THESIS IN BIOMECHANICS (1-6 credits)

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's advisory committee. In this project the student will develop skills in research design, research conduct, data analysis, and reporting. The final product of this course will be an original thesis of independent scientific investigation.

Prerequisite(s): Department Permission. Not open to non-degree graduate students.

Biomedical Informatics (BMI)

Biomedical Informatics Graduate Courses

BMI 8000 ADVANCES IN BIOMEDICAL INFORMATICS (0 credits)

BMI 8000 provides a regular forum for BMI graduate students, where the latest developments in the field of Biomedical Informatics are introduced and discussed. The course also functions as a central communication and collaboration hub for graduate students in BMI. Participation is required.

Prerequisite(s): Students in the MS in BMI and PhD in BMI program may register. Not open to non-degree graduate students.

BMI 8020 ADVANCED COURSE IN BIOINFORMATICS (3 credits)

This is a special topics course designed to explore the research interests of faculty and students. Therefore, topics may include, but are not limited to, such areas of study as next-generational sequencing, biological networks, proteomics, metabolomics, and biomedical informatics.

Prerequisite(s): Admission to the MS/PhD Program in the College of Information Science and Technology, or permission of the instructor. Not open to non-degree graduate students.

BMI 8070 HEALTH INFORMATICS RESEARCH METHODS (3 credits)

This is a foundational course for health informatics research methods. Health informatics is a broad term that denotes disciplines that encompass the use of computer and information science to manage all aspects of healthcare data and the use of healthcare information to foster better collaboration among a patient's various healthcare providers. This course takes a practical approach to understanding health informatics research methods through the use of real-life examples, step-by-step research method practices, and applying various analytical procedures. The course will guide the student through the process of designing research studies using a variety of research methods. Students are introduced to quantitative, qualitative and mixed methods designs through hands-on assignments and reviewing selected research studies. In addition, students will learn how to conduct a literature review. Students will learn about grant opportunities, the proposal writing process and IRB applications.

Prerequisite(s): Graduate student status and prior or concurrent enrollment in BMI 8100, or by instructor approval.

BMI 8080 SEMINAR IN BIOMEDICAL INFORMATICS (3 credits)

This is a variable-content course that engages students in current research in Biomedical Informatics and develops skills in the oral and written presentation of scientific research.

Prerequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular course offerings.

BMI 8100 INTRODUCTION TO BIOMEDICAL INFORMATICS (3 credits)

This course offers students an overview of the field of biomedical informatics, combining perspectives from computing, biosciences and medicine. The historical development of the field and its influence on biological, clinical, and translational research will be discussed. Issues related to bioinformatics, clinical, bioimaging and public health/population informatics will be explored.

Prerequisite(s): Class standing of senior or above.

BMI 8300 PUBLIC HEALTH GENOMICS (3 credits)

This course will address the biopsychosocial issues that bridge genomics and public health, which are generally considered two vastly different disciplines. The focus will center on understanding how genomics may be incorporated into health promotion and disease prevention efforts for individuals and population.

Prerequisite(s): Class standing of senior or above.

BMI 8320 CONSUMER HEALTH INFORMATION SYSTEMS (1 credit)

Consumer health informatics as a field focuses on health informatics from the perspective of the consumer or patient, health literacy, and consumer education. Creative problem solving and fluency in this subdiscipline requires competence in information structures and processes that empower consumers to manage their own health. In this course, students will strategically review publicly available databases, datasets, and projects involved in consumer health. With this information in hand, students will design their own consumer health information system geared towards addressing a consumer or patient education and literacy challenge of their interest.

BMI 8400 LINEAR ALGEBRA FOR ADVANCED COMPUTING AND AI (3 credits)

Matrix Analysis and Linear Algebra are at the core of several important algorithms and techniques that are widely used in machine learning for data analytics, imaging informatics, and bioinformatics. The course will explore fundamental concepts of matrix analysis and linear algebra as they apply to machine learning, emphasizing applications over proofs. Students will have an opportunity to perform "pencil and paper" calculations as well as more sophisticated numerical computations using a programming language/statistical environment of their choice. Applications of linear algebra to machine learning in the context of imaging informatics and biomedicine will be covered in depth.

Prerequisite(s): Proficiency in programming and knowledge of calculus are required. Familiarity with concepts from biology is beneficial but not required.

BMI 8540 FOUNDATIONS IN PROGRAMMING FOR BIOMEDICAL INFORMATICS (3 credits)

Foundations in programming, software development, pipeline management, and version control are critical for developing a capable biomedical informatics workforce. This course will provide foundations in programming skills necessary for students with a limited computer science background to develop fluency and basic skills in the concepts of software development for biomedical informatics. Specific topics covered will include Unix/Linux shell programming, Python, databases, Applications Programming Interface (APIs), software versioning, and data management.

Prerequisite(s): Experience with programming in a scripting, database management, or object-oriented programming language is strongly recommended but not required.

BMI 8850 BIOMEDICINE FOR THE NONMEDICAL PROFESSIONAL (3 credits)

This course will cover the basic principles of molecular and cellular biology, human anatomy, physiology, and pathology that are essential to an informed use of biomedical data. The biomedical topics will be interspersed and complemented with discussions about relevant data sources and datasets, emphasizing their strengths and weaknesses, and the lectures will be enriched with virtual anatomical dissections. Reading assignments from the primary literature and multimedia materials will supplement the textbook.

Prerequisite(s): Class standing of senior or above

BMI 8866 BIOINFORMATICS ALGORITHMS (3 credits)

The main objective of this course is to provide an organized forum for students to understand the foundations of algorithmic design and analysis in the context of health and biological data. The course will present fundamental concepts in algorithms (exhaustive, greedy, graph, heuristic, and more) and explore how those concepts extend to bioinformatics and related fields, such as biomedical informatics, and health informatics. Students will learn about historical context of these algorithms and how they were pivotal in forming more complex modern approaches, and will explore advanced algorithms in their area of interest. Students will also exercise their programming skills with the opportunity to implement and apply bioinformatics algorithms to real data, so to better grasp the technical components of algorithmic design and analysis. (Cross-listed with BIOI 4860).

BMI 8896 COMPUTERIZED GENETIC SEQUENCE ANALYSIS (3 credits)

The goal of this course is to introduce students to major topics in computerized analysis of genetic sequences. In particular the course will allow students to become familiar with the computational tools and software that aid in the modern molecular biology experiments and analysis of experimental results. Following the completion of this course, it is expected that the students will have a basic understanding of the theoretical foundations of the sequence analysis tools and develop competence in evaluating the output from these tools in a biological context. This course will emphasize hands-on experience with the programs for nucleotide and amino acid sequence analysis and molecular phylogeny. (Cross-listed with BIOI 4890).

Prerequisite(s): Permission from the instructor.

BMI 8900 INDEPENDENT RESEARCH IN BIOMEDICAL INFORMATICS (1-3 credits)

The content of the course will vary, however both the student and the faculty member must sign an Independent Research Agreement and file it with the Biomedical Informatics Graduate Program Committee before registration for the course. This agreement will detail the project, the schedule for its completion, the form of the output, the method of evaluation and other relevant information pertaining to the project.

Prerequisite(s): Permission of instructor, and at least 12 hours of course work toward the MS BMI program should be completed.

BMI 8910 INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the Biomedical Informatics graduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s): Students must have completed a minimum of 12 credit hours towards the MS in BMI program. Not open to non-degree graduate students.

BMI 8950 BIOMEDICAL INFORMATICS GRADUATE CAPSTONE (3 credits)

The graduate capstone course challenges students to prove their mastery of the skills and domain knowledge they have gathered throughout their program of study. The course begins with a module on project management and research best practices. The majority of the course is structured around facilitating a non-trivial semester-long project, often in service to a third-party project sponsor, such as a community, industry, or government partner. The course is intended for students that have selected the coursework option, not thesis, and that are close to graduation.

Prerequisite(s): Students must have 9 credit hours or fewer left in the program, including this course. Students must have completed all core courses, and core electives are recommended but not required. Not open to non-degree graduate students.

BMI 8970 INDEPENDENT STUDY IN BIOINFORMATICS (1-3 credits)

This is a variable-credit course designed for graduate students in bioinformatics who would benefit from independent reading assignments and research-type problems. Independent study enables coverage of topics not taught in scheduled course offerings.

Prerequisite(s): Permission of a supervising faculty member and approval of the Bioinformatics Program Committee Chair. A formal description of the problem area to be investigated, the resources to be used, and the results to be produced must be prepared.

BMI 8990 THESIS IN BIOMEDICAL INFORMATICS (1-6 credits)

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.

Prerequisite(s): Graduate major in BMI and approval of the Thesis Advisory Committee. Not open to non-degree graduate students.

BMI 9900 ADVANCED RESEARCH IN BIOMEDICAL INFORMATICS (3 credits)

This course provides a format for exploring advanced research areas for doctoral students in Biomedical Informatics and related fields. Specific topics will vary in keeping with research interest of faculty and students.

Prerequisite(s): Admission to graduate program in Biomedical Informatics. Not open to non-degree graduate students.

BMI 9980 INDEPENDENT RESEARCH IN BIOMEDICAL INFORMATICS (1-3 credits)

This course allows students to research a topic of their interest that is not available in a formal course. The topic to be studied must be agreed upon by the student and the instructor.

Prerequisite(s): Admission to the Ph.D. program in Biomedical Informatics and permission of instructor. Not open to non-degree graduate students.

BMI 9990 DISSERTATION (1-12 credits)

The dissertation is an original research project conducted and written under the direction of a faculty dissertation committee supervisory committee.

The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge in health or bioinformatics and demonstrate technical mastery of the discipline.

Prerequisite(s): Admission to the Ph.D. program in Biomedical Informatics and candidacy for the Ph.D. degree. Prior to enrolling for dissertation hours, the students must have permission of the supervisory committee. Not open to non-degree graduate students.

Biomechanics and Kinesiology

BMKI 9000 GRANT WRITING FOR THE BIOMEDICAL SCIENCES (3 credits)

The purpose of this course is to introduce students to the scientific process and translate it to effective grant writing for biomedical sciences. Topics covered include hypotheses development, strong inference, how to write specific aims, how to generate ideas, federal grant processes with emphasis on National Institutes of Health, National Science Foundation and Veterans' Affairs, how to evaluate calls for grant applications, grant construction, and stylistic writing approaches. Students will compare and contrast successful and unsuccessful grant submissions.

BMKI 9001 RESEARCH IN HEALTH & KINESIOLOGY (3 credits)

The course introduces students to scientific writing, quantitative research design, and statistical methods. Considerable emphasis is placed on evaluation of research in scholarly publications. A research proposal in the form of a grant proposal is written as one of the course requirements. Students will develop the skills necessary to analyze study designs in existing literature and create a research proposal. (Cross-listed with HEKI 8030).

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

BMKI 9010 PRINCIPLES AND PRACTICE OF BIOMEDICAL RESEARCH (3 credits)

The purpose of this course is to introduce students to a variety of topics related to research practice that will allow them to be successful, independent scientists. Topics covered include manuscript writing and plagiarism, authorship, mentoring, research ethics, responsible conduct of research, presentation skills, research notebook keeping, scientific etiquette, and time and laboratory management.

BMKI 9031 BIostatistics in Biomechanics I (3 credits)

The focus of the course is to prepare students to understand and apply research and biostatistical methods needed in the design and analysis of biomechanical investigations. The major topics to be covered include research design and multiple linear regression. (Cross-listed with BMCH 8030)

Prerequisite(s): Graduate Standing in Biomechanics program or Department Permission.

BMKI 9040 BIostatistics in Biomechanics II (3 credits)

The focus of the course is to prepare graduate students to understand and apply advanced research and biostatistical methods needed in the design and analysis of biomechanical investigations. The major topics to be covered include advanced research design and the general linear model.

This course builds upon basic research design and linear regression learned in Biostatistics in Biomechanics I for the application in single factor and multi-factor experimental analyses.

Prerequisite(s): Graduate Standing, BMCH 8030/BMKI 9031 or equivalent

BMKI 9041 ADVANCED STATISTICS (3 credits)

This course will be a study in the statistical methods commonly used in descriptive and experimental research in physical education and exercise science. Application, particularly regarding the purpose, selection, and interpretation of statistical procedures will be emphasized. (Cross-listed with KINS 8040).

Prerequisite(s): HPER 8030/HEKI 8030 or BMKI 9001/HPER 9031/HEKI 9031 or equivalent

BMKI 9050 PHYSICAL ACTIVITY EPIDEMIOLOGY (3 credits)

This course will cover the broad scope of the issues related to epidemiological methods that are relevant to the study of physical activity populations. It is intended to enhance students' ability to understand and apply epidemiological methods to physical activity related research.

Prerequisite(s): PE 8130/KINS 8130 and PE 8040/KINS 8040 or related course, or permission by the instructor. Not open to non-degree graduate students.

BMKI 9101 NONLINEAR ANALYSIS FOR MOVEMENT STUDIES (3 credits)

This course is to introduce different nonlinear methods for the analysis of biological and movement time series. Emphasis will be given on understanding the algorithms behind each nonlinear method. (Cross-listed with BMCH 8100).

Prerequisite(s): Instructor Permission

BMKI 9131 IMPLEMENTING PHYSICAL ACTIVITY IN DIVERSE POPULATIONS (3 credits)

This course will focus on information necessary to assess, design, implement, and evaluate the need for and effectiveness of physical activity interventions in diverse populations, races, and ethnicities. These populations will include: African American, Native American, Hispanic, Asian American, Pacific Islanders, and Caucasian. Additionally, candidates will complete a health and physical activity service learning project in which they will work with diverse populations in the community. (Cross-listed with KINS 8130).

Prerequisite(s): PE 3900/KINS 3900 or PE 8905/KINS 8905 or PE 8700/KINS 8700 or HED 8600/PHHB 8600.

BMKI 9141 PHYSICAL ACTIVITY ASSESSMENT AND HEALTH RELATED RESEARCH (3 credits)

This course will cover the broad scope of research on physical activity and public health. Emphasis will be placed on the application of physical activity assessment techniques. (Cross-listed with KINS 8140).

BMKI 9201 MATLAB FOR MOVEMENT SCIENCES (3 credits)

Introduction to Matlab software, plotting data, spectral analysis and the Fourier transform, data smoothing, and image analysis of movement related data. All topics will be implemented using Matlab. (Cross-listed with BMCH 8200).

Prerequisite(s): Instructor permission.

BMKI 9221 METHODS IN CARDIOVASCULAR BIOMATERIALS RESEARCH (3 credits)

This course contains lecture and lab components focused on cardiovascular biomaterial development and characterization methods used in academia and industry. The lecture component will provide the necessary clinical background of cardiovascular diseases and the theoretical background of cardiovascular biomaterials and state-of-the-art research methods. The lab component will provide practical experience focused on cardiovascular biomaterial design, manufacturing, and characterization methods. (Cross-listed with BMCH 8220).

BMKI 9300 SYSTEMATIC REVIEW AND META-ANALYSIS (3 credits)

This course is designed to introduce students to the process of completing systematic reviews and meta-analyses. The objective of the course is to provide students with a foundation of the requisite skills necessary to perform a quantitative and qualitative synthesis of the literature within their area of interest.

Prerequisite(s): HEKI 8030 or equivalent research methods course.

BMKI 9301 STEM TEACHING METHODS FOR DEVICE DESIGN (3 credits)

STEM Teaching in Biomechanics focuses on principles in teaching including teaching models (Problem-Based, Team-Based, Inquiry-Based teaching), student assessment, classroom logistics/organization, and device design through a mentorship project. (Cross-listed with BMCH 8300, STEM 8300).

BMKI 9401 MOTOR LEARNING I (3 credits)

Discussion and analysis of scientific principles related to the learning of motor skills; review related literature and research in motor learning. The focus of the course is on recent theories of how movements are acquired and performed, and on factors that have implications for motor learning throughout the life span. (Cross-listed with BMCH 8400).

Prerequisite(s): Department Permission.

BMKI 9411 MOTOR CONTROL I (3 credits)

The focus of the course is to explore the study of the conditions and factors that influence the control and performance of motor skills from both neurophysiological and psychobiological perspectives. (Cross-listed with BMCH 8410).

Prerequisite(s): Department Permission. Not open to non-degree graduate students.

BMKI 9421 MOTOR DEVELOPMENT (3 credits)

This course focuses on the study of motor development, the processes that underlie this development and the factors that influence it. Students will gain an understanding of the major theoretical perspectives of motor development across the life span with special emphasis given in child development. (Cross-listed with BMCH 8420).

Prerequisite(s): PE 2800 (Motor Behavior) or permission of instructor.

BMKI 9451 ADVANCED BIOMECHANICS (3 credits)

The course will address the biomechanical basis of human performance including mechanical analysis of human gait, fundamental movement patterns and techniques used for collecting biomechanical data. (Cross-listed with BMCH 8450).

Prerequisite(s): BMCH 4630 (Biomechanics) [previously PE 4630] or Instructor Permission.

BMKI 9460 ADVANCED BIOMECHANICS II (3 credits)

A comprehensive and advanced detailed investigation of the biomechanics of motor performance in special populations such as stroke, Parkinson's disease, and amputees. Includes advanced study of the mechanical analysis of motor skills and movement patterns and the research techniques for collecting and interpreting biomechanical data. Detailed lectures will cover etiology of such special populations with a focus on the endpoint movement disorders.

Prerequisite(s): BMCH 8450 or BKMI 9451/BMCH 9451 or Instructor Permission. Not open to non-degree graduate students.

BMKI 9500 MOTOR LEARNING II (3 credits)

The focus of the course is to further explore the study of the conditions and factors that influence the learning and performance of motor skills.

Prerequisite(s): BMCH 8400, BMKI 9401/BMCH 9401 or Instructor Permission. Not open to non-degree graduate students.

BMKI 9510 MOTOR CONTROL II (3 credits)

The focus of the course is to further explore the study of the conditions and factors that influence the control and performance of motor skills.

Prerequisite(s): BMCH 8410, BMKI 9411/BMCH 9411 or Department Permission. Not open to non-degree graduate students.

BMKI 9520 MOTOR DEVELOPMENT II (3 credits)

This course focuses on the study of motor development, the processes that underlie this development and the factors that influence it. This course will focus on exploring motor development in clinical populations of people with autism, down syndrome, cerebral palsy, etc. and the factors that influence the progression of motor skills.

Prerequisite(s): BMCH 8420 or permission from instructor.

BMKI 9691 MATHEMATICS OF BIOMECHANICAL DATA PROCESSING (3 credits)

Biomechanics is a rapidly changing and technologically dependent field of study. A thorough understanding of the factors influencing outcome measures is critical to correctly interpreting results. Students will be exposed to various data acquisition systems, approaches, and choices required to assess the computational aspects of biomechanical data critically. This course will equip students to complete independent processing from raw data to 3D joint angles and forces. (Cross-listed with BMCH 8690).

Prerequisite(s): Departmental Permission

BMKI 9701 PSYCHOLOGY OF PHYSICAL ACTIVITY (3 credits)

The central purpose of this course is to examine the psychological antecedents and consequences of exercise and physical activity behaviors. The course will focus on traditional theories/principles of psychology as they relate to various physical activity settings. (Cross-listed with KINS 8700).

BMKI 9810 HIGHER EDUCATION TEACHING SEMINAR (3 credits)

The seminar is designed to prepare students for entry into a higher education teaching career. This seminar requires doctoral students to teach an undergraduate or graduate lecture course relevant to their field of preparation. The seminar includes an examination of the roles, responsibilities, and privileges associated with teaching in higher education.

Prerequisite(s): Admittance to the UNO Doctoral Program in Biomechanics and Kinesiology and successful completion of 24 hours of doctoral coursework and approval from advisor. Not open to non-degree graduate students.

BMKI 9820 SERVICE EXPERIENCE IN HIGHER EDUCATION (3 credits)

This seminar will allow students the opportunity to gain valuable knowledge of the service expectations of faculty in higher education settings. The seminar will focus on service opportunities within the university, within the profession and within the community. Participants in the seminar will complete appropriate service activities.

Prerequisite(s): Admittance to the UNO Doctoral program in Biomechanics and Kinesiology, successful completion of 24 hours of doctoral coursework, and approval from advisor. Not open to non-degree graduate students.

BMKI 9851 EXERCISE FOR SPECIAL POPULATIONS (3 credits)

The course will examine the physiological and medical limitations imposed on people with various common chronic diseases/conditions including arthritis, osteoporosis, exercise-induced asthma, obesity, diabetes, hypertension and pregnancy. Special groups such as children and elders will be discussed. Content will emphasize the etiology and guidelines for exercise testing, prescription, and supervision. (Cross-listed with HEKI 8850).

Prerequisite(s): PE 4940/KINS 4940 or PE 8946/KINS 8946

BMKI 9870 MUSCULOSKELETAL SIMULATION (3 credits)

This course covers knowledge and skills needed to generate dynamic models, analyses, and simulations of the human musculoskeletal system for different types of movement. In this course, students build and analyze computer simulations implemented on common software platforms to gain insight into movement biomechanics and control. The materials covered in this course may be of interest to engineers, physical therapists, and biomedical researchers looking to apply their technical skills to solving clinical problems. This course emphasizes the technical skills necessary to conduct and analyze musculoskeletal simulations of movement.

Prerequisite(s): Department Permission.

BMKI 9910 DOCTORAL SEMINAR (1-24 credits)

The major goal of this course is to teach the graduate student how to write manuscripts/grants and be an effective academician with strong ethics. The outcome of this course is for the student to produce a manuscript based on data acquired in the laboratory from the ideas developed in the seminar or submit a grant that will support the research ideas developed in at least one semester. The material covered is intended to equip students with the skills necessary to be successful in their academic careers with emphasis given on writing scientific papers.

Prerequisite(s): Admission into the PhD program. Not open to non-degree graduate students.

BMKI 9911 INDEPENDENT STUDY IN BIOMECHANICS (1-6 credits)

This is a variable credit course designed for graduate students in Biomechanics who would benefit from independent reading assignments and problems. Independent study enables individual students or a small group of students to focus on topics typically not explored in other offerings or to explore topics currently offered in further depth. (Cross-listed with BMCH 8910).

Prerequisite(s): Graduate student in BMCH and approval by Faculty Advisor. Not open to non-degree graduate students.

BMKI 9951 ADVANCED EXERCISE PHYSIOLOGY (3 credits)

A detailed analysis of selected topics including acute and chronic effects of exercise on metabolic, pulmonary, and cardiovascular function; and sports nutrition. Current research findings and methodology will be emphasized. (Cross-listed with KINS 8950).

Prerequisite(s): PE 4940/KINS 4940 or equivalent

BMKI 9960 ADVANCED EXERCISE PHYSIOLOGY II (3 credits)

The focus of this course is a detailed analysis of the mechanisms responsible for acute and chronic responses to exercise at the cellular and molecular level. Current and historical research will be emphasized.

Prerequisite(s): PE 8950/KINS 8950 or BMKI 9951/PE 9951/KINS 9951. Not open to non-degree graduate students.

BMKI 9971 TOPICS IN SPORTS MEDICINE (3 credits)

This course is designed to help students synthesize and apply their knowledge of athletic training and sports medicine to current topics, unique populations, and other areas of exercise, sports medicine and health care. (Cross-listed with KINS 8970).

BMKI 9990 DISSERTATION (1-15 credits)

The course provides doctoral candidates in Biomechanics & Kinesiology with a process to complete a dissertation research plan. The course learning activities will focus on the completion of a candidate's dissertation. The course is designed to allow advanced doctoral candidates to demonstrate technical mastery of the discipline and to advance knowledge by completing an investigation.

Prerequisite(s): Admittance to UNO Doctoral Program in Biomechanics & Kinesiology, successful completion of doctoral coursework & comprehensive exams, dissertation supervisory committee chair approval & advancement to candidacy. Not open to non-degree graduate students.

Black Studies (BLST)

Black Studies Graduate Courses

BLST 8020 RACE, ETHNICITY, AND AMERICAN CULTURE (3 credits)

This course explores two central themes, race and ethnicity, which have played a dominant role in the shaping of American society and American culture. (Cross-listed with UBNS 8020).

Prerequisite(s): BLST 1000, BLST 1100, or permission by the instructor.

BLST 8036 AFRICANA RELIGIONS (3 credits)

An introduction to religions in Africa and the diaspora, including African Traditional Religions, Christianity, Islam, and Afro-Caribbean religious traditions, using anthropological, historical, and other academic approaches to the study of religious and spiritual traditions. In particular, students will learn about the role of spirits, ancestors, witches, and other invisible agents in ideas and practices regarding health and healing. Finally, the class will examine the complex inter-relationships between religious ideas and practices and contemporary post-colonial political-economic realities, including the consequences of genocide and other human rights violations and the role of religious communities in social and economic development. (Cross-listed with RELI 8036, RELI 4030, BLST 4030).

BLST 8080 SPECIAL TOPICS IN BLACK STUDIES (3 credits)

Special Topics in Black Studies will cover courses on a particular or specific topic, not otherwise specifically covered in the courses of the BLST curriculum, using the theoretical and methodological tools of the discipline of Black Studies. The course will trace the historical evolution of that topic from its points of origin into the present, presenting a survey of the Black Studies discipline and research concerning a specific topic. Students will read works about and within the topic area, situating it within its economic, political, and social contexts as they relate to the Black Studies discipline and Africana communities.

Prerequisite(s): graduate standing

BLST 8110 GLOBAL SOCIAL ISSUES: CREATIVE AND CRITICAL ANALYSES (3 credits)

This course focuses on global cultural and social forces and how they interact to form nexuses of both opportunity and obstacle to constructive human engagement on a wide array of social issues. An overview of topics covered in the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. This course will provide students with the analytical tools, collaborative engagement skills, and applied problem-solving techniques that will help students succeed in this concentration and program. (Cross-listed with CACT 8110)

Prerequisite(s): Graduate standing.

BLST 8156 AFRICAN AMERICAN PSYCHOLOGY (3 credits)

African American Psychology traces the psychological history of Africans and African Americans from self-attributes and identity, through race and racism, to cognition, learning, and language. This course will review concepts relevant to understanding the psychology of African Americans, methodological and research issues, and best practices. (Cross-listed with BLST 4150, PSYC 4150, PSYC 8156).

Prerequisite(s): BLST 1000 and Junior standing or Instructor permission

BLST 8216 THE HARLEM RENAISSANCE (3 credits)

"The Harlem Renaissance" was the name given to the explosion in cultural, artistic, and social awareness that occurred primarily in Harlem, an area of New York City, between the end of World War I and the middle of the 1930s. This course will familiarize students with the general characteristics of African American literature produced during this period and its relation to African American literature and American literature writ large. The selected texts and writers will provide particular insight into the historical experiences of African Americans in the U.S. primarily between the two world wars and inform the subsequent cultural production of African Americans in later years. (Cross-listed with ENGL 8216, ENGL 4210, BLST 4210).

BLST 8226 PAN AFRICANISM & BLACK LIBERATION (3 credits)

The Pan-Africanism and Black Liberation course will expose students to the historical origins and development of Pan-Africanism, and the connection to global Black liberation movements. In this course, students will learn about the origin of Pan-Africanism, including major Pan-African leaders and historical events; the definitions of Pan-Africanism, Black Nationalism, Ethiopianism, and Negritude; and the commonalities and linkages between African continental and diasporic Pan-African liberation movements. Students will critically examine the differences between Pan-Africanism as an ideological, political, and cultural movement, and will explore the evolution of Pan-African ideology and philosophy in the 21st century. (Cross-listed with BLST 4220).

Prerequisite(s): BLST 1000, BLST 2410, or permission of instructor.

BLST 8266 WOMEN OF COLOR WRITERS (3 credits)

Women of Color Writers is designed to introduce graduate students to the multicultural, literary experience, creativity and contributions of women of color writers to contemporary world literature. (Cross-listed with BLST 4260)

BLST 8356 THE BLACK ATLANTIC (3 credits)

This course examines the cultural and ethnic history of Black people who comprised "The Black Atlantic." The course is organized historically and begins with a brief overview of the European slave trade on the West African Coast in the 15th century. From there, we look critically at the arrival of Africans to the New World, examine varieties of slavery and freedom in the Americas, and conclude with slave revolts and emancipation activism in the 18th and 19th century. We will use the Haitian Revolution (in which Haiti became the first country to be founded by formerly enslaved people) as a special case study, a conduit for our exploration of this socio-cultural, economic, and Diasporic space. (Cross-listed with BLST 4350, HIST 4080, HIST 8086).

Prerequisite(s): Graduate standing

BLST 8476 SOUTH AFRICA & THE SOCIO POLITICS OF APARTHEID (3 credits)

South Africa and the Socio Politics of Apartheid examines the lived experiences of South African people under the Apartheid system, and their long struggle against European colonial oppression and racial segregation throughout the 20th century. Students will examine the laws, tools, and strategies that developed and sustained Apartheid, and the anti-Apartheid movements and international pressure that led to its repeal and South African democratic elections. (Cross-listed with BLST 4470, PSCI 8476, PSCI 4470, SOC 8476, SOC 4470).

Prerequisite(s): Graduate standing

BLST 8570 SEMINAR IN BLACK STUDIES (3 credits)

This graduate seminar offers topics to be covered related to the academic field of Black Studies. The seminar topics may vary but will focus on the theories, methods, and intellectual traditions of the Black Studies discipline. The course will use scholarly documents and texts to cover historical and contemporary fundamentals related to the discipline and will vary in different semesters.

Prerequisite(s): graduate standing

BLST 8580 SEMINAR IN RESEARCH AND WRITINGS OF W.E.B. DUBOIS (3 credits)

This course examines the life and writings of W.E.B. DuBois, who stands as the most eminent intellectual produced by people of African descent in the United States. Perhaps, next to Cheikh Anta Diop, DuBois is the most respected and honored African scholar of the 20th century. Within the context of Western traditions, DuBois is in the top category of prodigious intellectuals developed in the West. He is the father of modern American sociology, the founder of reconstruction history, the leader in urban analysis, the first serious student of inter-racial relations, as well as a novelist, poet, playwright, and essayist.

BLST 8586 COMMUNICATING RACE, ETHNICITY & IDENTITY (3 credits)

This is an undergraduate/graduate course that provides students with definitional and experiential knowledge about the origin of racial concepts, theories, and practices, definitions of ethnicity and identity, and the communicative relationship between race, ethnicity, and identity. (Cross-listed with BLST 4580, CMST 4580, CMST 8586)

BLST 8596 AFRICAN-AMERICAN POPULAR MUSIC FROM BEBOP TO HIP-HOP (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of African-American popular music literature from c. 1900-present. The objective will be to provide the student with a broad overview with special attention given to musicians and individual works which typify a style or form. Listening assignments will be an integral part of the course, and attendance at live performances will supplement the lectures, discussions and readings. (Cross-listed with BLST 4590).

BLST 8656 SLAVERY AND RACE RELATIONS IN THE AMERICAS (3 credits)

Slavery and Race Relations in the Americas examines the historical relationship between the trans-Atlantic slave trade and American race relations, connecting the enslavement of Africans in the Americas to race relations in the Caribbean, Latin America, and the United States. (Cross-listed with BLST 4650, HIST 4070, HIST 8076, LLS 4650, LLS 8656).

Prerequisite(s): Graduate standing

BLST 8700 AFRICAN PHILOSOPHY (3 credits)

Explores ancient, traditional and contemporary philosophical/theological concepts and doctrines of Africans through an investigation of their cosmological, metaphysical, ontological, and ethical world view.

Prerequisite(s): Graduate status.

BLST 8716 BROWN V. BOARD OF EDUCATION (3 credits)

Brown v. Board of Education traces the educational history of African Americans from segregation to desegregation to re-segregation. This course will review the legal cases before and after the Supreme Court's Brown decision, their aftermath, and the effects on educational policies and practices. (Cross-listed with BLST 4710, PSCI 8136, PSCI 4130).

Prerequisite(s): Graduate standing or instructor permission

BLST 8756 CRITICAL QUANTITATIVE RESEARCH METHODS (3 credits)

This online undergraduate/graduate course is a comprehensive source for foundational concepts in quantitative behavioral research. The course is designed to expose students to the role and importance of critical quantitative research of marginalized and underrepresented groups. Students will examine and gain definitional and empirical knowledge about conducting culturally relevant quantitative research and will learn both the logic behind and procedures for critical quantitative research, including research ethics, correlational and experimental designs, data collection, sampling, analysis, and reporting. (Cross-listed with BLST 4750).

Prerequisite(s): Graduate student or instructor permission

BLST 8886 BLACK LEADERSHIP IN AMERICA (3 credits)

Designed as a senior and graduate seminar, Black Leadership in America will examine the meaning and attributes of effective leadership strategies of African Americans, particularly as it relates to Black student leaders. The role of Black leadership will be explored using leadership and community theory, and will highlight the impact of Black culture within the broader American experience. (Cross-listed with BLST 4880).

Prerequisite(s): Senior or graduate student or instructor permission.

Business Administration (BSAD)

Business Administration Graduate Courses

BSAD 8000 BUSINESS ETHICS: ACHIEVING SOCIAL RESPONSIBILITY (2 credits)

This core MBA course will explore the relationship between law and ethics, will examine the generally-accepted theoretical principles associated with doing business ethically, and will examine practical ethical issues associated with various facets of business.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent) or admission to the MAcc program. Students with an undergraduate major or a graduate degree in Law may not include this course in a plan of study for the MBA degree. Not open to non-degree students

BSAD 8020 ENVIRONMENTAL ECONOMICS AND MANAGEMENT (3 credits)

This course covers topics related to environmental economics and policy, with an emphasis on comparative policy analysis and business strategies towards the environment. (Cross-listed with ECON 8020)

Prerequisite(s): Principles of Microeconomics (ECON 2200) and Principles of Macroeconomics (ECON 2220), or Analytical Foundations of Economics (BSAD 8180), or permission of the instructor. Not open to non-degree graduate students.

BSAD 8026 RESEARCH METHODS IN ECONOMICS AND BUSINESS (3 credits)

Covers the methodology of economics: choosing a research topic, literature search tools, data source identification, data summary techniques, basic statistical data analysis using statistical packages, and clear economics writing. The student will become familiar with these techniques through text materials, journal studies, and completion of an empirical economics paper.

Prerequisite(s): Graduate standing. Not open to nondegree students.

BSAD 8030 INFORMATION TECHNOLOGY IN BUSINESS (3 credits)

The premise of this course is that today's managers must learn to use information technology to create competitive firms, manage global corporations and provide useful products and services to customers. Accordingly, the content of this course is focused on use of information technology for competitive advantage. Students will develop case studies of firms who have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application.

Prerequisite(s): Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent). Not open to nondegree students.

BSAD 8040 BUSINESS AND INFORMATION TECHNOLOGY: CONNECTING PEOPLE AND INFORMATION (2 credits)

The premise of this course is that today's managers must learn to use information technology to create competitive firms, manage global corporations and provide useful products and services to customers. Accordingly, the content of this course is focused on use of information technology for competitive advantage. Students will develop case studies of firms who have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in management information systems may not include this course in a plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8060 PEOPLE: CULTIVATING SKILLS FOR LEADERSHIP (2 credits)

This course will prepare students with the skills to effectively enact the critical leadership skills of listening, employee feedback and coaching, goal-setting, empowerment/delegation, influencing, interviewing, conflict, negotiation, intercultural awareness, team/group discussions, and business etiquette.

Prerequisite(s): Admission to the MBA program. Not open to non-degree graduate students.

BSAD 8066 HEALTHCARE ANALYTICS FOR BUSINESS (3 credits)

This course will focus on the use of analytics to develop key performance indicators that integrate and evaluate clinical, administrative, and financial performance. Key concepts in this course will include information management, performance metrics, data visualization, and communication of results across the healthcare ecosystem. Specific topics will include health outcomes analysis, financial performance, developing an analytics strategy, data quality and governance, and the four stages of actionable intelligence. (Cross-listed with MGMT 4060, SCMT 4060).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8070 COACHING & DEVELOPING OTHERS (2 credits)

Organizational leaders must effectively coach and develop others in order to ensure sustainable long-term organizational performance. Both through one-on-one feedback and coaching as well as through strategy-aligned organizational-level talent development programs, leaders establish the organization's culture of employee development and growth.

Prerequisite(s): Admission to Executive MBA Program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8076 INTERNATIONAL LOGISTICS MANAGEMENT (3 credits)

This course will focus on the logistics of international trade and how managers facilitate the flow of goods and services in import and export environments. Students will learn about infrastructure and business practices needed to manage international transportation, communications, services, and regulatory requirements. Students will develop an understanding of international terms of trade, transaction risk management, and location decisions for placement of warehouses and distribution centers. (Cross-listed with SCMT 4070).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8080 BUSINESS FORECASTING (3 credits)

The course will cover forecasting tools and applications applied to business settings. The first half of the course will cover traditional Econometric forecasting methods and the second half of the course will focus on predictive analytics models and machine learning. Time in the computer lab will be focused on teaching students how to implement the models discussed in lectures. (Cross-listed with ECON 8310).

Prerequisite(s): ECON 8320 (or equivalent programming experience) or permission of instructor. Not open to non-degree graduate students.

BSAD 8090 ESSENTIAL LEADERSHIP SKILLS (3 credits)

This course will teach students the interpersonal skills necessary to effectively manage others. Second, this course will serve as a vehicle to assess the business content knowledge and computer literacy of incoming MBA students in order to provide customized remediation recommendations for each student. Third, the course will collect information that will be used for assessment and accreditation purposes to evaluate the effectiveness of the MBA program. This course will address the following MBA program themes: communication, change agent, teamwork, information technology, critical thinking and information gathering and analysis.

Prerequisite(s): Admission to the MBA program and completion of MBA foundation courses (or equivalent) or may be taken concurrently with the final foundation course. Not open to nondegree students.

BSAD 8096 MANAGING COLLABORATIVE ENGAGEMENT (3 credits)

This course will provide students with the opportunity to develop knowledge and strategies for leading teams, enhancing collaboration, building consensus, problem solving in teams, facilitating group processes, and designing collaborative workspaces. (Cross-listed with MGMT 4090, ITIN 4090)

Prerequisite(s): Admission to a graduate program at UNO or the STRATCOM Leader Fellow Program. Not open to non-degree students.

BSAD 8100 MANAGERIAL ECONOMICS (3 credits)

The course will offer students tools of analysis drawn from consumer theory and the theory of the firm in order to improve the understanding of human behavior as it is constrained in the context of business decision-making. This course is intended for students who are seeking the degree of Master of Science in Economics or the degree of Master of Business Administration.

Prerequisite(s): ECON 2200 and 2220 or BSAD 8180 and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to nondegree students.

BSAD 8110 ACCOUNTING AND FINANCIAL FUNDAMENTALS (3 credits)

The course is designed to give incoming graduate students the foundation in accounting that is necessary for subsequent graduate courses. Emphasis is on introducing the students to as many accounting concepts as possible.

Prerequisite(s): Graduate admission or permission of the appropriate graduate advisor. This course cannot be used in a plan of study for any graduate program at UNO. Not open to non-degree graduate students.

BSAD 8136 HUMAN RESOURCE MANAGEMENT (3 credits)

This course is a comprehensive review of human resource management concepts and practices. The course is designed to educate future managers and leaders on the importance of utilizing effective human resource methods that comply with federal laws and provide the organization with high-quality talent that provides a competitive advantage. (Cross-listed with MGMT 4030).

Prerequisite(s): BSAD 8136 students do not have any prerequisite courses; however, BSAD 8250 (Organizational Behavior) is recommended prior to enrollment.

BSAD 8140 BUSINESS INTELLIGENCE ANALYSIS (2 credits)

In BSAD 8440 you learned how to extract and manipulate data in a business intelligence tool. In this class you will learn to use this data to extract business knowledge. To do this, you will learn about the data model, methods of aggregation, and visualizations in the business intelligence (BI) software.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8440. Not open to non-degree graduate students.

BSAD 8146 TOTAL REWARDS (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee compensation and benefit programs. The course is designed to enable future managers and human resource professionals to utilize effective strategies for managing the single largest controllable expense for organizations; employee pay and benefits. (Cross-listed with MGMT 4010).

Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8150 ECONOMICS: ESSENTIAL CONCEPTS FOR MANAGERS (2 credits)

This course exposes MBA students to fundamental economic concepts necessary for successful business planning and financial success. Topics include: Comparative advantage and international trade, market dynamics, the role that the competitive landscape plays in company decision-making, macroeconomic growth and development, and monetary and fiscal policy and their impact on business activity.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in economics may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8156 TALENT DEVELOPMENT (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee training and development programs to optimize human capital effectiveness in modern organizations. The course is designed to enable future managers and human resource professionals to utilize effective strategies for assessing employee training needs and developing appropriate solutions to maximize talent utilization. (Cross-listed with MGMT 4120).

Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8160 INTERMEDIATE ANALYTICS (2 credits)

Business Intelligence software tools are statistical in nature. Many of the visualizations/widgets use statistics "under the hood" to provide insights to you the user. Can you trust these insights? How are they calculated? When are they appropriate? In this class, you will learn the answers to these questions.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8140. Not open to non-degree graduate students.

BSAD 8166 STAFFING THE ORGANIZATION (3 credits)

This course is a comprehensive review of issues and techniques related to the acquisition of high-quality human resources for optimal organizational effectiveness. The course is designed to enable future managers and human resource professionals to utilize effective strategies for recruiting, selecting, placing, and integrating new employees into the organization's workforce. (Cross-listed with MGMT 4110).

Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8176 EMERGING TRENDS IN SUPPLY CHAIN MANAGEMENT (3 credits)

This course will focus on megatrends influencing supply chain management and design in the 21st century. Key concepts in this course will include contemporary opportunities and challenges in creating customer value via the supply chain with a focus on globalization, sustainability, and risk management. Specific topics will include the influence of the empowered customer on supply chain design, global supply chain trends, and the need for integration of technology and talent to create a competitive advantage. (Cross-listed with SCMT 4170).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8190 APPLICATIONS IN ANALYTICS (2 credits)

What is a 'business question' and how do you answer it with data? In this class you will learn to form testable business questions. This course will build on the knowledge you gained in BSAD 8440, BSAD 8140, and BSAD 8160 to answer your business questions with the help of business intelligence software.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8160. Not open to non-degree graduate students.

BSAD 8200 MANAGERIAL ACCOUNTING (3 credits)

A study of concepts, analysis and procedures of accounting utilizing internal financial and non-financial data which provides management with information for planning and controlling routine operations, for non-routine decisions, policy-making and long-range planning; and for external reporting to stockholders, governments and interested parties.

Prerequisite(s): ACCT 2010 and 2020 or BSAD 8110, and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to nondegree students.

BSAD 8206 CONSULTATIVE SELLING PRINCIPLES (3 credits)

The primary focus of the Consultative Selling Principles course is to develop the behaviors, methodologies, principles, and processes required to successfully lead and manage complex selling initiatives to a win-win close. The course examines and applies, through role playing and other activities, the critical relationship building, critical thinking, problem solving, listening and negotiating capabilities which are the foundation skills underlying consultative selling. (Cross-listed with MKT 4200)

Prerequisite(s): MKT 3310 with 'C+' or better; MKT 3100 with C+ or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8210 ACCOUNTING: DECISIONS & CONSEQUENCES (2 credits)

Managers and administrators must be able to understand, analyze, and use accounting information to make operational and strategic business decisions. In this course, we will study practical uses of accounting information to address the problems and decisions managers face in business. Emphasis is placed on the user of accounting information rather than the preparer. Upon completion of this course, a student should be able to use accounting information to make management decisions, understand how accounting rules inform those decisions, and consequently, how those decisions affect a company's financial reports.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or graduate degree in accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8216 SELLING FINANCIAL SERVICES (3 credits)

Selling Financial Services concentrates on methods to effectively sell services and products in the financial services industry, including the banking, brokerage and insurance sectors. Targeting, initiating, and acquiring client relationships, expanding business opportunities, and maintaining long-term client relationships are the course's focal points. This integrative course is designed to provide students with a basic understanding of the selling profession and sales culture within the financial services industry. (Cross-listed with MKT 4210, FNBK 4210).

Prerequisite(s): Not open to non-degree graduate students.

BSAD 8220 ADVANCED APPLICATIONS IN ANALYTICS (2 credits)

Using the knowledge gained in BSAD 8440, BSAD 8140, BSAD 8160, and BSAD 8190, each student in this course will work individually to apply the entire business analytics process (starting with data collection and ending with using results to make informed decisions) to a real problem in their own organization.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8190. Not open to non-degree graduate students.

BSAD 8226 GLOBAL STRATEGIC ACCOUNT MANAGEMENT (3 credits)

Throughout this course, the management of strategic account programs at national, multi-country, and global levels will be addressed. The primary focus of the curriculum is on the critical success factors for driving revenue, sustainable long term-growth and profitability with a base of core strategic buyers.

Prerequisite(s): Senior or graduate student standing and permission of the instructor. Not open to non-degree graduate students.

BSAD 8230 LEADING CHANGE & INNOVATION (2 credits)

This course focuses on providing leaders with the knowledge and ability to lead organizational change and enhance organizational innovation. Topics include organizational culture, organizational design, and organizational processes (including reward systems).

Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8240 EFFECTIVE LEADERSHIP OF PEOPLE (2 credits)

This course aims to enhance the leadership effectiveness of students by developing knowledge of what constitutes effective leadership and how to apply leadership concepts and models.

Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8250 ORGANIZATIONAL BEHAVIOR: ENHANCING HUMAN & ORGANIZATIONAL CAPABILITIES (2 credits)

This course will prepare students with the knowledge necessary to manage and lead organizations effectively. Students will learn management theories, understand important research findings in organizational behavior, and apply both theory and research results to real organizational situations, thus giving them the capacity to use OB theories to enhance organizational effectiveness.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in management may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8260 EFFECTIVE USE & REPORTING OF ACCOUNTING INFORMATION (2 credits)

This course focuses on the use and reporting of accounting information, with an emphasis on financial statements and how executive decisions can influence these statements. Financial statements, including footnotes and explanatory material, are the primary instruments utilized by parties external to the enterprise in making judgments about the enterprise. By understanding how management decisions are reflected in the financial statements, managers will understand how they can influence their judgment.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8280 EMPLOYEE RECRUITMENT, ENGAGEMENT, AND RETENTION (2 credits)

Effective recruitment, engagement, and retention of highly motivated and high performing employees is critical for organizational success. This course will address the key organizational characteristics that must be in place for this to occur.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership.

BSAD 8300 ORGANIZATION THEORY & DESIGN (3 credits)

This course is designed to increase students' understanding and knowledge of how organizations are designed and structured in order to create value and competitive advantage, and how organizations can operate in an effective and efficient manner in an ever-changing environment. The course will address topics such as: organizational effectiveness, organizational structure, organizational design, organizational culture, organizational technology, the external environment, organizational change, and the organizational life cycle. The ultimate goal is for students to be able to understand how organizations should be structured as a result of both external and internal factors.

Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8310 MANAGING PERFORMANCE IN ORGANIZATIONS (3 credits)

A human behavior course emphasizing the areas of individual behavior, interpersonal behavior, group behavior and the interplay of human and non-human factors.

Prerequisite(s): Essential Leadership Skills (BSAD 8060) or admission to the MAcc program. Not open to nondegree students.

BSAD 8326 SALES MANAGEMENT (3 credits)

The student will be exposed to current research findings in sales management and to business cases and simulations where sales management theories and concepts will be applied. This course will prepare students to develop and implement specific compensation, motivation, and evaluation strategies for managing sales professionals across a wide variety of organizations. (Cross-listed with MKT 4320.)

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8330 LEADING TEAMS (2 credits)

This course focuses on building and leading high-performing teams in organizations. Topics include how to evaluate team effectiveness, how to create and develop teams that are cohesive and high-performing, how to lead and facilitate teams, and how to diagnose and intervene when teams are experiencing problems.

Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8336 PROJECT MANAGEMENT (3 credits)

This course will focus on the planning and execution of complex projects within an organization. Students will learn how to conduct stakeholder analysis, plan the scope of a project, develop a project budget, lead a project team, and define the steps necessary to bring a complex project to a successful conclusion. Students will recognize how the strategy, structure, and culture of an organization can be used to identify and prioritize complex projects. (Cross-listed with MGMT 4330, SCMT 4330)

Prerequisite(s): Admission to Graduate College, MBA Program; or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8340 INTERNATIONAL BUSINESS STUDY ABROAD (3 credits)

This course provides students with an international business and cultural experience through a study tour in a selected international location. Students will develop an understanding of the factors that affect international business decisions by visiting American companies operating abroad and foreign companies that export goods and services to the U.S.

Prerequisite(s): Instructor Permission.

BSAD 8345 CONSUMER BEHAVIOR (3 credits)

Consumers purchase, use, experience, and dispose of products and services as part of their consumption process. How and why consumers choose various brand options, form judgments about these brands, and decide which options to buy and/or re-buy are essential knowledge for marketing professionals. The course covers the psychological and social issues that guide consumption decisions. (Cross-listed with MKT 3320).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8356 GLOBAL SOURCING AND INNOVATION (3 credits)

This course focuses on global suppliers as partners in the development and commercialization of new products. Students will learn about open innovation and the integration of internal and external business systems in new product innovation. Students will develop an understanding of regulatory policies related to information sharing and the intellectual property rights of buyers and suppliers. (Cross-listed with SCMT 4350).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8360 EFFECTIVE MANAGEMENT OF CAPITAL STRUCTURE, CASH, & RISK (2 credits)

Students will develop strategic decision making skills by using financial concepts including time value of money, capital budgeting processes, cash flow forecasting and project risk analysis. Topics covered include: capital budgeting, financial statement analysis, capital structure, financial risk analysis.

Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8366 E-MARKETING (3 credits)

This course focuses on utilizing the Internet as a marketing platform. Course content includes discussion of how the Internet is used by businesses for designing products, pricing, promotions, distribution, positioning, gathering information, and cultivating relationships with stakeholders. The discussion about the rise of social media, sharing economy, virtual reality devices, and other relevant trends will also be part of the course. (Cross-listed with MKT 4360).

Prerequisite(s): BSAD 8400 with a grade of 'B' or above. Not open to non-degree graduate students.

BSAD 8370 LEADERSHIP IN DIVERSITY, EQUITY, ACCESS, AND INCLUSION (2 credits)

This course will focus on the role that organizational leaders play in proactively addressing organizational issues related to diversity, power, access, and equity. The course will explore tensions through the range of dimensions in which diversity is manifested among business leaders, staff, and stakeholders (which includes anyone impacted by the organization's business decisions - e.g., employees, contractors, suppliers, customers, and the community). Policies, systems, histories, structures, and legislation will also be discussed.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8376 SUPPLY CHAIN ANALYTICS (3 credits)

This course focuses on integrating supply chain management through the use of key performance indicators. Key concepts in this course include data visualization, supplier performance metrics, service-dominant logic, and the supply chain for data. Specific topics include the influence of the empowered customer on supply chain metrics, using metrics to develop a competitive advantage, data-driven decision making, and the four stages of actionable intelligence. (Cross-listed with SCMT 4370).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8380 EFFECTIVE SYSTEMS, OPERATIONS, AND IT (2 credits)

Students will learn how to employ decision-making skills to create a long-term competitive advantage for an organization through operational and technical excellence. Key concepts in this course will include developing a view of organizations as technical and behavioral systems, operations management, quality management, strategies related to IT procurement, deployment, maintenance and security, and the supply chain. Specific topics will include applied systems theory, process improvement, quality assurance, supply chain management, IT systems development strategies, and issues related to systems security, data security, and data privacy.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business

BSAD 8386 INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT (3 credits)

This course will focus on the strategic procurement of products and services in order to gain a competitive advantage through integrated supply management. Students will learn about strategic supply management, contract negotiation, and supplier quality management. Students will develop an understanding of supplier performance management through the use of supply chain information systems. (Cross-listed with MKT 4380, SCMT 4380)

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8396 MARKETING ANALYTICS (3 credits)

This course focuses on the application of data analytics in marketing decision making (e.g., segmentation, sales forecasting, and resource allocation). Students will learn to apply statistics and econometrics to solve marketing problems. Key topics in this course include marketing data visualization, marketing metrics, descriptive and predictive analytics, and digital marketing analytics. This course takes a very hands-on approach with real-world databases and equips students with tools that can be used immediately on the job. (Cross-listed with MKT 4370).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8400 MARKETING POLICIES (3 credits)

This course provides an introduction to the fundamental concepts of marketing, including a customer orientation, matched with attention to competition and core strengths. The course will illustrate strategies and principles that will help you understand how marketing managers, product managers or service managers must think through their situations, determine their goals and lay a course to achieve those goals.

Prerequisite(s): Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent); or admission to MAcc program. Not open to nondegree students.

BSAD 8416 DIVERSITY, EQUITY, ACCESS AND INCLUSION SOLUTIONS FOR MINIMIZING RISK (3 credits)

This course provides students an opportunity to explore the various aspects of power, access, and equity as it relates to the business environment. Students will explore tensions through the range of dimensions in which diversity is manifested among business leaders, staff, and stakeholders (include anyone impacted by business decisions, such as: employees, contractors, suppliers, customers, and the community) through policies, systems, histories, structures, and legislation. Students will have the opportunity to learn differences that individuals bring to a business environment and how stakeholders can capitalize on those differences by creating long-term inclusive environments. (Cross-listed with LAWS 4410).

Prerequisite(s): Admission to the MBA program. Not open to non-degree graduate students.

BSAD 8420 MARKETING: UNDERSTANDING CONSUMERS AND MARKETS (2 credits)

This course exposes MBA students to the fundamental concepts, practices and issues of marketing. A wide range of marketing practices and structures will be explored including product and service firms, consumer and business markets, profit and not-for-profit organizations, domestic and global companies, and small and large businesses.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in marketing may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8426 BUSINESS DEMOGRAPHICS (3 credits)

The goal of this course is to develop a demographic perspective in order to assist in understanding the business environment and business policy. How population change impacts consumer markets and all of the functions (for example, accounting, finance and management) that must exist for these markets to perform. Includes a history of population change and policy as well as a view toward international population considerations. (Cross-listed with MKT 4420).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8430 STRATEGIC BRAND MANAGEMENT (3 credits)

An exploration of the characteristics, meanings, and management of brands in the business world. The course examines brands as a strategic asset, and draws on managerial, consumer, and cultural perspectives.

Prerequisite(s): BSAD 8420 or permission of instructor. Not open to nondegree students.

BSAD 8435 MARKETING INNOVATION (3 credits)

Product, service, and process innovation are essential drivers of firm performance. However, firms face considerable and complex challenges when bringing innovative ideas to life. For example, what marketing research methods should we employ to uncover vital consumer insights? How do these insights influence the development and launch of new products and services? What differentiated value are we delivering to our consumers? How do we successfully bring this new product or service to market? How does a brand's purpose and personality influence consumers' perceptions, purchase decisions, adoption, and engagement? This course will cover key marketing principles involved in the development and launch of new and innovative products and services - from conception to commercialization. Furthermore, we will explore how new-age technologies impact each stage of the development and launch processes. (Cross-listed with MKT 3400).

Prerequisite(s): BSAD 8420 or equivalent; and admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8440 BUSINESS INTELLIGENCE DATA EXPLORATION (2 credits)

The first in any analytics project is to get data ready for analysis. In this class you will learn to extract data from a business data source and ready it for analysis in a business intelligence software tool. In the process you will learn tools necessary for this process including SQL, Power Query, M, and DAX.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics. Not open to non-degree graduate students.

BSAD 8450 SEMINAR IN MARKETING (3 credits)

Exploration, study and critical analysis of contemporary marketing problems, trends, methods and approaches for seminar discussion and written report.

Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8456 MANAGERIAL NEGOTIATION STRATEGIES (3 credits)

This course introduces students to the theory and practice of negotiation. The ability to negotiate successfully rests on a combination of analytical and interpersonal skills. In this course we will develop a set of conceptual frameworks that should help students better analyze negotiations in general and prepare more effectively for future negotiations in which they may be involved. This course is designed to help students better understand the theories, processes, and practices of negotiation, as well as conflict resolution and relationship management so that students can be more effective negotiators in a wide variety of situations. (Cross-listed with MGMT 4450, SCMT 4450).

Prerequisite(s): Admission to Graduate College, MBA Program, or by permission of the instructor.

BSAD 8466 SUPPLY CHAIN INTEGRATION (3 credits)

This course will focus on the integration of internal and external systems designed to maximize the efficiency and effectiveness of supply chain networks developed by industrial organizations, government agencies, and not-for-profit organizations. Key concepts will include supply chain design, trends in technology, and cross-functional collaboration, coordination, and communication along the value chain. Specific topics will include the influence of empowered customers on supply chain integration, global supply chain trends, closed-loop supply chains, and the challenges and benefits of integrating technology and talent in the workplace. (Cross-listed with SCMT 4460).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8476 BEHAVIORAL FINANCE & INVESTING (3 credits)

This course focuses on how actual investor behaviors and market behaviors differ from traditional theories of finance. This course will examine psychological biases, identify how such biases influence financial markets and settings, and explore methods that can be utilized to recognize and overcome such behavioral pitfalls. (Cross-listed with FNBK 4470).

Prerequisite(s): Admission to graduate college, MBA program, or by permission of instructor. Not open to non-degree graduate students.

BSAD 8480 GLOBAL ECONOMICS AND CORPORATE SOCIAL RESPONSIBILITY (2 credits)

In this course students will learn both how to apply global economic issues business strategy and how to balance socially responsible activities with the profit motive. With respect to global economics, topics include gains from trade, international trade patterns, foreign exchange markets, and barriers to trade. With respect to corporate social responsibility, topics include social responsibility and working conditions, socially responsible stewardship of the environment, and socially responsible strategies concerning human rights issues.

Prerequisite(s): Admittance to the Executive MBA Program or the Executive Certificate in Business.

BSAD 8510 SECURITY ANALYSIS (3 credits)

Study of the efficient market, fundamental and technical analysis approaches for the valuation of marketable securities. Methods of analysis are considered for the economy, industry groups and individual corporations.

BSAD 8520 SEMINAR INVESTMENT MANAGEMENT (3 credits)

This course focuses upon the modern portfolio theory of investment management and its application in formulation of policies for individuals and institutional investors. Topics addressed will include qualitative and quantitative analysis of the risks and returns of portfolio management using efficient market, fundamental analysis, and technical analysis approaches.

Prerequisite(s): BSAD 8510. Not open to nondegree students.

BSAD 8530 BANK & FINANCIAL MARKETS (3 credits)

This course focuses on the theory and practice in managing commercial banks. Topics covered include but not limited to: bank regulations, bank performance analysis, asset liability management, credit analysis and consumer loans. The course emphasizes the link between theory and practice through assigned course related readings, guest lecturers from industry experts, and a comprehensive bank research project on a local bank of your choice. At the end of the course, students should have a good understanding of basic banking theories as well as banking practices, and current issues and challenges facing the banking industry.

Prerequisite(s): BSAD 8500. Not open to non-degree graduate students.

BSAD 8540 MULTINATIONAL FINANCIAL MANAGEMENT (3 credits)

The focus of this course is on multinational financial management as viewed and practiced by the multinational firm and on current developments in international financial markets, including global banking. Familiarity with certain areas of the firm's environment, such as the international monetary system, the European Monetary System, and determination of exchange rates under alternative regimes, is essential to the international financial manager.

BSAD 8550 SEMINAR IN FINANCE (3 credits)

This course will address specific financial management topics which will vary by semester and is intended for graduate students.

BSAD 8560 MARKETING STRATEGY: CUSTOMERS AND MARKETS (2 credits)

This course will focus on how successful businesses match their objectives and resources with opportunities in the marketplace by identifying and measuring consumer needs, determining target markets and deciding which products and services to offer. This course will also address pricing, promotion, and distribution strategies to create competitive advantage in domestic and international markets.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8570 EFFECTIVE STRATEGIC MANAGEMENT (2 credits)

This course centers around the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. Students will develop the strategic thinking skills needed to formulate and execute successful strategies for firms/organizations in a variety of industries and dynamic environments. Emphasis is given to the contributions of several business disciplines of study, such as marketing, finance and management, to understanding both the internal operations of the organization and the influences of the external environment. This course is integrative and introduces both the theory and practice that enables that integrative process.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8576 INVESTMENT MANAGEMENT FOR FINANCIAL ANALYSTS (3 credits)

This course provides critical knowledge needed for students pursuing a career in investment management. The topic areas bridge academic theory, current industry practice, and ethical and professional standards and comprehensively address the areas assessed in the Chartered Financial Analyst examinations. (Cross-listed with FNBK 4570)

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

BSAD 8590 EXECUTIVE MBA CAPSTONE PROJECT (4 credits)

Students in the Executive MBA capstone project course will complete an applied consulting project for an organization that requires them to integrate knowledge across multiple Executive MBA program knowledge areas. Students will identify the key problem(s) to be solved, use sound methodologies to gather necessary data, identify and employ relevant evidence-based research and practitioner literatures, apply relevant models and theories to guide the generation of potential solutions and implementation strategies, and identify the feasibility and financial implications of their proposed solution(s).

Prerequisite(s): Admission to the Executive MBA Program. Not open to non-degree graduate students.

BSAD 8596 RISK MANAGEMENT FOR BUSINESS MANAGERS (3 credits)

An analysis of risk management techniques for handling the risk exposures most businesses face, including insurance, self insurance, risk control, and risk avoidance, among others. (Cross-listed with FNBK 4590.)

BSAD 8600 REAL ESTATE FINANCE THEORY AND APPLICATIONS (3 credits)

This course explores advanced financial analysis tools and methodologies used to quantify complex factors surrounding real estate productivity, value, investment, and project feasibility. Specific course topics will coincide with student interest in one of three focus areas: Investment, Development, or Commercial Finance.

Prerequisite(s): RELU 3410 and BSAD 8630, or permission of Real Estate Program Director.

BSAD 8605 REAL ESTATE PRINCIPLES AND PRACTICES (3 credits)

This is a survey course in real estate principles and practices, which is designed to familiarize students with industry terminology, current practices, and cover the following topics: Licensure, property rights, legal descriptions, real estate law and contracts, appraisal, financing, investments, Fair Housing, and related topic areas. This course provides foundational knowledge of the real estate field and will prepare students to successfully complete more advanced real estate coursework. NOTE: Students cannot receive credit for both RELU 2410 and RELU 3410. (Cross-listed with RELU 3410).

Prerequisite(s): Admission to Graduate College, MBA Program, or permission of Real Estate Program Director.

BSAD 8606 FINANCIAL RISK MANAGEMENT (3 credits)

The course provides students with an intermediate level analysis of financial derivatives, and the use of these instruments for managing risk in financial institutions. (Cross-listed with FNBK 4600.)

Prerequisite(s): BSAD 8500 and 8510 or their equivalent, and graduate standing. Not open to nondegree students.

BSAD 8610 REAL ESTATE APPRAISAL (3 credits)

This course addresses the fundamentals of real estate valuation and appraising, including factors affecting value, valuing land, improvements, and special classes of residential property, appraisal practice and rules, depreciation and obsolescence, and the mathematics of appraising.

Prerequisite(s): RELU 3410 and BSAD 8630, or permission of instructor.

BSAD 8616 REAL ESTATE INVESTMENTS (3 credits)

This course focuses on methods used to analyze existing and proposed commercial and residential real estate investments through dynamic programming models, and explores strategies to finance commercial real estate. The class ultimately prepares students to understand the risks and rewards associated with financing and investing in real estate. (Cross-listed with RELU 4390).

Prerequisite(s): RELU 2410 or RELU 3410 or FNBK 3250 or BSAD 8605 or BSAD 8630

BSAD 8625 PROPERTY MANAGEMENT (3 credits)

This course focuses on commercial and residential property management concepts and their application to the operation, control, and oversight of real property. The course will study leasing, tenant selection and relations, maintenance, marketing, contract management, asset management principles, as well as Fair Housing Laws and the Americans With Disabilities Act as they pertain to property management. (Cross-listed with RELU 3450).

Prerequisite(s): BSAD 8605, or permission of the Real Estate Program Director.

BSAD 8626 REAL ESTATE DEVELOPMENT (3 credits)

This course focuses on the procedures and complexities in developing and redeveloping various commercial property types and mixed-use real estate. Topics include an overview of the real estate development process, assembling a team, identifying project stakeholders, financial analysis, site selection, market analysis, and the regulatory environment. (Cross-listed with RELU 4440).

Prerequisite(s): BSAD 8605 or BSAD 8630, or permission of the Real Estate Program Director.

BSAD 8630 FINANCE: UNDERSTANDING CAPITAL AND CASH (2 credits)

As a comprehensive introduction to financial management, the course will cover various fields of finance and discuss topics including the time value of money, bond and stock valuation, capital budgeting.

Prerequisite(s): BSAD 8060 or BSAD 8070, 8150 and 8210. Students with an undergraduate major or a graduate degree in finance or accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8640 IT: STRATEGIC DEVELOPMENT AND DEPLOYMENT (1 credit)

Students will gain a strategic perspective of information technology management, including current trends and best practices, and understand how technology can be used in competitive positioning. Processes for innovation and research and development spending and new business models will be covered.

BSAD 8650 VISION & STRATEGIC LEADERSHIP (2 credits)

This course focuses on the critical role that organizational leaders play in ensuring that the organization has a clear vision and a clear mission which are in alignment with the organization's business strategy and unit goals and effectiveness metrics. This course focuses on the mission and vision creation and communication process as well as vertical and horizontal goal alignment.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8660 FRONTIERS OF ANALYTICS (2 credits)

In this program, you have learned many analytics techniques. However, analytics is a constantly evolving field with increasingly advanced methods. What techniques might be presented to you as a manager? How do you interpret these results? In this class we will explore cutting-edge analytics methods and when they are appropriate for your business.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8160. Not open to non-degree graduate students.

BSAD 8696 EMERGING TECHNOLOGY AND INNOVATION (3 credits)

This course equips entrepreneurially-minded students with a more complete range and vision of the viability of various startup opportunities (with a specific focus on innovative technologies and innovative business models). Students will become familiarized with the new and emerging technologies and innovations that define modern industries and product categories, as well as the various shifts in the way cutting-edge business gets done, regardless of industry. (Cross-listed with ENTR 4690, MGMT 4690).

Prerequisite(s): Admission to a UNO graduate degree program or permission of instructor

BSAD 8700 BUSINESS ANALYTICS: MAKING SENSE OF DATA (2 credits)

The purpose of this course is to provide business managers with an understanding of the important role data analytics has assumed in today's organizations. Data analytics has become a key component in accomplishing strategic and operational goals. This course is designed to familiarize students with the concepts and principles of analytics. It is targeted for graduate or MBA students who have little or no background in analytics. Therefore, it focuses on breadth of coverage rather than depth in any specific area.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent); or admission to the MAcc program. Not open to non-degree graduate students.

BSAD 8710 SUPPLY CHAIN MANAGEMENT (3 credits)

This course will focus on supply chain management as a key functional area of organizational success. Students will learn about current techniques used by supply chain practitioners to make strategic and tactical decisions that support the overall strategy and day-to-day operations of an organization. Students will develop an understanding of how supply chain decisions and appropriate metrics of performance can be utilized to improve the operational efficiency and effectiveness of an organization.

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8720 STRATEGIC FINANCIAL MANAGEMENT (2 credits)

This course is intended to be advanced financial management. It will stress the theory and application of topics including, but not limited to capital budgeting, cash flow estimation, real options, capital structure, dividends and share repurchases, working capital management, budgeting, planning and forecasting, and lease management. The material covered in Strategic Financial Management will increase the student's knowledge of how to strategically manage financial resources to increase the intrinsic value of the organization.

Prerequisite(s): For MBA students, BSAD 8630. For MAcc students, completion of all Master of Accounting (MAcc) foundation courses. Not open to non-degree graduate students.

BSAD 8726 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with ENTR 4720, ITIN 4720, ITIN 8256, MGMT 4720, MKT 4720).

Prerequisite(s): Admission to a graduate program or by instructor permission

BSAD 8736 ECONOMICS OF ENTREPRENEURSHIP (3 credits)

This course will review economic theories of entrepreneurship with special emphasis on Schumpeter's theory of creative destruction. The main focus of the seminar will be on the "high-level" entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 4730, ECON 8436)

Prerequisite(s): ECON 2200 or permission of the instructor for all students

BSAD 8766 SELLING IN AN ENTREPRENEURIAL CONTEXT (3 credits)

Successful entrepreneurs are able to identify unmet needs in the marketplace and then design and sell products or services that fulfill those needs. Sales effectiveness is essential for entrepreneurs because they must be able to build sustainable sales pipelines that ensure profitable growth while simultaneously addressing other pressing issues including financing, staffing, and product development. This course will focus on consultative solution-based sales fundamentals that can be applied in an entrepreneurial selling environment. (Cross-listed with ENTR 4760, MKT 4760)

Prerequisite(s): GPA 2.5 or better; MKT 3100 with a "C+" or better; MKT 3310 with a "C+" or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8776 INTRODUCTORY MAVERICK VENTURE FUND (1 credit)

This course teaches the basics of venture capital, including, the topics of term sheets, due diligence and learning the perspectives of the entrepreneur and investor. Students in this course have the opportunity to observe more advanced students making investments, ranging from 5,000 dollars to 10,000 dollars plus. This course is the first of three, one-credit courses where students gain more advanced venture funding knowledge and application at each level. (Cross-listed with ENTR 4770).

Prerequisite(s): This course requires instructor approval. Students must apply and interview to take this course. Preference is given to students in their junior year, and must have three semesters of school left before graduating.

BSAD 8786 INTERMEDIATE MAVERICK VENTURE FUND (1 credit)

In this course, students source deals, listen to pitches, and select start-ups to be funded. Investments typically range from 5,000 dollars to 10,000 dollars plus. This course is the second in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4780).

Prerequisite(s): This course requires instructor approval. Students must have completed BSAD 8776 with a grade of C or better.

BSAD 8796 ADVANCED MAVERICK VENTURE FUND (1 credit)

This course applies advanced concepts of venture capital. Students will learn how to monitor and assist start-ups in the scaling process. Students learn how to leverage community partners to amplify investment opportunities. This course is the third in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4790).

Prerequisite(s): This course requires instructor approval. Students must have completed BSAD 8786 with a grade of C or better.

BSAD 8800 MBA PROJECT-FOCUSED CAPSTONE (2 credits)

In this Master's of Business Administration (MBA) required project-focused capstone course, students complete a service-learning consulting project for a non-profit or other type of organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program.

Prerequisite(s): Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 prior to Capstone and must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Not open to non-degree graduate students.

BSAD 8820 CONTEMPORARY BUSINESS ISSUES (1 credit)

This course exposes students to contemporary business issues that they are likely to experience as leaders. Students will examine and synthesize academic literature relevant to an instructor-approved specific topic associated with the contemporary business issue of focus. This course can be used for MBA students who need a one credit hour course to meet their credit hour graduation requirements.

Prerequisite(s): BSAD 8150 or permission of instructor. Not open to non-degree graduate students.

BSAD 8830 STRATEGY: DEVELOPING SUSTAINABLE COMPETITIVE ADVANTAGE (2 credits)

This course centers on the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. The primary objective of this course is to sharpen the ability of students to think strategically, to diagnose situations from a strategic perspective and to develop creative solutions to enable firms to achieve a sustainable competitive advantage.

Prerequisite(s): Students must successfully complete BSAD 8150 and BSAD 8210 before enrolling in this course. This course must be taken within the first 20 hours of the MBA program. Not open to non-degree graduate students.

BSAD 8880 ARTS AND THE EXECUTIVE (3 credits)

The course will provide the graduate student with an understanding of the organizational and managerial issues involved in an arts organization as the role of the arts in the business community.

Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8900 INDEPENDENT STUDY (1-6 credits)

In this independent study course, individual students are able to complete independent research in a business-related topic area under the supervision of a faculty member. Written independent study reports are expected to include appropriate academic citations and references.

Prerequisite(s): Graduate and permission of MBA Advisor. Requires submission of completed Independent Study Contract to MBA Advisor prior to registration. Not open to non-degree graduate students.

BSAD 8926 SPECIAL TOPICS IN BUSINESS (3 credits)

This business-focused special topics course is designed to provide students the opportunity to focus on a current or emerging topic in any area of business. An in depth exploration of the topic will be undertaken with the expectation that students will play an active role in the course and engage deeply with the material and concepts addressed within the focal topic area. (Cross-listed with BSAD 4920).

Prerequisite(s): Not open to non-degree graduate students.

BSAD 8990 THESIS (1-6 credits)

A research project, under the supervision of a faculty thesis adviser in the College of Business Administration, in which the student establishes his capacity to design, conduct and complete an independent, scholarly investigation of a high originality. The research topic and the completed project must be approved by the student's faculty thesis adviser and two other faculty members, one of whom must be from outside the program area.

Prerequisite(s): Permission of graduate adviser. Not open to non-degree graduate students.

BSAD 8000 BUSINESS ETHICS: ACHIEVING SOCIAL RESPONSIBILITY (2 credits)

This core MBA course will explore the relationship between law and ethics, will examine the generally-accepted theoretical principles associated with doing business ethically, and will examine practical ethical issues associated with various facets of business.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent) or admission to the MAcc program. Students with an undergraduate major or a graduate degree in Law may not include this course in a plan of study for the MBA degree. Not open to non-degree students

BSAD 8020 ENVIRONMENTAL ECONOMICS AND MANAGEMENT (3 credits)

This course covers topics related to environmental economics and policy, with an emphasis on comparative policy analysis and business strategies towards the environment. (Cross-listed with ECON 8020)

Prerequisite(s): Principles of Microeconomics (ECON 2200) and Principles of Macroeconomics (ECON 2220), or Analytical Foundations of Economics (BSAD 8180), or permission of the instructor. Not open to non-degree graduate students.

BSAD 8026 RESEARCH METHODS IN ECONOMICS AND BUSINESS (3 credits)

Covers the methodology of economics: choosing a research topic, literature search tools, data source identification, data summary techniques, basic statistical data analysis using statistical packages, and clear economics writing. The student will become familiar with these techniques through text materials, journal studies, and completion of an empirical economics paper.

Prerequisite(s): Graduate standing. Not open to nondegree students.

BSAD 8030 INFORMATION TECHNOLOGY IN BUSINESS (3 credits)

The premise of this course is that today's managers must learn to use information technology to create competitive firms, manage global corporations and provide useful products and services to customers. Accordingly, the content of this course is focused on use of information technology for competitive advantage. Students will develop case studies of firms who have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application.

Prerequisite(s): Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent). Not open to nondegree students.

BSAD 8040 BUSINESS AND INFORMATION TECHNOLOGY: CONNECTING PEOPLE AND INFORMATION (2 credits)

The premise of this course is that today's managers must learn to use information technology to create competitive firms, manage global corporations and provide useful products and services to customers. Accordingly, the content of this course is focused on use of information technology for competitive advantage. Students will develop case studies of firms who have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in management information systems may not include this course in a plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8060 PEOPLE: CULTIVATING SKILLS FOR LEADERSHIP (2 credits)

This course will prepare students with the skills to effectively enact the critical leadership skills of listening, employee feedback and coaching, goal-setting, empowerment/delegation, influencing, interviewing, conflict, negotiation, intercultural awareness, team/group discussions, and business etiquette.

Prerequisite(s): Admission to the MBA program. Not open to non-degree graduate students.

BSAD 8066 HEALTHCARE ANALYTICS FOR BUSINESS (3 credits)

This course will focus on the use of analytics to develop key performance indicators that integrate and evaluate clinical, administrative, and financial performance. Key concepts in this course will include information management, performance metrics, data visualization, and communication of results across the healthcare ecosystem. Specific topics will include health outcomes analysis, financial performance, developing an analytics strategy, data quality and governance, and the four stages of actionable intelligence. (Cross-listed with MGMT 4060, SCMT 4060).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8070 COACHING & DEVELOPING OTHERS (2 credits)

Organizational leaders must effectively coach and develop others in order to ensure sustainable long-term organizational performance. Both through one-on-one feedback and coaching as well as through strategy-aligned organizational-level talent development programs, leaders establish the organization's culture of employee development and growth.

Prerequisite(s): Admission to Executive MBA Program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8076 INTERNATIONAL LOGISTICS MANAGEMENT (3 credits)

This course will focus on the logistics of international trade and how managers facilitate the flow of goods and services in import and export environments. Students will learn about infrastructure and business practices needed to manage international transportation, communications, services, and regulatory requirements. Students will develop an understanding of international terms of trade, transaction risk management, and location decisions for placement of warehouses and distribution centers. (Cross-listed with SCMT 4070).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8080 BUSINESS FORECASTING (3 credits)

The course will cover forecasting tools and applications applied to business settings. The first half of the course will cover traditional Econometric forecasting methods and the second half of the course will focus on predictive analytics models and machine learning. Time in the computer lab will be focused on teaching students how to implement the models discussed in lectures. (Cross-listed with ECON 8310).

Prerequisite(s): ECON 8320 (or equivalent programming experience) or permission of instructor. Not open to non-degree graduate students.

BSAD 8090 ESSENTIAL LEADERSHIP SKILLS (3 credits)

This course will teach students the interpersonal skills necessary to effectively manage others. Second, this course will serve as a vehicle to assess the business content knowledge and computer literacy of incoming MBA students in order to provide customized remediation recommendations for each student. Third, the course will collect information that will be used for assessment and accreditation purposes to evaluate the effectiveness of the MBA program. This course will address the following MBA program themes: communication, change agent, teamwork, information technology, critical thinking and information gathering and analysis.

Prerequisite(s): Admission to the MBA program and completion of MBA foundation courses (or equivalent) or may be taken concurrently with the final foundation course. Not open to nondegree students.

BSAD 8096 MANAGING COLLABORATIVE ENGAGEMENT (3 credits)

This course will provide students with the opportunity to develop knowledge and strategies for leading teams, enhancing collaboration, building consensus, problem solving in teams, facilitating group processes, and designing collaborative workspaces. (Cross-listed with MGMT 4090, ITIN 4090)

Prerequisite(s): Admission to a graduate program at UNO or the STRATCOM Leader Fellow Program. Not open to non-degree students.

BSAD 8100 MANAGERIAL ECONOMICS (3 credits)

The course will offer students tools of analysis drawn from consumer theory and the theory of the firm in order to improve the understanding of human behavior as it is constrained in the context of business decision-making. This course is intended for students who are seeking the degree of Master of Science in Economics or the degree of Master of Business Administration.

Prerequisite(s): ECON 2200 and 2220 or BSAD 8180 and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to nondegree students.

BSAD 8110 ACCOUNTING AND FINANCIAL FUNDAMENTALS (3 credits)

The course is designed to give incoming graduate students the foundation in accounting that is necessary for subsequent graduate courses. Emphasis is on introducing the students to as many accounting concepts as possible.

Prerequisite(s): Graduate admission or permission of the appropriate graduate advisor. This course cannot be used in a plan of study for any graduate program at UNO. Not open to non-degree graduate students.

BSAD 8136 HUMAN RESOURCE MANAGEMENT (3 credits)

This course is a comprehensive review of human resource management concepts and practices. The course is designed to educate future managers and leaders on the importance of utilizing effective human resource methods that comply with federal laws and provide the organization with high-quality talent that provides a competitive advantage. (Cross-listed with MGMT 4030).

Prerequisite(s): BSAD 8136 students do not have any prerequisite courses; however, BSAD 8250 (Organizational Behavior) is recommended prior to enrollment.

BSAD 8140 BUSINESS INTELLIGENCE ANALYSIS (2 credits)

In BSAD 8440 you learned how to extract and manipulate data in a business intelligence tool. In this class you will learn to use this data to extract business knowledge. To do this, you will learn about the data model, methods of aggregation, and visualizations in the business intelligence (BI) software.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8440. Not open to non-degree graduate students.

BSAD 8146 TOTAL REWARDS (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee compensation and benefit programs. The course is designed to enable future managers and human resource professionals to utilize effective strategies for managing the single largest controllable expense for organizations; employee pay and benefits. (Cross-listed with MGMT 4010).

Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8150 ECONOMICS: ESSENTIAL CONCEPTS FOR MANAGERS (2 credits)

This course exposes MBA students to fundamental economic concepts necessary for successful business planning and financial success. Topics include: Comparative advantage and international trade, market dynamics, the role that the competitive landscape plays in company decision-making, macroeconomic growth and development, and monetary and fiscal policy and their impact on business activity.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in economics may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8156 TALENT DEVELOPMENT (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee training and development programs to optimize human capital effectiveness in modern organizations. The course is designed to enable future managers and human resource professionals to utilize effective strategies for assessing employee training needs and developing appropriate solutions to maximize talent utilization. (Cross-listed with MGMT 4120).

Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8160 INTERMEDIATE ANALYTICS (2 credits)

Business Intelligence software tools are statistical in nature. Many of the visualizations/widgets use statistics "under the hood" to provide insights to you the user. Can you trust these insights? How are they calculated? When are they appropriate? In this class, you will learn the answers to these questions.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8140. Not open to non-degree graduate students.

BSAD 8166 STAFFING THE ORGANIZATION (3 credits)

This course is a comprehensive review of issues and techniques related to the acquisition of high-quality human resources for optimal organizational effectiveness. The course is designed to enable future managers and human resource professionals to utilize effective strategies for recruiting, selecting, placing, and integrating new employees into the organization's workforce. (Cross-listed with MGMT 4110).

Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8176 EMERGING TRENDS IN SUPPLY CHAIN MANAGEMENT (3 credits)

This course will focus on megatrends influencing supply chain management and design in the 21st century. Key concepts in this course will include contemporary opportunities and challenges in creating customer value via the supply chain with a focus on globalization, sustainability, and risk management. Specific topics will include the influence of the empowered customer on supply chain design, global supply chain trends, and the need for integration of technology and talent to create a competitive advantage. (Cross-listed with SCMT 4170).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8190 APPLICATIONS IN ANALYTICS (2 credits)

What is a 'business question' and how do you answer it with data? In this class you will learn to form testable business questions. This course will build on the knowledge you gained in BSAD 8440, BSAD 8140, and BSAD 8160 to answer your business questions with the help of business intelligence software.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8160. Not open to non-degree graduate students.

BSAD 8200 MANAGERIAL ACCOUNTING (3 credits)

A study of concepts, analysis and procedures of accounting utilizing internal financial and non-financial data which provides management with information for planning and controlling routine operations, for non-routine decisions, policy-making and long-range planning; and for external reporting to stockholders, governments and interested parties.

Prerequisite(s): ACCT 2010 and 2020 or BSAD 8110, and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to nondegree students.

BSAD 8206 CONSULTATIVE SELLING PRINCIPLES (3 credits)

The primary focus of the Consultative Selling Principles course is to develop the behaviors, methodologies, principles, and processes required to successfully lead and manage complex selling initiatives to a win-win close. The course examines and applies, through role playing and other activities, the critical relationship building, critical thinking, problem solving, listening and negotiating capabilities which are the foundation skills underlying consultative selling. (Cross-listed with MKT 4200)

Prerequisite(s): MKT 3310 with 'C+' or better; MKT 3100 with C+ or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8210 ACCOUNTING: DECISIONS & CONSEQUENCES (2 credits)

Managers and administrators must be able to understand, analyze, and use accounting information to make operational and strategic business decisions. In this course, we will study practical uses of accounting information to address the problems and decisions managers face in business. Emphasis is placed on the user of accounting information rather than the preparer. Upon completion of this course, a student should be able to use accounting information to make management decisions, understand how accounting rules inform those decisions, and consequently, how those decisions affect a company's financial reports.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or graduate degree in accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8216 SELLING FINANCIAL SERVICES (3 credits)

Selling Financial Services concentrates on methods to effectively sell services and products in the financial services industry, including the banking, brokerage and insurance sectors. Targeting, initiating, and acquiring client relationships, expanding business opportunities, and maintaining long-term client relationships are the course's focal points. This integrative course is designed to provide students with a basic understanding of the selling profession and sales culture within the financial services industry. (Cross-listed with MKT 4210, FNBK 4210).

Prerequisite(s): Not open to non-degree graduate students.

BSAD 8220 ADVANCED APPLICATIONS IN ANALYTICS (2 credits)

Using the knowledge gained in BSAD 8440, BSAD 8140, BSAD 8160, and BSAD 8190, each student in this course will work individually to apply the entire business analytics process (starting with data collection and ending with using results to make informed decisions) to a real problem in their own organization.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8190. Not open to non-degree graduate students.

BSAD 8226 GLOBAL STRATEGIC ACCOUNT MANAGEMENT (3 credits)

Throughout this course, the management of strategic account programs at national, multi-country, and global levels will be addressed. The primary focus of the curriculum is on the critical success factors for driving revenue, sustainable long term-growth and profitability with a base of core strategic buyers.

Prerequisite(s): Senior or graduate student standing and permission of the instructor. Not open to non-degree graduate students.

BSAD 8230 LEADING CHANGE & INNOVATION (2 credits)

This course focuses on providing leaders with the knowledge and ability to lead organizational change and enhance organizational innovation. Topics include organizational culture, organizational design, and organizational processes (including reward systems).

Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8240 EFFECTIVE LEADERSHIP OF PEOPLE (2 credits)

This course aims to enhance the leadership effectiveness of students by developing knowledge of what constitutes effective leadership and how to apply leadership concepts and models.

Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8250 ORGANIZATIONAL BEHAVIOR: ENHANCING HUMAN & ORGANIZATIONAL CAPABILITIES (2 credits)

This course will prepare students with the knowledge necessary to manage and lead organizations effectively. Students will learn management theories, understand important research findings in organizational behavior, and apply both theory and research results to real organizational situations, thus giving them the capacity to use OB theories to enhance organizational effectiveness.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent).

Students with an undergraduate major or a graduate degree in management may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8260 EFFECTIVE USE & REPORTING OF ACCOUNTING INFORMATION (2 credits)

This course focuses on the use and reporting of accounting information, with an emphasis on financial statements and how executive decisions can influence these statements. Financial statements, including footnotes and explanatory material, are the primary instruments utilized by parties external to the enterprise in making judgments about the enterprise. By understanding how management decisions are reflected in the financial statements, managers will understand how they can influence their judgment.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8280 EMPLOYEE RECRUITMENT, ENGAGEMENT, AND RETENTION (2 credits)

Effective recruitment, engagement, and retention of highly motivated and high performing employees is critical for organizational success. This course will address the key organizational characteristics that must be in place for this to occur.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership.

BSAD 8300 ORGANIZATION THEORY & DESIGN (3 credits)

This course is designed to increase students' understanding and knowledge of how organizations are designed and structured in order to create value and competitive advantage, and how organizations can operate in an effective and efficient manner in an ever-changing environment. The course will address topics such as: organizational effectiveness, organizational structure, organizational design, organizational culture, organizational technology, the external environment, organizational change, and the organizational life cycle. The ultimate goal is for students to be able to understand how organizations should be structured as a result of both external and internal factors.

Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8310 MANAGING PERFORMANCE IN ORGANIZATIONS (3 credits)

A human behavior course emphasizing the areas of individual behavior, interpersonal behavior, group behavior and the interplay of human and non-human factors.

Prerequisite(s): Essential Leadership Skills (BSAD 8060) or admission to the MAcc program. Not open to nondegree students.

BSAD 8326 SALES MANAGEMENT (3 credits)

The student will be exposed to current research findings in sales management and to business cases and simulations where sales management theories and concepts will be applied. This course will prepare students to develop and implement specific compensation, motivation, and evaluation strategies for managing sales professionals across a wide variety of organizations. (Cross-listed with MKT 4320.)

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8330 LEADING TEAMS (2 credits)

This course focuses on building and leading high-performing teams in organizations. Topics include how to evaluate team effectiveness, how to create and develop teams that are cohesive and high-performing, how to lead and facilitate teams, and how to diagnose and intervene when teams are experiencing problems.

Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8336 PROJECT MANAGEMENT (3 credits)

This course will focus on the planning and execution of complex projects within an organization. Students will learn how to conduct stakeholder analysis, plan the scope of a project, develop a project budget, lead a project team, and define the steps necessary to bring a complex project to a successful conclusion. Students will recognize how the strategy, structure, and culture of an organization can be used to identify and prioritize complex projects. (Cross-listed with MGMT 4330, SCMT 4330)

Prerequisite(s): Admission to Graduate College, MBA Program; or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8340 INTERNATIONAL BUSINESS STUDY ABROAD (3 credits)

This course provides students with an international business and cultural experience through a study tour in a selected international location. Students will develop an understanding of the factors that affect international business decisions by visiting American companies operating abroad and foreign companies that export goods and services to the U.S.

Prerequisite(s): Instructor Permission.

BSAD 8345 CONSUMER BEHAVIOR (3 credits)

Consumers purchase, use, experience, and dispose of products and services as part of their consumption process. How and why consumers choose various brand options, form judgments about these brands, and decide which options to buy and/or re-buy are essential knowledge for marketing professionals. The course covers the psychological and social issues that guide consumption decisions. (Cross-listed with MKT 3320).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8356 GLOBAL SOURCING AND INNOVATION (3 credits)

This course focuses on global suppliers as partners in the development and commercialization of new products. Students will learn about open innovation and the integration of internal and external business systems in new product innovation. Students will develop an understanding of regulatory policies related to information sharing and the intellectual property rights of buyers and suppliers. (Cross-listed with SCMT 4350).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8360 EFFECTIVE MANAGEMENT OF CAPITAL STRUCTURE, CASH, & RISK (2 credits)

Students will develop strategic decision making skills by using financial concepts including time value of money, capital budgeting processes, cash flow forecasting and project risk analysis. Topics covered include: capital budgeting, financial statement analysis, capital structure, financial risk analysis.

Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8366 E-MARKETING (3 credits)

This course focuses on utilizing the Internet as a marketing platform. Course content includes discussion of how the Internet is used by businesses for designing products, pricing, promotions, distribution, positioning, gathering information, and cultivating relationships with stakeholders. The discussion about the rise of social media, sharing economy, virtual reality devices, and other relevant trends will also be part of the course. (Cross-listed with MKT 4360).

Prerequisite(s): BSAD 8400 with a grade of 'B' or above. Not open to non-degree graduate students.

BSAD 8370 LEADERSHIP IN DIVERSITY, EQUITY, ACCESS, AND INCLUSION (2 credits)

This course will focus on the role that organizational leaders play in proactively addressing organizational issues related to diversity, power, access, and equity. The course will explore tensions through the range of dimensions in which diversity is manifested among business leaders, staff, and stakeholders (which includes anyone impacted by the organization's business decisions - e.g., employees, contractors, suppliers, customers, and the community). Policies, systems, histories, structures, and legislation will also be discussed.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8376 SUPPLY CHAIN ANALYTICS (3 credits)

This course focuses on integrating supply chain management through the use of key performance indicators. Key concepts in this course include data visualization, supplier performance metrics, service-dominant logic, and the supply chain for data. Specific topics include the influence of the empowered customer on supply chain metrics, using metrics to develop a competitive advantage, data-driven decision making, and the four stages of actionable intelligence. (Cross-listed with SCMT 4370).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8380 EFFECTIVE SYSTEMS, OPERATIONS, AND IT (2 credits)

Students will learn how to employ decision-making skills to create a long-term competitive advantage for an organization through operational and technical excellence. Key concepts in this course will include developing a view of organizations as technical and behavioral systems, operations management, quality management, strategies related to IT procurement, deployment, maintenance and security, and the supply chain. Specific topics will include applied systems theory, process improvement, quality assurance, supply chain management, IT systems development strategies, and issues related to systems security, data security, and data privacy.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business

BSAD 8386 INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT (3 credits)

This course will focus on the strategic procurement of products and services in order to gain a competitive advantage through integrated supply management. Students will learn about strategic supply management, contract negotiation, and supplier quality management. Students will develop an understanding of supplier performance management through the use of supply chain information systems. (Cross-listed with MKT 4380, SCMT 4380)

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8396 MARKETING ANALYTICS (3 credits)

This course focuses on the application of data analytics in marketing decision making (e.g., segmentation, sales forecasting, and resource allocation). Students will learn to apply statistics and econometrics to solve marketing problems. Key topics in this course include marketing data visualization, marketing metrics, descriptive and predictive analytics, and digital marketing analytics. This course takes a very hands-on approach with real-world databases and equips students with tools that can be used immediately on the job. (Cross-listed with MKT 4370).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8400 MARKETING POLICIES (3 credits)

This course provides an introduction to the fundamental concepts of marketing, including a customer orientation, matched with attention to competition and core strengths. The course will illustrate strategies and principles that will help you understand how marketing managers, product managers or service managers must think through their situations, determine their goals and lay a course to achieve those goals.

Prerequisite(s): Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent); or admission to MAcc program. Not open to nondegree students.

BSAD 8416 DIVERSITY, EQUITY, ACCESS AND INCLUSION SOLUTIONS FOR MINIMIZING RISK (3 credits)

This course provides students an opportunity to explore the various aspects of power, access, and equity as it relates to the business environment. Students will explore tensions through the range of dimensions in which diversity is manifested among business leaders, staff, and stakeholders (include anyone impacted by business decisions, such as: employees, contractors, suppliers, customers, and the community) through policies, systems, histories, structures, and legislation. Students will have the opportunity to learn differences that individuals bring to a business environment and how stakeholders can capitalize on those differences by creating long-term inclusive environments. (Cross-listed with LAWS 4410).

Prerequisite(s): Admission to the MBA program. Not open to non-degree graduate students.

BSAD 8420 MARKETING: UNDERSTANDING CONSUMERS AND MARKETS (2 credits)

This course exposes MBA students to the fundamental concepts, practices and issues of marketing. A wide range of marketing practices and structures will be explored including product and service firms, consumer and business markets, profit and not-for-profit organizations, domestic and global companies, and small and large businesses.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in marketing may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8426 BUSINESS DEMOGRAPHICS (3 credits)

The goal of this course is to develop a demographic perspective in order to assist in understanding the business environment and business policy. How population change impacts consumer markets and all of the functions (for example, accounting, finance and management) that must exist for these markets to perform. Includes a history of population change and policy as well as a view toward international population considerations. (Cross-listed with MKT 4420).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8430 STRATEGIC BRAND MANAGEMENT (3 credits)

An exploration of the characteristics, meanings, and management of brands in the business world. The course examines brands as a strategic asset, and draws on managerial, consumer, and cultural perspectives.

Prerequisite(s): BSAD 8420 or permission of instructor. Not open to nondegree students.

BSAD 8435 MARKETING INNOVATION (3 credits)

Product, service, and process innovation are essential drivers of firm performance. However, firms face considerable and complex challenges when bringing innovative ideas to life. For example, what marketing research methods should we employ to uncover vital consumer insights? How do these insights influence the development and launch of new products and services? What differentiated value are we delivering to our consumers? How do we successfully bring this new product or service to market? How does a brand's purpose and personality influence consumers' perceptions, purchase decisions, adoption, and engagement? This course will cover key marketing principles involved in the development and launch of new and innovative products and services - from conception to commercialization. Furthermore, we will explore how new-age technologies impact each stage of the development and launch processes. (Cross-listed with MKT 3400).

Prerequisite(s): BSAD 8420 or equivalent; and admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8440 BUSINESS INTELLIGENCE DATA EXPLORATION (2 credits)

The first in any analytics project is to get data ready for analysis. In this class you will learn to extract data from a business data source and ready it for analysis in a business intelligence software tool. In the process you will learn tools necessary for this process including SQL, Power Query, M, and DAX.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics. Not open to non-degree graduate students.

BSAD 8450 SEMINAR IN MARKETING (3 credits)

Exploration, study and critical analysis of contemporary marketing problems, trends, methods and approaches for seminar discussion and written report.

Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8456 MANAGERIAL NEGOTIATION STRATEGIES (3 credits)

This course introduces students to the theory and practice of negotiation. The ability to negotiate successfully rests on a combination of analytical and interpersonal skills. In this course we will develop a set of conceptual frameworks that should help students better analyze negotiations in general and prepare more effectively for future negotiations in which they may be involved. This course is designed to help students better understand the theories, processes, and practices of negotiation, as well as conflict resolution and relationship management so that students can be more effective negotiators in a wide variety of situations. (Cross-listed with MGMT 4450, SCMT 4450).

Prerequisite(s): Admission to Graduate College, MBA Program, or by permission of the instructor.

BSAD 8466 SUPPLY CHAIN INTEGRATION (3 credits)

This course will focus on the integration of internal and external systems designed to maximize the efficiency and effectiveness of supply chain networks developed by industrial organizations, government agencies, and not-for-profit organizations. Key concepts will include supply chain design, trends in technology, and cross-functional collaboration, coordination, and communication along the value chain. Specific topics will include the influence of empowered customers on supply chain integration, global supply chain trends, closed-loop supply chains, and the challenges and benefits of integrating technology and talent in the workplace. (Cross-listed with SCMT 4460).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8476 BEHAVIORAL FINANCE & INVESTING (3 credits)

This course focuses on how actual investor behaviors and market behaviors differ from traditional theories of finance. This course will examine psychological biases, identify how such biases influence financial markets and settings, and explore methods that can be utilized to recognize and overcome such behavioral pitfalls. (Cross-listed with FNBK 4470).

Prerequisite(s): Admission to graduate college, MBA program, or by permission of instructor. Not open to non-degree graduate students.

BSAD 8480 GLOBAL ECONOMICS AND CORPORATE SOCIAL RESPONSIBILITY (2 credits)

In this course students will learn both how to apply global economic issues business strategy and how to balance socially responsible activities with the profit motive. With respect to global economics, topics include gains from trade, international trade patterns, foreign exchange markets, and barriers to trade. With respect to corporate social responsibility, topics include social responsibility and working conditions, socially responsible stewardship of the environment, and socially responsible strategies concerning human rights issues.

Prerequisite(s): Admittance to the Executive MBA Program or the Executive Certificate in Business.

BSAD 8510 SECURITY ANALYSIS (3 credits)

Study of the efficient market, fundamental and technical analysis approaches for the valuation of marketable securities. Methods of analysis are considered for the economy, industry groups and individual corporations.

BSAD 8520 SEMINAR INVESTMENT MANAGEMENT (3 credits)

This course focuses upon the modern portfolio theory of investment management and its application in formulation of policies for individuals and institutional investors. Topics addressed will include qualitative and quantitative analysis of the risks and returns of portfolio management using efficient market, fundamental analysis, and technical analysis approaches.

Prerequisite(s): BSAD 8510. Not open to nondegree students.

BSAD 8530 BANK & FINANCIAL MARKETS (3 credits)

This course focuses on the theory and practice in managing commercial banks. Topics covered include but not limited to: bank regulations, bank performance analysis, asset liability management, credit analysis and consumer loans. The course emphasizes the link between theory and practice through assigned course related readings, guest lecturers from industry experts, and a comprehensive bank research project on a local bank of your choice. At the end of the course, students should have a good understanding of basic banking theories as well as banking practices, and current issues and challenges facing the banking industry.

Prerequisite(s): BSAD 8500. Not open to non-degree graduate students.

BSAD 8540 MULTINATIONAL FINANCIAL MANAGEMENT (3 credits)

The focus of this course is on multinational financial management as viewed and practiced by the multinational firm and on current developments in international financial markets, including global banking. Familiarity with certain areas of the firm's environment, such as the international monetary system, the European Monetary System, and determination of exchange rates under alternative regimes, is essential to the international financial manager.

BSAD 8550 SEMINAR IN FINANCE (3 credits)

This course will address specific financial management topics which will vary by semester and is intended for graduate students.

BSAD 8560 MARKETING STRATEGY: CUSTOMERS AND MARKETS (2 credits)

This course will focus on how successful businesses match their objectives and resources with opportunities in the marketplace by identifying and measuring consumer needs, determining target markets and deciding which products and services to offer. This course will also address pricing, promotion, and distribution strategies to create competitive advantage in domestic and international markets.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8570 EFFECTIVE STRATEGIC MANAGEMENT (2 credits)

This course centers around the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. Students will develop the strategic thinking skills needed to formulate and execute successful strategies for firms/organizations in a variety of industries and dynamic environments. Emphasis is given to the contributions of several business disciplines of study, such as marketing, finance and management, to understanding both the internal operations of the organization and the influences of the external environment. This course is integrative and introduces both the theory and practice that enables that integrative process.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8576 INVESTMENT MANAGEMENT FOR FINANCIAL ANALYSTS (3 credits)

This course provides critical knowledge needed for students pursuing a career in investment management. The topic areas bridge academic theory, current industry practice, and ethical and professional standards and comprehensively address the areas assessed in the Chartered Financial Analyst examinations. (Cross-listed with FNBK 4570)

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

BSAD 8590 EXECUTIVE MBA CAPSTONE PROJECT (4 credits)

Students in the Executive MBA capstone project course will complete an applied consulting project for an organization that requires them to integrate knowledge across multiple Executive MBA program knowledge areas. Students will identify the key problem(s) to be solved, use sound methodologies to gather necessary data, identify and employ relevant evidence-based research and practitioner literatures, apply relevant models and theories to guide the generation of potential solutions and implementation strategies, and identify the feasibility and financial implications of their proposed solution(s).

Prerequisite(s): Admission to the Executive MBA Program. Not open to non-degree graduate students.

BSAD 8596 RISK MANAGEMENT FOR BUSINESS MANAGERS (3 credits)

An analysis of risk management techniques for handling the risk exposures most businesses face, including insurance, self insurance, risk control, and risk avoidance, among others. (Cross-listed with FNBK 4590.)

BSAD 8600 REAL ESTATE FINANCE THEORY AND APPLICATIONS (3 credits)

This course explores advanced financial analysis tools and methodologies used to quantify complex factors surrounding real estate productivity, value, investment, and project feasibility. Specific course topics will coincide with student interest in one of three focus areas: Investment, Development, or Commercial Finance.

Prerequisite(s): RELU 3410 and BSAD 8630, or permission of Real Estate Program Director.

BSAD 8605 REAL ESTATE PRINCIPLES AND PRACTICES (3 credits)

This is a survey course in real estate principles and practices, which is designed to familiarize students with industry terminology, current practices, and cover the following topics: Licensure, property rights, legal descriptions, real estate law and contracts, appraisal, financing, investments, Fair Housing, and related topic areas. This course provides foundational knowledge of the real estate field and will prepare students to successfully complete more advanced real estate coursework. NOTE: Students cannot receive credit for both RELU 2410 and RELU 3410. (Cross-listed with RELU 3410).

Prerequisite(s): Admission to Graduate College, MBA Program, or permission of Real Estate Program Director.

BSAD 8606 FINANCIAL RISK MANAGEMENT (3 credits)

The course provides students with an intermediate level analysis of financial derivatives, and the use of these instruments for managing risk in financial institutions. (Cross-listed with FNBK 4600.)

Prerequisite(s): BSAD 8500 and 8510 or their equivalent, and graduate standing. Not open to nondegree students.

BSAD 8610 REAL ESTATE APPRAISAL (3 credits)

This course addresses the fundamentals of real estate valuation and appraising, including factors affecting value, valuing land, improvements, and special classes of residential property, appraisal practice and rules, depreciation and obsolescence, and the mathematics of appraising.

Prerequisite(s): RELU 3410 and BSAD 8630, or permission of instructor.

BSAD 8616 REAL ESTATE INVESTMENTS (3 credits)

This course focuses on methods used to analyze existing and proposed commercial and residential real estate investments through dynamic programming models, and explores strategies to finance commercial real estate. The class ultimately prepares students to understand the risks and rewards associated with financing and investing in real estate. (Cross-listed with RELU 4390).

Prerequisite(s): RELU 2410 or RELU 3410 or FNBK 3250 or BSAD 8605 or BSAD 8630

BSAD 8625 PROPERTY MANAGEMENT (3 credits)

This course focuses on commercial and residential property management concepts and their application to the operation, control, and oversight of real property. The course will study leasing, tenant selection and relations, maintenance, marketing, contract management, asset management principles, as well as Fair Housing Laws and the Americans With Disabilities Act as they pertain to property management. (Cross-listed with RELU 3450).

Prerequisite(s): BSAD 8605, or permission of the Real Estate Program Director.

BSAD 8626 REAL ESTATE DEVELOPMENT (3 credits)

This course focuses on the procedures and complexities in developing and redeveloping various commercial property types and mixed-use real estate. Topics include an overview of the real estate development process, assembling a team, identifying project stakeholders, financial analysis, site selection, market analysis, and the regulatory environment. (Cross-listed with RELU 4440).

Prerequisite(s): BSAD 8605 or BSAD 8630, or permission of the Real Estate Program Director.

BSAD 8630 FINANCE: UNDERSTANDING CAPITAL AND CASH (2 credits)

As a comprehensive introduction to financial management, the course will cover various fields of finance and discuss topics including the time value of money, bond and stock valuation, capital budgeting.

Prerequisite(s): BSAD 8060 or BSAD 8070, 8150 and 8210. Students with an undergraduate major or a graduate degree in finance or accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8640 IT: STRATEGIC DEVELOPMENT AND DEPLOYMENT (1 credit)

Students will gain a strategic perspective of information technology management, including current trends and best practices, and understand how technology can be used in competitive positioning. Processes for innovation and research and development spending and new business models will be covered.

BSAD 8650 VISION & STRATEGIC LEADERSHIP (2 credits)

This course focuses on the critical role that organizational leaders play in ensuring that the organization has a clear vision and a clear mission which are in alignment with the organization's business strategy and unit goals and effectiveness metrics. This course focuses on the mission and vision creation and communication process as well as vertical and horizontal goal alignment.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8660 FRONTIERS OF ANALYTICS (2 credits)

In this program, you have learned many analytics techniques. However, analytics is a constantly evolving field with increasingly advanced methods. What techniques might be presented to you as a manager? How do you interpret these results? In this class we will explore cutting-edge analytics methods and when they are appropriate for your business.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8160. Not open to non-degree graduate students.

BSAD 8696 EMERGING TECHNOLOGY AND INNOVATION (3 credits)

This course equips entrepreneurially-minded students with a more complete range and vision of the viability of various startup opportunities (with a specific focus on innovative technologies and innovative business models). Students will become familiarized with the new and emerging technologies and innovations that define modern industries and product categories, as well as the various shifts in the way cutting-edge business gets done, regardless of industry. (Cross-listed with ENTR 4690, MGMT 4690).

Prerequisite(s): Admission to a UNO graduate degree program or permission of instructor

BSAD 8700 BUSINESS ANALYTICS: MAKING SENSE OF DATA (2 credits)

The purpose of this course is to provide business managers with an understanding of the important role data analytics has assumed in today's organizations. Data analytics has become a key component in accomplishing strategic and operational goals. This course is designed to familiarize students with the concepts and principles of analytics. It is targeted for graduate or MBA students who have little or no background in analytics. Therefore, it focuses on breadth of coverage rather than depth in any specific area.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent); or admission to the MAcc program. Not open to non-degree graduate students.

BSAD 8710 SUPPLY CHAIN MANAGEMENT (3 credits)

This course will focus on supply chain management as a key functional area of organizational success. Students will learn about current techniques used by supply chain practitioners to make strategic and tactical decisions that support the overall strategy and day-to-day operations of an organization. Students will develop an understanding of how supply chain decisions and appropriate metrics of performance can be utilized to improve the operational efficiency and effectiveness of an organization.

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8720 STRATEGIC FINANCIAL MANAGEMENT (2 credits)

This course is intended to be advanced financial management. It will stress the theory and application of topics including, but not limited to capital budgeting, cash flow estimation, real options, capital structure, dividends and share repurchases, working capital management, budgeting, planning and forecasting, and lease management. The material covered in Strategic Financial Management will increase the student's knowledge of how to strategically manage financial resources to increase the intrinsic value of the organization.

Prerequisite(s): For MBA students, BSAD 8630. For MAcc students, completion of all Master of Accounting (MAcc) foundation courses. Not open to non-degree graduate students.

BSAD 8726 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with ENTR 4720, ITIN 4720, ITIN 8256, MGMT 4720, MKT 4720).

Prerequisite(s): Admission to a graduate program or by instructor permission

BSAD 8736 ECONOMICS OF ENTREPRENEURSHIP (3 credits)

This course will review economic theories of entrepreneurship with special emphasis on Schumpeter's theory of creative destruction. The main focus of the seminar will be on the "high-level" entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 4730, ECON 8436)

Prerequisite(s): ECON 2200 or permission of the instructor for all students

BSAD 8766 SELLING IN AN ENTREPRENEURIAL CONTEXT (3 credits)

Successful entrepreneurs are able to identify unmet needs in the marketplace and then design and sell products or services that fulfill those needs. Sales effectiveness is essential for entrepreneurs because they must be able to build sustainable sales pipelines that ensure profitable growth while simultaneously addressing other pressing issues including financing, staffing, and product development. This course will focus on consultative solution-based sales fundamentals that can be applied in an entrepreneurial selling environment. (Cross-listed with ENTR 4760, MKT 4760)

Prerequisite(s): GPA 2.5 or better; MKT 3100 with a "C+" or better; MKT 3310 with a "C+" or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8776 INTRODUCTORY MAVERICK VENTURE FUND (1 credit)

This course teaches the basics of venture capital, including, the topics of term sheets, due diligence and learning the perspectives of the entrepreneur and investor. Students in this course have the opportunity to observe more advanced students making investments, ranging from 5,000 dollars to 10,000 dollars plus. This course is the first of three, one-credit courses where students gain more advanced venture funding knowledge and application at each level. (Cross-listed with ENTR 4770).

Prerequisite(s): This course requires instructor approval. Students must apply and interview to take this course. Preference is given to students in their junior year, and must have three semesters of school left before graduating.

BSAD 8786 INTERMEDIATE MAVERICK VENTURE FUND (1 credit)

In this course, students source deals, listen to pitches, and select start-ups to be funded. Investments typically range from 5,000 dollars to 10,000 dollars plus. This course is the second in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4780).

Prerequisite(s): This course requires instructor approval. Students must have completed BSAD 8776 with a grade of C or better.

BSAD 8796 ADVANCED MAVERICK VENTURE FUND (1 credit)

This course applies advanced concepts of venture capital. Students will learn how to monitor and assist start-ups in the scaling process. Students learn how to leverage community partners to amplify investment opportunities. This course is the third in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4790).

Prerequisite(s): This course requires instructor approval. Students must have completed BSAD 8786 with a grade of C or better.

BSAD 8800 MBA PROJECT-FOCUSED CAPSTONE (2 credits)

In this Master's of Business Administration (MBA) required project-focused capstone course, students complete a service-learning consulting project for a non-profit or other type of organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program.

Prerequisite(s): Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 prior to Capstone and must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Not open to non-degree graduate students.

BSAD 8820 CONTEMPORARY BUSINESS ISSUES (1 credit)

This course exposes students to contemporary business issues that they are likely to experience as leaders. Students will examine and synthesize academic literature relevant to an instructor-approved specific topic associated with the contemporary business issue of focus. This course can be used for MBA students who need a one credit hour course to meet their credit hour graduation requirements.

Prerequisite(s): BSAD 8150 or permission of instructor. Not open to non-degree graduate students.

BSAD 8830 STRATEGY: DEVELOPING SUSTAINABLE COMPETITIVE ADVANTAGE (2 credits)

This course centers on the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. The primary objective of this course is to sharpen the ability of students to think strategically, to diagnose situations from a strategic perspective and to develop creative solutions to enable firms to achieve a sustainable competitive advantage.

Prerequisite(s): Students must successfully complete BSAD 8150 and BSAD 8210 before enrolling in this course. This course must be taken within the first 20 hours of the MBA program. Not open to non-degree graduate students.

BSAD 8880 ARTS AND THE EXECUTIVE (3 credits)

The course will provide the graduate student with an understanding of the organizational and managerial issues involved in an arts organization as the role of the arts in the business community.

Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8900 INDEPENDENT STUDY (1-6 credits)

In this independent study course, individual students are able to complete independent research in a business-related topic area under the supervision of a faculty member. Written independent study reports are expected to include appropriate academic citations and references.

Prerequisite(s): Graduate and permission of MBA Advisor. Requires submission of completed Independent Study Contract to MBA Advisor prior to registration. Not open to non-degree graduate students.

BSAD 8926 SPECIAL TOPICS IN BUSINESS (3 credits)

This business-focused special topics course is designed to provide students the opportunity to focus on a current or emerging topic in any area of business. An in depth exploration of the topic will be undertaken with the expectation that students will play an active role in the course and engage deeply with the material and concepts addressed within the focal topic area. (Cross-listed with BSAD 4920).

Prerequisite(s): Not open to non-degree graduate students.

BSAD 8990 THESIS (1-6 credits)

A research project, under the supervision of a faculty thesis adviser in the College of Business Administration, in which the student establishes his capacity to design, conduct and complete an independent, scholarly investigation of a high originality. The research topic and the completed project must be approved by the student's faculty thesis adviser and two other faculty members, one of whom must be from outside the program area.

Prerequisite(s): Permission of graduate adviser. Not open to non-degree graduate students.

Chemical Engineering (CHME)

Chemical Engineering Graduate Courses

CHME 8306 CHEMICAL ENGINEERING LAB (4 credits)

Selected experiments in chemical engineering. Emphasis on experimental design, interpretation of results, and formal oral and written reports. (Cross-listed with CHME 4300).

Prerequisite(s): CHME 2030 and CHME 3330 and (coreq CHME 4420 or CHME 8426)

CHME 8346 DIFFUSIONAL OPERATIONS (3 credits)

Application of diffusional theory to the design of processing equipment required for absorption, adsorption, leaching, drying, and chemical reactions. (Cross-listed with CHME 4340).

Prerequisite(s): CHME 3330 and CHME 4420 and MATH 2350

CHME 8426 CHEMICAL REACTOR ENGINEERING AND DESIGN (3 credits)

Basic principles of chemical kinetics are coupled with models descriptive of rates of energy and mass transfer for the analysis and design of reactor systems. (Cross-listed with CHME 4420).

Prerequisite(s): CHME 3230

CHME 8896 AIR POLLUTION, ASSESSMENT AND CONTROL (3 credits)

Survey of the present status of the air pollution problem and the application of engineering and scientific principles to its practical and effective coordinated control. (Cross-listed with CHME 4890).

Prerequisite(s): Senior standing, not open to nondegree students

Chemistry (CHEM)

Chemistry Graduate Courses

CHEM 8040 SEMINAR IN TEACHING ADVANCED PLACEMENT CHEMISTRY (2 credits)

This course provides an introduction to the Advanced Placement high-school chemistry course and includes instruction on content and methods specific to teaching an Advanced Placement chemistry course. Emphasis will be placed on subject content and adaptations of college-level laboratory experiments to the high-school level.

Prerequisite(s): Concurrent enrollment in the Advanced Placement Chemistry Institute at UNO and current employment as a high-school science teacher or instructor permission.

CHEM 8215 INTRODUCTION TO MOLECULAR MODELING (3 credits)

The course covers the advantages and limitations of current modeling systems, the criteria for choosing the appropriate modeling system to best solve a given problem and the computer resources needed to conduct the modeling experiments. Following an introduction to the theory behind a variety of modeling systems, students model organic and bioorganic compounds in projects designed to mimic real world applications. (Alternate Spring semesters). (Cross-listed with CHEM 3210).

Prerequisite(s): CHEM 2260 and CHEM 2274 with a grade of C- or better.

CHEM 8236 ADVANCED ORGANIC CHEMISTRY - SYNTHESIS (3 credits)

An advanced lecture course in modern theories and organic reactions with application to synthesis. (Alternate Fall semesters) (Cross-listed with CHEM 4230).

CHEM 8246 ADVANCED ORGANIC CHEMISTRY - MECHANISM (3 credits)

An advanced lecture course in organic chemical reactions. (Cross-listed with CHEM 4240).

Prerequisite(s): CHEM 2260 and CHEM 2400 with a C- or better

CHEM 8256 ADVANCED ORGANIC CHEMISTRY: MECHANISMS AND MODELING (4 credits)

Presentation of advanced topics in organic chemistry focused on structure, bonding and reaction mechanisms. The use of molecular modeling software as means to predict structure, relative stabilities and reaction thermodynamics are covered in a hands-on environment. The course will survey various modeling methods and show its relevance to molecular orbital theory. The basic methodologies used to explore organic mechanisms are presented and then used to study mechanistic details of various reaction types. Students cannot count both Chem 4250 and Chem 4240 toward their degree. (Cross-listed with CHEM 4250).

Prerequisite(s): CHEM 2260 and CHEM 2274 with a C- or better

CHEM 8276 ADVANCED ORGANIC CHEMISTRY-MOLECULAR MODELING LABORATORY (1 credit)

The use of molecular modeling software as means to predict structure, relative stabilities and reaction thermodynamics are covered in a hands-on environment. The course will survey various modeling methods and show its relevance to organic reactions and mechanisms therein. Students will learn how to use commercial software to obtain/supplement experimental data in a manner suitable for peer-review publication. (Cross-listed with CHEM 4244).

Prerequisite(s): CHEM 2260 and CHEM 2400 with a C- or better

CHEM 8316 POLYMER CHEMISTRY (3 credits)

An introduction to the chemical and physical properties of polymers. Emphasis will be on physical properties and structure/property relationships. Topics will include kinetics and synthesis. Students will gain an understanding of the characteristics of polymers and their applications.

Prerequisite(s): CHEM 2260 and CHEM 3350 with a grade of C or better, or instructor permission.

CHEM 8355 PHYSICAL CHEMISTRY I (3 credits)

A presentation of selected topics from the laws of thermodynamics, chemical and physical equilibria, phase diagrams, thermodynamics of solutions, electrochemistry and kinetics. (Fall) (Cross-listed with CHEM 3350).

Prerequisite(s): CHEM 2260, CHEM 2274, CHEM 2400, CHEM 2404, PHYS 1120 or PHYS 2120; MATH 1960 or higher. (Chemistry courses must be with a grade of C- or better). Concurrent enrollment in CHEM 3354/8359.

CHEM 8359 PHYSICAL CHEMISTRY I LABORATORY (1 credit)

Physical chemistry laboratory covering topics in thermodynamics, kinetics and electrochemistry, to be taken concurrently with CHEM 3350/8355. Instruction and practice in scientific writing is also an emphasis of the course. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. Offered in Fall. (Cross-listed with CHEM 3354).

CHEM 8365 PHYSICAL CHEMISTRY II (3 credits)

A presentation of selected topics from the areas of quantum mechanics, spectroscopy, kinetics and statistical mechanics. (Cross-listed with CHEM 3360).

Prerequisite(s): CHEM 3350 and CHEM 3354 with a grade of C- or better.

CHEM 8369 PHYSICAL CHEMISTRY II LABORATORY (1 credit)

Physical chemistry laboratory covering topics in quantum mechanics, computational chemistry, spectroscopy, and kinetics, to be taken concurrently with CHEM 3360. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. Offered in Spring. (Cross-listed with CHEM 3364).

CHEM 8406 INSTRUMENTAL ANALYSIS (3 credits)

Study of instrumentation for use in chemical analysis and chemistry research. Advanced instrumental methods and data analysis techniques are included. (Cross-listed with CHEM 4400).

Prerequisite(s): CHEM 3350 and CHEM 3354 both with a C- or better; or CHEM 3360 and CHEM 3364 both with a C- or better; or instructor permission. Concurrent enrollment in CHEM 8409.

CHEM 8409 INSTRUMENTAL ANALYSIS LABORATORY (1 credit)

Investigation of instrument performance and use of instrumentation in quantitative and trace analysis. Advanced instrumental methods and electronics for instrumentation are included. (Spring) (Cross-listed with CHEM 4404).

Prerequisite(s): Concurrent enrollment in CHEM 8406

CHEM 8425 SPECTROMETRIC CHARACTERIZATIONS (1 credit)

A laboratory course intended to further develop the ability to determine chemical structure from focused spectrometric data especially IR, MS, 1D and 2D (proton and carbon) NMR. Lab time focuses on the spectrochemical data collection and interpretation. (Cross-listed with CHEM 3424).

CHEM 8506 ADVANCED INORGANIC CHEMISTRY (3 credits)

The application of bonding models for understanding of the composition, structure, and reactions of inorganic molecules, including organometallic and bioinorganic complexes. (Cross-listed with CHEM 4500).

Prerequisite(s): CHEM 8355 or may be taken concurrently.

CHEM 8654 BIOCHEMISTRY I LABORATORY (1 credit)

A laboratory course to help integrate the concepts learned in biochemistry lecture with the development of biochemical laboratory skills including experimental design, data analysis, presentation of results and communication of scientific information, with a focus on formal instruction in journal-style writing and notebook skills. There is an emphasis on protein properties, including enzyme activity. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. (Fall) (Cross-listed with BIOL 4654, BIOL 8654, CHEM 4654).

CHEM 8656 BIOCHEMISTRY I (3 credits)

A comprehensive introduction to biochemistry emphasizing: structure-function relationships for proteins, carbohydrates, lipids, and nucleic acids; protein purification; enzyme kinetics and mechanisms; membranes and membrane transport; carbohydrate metabolism including glycolysis, the citric acid cycle and oxidative phosphorylation; and important applications of thermodynamics and the properties of water to living systems. (Fall) (Cross-listed with BIOL 4650, BIOL 8656, CHEM 4650).

Prerequisite(s): CHEM 2260 and CHEM 2274; and either CHEM 2400 or BIOL 3020, all with a C- or better. Other comparable courses taken at accredited colleges or universities are acceptable. CHEM 8654 must be taken concurrently.

CHEM 8664 BIOCHEMISTRY II LABORATORY (1 credit)

A laboratory course to help integrate the concepts learned in Biochemistry II lecture with the development of biochemical laboratory skills, to gain practical experience in experimental design, data analysis, presentation of results and communication of scientific information, with a focus on formal instruction in journal-style writing and notebook skills. There is an emphasis on nucleic acid properties. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. (Spring) (Cross-listed with BIOL 4664, BIOL 8664, CHEM 4664).

CHEM 8666 BIOCHEMISTRY II (3 credits)

A continuation of the study of the structure and function of biomolecules and biochemical reactions with an emphasis on metabolism of carbohydrates, lipids, amino acids and nucleotides, and the chemistry of signal transduction and genetic information transfer. (Spring) (Cross-listed with BIOL 4660, BIOL 8666, CHEM 4660).

Prerequisite(s): CHEM 8656 and CHEM 8654 or BIOL 8656 and BIOL 8654 with a grade of B- or better. CHEM 8664 must be taken concurrently.

CHEM 8676 PROTEIN PURIFICATION AND CHARACTERIZATION (2 credits)

This course is a study of protein biochemistry, protein purification techniques, and characterization strategies with an emphasis on chromatography and crystallography. The course has a significant laboratory component. (Cross-listed with CHEM 4670).

Prerequisite(s): CHEM 8656 and CHEM 8654 (grade of B or better), or permission of instructor.

CHEM 8936 SPECIAL TOPICS IN CHEMISTRY (1-3 credits)

Selected special topics in chemistry. (Cross-listed with CHEM 4930).

Prerequisite(s): CHEM 2260, CHEM 2400 with a grade of C or better. Some topics will require more advanced prerequisites and will be accepted for advanced course work in chemistry.

CHEM 8966 CHEMISTRY PROBLEMS (1-3 credits)

Independent student research and communication of results. (Cross-listed with CHEM 4960).

Prerequisite(s): CHEM 4950 with a grade of C or better and permission of instructor or graduate standing in a related discipline

CHEM 8990 RESEARCH IN CHEMISTRY (1 credit)

Experimental or theoretical work in chemistry or an interdisciplinary field involving chemical content, analysis and communication of results.

Prerequisite(s): Permission of instructor, graduate, and sufficient grounding in the research area to fully support successful project accomplishment.

College of Information Science & Technology (CIST)

College of Information Science Technology Graduate Courses

CIST 9040 COLLOQUIUM ON IT RESEARCH (1 credit)

The purpose of the course is to provide a forum for interaction among doctoral students and faculty on topics of relevance to professional success as researchers. Topics to be discussed include: nature of research in information technology; research problem selection, development, and presentation with special emphasis on the doctoral dissertation; dissertation process; development and crafting of papers for journals; collaboration on research projects; and review process for journal papers.

Prerequisite(s): Admission to PhD program in Information Technology or permission of instructor.

CIST 9050 COLLOQUIUM ON IT TEACHING (1 credit)

The purpose of the course is to provide a forum for interaction among doctoral student and faculty on topics of relevance to professional success as teachers/educators in university settings. Topics to be discussed include: issues and challenges of teaching; getting started in teaching; course preparation; teaching methods; assessment of students; on-going course development; diversity in the classroom; use of technology in teaching including online education; and developing and maintaining a teaching portfolio.

Prerequisite(s): Doctoral students in Information Technology and Biomedical informatics. Students from doctoral programs across the University of Nebraska are welcome to register with permission of instructor. Not open to non-degree graduate students.

CIST 9060 COLLOQUIUM ON IT PROFESSION AND ETHICS (1 credit)

The purpose of this course is to provide a forum for interaction among doctoral students and faculty on topics of relevance to professional success as members of the academy. Some of the topics to be discussed will include: ethics and professional code of conduct; strategies for dealing with academic dishonesty/plagiarism; academic and professional organizations in the IT profession (e.g., IEEE, ACM, AIS, PMI, AITP); challenges of human subjects research; developing survival skills: balancing service, teaching and research, etc.; career development and progression; and role and nature of local, national, and international service.

Prerequisite(s): Any IS&T PhD student is eligible to attend; other Doctoral students can attend with permission of instructor. Not open to non-degree graduate students.

CIST 9080 RESEARCH DIRECTIONS IN I.T. (3 credits)

The purpose of this course is to provide a forum for interaction among doctoral students and faculty on topics of relevance to IT research and make them familiar with current and future research directions in IT. Students will examine what constitutes a research contribution, gain hands-on experience with directed research, and explore the breadth of sub-disciplines within IT research.

Prerequisite(s): Doctoral standing in Information Technology or permission of course coordinators. Not open to non-degree graduate students.

CIST 9100 SEMINAR ON READINGS IN IT (1 credit)

Seminar focused on IT literature within a topic area aligned with PhD in IT concentrations, providing opportunity for in-depth review and discussion of materials in the concentration reading list. Provides exposure to current topics, research methods, and professional practice for the concentration.

Prerequisite(s): Open to all currently admitted PhD students and other graduate students by instructor permission. May be repeated up to 3 times for credit in Major Field of Study, and up to 3 times as an elective.

CIST 9900 SPECIAL TOPICS IN INFORMATION TECHNOLOGY (3 credits)

This course is designed to acquaint students with issues which are current to the field or emerging trends in the information technology area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular topic offerings.

CIST 9970 RESEARCH OTHER THAN THESIS (1-3 credits)

This is a directed research course enabling students to pursue a research topic individually under the direction of a graduate faculty member.

Research problems should help introduce students to practical research methods in the field of computing, and they should be framed in such a way to enable the student to complete the work in the course of one semester.

Prerequisite(s): Requires instructor permission. Only open to doctoral students in the IT PhD program. Course cannot be taken for credit after candidacy nor count towards core/major field of study requirements in the IT PhD. Not open to non-degree graduate students.

CIST 9980 INDEPENDENT STUDY IN INFORMATION TECHNOLOGY (1-3 credits)

This course allows students to conduct an in-depth study of a specific topic of their interest that is not available in a formal course. The topic to be studied must be agreed upon by the student and the instructor, including a structured schedule and grading criteria, and should be distinct from students' thesis work or Research Other Than Thesis (CIST 9970) course credits.

Prerequisite(s): Requires instructor permission. Only open to doctoral students in the IT PhD program. Not open to non-degree graduate students.

CIST 9990 DISSERTATION (1-12 credits)

The dissertation is an original research project conducted and written under the direction of a faculty supervisory committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge in information systems and/or information technology.

Prerequisite(s): Admission to the Ph.D. program in Information Technology. Admission to candidacy for the Ph.D. degree. Prior to enrolling for dissertation hours, the students must have permission of the supervisory committee. Not open to non-degree graduate students.

Civil Engineering (CIVE)

Civil Engineering Graduate Courses

CIVE 819 FLOW SYSTEMS DESIGN (3 credits)

Application of hydraulic principles to the design of water distribution systems, wastewater and stormwater collection systems, channelized flow systems and treatment facilities. (Cross-listed with CIVE 419).

Prerequisite(s): CIVE 326 or CIVE 327; Corequisite: CIVE 352

CIVE 822 POLLUTION PREVENTION: PRINCIPLES AND PRACTICES (3 credits)

Introduction to pollution prevention (P2) and waste minimization methods. Practical applications to small businesses and industries. Legislative and historical development of P2 systems analysis, waste estimation, P2 methods, P2 economics, and sources of P2 information. (Cross-listed with CIVE 422).

CIVE 823 PHYSICAL & CHEMICAL TREATMENT PROCESSES IN ENVIRONMENTAL ENG (3 credits)

Evaluation and analysis of physical and chemical unit operations and processes applied to the treatment of water, wastewater, and hazardous wastes.

Prerequisite(s): CIVE326 and CIVE425

CIVE 824 SOLID WASTE MANAGEMENT ENGINEERING (3 credits)

Planning design and operation of solid and waste collection processing, treatment, and disposal systems including materials, resources and energy recovery systems. (Cross-listed with CIVE 424).

Prerequisite(s): CIVE 326 and CIVE 334

CIVE 826 DESIGN OF WATER TREATMENT FACILITIES (3 credits)

Analyses of water supplies and design of water treatment and distribution systems. (Cross-listed with CIVE 426).

Prerequisite(s): CIVE 420

CIVE 827 DESIGN OF WASTEWATER TREATMENT AND DISPOSAL FACILITIES (3 credits)

Analysis of systems for wastewater treatment and disposal. (Cross-listed with CIVE 427).

Prerequisite(s): CIVE 420

CIVE 828 ENVIRONMENTAL ENGINEERING CHEMISTRY (3 credits)

Basic concepts from general chemistry. Thermodynamic and kinetic basis for the composition of aquatic systems. Equilibrium chemistry, including acid-base reactions, reduction-oxidation reactions, metal speciation and precipitation, and gas/liquid partitioning.

Prerequisite(s): CIVE 326. Not open to non-degree graduate students.

CIVE 829 BIOLOGICAL WASTE TREATMENT (3 credits)

Principles of biological processes and their application in the design of waste treatment systems.

Prerequisite(s): CIVE 326 or equivalent.

CIVE 830 FUNDAMENTALS OF WATER QUALITY MODELING (3 credits)

Comprehensive study of water quality and the effects of various water pollutants on the aquatic environment; modeling of water quality variables. (Cross-listed with CIVE 430).

Prerequisite(s): CIVE 326

CIVE 834 SOIL MECHANICS II (3 credits)

(Lecture 3, option Lab 3) Application of the effective stress principle to shear strength of cohesive soils; analysis of stability of slopes. Development of continuum relationships for soils; solutions for stresses and displacements for an elastic continuum, solution of the consolidation equation for various initial and boundary conditions.

Prerequisite(s): CIVE334

CIVE 836 FOUNDATION ENGINEER (3 credits)

(Lecture 3, Optional Lab 3) Subsoil exploration and interpretation; selection of foundation systems; determination of allowable bearing capacity and settlement; design of deep foundations; pile driving analysis; control of groundwater.

Prerequisite(s): CIVE 334

CIVE 839 INTRODUCTION TO BRIDGE ENGINEERING (3 credits)

Structural types, bridge loads, design of bridge slabs, steel girder bridges, and prestressed concrete girder bridges. Evaluation of existing bridges. Problems related to fatigue and corrosion. Field testing of bridges.

Prerequisite(s): CIVE440 or CIVE441 or CIVE840

CIVE 840 REINFORCED CONCRETE DESIGN I (3 credits)

Introduction to the design of reinforced concrete building components. Emphasis is placed on the design of flexural and compression members, simple walls, foundations, and floor systems using the latest ACI design requirements.

Prerequisite(s): CIVE341

CIVE 842 STRUCTURAL DYNAMICS (3 credits)

Dynamic behavior of civil engineering structures. Free and forced vibrations of multi degree-of-freedom systems. Response of continuous beam and frames. Elasto-plastic behavior. Dynamic loads on bridges. Analysis and design considerations for buildings and bridges subjected to seismic loadings. Emphasis is on application of computer-aided numerical procedures.

Prerequisite(s): CIVE 443

CIVE 843 ADVANCED STRUCTURAL ANALYSIS (3 credits)

Matrix analysis methods and computer solutions for indeterminate structures. Additional topics: static condensation, shear deformations, and non-prismatic members in matrix-based analyses, moment distribution method, load cases and load combinations for buildings and bridges, and influence lines and analysis for moving loads. (Cross-listed with CIVE 443)

Prerequisite(s): CIVE 341. Not open to non-degree graduate students.

CIVE 844 STRUCTURAL DESIGN AND PLANNING (3 credits)

Principles of design of steel and reinforced concrete structural building systems, planning of building vertical and horizontal load resisting systems, and bridge systems. Several design projects involve indeterminate analysis and design concepts for both steel and reinforced concrete. (Cross-listed with CIVE 444).

Prerequisite(s): CIVE 440 and CIVE 441

CIVE 846 STEEL DESIGN II (3 credits)

A continuation of CIVE 441. The principles and procedures used in design of steel buildings, design of plate girders, design and analysis of building systems, design and analysis of composite steel-concrete building systems, innovative building systems, and introduction to seismic design of steel buildings. Plate buckling, beam, column, and beam-column design. Frame stability. Introduction to connection design.

Prerequisite(s): CIVE441

CIVE 847 REINFORCED CONCRETE II (3 credits)

Shear friction theory, strut-and-tie modeling, anchorage, deflection, slender and bi-axially loaded members, torsion, two-way action and punching shear, and footing design. Excel spreadsheets are developed and used for various design tasks. (Continuation of topics covered in CIVE 440/CIVE 840.) (Cross-listed with CIVE 447).

Prerequisite(s): CIVE 440 or CIVE 840

CIVE 849 INTRODUCTORY FINITE ELEMENT ANALYSIS IN SOLID MECHANICS (3 credits)

Matrix methods of analysis. The finite element stiffness method with a focus on solid mechanics. Isoparametric elements formulation based on energy principles. Perform finite element analyses using commercial software.

Prerequisite(s): CIVE 443 or 843

CIVE 850 PRESTRESSED CONCRETE (3 credits)

Analysis and design of prestressed concrete members. Axial force, bending, shear, torsion, prestress losses, initial and long-term deflection, partial prestressing, statically indeterminate structures.

Prerequisite(s): CIVE341 and CIVE440

CIVE 851 INTRODUCTION TO FINITE ELEMENT ANALYSIS (3 credits)

Matrix methods of analysis. The finite element stiffness method. Computer programs. Applications to structures and soils. Introduction to finite element analysis of fluid flow. (Cross-listed with CIVE 451).

Prerequisite(s): MENG 3250 or EMEC 3250; and MENG 4800 or EMEC 4800.

CIVE 852 WATER RESOURCES DEVELOPMENT (3 credits)

Theory and application of systems engineering with emphasis on optimization and simulation techniques for evaluating alternatives in water resources developments related to water supply, flood control, hydroelectric power, drainage, water quality, water distribution, irrigation and water measurement. (Cross-listed with CIVE 452).

Prerequisite(s): CIVE 352

CIVE 853 GIS IN WATER RESOURCES (3 credits)

Familiarization with a wide range of spatial information and used in hydrologic and water resources analysis. Development of expertise in GIS systems, especially ArcGIS, Digital mapping and analysis of water resources information. Hydrologic terrain analysis using digital elevation models. Integration of time series and geospatial data. Hydrologic Information Systems. River and watershed networks. Evapotranspiration, Precipitation (PRISM), Soil, and Landuse maps, and databases. Use of Remote Sensing tools.

CIVE 854 HYDRAULIC ENGINEERING (3 credits)

Fundamentals of hydraulics with applications of mechanics of solids, mechanics of fluids, and engineering economics to the design of hydraulic structures. Continuity, momentum, and energy principles are applied to special problems from various branches of hydraulic engineering. (Cross-listed with CIVE 454).

Prerequisite(s): CIVE 352

CIVE 855 NONPOINT SOURCE POLLUTION CONTROL ENGINEERING (3 credits)

Identification, characterization, and assessment of nonpoint source pollutants; transport mechanisms and remediation technologies; design methodologies and case studies. (Cross-listed with CIVE 455).

Prerequisite(s): CIVE 326 and CIVE 352

CIVE 856 SURFACE WATER HYDROLOGY (3 credits)

Stochastic analysis of hydrological data and processes including rainfall, runoff, infiltration, temperature, solar radiation, wind, and non-point pollution. Space-time hydrologic modeling with emphasis on the application of techniques in the design of engineering projects. (Cross-listed with CIVE 456).

CIVE 857 APPLIED STRUCTURAL ANALYSIS (3 credits)

Review of basic concepts. Mesh generation using a preprocessor. 2D and 3D Model generation. Boundary conditions. Implicit and explicit solution algorithms. Interpretation of analysis results using a post-processor. Solution of problems using existing FE software.

Prerequisite(s): CIVE851

CIVE 858 GROUNDWATER ENGINEERING (3 credits)

Application of engineering principles to the movement of groundwater. Analysis and design of wells, well fields, and artificial recharge. Analysis of pollutant movement. (Cross-listed with CIVE 458).

Prerequisite(s): CIVE 352.

CIVE 859 RELIABILITY OF STRUCTURES (3 credits)

Fundamental concepts related to structural reliability, safety measures, load models, resistance models, system reliability, optimum safety levels, and optimization of design codes.

Prerequisite(s): CIVE341, not open to nondegree students

CIVE 861 URBAN TRANSPORTATION PLANNING (3 credits)

Development of urban transportation planning objectives and goals. Data collection procedures, land use and travel forecasting techniques, trip generation, trip distribution, modal choice analysis, and traffic assignment. Site development and traffic impact analysis. (Cross-listed with CIVE 461).

Prerequisite(s): CIVE 361

CIVE 862 HIGHWAY DESIGN (3 credits)

Design of roadways, intersections, interchanges, parking facilities, and land development site access and circulation. Emphasis on design projects. (Cross-listed with CIVE462)

CIVE 863 TRAFFIC ENGINEERING (3 credits)

Design of signalized intersections, arterial street and network signal systems, and freeway control systems. Emphasis on design projects. (Cross-listed with CIVE463)

Prerequisite(s): CIVE361

CIVE 864 ANALYSIS AND ESTIMATION OF TRANSPORTATION DEMAND (3 credits)

Introduction to conceptual, methodological and mathematical foundations of analysis and design of transportation services; review of probabilistic modeling; application of discrete choice models to demand analysis.

Prerequisite(s): CIVE461 or CIVE861 or equivalent

CIVE 865 HIGHWAY GEOMETRICS (3 credits)

Principles of highway geometrics. Sight distances, design vehicles, vehicle characteristics, horizontal and vertical alignment, cross section elements, and at-grade intersections and interchanges.

Prerequisite(s): (CIVE462 or CIVE862), not open to nondegree students

CIVE 866 TRANSPORTATION CHARACTERISTICS (3 credits)

Use of the concepts of volume, speed, density, and capacity to describe the characteristics and performance of surface, air, and water transportation systems.

Prerequisite(s): (CIVE463 or CIVE863) and (STAT3800 or MATH3800)

CIVE 867 TRANSPORTATION SAFETY ENGINEERING (3 credits)

Safety criteria in the planning, design and operation phases of highway, rail, airport, mass transit, pipeline, and waterway transportation systems. Background of safety legislation and funding requirements. Identification of high accident locations and methods to determine cost/effectiveness of improvements.

Prerequisite(s): Permission.

CIVE 868 AIRPORT PLANNING AND DESIGN (3 credits)

Planning and design of general aviation and air-carrier airports. Land-side components include vehicle ground access systems, vehicle circulation parking and terminal buildings. Air-side components include aircraft apron-gate area, taxiway system, runway system and air traffic control facilities and airspace. Emphasis on design projects. (Cross-listed with CIVE468)

Prerequisite(s): CIVE361

CIVE 869 COMPUTER-AIDED INTERCHANGE DESIGN (3 credits)

Principles of high-speed traffic operations, safety, and decision making related to critical design parameters used for optimal interchange geometric design through development of an interchange design project using graphical and civil engineering software.

Prerequisite(s): CIVE 862. Not open to non-degree graduate students.

CIVE 871 BITUMINOUS MATERIALS AND MIXTURES (3 credits)

Understanding of the physical, chemical, geometrical, and mechanical characteristics and practical applications of bituminous materials and mixtures. Fundamental mechanics for elastic and inelastic materials and basic theories associated with mechanical data analyses and designs. Recent advances and significant research outcomes for further discussions. Applications of theories to laboratory and field testing. (Cross-listed with CIVE 471)

Prerequisite(s): CIVE 378. Not open to non-degree graduate students.

CIVE 872 PAVEMENT DESIGN AND EVALUATION (3 credits)

Thickness design of flexible and rigid pavement systems for highways and airports; design of paving materials; evaluation and strengthening of existing pavements. (Cross-listed with CIVE 472).

Prerequisite(s): CIVE 334

CIVE 875 WATER QUALITY STRATEGY (3 credits)

A holistic approach to the selection and analysis of planning strategies for protecting water quality from nonpoint sources of contamination. An introduction to the use of methods of analyzing the impact of strategies on whole systems and subsystem for selecting strategies; and for evaluating present strategies.

CIVE 881 COMPUTATIONAL PROBLEM SOLVING IN CIVIL ENGINEERING (3 credits)

Introduction of numerical methods to solve problems in civil engineering, including finding roots of equations, solving linear algebra equations, optimization, curve fitting, numerical differentiation and integration, and finite difference method. Computational methods in numerical integration, matrix operations and ordinary differential equations as they apply to civil engineering problems. (Cross-listed with CIVE 481)

Prerequisite(s): Not open to non-degree graduate students.

CIVE 891 SPECIAL TOPICS IN CIVIL ENGINEERING (1-6 credits)

Special topics in emerging areas of civil engineering which may not be covered in other courses in the civil engineering curriculum.

CIVE 894 INDEPENDENT STUDY IN CIVIL ENGINEERING (1-3 credits)

Individual study at the masters level in a selected area of civil engineering under the supervision and guidance of a Civil & Environmental Engineering faculty member.

CIVE 898 INDEPENDENT RESEARCH IN CIVIL ENGINEERING (1-6 credits)

Independent research work and written findings, other than thesis or dissertation work, in a selected area of civil and environmental engineering under the supervision and guidance of a Civil & Environmental Engineering faculty member.

CIVE 899 MASTERS THESIS (1-10 credits)

Master's Thesis

Prerequisite(s): Admission to masters degree program and permission of major adviser, Not open to nondegree students.

CIVE 916 ENVIRONMENTAL LAW AND WATER RESOURCE MANAGEMENT SEMINAR (3 credits)

An interdisciplinary seminar with the Department of Civil Engineering. Contemporary environmental issues and water resource Management.

Prerequisite(s): Permission. Not open to non-degree graduate students.

CIVE 945 STRUCTURAL ANALYSIS AND DESIGN FOR DYNAMIC LOADS (3 credits)

Behavior of structural materials and systems under dynamic loads. Analysis and design for dynamic loads. Computational techniques. Selected laboratory demonstrations of the dynamic behavior of structural systems.

Prerequisite(s): CIVE 443 or CIVE 843, and CIVE 842; or permission. Not open to non-degree graduate students.

CIVE 948 BLAST-RESISTANT STRUCTURAL DESIGN (3 credits)

Introduction to explosion effects. Air-blast. Fragmentation. Single-Degree-of-Freedom (SDOF) analysis. Equivalent SDOF systems. Pressure-impulse diagrams. Energy solutions. Steel design. Reinforced concrete design. Masonry design. Progressive collapse. Windows and doors.

Prerequisite(s): CIVE842

CIVE 949 STEEL BRIDGE DESIGN (3-6 credits)

Analysis and design of steel bridges for short, medium-, and long-span road and water crossings. Stringer bridges. Truss, arch, cable-stayed, and suspension bridges. High performance steel and accelerated construction.

Prerequisite(s): (CIVE436 or CIVE836) and (CIVE446 or CIVE846). Not open to non-degree graduate students.

CIVE 954 ADVANCED HYDRAULICS (3 credits)

Advanced studies involving pipe and culvert hydraulics, rapidly-varied flow in open channels, sediment transport, river mechanics, control, and design.

Prerequisite(s): CIVE 854. Not open to non-degree graduate students.

CIVE 958 CONTAMINANT TRANSPORT IN POROUS MEDIA (3 credits)

Theory of flow and contaminant transport in porous media including groundwater flow, multiphase flow, equilibrium contaminant distribution, reactive transport of contaminants, and colloid transport in porous media.

Prerequisite(s): Permission. Not open to non-degree graduate students.

CIVE 961 MASS TRANSIT SYSTEMS (3 credits)

The place of mass transit in solving urban transportation problems: transit system and terminal characteristics and planning criteria. Speed, capacity, accessibility, and operation of mass transit systems. Future prospects in transit technology and case studies of existing systems.

Prerequisite(s): Not open to nondegree students

CIVE 962 APPLICATION OF GEOGRAPHIC INFORMATION SYSTEMS (GIS) TO TRANSPORTATION (3 credits)

Geographic Information Systems (GIS) structure, function, and concepts such as spatial data models, relational databases, and spatial analyses. GIS project planning, management, and applications to transportation-related issues.

Prerequisite(s): Not open to nondegree students

CIVE 963 HIGHWAY SAFETY DATA ANALYSIS (3 credits)

Highway safety issues and appropriate accident data analysis. Quantify changes in safety when modifications are made to highways in an effort to enhance safety. Judge reported safety improvements and carry out appropriate analysis for assessing the effectiveness of safety improvements.

Prerequisite(s): STAT8805, not open to nondegree students

CIVE 964 THEORY TRAFFIC FLOW (3 credits)

Analysis of traffic characteristics as applied to traffic engineering facility design and flow optimization. Capacity of expressways, ramps, weaving sections, and intersections. Analytical approaches to flow analysis, queueing theory, flow density relationships, and traffic simulation.

Prerequisite(s): CIVE 866 and (STAT 3800 or STAT 8805). Not open to non-degree graduate students.

CIVE 965 TRAFFIC CONTROL SYSTEMS (3 credits)

Principles of traffic control. Design and analysis of intersection, arterial street, network, and freeway control systems. Traffic surveillance and driver information systems.

Prerequisite(s): CIVE 966 and permission. Not open to non-degree graduate students.

CIVE 966 TRANSPORTATION PLANNING AND ECONOMICS (3 credits)

Community growth and development based on planning decisions regarding land use whereby transportation facilities are fitted to land use. Economic studies that consider the consequences to transportation agencies, users, and nonusers. Agency expenditures, capital outlay and annual expenses for maintenance and operations. User consequences such as vehicle operating costs; commercial time costs; accident costs; discomfort and inconvenience costs; and assignment of money valuations to pleasure, recreation, and culture. Nonusers consequences items such as cost reductions or increases in public services; increases in value of crops and natural resources where areas become more readily accessible; changes in business and industrial activities; and increase or decrease of residential property values.

Prerequisite(s): Permission.

CIVE 967 ANALYSIS AND DESIGN OF TRANSPORTATION SAFETY SYSTEMS (3 credits)

Operations research techniques for modeling system performance and design of transportation services. Routing and scheduling problems. Network equilibration and partially distributed queueing systems.

Prerequisite(s): Not open to nondegree students

CIVE 989 SEMINAR IN CIVIL ENGINEERING (1-6 credits)

Current topics, research projects, and review of current literature in the various areas of civil engineering.

Prerequisite(s): Permission. Not open to non-degree graduate students.

CIVE 990 CIVIL ENGINEERING SEMINAR (1-6 credits)

Frontiers of an area of civil engineering.

CIVE 990E CIVIL ENGINEERING SEMINAR IN ENVIRONMENTAL ENGINEERING (1-6 credits)

Frontiers of an area of environmental engineering.

CIVE 990M CIVIL ENGINEERING SEMINAR IN GEOTECHNICAL AND MATERIALS ENGINEERING (1-6 credits)

Frontiers of an area of geotechnical and materials engineering.

CIVE 990R CIVIL ENGINEERING SEMINAR IN STRUCTURAL ENGINEERING (1-6 credits)

Frontiers of an area of structural engineering.

CIVE 990T CIVIL ENGINEERING SEMINAR IN TRANSPORTATION ENGINEERING (1-6 credits)

Frontiers of an area of transportation engineering.

CIVE 990W CIVIL ENGINEERING SEMINAR IN WATER RESOURCES ENGINEERING (1-6 credits)

Frontiers of an area of water resources engineering.

CIVE 991 ADVANCED SPECIAL TOPICS IN CIVIL ENGINEERING (1-6 credits)

Advanced special topics in emerging areas of civil and environmental engineering which may not be covered in other courses in the civil engineering curriculum.

CIVE 994 ADVANCED INDEPENDENT STUDY IN CIVIL ENGINEERING (1-3 credits)

Advanced individual study at the doctoral level in a selected area of civil engineering under the supervision and guidance of a Civil & Environmental Engineering faculty member.

CIVE 998 ADVANCED INDEPENDENT RESEARCH IN CIVIL ENGINEERING (1-6 credits)

Advanced independent research work and written findings, other than thesis or dissertation work, in a selected area of civil engineering under the supervision and guidance of a Civil & Environmental Engineering faculty member.

Prerequisite(s): Permission.

CIVE 999 DOCTORAL DISSERTATION (1-24 credits)

Doctoral Dissertation.

Prerequisite(s): Admission to doctoral degree program and permission of supervisory committee chair. Not open to nondegree students.

Communication (COMM)

Communication Graduate Courses

COMM 8000 FOUNDATIONS OF COMMUNICATION (3 credits)

This seminar is designed to introduce graduate students to the Communication discipline. This course will expose students to historical, theoretical, and philosophical perspectives across various contexts and areas of study. In addition to a foundational exploration of the discipline, this course also prepares MA students to conduct research, apply theory to practice, and declare their own expertise in the discipline. Through readings, guest lectures, writing, and discussions, students will work to understand the broad expanse of the discipline.

Prerequisite(s): Admission to the School of Communication MA program. Not open to non-degree graduate students.

COMM 8010 COMMUNICATION RESEARCH METHODS SEMINAR: QUANTITATIVE (3 credits)

Philosophy of scientific investigation from a quantitative standpoint, including process and products, in comparison to other ways of knowing. Introduces students to quantitative designs and statistical applications for communication research and to data gathering methods appropriate for such designs. Emphasis is placed on preparing, evaluating and writing quantitatively oriented communication research proposals and reports.

Prerequisite(s): Graduate majoring in communication or permission of instructor. Not open to non-degree graduate students.

COMM 8020 COMMUNICATION RESEARCH METHODS SEMINAR: QUALITATIVE (3 credits)

This course is an introduction to the methodology and practice of qualitative research. Within the course, students will be exposed to research paradigms, approaches to qualitative research, and ways to collect and analyze qualitative data. Students will be required to design and carry out their own qualitative research project.

Prerequisite(s): Open to School of Communication Graduate Students only

COMM 8030 TOPICAL SEMINAR: RESEARCH METHODS (3 credits)

This variable-content course provides students with in-depth knowledge about various communication research methods (e.g., survey or experimental, content analysis, legal, assessment strategies, ethnography, advanced critique, etc.) or other communication methods and assessment in context with particular areas of study.

Prerequisite(s): Graduate student status

COMM 8040 SEMINAR IN RHETORICAL CRITICISM (3 credits)

Students will engage with the history of rhetorical criticism in the field of communication, popular orientations toward criticism over the years, and new directions in methodology. A variety of rhetorical methods and theories as well as rhetorical artifacts will be explored.

Prerequisite(s): Graduate admission to School of Communication or permission of instructor. Not open to non-degree graduate students.

COMM 8110 GRADUATE TEACHING ASSISTANT SEMINAR (1 credit)

This course provides weekly training, assessment, and teaching strategies for graduate teaching assistants within the the School of Communication.

Prerequisite(s): School of Communication Graduate Teaching Assistants Only. Not open to non-degree graduate students.

COMM 8180 TOPICAL SEMINAR: COMMUNICATION STUDIES (3 credits)

A variable content course dealing with communication studies. Each offering will treat a single aspect of communications studies in-depth - e.g., interpersonal conflict, gender and communication, organizational culture, health systems communication, relational communication, political communication, marital and family communication, communication education, rhetorical critique, etc. Course may be repeated.

Prerequisite(s): Graduate Student Standing

COMM 8200 SEMINAR IN POPULAR CULTURE, MASS MEDIA AND VISUAL RHETORIC (3 credits)

This course studies how discursive meaning is made through established and emerging visual technologies and the impact visual symbol systems are having upon the field of rhetoric in general. Students will investigate how visual technologies, discourse theory, and semiotic theory has intersected with and expanded contemporary rhetorical theories, and they will apply these theories to visual texts. (Cross-listed with ENGL 8760).

COMM 8250 STRATEGIC COMMUNICATION (3 credits)

This course surveys the topic of strategic communication in business, nonprofit, and government sectors. Focused on management-level evaluation of effective strategic communication, the course prepares students to work in collaboration with strategic communication departments and optionally integrate strategic communication into a research agenda for further graduate study. Content includes determining motivations and reasons for campaigns, understanding relationships between stakeholders, and evaluating outcomes of campaigns.

COMM 8300 TOPICAL SEMINAR: JOURNALISM AND MEDIA COMMUNICATION (3 credits)

Substantive study of specialized areas and modes of journalism and media communication (broadcasting, film, print, public relations, advertising, social media, etc). Content will vary. Course may be repeated.

Prerequisite(s): Graduate Student Status

COMM 8580 COMMUNICATION, IDENTITY, AND DIVERSITY (3 credits)

This course provides a theoretical exploration of the ways social identity may be formed and communicated in diverse contexts. The content of this class builds from communication scholarship on identity, drawing on a variety of approaches, such as rhetorical, intercultural, and interpersonal. It also includes both germinal and contemporary literature regarding social identity, diversity-equity-access-inclusion (DEAI), intersectionality, and power relationships. This class provides students with an academic lens for critically examining how identity is communicated through and to society. Additionally, this course encourages students to explore their personal identity and communicate their experiences of diversity and power in social contexts. Students who complete this class can expect to gain a greater understanding of the complex social dynamics that influence identity and its communicative power in diverse contexts.

Prerequisite(s): Admission to the graduate program or permission from the instructor

COMM 8970 GRADUATE PROJECT (3 credits)

Project Option students must complete a three-hour graduate project written under the supervision of an adviser. A two-member graduate committee (adviser and second committee member) must approve the project.

Prerequisite(s): COMM 8010, 8020, 8470, 8570 and student must be admitted to candidacy.

COMM 8980 INDEPENDENT STUDY (1-3 credits)

Students conduct independent research under the supervision of an adviser. May be taken multiple times with approval of graduate adviser.

Prerequisite(s): Completion of appropriate paperwork; Agreement of supervising faculty; Approval of independent study by supervising faculty, graduate program chair, and the School director's office.

COMM 8990 THESIS (1-6 credits)

Independent research project written under the supervision of an adviser.

Prerequisite(s): Completion of or concurrent enrollment in final coursework in completion of the MA degree; Approval by Graduate Program Chair. Not open to non-degree graduate students.

COMM 9400 SEMINAR IN COMMUNICATION & TECHNOLOGY (3 credits)

A synthesis of speech and mass communication research as it relates to the study of computers and technology. Computer Mediated Communication (CMC) will be emphasized. Students write a research paper appropriate for submission to an academic conference.

Prerequisite(s): COMM 8470 or COMM 8570, and COMM 8010 or COMM 8020, or permission of instructor.

Communication Disorders (CDIS)

Communication Disorders Graduate Courses

CDIS 8200 ADVANCED STUDY OF PEDIATRIC SPEECH SOUND DISORDERS (2 credits)

The purpose of this course is to expand student understanding and application of clinical practices for pediatric speech sound disorders with varying etiologies by building on concepts related to identification, assessment, and treatment introduced at the undergraduate level. Students will learn and apply relevant, theory-driven, and evidence-based practices related to pediatric speech sound disorder management. Assessment and treatment practices will be discussed along with their basis in theoretical perspectives related to motor learning, linguistics, and psycholinguistics. Speech production characteristics associated with cleft palate, childhood dysarthria, and childhood apraxia of speech will be discussed. Students will also address the speech-language pathologist's role in determining speech sound production differences relative to cultural-linguistic diversity and dialectal variations as well as navigate ethical considerations related to clinical decision making.

Prerequisite(s): Graduate standing in Speech-Language Pathology

CDIS 8240 LANGUAGE DISORDERS IN SCHOOL-AGE CHILDREN (3 credits)

This course focuses on the relationship between spoken and written language and its role in language-based learning disabilities in school-age students. It addresses the characteristics of language and reading impairments; the subtypes of these disorders including dyslexia; and the different diagnostic strategies, assessment tools, and intervention approaches used with them. Various models of language and reading as they relate to development and disorders will be reviewed.

Prerequisite(s): Graduate standing in Speech-Language Pathology and a course in later (school age) language development. Not open to non-degree graduate students.

CDIS 8310 ADVANCED AUDIOLOGY FOR THE SPEECH-LANGUAGE PATHOLOGIST (1 credit)

The purposes of Advanced Audiology for Speech-Language Pathologists are to ensure all graduate candidates possess fundamental knowledge in the area of audiology and aural rehabilitation. Candidates will competently complete basic audiological screening, and be competent in reading audiological evaluations, understanding and discussing types of hearing loss, and amplification. Instruction will introduce auditory skills, language development for children who are Deaf/hard-of-hearing, and aural rehabilitation programs for children and adults. Topics related to hearing loss including educational considerations and the Deaf culture will be covered. The course will also provide hands-on experiences with audiology-related and aural rehabilitation tasks a speech-language pathologist will encounter in a real-life work setting. These practical experiences will prepare students for encounters they will have in any work setting as a speech-language pathologist.

Prerequisite(s): Graduate standing in speech-language pathology

CDIS 8396 HEARING SCIENCE (3 credits)

This course is designed for undergraduate majors in speech-language pathology and audiology and for graduate candidates in education of the deaf/hard of hearing. The course will include basic terminology, anatomy and physiology of the hearing mechanism, acoustics and physics of sound, the processes of human hearing, elements of basic hearing measurements, psychophysics. This course will prepare speech-language pathology candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. (Cross-listed with CDIS 4390).

Prerequisite(s): Admission to Graduate College

CDIS 8410 MOTOR SPEECH DISORDERS (3 credits)

This course is designed to integrate background information from neurophysiology related to motor speech disorders (MSD). The term motor speech disorders refers to speech deficits and differences resulting from injury to the human nervous system. This course will focus on acquired movement-based disorders of speech production that impact one or more of the following subsystems of speech: respiration, phonation, resonance, and/or articulation, including the dysarthrias and apraxia of speech. This course will entail clinical description and characteristics of the impairments as well as on the psychosocial changes in life activities and participation of individuals who live with MSD.

Prerequisite(s): SPED 4470/CDIS 4470 or SPED 8470/CDIS 8470 or equivalent; graduate standing in Speech-Language Pathology. Not open to non-degree graduate students.

CDIS 8420 VOICE DISORDERS (3 credits)

The purpose of this course is to provide candidates the opportunity to study the disorders of voice in depth so that they are able to effectively orchestrate caseloads including this disorder type. Voice disorders of both organic and functional etiology will be studied. Candidates will have opportunities to conduct instrumental voice evaluation techniques. The disorders will be discussed to cover the range of topics including etiology, symptomology, assessment and diagnosis, prognosis, and treatment, both medical and non-medical.

Prerequisite(s): Graduate standing in Speech-Language Pathology. Not open to non-degree graduate students.

CDIS 8430 FLUENCY DISORDERS (3 credits)

This course examines the types and causes of rate, rhythm, and stress pattern differences as they relate to child, adolescent, and adult fluency disorders. Theory, current research, and contemporary practice information will constitute the foundation within which to address issues of identification, general assessment, differential assessment, prescription, and the implementation and evaluation of treatment strategies. The course is intended for graduate students in speech-language pathology.

Prerequisite(s): Graduate standing in Speech-Language Pathology. Not open to non-degree graduate students.

CDIS 8440 APHASIA (3 credits)

The purpose of this course is to provide the requisite knowledge and prepare future clinicians to assess, diagnose, and treat acquired language disorders associated with focal lesions as well degenerative processes to the left hemisphere. Following the World Health Organization - International Classification of Functioning, Disability and Health, known more commonly as ICF (WHO-ICF) framework, students will learn assessment, differential diagnosis as well as management of the aphasia syndromes and primary progressive aphasia. The course is designed to help future clinicians understand the theoretical bases and etiologies of acquired language disorders, the principles and best practices for assessment and intervention. After completing this course, students will understand how to evaluate different types and severities of aphasia and develop goals and plans for intervention based on individual assessment.

Prerequisite(s): Admission to the Speech-Language Pathology Graduate Program AND CDIS 8470/4470 (Neurophysiology). Not open to non-degree graduate students.

CDIS 8460 COGNITIVE-LINGUISTIC DISORDERS RELATED TO DEMENTIA (1 credit)

The purpose of this course is to provide the requisite knowledge and prepare future clinicians to assess, diagnose, and treat individuals with cognitive-linguistic impairments due to dementia, a general term for loss of memory, language, problem-solving and other thinking abilities that are severe enough to interfere with daily life. Following the World Health Organization - International Classification of Functioning, Disability and Health, known more commonly as ICF (WHO-ICF) framework, students will learn assessment, differential diagnosis as well as management of mild cognitive impairment as well as the different types of dementia. The course is designed to help future clinicians understand the theoretical bases and etiologies of neurocognitive degenerative disorders, the principles and best practices for assessment and intervention. After completing this course, students will understand how to evaluate different types and severities of dementia and develop goals and plans for intervention based on individual assessment.

Prerequisite(s): Admission to the Speech-Language Pathology Graduate Program AND CDIS 8470/4470 (Neurophysiology).

CDIS 8470 NEUROPHYSIOLOGY OF SPEECH AND LANGUAGE (3 credits)

The purpose of this course is to provide speech-language pathology graduate candidates an introduction to human neuroanatomy and neurophysiology of the speech, language and hearing mechanisms, across the lifespan. Emphasis is placed on developing an understanding of the neurophysiological underpinnings of human communication and its disorders. Ultimately, the course will prepare speech-language pathology graduate candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world.

Prerequisite(s): Graduate Standing Speech-Language Pathology Majors in the CDIS 4380 or equivalency. Not open to non-degree graduate students.

CDIS 8486 RESEARCH METHODS IN COMMUNICATION DISORDERS (3 credits)

This course will provide candidates with an introductory set of skills to interpret and evaluate research in communication disorders and closely related fields. In addition, this course will provide candidates with basic knowledge regarding research designs and analyses commonly used in communication disorders and related fields. The content addressed in this course will prepare candidates to judiciously evaluate evidence-based practice and apply the scientific method to clinical decision-making. It offers an opportunity to cultivate critical thinking skills imperative to becoming dedicated practitioners, reflective scholars, and responsible citizens who can adeptly meet the ever-evolving challenges of their profession.

Prerequisite(s): This course is designed for graduate and undergraduate students majoring in speech-language pathology and is a required course for speech-language pathology candidates.

CDIS 8490 COGNITIVE-COMMUNICATION DISORDERS RELATED TO RIGHT HEMISPHERE BRAIN DAMAGE & TRAUMATIC BRAIN INJURY (2 credits)

The purpose of this course is to provide the requisite knowledge and prepare future clinicians to assess, diagnose, and treat individuals with cognitive-communication impairments due to right hemisphere brain damage (RHD) and traumatic brain injury (TBI). Following the World Health Organization - International Classification of Functioning, Disability and Health, known more commonly as ICF (WHO-ICF) framework, students will learn assessment, differential diagnosis as well as management of cognitive-communication disorders related to right hemisphere damage and traumatic brain injury. The course is designed to help future clinicians understand the theoretical bases, etiologies, and the principles and best practices for assessment and intervention.

Prerequisite(s): Neurophysiology, CDIS 8470/4470 and Aphasia, CDIS 8440

CDIS 8500 BASIC CLINICAL PRACTICUM IN SPEECH-LANGUAGE PATHOLOGY (2 credits)

These courses are designed to provide the speech-language pathology candidate clinicians with diverse clinical experiences prior to full-semester clinical externships in the educational, and medical settings.

Prerequisite(s): Graduate standing in Speech-Language Pathology Program, completed any previous semester of 8500 with a B or above, currently maintain at least a 3.0 GPA overall. Permission from program faculty. Not open to non-degree graduate students.

CDIS 8510 EDUCATIONAL EXTERNSHIP IN COMMUNICATION DISORDERS (4 credits)

This course is designed to provide the speech-language pathology candidate with experiences of a clinical nature in educational settings. The purpose of the course is to advance the candidate's skills in the evaluation and management of communication and swallowing disorders.

Prerequisite(s): Successful completion of "Foundation Block" (CDIS 4550/8556; SPED 8030, 8120 or equivalent) and three semesters of SPED 8500/CDIS 8500 unless otherwise indicated. Permission required. Not open to non-degree graduate students.

CDIS 8520 MEDICAL EXTERNSHIP IN COMMUNICATION DISORDERS (4 credits)

This course is designed to provide the speech-language candidate with experiences of a clinical nature in medical settings. The purpose is to advance the candidates' skills in the evaluation and management of communication and swallowing disorders.

Prerequisite(s): Three semesters of SPED 8500/CDIS 8500 unless otherwise indicated plus permission. Not open to non-degree students.

CDIS 8530 SEMINAR IN SPEECH-LANGUAGE PATHOLOGY (3 credits)

This course is designed to provide intensive discussion of research or problems of current professional interest based on current literature in speech-language pathology. This course will prepare candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world.

Prerequisite(s): Graduate standing

CDIS 8540 AUTISM SPECTRUM DISORDER (2 credits)

This course is designed to familiarize candidates with the features of, and interventions for, individuals with autism spectrum disorder. The course will emphasize evidence-based practices when utilizing various methodologies for supporting social and communication skills.

Prerequisite(s): Co-requisite: CDIS 8560. Admission to the Graduate College. Not open to non-degree graduate students.

CDIS 8556 SPECIAL NEEDS STUDENTS FROM DIVERSE COMMUNITIES (3 credits)

The purpose of this course is to study the impact of cultural and linguistic diversity on communication, learning, and behavior. The contrast between what is considered 'normal' language / learning development and in the presence of culturally and linguistically diverse (CLD) P-12 students will receive special emphasis.

CDIS 8560 AUGMENTATIVE & ALTERNATIVE COMMUNICATION (2 credits)

This course is designed to introduce students to the nature and process of augmentative and alternative communication (AAC), current theories and models of AAC, basic elements of AAC systems, and contemporary AAC clinical practices and principles. Topics will be examined from educational and rehabilitation perspectives as they relate to assessment, prescription, implementation and evaluation. The course will emphasize practical solutions in AAC for children and adults using both high technology and other less-complex communication strategies. Students will explore high-tech, low-tech, and no-tech options of AAC and gain knowledge of and experience with assessment of clients for AAC needs, prescription of an appropriate level of AAC, practice with implementing various AAC systems, and on-going evaluation of the AAC system's effectiveness with clients.

Prerequisite(s): Graduate standing in Speech-Language Pathology program

CDIS 8570 DYSPHAGIA (3 credits)

This course is designed to integrate background information from neurophysiology to dysphagia. The term dysphagia refers to swallowing disorders resulting from congenital birth anomalies (i.e., cleft palate, cerebral palsy, etc.) as well as acquired injury to the central nervous system (i.e., stroke, head injury, etc.). This course will introduce candidates to bedside, radiographic, and endoscopic assessment procedures as well as direct, indirect, and medical management techniques of dysphagia. Additionally, this course will provide clinical description and characteristics of swallowing impairments as well as on the psychosocial changes in life activities and participation of individuals who live with dysphagia.

Prerequisite(s): SPED 4470/CDIS 4470 or equivalent, graduate standing in speech-language pathology. Not open to non-degree graduate students.

CDIS 8590 EARLY INTERVENTION: BIRTH TO FIVE (2 credits)

This course is designed to provide candidates with knowledge about supporting communicative disorders in young children, and their families, within a multicultural and global framework. It will cover assumptions underlying current approaches to the evaluation and treatment in the developing child.

Prerequisite(s): CDIS 4420 or equivalent. Admission to Graduate Program in Speech-Language Pathology. Not open to non-degree graduate students.

CDIS 8680 SPEECH-LANGUAGE GLOBAL INTERPROFESSIONAL CLINICAL EXPERIENCE (3 credits)

The purpose of this course is to help students develop cultural competency and a practice of cultural humility in providing culturally responsive care. Students will expand their knowledge and skills through cross-cultural experiences focusing on the aspects of speech language therapy treatment. A major focus of the class will be exploration of the role of speech language therapy and collaboration with other health care providers working in an underserved population. Students will engage in cultural exploration providing assessment, therapy and recommendations.

Prerequisite(s): Students will apply for the course. Selected students will be given permission for the course. Not open to non-degree graduate students.

Communication Studies (CMST)

Communication Studies Graduate Courses

CMST 8116 RHETORICAL THEORY AND CRITICISM (3 credits)

Rhetoric is the art of persuasion. Rhetoric impacts our daily lives by influencing how we think about and respond to things. It pervades our political world, work environments, civic and social settings, and pop culture. Students will learn a variety of approaches to rhetorical criticism (theoretical and methodological) that enable them to critically analyze the messages that surround us. We will also unpack the ways rhetoric undergirds or undermines existing power structures, and how it might reshape them.

Prerequisite(s): Junior standing and (Journalism/Media Communication or CMST major). By permission of instructor.

CMST 8126 COMMUNICATION AND SOCIAL PROTEST (3 credits)

This class will examine the role played by communication in movements for social change in contemporary society. We will examine social movements which rely on speeches (i.e. women's rights movements), social movements which rely on the grassroots political efforts of their members (i.e. the environmental rights movement) and the overall strategies of persuasion utilized in movements which seek social change, including emerging communication technologies. (Cross-listed with CMST 4120)

Prerequisite(s): Non-degree or admission to School of Communication M.A. program.

CMST 8136 FAMILY COMMUNICATION (3 credits)

This course emphasizes the role of communication in family relationships. Theories, models, and research methods will be used to examine the family in various cultures and contexts (e.g., nuclear families, single-parent families, and blended families). Topics that will be covered in this course include: family conflict, family roles, family stories, family stress, family well-being, genograms, marriage, and divorce. (Cross-listed with CMST 4130)

Prerequisite(s): Graduate majoring in the School of Communication or permission of instructor. Not open to non-degree graduate students.

CMST 8146 COMMUNICATION AND HUMAN RELATIONSHIPS (3 credits)

This course applies theories of interpersonal processes and communication principles to the study of close, significant and personal human relationships. Discussion focuses on the communication in different types of relationships and relational stages, e.g., strangers, acquaintances, friendships and intimates. (Cross-listed with CMST 4140)

Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

CMST 8156 CORPORATE TRAINING AND DEVELOPMENT (3 credits)

This course introduces students to the process of designing communication training programs and workshops for a variety of professional settings. It provides students, especially those who are prospective trainers and/or consultants, with experiential and cognitive knowledge about needs assessment, adult learning, communication training research, objectives writing, module design, interactive delivery methods and program evaluation. (Cross-listed with CMST 4150)

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

CMST 8166 COMMUNICATION FOR INSTRUCTIONAL SETTINGS (3 credits)

This course is designed to help prospective instructors and/or trainers understand and apply the principles of communication in instructional settings (i.e., classrooms, workshops, training programs). It introduces students to the research area in the speech communication discipline called 'Instructional Communication' by covering these five units: 1) Communication Strategies, Objectives, & Content; 2) Student Communication Needs & Expectations; 3) Feedback, Reinforcement, & Discussion; 4) Context, Climate, & Influence; and 5) Teacher Communicator Style, Characteristics, & Behaviors. (Cross-listed with CMST 4160)

Prerequisite(s): Graduate Standing.

CMST 8176 ORGANIZATIONAL COMMUNICATION (3 credits)

This course will help students understand organizational communication theories, models, and processes; apply these principles in organizational communication speaking exercises; and learn management and leadership skills. (Cross-listed with CMST 4170)

Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

CMST 8186 COMMUNICATION LEADERSHIP AND POWER AND ORGANIZATIONS (3 credits)

This course provides theoretical and experiential knowledge about such topics as communication leadership styles and tactics, superior and subordinate interactions, power, ethical responsibilities, and diversity gender issues related to communication leadership. (Cross-listed with CMST 4180)

Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

CMST 8196 COMPUTER-MEDIATED COMMUNICATION (3 credits)

Computer-Mediated Communication addressing emerging issues of virtual communities, identity, civic life and participation, online relationships, collaborative work environments, digital networks, gender race class issues, legal and ethical considerations of technology, and commodification of mediated communication. (Cross-listed with CMST 4190).

CMST 8226 HEALTH COMMUNICATION (3 credits)

This course introduces students to the interdisciplinary field of health communication. In this course, students will learn various theories of health communication as well as current research and trends in health communication and its related fields. To speak to the complexity and dynamism of health communication, this course will expose students to the multiple voices and perspectives involved in the delivery of health and healthcare. (Cross-listed with CMST 4220)

Prerequisite(s): Junior standing; a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

CMST 8516 PERSUASION AND SOCIAL INFLUENCE (3 credits)

The primary goal of this course is to provide students with a solid grounding in theories, principles, and strategies of persuasion social influence as they apply to everyday contexts in which influence attempts take place. Students should gain familiarity with findings from empirical investigations on persuasion, social influence, and compliance gaining, and will learn about strategies and techniques of persuasion relating (Cross-listed with CMST 4510)

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

CMST 8536 INTERCULTURAL COMMUNICATION-US (3 credits)

This course will provide a foundation that leads to Intercultural Communication competence. Specifically, this course is to introduce the concepts of cross-cultural communication. Theory and research are integrated with application and necessary skills are identified and developed. (Cross-listed with CMST 4530)

CMST 8556 NONVERBAL COMMUNICATION (3 credits)

This course is designed to familiarize the student with current knowledge and research about nonverbal communication and to provide a wide variety of practical experiences through which the student can analyze and evaluate his or her own nonverbal behavior and that of others. The course, also, reviews the functions, areas and applied contexts of nonverbal communication. (Cross-listed with CMST 4550)

Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

CMST 8566 COMMUNICATION, TEAMWORK, & FACILITATION (3 credits)

This course focuses on the communication practices, process tools, and theory associated with team problem solving, group discussion, facilitation skills, facilitative leadership, meeting management, and training in effective group interaction. (Cross-listed with CMST 4560)

Prerequisite(s): Graduate standing. Not open to nondegree students.

CMST 8576 INTERCULTURAL COMMUNICATION IN THE GLOBAL WORKPLACE (3 credits)

This course examines the intercultural perspective of organizational communication in a modern global world by focusing on the management of cultural differences in the global workplace. The trend towards a global economy is bringing people of different ethnic and cultural background together. Thus, the development of greater intercultural understanding has become an essential element of global workplace. After taking this course you will be more aware of cultural diversity in an organizational setting and further develop intercultural sensitivity and intercultural competence that will help you adapt to your future organizational life. (Cross-listed with CMST 4570)

CMST 8586 COMMUNICATING RACE, ETHNICITY & IDENTITY (3 credits)

This is an undergraduate/graduate course that provides students with definitional and experiential knowledge about the origin of racial concepts, theories, and practices, definitions of ethnicity and identity, and the communicative relationship between race, ethnicity, and identity. (Cross-listed with CMST 4580, BLST 4580, BLST 8586)

CMST 8606 COMMUNICATION THEORY AND APPLICATION (3 credits)

This course begins by introducing students to two broad categories of theory development - objective and interpretive. Then concepts and assumptions associated with each of these two perspectives are employed to critically evaluate several specific theories that fall within different of the sub-disciplines of the field of communication: interpersonal, group, organizational, mass, public/thetorical, cultural, and intercultural/gender. Along with critically evaluating and comparing/contrasting different communication theories, emphasis is placed on how the theories can be effectively applied in concrete settings and circumstances. (Cross-listed with CMST 4600)

Prerequisite(s): Graduate standing

CMST 8706 INTERPERSONAL CONFLICT (3 credits)

This course provides an overview of interpersonal conflict processes. It examines perspectives on conflict, patterns of constructive and destructive conflict, conflict styles and tactics, interpersonal power, negotiation strategies, conflict assessment, and conflict skill development. (Cross-listed with CMST 4700)

Prerequisite(s): Communication major

Computer Science (CSCI)

Computer Science Graduate Courses

CSCI 8000 ADVANCED CONCEPTS IN PROGRAMMING LANGUAGES (3 credits)

Logic/Declarative programming is an important programming paradigm in which problems are described in terms of the properties they possess. As a result, in this style of programming many algorithmic elements, which explicitly must be articulated when writing programs in other programming languages, can be omitted. Core elements of logic programming play important roles in AI.

Prerequisite(s): CSCI 3320; CSCI 3660; CSCI 4220. Not open to non-degree graduate students.

CSCI 8010 FOUNDATIONS OF COMPUTER SCIENCE (3 credits)

This is a foundational course for students enrolled in the graduate program in computer science. The objectives are to introduce students to a large body of concepts so that they are better prepared for undertaking the core courses in the graduate program. It is assumed that student would have programmed in a high-level language and have exposure to basic college level mathematical concepts such as logarithms, exponents, sequences, and counting principles.

Prerequisite(s): Students are expected to have written programs using a high-level programming language and should understand basic mathematical concepts including exponents, logarithms, sequences, and counting principles. Not open to non-degree graduate students.

CSCI 8016 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with MATH 4010, MATH 8016, CSCI 4010).

Prerequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

CSCI 8040 LARGE SCALE NETWORK ANALYSIS ALGORITHMS (3 credits)

The course will provide a review of the properties of large complex network systems, such as those occurring in social networks, epidemiology and biological systems. We will discuss algorithms to analyze these properties, their implementations, their stability under information fluctuation and how information spreads through networks.

Prerequisite(s): Students should be comfortable w/ programming, have knowledge of data structures, preliminary graph algorithms, & linear algebra. Suggest Prep Courses: CSCI 4150 or CSCI 8156; CSCI 3320; MATH 4050 or Permission. Not open to non-degree graduate students.

CSCI 8050 ALGORITHMIC GRAPH THEORY (3 credits)

The overall of the goal is to introduce advanced concepts in graph theory, graph modeling, and graph algorithms and how they can be used to solve a wide range of problems in various application domains. The course introduces students to several applied path algorithms, clustering and partitioning techniques, network flow algorithms, and weighted matching algorithms. Other advanced concepts associated with complex networks include node centralities in graphs and community detection approaches. The course will also introduce students to key classes of graphs with a particular focus on the main classes of Perfect Graphs and their applications in scheduling, chip design, mobile computing, and Biomedical Informatics. (Cross-listed with MATH 8050).

Prerequisite(s): CSCI 3320 or CSCI 8325 and MATH 4150 or MATH 8156 or permission of instructor. Not open to non-degree graduate students.

CSCI 8060 ALGORITHMIC COMBINATORICS (3 credits)

This course includes classical combinatorial analysis graph theory, trees, network flow, matching theory, external problems, and block designs. (Cross-listed with MATH 8060).

Prerequisite(s): MATH 3100, CSCI 3100, MATH 8105 or CSCI 8105 or instructor's permission.

CSCI 8080 DESIGN AND ANALYSIS OF ALGORITHMS (3 credits)

The course provides students an understanding of advanced topics in algorithms. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, dynamic programming, greedy algorithms, graph algorithms, and the theory of NP-Completeness. (Cross-listed with MATH 8080).

Prerequisite(s): CSCI 3320 or CSCI 8325 or equivalent. Not open to non-degree graduate students.

CSCI 8105 APPLIED COMBINATORICS (3 credits)

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with MATH 8105, MATH 3100, CSCI 3100).

CSCI 8110 ADVANCED TOPICS IN ARTIFICIAL INTELLIGENCE (3 credits)

An in-depth study of one or more topics selected from: search techniques, knowledge representation, knowledge programming, parallel processing in Artificial Intelligence, natural language processing, image processing, current and future directions, etc. May be repeated with different topics, with permission of adviser.

Prerequisite(s): CSCI 4450 or CSCI 8456 or equivalent.

CSCI 8150 ADVANCED COMPUTER ARCHITECTURE (3 credits)

This course will provide an in-depth understanding of the key architectural concepts governing the design of state-of-the-art high-performance computers. It will introduce methods that are commonly used to trade-off the various architectural choices to design systems with the desired cost-performance requirements. The course will provide a systems level perspective to design. The emphasis will be on the cache, memory and I/O subsystems, system interconnects leading to distributed shared-memory multiprocessor systems. Multiprocessor clusters based on message passing and high-performance processor architecture will be covered. The course will also provide a brief overview of emerging system architectures including quantum computing and those used to facilitate machine learning applications.

Prerequisite(s): CSCI 4350, CSCI 4500 or equivalent with permission of the instructor. Not open to non-degree graduate students.

CSCI 8156 GRAPH THEORY & APPLICATIONS (3 credits)

Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 4150, MATH 4150, MATH 8156).

Prerequisite(s): MATH 2030 or permission of instructor.

CSCI 8160 INTRODUCTION TO VLSI DESIGN (3 credits)

Introduction to the principal concepts of integrated circuits layout. Presentation of the hardware foundations, algorithmic mathematical and graph theoretical foundations of circuit layout. Topics discussed in digital design and computer architecture classes are studied at the actual layout design level such as datapath subsystems and array subsystems. Design methodology tools and testing. Hardware descriptions languages.

Prerequisite(s): CSCI 3320 (or CSCI 8325), CSCI 3710 and CSCI 4350 (or CSCI 8356). Not open to non-degree graduate students.

CSCI 8206 NUMERICAL METHODS (3 credits)

This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 4200, MATH 4200, MATH 8206).

Prerequisite(s): MATH 1970 and MATH 2050 and MATH 2350 with a C- or better or permission of instructor.

CSCI 8210 ADVANCED COMMUNICATIONS NETWORKS (3 credits)

Advanced study of communication networks, analysis of communication needs, special problems encountered in different types of networks, efficiency and traffic analysis and emerging hardware software technologies. Detailed "hands-on" study of the TCP/IP networking protocols.

Prerequisite(s): CSCI 3550 or 8555 or equivalent. Not open to non-degree graduate students.

CSCI 8256 HUMAN COMPUTER INTERACTION (3 credits)

Human computer interaction is concerned with the joint performance of tasks by humans and machines; human capabilities to use machines (including learnability of interfaces); algorithms and programming of the interface; engineering concerns that arise in designing and building interfaces; the process of specification, design, and implementation of interfaces; and design trade-offs. (Cross-listed with CSCI 4250).

CSCI 8266 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, ITIN 4260, ITIN 8266).

CSCI 8300 IMAGE PROCESSING AND COMPUTER VISION (3 credits)

This course introduces the computer system structures and programming methodologies for digital image processing and computer vision. The course will cover the mathematical models of digital image formation, image representation, image enhancement and image understanding. Techniques for edge detection, region growing, segmentation, two-dimensional and three-dimensional description of object shapes will be discussed. The course will concentrate on the study of knowledge-based approaches for computer interpretation and classification of natural and man-made scenes and objects.

Prerequisite(s): CSCI 1620 and CSCI 3320. Not open to non-degree graduate students.

CSCI 8306 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, MATH 4300, MATH 8306).

Prerequisite(s): MATH 2050 with a C- or better or permission of instructor.

CSCI 8316 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, MATH 4310, MATH 8316).

Prerequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

CSCI 8325 DATA STRUCTURES (3 credits)

This is a core that will cover a number of data structures such as tree, hashing, priority queues and graphs as well as different algorithm design methods by examining common problem-solving techniques. (Cross-listed with CSCI 3320)

CSCI 8326 COMPUTATIONAL OPERATIONS RESEARCH (3 credits)

Survey of computational methods used in the solution of operations research problems. Some topics may include scripting to guide optimization software, constraint programming, heuristics and metaheuristics for optimization, basic machine learning algorithms, and simulation. (Cross-listed with MATH 4320, MATH 8326, CSCI 4320).

Prerequisite(s): MATH 3200 or CSCI 1620, and MATH 4300 each with a grade of C- or better or permission of instructor.

CSCI 8340 DATABASE MANAGEMENT SYSTEMS II (3 credits)

This course is an in-depth coverage of database management systems. Students will learn important principles of query processing and query optimization, transaction processing, and various database systems architectures. After taking this course, students should also be able to identify useful resources to explore future developments in the area of database management systems.

Prerequisite(s): CSCI 4850 or CSCI 8856. Not open to non-degree graduate students.

CSCI 8350 DATA WAREHOUSING AND DATA MINING (3 credits)

This course is an in-depth coverage of data warehousing and data mining. This course starts with coverage of data warehousing (an enabling technology for data mining) and covers the entire data mining process and various data mining functionalities in detail. Students will get a chance to practice knowledge learned in the course to complete term projects related to data warehousing and/or data mining. After taking this course, students should also be able to identify useful resources to explore future developments in the area of data warehousing and data mining.

Prerequisite(s): CSCI 4850 or CSCI 8856. Not open to non-degree graduate students.

CSCI 8360 MACHINE LEARNING FOR TEXT (3 credits)

This course focuses on the fundamental techniques for extraction of various insights from text data which is ubiquitous on the Web, social media sites, emails, news articles, digital libraries, and other sources. The course topics will include concepts and techniques used by search engines to crawl, index, and rank web pages on the Web, machine learning techniques for categorization of news articles into different categories, sentiment and opinion analysis of social media chats, text summarization, and information extraction.

Prerequisite(s): Not open to non-degree graduate students.

CSCI 8366 FOUNDATIONS OF CYBERSECURITY (3 credits)

Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 4360, CYBR 8366)

Prerequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CSCI 8390 ADVANCED TOPICS IN DATA BASE MANAGEMENT (3 credits)

This course is an in-depth coverage of well-selected topic(s) in recent development of database management systems. Since new developments in DBMS are very diverse, when each time when this course is offered, it will focus on one or more specific topics, and the course can be taken multiple times for credit.

Prerequisite(s): CSCI 4850 or CSCI 8856. Not open to non-degree graduate students.

CSCI 8400 ADVANCED COMPUTER GRAPHICS (3 credits)

Computer graphics continues to play an important role in computer science. This course covers the mathematical foundations of three-dimensional representation and animation; ray tracing and path tracing rendering methods; using the graphical processing unit (GPU) for real time applications; and concludes with simulation of natural phenomenon.

Prerequisite(s): Bachelors degree or permission from the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8410 DISTRIBUTED SYSTEMS AND NETWORK SECURITY (3 credits)

The course aims at understanding the issues surrounding data security, integrity, confidentiality and availability in distributed systems. Further, we will discuss various network security issues, threats that exist and strategies to mitigate them. This course will cover topics in cryptography, public key infrastructure, authentication, hashing, digital signatures, ARP protection, IP and IPSEC, IP Tables, SSL/TLS, firewalls, etc. (Cross-listed with CYBR 8410)

Prerequisite(s): CSCI 8366 or equivalent(s). Not open to non-degree graduate students.

CSCI 8420 SOFTWARE ASSURANCE (3 credits)

Software assurance is a reasoned, auditable argument created to support the belief that the software will operate as expected. This course is an intersection of knowledge areas necessary to perform engineering activities or aspects of activities relevant for promoting software assurance. This course takes on a software development lifecycle perspective for the prevention of flaws. (Cross-listed with CYBR 8420)

Prerequisite(s): CSCI 8836 OR by permission of the Instructor. Not open to non-degree graduate students.

CSCI 8430 TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT (3 credits)

This course examines in detail: the principles of a security architecture, access control, policy and the threat of malicious code; the considerations of trusted system implementation to include hardware security mechanisms, security models, security kernels, and architectural alternatives; the related assurance measures associated with trusted systems to include documentation, formal specification and verification, and testing, and approaches that extend the trusted system, into applications and databases and into networks and distributed systems.

Prerequisite(s): CSCI 8366 or equivalents, or instructor permission. Not open to non-degree graduate students.

CSCI 8446 INTRODUCTION TO PARALLEL COMPUTING (3 credits)

This course is an introduction to parallel computing, that is using multiple processors to execute algorithms. Topics discussed include: classification of parallel computers; shared-memory versus message passing; forms of parallelism; measures of performance; designing parallel algorithms; parallel programming and parallel languages; synchronization constructs; and operating systems for parallel computers. (Cross-listed with CSCI 4440)

Prerequisite(s): CSCI 4500, which may be taken concurrently, with C- or better.

CSCI 8450 ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING (3 credits)

The course will provide in depth study of the topics in natural language processing and understanding, such as syntax, lexical and computational semantics, natural language ambiguities and their disambiguation, logical form construction and inference. The course will survey state-of-the-art natural language processing toolkits and knowledge bases that boost the development of modern language processing and understanding applications.

Prerequisite(s): CSCI 3320 OR CSCI 3660 OR CSCI 4450. Not open to non-degree graduate students.

CSCI 8456 INTRODUCTION TO ARTIFICIAL INTELLIGENCE (3 credits)

An introduction to artificial intelligence. The course will cover topics such as machine problem solving, uninformed and informed searching, propositional logic, first order logic, approximate reasoning using Bayesian networks, temporal reasoning, planning under uncertainty and machine learning. (Cross-listed with CSCI 4450).

CSCI 8476 PATTERN RECOGNITION (3 credits)

Structures and problems of pattern recognition. Mathematics model of statistical pattern recognition, multivariate probability, Bay's decision theory, maximum likelihood estimation, whitening transformations. Parametric and non-parametric techniques, linear discriminant function, gradient-descent procedure, clustering and unsupervised learning, and feature selection algorithms. (Cross-listed with CSCI 4470)

Prerequisite(s): CSCI 1620 with C- or better, and MATH 2050.

Recommended: MATH 4740/8746 or STAT 3800/8805.

CSCI 8480 MULTI-AGENT SYSTEMS AND GAME THEORY (3 credits)

This course covers advanced topics in the area of coordination of distributed agent-based systems with a focus on computational aspects of game theory. The main topics covered in this course include distributed constraint satisfaction, distributed constraint optimization, and competitive and cooperative game theory. (Cross-listed with MATH 8480)

Prerequisite(s): CSCI 4450 or CSCI 8456. Suggested background courses: CSCI 4480 or CSCI 8486; CSCI 8080. Not open to non-degree graduate students.

CSCI 8486 ALGORITHMS FOR ROBOTICS (3 credits)

This course provides an introduction to software techniques and algorithms for autonomously controlling robots using software programs called controllers. Students will be taught how to program and use software controllers on simulated as well as physical robots. (Cross-listed with CSCI 4480).

Prerequisite(s): CSCI 3320 with C- or better. CSCI 4450/8456 is a recommended but not essential pre-requisite.

CSCI 8500 NUMERICAL LINEAR ALGEBRA (3 credits)

Topics covered in this course include error propagation, solutions of nonlinear equations, solutions of linear and nonlinear systems by various schemes, matrix norms and conditioning, and computation of eigenvalues and eigenvectors. (Cross-listed with MATH 8500).

Prerequisite(s): MATH 1960 and MATH 2050, or permission of instructor. Familiarity with computer programming is assumed.

CSCI 8506 OPERATING SYSTEMS (3 credits)

Operating system principles. The operating system as a resource manager; I/O programming, interrupt programming and machine architecture as it relates to resource management; memory management techniques for uni-multiprogrammed systems; process description and implementation; processor management (scheduling); I/O device, controller, and channel management; file systems. Operating system implementation for large and small machines. (Cross-listed with CSCI 4500).

Prerequisite(s): CSCI 3710, CSCI 3320/8325, MATH 1950, and CSCI 4350/8356 with C- or better.

CSCI 8510 NUMERICAL DIFFERENTIAL EQUATIONS (3 credits)

Topics covered in this course include interpolation and approximations, numerical differentiation, numerical integration, and numerical solutions of ordinary and partial differential equations. (Cross-listed with MATH 8510).

Prerequisite(s): MATH 1970, MATH 2350, or permission of instructor.

Familiarity with computer programming is assumed.

CSCI 8520 ADVANCED TOPICS IN OPERATIONS RESEARCH (3 credits)

Advanced treatment of a specific topic in the area of operations research not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with MATH 8520).

Prerequisite(s): MATH 4300 or MATH 8306 or CSCI 4300 or CSCI 8306 or permission of the instructor.

CSCI 8530 ADVANCED OPERATING SYSTEMS (3 credits)

State-of-the art techniques for operating system structuring and implementation. Special purpose operating systems. Pragmatic aspects of operating system design, implementation and use.

CSCI 8555 COMMUNICATION NETWORKS (3 credits)

This course is designed to bring students up to the state of the art in networking technologies with a focus on Internet. It will cover the principles of networking with an emphasis on protocols, implementations and design issues. (Cross-listed with CSCI 3550)

Prerequisite(s): (CSCI 3320 or CSCI 8325 with grade of C- or better) AND (CSCI 2240 or CYBR 2250 with grade of C- or better)

CSCI 8566 NUMBER THEORY & CRYPTOGRAPHY (3 credits)

An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 4560, MATH 4560, MATH 8566).

Prerequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

CSCI 8590 FUNDAMENTALS OF DEEP LEARNING (3 credits)

This course is an introduction to deep learning, a branch of machine learning concerned with the development and application of neural networks. Deep learning trains the machine to learn patterns that it is presented with rather than requiring the human operator to define the patterns that the machine should look for. Deep learning is behind many recent advances in artificial intelligence, such as face recognition, speech recognition and autonomous driving. This course will cover the foundations of deep learning, learning theory, basic/advanced neural networks and problem domains of many selected applications.

Prerequisite(s): CSCI 3320 or instructor permission

CSCI 8610 FAULT TOLERANT DISTRIBUTED SYSTEMS (3 credits)

This course is to study the theory and practice of designing computer systems in the presence of faulty components. Emphasizes the basics of how faults can affect systems and what is required to mask or compensate for their efforts.

Prerequisite(s): Not open to non-degree graduate students.

CSCI 8620 MOBILE COMPUTING AND WIRELESS NETWORKS (3 credits)

The objective of the course is to introduce contemporary issues in mobile computing and wireless networks. The course covers the differences between mobile computing and the traditional distributed computing paradigm, impediments of the mobile and wireless environments, problems and limitations due to such impediments, various network layers solutions, location management techniques, mobile IP, wireless LANs, wireless TCP, ad hoc networks, and sensor networks.

Prerequisite(s): CSCI 3550 or CSCI 8555. Not open to non-degree graduate students.

CSCI 8626 COMPUTER GRAPHICS (3 credits)

An introduction to the acquisition, manipulation and display of graphical information using digital techniques. Topics include discussion of the various hardware devices used for input and output, the classical algorithms and data structures used in manipulation of graphical objects, the user interface to the graphics system, and applicable standards. (Cross-listed with CSCI 4620).

Prerequisite(s): ISQA 3300 or CSCI 3320.

CSCI 8656 INTRODUCTION TO CLOUD COMPUTING (3 credits)

This course is an introduction to cloud computing. The students will learn about core concepts of cloud computing such as cloud models (IaaS, PaaS, SaaS, etc.), deployment models (public, private, hybrid), cloud infrastructures (compute, networking, storage), cloud services (VMs, serverless, object storage, cache, CDN, etc.), and big-data driven systems. This course will revisit essential topics in CS-related courses such as data structure, operating systems, and distributed systems and show how they are utilized and applied in diverse cloud computing technologies and systems including Hadoop, Spark, and distributed databases. After taking this course, students will have basic knowledge of cloud computing and hand-on experiences with diverse projects (including cloud system demos) that utilize diverse and heterogeneous cloud resources. (Cross-listed with CSCI 4650).

Prerequisite(s): Prior experience and background knowledge of networking and operating systems are preferred

CSCI 8666 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)

This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, MATH 4660, MATH 8666).

Prerequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

CSCI 8700 SOFTWARE SPECIFICATIONS AND DESIGN (3 credits)

A continuation of the study of software engineering with an emphasis on early phases of software development, namely requirements engineering/specification and architectural design. Includes an in-depth study of practices for effective software requirements specification and architectural design, as well as formal specifications of software systems. Related topics such as metrics and support tools are also covered.

Prerequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8706 COMPILER CONSTRUCTION (3 credits)

Assemblers, interpreters and compilers. Compilation of simple expressions and statements. Analysis of regular expressions. Organization of a compiler, including compile-time and run-time symbol tables, lexical scan, syntax scan, object code generation and error diagnostics. (Cross-listed with CSCI 4700).

CSCI 8710 MODERN SOFTWARE DEVELOPMENT METHODOLOGIES (3 credits)

Designed to introduce students to advanced object technology and other modern methodologies for developing software systems. Intended for graduate students who have mastered the basic concepts and issues of software engineering. Course covers advanced object-oriented software development. The course also covers several offshoots of object technology, including: component-based software engineering, aspect-oriented software development, software product line engineering, service-oriented computing, etc.

Prerequisite(s): CSCI 4830 or CSCI 8836.

CSCI 8760 FORMAL METHODS IN SOFTWARE ENGINEERING (3 credits)

In the high consequence system domain, a primary objective of any construction technique employed is to provide sufficiently convincing evidence that the system, if put into operation, will not experience a high consequence failure or that the likelihood of such a failure falls within acceptable probabilistically defined limits. Systems for which such evidence can be provided are called high assurance systems. The objective of this course is to examine software-engineering techniques across the development life cycle that are appropriate for high assurance systems. The course will analyze the nature of the evidence provided by various techniques (e.g., does a given technique provide sufficiently strong evidence in a given setting).

Prerequisite(s): CSCI 8000 and CSCI 8836 or CSCI 4830

CSCI 8766 TOPICS IN MODELING (3 credits)

Selection of such topics as formulation and analysis of various models involving Markov chains, Markov processes (including birth and death processes), queues, cellular automata, difference and differential equations, chaotic systems and fractal geometries. (Cross-listed with CSCI 4760).

Prerequisite(s): MATH 2350 and MATH 4740 or MATH 8746.

CSCI 8790 ADVANCED TOPICS IN SOFTWARE ENGINEERING (3 credits)

The main objective of this course is (1) to introduce advanced topics in software engineering approaches and (2) to provide an overview and in-depth understanding of software development and maintenance techniques. Many well-known software implementation problems, associated programming tools, and analysis techniques are also covered. At the end of this course, the student should be able to apply the practical skills and approaches in solving non-trivial problems in diverse fields of study.

Prerequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8836 INTRODUCTION SOFTWARE ENGINEERING (3 credits)

Basic concepts and major issues of software engineering, current tools and techniques providing a basis for analyzing, designing, developing, maintaining and evaluating the system. Technical, administrative and operating issues. Privacy, security and legal issues. (Cross-listed with CSCI 4830).

CSCI 8856 DATABASE MANAGEMENT SYSTEMS (3 credits)

Basic concepts of data base management systems (DBMSs). The relational, hierarchical and network models and DBMSs which use them. Introduction to data base design. (Cross-listed with CSCI 4850).

CSCI 8876 DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS (3 credits)

This required course for undergraduate bioinformatics majors provides foundational knowledge on database aspects used in the field and an overview of their applications in bioinformatics, biomedical informatics, and health/clinical informatics. The course begins with a brief review of key concepts in computational molecular biology related to database search/development, database management systems, the difference between primary and secondary databases, and bioinformatics-related aspects of modeling and theory in computer science. The major focus is on the multiple challenges and aspects of bio-database development, search, and pattern discovery. The course uses problem-based learning to help students develop database management skills as they apply to high throughput "omics." data, the basics of data management, data provenance and governance, standards, and analysis through KDD-based workflows. This course will also consider the fundamentals of artificial intelligence and machine learning as they pertain to bioinformatics, from the perspective of database storage, I/O, and analysis. (Cross-listed with BIOI 4870)

Prerequisite(s): CSCI 3320 and BIOI 3500, or permission of instructor; BIOI 3500 can be taken concurrently. Prior completion of CSCI 4850 is strongly recommended but not required. Not open to non-degree graduate students.

CSCI 8910 MASTER OF SCIENCE CAPSTONE (3 credits)

The capstone course is to integrate coursework, knowledge, skills and experimental learning to enable the student to demonstrate a broad mastery of knowledge, skills, and techniques across the Master degree curriculum of Computer Science for a promise of initial employability and further career advancement. The course is designed to be in a student-centered and student-directed manner which requires the command, analysis and synthesis of knowledge and skills. Students may apply their knowledge and skill to a project which serves as an instrument of evaluation. Students are encouraged to foster an interdisciplinary research and cultivate industry alliances and cooperation in this course. This capstone course should be taken only after students have completed at least 3/4 of course requirements for the major.

Prerequisite(s): Master's degree of Computer Science with course-only option (program III). Not open to nondegree students.

CSCI 8920 ADVANCED TOPICS COMPUTER SCIENCE (3 credits)

An in-depth study, at the graduate level, of one or more topics that are not treated in other courses. May be repeated with different topics with permission of adviser.

Prerequisite(s): Permission of instructor; will vary with offering. Not open to non-degree graduate students.

CSCI 8950 GRADUATE INTERNSHIP IN COMPUTER SCIENCE (1-3 credits)

The purpose of this course is to provide students with opportunities to apply their academic studies in environments such as those found in business, industry, and other non-academic organizations. The student interns will sharpen their academic focus and develop better understanding of non-academic application areas.

Prerequisite(s): Permission of the graduate program chairperson and a minimum grade point average of 3.0 (B), with at most one grade below B, but not lower than C+ for all CS graduate classes. Not open to non-degree graduate students.

CSCI 8960 THESIS EQUIVALENT PROJECT IN COMPUTER SCIENCE (1-6 credits)

This course allows a graduate student to conduct a research project in computer science or a related area. The project is expected to place an emphasis on applied, implementations-based, or experimental research. The process for development and approval of the project must include: appointment of supervisory committee (chaired by project adviser), a proposal approved by the supervisory committee, monitoring of the project by the supervisory committee, an oral examination over the completed written product conducted by the supervisory committee, and final approval by the supervisory committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines.

Prerequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 8970 INDEPENDENT STUDY (1-3 credits)

Under this number a graduate student may pursue studies in an area that is not normally available in a formal course. The topics to be studied will be in a graduate area of computer science to be determined by the instructor.

Prerequisite(s): Permission of the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8980 GRADUATE SEMINAR (1 credit)

This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques and methodologies, and/or the current research results in the fundamental areas of computer science. Topics to be covered by the course will vary in different semesters.

Prerequisite(s): Permission of the Instructor. Not open to non-degree graduate students.

CSCI 8986 TOPICS IN COMPUTER SCIENCE (3 credits)

This is a variable topic course in computer science at the senior/graduate level. Topics not normally covered in the computer science degree program, but suitable for senior/graduate-level students can be offered. (Cross-listed with CSCI 4980).

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

CSCI 8990 THESIS (1-6 credits)

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.

Prerequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 9410 ADVANCED TOPICS IN LOGIC PROGRAMMING (3 credits)

This course will examine some advanced topics in logic programming, in particular logic programming under stable model (or answer set) semantics. Answer set programming is a common name of the field. Formal syntax, semantics, and proofs of correctness for logic programs will be considered. Elements of inductive and Prolog programming will also be introduced. Each advanced topic will be followed by how it has been applied in practice. Advanced applications of logic programming will be covered in detail.

Prerequisite(s): CSCI 8000 and doctoral student standing in Information Technology or the permission of the instructor.

CSCI 9420 INTELLIGENT AGENT SYSTEMS (3 credits)

This course covers the principles of interaction between agents in multi-agent systems using game theory. Relevant topics studied in this course include competitive games, statistical Bayesian games, cooperative games, and mechanism design. Students will have to implement projects related to the material studied in the course.

Prerequisite(s): CSCI 3320 or CSCI 8325 and CSCI 4450 or CSCI 8456. Not open to non-degree graduate students.

CSCI 9710 METHODS IN SOFTWARE ENGINEERING RESEARCH (3 credits)

This course provides guidelines on how to conduct research in the field of software engineering by presenting the research methods, classic readings, and development of theories and their application to real life problems. The main emphasis of the course is to provide opportunity for in-depth study of topics such as contemporary methods for software development.

Prerequisite(s): CSCI 8836 or equivalent course and doctoral student standing in Information Technology or permission of the instructor. Not open to non-degree graduate students.

CSCI 9810 RESEARCH FOUNDATIONS IN THEORETICAL COMPUTING (3 credits)

This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques, and methodologies, and/or the current research results in the fundamental areas of theoretic computing. The course will examine advanced research topics in computer science and engineering, including foundations of automata theory, computability, complexity analysis, computational logics and algorithmic analysis, hybrid dynamic systems theory, number theory, adaptation and learning theory, concepts and principles in computational geometry, stochastic processes, and random optimization. Each topic will be discussed with a perspective of research issues and directions. Active student participation in investigation of the research topics, survey of the current state-of-art, and identifying the future research insights is required. Students will take turn presenting their research results on specific topics. Topics to be covered by the course will vary in different semesters.

Prerequisite(s): The prerequisites of this course vary depending on the areas to be covered in the semester the course is offered. Good standing in Ph.D. program is required. Permission of the instructor may be required. Not open to non-degree graduate students.

Computer Science Teacher Education (CSTE)

Computer Science Teacher Education Graduate Courses

CSTE 8020 EXPLORING COMPUTER SCIENCE FOR TEACHERS (3 credits)

This course provides a breadth first introduction to computer science for pre-service and in-service teachers. The Exploring Computer Science curriculum (<http://www.exploringcs.org>) serves as a guiding framework for this course, which introduces domain knowledge and appropriate teaching techniques related to teaching human computer interaction, computational problem solving, web design, programming, data analysis, and artificial intelligence in school environments. The course also covers ethical and social issues in computing along with an overview of computing careers.

CSTE 8030 COMPUTER SCIENCE PRINCIPLES FOR TEACHERS (3 credits)

This course introduces pre-service and in-service teachers to the foundational principles of computer science. It aims to help them learn the essential thought processes used by computer scientists to solve problems, expressing those solutions as computer programs. It prepares them to teach the AP CS Principles course (<https://apcentral.collegeboard.org/courses/ap-computer-science-principles>) as defined by the College Board. Students explore several different curricula available through College Board endorsed providers.

Prerequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or equivalent with C- or better.

CSTE 8040 OBJECT ORIENTED PROGRAMMING FOR TEACHERS (3 credits)

This course provides an in-depth treatment of the fundamentals of object-oriented programming (OOP) in Java programming language environment. Topics include data types and information representation, control structures, classes and objects, methods, encapsulation, and use of introductory data structures to solve real-world problems. Additionally, this course interleaves coverage of OOP content with discussion of common learner misconceptions and teaching strategies/tools that can be employed to aid learners' mastery of this material. This course prepares students to implement the Advanced Placement Computer Science A curriculum in a secondary school setting.

Prerequisite(s): CSTE 8020 or CSTE 8030.

CSTE 8910 CAPSTONE IN CS EDUCATION (3 credits)

This course will allow graduate students, as an individual or as part of a group, to study and analyze specific problems related to teaching computing in schools. Projects will be concerned with the curriculum and/or instruction of computing and should address a broad scope of application rather than a specific level. (Cross-listed with STEM 8910).

Prerequisite(s): The student must have completed at least 21 credit hours in the Masters of CS Education program.

CSTE 8920 SPECIAL TOPICS IN CS EDUCATION (3 credits)

This course will cover variable content focusing on CS education topics relevant to PK-12 teachers and based on current research trends. New curricula, tools, assessments, programming languages, or related standards may be covered.

Prerequisite(s): Advisor and/or instructor approval.

CSTE 8960 THESIS EQUIVALENT PROJECT IN CS EDUCATION (1-6 credits)

This course allows a graduate student to conduct a research project in computing education. The process for development and approval of the project must include: appointment of supervisory committee (chaired by project adviser), a proposal approved by the supervisory committee, monitoring of the project by the supervisory committee, an oral examination over the completed written product conducted by the supervisory committee, & final approval by the supervisory committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines. Project credits must be completed over two or more academic terms.

Prerequisite(s): Completion of required Core courses and approval of advisor.

CSTE 8970 CS ED INDEPENDENT STUDY (1-3 credits)

This is a specially designed course taken under the supervision of a graduate faculty member to accommodate the student who has identified a focus of study not currently available in the departmental offerings and who has demonstrated capability for working independently.

Prerequisite(s): Permission of the department and graduate faculty member.

CSTE 8990 THESIS (1-6 credits)

This course is an independent research project completed under the direction of a thesis advisor and required of all candidates pursuing a Master of Science with Thesis option. Thesis credits must be completed over two or more academic terms.

Prerequisite(s): Completion of Required Core Courses and approval of advisor. Not open to non-degree graduate students.

Construction Engineering (CONE)

Construction Engineering Graduate Courses

CONE 816 WOOD/CONTEMPORARY MATERIALS DESIGN (3 credits)

Design of structural timber, beams, columns, and connections. Introduction to applicable design philosophies and codes. Overview of materials design. Masonry, aluminum, and contemporary materials such as plastics and fiber reinforced systems and composite material groups. Design considerations, cost and constructability analysis. (Cross-listed with CONE 416)

Prerequisite(s): CIVE 341

CONE 817 FORMWORK SYSTEMS (3 credits)

Design of structural timber, beams, columns, and connections. Introduction to applicable design philosophies and codes. Overview of materials design, masonry, aluminum, and contemporary materials such as plastics and fiber reinforced systems and composite material groups. Design considerations, cost and constructability analysis. (Cross-listed with CONE 417)

Prerequisite(s): CONE 416; Pre/Co-req.: CIVE 441

CONE 821 CONSTRUCTION RISK ASSESSMENT AND MANAGEMENT (3 credits)

The overall process of hazards risk management (risk identification, risk analysis, risk assessment, risk communication), risk based decision making and risk mitigation. Classification of building stock, defining vulnerability, risk assessment methods, assessing economic losses and cost benefit analysis. Case studies will be used to demonstrate the application of risk management principles/techniques in practice.

Prerequisite(s): STAT 3800. Not open to non-degree graduate students.

CONE 850 SUSTAINABLE CONSTRUCTION (3 credits)

Sustainable construction and its application to the green building industry. Topics include: the LEED certification process, sustainable building site management, efficient wastewater applications, optimizing energy performance, indoor environmental issues, performance measurement/verification, recycled content and certified renewable materials. (Cross-listed with CONE 450)

CONE 859 INTRODUCTION TO BUILDING INFORMATION MODELING (3 credits)

This course instructs CAD users on the effective use of Building Information Model (BIM) for integration of design, document and construction estimate. Topics include: model-based 3D design, file formats, interoperability, and MEP modeling. (Cross-listed with CONE 459)

Prerequisite(s): CNST 112, or Graduate standing in AREN, CIVE, CNST or CONE.

CONE 866 HEAVY AND/OR CIVIL ESTIMATING (3 credits)

Estimating techniques and strategies for heavy and/or civil construction. Unit pricing, heavy and civil construction takeoffs and estimating, equipment analysis, overhead cost and allocations, estimating software and government contracts. (Cross-listed with CONE 466).

Prerequisite(s): CONE 319 and CONE 378 and CONE 485

CONE 881 HIGHWAY & BRIDGE CONSTRUCTION (3 credits)

The methods and equipment required in the construction of roads and bridges. Methods and equipment necessary for roads and bridges. Substructure and superstructures, precast and cast-in-place segments, and standard and specialized equipment. (Cross-listed with CONE 481)

Prerequisite(s): CONE 319 or CNST 241

CONE 882 HEAVY AND/OR CIVIL CONSTRUCTION (3 credits)

History, theory, methods, and management principles of planning and executing heavy and/or civil projects. Emerging and new equipment capabilities. Economical use of equipment and management of costs associated with production. (Cross-listed with CNST 482, CNST 882, CONE 482).

Prerequisite(s): CNST 379. Not open to non-degree graduate students.

CONE 883 SUPPORT OF EXCAVATION (3 credits)

The design and placement of excavation supports according to OSHA requirements and industry standards. A variety of routine to moderately complex support systems. Open excavations, sheet piling and cofferdams. Soil mechanics, lateral loads, hydrology, and pumping methods. (Cross-listed with CONE 483)

CONE 885 CONSTRUCTION PLANNING, SCHEDULING, AND CONTROLS (3 credits)

Planning and scheduling a project using the critical path methods (CPM) with computer applications. Project pre-planning, logic networks, precedence diagrams, time estimates, critical path, float time, crash programs, scheduling, short interval schedules, pull planning, and monitoring project activities. (Cross-listed with CNST 485, CNST 885, CONE 485)

Prerequisite(s): CNST 378. Not open to non-degree graduate students.

CONE 895 GRADUATE INTERNSHIP (3 credits)

Open only to Construction Management graduate students. Participation in a full-time summer internship with an approved Construction Engineering or Construction Management related entity. Includes weekly assignments and a final presentation that are designed to create interaction between the Construction entity and the intern, and associated with the business aspects of the entity. General topics include Business Plans, Marketing, Finance and Budgets, Contracts, Legal Issues and Professionalism. (Cross-listed with CNST 895)

Prerequisite(s): Permission. Not open to non-degree graduate students.

CONE 898 SPECIAL TOPICS IN CONSTRUCTION ENGINEERING (1-6 credits)

Individual and small group investigation of special topics in construction engineering. A signed student-instructor learning contact is required. Topics vary.

Prerequisite(s): Master of engineering in construction or related discipline and permission. Not open to non-degree graduate Students.

CONE 960 PROFESSIONAL PRACTICE (0 credits)

CONE 0960 is required of CONE majors prior to graduation. The work experience must be pre-approved by the faculty adviser in the CONE department. Work experience in a construction related work area.

Prerequisite(s): Senior standing

CONE 999 DOCTORAL DISSERTATION (1-24 credits)

None provided

Prerequisite(s): Admission to doctoral degree program and permission of supervisory committee chair. Not open to nondegree students.

Construction Management (CNST)

Construction Management Graduate Courses

CNST 811 PROJECT ADMINISTRATION (3 credits)

Ownership and administration of companies focusing on documentation and specifications, contracts, take-offs, estimating, bidding, bonds, insurance, project management and administration, scheduling, time and cost management, labor law and labor relations, and project safety. (Cross-listed with CNST 411).

Prerequisite(s): CNST 3790. Not open to non-degree graduate students.

CNST 815 MECHANICAL/ELECTRICAL PROJECT MANAGEMENT (3 credits)

Fundamentals of project management within the mechanical and electrical contracting industry. Codes, contract documents, productivity, coordination, project control and administration, scheduling, safety, and project closeout, from a specialty contracting perspective. (Cross-listed with CNST 415).

Prerequisite(s): CNST 305, CNST 306 and CNST 379. CNST 405 and CNST 406 are recommended.

CNST 820 PROFESSIONAL PRACTICE AND ETHICS (3 credits)

Examination of professional practice considering the perspectives of designers and the contractors and their respective relationships to society, specific client types, and other collaborators in the design and construction fields. Focus on ethics, professional communication and responsibility, professional organization, office management, environmental stewardship, professional registration, and owner-designer-contractor relationships. (Cross-listed with CNST 420).

Prerequisite(s): CNST 379, LAWS 3930. Not open to non-degree graduate students.

CNST 825 ALTERNATIVE PROJECT DELIVERY METHODS (3 credits)

Historical and current project delivery methods (PDM) are explored. Procurement strategies, contractual arrangements, and compensation methods are also discussed in conjunction with risks, costs, and legal and ethical issues that need to be considered when determining which system is best for a particular project. (Cross-listed with CNST 425)

Prerequisite(s): Not open to non-degree graduate students.

CNST 826 OCCUPATIONAL HEALTH AND SAFETY FOR CONSTRUCTION (3 credits)

Investigation of occupational health and safety hazards in the construction environment. Accident causation and illness exposure models, construction and safety programs and contract requirements, project safety and health management, special problems in construction safety, OSHA/EPD/ADA regulation and compliance issues, health assessment and monitoring, safe building methods design, toxic substance exposures, abatement methods, and worker training and protection.

Prerequisite(s): Permission; open only to students in engineering, construction management, architecture, or other closely related fields

CNST 834 THE DESIGN-BUILD PROJECT DELIVERY SYSTEM (3 credits)

The organizational, managerial, ethical and legal principles involved in design-build as a project delivery system. Advantages and disadvantages, growth, merits, and criticism of the design-build system. (Cross-listed with CNST 434)

Prerequisite(s): CNST 379. Not open to non-degree graduate students.

CNST 835 DESIGN/BUILD: METHODS AND APPLICATION (3 credits)

Investigation, documentation, and application of current Design/Build processes and methodology used in commercial construction. Principles and practices of Design/Build as a project delivery system.

Prerequisite(s): Permission; open only to students in engineering, construction management, architecture, or other closely related field

CNST 836 INTENT AND APPLICATION OF INTERNATIONAL BUILDING CODE (3 credits)

Fundamentals of how to research, interpret, and apply building code requirements to the design and construction of both new and renovated structures. (Cross-listed with CNST 436)

Prerequisite(s): CNST 379. Not open to non-degree graduate students.

CNST 840 BUILDING INFORMATION MODELING (BIM) II (3 credits)

Advance topics in building information modeling, including structural and MEP modeling, 4/5 dimensional construction animations and visualization. Good knowledge of Revit Architectural Modeling and knowledge of construction estimating and scheduling is required before registering in this class. (Cross-listed with CNST 440)

Prerequisite(s): CNST 225 and CNST 378.

CNST 842 HEALTHCARE DESIGN AND CONSTRUCTION (3 credits)

Introduction to the design and construction of healthcare facilities. Healthcare regulations and standards, infection control, interim life safety measures, code requirements, medical equipment selection and coordination, healthcare design and construction techniques, and best practices will be addressed. Provides guidance in preparation for the Certified Healthcare Constructor credential offered by the American Healthcare Association. (Cross-listed with AREN 8426, AREN 4420, CNST 442).

Prerequisite(s): Senior or graduate standing

CNST 844 CONSTRUCTION SITE SAFETY MANAGEMENT (3 credits)

Introduction to safety management for project engineers, project managers, safety teams, and company safety officers. Addresses basic accident and injury models, human accident costs, safety behavior, ethical issues in safety, workers' compensation and EMR, job safety analysis (JSA), project site safety audits, safety promotion and training, emergency planning and response, safety management programs and training, and OSHA record-keeping and reporting. (Cross-listed with CNST 444)

Prerequisite(s): CNST 241 or CONE 319. Not open to non-degree graduate students.

CNST 850 SUSTAINABLE CONSTRUCTION (3 credits)

Application of Leadership in Energy and Environmental Design (LEED) best practices in building procurement and delivery systems. History, theory, and state-of-the-art practices in designing and constructing green buildings. Basic principles required to make the multitude of decisions when designing or constructing a green building. LEED construction practices (emerging practices that are economical, produce esthetically pleasing structures, and are environmentally sound).

Prerequisite(s): ARCH major or CIVE major or CNST major. Not open to non-degree graduate students.

CNST 860 CONSTRUCTION VISUALIZATION AND SIMULATION (3 credits)

Fundamental knowledge of visualization platforms of buildings and construction. Topics include construction visualization software, basic data structure and programming, interoperability, and building performance simulation.

Prerequisite(s): Graduate standing in construction management or related discipline with instructor approval. Not open to non-degree graduate students.

CNST 879 CONSTRUCTION MANAGEMENT & CONSTRUCTION SYSTEMS (3 credits)

Quantity survey methods, production rate and cost analysis, bidding, contingency and risk analysis. Computer applications of estimating and research topics. Monte Carlo simulation, Virtual #D, BIM applications relevant to construction estimating and risk analysis.

CNST 880 PRODUCTIVITY AND HUMAN FACTORS IN CONSTRUCTION (3 credits)

Motivation and productivity improvement methods for management in typical job environments. Methods to improve working environments in the field and office. Procedures and mechanisms to implement human behavior and ergonomics concepts for enhanced productivity and safety. (Cross-listed with CNST 480).

Prerequisite(s): CNST 379 and senior standing. Not open to non-degree graduate students.

CNST 882 HEAVY AND/OR CIVIL CONSTRUCTION (3 credits)

History, theory, methods, and management principles of planning and executing heavy and/or civil projects. Emerging and new equipment capabilities. Economical use of equipment and management of costs associated with production. (Cross-listed with CNST 482, CONE 482, CONE 882)

Prerequisite(s): CNST 379. Not open to non-degree graduate students.

CNST 883 MANAGEMENT OF LIMITED SCOPE PERMITTING (3 credits)

Building code permitting process associated with all projects. Phased projects that require one or more limited scope permits prior to receiving the final full construction permit. How to improve coordination and reduce the confusion and risk associated with managing the permitting process. The permitting process that is applicable to both large and small projects and that can be easily adapted and used in all jurisdictions throughout the United States.

Prerequisite(s): (ARCH major or CIVE major or CNST major). Not open to non-degree graduate students.

CNST 885 CONSTRUCTION PLANNING, SCHEDULING, AND CONTROLS (3 credits)

Planning and scheduling a project using the critical path methods (CPM) with computer applications. Project pre-planning, logic networks, precedence diagrams, time estimates, critical path, float time, crash programs, scheduling, short interval schedules, pull planning, and monitoring project activities. (Cross-listed with CNST 485, CONE 485, CONE 885)

Prerequisite(s): CNST 378. Not open to non-degree graduate students.

CNST 886 CONSTRUCTION MANAGEMENT SYSTEMS (3 credits)

Application of selected topics in systems analysis (operations research). Simulation, mathematical optimization, queuing theory, Markov decision processes, econometric modeling, neural networks, data envelopment analysis, decision analysis, and analytic hierarchy processes as used in the industry. (Cross-listed with CNST 486).

Prerequisite(s): CNST 379. Not open to non-degree graduate students.

CNST 887 CONSTRUCTION LEADERSHIP AND STRATEGIC PLANNING (3 credits)

New models of construction leadership for the 21st Century. Application of transformational leadership to strategic planning and marketing in construction contracting. Leadership and strategic problem solving constructs and methods.

Prerequisite(s): Permission; open only to students in engineering, construction management, architecture, or other closely related fields

CNST 888 RESIDENTIAL CONSTRUCTION AND REAL ESTATE DEVELOPMENT (3 credits)

Application of various strategies to real estate development including community and residential design, planning, site selection, land development, marketing and customer service. Methods used by construction companies to analyze, bid, and market their developments to customers through the preconstruction and bidding process. (Cross-listed with CNST 488)

Prerequisite(s): CNST 397.

CNST 890 MASTERS PROJECT (3 credits)

First course in a two-course sequence required for the masters degree. Technical report, technical paper, or portfolio project, culminating in a final document or oral presentation.

Prerequisite(s): Permission; admission to the master of engineering degree program with an emphasis in construction. Not open to non-degree graduate students.

CNST 891 MASTERS PROJECT II (3 credits)

Second course in a two-course sequence required for the masters degree. Technical report, technical paper, or portfolio project, culminating in a final document or oral presentation.

Prerequisite(s): CNST 890 and permission.

CNST 895 GRADUATE INTERNSHIP (3 credits)

Open only to Construction Management graduate students. Participation in a full-time summer internship with an approved Construction Engineering or Construction Management related entity. Includes weekly assignments and a final presentation that are designed to create interaction between the Construction entity and the intern, and associated with the business aspects of the entity. General topics include Business Plans, Marketing, Finance and Budgets, Contracts, Legal Issues and Professionalism. (Cross-listed with CONE 895).

Prerequisite(s): Permission. Not open to non-degree graduate students.

CNST 898 SPECIAL TOPICS IN CONSTRUCTION MANAGEMENT (1-6 credits)

Individual or small group study of special topics in construction management. Topic varies. A signed student-instructor learning contract is required. (Cross-listed with CNST 498, CONE 498).

Prerequisite(s): Master of engineering in construction management or related discipline and permission.

CNST 899 MASTER'S THESIS (1-10 credits)

Master's Thesis.

Prerequisite(s): Admission to Masters of Science in Construction degree program and permission of major advisor. Not open to nondegree students

CNST 993 GRADUATE SEMINAR (1 credit)

Seminar participation to broaden knowledge of construction engineering and management topics, improve presentation and professional skills, and learn about professional development resources available on campus.

Prerequisite(s): Graduate student in Construction. Not open to non-degree graduate students.

CNST 999 DOCTORAL DISSERTATION (1-24 credits)

None provided

Prerequisite(s): Admission to doctoral degree program and permission of supervisory committee chair. Not open to nondegree students.

Counseling (COUN)

Counseling Graduate Courses

COUN 8006 SPECIAL STUDIES IN COUNSELING (1-6 credits)

This course is designed to allow candidates to pursue independent study of a topic under the direction and guidance of a faculty member. Topics studied and the nature of the learning activities are mutually agreed upon by the candidate and instructor. This course will prepare graduate (or undergraduate) candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. (Cross-listed with COUN 4000).

Prerequisite(s): Permission by the Department. Must be admitted to the Counseling Program. Not open to non-degree graduate students.

COUN 8010 INTRODUCTION TO COUNSELING (3 credits)

This is an exploratory course for students entering, or considering entering, the field of professional counseling. The focus is on: 1) the development of the profession of counseling, 2) your own professional and personal development as well as your understanding of what contributes to your development as an effective counselor, and 3) a general overview of specific requirements for successful completion of a master's degree in Counseling at UNO.

Prerequisite(s): Undergraduate Degree. Department permit required for non-degree seeking students (based on availability)

COUN 8016 MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS (3 credits)

This course explores the role that educators and school mental health professionals play in identifying the risk factors and warning signs of children and youth with mental health concerns. Students will understand the risk and protective factors at the individual, family, school, and community level as related to children and youth's mental health.

The course will provide an overview of externalizing and internalizing disorders as well as school-based and community-based treatments and interventions. (Cross-listed with COUN 4010, SPED 4010, SPED 8016).

Prerequisite(s): Not open to non-degree graduate students.

COUN 8020 COUNSELING FOR WORK AND WELLNESS (3 credits)

This course will serve as an introduction to the topics of career counseling, career development, and wellness.

Prerequisite(s): Admission to UNO Counseling as degree seeking student; Department permit for non-degree seeking student (based on availability)

COUN 8030 COUNSELING PRACTICES (3 credits)

The major purpose of Counseling 8030 is to assist students in skill development as noted in Ivey's Intentional Interviewing and Counseling Model. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism. Candidates will continue to develop counseling skills through additional coursework leading to practicum and internship experiences.

Prerequisite(s): Open only to students admitted to the UNO Counseling Program; Department permission is required for students with non-degree status; and is based on availability.

COUN 8040 ETHICAL ISSUES FOR PROFESSIONAL COUNSELORS (3 credits)

This course examines the ethical, professional, and legal aspects of individual, couple and family counseling including liabilities incurred by the professional. The course addresses the appropriate ethical guidelines as stated by the American Counseling Association (ACA) code of ethics in a participatory format.

Prerequisite(s): Open only to students admitted to the UNO Counseling Program; Department permission is required for students with non-degree status; and is based on availability.

COUN 8050 INTRODUCTION TO PROFESSIONAL SCHOOL COUNSELING (1 credit)

This is an exploratory course for candidates considering entering the field of professional school counseling. This introductory course is required for candidates majoring in counseling, with a concentration in school counseling. Selected issues underlying the school counseling profession are studied.

Prerequisite(s): Admission to the Graduate College and/or the Counseling Department.

COUN 8100 RESEARCH PROJECT IN COUNSELING (1-3 credits)

Individual or group study and analysis of specific problems/issues in the field.

Prerequisite(s): Admission to Counseling program and permission of instructor. Not open to non-degree students.

COUN 8110 HUMAN DEVELOPMENT AND PSYCHO-SOCIAL INTERVENTION STRATEGIES (3 credits)

This course is designed to examine theories of human development covering the lifespan of the individual and the psychosocial interventions appropriate to various phases of the lifespan. The course will emphasize human development as an interactive process involving individuals in a number of contexts; hence human diversity factors (racial ethnic groups, gender, sexual orientation) also will be considered.

Prerequisite(s): Open only to students admitted to the UNO Counseling Program; Department permission is required for students with non-degree status; and is based on availability.

COUN 8150 STUDENT AND STUDENT PERSONNEL WORK IN HIGHER EDUCATION (3 credits)

An overview of the characteristics of college students and their interaction with campus environmental influences. The impact of student personnel work is considered as it affects personality growth, social development and career planning by college students.

Prerequisite(s): Admission to Counseling program. Not open to non-degree graduate students.

COUN 8200 COUNSELING THEORIES (3 credits)

This course is designed to examine counseling theories and the historical and geographic influence on counseling theory development.

Prerequisite(s): Open only to students admitted to the UNO Counseling Program. Not open to non-degree graduate students.

COUN 8210 ORGANIZATION & ADMINISTRATION OF SCHOOL COUNSELING PROGRAMS (3 credits)

The course introduces graduate candidates to an administrative systems approach to organizing comprehensive and developmental school counseling programs for all k-12 students. The American School Counselor Association's (ASCA) National Model for School Counseling Programs provides the foundation for content. Topics include, but are not limited to, school counseling programs: Foundation, Delivery System, Management System, and Accountability domains. Special focus is also placed on developing educational leadership skills, advocacy for k-12 students, and bringing about positive systemic change. Teaching counselor candidates to effectively manage school counseling programs is an important part of our effort to prepare educational leaders.

Prerequisite(s): Admission to UNO Counseling Dept. Not open to non-degree graduate students.

COUN 8220 COUNSELING PRACTICUM (3 credits)

This course is the first of the clinical application courses of counseling knowledge, techniques, and specialty areas in clinical mental health settings. Candidates practice, develop and improve counseling skills in an environment of professional constructive criticism.

Prerequisite(s): Pre-Reqs: COUN 8010, COUN 8030, COUN 8040, COUN 8200, COUN 8280, COUN 8400, COUN 8516, COUN 8520, COUN 8920 Co-Reqs: COUN 8360, COUN 8610, COUN 8800 Registration Reqs: Attend Practicum Orientation; Dept Consent. Not open to non-degree graduate students.

COUN 8230 APPRAISAL TECHNIQUES IN COUNSELING (3 credits)

Appraisal Techniques in Counseling includes the history of individual appraisal, the major technical considerations governing assessments, and a survey of measurement devices in the cognitive and affective domains. The course will include uses and implications of standardized and non-standardized assessment devices. Additionally, this course will cover the responsible use and interpretation of ability, aptitude, interest, personality, and career development assessment tools. Whenever it is applicable, a strengths-based, positive psychology approach will be integrated and utilized throughout this course.

Prerequisite(s): Admission to UNO Counseling Department as degree seeking student; Department permission for non-counseling/degree seeking student in UNO allied mental health discipline only (based on availability)

COUN 8250 INTERNSHIP: CLINICAL MENTAL HEALTH COUNSELING (3 credits)

This course is the first of the clinical applications of knowledge, techniques, and specialty areas in community settings. Students practice, develop and improve counseling skills in an environment of professional constructive criticism. This course is required for all graduate students in counseling who meet the prerequisites.

Prerequisite(s): COUN 8220 with grade of B or better; Department Permission. Not open to non-degree graduate students.

COUN 8260 ADVANCED INTERNSHIP: CLINICAL MENTAL HEALTH COUNSELING (3 credits)

Field experience in an approved agency program under the supervision of a licensed counselor and university instructor.

Prerequisite(s): Completion of COUN 8250 with grade of B or higher. Not open to non-degree graduate students.

COUN 8270 GROUP TECHNIQUES (1 credit)

This course is intended to prepare students to effectively incorporate group principles appropriate to various counseling settings including schools, treatment centers, and agencies. This class includes a group experience.

Prerequisite(s): Admission to graduate program in Counseling or permission of instructor. Not open to non-degree graduate students.

COUN 8280 TRAUMA, CRISIS, AND GRIEF COUNSELING (3 credits)

This course will present approaches to trauma, crisis intervention, and grief counseling which include definitions and characteristics of trauma and crisis, a brief history of trauma and crisis intervention and associated theories/models and a practice of skills for intervention and crisis case management. Topics will include applied therapeutic counseling strategies in general casework and in crisis intervention cases, in particular, which describe actual techniques to alleviate the crisis and trauma. Grief topics will also be explored including counseling theory, techniques and interventions.

Prerequisite(s): Admission to UNO Counseling as degree seeking student; COUN 8030, COUN 8200, COUN 8040; Dept permission/graduate status as degree seeking student in allied mental/behavioral health (based on availability). Not open to non-degree graduate students.

COUN 8306 COUNSELING TECHNIQUES I (1 credit)

This course will present the counseling process, knowledge of beginning skills development and application of techniques related to a specific approach. Topics may include Adlerian counseling (specified in this syllabus), anger management, play therapy, solution focused, cognition, and other topics as needed. (Cross-listed with COUN 4300).

Prerequisite(s): Admission to Counseling program. Not open to non-degree students; must take prior to practicum.

COUN 8316 COUNSELING TECHNIQUES II (1 credit)

This course will present the counseling process, knowledge of beginning skills development and application of techniques related to a specific approach. Topics may include Rational Emotive Behavior Therapy (REBT) (specified in the syllabus), anger management, play therapy, solution focused, cognition, and other topics as needed.. (Cross-listed with COUN 4310)

Prerequisite(s): Admission to Counseling program; must take prior to practicum. Not open to non-degree students.

COUN 8330 PRACTICUM FOR SCHOOL COUNSELORS (3 credits)

This course is the first of the clinical applications to provide the prospective school counselor with supervision in a school counseling setting. Candidates will continue to develop counseling skills and will become immersed in the work of a professional school counselor. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism.

Prerequisite(s): Instructor Consent; COUN 8030; COUN 8040; COUN 8200; COUN 8210; COUN 8280; COUN 8630; COUN 8650; COUN 8670; COUN 8700; COUN 8740; Grade of B or better in COUN 8030 and COUN 8040. Not open to non-degree graduate students.

COUN 8360 GROUP THEORY & TECHNIQUES (3 credits)

This course is intended to prepare students to effectively incorporate group principles appropriate to various counseling settings including schools, clinical mental health treatment facilities, and agencies. This class includes a group experience.

Prerequisite(s): Admission as degree seeking student in UNO Counseling Dept; Pre-Reqs: COUN 8030, COUN 8040; Completion of Group Experience and Department permission. Not open to non-degree graduate students.

COUN 8400 ADVANCED THEORY AND TECHNIQUES IN COUNSELING (3 credits)

This course introduces students to the basic knowledge and skills necessary to understand and apply counseling techniques related to differential approaches to treatment. Topics may include Solution-Focused, Adlerian, Cognitive-Behavioral (CBT), Dialectical Behavioral (DBT), Motivational Interviewing, and other techniques as deemed to be relevant/appropriate.

Prerequisite(s): Admission to UNO Counseling program; Pre-Reqs: COUN 8030; COUN 8200

COUN 8406 COUNSELING TECHNIQUES III (1 credit)

This course will assist candidates in developing more systematic integration of previously learned information and skills and the application to specific counseling situations related to various approaches. Topics may include Solution Focused Counseling - SFC (specified in the syllabus), Dialectical Behavioral Therapy, anger management, art therapy, play therapy, solution focused, cognition, and other topics as needed. (Cross-listed with COUN 4400)

Prerequisite(s): Admission to Counseling program. Not open to non-degree students.

COUN 8430 INTERNSHIP IN SCHOOL COUNSELING (3 credits)

This course is the second of the clinical applications to provide the prospective school counselor with supervision in a school counseling setting. Candidates will continue to develop counseling skills and will become immersed in the work of a professional school counselor. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism.

Prerequisite(s): Pre-req: COUN 8330. Not open to non-degree graduate students.

COUN 8440 TRAUMA INFORMED EDUCATION (3 credits)

This course will present approaches to create trauma-informed classrooms which includes definitions and characteristics of trauma and how it impacts children, a brief history of trauma and associated theories/models, and a practice of skills for intervention in the classroom to support students and their families. Topics include applied teaching strategies which describe research-based techniques to support students with a history of trauma, as well as strategies to recognize signs of secondary trauma and burnout, followed by ways to mitigate them using research-based self-care techniques. (Cross-listed with TED 8290).

COUN 8450 COLLEGE STUDENT PERSONNEL INTERNSHIP (1-3 credits)

This course is designed to provide practical work experience under supervision in various areas within student personnel services.

Prerequisite(s): COUN 8030, COUN 8040, COUN 8006, COUN 8150, COUN 8360, COUN 8520. Not open to non-degree graduate students.

COUN 8460 ADVANCED INTERNSHIP IN SCHOOL COUNSELING (3-6 credits)

This course is the third of the clinical applications to provide the prospective school counselor with supervision in a school counseling setting. Candidates will continue to develop counseling skills and will become immersed in the work of a professional school counselor. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism.

Prerequisite(s): COUN 8330. Not open to non-degree graduate students.

COUN 8500 CONSULTATION IN PROFESSIONAL COUNSELING (2 credits)

Instruction in this course is founded upon commitment to the beliefs that individuals are valuable, responsible and capable, and that all human service professionals should work to create the conditions in which people value themselves as human beings and behave accordingly. As reflective decision-makers, such professionals value human potential and purposefully design policies, processes and programs that facilitate the realization of that potential. The counselor learns that consultation and collaboration are first and foremost helping relationships that have as their foundation the dignity and respect of individuals/groups involved. Consultation and collaboration are characterized as problem-solving processes that involve a variety of key decision points. A generic model is provided for students as a "cognitive map" upon which they can reflect when attempting to determine effective practice.

Prerequisite(s): Admission to the Counseling Program. Not open to non-degree graduate students

COUN 8516 TREATMENT ISSUES IN CHEMICAL DEPENDENCY (3 credits)

This course addresses chemical dependency treatment issues including denial, minimization, relapse and its prevention, resistance, family dynamics, poly-substance abuse, co-occurring disorders, spirituality and the influence of self-help groups. The education will include the clinical treatment needs of individuals suffering from chemical dependency, taking into consideration diversity, gender, culture and lifestyle. (Cross-listed with COUN 4510, SOWK 4510, SOWK 8516).

Prerequisite(s): Admission to counseling program or social work programs or permission of instructor. Not open to non-degree graduate students.

COUN 8520 COUNSELING MULTICULTURAL AND DIVERSE POPULATIONS (3 credits)

This course will make candidates more aware of the societal context in which counseling takes place and to help prepare candidates for work with persons who are members of populations which require special knowledge and skills of the counselor. Certain special populations will be considered in comparative detail as well as a general information which will emphasize acquiring broader understandings transferable to counseling with any special population.

Prerequisite(s): Not open to non-degree graduate students.

COUN 8610 INTRODUCTION TO MARITAL AND FAMILY THERAPY (3 credits)

This course is the first of the clinical mental health applications to provide the prospective mental health counselor with instruction in marital and family therapy. Students will continue to develop counseling skills and will become immersed in the work of a professional counselor. Students practice, develop and improve marital and family counseling skills in an environment of professional and constructive peer feedback.

Prerequisite(s): Admission to UNO Counseling program; COUN 8030, COUN 8200, COUN 8040. Not open to non-degree graduate students.

COUN 8620 SURVEY OF ISSUES IN SCHOOL COUNSELING (2 credits)

This course is designed to provide school counselors with information on topics that are current and relevant to secondary school settings. It will allow candidates and practicing counselors the opportunity to study and evaluate what activities school counselors are currently engaged in and consideration of strategies to deal with students and families.

Prerequisite(s): Admission to counseling program. Not open to non-degree graduate students.

COUN 8630 FOUNDATIONS AND ISSUES IN SCHOOL COUNSELING (3 credits)

This course is designed to introduce the history, current ASCA (American School Counselor Association) model, and the role of a professional school counselor; and to provide information on and practice with topics that are current and relevant to secondary, middle, and elementary school settings.

Prerequisite(s): Admission to UNO Counseling Dept. Not open to non-degree graduate students.

COUN 8650 ISSUES IN ELEMENTARY AND MIDDLE SCHOOL COUNSELING (3 credits)

This course is intended to prepare students to effectively implement an elementary and/or middle school counseling program. School counselors in training will develop awareness and skill sets through an overview of the unique issues, approaches, systems, and practice of elementary and middle school counseling.

Prerequisite(s): Admission to UNO Counseling Department. Not open to non-degree graduate students.

COUN 8656 TRANSITION PLANNING (3 credits)

Curriculum oriented for teachers and related professionals to work with the career development and transition of individuals with disabilities within a multicultural and global society. Includes information for elementary through adulthood with emphasis on transition from high school to community living.

Prerequisite(s): EDUC 2510 or SPED 1500. Not open to non-degree graduate students.

COUN 8670 CAREER DEVELOPMENT POST-SECONDARY TRANSITIONS (3 credits)

This course is an introduction to career counseling and career development and post-secondary planning in P-12 schools. This course is required for all graduate students seeking a masters degree in counseling with a concentration in school counseling.

Prerequisite(s): Admission to UNO Counseling Dept

COUN 8686 MEDICAL AND PSYCHOSOCIAL ASPECTS OF SUBSTANCE USE DISORDERS (3 credits)

This course introduces students to substance use disorders and their impact on the individual, family, and society. It covers psychopharmacology, alcohol and drug interactions, drug classifications, theories of substance use disorders, various models of treatment, vulnerable populations, and ethical and legal issues. (Cross-listed with SOWK 4680, SOWK 8686, COUN 4680).

Prerequisite(s): Admission to counseling program or social work program or permission of instructor.

COUN 8696 ASSESSMENT AND CASE MANAGEMENT IN SUBSTANCE USE DISORDERS (3 credits)

This course focuses on assessment of clients and their environment, and diagnosis and referral for substance use disorder treatment. Emphasis is given to assessment instruments, treatment levels, treatment planning, case management, and social justice. (Cross-listed with COUN 4690, SOWK 4690, SOWK 8696).

Prerequisite(s): Admission to counseling program or social work program or permission of instructor.

COUN 8700 CHILD AND ADOLESCENT COUNSELING (3 credits)

This course is an introduction to counseling children and adolescents and will examine the theories, techniques, professional settings, cultural, and ethical/legal issues associated with counseling children and adolescents in a diverse society. Although diagnosis of mental disorders will be discussed, the course is designed to build competencies in counseling children and adolescents, with specific attention to social, developmental, and behavioral issues across professional settings.

Prerequisite(s): Admission to UNO Counseling Department; COUN 8030 or Department Permission. Not open to non-degree graduate students.

COUN 8740 SCHOOL COUNSELING GROUPS (3 credits)

This course is designed to provide the school counselor candidate with a focused study of small group counseling and enrichment programs in schools.

Prerequisite(s): Instructor Consent; Documented completion of group experience. Not open to non-degree graduate students.

COUN 8750 SCHOOL COUNSELING GROUPS & ENRICHMENT PROGRAMS (2 credits)

This course is intended to prepare students to effectively incorporate small group design, implementation, and assessment as part of a school counseling program. Candidates will develop small group counseling skills and strategies for enrichment program development and delivery.

Prerequisite(s): Counseling Major. COUN 8030 and COUN 8270 and COUN 8406 or permission. Not open to non-degree graduate students.

COUN 8756 MID-LIFE, CAREER CHANGE, PRERETIREMENT PLANNING (3 credits)

This course is designed to involve candidates in the exploration of the developmental tasks of mid-life, myths and realities related to career change as well as the implication of preretirement planning. Factual information, as well as model examination and evaluation are presented to aid the candidate in becoming better equipped to understand some of the forces which affect the well-being of middle aged persons as they prepare for the later years. (Cross-listed with GERO 4750 and GERO 8756)

Prerequisite(s): Not open to non-degree graduate students.

COUN 8800 CLINICAL MENTAL HEALTH COUNSELING (3 credits)

This course is an introduction to the specialization of clinical mental health counseling. The course content examines the historical, philosophical, educational, ethical, and psychological concepts and foundations of clinical mental health counseling. Additionally, the course will explore key public and private professional settings and programs within the clinical mental health paradigm, professional advocacy and leadership, and the personal and professional skills and traits expected of professional counselors.

Prerequisite(s): Not open to non-degree graduate students.

COUN 8810 LAW AND ETHICS IN HIGHER EDUCATION AND STUDENT AFFAIRS (3 credits)

This introductory course is designed to ground future student affairs practitioners in the guiding ethical and legal standards and principles of higher education administrators and student affairs professionals. The course will examine ethical and legal principles through evidence-based readings, discussion/lecture, case studies, exams, and projects. The course will also challenge students to examine their personal values and beliefs and their potential influence on future decision making responses as a student affairs professional.

Prerequisite(s): Admission to the UNO Counseling Department or department permission.

COUN 8820 CRISIS AND EMERGENCY MANAGEMENT IN HIGHER EDUCATION (3 credits)

This course is designed to provide future student affairs professionals with an understanding of the role of higher education institutions respond and adapt to crises that affect institutional well-being and the well-being of faculty, staff, and students. The course will feature content on crisis and emergency management theory and policy-as well as their implications on the well-being of the institution and key stakeholders (i.e., administrators, faculty, staff, students, community, alumni). Specific focus will be given to examining the specific role of the student affairs professional in the design, implementation, and assessment of crisis and emergency management policy and procedures.

Prerequisite(s): Admission to the UNO Department of Counseling and/or department permission

COUN 8830 CURRENT ISSUES IN HIGHER EDUCATION AND STUDENT AFFAIRS (3 credits)

This course involves a detailed exploration of current events and issues related to Student Affairs and Higher Education. The higher education ecological environment will be explored and issues pertaining to students will be investigated within the context of the current higher educational landscape. Finally, the college campus's social, political, and physical landscapes will be discussed and current events facing student affairs and higher education professionals will be examined in order to provide students with information on conflicting perspectives related to relevant issues across academia and higher education as a whole.

Prerequisite(s): Admission to the UNO Counseling Department and/or department permission

COUN 8850 THE COLLEGE STUDENT EXPERIENCE (3 credits)

This course will examine the personal, academic, and psychosocial, and institutional variables common to the experience of students in public and private institutions of higher education in the United States.

Prerequisite(s): Full admission to the UNO Counseling Department and/or permission from the Counseling Department Chair.

COUN 8920 TREATMENT PLANNING AND THE DSM (3 credits)

This course is designed to orient students to the stages of treatment planning and use of the DSM-5 as a part of the treatment process in mental health settings. The course will examine the stages of treatment planning and offer opportunities to integrate counseling theories into practice. Factors such as psychopathology/pharmacology, ethics, and human diversity will be considered.

Prerequisite(s): Not open to non-degree graduate students.

COUN 8930 HISTORY OF HIGHER EDUCATION AND STUDENT AFFAIRS (3 credits)

This course will examine a range of topics relevant to understanding and working in higher education institutions. Specific topics will include the purpose of higher education, accessibility and student diversity issues, financial and legal factors, extracurricular activities, and issues related to faculty and staff experiences.

Prerequisite(s): Full admission to the UNO graduate program in Student Affairs in Higher Education or permission from Counseling Department Chair

COUN 8940 DIVERSITY AND WELLNESS ISSUES IN HIGHER EDUCATION (3 credits)

This course is an exploration of holistic wellness and of power, privilege, social identities, social justice theories and multicultural issues and practices within the context of higher education. We begin by offering foundational definitions of terminology used throughout the course and delve into understanding systems of oppression, privilege, power, and activism through a holistic wellness lens. We then explore and discuss specific social identities, returning again to think about identity through a social justice lens.

Prerequisite(s): Full admission to the UNO Counseling Department and/or permission from the Counseling Department Chair. Not open to non-degree graduate students.

COUN 8950 ORGANIZATION, ADMINISTRATION, AND LEADERSHIP IN HIGHER EDUCATION (3 credits)

This course will provide an analysis of leadership, management, and organizational theory and practice in US higher education with particular emphasis on student affairs/student development. An examination of current practices of management will include human, fiscal, and physical resource management. This course is required for all students who are seeking a master's degree (M.S.) in Student Affairs in Higher Education.

Prerequisite(s): Full admission to the UNO Counseling Department and/or permission from the Counseling Department Chair.

COUN 8980 DIGITAL LEARNING: POLICY, PROGRAMMING, & SYSTEMS (3 credits)

This course is an exploration of digital learning organizational structures within the context of higher education. We begin by offering foundational definitions of terminology used throughout the course and delve into understanding how digital learning fits within the broader context of college and university operations. We then explore and discuss strategies for understanding relevant policies, technology systems and wrap-around support services to ultimately engage and retain digital learners in pursuit of post-secondary education.

Prerequisite(s): Admission to UNO Department of Counseling and/or department permission.

COUN 8986 COUNSELING SKILLS IN GERONTOLOGY (3 credits)

This course is intended to help develop basic counseling skills for application in gerontology. (Cross-listed with GERO 4980, GERO 8986).

Prerequisite(s): Not open to non-degree graduate students.

COUN 8990 THESIS (1-6 credits)

To develop the candidate's ability to carry out accepted procedures associated with the research process.

Prerequisite(s): Approval of the Thesis Review Committee and permission of student's thesis chairperson. Not open to non-degree graduate students.

Criminology and Criminal Justice (CRCJ)

Criminology and Criminal Justice Graduate Courses

CRCJ 8010 NATURE OF CRIME (3 credits)

This course provides an overview of the major dimensions of crime in the U.S. Content areas included are the epidemiology of crime, the costs of crime and typologies of crime and criminals.

Prerequisite(s): Admission to UNO Graduate College.

CRCJ 8020 SEMINAR IN ADMINISTRATION OF JUSTICE (3 credits)

This course is designed to provide students with a critical understanding of responses to crime. Particular emphasis is placed on theory and research bearing upon the effectiveness of the policies and strategies of the principal institutions of the criminal justice system - the police, courts and corrections. Additionally, philosophical and practical matters pertaining to "justice" and "fairness" in the administration of the criminal law are explored.

Prerequisite(s): Admission to UNO Graduate College.

CRCJ 8030 CRIMINAL JUSTICE RESEARCH THEORY AND METHODOLOGY (3 credits)

Research theory and methodology in the social sciences as applicable to criminal justice; preparation of research designs, conceptual models; sampling procedures; and development of individual research papers.

Prerequisite(s): Admission to UNO Graduate College.

CRCJ 8040 SEMINAR IN POLICE AND SOCIETY (3 credits)

This course is designed to explore the role of the police in American society. Attention is given to the origins of policing, the nature of police organizations and police work, and patterns of relations between the police and the public. The values of a democratic society as they affect the law enforcement role are discussed.

Prerequisite(s): Admission to the graduate program in Criminology and Criminal Justice; or admission to the UNO graduate program and permission of instructor.

CRCJ 8050 SEMINAR IN CORRECTIONS (3 credits)

This course is designed to give an analytical perspective to the history, development, implementation and future of critical issues in the field of corrections. Primary focus will be directed toward an exploration of the various theoretical approaches to corrections and the research intended to support or refute these perspectives.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8060 SEMINAR IN THE CRIMINAL COURT SYSTEM (3 credits)

This course is designed to provide a social science perspective on the role of the courts in the criminal justice system. The ideals of the system will be compared with actual functioning, and court reform programs and proposals will be critically examined.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8070 SEMINAR IN CRIMINAL LAW AND PROCEDURE (3 credits)

This course is designed to examine substantive criminal law as the basis of social control in our country. Contemporary issues such as the insanity defense, decriminalization of so-called victimless crimes, sexual assault and abortion, and current proposals to assist victims of crimes will be among the topics explored. In addition, current criminal procedure problems relating to right to counsel, search and seizure and interrogation will be examined.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8080 SEMINAR IN JUVENILE JUSTICE (3 credits)

An inquiry in the social ramifications of the entire juvenile delinquency process including labeling, detention, incarceration and tolerance. Pre- and post-adjudicatory issues are dealt with as well as a realistic perspective given to delinquency prevention strategies.

Prerequisite(s): Admission to UNO graduate program.

CRCJ 8090 SEMINAR IN THEORETICAL CRIMINOLOGY (3 credits)

A study of the etiology of crime as a social phenomenon and an objective analysis of the historical influences and thought which molded its development into an accepted contemporary science.

Prerequisite(s): Admission to graduate program in criminology and criminal justice; or admission to UNO graduate program and instructor permission.

CRCJ 8100 CRIMINAL JUSTICE ORGANIZATION, ADMINISTRATION AND MANAGEMENT (3 credits)

This course will deal with issues in the organization and administration of modern justice agencies. The students will be exposed to theories, concepts, and issues relating to the administration and organization of justice agencies.

Prerequisite(s): Admission to the graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8110 VICTIMOLOGY (3 credits)

The Victimology seminar provides an overview of key research areas on prevalence, predictors, and consequences of various forms of victimization. By the end of the course, students will develop a critical understanding and appreciation of the development and current state of theories of victimology, measurement of different types of victimization, and quantitative and qualitative results that have been used to inform research in the field. Furthermore, students will learn how to critically analyze and interpret primary research regarding victimization.

Prerequisite(s): Admission to UNO graduate program.

CRCJ 8120 RACE, CRIME AND INJUSTICE (3 credits)

This course examines inequities in the context of the cumulative effects of biases in the criminal justice system. Students learn how macro-structural conditions, community violence, depletion of male role models as the result of incarceration, and adversarial contacts with police can negatively impact young children residing in some lower socio-economic communities of color as well as increase their likelihood of early contact with the juvenile justice system.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and permission of the instructor.

CRCJ 8130 SEMINAR IN WOMEN AND CRIMINAL JUSTICE (3 credits)

This course focuses on the experiences of women in the criminal justice system. It will cover the history of criminological theory on women, application of mainstream criminological theory to women, and women as offenders, victims, and professionals in the criminal justice system.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8136 SOCIOLOGY OF DEVIANT BEHAVIOR (3 credits)

This course is designed to investigate the etiology of many forms of norm-violating conduct. Emphasis will be placed on rule-breaking behavior as defined in the criminal statutes. (Cross-listed with CRCJ 4130).

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8180 CRIMINAL JUSTICE INTERNSHIP (3 credits)

This course is designed to provide supervised individualized learning experiences in a selected criminal justice agency. The principal objective of the internship is to provide students with the opportunity to apply theoretical and methodological principles acquired in graduate courses to the analysis of problems in local criminal justice agencies.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice, successful completion of 15 hours of graduate work, and permission of instructor. Not open to non-degree graduate students.

CRCJ 8190 INDEPENDENT STUDY (1-3 credits)

Individual projects in research, literature review or creative production which may or may not be an extension of course work. The work will be supervised and evaluated by departmental graduate faculty members.

Prerequisite(s): Admission to graduate program at UNO, and permission of instructor.

CRCJ 8210 PROGRAM EVALUATION AND POLICY ANALYSIS (3 credits)

This course is a survey of program evaluation and policy analysis techniques. The focus is on theoretical foundations of the Criminal Justice policy process, program development and implementation, research designs specific to program evaluation and policy research, and methodological techniques commonly used to evaluate criminal justice programs and policies.

Prerequisite(s): Admission to doctoral program in Criminology and Criminal Justice; or admission to graduate program at UNO and CRCJ 8030; or instructor permission.

CRCJ 8230 TERRORISM (3 credits)

A course devoted to an exploration and analysis of contemporary special problems in the broad spectrum of law enforcement and corrections.

CRCJ 8300 COMMUNITIES AND CRIME (3 credits)

This course is designed to provide an analytical perspective to the meaning of community, theories that explain community-level crime, and police decision-making at the community level. The primary focus will be directed toward an exploration of the various theoretical approaches to explaining community-level crime, with a special emphasis on police action. This course will enable students to become proficient in the topic of community-level theories of crime and determine whether communities perpetuate or prevent criminal behavior.

Prerequisite(s): Admission to a Criminology and Criminal Justice graduate degree program, or UNO SCCJ Graduate Program Coordinator permission. Not open to non-degree graduate students.

CRCJ 8356 COMMUNITY-BASED CORRECTIONS (3 credits)

This course is intended for advanced students with a special interest in the correctional process as applied in a community setting. It is designed to focus on innovative community-based strategies for dealing with the offender as well as the traditional processes of probation and parole.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8400 INTIMATE PARTNER VIOLENCE (3 credits)

This course examines the complex nature and dynamics of intimate partner violence (IPV). The course begins with a general presentation of IPV, such as definitions, characteristics, and the cycle of IPV. Then, theories of IPV are presented and various sources of IPV data and measurement issues are discussed. The majority of the course focuses on the historical development/evolution and current response of the criminal justice system to IPV including law enforcement response, the use of protection orders, domestic violence courts, and batterer intervention treatment programs. Additionally, the course examines "special topics" regarding IPV including teen dating violence, intimate partner homicide, and IPV within criminal careers.

Prerequisite(s): Admission to a UNO graduate degree program, or permission of the UNO School of Criminology and Criminal Justice Graduate Program Coordinator. Not open to non-degree graduate students.

CRCJ 8430 HUMAN TRAFFICKING (3 credits)

This course is designed to provide students with a systematic introduction to the study of human trafficking. Students will learn about the prevalence, predictors, and consequences of human trafficking. Additionally, students will develop a critical understanding and appreciation of the development and current state of theories, measurement, and quantitative and qualitative results that can be used to inform our understanding of the nature of these events, the victims who are harmed, the individuals who facilitate these crimes, and identification and response initiatives.

Prerequisite(s): Admission to a UNO graduate degree program, or UNO SCCJ Graduate Program Coordinator permission. Not open to non-degree graduate students.

CRCJ 8516 VIOLENCE (3 credits)

This course is a survey of the nature and extent of violence. The focus is on patterns of violence across social groups, the causes and correlates of violence and violent behavior, and programs/policies geared toward violence prevention and reduction. Also of interest is the relationship between theory and violence research.

Prerequisite(s): Upper-division CRCJ major; CRCJ minor; or CRCJ 1010 and jr/sr standing.

CRCJ 8800 SPECIAL PROBLEMS IN CRIMINAL JUSTICE (3 credits)

A course devoted to an exploration and analysis of contemporary special problems in the broad spectrum of criminal justice philosophy. This course looks at philosophical issues related to social control. The purpose of this course is to foster a deeper understanding of the reasons, justifications, and problems related to societal approaches to the control of its citizens.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or UNO graduate student and permission of instructor.

CRCJ 8850 RISK/NEEDS ASSESSMENT INSTRUMENTS (3 credits)

This course is designed to provide students with advanced knowledge and understanding in the area of risk/needs assessment tools used in the juvenile and adult justice system.

Prerequisite(s): Admission to graduate program in criminology and criminal justice; or, instructor permission.

CRCJ 8950 STATISTICAL APPLICATIONS IN CRIMINAL JUSTICE & PUBLIC ADMIN (3 credits)

This is a required course which provides a foundation for the use of statistical methods in criminal justice and public affairs research. It will review fundamentals of research, showing the interplay between the theory, the research, the statistical method, and the interpretation.

Prerequisite(s): Admission to UNO Graduate college.

CRCJ 8970 CAPSTONE PROJECT IN CRIMINOLOGY AND CRIMINAL JUSTICE (3 credits)

The Capstone Project offers each student the opportunity to demonstrate mastery of the theory and practice of Criminology and Criminal Justice by applying the knowledge and skills gained in the Master of Science program to a project of the student's choice. This involves completing a project report reflecting the cumulative knowledge gained from these experiences. This class is intended only for students who are completing their Master of Science degree in Criminology and Criminal Justice.

Prerequisite(s): Admission to Criminology and Criminal Justice MS program, and completion of a minimum of 24 credit hours; or permission of Masters Program Coordinator. Not open to non-degree graduate students.

CRCJ 8990 MASTERS THESIS (1-6 credits)

The thesis is required for all students in the MA program. It provides students with an opportunity to integrate theories, concepts, and aspects of the criminology and criminal justice literature with methods and techniques for conducting research, through the completion of an original research project. The thesis project should constitute original research and is conducted under the supervision of a Masters Thesis Committee.

Prerequisite(s): Admission to the MA program in Criminology and Criminal Justice; and, CRCJ 8010, CRCJ 8020, CRCJ 8030, CRCJ 8950 and 6 other 8000+ CRCJ courses. Not open to non-degree graduate students.

CRCJ 9010 SEMINAR ON LAW & SOCIAL CONTROL (3 credits)

This is a required course which will examine the relationships between the state, the law, and the citizen in a democratic society. It will also examine the relationship between social control, law and social change.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or UNO graduate student and permission of instructor.

CRCJ 9020 SEMINAR ON THEORIES OF CRIME (3 credits)

This is a required course which emphasizes conceptual and theoretical issues in contemporary criminological theory. It also provides students with a working knowledge of theory construction.

Prerequisite(s): Admission to Criminology and Criminal Justice MA or PhD graduate programs; or admission to UNO graduate program and instructor permission.

CRCJ 9030 SEMINAR ON RACE, ETHNICITY, AND CRIMINAL JUSTICE (3 credits)

This is a required course which introduces students to current empirical research and theory on racial minorities and the criminal justice system. It focuses on racial minorities as victims of crime, as offenders, and as criminal justice professionals.

Prerequisite(s): Admission to UNO graduate program.

CRCJ 9040 COMPARATIVE CRIMINOLOGY AND CRIMINAL JUSTICE SYSTEMS (3 credits)

This course provides a cross-national examination of the dynamics of criminality and the social response to crime. It also describes the extent and nature of crime in different countries.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and instructor permission.

CRCJ 9050 ACADEMIC WRITING (3 credits)

This course is designed to familiarize students with academic and professional writing with the goal of promoting the development of formal writing and organizational skills. Students will learn how to construct and organize scholarly papers to better prepare them for the comprehensive examination, the doctoral dissertation, the development of scholarly journal articles and monographs, and the development of funded project proposals.

Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and permission of instructor.

CRCJ 9080 ADVANCED STATISTICAL APPLICATIONS (3 credits)

This is a required course which will provide the student with fundamentals of modern statistical techniques used in criminal justice and public affairs research. (Cross-listed with PA 9080).

Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and CRCJ 8950 or PA 8950 and instructor permission.

CRCJ 9090 SPECIAL PROBLEMS IN RESEARCH METHODS (3 credits)

This course will explore specialized topics in research methodology. The course assumes that participants have a firm understanding of the basic principles of research methods and statistics.

Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9100 SPECIAL PROBLEMS IN STATISTICAL ANALYSIS (3 credits)

This course will explore advanced techniques of statistical analysis within the field of criminal justice. It assumes that participants have taken courses in basic descriptive and inferential statistics and advanced multivariate analysis of variance and regression.

Prerequisite(s): Admission to the graduate program in Criminology and Criminal Justice and CRCJ 9080; or admission to UNO graduate program, CRCJ 9080, and permission of the instructor.

CRCJ 9130 ADVANCED RESEARCH ON POLICING (3 credits)

This course will explore critical research issues in American policing. The focus of the course may vary and cover topics such as police discretion, police use of force, labor unions in law enforcement, gender differences in policing, and police organization management.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and permission of the instructor.

CRCJ 9150 SPECIAL TOPICS IN CRIMINAL JUSTICE RESEARCH (3 credits)

This course will focus on specialized topics in criminology & criminal justice research. The purpose of the course is to provide students with an opportunity to read and critique current research on topics such as the history of the criminal justice system, civilian review of the police, sentencing, or the application of the death penalty.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9160 SEMINAR IN COMMUNITY-BASED CORRECTIONS (3 credits)

This course will deal with strategies of correctional reform and with models and practices of community-based corrections. Recent innovations in community-based corrections will be examined to demonstrate how they fit into an overall correctional strategy.

Prerequisite(s): Admission to UNO graduate program.

CRCJ 9170 SEMINAR ON INSTITUTIONAL CORRECTIONS (3 credits)

This course will examine the role of correctional institutions in the criminal justice system. The student will be exposed to the historical, current, and projected role of these institutions.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 9180 SEMINAR ON THE CRIMINAL COURT SYSTEM (3 credits)

This course will focus on the structure, organization, and operation of the state and federal court systems in the United States. The purpose of the course is to survey recent research on the dynamics of courthouse justice—charging, plea bargaining, bail decision making, jury decision making, and sentencing.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 9200 SEMINAR ON VIOLENT CRIME AND CRIMINAL BEHAVIOR (3 credits)

This course exposes students to the leading theories and research in the area of violent criminal behavior. It addresses major violent crimes including rape, homicide, and child sexual physical abuse.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 9220 ADVANCED CRIMINOLOGICAL THEORY AND THEORY CONSTRUCTION (3 credits)

This course is designed to extend students' knowledge of theory and theory construction beyond the basics of the elements and propositions of particular criminological theories. Students will have an opportunity to examine in depth topics such as theory construction, theory integration, theory compatibility and synthesis, and new directions in criminological theory.

Prerequisite(s): CRCJ 8090 or CRCJ 9020 and admission to graduate program in Criminology and Criminal Justice; or permission of instructor.

CRCJ 9250 SEMINAR ON VICTIMIZATION ACROSS THE LIFE-COURSE (3 credits)

The Seminar on Victimization across the Life-course provides graduate students a survey of the primary topics regarding the predictors and consequences of victimization at various points in life. This an elective course for graduate students in Criminology and Criminal Justice.

By the end of the course, students will understand major theories, research methods, and seminal research studies in the victimology field. Furthermore, students will learn how to critically analyze and interpret primary research regarding victimization.

Prerequisite(s): Admission to UNO graduate program. Not open to non-degree graduate students.

CRCJ 9700 TEACHING CRIMINAL JUSTICE AT THE COLLEGE/ UNIVERSITY LEVEL (3 credits)

This seminar is a required course for doctoral students in criminal justice. The purpose of the course is to provide students with the knowledge and skills that will enable them to become informed, effective, and stimulating teachers. A variety of pedagogical issues will be covered during the course of the semester; theories of learning and student motivation; constructing a course syllabus; designing effective writing assignments and in-class exercises; leading class discussions; testing and grading; and managing the classroom.

Prerequisite(s): Admission to Criminology and Criminal Justice PhD graduate program; or admission to Criminology and Criminal Justice MA or MS graduate program and instructor permission. Not open to nondegree students.

CRCJ 9800 ADVANCED RESEARCH DESIGN (3 credits)

This is a required course which will expose students to advanced topics in research methods in preparation for writing their doctoral dissertation. It will also apply advanced methodological techniques to problems in the field.

Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9980 DIRECTED READINGS IN CRIMINOLOGY & CRIMINAL JUSTICE (1-6 credits)

This course is designed to provide the advanced graduate student with the opportunity to do extended readings on a specialized criminology or criminal justice topic.

Prerequisite(s): Admission to graduate program in criminology and criminal justice or UNO graduate program, and permission of instructor.

CRCJ 9990 DISSERTATION (1-20 credits)

The dissertation is an original research project conducted and written under the direction of a faculty dissertation committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge on crime and criminal justice.

Prerequisite(s): Completion of all coursework, completion of the comprehensive examination, and permission of Supervisory Committee Chair. Not open to non-degree graduate students.

Critical and Creative Thinking (CACT)

Critical and Creative Thinking Graduate Courses

CACT 8000 INTRODUCTION TO CRITICAL AND CREATIVE THINKING (3 credits)

This course is the foundational introductory course for the Master of Arts in Critical and Creative Thinking program (MA CCT). It focuses on the development of students' skills as critical thinkers and creative problem solvers as well as the cultivation of students' capacity to recognize and leverage tools, resources, and ideas towards finding innovative solutions to everyday problems.

Prerequisite(s): Graduate status and acceptance into MA CACT program or permission of instructor.CACT8000

CACT 8060 TOPICS IN CRITICAL AND CREATIVE THINKING (3 credits)

This is a course on selected topics offered on a one-time or occasional basis. The course may be repeated as long as the topic is different each time. May be cross listed with other departments when topics are appropriate to other departments. A complete topics syllabus will be available on file in the Office of the Master of Arts in Critical and Creative Thinking program.

Prerequisite(s): Graduate standing.

CACT 8080 INDEPENDENT STUDY (1-3 credits)

This course is designed for those students who are independently pursuing an area of study that is not covered under the existing curriculum. The student will be supervised by a member of the faculty of the MA in Critical and Creative Thinking program. All course assignments, readings, requirements, and expectations will be clearly communicated to the student in advance. May be repeated for credit for a total of six credit hours.

Prerequisite(s): Admission into the MA CCT program, successful completion of 6 hours of CACT coursework, including CACT 8000, and permission of faculty member. Not open to non-degree graduate students.

CACT 8090 CRITICAL AND CREATIVE THINKING GRADUATE PROJECT (3 credits)

The Graduate Project is an applied student project under the direction of a faculty advisor. In the project, the student will apply interdisciplinary knowledge and skills gained within the program to address a problem or to expand knowledge within or across disciplines. The product or artifact produced by the student may take a variety of forms.

Prerequisite(s): Permission of faculty advisor and Graduate Program Committee Leadership (or its designee). Not open to non-degree graduate students.

CACT 8100 GLOBAL CINEMA (3 credits)

A critical and analytic study of foreign films focusing on overlapping global issues. This course supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking.

CACT 8106 CULTURAL PSYCHOLOGY (3 credits)

This course will provide an overview of the cultural, community and ecological factors that play a role in how people perceive their environments. The goal is to investigate the ways in which culture affects individual behaviors, attitudes and cognitions. It may be easy to tell that two cultures are different, but identifying exactly what is meant - and all that is encompassed - when speaking about "culture" can be much more difficult. Culture can include everything from gender constructs and race/ethnicity to the effects of new technologies. All of these aspects of culture affect individuals' psychological make-up and behavior. Although psychology has largely developed from a Western tradition, attention to research from non-Western perspectives will also be emphasized. This course supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 4530, PSYC 8536).

Prerequisite(s): Enrollment in MA in Critical & Creative Thinking program or by permission of the instructor.

CACT 8110 GLOBAL SOCIAL ISSUES: CREATIVE AND CRITICAL ANALYSES (3 credits)

This course focuses on global cultural and social forces and how they interact to form nexuses of both opportunity and obstacle to constructive human engagement on a wide array of social issues. An overview of topics covered in the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. This course will provide students with the analytical tools, collaborative engagement skills, and applied problem-solving techniques that will help students succeed in this concentration and program. (Cross-listed with BLST 8110)

Prerequisite(s): Graduate standing.

CACT 8116 GEOGRAPHY OF ECONOMIC GLOBALIZATION (3 credits)

A study of the geography of economic globalization and the geography of the world economy. The major topics include the historical development of the world economy and globalization from the geographical perspective, trends in geography of global production, trade and investment, the most important factors and actors in the globalization processes and its geographic effects, geography of transnational corporations, case studies of economic geography of selected industries and service activities, effects of globalization on the developed and developing countries. This course also supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with GEOG 4550, GEOG 8556)

Prerequisite(s): Graduate status.

CACT 8186 URBAN LATIN AMERICA (3 credits)

This course examines the experience of Latin American urbanization, attending to its contributions to urban sociology, social movements, and policymaking. Topics include urban transitions (e.g. pre-Hispanic to colonial, post-colonial to industrial, and the neoliberal turn), socio-spatial configurations (e.g. plazas, squatter settlements), urban marginality debates, urban politics, and planning as well as governance innovations (e.g. bus rapid transit systems, participatory budgeting). Students will compare city case studies across the region and to urban life in the United States. (Cross-listed with SOC 8786, SOC 4780, LLS 8786, LLS 4780).

CACT 8200 SEMINAR IN POLITICAL THEORY (3 credits)

This course introduces students to the history of political theory, from its origins in ancient Greece to its manifestations in contemporary thought. (Cross-listed with PSCI 8300)

Prerequisite(s): Permission of graduate advisor. Not open to non-degree graduate students.

CACT 8206 COMPARATIVE RELIGIOUS ETHICS (3 credits)

An introduction to historical and contemporary approaches to comparative religious ethics, with special focus on specific case studies as encountered in societies and religious communities across the globe. In addition to reading authors from a variety of perspectives (Aristotelians, natural law theorists, philosophers of law, pragmatists, theologians, and historians of religion), students will be introduced to special topics in the field, e.g., religion and public life, religion and law, syncretism, the secular/non-secular divide, etc. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 4200, RELI 8206)

CACT 8215 VALUES AND VIRTUES (3 credits)

This course explores advanced topics in ethics with particular emphasis on value theory and virtue ethics. Topics to be considered include the meaning and status of value claims, sources of value, intrinsic goods, agent-relative goods, practical reason, moral development, happiness, moral ambiguity, moral luck, the identification of virtues, and relationships of care, trust, and responsibility. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PHIL 3060)

CACT 8216 PUBLIC HEALTH, RELIGION, AND HUMAN RIGHTS (3 credits)

This course examines the intersections among public health, religion, and human rights. It considers how human rights impact public health and vice versa; how human rights and religious thought impact each other; how religious communities approach issues of public health; and how religious thought and practice affects people's health. Topics include infectious diseases such as HIV and COVID-19; issues of stigma and discrimination in public health; social determinants of health such as poverty and environmental quality; and women's and LGBTQ+ health. Students will gain skills of textual analysis, dialogue, and argumentative reasoning in both written and verbal form. (Cross-listed with RELI 8216, RELI 4210)

Prerequisite(s): Graduate standing.

CACT 8226 VIOLENT CONFLICTS, PEACEBUILDING, AND THE ETHICS OF INTERVENTION (3 credits)

This course is designed to familiarize the student with the nature of violent conflict, including terrorism, and a variety of the mechanisms for peacebuilding. The course will also explore human rights and the ethics of intervention. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 4220, RELI 8226)

CACT 8306 INTERNATIONAL DEVELOPMENT & SUSTAINABILITY (3 credits)

This course introduces students to different concepts of international development through the lens of sustainability. The course explores a broad range of activities related to international development, including international aid, trade, philanthropy, interventions in conflict, peacebuilding, public health, human rights, social justice, and the environment. (Cross-listed with PSCI 4290, PSCI 8296)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

CACT 8310 ECOLOGICAL WRITING AND ANALYSIS (3 credits)

This course provides students with the opportunity to develop expertise in a wide range of foundational works and key techniques of ecological writing and theory in English. By engaging mindfully with these works and techniques, students will develop advanced skills in ecologically oriented critical analysis and creative thinking. This course supports the Writing and Critical Reflection and the Health and the Environment concentrations in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENGL 8310)

Prerequisite(s): Graduate standing.

CACT 8316 OUR ENERGY FUTURE: SOCIETY, THE ENVIRONMENT AND SUSTAINABILITY (3 credits)

In this course, students will analyze our energy options including the environmental, economic, and ethical connections with a particular emphasis on electrical energy. The course doesn't prescribe a particular energy future but rather emphasizes development of the knowledge and skills to more effectively contribute to the conversation. To understand our future, the course begins with the present energy landscape and its historical underpinnings, then focuses on developing a student's ability to critically assess energy options by examining the associated implications, consequences, intent, origins, and bias. Students' own work, life, and academic experience are used in the course to underscore the individual relevance of these energy choices. The course includes the necessary science, but the greater emphasis is on the associated critical and creative thinking so that ultimately students can make informed, creative, sustainable energy choices. (Cross-listed with ENVN 4310, ENVN 8316)

Prerequisite(s): Graduate standing.

CACT 8326 ECOLOGICAL SUSTAINABILITY AND HUMAN HEALTH (3 credits)

The course will explore and develop the complex context of the systemic links among ecosystems and human health (and more broadly human well-being) using case studies including climate change, water quality, infectious diseases and agricultural production. Students will develop skills in critical thinking and applied research by studying biological connections between humans and ecosystems and how social, economic and cultural processes and practices mediate these connections. This course supports the Health and the Environment concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENVN 4320)

Prerequisite(s): Graduate standing.

CACT 8400 A HISTORY OF AMERICAN IMMIGRATION POLICIES AND LAWS (3 credits)

This seminar will examine the evolution of American immigration policies and laws from the colonial period to the present day. Where appropriate, the course will examine American immigration laws in a comparative context. It will pay particular attention to how state policies create and/or sustain inclusionary or exclusionary practices for members of different racial, ethnic, religious, or gender groups in American society.

Prerequisite(s): Graduate standing.

CACT 8410 IMMIGRATION, MIGRATION, AND DIASPORA: CRITICAL APPROACHES AND THEORIES OF MOVEMENT IN LITERATURE (3 credits)

This seminar in literature and some film analyzes the depictions in non-fiction and fiction of displacement as a result of immigration, migration, refugee status, or any other considered movement, intentional or imposed. It will focus largely on the U.S. experiences of those displaced from all locales. (Cross-listed with ENGL 8410)

Prerequisite(s): Graduate standing.

CACT 8416 LITERATURE/CULTURE: CENTRAL AMERICA AND THE CARIBBEAN 1898-2000 (3 credits)

"Literature/ Culture: Central America and the Caribbean 1898- 2000" studies major historical and socio-cultural events in Latin American history in the 20th century, through their articulation in literary texts, film, and other cultural expressions from Central America and the Hispanic Caribbean. (Cross-listed with SPAN 4150, SPAN 8156)

CACT 8420 MEXICO AND THE U.S. BORDERLANDS: TWO HISTORIES, ONE DESTINY (3 credits)

Exploration of U.S.-Mexico Borderlands history and its pathways to current developments. It reviews borderland encounters, miscegenation, and wars between Indigenous groups, Europeans, North Americans, and Mexicans. It looks at the history of the drafting of the imaginary U.S.-Mexico borderline and follows its development until the construction of a wall to separate an undividable socio-cultural space. The course integrates a comparative conceptual approach to empires, nation-building, territorial expansion, identity formation, code-mixed English-Spanish uses, and state sovereignty.

CACT 8436 INTERNATIONAL MIGRATION, DEVELOPMENT AND CITIZENSHIP (3 credits)

The course examines the forces driving contemporary global migration, the impact of migration in both sending and receiving nations' development, as well as the politics and practices of migration policy development. The course also discusses the current debates on immigrant incorporation and citizenship in the receiving countries. (Cross-listed with LLS 4430, LLS 8436).

Prerequisite(s): Graduate standing

CACT 8500 COMPLEX ORGANIZATIONS (3 credits)

This graduate seminar provides an overview focused on the understanding and analysis of intricate internal and external organizational forces such as organizational bureaucracy, organizational culture, autonomy and control systems, which affect performance of organizational members as well as influence organizational survival. (Cross-listed with SOC 8500)

Prerequisite(s): Graduate enrollment or permission of class instructor.

CACT 8506 CREATIVITY AND INNOVATION IN ORGANIZATIONS (3 credits)

To provide a discussion of the antecedents of individual and organizational creativity, including measurement, models, characteristics of the individual and the environment that facilitate creativity and innovation in an organizational setting. Students in this course will be able to understand the research literature related to creativity and innovation and apply the findings to improve critical and creative thinking, implementation of creative ideas, and development of creative teams and organizations. This course supports the Organizational Science and Leadership concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 4650, PSYC 8656)

CACT 8510 SEMINAR IN LEADERSHIP (3 credits)

This course introduces students to classical and contemporary scholarship on leadership theory, research, and application. Students gain a foundation in models of leadership, assess their own leadership styles, and learn to integrate what they learn in corporate, governmental, non-profit, or community organizations. (Cross-listed with PSCI 8120)

Prerequisite(s): Permission of graduate adviser. Not open to non-degree graduate students.

CACT 8520 POSITIVE ORGANIZATIONAL PSYCHOLOGY AND LEADERSHIP (3 credits)

This course is a graduate seminar on organizational psychology and leadership that focuses on the understanding and critical analysis of theory and practice pertaining to individual functioning at work. Positive organizational psychology theories and practices will provide the overarching framework in understanding potential solutions to challenges and problems facing leaders and their employees. (Cross-listed with PSYC 9421).

Prerequisite(s): Graduate standing or permission of instructor.

CACT 8530 PERSONNEL PSYCHOLOGY AND LEADERSHIP (3 credits)

This course provides an overview of personnel psychology from a leadership perspective. Topics include methodology, employee selection, performance appraisal, organizational attitudes and behavior, motivation, and leadership style.

Prerequisite(s): Graduate standing or permission of instructor

CACT 8540 SEMINAR ON INTERNATIONAL LEADERSHIP AND STRATEGY (3 credits)

This course introduces students to international leadership and strategy theory, research, and application. (Cross-listed with PSCI 8220).

Prerequisite(s): Not open to non-degree graduate students.

CACT 8610 PROFESSIONAL AND TECHNICAL WRITING (3 credits)

This course will introduce students to the theory, research, and practices of professional and technical writing. Through readings, discussions, and assignments, students will gain an understanding of the types and circumstances of communication challenges encountered in the workplace. The course will also consider the roles of persuasion and ethics in written communication. (Cross-listed with ENGL 8610)

Prerequisite(s): Graduate standing.

CACT 8630 DIGITAL RHETORIC (3 credits)

This course provides students with the opportunity to develop expertise in the theory and practice of digital rhetoric by considering technology's deep impact on how we define and engage in writing. Students examine contemporary writing practices as part of a rich rhetorical tradition while they design and create effective multimodal compositions and analyze foundational works in digital rhetoric. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENGL 8630)

Prerequisite(s): Graduate standing.

CACT 8640 CREATIVE NONFICTION IN DIGITAL ENVIRONMENTS (3 credits)

Students in this course will study creative nonfiction in digital environments, analyze rhetorical situations created in digital environments, which might include, in addition to other modalities, sounds, animations, and hypertext, and create multimodal essays. The course will also focus on the study and analysis of craft-elements of creative nonfiction: narrative persona, tone, rhythm and style, scenic construction, among others. Students taking this course will learn to read with interpretative and analytical proficiency a broad range of creative nonfiction in digital environments. (Cross-listed with ENGL 8640).

Prerequisite(s): Graduate standing

CACT 8650 WRITING ACROSS DIFFERENCES: RHETORICAL THEORY FOR PERSUASION AND PUBLIC ADVOCACY (3 credits)

This course provides students a theoretical foundation for understanding how language is used in various types of discourses and texts as a means of convincing others of a given viewpoint or idea. Students will apply this theory to real-world writing scenarios in their scholarly areas of interest, to advocacy and social issues movements, or to address workplace needs and goals. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENGL 8650)

Prerequisite(s): Graduate standing.

Cybersecurity (CYBR)

Cybersecurity Graduate Courses

CYBR 8000 CENTER OF ACADEMIC EXCELLENCE-CYBER OPERATIONS COMPLETION CERTIFICATE (0 credits)

This course is utilized to provide a specific designation for students that have completed the Center of Academic Excellence - Cyber Operations coursework. It is a zero credit hour class used to designate the completion of this focus area in the cybersecurity curriculum.

Prerequisite(s): Instructor Permission. The program committee will work with the UG advisors to ascertain that the student has fulfilled all requirements for this designation-if he/she has or will within the last semester, they will be allowed to register for this class.

CYBR 8080 SPECIAL TOPICS IN INFORMATION ASSURANCE (1-6 credits)

The course provides a format for exploring advanced research areas for graduate students in Information Assurance and related fields. Specific topics vary, in keeping with research interests of faculty and students. Examples include applied data mining, mobile security, web services and applications, vulnerability assessments, cloud computing security, and other issues in Information Assurance research.

Prerequisite(s): Instructor Permission.

CYBR 8366 FOUNDATIONS OF CYBERSECURITY (3 credits)

Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 4360, CSCI 8366)

Prerequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CYBR 8396 MOBILE DEVICE FORENSICS (3 credits)

Mobile device forensics is the science of recovering digital evidence from a mobile device under forensically sound conditions using accepted methods. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a mobile device forensics investigation. Topics include: an introduction to digital and mobile device forensics, mobile forensics standards, acquisition methods (manual, logical, physical and provider-side), Android and iOS filesystem analysis, decoding approaches, application data analysis, and report writing. Students will be required to perform several investigations in a controlled lab environment, including acquiring forensically sound evidence and analyzing these using industry standard tools. (Cross-listed with CYBR 4390).

CYBR 8410 DISTRIBUTED SYSTEMS AND NETWORK SECURITY (3 credits)

The course aims at understanding the issues surrounding data security, integrity, confidentiality and availability in distributed systems. Further, we will discuss various network security issues, threats that exist and strategies to mitigate them. This course will cover topics in cryptography, public key infrastructure, authentication, hashing, digital signatures, ARP protection, IP and IPSEC, IP Tables, SSL/TLS, firewalls, etc. (Cross-listed with CSCI 8410)

Prerequisite(s): IASC 8366 or equivalent(s); or instructor permission. Not open to non-degree graduate students.

CYBR 8420 SOFTWARE ASSURANCE (3 credits)

Software assurance is a reasoned, auditable argument created to support the belief that the software will operate as expected. This course is an intersection of knowledge areas necessary to perform engineering activities or aspects of activities relevant for promoting software assurance. This course takes on a software development lifecycle perspective for the prevention of flaws. (Cross-listed with CSCI 8420)

Prerequisite(s): CSCI 8836 OR by permission of the Instructor. Not open to non-degree graduate students.

CYBR 8436 QUANTUM COMPUTING AND CRYPTOGRAPHY (3 credits)

The course builds an understanding of exciting concepts behind quantum computing and quantum cryptography. In doing so it will introduce the principles of qubits, superposition, entanglement, teleportation, measurement, quantum error correction, quantum algorithms such as quantum Fourier transformation, Shor's algorithm and Grover's algorithm, quantum key exchange, quantum encryption, and secure quantum channels that are built using these principles. It will also discuss advantages of quantum computing and cryptography over classical computing and cryptography and limitations thereof. The students will come out with a working understanding of the field of quantum computing and quantum cryptography. During the course, students will also implement several of the quantum algorithms. (Cross-listed with CYBR 4430, CSCI 4430).

CYBR 8446 INDUSTRIAL CONTROL SYSTEM SECURITY (3 credits)

The objective of this course is to research vulnerabilities into, and provide guidance for securing, industrial control systems (ICS). ICS is a general term that encompasses several types of control systems, including supervisory control and data acquisition (SCADA) systems, distributed control systems (DCS), and other control system items such as Programmable Logic Controllers (PLC). The student will learn to identify network and device vulnerabilities and potential countermeasures to these weaknesses. (Cross-listed with CYBR 4440)

CYBR 8450 APPLIED CRYPTOGRAPHY (3 credits)

In this course we will implement stream and block ciphers in different modes, public key algorithms, hash functions, message authentication codes, random number generators, etc. Along the way we will also explore weaknesses of these algorithms and implement well-known attacks on them. We will also solve crypto challenges and puzzles. This is a hand-on course and will require programming proficiency. The preferred language will be Python; you can, however, use other object oriented languages.

Prerequisite(s): CSCI 8410 or CYBR 8410

CYBR 8456 HOST-BASED VULNERABILITY DISCOVERY (3 credits)

The class will cover security issues at an implementation and hardware level. The students will learn assembly language and the use of a reverse assembler and debugger. This will allow the student to analyze various "packing" algorithms for computer viruses, the viruses themselves, operating system "hooking", "fuzzing", and other machine code, host-based exploits. The class will be using both Windows and Linux as operating systems. (Cross-listed with CYBR 4450.)

Prerequisite(s): CSCI 3710 and CYBR 2250.

CYBR 8466 NETWORK-BASED VULNERABILITY DISCOVERY (3 credits)

The course is an advanced class in which the students learn various techniques for testing for and identifying security flaws in network software and web applications. Internet technologies such as HTTP, DNS, DHCP, and others are examined in the context of cyber security. Students are expected to participate in numerous hands-on experiments related to Information Assurance with respect to web technologies. (Cross-listed with CYBR 4460)

Prerequisite(s): CSCI 3550

CYBR 8470 SECURE WEB APPLICATION DEVELOPMENT (3 credits)

Web applications are pervasive fixtures of 21st century culture. Web application security is an inclusive, amorphous, term that spans application level security, i.e. ensuring high level code cannot be exploited, server level security, i.e. ensuring server resources such as databases and file systems cannot be exploited, and network security, i.e. ensuring unauthorized parties cannot access a server or tamper with user sessions. This course cross-cuts the web application security concepts across the different categories above and takes a heavily hands-on approach to introduce students to the world of secure web app. design and development.

CYBR 8480 SECURE MOBILE DEVELOPMENT (3 credits)

Mobile devices are already pervasive fixtures of 21st century culture and increasingly the internet of things (IoT) and wearables are proliferating throughout the world. As this proliferation occurs, numerous vendor-centric and third-party mobile, wearable, and internet of things apps are being created by developers and downloaded by end-users with little to no thought about the security and privacy of the information used and collected by the apps. This course examines this issue from a development point of view to a) introduce mobile/wearable/IoT architectures and technologies, b) increase student application development competencies with these technologies, and c) integrate secure design principles into the ideation, design, and testing phases during development.

Prerequisite(s): CYBR 8470 or Instructor Permission

CYBR 8490 CYBER INVESTIGATIONS (3 credits)

Security incidents and cybercrimes detected by organizations are escalating in both scale and complexity. As a result, cyber investigation capabilities have become a critical mechanism for organizations in an effort to minimize the damage from incidents and cybercrimes. These investigations often involve the preservation, identification, extraction, analysis and documentation of digital data (evidence) stored on a variety of electronic devices. The aim of this course is to introduce graduate students to acceptable approaches for collecting, analyzing and reporting data from a cyber investigation. Topics include but are not limited to: an introduction to cyber investigations, cyber investigations and the law, incident response and first responder actions, investigation techniques, operating system analysis, and network investigations. Students will be required to perform several analyses in a controlled lab environment.

Prerequisite(s): CYBR 8366 or equivalent. CSCI 3550 or ISQA 3400, or equivalent. CYBR 3370 or equivalent. Alternatively, instructor permission can be sought before enrolling into the class for students who have not met all of the above requirements.

CYBR 8546 COMPUTER SECURITY MANAGEMENT (3 credits)

The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST 4540, CYBR 4540, ISQA 8546)

Prerequisite(s): IASC 4360 or permission of the instructor.

CYBR 8570 INFORMATION SECURITY POLICY AND ETHICS (3 credits)

The course will cover the development and need for information security policies, issues regarding privacy, and the application of computer ethics. (Cross-listed with ISQA 8570)

Prerequisite(s): CIST 2100 or BSAD 8030, or permission of instructor.

CYBR 8900 INDEPENDENT STUDY IN INFORMATION ASSURANCE (1-3 credits)

The course provides a format for exploring advanced research areas for graduate students in Information Assurance and related fields. The class is designed for students that would like to explore specific Information Assurance topics at a greater depth, or topics that are not currently a part of the IA curriculum. The class is proposed and organized by the student, with participating faculty mentoring.

Prerequisite(s): Instructor Permission

CYBR 8910 INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the MS in CyberSecurity (CYBR) program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s): Students must have completed a minimum of 12 credit hours towards the MS in CYBR program. Instructor permission is required to register. Not open to non-degree graduate students.

CYBR 8950 CYBERSECURITY GRADUATE CAPSTONE (3 credits)

The graduate capstone course challenges students to prove their mastery of the skills and domain knowledge they have gathered throughout their program of study. The course begins with a module on project management and research best practices. The majority of course is structured around facilitating a non-trivial semester-long project, often in service to a third-party project sponsor, such as a community, industry, or government partner. The course is intended for students that have selected the coursework option, not thesis, and that are close to graduation (see prerequisites). The course is considered summative and replaces the MS in CYBR comprehensive examination requirement.

Prerequisite(s): Students must have 9 credit hours or fewer left in the program. Students must have completed CYBR 8366, CYBR 8410, and CYBR 8420. Not open to non-degree graduate students.

CYBR 8986 SPECIAL TOPICS IN CYBERSECURITY (3 credits)

The course provides a format for exploring advanced research areas for undergraduate and graduate students in Cybersecurity and related fields. Specific topics vary, in keeping with the research interests of faculty and students. Examples include applied data mining, mobile security, web services and applications, vulnerability assessments, cloud computing security, and other issues in Cybersecurity research. (Cross-listed with CYBR 4980)

Prerequisite(s): Instructor Permission.

CYBR 8990 THESIS IN INFORMATION ASSURANCE (1-6 credits)

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.

Prerequisite(s): Instructor Permission.

CYBR 9460 SECURITY OF EMBEDDED SYSTEMS (3 credits)

An embedded system is some combination of computer hardware and software, either fixed in capability or programmable, which is specifically designed for a particular function. Industrial machines, automobile electronic systems, medical equipment, cameras, household appliances, airplanes, and vending machines, are among the myriad possible hosts of an embedded system. This course covers forward-looking topics in the security of embedded systems, including topics such as logic circuit obfuscation, hardware security methods, network setup exploits, and other "lower level" computer architecture subjects with respect to cybersecurity.

Prerequisite(s): CYBR 8366 - Foundations of Information Assurance

Economics (ECON)

Economics Graduate Courses

ECON 8010 SEMINAR IN PUBLIC FINANCE (3 credits)

This course is designed to develop the tools of applied welfare economics and to use these tools to evaluate the expenditure and tax decisions of governments. The structure, effects and reform of the U.S. individual and corporate income taxes, social security and healthcare system will be emphasized. Government debt and deficits will also be discussed.

Prerequisite(s): ECON 3200 or ECON 8210 or BSAD 8100 or permission

ECON 8020 ENVIRONMENTAL ECONOMICS AND MANAGEMENT (3 credits)

This course covers topics related to environmental economics and policy, with an emphasis on comparative policy analysis and business strategies towards the environment. (Cross-listed with BSAD 8020).

Prerequisite(s): ECON 2200 and ECON 2220 or BSAD 8180, or permission of the instructor. Not open to non-degree graduate students.

ECON 8050 ECONOMIC EDUCATION (3 credits)

A study and examination of economic principles and how they can be related to the teacher's classroom presentation. This course is designed to furnish the k-12 teacher with sufficient background and understanding to aid in the recognition of economic issues and the teaching of economic concepts and principles.

Prerequisite(s): No previous course work in economics. Not open to Economics majors.

ECON 8080 MONEY AND FINANCIAL INSTITUTIONS (3 credits)

This course examines the financial system (institutions, instruments, markets, practices, and public authorities), and the implementation of monetary policy that aims to maintain financial stability and support economic growth. The course discusses current events reported in the financial press and uses the analytic frameworks developed in class to analyze these issues. This course trains students to think systematically about the current state of the economy and use quantitative tools to analyze the interactions between monetary policy and the financial system.

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 8200 SEMINAR IN MICRO ECONOMIC THEORY (3 credits)

The course covers major topics in microeconomic theory. The major topics covered are the theory of consumer behavior, theory of production and cost, theory of the firm, pure exchange economy, general equilibrium, and welfare theory.

Prerequisite(s): ECON 3200, ECON 3220 and ECON 8306 or permission.

ECON 8210 APPLIED MANAGERIAL ECONOMICS (3 credits)

This is a course in empirical economic modeling techniques deployed by economists and other business consultants use in business and public policy applications. There are four main themes: 1) techniques used in demand analysis and economic forecasting, 2) techniques used in production and cost analysis, 3) supply chain and trade analysis, and 4) analysis and measurement of competitive interactions.

Prerequisite(s): ECON 2200 or equivalent, or permission of the instructor.

ECON 8216 INDUSTRIAL ORGANIZATION (3 credits)

In this class we will examine why firms and industries behave the way that they do. We will explore why some industries face intense competition while others enjoy large profits, why some industries offer only bundles, and why some firms buy up their supply chain when others do not. This theoretical course will illuminate un-theoretical implications to your life and future business ventures. This course will use your economic knowledge, a bit of psychology (behavioral economics) and game theory to answer questions like "Why does everyone hate the cable company?" and "Why are CEOs given so many stock options?" (Cross-listed with ECON 4210).

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 8220 SEMINAR IN MACRO THEORY (3 credits)

This course traces the development of macroeconomic theory from the classical point of view to current schools of thought. Keynesian, neo-Keynesian and neo-classical models are developed.

Prerequisite(s): ECON 3200 or ECON 8210 or BSAD 8100, ECON 3220, and ECON 8306, or permission.

ECON 8230 BUSINESS CONDITIONS ANALYSIS (3 credits)

This course is concerned with the statistical measurement and evaluation of general business conditions, as well as the adaptation of business policies to changing business conditions. Emphasis is placed upon the practical application of statistical analysis techniques to business situations within the framework of the aggregate economy.

Prerequisite(s): ECON 2200 and ECON 2220.

ECON 8246 LABOR ECONOMICS (3 credits)

The course will cover essential topics in Labor Economics including factors leading to equilibrium conditions in the labor market, human capital accumulation, discrimination in the workplace, compensation for undesirable work, mobility, unionization, and more. (Cross-listed with ECON 4240).

Prerequisite(s): ECON 2200 OR BSAD 8150

ECON 8290 RESEARCH METHODS IN ECONOMICS AND BUSINESS (3 credits)

Covers the methodology of economics: choosing a research topic, literature search tools, data source identification, data summary techniques, basic statistical data analysis using statistical packages, and clear economics writing. The student will become familiar with these techniques through text materials, journal studies, and completion of an empirical economics paper.

Prerequisite(s): ECON 3200, ECON 3220, or equivalents, or permission of the instructor. Not open to non-degree graduate students.

ECON 8300 ECONOMETRICS (3 credits)

The study of the underlying assumptions, techniques and applications of single and multiple equation regression analysis in economics.

Prerequisite(s): Basic Statistics, ECON 8306/ECON 4300, or permission. Not open to non-degree graduate students.

ECON 8306 QUANTITATIVE APPLICATIONS IN ECONOMICS AND BUSINESS (3 credits)

The study and application of modern quantitative techniques to problem-solving in economics and business. It is designed to help the student to translate verbal arguments in economics and business into their mathematical equivalents, to improve analytical skills, and to attain proficiency in marginal analysis, equilibrium analysis, static optimization, and comparative statics analysis. It covers topics such as exponential and logarithmic functions and their applications, linear algebra and its applications, derivatives and their applications, maximization of functions with one variable and multi variables, maximization with non negativity constraints, and integral calculus and its applications in economics and business. (Cross-listed with ECON 4300).

Prerequisite(s): ECON 2200 and ECON 2220, or BSAD 8180.

ECON 8310 BUSINESS FORECASTING (3 credits)

The course will cover forecasting tools and applications applied to business settings. The first half of the course will cover traditional Econometric forecasting methods and the second half of the course will focus on predictive analytics models and machine learning. Time in the computer lab will be focused on teaching students how to implement the models discussed in lectures. (Cross-listed with BSAD 8080).

Prerequisite(s): ECON 8320 (or equivalent programming experience) or permission of instructor. Not open to non-degree graduate students.

ECON 8316 BUSINESS INTELLIGENCE AND REPORTING (3 credits)

The course will teach students to use state-of-the-art Business Intelligence (BI) software to generate reports and information from data. BI software is used to inform decision-making in industries from transportation to medicine, from marketing to government, and is facilitated by rapidly increasing access to data in all industries. Students will learn to employ best practices in visualization and verbal communication as they are trained to create valuable insights from data and convey those insights to stakeholders. Additionally, the course will aid students in preparing for certification in the use of state-of-the-art BI software. (Cross-listed with ECON 4350).

Prerequisite(s): BSAD 2130 (or equivalent) OR Instructor Approval

ECON 8320 TOOLS FOR DATA ANALYSIS (3 credits)

The course will cover basic principles of programming languages, as well as libraries useful in collecting, cleaning and analyzing data to answer research questions. The course will utilize basic Economic principles and Econometric methods as inspiration for assignments and projects throughout the duration of the course, and will do so in a way that is accessible to non-Economists. This course is intended to introduce the student to the Python programming language as a tool for conducting data analysis. While the course uses Python, the student should be able to move to other languages frequently used in data analysis using the principles taught in this course.

Prerequisite(s): BSAD 2130 or equivalent; or instructor approval.

ECON 8326 NATURAL RESOURCE ECONOMICS (3 credits)

This course introduces students to the economics and management of Earth's natural resources. We address questions such as: Are we running out of natural resources? Are we using resources in a sustainable fashion? What role to markets play in resource use? We will address issues related to fossil-based resources, minerals, fisheries, water, land, forests and other associated topics. The course covers the basic theoretical framework for understanding the optimal rate of resource use, identifies the factors that determine the actual rate of use, and considers and evaluates various public policy prescriptions. (Cross-listed with ECON 4320).

Prerequisite(s): ECON 2200 and ECON 2220, BSAD 8150 or permission of instructor.

ECON 8330 DATA ANALYSIS FROM SCRATCH (3 credits)

Econometrics is routinely taught as an application class using a 'black box' like Stata or SAS to perform calculations. This class takes a different approach. Using the Python programming language, we build all estimators from scratch. Additionally, we introduce numerous non-parametric and simulation techniques. This approach to econometrics results in a stronger understanding of statistical assumptions and methods, a better understanding of when a method is appropriate, and stronger programming techniques. Furthermore, a deeper understanding of the underlying mechanics provides the student the ability to program custom procedures not already built into popular software packages. As part of the course, students will work with a community partner to answer a real question with data; MBA students should consult with their advisor about this course satisfying the project-focused capstone requirement.

Prerequisite(s): A multivariate or regression analysis course such as ECON 8300, ISQA 9130 or STAT 8436, and a programming class such as ECON 8320 or equivalent programming experience; or instructor approval. Not open to non-degree graduate students.

ECON 8346 ECONOMICS OF TECHNOLOGY (3 credits)

Innovative dynamism is the economic system which brings us the new goods and processes that make life longer and better. We will examine how the system works, including: The role of the breakthrough inventor and the innovative entrepreneur; whether the system improves or hurts ethical behavior, culture, equality, and the environment; the costs to workers in terms of job loss, and the benefits to workers in terms of the creation of better jobs; how funding, regulatory, and patent policies affect innovative dynamism; and how innovative dynamism in medicine can result in more and faster cures for cancer and other diseases. (Cross-listed with ECON 4340).

Prerequisite(s): ECON 2200 or BSAD 8180 or permission of the instructor.

ECON 8456 DOMESTIC MONETARY THEORY AND POLICY (3 credits)

The course will introduce students to topics in money and banking, financial institutions, markets, financial instruments, and monetary theory in order to enhance financial decision making and enable students to effectively analyze economic news in media such as the Wall Street Journal, The New York Times, Business Week, Barrons, The Economist, and other related business publications. This knowledge will enable students to formulate their own views about the current economic environment, government policies, and responses to economic environments. (Cross-listed with ECON 4450).

ECON 8576 ECONOMIC CONDITIONS ANALYSIS (3 credits)

This course teaches students how to conduct an economic analysis of, and produce an economic forecast for, a local economy such as a state, county, or metropolitan area. Students will learn where to find data, how to analyze that data, how to develop models with the data, and how to present the data in a clear, concise, and jargon-free manner. The final published report will be authored by the students registered in the course. All students will contribute equally to the final report. The instructor will ensure equal participation. (Cross-listed with ECON 4570).

Prerequisite(s): ECON 2200 and ECON 2220, or Permission from the instructor

ECON 8616 INTERNATIONAL TRADE (3 credits)

An analysis of the character of international economic relations. Subjects covered include the economic basis for international specialization and trade, the economic gains from trade, commercial policy, economic integration and economic growth. (Cross-listed with ECON 4610).

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8626 INTERNATIONAL MONETARY THEORY (3 credits)

This course is designed to introduce students to topic areas in International Macroeconomics and International Finance. Students will examine the mechanisms of the foreign exchange market, and how exchange rates are determined in the short-run as well as in the long-run. Students will investigate the different exchange rate regimes around the world, including fixed exchange rates, floating exchange rates, crawling pegs, and other arrangements. Students will examine the European Union and ask whether such a system is economically viable. This is especially important in the current economic environment facing Europe. Students will also examine exchange rate crises over history, and examine how they all have common elements. (Cross-listed with ECON 4620).

Prerequisite(s): ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8666 INTERNATIONAL ECONOMIC DEVELOPMENT (3 credits)

This course introduces theories and application of economic development and growth, economic problems facing developing countries, analyzes domestic economic issues (e.g., per capita GDP, income distribution, population, unemployment, urbanization, education, fiscal policies, and financial policies), and international economic issues (e.g., trade, foreign investment, and foreign debt). Financial crises, debt crises, and economic recovery will be discussed. (Cross-listed with ECON 4660).

Prerequisite(s): ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8736 ECONOMICS OF ENTREPRENEURSHIP (3 credits)

This course will review economic theories of entrepreneurship with special emphasis on Schumpeter's theory of creative destruction. The main focus of the seminar will be on the "high-level" entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 4730, BSAD 8736.)

Prerequisite(s): ECON 2200 or permission of the instructor for all students.

ECON 8856 ECONOMICS OF URBAN AND REGIONAL DEVELOPMENT (3 credits)

This course will consider factors and trends in development at the global and national level but will focus primarily on economic development at the state, local, and regional levels in the United States. The focus of this course will be real world strategic planning for economic development. (Cross-listed with ECON 4850).

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 8910 SPECIAL STUDIES IN ECONOMICS (3 credits)

This course will focus on issues or developments in a specific area of economics or business.

Prerequisite(s): Graduate student in good standing and as indicated for specific workshop or seminar.

ECON 8920 INDEPENDENT STUDY (1-3 credits)

Guided independent study and research.

Prerequisite(s): Graduate student in economics and permission of instructor.

ECON 8940 ECONOMIC INTERNSHIP (1-3 credits)

Guided internship in a firm or organization that makes use of, or extends, the student's skill in economics.

Prerequisite(s): Completion of at least nine hours of graduate level economics and permission of instructor.

ECON 8990 THESIS (1-6 credits)

An independent research project, written under the supervision of a graduate adviser in the department of economics. Approval of the topic and the completed project by departmental committee is required.

Prerequisite(s): Approval of the topic and the completed project by departmental committee is required.

Educational Leadership (EDL)

Educational Leadership Graduate Courses

EDL 8000 SPECIAL STUDIES IN EDUCATIONAL LEADERSHIP (3 credits)

This course will provide candidates in educational leadership with the opportunities and experiences of in-depth study of a specialized area of practice and research in school leadership.

Prerequisite(s): Admission to Graduate Studies or permission of instructor.

EDL 8010 INTRODUCTORY RESEARCH METHODS (3 credits)

The Introductory Research Methods course will introduce graduate degree candidates to foundational topics in quantitative, qualitative, and mixed methods research. Particular attention will be given to aligning evidence based literature frameworks with research methodology and data analysis techniques. The course will also prepare graduate students to generate ethically considered research topics and formally evaluate and present research findings in written form.

Prerequisite(s): Graduate Standing

EDL 8020 EDUCATIONAL POLICY AND LEADERSHIP (1 credit)

This course explores the expanded federal and state presence in local school districts. Historical and political factors influencing the governance of today's schools are explored, as well as current trends and policy decisions.

Prerequisite(s): Acceptance to Graduate Studies or department permission.

EDL 8030 INTRODUCTION TO EDUCATIONAL LEADERSHIP (3 credits)

This course is designed to introduce the beginning school leadership candidate to theories and practices of organization, motivation, leadership, and change processes, in order to develop an understanding of schools as complex organizations and the nature and challenges of leadership.

Prerequisite(s): Admission to UNO Graduate Studies or department permission.

EDL 8050 SCHOOL-COMMUNITY CONNECTIONS (3 credits)

School leaders engage the external and internal communities in their buildings and districts. This course assists candidates in developing an understanding of school-community relations, practicing the skills of positive influence with education stakeholders, and refining the dispositions of responsible citizenship by connecting to diverse community needs.

Prerequisite(s): Admission to Graduate Studies or department permission.

EDL 8100 INDEPENDENT STUDY IN EDUCATIONAL LEADERSHIP (1-6 credits)

This course is designed to allow graduate candidates in educational leadership to pursue independent study of a topic under the direction and guidance of a faculty member. Topics studied and the nature of the learning activities are mutually agreed upon by the candidate and instructor. This course will prepare school leaders as practitioners and researchers who can meet the dynamic challenges of education.

Prerequisite(s): Admittance to the doctoral program in educational administration/leadership, or instructor permission.

EDL 8310 ISSUES IN TECHNOLOGY FOR SCHOOL LEADERS (1 credit)

This class addresses the unique needs that those in administrative positions encounter in the constantly changing world of technology. Topics include: managing sustainability and obsolescence; ethics and policies for faculty, staff and students-including prevention of cyberbullying; technology for teaching and learning; and technology for business and accountability.

EDL 8320 ESSENTIALS OF DATA ANALYSIS AND PRESENTATION (1 credit)

This course is designed to give graduate students a foundational understanding of how information is processed, interpreted, and presented to provide school leaders with the ability to make data informed decisions. Major topics include how usable information can be extracted from tests and surveys, how probability is used to make claims from data sets, how charts and tables can be most effectively leveraged to understand the full scope of data sets, and how to publish results.

EDL 8340 ISSUES IN IDENTITY, CULTURE, AND POWER (1 credit)

This class promotes personal reflection and content awareness needed for educational leaders to promote racial equity in education. Topics include structural racism, bias, historical context of educational policy, and a call to action for racial justice in education.

EDL 8350 ISSUES IN MANAGEMENT FOR SCHOOL LEADERS (1 credit)

This class addresses the unique needs that those in educational leadership positions encounter when determining resource management of non-instructional systems. Topics include resource acquisition and management, using resources effectively, and oversight of facilities.

EDL 8360 CURRENT ISSUES IN SPECIAL EDUCATION ADMINISTRATION (1 credit)

The purpose of this course is to examine special education administration and leadership issues. This course will focus on policies and procedures necessary to effectively provide leadership to programs for children and youth with disabilities.

Prerequisite(s): Graduate standing.

EDL 8400 ELEMENTARY SCHOOL INTERNSHIP IN EDUCATIONAL LEADERSHIP (3 credits)

Elementary internship is designed to provide practice in elementary and general and special education administration and supervision according to the interests and needs of the candidates. Candidates will work with practicing administrators and a university supervisor.

Prerequisite(s): Candidates must be enrolled in the Master's and/or the Building Administration Endorsement program in Educational Leadership and be in their last year of the program or have department permission. Permit to enroll from department is required.

EDL 8410 SECONDARY SCHOOL INTERNSHIP IN EDUCATIONAL LEADERSHIP (3 credits)

Secondary school internship is designed to provide practice in 7-12 and general and special education administration and supervision according to the interests and needs of the candidates. Candidates will work with practicing administrators and a university supervisor.

Prerequisite(s): Candidates must be enrolled in the Master's and/or the School Administration Endorsement program in Educational Leadership and be in their last year of the program or have department permission. Permit to enroll from department is required.

EDL 8470 ADMINISTRATION AND SUPERVISION IN SCHOOLS (3 credits)

This course is designed to prepare educational leaders as dedicated practitioners, reflective scholars, and responsible citizens as they relate to the administration of a school site and system. This course is specifically designed to address the problems, issues, and opportunities of building level leadership.

Prerequisite(s): Admission to Graduate College. Not open to non-degree graduate students.

EDL 8490 INSTRUCTIONAL LEADERSHIP (3 credits)

School leaders serve as instructional leaders in their buildings and districts. This course assists candidates in developing knowledge and practicing skills necessary to lead educators and schools in the areas of instruction and curriculum.

Prerequisite(s): Admission to the Graduate College

EDL 8550 SCHOOL BUSINESS MANAGEMENT (3 credits)

This course will analyze the functions of school business management: budgetary processes, financial accounting, auditing and reporting, management of funds, purchasing procedures, transportation, food services, insurance and inventory control.

Prerequisite(s): EDAD8030 (previously or concurrently). Not open to non-degree graduate students.

EDL 8560 SCHOOL FINANCE (1 credit)

This course provides a study of the current sources of school financing: local, state, and federal. In addition to a review of the history of school finance, emphasis is placed on current problems in school finance, especially those related to overseeing the financial aspects of a school district.

Prerequisite(s): EDL 8350 or permission of the instructor.

EDL 8596 FOUNDATIONS OF LEADERSHIP DEVELOPMENT (3 credits)

Leadership development is an educational outcome for college students, and at UNO, is strongly encouraged. This course will expose students to foundational leadership theories and challenge them to explore personal and social competencies associated with effective collaboration and leadership. (Cross-listed with EDL 4590).

EDL 8620 SCHOOL PLANTS AND EQUIPMENT (3 credits)

This course is designed for aspiring superintendents and central office leaders. It will prepare school leaders to be proactive in developing specifications for school buildings that will enhance educational processes. It includes planning procedures for new and remodeled buildings, soliciting support for projects, site selection, design, maintenance and operations of school buildings.

Prerequisite(s): Admission to Graduate College

EDL 8710 INTERPERSONAL RELATIONSHIPS IN EDUCATIONAL LEADERSHIP (3 credits)

This course deals with the establishment of quality interpersonal and group relations among adults in school settings. Candidates will develop an increased awareness of their own and others' perspectives and will develop dispositions and skills that will allow them to work more productively. This course does not meet the requirements of Nebraska law LB 250 (Multi-Cultural and Interpersonal Relations).

Prerequisite(s): Admission to the Graduate Studies and Department of Educational Leadership or department permission.

EDL 8720 MULTICULTURAL AND NON-SEXIST AWARENESS (1 credit)

This course is designed for certificated educational employees, both teachers and administrators, seeking renewal of Nebraska certification under Nebraska LB 250 (Multi-Cultural and Interpersonal Relations). This course meets the requirements of Nebraska law LB 250 (Multi-Cultural and Interpersonal Relations). The purpose of the course is to develop awareness of cultural diversity in American society and to develop skills to effectively meet the needs of students, parents, and school community members.

Prerequisite(s): Graduate level. Permit of department required.

EDL 8730 COMMUNICATION AND CULTURE IN EDUCATIONAL HUMAN RESOURCES (1 credit)

This course focuses upon the interpersonal and professional knowledge, skills, and dispositions of human resources issues and functions for effective leadership in education.

Prerequisite(s): Admission to Graduate College.

EDL 8740 PROFESSIONAL DEVELOPMENT FOR SCHOOL LEADERSHIP (1 credit)

This course addresses strategies and models of planning, implementing, and evaluating adult and organizational learning for effective leadership in education.

Prerequisite(s): Admittance to Graduate College. Not open to non-degree graduate students.

EDL 8750 FUNDAMENTALS OF HUMAN RESOURCES IN EDUCATION (1 credit)

This course examines the frameworks that schools utilize to recruit, select, place, and support faculty and staff. School leaders need human resources skills and knowledge in order to effectively implement strategies and policies related to staff management, motivation, and evaluation.

Prerequisite(s): Admission to Graduate College. Not open to non-degree graduate students.

EDL 8780 EDUCATIONAL LEADERSHIP SUMMIT (2 credits)

The leadership summit in educational leadership synthesizes the program of school administration, supervision, and management in a manner that can be professionally presented and clearly articulated.

Prerequisite(s): Twenty four credit hours must be completed or taken concurrently in educational leadership. Department permit to enroll is required. Not open to non-degree graduate students.

EDL 8800 SCHOOL LEADERSHIP ACADEMY (3 credits)

A leadership course designed for current and aspiring school administrators and teacher-leaders. The course content will relate administrative theory to operations of schools drawing on research, models, and various organizational structures. This course is specifically designed to bridge leadership and management theory to the practical operations of schools.

Prerequisite(s): Advisor's approval.

EDL 8810 URBAN SCHOOL LEADERSHIP (3 credits)

This course is designed to acquaint candidates with urban concerns and issues which most significantly affect the administration of schools in and around metropolitan areas.

Prerequisite(s): Admission to Graduate College.

EDL 8900 SPECIAL EDUCATION LAW (3 credits)

The purpose of this course is to research and explore legal and policy issues affecting special education within our schools. Case law will be examined to ensure effective special education programs for children and youth with disabilities. (Cross-listed with SPED 8900).

Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

EDL 9000 FUNDAMENTALS OF RESEARCH DESIGN (3 credits)

This course will provide direction and assistance concerning principles of empirical research design as related to topics in educational leadership. Instruction as to appropriate format, style, and content of educational research as well as designing methodology for dissertation proposal will be emphasized.

Prerequisite(s): Admission to Graduate College. Students should be degree-seeking to take the course. Not open to non-degree graduate students.

EDL 9010 ADVANCED SEMINAR IN EDUCATIONAL RESEARCH (1 credit)

This seminar will provide support for doctoral candidates in applying skills of educational research to the development of a successful dissertation proposal.

Prerequisite(s): Admission to Graduate College. Completion of EDL 9000 or permission from instructor. Not open to non-degree graduate students.

EDL 9020 CONCEPTS AND CONTEXTS FOR LEADERSHIP IN SCHOOL LIBRARIES (3 credits)

Concepts and Context for School Libraries will introduce candidates to the broad landscape of school librarianship and its relationship to the greater library and information profession.

Prerequisite(s): Admission to the University of Nebraska Doctoral Program in Educational Administration or other University of Nebraska doctoral program in education, and instructor permission. Not open to non-degree graduate students.

EDL 9110 FIELD PROJECT IN EDUCATIONAL ADMINISTRATION (1-3 credits)

Administrative practitioners will study a current or anticipated educational problem using research techniques. Candidates will review a change process to their school or district that has recently been implemented or is under consideration for future implementation as the capstone work for the Educational Specialist degree.

Prerequisite(s): Admittance to the Ed.S. program and completion of EDL 9200. Candidates are encouraged, but not required, to utilize the project from EDL 9200 for the focus of the field project. Not open to non-degree students.

EDL 9200 ADVANCED PRACTICUM IN EDUCATIONAL ADMINISTRATION (3 credits)

This course is an independent, advanced practicum course meant to help practitioners prepare to be reflective scholars. It builds upon theory and practice of educational leadership and provides a guided experience.

Prerequisite(s): Admittance to the Ed.S. program and completion of EDL 9200. Candidates are encouraged, but not required, to utilize the project from EDL 9200 for the focus of the field project. Not open to non-degree students.

EDL 9310 ISSUES IN STRATEGIC PLANNING FOR SCHOOL LEADERS (1 credit)

Strategic planning is critical to the health, growth and sustainability of a school district. The process provides an opportunity to prioritize goals, actions, time and resources on key initiative. This course will examine the strategic planning processes used by leaders to guide educational change and improvement.

EDL 9320 LEGAL ISSUES IN SPECIAL EDUCATION (1 credit)

School Leaders have an obligation to know the rights of students with disabilities and the laws and policies that protect those rights. This course will focus on the mandatory requirements of Individuals with Disabilities Education Improvement Act (IDEIA) of 2004; the Americans with Disabilities Act (ADA) of 1990, amended in 2008 and the Rehabilitation Act of 1973, Section 504 along with program mandates and the case law that protects these students.

EDL 9330 ISSUES IN SCHOOL OPERATIONS (1 credit)

This course addresses leadership issues that current and prospective school leaders will find applicable as they earn certification as a superintendent, principal, curriculum supervisor, or special education leader. This one-hour course will provide knowledge and skills educational leaders will need to effectively and efficiently lead a public or private school building, program, or school district. Course modules will engage candidates in developing a leadership entry/transition plan, a leadership succession plan, and a leadership succession board policy and administrative procedures.

EDL 9340 CONTEMPORARY ISSUES IN SCHOOL LAW (1 credit)

This course is concerned with the most recent legal challenges and judicial decisions that are impacting schools. Topics include the most recent decisions from all levels of the courts up to the Supreme Court. School leaders will help prevent litigation by understanding the implications of current cases for the purpose of work with students, staff, faculty and community members without infringing upon their due process rights. School leaders may use the current decisions to update student and faculty handbooks and understand the critical need for guidance by school district legal counsel.

Prerequisite(s): School Law 9540 Legal Issues in Special Education Law 8920 or Instructor permission

EDL 9500 FRAMEWORKS OF BEST PRACTICE: LEADERSHIP IN SCHOOL LIBRARIES (3 credits)

This class will explore best practice in school libraries using the framework of current national standards for school librarianship preparation programs. Major areas for exploration include but are not limited to teaching for learning, literacy and reading, information and access, advocacy and leadership, and program management and administration.

Prerequisite(s): Admission to the University of Nebraska Joint Doctoral Program in Educational Administration pursuing studies in educational leadership with an emphasis in school librarianship or with instructor permission. Not open to non-degree graduate students.

EDL 9510 SEMINAR IN CULTURE AND CONTEXT OF SCHOOLING (3 credits)

An advanced seminar designed to enhance understanding of the cultural and social forces, trends, and issues that influence the delivery and effectiveness of schooling.

Prerequisite(s): Admission to the Department of Educational Administration and Supervision and the Ed.D. Program. Not open to non-degree graduate students.

EDL 9520 ACHIEVING SCHOOL EXCELLENCE (3 credits)

An advanced seminar on the pursuit of improvement in education and the role of administration in guiding positive school change through influence, persuasion, power, ethics, and research.

Prerequisite(s): Admission to the University of Nebraska Joint Doctoral Degree program or admission to another University of Nebraska doctoral program. Not open to non-degree graduate students.

EDL 9530 PARADIGMS AND PRACTICES OF SCHOOLING (3 credits)

This is an advanced seminar to explore leadership and supervisory practices. Particular attention will be given to organizational conceptualizations (paradigms) for addressing current educational problems and issues. Candidates will be encouraged to think outside the traditional frames of education in order to improve student achievement in PK-12 schools. When a paradigm shifts, the way we view the world and what we assume to be true dramatically changes. When faced with shifting circumstances, school leaders can turn change into opportunity and opportunity into success.

Prerequisite(s): Admittance to the UNO-UNL Joint Doctorate Program. Not open to non-degree graduate students.

EDL 9540 SCHOOL LAW (3 credits)

This course is concerned with laws related to schools. Topics include certification, contract, negligence, student rights, due process, curriculum, and discipline. Each topic is approached through study of most recent court cases.

Prerequisite(s): Admission to Graduate Studies or instructor permission. Not open to non-degree graduate students.

EDL 9550 SYMPOSIUM ON SCHOOL LEADERSHIP (3 credits)

The purpose of this seminar is to relate research, theory, and practice in educational organizations. The course is designed to engage candidates with a systematic examination of school reform, best practices, and the implications for practitioners. The symposium will involve candidates with the changing roles and functions of educational leaders in rapidly changing metropolitan educational environments.

Prerequisite(s): Admission to Graduate Studies or permission of instructor.

EDL 9610 STATISTICAL METHODS FOR THE BEHAVIORAL SCIENCES (2 credits)

This course is designed to help graduate students develop competence in understanding and applying statistical methods for the behavioral and social sciences. The course introduces broad historically based topics in statistics such as probability theory, the Law of Large Numbers, and the Central Limit Theorem to develop conceptually based models for hypothesis testing, description of data, and statistical inference. Emphasis is placed on the evaluation and interpretation of statistical methods used in published research and the development of analytic models in dissertation research.

Prerequisite(s): Admission to the Doctor of Education (Ed.D.) program in Educational Leadership or Department/Instructor's permission.

EDL 9620 NON PARAMETRIC STATISTICS FOR THE BEHAVIORAL AND SOCIAL SCIENCES (2 credits)

This course is designed to help graduate students develop skills in calculating and interpreting Non-Parametric data analytics. The course includes the application of nonparametric inferential and relational techniques. The statistical analyses include: Chi-squared family of tests, Mann-Whitney U, Wilcoxon Signed-Ranks and Rank-Sums, Kruskal-Wallis ANOVA, Spearman and Biserial correlations, Graphical analytics of Hierarchical Clustering, Dendrograms, K-Means Clustering, and Logistical Regression. Technology applications will include Excel statistical packages for Non-Parametric testing.

EDL 9630 QUALITATIVE RESEARCH (3 credits)

Qualitative Research develops skills and competence in designing, collecting, and analyzing data for studies in educational research.

Prerequisite(s): EDL 9610 or equivalent. Not open to non-degree graduate students.

EDL 9650 PROGRAM EVALUATION FOR EDUCATIONAL ADMINISTRATORS (3 credits)

This course provides an introduction to program evaluation theory and practice. It will address the range of approaches within education human service program evaluation, the standards established by the profession, the "how to" of program evaluation, and the skills needed to conduct program evaluation.

Prerequisite(s): Admission to the Graduate College or instructor's permission.

EDL 9660 STRATEGIC LEADERSHIP FOR SCHOOL LIBRARIES (3 credits)

This course will focus on the political, economic and social trends that have shaped school libraries and develop the skills and dispositions required for leaders of 21st Century school library programs.

Prerequisite(s): Admission to the University of Nebraska Joint Doctoral Program in Educational Administration or to any other doctoral program in the University of Nebraska, or instructor permission. Not open to non-degree graduate students.

EDL 9670 INQUIRY AND RESEARCH FOR LEADERSHIP IN SCHOOL LIBRARIES (3 credits)

Inquiry and Research for Leadership in School Librarianship will examine current research in the school library field and focus on action research based on authentic need.

Prerequisite(s): Admission to the University of Nebraska Joint Doctoral Program in Educational Administration or to any other doctoral program in the University of Nebraska, or instructor permission. Not open to non-degree graduate students.

EDL 9680 QUALITATIVE RESEARCH: FOUNDATIONS & APPROACHES (2 credits)

Qualitative research is social research that aims to investigate how people make sense of their ideas. This course will engage students in considering perspective, acknowledging positions, framing a study, and choosing a research approach (methodology).

Prerequisite(s): Admission to the Doctor of Education (Ed.D.) program in Educational Leadership or Department/Instructor's permission.

EDL 9690 QUALITATIVE RESEARCH: COLLECTION & ANALYSIS (2 credits)

Qualitative research is social research that aims to investigate how people make sense of their ideas. This course is about collecting data, applying qualitative data analysis strategies, and academic writing.

Prerequisite(s): Admission to the Doctor of Education (Ed.D.) program in Educational Leadership or Department/Instructor's permission.

EDL 9980 SUPERINTENDENT INTERNSHIP IN EDUCATIONAL ADMINISTRATION (3 credits)

This course is a guided, field-based internship for candidates seeking the school superintendent endorsement from the Nebraska Department of Education (NDE). The internship will provide candidates with experiences in the various roles and responsibilities of a superintendent.

Prerequisite(s): Admittance to the the EdD or EdS in educational administration or departmental permission. Candidates must submit an internship application by April 1 for following fall term.

EDL 9990 DISSERTATION (1-12 credits)

The course provides doctoral candidates in Educational Administration and Supervision with a process to complete a dissertation research plan. The course learning activities will focus on the completion of a candidate's dissertation. The course is designed to allow advanced doctoral candidates to demonstrate technical mastery of the discipline and to advance knowledge by completing an investigation.

Prerequisite(s): Admittance to the EdD in Educational Administration. Department permit to enroll required. Not open to non-degree graduate students.

Electrical and Computer Engineering (ECEN)

Electrical and Computer Engineering Graduate Courses

ECEN 800 ELECTRONIC INSTRUMENTATION (3 credits)

Applications of analog and digital devices to electronic instrumentation. Includes transducers, instrumentation amplifiers, mechanical and solid state switches, data acquisition systems, phase-lock loops, and modulation techniques. Demonstrations with working circuits and systems. (Cross-listed with ECEN 400)

Prerequisite(s): Senior Standing in Engineering or Permission. Not open to non-degree graduate students.

ECEN 806 POWER SYSTEMS ANALYSIS (3 credits)

Symmetrical components and fault calculations, power system stability, generator modeling (circuit view point), voltage control system, high voltage DC transmission, and system protection. (Cross-listed with ECEN 406)

Prerequisite(s): ECEN 338. Not open to non-degree graduate students.

ECEN 807 POWER SYSTEMS PLANNING (3 credits)

Economic evaluation, load forecasting, generation planning, transmission planning, production simulation, power plant reliability characteristics, and generation system reliability. (Cross-listed with ECEN 407)

Prerequisite(s): ECEN 305. Not open to non-degree graduate students.

ECEN 808 ENGINEERING ELECTROMAGNETICS (3 credits)

Applied electromagnets: Transmission lines in digital electronics and communication. The quasistatic electric and magnetic fields; electric and magnetic circuits and electromechanical energy conversion. Guided waves; rectangular and cylindrical metallic waveguides and optical filters. Radiation and antennas; line and aperture antennas and arrays. (Cross-listed with ECEN 408)

Prerequisite(s): ECEN 306. Not open to non-degree graduate students.

ECEN 810 MULTIVARIATE RANDOM PROCESSES (3 credits)

Probability space, random vectors, multivariate distributions, moment generating functions, conditional expectations, discrete and continuous-time random processes, random process characterization and representation, linear systems with random inputs. (Cross-listed with ECEN 410)

Prerequisite(s): ECEN 305. Not open to non-degree graduate students.

ECEN 815 DIGITAL IMAGE PROCESSING (3 credits)

Topics covering the spatial and spectral analysis of digital image processing systems, the design of multi-dimensional digital filters and systems, and advanced theories and technologies in digital image processing systems.

Prerequisite(s): ECEN 424 or ECEN 824 or permission.

ECEN 816 MATERIALS AND DEVICES FOR COMPUTER MEMORY, LOGIC, AND DISPLAY (3 credits)

Survey of fundamentals and application of devices used for memory, logic, and display. Magnetic, superconductive, semi-conductive, and dielectric materials. (Cross-listed with ECEN 416)

Prerequisite(s): PHYS 2120, not open to non-degree graduate students.

ECEN 817 SEMICONDUCTOR FUNDAMENTALS II (3 credits)

Analysis of BJT's and MOSFET's from a first principle materials viewpoint. Statics and dynamic analysis and characterization. (Cross-listed with ECEN 417.)

Prerequisite(s): ECEN 421 or ECEN 821. Not open to non-degree graduate students.

ECEN 820 PLASMA PROCESSING OF SEMICONDUCTORS (3 credits)

Physics of plasmas and gas discharges developed. Includes basic collisional theory, the Boltzman equation and the concept of electron energy distribution. Results are related to specific gas discharge systems used in semiconductor processing, such as sputtering, etching, and deposition systems. (Cross-listed with ECEN 420)

Prerequisite(s): Senior or graduate Standing. Not open to non-degree graduate students.

ECEN 821 PRINCIPLES OF SEMICONDUCTOR MATERIALS AND DEVICES I (3 credits)

Introduction to semiconductor fundamentals, charge carrier concentration and carrier transport, energy bands, and recombination. PN junction, static and dynamic, and special PN junction diode devices. (Cross-listed with ECEN 421)

Prerequisite(s): PHYS 2130. Not open to non-degree graduate students.

ECEN 824 DIGITAL SIGNAL PROCESSING (3 credits)

The temporal and spectral analysis of digital signals and systems, the design of digital filters and systems, and advanced systems including multi-rate digital signal processing techniques. (Cross-listed with ECEN 424)

Prerequisite(s): ECEN 355

ECEN 828 POWER ELECTRONICS (3 credits)

Basic analysis and design of solid-state power electronic devices and converter circuitry. (Cross-listed with ECEN 428)

Prerequisite(s): ECEN 304, ECEN 316.

ECEN 830 WIND ENERGY (3 credits)

This broad multidisciplinary course will combine engineering principles of both the mechanical/aerodynamical and electrical components and systems, along with economic and environmental considerations for siting and public policy, to appropriately cover the relevant topics associated with all scales of wind energy implementations. (Cross-listed with ECEN 430)

Prerequisite(s): Senior standing or permission.

ECEN 833 MICROPROCESSOR SYSTEM DESIGN (4 credits)

Microprocessor based systems. Architecture; design and interfacing. Memory design, input/output ports, serial communications, and interrupts. Generating assembly ROM code, assembly/C firmware generation, and designing device drivers. (Cross-listed with ECEN 433)

Prerequisite(s): ECEN 310 with grade of C or better and ECEN 332 with grade of C or better.

ECEN 835 EMBEDDED MICROCONTROLLER DESIGN (4 credits)

Microcontroller architecture: design, programming, and interfacing for embedded systems. Timing issues, memory interfaces, serial and parallel interfacing, and functions for common microcontrollers. (Cross-listed with ECEN 435)

Prerequisite(s): ECEN 433/ECEN 833, STAT 3800. Pre- or co-req: CSCI 4500.

ECEN 836 ELECTRIC MACHINES (3 credits)

Provides a solid background in electric machine analysis, covering fundamental concepts, techniques, and methods for analysis and design. Discussion of transformers and presentation of some new systems and applications. (Cross-listed with ECEN 436).

Prerequisite(s): PHYS 2120 and ECEN 216

ECEN 837 PARALLEL AND DISTRIBUTED PROCESS (3 credits)

Parallel and Distributed Processing concepts, principles, techniques and machines. (Cross-listed with ECEN 437).

Prerequisite(s): ECEN 435 or ECEN 835

ECEN 842 BASIC ANALYTICAL TECHNIQUES IN ELECTRICAL ENGINEERING (3 credits)

Applications of partial differential equations, matrices, vector analysis, complex variables, and infinite series to problems in electrical engineering. (Cross-listed with ECEN 442)

Prerequisite(s): MATH 2350. Not open to non-degree graduate students.

ECEN 844 LINEAR CONTROL SYSTEMS (3 credits)

Classical (transfer function) and modern (state variable) control techniques. Both time domain and frequency domain techniques are studied.

Traditional, lead, lag, and PID compensators are examined, as well as state variable feedback. (Cross-listed with ECEN 444)

Prerequisite(s): ECEN 304. Not open to non-degree graduate students.

ECEN 848 DECISION ANALYSIS (3 credits)

Principles of engineering economy including time value of money, net present value, and internal rate of return. Use of influence diagram and decision tree to structure and analyze decision situations under uncertainty including use of stochastic dominance, value of information, and utility theory. Fundamentals of two-person matrix games including Nash equilibrium. (Cross-listed with ECEN 448)

Prerequisite(s): ECEN 305 or STAT 3800

ECEN 850 BIOINFORMATICS (3 credits)

This course examines how information is organized in biological sequences such as DNA and proteins and will look at computational techniques which make use of this structure. During this class various biochemical processes that involve these sequences are studied to understand how these processes effect the structure of these sequences. In the process bioinformatics algorithms, tools, and techniques which are used to explore genomic and amino acid sequences are also introduced. (Cross-listed with ECEN 450)

Prerequisite(s): Computer programming language and ECEN 305 or STAT 3800 or equivalent.

ECEN 851 INTRODUCTION TO VLSI SYSTEM DESIGN (3 credits)

The concepts, principles, and methodology at all levels of digital VLSI system design and focused on gate-level VLSI implementation. (Cross-listed with ECEN 451).

Prerequisite(s): ECEN 310

ECEN 852 INTRODUCTION TO COMPUTER-AIDED DIGITAL DESIGN (3 credits)

The concepts, simulation techniques and methodology in computer-aided digital design at system and logic levels. (Cross-listed with ECEN 452)

Prerequisite(s): ECEN 310

ECEN 853 COMPUTATIONAL AND SYSTEMS BIOLOGY (3 credits)

Provides the required biology primer and covers functional genomics, transcriptomics, differential expression, clustering, classification, prediction, biomarker discovery, pathway analysis and network based approaches to high throughput biological data analysis. Includes the development of databases, algorithms, web-based and other tools regarding management and analysis of life science data. Areas of study include DNA, RNA, and protein sequence analysis, functional genomics and proteomics, 3D macromolecule structure prediction, and systems/network approach. (Cross-listed with ECEN 453).

Prerequisite(s): By permission.

ECEN 854 POWER SYSTEMS OPERATION AND CONTROL (3 credits)

Characteristics and generating units. Control of generation, economic dispatch, transmission losses, unit commitment, generation with limited supply, hydrothermal coordination, and interchange evaluation and power pool. (Cross-listed with ECEN 454)

Prerequisite(s): ECEN 838. Not open to non-degree graduate students.

ECEN 860 LABVIEW PROGRAMMING (3 credits)

Labview as a programming language and for applications to acquire data, to access the network, control lab instruments, and for video and sound applications. (Cross-listed with ECEN 460)

Prerequisite(s): Prior programming experience.

ECEN 861 DIGITAL COMMUNICATIONS MEDIA (4 credits)

Topics related to the transport of bit streams from one geographical location to another over various physical media such as wire pairs, coaxial cable, optical fiber, and radio waves. Transmission characteristics, media interfacing, delay, distortion, noise, and error detection and correction techniques. (Cross-listed with ECEN 461)

ECEN 862 COMMUNICATION SYSTEMS (3 credits)

Mathematical descriptions of signals in communication systems. Principles of analog modulation and demodulation. Performance analysis of analog communication systems in the presence of noise. (Cross-listed with ECEN 462)

Prerequisite(s): ECEN 304 and ECEN 305. Not open to non-degree graduate students.

ECEN 863 DIGITAL SIGNAL PROCESSING (3 credits)

Discrete system analysis using Z-transforms. Analysis and design of digital filters. Discrete Fourier transforms. (Cross-listed with ECEN 463)

Prerequisite(s): ECEN 304. Not open to non-degree graduate students.

ECEN 864 DIGITAL COMMUNICATION SYSTEMS (3 credits)

Principles of digital transmission of information in the presence of noise. Design and analysis of baseband PAM transmission systems and various carrier systems including ASK, FSK, PSK. (Cross-listed with ECEN 464)

Prerequisite(s): ECEN 462. Not open to non-degree graduate students.

ECEN 865 INTRODUCTION TO DATA COMPRESSION (3 credits)

Introduction to the concepts of Information Theory and Redundancy removal. Simulation of various data compression schemes such as Delta Modulation, Differential Pulse Code Modulation, Transform Coding and Runlength Coding. (Cross-listed with ECEN 465)

Prerequisite(s): ECEN 305. Not open to non-degree graduate students.

ECEN 866 TELECOMMUNICATION ENGINEERING I (4 credits)

Standard telecommunications protocols, architecture of long distance integrated data networks, local area networks, wide area networks, radio and satellite networks. Network management, internetworking, system modeling and performance analysis. (Cross-listed with ECEN 466).

Prerequisite(s): ECEN 362; ECEN 461/ECEN 861 prior to or concurrent.

ECEN 867 ELECTROMAGNETIC THEORY AND APPLICATIONS (3 credits)

Engineering application of Maxwell's equations. Fundamental Parameters of Antennas, Radiation analysis, and synthesis of antenna arrays. Aperture Antennas. (Cross-listed with ECEN 467)

Prerequisite(s): ECEN 306. Not open to non-degree graduate students.

ECEN 868 MICROWAVE ENGINEERING (3 credits)

Applications of active and passive devices to microwave systems. Includes impedance matching, resonators, and microwave antennas. (Cross-listed with ECEN 468)

Prerequisite(s): ECEN 306. Not open to non-degree graduate students.

ECEN 869 ANALOG INTEGRATED CIRCUITS (3 credits)

Analysis and design of analog integrated circuits both bipolar and MOS. Basic circuit elements such as differential pairs, current sources, active loads, output drivers used in the design of more complex analog integrated circuits. (Cross-listed with ECEN 469)

Prerequisite(s): ECEN 361. Not open to non-degree graduate students.

ECEN 870 DIGITAL AND ANALOG VLSI DESIGN (3 credits)

Introduction to VLSI design techniques for analog and digital circuits. Fabrication technology and device modeling. Design rules for integrated circuit layout. LSI design options with emphasis on the standard cell approach of digital and analog circuits. Lab experiments, computer simulation and layout exercises. (Cross-listed with ECEN 470)

Prerequisite(s): ECEN 361. Not open to non-degree graduate students.

ECEN 871 COMPUTER COMMUNICATION NETWORKS (4 credits)

This course investigates the standard protocols and hardware solutions defined by the International Standard Organization (ISO) and Institute of Electrical and Electronics Engineers (IEEE) for the computer communications networks. Included are ISO OSI model, IEEE 802.X (Ethernet, token bus, token ring) and Asynchronous Transfer Modals (ATM) networks. (Cross-listed with ECEN 471)

Prerequisite(s): ECEN 325

ECEN 873 MOBILE AND PERSONAL COMMUNICATIONS (4 credits)

This course provides basic concepts on mobile and personal communications. Concepts on mobile and personal communications. Modulation techniques for mobile radio, equalization, diversity, channel coding, and speech coding. (Cross-listed with ECEN 473)

Prerequisite(s): ECEN 325

ECEN 874 DIGITAL SYSTEMS (3 credits)

Synthesis using state machines; design of digital systems; micro programming in small controller design; hardware description language for design and timing analysis. (Cross-listed with ECEN 474)

Prerequisite(s): ECEN 370. Not open to non-degree graduate students.

ECEN 875 SATELLITE COMMUNICATIONS (4 credits)

The fundamental concepts of satellite communications. Orbits, launching satellites, modulation and multiplexing, multiple access, earth stations, coding, interference and special problems in satellite communications. (Cross-listed with ECEN 475)

Prerequisite(s): ECEN 325

ECEN 876 WIRELESS COMMUNICATIONS (3 credits)

The fundamental concepts of wireless communications. Basic communications concepts such as multiple access, and spectrum. Propagation, radio, standards, and internetworking. Current issues in wireless communications. (Cross-listed with ECEN 476)

Prerequisite(s): ECEN 325 or ECEN 462 prior to or concurrent

ECEN 877 DIGITAL SYSTEMS ORGANIZATION AND DESIGN (3 credits)

Hardware development languages, hardware organization and realization, microprogramming, interrupt, intersystem communication, and peripheral interfacing. (Cross-listed with ECEN 477)

Prerequisite(s): ECEN 475 or ECEN 874. Not open to non-degree graduate students.

ECEN 879 OPTICAL FIBER COMMUNICATIONS (4 credits)

Fundamentals of lightwave communication in optical fiber waveguides, physical description of fiber optic systems. Properties of the optical fiber and fiber components. Electro-optic devices: light sources and modulators, detectors and amplifiers; optical transmitter and receiver systems. Fiber optic link design and specification; fiber optic networks. (Cross-listed with ECEN 479)

Prerequisite(s): ECEN 463.

ECEN 880 INTRODUCTION TO LASERS AND LASER APPLICATIONS (3 credits)

Physics of electronic transition production stimulated emission of radiation. Threshold conditions for laser oscillation. Types of lasers and their applications in engineering. (Cross-listed with ECEN 480)

Prerequisite(s): PHYS 2130.

ECEN 882 ANTENNAS AND RADIO PROPAGATION FOR WIRELESS COMMUNICATIONS (4 credits)

Fundamental theory of antennas and radio propagation for wireless communications. Basic antenna characteristics and various antennas and antenna arrays. Basic propagation mechanisms and various channel models, such as Friis free space model, Hata model, lognormal distribution, and multipath model. Includes practical antenna design for high radio frequency (RF) with modeling software tools such as Numerical Electromagnetic Code (NEC) and ADvanced Design System (ADS). Design projects will be assigned as the main part of course. (Cross-listed with ECEN 482)

Prerequisite(s): ECEN 328

ECEN 883 RANDOM PROCESSES IN ENGINEERING (3 credits)

Topics related to the concept of random variables, functions of random variables and random processes.

Prerequisite(s): STAT 3800

ECEN 884 NETWORK SECURITY (4 credits)

Network security and cryptographic protocols. Classical encryption techniques, block ciphers and stream ciphers, public-key cryptography, authentications digital signatures, key management and distributions, network vulnerabilities, transport-level security, IP security. (Cross-listed with ECEN 484)

ECEN 885 SPREAD SPECTRUM COMMUNICATIONS (3 credits)

Introduction to the theory of spread spectrum communications: direct sequence, frequency and time hopping techniques. Topics include properties of pseudo-random binary sequences, low-probability-of-intercept (LPI) and anti-jamming (AJ) methods, performance of spread spectrum systems, applications of spread spectrum techniques in radio frequency and optical code-division multiple access (CDMA) systems.

Prerequisite(s): ECEN 463 or ECEN 861 or permission.

ECEN 886 APPLIED PHOTONICS (3 credits)

Introduction to the use of electromagnetic radiation for performing optical measurements in engineering applications. Basic electromagnetic theory and light interaction with matter are covered with corresponding laboratory experiments conducted. (Cross-listed with ECEN 486)

Prerequisite(s): ECEN 306 or permission. Not open to non-degree graduate students.

ECEN 888 WIRELESS SECURITY (4 credits)

A comprehensive overview on the recent advances in wireless network and system security. Covers security issues and solutions in emerging wireless access networks and systems as well as multihop wireless networks. (Cross-listed with ECEN 488)

Prerequisite(s): ECEN 325

ECEN 891 SPECIAL TOPICS IN ELECTRIC AND COMPUTER ENGINEERING IV (1-4 credits)

Special topics in the emerging areas of electrical, computer and electronics engineering which may not be covered in the other courses in the electrical, and computer engineering curriculum. (Cross-listed with ECEN 491)

ECEN 892 INDIVIDUAL STUDY IN ELECTRICAL AND COMPUTER ENGINEERING IV (1-3 credits)

Individual study in a selected electrical, computer or electronics engineering area under the supervision and guidance of a Electrical and Computer Engineering faculty member. (Cross-listed with ECEN 492).

ECEN 893 INDEPENDENT STUDY IN COMPUTER AND ELECTRONICS ENGINEERING (1-3 credits)

Individual study at the graduate level in a selected computer or electronics engineering area under the supervision and guidance of a Computer and Electronics Engineering faculty member.

Prerequisite(s): Departmentally approved proposal.

ECEN 895 SPECIAL TOPICS (1-3 credits)

Special topics in the newly emerging areas of computer and electronics engineering not covered in the other courses in the computer and electronics engineering curriculum.

ECEN 898 SPECIAL TOPICS IN ELECTRICAL ENGINEERING IV (1-6 credits)

Offered as the need arises to meet electrical engineering topics for fourth-year and graduate students not covered in other courses. (Cross-listed with ECEN 498)

ECEN 899 MASTERS THESIS (1-10 credits)

Masters thesis work.

Prerequisite(s): Admission to masters degree program and permission of supervisory committee chair. Not open to non-degree graduate students.

ECEN 911 COMMUNICATION THEORY (3 credits)

Applications of probability and statistics to signals and noise; correlation; sampling; shot noise; spectral analysis; Gaussian processes; filtering.

Prerequisite(s): ECEN 862, and ECEN 864 or ECEN 810.

ECEN 912 ERROR CONTROL CODING (3 credits)

Fundamentals of error correction and detection in digital communication and storage systems. Linear and algebraic block codes; Hamming, BCH and Reed Solomon codes; algebraic decoding techniques; structure and performance of convolutional codes, turbo codes, and trellis coded modulation; MAP, Viterbi, and sequential decoding techniques.

Prerequisite(s): ECEN 410 or ECEN 810, and ECEN 464 or ECEN 864, or Permission.

ECEN 913 ADVANCED ANALOG AND MIXED-SIGNAL INTEGRATED CIRCUITS (3 credits)

Advanced current mirrors and op-amps. Comparators and sample/hold (S/H) circuits. Band-gap reference circuits. Trans-linear circuits and analog multipliers. Voltage controlled oscillators. Operational trans-conductance amplifiers (OTA's). Switched capacitor circuits. Data converters. Non-linearity, mismatch, and short-channel effects. Continuous time domain integrated filters. Current conveyors. Phase locked loops. Analog CAD.

Prerequisite(s): ECEN 869 and permission. Not open to non-degree graduate students.

ECEN 915 ADAPTIVE SIGNAL PROCESSING (3 credits)

Adaptive filtering algorithms, frequency and transform domain adaptive filters, and simulation and critical evaluation of adaptive signal processing for real world applications.

Prerequisite(s): ECEN 410 or ECEN 810, ECEN 463 or ECEN 863, and permission. Not open to non-degree graduate students.

ECEN 926 STATISTICAL SIGNAL PROCESSING FOR WIRELESS COMMUNICATION (3 credits)

Statistical signal processing and applications for wireless communications covering the characteristics of random signals, optimum linear filters, statistical parameter estimation using maximum likelihood (ML) and minimum mean-square error (MMSE) methods, adaptive signal processing using least-mean-square (LMS) and recursive least-square (RLS) approaches, Kalman filtering, and eigenanalysis algorithms. Applications of the statistical signal processing techniques in wireless communications will be explored.

Prerequisite(s): ECEN 424 or ECEN 824, ECEN 476 or ECEN 876, and ECEN 883. Not open to non-degree graduate students.

ECEN 932 ADVANCED POWER ELECTRONICS AND APPLICATIONS (3 credits)

Analysis and design of power electronic circuits and their applications, including: snubber circuits, resonant converters and soft switching techniques, pulse-width modulation techniques, control of power electronic circuits, power electronics and control for electric machines and wind energy systems, flexible AC-transmission system (FACTS) devices, and high-voltage DC (HVDC) transmission.

Prerequisite(s): ECEN 436 or ECEN 836, ECEN 428 or ECEN 828.

ECEN 935 COMPUTATIONAL INTELLIGENCE (3 credits)

Computational intelligence paradigms and their applications, including: artificial neural networks, fuzzy logic systems, swarm intelligence, evolutionary computation (e.g. genetic algorithms), machine learning (e.g., supervised learning, unsupervised learning, and reinforcement learning), neurocontrol and adaptive critic designs, and applications of computational intelligence for system identification, state estimation, time series prediction, signal processing, adaptive control, optimization, diagnostics, prognostics, etc.

Prerequisite(s): MATH 1970, MATH 2350 and MATH 2050. Good skills using MATLAB. Not open to non-degree graduate students.

ECEN 946 OPTIMAL FILTERING ESTIMATION AND PREDICTION (3 credits)

Techniques for optimally extracting information about the past, present, or future status of a dynamic system from noise-corrupted measurements on that system.

Prerequisite(s): ECEN 810 or permission. Not open to non-degree graduate students.

ECEN 957 ADVANCED COMPUTER METHODS IN POWER SYSTEM ANALYSIS (3 credits)

Power System matrices, sparsity techniques, network equivalents, contingency analysis, power flow optimization, state estimation, and power system restructuring examined via computer methods.

Prerequisite(s): ECEN 806. Not open to non-degree graduate students.

ECEN 959 WIRELESS COMMUNICATIONS (3 credits)

Principles of wireless communications, including: description of the wireless channel characteristics; ultimate performance limits of wireless systems; performance analysis of digital modulation techniques over wireless channels; diversity techniques; adaptive modulation; multiple-antenna communications; multi-carrier modulation; and multi-user wireless communications.

Prerequisite(s): ECEN 864 and permission. Not open to non-degree graduate students.

ECEN 960 SOLID STATE DEVICES (3 credits)

Gallium arsenide and silicon devices. Device properties based on structure and physical properties of the materials.

Prerequisite(s): ECEN 315, not open to non-degree graduate students.

ECEN 965 PASSIVE MICROWAVE COMPONENTS (3 credits)

Application of Maxwell's Equations to the analysis of waveguides, resonant cavities, filters and other passive microwave devices.

Prerequisite(s): ECEN 867 or ECEN 868. Not open to non-degree graduate students.

ECEN 967 INTRODUCTION TO QUANTUM ELECTRONICS (3 credits)

Introduction to the quantum aspects of electron devices.

Prerequisite(s): Not open to non-degree graduate students.

ECEN 971 SEMINAR (1-12 credits)

Selected topics.

Prerequisite(s): Permission. Not open to non-degree graduate students.

ECEN 975 OPTICAL PROPERTIES OF MATERIALS (3 credits)

Quantum mechanical description of the optical properties of solids (complex refractive index and its dispersion, effects of electric and magnetic fields, temperature, stress; additional special topics as desired).

Prerequisite(s): ECEN 967 or permission. Not open to non-degree graduate students.

ECEN 977 SPACE-TIME WIRELESS COMMUNICATIONS (3 credits)

Theory of space-time (ST) wireless communication systems. Emphasis will be placed on spatial diversity, smart antenna systems, MIMO capacity of multi-antenna fading channels, space-time signaling, space-time receivers and interference mitigation. Includes overview of more advanced topics such as MIMO-OFDM and current trends in research and industry.

Prerequisite(s): ECEN 461, ECEN 463, ECEN 476.

ECEN 979 NON-LINEAR FIBER OPTIC SYSTEMS (3 credits)

Linear and non-linear propagations in optical fibers. Topics include fiber non-linearity, fundamentals of optical amplifiers, semiconductor and fiber amplifiers, soliton communications. Applications include high capacity and long distance transmissions, all-optical networks.

Prerequisite(s): ECEN 479 or ECEN 879 or permission.

ECEN 986 OPTOELECTRONICS (3 credits)

Modern phenomena associated with optoelectronics. Electro-optical effect such as Pockel effect, Kerr effect, and nonlinear optical phenomena. Material and devices used in modern communications, femtosecond lasers, and optical computer systems.

Prerequisite(s): ECEN 886. Not open to non-degree graduate students.

ECEN 991 INDEPENDENT STUDY (1-24 credits)

Selected topic under the direction and guidance of a faculty member.

Prerequisite(s): Permission. Not open to non-degree graduate students.

ECEN 992 RESEARCH OTHER THAN THESIS (1-6 credits)

Supervised non-thesis research and independent study.

Prerequisite(s): Permission and graduate standing.

ECEN 996 TOPICS IN ELECTRICAL ENGINEERING (3 credits)

Selected topics in electrical engineering.

Prerequisite(s): Permission. Not open to non-degree graduate students.

ECEN 998 ADVANCED SPECIAL TOPICS (1-3 credits)

Advanced topics in computer and electronics engineering not covered in other 9000 level courses.

Prerequisite(s): Permission.

ECEN 999 DOCTORAL DISSERTATION (1-24 credits)

Dissertation research.

Prerequisite(s): Admission to doctoral degree program and permission of supervisory committee chair. Not open to non-degree graduate students.

ECEN 8226 INTRODUCTION TO PHYSICS AND CHEMISTRY OF SOLIDS (3 credits)

Introduction to structural, thermal, electrical, and magnetic properties of solids, based on concepts of atomic structure, chemical bonding in molecules, and electron states in solid state devices. (Cross-listed with ECEN 4220).

Prerequisite(s): Not open to non-degree graduate students.

Emergency Management (EMGT)

Emergency Management Graduate Courses

EMGT 8060 PLANNING, PREPAREDNESS, AND MITIGATION (3 credits)

This course addresses the pre-disaster phases of Emergency Management, including planning, preparedness, and mitigation. The class covers the National Response Framework (NRF) and the National Incident Management System (NIMS) and their influence on modern community Emergency Management and Homeland Security. EMGT 8060 is intended to prepare students for the various tangible and intangible considerations EMGT professionals face when planning and preparing for disasters, either natural or man-made. (Cross-listed with PA 8160).

Prerequisite(s): Students must have completed or be concurrently taking the beginning core of the MPA curriculum.

EMGT 8430 RESPONSE, RECOVERY & RESILIENCE (3 credits)

This course addresses the post-impact/disaster phases of Emergency Management, including response, recovery, and resiliency. The class focuses on disasters declarations and assistance, interagency cooperation, unified and incident command, operational application of the National Incident Management System (NIMS), and the political, legal, social, and economic considerations inherent with responding to and recovering from emergencies. (Cross-listed with PA 8430).

Prerequisite(s): Students must have completed or be concurrently taking the beginning core of the MPA curriculum.

EMGT 8600 CONTEMPORARY ISSUES IN EMERGENCY MANAGEMENT (3 credits)

This course exposes the student to contemporary issues in Emergency Management including how to conduct exercise design, development, and evaluation. What different factors affect administration of emergency management services and what actions are required for planning, preparedness, mitigation, response, and recovery strategies when dealing with Natural Disasters, Medical Pandemics and Outbreaks, and Terrorism/Para Military Events that threaten the United States. (Cross-listed with PA 8610).

Prerequisite(s): Students must have completed or be concurrently taking the beginning core of the MPA curriculum.

Engineering (ENGR)

Engineering Graduate Courses

ENGR 807 PROJECT MANAGEMENT (3 credits)

Project development, role of the project manager, project selection, project planning, budgeting and cost estimation, project scheduling, and project termination.

ENGR 810 ERGONOMICS (3 credits)

Introduction to the principles of ergonomics. Information processing, human output and control, workplace design and environmental conditions. Not open to students with credit in ISMG 3150.

ENGR 815 COGNITIVE ERGONOMICS (3 credits)

Human factors affecting work. Focus on humans: energy requirements, lighting, noise, monotony and fatigue, learning, simulations versus sequential tasks. Experimental evaluation of concepts.

ENGR 816 PHYSICAL ERGONOMICS (3 credits)

Human performance in work. Human response to various environmental and task-related variables with emphasis on physical and physiological effects.

ENGR 817 OCCUPATIONAL SAFETY HYGIENE ENGINEERING (3 credits)

Introduction to occupational hygiene engineering with emphasis on workplace environmental quality. Heat, illumination, noise, and ventilation.

Prerequisite(s): Senior standing or permission.

ENGR 823 RELIABILITY ENGINEERING (3 credits)

System and component reliability analyses of series, parallel and complex systems. Concepts of reliability, availability, and maintainability in design of systems. Methods of reliability testing and estimation.

ENGR 830 APPLIED STATISTICS AND QUALITY CONTROL (3 credits)

Systematic analysis of processes through the use of statistical analysis, methods, and procedures; statistical process control, sampling, regression, ANOVA, quality control, and design of experiments. Use of software for performing a statistical analysis.

Prerequisite(s): MECH 321.

ENGR 831 STOCHASTIC PROCESSES (3 credits)

Fundamentals of stochastic processes and their application in modeling production/inventory control, maintenance and manufacturing systems. Markov and semi-Markov chains, Poisson processes, renewal processes, regenerative processes and Markov decision processes.

ENGR 833 EVIDENCE-BASED STEM TEACHING STRATEGIES (3 credits)

This learning experience is designed to provide graduate level training on teaching at the postsecondary level. Evidence-based teaching methods applicable to Science, Technology, Engineering, and Mathematics (STEM) will be investigated and a learner-based pedagogy will be used to engage those in the course to experience STEM practices. The common element of problem solving is emphasized across all STEM disciplines allowing for discovery, exploration, and application of critical thinking skills.

Primary tasks include developing a unit on Canvas that includes learning outcomes, lecture and activities, and assessments, a teaching philosophy, and engaging with technologies that support and enhance teaching and learning.

ENGR 840 DISCRETE EVENT SIMULATION MODELING (3 credits)

Development of simulation models of discrete systems. Model development, Monte Carlo techniques, random number generators, and output analysis.

Prerequisite(s): CONE 206; MECH 321 and CIST 1400 or CSCI 1620 or CSCI 2240 or permission

ENGR 860 PACKAGING ENGINEERING (3 credits)

Investigation of packaging processes, materials, equipment and design. Container design, material handling, storage, packing and environmental regulations, and material selection.

Prerequisite(s): CONE 206, MECH 321, MECH 373

ENGR 861 RFID SYSTEMS IN THE SUPPLY CHAIN (3 credits)

Foundations of Radio Frequency Identification Systems (RFID). The fundamentals of how RFID components of tag, transponder, and antennae are utilized to create RFID systems. Best practices for implementation of RFID systems in common supply operations.

ENGR 869 TECHNOLOGY, SCIENCE AND CIVILIZATION (3 credits)

(Lect 2 Dis. 2) This course studies the development of technology as a trigger of change upon humankind, from the earliest tools of Homo Habilis to the advent of the radio telescope in exploring the creation of the universe. The course traces the paths from early science to development of the sciences and technologies that will dominate the new millennium. (869 is for non SET students.) (Cross-listed with ENGR 469).

Prerequisite(s): Senior or permission. (ENGR 869 is for non-SET students.)

ENGR 881 SUPPLY CHAIN OPTIMIZATION (3 credits)

Foundations of supply chain network modeling. The concepts that support the economic and service trade-offs in supply chain and logistics management. Using decision support system (DSS) to design optimal logistics network models given data requirements and operational parameters. Using leading software packages to model problems arising in strategic management of logistics networks.

ENGR 882 MATERIAL PLAN IN LOGISTIC SYSTEMS (3 credits)

Theory, practice and application of inventory, demand and supply planning techniques in multistage environments. Managing economies of scale, uncertainties, capacity constraints, and product availability in a supply chain. Integrated planning, supply chain coordination and technology enablers.

Prerequisite(s): MECH 321

ENGR 883 LOGISTICS IN THE SUPPLY CHAIN (3 credits)

The process of planning, implementing and controlling the efficient, effective flow and storage of goods, services and related information from the point of origin to the point of consumption. Domestic transportation systems, distribution centers and warehousing, international logistics, logistic system controls, and reengineering logistics systems.

ENGR 891 SPECIAL TOPICS IN ENGINEERING (1-6 credits)

Subject matter in emerging areas of engineering and closely related areas not covered in other courses within the College of Engineering graduate programs. Topics, activities, and delivery methods vary.

ENGR 901 TOTAL QUALITY MANAGEMENT USING SIX SIGMA TECHNIQUES (3 credits)

Introduction to advanced topics in Engineering Management and the foundations of Total Quality Management (TQM). Costs of quality, statistical tools, initiating change, advanced topics, and TQM in practice. Using DMAIC, DFSS, and CQPQ along with the other industry accepted Six Sigma Quality Techniques.

ENGR 905 ANALYSIS OF ENGINEERING MANAGEMENT (3 credits)

Continuation of concepts and principles of engineering management applied to production cases.

ENGR 906 FINANCIAL ENGINEERING (3 credits)

Applications of principle and financial economics in industrial and systems engineering. Term structure of interest, capital asset pricing and other capital allocation modes. Evaluation of real-options using binomial lattice, Black Scholes and other pricing models.

ENGR 919 DETERMINANTS OF OCCUPATIONAL PERFORMANCE (3 credits)

Focus on the individual in the industrial working environment. Emphasis on evaluation of fatigue, training, shift work, perception, vigilance, and work rest scheduling as they relate to the working environment.

Prerequisite(s): Permission.

Engineering Mechanics (EMEC)

Engineering Mechanics Graduate Courses

EMEC 8616 SP TOP IN ENG MECHANICS (1-6 credits)

Treatment of special topics in engineering mechanics by experimental, computation and/or theoretical methods. Topics will vary from semester to semester. See current schedule of classes for offerings.

EMEC 9610 ADV INV IN ENG MECH (1-12 credits)

English (ENGL)

English Graduate Courses

ENGL 8010 SEMINAR: TEXT-BASED RESEARCH METHODS FOR ENGLISH STUDIES (3 credits)

An overview of the theories, methods and practices for conducting text-based research in English and related disciplines; graduate students gain experience conducting textual analysis and interpretation using relevant theories and methods, and reporting findings.

Prerequisite(s): Admission to the graduate program in English or permission of instructor.

ENGL 8020 SEMINAR: COLLEGE WRITING INSTRUCTION (5 credits)

The seminar in college writing instruction prepares Graduate Teaching Assistants to fulfill their responsibilities as teachers of first-year composition.

Prerequisite(s): Graduate status and a teaching assistantship. Not open to non-degree graduate students.

ENGL 8026 AMERICAN POETRY TO 1900 (3 credits)

A comprehensive survey of the American poetic tradition from the 17th to the end of the 19th century. (Cross-listed with ENGL 4020).

Prerequisite(s): Graduate standing; ENGL 8010 or ENGL 8030 recommended.

ENGL 8030 FIELD-BASED RESEARCH METHODS IN ENGLISH STUDIES (3 credits)

An overview of resources and methods for conducting qualitative, field-based research in English and related disciplines; students gain experience collecting data and analyzing data and reporting findings.

Prerequisite(s): Admission to the graduate program in English or permission of instructor. Not open to non-degree graduate students.

ENGL 8036 AMERICAN POETRY SINCE 1900 (3 credits)

A survey of the American poetic tradition from the turn of the twentieth-century to the present, focusing on various "schools" such as Imagism, High Modernism, the Harlem Renaissance, Confessional, Beats, and New Formalism. (Cross-listed with ENGL 4030).

Prerequisite(s): Graduate Standing; ENGL 8010 or ENGL 8030 recommended

ENGL 8040 WRITING FOR PUBLICATION (3 credits)

In this seminar, students will study and practice methods for transforming their scholarly research and/or creative nonfiction into publishable articles and essays, as well as conference papers and other modes of sharing that work publicly. Students will edit and revise previously drafted work with the guidance of instructor feedback, advice from faculty mentors in their fields, and peer review. They will also research the larger structures and expectations of professional publishing in their fields.

Prerequisite(s): Graduate standing and instructor permission.

ENGL 8066 THE AMERICAN NOVEL (3 credits)

A comprehensive survey of the evolution of the American Novel from the 1780s to the present day. Special emphasis will be placed on how a broad range of authors have responded to changing cultural and historical circumstances, and on how they have expressed widely varying viewpoints depending on their own gender, race, geographic region, and/or ethnicity. (Cross-listed with ENGL 4060).

Prerequisite(s): Graduate standing in English

ENGL 8070 SEMINAR: WALT WHITMAN AND EMILY DICKINSON (3 credits)

A comprehensive examination of the poetry of Walt Whitman and Emily Dickinson.

Prerequisite(s): Graduate Program admission. ENGL 8010 or ENGL 8030 recommended.

ENGL 8100 SEMINAR: TOPICS IN AMERICAN LITERATURE (3 credits)

This course involves the investigation of a particular topic (genre, author or group of authors, time period, subject area) in American literature. (The course may be repeated for additional credits under different topics.) Formerly ENGL 8060.

Prerequisite(s): Graduate standing; ENGL 8010 or 8030 recommended

ENGL 8146 AMERICAN LITERARY REALISM AND NATURALISM (3 credits)

In the late nineteenth and early twentieth century two major literary genres - Realism and Naturalism - emerged in the United States not only to challenge the primacy of Romanticism and its generally optimistic view of life but also to actively engage with the modern America created after the Civil War. This course examines a wide range of realist and naturalist works, written between 1865 and 1914, by an extremely diverse group of male and female authors from different races, ethnicities, regions, religions, and socioeconomic classes. Emphasis will be placed on how various cultural, economic, political, and social factors influenced the construction and reception of these works. (Cross-listed with ENGL 4140).

Prerequisite(s): Graduate standing in English

ENGL 8160 SEMINAR: POSTMODERN FICTION OF THE UNITED STATES (3 credits)

A seminar in American Fiction from the second half of the twentieth century into the twenty-first century which presents and discusses some of the major trends and issues associated with postmodern culture in America.

ENGL 8166 TOPICS IN AMERICAN REGIONALISM (3 credits)

A study of major topics in American literary regionalism, with special emphasis on particular social, cultural, and geographical contexts. Focus will be determined by instructor, but may include particular historical periods, geographic regions, authors, or literary themes. (Cross-listed with ENGL 4160).

Prerequisite(s): Graduate standing in English

ENGL 8190 BOOK-SMART: EDUCATION IN LITERATURES AND CULTURES (3 credits)

The purpose of this course is to enable a critical consideration of how education is tied inextricably to issues of class, gender, religion, culture, and politics as well as an examination of how literature responds to and represents the theme of education, often also powerfully making the case for outsiders excluded by systems of privilege.

ENGL 8196 THE AMERICAN NIGHTMARE (3 credits)

The literature in this course represents and explores major trends that subvert America's fascination with the "American Dream" narrative and even contend its opposite, an "American Nightmare." Over the twentieth century, many writers expressed a disillusionment with the breach that separates experiences in America from the "America" idealized by narratives of the founding roots and the constructed American Dream. Writers who have experienced or witnessed the marginalization or helplessness of large portions of the American population write in a variety of ways about the failures of this American Dream narrative. This course will analyze these expressions in American literature. (Cross-listed with ENGL 4190).

Prerequisite(s): ENGL 1160 or permission.

ENGL 8216 THE HARLEM RENAISSANCE (3 credits)

"The Harlem Renaissance" was the name given to the explosion in cultural, artistic, and social awareness that occurred primarily in Harlem, an area of New York City, between the end of World War I and the middle of the 1930s. This course will familiarize students with the general characteristics of African American literature produced during this period and its relation to African American literature and American literature writ large. The selected texts and writers will provide particular insight into the historical experiences of African Americans in the U.S. primarily between the two world wars and inform the subsequent cultural production of African Americans in later years. (Cross-listed with ENGL 4210, BLST 4210, BLST 8216).

Prerequisite(s): Graduate standing in English

ENGL 8236 LATINO LITERATURE (3 credits)

A study of representative works of Mexican-American, Spanish-American, and American writers, along with their cultural and historical antecedents. Formerly ENGL 4180/8186 Chicano Literature and Culture. (Cross-listed with ENGL 4230).

Prerequisite(s): Graduate program admission

ENGL 8246 TEACHING LATINO LITERATURE (3 credits)

This course is designed specifically for current or future teachers of high school students. It introduces pedagogical approaches of contemporary literature by Latinos/as in the United States. The course provides an overview of Mexican American, Chicano/a, and other Latino/a voices in American literature from mid-19th Century to the present and complement that with social, cultural, historical and other approaches to developing teaching strategies. (Cross-listed with ENGL 4240)

ENGL 8256 WOMEN'S STUDIES IN LITERATURE (3 credits)

A critical study of literature by and/or about women in which students learn about contributions of women to literature, ask what literature reveals about the identity and roles of women in various contexts, and evaluates standard interpretations from the perspectives of current research and individual experience. (Cross-listed with ENGL 4250, WGST 4250).

ENGL 8266 WOMEN OF COLOR WRITERS (3 credits)

Women of Color Writers is designed to introduce students to the multicultural, literary experience and contributions of women of color writers. The course will elucidate the multi-ethnic and feminist/womanist perspectives reflected in literary works by examining the themes, motifs and idioms about a womanist perspective. The course examines critically the implications and conceptual grounds of literary study which have been based almost entirely on white, male literary experiences and criteria. (Cross-listed with ENGL 4260).

Prerequisite(s): Graduate English major or permission of instructor for 8266

ENGL 8276 WOMEN WRITERS OF THE NORTH AMERICAN WEST (3 credits)

A survey of U.S. and Canadian women writers (18th century to the present) enabling students to examine issues of gender and sexuality across a wide thematic range, including settlement, land use, cultural displacement, and survival in western territories, states, and provinces of North America. (Cross-listed with ENGL 4270, WGST 4270).

Prerequisite(s): Graduate standing; ENGL 8010 or ENGL 8030 recommended.

ENGL 8286 QUEER AMERICAN WESTS (3 credits)

A survey of queer literatures about the American West. The course will explore a variety of genres, including poetry, short stories, plays, novels, creative nonfiction, and, depending on time, film/television. "Queer" will be construed as including any "non-normative" sexualities and sexual identities (e.g., genderqueer, winkle, two-spirit, 3rd/4th gender). Non-western writers (e.g., Walt Whitman) imagining the West queerly may also be included. (Cross-listed with ENGL 4280, WGST 3160).

Prerequisite(s): ENGL 8010 or ENGL 8030 recommended

ENGL 8300 SEMINAR: SHAKESPEARE (3 credits)

A study of Shakespeare's plays and poetry, in historical and modern contexts.

Prerequisite(s): ENGL 8010 recommended.

ENGL 8306 ANGLO-SAXON LITERATURE (3 credits)

From the sixth to the eleventh centuries, a people known collectively as the Anglo-Saxons ruled Britain, giving it a new name and establishing the roots of the modern English language. Anglo-Saxon culture continues to haunt the modern imagination. We study the historic, artistic and intellectual environment that produced this influential literary tradition. We also place these people, their language, and their writings within the context of the broader early medieval world. Finally, we engage with some of the foremost modern scholars of this fascinating culture. (Cross-listed with ENGL 4300).

Prerequisite(s): Graduate standing.

ENGL 8310 ECOLOGICAL WRITING AND ANALYSIS (3 credits)

This course provides students with the opportunity to develop expertise in a wide range of foundational works and key techniques of ecological writing and theory in English. By engaging mindfully with these works and techniques, students will develop advanced skills in ecologically oriented critical analysis and creative thinking. This course supports the Writing and Critical Reflection and the Health and the Environment concentrations in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8310)

ENGL 8326 CHAUCER (3 credits)

A literary, linguistic, and historical study of the works of Geoffrey Chaucer: his dream visions, Troilus and Criseyde, and the Canterbury Tales. (Cross-listed with ENGL 4320).

ENGL 8336 RENAISSANCE SATIRE (3 credits)

Satirical traditions and the literature of critique and invective as inherited from medieval and classical forms. Considerations will include satire as an aesthetic, philosophical, and political mode of expression; topicality as it relates to and portrays cultural history; and self-representation through humanist learning and response. (Cross-listed with ENGL 4330).

Prerequisite(s): Graduate standing

ENGL 8346 SHAKESPEARE (3 credits)

A critical study of selected plays and poetry from Shakespeare's works, in the context of the historical and cultural moment of the English Renaissance and as a set of texts inherited and reinvented by modernity. (Cross-listed with ENGL 4340).

Prerequisite(s): ENGL 1160

ENGL 8376 RESTORATION AND EIGHTEENTH CENTURY LITERATURE (3 credits)

Poetry, prose (exclusive of the novel), and drama of England in the Restoration and 18th century (1660-1800), with emphasis on Swift and Johnson. Formerly ENGL 4620/8626. (Cross-listed with ENGL 4370).

ENGL 8396 MEDIEVAL CELTIC LITERATURE (3 credits)

This course examines the literature and culture of the Celtic civilizations. The course examines the archeological record and texts about the Celts by Greek and Roman authors, as well as later medieval tales from the Irish, Welsh, and Breton traditions. All texts are in translation with guided reference to the original languages. (Cross-listed with ENGL 4390).

Prerequisite(s): ENGL 2410 or ENGL 2420 and one ENGL course above 3299, or instructor permission; ENGL 2310 recommended. Not open to non-degree graduate students.

ENGL 8400 SEMINAR: ENGLISH RENAISSANCE (3 credits)

A seminar in a few significant literary figures of the English Renaissance. Formerly ENGL 8080.

ENGL 8406 KING ARTHUR THROUGH THE AGES (3 credits)

Starting with post-medieval selections from the Arthurian corpus, this course follows Arthur back through his many literary incarnations, until we reach the "historical" Arthur (c.1000). We consider the different aesthetic additions, subtractions, and changes made to this secular king of kings within the social and historical contexts of each reincarnation. We also examine Arthur in other media, such as film, with divergent artistic agendas. These other media, too, will be considered within their social and historical contexts in terms of what they have to say about what modern audiences look for in their versions of Arthur and the stories from the Arthurian corpus. All texts are in translation, with guided reference to the original languages. (Cross-listed with ENGL 4400).

ENGL 8410 IMMIGRATION, MIGRATION, AND DIASPORA: CRITICAL APPROACHES AND THEORIES OF MOVEMENT IN LITERATURE (3 credits)

This seminar in literature and some film analyzes the depictions in non-fiction and fiction of displacement as a result of immigration, migration, refugee status, or any other considered movement, intentional or imposed. It will focus largely on the U.S. experiences of those displaced from all locales. (Cross-listed with CACT 8410).

Prerequisite(s): Graduate standing.

ENGL 8416 LITERATURE OF THE ROMANTIC PERIOD (3 credits)

This course surveys literary works published in the Romantic period (roughly, 1789-1832), focusing specifically on those by British, Irish, and Anglophone authors. It considers what these works signify about literary as well as cultural, political, and historical events, movements, or trends. (Cross-listed with ENGL 4410).

ENGL 8426 NINETEENTH-CENTURY ENGLISH AND ANGLOPHONE LITERATURES (3 credits)

English and Anglophone poetry and prose (excluding the novel) in the nineteenth century. (Cross-listed with ENGL 4420).

Prerequisite(s): Graduate standing

ENGL 8436 THE BRITISH AND ANGLOPHONE NOVEL (19TH AND 20TH CENTURY) (3 credits)

Introduction to the British and Anglophone novel in the nineteenth and twentieth century. (Cross-listed with ENGL 4430).

Prerequisite(s): Graduate standing

ENGL 8446 BRAM STOKER: BEYOND DRACULA (3 credits)

This course examines several major works from Stoker's literary oeuvre: *The Snake's Pass* (1890), *Dracula* (1897), *The Jewel of Seven Stars* (1903), *The Lady of the Shroud* (1909), and *The Lair of the White Worm* (1911) and selected short stories. Stoker is one of the more complex figures among the Anglo-Irish literary tradition, so the author and his writing is placed within the social and cultural contexts of late 19th and early 20th century Ireland and England, as well as within broader literary theoretical frameworks - psychoanalytic, gender, and postcolonial criticism among them - for which Stoker's tales continue to provide such rich fodder. (Cross-listed with ENGL 4440).

ENGL 8456 MODERN IRISH DRAMA (3 credits)

A survey of the major movements and significant figures associated with Irish drama from the mid-nineteenth to the twenty-first centuries, with special attention to the socio-cultural and historical contexts in Ireland. (Cross-listed with ENGL 4450).

Prerequisite(s): ENGL 1160 required; ENGL 2410 or ENGL 2420 recommended

ENGL 8496 GREAT WORKS OF BRITISH LITERATURE (3 credits)

This course pursues a trans-historical approach to literary study while interrogating what makes a literary work "great" within the field of British Literature. It allows students to engage with great works of British literature from across the ages - starting with the foundations of British literary history in the medieval period and extending to the present. Attending to formal, thematic, and historical dimensions of a wide array of literary texts, we will increase our appreciation of the many ways texts make meaning while developing a deep understanding of the British literary tradition. Reading literature with a sense of purpose and comparatively across time will allow us not only to appreciate great works but also to enhance the impact they have on us. Furthermore, we will recognize how culture and politics inform what literary works become deemed "great," thereby developing a critical understanding of the process of canon formation. (Cross-listed with ENGL 4490).

Prerequisite(s): Graduate standing in English

ENGL 8610 PROFESSIONAL AND TECHNICAL WRITING (3 credits)

This course will introduce students to the theory, research, and practices of professional and technical writing. Through readings, discussions, and assignments, students will gain an understanding of the types and circumstances of communication challenges encountered in the workplace. The course will also consider the roles of persuasion and ethics in written communication. (Cross-listed with CACT 8610).

ENGL 8615 INTRODUCTION TO LINGUISTICS (3 credits)

An introduction to the concepts and methodology of the scientific study of language; includes language description, history, theory, variation, and semantics as well as first and second language acquisition. (Cross-listed with ENGL 3610).

ENGL 8626 HISTORY OF ENGLISH (3 credits)

A critical study of both the internal and external histories of English. Includes historical development of English phonology, morphology, graphics, syntax, diction, dialects, and semantics. (Cross-listed with ENGL 4620).

ENGL 8630 DIGITAL RHETORIC (3 credits)

This course provides students with the opportunity to develop expertise in the theory and practice of digital rhetoric by considering technology's deep impact on how we define and engage in writing. Students examine contemporary writing practices as part of a rich rhetorical tradition while they design and create effective multimodal compositions and analyze foundational works in digital rhetoric. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8630).

ENGL 8640 CREATIVE NONFICTION IN DIGITAL ENVIRONMENTS (3 credits)

Students in this course will study creative nonfiction in digital environments, analyze rhetorical situations created in digital environments, which might include, in addition to other modalities, sounds, animations, and hypertext, and create multimodal essays. The course will also focus on the study and analysis of craft-elements of creative nonfiction: narrative persona, tone, rhythm and style, scenic construction, among others. Students taking this course will learn to read with interpretative and analytical proficiency a broad range of creative nonfiction in digital environments. (Cross-listed with CACT 8640).

ENGL 8646 APPLIED LINGUISTICS (3 credits)

This course is designed to develop knowledge and skills for second language instructors and others interested in second language learning and instruction. Content covers relevant second language acquisition (SLA) theory and second language pedagogy. (Cross-listed with ENGL 4640)

Prerequisite(s): ENGL 3610 and Junior standing or with permission from instructor.

ENGL 8650 WRITING ACROSS DIFFERENCES: RHETORICAL THEORY FOR PERSUASION AND PUBLIC ADVOCACY (3 credits)

This course provides students a theoretical foundation for understanding how language is used in various types of discourses and texts as a means of convincing others of a given viewpoint or idea. Students will apply this theory to real-world writing scenarios in their scholarly areas of interest, to advocacy and social issues movements, or to address workplace needs and goals. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8650).

ENGL 8656 STRUCTURE OF ENGLISH (3 credits)

A study of grammar as it has been conceived through history, including traditional prescriptive and descriptive approaches as well as transformational- generative grammar. (Cross-listed with ENGL 4650).

Prerequisite(s): ENGL 3610 / ENGL 8615 or permission

ENGL 8676 SOCIOLINGUISTICS (3 credits)

An exploration of interconnections between language, culture, and communicative meaning, stressing interactional, situational, and social functions of language as they take place and are created within social contexts. (Cross-listed with ENGL 4670).

Prerequisite(s): ENGL 3610/ENGL 8615, or permission.

ENGL 8696 TOPICS IN LINGUISTICS (3 credits)

This course introduces students to a specialized subject matter in the discipline of Linguistics not covered in existing courses. This course may be repeated for different topics. (Cross-listed with ENGL 4690).

Prerequisite(s): ENGL 3610/ENGL 8615, or permission.

ENGL 8736 CONTEMPORARY RHETORIC (3 credits)

A study of contemporary theories and their application with particular attention to invention, form, style, and cultural context. The course will include an overview of ancient rhetoric and address non-Western rhetorics, such as Native-American, Chinese, and Japanese rhetorical theories. Formerly, ENGL 4530/8536. (Cross-listed with ENGL 4730).

ENGL 8740 SEMINAR: DISCOURSE, CULTURE, AND POWER (3 credits)

A graduate-level introduction to theories and methodologies of analyzing spoken and written discourse. Students will employ various methods to collect natural language data, including field research, and analyze the data using appropriate theoretical orientations to discourse analysis.

ENGL 8750 OXBOW WRITING PROJECT (3 credits)

Oxbow Writing Project summer institute immerses K-16 educators in writing pedagogy via their own writing, presentations about writing and pedagogy, reading and discussing professional literature, designing and implementing an in-depth inquiry project, and developing leadership strengths. Oxbow is a National Writing Project Site. (Cross-listed with TED 8750).

Prerequisite(s): Acceptance into Oxbow Writing Project Summer Institute

ENGL 8756 COMPOSITION THEORY & PEDAGOGY (3 credits)

This course is an overview of composition theories and pedagogies since 1968 and focuses on how historical movements in education and theoretical frameworks (rhetorical, expressivist, socio-cognitivist, collaborative, social constructionist, critical pedagogy, cultural studies, feminist, technological, and linguistic theories) both enrich and complicate the teaching of composition. (Cross-listed with ENGL 4750).

ENGL 8760 SEMINAR IN POPULAR CULTURE, MASS MEDIA AND VISUAL RHETORIC (3 credits)

This course studies how discursive meaning is made through established and emerging visual technologies and the impact visual symbol systems are having upon the field of rhetoric in general. Students will investigate how visual technologies, discourse theory, and semiotic theory has intersected with and expanded contemporary rhetorical theories, and they will apply these theories to visual texts. (Cross-listed with COMM 8200).

ENGL 8770 L2 COMPOSITION PEDAGOGY (3 credits)

This course helps prepare students to teach writing to Language Learners. Students will review principles of Second Language Acquisition Theory, study theories of teaching writing, and learn tenets of curriculum design. Students who complete the course will be able to design curricula, courses, syllabi, and lesson plans.

Prerequisite(s): Graduate Standing

ENGL 8775 WRITING CENTER THEORY, PEDAGOGY, AND RESEARCH (3 credits)

This course is an introduction to writing center theory, pedagogy, research, and history. The course is designed for undergraduate and graduate students interested in or already working in a writing center. Throughout the course we will explore a wide range of models for writing center work and the often problematic metaphors associated with those models. The overall aim in this course will be to help students develop multiple strategies for teaching writing one-to-one, for conducting research in writing centers, and for understanding writing center administration. (Cross-listed with ENGL 3770).

ENGL 8796 ENGLISH CAREER PREPARATION (1 credit)

This course will prepare students for an internship or a career, addressing topics such as finding and applying for internships, workplace and industry, resume and cover letters, interviewing techniques, developing a professional portfolio, and statement of goals. Taking this course prior to an internship is highly recommended. (Cross-listed with ENGL 4790).

Prerequisite(s): The course is restricted to undergraduate Majors and graduate students in English.

ENGL 8800 SEMINAR: TOPICS IN ENGLISH LANGUAGE AND LITERATURE (3 credits)

An intensive study of one or more authors, genres in literature and language not covered by regular courses.

Prerequisite(s): Graduate standing

ENGL 8806 ENGLISH INTERNSHIP (1-3 credits)

Supervised internship in a professional setting with a local employer or nonprofit organization. Hands-on experience. Work hours, activities, and responsibilities must be specified in a written agreement between the employer and the student in consultation with the internship director. Some internships will be paid and some will not. (Cross-listed with ENGL 4800).

Prerequisite(s): ENGL 2410 or ENGL 2420, an ENGL 4000-level writing course, and permission of internship director.

ENGL 8816 DIGITAL LITERACIES FOR TECHNICAL COMMUNICATORS (3 credits)

This course addresses emerging issues in digital literacies such as the rhetoric of technology, technological competency, technology and information ecologies, critical awareness of technology and human interactions, judicious application of technological knowledge, user-centered design, networking and online communities, ethics and technology, and culture and technology. (Cross-listed with ENGL 4810, JMC 8816, JMC 4810).

Prerequisite(s): Graduate Standing or permission of instructor

ENGL 8826 AUTOBIOGRAPHY (3 credits)

In this creative nonfiction writing course, students will craft, workshop, and revise original works of autobiographical nonfiction. Students will read, discuss and critically analyze writing techniques found in diverse autobiographical prose by published authors and student peers. A final project will invite students to research and summarize a book-length autobiography of their own. (Cross-listed with ENGL 4820).

Prerequisite(s): graduate standing

ENGL 8836 TECHNICAL COMMUNICATION (3 credits)

Technical Communication introduces students to the field of technical communication. Students will study the development of print and electronic genres common to industry settings, the design and production of technical documents, the writing processes and work practices of professional technical communicators, and the roles of technical communicators in organizational contexts. (Cross-listed with ENGL 4830, JMC 4830, JMC 8836).

Prerequisite(s): Graduate standing or permission of instructor.

ENGL 8846 TRAVEL WRITING (3 credits)

Travel Writing is a course in professional writing. Although the course includes critical examinations of texts, the primary focus is on the composition of various kinds of travel essays. (Cross-listed with ENGL 4840).

Prerequisite(s): Graduate standing

ENGL 8850 SEMINAR: SPIRITUAL NONFICTION (3 credits)

Spiritual Nonfiction is a creative nonfiction writing seminar where students study and practice various forms and styles of spiritual nonfiction. The comparative study of spirituality and religion is not the focus of this course. Writing is the focus. Discussion of the characteristics of spiritual experiences and ideas will be limited to their formalistic treatment within individual works.

Prerequisite(s): Graduate Standing. At least one creative nonfiction writing course at 4000/8000 level.

ENGL 8856 INFORMATION DESIGN FOR TECHNICAL COMMUNICATORS (3 credits)

This course introduces students to strategies for integrating visual and textual elements of technical documents. Instruction will focus on design theory and application through individual and collaborative projects. Students will develop the professional judgment necessary for making and implementing stylistic choices appropriate for communicating technical information to a lay audience. (Cross-listed with ENGL 4850, JMC 4850, JMC 8856).

Prerequisite(s): Graduate standing or permission of instructor.

ENGL 8860 ADVANCED PLACEMENT INSTITUTE: LITERATURE & COMPOSITION (3 credits)

An intensive Advanced Placement Summer Institute focusing on curricular and pedagogical questions, paired with independent specialized research into various topics related to the planning, organization, implementation, and improvement of Advanced Placement English Literature and Composition instruction and learning at the secondary educational level. Course may be repeated if the APSI topic is different.

Prerequisite(s): Must register for and successfully complete the UNO Advanced Placement Summer Institute for English Literature and Composition.

ENGL 8866 THE MODERN FAMILIAR ESSAY (3 credits)

Students in this course will read as well as write the Modern Familiar Essay, a sub-genre of Creative Nonfiction, with an emphasis on writing the informal essay. Essays will represent a wide scope of perspectives and issues, including gender, social class, education, politics, culture, sexuality, health, race, and ethnicity, and will range from the the sixteenth century "inventor" of the modern essay to twenty-first century practitioners of the form. This course will also cover a wide range of sub-genres and stylistic forms, such as memoir, autobiography, flash, experimental, and more. (Cross-listed with ENGL 4860).

Prerequisite(s): Graduate standing and/or admittance to the Advanced Writing program

ENGL 8870 SEMINAR: PUBLISHING NON-FICTION (3 credits)

A seminar in the process leading to publication of essays in one or more of the following genres: scholarly essay, personal essay, travel essay, pedagogical essay, autobiographical essay.

Prerequisite(s): Graduate standing and 6 hours of graduate credit.

ENGL 8876 TECHNICAL EDITING (3 credits)

This course introduces students to the roles and responsibilities of technical editors: the editorial decision-making processes for genre, design, style, and production of technical information; the communication with technical experts, writers, and publishers; the collaborative processes of technical editing; and the techniques technical editors use during comprehensive, developmental, copyediting, and proofreading stages. (Cross-listed with ENGL 4870, JMC 4870, JMC 8876).

Prerequisite(s): ENGL 1160 or permission of the instructor

ENGL 8880 ADVANCED PLACEMENT INSTITUTE: LANGUAGE & COMPOSITION (3 credits)

An intensive Advanced Placement Summer Institute focusing on curricular and pedagogical questions, paired with independent specialized research into various topics related to the planning, organization, implementation, and improvement of Advanced Placement English Language and Composition instruction and learning at the secondary educational level. Course may be repeated if the APSI topic is different.

Prerequisite(s): Must register for and successfully complete the UNO Advanced Placement Summer Institute for English Language and Composition.

ENGL 8890 SEMINAR: EXPERIMENTS IN CREATIVE NONFICTION (3 credits)

This is a graduate seminar in creative nonfiction. This course explores, through an intensive engagement with long and short forms of creative nonfiction, the ways in which contemporary practitioners of the genre have experimented with form and meaning. Students will attempt their own experiments in writing.

Prerequisite(s): Graduate Standing, Two graduate-level creative nonfiction courses from ENGL 8846, ENGL 8866, ENGL 8870, or ENGL 8800, when topic is appropriate.

ENGL 8896 CAPSTONE COURSE IN TECHNICAL COMMUNICATION (3 credits)

In this capstone course, students will extend foundational skills learned in previous technical communication courses. Students will demonstrate their competency in the technical documentation process in organizational environments, the issues important to the technical communication profession, and the practices of writing and creating complex technical documents for specific purpose and audience. (Cross-listed with ENGL 4890, JMC 8896, JMC 4890).

Prerequisite(s): Graduate standing or permission of instructor.

ENGL 8900 INDEPENDENT STUDY (1-3 credits)

Specially planned readings in a well-defined field of literature or language, carried out under the supervision of a member of the graduate faculty. Designed primarily for the student who has need of work not currently available in the departmental offering and who has demonstrated capability of working independently.

Prerequisite(s): Graduate, permission of instructor, and no "incompletes" outstanding.

ENGL 8910 SEMINAR: CRITICAL THEORY (3 credits)

Seminar in critical theory with readings in New Criticism, semiotics, structuralism, deconstruction, New Historicism, feminist and gender theory, cultural materialism, psychoanalytic theory, queer theory, postcolonial theory, New Formalism, and other more recent theoretical developments in literary study.

Prerequisite(s): ENGL 8010 recommended.

ENGL 8936 NARRATIVE NONFICTION (3 credits)

Students will read, discuss, and write critical analyses of narrative nonfiction by published and student writers. They will craft, workshop, and revise original works of narrative nonfiction. (Cross-listed with ENGL 4930).

Prerequisite(s): One creative nonfiction course or permission from the instructor

ENGL 8956 BRINGING THE WAR HOME: DEPICTIONS OF WAR VETERANS IN LITERATURE AND FILM (3 credits)

Course explores the impact of war on combatants, their families and communities as represented in literary fiction, film, historical documentation, first-person accounts, and other texts written in or translated to English. (Cross-listed with ENGL 4950, MEDH 4950).

Prerequisite(s): Graduate standing

ENGL 8966 TOPICS IN LANGUAGE AND LITERATURE (3 credits)

This course introduces students to a specialized subject matter in the discipline of English Studies not covered in existing courses. This course may be repeated for different topics. (Cross-listed with ENGL 4960).

Prerequisite(s): Graduate Standing

ENGL 8976 WRITING ABOUT SICKNESS AND HEALTH (3 credits)

Students will explore many themes of the human experience in healthcare through reading and discussion of selected poems, short stories, excerpts from fiction, and essays and creative nonfiction. To help students generate their own poems, stories, and essays, the class will incorporate the work of community writing programs and projects. (Cross-listed with ENGL 4970).

ENGL 8990 THESIS (3-6 credits)

Independent research or creative project written under the supervision of a director.

Prerequisite(s): Graduate, permission of thesis director. Not open to non-degree graduate students.

Entrepreneurship (ENTR)

Entrepreneurship Graduate Courses

ENTR 8156 GEOGRAPHY, GENDER AND ENTREPRENEURSHIP (3 credits)

An advanced seminar focused on links among geography, gender and work, emphasizing leadership and entrepreneurship. The course considers theory and method in addition to empirical work. The nature of space, of gender, and of work, are examined. Topics include the gendering of work, the geography of entrepreneurship, gender and leadership. (Cross-listed with ENTR 4150, GEOG 4150, GEOG 8156, WGST 4150, WGST 8156)

Prerequisite(s): Junior, senior, or graduate standing, or permission of instructor.

ENTR 8716 COMPARATIVE INTERNATIONAL DEVELOPMENT AND INNOVATION (3 credits)

Comparative International Development and Innovation will analyze the rise and fall of civilizations from a historical and theoretical perspective in a comparative manner. The course will address issues concerning political, social, economic, and environmental change in national, and international contexts. Among its major emphases are state institutions, economic growth, entrepreneurship, and the transformation of social structure and culture. (Cross-listed with ENTR 4710, PSCI 4710, PSCI 8716).

Environmental Engineering (ENVE)

Environmental Engineering Graduate Courses

ENVN 8316 OUR ENERGY FUTURE: SOCIETY, THE ENVIRONMENT AND SUSTAINABILITY (3 credits)

In this course, students will analyze our energy options including the environmental, economic, and ethical connections with a particular emphasis on electrical energy. The course doesn't prescribe a particular energy future but rather emphasizes development of the knowledge and skills to more effectively contribute to the conversation. To understand our future, the course begins with the present energy landscape and its historical underpinnings, then focuses on developing a student's ability to critically assess energy options by examining the associated implications, consequences, intent, origins, and bias. Students' own work, life, and academic experience are used in the course to underscore the individual relevance of these energy choices. The course includes the necessary science, but the greater emphasis is on the associated critical and creative thinking so that ultimately students can make informed, creative, sustainable energy choices. (Cross-listed with ENVN 4310, CACT 8316)

Prerequisite(s): Graduate standing.

ENVN 8336 INTRODUCTION TO GREEN INFRASTRUCTURE (3 credits)

This course provides an overview of green infrastructure including issues managed with green infrastructure (storm water quality and quantity, urban habitat value, urban sustainability, etc.); basic design and management parameters for best management practices (BMPs); case study applications of BMPs; treatment train assessment and evaluation; and regulatory and cost considerations. (Cross-listed with ENVN 4330).

Prerequisite(s): Graduate standing.

ENVN 8356 GLOBAL CLIMATE CHANGE (3 credits)

The primary objective of this course is for students to form a scientific, evidence-based, stance on current and future changes to the Earth's climate. To this end, this course will be based on scientific inquiry into the current state of knowledge. Particular emphases are placed on evidence and causes of change, and the associated environmental and social impacts, including: water resources, extreme weather, human health, and others of interest to the class. (Cross-listed with GEOG 8356, GEOG 4350, ENVN 4350).

Prerequisite(s): Graduate standing

ENVN 8826 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

An introduction to environmental law and regulations intended for students pursuing careers in environmental sciences or related fields. The course emphasizes the origins, implementation, and enforcement of U.S. state and federal laws and regulations. Major federal environmental laws, covering air and water quality, solid and hazardous waste, pollution prevention and remediation, and natural resources will be discussed. Usually offered Fall semesters. (Cross-listed with ENVN 4820, BIOL 4820, GEOG 8826, GEOG 4820, PA 8826).

Prerequisite(s): Graduate Standing or Permission from the Instructor.

Environmental Studies (ENVN)

Environmental Studies Graduate Courses

ENVN 8316 OUR ENERGY FUTURE: SOCIETY, THE ENVIRONMENT AND SUSTAINABILITY (3 credits)

In this course, students will analyze our energy options including the environmental, economic, and ethical connections with a particular emphasis on electrical energy. The course doesn't prescribe a particular energy future but rather emphasizes development of the knowledge and skills to more effectively contribute to the conversation. To understand our future, the course begins with the present energy landscape and its historical underpinnings, then focuses on developing a student's ability to critically assess energy options by examining the associated implications, consequences, intent, origins, and bias. Students' own work, life, and academic experience are used in the course to underscore the individual relevance of these energy choices. The course includes the necessary science, but the greater emphasis is on the associated critical and creative thinking so that ultimately students can make informed, creative, sustainable energy choices. (Cross-listed with ENVN 4310, CACT 8316)

Prerequisite(s): Graduate standing.

ENVN 8336 INTRODUCTION TO GREEN INFRASTRUCTURE (3 credits)

This course provides an overview of green infrastructure including issues managed with green infrastructure (storm water quality and quantity, urban habitat value, urban sustainability, etc.); basic design and management parameters for best management practices (BMPs); case study applications of BMPs; treatment train assessment and evaluation; and regulatory and cost considerations. (Cross-listed with ENVN 4330).

Prerequisite(s): Graduate standing.

ENVN 8356 GLOBAL CLIMATE CHANGE (3 credits)

The primary objective of this course is for students to form a scientific, evidence-based, stance on current and future changes to the Earth's climate. To this end, this course will be based on scientific inquiry into the current state of knowledge. Particular emphases are placed on evidence and causes of change, and the associated environmental and social impacts, including: water resources, extreme weather, human health, and others of interest to the class. (Cross-listed with GEOG 8356, GEOG 4350, ENVN 4350).

Prerequisite(s): Graduate standing

ENVN 8826 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

An introduction to environmental law and regulations intended for students pursuing careers in environmental sciences or related fields. The course emphasizes the origins, implementation, and enforcement of U.S. state and federal laws and regulations. Major federal environmental laws, covering air and water quality, solid and hazardous waste, pollution prevention and remediation, and natural resources will be discussed. Usually offered Fall semesters. (Cross-listed with ENVN 4820, BIOL 4820, GEOG 8826, GEOG 4820, PA 8826).

Prerequisite(s): Graduate Standing or Permission from the Instructor.

Executive Master of Science/ Information Technology (EMIT)

Executive MS Information Technology Graduate Courses

EMIT 8000 MANAGING & LEADING IN A DIGITAL WORLD (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to the challenges and opportunities of managing and leading in a digital world within the context of a dynamic environment of technology workforce diversity, a global and emerging collaborative economy, and concern for ethics and social responsibility in the development of systems/technologies.

Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8050 IT LEADERSHIP (2 credits)

This course equips students with the knowledge, skills and tools to be an effective information technology (IT) leader. The primary focus of the course is on developing leadership capability and ability to contribute, both strategically and operationally, to the performance of an organization through IT.

Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8100 IT STRATEGY AND CHANGE MANAGEMENT (2 credits)

This course introduces students to a critical view of both strategic and tactical levels of IT management. The course also addresses the challenges of managing IT-enabled change and the complexities associated with managing people, processes, and technology.

Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program is required. Not open to non-degree graduate students.

EMIT 8150 BIG DATA ANALYTICS AND VIZUALIZATION (2 credits)

This course introduces students to data analytics including big data analytics, data quality, and visualization. Topics will include concepts, exercises, tools and techniques surrounding data analytics, quality, visualization, IoT and cloud computing within the context of addressing business challenges and/or to create competitive advantage.

Prerequisite(s): This course is intended exclusively for IT professionals in the EMIT program. Not open to non-degree graduate students.

EMIT 8200 MANAGING INFORMATION TECHNOLOGY INNOVATION (2 credits)

This course introduces students to the concepts, applications and tools for facilitating IT Innovation, Creativity, Entrepreneurship and Risk Taking.

Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8250 MANAGING INFORMATION ASSURANCE (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to information assurance topics including areas such as managing cloud and mobile security, IT governance and policy, and information assurance planning and deployment.

Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8300 SYSTEMS DEVELOPMENT AND MAINTENANCE (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to the development and maintenance of software-intensive systems.

Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8350 ENTERPRISE COMPUTING IN THE ERA OF BIG DATA (2 credits)

This course explores design, managerial and technical issues relevant to creating big data based solutions from a holistic viewpoint. Students will develop an understanding of both the technical and business aspects by exploring a balanced view of the theoretical foundation and practical implications of Enterprise Computing in the context of Big Data and other related (emerging) technologies.

Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8400 LEADING TEAMS AND MANAGING VIRTUAL WORK (2 credits)

This course introduces students in the Executive Master of Science in Information Technology (EMIT) program to fundamental concepts, principles, theories, and practices related to organizational teamwork. Students will learn and practice skills to run productive & effective collaborative problem solving efforts, using modern collaboration technology.

Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8450 EVALUATION OF ENTERPRISE I.T. (2 credits)

This course introduces students to concepts associated with evaluation of enterprise IT investments. Topics addressed will include understanding financial statements, IT investment value vs risk tradeoffs, understanding cost of adopting IT innovations and/or emerging technologies, designing reports, designing of IT-KPIs, performance measurement systems such as balanced scorecard and more.

Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8500 MANAGING AND LEVERAGING EMERGING TECHNOLOGIES (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to industry models and processes to identify, track, pilot and eventually adopt business innovations and/or emerging technologies that could provide an advantage for a business. Students will also learn how IT can facilitate business process change. Concepts and exercises surrounding Lean IT will be covered to optimize the processes in the IT organization.

Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8700 EMERGING CHALLENGES FOR IT EXECUTIVES (2 credits)

This course introduces Executive Master of Science in Information Technology (EMIT) students to emerging challenges that will be faced by IT executives.

Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8990 INTEGRATED EMIT CAPSTONE PROJECT (2 credits)

This course serves as the integrated capstone project for the Executive Master's of Science in Information Technology (EMIT) program.

Prerequisite(s): Admission to the Executive Master's of Science in IT (EMIT) program and completion of all cohort modules prior to submission of integrated project. Concurrent enrollment with other EMIT modules will be required. Not open to non-degree graduate students.

Foreign Language & Literature (FLNG)

Foreign Language & Literature Graduate Courses

FLNG 8020 SEMINAR:FL/TESOL RESEARCH (3 credits)

A survey of Second Language Acquisition theory and methodology culminating in a student-designed, classroom-based research project.

FLNG 8030 SEMINAR: SECOND AND BILINGUAL LANGUAGE ACQUISITION THEORY (3 credits)

An advanced introduction to second and bilingual language acquisition theories based in neurolinguistics, psycholinguistics, and sociolinguistics. Students will explore various schools of thought about how people learn languages other than their language(s) of nurture; this includes languages that are acquired by adolescents and adults, both inside and outside the classroom.

FLNG 8040 SEMINAR: ASSESSMENT & CURRICULUM DESIGN (3 credits)

This course will familiarize (future) language educators with current trends in the assessment of language skills as well as expose them to the design, implementation, and evaluation of second language curricula.

FLNG 8050 THEORY AND METHODS IN THE TEACHING OF HERITAGE LANGUAGES (3 credits)

This course is designed to introduce graduate candidates to current theoretical and pedagogical approaches to teaching heritage languages in the United States. As dedicated practitioners, reflective scholars, and responsible citizens, students will be able to explore evidence-based pedagogical and assessment strategies to use in educational contexts serving bilingual/heritage speakers.

Prerequisite(s): SPAN 8086 or instructor permission

FLNG 8060 APPROACHES AND METHODS IN LANGUAGE TEACHING (3 credits)

This course offers a foundation in the approaches and methods for the teaching of second language, third languages, and foreign languages from the perspectives of language acquisition research and language teaching pedagogy. The main goals are to teach teachers and applied linguistics researchers about current research-based approaches to teaching languages including content-based instruction, task-based instruction, and critical approaches. The course also dives into best practices for syllabus design, lesson planning, and creation of course and lesson objectives.

Prerequisite(s): Graduate standing

FLNG 8900 DIRECTED READINGS (3 credits)

In this course, students will deepen their theoretical and practical understanding of topics pertaining to language acquisition in L2 and heritage language learners. Students meet this goal by participating in a teaching experience and engaging in targeted academic readings that inform their classroom practices.

Prerequisite(s): Permission of instructor and/or at least twelve graduate hours completed. Graduate non-degree students not allowed.

FLNG 8960 SEMINAR:SPECIAL TOPICS (3 credits)

This course provides a format for the exploration of topics of interest to advanced foreign language/TESOL students.

French (FREN)

French Graduate Courses

FREN 8036 ADVANCED FRENCH CONVERSATION (3 credits)

This course focuses on the development of oral skills in French through the use of complex and sophisticated conversational structures and nuanced lexicon. Students will be involved in expressing or presenting their ideas and opinions, interpersonal speaking activities, and a variety of activities including reading short literary and cultural texts and screening films. (Cross-listed with FREN 4030).

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

FREN 8056 SEMINAR IN THE CULTURE AND CIVILIZATION OF QUEBEC (3 credits)

An introduction to the many facets of Quebec Culture & Civilization, through readings on Quebec's history and contemporary culture and also through films and other media related to Quebec. (Cross-listed with FREN 4050).

Prerequisite(s): FREN 2120 or departmental permission.

FREN 8076 FRANCOPHONE WEST AFRICA CULTURES (3 credits)

This course is intended as an introduction and exploration to the history, literary traditions and cinema of Francophone West Africa from 1945 to today. It seeks to familiarize students with the practice of reading literary texts, discussing seminal films and articulating critically informed reaction in writing. The course will focus on a selection of canonical authors and seminal films from Burkina Faso, Guinea, Ivory Coast, Mali, Mauritania and Senegal. The texts and films will provide a point of entry to the study of history, society, and culture. Historical, socio-political and cultural issues covered in the course will include: Ancient rites and oral literature, French colonization and post-colonialism, women and gender issues, childhood, immigration, the "Afropean" literature and West African Francophone countries contemporary challenges (politics and economies) with presentations on Benin, Niger and Togo today. (Cross-listed with FREN 4070).

Prerequisite(s): One French course at the 3000 or 4000 level - must be a graduate student

FREN 8156 CONTEMPORARY FRENCH NOVEL (3 credits)

Selected contemporary French novels are analyzed and discussed. The main objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the texts under consideration. In addition, students will examine the sociopolitical and cultural contexts of these literary works. (Cross-listed with FREN 4150).

Prerequisite(s): FREN 3060 or departmental permission. Not open to non-degree graduate students.

FREN 8176 CONTEMPORARY FRENCH THEATER (3 credits)

Selected contemporary French plays are analyzed and discussed. The main objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the texts under consideration. (Cross-listed with FREN 4170).

Prerequisite(s): FREN 3060 or permission of instructor. Not open to non-degree graduate students.

FREN 8226 THE STRUCTURE OF FRENCH (3 credits)

A survey of the linguistic structure of modern French, including phonology, morphology, and syntax. (Cross-listed with FREN 4220).

Prerequisite(s): FREN 3040 or departmental permission. Not open to non-degree graduate students.

FREN 8440 SEMINAR: FRENCH COMPOSITION (3 credits)

This course provides opportunities for students to refine their composition skills in French through extensive writing workshops and peer editing. Computer applications to composition will be employed.

Prerequisite(s): Admission to the Graduate College.

FREN 8866 MODERN FRENCH WOMEN AUTHORS (3 credits)

Selected contemporary French literary texts written by women are analyzed and discussed. This may include novels, short stories, poetry, and graphic novels. The primary objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the works under consideration. In addition, students will examine the sociopolitical and cultural contexts of these works. (Cross-listed with FREN 4860).

Prerequisite(s): FREN 3060 or permission. Not open to non-degree graduate students.

FREN 8900 FRENCH INDEPENDENT STUDY (1-3 credits)

Specifically planned projects and readings in a well-defined field of French literature or linguistics carried out under the supervision of a member of the foreign languages faculty holding graduate faculty status.

FREN 8906 INDEPENDENT STUDY (1-3 credits)

Specially planned readings in a well-defined field of literature, carried out under the supervision of a member of the foreign language faculty. Designed primarily for the student who has need of work not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated for credit once. (Cross-listed with FREN 4900).

Prerequisite(s): Permission of the instructor, junior or senior standing, and no incompletes outstanding. Not open to non-degree graduate students.

FREN 8956 PRO-SEMINAR: LITERATURE AND/OR FILM (3 credits)

This course is dedicated to the study of a narrow field of the literature and/or cinema of the Francophone world. (Cross-listed with FREN 4950).

Prerequisite(s): Graduate student status.

FREN 8966 PRO-SEMINAR: CULTURE AND SOCIETY (3 credits)

This course will address narrow field of study of the civilization, history, film, contemporary culture, art, politics, and or cultural studies of the Francophone world. (Cross-listed with FREN 4960).

Prerequisite(s): FREN 3030, FREN 3040, and FREN 3060

FREN 8976 PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS (3 credits)

This course will address a narrow field of study of linguistics, translation/interpretation or the professional language of the Francophone world. (Cross-listed with FREN 4970).

Prerequisite(s): Graduate student status.

Geography (GEOG)

Geography Graduate Courses

GEOG 8000 HISTORY AND PHILOSOPHY OF GEOGRAPHY (3 credits)

Introduction to history of geography. Emphasis on significant concepts, methodologies, and philosophies in geography from classical Greeks to the present.

Prerequisite(s): Permission

GEOG 8016 CONSERVATION OF NATURAL RESOURCES (3 credits)

This course provides a diverse overview of the principles and contemporary issues related to ecology and management of wildlife, fisheries, forests, soil, rangeland, minerals, and water. It includes the philosophical, economic and social aspects of resource management. Current local, regional, and global issues are examined. (Cross-listed with GEOG 4010).

Prerequisite(s): Three hours of geography

GEOG 8026 SPATIAL ANALYSIS IN GEOGRAPHY (3 credits)

An introduction to spatial analysis with a focus on spatial statistics. Emphasis will be placed on the nature of geographic data, spatial data handling, modeling logic, sampling theory, and design. Both descriptive and spatial statistics methods are covered. Students will receive hands-on experience working with statistical data sets, software, and scientific visualization of research results. (Cross-listed with GEOG 4020).

Prerequisite(s): STAT 1530 or STAT 3000 and GEOG 4050 or permission

GEOG 8036 COMPUTER MAPPING AND VISUALIZATION (3 credits)

Computer techniques in the mapping and visualization of spatial data. Various forms of spatial data manipulation and computer graphic output techniques are examined. Particular attention is given to the creation of maps for the internet and the incorporation of interaction and animation in their display. (Cross-listed with GEOG 4030).

Prerequisite(s): GEOG 1090 or permission of instructor. Background in programming, particularly JavaScript, highly recommended.

GEOG 8040 SEMINAR IN EDUCATION GEOGRAPHY (3 credits)

This seminar surveys the goals, methods, and content associated with teaching geography in elementary, secondary, and in higher education. It is designed to aid current and future teachers in teaching geography.

Prerequisite(s): Permission

GEOG 8046 GEOARCHAEOLOGY (3 credits)

An introduction to geoarchaeology: the application of methods and techniques of geography, geology and other earth sciences to solve archaeological problems and reconstruct past environments. (Cross-listed with GEOL 4040, GEOG 4040).

GEOG 8056 GEOGRAPHIC INFORMATION SYSTEMS I (4 credits)

An introduction to the concepts and principles of geographic information systems (GIS). Emphasis will be placed on geographic data inputs, manipulation, analysis, and output functions. Exercises introduce students to GIS software and applications. Usually offered Fall, Spring, Summer. (Cross-listed with GEOG 4050).

Prerequisite(s): 3 hours in Geography or by permission

GEOG 8106 BIOGEOGRAPHY (3 credits)

This course is intended as an introduction to biogeography, the study of the distribution and evolution of organisms across space and through time. Usually offered every year. (Cross-listed with BIOL 4100, GEOL 4100, BIOL 8106, GEOL 8106, GEOG 4100).

Prerequisite(s): BIOL 1450 and BIOL 1750 or GEOL 3100 or BIOL 3100, junior-senior

GEOG 8126 URBAN GEOGRAPHY (3 credits)

This course is designed to serve as an introduction to the complex and dynamic urban system, including the physical, economic, political, cultural, social, and environmental forces that shape the form and function of cities, as well as how individuals and groups experience urban life. We make ample use of geographic information systems (GIS) to analyze cities and better understand crucial urban concepts such as urban growth and development, patterns of urban form, segregation and neighborhood change, economic specialization and agglomeration, urban sprawl, and environmental justice. (Offered Fall) (Cross-listed with GEOG 4120).

GEOG 8130 SEMINAR IN ECONOMIC GEOGRAPHY (3 credits)

This seminar course investigates the development of current world economic systems through the elements of primary, secondary, tertiary, quarternary and quinary production on a micro and macro scale. Exchange and transactional systems, consumption linkages, resource management, economic health on global and local scales, and location decision-making are major topics.

Prerequisite(s): Graduate in geography and permission of instructor

GEOG 8136 POLITICAL GEOGRAPHY (3 credits)

An introduction to the basic concepts and approaches in contemporary political geography at the global, national and local scales. Core topics to be examined include geopolitics, imperialism, war and peace, global ecopolitics, states, nationalism and electoral geography. (Offered Fall) (Cross-listed with GEOG 4130).

Prerequisite(s): Graduate status

GEOG 8156 GEOGRAPHY, GENDER AND ENTREPRENEURSHIP (3 credits)

An advanced seminar focused on links among geography, gender and work, emphasizing leadership and entrepreneurship. The course considers theory and method in addition to empirical work. The nature of space, of gender, and of work, are examined. Topics include the gendering of work, the geography of entrepreneurship, gender and leadership. (Cross-listed with WGST 4150, GEOG 4150, ENTR 4150, ENTR 8156, WGST 8156).

Prerequisite(s): Junior, senior, or graduate standing, or permission of instructor.

GEOG 8166 URBAN SUSTAINABILITY (3 credits)

Using sustainability as a conceptual framework, students in this course will investigate a variety of social, economic, and environmental challenges facing cities of the 21st century. Topics and issues explored include urban growth and expansion, livability, equity & gentrification, energy use & production, urban farming, poverty, automobility & transportation, water security, urban pollution, and the role of cities in climate change. (Cross-listed with GEOG 4160)

Prerequisite(s): Graduate standing.

GEOG 8176 ADVANCED CULTURAL GEOGRAPHY (3 credits)

This course examines current theoretical debate and research practice in a select topic in Cultural Geography. Emphasis will be on readings and discussion with students engaging in original research. Specific thematic focus will vary from year to year. This course may be taken multiple times as long as topics differ. (Cross-listed with GEOG 4170).

Prerequisite(s): Graduate standing and permission of the instructor.

GEOG 8210 SEMINAR IN CULTURAL GEOGRAPHY (3 credits)

This course explores the different theoretical, methodological and empirical approaches in cultural geography, while also addressing its development, its evolution, its competing schools of thought, and new frontiers.

Prerequisite(s): Permission

GEOG 8236 GREAT PLAINS & NEBRASKA (3 credits)

This course is a comprehensive examination of the Great Plains region from a geographical perspective. It considers both the physical and human geography of the Plains, with particular attention to our home, Nebraska. Topics to be covered include: the Plains' unique ecosystems, its early human inhabitants, its later settlers, its evolving land-use patterns, and current issues. (Cross-listed with GEOG 4230).

GEOG 8266 PROCESS GEOMORPHOLOGY (4 credits)

A lecture and laboratory course focused on understanding Earth surface processes and the evolution of landforms across spatial and temporal scales. The course emphasizes applying unifying concepts in geomorphology, quantitative methodology and modern process-oriented geomorphology to interpret landscape evolution. (Cross-listed with GEOG 4260, GEOL 4260).

Prerequisite(s): One of the following: GEOL 1010, GEOL 1170, GEOG 1030, GEOG 1050 or instructor permission.

GEOG 8310 GEOGRAPHY OF AGRICULTURE (3 credits)

A systematic study of the characteristics and patterns of world agriculture. Usually offered on demand.

Prerequisite(s): Permission

GEOG 8326 CLIMATOLOGY (3 credits)

A study of climatic processes and their effect on shaping the physical landscape. Emphasis on physical and applied aspects of the field. (Cross-listed with GEOG 4320).

Prerequisite(s): GEOG 1030, GEOG 1050, GEOG 3510, or permission of instructor.

GEOG 8336 SOIL GENESIS, MORPHOLOGY AND CLASSIFICATION (4 credits)

This course is designed to familiarize students with basic soil chemical, physical and biological properties, soil morphological characteristics, soil classification and soil forming processes. The course focuses on relationships between soils and environmental factors and how such factors alter soil forming processes. The lab will focus on developing basic field skills, including soil morphological descriptions and soil mapping, as well as common laboratory methods used to analyze soils. (Cross-listed with GEOG 4330, GEOL 4330).

Prerequisite(s): One of the following: GEOG 1030, GEOG 1050, GEOL 1010, GEOL 1170 or instructor permission.

GEOG 8346 WATER RESOURCES (3 credits)

This course explores the applied principles of hydrology, water systems modeling, river basin development, and water management issues and practices in the United States and other parts of the world. Two local Saturday field trips will be required. (Cross-listed with GEOG 4340).

Prerequisite(s): Six hours of Physical Geography or equivalent and graduate standing.

GEOG 8356 GLOBAL CLIMATE CHANGE (3 credits)

The primary objective of this course is for students to form a scientific, evidence-based, stance on current and future changes to the Earth's climate. To this end, this course will be based on scientific inquiry into the current state of knowledge. Particular emphases are placed on evidence and causes of change, and the associated environmental and social impacts, including: water resources, extreme weather, human health, and others of interest to the class. (Cross-listed with GEOG 4350, ENVN 8356, ENVN 4350).

Prerequisite(s): Graduate standing

GEOG 8406 EMERGING TOPICS IN GEOGRAPHY (3 credits)

Emerging Topics in Geography focuses on the latest research areas in the field of geography. The specific topic of each course set will be based on the research trends in geography. This course will be offered on demand. (Cross-listed with GEOG 4400).

Prerequisite(s): Permission of the instructor

GEOG 8500 SPECIAL TOPICS IN GEOGRAPHY (3 credits)

This course will provide for an in-depth study of a geographical or geological subject (as specified in the course subtitle). Subjects will be offered as sections of GEOG 8500, but will be separate from one another. Students may repeat GEOG 8500 as often as they like as long as no specific subject is duplicated. Course to be offered with approval of Graduate Program Committee and Dean for Graduate Studies.

Prerequisite(s): Permission of instructor

GEOG 8535 CARTOGRAPHY AND DATA VISUALIZATION (4 credits)

An introduction to the concepts and techniques of map construction and visual data communication. Topics include map scale, map projections, thematic cartography, history of cartography, computer mapping, and global positioning systems. Particular attention is given to designing both paper and Internet distributed maps. This course is offered in both the Fall and Spring semesters. (Cross-listed with GEOG 3530).

Prerequisite(s): GEOG 1000 or GEOG 1020 and GEOG 1030 or GEOG 1050

GEOG 8536 HISTORICAL GEOGRAPHY OF THE UNITED STATES (3 credits)

This course examines the geography, physical and human, real, perceived, or theoretical, of the United States' historical development. It considers the ways history has and has not been affected by geography. It will also cover the field of historical geography, its theories and practices. (Cross-listed with GEOG 4530).

GEOG 8556 GEOGRAPHY OF ECONOMIC GLOBALIZATION (3 credits)

A study of the geography of economic globalization and the geography of the world economy. The major topics include the historical development of the world economy and globalization from the geographical perspective, trends in geography of global production, trade and investment, the most important factors and actors in the globalization processes and its geographic effects, geography of transnational corporations, case studies of economic geography of selected industries and service activities, effects of globalization on the developed and developing countries. This course also supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with GEOG 4550, CACT 8116).

Prerequisite(s): Graduate status.

GEOG 8600 INDEPENDENT RESEARCH (1-3 credits)

This is an independent research course, where students undertake and complete a focused independent project under faculty supervision, exploring an aspect of geography in greater depth.

Prerequisite(s): Completed independent research contract between faculty and student and permission of adviser or the Graduate Studies Coordinator.

GEOG 8616 ENVIRONMENTAL MONITORING AND ASSESSMENT (3 credits)

An interdisciplinary approach to techniques for the design and implementation of environmental inventory and monitoring schemes used to evaluate natural resources. Students work as teams to synthesize information from their backgrounds in geography, geology and ecology to evaluate the impacts of human actions on environmental quality following the framework for environmental assessments provided by the National Environmental Policy Act. Course is organized to accommodate variable needs of students with different backgrounds and career choices. Usually offered every year. (Cross-listed with BIOL 4610, ENVN 4610, GEOG 4610, GEOL 4610, GEOL 8616)

Prerequisite(s): Permission of instructor.

GEOG 8626 GEOGRAPHICAL FIELD STUDIES (3 credits)

Field experience course based on variable topics and themes. Students must attend the multiple day field trip that will require overnight stays. (Cross-listed with GEOG 4620).

Prerequisite(s): Instructor Permission. Not open to non-degree graduate students.

GEOG 8636 ENVIRONMENTAL REMOTE SENSING (4 credits)

An introduction to remote sensing science and technology. Emphasis will be placed on multispectral data, matter/energy interactions, sensor system characteristics, photogrammetry, image interpretation, digital image processing, and environmental applications. Formal laboratory instruction will provide students with problem-solving skills and hands-on experience with remote sensing and GIS software. (Cross-listed with GEOG 4630).

Prerequisite(s): GEOG 1060 or GEOG 1070 or GEOL 1170. Introductory statistics highly recommended.

GEOG 8640 REMOTE SENSING ADVANCED CONCEPTS AND APPLICATIONS (3 credits)

Designed for the graduate student desiring to do advanced work in remote sensing. The emphasis of the course is on non-photographic sensors and especially digital processing of multispectral satellite data. The applications are multidisciplinary in nature. Usually offered on demand.

Prerequisite(s): GEOG 4630 / GEOG 8636

GEOG 8646 CRITICAL ZONE SCIENCE (4 credits)

This course examines the Critical Zone (CZ), Earth's permeable layer that extends from the top of vegetation to the bottom of groundwater. The CZ is a constantly evolving layer where rock, soil, water, air, and living organisms interact to regulate the landscape and natural habitats; it also determines the availability of life-sustaining resources, including our food production and water quality. CZ science is an interdisciplinary and international endeavor focused on cross-disciplinary science. In this course, we will focus on using data available from the existing National Science Foundation (NSF)-funded CZ Observatories (CZOs) along with readings, discussions and activities to explore interactions within the CZ. (Cross-listed with GEOG 4640, GEOL 4640)

Prerequisite(s): One of the following: GEOL 1170, GEOL 1010, GEOG 1030 or GEOG 1050; one chemistry or physics course recommended; or instructor permission.

GEOG 8650 LAND USE (3 credits)

Introduction to the theories and practices of land use planning. Land use planning considers the natural environment and the human activities utilizing it, studying the decisions made in human land use, in order to understand and critique current land use practices. Local, state, nation, and international case studies of land use will be considered.

Prerequisite(s): GEOG 4120/ GEOG 8126 Urban Geography

GEOG 8666 GEOGRAPHIC INFORMATION SYSTEMS II (4 credits)

An introduction to advanced geographic information systems (GIS) topics. Emphasis will be placed on algorithms and analysis for information extraction. Topics include spatial interpolation, remote sensing GIS integration, software development, spatial analysis, GIS modeling, and future advances in GIS. Formal laboratory instruction will provide students with GIS experience to solve application problems. Usually offered in Fall. (Cross-listed with GEOG 4660).

Prerequisite(s): GEOG 4050/ GEOG 8056

GEOG 8670 CARTOGRAPHIC METHODS (3 credits)

An applied graduate seminar in cartography and geospatial science. The course examines advanced methods for the representation of spatial data. Emphasis is placed on the design of interactive Internet-based maps. Projects will be directed toward the creation of map-based web pages.

Prerequisite(s): A junior/senior course in cartography, GIS, computer mapping, or visualization.

GEOG 8680 SEMINAR IN GEOSPATIAL SCIENCE (3 credits)

Seminar in Geospatial Science examines the origins, development and prospects of spatial information technology to understand people, places, and processes of the earth. The overall approach is to examine the three main components of geospatial science: 1) Geographic Information Systems (GIS), the software, hardware, outputs, personnel, and practices that together facilitate the analysis and mapping of geographic entities and phenomena; 2) Remote Sensing, the use and processing of aerial photographs and satellite imagery; and 3) Cartography, the general processing and display of geographic information for both analysis and communication.

Prerequisite(s): Graduate standing. Prior coursework in geographic information systems, remote sensing or cartography.

GEOG 8700 RESEARCH METHODS (3 credits)

The course provides students with an overview of research approaches and methods used by geographers. Students are expected to put these methods into practice by drafting a full thesis proposal by semester's end.

GEOG 8800 INTERNSHIP IN ENVIRONMENTAL/REGIONAL PLANNING (1-6 credits)

(repeatable up to six hours) Internship with local planning agencies enabling students to gain knowledge and experience in comprehensive regional or environmental planning. Usually offered Fall, Spring, and Summer.

Prerequisite(s): Permission and 12 graduate hours in geography.

GEOG 8826 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

An introduction to environmental law and regulations intended for students pursuing careers in environmental sciences or related fields. The course emphasizes the origins, implementation, and enforcement of U.S. state and federal laws and regulations. Major federal environmental laws, covering air and water quality, solid and hazardous waste, pollution prevention and remediation, and natural resources will be discussed. Usually offered Fall semesters. (Cross-listed with ENVN 8826, ENVN 4820, BIOL 4820, GEOG 4820, PA 8826).

Prerequisite(s): Graduate Standing or Permission from the Instructor.

GEOG 8830 SEMINAR IN URBAN STUDIES (3 credits)

This course provides an interdisciplinary overview of the forces influencing and influenced by urbanization and urbanism. (Cross-listed with UBNS 8000)

Prerequisite(s): Not open to non-degree graduate students.

GEOG 8840 DIRECTED RESEARCH IN URBAN STUDIES (3 credits)

The course is intended for advanced graduate students in urban studies or geography. It is especially suited for those in-career students who have had their internships waived and who might profit more by in-depth research on a problem of urban studies rather than additional classroom courses. (Cross-listed with UBNS 8940).

Prerequisite(s): Completed 9 graduate hours in Urban Studies. Permission from the School. For Geography students, GEOG 8126 (Urban Geography) or permission from the School.

GEOG 8990 THESIS (1-6 credits)

Independent research project conducted under the supervision of an adviser and thesis committee.

Prerequisite(s): Graduate student in geography who has successfully presented and defended their thesis proposal.

Geology (GEOL)

Geology Graduate Courses

GEOL 8106 BIOGEOGRAPHY (3 credits)

This course is intended as an introduction to biogeography, the study of the distribution and evolution of organisms across space and through time. Usually offered every year. (Cross-listed with GEOL 4100, BIOL 4100, BIOL 8106, GEOG 4100, GEOG 8106).

Prerequisite(s): BIOL 1450 and BIOL 1750 or GEOL 3100 or BIOL 3100, junior-senior.

GEOL 8616 ENVIRONMENTAL MONITORING AND ASSESSMENT (3 credits)

An interdisciplinary approach to techniques for the design and implementation of environmental inventory and monitoring schemes used to evaluate natural resources. Students work as teams to synthesize information from their backgrounds in geography, geology and ecology to evaluate the impacts of human actions on environmental quality following the framework for environmental assessments provided by the National Environmental Policy Act. Course is organized to accommodate variable needs of students with different backgrounds and career choices. Usually offered every year. (Cross-listed with BIOL 4610, ENVN 4610, GEOG 4610, GEOG 8616, GEOL 4610).

Prerequisite(s): Permission of instructor.

German (GERM)

German Graduate Courses

GERM 8046 ADVANCED GERMAN COMPOSITION AND STYLISTICS (3 credits)

Advanced grammatical principles, composition and stylistics.

GERM 8166 BLACK GERMANY: PEOPLE AND CULTURE (3 credits)

The course addresses fiction, film, photography, music and journalism to dive into Black people's contribution to German culture. From the formation of a Black community in imperial Germany, to the African American GI's role in postwar democratization process, the artistic output of so-called "occupation babies" born in the wake of WWII, to contemporary artists who continue to expand and refine German culture. The African Diaspora in Germany is a rich field to expand our notion of global connectedness and cultural identity, while taking a deep dive into contemporary German culture and social developments. (Cross-listed with GERM 4160).

GERM 8226 THE STRUCTURE OF GERMAN (3 credits)

A survey of the linguistic structure of modern German, including phonology, morphology, and syntax. (Cross-listed with GERM 4220).

Prerequisite(s): GERM 3040 and GERM 4610, or permission.

GERM 8440 SEMINAR:GERMAN COMPOSITION (3 credits)

This course will provide opportunities for students to refine their composition skills in German through extensive writing practice, writing workshops, and peer editing. Computer applications to composition will be employed.

Prerequisite(s): Admission to Graduate College.

GERM 8906 INDEPENDENT STUDY (1-3 credits)

Specially planned readings in a well-defined field of literature, carried out under the supervision of a member of the foreign language faculty. Designed primarily for the student who has need of work not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated for credit once.

Prerequisite(s): Permission of the instructor, junior or senior standing, and no incompletes outstanding.

GERM 8956 PRO-SEMINAR: LITERATURE AND/OR FILM (3 credits)

This course is dedicated to the study of a narrow field of the literature and/or cinema of the German-speaking world. (Cross-listed with GERM 4950).

Prerequisite(s): Graduate student status.

GERM 8966 PRO-SEMINAR: SOCIETY AND CULTURE (3 credits)

This course will address a narrow field of study of the civilization, history, film, contemporary culture, art, politics, and/or cultural studies of the German-speaking world. (Cross-listed with GERM 4960).

Prerequisite(s): GERM 3030, GERM 3040, and GERM 3060

GERM 8976 PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS (3 credits)

This course will address a narrow field of study of linguistics, translation/interpretation or the professional language of the German-speaking world. (Cross-listed with GERM 4970).

Prerequisite(s): Graduate student status.

Gerontology (GERO)

Gerontology Graduate Courses

GERO 8020 INTRODUCTION TO RESEARCH METHODS (3 credits)

An introduction to research methods and statistical procedures in the social and behavioral sciences.

GERO 8056 ADVANCED BIOLOGY OF AGING (3 credits)

This course covers biological aging topics at an advanced level, and is designed for undergraduate and graduate students who have some prior knowledge about biology or aging. The course will be interdisciplinary in nature and focus on topics relevant to gerontology, biology, psychology, and exercise science. Students will learn how to think critically about primary research in the biology of aging. Furthermore, they will apply their knowledge of the biology of aging field by creating a handbook of healthy aging for older adults. (Cross-listed with GERO 4050, NEUR 4050).

Prerequisite(s): Junior or senior standing for undergraduate students or graduate level standing

GERO 8106 EDUCATIONAL GERONTOLOGY (3 credits)

An introduction to the field of education for and about the aging. The institutions and processes of education will be analyzed to determine their relationships and value to persons who are now old and those who are aging. (Cross-listed with GERO 4100).

Prerequisite(s): Students must have a junior, senior or graduate student status.

GERO 8206 VOLUNTEER MANAGEMENT (3 credits)

The purpose of this course is to equip managers of volunteers in aging services to develop, maintain, assess impact and evaluate a sustainable volunteer program that will provide reliable and necessary services to older adults and further to be embraced as a valuable asset by professionals working in the field of aging. (Cross-listed with GERO 4200).

Prerequisite(s): Graduate Student

GERO 8356 ISSUES IN AGING (3 credits)

This course is intended for students in gerontology and in other fields who are interested in a humanistic approach to understanding significant issues which affect the lives of older people. (Cross-listed with GERO 4350).

GERO 8426 RECREATION FOR THE AGING (3 credits)

Role of leisure services as related to understanding and working with elders. Emphasis on recreation programming as a mode of intervention. Analysis and study of the phases of aging, with reference to psychomotor, affective, and cognitive changes; introduction to the theories of aging and how they relate to the lifestyle of this population; recreational therapy intervention, activity adaptation and program design; leisure education and issues and trends. (Cross-listed with GERO 4420, RLS 4420, RLS 8426).

GERO 8446 SOCIOLOGY OF AGING (3 credits)

This course will introduce students to important theories and concepts in the sociological study of aging and give deeper understanding of the experiences that people encounter as they grow older, including retirement, disease and disability, and long-term care. In addition to exploring the challenges faced by older adults, this course will focus on factors that contribute to successful aging. (Cross-listed with GERO 4440).

Prerequisite(s): Graduate Students

GERO 8466 PSYCHOLOGY OF ADULT DEVELOPMENT AND AGING (3 credits)

The focus of this course is on the major social and psychological changes that occur as a function of aging. Both normal and abnormal patterns of developmental change are examined, along with their implications for behavior. (Cross-listed with GERO 4460, PSYC 4460)

Prerequisite(s): Junior or Senior.

GERO 8476 MENTAL HEALTH AND AGING (3 credits)

The goal of this courses is to survey the mental health needs of older adults. Consideration is given to identifying both positive mental health and pathological conditions. Treatment interventions effective with older adults and their families are also discussed. (Cross-listed with GERO 4470, PSYC 4470, PSYC 8476).

Prerequisite(s): Junior or Senior

GERO 8486 GLOBAL AGEING (3 credits)

The study of ageing around the world by a comparative method in a cross-cultural and cross-national framework. An explanation of some practical experiences and developments in Europe, Asia and Africa will be examined. (Cross-listed with GERO 4480).

GERO 8500 POLITICS AND AGING (3 credits)

The purpose of this course is to provide an understanding of the role of the political process in the emergence of public policy towards older adults in the United States, particularly during the past century.

GERO 8506 LEGAL ASPECTS OF AGING (3 credits)

This course centers on the legal concerns likely to arise as people age. We will discuss the American legal system with an emphasis on underlying legal concepts and issues of special importance to older persons. Some of the topics include guardianship, finances in retirement, abuse and neglect, Social Security, and Medicare and Medicaid. Consideration of the legal concerns which are likely to arise as people age. Includes introduction to American legal system, and emphasis on underlying legal concepts and issues of special importance to older persons. (Cross-listed with GERO 4500).

GERO 8516 LONG-TERM CARE ADMINISTRATION (3 credits)

An investigation of the broad range of policy issues, theoretical concerns and practical management strategies influencing the design, organization and delivery of long-term care services. (Cross-listed with GERO 4510, PA 4510, PA 8516).

GERO 8526 SENIOR HOUSING (3 credits)

The senior housing course is designed to provide students with an in-depth understanding of the various housing options available to older adults including aging in place to hospice. At the end of the course students will have a working knowledge of the needs of older adults and how this is used in making decisions about housing. (Cross-listed with GERO 4520.)

Prerequisite(s): Graduate student

GERO 8556 HEALTH ASPECTS OF AGING (3 credits)

This course emphasizes health promotion for older adults. Special health needs of older Americans are compared and contrasted with health needs for other age groups. Prevention or delaying of chronic diseases and disorders are emphasized. (Cross-listed with GERO 4550, PHHB 4550, PHHB 8556, WGST 4550).

GERO 8566 NUTRITION AND AGING (3 credits)

The goal of this course is to provide an understanding of the relationship between nutrition and successful or usual aging. This course will review the basics of good nutrition and relate them to the usual food intake of older adults. It will identify the impact of poor nutrition. This course will also look at the role nutrition plays in various disease processes that are associated with aging. It will provide information about support services that are available to assure good nutrition into old age for those living independently. (Cross-listed with GERO 4560).

GERO 8576 REHABILITATIVE DESIGN (3 credits)

The purpose of this interdisciplinary course is to provide students with a greater appreciation and understanding of impairment as a platform for professional activities. This course will also provide an understanding of how Rehab Engineering, Universal and Inclusive Design and the implementation of Assistive Technology allow for greater levels of independence and quality of life for all members of our community, with an emphasis on the applications in the aging process. (Cross-listed with GERO 4570).

GERO 8606 MANAGEMENT AND ADMINISTRATION OF AGING PROGRAMS (3 credits)

This course is designed to give students a broad overview of theories, models, issues and approaches related to the administration of services and programs for older adults. (Cross-listed with GERO 4600).

GERO 8676 PROGRAMS AND SERVICES FOR OLDER ADULTS (3 credits)

This course is provided to give the student an historical overview of programs for older adults; examine the national policy process as it relates to the older American; and review the principles and practices relative to the existing national programs for the aged. (Cross-listed with GERO 4670, PA 8676).

Prerequisite(s): Not open to non-degree graduate students.

GERO 8696 WORKING WITH MINORITY ELDERLY (3 credits)

This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 4690, SOWK 4040, SOWK 8046).

GERO 8726 BABY BOOMERS AND THE 21ST CENTURY (3 credits)

Marketing decisions and strategies apply to all businesses and are influenced by the target market. The economic realities and the character of America will change due to shifting demographics of baby boomers. Businesses that understand the power of the baby boomers will succeed; failure to understand that power may lead to economic consequences. Students from many disciplines will benefit from this cross-referenced course blending the realities of gerontology with the predictions of baby boomer behavior and the resulting impact to all businesses. (Cross-listed with GERO 4720).

Prerequisite(s): Junior, Senior and Graduate Level Standing.

GERO 8730 DYING, DEATH & GRIEVING (3 credits)

An examination of theory and research relevant to interaction with the older, terminally ill person, focusing on communication with widows and other survivors as well as the dying patient. (Cross-listed with PHHB 8730).

Prerequisite(s): Graduate Students

GERO 8756 MID-LIFE, CAREER CHANGE, PRERETIREMENT PLANNING (3 credits)

This course is designed to involve candidates in the exploration of the developmental tasks of mid-life, myths and realities related to career change as well as the implication of preretirement planning. Factual information, as well as model examination and evaluation are presented to aid the candidate in becoming better equipped to understand some of the forces which affect the well-being of middle aged persons as they prepare for the later years. (Cross-listed with COUN 8756, GERO 4750).

Prerequisite(s): Not open to non-degree graduate students.

GERO 8800 GRADUATE SEMINAR IN THE AGING BRAIN (3 credits)

The Graduate Seminar in the Aging Brain is a graduate level gerontology course focused on understanding the changes to the brain due to normal aging and aging-related diseases. This is an elective course for the Gerontology graduate program at UNO. The content matter of this course also makes it a relevant fit for graduate students from disciplines such as biology, psychology, geriatric medicine, nursing, social work, and exercise science. By the end of the course, students should have a thorough understanding of the changes to the brain in healthy aging and aging-related disease that affect cognitive and emotional functioning. (Cross-listed with PSYC 8800).

Prerequisite(s): Graduate level standing

GERO 8810 GRADUATE SEMINAR IN THE BIOLOGY OF AGING (3 credits)

This course provides an in-depth investigation of key topics in the biology of aging for graduate students. The course will be interdisciplinary in nature and focus on topics relevant to gerontology, biology, psychology, neuroscience, and exercise science. Students will learn about theory, primary research, and hypotheses within the biology of aging field. Students will be asked to think critically and apply their knowledge through assignments and class discussions.

Prerequisite(s): graduate level standing

GERO 8856 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)

This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 4850, SOWK 4850, SOWK 8856).

GERO 8920 SPECIAL STUDIES IN GERONTOLOGY (1-3 credits)

Special studies designed around the interests and needs of the individual student in such areas as the psychology, sociology, economics, biology, or politics of aging, as well as operation of various service systems. This independent study may include a literature review or a field project in which experience is gained in the community, identifying and analyzing needs and services related to older people.

Prerequisite(s): Instructor permission

GERO 8940 GRADUATE PRACTICUM (3 credits)

This course provides the opportunity to students to share field experiences; to obtain guidance concerning various relationships with agency, staff and clients; and to develop a broadly based perspective of the field of aging.

Prerequisite(s): Nine hours in gerontology and permission. Students must be enrolled in the certificate or degree program (MA, PhD) as well as have a minimum GPA of 3.0. Not open to non-degree students.

GERO 8956 PALLIATIVE CARE: MENTORING A HEALTHCARE APPROACH OF PATIENT-CENTERED CARE WITH FOCUS ON WELL-BEING (3 credits)

This course provides a foundation for the recognition of the need to implement palliative medical care. Using current texts and literature, video and podcast lectures by colleagues, and review of cases and topics, a student will understand the definitions, purposes, and benefits of palliative medical care. The student will learn the avenues and ways to implement palliative care to provide care that promotes well-being. (Cross-listed with GERO 4950).

GERO 8980 LITERATURE AND AGING (3 credits)

In this course, we will examine the experience of aging and of being an older person through the world's great literature. We will study this universal experience by reading novels, short stories, poems, plays, and personal narratives from across different eras and cultures. In this way we hope to come to a better understanding of: 1) the older adults we serve as patients and clients; 2) our own aging process and those of our close family members and friends; 3) literary works and their relevance in our everyday lives.

Prerequisite(s): Graduate students only.

GERO 8986 COUNSELING SKILLS IN GERONTOLOGY (3 credits)

This course is intended to help develop basic counseling skills for application in gerontology. (Cross-listed with COUN 8986, GERO 4980).

Prerequisite(s): Not open to non-degree graduate students.

GERO 8990 THESIS (1-6 credits)

Independent research project required of all students working toward the Master of Arts degree. The thesis is written under the supervision of the thesis adviser and the thesis committee.

Prerequisite(s): Permission from adviser.

GERO 9020 GRADUATE SEMINAR IN STATISTICAL APPLICATIONS (3 credits)

Provides an introduction to statistical methods and data management used in the social, behavioral and health sciences.

GERO 9110 THEORIES OF AGING (3 credits)

An overview of social gerontology with an emphasis on the interplay between social, psychological and physical elements in later life. Restricted to graduate students only; required of gerontology students. (Cross-listed with SOC 9110).

Prerequisite(s): Graduate.

GERO 9460 SEMINAR IN AGING AND HUMAN BEHAVIOR (3 credits)

This course will examine in detail age-related changes in psychological processes and explore the implications of these changes for behavior. The course is intended primarily for graduate students in psychology and gerontology. (Cross-listed with PSYC 9460).

Prerequisite(s): Graduate standing in gerontology or psychology or permission of the instructor.

GERO 9990 DISSERTATION (1-6 credits)

This course provides doctoral students pursuing the PhD in Human Sciences with a specialization in gerontology to complete a dissertation research plan. The course learning activities will focus on the completion of an approved dissertation.

Prerequisite(s): Admittance to the PhD in Human Sciences with a specialization in gerontology. Not open to non-degree graduate students.

Health & Kinesiology (HEKI)

Health & Kinesiology Graduate Courses

HEKI 8000 SPECIAL STUDIES (1-3 credits)

A series of intensive courses - scheduled as regular seminars or workshops according to purpose.

Prerequisite(s): Permission of department.

HEKI 8030 RESEARCH IN HEALTH & KINESIOLOGY (3 credits)

The course introduces students to scientific writing, quantitative research design, and statistical methods. Considerable emphasis is placed on evaluation of research in scholarly publications. A research proposal in the form of a grant proposal is written as one of the course requirements. Students will develop the skills necessary to analyze study designs in existing literature and create a research proposal. (Cross-listed with BMKI 9001).

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

HEKI 8100 RESEARCH PROJECT (1-3 credits)

Individual or group study and analysis of specific problems in health, physical education or recreation.

Prerequisite(s): Permission of instructor.

HEKI 8220 PROBLEMS & ISSUES IN HPER (3 credits)

An examination of current problems and issues in HPER that relate to the general aims and purposes of HPER.

HEKI 8300 ANALYSIS OF RESEARCH AND LITERATURE IN HUMAN MOVEMENT (3 credits)

Survey of research and literature in Human Movement for the purpose of orienting the candidate to possible areas of research and developing an understanding of and appreciation for writings in the field. The course may be offered focusing on only one specific area in HPER.

Prerequisite(s): HPER 8030 or HEKI 8030

HEKI 8500 QUALITATIVE RESEARCH METHODS (3 credits)

An examination of qualitative research methods. Emphasis on the broad application of qualitative research in public health, education, and social sciences. Course topics include research design, data collection, data analysis, and reporting.

Prerequisite(s): Not open to non-degree graduate students.

HEKI 8850 EXERCISE FOR SPECIAL POPULATIONS (3 credits)

The course will examine the physiological and medical limitations imposed on people with various common chronic diseases/conditions including arthritis, osteoporosis, exercise-induced asthma, obesity, diabetes, hypertension and pregnancy. Special groups such as children and elders will be discussed. Content will emphasize the etiology and guidelines for exercise testing, prescription, and supervision. (Cross-listed with BMKI 9851).

Prerequisite(s): PE 4940/KINS 4940 or PE 8946/KINS 8946

HEKI 8990 THESIS (1-6 credits)

The thesis experience is designed to help develop the candidate's ability to execute accepted procedures associated with the research process appropriate to the Master's degree.

Prerequisite(s): Permission. Not open to non-degree graduate students.

History (HIST)

History Graduate Courses

HIST 8010 RESEARCH DIRECTED READINGS PROJECT (1-3 credits)

Special research problems and or directed readings arranged individually with students on topics not explored in other graduate offerings. If students do not complete all the readings during the semester in which they enroll in the course, they must complete all the readings within one academic year of their enrollment.

Prerequisite(s): Minimum of nine graduate hours in history completed. Permission of history Graduate Program Chair. Open only to students enrolled in the History MA program. Not open to non-degree graduate students.

HIST 8016 RELIGION IN EARLY AMERICA (3 credits)

This course examines the history and nature of religion in North America to c. 1770 with an emphasis on the British colonies. (Cross-listed with HIST 4010, RELI 4050).

Prerequisite(s): Must be a graduate student enrolled in History MA program. Not open to non-degree graduate students.

HIST 8020 GRADUATE INTERNSHIP (1-3 credits)

The graduate student is supervised by a member of the faculty in a project involving part-time employment or service with a museum, historic site, historical society or other institution. Work hours, activities, reporting requirements, and responsibilities must be specified in written agreement between employer, student, Graduate Program Chair, and/or supervising faculty member. Normally taken for 3 hours. If a hosting institution cannot commit to a supervised workload which the departmental advisor and/or Graduate Program Chair believe to be equivalent to 3 hours, course may be taken for fewer hours. In such circumstances, student may repeat course up to a total of 3 hours.

Prerequisite(s): Must be in the History/History & Government MA program, have completed at least 6 hours of graduate credit, and have History Graduate Program Chair (GPC) and/or supervising faculty approval before enrolling. Not open to non-degree graduate students.

HIST 8030 GRADUATE HISTORICAL METHODOLOGY (3 credits)

This course will examine various historical methodologies which have been employed by historians to provide structural interpretations of the past. Although exact content may vary, examples of methodologies include the Whig Interpretation, Marxism, Structuralism, Postmodernism, and the New Social History.

Prerequisite(s): Graduate student in History/History & Government program. Not open to non-degree graduate students.

HIST 8046 HOMESCAPES: THE MATERIAL CULTURE OF EVERYDAY LIFE IN AMERICA, 1600-1860 (3 credits)

This course examines the culture and technologies of house forms and work landscapes in North America, 1600-1860. (Cross-listed with HIST 4040).

Prerequisite(s): Graduate student in history, or permission of the graduate chair.

HIST 8056 HISTORY OF WOMEN IN AMERICA TO 1875 (3 credits)

This course examines the history of women in what is now the United States from the seventeenth century to 1875. Topics include law, work, sexuality and reproduction, slavery, cross-cultural encounters, religion, political activism, and the transformation of gender by the market and industrial revolutions. (Cross-listed with HIST 4050).

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

HIST 8066 HISTORY OF WOMEN IN AMERICA FROM 1875 - 1992 (3 credits)

This course examines the history of women in the United States from 1875 to 1992. Topics include law, work, sexuality and reproduction, immigration, civil rights, political participation and party politics, and changes to the American gender system, including family structure and employment. (Cross-listed with HIST 4060, WGST 4060, WGST 8066).

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

HIST 8076 SLAVERY AND RACE RELATIONS IN THE AMERICAS (3 credits)

Slavery and Race Relations in the Americas examines the historical relationship between the trans-Atlantic slave trade and American race relations, connecting the enslavement of Africans in the Americas to race relations in the Caribbean, Latin America, and the United States. (Cross-listed with HIST 4070, BLST 4650, BLST 8656, LLS 4650, LLS 8656).

Prerequisite(s): Graduate standing

HIST 8086 THE BLACK ATLANTIC (3 credits)

This course examines the cultural and ethnic history of Black people who comprised "The Black Atlantic." The course is organized historically and begins with a brief overview of the European slave trade on the West African Coast in the 15th century. From there, we look critically at the arrival of Africans to the New World, examine varieties of slavery and freedom in the Americas, and conclude with slave revolts and emancipation activism in the 18th and 19th century. We will use the Haitian Revolution (in which Haiti became the first country to be founded by formerly enslaved people) as a special case study, a conduit for our exploration of this socio-cultural, economic, and Diasporic space. (Cross-listed with BLST 8356, BLST 4350, HIST 4080).

Prerequisite(s): Graduate standing

HIST 8146 COLONIAL AMERICAN HISTORY (3 credits)

This course provides a study of the settlement and development of North America to c. 1763 with an emphasis on the British colonies. (Cross-listed with HIST 4140).

HIST 8156 THE AMERICAN REVOLUTIONARY ERA, 1763-89 (3 credits)

This course examines the period of the American Revolution beginning with the changed circumstances in the British North American colonies following the end of the French and Indian War and concluding with the ratification of the United States Constitution. The course analyses social, political, and military themes from this period. (Cross-listed with HIST 4150).

Prerequisite(s): graduate standing

HIST 8166 THE EARLY AMERICAN REPUBLIC: FROM THE CONSTITUTION TO THE SECOND PARTY SYSTEM (3 credits)

This course covers an important period of American history beginning with the first federal government and ending with an analysis of the consolidation of the Second American Party system. Topics to be covered include the earliest debates over the nature of the federal government, foreign relations, the emergence of political parties, and the rise of the Jacksonian democracy. (Cross-listed with HIST 4160).

Prerequisite(s): graduate standing

HIST 8176 HISTORY OF THE AMERICAN WEST (3 credits)

An examination of the unique aspects of the region of the United States known as "the west." Students will learn about the multiple peoples, cultures, and environments which combined to form this region. Content will also include an examination of how the myths of the west were created. (Cross-listed with HIST 4170).

Prerequisite(s): Graduate standing

HIST 8186 THE AMERICAN CIVIL WAR PERIOD: FROM THE TEXAS REVOLUTION THROUGH RECONSTRUCTION (3 credits)

This course focuses on the period of the American Civil War. It will begin with the background to, and events of the Texas Revolution. It will then consider the growing national tensions over slavery, particularly as a consequence of the Mexican-American War before examining the immediate causes of the civil war. The course will then examine the war itself before concluding with analysis of Reconstruction. (Cross-listed with HIST 4180).

Prerequisite(s): graduate standing

HIST 8246 EMERGENCE OF MODERN AMERICA (3 credits)

This course examines American history from the end of Reconstruction to the end of World War II. Among the topics covered are western expansion, industrialization, immigration, and the expanding international footprint of the United States. (Cross-listed with HIST 4240).

Prerequisite(s): graduate standing

HIST 8336 U.S. CONSTITUTIONAL HISTORY TO 1860 (3 credits)

This course will examine the history of the United States constitution from its promulgation in 1787 through the end of the Civil War. This will include consideration of both English and colonial precedents. The course will analyze the process of writing and ratifying the document in the late 1780s and will then look at some of the key legal decisions between 1790 and 1860. (Cross-listed with HIST 4330).

Prerequisite(s): graduate standing

HIST 8346 U.S. CONSTITUTIONAL HISTORY SINCE 1860 (3 credits)

This course examine the increasingly important role played by competing interpretations of the United States constitution since the outbreak of he Civil War. This will include the emergence of the idea of a "living constitution," the extension of constitutional guarantees to the states, and examination of critical Supreme Court cases. (Cross-listed with HIST 4340).

Prerequisite(s): graduate standing

HIST 8366 THE U.S. IN THE COLD WAR (3 credits)

This course will examine the impact of the Cold War in modern American history on two levels. First it will seek to understand how the Cold War influenced American foreign policy decisions since the end of World War II and examine the long term consequences of those policies for both the U.S. and the world. Secondly, this course will examine how the Cold War impacted or shaped American culture, domestic politics, and social movements in the postwar period. (Cross-listed with HIST 4360).

Prerequisite(s): Graduate student in history, or permission of the graduate chair.

HIST 8406 HISTORY OF NATIVE AMERICAN INDIGENOUS PEOPLES (3 credits)

This survey of North American Indigenous peoples provides a historical overview of the peoples and their interactions with settlers, wars, policies, and other events that have shaped modern Tribal and U.S. relations. (Cross-listed with HIST 4400, NAMS 4400).

Prerequisite(s): Graduate standing

HIST 8416 HISTORY OF NEBRASKA (3 credits)

An examination of the history of Nebraska from Native American occupation to the present, with emphasis on environmental factors that have shaped the region and its people. (Cross-listed with HIST 4410).

Prerequisite(s): Graduate standing

HIST 8426 THE SIOUX TRIBE (3 credits)

A cultural and historical study of the Sioux tribes emphasizing the earliest historic period to the present. (Cross-listed with HIST 4420).

HIST 8456 NATIVE AMERICAN ENVIRONMENTALISM (3 credits)

This course studies North American tribal subsistence and natural resource use practices from the early historic period to the present, Native Americans as environmentalists, and modern tribal environmentalism. (Cross-listed with HIST 4450).

HIST 8466 AMERICAN IMMIGRATION HISTORY (3 credits)

A study of American immigration from the colonial era to the present. Topics covered include Old World origins of migration, the old immigrants from western Europe, the new immigrants from southern and eastern Europe, non-European immigrants, native-born American responses to immigrants, the periods of immigrant adjustment in the new physical environment, and the contemporary revival of ethnicity. (Cross-listed with HIST 4460).

Prerequisite(s): Graduate student standing or permission of the graduate chair

HIST 8486 THE UNITED STATES IN THE 1960S (3 credits)

This course is a review of the economic, social, cultural, and political changes that marked the United States in the 1960s. (Cross-listed with HIST 4480).

HIST 8536 EUROPE: RENAISSANCE & REFORMATION (3 credits)

This course will examine European history from the fifteenth through the seventeenth centuries. Among the topics which will be covered are the Renaissance, the Protestant Reformation, the Catholic Reformation, Wars of Religion, the beginning of European overseas expansion, and the Scientific Revolution. In addition to examining the religious ideas and revolutions of the period, there will also be analysis of economic, social, and political change. (Cross-listed with HIST 4530).

Prerequisite(s): graduate standing

HIST 8546 MEDIEVAL EUROPE (3 credits)

A dive into the history of medieval Europe through the stories of men and women, their beliefs, struggles, contradictions and achievements. (Cross-listed with HIST 4540).

Prerequisite(s): graduate standing

HIST 8616 TUDOR AND STUART ENGLAND (3 credits)

English history from the end of the Wars of the Roses in 1485 to the death of Queen Anne in 1714. The course will examine the efforts of the Tudors and Stuarts to establish dynasties, the religious upheavals in the sixteenth and seventeenth centuries, changes in the role of Parliament, the Civil Wars, and the beginning of English overseas expansion. (Cross-listed with HIST 4610).

Prerequisite(s): graduate standing

HIST 8726 THE HOLOCAUST (3 credits)

An interdisciplinary approach in a seminar oriented format discussing various aspects of the most notorious genocide in modern times. The course will explore the history of anti-Semitism, the rise of Nazi Germany and the road to the 'final solution.' It will further explore psychological, sociological and intellectual aspects of the dark side of humanity. (Cross-listed with HIST 4720, RELI 4160, RELI 8166).

HIST 8736 ISRAEL AND PALESTINE (3 credits)

This course will outline the history of the conflict over Palestine/Israel, examine its present status, and explore its likely unfolding in the future. It seeks to provide a broad and concise understanding of the historical events which have shaped the relations between Israelis and Palestinians, as well as a keen awareness of the challenges and prospects related to their future. (Cross-listed with HIST 4730).

HIST 8746 COMPARATIVE GENOCIDE (3 credits)

This course explores genocide and its many forms throughout history. It begins by considering the varied elements and definitions of the term. Next it looks at what makes people kill before going on to examine many different genocides throughout history. Finally, the course addresses the prosecution and prevention of genocide. (Cross-listed with HIST 4740).

Prerequisite(s): Graduate student enrolled in History MA program. Not open to non-degree graduate students.

HIST 8806 U.S. AND THE MIDDLE EAST (3 credits)

This course focuses on the evolution of US relations with and Foreign Policy vis-a-vis the Middle East over the last six decades. It seeks to illuminate the constant features in contrast to the changes in direction, examining the agendas of varying administrations as well as the treatment by the media of this region. It follows a chronological framework with particular emphasis on key thematic topics. While emphasizing the political dimensions of international relations, the class will also explore cultural and social aspects of the ties between the US and the peoples of the Middle East. (Cross-listed with HIST 4800).

Prerequisite(s): Not open to non-degree graduate students

HIST 8826 MESOPOTAMIA AND PRE-ISLAMIC PERSIA (3 credits)

Examination of the Ancient Near East from the emergence of its earliest civilizations—Sumer, Akkad and Babylonia—through the Bronze and Iron Ages, concluding with Persia in the Common Era (CE) just before the rise of Islam. (Cross-listed with HIST 4820).

HIST 8836 ANCIENT GREEK MYTH, RELIGION & MAGIC (3 credits)

Students will examine the impact of ancient Greek myth and belief on actual religious practice: e.g., "lived" religion. Areas covered include formal civic sacrifice, wartime religion, family and personal devotions, mystery cults, oracles and seers, plus the popular pursuit of magic. (Cross-listed with HIST 4830, RELI 4830, RELI 8836).

Prerequisite(s): Junior standing

HIST 8846 ALEXANDER THE GREAT AND THE MACEDONIAN ORIGIN (3 credits)

Examination of the conquests of Alexander the Great, as well as controversies in Alexander studies. Includes discussion of both the Macedonian culture that produced him and the career of his father, Philip II. (Cross-listed with HIST 4840).

Prerequisite(s): Graduate standing

HIST 8856 ROME AND THE EARLY CHURCH (3 credits)

Students will cover Roman-Christian-Jewish interactions from just before the birth of Jesus of Nazareth to c. 450 CE, with an emphasis on social and political history. We catalogue Christianity's transformation from its origins as a Jewish movement and an illegal "superstition" to the dominant religion of the Roman empire. (Cross-listed with HIST 4850, RELI 4850, RELI 8856).

Prerequisite(s): Junior standing.

HIST 8916 TOPICS IN HISTORY (3 credits)

This course introduces students to specialized subject matter not available in existing History courses. Course may be repeated as long as the topic is substantially different each time. Course may be cross-listed with other programs e.g. Native American Studies (NAMS), Women's and Gender Studies (WGST) when topics are appropriate. (Cross-listed with HIST 4910).

Prerequisite(s): Graduate standing

HIST 8990 THESIS (1-6 credits)

Thesis research project written under supervision of an adviser.

Prerequisite(s): Completion of twenty-four hours of History or History & Government graduate work. Permission of History Graduate Program Chair. Not open to non-degree graduate students.

HIST 9100 SEMINAR IN HISTORY (3 credits)

This seminar guides advanced graduate students through critical readings and practices in historical research or historiography. Topics will vary and course can be repeated under different topics.

Prerequisite(s): Graduate students in History/History & Government who have completed HIST 2980 or equivalent, or approval of GPC. Non-History grad students may be admitted after consultation with History GPC and instructors. Not open to non-degree graduate students.

HIST 9200 COLLOQUIUM (3 credits)

The colloquium guides advanced graduate students through the historiography of a specific subject. Topics will vary and course can be repeated under different topics. Open only to students enrolled in MA program in history unless permission granted by History Department Graduate Program Chair.

Prerequisite(s): Graduate students in History/History & Government who have completed HIST 2980 or equivalent, or approval of GPC. Non-History grad students may be admitted after consultation with History GPC and instructors. Not open to non-degree graduate students.

Information Systems & Quantitative Analysis (ISQA)

Information Systems & Quantitative Analysis Graduate Courses

ISQA 8016 BUSINESS INTELLIGENCE (3 credits)

This course intends to provide graduate students in-depth exposure to the growing field of business intelligence. Business intelligence (BI) consists of the set of concepts and techniques used to analyze business data in support of decision-making and planning. BI spans a number areas of management information systems, including Decision Support Systems (DSS), Enterprise Resource Planning (ERP), Data Warehousing, Knowledge Management, Customer Relationship Management, Data Mining, and others.

Prerequisite(s): (ISQA 4150 or ISQA 8156) and ISQA 8040 and ISQA 8050. Not open to non-degree graduate students.

ISQA 8030 INFORMATION SYSTEMS AND ETHICS (3 credits)

This course gives you an introduction to organizations and the role that information and information systems play in supporting an organization's operations, decision-making processes, quality management, and strategic activities. The course provides an introduction to the management of information systems function, the strategic and regulatory issues of telecommunications, and ethical and legal issues related to information systems.

Prerequisite(s): Admission into the MS in MIS program.

ISQA 8040 AN OVERVIEW OF SYSTEMS DEVELOPMENT (3 credits)

The course presents an overview of the systems development lifecycle and database development. The course will focus on theory, current tools and techniques that the system developer can use to develop and document information systems. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8050 DATA ORGANIZATION AND STORAGE (3 credits)

The course will provide concepts of data organization, data storage, and data transfer through computer networks. The performance implications of various design decisions will be explored. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8060 RESEARCH IN MIS (3 credits)

This course covers research methods and their application to the development and evaluation of management information systems. Also covered is the relationship between organization theory and IS research.

Prerequisite(s): CIST 2500, CIST 2100, and ISQA 8040, or permission of the instructor.

ISQA 8070 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (1 credit)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular course offerings.

ISQA 8080 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (3 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s): 1) Permission of the instructor. 2) Additional prerequisite courses may be required for particular course offerings.

ISQA 8086 SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS (1-5 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ISQA 4000)

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 8090 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (2 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular course offerings.

ISQA 8106 INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION (3 credits)

This course examines the frameworks and tools used to develop an organization's information system architecture. It provides the analytical skills and conceptual frameworks with which to make recommendations and decisions regarding the integration of information technology components into an information system architecture. (Cross-listed with ISQA 4100)

Prerequisite(s): CIST 2100 and ISQA 3310

ISQA 8136 INFORMATION TECHNOLOGY FOR DEVELOPMENT (3 credits)

Information Technology for Development (ITD) is the implementation and evaluation of information technology infrastructures to stimulate economic, social and human development. In this service-learning course, students will learn and apply ITD concepts for developing and adding value through IT by working with small business entrepreneurs in Omaha or rural Nebraska. Students will evaluate micro-business technology needs, prepare business technology plans, provide training, and implement appropriate solutions, to the extent possible within a semester class. (Cross-listed with ISQA 4130)

Prerequisite(s): Though not required, the following courses or their equivalent would provide the necessary background : CIST 1100, CIST 1300, ISQA 3210, ISQA 3310, ISQA 3400. Not open to non-degree graduate students.

ISQA 8156 ADVANCED STATISTICAL METHODS FOR IS&T (3 credits)

This course emphasizes the application and interpretation of statistical methods including design of experiments, analysis of variance, multiple regression, and nonparametric procedures and the use of statistical computer packages. The intent is to develop quantitative abilities needed for quantitatively intensive jobs and for advanced study in management information systems, computer science and information technology. (Cross-listed with ISQA 4150)

Prerequisite(s): CIST 2500 or equivalent (at least one course in statistics)

ISQA 8160 APPLIED DISTRIBUTION FREE STATISTICS (3 credits)

The primary objective of this course is to expose students to methods of analyzing data from non-normal populations including binomial tests, contingency tables, use of ranks, Kolmogorov-Smirnov type statistics and other selected topics.

Prerequisite(s): Admission to MS program in Management Information Systems or permission of instructor. This course assumes prior knowledge with basic descriptive and inferential statistics from an introductory undergraduate course (e.g., CIST 2500).

ISQA 8166 INTRODUCTION TO ENTERPRISE RESOURCE PLANNING (3 credits)

Introduction to Enterprise Resource Planning (ERP) is designed to expose students to the primary enterprise application that forms the information systems (IS) infrastructure for most large organizations today. The primary purpose of this course is for students to gain an understanding of the enterprise wide, cross functional nature of ERP software. In the process of learning about ERPs, the students develop "hands on" experience with the largest and most well-known ERP application, SAP. (Cross-listed with ISQA 4160, SCMT 4160)

Prerequisite(s): CIST 2100 or equivalent. Not open to non-degree graduate students.

ISQA 8176 DIGITAL SUPPLY CHAIN & LOGISTICS (3 credits)

Global Supply Chains are being disrupted by digital transformation driven by emerging technologies such as IoT (internet of things) and AI/ML (Artificial Intelligence/Machine Learning). This course will take a closer look at global supply chains and logistics with an emphasis on the impact of digitalization. We will explore the typical global supply chain processes and how state-of-the-art and emerging technologies impact them. Thus, the class views global digital supply chains by integrating business and technological perspectives. The course will start with an overview of technologies relevant to digital supply chains. We will then discuss digitalization strategy and digital supply chains, fundamental GSCM (Global Supply Chain Management) processes and their potential for digitalization, and discussion of IT/software systems, IoT, AI/ML, Data Analytics/Visualization, and related facets that impact digital supply chains. The course will culminate with an integrated case study and/or research paper (graduate). (Cross-listed with ISQA 4170).

Prerequisite(s): Permission of instructor. It is preferable that students have taken an introductory supply chain class or have some experience in the transportation, logistics and supply chain management sector. Undergraduate students must have Junior standing.

ISQA 8180 ELECTRONIC COMMERCE (3 credits)

Electronic Commerce is the digital enablement of transactions between multiple parties. A multitude of technologies, tools and applications have brought about changes in business, and society that require careful consideration. Students are given an overview of electronic commerce business models and required to apply these to solve business problems or take on opportunities presented. They will cover topics such as social networking, electronic markets, and political and ethical issues associated with electronic commerce, and business plans for technology ventures. They will apply these concepts using Web 2.0 tools, mobile applications and website design assignments.

ISQA 8196 PROCESS REENGINEERING WITH INFORMATION TECHNOLOGY (3 credits)

Business process reengineering issues are examined. Reengineering concepts and methods are introduced. Additional special project(s) are required. SAP will be introduced. (Cross-listed with ISQA 4190)

Prerequisite(s): CIST 2500; prerequisite/co-requisite ISQA 4110.

ISQA 8206 INFORMATION AND DATA QUALITY MANAGEMENT (3 credits)

The course primarily focuses on developing an in-depth understanding of Data and Information Quality (DQ and IQ) concepts and issues. On completing this course students will be able to understand and use DQ and IQ Concepts in Information Systems projects, be able to recognize various patterns of Data and Design Deficiencies in Systems and be able to suggest appropriate DQ and IQ improvement plans in light of known deficiencies in systems. (Cross-listed with ISQA 4200)

Prerequisite(s): CIST 2500

ISQA 8210 MANAGEMENT OF SOFTWARE DEVELOPMENT (3 credits)

This course should encourage you to think critically about aspects of software development that make it difficult and strategies to mitigate these challenges. This course integrates concepts from software engineering, management science, psychology, and organizational behavior to identify, understand, and propose solutions to problems associated with software development. We examine and consider issues from various perspectives, such as the project manager, development team, senior management, and project sponsor. This course prepares students for various roles within a software development effort including leadership positions in software development. Students will practice software project management and agile methods of managing projects in a semester long team project using contemporary project and development methods.

Prerequisite(s): ISQA 8040 or equivalent. Not open to non-degree graduate students.

ISQA 8220 ADVANCED SYSTEMS ANALYSIS AND DESIGN (3 credits)

This course is a systems analysis and design course for systems and business analysts. The course presents an overview of object-oriented system analysis and design. The course will then focus on theory, best practices, and modern methodologies that analysts can use to analyze and design information systems.

Prerequisite(s): ISQA 8040 or (ISQA 4110 and ISQA 4120) or equivalent and ISQA 8050 or ISQA 3310 or equivalent

ISQA 8306 DATABASE ADMINISTRATION (3 credits)

This course is designed to give students an applied, practical introduction to database administration. Students will gain an understanding of the functioning of a database management system and its relationship to the computing environment in which it runs. They will learn the concepts, principles, and techniques necessary to carry out such functions as database object creation, storage management, capacity planning, performance tuning, backup and recovery, and security management. Each semester the course will focus on one commercial database management system (DBMS), such as Oracle. (Cross-listed with ISQA 4300)

Prerequisite(s): ISQA 8040 or ISQA 3310 or CSCI 4850. Not open to non-degree graduate students.

ISQA 8310 IT INFRASTRUCTURE & CLOUD COMPUTING (3 credits)

This course provides a graduate-level introduction to the business and technical decisions around technical infrastructure. It covers topics related to computer and systems architecture and communications networks, with a focus on the technical and business decisions around technology. Students completing the course will be able to understand and design network infrastructure, evaluate cloud computing offerings, and communicate their decisions. The course covers hardware, software, and cloud computing technologies.

ISQA 8340 APPLIED REGRESSION ANALYSIS (3 credits)

The primary objective of this course is to expose students to regression models and applications with particular emphasis on applying these concepts to IT research. Topics to be discussed include: Foundations of regression analysis using least squares procedures; model formulation, stepwise regression, transformations; graphical methods, estimation; inference; influence diagnosis; matrix formulation, multicollinearity, time series, and nonlinear models.

Prerequisite(s): ISQA 4150 or ISQA 8156, not open to non-degree graduate students.

ISQA 8380 ENTERPRISE ARCHITECTURE AND SYSTEMS INTEGRATION (3 credits)

This course is designed to give students grounding in the concepts, issues, and tools needed to manage enterprise architecture, distributed systems & Internet-based environments. The goal of the course is to equip students to make the architecture and infrastructure-related decisions needed for successful development and use of contemporary client/server and Internet-based systems. Topics include middleware, architecture, XML, JSON, web services, service-oriented architecture, enterprise application integration, distributed computing services, Model View Controller (MVC) development frameworks.

Prerequisite(s): ISQA 8310 and ISQA 8050 or equivalent; permit required.

ISQA 8410 DATA MANAGEMENT (3 credits)

The course provides in-depth coverage of such areas as: the relational model, SQL, data modeling, data quality management, database design, data warehousing, business intelligence, document and content management, NoSQL systems, and data governance. The course offers a mix of theoretical treatment and hands-on application. Current DBMS and data modeling software will be used.

Prerequisite(s): ISQA 8050 or equivalent, permit only.

ISQA 8420 MANAGING THE I.S. FUNCTION (3 credits)

The course provides a focus on the business management implications of the information explosion. The course is organized around a management audit of the information services activity to help present and future managers recognize and implement effective information services management.

Prerequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8450 NOSQL AND BIG DATA TECHNOLOGIES (3 credits)

The course will cover topics in the area of NoSQL and Big Data management. The course is intended to get students familiarized with NoSQL and Big Data technologies, explore how these database technologies differ conceptually from traditional relational database technologies, understand their applications, uses, advantages, and disadvantages, and provide hands-on experience with NoSQL and Big Data databases. The course offers a mix of theoretical treatment and hands-on application of the discussed NoSQL and Big Data technologies.

Prerequisite(s): Prior exposure to data management is expected. The prereq is: ISQA 3310, ISQA 8040, CSCI 4850, or work experience that has given you a comparable grounding in database concepts and technologies; in this case permission by the instructor is needed.

ISQA 8460 INTERNET OF THINGS (IOT), BIG DATA AND THE CLOUD (3 credits)

This course introduces the Internet of Things (IoT). It provides an overview of a number of technologies and research disciplines that enable the Internet to reach out into the real world of physical objects. In the future, the "Things" in question may have identities and virtual personalities, operating in smart spaces using intelligent interfaces to connect and communicate with the social, environmental, and user context.

Prerequisite(s): Basic Web Development using HTML/CSS and some MVC framework. The equivalent of two semester exposure to programming.

ISQA 8525 GRAPHICAL USER INTERFACE DESIGN (3 credits)

This course is an introduction to interaction design with a primary emphasis on designing usable and useful computer interfaces. Students will learn the principles of interface design grounded in a fundamental understanding of human cognitive processes. They will learn how end-users develop and use mental models of interaction and will apply this knowledge to the design of interfaces for real-world applications. A design project will challenge students to plan their own designs, to develop interfaces and to integrate them into a working application prototype, to test their application with real users, and to effectively communicate the overall results. (Cross-listed with ISQA 3520)

Prerequisite(s): CIST 1300

ISQA 8546 COMPUTER SECURITY MANAGEMENT (3 credits)

The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST4540, CYBR 4540, CYBR 8546)

Prerequisite(s): IASC 4360 or permission of the instructor.

ISQA 8560 INFORMATION WARFARE AND SECURITY (3 credits)

This course will study the nature of information warfare, including computer crime and information terrorism, as it relates to international, national, economic, organizational, and personal security. Information warfare policy and ethical issues will be examined.

Prerequisite(s): CIST 2100 or BSAD 8030 or ISQA 8030, or permission of instructor required.

ISQA 8570 INFORMATION SECURITY POLICY AND ETHICS (3 credits)

The course will cover the development and need for information security policies, issues regarding privacy, and the application of computer ethics. (Cross-listed with IASC 8570)

Prerequisite(s): CIST 2100 or BSAD 8030, or permission of instructor.

ISQA 8580 SECURITY RISK MANAGEMENT AND ASSESSMENT (3 credits)

The purpose of this course is to prepare the student for managing information security at the organizational level. This course will combine concepts from strategic management, decision science and risk analysis to prepare the student to integrate security issues into an organizational strategic planning process.

Prerequisite(s): CIST 2100 or ISQA 8030. Not open to non-degree graduate students.

ISQA 8600 FROM DATA TO DECISIONS (3 credits)

This course focuses on inquiry-driven data preparation and exploratory analysis skills for audience-driven, decision-oriented data analysis. Students gain experience in data evaluation, cleaning, documentation, and exploration with basic descriptive statistics and visualizations.

ISQA 8700 DATA MINING: THEORY AND PRACTICE (3 credits)

This course provides students theoretical issues as well as practical methods for conducting data mining process, including the implementation of a warehouse. After covering the essential concepts, issues, techniques to build an effective data warehouse, this course emphasizes the various techniques of data mining, such as association, classification, clustering and prediction for on-line analyses within the framework of data warehouse architectures. This course also promotes students to conduct a real-life data analyzing project in Big Data Era.

Prerequisite(s): ISQA 8050 and ISQA 8310 and ISQA 8040, not open to non-degree graduate students.

ISQA 8720 APPLIED STATISTICAL MACHINE LEARNING (3 credits)

This course focuses on advanced techniques in the analysis and evaluation of data, using both supervised and unsupervised methods. It covers the main types of statistical learning models needed for complex data analytics problems, as well as aspects of model development and optimization.

Topics include: Linear and Non-Linear Regression Models, Classification, Resampling Methods, Model Selection and Regularization, Decision Trees, Model Boosting and Bagging, Support Vector Machines, and Clustering methods. This is an applied, hands-on course that will use a state-of-the-art statistical tool to implement the discussed approaches in assignments and a course project and focuses on the understanding and application of the concepts.

Prerequisite(s): ISQA 8156 (B- grade or better) and the following topics: The equivalent of two classes of statistics and/or advanced mathematics and a minimum of one semester of applying R in courses and/or projects

ISQA 8736 DECISION SUPPORT SYSTEMS (3 credits)

This course examines a set of information systems which specifically support managerial decision makers: Decision Support Systems, Group Decision Support Systems, Executive Information Systems, Data Warehouses, Expert Systems, and Neural Networks. This course explores the development, implementation, and application of these systems, how these systems can be applied to current business problems, as well as how organizational issues impact the implementation and usage of these systems. (Cross-listed with ISQA 4730)

Prerequisite(s): ISQA 8030 or equivalent.

ISQA 8750 STORYTELLING WITH DATA (3 credits)

This course provides an in-depth study of how to build a compelling story using data for business professionals to make winning arguments, it provides an overview of a number of technologies and research disciplines that enabled the power of data visualization. Data visualization is critical to managing large volumes of data, and can be defined as the science (analytical) and art (design) of manipulating and presenting data for expression and cognitive recognition. Data visualization involves using data in a way that humans can clearly understand, supporting efforts by organization to gain competitive advantage by changing operations, decision-making, and strategic initiatives.

Prerequisite(s): CSCI 1620 or equivalent. Admission into the UNO graduate program, basic web development or work experience with comparable grounding in programing, scripting concepts & technologies and permission by the instructor is needed.

ISQA 8810 INFORMATION TECHNOLOGY PROJECT FUNDAMENTALS (3 credits)

The course will integrate concepts and techniques from management science, psychology, organizational behavior, & administration change to identify, understand & propose solutions to the problems of project management. The purpose of the course is to prepare the graduate for project participation and leadership.

Prerequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8820 PROJECT RISK MANAGEMENT (3 credits)

This course will cover project risk management, i.e., the process of measuring or assessing risk in projects and then developing strategies to manage the risk. The topics covered will include: Risk Management Planning, Risk Identification, Quantitative Risk Analysis, Qualitative Risk Analysis, Risk Response Planning, and Risk Monitoring and Control will be covered in detail. Students will learn how to apply and use the tools and techniques needed to perform these project management tasks. A collection of readings on risk management from the empirical literature coupled with risk management standards from organizations such as IEEE and the Project Management Institute (PMI) will be used to provide the student with an excellent foundation in risk management and control.

Prerequisite(s): ISQA 8810 or permission of instructor.

ISQA 8900 INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS (1-3 credits)

The content of the course will vary. However, both the student and the faculty member must sign an Independent Research Agreement and file it with the Master of Science in Management Information Systems Graduate Program Committee before registration for the course. This agreement will detail the project, the schedule for its completion, the form of the output, the method of evaluation and other relevant information pertaining to the project.

Prerequisite(s): Permission of instructor, and at least 12 hours of course work toward a M.S. in MIS should be completed.

ISQA 8910 INFORMATION SYSTEMS INTERNSHIP (1-3 credits)

Information Systems Internship provides students with an opportunity for practical application and further development of knowledge and skills acquired in the MS MIS degree program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s): Permission of the instructor required. Students must have completed a minimum of 18 credit hours towards the MS MIS program. Not open to non-degree graduate students.

ISQA 8950 CAPSTONE MANAGEMENT INFORMATION SYSTEMS (3 credits)

The course consists of a student executed Information Systems design project providing an in-depth practical experience. It typically covers system conceptualization, analysis, and design. It may also involve prototyping. The project will typically not include the actual implementation of the system. This course replaces the MS in MIS comprehensive exam requirement.

Prerequisite(s): Students must have 6 credit hours or fewer left in the program. Students must have completed all core classes. Not open to non-degree graduate students.

ISQA 8990 THESIS (1-6 credits)

This course is a research project designed and executed under supervision of a thesis supervisory committee. Student will develop skills, including the ability to design, conduct, analyze, and report results in writing (i.e., thesis) of an original, independent, scientific investigation. The student's thesis supervisory committee must approve the project plan.

Prerequisite(s): ISQA 8060 research methods or equivalent. Graduate major in MIS and approval of the thesis supervisory committee. Not open to non-degree graduate students.

ISQA 9010 FOUNDATIONS OF INFORMATION SYSTEMS RESEARCH (3 credits)

This course covers the following areas: (1) information systems as an academic discipline including classic readings in IS and its reference disciplines, (2) theory development and evaluation, (3) research methods applicability in IS.

Prerequisite(s): Doctoral student standing in the information systems areas or with the permission of the instructor; ISQA 8060 or equivalent. Not open to non-degree graduate students.

ISQA 9020 TECHNICAL AND PROCESS ISSUES IN INFORMATION SYSTEMS RESEARCH (3 credits)

This seminar is a survey course on the technical and process issues in information systems research. The course balances the acquisition of knowledge about the conduct of research in technical and process issues with the application of that knowledge to research on information systems. Major topics include: software engineering, programming, data base systems, decision support systems, data warehousing and mining systems, object-oriented systems, adaptive and expert systems, client-service systems, information filtering and multimedia systems, information agents, mobile computing, telecommunications, and electronic commerce.

Prerequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 9010 is recommended. Not open to non-degree graduate students.

ISQA 9030 BEHAVIORAL AND ORGANIZATIONAL ISSUES IN INFORMATION SYSTEMS (3 credits)

This seminar is a survey course on behavioral and organizational issues in information systems research. The course balances the acquisition of knowledge about the conduct of research in behavioral and organizational issues with the application of that knowledge to research on information systems. The course is intended for doctoral students in Information Technology or related areas.

Prerequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 9010 is recommended. Not open to non-degree graduate students.

ISQA 9120 APPLIED EXPERIMENTAL DESIGN AND ANALYSIS (3 credits)

Constructing and analyzing designs for experimental investigations; completely randomized, randomized complete block and Latin-square designs, split-plot designs, incomplete block designs, confounded factorial designs, nested designs, and treatment of missing data, comparison of designs. The course will use computer-assisted analysis and graphic techniques included in software such as Statistical Analysis Software (SAS) or Statistical Package for Social Sciences (SPSS) or R (a programming language that provides a wide variety of statistical and graphical techniques. Similar to the S language).

Prerequisite(s): ISQA 4150 or ISQA 8156 or consent of instructor. Not open to non-degree graduate students.

ISQA 9130 APPLIED MULTIVARIATE ANALYSIS (3 credits)

The use of multivariate analysis for solving business problems. Multivariate Analysis of Variance (MANOVA), factor, cluster, and discriminant analysis techniques in IT research. The course will use computer-assisted analysis and graphic techniques included in software such as Statistical Analysis Software (SAS) or Statistical Package for Social Sciences (SPSS) or R (A programming language that provides a wide variety of statistical and graphical techniques. Similar to the S language).

Prerequisite(s): ISQA 4150 or ISQA 8156 or consent of instructor. Not open to non-degree graduate students.

ISQA 9150 RESEARCH IN INFORMATION TECHNOLOGY (3 credits)

Research methods in Information Technology involves an overview of the research process specific to problems in IT. Students will learn about theories in IT relevant to their areas of research. They will identify key components of research problems in IT, understand different types of research processes, develop research questions, and design research projects. They will learn to construct research instruments that enable them to collect data. They will also learn about the different data collection and analysis tools and techniques. As part of this course, students will take the CITI training and achieve the research readiness they need to succeed in the PhD in IT program.

Prerequisite(s): Permission of the instructor. Not open to non-degree graduate students.

ISQA 9900 ADVANCED RESEARCH IN INFORMATION SYSTEMS (3 credits)

This course provides a format for exploration of advanced research areas that are of interest to doctoral students in the information systems and/or information technology area. The specific research area will vary from semester to semester, in keeping with research interests of faculty and students. Examples of areas include, but are not limited to, e-business technology, mobile commerce, intelligent agents e-enabled decision support, electronic collaboration, computer-mediated communications, human-computer interaction and information assurance.

Prerequisite(s): Admission to PhD program in Information Technology or permission of instructor

IT Innovation (ITIN)

IT Innovation Graduate Courses

ITIN 8000 TECHNOLOGY & INNOVATION STUDIO (3 credits)

ITIN 8000 is a studio course that provides a foundation to incoming MSc ITIN students from all disciplines through self-guided modules covering topics from technology, innovation, design, and computing. Students will use the modules to practice applying and mastering skills in a self-guided collaborative environment. Each module will consist of three levels of difficulty. Student performance will be assessed by students' personal progress and skills improvement as shown by them completing increasingly difficult levels of the modules. Students will be graded on a satisfactory/unsatisfactory basis. The class requires in-person participation and attendance.

Prerequisite(s): Students in the MS in IT Innovation program must register during their first three terms. Not open to non-degree graduate students.

ITIN 8006 SPECIAL TOPICS IN IT INNOVATION (3 credits)

This course is designed to acquaint students with issues which are current to the field or emerging trends in the IT Innovation area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ITIN 4000).

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ITIN 8100 INTERMEDIA (3 credits)

This is an ongoing course that brings together students of the arts and students of scientific disciplines in order to facilitate and promote the creation of intermedia art, and to further explore shared resources, joint research, and exhibition/performance opportunities.

Prerequisite(s): Graduate Standing

ITIN 8210 DESIGN SCIENCE AND THEORY DEVELOPMENT (3 credits)

The purpose of this course is to help students understand theory, theoretical contributions, and design science. Students will approach such questions as: What is a theory? What makes a good theory? Why are theories just theories and not laws? What is not a theory? Following this introduction, we explore design science as a research methodology and Information Technology design theories. Ultimately, students create their own new studies around some design concept.

Prerequisite(s): Graduate standing / permission of the instructor

ITIN 8220 DESIGN PROCESS (3 credits)

Inter-disciplinary design teams will work together to design and innovate products of the future. The design projects in the course are developed to directly address a problem brought forward by a technology company in the Omaha area in order to provide students with a design experience that directly impacts real-world product development. Students will focus on the technological (interface), physical (ergonomics) and aesthetic quality of design, and will learn how to conduct rigorous user studies in a laboratory setting. Teams will be cross disciplinary and consider all aspects of the design, creation, testing, and fabrication of the products.

ITIN 8256 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with BSAD 8726, ENTR 4720, ITIN 4720, MGMT 4720, MKT 4720).

Prerequisite(s): Admission to a graduate program or instructor permission.

ITIN 8266 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, CSCI 8266, ITIN 4260).

ITIN 8300 RESEARCH FOUNDATIONS (3 credits)

This course serves as an introduction to research literature and research methodology in the innovation and creativity research domain. Students are introduced to skills, methodological issues, and bibliographic resources to enhance their ability in critically evaluating and conducting research in the IT Innovation field. Through a series of readings, in-class discussions, and lectures the student will select and define a research question, explore the various types of research designs and complete a literature review. This course is structured to make research meaningful and significant and enable students to write effectively.

Prerequisite(s): CIST 2500 or equivalent

ITIN 8900 INDEPENDENT STUDIES (1-3 credits)

A variable credit course for the graduate student who will benefit from independent reading assignments and research type problems. Independent study makes available courses of study not available in scheduled course offerings. The student wishing to take an independent study course should find a faculty member willing to supervise the course and then submit, for approval, a written proposal (including amount of credit) to the IT Innovation Graduate Program Committee Chair at least three weeks prior to registration.

Prerequisite(s): Written permission required

ITIN 8910 INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the MS in IT Innovation program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s): Students must have completed a minimum of 12 credit hours towards the MS in ITIN program. Instructor permission is required to register. Not open to non-degree graduate students.

ITIN 8940 ITIN CAPSTONE I (3 credits)

The purpose of the Information Technology Innovation (ITIN) capstone courses is for ITIN majors to explore, identify, evaluate, design, construct and implement a new innovative product that leverages information technology and includes an interdisciplinary field of study. The capstone is the culmination product of the specific various disciplines a student has selected as the unique combination for his or her degree. This course serves as part one of the capstone project for the ITIN Masters degree. The two courses for the ITIN capstone project are intended to be completed in two consecutive semesters (Fall/Spring).

Prerequisite(s): Must be pursuing ITIN MS degree and have completed: two sections of ITIN 8000, ITIN 8220, 8300, and 3 hours of upper division courses in interdisciplinary area identified in the student's course plan. Not open to non-degree graduate students.

ITIN 8950 ITIN CAPSTONE II (3 credits)

The purpose of the ITIN capstone courses is for ITIN majors to explore, identify, evaluate, design, construct and implement a new innovative product that leverages information technology and an interdisciplinary field. The capstone is the culmination product for prospective graduate and utilizes the discipline(s) a student has selected as the unique combination for his or her degree. This course serves as part two of the capstone project for the Information Technology Innovation (ITIN) program. The two courses for the ITIN capstone project are taught in two consecutive semesters.

Prerequisite(s): Must be pursuing ITIN MS degree and have completed: three sections of ITIN 8000, ITIN 8220, 8300, 8940 and 6 hours of upper division courses in interdisciplinary area identified in the student's course plan. Not open to non-degree graduate students.

ITIN 8960 THESIS EQUIVALENT PROJECT IN IT INNOVATION (1-6 credits)

This course allows a graduate student to conduct a research project in IT Innovation or a related area. The project is expected to place an emphasis on applied, implementations-based, or experimental research. The process for development and approval of the project must include: 1) apply for eligibility to take ITIN 8960 with a chosen faculty advisor, 2) register for 6 credits of ITIN 8960 to complete the chosen project, 3) participate in a public oral defense of their project work to the Graduate Concentration Committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines.

Prerequisite(s): Permission of graduate advisor. Not open to non-degree graduate students.

ITIN 8990 THESIS (1-6 credits)

This course is required for the Master of Science degree in the MS in IT Innovation Program. The purpose of this course is to conduct original research in IT Innovation, under supervision of a faculty member, culminating in a paper document that represents the student's competency in their chosen field, as well as scholarly contributions. With consultation from their committee, MS in IT Innovation thesis students should be prepared to independently complete the writing of their thesis and successfully defend their thesis.

Prerequisite(s): Graduate major in ITIN and approval of the Thesis Advisory Committee.

ITIN 9300 SOCIAL COMPUTING AND ITS APPLICATIONS (3 credits)

It is indisputable that social media and the Internet more broadly reshaped information disbursement and processing. Digital participation and communication has become the 'new normal' and the dividing line between off- and online communities is increasingly blurred. This leads to specific challenges in the extraction and analysis of online social media data, and the management of new communication.

Prerequisite(s): Open to all currently-admitted doctoral students. Students should have a technical aptitude; experience with at least one web scripting language, (e.g. PHP, rails, python etc) is helpful. Experience with JSON is advantageous but not essential.

Journalism and Media Communication (JMC)

Journalism and Media Communication Graduate Courses

JMC 8046 SOCIAL MEDIA MEASUREMENT AND MANAGEMENT (3 credits)

Social Media Measurement and Management explores the dynamic development of social media platforms within a journalism and media communication context. Students of journalism, broadcasting, public relations, advertising and marketing will examine theories and best practices of social media interaction and engagement. (Cross-listed with JMC 4040).

Prerequisite(s): Good standing as a UNO graduate student.

JMC 8246 PUBLIC RELATIONS CASE STUDIES (3 credits)

The course is designed to enable the student: 1) to integrate issue-management and decision-making theoretical models with the communication theory and research techniques presented in JMC 3230/ JMC 8236 and 2) to apply professional judgment to the public relations problem-solving process through the development of structured analysis of historical cases. (Cross-listed with JMC 4240).

JMC 8266 MEDIA RELATIONS (3 credits)

This course focuses on the communication tools used in media relations, the nuances of working with reporters from press and various media, news writing, news judgment, strategic planning, and the application of communication theories in understanding the relationship between news organizations and media relations representatives for organizations and corporations. (Cross-listed with JMC 4260).

JMC 8316 MEDIA & POLITICS (3 credits)

An in-depth study of the impact of the media on political communication. This course will explore the symbiotic relationship of media and political communication, including the influence of traditional mass media, digital media, and social media on the political communication process. Students will delve into media theories and critically examine the influence of the media on the political communication process. (Cross-listed with JMC 4310).

JMC 8346 MEDIA REGULATION & FREEDOM (3 credits)

Media and Internet regulation and free expression as defined and interpreted through First Amendment rights, prior restraint and obscenity case law, advertising and public relations, broadcast and cable TV regulation and deregulation policy, new telecommunication media, and privacy. (Cross-listed with JMC 4340).

Prerequisite(s): ENGL1160

JMC 8376 COMMUNICATION WORKSHOP (3 credits)

A workshop to explore communication theory and processes and to develop skills in their application. (Cross-listed with JMC 4370).

Prerequisite(s): Junior Standing, Permission of instructor

JMC 8396 MEDIA ENTREPRENEURSHIP (3 credits)

4390 Media Entrepreneurship explores new and emerging media business models from local, national and global perspectives. Students learn about and work within the start-up economy and entrepreneurial approaches. The course offers professional and critical perspectives. (Cross-listed with JMC 4390, ENTR 4390).

Prerequisite(s): JMC 3340 and JMC 3350 or permission of instructor

JMC 8816 DIGITAL LITERACIES FOR TECHNICAL COMMUNICATORS (3 credits)

This course addresses emerging issues in digital literacies such as the rhetoric of technology, technological competency, technology and information ecologies, critical awareness of technology and human interactions, judicious application of technological knowledge, user-centered design, networking and online communities, ethics and technology, and culture and technology. (Cross-listed with ENGL 4810, ENGL 8816, JMC 4810).

Prerequisite(s): Graduate standing or permission of instructor

JMC 8826 POLITICS AND FILM (3 credits)

This course introduces students to the analysis of politics and film, focusing on how politics is portrayed in film and the politics of film making. (Cross-listed with PSCI 4820, JMC 4820, PSCI 8826).

JMC 8836 TECHNICAL COMMUNICATION (3 credits)

Technical Communication introduces students to the field of technical communication. Students will study the development of print and electronic genres common to industry settings, the design and production of technical documents, the writing processes and work practices of professional technical communicators, and the roles of technical communicators in organizational contexts. (Cross-listed with ENGL 4830, ENGL 8836, JMC 4830).

Prerequisite(s): Graduate standing or permission of instructor

JMC 8856 INFORMATION DESIGN FOR TECHNICAL COMMUNICATORS (3 credits)

This course introduces students to strategies for integrating visual and textual elements of technical documents. Instruction will focus on design theory and application through individual and collaborative projects. Students will develop the professional judgment necessary for making and implementing stylistic choices appropriate for communicating technical information to a lay audience. (Cross-listed with ENGL 4850, ENGL 8856, JMC 4850).

Prerequisite(s): Graduate standing or permission of instructor

JMC 8876 TECHNICAL EDITING (3 credits)

This course introduces students to the roles and responsibilities of technical editors: the editorial decision-making processes for genre, design, style, and production of technical information; the communication with technical experts, writers, and publishers; the collaborative processes of technical editing; and the techniques technical editors use during comprehensive, developmental, copyediting, and proofreading stages. (Cross-listed with ENGL 4870, ENGL 8876, JMC 4870).

Prerequisite(s): ENGL 1160 or permission of the instructor

JMC 8896 CAPSTONE COURSE IN TECHNICAL COMMUNICATION (3 credits)

In this capstone course, students will extend foundational skills learned in previous technical communication courses. Students will demonstrate their competency in the technical documentation process in organizational environments, the issues important to the technical communication profession, and the practices of writing and creating complex technical documents for specific purpose and audience. (Cross-listed with ENGL 4890, ENGL 8896, JMC 4890).

Prerequisite(s): Graduate standing or permission of instructor.

JMC 8906 SEMINAR MASS COMMUNICATION (3 credits)

A senior seminar applying historical and theoretical perspective to current issues and developments in mass communications. (Cross-listed with JMC 4900)

Prerequisite(s): Graduate standing

JMC 8926 MEDIA LITERACY (3 credits)

An advanced seminar on the study of media and information literacy through deconstruction of mass communication content, meaning construction, framing analyses and critical/cultural approaches. (Cross-listed with JMC 4920).

Kinesiology (KINS)

Kinesiology Graduate Courses

KINS 8040 ADVANCED STATISTICS (3 credits)

This course will be a study in the statistical methods commonly used in descriptive and experimental research in physical education and exercise science. Application, particularly regarding the purpose, selection, and interpretation of statistical procedures will be emphasized. (Cross-listed with BMKI 9041).

Prerequisite(s): HPER 8030/HEKI 8030 or BMKI 9001/HPER 9031/HEKI 9031 or equivalent

KINS 8056 EXERCISE AND SPORT NUTRITION (3 credits)

This course presents an overview of the principles of nutrition and the relationship between nutrition and health, fitness, and sports performance. It is designed to provide students with the knowledge and skills necessary to assess nutritional status, improve overall health, and enhance sports performance. (Cross-listed with KINS 4050).

KINS 8076 OPTIMIZING SPORTS PERFORMANCE (3 credits)

The course is designed for coaches, athletes and physically active people, and allied health professionals. Course content emphasizes integration of several disciplines in sports medicine aimed at preparing one for optimal sports performance. Topics include peaking, detraining, overuse injury, efficiency, special foods and nutritional requirements, genetics and trainability, and designing of multi-year training schedules. (Cross-listed with KINS 4070).

Prerequisite(s): PE 4940/KINS 4940 with a grade of C- or better.

KINS 8086 CLINICAL EXERCISE PHYSIOLOGY (3 credits)

This course will offer students the knowledge, skills, and abilities to take the American College of Sports Medicine's health fitness instructor certification exam. This course will emphasize health risk assessment, exercise testing, and exercise prescription for healthy and clinical populations. (Cross-listed with KINS 4080).

Prerequisite(s): PE 4940/KINS 4940 with a grade of C- or better.

KINS 8120 CURRENT TOPICS IN WEIGHT MANAGEMENT (3 credits)

This course will focus on current issues related to weight management. Students will review and apply the guidelines for physical activity and nutrition, critique current perspectives about weight management in the scientific literature and popular media (e.g., books, podcasts, news articles), and develop a best practice for weight management using what they have learned.

Prerequisite(s): Not open to non-degree graduate students.

KINS 8130 IMPLEMENTING PHYSICAL ACTIVITY IN DIVERSE POPULATIONS (3 credits)

This course will focus on information necessary to assess, design, implement, and evaluate the need for and effectiveness of physical activity interventions in diverse populations, races, and ethnicities. These populations will include: African American, Native American, Hispanic, Asian American, Pacific Islanders, and Caucasian. Additionally, candidates will complete a health and physical activity service learning project in which they will work with diverse populations in the community. (Cross-listed with BMKI 9131).

KINS 8140 PHYSICAL ACTIVITY ASSESSMENT AND HEALTH RELATED RESEARCH (3 credits)

This course will cover the broad scope of research on physical activity and public health. Emphasis will be placed on the application of physical activity assessment techniques. (Cross-listed with BMKI 9141).

KINS 8206 PLANNING WORKSITE WELLNESS PROGRAMS (3 credits)

This course will focus on the planning of quality worksite wellness programs utilizing standards established by the Association for Worksite Health Promotion. Steps in the planning process such as needs assessment, strategic planning, implementation, and evaluation will be taught with special application to the worksite. Critical issues involving worksite programs also will be addressed such as upper management support, program standards, corporate culture, competencies for worksite health promotion professionals, economic benefits, behavioral theories, legal issues, and the integration of worksite wellness programs and health care. (Cross-listed with KINS 4200).

Prerequisite(s): Junior standing.

KINS 8240 SPORT IN AMERICAN CULTURE (3 credits)

Sport in American culture is a study of sport from a theoretical perspective. The relationship between sport and sub-cultures (to include disadvantaged American cultures), economics, global influences, and technology will be analyzed.

KINS 8280 CURRICULUM IN PHYSICAL EDUCATION (3 credits)

A study of the foundations for curriculum development. Special consideration is given to curriculum change, curriculum patterns and programs in physical education which will meet a culturally diverse, global society.

KINS 8316 LOWER EXTREMITY EVALUATION (3 credits)

This course is designed to provide the candidate with knowledge and skill in the area of advanced athletic injury assessment. The candidate will be exposed to current methodology in the field of orthopedic assessment, pathophysiology of orthopedic injury, and application of current research in injury evaluation. The candidate will receive practical experience in the management of athletic injuries. This course will focus on the low back, hip, and lower extremities. (Cross-listed with KINS 4310).

Prerequisite(s): PE 8326/KINS 8326 and PE 8710/KINS 8710. Not open to non-degree graduate students.

KINS 8320 EVIDENCE-BASED PRACTICE IN SPORTS MEDICINE (3 credits)

This course is designed to provide the student with knowledge and skill in the area of developing clinical research questions, assessing research study designs, understanding statistical and epidemiological analyses, interpreting peer-reviewed manuscripts, the incorporation of research into clinical practice, understanding the role of an athletic trainer within the public health system, international classification of function, health literacy, and social determinants of health. Students in this course will learn to understand the role of evidence based /practice in clinical decision making.

KINS 8326 UPPER EXTREMITY EVALUATION (3 credits)

This course is designed to provide the candidate with knowledge and skill in the area of advanced athletic injury assessment. The candidate will be exposed to current methodology in the field of orthopedic assessment, pathophysiology of orthopedic injury, and application of current research in injury evaluation. The candidate will receive practical experience in the management of athletic injuries. This course will focus on the head, neck, thorax, and upper extremities. (Cross-listed with KINS 4320).

Prerequisite(s): PE 8316/KINS 8316, PE 8336/KINS 8336 and PE 8720/KINS 8720. Not open to non-degree graduate students.

KINS 8336 ATHLETIC THERAPEUTIC MODALITIES (3 credits)

This course will cover the theory, physiology and application of physical agents used in the treatment of injuries and illness. Students will gain practical experience utilizing selected agents to treat injuries and illnesses. (Cross-listed with KINS 4330).

Prerequisite(s): PE 8326/KINS 8326 and PE 8710/KINS 8710. Not open to non-degree graduate students.

KINS 8356 ORGANIZATION AND ADMINISTRATION OF ATHLETIC TRAINING (3 credits)

Administration of athletic training programs including the use of records and forms, budgets, facility design and legal concerns. (Cross-listed with KINS 4350).

Prerequisite(s): PE 4340/KINS 4340, PE 4320/KINS 4320

KINS 8370 ANALYZING PHYSICAL EDUCATION TEACHING & SPORT INSTRUCTION (3 credits)

This course will examine the teaching and coaching in physical education and sport. It will identify assessment techniques utilized in teaching and coaching behavior research as well as typical prescriptions in an effort to improve one's performance.

Prerequisite(s): Graduate standing

KINS 8506 BEHAVIORAL ASPECTS OF COACHING (3 credits)

This course is designed to provide the physical education teacher and athletic coach with an overview of the behavioral aspects of coaching athletes. The course will provide information which will enable the coach to enhance as well as orchestrate performance of elementary, junior high, senior high, college, and post-college athletes. (Cross-listed with KINS 4500).

KINS 8700 PSYCHOLOGY OF PHYSICAL ACTIVITY (3 credits)

The central purpose of this course is to examine the psychological antecedents and consequences of exercise and physical activity behaviors. The course will focus on traditional theories/principles of psychology as they relate to various physical activity settings. (Cross-listed with BMKI 9701).

KINS 8710 CLINICAL PRACTICUM IN ATHLETIC TRAINING I (1 credit)

Clinical Practicum in Athletic Training I is the first course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills.

Prerequisite(s): Admission to the MA in Athletic Training program, instructor permission, & compliance with published Athletic Training Program Technical Standards for Admission. Co-requisite: PE 8326/KINS 8326. Not open to non-degree graduate students.

KINS 8720 CLINICAL PRACTICUM IN ATHLETIC TRAINING II (1 credit)

Clinical Practicum in Athletic Training II is the second course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills.

Prerequisite(s): Admitted to MA in Athletic Training, PE 8710/KINS 8710, instructor permission, & compliance w/published Athletic Training Program Technical Standards for Admission. Co-reqs: PE 8316/KINS 8316 & PE 8336/KINS 8336. Not open to non-degree graduate students.

KINS 8730 CLINICAL PRACTICUM IN ATHLETIC TRAINING III (1 credit)

Clinical Practicum in Athletic Training III is the third course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills.

Prerequisite(s): Admitted to MA in Athletic Training, PE 8720/KINS 8720, instructor permission, & compliance w/published Athletic Training Program Technical Standards for Admission. Co-reqs: PE 8346/KINS 8346 & PE 8356/KINS 8356. Not open to non-degree graduate students.

KINS 8740 CLINICAL PRACTICUM IN ATHLETIC TRAINING IV (1 credit)

Clinical Practicum in Athletic Training IV is the fourth course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.

Prerequisite(s): Admission to the MA in Athletic Training, PE 8730/KINS 8730 instructor permission, and compliance with published Athletic Training Program Technical Standards for Admission. Co-req: PE 8966/KINS 8966. Not open to non-degree graduate students.

KINS 8800 RISK MANAGEMENT FOR HEALTH FITNESS PROFESSIONALS (3 credits)

A study of risk management for health fitness professionals with a focus on minimizing liability exposures for health fitness facilities and their personnel. Principles of risk management such as the assessment of liability exposures, the development and implementation of risk management strategies, and the evaluation of these strategies will be explored as well as the law as it pertains to health fitness liability. Candidates will develop the knowledge and skill to manage high quality health fitness programs in various settings.

Prerequisite(s): PE 4010/KINS 4010 or PE 8016/KINS 8016

KINS 8856 CARDIOVASCULAR DISEASE PREVENTION AND REHABILITATION (3 credits)

The purpose of this course is to provide candidates with an introduction to the theories and practices involved in all phases of cardiac rehabilitation. (Cross-listed with KINS 4850).

Prerequisite(s): PE 2500/BMCH 2500 with a grade of C- or better or BIOL 2840 with a grade of C- or better, PE 4940/KINS 4940 with a grade of C- or better

KINS 8865 SCIENTIFIC ASPECTS OF STRENGTH DEVELOPMENT (3 credits)

This course is designed to explore the nature of muscular strength development, to investigate the physiological basis of physical conditioning, and to provide teachers, coaches and trainers with practical experience in designing specialized conditioning programs for a variety of sports and cultures.

KINS 8900 MANAGEMENT & LEADERSHIP SKILLS FOR FITNESS WELLNESS MANAGERS (3 credits)

This course is a study of management and leadership skills necessary for the successful management of fitness and wellness facilities and programs. Candidates will develop knowledge and practical skills in the areas of personnel and financial management, marketing, and operating policies procedures as well as develop a personal leadership philosophy based on sound principles of leaders.

Prerequisite(s): PE 4010/KINS 4010 or PE 8016/KINS 8016 or ACSM Health Fitness Certification.

KINS 8910 INTERNSHIP IN EXERCISE SCIENCE (3 credits)

This course is an off-campus, supervised, educational work experience of at least 150 clock hours at an approved worksite offering programs and experiences in fitness development or health promotion. Candidates must have current CPR certification.

Prerequisite(s): 2.5 GPA and permission of Academic Advisor

KINS 8950 ADVANCED EXERCISE PHYSIOLOGY (3 credits)

A detailed analysis of selected topics including acute and chronic effects of exercise on metabolic, pulmonary, and cardiovascular function; and sports nutrition. Current research findings and methodology will be emphasized. (Cross-listed with BMKI 9951).

Prerequisite(s): PE 4940/KINS 4940 or equivalent

KINS 8970 TOPICS IN SPORTS MEDICINE (3 credits)

This course is designed to help students synthesize and apply their knowledge of athletic training and sports medicine to current topics, unique populations, and other areas of exercise, sports medicine and health care. (Cross-listed with BMKI 9971).

Latino/Latin American Studies (LLS)

Latino/Latin American Studies Graduate Courses

LLS 8145 LATINO/-A POLITICS (3 credits)

This course introduces students to the dynamism and growth of the role of Latinos, as a group of political actors, in the United States. This course provides students with an exposure to and understanding of various concepts and dimensions of this phenomenon, including historical and contemporary Latino political thought and the efforts to increase political empowerment (representation and participation) and influence through grassroots, social, and political movements. (Cross-listed with PSCI 8145, LLS 3140, PSCI 3140)

LLS 8246 SOCIAL TRANSFORMATIONS IN LATIN AMERICA (3 credits)

The course reviews the main social, economic, and political forces that have shaped Latin American societies, and the sociological theories used to understand Latin American development and underdevelopment. Race, ethnicity, gender and class in Latin America, as well as the region's position in the global economy are examined. (Cross-listed with SOC 8246, SOC 4240, LLS 4240).

Prerequisite(s): Graduate standing

LLS 8256 CRISSCROSSING THE CONTINENT: LATIN AMERICAN MIGRATIONS (3 credits)

In this course we will use an interdisciplinary lens to study the changes and continuities of migration in the Americas. The course starts with an overview of immigration to the Americas during the first era of mass migration (1850-1920) to explore the relevance of European migrations for national and identity constructions in the Southern Cone of America. Students then will be introduced to the impacts of social and political change on emigration flows, both regionally and beyond the region. They will also explore migration related policies at the national and regional level. We will also study the changes and continuities in the migration system of the Americas. Lastly, we will analyze the new North-South migration, as well as immigration to Latin America from Asia (recent and historical), Europe, and Africa. (Cross-listed with SOC 8256, SOC 4250, LLS 4250).

Prerequisite(s): Graduate standing

LLS 8286 INTERNATIONAL RELATIONS OF LATIN AMERICA (3 credits)

Analysis of the role of Latin American states in the international political arena. Emphasis upon developing, applying and testing an explanatory theory of international politics through the study of the inter-American system: the regional, institutional and ideological environment, power relations, policies and contemporary problems. (This course fulfills the department's international politics requirement). (Cross-listed with LLS 4280, PSCI 4280, PSCI 8286)

LLS 8436 INTERNATIONAL MIGRATION, DEVELOPMENT AND CITIZENSHIP (3 credits)

The course examines the forces driving contemporary global migration, the impact of migration in both sending and receiving nations' development, as well as the politics and practices of migration policy development. The course also discusses the current debates on immigrant incorporation and citizenship in the receiving countries. (Cross-listed with LLS 4430, CACT 8436).

Prerequisite(s): Graduate standing

LLS 8516 ILLNESS AND DISEASE IN SOUTHERN CONE LATIN AMERICAN LITERATURES AND CULTURES (3 credits)

The course will examine representations of illness, disease, and affections in literary and cultural texts from the Latin American Southern Cone, focusing in Argentina, Uruguay, and Chile. It will explore notions of health and disease, as embedded in literary and cultural texts from the late 19th to the 21st centuries. We will examine the ways in which physical ailments, mental health symptoms, and other conditions or disorders have been conceptualized and portrayed, co-relating the individual "disruptions" caused by unwellness with a host of social and cultural factors. The course will also explore current treatments and therapies for the illnesses discussed in the texts, taking into account the integration of western and alternative medicine and practices. (Cross-listed with SPAN 8516, SPAN 4510, LLS 4510).

Prerequisite(s): Graduate student standing

LLS 8656 SLAVERY AND RACE RELATIONS IN THE AMERICAS (3 credits)

Slavery and Race Relations in the Americas examines the historical relationship between the trans-Atlantic slave trade and American race relations, connecting the enslavement of Africans in the Americas to race relations in the Caribbean, Latin America, and the United States. (Cross-listed with BLST 8656, BLST 4650, HIST 8076, HIST 4070, LLS 4650).

Prerequisite(s): Graduate standing

LLS 8685 GOVERNMENT AND POLITICS OF LATIN AMERICA (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Latin America. (Cross-listed with LLS 3680, PSCI 3680, PSCI 8685)

LLS 8786 URBAN LATIN AMERICA (3 credits)

This course examines the experience of Latin American urbanization, attending to its contributions to urban sociology, social movements, and policymaking. Topics include urban transitions (e.g. pre-Hispanic to colonial, post-colonial to industrial, and the neoliberal turn), socio-spatial configurations (e.g. plazas, squatter settlements), urban marginality debates, urban politics, and planning as well as governance innovations (e.g. bus rapid transit systems, participatory budgeting). Students will compare city case studies across the region and to urban life in the United States. (Cross-listed with SOC 4780, SOC 8786, LLS 4780, CACT 8186).

Prerequisite(s): Graduate standing

LLS 8956 LATIN AMERICAN STUDY ABROAD (3 credits)

This course is designed as an international study abroad course that will introduce undergraduate and graduate students to the dynamism of socio-cultural, economic, and political changes taking place across Latin America. Note: International travel and special fees required. (Cross-listed with LLS 4950, INST 4950)

Master of Fine Arts Writing (MFAW)

Master of Fine Arts Writing Graduate Courses

MFAW 8700 RESIDENCY SESSION (3 credits)

A ten-day colloquium presenting lectures, classes, workshops, readings and individual conferences with seminar faculty. Taken 4 times, the Residency Session ends one seminar session and begins the next. The session affords students intensive contact with faculty and peers before returning to their writing projects.

Prerequisite(s): Admission to MFA in Writing program. Permission of the Program Director. Not open to non-degree graduate students.

MFAW 8710 GRADUATING RESIDENCY SESSION (0 credits)

The Graduation Residency Session is the final residency for MFA students who have successfully completed their seminars and creative thesis. In the ten days of this residency, students will give a graduating lecture, "mentor" new students in their first residency, and give a reading from their thesis. A graduating ceremony will cap their activities during this session.

MFAW 8720 ENRICHMENT RESIDENCY SESSION (2 credits)

An eight-day creative writing symposium-style course presenting lectures, workshops, readings and individual conferences with faculty. The Enrichment Residency affords advanced writing students additional intensive contact with published and apprentice writers to reinforce and enrich their life-long commitment to the art of writing and to the continuing development of their craft.

Prerequisite(s): MFA Program Director's permission. Must have completed MFA/PhD with writing emphasis. Writers with MA in English and emphasis in writing, or writers with an extensive background in writing may also be considered. Not open to non-degree graduate students.

MFAW 8820 POETRY SEMINAR (6-12 credits)

An individualized course in poetry writing. Taken 4 times, the required seminar offers practical instruction in writing and criticism. Using distance technology, student and instructor work through independent projects designed to sharpen the student's writing skills. Each student will compose both original poetry and critical analyses of poetry by other writers preparatory to submitting an original book-length manuscript of publishable quality by the final semester.

Prerequisite(s): Acceptance into the MFA in Writing Program and permission of the MFA Program Coordinator. Not open to non-degree graduate students.

MFAW 8830 FICTION SEMINAR (6-12 credits)

An individualized course in fiction writing. Taken four times, the seminar offers practical instruction in fiction writing and criticism. Using distance technology, student and instructor work through individualized writing projects designed to sharpen the student's writing skills to a professional edge. Students will compose both original fiction and critical analyses of fiction preparatory to submitting an original book-length manuscript of publishable quality by their final semester's work.

Prerequisite(s): Permission of Program Director. Not open to non-degree graduate students.

MFAW 8840 NONFICTION SEMINAR (6-12 credits)

An individualized course in nonfiction writing. Taken 4 times, the seminar offers practical instruction in writing and criticism. Students will compose both original nonfiction and critical analyses of nonfiction.

Prerequisite(s): Permission of Program Director. Not open to non-degree graduate students.

MFAW 8850 PLAYWRITING AND SCREENWRITING SEMINAR (6-12 credits)

An individualized seminar in playwriting or screenwriting. Taken 4 times, the seminar offers practical instruction in playwriting/screenwriting and criticism. Using distance technologies, student and instructor work through independent projects designed to sharpen the student's writing. Each student will compose both original scripts and critical analyses of scripts by other playwrights or screenwriters preparatory to submitting at minimum a full-length script, a one-act script, and a ten-minute script by the final semester.

Prerequisite(s): Acceptance into the MFA in Writing Program and permission of the MFA Program Coordinator. Not open to non-degree graduate students.

MFAW 8870 ENRICHMENT SEMINAR IN WRITING (6 credits)

An advanced writing semester for those who want assistance launching a new writing project or have a degree in one genre and want to pursue study of another, such as fiction, creative nonfiction, poetry, young adult, playwriting, or screenwriting.

Prerequisite(s): Corequisite: MFAW 8720. Permission from Program Coordinator required.

Mathematics (MATH)

Mathematics Graduate Courses

MATH 8016 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with CSCI 4010, CSCI 8016, MATH 4010).

Prerequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

MATH 8036 MODERN ALGEBRA (3 credits)

Algebra is the study of mathematical manipulations that preserve something (like equality - when solving equations). The areas in which Algebra finds application are quite diverse, from Ancient Greek Geometry through to Modern Information Protection and Security (error correcting codes, data compression, and cryptography). This course begins with topics that should be familiar (such as ruler-and-compass constructions, and modular arithmetic) and builds upon this foundation through polynomial rings up to finite fields and basic group theory. (Cross-listed with MATH 4030).

Prerequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better

MATH 8050 ALGORITHMIC GRAPH THEORY (3 credits)

The overall of the goal is to introduce advanced concepts in graph theory, graph modeling, and graph algorithms and how they can be used to solve a wide range of problems in various application domains. The course introduces students to several applied path algorithms, clustering and partitioning techniques, network flow algorithms, and weighted matching algorithms. Other advanced concepts associated with complex networks include node centralities in graphs and community detection approaches. The course will also introduce students to key classes of graphs with a particular focus on the main classes of Perfect Graphs and their applications in scheduling, chip design, mobile computing, and Biomedical Informatics. (Cross-listed with CSCI 8050).

Prerequisite(s): CSCI 3320 or CSCI 8325 and MATH 4150 or MATH 8156 or permission of instructor. Not open to non-degree graduate students.

MATH 8056 LINEAR ALGEBRA (3 credits)

Linear algebra is extensively utilized in the mathematical modeling of many natural phenomena. Many scientific and engineering disciplines, such as data science, chemical engineering and biology, make extensive use of the theory and techniques commonly present in basic to advanced linear algebra courses. The goal of this course is to help students to grasp a solid theoretical understanding of vectors, vector spaces, inner product spaces, linear transformations, eigenvalues, canonical forms, complex vectors, matrices, and orthogonality. By going through the materials in a mathematically rigorous way, students will develop deeper and more accurate intuitions of the basic concepts in linear algebra. Consequently, the applications of linear algebra will become much more transparent. (Cross-listed with MATH 4050).

Prerequisite(s): MATH 2050 with a grade of C- or better; MATH 2030 or MATH 2230 or equivalent with a grade of C- or better; or permission

MATH 8060 ALGORITHMIC COMBINATORICS (3 credits)

This course includes classical combinatorial analysis graph theory, trees, network flow, matching theory, external problems, and block designs. (Cross-listed with CSCI 8060).

Prerequisite(s): MATH 3100, CSCI 3100, MATH 8105 or CSCI 8105 or instructor's permission.

MATH 8080 DESIGN AND ANALYSIS OF ALGORITHMS (3 credits)

The course provides students an understanding of advanced topics in algorithms. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, dynamic programming, greedy algorithms, graph algorithms, and the theory of NP-Completeness. (Cross-listed with CSCI 8080).

Prerequisite(s): CSCI 3320 or CSCI 8325 or equivalent. Not open to non-degree graduate students.

MATH 8105 APPLIED COMBINATORICS (3 credits)

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with CSCI 3100, CSCI 8105, MATH 3100).

MATH 8116 ABSTRACT ALGEBRA I (3 credits)

An introduction to group theory. Various classes of group are studied: symmetric groups, abelian, cyclic, and permutation groups. Basic tools are developed and used: subgroups, normal subgroups, cosets, the Lagrange theorem, group homomorphisms, quotient groups, direct products, and group actions on a set. The course culminates with the Sylow theorems in finite group theory. The theory is illustrated with examples from geometry, linear algebra, number theory, crystallography, and combinatorics. (Cross-listed with MATH 4110).

Prerequisite(s): MATH 4050/MATH 8056 with a C- or better or MATH 4560/MATH 8566 with a C- or better or permission of instructor

MATH 8126 ABSTRACT ALGEBRA II (3 credits)

An introduction to ring and field theory. Various classes of commutative rings are considered including polynomial rings, and the Gaussian integers. Examples of fields include finite fields and various extensions of the rational numbers. Concepts such as that of an ideal, integral domain, characteristic and extension field are studied. The course culminates with an introduction to Galois theory. Applications include the resolution of two classical problems: the impossibility of angle-trisection and the general insolubility of polynomial equations of degree 5 or higher. (Cross-listed with MATH 4120)

Prerequisite(s): MATH 4110/MATH 8116 with a C- or better or permission of instructor

MATH 8156 GRAPH THEORY & APPLICATIONS (3 credits)

Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 4150, CSCI 8156, MATH 4150).

Prerequisite(s): MATH 2030 or permission of instructor.

MATH 8206 NUMERICAL METHODS (3 credits)

This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 4200, CSCI 8206, MATH 4200).

Prerequisite(s): MATH 1970 and MATH 2050 and MATH 2350 with a C- or better or permission of instructor.

MATH 8235 INTRODUCTION TO ANALYSIS (3 credits)

This course provides a theoretical foundation for the concepts of elementary calculus. Topics include real number system, topology of the real line, limits, functions of one variable, continuity, differentiation. (Cross-listed with MATH 3230).

Prerequisite(s): MATH 1960 and MATH 2230 each with a grade of C- or better.

MATH 8236 MATHEMATICAL ANALYSIS I (3 credits)

Provides a theoretical foundation for the concepts of classical calculus.

Topics include ordered fields, the real and complex number system, basic metric space topology, numerical sequences and series, limits and continuity in metric spaces, monotonic functions, differentiation, (functions of several variables included). (Cross-listed with MATH 4230).

Prerequisite(s): MATH 3230/MATH 8235 or equivalent with a grade of C- or better.

MATH 8246 MATHEMATICAL ANALYSIS II (3 credits)

Provides a theoretical foundation for the concepts of classical Calculus (vector calculus included). Topics include sequences and series of functions, uniform convergence, power series, Fourier series, multivariable real differential and integral calculus, the Implicit Function Theorem, integration of different forms, and the important formulas, connecting those integrals, due to: Green, Gauss, Riemann, and Ostrogradski. (Cross-listed with MATH 4240).

Prerequisite(s): MATH 4230/MATH 8236 with a grade of C- or better.

MATH 8250 PARTIAL DIFFERENTIAL EQUATIONS (3 credits)

Partial differential equations (PDEs) are fundamental in the application of mathematics to science and engineering. Topics to be covered will include: Linear and nonlinear first-order equations, classification of second-order linear equations, elliptic, hyperbolic and parabolic equations and boundary value problems, and Green's functions.

Prerequisite(s): MATH 1970, MATH 2350, or instructor's permission. MATH 4330/MATH 8336 is recommended, but not required.

MATH 8255 INTRODUCTION TO NUMERICAL METHODS (3 credits)

This course emphasizes the implementation of several numerical methods to problems that arise in science and engineering. It involves the application of the computer to solve mathematical problems using the following computational techniques: Taylor Series approximation, numerical differentiation, root-finding methods, interpolation, extrapolation, curve fitting, solution methods for matrix equations, numerical differentiation, numerical integration, and the solution of differential equations. (Cross-listed with MATH 3250).

Prerequisite(s): MATH 1960 with a C or better.

MATH 8276 COMPLEX ANALYSIS (3 credits)

This course is an introduction to the theory of functions of a complex variable, a fundamental area of mathematics with multiple applications to science and engineering. Topics include the field of complex numbers, complex differentiation, the complex contour integral and Cauchy's integral formula, Taylor expansions and analytic functions, conformal mapping and Riemann's conformal equivalence theorem, residue theory and Laurent series, harmonic functions, and applications. (Cross-listed with MATH 4270).

Prerequisite(s): MATH 3230/MATH 8235 with a grade of C- or better or permission of the instructor.

MATH 8306 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, CSCI 8306, MATH 4300).

Prerequisite(s): MATH 2050 with a C- or better or permission of instructor.

MATH 8316 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, CSCI 8316, MATH 4310).

Prerequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

MATH 8326 COMPUTATIONAL OPERATIONS RESEARCH (3 credits)

Survey of computational methods used in the solution of operations research problems. Some topics may include scripting to guide optimization software, constraint programming, heuristics and metaheuristics for optimization, basic machine learning algorithms, and simulation. (Cross-listed with MATH 4320, CSCI 4320, CSCI 8326).

Prerequisite(s): MATH 3200 or CSCI 1620, and MATH 4300 each with a grade of C- or better or permission of instructor.

MATH 8336 INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS (3 credits)

This course introduces the basic methods of PDEs guided by applications in physics and engineering. The main topics to be covered include The Linear First order PDEs, Transport equations, Characteristics, Classification of PDEs, Separation of variables, Heat conduction, vibrating membranes, boundary value problems, Maximum principle, Sturm-Liouville problems, Fourier series, Fourier integrals, Harmonic functions, Legendre polynomials, Distributions, Green's functions. (Cross-listed with MATH 4330).

Prerequisite(s): MATH 1970 with a C- or better and MATH 2350 with a C- or better, or permission of instructor; MATH 2050 recommended, not required.

MATH 8356 ORDINARY DIFFERENTIAL EQUATIONS (3 credits)

This course covers the theory of initial-, boundary-, and eigenvalue problems, existence theorems, real and complex linear systems of differential equations, and stability theory. There will be a strong emphasis on methods for finding solutions of initial and boundary value problems and analyzing properties of these solutions for various ordinary differential equations. (Cross-listed with MATH 4350).

Prerequisite(s): MATH 1970 with a C- or better, MATH 2050 with a C- or better, and MATH 2350 with a C-, or better or instructor's permission.

MATH 8400 DYNAMICAL SYSTEMS AND CHAOS (3 credits)

Review of difference equations and differential equations, stability theory, periodic orbits, bifurcations, Lyapunov exponents, fractals, chaotic orbits, and chaotic attractors.

Prerequisite(s): Permission from Instructor (If you have a background that covers introduction to analysis, differential equations, linear algebra, and you are somewhat familiar with computer codes, it is easy to obtain permission.)

MATH 8406 THE FINITE ELEMENT METHOD (3 credits)

Introduction to finite elements methods for solving ordinary and partial differential equations. Theoretical foundations of finite element methods for boundary value problems, approximation by piecewise polynomial functions, variation formulation of partial differential equations, basic error estimates. The Rayleigh-Ritz-Galerkin method, convergence of approximations, time-dependent problems, error analysis, discretization and computer implementation, applications to problems in elasticity, heat transfer, and fluid mechanics. (Cross-listed with MATH 4400).

Prerequisite(s): MATH 1970, MATH 2050 and MATH 2350 all with a C- or better or instructor permission. MATH 3300/MATH 8305 and MATH 4330/MATH 8336 recommended. Students should be able to use a programming language (ie MATLAB) to complete computational assignments

MATH 8410 BOOLEAN NETWORKS (3 credits)

This course is focused on introduction to discrete dynamical networks, in particular logical networks, and their applications.

Prerequisite(s): MATH 1960 (Calculus II), MATH 2230 (proof writing skills), MATH 4740 or equivalent (basic probability theory), basic computer skills; or permission of the instructor.

MATH 8430 LINEAR PROGRAMMING (3 credits)

This course includes a complete development of theoretical and computational aspects of linear programming. Basic theoretical foundations covered include polyhedra, convexity, linear inequalities and duality. Advanced topics such as decomposition and column generation are covered. Both simplex methods and interior point methods are included.

Prerequisite(s): MATH 4300/MATH 8306

MATH 8440 NETWORK PROGRAMMING (3 credits)

A presentation of network flow models and optimization algorithms. Topics include pure, generalized, integer, and constrained network problems, plus special cases of each, including transportation, assignment, shortest-path, transshipment, and multicommodity.

Prerequisite(s): MATH 4300/MATH 8306

MATH 8456 INTRODUCTION TO MACHINE LEARNING AND DATA MINING (3 credits)

This is an introduction to machine learning and data mining which covers the following topics with an emphasis on mathematical and statistical analysis: linear and nonlinear regression models, model selection and regularization methods, resampling methods, classification models, tree-based models, and unsupervised learning topics. If time allows, text mining and deep learning will also be introduced in the course. Statistical software will be used. (Cross-listed with MATH 4450, STAT 4450, STAT 8456)

Prerequisite(s): MATH 4740/8746 with a C- or better or STAT 3800/8805 with a C- or better or permission of instructor.

MATH 8460 INTEGER PROGRAMMING (3 credits)

Advanced study in mathematical programming with integer or mixed integer variables. Topics include integer programming, modeling, applications of integer programming, and exploration of solution algorithms based on linear programming and heuristic methods such as tabu search, simulated annealing, and genetic algorithms.

Prerequisite(s): MATH 4300/CSCI 4300/MATH 8306/CSCI 8306. Not open to non-degree graduate students.

MATH 8480 MULTI-AGENT SYSTEMS AND GAME THEORY (3 credits)

This course covers advanced topics in the area of coordination of distributed agent-based systems with a focus on computational aspects of game theory. The main topics covered in this course include distributed constraint satisfaction, distributed constraint optimization, and competitive and cooperative game theory. (Cross-listed with CSCI 8480).

Prerequisite(s): CSCI 4450 or CSCI 8456. Suggested background courses: CSCI 4480 or CSCI 8486; CSCI 8080. Not open to non-degree graduate students.

MATH 8500 NUMERICAL LINEAR ALGEBRA (3 credits)

Topics covered in this course include error propagation, solutions of nonlinear equations, solutions of linear and nonlinear systems by various schemes, matrix norms and conditioning, and computation of eigenvalues and eigenvectors. (Cross-listed with CSCI 8500).

Prerequisite(s): MATH 1960 and MATH 2050, or permission of instructor. Familiarity with computer programming is assumed.

MATH 8510 NUMERICAL DIFFERENTIAL EQUATIONS (3 credits)

Topics covered in this course include interpolation and approximations, numerical differentiation, numerical integration, and numerical solutions of ordinary and partial differential equations. (Cross-listed with CSCI 8510).

Prerequisite(s): MATH 1970, MATH 2350, or permission of instructor. Familiarity with computer programming is assumed.

MATH 8520 ADVANCED TOPICS IN OPERATIONS RESEARCH (3 credits)

Advanced treatment of a specific topic in the area of operations research not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with CSCI 8520).

Prerequisite(s): MATH 4300 or MATH 8306 or CSCI 4300 or CSCI 8306 or permission of the instructor.

MATH 8566 NUMBER THEORY & CRYPTOGRAPHY (3 credits)

An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 4560, CSCI 8566, MATH 4560).

Prerequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

MATH 8616 INTRODUCTION TO TOPOLOGY (3 credits)

This is a proof-oriented course presenting the foundations of topology. Metric spaces and general topological spaces are introduced. The course explores the properties of connectedness, compactness and completeness, and operations of Tychonoff product and hyperspace. (Cross-listed with MATH 4610).

Prerequisite(s): MATH 3230/8235 with a C- or better or permission of instructor.

MATH 8620 GENERAL TOPOLOGY (3 credits)

General topology has roots in geometry and analysis through the study of spaces, dimensions, and transformations. Its development was influenced by the parallel development of (axiomatic) set theory. This course introduces topological spaces from the point of view of separation axioms, countability axioms, compactifications, Baire property, and other completeness properties. Basic concepts of Descriptive Set Theory are also introduced.

Prerequisite(s): MATH 4610/8616 or permission of instructor.

MATH 8626 ITERATED FUNCTION SYSTEMS AND FRACTALS (3 credits)

This is a proof-oriented course presenting the foundations of fractal geometry. It introduces students to the beauty, magic, and applications of fractals and iterated function systems, with emphasis on the mathematics behind it all. Topics range from contractions on hyperspaces and their fixed points to fractal dimensions to Julia and Mandelbrot sets. (Cross-listed with MATH 4620).

Prerequisite(s): MATH 8616 with a C or better or permission of instructor.

MATH 8645 MODERN GEOMETRY (3 credits)

This course will study the modern foundations of Euclidean and Non-Euclidean Geometry. Included will be a study of the principles of axiomatic systems. Euclidean Geometry will be investigated using Hilbert's axioms for Euclidean geometry (or another equivalent Euclidean geometry axiom set). Hyperbolic geometry will be encountered through the models of Klein and Poincare. Neutral geometry with Lambert and Saccheri quadrilaterals will be studied. Finite geometries and projective geometries will also be explored. (Cross-listed with MATH 3640).

Prerequisite(s): MATH 2230 with a grade of C- or better.

MATH 8650 INTRODUCTION TO PROBABILITY MODELS (3 credits)

This is an introduction to probability modeling including Poisson Processes, Markov chains, birth-death processes, queueing models and renewal theory. Applications will be an important part of the course.

Prerequisite(s): MATH 4740/MATH 8746 or STAT 3800/STAT 8805 or permission of instructor.

MATH 8666 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)

This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, CSCI 8666, MATH 4660).

Prerequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

MATH 8670 TOPICS IN PROBABILITY AND STATISTICS (3 credits)

Advanced treatment of a specific topic in the area of probability and/or statistics not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with STAT 8670).

Prerequisite(s): MATH 4750/MATH 8756 or STAT 3800/STAT 8805 or permission from instructor

MATH 8720 RELIABILITY THEORY (3 credits)

This course covers the probabilistic and statistical aspects of reliability theory. Reliability theory is concerned with the probability that a component or system is successfully working over a given time period or at a specific time instance. (Cross-listed with STAT 8720).

MATH 8746 INTRODUCTION TO PROBABILITY AND STATISTICS I (3 credits)

A mathematical introduction to probability theory including the properties of probability; probability distributions; expected values and moments; specific discrete and continuous distributions; and transformations of random variables. (Cross-listed with MATH 4740).

Prerequisite(s): MATH 1970 and either MATH 2230 or MATH 2030 all with a grade of C- or better or permission of instructor.

MATH 8756 INTRODUCTION TO PROBABILITY AND STATISTICS II (3 credits)

Theory and methods of statistical inference including sampling distributions, estimators, estimation, and statistical hypotheses. (Cross-listed with MATH 4750).

Prerequisite(s): MATH 4740/MATH 8746 with a grade of C- or better.

MATH 8766 TOPICS IN APPLIED MATHEMATICS (3 credits)

Selection of such topics such as dynamical systems and chaos, Boolean networks, modeling of discrete or continuous systems, matrix theory, difference equations, information theory, discrete events simulation and other approved by Upper Curriculum Committee. (Cross-listed with MATH 4760).

Prerequisite(s): MATH 3100/CSCI 3100 with a grade of C- or better, or permission of instructor.

MATH 8855 HISTORY OF MATHEMATICS (3 credits)

An overview of the history of mathematics and famous mathematicians via studying and solving famous mathematical problems, exploring famous mathematical theorems, and studying the biographies of famous mathematicians. (Cross-listed with MATH 3850).

Prerequisite(s): MATH 1950 with a grade of C- or higher and one of either MATH 2230 or MTCH 2000 with a grade of C- or higher.

MATH 8956 TOPICS IN THEORETICAL MATHEMATICS (3 credits)

This course introduces students to a specialized subject matter in the areas of theoretical mathematics not covered in existing courses. The course may be repeated for different topics up to a maximum of six credit hours. The specific topics will vary, depending upon when the course is offered. One example of a course is Axiomatic Set Theory. (Cross-listed with MATH 4950).

Prerequisite(s): Permission of instructor.

MATH 8960 MASTER'S PROJECT (1-6 credits)

An applied project, designed and executed under the supervision of both a faculty and industry advisor. In the project the student will apply their mathematical and/or statistical skills to an applied problem. The student will present their results via a written report and oral presentation. (Cross-listed with STAT 8960).

Prerequisite(s): Permission of faculty advisor and graduate program chair. Not open to non-degree graduate students.

MATH 8970 INDEPENDENT GRADUATE STUDIES (1-3 credits)

Under this number a graduate student may pursue studies in an area that is not normally available to him/her in a formal course. The topics studied will be a graduate area in mathematics to be determined by the instructor.

Prerequisite(s): Permission of instructor and graduate classification.

MATH 8980 GRADUATE SEMINAR (3 credits)

A graduate seminar in mathematics offering coverage of advanced areas of mathematics. Topics to be covered by the course will vary in different semesters.

Prerequisite(s): Permission of the Instructor.

MATH 8990 THESIS (1-6 credits)

An independent research project, written under the supervision of a graduate adviser in the department of mathematics. Approval of the topic and the completed project by thesis committee is required.

Prerequisite(s): Approval of the topic and the completed project by thesis committee is required.

MATH 9110 ADVANCED TOPICS IN APPLIED MATHEMATICS (3 credits)

Advanced treatment of a specific topic in the area of applied mathematics not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ.

Prerequisite(s): Permission of instructor.

MATH 9230 THEORY OF FUNCTION OF REAL VARIABLES (3 credits)

A theoretical foundation for the concepts of measure theory and integration on a measure space as developed by Henry Leon Lebesgue (followed by others) starting the first decade of the 20th century including a comparison with Riemann's classical construction of integration theory known from classical calculus. Topics include: Real number system, convergence, continuity, bounded variation, differentiation, Lebesgue-Stieltjes integration, abstract measure theory, and the L_p spaces.

Prerequisite(s): MATH 4230/MATH 8236 or permission of the instructor

Mathematics for Teachers (MTCH)

Mathematics for Teachers Graduate Courses

MTCH 8010 STATISTICAL RESEARCH FOR MATHEMATICS TEACHERS (3 credits)

This course is designed for graduate students in the MAT program who select the statistics option to complete their degree. The student will do a literature review, design a study involving mathematics education, gather and analyze the data, and prepare a manuscript for submission to a refereed journal. (The course will not count toward a major in the MA or MS program.) To prepare for the course, interested students should contact the instructor of the course several months before (8 is the norm) to have time to do the groundwork for the study.

Prerequisite(s): STAT 8015 and TED 8010.

MTCH 8020 MATHEMATICAL MODELING FOR SECONDARY TEACHERS (3 credits)

This course will examine the mathematics underlying several problem situations found in a variety of societal settings. Mathematical models of problems in current literature will be examined and other models will be constructed based on data collected through course activities. Topics relevant to these problems will include function analysis, algebra, geometry, trigonometry and probability and statistics. The role of mathematics in society will be evidenced as problems considered will be timely and sources utilized will include original documentation whenever possible (i.e. recent research reports, government reports and publications).

MTCH 8030 ALGEBRA FOR ALGEBRA TEACHERS (3 credits)

This course will use study interesting mathematical systems related to key algebraic ideas and study habits of mind that are key to effective problem solving. The properties about numbers and operations discovered will connect to the same properties taught in school algebraic course. Special attention will be paid to linear, quadratic, exponential, and logarithmic, polynomial functions in connection to their importance in school algebra.

Prerequisite(s): Admission to the Graduate Program

MTCH 8040 TOPICS IN MATHEMATICAL COMPUTING (3 credits)

This course focuses on the current state-of-the-art technology that is either designed for or is uniquely suitable for teaching mathematics. (Cross-listed with STEM 8040)

Prerequisite(s): MATH 2200 or equivalent or approval of instructor.

MTCH 8880 ADVANCED PLACEMENT INSTITUTE: CALCULUS (3 credits)

A workshop for teachers planning to offer an advanced placement course in calculus. Objectives include increasing teacher competencies in single-variable calculus, discussion and study of AP calculus exams, implementations of AP courses in calculus, and development and presentation of projects for graduate credit. (This course will not count toward the M.A. or M.S. degrees in Mathematics, or the Secondary Mathematics Specialist Graduate Certificate.)

Prerequisite(s): Graduate in mathematics or mathematics education.

Mechanical Engineering (MECH)

Mechanical Engineering Graduate Courses

MECH 891 SPECIAL TOPICS IN ENGINEERING MECHANICS (1-6 credits)

Treatment of special topics in engineering mechanics by experimental, computational and/or theoretical methods. Topics will vary from term to term. (Cross-listed with MECH 491).

MECH 898 RESEARCH (0-6 credits)

Faculty-supervised research. (Cross-listed with MECH 498).

MECH 999 DOCTORAL DISSERTATION (1-24 credits)

Doctoral dissertation

Prerequisite(s): Admission to doctoral degree program and permission of supervisory committee chair.

Music (MUS)

Music Graduate Courses

MUS 815A APPLIED BASSOON (1-3 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 815B APPLIED CELLO (1-3 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for 1-3 credits. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the string faculty.

MUS 815C APPLIED CLARINET (1-3 credits)

This course provides individual weekly instruction on clarinet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 815D APPLIED DOUBLE BASS (1-3 credits)

This course, applied bass, is intended for private study of the double bass at the university graduate level. This course provides individual weekly instruction on double bass. Students work with the instructor to schedule lessons for one to three credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): An audition is required of all students registering for three hours of study and declaring bass as their major instrument. Not open to non-degree graduate students.

MUS 815E APPLIED EUPHONIUM (1-3 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815F APPLIED FLUTE (1-3 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors), two credit hours (music education majors), or three credit hours (music performance majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty, or successful completion of at least 1 credit of MUS 815F. Students enrolled in this course must also enroll in an instrumental ensemble.

MUS 815G APPLIED FRENCH HORN (1-3 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815H APPLIED GUITAR (1-3 credits)

This course, applied guitar, is intended for private study of the guitar at the university graduate level. This course provides individual weekly instruction on guitar. Students work with the instructor to schedule lessons for one to three credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): An audition is required of all students registering for three hours of study and declaring guitar as their major instrument. Not open to non-degree graduate students.

MUS 815I APPLIED HARP (1-3 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for 1-3 credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): An audition is required of all students registering for three hours of study and declaring harp as their major instrument. Not open to non-degree graduate students.

MUS 815J APPLIED OBOE (1-3 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 815K APPLIED PERCUSSION (1-3 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Admission into the graduate college. Enrollment in this course requires an audition performed for and approved by the percussion faculty. Must attend the weekly masterclass. Not open to non-degree graduate students.

MUS 815L APPLIED PIANO (1-3 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credits (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 815M APPLIED PIPE ORGAN (1-3 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 815N APPLIED SAXOPHONE (1-3 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 815O APPLIED TROMBONE (1-3 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), and three credits (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815P APPLIED TRUMPET (1-3 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), and MM (three credits). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815Q APPLIED TUBA (1-3 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 815R APPLIED VIOLA (1-3 credits)

This course, applied bass, is intended for private study of the viola at the university graduate level. This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one to three credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): An audition is required of all students registering for three hours of study and declaring viola as their major instrument. Not open to non-degree graduate students.

MUS 815S APPLIED VIOLIN (1-3 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for 1-3 credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): An audition is required of all students registering for three hours of study and declaring violin as their major instrument. Not open to non-degree graduate students.

MUS 815T APPLIED VOICE (1-3 credits)

This course provides graduate level individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one or two credit hour (MM Education candidates) or three credit hours (MM Performance candidates). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for and approved by the voice faculty. All students must attend the weekly masterclass.

MUS 8006 SPECIAL STUDIES IN MUSIC (1-3 credits)

Seminars or workshops in Theory, History, Performance, and Music Education designed to meet specific interests and needs of students. Topics and number of credits for each specific offering will be announced during the prior semester. (Cross-listed with MUS 4000).

Prerequisite(s): Graduate and permission of department.

MUS 8160 PERFORMING ENSEMBLES (0-1 credits)

This course is designed to provide high quality performance experience for the graduate level string, voice, instrumental, and jazz students. In addition to the series concerts on campus, there are frequent appearances at professional music conferences and community/statewide events. Students will be exposed to a wide variety of music from appropriate style periods.

Prerequisite(s): Graduate standing, audition. Not open to non-degree graduate students.

MUS 8246 ADVANCED AUDIO RECORDING TECHNIQUES (3 credits)

This course provides students with advanced instruction in sound mixing, digital audio editing, audio post-production and mastering. Topics include advanced digital audio editing, audio signal processing techniques, analog signal processing hardware, automation, and final product authoring and mastering. (Cross-listed with MUS 4240).

Prerequisite(s): MUS 3170, MUS 4200 & MUS 4210. Not open to non-degree graduate students.

MUS 8436 ARRANGING FOR JAZZ ENSEMBLE (3 credits)

Techniques of writing for jazz ensembles of various combinations of instruments. (Cross-listed with MUS 4430).

Prerequisite(s): MUS 2480 or MUS 2420

MUS 8446 MUSIC SINCE 1945 (3 credits)

This course covers important developments in music in the United States and Europe since 1945. (Cross-listed with MUS 4440).

Prerequisite(s): Graduate standing or permission of the instructor.

MUS 8460 MUSIC ANALYSIS FOR PERFORMANCE (3 credits)

Advanced study of performance practice and music analysis.

MUS 8536 HISTORY OF WESTERN OPERA (3 credits)

This course will consist of significant music theater works in the Western world from 1600 to the present. (Cross-listed with MUS 4530).

Prerequisite(s): Music major or permission of instructor

MUS 8546 RENAISSANCE MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature c. 1350-1600. (Cross-listed with MUS 4540).

Prerequisite(s): MUS 2550, 2560, 2570 and graduate. Not open to non-degree graduate students.

MUS 8556 BAROQUE MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from c. 1600-1750. (Cross-listed with MUS 4550).

Prerequisite(s): MUS 2550, MUS 2560 and graduate.

MUS 8566 CLASSICAL MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from c. 1750-1815. (Cross-listed with MUS 4560).

Prerequisite(s): MUS 2550, 2560, 2570 and graduate

MUS 8576 ROMANTIC MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of Music literature from c. 1815-1912. (Cross-listed with MUS 4570).

Prerequisite(s): MUS 2550, MUS 2560 and graduate.

MUS 8586 MUSIC FROM 1900 - 1945 (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from the post-romantic period to 1945. The objective will be to provide the student with a broad overview with special attention given to composers and individual works which typify a style or form. (Cross-listed with MUS 4580).

Prerequisite(s): MUS 2560.

MUS 8596 AFRICAN-AMERICAN POPULAR MUSIC FROM BEBOP TO HIP-HOP (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of African-American popular music literature from c. 1900-present. The objective will be to provide the student with a broad overview with special attention given to musicians and individual works which typify a style or form. Listening assignments will be an integral part of the course, and attendance at live performances will supplement the lectures, discussions and readings. (Cross-listed with MUS 4590).

Prerequisite(s): Music major standing or permission of instructor.

MUS 8600 PEDAGOGY OF WORLD MUSIC (3 credits)

This class will cover the two primary approaches to teaching world musics; the world music curriculum and the music in America curriculum. Pedagogical approaches to the case study and the cultural survey will be included. Activities relating to performing and listening to world musics are also part of the course.

Prerequisite(s): Graduate

MUS 8606 PIANO PEDAGOGY (3 credits)

This course is a survey of the art of teaching the piano. Course content will include a survey of beginning and intermediate piano methods, literature for the beginning/intermediate piano student, studio business practice, professional organizations, and group piano instruction pedagogy. (Cross-listed with MUS 4600).

MUS 8610 ORGANIZATION AND ADMINISTRATION IN MUSIC (3 credits)

Course is designed to acquaint students with the knowledge and concepts necessary for understanding and developing music education programs in the public schools and specific knowledge pertaining to policies and procedures for administering and supervising programs of music education.

MUS 8616 VOICE PEDAGOGY (3 credits)

This course is a study of the physiological and acoustical properties of the vocal mechanism and of the various techniques used in developing the singing voice. Also, it will apply knowledge acquired about the voice through studio teaching and observations of other voice teachers. (Cross-listed with MUS 4610).

Prerequisite(s): Voice Music Major or permission of instructor.

MUS 8630 RESEARCH AND BIBLIOGRAPHY IN MUSIC (3 credits)

A study of research techniques and literature in music toward the objectives of reading and evaluating music research and doing independent work in the area.

Prerequisite(s): Graduate standing in the UNO School of Music.

MUS 8640 FOUNDATIONS OF MUSIC EDUCATION (3 credits)

A study of psychological and historical backgrounds of music education through attention to relevant topics in the psychology of music and learning theory and through relevant readings in the history of music education as well as sociological trends in American schools.

Prerequisite(s): Graduate.

MUS 8660 PEDAGOGY OF MUSIC THEORY (3 credits)

Designed to introduce teachers to the techniques and problems of teaching music theory in elementary and secondary schools and colleges. This will be accomplished through a variety of methods to include a review of texts, teaching, and research.

Prerequisite(s): Acceptance to the graduate program in music.

MUS 8670 KODALY I: METHODOLOGY (3 credits)

This course provides strategies for teaching music based on the philosophies and practices of musician-composer-educator Zoltan Kodaly. Level I courses focus specifically on pedagogy, repertoire, and materials for grades prekindergarten through grade 1.

MUS 8680 KODALY 2: METHODOLOGY (3 credits)

This course provides strategies for teaching music based on the philosophies and practices of musician-composer-educator Zoltan Kodaly. Level I courses focus specifically on pedagogy, repertoire, and materials for grades 2 through grade 4.

Prerequisite(s): Successful completion of MUS 8670

MUS 8690 KODALY 3: METHODOLOGY (3 credits)

This course provides strategies for teaching music based on the philosophies and practices of musician-composer-educator Zoltan Kodaly. Level III courses focus specifically on pedagogy, repertoire, and materials for grades 5-6.

Prerequisite(s): Successful completion of MUS 8680.

MUS 8696 HEALTH AND WELLNESS FOR MUSICIANS (3 credits)

Health and Wellness for Musicians gives an overview of the dimensions of wellness and common health/wellness challenges for musicians. The course provides students with a toolbox of ideas and strategies for the development, design, and implementation of a music wellness campaign for non-musicians and individualized wellness plans for specific instruments and voice types. (Cross-listed with MUS 4660).

MUS 8700 CONDUCTING PRACTICUM (1-3 credits)

Private instruction in conducting and an intense study of the various disciplines in music and their relationship and application to the art of conducting. Course may include a group seminar component. This course may be repeated for credit.

Prerequisite(s): Acceptance into the graduate program for conducting majors. Permission of instructor for performance or music education majors.

MUS 8710 KODALY 4: METHODOLOGY AND ADVANCED STUDIES (3 credits)

This course provides strategies for teaching music based on the philosophies and practices of musician-composer-educator Zoltan Kodaly. It is designed for students who have completed Kodaly certification (levels I-III). The course assists students in continual development of individual musicianship, mentoring, and research skills.

MUS 8720 KODALY 1: MUSICIANSHIP (1 credit)

This course provides basic musicianship skills through singing, conducting, and dictating simple rhythms, melodies and folk songs.

Prerequisite(s): Requires concurrent enrollment in MUS 8670

MUS 8726 CHORAL LITERATURE (3 credits)

A survey course in the study of significant choral genre of the various periods of music from plain song to contemporary music. (Cross-listed with MUS 4720).

Prerequisite(s): Graduate music major standing or permission of the instructor.

MUS 8730 KODALY 2: MUSICIANSHIP (1 credit)

This course provides intermediate musicianship skills through singing, conducting, and dictating simple rhythms, melodies and folk songs.

Prerequisite(s): Prerequisites: MUS 8670 and MUS 8720; Requires concurrent enrollment in MUS 8680

MUS 8736 KEYBOARD LITERATURE (3 credits)

This course will examine literature written for keyboard (piano) from the 16th century to the present. Emphasis will be placed on solo literature of the Baroque, Classic, Romantic, and Contemporary periods. Included are keyboard concertos with orchestra and works for four hands and two pianos. (Cross-listed with MUS 4730).

MUS 8740 KODALY 3: MUSICIANSHIP (1 credit)

This course provides advanced musicianship skills through singing, conducting, and dictation of rhythms, melodies and folk songs in multiple meters, scales, and modes.

Prerequisite(s): Prerequisite must have completed MUS 8680 and MUS 8730; Requires concurrent enrollment in MUS 8690

MUS 8746 VOICE LITERATURE (3 credits)

This course is a study of the development of art song in Europe and America. Emphasis will be given to German and French song literature and their influences on English and American song. (Cross-listed with MUS 4740).

Prerequisite(s): MUS 815T or permission of graduate instructor.

MUS 8770 KODALY 4: MUSICIANSHIP (1 credit)

This course provides advanced musicianship skills through singing, conducting, and dictation of rhythms, melodies and folk songs in multiple meters, scales, and modes.

Prerequisite(s): Prerequisites: completion of MUS 8690 and MUS 8740; Corequisites: Requires concurrent enrollment in MUS 8710

MUS 8970 GRADUATE PROJECT (3 credits)

Completion of a graduate project relevant to the student's major area of study under the supervision of an advisor. The project must demonstrate competency in writing and research/creative activity as it pertains to appropriate aspects of music.

Prerequisite(s): A committee comprised of three full-time faculty members, with graduate standing in the School of Music must approve the project.

MUS 8980 RECITAL (3 credits)

This course involves the selection, preparation and public performance of a full recital in the student's major applied area. The recital should demonstrate the student's competency in a variety of styles and make advanced technical and interpretative demands. The course also includes related Electronic Press Kit: program, press release and photo.

Prerequisite(s): Students are required to pay a Recital Fee which covers costs for programs and recording. Students must be concurrently enrolled in applied lessons (MUS 815) on the instrument/voice on which they are performing the recital.

MUS 8990 THESIS (3 credits)

The purpose of this course is to allow graduate students in Music Education the opportunity to develop a substantive thesis which employs and mirrors research or original thought of a quality and quantity appropriate to advanced work in music education. This course will be handled on an individual study basis with aid and consultation from a faculty thesis advisor and thesis committee. Method of grading will be a designation of "satisfactory" or "unsatisfactory".

Prerequisite(s): MUS 8630 and 24 hours of graduate coursework. A Proposed Supervisory Committee Form and Thesis Proposal Approval Form filed with the Office of Graduate Studies before initiating the thesis at least one semester prior to anticipated graduation date.

Neuroscience (NEUR)

Neuroscience Graduate Courses

NEUR 8006 SYSTEMS NEUROSCIENCE (3 credits)

This is an advanced course for the Neuroscience major designed to provide a solid understanding of the peripheral and central connections that make the systems of the body function. Data and theories of brain-behavior relationships from current research in neuroscience will be discussed. (Cross-listed with NEUR 4000).

Prerequisite(s): Graduate standing or permission. Not open to non-degree graduate students.

NEUR 8166 NEUROPHARMACOLOGY (3 credits)

Neuropharmacology will introduce students to ligand-receptor interactions and their effects on behavior, cognition, and development. This course will characterize the molecular structure of ligands and how these small molecules or biologics affect central nervous system receptors and transporters. Students will learn about structure-activity relationships and principles of pharmacology: distribution, metabolism, pharmacokinetics, and elimination) and explore the historical milestones in drug development. We'll also discuss the dynamic actions of drugs of abused drugs and the mechanisms of action. For undergraduate Neuroscience Majors, the course counts as a Neuroscience Block 1. (Cross-listed with NEUR 4160, PSYC 4160, PSYC 8166).

Prerequisite(s): Graduate standing

NEUR 8296 NEUROETHOLOGY (3 credits)

In the field of Neuroethology a major goal is to understand the neural bases of animal behaviors in a natural context. In this course students will investigate how behaviors are generated and modulated by the nervous system in organisms ranging from insects to mammals. We will explore the neural mechanisms underlying a variety of animal behaviors as they interact with their natural environment ranging from sensory perception of the world (e.g. echolocation, electrolocation), to locomotor movements (e.g. flying, swimming), to more complex behaviors (e.g. learning, memory). (Cross-listed with NEUR 4290, BIOL 4290, BIOL 8296, PSYC 8296).

Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

NEUR 8336 SOCIAL NEUROSCIENCE (3 credits)

This course will evaluate the biological substrates of sociality and social behavior, and explore the impact of social environments on brain function and development. Students in the course will explore the molecular, cellular, neurotransmitter, and endocrine influences on social behavior, including affiliative care, aggression, social bonding, altruism, and social cognition. (Cross-listed with NEUR 4330, PSYC 8336).

Prerequisite(s): Graduate status or permission of Instructor. Not open to non-degree graduate students.

NEUR 8486 NEUROIMMUNOLOGY (3 credits)

The course explores the bi-directional mechanisms by which the brain and the immune system communicate with each other in health and during injury or infection. This course also introduces human immunology as a basis for understanding the advanced content in neuroimmunology. Topics include innate immunity in the central nervous system (CNS), inflammation in neurodegenerative diseases, CNS infections and autoimmune diseases. Reading and evaluating neuroimmunology primary literature, presentation and scientific writing will be emphasized. Counts as a Neuroscience Block 1 course requirement. (Cross-listed with NEUR 4480).

Prerequisite(s): Graduate standing.

NEUR 8646 NEURAL MECHANISMS OF SUBSTANCE USE DISORDERS (3 credits)

This course details how the brain changes during and after the administration of illicit substances. Illicit drugs 'hijack' the natural reward pathways and brain circuits. Material highlights brain regions, neural circuits, and structural alterations that accompany illicit drug use. Modern neuroscience research techniques that measure and manipulate brain function reveal opportunities for therapeutic interventions. The course will explore how therapeutic interventions repair the brain. (Cross-listed with NEUR 4640).

Prerequisite(s): Graduate standing.

NEUR 8846 GLIA IN HEALTH AND DISEASE (3 credits)

While neurons are often highlighted as the primary drivers of brain function, evidence is rapidly growing that a lesser-known class of cells, glia, are intimately involved in virtually all aspects of central nervous system function. This course is designed for students looking for an in-depth discussion on the various glial cells of the central system, with an emphasis on cutting-edge research and the techniques used to study them. Counts as a Block 1 Neuroscience requirement. (Cross-listed with NEUR 4840).

Prerequisite(s): Graduate standing

NEUR 8856 NEUROBIOLOGY OF LEARNING AND MEMORY (3 credits)

This course will evaluate the neurobiology of learning and memory. In this course students will explore how learning and memory processes are encoded and stored at the cellular and molecular neurobiology levels. We will examine both classic and cutting edge studies to see how changes in molecular activity, genetics, and cellular physiology can influence learning and memory processes. Counts as a Block 1 course for Neuroscience Majors. (Cross-listed with NEUR 4850).

Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

NEUR 8876 MOLECULAR AND CELLULAR NEUROBIOLOGY (3 credits)

This course presents foundational topics in molecular and cellular neurobiology in the context of how the nervous system is functionally organized. Topics include: nervous system cell types and their subcellular organization; electrical properties of neurons and glia; energy metabolism and biochemistry of the brain; intra- and intercellular neuronal signaling; the regulation of gene expression in neuronal cells; synaptic plasticity; and how these are altered in disease. (Cross-listed with BIOL 4870, BIOL 8876, NEUR 4870).

Prerequisite(s): NEUR 1500, or both NEUR 1520 and NEUR 1540, or BIOL 3020, or permission of instructor.

NEUR 8896 GENES, BRAIN, AND BEHAVIOR (3 credits)

This course will evaluate the complex interaction between an organism's genome and neural activity pattern in the nervous system as related to behavior. In this course students will explore how changes in gene expression (allelic variants, epigenetics, differential regulation) and gene networks within neural tissue can reciprocally influence behaviors such as communication, foraging, reproduction, and cognition. (Cross-listed with NEUR 4890, BIOL 4890, BIOL 8896, PSYC 8896).

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

Philosophy (PHIL)

Philosophy Graduate Courses

PHIL 8225 PHILOSOPHY OF ART (3 credits)

The course is an inquiry into historical and contemporary philosophical perspectives on the making, interpreting and criticizing of works of art, including relations of the arts to other dimensions of cultures. Students will wrestle with foundational questions (e.g., "What is beauty?", "What is art?", "What makes good art good?", "Is there a right way to interpret art?"), consider connections between art and ethics, culture, and politics (e.g., "Can an artwork be both immoral and good?", "Can a particular culture have exclusive rights to an artform?", "How does public art create political communities and divisions?"), explore questions within particular arts (e.g., "Can music represent?", "Why do we respond emotionally to fictions?"), and experience and evaluate art in light of these investigations. (Cross-listed with PHIL 3220)

Prerequisite(s): Graduate standing

PHIL 8256 LIMITS OF CONSCIOUSNESS (3 credits)

Consciousness is often considered one of the last great mysteries of science. Despite our internal experience of pleasures, sights, sounds, and pains, it is a largely open question why we have these experiences and what makes them happen. This upper level seminar class examines the philosophy, psychology, and neuroscience of consciousness. Topics covered will include neuroscientific theories of consciousness, unconscious perception, the relationship between attention and consciousness, animal consciousness, and detecting consciousness in the persistent vegetative state. (Cross-listed with PHIL 4250, PSYC 8256, PSYC 4250).

Prerequisite(s): PSYC 1010; or 6 hours in Philosophy. Not open to non-degree graduate students.

PHIL 8655 PHILOSOPHY OF MIND (3 credits)

A discussion of various accounts of the nature of minds which focuses upon philosophical problems such as whether the mind is identical with the brain, the extent of similarities between human minds and computers, the nature of personal identity and the relationship of mental activity to behavior. (Cross-listed with PHIL 3650, PSYC 3650)

Prerequisite(s): No Prerequisites. Some prior coursework in Philosophy is recommended, but not required.

PHIL 8900 READINGS IN PHILOSOPHY (3 credits)

An individually organized program of readings pertinent to one or more topics subordinate to the heading of Philosophy. To be carried out under the supervision of a member of the graduate faculty. May be repeated once for credit.

Prerequisite(s): Graduate, permission of instructor, and no "incompletes" outstanding.

Physics (PHYS)

Physics Graduate Courses

PHYS 8110 REPRESENTATIONS IN PHYSICS INSTRUCTION (3 credits)

In this course, students will integrate pedagogical knowledge with content knowledge in physics. Specifically, students will learn how to plan instruction in physics and physical science using research-based tools that target state and national science standards. Students in this class will learn what productive representations their students can use to assist them in bridging phenomena, words and mathematics. The course will focus on cross-cutting concepts in motion, forces, and energy/momentum. This course is designed for pre- and in-service teachers.

Prerequisite(s): PHYS 1050, PHYS 1110, PHYS 2110, or permission of the instructor.

PHYS 8120 EXPERIMENTS IN PHYSICS INSTRUCTION (3 credits)

In this course, students will learn to reconceptualize the role experiments play in the teaching and learning of physics. Specifically, students will learn a framework for thinking about experiments that engage understanding, and they will use this framework to plan instruction in physics and physical science that targets state and national science standards. Students in this class will also learn the role of labs and their integration, multilayered experiments, and practical aspects of experimentation. This course is designed for pre- and in-service teachers.

Prerequisite(s): PHYS 1050, PHYS 1110, PHYS 2110, or permission of the instructor.

PHYS 8206 INTRODUCTION TO QUANTUM MECHANICS (3 credits)

This course provides an introduction to the historical development of modern physics and to the Schroedinger formulation of quantum mechanics. Specific topics will include square wells potential barriers, the simple harmonic oscillator potential and the hydrogen atom. Characteristics of multi-electron atoms, including angular momentum coupling schemes, spectra and transition rules will also be included. (Cross-listed with PHYS 4200)

Prerequisite(s): PHYS 3250 or permission.

PHYS 8210 TEACHING PROBLEM-SOLVING IN PHYSICS (3 credits)

In this course, students will learn how to teach problem-solving process abilities within the context of physics. Specifically, students will learn how the Zone of Proximal Development can be used as a model for designing structured problem-solving activities that build student abilities with time and acquisition of content knowledge, leading to their students solving multi-step and multi-concept problems. Students will also learn how to assess problem-solving process in a consistent and rigorous way. Concepts include problem framing and getting students to see beyond surface features, physics representations, translating physics representations into mathematics, multi-equation and multi-concepts problems, and reflection. Content includes motion, force, energy, momentum, electric force and fields, and magnetism.

Prerequisite(s): PHYS 1050, PHYS 1110, PHYS 2110, or permission of the instructor.

PHYS 8216 QUANTUM THEORY (3 credits)

The matrix operator formalism is covered along with philosophical implications of this approach. The methods developed will be applied to simple harmonic oscillator and hydrogen atom potentials. Raising and lowering operators, creation-annihilation operators, and first and second order perturbation theory will be discussed. (Cross-listed with PHYS 4210)

Prerequisite(s): PHYS 4200 or permission.

PHYS 8226 PHYSICS OF MOLECULES AND SOLIDS (3 credits)

This course covers the various types of atomic bonding found in molecules and solids. Electronic energy levels and spectra of molecules will be discussed. Topics in solid state physics will include mechanics and thermodynamics of crystals, the scattering of waves including x-ray and neutron scattering, electron scattering and phonon and photon interactions. (Cross-listed with PHYS 4220)

Prerequisite(s): PHYS 4200 or permission.

PHYS 8230 PHYSICS EDUCATION METHODS (3 credits)

In this course, students will integrate the research on learning theories with effective educational practices in the teaching of physics. Specifically, students will learn how to implement active learning strategies that support eliciting of student ideas, listening and questioning, and relationship building. In effect, this course focuses on the 'soft' skills needed for effective teaching of physics. Students will read articles from the education literature both specific to physics and in general. They will reflect on their experiences with their own students and how this relates to the literature they read.

Prerequisite(s): PHYS 1050, PHYS 1110, PHYS 2110, or permission of the instructor.

PHYS 8236 SPECIAL RELATIVITY AND NUCLEAR PHYSICS (3 credits)

This course includes a brief historical background of the development of relativity theory and the importance of the experiments performed in conjunction with it. Lorentz transformations and covariant formalism will be developed and applied to certain problems in mechanics and electricity and magnetism. The nuclear physics portion of the course will include the historical development of the concept of the nuclear atom. Theoretical models of nuclear structure will be discussed, along with the theory of alpha, beta and gamma decay. Fission and fusion discussed as time permits. (Cross-listed with PHYS 4230)

Prerequisite(s): PHYS 4200 or permission.

PHYS 8306 GENERAL RELATIVITY (3 credits)

A study of general relativity theory and its leading applications. Physical motivations and conceptual foundations will be explored. Students will be guided step-by-step to mastery of the tensor analysis required by this theory. Topics covered will include the equivalence principle, recap of special relativity, tensors, curvature and geodesics, Einstein field equations, black holes, cosmology, and gravitational waves. (Cross-listed with PHYS 4300)

Prerequisite(s): PHYS 3750 and PHYS 4230, or permission of instructor.

PHYS 8356 ASTROPHYSICS (3 credits)

This course introduces the fundamental of astrophysics to students with a prior knowledge of physics and mathematics. A review will be given of light and telescopes, classical and quantum mechanics and special relativity. Basic laws of physics will be applied to various topics such as: the sun, nuclear fusion and particle physics, evolution and end state of stars, interstellar medium, galaxies and cosmology. (Cross-listed with PHYS 4350)

Prerequisite(s): PHYS 2130 or 4200 and MATH 1970. Recommended: PHYS 1350.

PHYS 8455 CLASSICAL MECHANICS (3 credits)

Statics and dynamics of particles and rigid bodies including the equations of Lagrange and Hamilton.

Prerequisite(s): MATH 1970, PHYS 3250 or permission.

PHYS 8505 ELEMENTS OF ELECTRONICS (3 credits)

The topics covered will include basic circuit theory, principles and operation of electronic devices such as diodes, transistors and integrated circuits. Application of these devices in various electronic circuits. Both analog and digital circuitry will be studied. (Cross-listed with PHYS 3500)

Prerequisite(s): PHYS 1120 or PHYS 2120 and MATH 1970

PHYS 8506 BIOLOGICAL PHYSICS (3 credits)

This course is designed primarily for students specializing in Biomedical Physics. As a part of Biomedical Physics program at the Department of Physics, the course introduces the fundamental principles of physics and the use of these principles for various biological applications. PHYS 4500/8506 covers various topics including cells, polymers, polyelectrolytes, membranes, mesoscopic forces, self-assembly, photonics, fluid mechanics, motility, chemical kinetics, enzyme kinetics, modern experimental techniques of biophysics. Each topic connects biomolecules with their functions and relevant biological phenomena from a physics perspective. This course will benefit students with interests in biological and medical physics, as well as chemistry, biology. (Cross-listed with PHYS 4500).

Prerequisite(s): PHYS 2110 or permission of instructor required. PHYS 2120 and 3300 are recommended.

PHYS 8556 PHYSICS IN MEDICINE (3 credits)

This course is designed primarily for students desiring to specialize in Biomedical Physics. The course introduces principles and applications of various medical imaging modalities and medical physics based therapies. Topics include such imaging techniques as ultrasound, X-ray imaging, Computed Tomography (CT), MRI imaging, and positron emission tomography. The course discusses physical principles behind medical imaging and therapeutic applications and covers interaction of different kinds of radiation with biological matter. (Cross-listed with PHYS 4550).

PHYS 8605 THERMODYNAMICS AND STATISTICAL PHYSICS (3 credits)

Topics include: empirical and absolute temperature, equations of state, work, heat, entropy, the four laws of thermodynamics, phase changes, thermodynamic potentials, classical and quantum statistics of an ideal gas (e.g., blackbody radiation). Possible applications to be included: Einstein theory of a solid, paramagnetism, blackbody radiation, and conduction of electrons. (Cross-listed with PHYS 3600)

Prerequisite(s): PHYS 2120 and MATH 1970.

PHYS 8755 ELECTRICITY AND MAGNETISM I (3 credits)

An advanced study of electrostatics and magnetostatics, including Coulomb's law, Gauss' law, the scalar potential, conductors and dielectrics, electrostatic energy, special methods, electric currents, Ampere's law, the magnetic induction, Faraday's law, and the electromagnetic wave equation as obtained from Maxwell's equations, with simple examples such as transmission lines and antennas. (Cross-listed with PHYS 3750)

Prerequisite(s): MATH 1950, MATH 1960, MATH 1970, PHYS 3250, or permission.

PHYS 8765 ELECTRICITY AND MAGNETISM II (3 credits)

A selection of more advanced topics from electromagnetic theory, including a deeper treatment of the electromagnetic wave equations derived from Maxwell's equations, extending to propagation, reflection, and refraction of plane waves, waves in wave guides, and radiation. Other topics covered might be magnetism and magnetic energy, plasmas, and special relativity. (Cross-listed with PHYS 3760)

Prerequisite(s): PHYS 3750.

PHYS 8805 OPTICS (3 credits)

The behavior of electromagnetic radiation as formulated in the ray, wave, and quantum models. Topics will include: reflection and refraction, vergence, matrix method, optical instruments, scalar waves, electromagnetic waves, blackbody radiation, interference, diffraction, and lasers; if time permits, fiber optics and holography will also be included. (Cross-listed with PHYS 3800)

Prerequisite(s): PHYS 1120 or PHYS 2120 and MATH 1970.

PHYS 8956 PROBLEMS IN PHYSICS (1-3 credits)

Individual laboratory and/or library work, or reading course in some field of physics. (Cross-listed with PHYS 4950, PHYS 4960, PHYS 8966)

Prerequisite(s): PHYS 2120 and permission of instructor.

PHYS 8966 PROBLEMS IN PHYSICS (1-3 credits)

Individual laboratory and/or library work, or reading course in some field of physics. (Cross-listed with PHYS 4950, PHYS 4960, PHYS 8956)

Prerequisite(s): PHYS 2120 and permission of instructor.

Political Science (PSCI)

Political Science Graduate Courses

PSCI 8000 SEMINAR IN THE RESEARCH METHODS IN POLITICAL SCIENCE (3 credits)

This course introduces students to the methods of data collection and analysis for political science research.

Prerequisite(s): Permission of graduate adviser

PSCI 8005 QUANTITATIVE ANALYSIS IN POLITICAL SCIENCE (3 credits)

This course introduces students to the techniques that political scientists use to answer research questions with quantitative data, as well as issues of research design, hypothesis formation, and causation. The course emphasizes the methods used to collect, analyze, and extract information from data using statistical computer software. (Cross-listed with PSCI 3000)

Prerequisite(s): Permission of graduate advisor

PSCI 8015 URBAN POLITICS (3 credits)

This course introduces students to the development, powers, forms of government, and functions of cities and their suburbs as well as the problems faced by elected officials, business and community leaders, and citizens in the urban setting. (Cross-listed with PSCI 3010)

Prerequisite(s): PSCI 1100.

PSCI 8036 THE PRESIDENCY (3 credits)

This course introduces students to the development and modern application of presidential leadership through examination of presidential selection, presidential decision-making, the relationship of the presidency with other governmental and non-governmental actors, and the role of the presidency in making public policy. (Cross-listed with PSCI 4030)

Prerequisite(s): PSCI 1100

PSCI 8040 SEMINAR IN AMERICAN GOVERNMENT AND POLITICS (3 credits)

This course introduces students to classic and contemporary scholarship on the principles, institutions, processes, and policies of national government in the United States with an emphasis on engaging in thoughtful discussion and individual research.

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8045 GOVERNMENT AND POLITICS OF NEBRASKA (3 credits)

This course introduces students to the development, structures, functions and public policies of the government of the state of Nebraska.. (Cross-listed with PSCI 3040)

Prerequisite(s): PSCI 1100.

PSCI 8046 CONGRESS AND THE LEGISLATIVE PROCESS (3 credits)

This course introduces students to the development of the Congress and modern application of the legislative process through examination of congressional elections, congressional leadership, congressional decision-making, legislative rules and procedures, the relationship of the Congress with other governmental and non-governmental actors, and the role of the Congress in making public policy. (Cross-listed with PSCI 4040)

Prerequisite(s): PSCI 1100

PSCI 8055 STATE GOVERNMENT AND POLITICS (3 credits)

This course introduces students to the development, structures, functions and public policies of states. (Cross-listed with PSCI 3050)

Prerequisite(s): PSCI 1100.

PSCI 8056 THE JUDICIAL PROCESS (3 credits)

This course introduces students to the administration of law in federal and state courts with respect to the organization of the courts, judicial selection, judicial powers, judicial decision-making, judicial policy-making, the bar, and reform movements in the pursuit of justice. (Cross-listed with PSCI 4050)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 8100 SEMINAR IN POLITICAL ECONOMY (3 credits)

A comprehensive study of theories of political economy, linkages between politics and economics, and major contemporary issues.

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8105 LGBT POLITICS (3 credits)

This course introduces students to the political struggle for Lesbian, Gay, Bisexual, and Transgender (LGBT) equal rights in the United States using a model of political empowerment, which may be applied for all minority or identity groups and social movements, generating operationalized measures of progress toward the loci of political power. (Cross-listed with PSCI 3100, WGST 3100, WGST 8105)

PSCI 8106 MONEY IN AMERICAN POLITICS (3 credits)

This course surveys facts and scholarship about two types of money in American politics: money as a political resource and money as policy. As a political resource, money is critically important for candidates to win elections, for interest groups to exert influence on government, and for policy expertise from civil society to inform government policy. As policy itself, in history or in modern times money has lain at the heart of policy debates like the creation of a national bank, gold and silver as legal tender, and financial regulations, as well as perennial governmental processes like federal budgeting and appropriations and the selection of congressional party leaders. This course trains students to comprehend, analyze, critically evaluate, and build on key research on these topics. (Cross-listed with PSCI 4100).

Prerequisite(s): PSCI 1100 or equivalent is a strongly recommended prerequisite.

PSCI 8116 POLITICAL PSYCHOLOGY (3 credits)

This course introduces students to the role of human thought, emotion, and behavior in politics through examination of the psychological factors that motivate political elites and the mass public. (Cross-listed with PSCI 4110, PSYC 4110, PSYC 8116)

Prerequisite(s): PSCI 1100 is recommended.

PSCI 8120 SEMINAR IN LEADERSHIP (3 credits)

This course introduces students to classical and contemporary scholarship on leadership theory, research, and application. Students gain a foundation in models of leadership, assess their own leadership styles, and learn to integrate what they learn in corporate, governmental, non-profit, or community organizations. (Cross-listed with CACT 8510)

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8126 PUBLIC OPINION AND POLLING (3 credits)

This course introduces students to the origins, nature, measurement, and consequences of public opinion on policymaking. (Cross-listed with PSCI 4120)

Prerequisite(s): PSCI 1100

PSCI 8135 WOMEN AND POLITICS (3 credits)

This course introduces students to women's political participation, including holding elective office, socialization, the feminist movement and its opposition, and public policies with particular impact on women. The focus is on contemporary perspectives on women in American political ideas and behavior. (Cross-listed with PSCI 3130, WGST 3130, WGST 8135)

PSCI 8136 BROWN V. BOARD OF EDUCATION (3 credits)

Brown v. Board of Education traces the educational history of African Americans from segregation to desegregation to re-segregation. This course will review the legal cases before and after the Supreme Court's Brown decision, their aftermath, and the effects on educational policies and practices. (Cross-listed with BLST 8716, BLST 4710, PSCI 4130).

Prerequisite(s): Graduate standing or instructor permission

PSCI 8145 LATINO/-A POLITICS (3 credits)

This course introduces students to the dynamism and growth of the role of Latinos, as a group of political actors, in the United States. This course provides students with an exposure to and understanding of various concepts and dimensions of this phenomenon, including historical and contemporary Latino political thought and the efforts to increase political empowerment (representation and participation) and influence through grassroots, social, and political movements. (Cross-listed with PSCI 3140, LLS 3140, LLS 8145)

PSCI 8146 CONSTITUTIONAL LAW: CIVIL RIGHTS (3 credits)

This course introduces students to the history, principles, and judicial interpretation of key constitutional provisions and federal statutes regarding civil rights in the United States. (Cross-listed with PSCI 4140)

Prerequisite(s): PSCI 1100 or equivalent.

PSCI 8150 SEMINAR IN CONSTITUTIONAL LAW (3 credits)

This course introduces students to the Constitution and the Supreme Court's exercise of judicial review in relation to governmental powers, civil rights, and civil liberties.

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8165 POLITICAL PARTIES (3 credits)

This course introduces students to the origin, development, structure, and functions of political parties in the United States as political organizations, coalitions of voters, and governing coalitions that seek to hold office and influence public policy. (Cross-listed with PSCI 3160)

Prerequisite(s): PSCI 1100

PSCI 8175 INTEREST GROUPS (3 credits)

This course introduces students to the theories, formation, organization, and activities of interest groups and their impact on public policy, particularly through their role in campaigns and elections and lobbying. (Cross-listed with PSCI 3170)

Prerequisite(s): PSCI 1100

PSCI 8176 CONSTITUTIONAL LAW: FOUNDATIONS (3 credits)

This course introduces students to the principles, design and operation of the American constitutional system with emphasis on analysis of the Declaration of Independence, the Articles of Confederation, the proceedings of the Constitutional Convention, and the Federalist Papers. (Cross-listed with PSCI 4170)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 8185 CAMPAIGNS AND ELECTIONS (3 credits)

This course introduces students to the evolution and modern application of campaigns and elections in the United States through examination of campaign management and campaign strategy in congressional and presidential elections. (Cross-listed with PSCI 3180)

Prerequisite(s): PSCI 1100

PSCI 8186 CONSTITUTIONAL LAW: THE FEDERAL SYSTEM (3 credits)

This course introduces students to American constitutional law as it relates to issues of federalism, the relation of the nation and the states, and separation of powers, the relation of the three branches of the national government. (Cross-listed with PSCI 4180)

Prerequisite(s): PSCI 1100

PSCI 8196 CONSTITUTIONAL LAW: CIVIL LIBERTIES (3 credits)

This course introduces students to the philosophy, history, and development of the personal liberties guaranteed by the Constitution including freedom of speech, religion, assembly, petition, and the right of privacy, primarily through examination of Supreme Court decisions. (Cross-listed with PSCI 4190)

Prerequisite(s): PSCI 1100

PSCI 8200 SEMINAR IN FOREIGN POLICY AND NATIONAL SECURITY (3 credits)

This course introduces students to classic and contemporary scholarship on the formulation and implementation of foreign and national security policy in the United States with an emphasis on engaging in thoughtful discussion and individual research.

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8206 INTERNATIONAL RELATIONS OF EAST ASIA (3 credits)

This course introduces students to the international politics of East Asia with an emphasis on the contemporary relations among major East Asian states (China, Japan, the Korean peninsula) and the United States. (Cross-listed with PSCI 4200)

PSCI 8216 INTERNATIONAL RELATIONS OF THE MIDDLE EAST (3 credits)

This course focuses on the international politics of the Middle East region, specifically looking at conditions for peace and causes of war. It examines how the international system, domestic politics, ideologies, and leaders influence international politics in the Middle East. (Cross-listed with PSCI 4210)

PSCI 8220 SEMINAR ON INTERNATIONAL LEADERSHIP AND STRATEGY (3 credits)

This course introduces students to international leadership and strategy theory, research, and application. (Cross-listed with CACT 8540).

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8225 DIPLOMACY AND INTERNATIONAL PROBLEM SOLVING (3 credits)

This course introduces students to the history, principles, structures, and processes developed to organize and legitimize peaceful reconciliation of the differences of nation-states and to advance their mutual interests in the contemporary global political and economic system. (Cross-listed with PSCI 3220)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8235 GENDER AND GLOBAL POLITICS (3 credits)

This seminar introduces students to gender politics in comparative and international politics. (Cross-listed with PSCI 3230, WGST 3230, WGST 8235)

PSCI 8245 THE POLITICS AND PRACTICE OF HUMAN RIGHTS (3 credits)

This course introduces students to human rights issues across the globe and explores the theoretical foundations of human rights as well as human rights institutions and transitional justice. (Cross-listed with PSCI 3240)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8246 INTERNATIONAL CONFLICT RESOLUTION (3 credits)

This course introduces students to different approaches to peace, their basic assumptions, and their application to current conflicts.. (Cross-listed with PSCI 4240)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8250 SEMINAR IN INTERNATIONAL RELATIONS (3 credits)

This course introduces students to classic and contemporary scholarship on the issues, theories, and methodological approaches associated with the study of the nation-state system, international law, international organizations, international security, and globalization.

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8255 GLOBAL SECURITY ISSUES (3 credits)

This course introduces students to issues of national and international security that cross boundaries and threaten all countries including issues such as climate change, environmental deterioration, population and demographics, gender issues, disease and public health, the media, asymmetrical warfare, drugs/organized crime, and cyberthreats. (Cross-listed with PSCI 3250)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8256 INTELLIGENCE AND NATIONAL SECURITY (3 credits)

This course introduces students to the United States intelligence services, and their relation to broader U.S. national security policy. (Cross-listed with PSCI 4250)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8265 UNITED STATES FOREIGN POLICY (3 credits)

This course introduces students to the analysis of foreign and defense policy processes in the United States, including the role of the President, Congress, Departments of State and Defense, the intelligence community, and other actors/factors affecting policy formulation and implementation. (Cross-listed with PSCI 3260)

Prerequisite(s): PSCI 2210.

PSCI 8266 INTERNATIONAL LAW (3 credits)

The course introduces students to the general principles of international law, including the key actors, the creation and sources of international law, the interpretation of international law by courts and tribunals, and its enforcement. (Cross-listed with PSCI 4260)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8276 GLOBAL ENVIRONMENTAL POLITICS (3 credits)

This course introduces students to issues of global environmental politics and policy, including the science behind issues such as climate change, how environmental policy is made at the national and international levels, and what role politics plays in determining environmental resource use. (Cross-listed with ENVN 4270, PSCI 4270)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8286 INTERNATIONAL RELATIONS OF LATIN AMERICA (3 credits)

Analysis of the role of Latin American states in the international political arena. Emphasis upon developing, applying and testing an explanatory theory of international politics through the study of the inter-American system: the regional, institutional and ideological environment, power relations, policies and contemporary problems. (This course fulfills the department's international politics requirement). (Cross-listed with PSCI 4280, LLS 4280, LLS 8286)

PSCI 8296 INTERNATIONAL DEVELOPMENT & SUSTAINABILITY (3 credits)

This course introduces students to different concepts of international development through the lens of sustainability. The course explores a broad range of activities related to international development, including international aid, trade, philanthropy, interventions in conflict, peacebuilding, public health, human rights, social justice, and the environment. (Cross-listed with PSCI 4290, CACT 8306)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8300 SEMINAR IN POLITICAL THEORY (3 credits)

This course introduces students to the history of political theory, from its origins in ancient Greece to its manifestations in contemporary thought. (Cross-listed with CACT 8200)

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8316 CLASSICAL POLITICAL THOUGHT (3 credits)

This course introduces students to key works representative of premodern political thought. Authors examined may include Plato, Aristotle, Xenophon, Cicero, Augustine, and Aquinas. (Cross-listed with PSCI 4310).

Prerequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8326 EARLY MODERN POLITICAL THOUGHT (3 credits)

This course introduces students to key works of the 16th through mid-18th centuries. Authors examined may include Machiavelli, Hobbes, Hume, Smith and Montesquieu. (Cross-listed with PSCI 4320)

Prerequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8336 LATE MODERN POLITICAL THOUGHT (3 credits)

This course introduces students to key texts of the mid-18th through 19th centuries. Authors to be examined may include Rousseau, Burke, Mill, Tocqueville, Marx, and Nietzsche. (Cross-listed with PSCI 4330).

Prerequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8345 AMERICAN POLITICAL THOUGHT (3 credits)

This course introduces students to the ideals, ideologies, identities, and institutions of American political thought from the country's origins to the present. Topics to be covered may include the political thought of the early American settlers and of the founding generation, the debates over the creation and implementation of the Constitution, the 19th century arguments over slavery, the rise of progressivism, the New Deal and its critics, and contemporary American conservatism and liberalism. (Cross-listed with PSCI 3340)

Prerequisite(s): PSCI 2310 is recommended.

PSCI 8346 CONTEMPORARY POLITICAL THOUGHT (3 credits)

This course introduces students to leading works of contemporary political thought, including Marx, Spencer, Dahl, Rawls, feminism, and rational choice. The theories, their interrelationships, the theorists, and the manifestations of these works will be discussed and analyzed. (Cross-listed with PSCI 4340)

Prerequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8356 DEMOCRACY (3 credits)

A basic study of theory, practice and practitioners of political democracy, its roots, development, present application and problems and future. (Cross-listed with PSCI 4350)

Prerequisite(s): PSCI 2500 or equivalent is recommended.

PSCI 8366 AUTHORITARIAN REGIMES (3 credits)

An analysis of various types of authoritarian regimes, their differences from democratic governments, and the causes of their establishment, maintenance, and failure. (Cross-listed with PSCI 4360).

PSCI 8376 GENERALS AND POLITICIANS: CIVIL-MILITARY RELATIONS (3 credits)

This course introduces students to civil-military relations and military politics across the globe. (Cross-listed with PSCI 4370).

Prerequisite(s): PSCI 2500 or equivalent is recommended.

PSCI 8476 SOUTH AFRICA & THE SOCIO POLITICS OF APARTHEID (3 credits)

South Africa and the Socio Politics of Apartheid examines the lived experiences of South African people under the Apartheid system, and their long struggle against European colonial oppression and racial segregation throughout the 20th century. Students will examine the laws, tools, and strategies that developed and sustained Apartheid, and the anti-Apartheid movements and international pressure that led to its repeal and South African democratic elections. (Cross-listed with BLST 8476, BLST 4470, PSCI 4470, SOC 8476, SOC 4470).

Prerequisite(s): Graduate standing

PSCI 8500 SEMINAR IN COMPARATIVE POLITICS (3 credits)

This course introduces students to classic and contemporary scholarship on the issues, theories, and methodological approaches associated with the systematic and comparative study of nation-states and their political systems with an emphasis on engaging in thoughtful discussion and individual research.

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8505 EUROPEAN POLITICS (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Europe, including the European Union. (Cross-listed with PSCI 3500)

PSCI 8506 GOVERNMENT AND POLITICS OF GREAT BRITAIN (3 credits)

A comprehensive study of contemporary British politics and government. Emphasis will be focused on the formal institutions and informal customs and practices of the British political system. (Cross-listed with PSCI 4500).

PSCI 8526 POLITICS OF FRANCE (3 credits)

This course introduces students to the political heritage of France, contemporary political institutions and problems, and political and policy responses to these problems. (Cross-listed with PSCI 4520)

PSCI 8556 POLITICAL VIOLENCE, INSURGENCY, AND TERRORISM (3 credits)

This course is a survey on the types of violence used within a political context, focusing on its causes, forms and consequences. Specifically, this course details why and how violence occurs, and its impact on institutions and the people operating within that system. (Cross-listed with PSCI 4550).

PSCI 8585 GOVERNMENT AND POLITICS OF RUSSIA AND THE POST-SOVIET STATES (3 credits)

This course introduces students to the political cultures, institutions, processes, and public policies of Russia and the states of the former Soviet Union. (Cross-listed with PSCI 3580)

PSCI 8626 ISLAM AND POLITICS (3 credits)

This course introduces students to the interaction between religion and politics in the Muslim world, covering various political ideologies in the Muslim world and different experiences of Muslim-majority countries such as Saudi Arabia, Pakistan, Iran, Turkey, Indonesia, and Egypt. It will also analyze mainstream and radical transnational Islamic movements. (Cross-listed with PSCI 4620)

PSCI 8645 GOVERNMENT AND POLITICS OF CHINA AND EAST ASIA (3 credits)

This course introduces students to the political cultures, institutions, processes, policies, and other characteristics of China and neighboring states, with reference to other major powers engaged in the region. (Cross-listed with PSCI 3640)

PSCI 8646 ASIAN POLITICS (3 credits)

This course provides students with a broad understanding of Asian Politics with a focus on Northeast Asia (Mainland China, Japan, South Korea, North Korea, and Taiwan) and some emphasis on Southeast Asia (Singapore, Philippines, Thailand, and Vietnam). Students in this course will investigate these Asian societies and discuss their shared history as well as their common political themes, patterns, and connections. Students will explore state institutions, political parties, and state-society relations through the overarching themes of development, democracy, and nationalism. Specific themes include the economic rise of East Asian states, the emergence and development of democracy in the region, and the persistence of authoritarianism. By the end of the course, students will be able to describe, explain, and critically evaluate from a social science perspective the principal political features and processes of these Asian societies and develop their own research projects based on a topic discussed in the course. (Cross-listed with PSCI 4630).

Prerequisite(s): PSCI 2500 or junior standing or permission of the instructor.

PSCI 8665 GOVERNMENT AND POLITICS OF JAPAN AND EAST ASIA (3 credits)

This course introduces students to the political cultures, institutions, processes, policies and other characteristics of Japan and neighboring states, with reference to other major powers engaged in the region. (Cross-listed with PSCI 3660)

PSCI 8685 GOVERNMENT AND POLITICS OF LATIN AMERICA (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Latin America. (Cross-listed with PSCI 3680, LLS 3680, LLS 8685)

PSCI 8705 GOVERNMENT AND POLITICS OF THE MIDDLE EAST (3 credits)

This course introduces students to government and politics in the contemporary Middle East, including considerations of state formation, authoritarianism and democratization, state-society relations, religion, culture, gender, and economy. (Cross-listed with PSCI 3700)

PSCI 8716 COMPARATIVE INTERNATIONAL DEVELOPMENT AND INNOVATION (3 credits)

Comparative International Development and Innovation will analyze the rise and fall of civilizations from a historical and theoretical perspective in a comparative manner. The course will address issues concerning political, social, economic, and environmental change in national, and international contexts. Among its major emphases are state institutions, economic growth, entrepreneurship, and the transformation of social structure and culture. (Cross-listed with PSCI 4710, ENTR 4710, ENTR 8716).

PSCI 8776 POLITICAL SOCIOLOGY (3 credits)

This course explores political sociology, focusing on political processes and power. Political sociologists investigate relationships between political institutions and various other institutions, including but not limited to the economy, education, media, and religion, and the impacts that these relationships have on society and the individuals that comprise the society. This course will explore the concepts, theories, and knowledge that comprise this field such as power, legitimacy, the state, networks, stratification, and collective action. (Cross-listed with PSCI 4770, SOC 4770, SOC 8776).

Prerequisite(s): Graduate standing

PSCI 8826 POLITICS AND FILM (3 credits)

This course introduces students to the analysis of politics and film, focusing on how politics is portrayed in film and the politics of film making. (Cross-listed with JMC 4820, JMC 8826, PSCI 4820)

PSCI 8900 READINGS IN POLITICAL SCIENCE (1-3 credits)

This course provides students an opportunity to study an advanced and specialized subject matter in the field of political science not covered in existing courses. The student must be capable of pursuing a highly independent course of study, which must be approved in consultation with the instructor in advance. This course may be repeated for different topics up to a maximum of six credit hours.

Prerequisite(s): Permission of graduate adviser

PSCI 8910 POLITICAL SCIENCE INTERNSHIP (3 credits)

This course offers students an opportunity to experience the resolution of public issues through direct involvement in career-oriented policy organizations. The host organization must be approved in advance in consultation with the internship coordinator. This course may be repeated for a maximum of six credit hours.

Prerequisite(s): Permission of instructor.

PSCI 8920 SEMINAR IN SPECIAL TOPICS IN POLITICAL SCIENCE (1-3 credits)

This course introduces students to an advanced and specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of twelve credit hours.

Prerequisite(s): Permission of graduate advisor.

PSCI 8926 ADVANCED SPECIAL TOPICS IN POLITICAL SCIENCE (1-3 credits)

This course introduces students to an advanced and specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours. (Cross-listed with PSCI 4920)

PSCI 8950 GRADUATE PROGRAM COMPREHENSIVE ASSESSMENT (0 credits)

This zero-credit-hour course is used to assess the knowledge and skills that are imparted by the Political Science Graduate Program to its students. Graduating must enroll in the class and take the comprehensive exam. The exam will test how students can synthesize knowledge in three subfields of Political Science. The students will get pass/fail grades for the course.

Prerequisite(s): At least 21 credit hours taken, at least 3 subfield seminars taken, and permission of Graduate Program Chair. Not open to non-degree graduate students.

PSCI 8980 RESEARCH IN POLITICAL SCIENCE (3 credits)

This course provides students an opportunity to conduct research in a specialized subject matter in the field of political science. The student must be capable of pursuing a highly independent course of study, which must be approved in consultation with the instructor in advance. This course may be repeated for different topics up to a maximum of six credit hours.

Prerequisite(s): Permission of graduate advisor, not open to non-degree graduate students.

PSCI 8990 THESIS (3-6 credits)

A research project, written under the supervision of a graduate adviser in the Department of Political Science, in which the students establish their capacity to design, conduct and complete an original, independent, scholarly investigation of a high order. The research topic and the completed project must be approved by the student's departmental committee.

Prerequisite(s): Permission of graduate program chair. Not open to non-degree graduate students.

Psychology (PSYC)

Psychology Graduate Courses

PSYC 8000 THE PROFESSION OF PSYCHOLOGY (0 credits)

Required non-credit course for graduate students in psychology. Intended to familiarize the beginning graduate student with the profession of psychology including such topics as ethics, professional organizations, job and educational opportunities, use of reference materials, licensing and certification and other relevant material.

Prerequisite(s): Not open to non-degree graduate students.

PSYC 8016 HISTORY OF PSYCHOLOGY (3 credits)

A study of the origins, development and nature of psychology and its relation to external events; emphasis on the period since 1875. (Cross-listed with PSYC 4010)

Prerequisite(s): Admission to graduate program in Psychology or permission of instructor. Not open to non-degree students or students in other departments or programs.

PSYC 8116 POLITICAL PSYCHOLOGY (3 credits)

This course introduces students to the role of human thought, emotion, and behavior in politics through examination of the psychological factors that motivate political elites and the mass public. (Cross-listed with PSCI 4110, PSCI 8116, PSYC 4110)

Prerequisite(s): PSCI 1100 is recommended.

PSYC 8156 AFRICAN AMERICAN PSYCHOLOGY (3 credits)

African American Psychology traces the psychological history of Africans and African Americans from self-attributes and identity, through race and racism, to cognition, learning, and language. This course will review concepts relevant to understanding the psychology of African Americans, methodological and research issues, and best practices. (Cross-listed with PSYC 4150, BLST 4150, BLST 8156).

Prerequisite(s): Graduate standing

PSYC 8166 NEUROPHARMACOLOGY (3 credits)

Neuropharmacology will introduce students to ligand-receptor interactions and their effects on behavior, cognition, and development. This course will characterize the molecular structure of ligands and how these small molecules or biologics affect central nervous system receptors and transporters. Students will learn about structure-activity relationships and principles of pharmacology: distribution, metabolism, pharmacokinetics, and elimination) and explore the historical milestones in drug development. We'll also discuss the dynamic actions of drugs of abused drugs and the mechanisms of action. For undergraduate Neuroscience Majors, the course counts as a Neuroscience Block 1. (Cross-listed with PSYC 4160, NEUR 4160, NEUR 8166).

Prerequisite(s): Graduate standing

PSYC 8250 FAMILY ANALYSIS AND TREATMENT (3 credits)

This course covers theories and techniques for family therapy, with special reference to adapting individual and group therapeutic, as well as consultation, principles for family interventions. Case analyses and evaluation methods are considered.

Prerequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8256 LIMITS OF CONSCIOUSNESS (3 credits)

Consciousness is often considered one of the last great mysteries of science. Despite our internal experience of pleasures, sights, sounds, and pains, it is a largely open question why we have these experiences and what makes them happen. This upper level seminar class examines the philosophy, psychology, and neuroscience of consciousness. Topics covered will include neuroscientific theories of consciousness, unconscious perception, the relationship between attention and consciousness, animal consciousness, and detecting consciousness in the persistent vegetative state. (Cross-listed with PSYC 4250, PHIL 4250, PHIL 8256)

Prerequisite(s): PSYC 1010; or 6 hours in Philosophy. Not open to non-degree graduate students.

PSYC 8276 ANIMAL BEHAVIOR (3 credits)

Behavior of diverse animals for the understanding of the relationships between nervous integration and the behavior manifested by the organism, as well as the evolution and adaptive significance of behavior as a functional unit. (Cross-listed with PSYC 4270, BIOL 4270, BIOL 8276)

Prerequisite(s): BIOL 1750 and PSYC 1010 or permission of instructor, junior-senior.

PSYC 8286 ANIMAL BEHAVIOR LABORATORY (3 credits)

Laboratory and field studies of animal behavior with an ethological emphasis. Classical laboratory experiences and independent studies will be conducted. (Cross-listed with PSYC 4280, BIOL 4280, BIOL 8286)

Prerequisite(s): PSYC 4270 or BIOL 4270 or PSYC 8276 or BIOL 8273 and not open to non-degree graduate students.

PSYC 8296 NEUROETHOLOGY (3 credits)

In the field of Neuroethology a major goal is to understand the neural bases of animal behaviors in a natural context. In this course students will investigate how behaviors are generated and modulated by the nervous system in organisms ranging from insects to mammals. We will explore the neural mechanisms underlying a variety of animal behaviors as they interact with their natural environment ranging from sensory perception of the world (e.g. echolocation, electrolocation), to locomotor movements (e.g. flying, swimming), to more complex behaviors (e.g. learning, memory). (Cross-listed with BIOL 4290, BIOL 8296, NEUR 4290, NEUR 8296).

Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

PSYC 8316 PSYCHOLOGICAL AND EDUCATIONAL TESTING (3 credits)

The use of standardized tests in psychology and education is considered with special regard to their construction, reliability and validity. (Cross-listed with PSYC 4310)

Prerequisite(s): PSYC 1010 and junior/senior and not open to non-degree graduate students.

PSYC 8326 HORMONES & BEHAVIOR (3 credits)

In this course, students will examine the interaction between hormones, chemical messengers released from endocrine glands, and behavior in both human and animal systems. Methods for studying hormonal issues on behavior will be addressed. This course will provide students in psychology, biology, and related disciplines an understanding of how hormones affect sensory processing, motor activities, and processing of information in the central nervous system. (Cross-listed with PSYC 4320, BIOL 4320, BIOL 8326)

Prerequisite(s): Must be admitted to a graduate level PSYC program or permission of department.. Not open to non-degree graduate students.

PSYC 8336 SOCIAL NEUROSCIENCE (3 credits)

This course will evaluate the biological substrates of sociality and social behavior, and explore the impact of social environments on brain function and development. Students in the course will explore the molecular, cellular, neurotransmitter, and endocrine influences on social behavior, including affiliative care, aggression, social bonding, altruism, and social cognition. (Cross-listed with NEUR 8336, NEUR 4330).

Prerequisite(s): Graduate status or permission of Instructor. Not open to non-degree graduate students.

PSYC 8446 ABNORMAL PSYCHOLOGY (3 credits)

A course designed to examine the aberrant behavior of individuals. Symptoms, dynamics, therapy and prognosis of syndromes are considered. (Cross-listed with PSYC 4440)

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 8456 PERSONALITY THEORIES (3 credits)

A comparative approach to the understanding and appreciation of personality theories considering history, assertions, applications, validations and prospects. (Cross-listed with PSYC 4450)

Prerequisite(s): Not open to non-degree graduate students.

PSYC 8476 MENTAL HEALTH AND AGING (3 credits)

The goal of this courses is to survey the mental health needs of older adults. Consideration is given to identifying both positive mental health and pathological conditions. Treatment interventions effective with older adults and their families are also discussed. (Cross-listed with PSYC 4470, GERO 4470, GERO 8476)

Prerequisite(s): Junior or Senior

PSYC 8500 PROFESSIONAL, LEGAL, AND ETHICAL FOUNDATIONS OF SCHOOL PSYCHOLOGY (3 credits)

This course covers the role description and job activities of a school psychologist, as well as theories, assessment and intervention techniques, certification requirements, employment opportunities, public policy, legislation, and ethics relevant to school psychology. School-based field experiences will also be included in the course.

Prerequisite(s): Must be admitted to a graduate level PSYC program or permission of dept. Not open to non-degree graduate students.

PSYC 8520 FOUNDATIONS OF ASSESSMENT (3 credits)

Course content covers traditional psychometric concepts (e.g., norms, reliability, validity) and their application to various areas of human behavior that are assessed (e.g., cognitive ability, personality, achievement). Clinical considerations are applied to how assessment information is integrated into a problem-solving process.

Prerequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8526 PSYCHOLOGY OF LANGUAGE (3 credits)

Language is what makes us human. It influences our thoughts and affects our lives in many ways. In this class, topics include the distinctive features of human language as a system of communication, the understanding and production of speech, reading and spelling, language development, bilingualism, language disorders, and how our social and cultural environment can influence how language is used. (Cross-listed with PSYC 4520)

Prerequisite(s): Senior level or graduate level student or permission of the instructor. Not open to non-degree graduate students.

PSYC 8530 EARLY CHILDHOOD ASSESSMENT (3 credits)

This course is an introduction to the assessment of children during early development including infancy, toddler, preschool and early primary ages. Assessment will be discussed as it relates to problem-solving and data-based decision making (i.e., diagnosis, treatment, program evaluation). Students will learn the principles of working with young children and their families and how these principles will be used in conducting valid and reliable assessments that, in turn, lead to appropriate interventions.

Prerequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8536 CULTURAL PSYCHOLOGY (3 credits)

This course will provide an overview of the cultural, community and ecological factors that play a role in how people perceive their environments. The goal is to investigate the ways in which culture affects individual behaviors, attitudes and cognitions. It may be easy to tell that two cultures are different, but identifying exactly what is meant - and all that is encompassed - when speaking about "culture" can be much more difficult. Culture can include everything from gender constructs and race/ethnicity to the effects of new technologies. All of these aspects of culture affect individuals' psychological make-up and behavior. Although psychology has largely developed from a Western tradition, attention to research from non-Western perspectives will also be emphasized. This course supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 4530, CACT 8106).

Prerequisite(s): Enrollment in MA in Critical & Creative Thinking program or by permission of the instructor.

PSYC 8540 SCHOOL AGE ASSESSMENT (3 credits)

This course covers data-based decision-making as it applies to schools. Students will learn and practice the skills of reviewing records, interviewing, systematically observing, and testing. They will be exposed to the following types of assessments: academic, behavior, curriculum-based, intellectual, social-emotional, and screening measures.

Prerequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8550 PSYCHOTHERAPEUTIC INTERVENTIONS (3 credits)

This course provides graduate students knowledge in the application of evidence-based therapeutic interventions that can be utilized with children and adolescents in school, home, and family settings. Various approaches and techniques are presented along with supporting research. Observation and participation in clinical cases may be arranged.

Prerequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8576 BEHAVIOR ANALYSIS AND INTERVENTIONS (3 credits)

Introduction to experimental methodology, rationale and research literature of changing behavior through behavior modification techniques. Particular attention will be paid to methodological concerns regarding single subject design, ethical considerations and ramifications of behavior intervention with children and youth. (Cross-listed with PSYC 4570)

Prerequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8590 PSYCHOLOGY OF EXCEPTIONAL CHILDREN (3 credits)

The content of this course will focus on children who are identified as "exceptional"; in terms of behavioral, cognitive, and learning problems. Exceptionality in this sense includes students who are in need of preventative and/or intervention-based services. The topics will be approached from a multidisciplinary perspective and emphasis will be placed on utilizing a response to intervention approach in working with exceptional individuals. The service-learning component of the course will require students to learn about the educational environment by spending time in an elementary classroom, consulting with school staff and addressing the educational needs of students.

Prerequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8636 ORGANIZATIONAL PSYCHOLOGY (3 credits)

This is a survey course which will cover the major concepts, theories and empirical research related to organizational psychology. Specific topics will include: work motivation, leadership, decision making and job satisfaction as well as more recent trends such as cultural diversity, work teams, work-family and quality issues. (Cross-listed with PSYC 4630)

Prerequisite(s): Admission to a graduate program or graduate certificate program. Not open to non-degree graduate students.

PSYC 8646 PERSONNEL PSYCHOLOGY (3 credits)

A survey of psychological principles, theories and research related to personnel issues. Course includes discussion of personnel selection, performance appraisal, recruitment, training and health and safety. (Cross-listed with PSYC 4640)

Prerequisite(s): Admission to a graduate program or graduate certificate program. Not open to non-degree graduate students.

PSYC 8656 CREATIVITY AND INNOVATION IN ORGANIZATIONS (3 credits)

To provide a discussion of the antecedents of individual and organizational creativity, including measurement, models, characteristics of the individual and the environment that facilitate creativity and innovation in an organizational setting. Students in this course will be able to understand the research literature related to creativity and innovation and apply the findings to improve critical and creative thinking, implementation of creative ideas, and development of creative teams and organizations. This course supports the Organizational Science and Leadership concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 4650, CACT 8506)

PSYC 8700 ETHICS AND LAW FOR PSYCHOLOGY AND APPLIED BEHAVIOR ANALYSIS (3 credits)

This course provides graduate students with advanced knowledge of ethical codes, legal statutes, and case law that guide the profession of psychology and related applied fields with particular attention to the practice of applied behavior analysis. The primary emphasis of the class is on clinic-, community-, and school-based practice with children and adolescents.

Prerequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

PSYC 8800 GRADUATE SEMINAR IN THE AGING BRAIN (3 credits)

The Graduate Seminar in the Aging Brain is a graduate level gerontology course focused on understanding the changes to the brain due to normal aging and aging-related diseases. This is an elective course for the Gerontology graduate program at UNO. The content matter of this course also makes it a relevant fit for graduate students from disciplines such as biology, psychology, geriatric medicine, nursing, social work, and exercise science. By the end of the course, students should have a thorough understanding of the changes to the brain in healthy aging and aging-related disease that affect cognitive and emotional functioning. (Cross-listed with GERO 8800).

Prerequisite(s): Graduate level standing

PSYC 8806 LAW & PSYCHOLOGY: ETHICS, RESEARCH & SERVICE (3 credits)

This course presents legal principles relevant to all psychological specialties, with special reference to mental health services. Ethical reasoning and the APA ethics code are considered. (Cross-listed with PSYC 4800)

Prerequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

PSYC 8850 SOCIAL JUSTICE, ADVOCACY, AND ACTION IN SCHOOL PSYCHOLOGY (3 credits)

Social Justice, Advocacy, and Action is designed for graduate students in school psychology and related fields. The course is designed to provide a social justice framework to all aspects of the role of a school psychologist. To that end, students will learn social justice theories and research with specific attention to minoritized and oppressed groups. Students will engage in self-exploration of personal values and biases that influence our practice. They will learn about social structures of power and oppression, socio-cultural diversity, and the impact in our schools. The overarching course goal is in an increased ability to advocate for and engage in applying socially just work in educational settings. The content of this course is specific to School Psychology.

Prerequisite(s): Admission to a graduate program in psychology. Not open to non-degree graduate students.

PSYC 8896 GENES, BRAIN, AND BEHAVIOR (3 credits)

This course will evaluate the complex interaction between an organism's genome and neural activity pattern in the nervous system as related to behavior. In this course students will explore how changes in gene expression (allelic variants, epigenetics, differential regulation) and gene networks within neural tissue can reciprocally influence behaviors such as communication, foraging, reproduction, and cognition. (Cross-listed with NEUR 4890, NEUR 8896, BIOL 4890, BIOL 8896).

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

PSYC 8900 PROBLEMS IN PSYCHOLOGY (1-6 credits)

A faculty-supervised research project, involving empirical or library work and oral or written reports.

Prerequisite(s): Written permission of department. Not open to non-degree graduate students.

PSYC 8950 PRACTICUM FOR MASTER'S STUDENTS (1-6 credits)

Faculty-supervised experience in industry or business designed to bridge the gap between the classroom and a job, emphasizing use of previously acquired knowledge in dealing with practical problems for master's students.

Prerequisite(s): Written permission of your practicum committee. Not open to non-degree graduate students.

PSYC 8970 MASTER'S LEVEL PRACTICUM IN SCHOOL PSYCHOLOGY (1-6 credits)

Faculty-supervised experience designed to provide experience in academic and behavioral assessment and intervention with children, and consultation with parents and school personnel.

Prerequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 8980 PRACTICUM IN DEVELOPMENTAL PSYCHOLOGY (1-6 credits)

Faculty-supervised experience in a setting designed to provide a practical understanding of theoretical concepts of human development. Emphasizes direct observation and or personal interaction as a means of training, and can be directed toward various populations within the developmental life span (e.g., infants, preschoolers, middle childhood, adolescents, adults, aged persons).

Prerequisite(s): PSYC 9560 and permission of Developmental Psychology Area Committee. Not open to non-degree graduate students.

PSYC 8990 THESIS (1-6 credits)

Independent research project written under supervision of a faculty committee. May be repeated up to a total of six hours.

Prerequisite(s): Written permission of your thesis committee. Not open to non-degree graduate students.

PSYC 9010 PROSEMINAR: STATISTICAL METHODS I (3 credits)

The purpose of this course is to introduce students to the statistical concepts of correlation and regression. The course will cover basic understanding of these techniques, their applications, and interpretations of results.

Prerequisite(s): Graduate standing and an undergraduate course in basic statistics which included an introduction to correlation and linear regression. Not open to non-degree graduate students.

PSYC 9020 PROSEMINAR: STATISTICAL METHODS II (3 credits)

An advanced approach to experimental design and inferential statistics using the analysis of variance models.

Prerequisite(s): A course in basic statistics which included an introduction to analysis of variance. Not open to non-degree graduate students.

PSYC 9030 SEMINAR: TOPICS IN INDUSTRIAL ORGANIZATIONAL PSYCHOLOGY (3 credits)

A topic area within field of Industrial Organizational Psychology will be explored in depth.

Prerequisite(s): Admission to Industrial Organizational graduate program and permission of instructor. Not open to non-degree graduate students.

PSYC 9040 PROSEMINAR LEARNING (3 credits)

A comprehensive and intensive coverage of experimental literature on learning in humans and animals.

Prerequisite(s): Permission of instructor. Not open to non-degree graduate students.

PSYC 9050 APPLIED BEHAVIOR ANALYSIS IN EDUCATION (3 credits)

The purpose of this course is to familiarize students with knowledge and skills in educational systems, educational assessment, educational interventions, and problem solving models with an emphasis on applied behavior analysis.

Prerequisite(s): Not open to non-degree graduate students.

PSYC 9070 PROSEMINAR: COGNITIVE PSYCHOLOGY (3 credits)

This course will be a comprehensive overview of the field of cognitive psychology including the topics of attention and performance, memory, problem solving, and language. In addition, there will be a more in-depth coverage of selected issues.

Prerequisite(s): Graduate standing or permission of instructor. Not open to non-degree graduate students.

PSYC 9090 PSYCHOMETRIC THEORY (3 credits)

Study of theoretical and practical problems related to the development and use of psychological measures and research designs covering such topics as scaling, test development, reliability, validity, interpretation of results and generalizability.

Prerequisite(s): PSYC 3130 or equivalent. Not open to non-degree graduate students.

PSYC 9100 SMALL N RESEARCH DESIGNS (3 credits)

This course uses applications of research methodology that involve direct observation and single-subject designs to identify evidence-based practices that address clinical problems experienced by individuals across a variety of settings. Topics covered include behavioral assessment techniques, graphing data, single subject experimental designs, and consumer satisfaction with interventions.

Prerequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor.

PSYC 9120 MULTIVARIATE STATISTICAL ANALYSIS (3 credits)

An examination of statistical techniques for describing and analyzing multivariate data commonly collected in behavioral research. Analytic techniques derived from general linear model will be considered, focusing on proper interpretation and use. The course is intended for doctoral students in psychology and (selectively) for advanced masters students in behavioral sciences.

Prerequisite(s): PSYC 9090, PSYC 9010 and PSYC 9020 or permission of instructor. Not open to non-degree graduate students.

PSYC 9130 APPLICATIONS OF ADVANCED STATISTICS IN PSYCHOLOGY (3 credits)

This course covers a variety of statistical tools that may be used to answer research questions for group designs. A primary focus of the class is the application of statistical tools to psychology research and practice.

Prerequisite(s): Admission to a graduate program in Psychology. Not open to non-degree graduate students.

PSYC 9140 ASSESSMENT AND TREATMENT OF AUTISM SPECTRUM DISORDERS (3 credits)

The purpose of this course is to familiarize students with the diagnosis, assessment, and treatment of autism spectrum disorders (ASD). (Cross-listed with SPED 9140).

Prerequisite(s): Not open to non-degree graduate students.

PSYC 9150 EXPERIMENTAL ANALYSIS OF BEHAVIOR (3 credits)

The purpose of this course is to familiarize students with basic behavior analytic research tactics and their application to the study of human and animal behavior. The course will include an in-depth evaluation of core principles of behavior analysis on an experimental level.

Prerequisite(s): PSYC 9040, PSYC 9100, or permission of instructor. Not open to non-degree graduate students.

PSYC 9160 BEHAVIOR ANALYTIC APPROACHES TO ORGANIZATIONAL CHANGE AND HUMAN PERFORMANCE IMPROVEMENT (3 credits)

The purpose of this course is to prepare students to apply principles of behavior analysis within complex systems and organizations. The course will cover methods of assessment, analysis, and intervention to solve human performance problems within organizations and at the individual level. The course will prepare students for leadership roles within human service organizations.

Prerequisite(s): PSYC 9040, PSYC 9100, or permission of instructor. Not open to non-degree graduate students.

PSYC 9230 PROSEMINAR: BEHAVIORAL NEUROSCIENCE (3 credits)

A study of the biological substrates of behavior with emphasis upon neuroanatomy, neurophysiology and neuropharmacology.

Prerequisite(s): Not open to non-degree graduate students.

PSYC 9240 PROSEMINAR: EVOLUTIONARY PSYCHOLOGY (3 credits)

A comprehensive overview of behavioral biology including topics of evolution and behavior, behavioral ecology, physiology and genetics of behavior, and learning.

Prerequisite(s): Not open to non-degree graduate students.

PSYC 9320 SEMINAR IN PROGRAM EVALUATION (3 credits)

This course is intended to help advanced graduate students in the applied social sciences understand the literature and conduct evaluation research. The history of program evaluation and philosophies manifest in evaluation research are reviewed, alternative evaluation models are discussed, and relevant methodological and practical issues such as quasi-experimental design and utilization are explored.

Prerequisite(s): Students should have prior graduate-level course work or experience in research design and statistics in the applied social sciences. Not open to non-degree graduate students.

PSYC 9421 POSITIVE ORGANIZATIONAL PSYCHOLOGY AND LEADERSHIP (3 credits)

This course is a graduate seminar on organizational psychology and leadership that focuses on the understanding and critical analysis of theory and practice pertaining to individual functioning at work. Positive organizational psychology theories and practices will provide the overarching framework in understanding potential solutions to challenges and problems facing leaders and their employees. (Cross-listed with CACT 8520)

Prerequisite(s): Graduate standing or permission of instructor.

PSYC 9430 PROSEMINAR: PERSONALITY (3 credits)

A course considering the effects of personality variables on behavior. A historical, theoretical, psychometric and experimental approach will be emphasized.

Prerequisite(s): Not open to non-degree graduate students.

PSYC 9440 PROSEMINAR: SOCIAL PSYCHOLOGY (3 credits)

Examination of theories, research findings and controversies in social psychology. Topics will include socialization; person perception; interpersonal attraction, leadership and group effectiveness; attitudes, attitude measurement, and attitude change; intergroup relations, power and social influence. New topics will be added as they become part of the research interests of social psychologists.

Prerequisite(s): Not open to non-degree graduate students.

PSYC 9460 SEMINAR IN AGING AND HUMAN BEHAVIOR (3 credits)

This course will examine in detail age-related changes in psychological processes and explore the implications of these changes for behavior. The course is intended primarily for graduate students in psychology and gerontology. (Cross-listed with GERO 9460)

Prerequisite(s): Graduate standing in gerontology or psychology.

PSYC 9470 PRACTICUM IN APPLIED BEHAVIOR ANALYSIS (1-12 credits)

The practicum in applied behavior analysis provides students with intensive supervised experience providing behavior analytic services to improve the well-being of children and their families. Students will be assigned to practicum sites based on their respective interests, career goals, and availability of positions.

Prerequisite(s): One semester of coursework in the Applied Behavior Analysis Master's degree program or admission to the Applied Behavior Analysis Certificate program. Not open to non-degree graduate students.

PSYC 9500 SOCIOEMOTIONAL DEVELOPMENT (3 credits)

This seminar is designed to provide an in-depth examination of the research literature on socioemotional development (emotional development that influences social behavior & development), with particular emphasis on both classic issues and current topics of debate. The course topics cover issues of importance in infancy, childhood, and adolescence. Research methods, as they apply to socioemotional development, will be emphasized throughout the course.

Prerequisite(s): Graduate standing and PSYC 9560. Not open to non-degree graduate students.

PSYC 9510 RESEARCH METHODS IN DEVELOPMENTAL PSYCHOLOGY (3 credits)

This course is designed to provide graduate students in developmental psychology and school psychology with the necessary skills to enable them to frame a research question and to design a study to answer that question. In addition, students will become familiar with methodologies for specialized areas within developmental psychology. Research ethics is a major component in the course.

Prerequisite(s): PSYC 9560. Not open to non-degree graduate students.

PSYC 9530 COGNITIVE DEVELOPMENT (3 credits)

This course covers contemporary issues in theory and research concerning the development of processes by which environmental information is perceived, attended to, stored, transformed and used. Both Piagetian and information processing orientations will be emphasized.

Prerequisite(s): PSYC 9560. Not open to non-degree graduate students.

PSYC 9550 PSYCHOSOCIAL DEVELOPMENT (3 credits)

A seminar focusing on research methods, theory and the empirical literature as they apply to social and personality development across the life span. All students will be expected to design and conduct a mini-observational experimental study in some specific area of social and personality development.

Prerequisite(s): Graduate standing and PSYC 9560. Not open to non-degree graduate students.

PSYC 9560 PROSEMINAR: DEVELOPMENTAL PSYCHOLOGY (3 credits)

A survey of developmental processes across the life-span, with a particular emphasis on the interface of biological, cognitive and social influences. Theories of human development and issues pertaining to developmental processes are examined. The primary focus in the course is on the research literature pertaining to developmental psychology. Special emphasis is given to the role of context in development and to the topics of research methods, multicultural factors in development and social policy.

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

PSYC 9570 APPLIED BEHAVIOR ANALYSIS (3 credits)

A comprehensive introduction to experimental methodology in applied behavior analysis. Topics covered include observational recording systems, reliability indices, procedural implementation of behavioral techniques, single-subject research designs and a broad review of the research literature.

Prerequisite(s): A minimum of one course in learning theory (PSYC 8560, PSYC 8576, PSYC 9040, or equivalent) and permission. Not open to non-degree graduate students.

PSYC 9610 MOTIVATION & MORALE (3 credits)

A course focusing on theory and research in the areas of work motivation, work behavior and job satisfaction. Emphasis is placed on such topics as expectancy theory, job redesign, leadership, absenteeism, turnover, goal setting and behavior modification.

Prerequisite(s): Admission into industrial/organizational psychology graduate program and permission of instructor. Not open to non-degree graduate students.

PSYC 9620 TRAINING AND DEVELOPMENT (3 credits)

This course will review theory and research relevant to training and organizational development, with emphasis on diagnosis, design, implementation, and evaluation. Practical concerns associated with intervention will be addressed.

Prerequisite(s): Admission into industrial/organizational psychology graduate program and PSYC 9090, PSYC 9010, and PSYC 9020. Not open to non-degree graduate students.

PSYC 9630 LEADERSHIP THEORIES AND RESEARCH (3 credits)

The purpose of this course is to provide the student with a thorough review of the theories and research in the area of leadership. Theories reviewed will be those that focus on the role of the individual in effective leadership, the role of the situation, and the role of the followers. Special attention will be given to the psychological theories of leadership. The application of leadership research and theory to areas such as selection and training will also be reviewed.

Prerequisite(s): Admission into the psychology graduate program or graduate standing and instructor permission. Not open to non-degree graduate students.

PSYC 9640 PROBLEM SOLVING & DECISION MAKING (3 credits)

The primary objective of the course is to acquaint students with some of the major conceptual, methodological, and measurement issues within the field of problem solving and decision making. Due to the scope of this field, the course will focus on the psychological research on individual decision making, with special emphasis on the cognitive and motivational processes underlying problem solving and decision making. The second major objective of the course is to encourage students to creatively integrate and apply decision making approaches and findings to traditional areas of concern to the industrial-organizational psychologist (e.g., employee selection, performance appraisal, training, leadership, motivation). The third objective is to hone students' critical thinking skills and their ability to present their ideas in a clear and coherent manner using oral and written formats.

Prerequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

PSYC 9650 RESEARCH METHODS IN PSYCHOLOGY (3 credits)

A course designed to allow students to integrate and extend their knowledge and understanding of psychological research. Students will develop skills in writing research proposals, conducting research, and preparing manuscripts for publications.

Prerequisite(s): PSYC 9010 or PSYC 9020. Not open to non-degree graduate students.

PSYC 9660 CRITERION DEVELOPMENT AND PERFORMANCE APPRAISAL (3 credits)

An in-depth examination of the fundamentals of personnel psychology including job analysis, criterion development and performance measurement and appraisal in organizations. Practical experience in the application of techniques and procedures is emphasized through group and individual projects in organizational settings.

Prerequisite(s): Admission to industrial/organizational psychology graduate program and PSYC 9090 (may be taken concurrently). Not open to non-degree graduate students.

PSYC 9670 PERSONNEL SELECTION (3 credits)

An exploration of current theory and practice in personnel selection. Problem solving strategies are emphasized through the design, analysis, and interpretation of selection research and the implementation of selection programs consistent with Equal Opportunity Guidelines and federal law.

Prerequisite(s): Admission to industrial organizational psychology graduate program, PSYC 9660. Not open to non-degree graduate students.

PSYC 9680 GROUPS AND TEAMS (3 credits)

Teamwork is hard but inevitable; individuals must be able to work effectively in a team. Teamwork is only becoming more difficult and complex as organizations use technology to communicate across space and time, bringing together culturally and functionally diverse, physically distributed team members who are members of multiple teams or systems of teams. This course explores what it means to be a good team member, to help others work effectively in teams, and to diagnose and solve teamwork problems. Challenges such as communication, decision-making, conflict resolution, and leadership are explored.

Prerequisite(s): Admission to industrial organizational psychology graduate program and PSYC 9660. Not open to non-degree graduate students.

PSYC 9770 SCHOOL CRISIS INTERVENTION STRATEGIES AND TECHNIQUES (3 credits)

This course will present approaches to school-based crisis intervention. The course includes definitions and characteristics of a crisis, a brief history of crisis intervention and associated theories/models, and school-based strategies and techniques for intervening when a school crisis occurs.

Prerequisite(s): Admission to the School Psychology graduate program or permission of the instructor. Not open to non-degree graduate students.

PSYC 9780 ADVANCED CONSULTATION IN PSYCHOLOGY AND EDUCATION (3 credits)

The course is designed to provide education and psychology professionals a comprehensive understanding of foundational theories and processes of consultation applied to education and psychology problems of children. A major objective is to focus on developing consultation skills considered necessary to be an effective consultant through direct practice and feedback. The course will emphasize the relationship between the consultant and parents, teachers, and other professionals within the school and child mental health settings.

Prerequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 9910 TOPICAL SEMINAR IN PSYCHOLOGY (3 credits)

A discussion of specific advanced topics which will be announced whenever the course is offered.

Prerequisite(s): Permission of instructor. Not open to non-degree graduate students.

PSYC 9920 TOPICAL SEMINAR IN PSYCHOLOGY (2 credits)

A discussion of specific advanced topics which will be announced whenever the course is offered.

Prerequisite(s): Permission of instructor. Not open to non-degree graduate students.

PSYC 9940 SCHOOL PSYCHOLOGY APPLIED RESEARCH PROJECT (1-7 credits)

The applied research project consists of students conducting an independent research project from start to finish. This project should have relevance to a practical aspect of school psychology and provide a unique contribution to the field. It may be quantitative or qualitative in nature, and must rely on sound research methodology.

Prerequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

PSYC 9950 PRACTICUM FOR DOCTORAL STUDENTS (1-6 credits)

Faculty-supervised experience in industry or business designed to bridge the gap between the classroom and a job, emphasizing use of previously acquired knowledge in dealing with practical problems for doctoral students.

Prerequisite(s): Admission to industrial/organizational psychology graduate program. Not open to non-degree graduate students.

PSYC 9960 RESEARCH OTHER THAN THESIS (1-12 credits)

Research work under supervision of a faculty member. May be repeated up to a total of 12 credit hours.

Prerequisite(s): Enrollment in a graduate program beyond the master's level. Not open to non-degree graduate students.

PSYC 9970 ED.S. LEVEL PRACTICUM IN SCHOOL PSYCHOLOGY (1-6 credits)

School Psychology School-Based Practicum is a capstone course in school psychology intended for students who have completed their Master's degree in School Psychology. This course is designed to reflect the scientist-practitioner model of training and practice in School Psychology. To accomplish this goal, students will be assigned to a practicing school psychologist employed by the public schools. The content of this course will focus on integrating previous and concurrent training experiences from courses and field experiences.

Prerequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 9980 INTERNSHIP IN SCHOOL PSYCHOLOGY (1-6 credits)

School Psychology Internship is the final course in school psychology intended for students who have completed all of their other coursework. It is a 1200 hour culminating experience leading to licensure/certification as a school psychologist in most states, and eligibility for the NCSP exam. The internship requires that students apply the domains of training and practice that are outlined in the School Psychology program philosophy and training objectives. University and site-based supervision is required.

Prerequisite(s): Admission to School Psychology Graduate Program and/or permission of instructor. Not open to non-degree graduate students.

PSYC 9990 PSYCHOLOGY DISSERTATION (1-24 credits)

The course provides doctoral candidates in Psychology with a process to complete a dissertation research plan. The course learning activities will focus on the completion of a candidate's dissertation. The course is designed to allow advanced doctoral candidates to demonstrate technical mastery of the discipline and to advance knowledge by completing an investigation.

Prerequisite(s): Must be admitted to a graduate level PSYC program or permission of instructor. Not open to non-degree graduate students.

Public Administration (PA)

Public Administration Graduate Courses

PA 8010 THE PUBLIC ECONOMY (3 credits)

This course focuses on microeconomics and its application to policy and management in the public and non-profit sectors. The concept of efficiency is developed along with the goal of social equity to help determine the roles of the public, private, and non-profit sectors. Some key issues examined are: the balance between equity and efficiency, government intervention in the market, privatization of public services, and cost benefit analysis.

Prerequisite(s): Not open to non-degree graduate students.

PA 8030 INTERNSHIP IN PUBLIC ADMINISTRATION (1-6 credits)

Maximum of 3 hours to be granted upon completion of written report on internship. Internship in some government: national, state, local or nonprofit agency and in some instances public-oriented private agencies. Students will take course as Satisfactory/Unsatisfactory. An additional 3 hours may be taken through PA 8040.

Prerequisite(s): Nine hours of MPA coursework and permission of school. Not open to non-degree graduate students.

PA 8040 INTERNSHIP IN PUBLIC ADMINISTRATION (1-6 credits)

Maximum of 3 hours to be granted upon completion of written report on internship. Internship in some government: national, state, local or nonprofit agency and in some instances public-oriented private agencies. Students will take the course as Satisfactory/Unsatisfactory. An additional 3 hours may be taken through PA 8030.

Prerequisite(s): Nine hours of MPA course work and permission of the school. Not open to non-degree graduate students.

PA 8050 FOUNDATIONS OF PUBLIC ADMINISTRATION (3 credits)

The purpose of this course is to introduce the student to the art and science of public administration and to enable the student to develop the knowledge, skills and abilities requisite to the pursuit of graduate education in public administration.

Prerequisite(s): Not open to non-degree graduate students

PA 8090 ORGANIZATION THEORY AND BEHAVIOR (3 credits)

A study of the various approaches to understanding public organizations and people in them with special emphasis on the design, functioning and management of public agencies.

Prerequisite(s): Not open to non-degree graduate students

PA 8100 ADVANCED MANAGEMENT AND LEADERSHIP FOR PUBLIC AND NONPROFIT PROFESSIONALS (3 credits)

This course is designed to advance students' understanding and techniques about the role of leadership and ethics in the public and nonprofit sectors. Special attention will be paid on the application of theories of leadership and ethics to manage various boundary spanning activities including managing external relationships, collaborations/networks, performance, and innovation and change.

Prerequisite(s): PA 8050 and PA 8090. Not open to non-degree graduate students.

PA 8106 MARKETING IN PUBLIC, NON-PROFIT AND AVIATION ORGANIZATIONS (3 credits)

This course will focus on developing a working knowledge of marketing and its component parts as they may be applied to non-profit organizations. Emphasis will be placed on understanding the marketing process and applying marketing principles to real organizational settings. (Cross-listed with PA 4100).

Prerequisite(s): Graduate and permission of instructor, and PA 8010, PA 8090; or permission of department.

PA 8110 MANAGING INFORMATION IN THE PUBLIC SECTOR (3 credits)

This course is directed toward in-career and pre-career students in public administration who wish to acquire knowledge of issues in the management of information in the public sector and the basics of computing applications in the public sector. Its primary focus is on special issues in the management of information.

Prerequisite(s): PA 8010, PA 8050 and PA 8090, or permission of school. Not open to non-degree graduate students.

PA 8120 ANALYSIS AND DECISION MAKING (3 credits)

This course assists students to develop their skills in research design and data analysis, covering both qualitative and quantitative data relevant to public affairs. The course introduces students to the fundamentals of research design, data collection, data and statistical analysis, and drawing pertinent policy and management recommendations.

Prerequisite(s): Not open to non-degree graduate students

PA 8130 MANAGING DIGITAL GOVERNANCE (3 credits)

This course equips current and future public and nonprofit managers with capabilities and strategies to evaluate, participate in, and/or lead an information technology (digital governance) project to improve or even transform public service and governance. Because information technology has become increasingly integrated into public service and governance, understanding the role of information and information technology in government has become a necessity. This course provides the concepts and tools for public and nonprofit managers to succeed in the information age by better managing information as a resource and information technology as an enabler for public services and governance. The topics include digital divide, online participation, strategic IT management and change management, information resource and knowledge management, financing IT projects, IT project and performance management, management of IT outsourcing, and business process management. Basic literacy in computing and information technology is an integral part of the course. The discussion of these topics will address the growing use of information and communication technologies such as social media, smart mobile devices, and internet of things. Moreover, this course addresses the interplay of management, technology, and policy in the context of public service organizations, including governmental and non-profit organizations. This course offers the best of both practical and academic worlds via assigned readings and exercises, discussions, and a service-oriented project. The emphasis is on research-based knowledge and best practices informing one another. The class discussion is aimed at integrating professional experience with quality research to generate additional insights.

Prerequisite(s): PA 8050. Not open to non-degree graduate students.

PA 8160 PLANNING, PREPAREDNESS, AND MITIGATION (3 credits)

This course addresses the pre-disaster phases of Emergency Management, including planning, preparedness, and mitigation. The class covers the National Response Framework (NRF) and the National Incident Management System (NIMS) and their influence on modern community Emergency Management and Homeland Security. EMGT 8060 is intended to prepare students for the various tangible and intangible considerations EMGT professionals face when planning and preparing for disasters, either natural or man-made. (Cross-listed with EMGT 8060).

Prerequisite(s): Students must have completed or be concurrently taking the beginning core of the MPA curriculum.

PA 8200 COMMUNITY ORGANIZING & SOCIAL CHANGE (3 credits)

This course focuses on various theories and applications of organizing communities and neighborhoods to effect change. Of particular interest is the role of engaging citizens in improving their communities. (Cross-listed with UBNS 8200).

Prerequisite(s): Permission of instructor. Not open to non-degree graduate students.

PA 8300 POLICY DESIGN AND IMPLEMENTATION (3 credits)

This course examines the formulation, adoption, implementation and evaluation of public policy. Important topics include the basic features of American government, the causes and determinants of public policies, the dynamics of decision-making in the public sector, the obstacles to "successful" public programs, and the criteria for the assessment of a public program's impact. Special emphasis is given to the role public managers play within the policy process.

Prerequisite(s): PA 8050, PA 8090 and PA 8120. Not open to non-degree graduate students.

PA 8320 PUBLIC POLICY EVALUATION (3 credits)

This course is designed to have the students understand the role of evaluation in the policy process, to demonstrate how to conduct and implement evaluations of public programs, to illustrate the procedures for presenting an evaluation report to public officials and citizens, to introduce operational issues and problems associated with management of an office of policy evaluation, and to insure the exploration of conflicts and limitations inherent to public policy evaluation.

Prerequisite(s): PA 8010, PA 8050, PA 8090 and PA 8120 and completion of at least 24 hours in the MPA program, not open to non-degree graduate students

PA 8330 SEMINAR IN POLICY ANALYSIS (3 credits)

Application of analytical techniques to the assessment of alternative courses of public action and the development and design of public programs; utilization and impact of expert analysis by public officials and political groups; impact and role of technical analysis in a democracy; management of policy analysis units within government.

Prerequisite(s): PA 8050 and PA 8120, not open to non-degree graduate students

PA 8350 SOCIAL POLICY AND INEQUALITY (3 credits)

The course aims to provide students with a foundation for understanding the sociological, political, and economic themes and issues that are relevant for today's social policy making. In this course, students will examine key theories and social policy issues that underlie contemporary thinking about our social, political, and economic landscape.

Prerequisite(s): PA 8050, PA 8090, and PA 8100. Admission to a graduate degree or graduate certificate program. Not open to non-degree graduate students.

PA 8400 PUBLIC AND NONPROFIT BUDGETING (3 credits)

The purpose of the course is to familiarize public administration students with the basic characteristics and features of public budgets and enable them to deal competently with them.

Prerequisite(s): PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8410 PUBLIC HUMAN RESOURCE MANAGEMENT (3 credits)

A study of the personnel process in American governmental administration. The processes and problems of recruiting, structuring and operating public bureaucracies are examined as well as problems in personnel leadership, neutrality, accountability and performance.

Prerequisite(s): PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8420 PUBLIC WORKS MANAGEMENT (3 credits)

This course is designed to develop an understanding of the profession of public works management, and its relationship with urban service delivery. Students will learn substantive specialty areas of public works, as well as management techniques to improve service delivery efficiency.

Prerequisite(s): PA 8050. Not open to non-degree graduate students.

PA 8430 RESPONSE, RECOVERY & RESILIENCE (3 credits)

This course addresses the post-impact/disaster phases of Emergency Management, including response, recovery, and resiliency. The class focuses on disasters declarations and assistance, interagency cooperation, unified and incident command, operational application of the National Incident Management System (NIMS), and the political, legal, social, and economic considerations inherent with responding to and recovering from emergencies. (Cross-listed with EMT 8430).

Prerequisite(s): Students must have completed or be concurrently taking the beginning core of the MPA curriculum.

PA 8436 MUNICIPAL ADMINISTRATION (3 credits)

The administrative structure and administrative practices of American cities covering such areas as finance, personnel, public works, public safety, health, utilities and planning. (Cross-listed with PA 4430).

Prerequisite(s): PA 8010 and PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8440 ORGANIZATION DEVELOP. & PLANNED CHANGE IN THE PUBLIC SECTOR (3 credits)

This course provides students with the theories and skills necessary to manage organizational change in the public sector. To accomplish this will require that the student become versed in the strategies of organizational development (OD) and planning in the public sector while at the same time mastering intervention techniques.

Prerequisite(s): PA 8010, PA 8050, PA 8090, PA 8120 and completion of at least 24 hours in the MPA, not open to non-degree graduate students

PA 8450 SEMINAR IN ADVANCED MANAGEMENT ANALYSIS IN PUBLIC AGENCIES (3 credits)

A study of theory and method related to analysis of problems of organization and workflow in public agencies. The course includes problem analysis, field study methods, design of improved methods, selecting alternatives and developing decision packages.

Prerequisite(s): PA 8010, PA 8050, PA 8090, PA 8120 and completion of at least 24 hours in the MPA program.

PA 8470 ADMINISTRATIVE ETHICS AND LEADERSHIP (3 credits)

Ethical action and effective leadership are especially important in public service and they are closely related. This course introduces students to concepts from public sector ethics and from leadership theory. Emphasis is placed on decision-making processes, relationships between public and nonprofit sector professionals and elected officials and citizens, and the role of the career public service professional in a democratic society.

Prerequisite(s): PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8480 SEMINAR IN PUBLIC FINANCIAL ADMINISTRATION (3 credits)

The study of public finance administration policy and techniques areas. Emphasis is placed on the technical aspects of public finance administration with particular emphasis on the purposes, processes and issues associated with particular techniques or technique areas.

Prerequisite(s): PA 8050 or permission of department.

PA 8500 ISSUES IN PUBLIC-PRIVATE SECTOR COOPERATION (3 credits)

This course introduces students to the organization and processes, as well as the tools and techniques, of public-private sector cooperation. The objective of such a course is to familiarize students with the concepts and skills needed to develop and administer joint activities between the public and private sectors. Such cooperative activities have become an important aspect of public administration in recent years.

Prerequisite(s): PA 8010, PA 8050, PA 8090 or permission of school. Not open to non-degree graduate students.

PA 8516 LONG-TERM CARE ADMINISTRATION (3 credits)

An investigation of the broad range of policy issues, theoretical concerns and practical management strategies influencing the design, organization and delivery of long-term care services. (Cross-listed with GERO 4510, GERO 8516, PA 4510).

Prerequisite(s): Permission of instructor and PA 8050, PA 8090 or permission of school. Not open to non-degree graduate students.

PA 8520 SEMINAR IN GRANT WRITING (3 credits)

This course explores the grant-writing process from initial conceptualization through submission and award to final report. The purposes of the course are to provide graduate students with the expertise and tools needed to fund their own research, to provide effective grant-writing assistance to faculty mentors and other colleagues, and to compete more effectively in the job market and/or for acceptance into doctoral and post-doctoral programs.

Prerequisite(s): PA 8010, PA 8050 and PA 8090. Not open to non-degree graduate students.

PA 8530 PLANNING AND EVALUATION (3 credits)

The basic question presented in this course is how we can use strategic planning and evaluation to build public and nonprofit organizations that function creatively and effectively, and that enhance the overall public value of their services.

Prerequisite(s): PA 8100, PA 8050, PA 8090, PA 8120 and PA 8300. Not open to non-degree graduate students.

PA 8540 NONPROFITS AND PUBLIC POLICY (3 credits)

The class explores the interaction between public policy and nonprofit organizations: how nonprofits influence and are influenced by public decision-making.

Prerequisite(s): PA 8050, PA 8090, PA 8100. Admission to a graduate degree or graduate certificate program. Not open to non-degree graduate students.

PA 8550 INTRODUCTION TO THE NON-PROFIT SECTOR (3 credits)

This course focuses on the contribution and importance of philanthropy, volunteerism and nonprofit organizations in society. Includes the differentiation between both public and private nonprofit organizations and the for profit sector. Management issues regarding nonprofit agencies is introduced.

Prerequisite(s): Graduate standing, PA 8010, PA 8090 and permission of advisor or permission of school. Not open to non-degree graduate students.

PA 8560 NONPROFIT FINANCIAL MANAGEMENT (3 credits)

The focus of this course is on developing an understanding of the managing of financial resources within a nonprofit organization. A special emphasis is also placed on developing and executing budgets for such organizations.

Prerequisite(s): Graduate standing and PA 8550 or permission of instructor. Not open to non-degree graduate students.

PA 8566 INTERGOVERNMENTAL MANAGEMENT (3 credits)

This course is directed at those who wish to improve their knowledge and understanding of intergovernmental relations as it impacts policy and administration in the United States. The course will look at history and theoretical underpinnings of intergovernmental relations, the different elements of these relationships and review specific management arenas that are affected by these relationships. (Cross-listed with PA 4560).

Prerequisite(s): PA 8010, PA 8050 and PA 8090; or permission of school. Not open to non-degree graduate students.

PA 8580 NONPROFIT HUMAN RESOURCES MANAGEMENT (3 credits)

This graduate-level course provides an introduction to the theories, principles, policies and practices related to leading and managing human resources in nonprofit organizations, including personnel, board and volunteer management and development.

Prerequisite(s): Graduate standing and permission of adviser; PA 8050; or permission of school. Not open to non-degree graduate students

PA 8596 TECHNIQUES TOPICS IN NONPROFIT MANAGEMENT (1-3 credits)

A variable content course emphasizing nonprofit management techniques and topics. Topics include nonprofit leadership, board executive staff roles and relationships, personnel and volunteer management, financial management, proposal and grant writing community resources, special events planning and administration, needs assessments and legal ethical aspects.

Prerequisite(s): PA 8050 or permission of school. Not open to non-degree graduate students.

PA 8600 ADMINISTRATIVE LAW (3 credits)

A review of the principal elements of the role and character of legal processes in government administration, including delegation of powers, legal forms of administrative action, liability of government units and officers and judicial review of administrative action.

Prerequisite(s): PA 8050, not open to non-degree graduate students

PA 8610 CONTEMPORARY ISSUES IN EMERGENCY MANAGEMENT (3 credits)

This course exposes the student to contemporary issues in Emergency Management including how to conduct exercise design, development, and evaluation. What different factors affect administration of emergency management services and what actions are required for planning, preparedness, mitigation, response, and recovery strategies when dealing with Natural Disasters, Medical Pandemics and Outbreaks, and Terrorism/Para Military Events that threaten the United States. (Cross-listed with EMGT 8600).

Prerequisite(s): Students must have completed or be concurrently taking the beginning core of the MPA curriculum.

PA 8676 PROGRAMS AND SERVICES FOR OLDER ADULTS (3 credits)

This course is provided to give the student an historical overview of programs for older adults; examine the national policy process as it relates to the older American; and review the principles and practices relative to the existing national programs for the aged. (Cross-listed with GERO 4670, GERO 8676).

Prerequisite(s): Not open to non-degree graduate students.

PA 8710 FUND RAISING IN PUBLIC AND NON-PROFIT ORGANIZATIONS (3 credits)

The purpose of this course is to introduce students to a variety of fund raising methods, provide the context in which these methods might be used, and provide an understanding of how fund raising operates within public and not-for-profit organizations.

Prerequisite(s): Graduate standing and permission of instructor, PA 8010, and PA 8090; or permission of school. Not open to non-degree graduate students.

PA 8740 HEALTH CARE POLICY (3 credits)

This course helps students understand major health care policy making and related issues. It focuses on the history/background; physical, social, and economic environment; policy process; and political marketplace of contemporary U.S. health care policies. Topics include health care reform, cost containment, indigent health care and urban vs. rural health care. A health care background is helpful, but not required.

Prerequisite(s): Not open to non-degree graduate students.

PA 8750 SOCIAL DETERMINANTS OF HEALTH (3 credits)

This course will introduce students to social determinants of health, health inequalities, vulnerable groups who experience substantial health disparities, and public policy strategies to improve health inequalities in the United States.

Prerequisite(s): PA 8050, PA 8090, PA 8100. Must be admitted to a graduate degree or graduate certificate program. Not open to non-degree graduate students.

PA 8826 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

An introduction to environmental law and regulations intended for students pursuing careers in environmental sciences or related fields. The course emphasizes the origins, implementation, and enforcement of U.S. state and federal laws and regulations. Major federal environmental laws, covering air and water quality, solid and hazardous waste, pollution prevention and remediation, and natural resources will be discussed. Usually offered Fall semesters. (Cross-listed with ENVN 8826, ENVN 4820, BIOL 4820, GEOG 4820, GEOG 8826).

Prerequisite(s): Graduate Standing or Permission from the Instructor.

PA 8896 SPECIAL TOPICS PUBLIC ADMIN (3 credits)

A course with the purpose of acquainting the student with key issues and topics of special concern to public and non-profit management that they otherwise would not receive elsewhere. No more than six hours of total credit in PA 8896 and PA 8906 can be taken without prior permission by the graduate program committee. Further, each topic in the course will need the approval of the Dean of Graduate Studies prior to being offered. (Cross-listed with PA 4890).

PA 8906 SPECIAL TOPICS IN PUBLIC ADMINISTRATION (1-3 credits)

A variable content course with Public Administration and Urban Studies topics selected in accordance with student and faculty interest. Possible topics include urban homesteading, administrative federalism and economic development and the public sector. (Cross-listed with PA 4900).

Prerequisite(s): PA 8050 or permission of the school. Not open to non-degree graduate students.

PA 8920 READINGS IN PUBLIC ADMINISTRATION (1-3 credits)

Specially planned readings in public administration for the graduate student who encounters scheduling problems in the completion of his degree program, or who has special preparatory needs and who is adjudged by the department to be capable of pursuing a highly independent course of study.

Prerequisite(s): PA 8010, PA 8050, PA 8090, PA 8120, and permission of the school. Not open to non-degree graduate students.

PA 8990 CAPSTONE PROJECT IN PUBLIC ADMINISTRATION (3 credits)

The Capstone Project offers each student the opportunity to demonstrate mastery of the theory and practice of public administration by applying the knowledge and skills gained in the MPA program to a project of the student's choice. This involves completing a project report reflecting the cumulative knowledge gained from these experiences. The course is intended only for students who are completing their Masters of Public Administration (MPA).

Prerequisite(s): Completion of at least 30 hours in the MPA, PA 8050, PA 8100, PA 8090, PA 8120, PA 8300, PA 8400, PA 8530 and school permission. Not open to non-degree graduate students.

PA 9000 FOUNDATIONS OF PUBLIC ADMINISTRATION (3 credits)

This course is designed as a doctoral seminar that surveys the development of public administration from its earliest antecedents to the present day, taking both a historical and topical approach.

Prerequisite(s): Admission into the doctoral program. Not open to non-degree graduate students.

PA 9080 ADVANCED STATISTICAL APPLICATIONS (3 credits)

This is a required course which will provide the student with fundamentals of modern statistical techniques used in criminal justice and public affairs research. (Cross-listed with CRCJ 9080).

Prerequisite(s): CRCJ 8950

PA 9200 THEORIES OF THE POLICY PROCESS (3 credits)

Proseminar in public policy with emphasis on the development and application of theories of the formulation, adoption, and implementation of public policy.

Prerequisite(s): Completion of a Master's degree in Public Administration or a related field, and permission of the instructor. Not open to non-degree graduate students.

PA 9300 KNOWLEDGE DEVELOPMENT AND USE IN THE PUBLIC SERVICE PROFESSION (3 credits)

This course will examine current issues in knowledge, development and use in the public service professions. Emphasis is placed on understanding various systematic research to effect social change.

Prerequisite(s): Admission to doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9400 THE ENVIRONMENT OF PUBLIC ADMINISTRATION (3 credits)

The purpose of this course is to enable the doctoral student to understand the role and responsibility of public administration in the context of the broader political economy.

Prerequisite(s): Admission to the doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9500 THEORIES OF NONPROFIT ORGANIZATIONS AND CIVIL SOCIETY (3 credits)

This seminar course focuses on the theories and context of nonprofit and voluntary organizations, philanthropy, and civic society. It is designed for Ph.D. students to increase their depth of knowledge in specific content areas, including historical, legal, social, political, economic, behavioral, religious, ethical, organizational, and critical theories. The purpose is to help students gain knowledge of theories and context related to nonprofit and voluntary organizations, philanthropy, and civic society; as well as develop other skills to improve as a scholar.

Prerequisite(s): Admission to the doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9600 SEMINAR IN ADVANCED MANAGEMENT THEORY (3 credits)

This course examines how recent advances in management theory may be incorporated into the practice of public administration.

Prerequisite(s): Admission to doctoral program and PA 8090 or permission of instructor. Not open to non-degree graduate students.

PA 9700 PUBLIC BUDGETING AND FINANCIAL THEORY (3 credits)

This seminar is focused on theoretical issues in public budgeting and governmental finance. The aim of the seminar is for the student to understand the central issues in public budgeting and finance, and the place of this field of study within public administration.

Prerequisite(s): Admission to doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9800 ADVANCED RESEARCH DESIGN (3 credits)

This is a required course which will expose students to advanced topics in research methods in preparation for writing their doctoral dissertation. It will also apply advanced methodological techniques to problems in the field.

Prerequisite(s): Admission to the doctoral program. Not open to non-degree graduate students.

PA 9900 ADVANCED TOPICS (3 credits)

This course provides a format for exploration of topics of interest to advanced students in public administration. Topics covered will change periodically in keeping with the interests of faculty and students. (Cross-listed with AVN 9900).

Prerequisite(s): Admission to PhD program in Public Administration or permission of instructor. Not open to non-degree graduate students.

PA 9920 TEACHING AND PROFESSIONAL SKILLS WORKSHOP (1 credit)

The workshop offers training for a career in higher education. Instruction and practice in teaching includes creating and presenting lecture material, facilitating discussion, constructing syllabi, and related matters. Instruction in professional skills includes topics such as interviewing for positions, writing and publishing, and the tenure process.

Prerequisite(s): Admission to Ph.D. program or permission of instructor. Not open to non-degree graduate students.

PA 9930 PHD RESEARCH & PROFESSIONAL SKILLS WORKSHOP (1 credit)

This one credit hour PhD workshop offers training and practice related to research and professional development to prepare for a career in higher education or another research-oriented career. Topics covered include developing a research design and proposal, applying for research funding, presenting research, publishing research, preparing to go on the academic or professional job market, and self-care/well-being.

Prerequisite(s): Admission to the doctoral program or permission of the instructor. Not open to non-degree graduate students.

PA 9950 QUANTITATIVE METHODS IN PUBLIC ADMINISTRATION (3 credits)

This course is designed to prepare the student to understand and apply advanced statistical methods needed in the design and analysis of public administration investigations. The major topics to be covered include research designs, nonexperimental research and specialized research designs, multiple linear regression, analysis of covariance, and logistic regression.

Prerequisite(s): CRCJ 8030 or equivalent, PA 8050 or permission of the school. Not open to non-degree graduate students.

PA 9960 QUALITATIVE RESEARCH METHODS (3 credits)

This course is a doctoral seminar in the methods and practice of qualitative research. Advanced research design techniques, validity, mixed methodology, and qualitative research tools common to the practice of public administration are presented.

Prerequisite(s): Admission to the doctoral program in public administration or permission of the instructor. Not open to non-degree graduate students.

PA 9970 DIRECTED RESEARCH IN PUBLIC ADMINISTRATION (3 credits)

This course offers a structure for doctoral students to conduct advanced research in their chosen area of specialization. (Cross-listed with AVN 9970).

Prerequisite(s): Admission to Ph.D. program in Public Administration and permission of instructor. Not open to non-degree graduate students.

PA 9980 DIRECTED READINGS IN PUBLIC ADMINISTRATION (3 credits)

This course is designed to provide the advanced graduate student with the opportunity to do extended readings on a specialized public administration topic.

Prerequisite(s): Admission to the Ph.D. program in public administration and permission. Not open to non-degree graduate students.

PA 9990 DISSERTATION (1-20 credits)

The dissertation is an original research project conducted and written under the direction of a faculty dissertation committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge in public administration.

Prerequisite(s): Admission to Ph.D. program in public administration. Admission to candidacy for Ph.D. degree. Prior to enrolling for dissertation hours, student must have permission from the chair of the supervisory committee. Not open to non-degree graduate students.

Public Health & Behavior (PHHB)

Public Health & Behavior Graduate Courses

PHHB 8050 APPLIED RESEARCH IN PUBLIC HEALTH (3 credits)

This course will assist candidates to develop the basic skills to conduct applied research to address contemporary problems in public health. The course will emphasize proposal writing, data collection, research design, statistical analysis, computer application, and writing of research reports.

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

PHHB 8080 TOPICS IN HEALTH EDUCATION (3 credits)

This course will explore important current issues in Health Education. Candidates will explore economic, political, ethical and technological developments that affect the practice of Health Education. There is no limit to the number of times a candidate may enroll in HED 8080 as long as a different topic is offered each time.

Prerequisite(s): Graduate.

PHHB 8206 A PUBLIC HEALTH APPROACH TO MENTAL HEALTH (3 credits)

This public health course will help students think critically about the prevention, identification, and treatment of mental illness in the United States. Students will be introduced to concepts from the disciplines of public health, psychology and sociology to understand mental health disorders and their impact on population health. Students will explore health disparities through the lens of cultural, social, behavioral, psychological, and economic factors. Students will recognize that mental health exists on a continuum and develop skills to address environmental influences on behavior. (Cross-listed with PHHB 4200).

PHHB 8250 HUMAN SEXUALITY (3 credits)

This graduate-level course is aimed at providing an overview of the current scientific knowledge concerning human sexuality. The course is designed to be interdisciplinary in nature, providing the biological, behavioral and cultural aspects of human sexuality. Priority will be given to candidates from the helping professions. Qualified candidates from other related disciplines must have permission of instructor.

Prerequisite(s): Undergraduate Anatomy and Physiology

PHHB 8270 INTERVENTIONS IN HEALTH EDUCATION (3 credits)

This course will provide health behavior candidates with an opportunity to investigate, contrast, develop, implement and evaluate a variety of intervention activities, to be applied in different settings. Theories regarding methods to enhance behavior change and teaching strategies to meet the health needs of a diverse population will be explored.

Prerequisite(s): Graduate status.

PHHB 8330 ALCOHOL EDUCATION (3 credits)

A study of the problems associated with alcohol use, misuse and abuse. The patterns and trends of use, theories of dependence, pharmacological aspects and health consequences are explored. Emphasis is given to the identification of people with alcohol related problems and the role of the private and public sectors in prevention, education, intervention, and referral. Methods of assessing needs, prescribing, implementing, and evaluating alcohol education programs will be explored.

PHHB 8360 COMMUNITY HEALTH (3 credits)

An in-depth examination of community health and determinants of community health issues. The epidemiology, statistical sciences, environmental health, political influences on health, and behavioral social sciences for community health are examined. Students are expected to be able to apply concepts addressed in class to contemporary health issues.

PHHB 8400 HEALTH PROMOTION PROGRAM PLANNING (3 credits)

An in-depth application of the health promotion program planning process utilizing a choice of planning models. Students develop a comprehensive plan in response to an actual grant announcement and follow appropriate guidelines.

PHHB 8450 EPIDEMIOLOGY & PREVENTION OF DISEASE (3 credits)

The course is designed for health behavior graduate students and others who are interested in public health. The causes, prevention, treatment and control of prevalent communicable and non-communicable disease in a culturally diverse and global society will be emphasized. Special emphasis will be given to diseases and health problems that can be prevented or controlled through education and advocacy. Students will apply skills to contemporary issues.

PHHB 8500 HEALTH PROGRAM DESIGN (3 credits)

This course will provide students the skills to design an education/advocacy health initiative based on health behavior theory and models. They will develop a plan that includes a detailed needs assessment, a carefully crafted set of SMART (Specific, Measurable, Achievable, Relevant, Time-Bound) objectives for all levels of program outcome, an implementation strategy using health behavior models, and a thorough and systematic evaluation framework (formative and summative).

PHHB 8556 HEALTH ASPECTS OF AGING (3 credits)

This course emphasizes health promotion for older adults. Special health needs of older Americans are compared and contrasted with health needs for other age groups. Prevention or delaying of chronic diseases and disorders are emphasized. (Cross-listed with PHHB 4550, GERO 4550, GERO 8556, WGST 4550).

PHHB 8600 HEALTH BEHAVIOR (3 credits)

The purpose of this course is to study the theoretical foundations of health behavior. Candidates will develop an understanding of the determinants of health behavior, the models and theories that provide a framework for predicting health behavior, and the strategies employed to bring about behavioral changes for health and disease prevention in individuals and groups.

PHHB 8706 WOMEN'S HEALTH AND ISSUES OF DIVERSITY (3 credits)

This course provides a critical understanding of the inter-relationship between socio-cultural, economic, and political factors and women's physical and mental health. The aim is to provide an overview of the experience with the health care system. Emphasis will be on critically examining recent scholarship from a sociological, behavioral, health policy perspective. (Cross-listed with PHHB 4700, SOC 4700, SOC 8706).

Prerequisite(s): Graduate standing.

PHHB 8730 DYING, DEATH & GRIEVING (3 credits)

An examination of theory and research relevant to interaction with the older, terminally ill person, focusing on communication with widows and other survivors as well as the dying patient. (Cross-listed with GERO 8730).

Prerequisite(s): Graduate Students

PHHB 8750 PROGRAM EVALUATION AND INSTRUMENTATION (3 credits)

This course will build skills for selection, development and analysis of various types of instruments and techniques for conducting process, impact, and outcome evaluations in health promotion, education, and behavior. Evaluation of health behavior change and its antecedents, changes in community services programs, and community health status will be discussed. Candidates will learn methods for developing choosing psychometric tools, choosing appropriate evaluation designs, procedures for data collection, and describing evaluation results. Emphasis will be placed on political, statistical, and theoretical aspects of instrumentation and evaluation practices.

Prerequisite(s): HED 8270/PHHB 8270 or permission of instructor.

PHHB 8850 HEALTH ASPECTS OF STRESS MANAGEMENT (3 credits)

The health-related aspects of stress management and control will be the focus of this course. Selected techniques for self-regulating stress will be demonstrated, practiced and analyzed. Candidates will be introduced to current scientific research in human stress.

Prerequisite(s): Graduate.

PHHB 8950 PUBLIC HEALTH LEADERSHIP AND ADVOCACY (3 credits)

This course incorporates public health leadership theory and practices that are grounded in biomedical and social science and sanctioned by public law. Also included is the politics of communities and organizations. Advocacy is emphasized as a key tool to secure funding and to help assure that local, state, and federal policy-makers will adopt, implement, and maintain important public health regulations, policies and programs.

Prerequisite(s): Fifteen (15) health education graduate credits. Not open to non-degree graduate students.

PHHB 8980 HEALTH EDUCATION PRACTICUM (1-3 credits)

This course offers graduate candidates in health education an opportunity to gain practical, on-the-job training in health education in local schools, businesses, hospitals, clinics, voluntary health agencies or governmental health agencies.

Prerequisite(s): Candidates must have completed 21 credit hours at the undergraduate or graduate level (3.0 GPA or above) in health education prior to enrolling in this course. Not open to non-degree graduate students.

Recreation-Leisure Study (RLS)

Recreation-Leisure Study Graduate Courses

RLS 8000 SPECIAL STUDIES IN RECREATION AND LEISURE STUDIES (1-3 credits)

A series of intensive courses especially designed for (1) practitioners within recreation, parks and leisure services and/or (2) candidate majors within recreation and leisure studies; scheduled as seminars or workshops, according to purpose.

Prerequisite(s): Graduate.

RLS 8050 SEMINAR IN RECREATION THERAPY (3 credits)

Seminars especially designed for recreational therapy majors within recreation and leisure studies and/or practitioners within therapeutic recreation and leisure services.

Prerequisite(s): Graduate standing

RLS 8060 PERSPECTIVES OF LEISURE EDUCATION (3 credits)

A survey approach which will focus on an awareness and understanding of leisure values, lifestyles, contributions, and basic concepts associated with the clinical application of leisure education.

Prerequisite(s): Graduate standing and permission of the instructor.

RLS 8076 CAMPUS RECREATION MANAGEMENT (3 credits)

A review of the knowledge, skills, and abilities required for the management of typical campus recreation programs and facilities. This course will prepare students for entry level positions managing campus recreation employees, programs, facilities and services. (Cross-listed with RLS 4070)

RLS 8080 RT: CLINICAL ASSESSMENT, EVALUATION & RESEARCH (3 credits)

An overview of the role of assessment, evaluation and research and their relevance to the priorities of the field of recreational therapy (RT). A seminar approach that will include historical and philosophical concepts as well as practical experience related to these areas. Special attention will be given to implications for developing a comprehensive understanding of the roles that assessment and evaluation play in the research process in providing information about RT efficacy and outcomes. The course will also provide the candidate an opportunity to develop a research agenda that is consistent with current recreation therapy efficacy needs.

Prerequisite(s): Graduate standing.

RLS 8246 RECREATION ADMINISTRATION (3 credits)

Designed to provide a background of information on public, private and commercial recreation with special attention to organization, promotion, and development from the administrative aspect. (Cross-listed with RLS 4240)

Prerequisite(s): RLS major and senior status.

RLS 8306 RECREATION PROGRAMMING AND LEADERSHIP (3 credits)

An advanced study of recreational programming and planning through practical applications. Emphasis is upon understanding proven programming and leadership knowledge and skills, understanding participant leisure behavior, understanding participant leisure needs, and skill development in ways through which organizations, agencies and businesses create service to respond to the leisure needs of the consumer. (Cross-listed with RLS 4300)

Prerequisite(s): Junior, senior or graduate.

RLS 8406 TRAVEL AND TOURISM (3 credits)

This course is designed to provide the recreation major or practitioner, and other interested candidates, with an awareness of the major components of the travel and tourism industry, including its costs and benefits to a resident community. (Cross-listed with RLS 4400)

Prerequisite(s): Junior Standing.

RLS 8420 LEISURE, PLAY AND HUMAN DEVELOPMENT (3 credits)

An examination of leisure and play as conditions of human development, reflections of human development, and as buffers for adjusting to age-related life events. These three foci will be considered in relationship to the entire life span, and implications will be drawn for recreation and leisure services.

Prerequisite(s): Graduate standing.

RLS 8426 RECREATION FOR THE AGING (3 credits)

Role of leisure services as related to understanding and working with elders. Emphasis on recreation programming as a mode of intervention. Analysis and study of the phases of aging, with reference to psychomotor, affective, and cognitive changes; introduction to the theories of aging and how they relate to the lifestyle of this population; recreational therapy intervention, activity adaptation and program design; leisure education and issues and trends. (Cross-listed with RLS 4420, GERO 4420, GERO 8426)

Religion (RELI)

Religion Graduate Courses

RELI 8036 AFRICANA RELIGIONS (3 credits)

An introduction to religions in Africa and the diaspora, including African Traditional Religions, Christianity, Islam, and Afro-Caribbean religious traditions, using anthropological, historical, and other academic approaches to the study of religious and spiritual traditions. In particular, students will learn about the role of spirits, ancestors, witches, and other invisible agents in ideas and practices regarding health and healing. Finally, the class will examine the complex inter-relationships between religious ideas and practices and contemporary post-colonial political-economic realities, including the consequences of genocide and other human rights violations and the role of religious communities in social and economic development. (Cross-listed with RELI 4030, BLST 8036, BLST 4030).

RELI 8066 FIRST NATIONS: SPIRIT IN ARTS AND CULTURES (3 credits)

First Nations: Spirit in Arts and Cultures explores how contemporary Indigenous/Native (First Nations, Metis and Inuit) artists in the lands now known as Canada express their cultures, especially beliefs, through the fine arts. While we will focus on visual culture (sculpture, painting, film, mixed media), literary works (a novel, poetry) and music will also be included. First Nations, Metis and Inuit artists often simultaneously express traditions, their own experiences, and reflections on the present and past through their work. By doing this, they share valuable perspectives on health and healing as well as the national process of Truth and Reconciliation. Trying, so much as possible, to let the artists speak for themselves, we will explore how spirituality manifests itself in contemporary cultures for these Indigenous artists north of the border. (Cross-listed with RELI 4060, NAMS 4060, NAMS 8066).

Prerequisite(s): Graduate student status

RELI 8156 JUDAISM IN THE MODERN AGE (3 credits)

A study of Jewish communities and movements since the Enlightenment emphasizing historical, intellectual, religious-legal, and socio-cultural developments. Pivotal movements (e.g., Hassidism, Reform, Historical Conservative Judaism, Modern Orthodoxy, Zionism) and major historical events (e.g., the American and French Revolutions, Tsarist oppression, the Holocaust/Shoah and the establishment of the State of Israel) will be analyzed for their ongoing impact on Jewish thought, practice, and social organization. (Cross-listed with RELI 4150)

RELI 8166 THE HOLOCAUST (3 credits)

An interdisciplinary approach in a seminar oriented format discussing various aspects of the most notorious genocide in modern times. The course will explore the history of anti-Semitism, the rise of Nazi Germany and the road to the 'final solution.' It will further explore psychological, sociological and intellectual aspects of the dark side of humanity. (Cross-listed with RELI 4160, HIST 4720, HIST 8726)

RELI 8176 HISTORY OF CHRISTIANITY I (3 credits)

The development of Christian theological, ritual, and social practice from the beginnings of Christianity through the Reformation. History of Christianity from its origins in the first century through the sixteenth century movements for reform. (Cross-listed with RELI 4170).

RELI 8186 HISTORY OF CHRISTIANITY II (3 credits)

This course will focus on the historical development of Christian ideas, practices, and institutions from the reformations of the sixteenth century CE through the early twenty-first century CE. In addition to the theological claims, students will examine the history of ritual practice and organizational development of the principal varieties of Christianity - Roman Catholic, Eastern Orthodox and other eastern churches, Protestant, and Pentecostal. (Cross-listed with RELI 4180).

RELI 8206 COMPARATIVE RELIGIOUS ETHICS (3 credits)

An introduction to historical and contemporary approaches to comparative religious ethics, with special focus on specific case studies as encountered in societies and religious communities across the globe. In addition to reading authors from a variety of perspectives (Aristotelians, natural law theorists, philosophers of law, pragmatists, theologians, and historians of religion), students will be introduced to special topics in the field, e.g., religion and public life, religion and law, syncretism, the secular/non-secular divide, etc. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 4200, CACT 8206)

RELI 8216 PUBLIC HEALTH, RELIGION, AND HUMAN RIGHTS (3 credits)

This course examines the intersections among public health, religion, and human rights. It considers how human rights impact public health and vice versa; how human rights and religious thought impact each other; how religious communities approach issues of public health; and how religious thought and practice affects people's health. Topics include infectious diseases such as HIV and COVID-19; issues of stigma and discrimination in public health; social determinants of health such as poverty and environmental quality; and women's and LGBTQ+ health. Students will gain skills of textual analysis, dialogue, and argumentative reasoning in both written and verbal form. (Cross-listed with RELI 4210, CACT 8216)

Prerequisite(s): Graduate standing.

RELI 8226 VIOLENT CONFLICTS, PEACEBUILDING, AND THE ETHICS OF INTERVENTION (3 credits)

This course is designed to familiarize the student with the nature of violent conflict, including terrorism, and a variety of the mechanisms for peacebuilding. The course will also explore human rights and the ethics of intervention. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 4220, CACT 8226)

RELI 8256 WAR, RELIGION, AND HUMAN RIGHTS (3 credits)

What is the connection between human rights, religion, conflict, and peacebuilding? Does religion cause war or help to stop it? How can human rights violations be prevented or stopped, and can religious actors be engaged in this work? Is the use of force ever appropriate to protect human rights? This course engages all of these questions by examining the ethical thought of multiple religious traditions; the work of human rights organizations; the just war tradition; and questions about sovereignty, peacebuilding, and the use of force worldwide. It includes discussion of historical issues and contemporary case studies. (Cross-listed with RELI 4250).

RELI 8266 THE END OF THE WORLD: RELIGION AND APOCALYPSE (3 credits)

This course introduces students to sacred texts and their interpretation by "end of the world" groups across world history. Several ancient, medieval, and contemporary groups are discussed. Special attention is paid to the connections between apocalyptic and political movements, as well as religion and violence. (Cross-listed with RELI 4260).

Prerequisite(s): Graduate standing

RELI 8406 WOMEN IN ISLAM (3 credits)

This course examines the religious, political and cultural assignments ascribed to Muslim women. Starting with the Qur'an, social, legal, and scriptural norms will be explored through the voices of Muslim women around the world. Passages of the Qur'an, hadiths and the commentaries that lead to the elevation and/ or demise of Muslim women and their rights are studied. Examining the role of the female body, sexuality and seclusion within a historical context will lead to an understanding of the gendering of women in Islam. (Cross-listed with RELI 4400)

Prerequisite(s): Graduate standing.

RELI 8426 MUSLIMS IN AMERICA (3 credits)

This course is designed to familiarize the student with the multiplicity of Muslim voices in the United States and to examine the myths created through stereotyping and orienting. The course will also investigate how Muslims in America form identities as hybrids and transnationals and follows the chronological development of American Muslims including their identity construction, religious issues, and politics. (Cross-listed with RELI 4420)

Prerequisite(s): Graduate Standing.

RELI 8456 HOLY TERROR: RELIGION AND HORROR (3 credits)

Examining the genre of horror in books, films, and television, students will explore the ways in which horror in its many forms illuminates upon an array of religious ideas. Some of the major subjects and themes examined in this class include: various cultural interpretations of sleep paralysis, the fear of death and dying badly, Hell and Satan, nature horror, body horror, and the breakdown of the established order of reality and its replacement with one that is alien and hostile to it. In addition to these themes, we will also explore horror in Native American and Eastern social and cultural contexts. Emphasis is placed on the genre's ability to portray complex religious, philosophical, sociological, and anthropological subject matter. (Cross-listed with RELI 4450).

RELI 8526 JESUS AND ARCHAEOLOGY (3 credits)

Jesus and Archaeology is a course surveying the material culture of Judea and Galilee in the time of Jesus. Studying materials is a new approach to the long study of the Historical Jesus Quest. By providing a large amount of archaeological data, this method contributes a critical mass on old debated questions such as the society in Judea and Galilee, rural versus urban, Hellenism versus Judaism, size, population and language of Galilee in the time of Jesus and much more. (Cross-listed with RELI 4520).

RELI 8556 JESUS IN FILM (3 credits)

This course is a study of how the life of Jesus of Nazareth has been portrayed in cinema over the past century. Emphasis will be placed upon the ways in which the biblical sources are adapted for films, how Jesus films reflected and influenced the values and beliefs of the times in which they were made, and the reception by audiences of the diverse film representations of Jesus. (Cross-listed with RELI 4550).

RELI 8606 WOMEN AND RELIGION (3 credits)

This course on women and religion will focus on the intersections of power and oppression that women experience in four of the major world religions - Judaism, Christianity, Buddhism, and Islam. Students will examine the historical, cultural and religious contexts that highlight women's involvement or exclusion from activity and power within each religion. Students will research case studies from around the world to examine tensions within and between religious and secular societies through the lens of gender. (Cross-listed with RELI 4600).

RELI 8756 RELIGION, FILM, AND VIOLENCE (3 credits)

A study of the ways in which films represent violence and how these representations intersect with religious concepts. Topics will include how films express the justification or "sanctification" of violence as legitimate, redemptive violence, notions of sacrifice, and the nonviolent critique of violence. We will examine a variety of genres including action films, crime stories, horror, and religious films, noting their societal influence and how they express diverse values regarding violence and its legitimization. (Cross-listed with RELI 4700).

RELI 8836 ANCIENT GREEK MYTH, RELIGION & MAGIC (3 credits)

Students will examine the impact of ancient Greek myth and belief on actual religious practice: e.g., "lived" religion. Areas covered include formal civic sacrifice, wartime religion, family and personal devotions, mystery cults, oracles and seers, plus the popular pursuit of magic. (Cross-listed with HIST 8836, HIST 4830, RELI 4830).

RELI 8856 ROME AND THE EARLY CHURCH (3 credits)

Students will cover Roman-Christian-Jewish interactions from just before the birth of Jesus of Nazareth to c. 450 CE, with an emphasis on social and political history. We catalogue Christianity's transformation from its origins as a Jewish movement and an illegal "superstition" to the dominant religion of the Roman empire. (Cross-listed with HIST 8856, HIST 4850, RELI 4850).

Prerequisite(s): Junior standing.

RELI 8900 READINGS IN RELIGION (1-6 credits)

An individually organized program of readings pertinent to one or more topics subordinate to the heading of Religion. To be carried out under the supervision of a member of the graduate faculty. May be repeated for credit when the topic varies.

Prerequisite(s): Graduate, permission of instructor, and no incompletes outstanding.

Science, Tech, Engr, and Math (STEM)

Science, Technology, Engineering, and Math Graduate Courses

STEM 8030 EVOLUTION: FROM GENOMES TO ECOSYSTEMS (3 credits)

This course will prepare students to evaluate and discuss evolution as an underlying concept in all of biology. Further, it will provide a comprehensive overview of evolutionary processes related to the evolution of genomes, development, physiology, morphology, behavior, and ecosystems. (Cross-listed with BIOL 8030).

Prerequisite(s): Courses for graduate admission or equivalent, or with permission of instructor.

STEM 8040 TOPICS IN MATHEMATICAL COMPUTING (3 credits)

This course focuses on the current state-of-the-art technology that is either designed for or is uniquely suitable for teaching mathematics. (Cross-listed with MTCH 8040)

Prerequisite(s): MATH 2200 or equivalent or approval of instructor.

STEM 8050 DATA-DRIVEN DECISION MAKING FOR EDUCATORS (3 credits)

This course provides graduate students with hands-on experiences that model data-driven decision making for educational success in today's classroom. Students will learn how to create valid and reliable assessments; interpret standardized test data; build data models that identify student, classroom, program, and school needs; and in general, to systematically enhance educational decision making from a base of carefully collected information. Graduate students will also explore data collection and analysis strategies associated with technologies such as cloud computing, tablet computers, and smart phones. In addition, they will experience data-driven decision-making models that can be integrated into student lessons to not only teach more effectively with data-driven decisions, but also to help teach students about data-driven decision-making. The course will use real data sets and cases, in interesting, hands on and technology-rich activities, to help educators learn how to find the "educational story" represented by a set of carefully collected data points. (Cross-listed with TED 8050).

Prerequisite(s): Graduate Standing.

STEM 8170 ECOSYSTEM ANALYSIS FOR EDUCATORS (3 credits)

This course is designed for education graduate students who wish to take a field-based biology course that uses an interdisciplinary approach to understanding the ecosystem of the tallgrass prairie. This course engages graduate students in methods reflecting multidisciplinary STEM strategies (e.g. scientific inquiry, modeling, geographic information system mapping, etc.) associated with research taking place at the Glacier Creek Preserve. Graduate students completing this course will develop advanced knowledge of ecology, restoration ecology, and monitoring of prairie habitat restoration. Graduate students will focus on the technical, biogeochemical, ecological and cultural aspects of analyzing and restoring the prairie ecosystem and its various habitats. (Cross-listed with BIOL 8170)

Prerequisite(s): Graduate Standing or Permission from the Instructor.

STEM 8300 STEM TEACHING METHODS FOR DEVICE DESIGN (3 credits)

STEM Teaching in Biomechanics focuses on principles in teaching including teaching models (Problem-Based, Team-Based, Inquiry-Based teaching), student assessment, classroom logistics/organization, and device design through a mentorship project. (Cross-listed with BMKI 9301, BMCH 8300).

STEM 8370 DATA VISUALIZATION AND MODELING FOR EDUCATORS (3 credits)

In the growing context of data informed decisions there is a need to answer "what if" questions in a variety of decision-making situations, as well as to display data both visually and interactively. This course will provide foundational skills in data visualization and modeling for educational decision making and instruction. It draws upon key fundamentals in data visualization (representing data trends visually) as well as key strategies in data modeling (interactive representations to explore possible outcomes). The course also explores the use of visualization and modeling technologies as well as assisting student learning with these tools. (Cross-listed with TED 8370).

STEM 8410 IMPROVEMENT OF INSTRUCTION: SPECIAL TOPICS (3 credits)

This course provides an in-depth study of instructional theory, research, and methodology designed to extend teachers' professional knowledge base and enhance their pedagogical skills. When offered, a course may be limited to improvement of instruction in a selected subject area. (Cross-listed with TED 8410).

STEM 8420 TRENDS AND TEACHING STRATEGIES IN SCIENCE EDUCATION (3 credits)

This course is designed for the graduate candidate in the Department of Teacher Education whose study program emphasis is in the area of science education. The course will describe and analyze past and present trends in science education, including curricula, teaching-learning strategies, the laboratory and instructional materials. The course focus will be K-12 and as such is meant to serve both elementary and secondary graduate candidates. (Cross-listed with TED 8420).

Prerequisite(s): Graduate standing.

STEM 8430 SCHOOL CURRICULUM PLANNING (3 credits)

This course is designed to provide advanced degree candidates with an understanding of the theory, principles, and practices utilized in curriculum planning in American schools. This course focuses on the principles and practices of effective curriculum planning and teachers' part in these processes as curriculum developers. (Cross-listed with TED 8430).

STEM 8450 BIOLOGY EDUCATION RESEARCH METHODS (3 credits)

In this course, students will learn the methods of conducting pedagogical research in Biology, understand how people learn the concepts, practices, and ways of thinking in science and engineering; understand the nature and development of expertise in a discipline; help identify and measure appropriate learning objectives and instructional approaches that advance students toward those objectives; contribute to the knowledge base in a way that can guide the translation of statistical findings to classroom practice; and identify approaches to make science and engineering education broad and inclusive. Students will work with live data sets to evaluate effective pedagogical approaches in the biology classroom of various audiences (K-16).

STEM 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)

This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with TED 8510, AVN 8510)

Prerequisite(s): Graduate standing.

STEM 8530 INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS (3 credits)

This course is designed to provide graduate candidates with the opportunity to enhance interdisciplinary instructional strategies, curricular understanding, and lesson preparation in the areas of science, technology, engineering, the arts, and mathematics (STEAM) through analysis and reflective practices in STEAM. This course provides hands-on experiences that model STEAM integration techniques, including how to effectively engage with community agencies and partners to bring STEAM into the classroom. This course emphasizes not only the technical aspects of STEM, but also the creativity and innovation that arts integration can add to enhance STEM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. (Cross-listed with TED 8530)

Prerequisite(s): This course includes both teacher education and STEAM related topics and therefore fits into both TED and STEM program coursework.

STEM 8810 STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH (3 credits)

This course will explore theoretical and foundational pedagogical strategies in early childhood education used to deliver integrative STEM education in the preK-12 setting. In order to understand the research and practice of STEM disciplines in preK-12, it is necessary to examine the social, cultural, political, and functional aspects that influence them. Candidates will investigate the nature of STEM education, Early Childhood Education (ECE) pedagogy and perspectives of learning, content knowledge and dispositions for educators of STEM topics, and issues of access and equity for STEM education through literature, discussion, and practice. This course includes a community outreach component in which candidates will use qualitative methods to observe class topics in public settings. (Cross-listed with TED 8810)

Prerequisite(s): Graduate status

STEM 8840 ENGINEERING EDUCATION EXTERNSHIP (3 credits)

This graduate course will address the best practice of effective teaching and learning in Engineering Education through professional collaboration between K-12 STEM (Science, Technology, Engineering, and Mathematics) teachers and practicing engineering professionals. K-12 STEM teachers, as graduate students in the course, will learn about and address real-world applications and career opportunities in STEM education through the externship. K-12 STEM teachers will research and develop authentic, experiential learning opportunities and projects for the classroom through course supports associated with lecture, discussion, and partnerships with practicing engineering professionals. The externship will be integral to the K-12 STEM teachers' experiences and work in this course, as the course models effective professional collaboration founded on experience, knowledge, and skills to achieve a curriculum enhancement goal. (Cross-listed with TED 8840).

Prerequisite(s): Graduate status. Not open to non-degree graduate students.

STEM 8860 INVENTION & INNOVATION IN ENGINEERING EDUCATION (3 credits)

This course will address emerging trends in STEM education for in-service K-12 STEM teachers with a focus on the use of engineering education practices in teaching and learning content. STEM teachers will receive applicable, hands-on, classroom-ready experiences through lecture, professional instruction, and projects that will emphasize product design and creation through the Engineering Design Process. The Engineering Design Process will be central to the candidates' experiences in this course and will be used by the candidates to develop curriculum utilizing emerging trends to supplement current course content and standards. Interdisciplinary planning will be central to the course. (Cross-listed with TED 8860)

Prerequisite(s): Graduate status is required.

STEM 8910 CAPSTONE IN CS EDUCATION (3 credits)

This course will allow graduate students, as an individual or as part of a group, to study and analyze specific problems related to teaching computing in schools. Projects will be concerned with the curriculum and/or instruction of computing and should address a broad scope of application rather than a specific level. (Cross-listed with CSTE 8910).

Prerequisite(s): Student must have completed 21 hours in the Masters of CS Education program.

Social Work (SOWK)

Social Work Graduate Courses

SOWK 8016 SOCIAL WORK WITH AMERICAN INDIANS (3 credits)

This course provides the student with a broad study of the origins, influences and issues of the American Indian which affect social work practice. The usefulness of established social work generalist methods is explored. Alternative methods applicable to culturally diverse people across the lifespan are presented. This is a Service Learning class. (Cross-listed with SOWK 4010).

Prerequisite(s): SOWK 8130 prior to or concurrent, or BSSW degree. Not open to non-degree graduate students.

SOWK 8026 SOCIAL WORK WITHIN THE AFRICAN AMERICAN COMMUNITY (3 credits)

This course seeks to develop in students an awareness and understanding of some of the social and psychological/cognitive realities influencing the behavior of African American youth and families across the lifespan. The content draws upon theories, research and social work practice skills relevant to African American youth and families, as well as the cognitive process and social systems which impact African youth and families. (Cross-listed with SOWK 4020).

Prerequisite(s): SOWK 8130 or admitted as Advanced Standing

SOWK 8036 SOCIAL WORK WITH LATINOS (3 credits)

The purpose of this course is to study and analyze cross-cultural social work practice with Latino populations. Students will learn what factors impact Latino communities and what skill sets are essential for diverse social work practice. (Cross-listed with SOWK 4030).

Prerequisite(s): Admitted to the BSSW program or SOWK 8130.

SOWK 8046 WORKING WITH MINORITY ELDERLY (3 credits)

This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 4690, GERO 8696, SOWK 4040).

SOWK 8056 ETHNIC DIVERSITY AND SOCIAL WORK PRACTICE (3 credits)

This course focuses on effective generalist social work practice with clients of ethnic diversity. (Cross-listed with SOWK 4050)

Prerequisite(s): Admission to the MSW program or permission of the Grace Abbott School of Social Work

SOWK 8066 MEDICAL SOCIAL WORK (3 credits)

This course is an introduction to medical social work. BSSW and MSW students will focus on the knowledge base and practice skills needed to assess the holistic care of patients and their families. This course prepares students to 1) understand healthcare disparities and needs of individuals and their family, 2) apply theory and models of patient-centered care delivery, 3) develop skills for working on interprofessional teams, 4) formulate ideas for addressing barriers and improving health care access. (Cross-listed with SOWK 4060).

Prerequisite(s): SOWK 8130 prior to or concurrent, or BSW degree

SOWK 8070 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT I (3 credits)

This course is the first part of a two-semester sequence within the Master of Social Work required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan, particularly infancy through adolescence, within the social environment at the micro- and macro-level (e.g., individuals, families, groups, organizations, institutions, and communities), as they relate to effective social work generalist practice. **Prerequisite(s):** Undergraduate Human Biology course (prior to or concurrent) and admission to the Master of Social Work program.

SOWK 8080 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT II (3 credits)

This course is the second part of a two-semester sequence within the Master of Social Work required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan— particularly during young, middle, and late adulthood— within the social environment at the micro- and macro-level (e.g., individuals, families, groups, organizations, institutions, and communities), as they relate to effective social work generalist practice.

Prerequisite(s): SOWK 8070

SOWK 8090 SOCIAL WELFARE POLICY (3 credits)

This course is an introduction to social welfare policy analysis. The course examines social welfare policy taking into account historical, political, economic, social, and cultural perspectives. Basic concepts and choices are examined in relation to values, ethics, context, social functioning and social consequences.

Prerequisite(s): Admission to the Master of Social Work program or permission of the Grace Abbott School of Social Work.

SOWK 8110 INSTITUTIONAL OPPRESSION (3 credits)

This course is about institutional racism, sexism and classism as it relates to social policy and social injustice. The focus is on how institutional oppressions are related and are mutually reinforcing. The consequences of institutional racism, sexism and classism are examined at the individual, group, family, and agency levels.

Prerequisite(s): Admission to the Master of Social Work program or permission of the Grace Abbott School of Social Work.

SOWK 8130 GENERALIST PRACTICE I (3 credits)

This course provides an introduction to the values, ethics, knowledge, and skills of generalist social work practice. Using constructs from the Generalist Intervention Model, systems theory, and the strengths-based perspective, students learn about engagement, assessment, planning and contracting, intervention, evaluation, and termination. Diversity and case management are emphasized as part of bringing planned change to client systems, including individuals and families..

Prerequisite(s): SOWK 8070 prior or concurrent.

SOWK 8150 GENERALIST PRACTICE II (3 credits)

This practice course is an introduction to a goal-oriented planned change process with an emphasis on educational, support, and task groups, organizations, and communities. The focus is on building knowledge and developing indirect practice skills in collaboration, planning, empowerment, and advocacy to effect social change using the Generalist Intervention Model.

Prerequisite(s): SOWK 8130 prior, and SOWK 8080 prior or concurrent

SOWK 8160 GENERALIST SOCIAL WORK PRACTICUM I (3 credits)

This course is designed to provide supervised, individual and experiential learning offered within the setting of a selected social service agency. The student will be introduced to a variety of social work practice roles, develop professional relationships with client systems and learn to apply different interventions to effect change across the life span. In order to facilitate integration of classroom theory with practice, students will attend a seven-week practicum seminar (2 hours per week).

Prerequisite(s): Prior: Human Biology, Research Methods, and Statistics deficiencies complete; Prior or Concurrent: SOWK 8070, SOWK 8090, SOWK 8130; Not open to non-degree graduate students.

SOWK 8170 GENERALIST SOCIAL WORK PRACTICUM II (3 credits)

This course is designed to provide supervised, individual, experiential learning offered within the setting of a social service agency, typically the same agency as in SOWK 8160. This course builds upon opportunities provided and competence achieved in Generalist Social Work Practicum I.

Prerequisite(s): Prior or Concurrent: SOWK 8160, SOWK 8080, SOWK 8110, and SOWK 8150. Not open to non-degree graduate students.

SOWK 8190 RESEARCH & COMPUTER APPLICATIONS (3 credits)

This course focuses on the use of research and computer programs in social work practice. Social and behavioral science research methods are reviewed. Students learn to analyze existing data using SPSS and to write an empirical research report. The use of Microsoft Word, Excel, and PowerPoint in social work practice are explored.

Prerequisite(s): Admission to the Master of Social Work program.

SOWK 8220 CLINICAL SOCIAL WORK WITH INDIVIDUALS (3 credits)

This advanced course provides an in-depth study of several theories of personality and behavior, and of therapeutic approaches derived from the theories. Major focus is on therapy with individuals across the life span, but application to family systems is also considered, as well as the fit of each theory within the broader social systems framework.

Prerequisite(s): SOWK 8170 prior to or concurrent; SOWK 8160 or admitted with advanced standing.

SOWK 8230 CLINICAL SOCIAL WORK WITH GROUPS (3 credits)

This advanced course provides knowledge of and experience in working with groups as systems. It includes both assessment of dynamics as well as developing skills in intervention modalities appropriate for working with various types of groups.

Prerequisite(s): SOWK 8220; SOWK 8170 or admitted to the Master of Social Work program with advanced standing.

SOWK 8240 SOCIAL WORK PRACTICE WITH CHILDREN (3 credits)

This advanced practice course provides an overview of several social work interventions used with children and adolescents. A brief review of normal child development and the family life cycle is the context for presenting a range of children's problems and special needs. The course will cover several intervention models and address their application in various service settings and in individual, family, group, and social action formats. Children in diverse family settings, institutions, and in minority families and cultures are considered to understand unique therapeutic issues present for them.

Prerequisite(s): SOWK 8220

SOWK 8250 SOCIAL WORK PRACTICE WITH FAMILIES (3 credits)

This course considers the family context as a system for therapeutic intervention. The family unit and its diverse forms are defined; theories for assessment and understanding family's interactions across the lifespan are considered, and the alternative modalities useful for treating family dysfunction are presented. As a practice-oriented course, it emphasizes the development of professional skills in working with the family across the lifespan.

Prerequisite(s): SOWK 8220; SOWK 8170 or admitted to the Master of Social Work program with advanced standing.

SOWK 8260 SOCIAL WORK PRACTICE WITH OLDER ADULTS (3 credits)

This course is part of the advanced MSW curriculum and focuses on micro- and macro-level practice skills essential to competent and effective social work practice with diverse older adults. This course emphasizes clinical and complimentary/ alternative interventions (particularly creativity programming) that focus on individuals and small groups as well as community practice skills that involve social marketing and community organizing, networking, and collaborating with inter-professional community practitioners.

Prerequisite(s): SOWK 8220 and SOWK 8170 or admitted as Advanced Standing

SOWK 8270 SOCIAL WORK PRACTICE WITH SEXUAL CONCERNS (3 credits)

This course provides a survey of the current knowledge base, theory and research in human sexuality with a focus on advanced practice intervention and prevention approaches for a variety of sexuality issues faced by individuals, couples, and families throughout the lifespan.

Prerequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing, and SOWK 8220.

SOWK 8280 SOCIAL WORK PRACTICE WITH COUPLES AND CHANGING FAMILY STRUCTURES (3 credits)

This is an advanced practice course designed to prepare students to provide therapy for couples and families at all life stages who are experiencing problems in intimacy, marital, divorce, or remarriage adjustment.

Prerequisite(s): SOWK 8220

SOWK 8290 SOCIAL WORK PRACTICE IN HEALTH AND MENTAL HEALTH (3 credits)

This course emphasizes the development of advanced level clinical and social work practice skills for working with selected acute and chronic health and mental health conditions affecting individuals across the life cycle.

Prerequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing, and SOWK 8220. Not open to non-degree graduate students.

SOWK 8400 ADVANCED SOCIAL WORK PRACTICUM I (3 credits)

This course is designed to provide supervised, individual professional learning experiences offered within the setting of a selected social service agency in the student's chosen concentration. The student will be introduced to a variety of advanced direct and indirect social work practices. The Dual Degree Program is a part of Integrated Practice. Dual Degree students may take SOWK 8400 as their administrative practicum. If so, then PA 8010, 8050 and 8090 must be taken prior to and one course from concentration prior to or concurrently.

Prerequisite(s): SOWK 8190 (prior to), SOWK 8220 (prior to), SOWK 8230 (prior to or concurrent). Not open to non-degree graduate students.

SOWK 8410 ADVANCED SOCIAL WORK PRACTICUM II (3 credits)

This course is designed to provide supervised, individual professional learning experiences offered within the setting of a social service agency in the student's chosen concentration, typically the same agency as in SOWK 8400. This course builds upon opportunities provided and competence achieved in Advanced Social Work Practicum I.

Prerequisite(s): SOWK 8400 (prior or concurrent), SOWK 8290 (prior or concurrent). Not open to non-degree graduate students.

SOWK 8420 ADVANCED SOCIAL WORK PRACTICUM III (1-3 credits)

This course is designed to provide a third supervised, individual professional learning experience offered within the setting of a social service agency in the student's chosen concentration. This course builds upon opportunities provided and competence achieved in Advanced Social Work Practicum II.

Prerequisite(s): SOWK 8410 prior to or concurrent, and permission of the Grace Abbott School of Social Work.

SOWK 8510 SOCIAL WORK LEADERSHIP (3 credits)

This course provides social work students with the knowledge and skills to be leaders in their organizations and communities. This course will explore leadership models and theories, and their usefulness in diverse settings, including social work leadership ethics. Students will also learn models and theories related to general supervision, power, and authority in public and nonprofit organizations. Useful skills covered include conflict management and evidence-informed decision-making. Students will also learn about care of self and others, especially as it relates to resiliency and vicarious trauma.

Prerequisite(s): SOWK 8160 or admitted to the Master of Social Work program with advanced standing.

SOWK 8516 TREATMENT ISSUES IN CHEMICAL DEPENDENCY (3 credits)

This course addresses chemical dependency treatment issues including denial, minimization, relapse and its prevention, resistance, family dynamics, poly-substance abuse, co-occurring disorders, spirituality and the influence of self-help groups. The education will include the clinical treatment needs of individuals suffering from chemical dependency, taking into consideration diversity, gender, culture and lifestyle. (Cross-listed with COUN 4510, COUN 8516, SOWK 4510).

Prerequisite(s): Admission to counseling program or social work programs or permission of instructor. For social work students, SOWK 8686 or COUN 8696 and SOWK 8696 or COUN 8696 must be taken prior to COUN 8516 or SOWK 8516. Not open to non-degree graduate students.

SOWK 8536 SCHOOL SOCIAL WORK (3 credits)

This course explores the field of social work practice in school settings, including the history of social work practice in schools, school environment, roles of school social workers, mandated foundations for school social work services, eligibility for special education and 504 plans, theories of practice that include school and community based models, and interventions for target populations in schools. (Cross-listed with SOWK 4530).

Prerequisite(s): SOWK 3320 or SOWK 8130. Not open to non-degree graduate students.

SOWK 8540 PLANNING FOR SOCIAL CHANGE (3 credits)

This course takes an in-depth look at the framework of macro-level problem solving and its application to all areas of social work practice. Focus will be placed on the critical exploration of social problems, their causes, and their potential solutions from a lens of broader social inequity.

Prerequisite(s): SOWK 8160 or admitted to the Master of Social Work (MSW) program with advanced standing. Not open to non-degree graduate students.

SOWK 8550 SOCIAL JUSTICE AND SOCIAL ADVOCACY (3 credits)

This course provides a perspective on national and international social and economic injustices experienced by people under corporate globalization. Practice implications for social workers are addressed.

Prerequisite(s): SOWK 8130 or admitted as Advanced Standing. Not open to non-degree graduate students.

SOWK 8560 ADVANCED COMMUNITY PRACTICE (3 credits)

This course is an elective macro course in the MSW curriculum. The course is designed to help students develop an analytical and empirical approach to empowering communities. The course builds on the social work "person-in-environment" perspective by focusing on the client system and its environmental contexts as a partner in practice. This course is particularly relevant to direct practice with and advocacy for diverse disempowered groups in society. The course may use a community-based service-learning pedagogy.

Prerequisite(s): SOWK 8170 or Master of Social Work student admitted with advanced standing or permission of the Grace Abbott School of Social Work. Not open to non-degree graduate students.

SOWK 8570 ADMINISTRATION OF SOCIAL WELFARE AGENCIES (3 credits)

This course focuses on the knowledge and skills needed by administrative leaders of social welfare agencies. Students will learn about resource issues, including grant writing, fundraising, budgeting, and financial management. Acknowledging political contexts and shaping organizational culture will also be covered. In addition, they will learn about personnel and managerial issues related to collaboration, human relations, governing/advisory boards, and strategic planning.

Prerequisite(s): SOWK 8170 or admitted to the Master of Social Work program with advanced standing.

SOWK 8600 PERMANENCE FOR CHILDREN (3 credits)

This course is about the child welfare system and focuses on policies, laws, and agency structures designed to help abused and neglected children and their families.

Prerequisite(s): SOWK 8130 or admitted as Advanced Standing

SOWK 8610 FAMILY AND COMMUNITY VIOLENCE (3 credits)

This course covers family and community violence across the life span with an emphasis on gaining knowledge of the issue, skills in policy analysis, and a broad framework for developing effective services in various service settings.

Prerequisite(s): SOWK 8130 or admitted as Advanced Standing

SOWK 8626 TRAUMA AND RESILIENCE (3 credits)

This course provides an overview of issues related to trauma including: the factors related to development of trauma, definitions of trauma, the impact of trauma on individuals, families and communities, and the programs and practices that are most effective and appropriate regarding the social work role in responding to trauma. (Cross-listed with SOWK 4620)

Prerequisite(s): SOWK 8070 and SOWK 8080 or Advanced Standing

SOWK 8650 HEALTH/MENTAL HEALTH POLICIES FOR SOCIAL WORK (3 credits)

This course emphasizes the development of health and mental health policy analysis skills and knowledge for social work students. Major topics include government response to health care, cultural and historical perspectives, service provision, and epidemiological trends across the life span. It provides a framework for clinical interventions in a variety of health and mental health settings.

Prerequisite(s): SOWK 8090 or admitted to the Master of Social Work program with advanced standing.

SOWK 8686 MEDICAL AND PSYCHOSOCIAL ASPECTS OF SUBSTANCE USE DISORDERS (3 credits)

This course introduces students to substance use disorders and their impact on the individual, family, and society. It covers psychopharmacology, alcohol and drug interactions, drug classifications, theories of substance use disorders, various models of treatment, vulnerable populations, and ethical and legal issues. (Cross-listed with SOWK 4680, COUN 4680, COUN 8686)

Prerequisite(s): Admission to counseling program or social work program or permission of instructor.

SOWK 8696 ASSESSMENT AND CASE MANAGEMENT IN SUBSTANCE USE DISORDERS (3 credits)

This course focuses on assessment of clients and their environment, and diagnosis and referral for substance use disorder treatment. Emphasis is given to assessment instruments, treatment levels, treatment planning, case management, and social justice. (Cross-listed with COUN 4690, COUN 8696, SOWK 4690).

Prerequisite(s): Admission to MSW program or permission of the School and SOWK 8686 or COUN 8686 (or equivalent course) prior to or concurrent.

SOWK 8806 SOCIAL WORK AND THE LAW (3 credits)

This course presents the fundamental principles of criminal and civil law that have relevance to the practice of social work. Topics include: the legal system, legal research methods, professional ethical/legal responsibilities and liabilities, family law, elder law, criminal law, juvenile law, personal injury law, employment discrimination law, capacity to make contracts and wills, rights of institutionalized patients, and rights of handicapped children to an education. (Cross-listed with SOWK 4800)

Prerequisite(s): SOWK 8130 or admitted as Advanced Standing

SOWK 8816 SPIRITUALITY AND SOCIAL WORK PRACTICE (3 credits)

Social work literature defines spirituality as the human striving for a sense of meaning, purpose, values, and fulfillment. Spirituality is expressed through diverse forms throughout a client's lifespan; it is central to clients' understanding of suffering and their attempts to resolve it. This course examines major issues pertaining to spiritually-sensitive social work practice with clients of diverse religious and non-religious (i.e., outside sectarian institutional contexts) perspectives. (Cross-listed with SOWK 4810)

Prerequisite(s): SOWK 8130 or admitted as Advanced Standing

SOWK 8826 GLOBAL ENGAGEMENT: A SOCIAL WORK PERSPECTIVE (3 credits)

This course prepares students to work in a global setting. Students examine theories, concepts, and skills related to social development, cross-cultural engagement, and issues related to particular countries. The course is designed with two elements: 1) On-campus classroom learning focused on global social work knowledge, and, 2) Field-based labs that involve direct engagement with an international population. Students select one lab: i) faculty-led trip to China for two-weeks, ii) refugee resettlement service-learning project in Omaha. (Cross-listed with SOWK 4820).

Prerequisite(s): Admitted to Graduate College. Travel overseas early summer-course lab. Passport, visa-China, travel insurance-UNO, immunizations and registration (International Studies) required to travel abroad. Faculty member leading trip to provide further info.

SOWK 8836 CRISIS INTERVENTION (3 credits)

The prevalence of crisis experiences within our society and lifespan development necessitates that social workers acquire a knowledge and skill-base for effective and professional crisis intervention practice. Students will study the ABC Model of Crisis Intervention and how to ethically practice with diverse and vulnerable populations. Students will apply crisis intervention theory and models of intervention to various concern areas including but not limited to: suicide, sexual assault, domestic violence, substance abuse, grief and loss, and violence. A systems, strengths, and cultural emphasis will be applied to the various crisis situations covered. (Cross-listed with SOWK 4830)

Prerequisite(s): SOWK 8130 or admitted as Advanced Standing

SOWK 8856 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)

This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 4850, GERO 8856, SOWK 4850.)

Prerequisite(s): SOWK 8130 or advanced standing

SOWK 8880 TOPICAL SEMINAR IN SOCIAL WORK (3 credits)

Specific seminar topics will focus on advanced content in social work theory and practice. The course description will be announced when a specific topical seminar is proposed. The topics selected will be consistent with School of Social Work program objectives, faculty expertise, and student needs. This course may be repeated for up to nine hours credit.

SOWK 8886 TOPICAL SEMINAR IN SOCIAL WORK (3 credits)

Specific seminar topics will focus on advanced content in social work theory and practice. The course description will be announced when a specific topical seminar is proposed. The topics selected will be consistent with Grace Abbott School of Social Work program objectives, faculty expertise, and student needs. (Cross-listed with SOWK 4880)

Prerequisite(s): Admission to the Master of Social Work (MSW) program or permission of the Grace Abbott School of Social Work (GASSW).

SOWK 8900 SPECIAL STUDIES IN SOCIAL WELFARE (1-3 credits)

This independent study course allows students to pursue a special selected area or topic within social welfare in order to deepen knowledge and/or skills in that particular area.

Prerequisite(s): Permission of the Grace Abbott School of Social Work (GASSW). Not open to non-degree graduate students.

SOWK 8940 EVALUATION OF SOCIAL PROGRAMS (3 credits)

This is an advanced research course in the evaluation of social programs and social agencies which focuses on agency organizational structure, program design and effectiveness, and social impact.

Prerequisite(s): SOWK 8190

SOWK 8950 RESEARCH METHODS IN CLINICAL PRACTICE (3 credits)

This course provides a study of the issues involved in clinical research methodology. Students are introduced to the tools for documenting the effects of clinical practice interventions for individuals, couples, families and groups (including qualitative and quantitative methodologies: single-case design, standardized measurement, self-report data, self-monitoring, case study, grounded theory etc.).

Prerequisite(s): SOWK 8190 and SOWK 8220

SOWK 8960 RESEARCH OTHER THAN THESIS (3 credits)

This course enables students, under faculty supervision, to prepare a research proposal, carry out the study, and prepare a detailed report of the purpose, design, outcome, and significance of the study.

Prerequisite(s): SOWK 8190 and permission of the Grace Abbott School of Social Work

SOWK 8990 MASTER'S THESIS (3-6 credits)

The Master's thesis provides students the opportunity to acquire first-hand experience in research methods under faculty direction. With the guidance of the thesis coordinator and a supervisory committee, the student prepares a research proposal, conducts the proposed study, and prepares a detailed report of the purpose, design, results, and implications of the findings.

Prerequisite(s): SOWK 8190 and permission of the Grace Abbott School of Social Work (GASSW)

Sociology (SOC)

Sociology Graduate Courses

SOC 8010 CLASSICAL SOCIOLOGICAL THEORY (3 credits)

This course surveys the nineteenth century writers whose ideas have had a strong influence on the development of contemporary sociology and sociological theories. It examines work in such areas as: structural functionalism; conflict theory; rationalism; and the beginnings of modern symbolic interaction, feminist, and race theory. The course emphasizes a close reading of original texts, as well as seminar-style class discussions.

Prerequisite(s): Graduate; permission of instructor if outside Sociology MA program.

SOC 8020 CONTEMPORARY SOCIOLOGICAL THEORY (3 credits)

This course reviews some of the most important developments in contemporary sociological theory. It examines work in such areas as: symbolic interactionism, phenomenology and ethnomethodology; dramaturgical analysis; functionalism and neo-functionalism; structuralism, post-structuralism and postmodernity; postcolonial and subaltern studies; neo-marxism; critical theory; critical race studies; feminist theory; cultural theory; and world systems and globalization theory. The course emphasizes a close reading of original texts, as well as seminar-style class discussions.

Prerequisite(s): Graduate; permission of instructor if outside Sociology MA program.

SOC 8030 SOCIOLOGICAL INQUIRY & RESEARCH DESIGN (3 credits)

This course focuses on the research design process from a sociological perspective. It gives broad, intermediate-level coverage to social science research methodology, with an emphasis on the logic of research procedures. Topics covered include the relationship of theory and research, causal analysis, sampling, and quantitative and qualitative design approaches.

Prerequisite(s): Graduate; undergraduate course in research methods; permission of instructor if outside Sociology MA program.

SOC 8040 SOCIOLOGICAL STATISTICS (3 credits)

This course focuses on intermediate statistics and data analysis as applied to social research. Topics include descriptive statistics, probability, significance tests, multiple regression, and more advanced topics as time permits. Students will also learn how to utilize computer software packages to perform statistical analyses.

Prerequisite(s): Graduate; undergraduate statistics course; permission of instructor if outside Sociology MA program.

SOC 8050 SEMINAR ON TEACHING: PEDAGOGICAL THEORY AND PRACTICE (3 credits)

A survey of various approaches to teaching at the college level (including critical, feminist, and other pedagogical theories) as well as strategies that can be employed in teaching. Topics include: syllabus and course design, evaluation and assessment strategies, developing a teaching style and philosophy, and the scholarship of teaching and learning. Emphasis is on preparing new teachers in sociology, but the course is intended for any graduate student who may already be teaching or anticipates teaching in the future.

Prerequisite(s): Enrollment in the graduate program in sociology or permission of the instructor.

SOC 8060 QUALITATIVE METHODS (3 credits)

This course familiarizes students with contemporary qualitative methodologies and techniques by which the social sciences explore social and cultural relations in natural settings. Students will conduct individual and or group field projects.

Prerequisite(s): Graduate standing or permission of the instructor.

SOC 8100 SOCIAL INEQUALITY (3 credits)

This course examines social inequality from a sociological vantage point. Students will review theoretical frameworks for studying social inequality, processes that result in the unequal distributions of individual resources, empirical analyses of inequality, and the consequences of various inequalities for intergenerational social mobility. While the course focuses on inequality in the United States, global and international dimensions of social inequality are also covered.

Prerequisite(s): Graduate; permission of instructor if outside of Sociology MA program

SOC 8136 SOCIOLOGY OF DEVIANCE (3 credits)

This course introduces students to the sociological study of behaviors that have been labeled as "deviant" because they presumably violate social norms. The course takes a constructionist approach, critically analyzing how deviance is socially defined, organized, and managed. Students will be challenged to see the diversity and pervasiveness of deviance in society and to question the labelling of behaviors, individuals, and powerless groups as deviant. We will explore the social processes, powerful actors, and social institutions that create deviance as well as efforts to resist definitions of deviance. (Cross-listed with SOC 4130).

Prerequisite(s): Graduate standing.

SOC 8146 URBAN SOCIOLOGY (3 credits)

This course examines classical and contemporary sociological theories on city formation, the urbanization process, and the interaction of society and the built environment. Topics covered include suburbanization, gentrification, residential segregation, social networks, crime, housing, city culture, and public policy. The focus is on U.S. cities with selected comparisons to other world regions. Students will also get basic knowledge and exposure to research methods to study urban areas locally. (Cross-listed with SOC 4140).

Prerequisite(s): Graduate standing, or permission of instructor

SOC 8156 AMERICAN FAMILY PROBLEMS (3 credits)

This course explores the problems and issues faced by contemporary American families, such as racism and sexism; the challenges of childhood and adolescence; divorce and remarriage; work and family conflict; and family violence. The difficulty of defining both "family" and "problems" is addressed throughout the course. (Cross-listed with SOC 4150)

Prerequisite(s): Not open to non-degree graduate students.

SOC 8176 SOCIOLOGY OF FATHERHOOD (3 credits)

This course examines the existing social science research on fatherhood, exploring topics such as the evolution, history, demography, and politics of fatherhood; father involvement and its relationship to both children's and men's well-being; the effects of diversity and family structure on fatherhood; and public policy surrounding fatherhood. (Cross-listed with SOC 4170)

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

SOC 8186 OCCUPATIONS & CAREERS: FULFILLMENT AND CHALLENGES AT WORK (3 credits)

This course examines what makes individuals and groups happy and satisfied with their jobs, and the factors that can turn "a dead-end job" into a meaningful pursuit that lasts decades. The course utilizes a life course approach and covers early socialization experiences to retirement transitions. It also employs a sociological lens to explore how individual experiences in the work realm are affected by stratification (such as race/ethnicity, gender, sexuality, social class, and parental status) and as well as by occupational norms and structures, workplace relationships, and culture and practices at the organizational and societal levels. (Cross-listed with SOC 4180).

Prerequisite(s): Enrollment in sociology graduate program or permission of the instructor.

SOC 8200 HEALTH & SOCIETY (3 credits)

The course provides a critical sociological understanding of health, illness, healing, and medical care within a social context. The focus ranges from examining health and illness behavior and patient-provider interaction to issues addressing the social organization of health care and medicine.

Prerequisite(s): Graduate standing.

SOC 8216 DISABILITY AND SOCIETY (3 credits)

This course takes a sociologically grounded but interdisciplinary look at the past, present, and potential future of disability. Along the way, competing models and theories of disability are critically explored and substantive issues pertaining to the social experiences and social responses to people with disabilities are discussed. (Cross-listed with SOC 4210)

Prerequisite(s): SOC 1010 and junior or senior standing; or permission of instructor. Not open to non-degree graduate students.

SOC 8246 SOCIAL TRANSFORMATIONS IN LATIN AMERICA (3 credits)

The course reviews the main social, economic, and political forces that have shaped Latin American societies, and the sociological theories used to understand Latin American development and underdevelopment. Race, ethnicity, gender and class in Latin America, as well as the region's position in the global economy are examined. (Cross-listed with SOC 4240, LLS 4240, LLS 8246).

Prerequisite(s): Graduate standing or permission of instructor.

SOC 8256 CRISSCROSSING THE CONTINENT: LATIN AMERICAN MIGRATIONS (3 credits)

In this course we will use an interdisciplinary lens to study the changes and continuities of migration in the Americas. The course starts with an overview of immigration to the Americas during the first era of mass migration (1850-1920) to explore the relevance of European migrations for national and identity constructions in the Southern Cone of America. Students then will be introduced to the impacts of social and political change on emigration flows, both regionally and beyond the region. They will also explore migration related policies at the national and regional level. We will also study the changes and continuities in the migration system of the Americas. Lastly, we will analyze the new North-South migration, as well as immigration to Latin America from Asia (recent and historical), Europe, and Africa. (Cross-listed with SOC 4250, LLS 4250, LLS 8256).

Prerequisite(s): Graduate standing

SOC 8316 SOCIOLOGY OF SEXUALITIES (3 credits)

This class focuses on the social construction of sexualities - especially heterosexual sexualities, bisexual sexualities, and homosexual sexualities. A primary focus of the class will be LGBT/Queer Studies. The class examines how sexual desires/identities/orientations vary or remain the same in different places and times, and how they interact with other social and cultural phenomenon such as government, family, popular culture, scientific inquiry, and race, gender, and class. (Cross-listed with SOC 4310)

Prerequisite(s): Not open to non-degree graduate students.

SOC 8356 WORK & FAMILY (3 credits)

This course examines the contemporary problems that individuals, families and communities in the U.S. have in integrating work and family/personal life. (Cross-listed with SOC 4350)

SOC 8446 HUMAN CONNECTION, LONELINESS, & HEALTH (3 credits)

This course examines the "loneliness epidemic" through a sociological perspective and is based on the premise that loneliness is a public health issue, as research consistently shows it is associated with a vast array of physical and mental health outcomes. After discussing the extent of loneliness and how to define it by distinguishing it from other types of social pain, the course covers: 1) the extent and nature of loneliness and its cultural/social sources; 2) the pathways from loneliness to health outcomes; and 3) possible interventions to reduce loneliness and improve public health. (Cross-listed with SOC 4440).

Prerequisite(s): Graduate standing.

SOC 8476 SOUTH AFRICA & THE SOCIO POLITICS OF APARTHEID (3 credits)

South Africa and the Socio Politics of Apartheid examines the lived experiences of South African people under the Apartheid system, and their long struggle against European colonial oppression and racial segregation throughout the 20th century. Students will examine the laws, tools, and strategies that developed and sustained Apartheid, and the anti-Apartheid movements and international pressure that led to its repeal and South African democratic elections. (Cross-listed with BLST 8476, BLST 4470, PSCI 8476, PSCI 4470, SOC 4470).

Prerequisite(s): Graduate standing

SOC 8500 COMPLEX ORGANIZATIONS (3 credits)

This graduate seminar provides an overview focused on the understanding and analysis of intricate internal and external organizational forces such as organizational bureaucracy, organizational culture, autonomy and control systems, which affect performance of organizational members as well as influence organizational survival. (Cross-listed with CACT 8500)

Prerequisite(s): Graduate enrollment or permission of class instructor.

SOC 8550 ORGANIZATIONAL CULTURE (3 credits)

This course will discuss the various dimensions of organizational cultures and their consequences to organizational life. Emphasis will be placed on the significance of culture to human behavioral patterns, and the analysis of how organizational cultures shape the behavior and performance of organizational members. The course will prepare students for leadership success in organizations using advanced knowledge of organizational culture.

Prerequisite(s): Graduate standing or permission of instructor.

SOC 8556 ORGANIZATIONAL DIVERSITY AND INCLUSION (3 credits)

This course provides advanced-level knowledge of the structural understanding, assessment, analysis, and management of social diversity as well as successful inclusion strategies in the workplace. Concepts and theories dealing with structural basis of the creation of difference, consequences of difference, inclusion, affirmative action, and diversity consulting skills are fully examined in this course. This course will prepare students for successful leadership in diverse organizational environments. (Cross-listed with SOC 4550)

Prerequisite(s): Graduate standing or permission of instructor.

SOC 8600 SEMINAR IN SOCIAL ORGANIZATION (3 credits)

Graduate seminar on the sociological analysis of organizational fields and an in-depth study of one organizational system, such as decision-making, authority, communication, change, supervision, technology, bureaucracy, and reward system, in one organizational type within one organizational field. As seminar topics change, this course may be repeated twice in a student's program without implying duplication.

Prerequisite(s): Graduate standing and SOC 4620/8626; or permission of instructor.

SOC 8626 APPLIED FORMAL ORGANIZATIONS (3 credits)

An advanced-level applied organizational sociology course that uses organizational theory, concepts, research, and practice to examine the structural bases of organizational effectiveness, efficiency, survival, and actions of organizational members. The course is designed to prepare students for organizational leadership using advanced knowledge and skills of organizational sociology. (Cross-listed with SOC 4620).

Prerequisite(s): Graduate standing or permission of instructor.

SOC 8706 WOMEN'S HEALTH AND ISSUES OF DIVERSITY (3 credits)

This course provides a critical understanding of the inter-relationship between socio-cultural, economic, and political factors and women's physical and mental health. The aim is to provide an overview of the experience with the health care system. Emphasis will be on critically examining recent scholarship from a sociological, behavioral, health policy perspective. (Cross-listed with SOC 4700, PHHB 4700, PHHB 8706)

Prerequisite(s): Graduate standing.

SOC 8746 SOCIAL JUSTICE AND SOCIAL CHANGE (3 credits)

This course investigates the economic, political and social constraints on equality present in local, national and global arrangements. Students will gain a theoretical understanding of these conditions as well as those that lead to social change, spanning from day-to-day resistance techniques to large scale social movements. Students will participate in a service learning or applied project as they explore contemporary social justice issues and learn both theoretical and practical tools needed to become successful change makers, activists, or community organizers. Examples of social justice movements or campaigns form the basis for understanding injustice at a local, national, and global level. (Cross-listed with SOC 4740)

Prerequisite(s): SOC 1010 and junior standing; or permission of instructor.

SOC 8766 ENVIRONMENTAL SOCIOLOGY (3 credits)

This course is an introduction to environmental sociology, a field of sociology that explores the interaction between the environment and society. Environmental sociologists consider how political, social, and economic factors have come to shape our patterns of interaction with the natural and built environment. Students will be expected to use the sociological perspective to understand the landscape of environmental problems, focusing on such issues as environment and health, disaster, environmental policy, climate change, environmental risk, human and animal interactions, sustainability, environmental justice and social movements. (Cross-listed with SOC 4760).

SOC 8776 POLITICAL SOCIOLOGY (3 credits)

This course explores political sociology, focusing on political processes and power. Political sociologists investigate relationships between political institutions and various other institutions, including but not limited to the economy, education, media, and religion, and the impacts that these relationships have on society and the individuals that comprise the society. This course will explore the concepts, theories, and knowledge that comprise this field such as power, legitimacy, the state, networks, stratification, and collective action. (Cross-listed with PSCI 4770, PSCI 8776, SOC 4770).

Prerequisite(s): Graduate standing

SOC 8786 URBAN LATIN AMERICA (3 credits)

This course examines the experience of Latin American urbanization, attending to its contributions to urban sociology, social movements, and policymaking. Topics include urban transitions (e.g. pre-Hispanic to colonial, post-colonial to industrial, and the neoliberal turn), socio-spatial configurations (e.g. plazas, squatter settlements), urban marginality debates, urban politics, and planning as well as governance innovations (e.g. bus rapid transit systems, participatory budgeting). Students will compare city case studies across the region and to urban life in the United States. (Cross-listed with SOC 4780, LLS 4780, LLS 8786, CACT 8186).

Prerequisite(s): Graduate standing or permission of instructor

SOC 8806 CONTEMPORARY TOPICS IN SOCIOLOGY (3 credits)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 4800)

Prerequisite(s): Sociology major; or permission of instructor.

SOC 8836 SOCIOLOGY OF MENTAL HEALTH & ILLNESS (3 credits)

This course will apply the sociological perspective to various topics regarding mental health and illness. The course will cover topics such as the social construction of mental illness, the social epidemiology of mental illness, labeling and stigma of those with a mental illness, and mental health policy/treatment. (Cross-listed with SOC 4830)

Prerequisite(s): SOC 1010, and junior standing; or permission of the instructor.

SOC 8856 SOCIOLOGY OF RELIGION (3 credits)

This course looks at religion as a social and cultural phenomenon, examining how religious beliefs, practices, institutions and movements shape and are shaped by their social context. Topics include: sociological theories and explanations of religion and spirituality; definitions of religion and the distinction between religion and other ideologies or worldviews; the measurement of religiosity and the scientific study of religion; trends in religiosity, spirituality, and the religious landscape historically and globally; sociological insights gained from the study of new religions, secularization, fundamentalism, and other issues related to contemporary religious experience. (Cross-listed with SOC 4850)

Prerequisite(s): SOC 1010 and junior standing; or permission of instructor

SOC 8886 CONTEMPORARY TOPICS IN SOCIOLOGY (1 credit)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 4880).

Prerequisite(s): Graduate standing or permission of instructor.

SOC 8896 CONTEMPORARY TOPICS IN SOCIOLOGY (2 credits)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 4890).

Prerequisite(s): Graduate standing or permission of instructor.

SOC 8950 PRACTICUM IN APPLIED SOCIOLOGY (3 credits)

A practical work experience under supervision that provides opportunity for applying principles from the student's academic area of concentration.

Prerequisite(s): Graduate sociology major. Not open to non-degree graduate students.

SOC 8960 APPLIED PROJECT (1-6 credits)

This capstone experience in the applied project option is an independent research project conducted in an applied setting under the supervision of a graduate faculty member in the department..

Prerequisite(s): Graduate sociology major; permission of the graduate program chair. Not open to non-degree graduate students.

SOC 8980 INDEPENDENT STUDY IN SOCIOLOGY (1-3 credits)

Guided reading or independent research in special topics in Sociology under the supervision of a member of the Sociology faculty. This course is designed primarily for the student interested in topics not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated once for credit.

Prerequisite(s): Permission of the instructor. Not open to non-degree graduate students.

SOC 8990 THESIS (1-6 credits)

A research project, written under the supervision of a graduate advisor in the Department of Sociology & Anthropology, in which the student designs, conducts, and completes an original, independent, scholarly investigation at a graduate level. The research topic and the completed project must be approved by the student's departmental committee.

Prerequisite(s): Permission from Graduate Chair. Not open to non-degree graduate students.

SOC 9110 THEORIES OF AGING (3 credits)

An overview of social gerontology with an emphasis on the interplay between social, psychological and physical elements in later life. Restricted to graduate students only; required of gerontology students. (Cross-listed with GERO 9110)

Prerequisite(s): Graduate.

Spanish (SPAN)

Spanish Graduate Courses

SPAN 8026 LANGUAGE ENHANCEMENT THROUGH VOCABULARY LEARNING (3 credits)

This class aims to expand students' vocabulary in Spanish. This will be achieved through doing an overview of current research that investigates how vocabulary is learned; identifying effective vocabulary learning strategies; and exploring topics not commonly encountered in Spanish classes such as commerce and science. The course also includes points of contact with the Spanish-speaking community in Omaha, where students can participate in interactions that connect what has been learned in the classroom to language use in real life. (Cross-listed with SPAN 4020).

Prerequisite(s): Graduate standing

SPAN 8036 ADVANCED SPANISH CONVERSATION (3 credits)

This course targets the development of oral skills in Spanish through the incorporation of complex and sophisticated conversational structures and nuanced lexicon. In particular, the course focuses on presentational (i.e., expressing or exposing ideas or opinions), and interpersonal speaking (i.e., engaging in conversation where learners narrate and describe in the major time frames of past, present, and future in paragraph-length discourse with control of aspect). (Cross-listed with SPAN 4030)

Prerequisite(s): Graduate standing

SPAN 8046 ADVANCED COMPOSITION AND STYLISTICS (3 credits)

In this capstone course, required for the completion of the major, learners will explore and practice advanced grammatical structures, write compositions in a variety of genres, and familiarize themselves with advanced stylistics. (Cross-listed with SPAN 4040)

Prerequisite(s): Not open to non-degree graduate students.

SPAN 8066 INTRODUCTION TO TRANSLATION AND INTERPRETATION (3 credits)

This course offers an introduction to the translation and interpretation field. Course objectives include (a) understanding translation theory; (b) comprehending the role of communication in translation and interpretation; (c) targeting common grammatical and pragmatic errors; (d) increasing vocabulary knowledge in a variety of fields; and (e) gaining an increased awareness of the rigor and demands innate to the translation and interpretation fields. (Cross-listed with SPAN 4060).

Prerequisite(s): Admission to MALT program or permission of instructor

SPAN 8076 HISPANIC BILINGUALISM (3 credits)

This course explores bilingualism among Spanish speaking populations. Topics include societal bilingualism, the history of Spanish and language policy in Spain, Latin America, and the U.S., psychological aspects of bilingualism, monolingual vs. bilingual acquisition, first vs second language acquisition, and Spanish as a heritage language in the U.S. (Cross-listed with SPAN 4070).

SPAN 8086 INTRODUCTION TO HISPANIC LINGUISTICS (3 credits)

This course introduces students to the field of linguistics by exploring the following areas: phonetics and phonology (sound systems), morphology (word formation), historical linguistics (language development over time), and sociolinguistics and pragmatics (language in society and context), among others, as framed within the study of the Spanish language. (Cross-listed with SPAN 4080).

Prerequisite(s): SPAN 3030 and SPAN 3040 OR SPAN 3010 and SPAN 3020; Graduate standing

SPAN 8126 HISPANIC SOCIOLINGUISTICS (3 credits)

This course introduces sociolinguistics, the study of the relationship between language and society, with an emphasis on the Spanish language. Its focus will be on correlational linguistics (how social factors such as age, gender and socioeconomic status affect language) and language and society (the role language plays in human conduct and social organization). Course topics will include the concept of speech communities, sociolinguistic variables, phonological and syntactic variation as well as languages in contact, bilingualism, Spanish in the U.S., Spanish as a heritage language, and language attitudes and ideologies. (Cross-listed with SPAN 4120).

Prerequisite(s): SPAN 8086 or instructor permission

SPAN 8136 SPANISH IN THE UNITED STATES (3 credits)

This course looks at Spanish in the U.S. from a sociolinguistic perspective. Course topics include: Dialectal/regional differences, dialect contact, Spanish- English bilingualism and code-switching, "Spanglish", language maintenance, language ideologies surrounding Spanish in the U.S., and Spanish in public spheres (e.g., TV, movies, radio, music, stand-up comedy). (Cross-listed with SPAN 4130).

Prerequisite(s): SPAN 8086 or instructor permission

SPAN 8146 INTRODUCTION TO LATIN AMERICAN FILM (3 credits)

The course will be a thematic study of significant Latin American films emphasizing and further investigating their relationship to history, culture, society and political issues that have often given rise to social movements. Films from a variety of Spanish-speaking countries including Mexico, Argentina, Chile, Cuba, Bolivia, etc. will be studied in their socio-political context. At the 8146 level, students will be introduced to theoretical approaches such as early film theory, montage theory, feminist theory, race theory, and phenomenological film theory in order to deepen their understanding these themes. (Cross-listed with SPAN 4140, LLS 4140).

SPAN 8156 LITERATURE/CULTURE: CENTRAL AMERICA AND THE CARIBBEAN 1898-2000 (3 credits)

"Literature/ Culture: Central America and the Caribbean 1898- 2000" studies major historical and socio-cultural events in Latin American history in the 20th century, through their articulation in literary texts, film, and other cultural expressions from Central America and the Hispanic Caribbean. (Cross-listed with SPAN 4150, CACT 8416)

Prerequisite(s): SPAN 3030, SPAN 3040 and SPAN 3060 or permission of instructor

SPAN 8176 INTRODUCTION TO LATIN AMERICAN LITERATURES (3 credits)

The course is intended as an introduction to the study of canonical and non-canonical texts in Latin American literatures, from the 16th to 21st centuries. It seeks to acquaint students with the rich literary traditions of a large region, from South America to Central America and Mexico, as well as with the historical challenges posed by the salient heterogeneity of texts included in the Latin American corpus, from the standpoint of ethnicity, gender, social class, and literary genre. The course also focuses on continuing to develop Spanish language skills, specifically reading for comprehension and interpretation of metaphorical meaning, writing, and presentational speaking skills in Spanish. (Cross-listed with SPAN 4170, LLS 4170).

Prerequisite(s): SPAN 3030 and SPAN 3040, or SPAN 3010 and SPAN 3020; SPAN 3060

SPAN 8196 REPRESENTATIONS OF THE SPANISH CIVIL WAR IN FILM AND POPULAR CULTURE (3 credits)

This course explores the principal social, economic, political, and cultural implications of the Spanish Civil War, including its antecedents and consequences, in order to critically analyze the ways in which such historical matters have been represented over time through film, as well as through other media. The course also focuses on the continued development of Spanish language skills, such as formal and informal essay writing, presentational speaking skills in Spanish, advanced reading, and interpretation of film theory and criticism. (Cross-listed with SPAN 4190).

Prerequisite(s): Graduate standing

SPAN 8226 THE STRUCTURE OF SPANISH (3 credits)

This course introduces students to the structure of the Spanish language with a focus on its morphology and syntax as seen in the study of constituents of a sentence, lexical categories, content and function words, the pronominal system, the structure of simple and complex sentences, and the verbal system, among others. It reviews frequent syntactical errors in Spanish L2 and Heritage learners with the purpose of advancing their linguistic competence. (Cross-listed with SPAN 4220).

Prerequisite(s): SPAN 3030 and 3040 or SPAN 3010 and SPAN 3020; graduate standing

SPAN 8336 LINGUISTIC JUSTICE AND LATINO HEALTH (3 credits)

Language barriers compromise the quality of health care for millions of Spanish-speaking patients each year. Spanish-speaking patients, for example, have disease (e.g., musculoskeletal diseases, pesticide poisoning, cervical cancer, HIV/AIDS), mortality, and pain burdens at least twice as high as English-speaking patients. At the same time, they have been disproportionately affected by infectious diseases such as the tuberculosis outbreaks or the COVID-19 pandemic. These facts make language a crucial concern for the improvement of health among Latinos in the US. Students in this course examine the relationship between language, health care, and health among Spanish speakers in the US through the dual lens of sociolinguistics and public health. We consider the effect of linguistic and discursive practices on access to health information and examine some of the measures currently in place to improve the transmission of health information across language boundaries. (Cross-listed with SPAN 4330).

Prerequisite(s): Instructor permission

SPAN 8440 SEMINAR:SPANISH COMPOSITION (3 credits)

This course provides opportunities for students to refine their composition skills in Spanish through extensive writing workshops and peer editing. Computer applications to composition will be employed.

Prerequisite(s): Admission to the Graduate College.

SPAN 8516 ILLNESS AND DISEASE IN SOUTHERN CONE LATIN AMERICAN LITERATURES AND CULTURES (3 credits)

The course will examine representations of illness, disease, and affections in literary and cultural texts from the Latin American Southern Cone, focusing in Argentina, Uruguay, and Chile. It will explore notions of health and disease, as embedded in literary and cultural texts from the late 19th to the 21st centuries. We will examine the ways in which physical ailments, mental health symptoms, and other conditions or disorders have been conceptualized and portrayed, co-relating the individual "disruptions" caused by unwellness with a host of social and cultural factors. The course will also explore current treatments and therapies for the illnesses discussed in the texts, taking into account the integration of western and alternative medicine and practices. (Cross-listed with SPAN 4510, LLS 4510, LLS 8516).

Prerequisite(s): Graduate student standing

SPAN 8536 DIALECTS OF THE SPANISH-SPEAKING WORLD (3 credits)

This course explores the diversity and variation of the various dialects within the Spanish-speaking world. Special attention will be devoted to understanding phonetic and phonological processes that make up these dialects. Students will increase their familiarity with the diversity of the Spanish-speaking world and the complexity of the relationship between languages and dialects. Through the course, students will employ data-collection skills and methods commonly used in the field of linguistics. Course will be conducted in Spanish. (Cross-listed with SPAN 4530).

Prerequisite(s): SPAN 8086 or instructor permission; Graduate standing

SPAN 8766 FORENSIC LINGUISTICS (3 credits)

This course will present an overview of forensic linguistics with an emphasis on the areas where linguistics (i.e., the study of language and its structures) and the law intersect. We will especially focus on these items: the nature of legal language, linguistic methods for determining the meaning of laws and statutes, types of linguistic analysis used for investigating deception and fraud, language used for profiling and identifying suspects in criminal cases, the relationship between language proficiency and defendants' ability to understand their rights, the legal and linguistic complexities of invoking one's rights, the language-related factors that lead to false confessions, the role of linguistic analysis in civil cases, and the challenges faced by court interpreters and other linguistic complexities of the courtroom. (Cross-listed with SPAN 4760).

SPAN 8900 SPANISH INDEPENDENT STUDY (1-3 credits)

Specifically planned projects and readings in a well-defined field within the areas of language, literature, culture, linguistics, or language acquisition, carried out under the supervision of a member of the foreign languages faculty holding graduate faculty status.

Prerequisite(s): (1) Acceptance into the Master of Arts in Language Teaching Program (MALT). Must have completed a minimum of six graduate credit hours. (2) Acceptance in Graduate Certificates. Must have completed a minimum of 6 graduate credit hours.

SPAN 8906 INDEPENDENT STUDY (1-3 credits)

Specially planned readings in a well-defined field of literature, carried out under the supervision of a member of the foreign language faculty. Designed primarily for the student who has need of work not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated for credit once.

Prerequisite(s): Senior status, no incompletes outstanding, and departmental permission.

SPAN 8956 PRO-SEMINAR: LITERATURE AND/OR FILM (3 credits)

This course is dedicated to the study of a narrower field of the literature and/or cinema of the Spanish-speaking world. (Cross-listed with SPAN 4950)

Prerequisite(s): Graduate standing

SPAN 8966 PRO-SEMINAR: CULTURE AND SOCIETY (3 credits)

This course will address a narrow field of study of the civilization, history, film, contemporary culture, art, politics, and/or cultural studies of the Spanish-speaking world. (Cross-listed with SPAN 4960)

Prerequisite(s): SPAN 3030 and SPAN 3010 or SPAN 3570 and enrolled in minor in Spanish for Health Sciences or SPAN 3050 and enrolled in minor in Spanish for Health Sciences

SPAN 8976 PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS (3 credits)

This course addresses a narrow field of study in linguistics or the professional language of the Spanish-speaking world. (Cross-listed with SPAN 4970)

Prerequisite(s): Graduate standing.

Special Education & Communication Disorders (SPED)

Special Education & Communication Disorders Graduate Courses

SPED 8000 SPECIAL PROJECTS (1-3 credits)

This course is designed to allow graduate candidates to pursue independent study of a topic under the direction and guidance of a faculty member. Topics studied and the nature of the learning activities is mutually agreed upon by the candidate and instructor.

Prerequisite(s): Permission by the instructor. Not open to non-degree graduate students.

SPED 8016 MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS (3 credits)

This course explores the role that educators and school mental health professionals play in identifying the risk factors and warning signs of children and youth with mental health concerns. Students will understand the risk and protective factors at the individual, family, school, and community level as related to children and youth's mental health. The course will provide an overview of externalizing and internalizing disorders as well as school-based and community-based treatments and interventions. (Cross-listed with COUN 4010, COUN 8016, SPED 4010).

Prerequisite(s): Not open to non-degree graduate students.

SPED 8030 TEACHING STUDENTS WITH EXCEPTIONALITIES (3 credits)

This course is designed to describe the characteristics and learning styles of students with various exceptional learning needs. This course also is intended to provide candidates with a knowledge base for the foundation of special education including the basic procedural flow of referral, identification and instruction and strategies for modifying the learning environment and individualizing instruction.

Prerequisite(s): Graduate standing.

SPED 8046 WORKSHOP IN SPECIAL EDUCATION OR SPEECH-LANGUAGE PATHOLOGY (1-6 credits)

The purpose of this course is to provide workshops or special seminars in the area of special education and communication disorders. This course will prepare graduate candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. (Cross-listed with SPED 4040).

Prerequisite(s): Must have graduate status and permission.

SPED 8080 SPECIAL EDUCATION FIELD EXPERIENCE SEMINAR (1 credit)

This course is designed to support special education teacher candidates as they begin to put into practice those principles, skills, and procedures that will be presented in their advanced courses. This course will offer 5 seminars throughout the semester that will provide an overview of the field experience, an explanation of the Council for Exceptional Children (CEC) Professional Ethical Principles, knowledge related to direct explicit instruction, evidence-based intervention, the Individual Education Program, lesson planning, and progress monitoring.

Prerequisite(s): Admitted to the Accelerated Special Education Program. Not open to non-degree graduate students.

SPED 8100 RESEARCH PROJECTS (1-3 credits)

The purpose of this course is to allow candidates to participate in research activities other than those related to the thesis. Specific course content and type of research will be dependent on the nature of the intended research and must be approved by the supervising advisor and Department Chair prior to registration.

Prerequisite(s): Graduate standing and admitted into a special education or speech-language pathology program of study.

SPED 8120 HIGH INCIDENCE DISABILITIES (3 credits)

This introductory course is designed to examine characteristics of learners with high incidence disabilities and the impact of those characteristics on learning. The focus will be on the manifestation of disabilities including learning disabilities, behavior disorders, mild to moderate intellectual disabilities, speech and language disorders, attention-deficit hyperactivity disorders, and autism spectrum disorders. Response to intervention procedures, and how they align with special education processes will be taught.

Prerequisite(s): Graduate Standing.

SPED 8236 LANGUAGE DEVELOPMENT AND DISORDERS FOR TEACHERS (3 credits)

This course is designed to introduce the candidate to the nature and structure of language, current theories of language, normal first and second language development, language disorders, multicultural issues in language assessment, and contemporary classroom management of language deficits. The topics will be examined from an educational perspective to enhance the teachers knowledge of language and to facilitate classroom management of language deficits exhibited by exceptional children in grades pre-K through 12. (Cross-listed with SPED 4230).

Prerequisite(s): Admission to Graduate College

SPED 8250 LITERACY ASSESSMENT AND INTERVENTIONS FOR STUDENTS WITH DISABILITIES (3 credits)

This course is designed to provide graduate candidates skills and strategies for instructing students with high incidence disabilities, including dyslexia, that struggle to acquire literacy skills. Emphasis is placed on diagnosis and assessment of specific reading and writing difficulties to determine effective instructional strategies. Instructional strategies will address modifications directed at teaching oral language, reading, writing, and spelling skills.

Prerequisite(s): Admission to the Master of Science degree program in special education or permission of the instructor. Not open to non-degree graduate students.

SPED 8260 DYSLLEXIA: FOUNDATIONS & SCIENCE OF READING (3 credits)

This course will address the critical components of language and literacy development and will introduce graduate students to the nature and needs of students with dyslexia. The course will focus on what dyslexia is, characteristics of children and youth with dyslexia and other learning disabilities, and the effects of dyslexia on learning to read and write. The course will also discuss important historical developments in the field, relevant laws, the science of reading, and policies as they relate to dyslexia.

Prerequisite(s): Admittance to Dyslexia certificate program/cohort OR Admittance to Special Education graduate program. Not open to non-degree graduate students.

SPED 8300 READINGS IN SPECIAL EDUCATION (1-3 credits)

Reading and discussion of current methodological developments, research, and innovations in special education.

Prerequisite(s): Admission to the graduate program in special education. Not open to non-degree graduate students.

SPED 8360 DYSLEXIA: LANGUAGE ESSENTIALS (3 credits)

This course is designed to address the neurobiological elements and origins of dyslexia. This includes its effect on language and literacy development, and variations in the processing and development of language, and literacy elements for students with and without dyslexia. This course will also address linguistic structures of and historical influences on the English language.

Prerequisite(s): Admittance to Dyslexia certificate program/cohort OR Admittance to special education graduate program AND SPED 8260. Not open to non-degree graduate students.

SPED 8580 INSTRUCTIONAL METHODS AND INTERVENTIONS IN SPECIAL EDUCATION (3 credits)

This course is designed to describe the various instructional methods that have been used successfully in supporting students with disabilities in a variety of settings. This course is intended to provide students with knowledge and evidence-based teaching strategies essential for modifying the learning environment and individualizing instruction for students with disabilities. In addition, teaching methods will focus on academic curriculum lesson planning, development of IEPs, selection of instructional methods and materials, explicit instruction, and universal design for learning (UDL).

Prerequisite(s): Admission into a Special Education Master's program and SPED 8120. Not open to non-degree graduate students.

SPED 8656 TRANSITION PLANNING (3 credits)

Curriculum oriented for teachers and related professionals to work with the career development and transition of individuals with disabilities within a multicultural and global society. Includes information for elementary through adulthood with emphasis on transition from high school to community living. (Cross-listed with SPED 4650).

Prerequisite(s): SPED 1500. Not open to non-degree graduate students.

SPED 8660 DYSLEXIA: ASSESSMENT FOR INSTRUCTIONAL PLANNING (3 credits)

This course is designed to address the principles and practices of effective assessment for students with dyslexia. This course will include the various purposes of assessment, the psychometric properties of high-quality assessment tools used to identify and support students with dyslexia, and important issues related to test administration. Graduate students will identify effective assessment tools appropriate for use with students with dyslexia, develop informal assessment procedures and plans, and interpret assessment data to design appropriate interventions for students with dyslexia.

Prerequisite(s): Admittance to Dyslexia certificate program/cohort OR Admittance to special education graduate program AND SPED 8260 & SPED 8360. Not open to non-degree graduate students.

SPED 8670 MATH INTERVENTIONS (3 credits)

The purpose of this course is to prepare graduate candidates to teach, co-teach or consult in the area of mathematics interventions. Graduate candidates will examine and apply the existing research in mathematics instruction for students with exceptional needs.

Prerequisite(s): Admission to the graduate program in Special Education. Not open to non-degree graduate students.

SPED 8690 DYSLEXIA: STRUCTURED LITERACY INSTRUCTION (3 credits)

This course is designed to address the principles and components of evidence-based literacy interventions for students with dyslexia. This will include the stages of literacy development, the characteristics and challenges of PK-12 students as they develop literacy skills, effective interventions in specific components of literacy, principles of structured literacy, direct instruction, and multisensory instruction, and the issues involved in designing comprehensive literacy interventions and programs for students with dyslexia.

Prerequisite(s): Admittance to Dyslexia certificate program/cohort OR Admittance to Special Education graduate program AND SPED 8260, SPED 8360 & SPED 8660. Not open to non-degree graduate students.

SPED 8700 SEMINAR IN SPECIAL EDUCATION (3 credits)

The seminar in Special Education is designed to be one of the very last courses taken by a master's degree candidate. Content covers a wide range of topics such as: 1) continuum of care; 2) educational and community service systems; 3) legislation; 4) family concerns; and 5) comparative special education. Each candidate develops a teaching module on one of the course topics, which is discussed and evaluated in class.

Prerequisite(s): Graduate standing.

SPED 8716 INTERACTIONS AND COLLABORATION (3 credits)

This course is offered to investigate the building blocks of collaboration. Effective interpersonal communication and collaboration skills are presented as the foundation necessary to build relationships among school personnel, families and community members. (Cross-listed with SPED 4710).

Prerequisite(s): Admission to Graduate College

SPED 8720 GRADUATE PRACTICUM IN SPECIAL EDUCATION (3 credits)

This graduate special education practicum course provides candidates with either inservice experience or placement in a school program for students with exceptionalities at an academic level commensurate with the candidate's desired level of the special education generalist endorsement (K-6 or 7-12).

Prerequisite(s): Admission to the graduate program in the desired endorsement, completion of 30 hours of required course work, and permission. Not open to non-degree graduate students.

SPED 8730 ADVANCED GRADUATE PRACTICUM IN SPECIAL EDUCATION (3 credits)

This course provides candidates with a second semester of classroom experience teaching students with disabilities. This experience is for graduate candidates who are extending their endorsement. For students seeking an additional endorsement as a Special Education Generalist, this course would prepare them for endorsement in grades K-6 or 7-12. For students seeking an additional endorsement in Behavior Intervention Specialist, this course would prepare them for endorsement in grades PK-6 or 7-12.

Prerequisite(s): Admission to the graduate program in the desired endorsement and completion of SPED 8720, SPED 8830 or SPED 8840. Not open to non-degree graduate students.

SPED 8760 DYSLEXIA: PRACTICUM (3 credits)

This course is designed to integrate the knowledge and theoretical study of dyslexia, including assessment and intervention information, with the application of these components in authentic settings. In this course, students will apply the knowledge of dyslexia, the principles of effective assessment and intervention and implement evidence-based practices for students with dyslexia through a supervised practicum experience.

Prerequisite(s): Admittance to Dyslexia certificate program/cohort OR Admittance to Special Education graduate program. Not open to non-degree graduate students.

SPED 8790 DYSLEXIA: ADVANCED PRACTICUM (3 credits)

This course is designed as a continued practicum experience to integrate the knowledge and theoretical study of dyslexia over a longer-period of time (e.g., 20+ weeks), including assessment and intervention information, with the application of these components in authentic settings. In this course, students will apply the knowledge of dyslexia, the principles of effective assessment and intervention and implement evidence-based practices for students with dyslexia through an extended supervised practicum experience. This practicum experience is a required experience for students pursuing national certification through the Center for Effective Reading Instruction (CERI).

Prerequisite(s): Admittance to Dyslexia certificate program/cohort AND successful completion of SPED 8760. Not open to non-degree graduate students.

SPED 8806 SOCIAL AND EMOTIONAL DEVELOPMENT OF CHILDREN AND YOUTH (3 credits)

This course is designed to prepare teacher candidates and graduate candidates with the understanding of the psychological, biological and environmental factors that affect the social-emotional development of children and adolescents. Emphasis is placed on the interaction of these factors for children with exceptional learning needs and the implications for the learning environment. (Cross-listed with SPED 4800).

SPED 8810 RESEARCH METHODS IN SPECIAL EDUCATION (3 credits)

This course is designed to provide an examination of the theoretical approaches to conducting educational research, research design and analysis, and interpretation and evaluation of existing research in special education and related fields.

Prerequisite(s): SPED 8120 or permission from the instructor. Not open to non-degree graduate students.

SPED 8816 BEHAVIOR INTERVENTIONS AND SUPPORTS (3 credits)

This course introduces a variety of practical interventions that teachers may use to support the positive classroom behavior of all students within a tiered model. Universal, targeted, and individualized strategies are presented. (Cross-listed with SPED 4810).

SPED 8820 CHARACTERISTICS OF EMOTIONAL AND BEHAVIORAL DISORDERS (3 credits)

This course is designed to assess and examine the causes and characteristics of behavioral disorders, which constitute internalizing, externalizing, and pervasive developmental disorders. Extensive use of the case study method will be used.

Prerequisite(s): Admission to the Master of Science degree program in special education.

SPED 8830 GRADUATE PRACTICUM IN BEHAVIOR INTERVENTION SPECIALIST (3 credits)

This course provides candidates with either an in-service experience or placement in a school program in which the candidate works with students with emotional and behavioral disorders at an academic level commensurate with the candidate's desired level of endorsement (PK- 9, or 7-12).

Prerequisite(s): Admission to the graduate program in special education with an emphasis in behavior intervention specialist, completion of 30 hours of the required coursework, and permission by the department. Not open to non-degree graduate students.

SPED 8840 ADVANCED PRACTICUM IN BEHAVIOR INTERVENTION SPECIALIST (3 credits)

This course provides candidates with additional experiences in working with students with disabilities who present challenging behaviors, including emotional disturbance and autism. This course is designed for graduate students who are already endorsed in special education.

Prerequisite(s): Behavior Intervention Specialist program and permission. Not open to non-degree graduate students.

SPED 8850 INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH EMOTIONAL AND BEHAVIORAL DISORDERS (3 credits)

The focus of the course will be on instruction and interventions that are effective for students with behavior disorders such as explicit instruction, social skills support, supporting executive functions, and cognitive strategy instruction.

Prerequisite(s): Graduate standing and successful completion of SPED 8820, not open to non-degree students.

SPED 8860 BEHAVIOR MODIFICATION (3 credits)

This course is designed to equip candidates with the skills necessary to assess, modify, and evaluate behavior in accordance with best practice and research-based approaches. In addition, this course will train candidates on how to conduct a functional behavioral assessment and create behavioral intervention plans in accordance with IDEA.

Prerequisite(s): Admission to the graduate program in special education. Not open to non-degree graduate students.

SPED 8870 AUTISM SPECTRUM DISORDERS: BEHAVIORAL SUPPORT AND INTERVENTIONS (3 credits)

This course is designed to provide information on the behavioral characteristics, instructional needs and necessary curriculum development specifically for children and youth with autism spectrum disorder (ASD).

Prerequisite(s): Admission to the graduate program in special education. Not open to non-degree graduate students.

SPED 8900 SPECIAL EDUCATION LAW (3 credits)

The purpose of this course is to research and explore legal and policy issues affecting special education within our schools. Case law will be examined to ensure effective special education programs for children and youth with disabilities. (Cross-listed with EDL 8900).

Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

SPED 8910 ASSESSMENT IN SPECIAL EDUCATION (3 credits)

This course provides an overview of measurement and evaluation concepts, strategies, and techniques that are appropriate for students with special needs. Graduate candidates will implement and analyze formal and informal assessments using a systematic and comprehensive approach. Emphasis is placed on those assessment strategies that yield objective data regarding individual learning characteristics that provide a basis for educational decision making.

Prerequisite(s): Graduate standing and SPED 8120

SPED 8920 SPECIAL EDUCATION LEADERSHIP (3 credits)

The purpose of this course is to examine special education administration and leadership issues. This course will focus on policies and procedures necessary to effectively provide leadership to programs for children and youth with disabilities.

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

SPED 8930 INCLUSION/COLLABORATION PRACTICUM (3 credits)

This course provides candidates with a practicum experience in the inclusion/collaboration specialty area with emphasis across PK-12 settings.

Prerequisite(s): Admission to the graduate program in inclusion/collaboration and permission by the department. Not open to non-degree graduate students.

SPED 8960 ADVANCED ASSESSMENT AND INTERVENTION (3 credits)

This course provides graduate candidates with in-depth practicum experiences in the administration and interpretation of standardized academic achievement measures, criterion-referenced tests, informal assessments, and progress monitoring with children experiencing learning difficulties. Emphasis is placed on utilizing assessment information in order to develop and monitor intervention plans.

Prerequisite(s): Admission to the Master of Science degree program in special education; SPED 8910, SPED 8646, SPED 8156, and SPED 8970; or have permission from the instructor. Not open to non-degree graduate students.

SPED 8970 INSTRUCTIONAL STRATEGIES (3 credits)

This course is designed to prepare graduate candidates with in-depth information regarding effective teaching strategies for students with high-incidence disabilities. Primary emphasis is placed on providing students with theoretical and practical foundations in the design and implementation of cognitive strategy instruction and the use of evidence-based practices and the selection and monitoring of individualized interventions.

Prerequisite(s): Admission to the Master of Science degree in special education, SPED 8120, SPED 8646 or equivalent or permission of the instructor. Not open to non-degree graduate students.

SPED 8980 PROFESSIONAL COLLABORATION (3 credits)

This course is designed to prepare candidates to work in collaboration with other professionals and parents to create a learning environment that enhances the potential for academic success and improvement of instructional practices. The focus will be on collaborative problem solving. (Cross-listed with TED 8850).

Prerequisite(s): Admission to Graduate College.

SPED 8990 THESIS (1-6 credits)

This course is intended for all graduate candidates in the Department of Special Education and Communication Disorders who are seeking a Master of Arts degree. The candidate is expected to generate and complete an independent research project under the guidance of a thesis advisor.

Prerequisite(s): Permission of Thesis Committee Chair and TED 8010. Not open to non-degree graduate students.

SPED 9140 ASSESSMENT AND TREATMENT OF AUTISM SPECTRUM DISORDERS (3 credits)

The purpose of this course is to familiarize students with the diagnosis, assessment, and treatment of autism spectrum disorders (ASD). (Cross-listed with PSYC 9140).

Prerequisite(s): Not open to non-degree graduate students.

Statistics (STAT)

Statistics Graduate Courses

STAT 8005 STATISTICAL METHODS I (3 credits)

An introduction to descriptive statistics, measures of central value and dispersion, probability and distributions, population and sample, simple linear regression, statistical inference: point estimation, confidence intervals, hypotheses testing, two population comparison, goodness-of-fit tests, analysis of variance. Statistical software like Minitab or Excel will be utilized in the course. (Cross-listed with STAT 3000).

Prerequisite(s): MATH 1220 or MATH 1300 or MATH 1320 or equivalent with a grade of C- or better, or permission of instructor

STAT 8416 INTRODUCTION TO DATA SCIENCE (3 credits)

Topics covered in this course include Data Technology, Methods of gathering and cleaning structured or unstructured data, Exploratory data analysis & Dynamic and interactive data visualization, Modeling data for prediction, forecasting or classification. (Cross-listed with STAT 4410).

Prerequisite(s): MATH 4740 with a C- or better or concurrent; or STAT 3800 with a C- or better or concurrent; or permission of instructor. Students should be comfortable with computer programming & have knowledge of data structures & preliminary statistical methods.

STAT 8426 EXPLORATORY DATA VISUALIZATION AND QUANTIFICATION (3 credits)

Topics covered in this course include Exploratory Data Visualization for categorical/qualitative single/multivariate data, Grammar of Graphics, Organizing Data for Visualization, Methods of Displaying Data that include dynamic and interactive visualization, Visual Diagnostics of Statistical Models and Visual Statistical Inference. Students planning to enroll in this course should be comfortable with computer programming and have knowledge of data structures and preliminary statistical methods. (Cross-listed with STAT 4420)

Prerequisite(s): STAT 3800 or STAT 8805 or MATH 4740 or MATH 8746 with a grade of C- or better or another introductory probability/statistics course with a grade of C- or better, and MATH 3200 or CSCI 1620 with a grade of C- or better, or permission of instructor.

STAT 8436 LINEAR MODELS (3 credits)

This is an introduction to linear statistical models which will include: simple linear regression models, multiple linear regression models, ANOVA models including one way ANOVA, randomized block design, and other designs. Also, logistic regression models, Poisson regression models, bootstrapping/resampling models, survival analysis. Some necessary linear algebra and mathematical statistics ideas will be covered in the course also. If time allows, some mixed models and/or survival models. Much use of computer software will be made. (Cross-listed with STAT 4430)

Prerequisite(s): MATH 4750 or MATH 8756 w/ a grade of C- or better or STAT 3800 or STAT 8805 w/ a C- or better or instructor permission based on students' having taken a basic statistics course w/ a grade of C- or better & having at least a basic knowledge of calculus.

STAT 8446 TIME SERIES ANALYSIS (3 credits)

The objective of this course is to learn and apply statistical methods for the analysis of data that have been observed over time. Topics covered include: Models for Stationary and Non-Stationary Time Series, Model Specification, Parameter Estimation, Model Diagnostics, Forecasting, Seasonal Models, Time Series Regression, and Spectral Analysis. Statistical software will be used. (Cross-listed with STAT 4440)

Prerequisite(s): MATH 4750 or MATH 8756 w/ a grade of C- or better or STAT 3800 or STAT 8805 w/ a C- or better or another introductory probability/statistics course w/ a C- or better, or permission of instructor.

STAT 8456 INTRODUCTION TO MACHINE LEARNING AND DATA MINING (3 credits)

This is an introduction to machine learning and data mining which covers the following topics with an emphasis on mathematical and statistical analysis: linear and nonlinear regression models, model selection and regularization methods, resampling methods, classification models, tree-based models, and unsupervised learning topics. If time allows, text mining will be introduced in the course. Statistical software will be used. (Cross-listed with MATH 4450, MATH 8456, STAT 4450)

Prerequisite(s): MATH 4740/8746 with a C- or better or STAT 3800/8805 with a C- or better or permission of instructor.

STAT 8670 TOPICS IN PROBABILITY AND STATISTICS (3 credits)

Advanced treatment of a specific topic in the area of probability and/or statistics not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with MATH 8670).

Prerequisite(s): MATH 4750/MATH 8756 or STAT 3800/STAT 8805 or permission from instructor

STAT 8700 BAYESIAN STATISTICS (3 credits)

The objective of this course is to introduce the Bayesian approach to statistical inference. Topics covered include: Review of probability, Bayes theorem, and Likelihood; The Bayesian methodology, prior and posterior distributions; Choices of prior distribution, conjugate and Jeffreys priors; Credible intervals and inference; Bayesian computation - Markov Chain Monte Carlo and the Gibbs Sampler; Hierarchical models; Regression models.

Prerequisite(s): MATH 8756 or equivalent or permission of instructor.

STAT 8710 DESIGN AND ANALYSIS OF EXPERIMENTS (3 credits)

Introduction to design and analysis of controlled experiments. The goal of experimental design is to be able to construct an experiment to identify which factors most impact the response and do so in an efficient manner. Statistical software will be used. Types of designs studied include: Randomized Block Designs, Latin Square Designs, Incomplete Block Designs, Factorial Designs, and Nested Designs.

Prerequisite(s): MATH 4750/8756 or permission of instructor.

STAT 8720 RELIABILITY THEORY (3 credits)

This course covers the probabilistic and statistical aspects of reliability theory. Reliability theory is concerned with the probability that a component or system is successfully working over a given time period or at a specific time instance. (Cross-listed with MATH 8720).

Prerequisite(s): Either MATH 4740 or STAT 3800 or permission of the instructor. Some basics of mathematical analysis are helpful when discussing limit theorems, but not required.

STAT 8730 ADVANCED STATISTICAL MACHINE LEARNING (3 credits)

This course will introduce machine learning models from a statistical perspective. Comparing to the introductory machine learning course, this course will focus more on (1) probability and statistical theory for machine learning methods; (2) relationship between machine learning and high-dimensional multivariate statistical analysis; (3) evolution and frontier of machine learning methods; (4) algorithm development for research purpose. Programming software will be used.

Prerequisite(s): MATH 4750/8756 with a C or better or permission of instructor.

STAT 8805 APPLIED ENGINEERING PROBABILITY AND STATISTICS (3 credits)

An introduction to the application of probability and statistics to engineering problems. Topics include: probability and probability distributions, mathematical expectation, distribution of random variables, binomial, Poisson, hypergeometric, gamma, normal, and t-distributions, Central Limit Theorem, confidence intervals, hypothesis testing. If time allows, some linear regression and contingency tables. Credit for both MATH 4740 and STAT 3800 will not be given. (Cross-listed with STAT 3800)

Prerequisite(s): MATH 1970

STAT 8960 MASTER'S PROJECT (1-6 credits)

An applied project, designed and executed under the supervision of both a faculty and industry advisor. In the project the student will apply their mathematical and/or statistical skills to an applied problem. The student will present their results via a written report and oral presentation. (Cross-listed with MATH 8960).

Prerequisite(s): Permission of faculty advisor and graduate program chair. Not open to non-degree graduate students.

Teacher Education (TED)

Teacher Education Graduate Courses

TED 8000 SPECIAL STUDIES (3 credits)

A series of intensive studies especially for in-service teachers scheduled as regular seminars or classes, according to purpose. Possible topics may include Reading Intervention, Mental Health, Social Emotional Learning, Math in the Community, etc.

Prerequisite(s): Graduate status

TED 8006 SPECIAL METHODS IN THE CONTENT AREA (3 credits)

This course is designed to develop knowledge, skills, and dispositions requisite of teachers. Course content is determined by the discipline area. For some content areas a field experience will be required. This is an in-school, guided practicum completed in conjunction with TED 4000 math, science, language arts, world languages, Business, Information Technology, ESL and social studies sections. Candidates must demonstrate competencies related to performance in 7-12 classrooms. This is the final practicum experience prior to the clinical practice semester. (Cross-listed with TED 4000).

TED 8010 INTRODUCTION TO RESEARCH (3 credits)

This course will introduce advanced degree candidates to: A) an understanding of the scientific method as applied to behavioral research, both qualitative and quantitative; B) assessment, evaluation, descriptive, causal-comparative, experimental, and qualitative data gathering procedures and analytical strategies; C) sampling theory, techniques, distribution and hypothesis testing; D) specific designs, methods, and tools of qualitative and quantitative research; E) search and retrieval of published research, both American and international (global); F) basic statistics, both descriptive and inferential; G) the ethical requirements of conducting research with human participants as outlined by Institutional Review Boards; H) a project involving critical evaluation of both qualitative and quantitative research studies.

Prerequisite(s): Graduate standing.

TED 8030 SEMINAR IN EDUCATION (3 credits)

This is a variable content course focusing on topics of current relevance to PK-12 teachers.

Prerequisite(s): Graduate standing.

TED 8040 SEMINAR ON STUDENT TEACHING/NEW TEACHER INDUCTION (3 credits)

The seminar is designed for experienced teachers who are, or may be, serving as cooperating teachers for student teachers or as mentor teachers for beginning teachers. Participants will study the purposes, techniques, and trends involved in serving as a cooperating teacher or as a mentor.

Prerequisite(s): Successful teaching experience is required for this course.

TED 8050 DATA-DRIVEN DECISION MAKING FOR EDUCATORS (3 credits)

This course provides graduate students with hands-on experiences that model data-driven decision making for educational success in today's classroom. Students will learn how to create valid and reliable assessments; interpret standardized test data; build data models that identify student, classroom, program, and school needs; and in general, to systematically enhance educational decision making from a base of carefully collected information. Graduate students will also explore data collection and analysis strategies associated with technologies such as cloud computing, tablet computers, and smart phones. In addition, they will experience data-driven decision-making models that can be integrated into student lessons to not only teach more effectively with data-driven decisions, but also to help teach students about data-driven decision-making. The course will use real data sets and cases, in interesting, hands on and technology-rich activities, to help educators learn how to find the "educational story" represented by a set of carefully collected data points. (Cross-listed with STEM 8050).

Prerequisite(s): Graduate standing.

TED 8055 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)

This course is designed to enhance candidates' understanding of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs) in the U.S. context. As dedicated practitioners, reflective scholars, and responsible citizens, students will have knowledge of factors that contribute to an effective multicultural and multilingual learning environment. TED 3050 includes an in school, guided practicum. Candidates must demonstrate competencies related to teaching English Learners (ELs) in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education.

Prerequisite(s): TED 2300 (EDUC 2010) OR TED 2380; and TED 2050.

TED 8060 CURRENT ISSUES AND TRENDS IN EDUCATION (3 credits)

The course is an advanced study of current issues and trends which have substantial impact on PK-12 education. The graduate candidates who take this class will read, analyze, and evaluate relevant research in order to become conversant in those issues.

Prerequisite(s): Graduate status is required.

TED 8070 TEACHING MULTIPLE INTELLIGENCE (3 credits)

This course focuses on the utilization of the multiple intelligences (MI) theory by teachers to enhance children's understanding of various disciplines. Graduate candidates will have the opportunity to explore, evaluate, and develop various methodologies that foster understanding.

Prerequisite(s): Graduate status.

TED 8080 STORYTELLING AND EDUCATION (3 credits)

This course is designed to consider the importance of storytelling, to provide teacher candidates with the background materials for storytelling, to study resource material for storytelling from a variety of cultures, and to develop techniques for storytelling. Actual experience in storytelling and opportunities for evaluating storytelling experiences will be provided.

Prerequisite(s): Graduate status

TED 8100 RESEARCH PROJECT (1-3 credits)

This course is designed for individual or group study and analysis of specific problems in schools dealing with curriculum and instruction in areas which have a broad scope of application rather than a specific level.

Prerequisite(s): Approval of Advisor.

TED 8120 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)

TED 8120 is designed to enhance graduate candidates' knowledge of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs). As dedicated practitioners, reflective scholars, and responsible citizens, graduate candidates will learn strategies for designing and promoting effective multicultural and multilingual learning environments. This course includes an in-school, guided practicum through which graduate candidates must demonstrate competencies related to standards related to teaching ELs in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education's ESL teaching endorsement.

Prerequisite(s): Not open to non-degree graduate students.

TED 8130 LANGUAGE, CULTURE, AND POWER (3 credits)

This course will focus on the intersection of language, culture, and power in the schools. This seminar will research how each component impacts the students and teachers in the classroom.

TED 8150 ANTI-RACISM EDUCATION: PRINCIPLES AND PRACTICES (3 credits)

This course provides a theoretical analysis of race, racism and the implications for anti-racist education. In addition to exploring the key features of anti-racism education, the course also addresses other axes of oppression, namely, class and gender, with a critical focus on racialized power and privilege, and how such features function in the broader U.S. context as well as the schooling environment. Of equal importance is a critical interrogation of the historical, ideological, and political processes that produce and maintain racism. Course participants explore pedagogies, curriculum, and school leadership strategies as mechanisms for instituting anti-racism work in schools and community.

Prerequisite(s): Graduate Status

TED 8160 ENGLISH AS A SECOND LANGUAGE STRATEGIES FOR PK-12 EDUCATORS (3 credits)

This course is designed to enhance graduate candidates' knowledge of PK-12 English as a Second Language (ESL) pedagogical and assessment strategies that address the needs of English Language Learners (ELs) in content area classrooms. As dedicated practitioners, reflective scholars, and responsible citizens, graduate candidates will be able to explore evidence-based pedagogical and assessment strategies to use in educational contexts serving ELs.

Prerequisite(s): Graduate candidate status. Not open to non-degree graduate students.

TED 8170 DEVELOPMENTAL ASSESSMENT OF THE YOUNG CHILD (3 credits)

This course is designed as a survey of developmental assessment in early childhood education (ages birth to eight years). Selection of assessment tools and strategies, implementation, data collection, analysis of results, and teaching impact are addressed in context of key assessment purposes in the early childhood field.

Prerequisite(s): Graduate status.

TED 8180 CULTURALLY RESPONSIVE TEACHING (3 credits)

This course includes an introductory analysis of the societal and institutional processes and problems which have bearing upon the education of children in urban settings. In addition, the course will focus on knowledge, skills and dispositions related to instructional strategies and classroom management needed for effective teaching in an urban environment.

Prerequisite(s): Graduate status

TED 8190 CONTEMPORARY ISSUES IN URBAN EDUCATION (3 credits)

This course is designed for candidates who wish to keep abreast of contemporary issues which confront the educational institution and teaching profession within the urban milieu.

Prerequisite(s): Graduate Status

TED 8200 SOCIAL WORLDS OF THE YOUNG CHILD (3 credits)

This course will explore theoretical and cultural perspectives on the social and emotional development of young children. This course will also examine the relationship between social emotional development, guidance practices, democratic life skills, and school readiness.

Prerequisite(s): Graduate status.

TED 8210 THE PRINCIPLES OF MULTICULTURAL EDUCATION (3 credits)

This course will develop practicing teachers' awareness of and skill in meeting the needs of P-12 students with regards to the areas of human understanding, acceptance and value. Candidates will examine existing attitudes towards various minority groups such as racial, ethnic, gender, exceptionality, etc. School materials and attitudes will also be examined in determining the effect they have on PK-12 students.

Prerequisite(s): Graduate status.

TED 8220 PLAY AS A LEARNING MEDIUM IN EARLY CHILDHOOD EDUCATION (3 credits)

This course provides an in-depth examination of young children's play and its curricular role in the early childhood classroom. The origins, developmental outcomes, assessment, curricular implementation, and evaluation of play will be covered, with an emphasis on play as a major component of developmentally appropriate practice with young children. The focus is on teachers learning to help children become partners in the operation of the learning environment.

TED 8230 LITERATURE FOR THE YOUNG CHILD (3 credits)

Literature for the young child is examined through the lens of developmentally appropriate practice for informing educators' interactions with children and also for developing high-quality, literature-related projects of study across the early childhood (birth-through-age-eight) continuum.

Prerequisite(s): Graduate Status.

TED 8240 FAMILY, SCHOOL, AND COMMUNITY PARTNERS (3 credits)

This course will examine the purposes and methods for developing family, school, and community partnerships. Candidates will explore characteristics of diverse families and develop the skills necessary for planning, design, implementation, and evaluation of effective partnerships in early childhood settings.

Prerequisite(s): Graduate Status.

TED 8250 ASSESSMENT FOR CLASSROOM TEACHER (3 credits)

This course studies assessment principles, effective practices, and classroom assessment processes throughout the curriculum. The research regarding assessment for learning is studied and application is made to classroom practices.

Prerequisite(s): Graduate status.

TED 8260 ADVANCED CURRICULUM IN EARLY CHILDHOOD (3 credits)

This course is designed to provide an in-depth examination of the processes used in selecting and implementing appropriate curricular content in programs for children ages three to eight years. Particular emphasis is on the role of the teacher as a dedicated practitioner and reflective scholar in the early learning environment.

TED 8270 TRENDS IN EARLY CHILDHOOD EDUCATION (3 credits)

This course provides a context for examining socio-political and research-based influences underlying trends in early childhood education at the local, national and international levels.

Prerequisite(s): Graduate Status.

TED 8280 INTRODUCTION TO HUMAN RIGHTS IN P-12 EDUCATION (3 credits)

The course examines the intersection of human rights and P-12 education and prepares individuals to effectively work with and advocate for children and adolescents in educational settings. Students completing the course will be able to 1) demonstrate an increased understanding of fundamental human rights with a specific emphasis on education rights and the human rights of children and adolescents 2) create learning environments that elevate human rights in educational settings and 3) design developmentally appropriate instruction for children and adolescents on varied human rights topics.

Prerequisite(s): Graduate Status

TED 8290 TRAUMA INFORMED EDUCATION (3 credits)

This course will present approaches to create trauma-informed classrooms which includes definitions and characteristics of trauma and how it impacts children, a brief history of trauma and associated theories/models, and a practice of skills for intervention in the classroom to support students and their families. Topics include applied teaching strategies which describe research-based techniques to support students with a history of trauma, as well as strategies to recognize signs of secondary trauma and burnout, followed by ways to mitigate them using research-based self-care techniques. (Cross-listed with COUN 8440).

TED 8300 EFFECTIVE TEACHING PRACTICES (3 credits)

This course focuses on specific characteristics and behaviors of effective teachers. Course content will be derived from research on teaching and learning.

Prerequisite(s): Graduate status

TED 8310 HUMAN DEVELOPMENT - CONTEMPORARY IMPLICATIONS FOR TEACHING & LEARNING (3 credits)

This course examines human growth and learning from birth through late adolescence. It is designed to prepare teachers to synthesize information regarding developmental theory and subsequently apply this to lesson design and effective content-area pedagogy. Candidates will examine multiple frameworks related to the cognitive, social/emotional, and physical development of children and use those to analyze current educational practices in PK-12 schools. Cultural influences impacting human development and implications for educational practices will also be examined. The course will include field-based experiences.

Prerequisite(s): Admission into a Teacher Education Department graduate program.

TED 8320 STRENGTHENING LEADERSHIP CAPACITY THROUGH RESEARCH AND COMMUNITY COLLABORATION (3 credits)

In Strengthening Leadership Capacity through Research and Community Collaboration, students extend their knowledge, reflective practice, and leadership to a community context. The course is designed create a mutually beneficial partnership between students' research agendas and community agencies. The goal is to enhance students' learning of content, understand the community, and perpetuate a sense of civic agency. Additionally, students further their research by submitting an article for publication.

TED 8370 DATA VISUALIZATION AND MODELING FOR EDUCATORS (3 credits)

In the growing context of data informed decisions there is a need to answer "what if" questions in a variety of decision-making situations, as well as to display data both visually and interactively. This course will provide foundational skills in data visualization and modeling for educational decision making and instruction. It draws upon key fundamentals in data visualization (representing data trends visually) as well as key strategies in data modeling (interactive representations to explore possible outcomes). The course also explores the use of visualization and modeling technologies as well as assisting student learning with these tools. (Cross-listed with STEM 8370).

TED 8376 TEACHING AT THE MIDDLE LEVEL (3 credits)

This course will provide candidates with a variety of middle level teaching techniques and strategies in their classrooms that have been identified in current research literature as appropriate for the middle level. This course is designed to introduce candidates to the unique characteristics of the middle student, school, curriculum, history, and philosophy. (Cross-listed with TED 4370).

Prerequisite(s): TED 2300 or EDUC 2010 or TED 2380.

TED 8390 CLASSROOM MANAGEMENT IN PRACTICE (3 credits)

This course will provide graduate students with a survey of general classroom management methods for classrooms. Candidates will enhance their understanding of three basic components of effective pedagogy: 1) proactive classroom management, 2) high-impact instructional strategies that impact student engagement and learning, 3) behavior management techniques that incorporate practice, feedback, research, and reflection.

Prerequisite(s): Graduate standing

TED 8400 ASSESSMENT AND INTERVENTIONS OF PK-12 READERS (3 credits)

This course is designed for graduate candidates enrolled in the Literacy MS or reading specialist endorsement program. The purpose of this course is to develop an understanding of theory and research as it relates to assessment, evaluation and instructional approaches that support Pk-12 reading development. This knowledge is applied through a practicum experience with Pk-12 students in which candidates integrate knowledge and practices related to assessment and evaluation of readers' strengths and needs.

Prerequisite(s): Graduate Standing

TED 8410 IMPROVEMENT OF INSTRUCTION: SPECIAL TOPICS (3 credits)

This course provides an in-depth study of instructional theory, research, and methodology designed to extend teachers' professional knowledge base and enhance their pedagogical skills. When offered, a course may be limited to improvement of instruction in a selected subject area. (Cross-listed with STEM 8410).

Prerequisite(s): Graduate standing.

TED 8420 TRENDS AND TEACHING STRATEGIES IN SCIENCE EDUCATION (3 credits)

This course is designed for the graduate candidate in the Department of Teacher Education whose study program emphasis is in the area of science education. The course will describe and analyze past and present trends in science education, including curricula, teaching-learning strategies, the laboratory and instructional materials. The course focus will be K-12 and as such is meant to serve both elementary and secondary graduate candidates. (Cross-listed with STEM 8420).

TED 8430 SCHOOL CURRICULUM PLANNING (3 credits)

This course is designed to provide advanced degree candidates with an understanding of the theory, principles, and practices utilized in curriculum planning in American schools. This course focuses on the principles and practices of effective curriculum planning and teachers' part in these processes as curriculum developers. (Cross-listed with STEM 8430).

TED 8470 TEACHING THE LANGUAGE ARTS (3 credits)

This course is designed to enhance candidates' knowledge of best practices in teaching reading, writing, listening, and speaking. Candidates will learn about research supported appropriate language arts instruction strategies and assessments. This course will inform graduate students as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

TED 8480 FOUNDATIONS OF BILINGUAL EDUCATION (3 credits)

This course is designed to give future and current teachers a thorough understanding of the theoretical, political, historical, and practical foundations of bilingual/multicultural education in the United States. As dedicated practitioners, reflective scholars, and responsible citizens, graduate students will have knowledge of factors that contribute to effective multilingual and multicultural learning environments that promote individual and societal bilingualism. Advanced Spanish language proficiency required.

Prerequisite(s): Graduate status

TED 8490 SPANISH LANGUAGE ARTS (3 credits)

This course is designed to reinforce first and second language acquisition theory as it relates to dual immersion settings. Best practices for developing and reinforcing bilingualism and biliteracy are presented and used for planning and delivering instruction. Spanish fluency is required for the course.

Prerequisite(s): Graduate status required for graduate students pursuing the bilingual education endorsement and concentration (does not lead to a Nebraska Department of Education teaching endorsement). Advanced Spanish language proficiency required.

TED 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)

This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with AVN 8510, STEM 8510).

Prerequisite(s): Graduate standing.

TED 8520 SCHOOL LIBRARY PRACTICUM (3 credits)

Candidates will gain direct experience and an understanding of the theories, concepts and activities integral to public services, technical services, and the administration in a 21st Century library and information agency at an assigned field site. Candidates will demonstrate the ability to plan, develop, and implement programming and services for patrons and diverse learners in their schools and communities.

Prerequisite(s): Candidates must be in the final 2 semesters of their school library program & must complete an application for the Practicum the semester prior to their practicum. Not open to non-degree graduate students.

TED 8530 INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS (3 credits)

This course is designed to provide graduate candidates with the opportunity to enhance interdisciplinary instructional strategies, curricular understanding, and lesson preparation in the areas of science, technology, engineering, the arts, and mathematics (STEAM) through analysis and reflective practices in STEAM. This course provides hands-on experiences that model STEAM integration techniques, including how to effectively engage with community agencies and partners to bring STEAM into the classroom. This course emphasizes not only the technical aspects of STEAM, but also the creativity and innovation that arts integration can add to enhance STEAM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. (Cross-listed with STEM 8530).

Prerequisite(s): This course includes both teacher education and STEAM related topics and therefore fits into both TED and STEM program coursework.

TED 8540 DIGITAL CITIZENSHIP (3 credits)

The course explores key concepts of Digital Citizenship pertaining to digital law, digital ethics, digital interaction, digital literacy, and cyber-security. The course addresses an educator's role as technology leader in both policy and practice to establish a responsible and robust digital learning community in P-12 schools.

Prerequisite(s): Graduate Standing/Status

TED 8550 TECHNOLOGY FOR CREATIVE AND CRITICAL THINKING (3 credits)

Technology for Creativity and Critical Thinking investigates the use of visual media tools in P-12 digital learning environments. This course provides candidates an opportunity to develop leadership skills and dispositions relevant to advocacy initiatives addressing policy and best practice in the use of technology in P-12 schools. The course encourages educators to critically evaluate and analyze digital tools supporting creativity and critical thinking through research and project development.

TED 8560 TECHNOLOGY FOR DIVERSE LEARNERS (3 credits)

This course will explore categories of diverse learners and how to effectively research and implement assistive technology, software, and tools to enhance their learning opportunities. Candidates will learn how to facilitate the use of instructional technology, pedagogy, and strategies to better meet the needs of diverse learners. With a focus on Universal Design for Learning paired with technology resources, candidates will become proficient in their ability to create learning activities that increase student learning outcomes. Throughout the course, candidates will be challenged as a leader to connect professionally, locally, and nationally to learn and share from professional peers.

TED 8570 INTERNET IN THE LEARNING PROCESS (3 credits)

This course is designed to help educators actively explore instructional implementations of Internet use appropriate for use in K-12 classrooms, successful diffusion of Internet innovations in educational environments, and emerging multicultural "breaking down the walls of the classroom" concepts available to educators through Internet use.

TED 8580 ONLINE TEACHING AND LEARNING (3 credits)

Online Teaching and Learning is a course for education professionals that investigates the use of online tools for planning, preparing and assessing student learning in an online teaching and learning environment. The course will prepare candidates to provide leadership for online teaching and learning initiatives within learning organizations. The course encourages education professionals to explore methods of virtual lesson delivery and online assessment through direct instruction, discussion, and project development.

Prerequisite(s): Graduate Admissions status

TED 8590 TEACHING AND LEARNING IN DIGITAL ENVIRONMENTS (3 credits)

This course is an introduction to future-ready information, digital learning environments, and instructional technologies for use with children and youth. Course will cover a diverse array of technical literacies that serve as content and skill goals for today's children and youth in P-12 schools and other learning environments.

TED 8610 TEACHING OF WRITING THROUGHOUT THE CURRICULUM (3 credits)

This course will develop candidates' understanding of the various aspects of writing to integrate throughout the content areas. Candidates will acquire and apply a common language for teaching and assessing student writing and investigate the varied ways writing genres extend throughout the curriculum. Candidates will examine research-supported writing instruction and the role write-to-learn strategies play in supporting diverse students in accessing and understanding content-specific information.

Prerequisite(s): Graduate status.

TED 8640 OPEN EDUCATIONAL RESOURCES FOR P-12 TEACHERS (3 credits)

TED 8640 Open Educational Resources for P-12 Teachers affords opportunities to study, evaluate, plan, and implement the open educational resources (OERs) to meet state, district, or diocese content standards and support equitable remote learning experiences. Graduate candidates will develop respective P-12 grade- and/or content-appropriate content/curriculum utilizing OERs focused on STEM (Science, Technology, Engineering, and Mathematics) education and the use of technology integration to foster effective teaching and learning.

TED 8650 CHILDREN'S LITERATURE AND EDUCATION (3 credits)

Candidates in this graduate course will explore story, poetry, drama, and informational materials for elementary students with an emphasis on methods for including literature in school curricula with an awareness of diverse children's lives, discourses, and understandings. Examines current issues, recent materials, and the theoretical and research base of this field to develop meaningful and creative learning, literacy, and library experiences for children.

TED 8660 YOUNG ADULT LITERATURE (3 credits)

This course extends candidates' knowledge of literature for young adults. The course addresses current trends in the genre and engages candidates in activities that support pedagogies in basic, visual, information and cultural literacies.

Prerequisite(s): Graduate status

TED 8695 LITERACY AND LEARNING (3 credits)

This course examines ways in which reading and writing can facilitate student learning in content areas studies (e.g., science, social studies, physical education, art, music, and math). The main focus is on teaching practices that engage students and contribute to their learning, integrating their background knowledge and cultural experiences with content area literacy. (Cross-listed with TED 3690).

TED 8700 ELEMENTARY EDUCATION CAPSTONE (3 credits)

This course is designed as a required, final capstone course for Elementary Education graduate students to be taken in the last nine hours of the Master of Science program. A grade of B or better must be received in TED 8700 to show satisfactory completion of the course and for program completion.

Prerequisite(s): Permission of the Elementary Education Program Chair. Not open to non-degree graduate students.

TED 8710 RESEARCH AND INQUIRY (3 credits)

The purpose of this course is for candidates to gain an overview and understanding of questioning, inquiry, and research strategies used in future ready P-12 libraries in order to ensure access to reference services and resources in a variety of formats and to design and support information literacy and inquiry-based instruction for all members of the learning community.

TED 8720 INTRODUCTION TO INSTRUCTIONAL COACHING IN PK-12 EDUCATION (3 credits)

This course examines the prominent coaching models used in PK-12 schools (i.e. teacher-centered coaching, student-centered coaching, cognitive coaching, transformational coaching). Candidates completing this course will be able to: develop an understanding of best practices in coaching, create a common lexicon for the role of an instructional coach, engage in the coaching cycle, and create a personal vision for their work as a coach. Candidates will engage in a field based experience to apply their learning.

Prerequisite(s): Graduate Status

TED 8726 SPECIAL LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the major types of 21st Century special libraries and information agencies. Candidates will demonstrate an understanding of social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the special libraries and information agencies. (Cross-listed with TED 4720).

TED 8730 PK-12 CAPSTONE (3 credits)

The PK-12 Graduate Capstone course provides candidates with an opportunity to apply the knowledge, skills, and dispositions acquired during their program to content specific synthesis activities in their respective disciplines. Students will demonstrate their ability to integrate information from program coursework in the design, development and presentation of a final capstone project related to teaching and learning.

Prerequisite(s): Graduate standing. Limited to those in online pathways. Not open to non-degree graduate students.

TED 8740 ORGANIZATION OF INFORMATION (3 credits)

Candidates will demonstrate the ability to integrate the legal and ethical standards of their discipline in ensuring access to information and ideas for a diverse array of learners in schools and communities. This course also addresses current theory and best practice in descriptive and subject cataloging and classification of information resources that align with school library standards and guidelines.

TED 8746 ORGANIZATION OF INFORMATION (3 credits)

Candidates will demonstrate a basic understanding of the theories, concepts and activities of descriptive and subject cataloging and classification procedures of information resources in 21st Century libraries and information agencies.

TED 8750 OXBOW WRITING PROJECT (3 credits)

Oxbow Writing Project summer institute immerses K-16 educators in writing pedagogy via their own writing, presentations about writing and pedagogy, reading and discussing professional literature, designing and implementing an in-depth inquiry project, and developing leadership strengths. Oxbow is a National Writing Project Site. (Cross-listed with ENGL 8750).

Prerequisite(s): Acceptance into Oxbow Writing Project Summer Institute

TED 8760 MANAGING COLLECTIONS IN LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the theories, concepts and activities integral to proactive collection management in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of community analysis, collection analysis, and the ability to conduct critical evaluations of a diverse array of information resources.

TED 8770 INTEGRATING TECHNOLOGY INTO INSTRUCTIONAL DESIGN (3 credits)

The purpose of this course is to introduce participants to effective methods for the integration of educational media into instructional design and provides participants (1) knowledge of broad instructional design theories and models with a concentration on constructivism, (2) experience in designing instruction that effectively integrates technology into the teaching-learning process, and (3) experience in producing instructional media. The course is intended to provide fundamentals in the selection, evaluation, production, application and utilization of educational media. This course is designed for in-service library media or instructional technology specialists as well as regular classroom teachers.

Prerequisite(s): Graduate status

TED 8780 FOUNDATIONAL SKILLS OF EARLY LITERACY (3 credits)

This course builds knowledge and instructional practices focused on early literacy foundational skills. With a focus on the components of foundational skills: (print concepts, phonological awareness, phonics and word recognition, and fluency) candidates will be able to identify concrete strategies to support Pk-3 student learning and practice. The course helps to build knowledge and skills of evidence-based early literacy instruction and provides resources to support teachers' planning and instruction.

Prerequisite(s): Graduate Standing

TED 8800 MULTICULTURAL LITERATURE FOR CHILDREN AND YOUTH (3 credits)

This is designed as a graduate-level course dealing with utilization of literary materials representing authors and content from multiple perspectives, particularly authors whose cultural and ethnic backgrounds differ from the mainstream.

TED 8810 STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH (3 credits)

This course will explore theoretical and foundational pedagogical strategies in early childhood education used to deliver integrative STEM education in the preK-12 setting. In order to understand the research and practice of STEM disciplines in preK-12, it is necessary to examine the social, cultural, political, and functional aspects that influence them. Candidates will investigate the nature of STEM education, Early Childhood Education (ECE) pedagogy and perspectives of learning, content knowledge and dispositions for educators of STEM topics, and issues of access and equity for STEM education through literature, discussion, and practice. This course includes a community outreach component in which candidates will use qualitative methods to observe class topics in public settings. (Cross-listed with STEM 8810)

Prerequisite(s): Graduate status

TED 8816 PRINCIPLES AND PHILOSOPHY OF INTEGRATING CAREER AND ACADEMIC EDUCATION (3 credits)

This course presents the philosophies and principles/practices underlying how schools can better prepare students for the workplaces of the future with emphasis on the integration of career education within broader academic preparation. The roles and responsibilities of teachers, counselors, and administrators in implementing integrated approaches will be examined. (Cross-listed with TED 4810).

TED 8820 CAPSTONE IN STEM EDUCATION (3 credits)

This course will prepare graduate students for the integration, articulation, and differentiation of curriculum and instruction in and between the STEM core areas of Science, Technology, Engineering, and Mathematics. Special emphasis will be on using the STEM core content to help provide applications and context to existing science and mathematics curriculum and instruction and on providing leadership in developing curriculum for mathematics and science dependent courses in engineering and technology.

Prerequisite(s): The student must be enrolled in one of the following concentrations: STEM, mathematics, science, technology; and be enrolled in the last six hours of their program of study. Not open to non-degree graduate students.

TED 8830 LEADERSHIP AND MANAGEMENT IN SCHOOL LIBRARIES (3 credits)

The course explores best practice for effective leadership and management of 21st Century school libraries. Candidates will gain a comprehensive knowledge of the theories, policies and processes involved in directing a school library in support of the personal and academic success of P-12 students. Candidates will explore and employ ethical codes of conduct in their profession to ensure school libraries meet the needs of their diverse array of patrons.

TED 8840 ENGINEERING EDUCATION EXTERNSHIP (3 credits)

This graduate course will address the best practice of effective teaching and learning in Engineering Education through professional collaboration between K-12 STEM (Science, Technology, Engineering, and Mathematics) teachers and practicing engineering professionals. K-12 STEM teachers, as graduate students in the course, will learn about and address real-world applications and career opportunities in STEM education through the externship. K-12 STEM teachers will research and develop authentic, experiential learning opportunities and projects for the classroom through course supports associated with lecture, discussion, and partnerships with practicing engineering professionals. The externship will be integral to the K-12 STEM teachers' experiences and work in this course, as the course models effective professional collaboration founded on experience, knowledge, and skills to achieve a curriculum enhancement goal. (Cross-listed with STEM 8840).

Prerequisite(s): Graduate status. Not open to non-degree graduate students.

TED 8850 PROFESSIONAL COLLABORATION (3 credits)

This course is designed to prepare candidates to work in collaboration with other professionals and parents to create a learning environment that enhances the potential for academic success and improvement of instructional practices. The focus will be on collaborative problem solving. (Cross-listed with SPED 8980).

Prerequisite(s): Admission to Graduate College.

TED 8856 COORDINATION TECHNIQUES IN WORK-BASED LEARNING (3 credits)

This course reviews responsibilities and techniques of coordination for the work-based learning teacher-coordinator and/or work-based learning coordinator, with special emphasis on administration of the part-time cooperative program and analysis of the laws and regulations governing this program. (Cross-listed with TED 4850).

TED 8860 INVENTION & INNOVATION IN ENGINEERING EDUCATION (3 credits)

This course will address emerging trends in STEM education for in-service K-12 STEM teachers with a focus on the use of engineering education practices in teaching and learning content. STEM teachers will receive applicable, hands-on, classroom-ready experiences through lecture, professional instruction, and projects that will emphasize product design and creation through the Engineering Design Process. The Engineering Design Process will be central to the candidates' experiences in this course and will be used by the candidates to develop curriculum utilizing emerging trends to supplement current course content and standards. Interdisciplinary planning will be central to the course. (Cross-listed with STEM 8860).

Prerequisite(s): Graduate status is required.

TED 8880 LEADERSHIP IN EARLY CHILDHOOD EDUCATION (3 credits)

This course seeks to prepare candidates with leadership skills in the early childhood field that will empower them to initiate and implement changes in programs serving young children and families. Candidates will explore and apply frameworks of leadership and analyze policy, governance, and power structures that can impact change. Candidates will also learn effective advocacy skills to positively influence policies and practices in program and governance structures. Lastly, candidates will examine approaches for developing new leaders in early childhood education through reflective supervision and mentorship.

Prerequisite(s): Graduate status.

TED 8900 SECONDARY EDUCATION GRADUATE CAPSTONE (3 credits)

The Secondary Education Graduate Capstone course provides candidates with an opportunity to apply the knowledge, skills, and dispositions acquired during their program to content specific synthesis activities in their respective disciplines. Candidates will demonstrate their ability to integrate information from program coursework in the design, development and presentation of a final capstone project related to teaching and learning in 21st Century educational environments.

Prerequisite(s): 30 credit hours towards degree completion; Permission required by Program Advisor. Not open to non-degree graduate students.

TED 8970 INDEPENDENT STUDY (1-3 credits)

This is a specially designed course taken under the supervision of a graduate faculty member to accommodate the student who has identified a focus of study not currently available in the departmental offerings and who has demonstrated capability for working independently.

Prerequisite(s): Permission of Department and Graduate Faculty member.

TED 8980 PRACTICUM: VARIOUS CONTENT AREAS (1-6 credits)

This course is designed to provide school professionals with a guided, supervised, field experience that will develop and enhance the knowledge, skills, and dispositions requisite of a successful educational practitioner.

Prerequisite(s): Prerequisites for the course will vary, depending on the content/discipline area. See syllabus for specific discipline area.

TED 8990 THESIS (1-6 credits)

This course is an independent research project completed under the direction of a thesis advisor and required of all candidates pursuing a Master of Science with Thesis option.

Prerequisite(s): Completion of Selective Retention and approval of advisor. Not open to non-degree graduate students.

TED 9100 THEORIES, MODELS, AND PRACTICES OF LITERACY (3 credits)

This course helps candidates develop a framework about the theories, models, practices, processes, and related research associated with literacy. The content looks across grade levels and student populations, and across social and cultural contexts in an examination of factors that impact theories and processes of literacy.

Prerequisite(s): Graduate status.

TED 9110 PRINCIPLES AND PRACTICES FOR TEACHING READERS (3 credits)

This foundational reading course is to provide candidates with a broad understanding of the core reading principles (phonological awareness, phonemic awareness, fluency, vocabulary and comprehension) as they relate to research, evidence-based practices and diverse students' literacy development. Candidates will also explore educational trends and shifts in literacy policies and approaches, and the impact these trends and shifts have on PK-12 classroom practices.

TED 9120 GRADUATE IN-SERVICE TEACHING (3 credits)

This is a graduate experience for in-service teachers pursuing teacher certification. Candidates must successfully complete a minimum of 100 hours (or per program of study) of field experience prior to completing their in-service teaching experience.

Prerequisite(s): Graduate standing. Permission. Applications go to the Office of Field Experiences. Not open to non-degree graduate students.

TED 9130 ASSESSMENTS AND INTERVENTIONS - ELEMENTARY (3 credits)

This course is designed for graduate candidates enrolled in the Literacy Masters or Reading Specialist endorsement program. The purpose of this course is to develop an understanding of theory and research as it relates to assessment and evaluation and instructional approaches that support reading development. This knowledge is applied through a practicum experience with elementary students in which candidates integrate knowledge and practices related to assessment and evaluation of readers' strengths and needs.

TED 9140 ASSESSMENT AND INTERVENTION - SECONDARY (3 credits)

This course is designed for graduate candidates in literacy endorsement and Master's programs. The purpose of this course is to develop an understanding of the theory and research driving assessment and evaluation and instructional approaches as they relate to reading differences for middle and high school students. Included in this course is knowledge about the role and responsibility of a literacy leader with regard to coaching, mentoring, supervision, and evaluation of a reading program. Application of this information is demonstrated through a practicum experience with middle and high school students.

Prerequisite(s): TED 9100; TED 9110 concurrent with, or prior to TED 9140.

TED 9180 LITERACY RESEARCH SEMINAR (3 credits)

This course will enhance candidates' understanding and ability to critically examine, apply, and conduct current literacy research by developing understandings of how to (1) discuss historical trends in literacy research, (2) critically evaluate the designs, theories, methods and tools of literacy research, and (3) develop understandings of action research to plan and implement a preliminary literacy research study in their own context. Candidates will develop a research proposal that is grounded in theory and action research methods within their own learning context.

TED 9190 LITERACY GRADUATE CAPSTONE (3 credits)

The Literacy Program Graduate Capstone course provides candidates with an opportunity to synthesize the knowledge, skills, and dispositions acquired during their program to honor the interrelationships among classroom, school, sociocultural, and community contexts as they relate to diverse students' literacy development. Candidates will demonstrate their ability to integrate information from program coursework in the design, development, and presentation of a final capstone project related to teaching, learning, and literacy advocacy in 21st Century educational environments.

Prerequisite(s): This course is designed as a capstone event. Accordingly, students must have no more than 6 additional remaining credit hours of coursework. Permit to enroll required.

TED 9200 CRITICAL PEDAGOGY: TEACHING FOR SOCIAL JUSTICE (3 credits)

This course examines ways in which ideology, power, and culture intersect in P-12 educational settings. Undemocratic, inequitable, and oppressive structures are identified. Possibilities for democratic, equitable transformations are proposed.

Prerequisite(s): Graduate status

Theatre (THEA)

Theatre Graduate Courses

THEA 8446 DIRECTING II (3 credits)

A practicum in play selection, analysis, casting, rehearsing and performing.

Prerequisite(s): Graduate standing with an undergraduate major or minor in theatre or permission of the instructor.

THEA 8615 COLLABORATIVE DESIGN STUDIES (3 credits)

Collaborative Design Studies explores the integration and process of theatrical production including scenery, lighting, costume, projection and sound. It chronicles their individual and collective impact on storytelling. While developing the skills of the Scenographer, students will work collaboratively as they foster their individual artistic design talents, and recognize the impact of design on society through storytelling.

Prerequisite(s): Graduate Standing or Permission of Instructor

THEA 8665 STAGE AND TV LIGHTING (3 credits)

Characteristics and control of light and color and their application to the theatre and television; elementary electricity; lens systems; reflectors; lamps; control systems; automation. (Cross-listed with THEA 3660).

Prerequisite(s): Graduate status or permission of instructor.

THEA 8755 THEATRE AND SOCIAL JUSTICE (3 credits)

This service-learning course will combine both research and practice in theatre that involves social change. Students will study the history of such theatre, with special focus on developments in the 20th century. All research will be accompanied by several community-based projects whereby students will create theatre with specific populations (schools, community centers, health centers, senior homes, etc.).

Prerequisite(s): Graduate in theatre. Graduate outside theatre with sufficient background in theatre and sociology political science requires permission of the instructor.

Urban Studies (UBNS)

Urban Studies Graduate Courses

UBNS 8000 SEMINAR IN URBAN STUDIES (3 credits)

This course provides an interdisciplinary overview of the forces influencing and influenced by urbanization and urbanism. (Cross-listed with GEOG 8830)

Prerequisite(s): Not open to non-degree graduate students.

UBNS 8020 RACE, ETHNICITY, AND AMERICAN URBAN CULTURE (3 credits)

This course explores two central themes, race and ethnicity, which have played a dominant role in the shaping of American society and American culture. (Cross-listed with BLST 8020).

Prerequisite(s): BLST 1000, BLST 1100, or permission by the instructor.

UBNS 8060 INTRODUCTION TO URBAN PLANNING (3 credits)

This course is an introduction to the development of urban planning as it has shaped and reacted to major trends in U.S. history. It provides students with major themes and traditions in the field of planning and includes planning practice, planning procedures and methods and contemporary issues in the field.

Prerequisite(s): Not open to non-degree graduate students.

UBNS 8200 COMMUNITY ORGANIZING & SOCIAL CHANGE (3 credits)

This course focuses on various theories and applications of organizing communities and neighborhoods to effect change. Of particular interest is the role of engaging citizens in improving their communities. (Cross-listed with PA 8200).

Prerequisite(s): Not open to non-degree graduate students.

UBNS 8400 URBAN LEADERSHIP (3 credits)

UBNS 8400 is an introduction to leadership in an urban setting. The course focuses on both theoretical and applied cases and strategies of effective urban leadership in a diverse society. Topics include leadership strategies for community engagement, neighborhood development, and nonprofit leadership. Profiles of urban leaders provide an applied setting for the course.

Prerequisite(s): Graduate student standing, but open to non-degree seeking students with Bachelor's degree; open to certificate students.

UBNS 8500 URBAN POLICY (3 credits)

Seminar on urban policies and policymaking. Attention is given to various current urban issues and the policy options surrounding them. Policy theories, policy processes, and the institutions of policymaking in cities are covered. Topics of focus include policies related to policing, economic development, land use, transportation, education, poverty, housing, and ordinances.

Prerequisite(s): Graduate student standing, but open to non-degree seeking students with Bachelor's degree; open to certificate students

UBNS 8820 COMPARATIVE URBAN STUDIES (3 credits)

Emphasis is upon contrasting the cities of the developed and developing areas of the world

Prerequisite(s): Not open to non-degree graduate students.

UBNS 8940 DIRECTED RESEARCH IN URBAN STUDIES (3 credits)

The course is intended for advanced graduate students in urban studies or geography. It is especially suited for those in-career students who have had their internships waived and who might profit more by in-depth research on a problem of urban studies rather than additional classroom courses. (Cross-listed with GEOG 8840).

Prerequisite(s): Completed 9 graduate hours in Urban Studies. Permission from the School. For Geography students, GEOG 8126 (Urban Geography) or permission from the School.

Women's and Gender Studies (WGST)

Women's and Gender Studies Graduate Courses

WGST 8066 HISTORY OF WOMEN IN AMERICA FROM 1875 - 1992 (3 credits)

This course examines the history of women in the United States from 1875 to 1992. Topics include law, work, sexuality and reproduction, immigration, civil rights, political participation and party politics, and changes to the American gender system, including family structure and employment. (Cross-listed with HIST 4060, WGST 4060, and HIST 8066).

Prerequisite(s): Graduate standing

WGST 8105 LGBT POLITICS (3 credits)

This course introduces students to the political struggle for Lesbian, Gay, Bisexual, and Transgender (LGBT) equal rights in the United States using a model of political empowerment, which may be applied for all minority or identity groups and social movements, generating operationalized measures of progress toward the loci of political power. (Cross-listed with PSCI 3100, PSCI 8105, WGST 3100)

WGST 8135 WOMEN AND POLITICS (3 credits)

This course introduces students to women's political participation, including holding elective office, socialization, the feminist movement and its opposition, and public policies with particular impact on women. The focus is on contemporary perspectives on women in American political ideas and behavior. (Cross-listed with PSCI 3130, PSCI 8135, WGST 3130)

WGST 8156 GEOGRAPHY, GENDER AND ENTREPRENEURSHIP (3 credits)

An advanced seminar focused on links among geography, gender and work, emphasizing leadership and entrepreneurship. The course considers theory and method in addition to empirical work. The nature of space, of gender, and of work, are examined. Topics include the gendering of work, the geography of entrepreneurship, gender and leadership. (Cross-listed with WGST 4150, ENTR 4150, ENTR 8156, GEOG 4150 and GEOG 8156).

Prerequisite(s): Junior, senior, or graduate standing, or permission of instructor.

WGST 8235 GENDER AND GLOBAL POLITICS (3 credits)

This seminar introduces students to gender politics in comparative and international politics. (Cross-listed with PSCI 3230, PSCI 8235, WGST 3230)

Writer's Workshop (WRWS)

Writer's Workshop Graduate Courses

WRWS 8000 FORM AND THEORY (3 credits)

This course is an advanced study of historical and contemporary theories, forms, and techniques in one or more literary genres, which may include poetry, fiction, nonfiction, drama, and screenwriting. Specific topics of study may change from term to term, and students may repeat the course under a new topic. Consult current class schedule.

WRWS 8106 FICTION STUDIO (4 credits)

An advanced course in fiction writing. Emphasis on refining the techniques of developing short fiction or the novel.

Prerequisite(s): WRWS 3100 or permission of instructor.

WRWS 8116 ADVANCED FICTION STUDIO II (4 credits)

An advanced course in fiction in which students write and edit the most fully-developed short stories and/or novel sections of their college career, as well as read, analyze, and discuss assigned texts. Students examine the techniques of fiction writing, use the vocabulary and perspective they have gained so far to discuss their and others' work. They draw upon aspects of the self, the senses, imagination and memory to produce texts unique to their own voice and experience. (Cross-listed with WRWS 4100, WRWS 4110)

Prerequisite(s): WRWS 3100 or permission of instructor. Not open to non-degree graduate students.

WRWS 8206 ADVANCED POETRY STUDIO I (4 credits)

An advanced course in poetry writing. Emphasis on refining poetic technique. (Cross-listed with WRWS 4200)

Prerequisite(s): WRWS 3200 or WRWS 4210 or permission of instructor. Not open to non-degree graduate students.

WRWS 8216 POETRY STUDIO (4 credits)

A graduate workshop in poetry writing with emphasis on such elements of craft as rhythm, imagery, lineation, diction, and metaphor. The course presumes the student is familiar with principles and practice of Twentieth Century poetry in English.

Prerequisite(s): Graduate standing and permission of instructor based on writing sample.

WRWS 8606 ADVANCED SCREENWRITING STUDIO I (4 credits)

This class will focus on the craft of screenwriting: plot, format, substance, style, scene development, film structure (both independent and main stream), three dimensional characters, and precise, professional dialogue. The student will complete a feature-length screenplay over course of the semester. There will be lectures and assigned reading. Once a month the student will view the current independent offering at Film Streams. This class will guide the student in completing a work portfolio, querying agents, applying to internships, and preparing for a career in film and television. (Cross-listed with WRWS 4600).

Prerequisite(s): Not open to non-degree graduate students.
