   i. A statement that if the student or student organization intends to present evidence, including witnesses, that information must be provided to the Conduct Officer no fewer than two (2) University days in advance of the hearing.
2. The notice of hearing must be sent at least five (5) University days before the hearing date. The hearing must be held no later than thirty (30) University days after the notice of hearing was sent. The time limits in this paragraph may be lengthened or shortened if the parties agree to do so. The time limits may also be lengthened if one of the parties makes a written request to the Vice Chancellor responsible for student conduct and the Vice Chancellor or their designee determines that there is a good reason for doing so. Under no circumstances may the hearing be held more than sixty (60) University days after the notice of hearing is sent.

Disqualification

1. The notice of hearing must be provided to the Hearing Officer or to the members of the hearing panel at least three (3) University days before the hearing so that the officer or members can decide whether they need to disqualify themselves.

2. Hearing Officers or panel members must disqualify themselves if they believe that they cannot decide the matter fairly and impartially or if there is a reasonable basis why others may perceive the officers or members as being unable to decide the matter fairly and impartially.

3. The name of the Hearing Officer or a list of the names of the members of the hearing panel must be provided to the Respondent at least three (3) University days before the hearing so that the Respondent can decide whether to challenge the Hearing Officer or any member of the hearing panel on grounds of lack of fairness or impartiality. The list of names of the members of the hearing panel must identify the Conduct Board Chair ("the Chair") and must also state the member’s status (faculty, staff, or student). The e-mail address of the Hearing Officer or the Chair must also be provided to the Respondent.

4. The Respondent may make a challenge by sending an e-mail to the Conduct Officer and to the Hearing Officer or the Chair in which the Respondent states the factual basis for challenging the impartiality or fairness of the officer or member. The e-mail must be sent no later than two (2) University days before the hearing. The failure to make a timely challenge to the officer or member waives the challenge unless the Respondent shows, as determined by the Vice Chancellor responsible for student conduct or their designee, that there are extraordinary circumstances that excuse the Respondent’s failure.

5. If the Respondent challenges the Hearing Officer, the officer must withdraw from the proceeding if the officer believes that the officer cannot decide the matter fairly and impartially or if there is a reasonable basis why others may perceive the officer as being unable to decide the matter fairly and impartially.

6. If the Respondent challenges a member of the hearing panel, the Chair must promptly forward the Respondent’s e-mail to the members of the panel. The member who is the subject of the challenge must withdraw from the proceeding if the member believes that the member cannot decide the matter fairly and impartially or if there is a reasonable basis why others may perceive the member as being unable to decide the matter fairly and impartially. If the member does not withdraw from the proceeding, the other members of the hearing panel may disqualify the member if they conclude by a majority vote that the standard for disqualification has been met.

7. If the Hearing Officer withdraws from the proceeding, the hearing must be conducted by a different Hearing Officer and the name of that officer must be promptly provided to the Respondent. If a Conduct Board member withdraws or is disqualified from the proceeding, the member must be replaced by a new Conduct Board member and the name of the new Conduct Board member must be promptly provided to the Respondent.

Pre-hearing Conference

1. Prior to a hearing a pre-hearing conference may be held to answer procedural questions and settle those matters which may be agreeably concluded.

Recording & Conducting the Hearing

1. The electronic or printed items that the Conduct Officer plans to use at the hearing may be made available to the Hearing Officer or Conduct Board for review before the hearing. The Respondent, however, must be given the opportunity to review the items before they are made available to the Hearing Officer or Conduct Board no fewer than five (5) University days in advance of the hearing. Any items that are made available to the Hearing Officer or Conduct Board must be presented as evidence at the hearing. If the Respondent intends to present evidence, including witnesses, that information must be provided to the Conduct Officer no fewer than two (2) University days in advance of the hearing.

2. The Conduct Board shall make a confidential verbatim record of each hearing. Such verbatim record shall be made by such method of recording or recording device as the University deems suitable. The recording shall be the property of the University. The Vice Chancellor responsible for student conduct or their designee has the authority to decide which recording means will be used.

3. At the beginning of the hearing, the Hearing Officer or Chair should state for the record:
   a. the date, time, and place; and
   b. their name and role as the Chair or Hearing Officer.

4. If the hearing is before a hearing panel, the Chair should:
   a. have the other members of the Conduct Board identify themselves, and
   b. state whether there is a quorum. If there is not a quorum, then the hearing must be rescheduled unless all parties waive on the recording any objection to the lack of a quorum.

5. The Hearing Officer or Chair should then identify the other persons present, ask the Conduct Officer to read the alleged violation(s), and ask the Respondent if the Respondent admits to the alleged violation(s).

6. The Hearing Officer or Chair must conduct the hearing in a manner that facilitates the presentation of relevant evidence by both the Conduct Officer and the Respondent. Both the Conduct Officer and the Respondent have the right to call witnesses and present their respective cases. The Hearing Officer or Chair has the discretion to allow the use of a question-and-answer format or allow a witness to make an oral statement about what the witness knows about the matter. The Hearing Officer or the members of the hearing panel may then ask questions to clarify what the witness said or to elicit more detailed information.

7. The Hearing Officer or Chair has the discretion to allow the parties to question the witnesses directly or to require the parties to submit suggested questions for the Hearing Officer or Chair to ask. In exercising this discretion, the Hearing Officer or Chair should consider all the relevant circumstances, including whether there is animosity between the Respondent and the witness, whether the charges involve violence, threats, or harassment of the witness by the Respondent, and whether direct questioning would be more efficient or would better enable the Respondent to present their information.

8. The Hearing Officer or Chair has the discretion to:
   a. allow the parties to make opening statements, closing statements, or both, with reasonable time limits;
   b. allow witnesses to testify by videoconferencing technology;
   c. require that the witnesses who have not yet testified wait somewhere other than the hearing room until they are called to testify; and
   d. schedule separate hearings if charges have been brought against multiple respondents or multiple charges have been brought against a single respondent.
9. The Respondent has the right to be present for the hearing. If the Respondent is a student organization, then one of its officers has the right to be present for the hearing. The hearing is closed to the public.

10. The Conduct Officer has the burden of demonstrating the alleged violation(s) by the greater weight of the evidence. The greater weight of the evidence means evidence sufficient to make the alleged violation(s) more likely true than not true. If the evidence is evenly balanced, or if it weighs in favor of the Respondent, then the Respondent is not responsible for the alleged violation(s).

11. The Conduct Officer will present evidence first, followed by the Respondent. Courtroom rules of evidence do not apply. Evidence may be presented if:
   a. it is relevant to the charges, the University response, or the credibility of the witnesses; and
   b. it is sufficiently reliable that a reasonable person would take it into account in making an important decision. Evidence may be excluded if it merely repeats evidence that has already been presented. The Hearing Officer or Chair will be solely responsible for the determination of the admissibility of evidence.

12. The Respondent’s advisor may not speak on behalf of the Respondent during the hearing and may not directly participate in any aspect of the hearing. The Respondent, however, may consult with the Respondent’s advisor during the hearing. The Hearing Officer or Chair may limit the length and frequency of consultations so that they do not unreasonably delay the hearing or unreasonably interfere with the presentation of evidence.

**Hearing Stages**

1. If the Respondent is present and contests the charge(s), a hearing must be conducted in two (2) stages. At the end of each stage a Conduct Board must go into closed session to deliberate and make its decisions by majority vote. If the Respondent is contesting only the appropriate response, the hearing will move immediately to the second stage.
   a. The first stage is to decide whether the Respondent is responsible for the violation. If the Respondent is a student organization, the Hearing Officer or Conduct Board must also conclude that it is more likely than not that the student organization engaged in, facilitated, or authorized the wrongful conduct, either expressly or impliedly.
      i. If the Hearing Officer or Conduct Board decides that the Respondent is not responsible, the hearing is over.
      b. The second stage is to decide the appropriate response(s). The hearing will move to the second stage only if the Hearing Officer or Conduct Board determines that the Respondent is responsible or if the Respondent admits the charges. The second stage shall be conducted immediately after the Conduct Board decides the Respondent is responsible. Only evidence that is relevant to the issue of the appropriate response(s) may be presented during the second stage.

2. At the conclusion of the hearing, the Conduct Board must go into closed session to deliberate and make its decision. The decision must be made by a majority vote.

3. If the Respondent fails to appear at the hearing, the Hearing Officer or Conduct Board shall proceed with the hearing if the Hearing Officer or a quorum of the hearing panel members are present.

**Notice of Decision**

1. No later than seven (7) University days after the hearing, the Respondent must be notified by letter of the decision(s) and response(s), if any. The letter must inform the Respondent of the right to appeal and include a copy of subsection G. The letter must also inform the Respondent of the name and e-mail address of the person to whom the documents required to appeal must be sent. The person must be the Vice Chancellor responsible for student conduct or their designee.

2. The letter must be sent to the Respondent’s e-mail address of record. If the Respondent is a student organization, then the letter must be sent to one of the officers at the officer’s e-mail address of record and to the organization’s faculty advisor of record, if any, or if the organization is a fraternity or sorority, the person listed as the chapter’s advisor, if any, in the records maintained by the Office of Fraternity & Sorority Life.

3. In the case of a crime of violence, the University shall provide to the victim the final results of any institutional disciplinary proceeding against the alleged perpetrator. Crimes of violence include:
   a. arson;
   b. assault offenses;
   c. burglary;
   d. criminal homicide – manslaughter by negligence;
   e. criminal homicide-murder and nonnegligent manslaughter;
   f. destruction, damage or vandalism of property;
   g. kidnapping; and
   h. robbery.

**Effective Date of Response & Request to Suspend Response**

1. The response to a violation takes effect on the day when the letter of decision is sent. The Respondent may request that the response be suspended while the appeal is pending by e-mailing or hand delivering a letter to the Vice Chancellor responsible for student conduct or their designee no later than five University days after the letter of decision was sent. In the letter, the Respondent should state that they are appealing the decision, explain how the Respondent will be harmed if the response is not suspended, and also explain why suspending the response will not adversely affect the University or other persons. The Respondent should also attach a copy of the letter of decision.

2. The Vice Chancellor or their designee should promptly review the letter and decide whether to grant or deny the request. In making the decision, the Vice Chancellor or their designee should consider whether the harm that the Respondent may suffer if the response is not suspended outweighs the harm that the University and other persons may suffer if the response is suspended. Before making the decision, the Vice Chancellor or their designee may request that the Conduct Officer explain why they believe that the request should be granted or denied.

3. If the request is granted but the Respondent waives their right of appeal, the response will be immediately reinstated. Waiver of the right of appeal is discussed below in subsection H.

**H. Appeals**

1. The Respondent may appeal the decision of the Hearing Officer or University Conduct Board to the Appeals Officer unless the Respondent requests the appeal be heard by an Appeals Board. An appeal by the Respondent is limited to the following grounds:
   a. the evidence presented at the hearing was insufficient to allow a reasonable person to conclude that the charges were more likely true than not;
   b. the response was clearly excessive in light of all the circumstances; or
   c. the Hearing Officer or University Conduct Board failed to follow the procedures and as a result of the failure, there is a substantial likelihood that the decision is wrong.

2. Evidence that was not presented at the hearing may not be considered on appeal. Newly discovered evidence may be grounds for a rehearing. Newly discovered evidence is discussed below in subsection J.

3. In order to appeal, a Respondent must send an e-mail to the person identified in the letter of decision and attach a letter that explains in detail the reasons why the decision should be overturned within ten (10) University days of the date of the letter of decision. A Respondent who does not comply with this section waives the right of appeal.
4. Upon receipt of an appeal the Appeals Officer or Chair of the Appeals Board will correspond with the parties regarding the Respondent’s appeal. The Conduct Officer may send an e-mail to both the Respondent and to the Appeals Officer or Chair and attach a letter that explains in detail the reasons why the decision should or should not be affirmed. The e-mail must be sent by the date specified by the Appeals Officer or Chair in their correspondence.

5. The Appeals Officer or Chair has the discretion to request the Respondent and the Conduct Officer to make an oral presentation. The presentation may be made to the Appeals Officer or the Appeals Board in person, by telephone, or by videoconferencing technology. The Appeals Officer or the Chair should inform the parties beforehand of any time limitations on their presentations and also inform them that the Appeals Officer or any member of the Appeals Board may ask the parties questions during or after their presentations, and that the Respondent’s advisor, if any, may not make a presentation. If there is a presentation, the University will record the presentation and any subsequent questions.

6. The Appeals Officer or Appeals Board must decide the appeal within twenty (20) University days after the receipt of the notice of appeal. Upon notice to the parties, the Appeals Officer or Chair may extend the deadline for the date of the decision letter by up to twenty (20) University days. The decision may affirm the decision being appealed, overturn the decision being appealed and specify that the charges be dismissed or that a new hearing be held, or modify any University response that was clearly excessive. The decision of the Appeals Officer or Appeals Board is final.

7. The Respondent and the Conduct Officer must be notified of the decision by an e-mail sent to the Conduct Officer and the Respondent at their e-mail addresses of record. If the Respondent is a student organization, then the email must be sent to one of the officers of the officer’s e-mail address of record and to the organization’s advisor of record, if any, or if the organization is a fraternity or sorority, the person listed as the chapter’s advisor, if any, in the records maintained by the Office of Fraternity & Sorority Life. The letter must inform the Conduct Officer and Respondent that the decision is final.

I. Effect on Graduation or Transcript Request

The University may withhold a degree or transcript until conduct proceedings (including appeals) have ended. The University should confer the degree or release the transcript after all investigations and proceedings have ended unless the response to the violation affects the student’s eligibility for the degree (for example, the student is expelled or must complete an educational program prior to receiving the degree).

J. New Evidence

1. The Respondent or Conduct Officer may seek a rehearing if the Respondent or Conduct Officer discovers new evidence after the hearing. To obtain a rehearing, the Respondent or Conduct Officer must meet three requirements:
   a. the evidence is in fact new
   b. the evidence could not have been discovered with reasonable diligence before the hearing; and
   c. there is a reasonable basis to believe that the new evidence would have changed the decision(s) and/or response(s).

2. The Respondent or Conduct Officer must explain in a letter to the Vice Chancellor responsible for student conduct or their designee why the three (3) requirements are met. The letter must be emailed to the Vice Chancellor or their designee no later than sixty (60) University days after the letter of decision was sent to the Respondent.

3. If the Vice Chancellor or their designee determines that the requirements have not been met, then the request must be denied.

4. If the Vice Chancellor or their designee determines that the requirements have been met, then a new hearing must be held before a Hearing Officer or Conduct Board. If suspension or expulsion was sought in the original hearing, however, the new hearing must be held before a Conduct Board.

5. The new hearing may be held before the same Hearing Officer or Conduct Board that originally heard the matter or before a different Hearing Officer or Conduct Board. The decision in the new hearing must be based on the recording of the original hearing and the new evidence presented at the new hearing.

6. After the expiration of the sixty-day (60) period, a student who was expelled may seek a rehearing by sending a letter by certified mail to the Vice Chancellor or their designee. In that letter, the student must explain why the three (3) requirements listed above are satisfied and also explain why it would be manifestly unjust not to grant the student a new hearing. The letter must be sent no later than one year after the letter of decision was sent to the student.

7. If the Chancellor or their designee determines that the requirements have not been met, then the request must be denied. The decision of the Chancellor or their designee is final. If the Chancellor determines that the requirements have been satisfied, then a new hearing must be held before a Conduct Board.

SECTION V - Temporary Suspensions

A. Grounds

1. The Vice Chancellor responsible for student conduct or their designee may temporarily suspend a student if there is credible information that the student’s conduct or presence on campus presents a clear threat to the physical safety of individuals, or is so disruptive that temporary suspension is necessary to preserve the rights of other students to pursue an education. A student may be temporarily suspended for the reasons stated in this paragraph even though the student’s conduct may not violate the Student Code of Conduct or Appendix A to the Code (Response to Allegations of Student Sexual Misconduct).

2. In determining whether to suspend a student temporarily, the Vice Chancellor or their designee should consider whether measures other than suspension would be adequate to address the threat to physical safety or the right of individuals to pursue an education. Those measures include, among others:
   a. requiring the student to leave University Housing or to move to a different room or residence hall;
   b. preventing the student from attending class;
   c. limiting the areas on campus in which the student may be present; and
   d. prohibiting the student from having contact with one or more specified individuals.

3. If one or more of those measures would be adequate, then the Vice Chancellor or their designee should require that they be implemented instead of suspending the student temporarily. A student may request at any time to meet with the Vice Chancellor or their designee to contest the implementation or continued implementation of the measures.

4. If a student is temporarily suspended, the Vice Chancellor or their designee must provide the student with a Notice of Temporary Suspension. The notice must be sent to the student’s e-mail address of record and must:
   a. state the factual basis for the student’s temporary suspension and explain why the student’s conduct or presence on campus presents a clear threat, significant risk, or is so disruptive that temporary suspension is necessary; merely reciting the language of the Code is insufficient;
   b. state that the student has a right to a meeting with the Vice Chancellor or their designee within three (3) University days after the temporary suspension becomes effective to present information to show that the requirements for a temporary suspension have not been satisfied and that the temporary suspension should therefore be lifted;
c. state the time, date, and place of the meeting with the Vice Chancellor or their designee and state that the student may be accompanied by an adult advisor of their choosing, including an attorney, but that the student is responsible for any fees that the advisor may charge;

d. state that after the expiration of the three (3)-day period, a student may seek to have the temporary suspension lifted by making a Request for Reinstatement; and

e. include a copy of Section V of the Code.

5. After the expiration of the three (3)-day period, a student who has been temporarily suspended may seek reinstatement by making a Request for Reinstatement ("the Request") on the ground that:

   a. the requirements for a temporary suspension were not met when the student was temporarily suspended and are not currently met, or

   b. circumstances have changed such that the requirements for a temporary suspension are no longer met.

6. The Request must be in writing, state the reasons for request, and include the evidence that supports the Request. The Request must be sent to the Vice Chancellor responsible for student conduct or their designee by e-mail or certified mail or may be hand-delivered to the Vice Chancellor’s office.

7. The Vice Chancellor or their designee must make a decision on the Request as soon as reasonably practicable. Before making a decision, the Vice Chancellor or their designee has the discretion to seek additional information, to ask a Conduct Officer to review and comment on the Request, or to schedule a meeting with the student and their advisor.

8. If the temporary suspension was based on alleged conduct that constitutes a violation of the Code and formal proceedings have not been instituted against a student who has been temporarily suspended, proceedings must be instituted within five (5) University days of the effective date of the temporary suspension. The conduct process must be resolved within twenty (20) University days of the effective date of the temporary suspension. The Vice Chancellor or their designee may extend the time limit for the hearing for up to an additional fifteen (15) University days if the parties agree to an extension or if either party establishes that extraordinary circumstances exist that warrant an extension. The Vice Chancellor or their designee may extend the time limit for the hearing for a longer period if the student consents.

9. The fact that a student was temporarily suspended should not be taken into account by the Hearing Officer or Conduct Board in determining whether the student violated the Code.

**SECTION VI - Miscellaneous Procedural Matters**

A. Inter-Institutional Authority

1. If University students or student organizations engage in conduct that violates the Standards on any University campus or in a course offered by another University campus, the University campuses may enter into an agreement whereby:

   a. the University campuses agree which campus will conduct an investigation in whole or in part, institute formal proceedings, and conduct those proceedings; and

   b. if the proceedings result in the issuance of a University response, which campus will enforce the University response.

B. University Conduct Board Membership and Quorum

1. The Vice Chancellor responsible for student conduct of each University institution will specify the number, qualifications, term, and selection process for members of the University Conduct Board.

2. The Vice Chancellor responsible for student conduct at each University institution must determine whether the institution will have an Appeals Officer, an Appeals Board, or both. If the Vice Chancellor determines that the institution will have an Appeals Board, then the Vice Chancellor for each institution will specify the number, qualifications, term, and selection process for the members of the Board.

3. The Vice Chancellor responsible for student conduct must specify the number of members that a Conduct Board or Appeals Board must have and, if the number is more than three (3), the number that will constitute a quorum.

C. Interpretations of the Code

1. Words in this Code should be given their ordinary meaning unless the context indicates that a different meaning was intended.

2. Any question of interpretation or application of the Code shall be referred to the Vice Chancellor responsible for student conduct or their designee.

D. Amendments

1. The Board of Regents may amend this Code at any time, in whole or in part. There may be times when unexpected issues arise that require prompt action or that involve errors or omissions in the Code. Examples include a change in federal, state, or local law, the adoption of a new Campus or University policy, the repeal of an existing Campus or University policy, the discovery of a drafting error, or the failure to anticipate a particular situation or type of conduct.

2. If an unexpected issue arises, the Code may be amended pursuant to the following procedure:

   a. First, the Provost of the University of Nebraska must approve the amendment.

   b. Second, the General Counsel of the University of Nebraska must approve the amendment.

   c. Third, the amendment must be reported to the Board of Regents at the next regularly scheduled meeting of the Board.

3. The Provost and the General Counsel may approve an amendment only if each of them separately determines that:

   a. the content of the amendment is appropriate and reasonably necessary, and

   b. the subject matter of the amendment either requires prompt action or involves minor changes that correct errors or omissions in a manner consistent with the purpose and scope of the Code. An amendment takes effect when both the Provost and the General Counsel have approved the amendment. The Board has the authority to rescind any such amendment when the amendment is reported to the Board.

E. Effective Date - The provisions of this Code apply to cases in which formal charges are brought after the date on which this Code was approved by the Board of Regents. Amendments to this Code apply to cases in which formal charges are brought after the date that the amendment takes effect.

F. Periodic Review - The University of Nebraska Student Code Conduct will be reviewed at least every four (4) years.

**Discrimination and Sexual Misconduct Policies**

The University of Nebraska does not discriminate based on race, color, ethnicity, national origin, sex, pregnancy, sexual orientation, gender identity, religion, disability, age, genetic information, veteran status, marital status, and/or political affiliation in its education programs or activities, including admissions and employment. The University prohibits any form of retaliation taken against anyone for reporting discrimination, harassment, or retaliation for otherwise engaging in protected activity. The University is committed to ensuring equal opportunity and access for all persons, and providing academic and employment environments free from discrimination, harassment, and retaliation. The University adheres to all applicable federal and state laws regarding nondiscrimination. Full
sexual misconduct. Sexual misconduct, which includes domestic violence, dating violence, sexual harassment, sexual assault, sexual exploitation, and stalking, is unacceptable behavior under University of Nebraska policy and against the law. The University of Nebraska has programs to promote awareness of and to help prevent sexual misconduct, and to assist members of the university community who are affected by such behavior.

University of Nebraska Sexual Misconduct Policy (https://www.unomaha.edu/university-compliance/civil-rights/title-ix-information/)

Resources for support (https://www.unomaha.edu/university-compliance/civil-rights/title-ix-information/resources.php)

All persons are expected to promptly report conduct that may violate the University’s Sexual Misconduct or Nondiscrimination Policy to the University.

Sex based misconduct or discrimination should be reported to:
UNO Title IX Coordinator
Phone: 402.554.2120
Email: equity@unomaha.edu

Other protected class discrimination should be reported to:
Compliance Administrator
Email: compliance@unomaha.edu

Accommodations Statement

The University is committed to providing individuals with disabilities an equal opportunity to participate in and benefit from university programs, activities, and services. Individuals may request reasonable accommodations from the University that they believe will enable them to have such equal opportunity to participate in our programs, activities, and services. Requesting accommodations is an interactive process initiated by the individual making the reasonable accommodations request.

Graduation

As students prepare to graduate from UNO, there are several things they should know. Please review the following information, and be aware of all relevant deadlines for the semester that you intend to graduate.

UNO students have the opportunity to graduate in May, August, or December. Students graduating in May are eligible to participate in the May commencement ceremony, while students graduating in August and December are eligible to participate in the December commencement ceremony. Participation in a commencement ceremony is not required in order to graduate from any degree program or to receive a diploma.

- Students must complete an Application for Degree during the semester in which they plan to graduate.

- Deadlines to apply for graduation are included in the academic calendar (https://www.unomaha.edu/registrar/academic-calendar.php).

- Log into MavLINK and fill out the application for degree on or before the deadline. Information on how to apply can be found on the Registrar’s website (http://www.unomaha.edu/registrar/students/graduation-and-diplomas/graduation-general-information.php).

- There is a $35.00 application for degree fee, payable at the time the application is submitted.

- Please contact the Registrar’s Office at 402.554.2314 with any questions.

Note: If you apply for graduation and will not complete all of the requirements for the degree, please notify the Office of Graduate Studies. You must REAPPLY to graduate in a future term; no additional fee is charged.

- After applying for the degree, students should visit the UNO Bookstore (https://www.unobookstore.com/) as soon as possible to purchase their academic regalia. Please contact the Bookstore at 402.554.2336 with any questions.

- The following requirements must be on file with the Office of Graduate Studies 12 working days prior to commencement (or 12 working days prior to the final day of the summer semester in the case of August graduation):
  - Comprehensive examination results (contact individual departments/schools for procedures to take the exams).
  - All Incomplete (I) and In Progress (IP) grades from previous terms must be completed and the grades submitted to the Office of Graduate Studies.

  - Report on Completion of Degree is to be submitted to the Office of Graduate Studies in person or by email to graduate@unomaha.edu.

For specific deadlines related to filing an application for degree, submitting comprehensive examination results, Incomplete (I) and In Progress (IP) grades from previous terms, and final copies of thesis, thesis-equivalent projects, EdS field projects, and dissertations, view the Graduation Checklist (https://www.unomaha.edu/office-of-graduate-studies/current-students/graduation-checklist.php).

In order to remain eligible for graduation, you must maintain enrollment for all currently enrolled courses that are part of your plan of study. A grade for any current enrollment(s) must be received by the Registrar’s Office no later than the close of business on the 15th working day following the date of commencement (or the final day of the semester in the case of August graduation). Diplomas will be mailed as soon as possible after the 15 working days have passed.

Your graduation file must be in complete order with the exception of grades for current enrollments. Final responsibility rests with you, the graduate student, to check with your advisor and the Office of Graduate Studies to be sure all requirements are met.
Note: If requirements are not complete by the published deadlines, students will be cancelled from graduation and will NOT be allowed to participate in the commencement ceremony.

Please be sure all holds are cleared and that the address listed on the degree application is correct, as this is the address to which diplomas are mailed. Diplomas or official transcripts will not be released for students who have outstanding debts or fees owed to the University. The student is responsible for contacting the Office of Cashiering and Student Accounts to make arrangements to clear their account.

Financing your Education

- Office of Financial Support and Scholarships (p. 1008)
- Federal Financial Aid Policies (p. 1008)
- Graduate Assistantships (p. 1011)

Office of Financial Support and Scholarships

The Office of Financial Support and Scholarships is committed to making higher education accessible by minimizing financial barriers for students so they may realize their educational goals. We strive to provide services of the highest quality to support the academic mission and goals of the university and its students.

For information about the various forms of scholarships, grants, work-study and loans, and how to apply:

Office of Financial Support and Scholarships
103 Eppley Administration Building
Omaha, NE, 68182

Federal Financial Aid Policies

Treatment of Title IV Aid When a Student Withdraws

Return of Funds Policy for Title IV Aid Recipients Who Withdraw

The Higher Education Amendments of 1998, as well as the program integrity regulations in 2010, established provisions which may require a certain percentage of federal financial aid (Title IV funds) to be returned to the Department of Education when a student completely withdraws from all classes. When a student is considered to have withdrawn, the University is required to determine the amount of earned and unearned Title IV aid.

Federal financial aid funds are awarded to a student under the assumption that the student will attend school for the entire period for which the assistance is awarded. When a student withdraws from all courses for any reason – including medical withdrawals – the student may no longer be eligible for the full amount of Title IV funds that they were originally scheduled to receive. If a student has received Title IV financial aid, a refund must be calculated under the Federal Return of Title IV Funds policy. The refunds are based on the number of days attended for the semester, divided by the total number of days in the semester (minus any scheduled breaks of at least five days in length). Funds are deposited back to the financial aid accounts in accordance with federal regulations.

There are three types of withdrawals that fall under the return to Title IV (R2T4) federal calculation regulations:

1. Official Withdrawals - student withdraws from all courses through MavLINK or contacts the Office of the University Registrar to initiate an official withdrawal.
2. Unofficial Withdrawal - If a student began attendance and has not officially withdrawn fails to earn a grade in at least one course offered over an entire period, the institution must assume, for Title IV purposes, that the student has unofficially withdrawn. UNO grading policy requires faculty to differentiate between two different types of failing grades – either an F (earned failing grade awarded to students who complete the course but fail to achieve the course objectives; and an FW grade (awarded to students who did not officially withdraw from the course, but who failed to participate in course activities through the end of the term). For FW grades, faculty report the last date a student last participated in any academically related activity. This date then becomes the basis for the withdrawal calculation. Therefore, a student cannot avoid the federally required return of Title IV Financial Aid by stopping out of classes but remaining enrolled and taking failing marks.
3. Modular Withdrawals - A student does not complete all modules the student was scheduled to attend (modules are classes that do not span an entire semester).

- If a student is enrolled in a standard, term-based program offered in modules and ceases attendance at any point prior to completing the payment period or period of enrollment, unless the school obtains written confirmation from the student at the time of the withdrawal that he or she will attend a module that begins later in the same payment period or period of enrollment, the student is considered a withdrawal for Title IV purposes.

- If written confirmation of future attendance is received from the student but the student does not return as scheduled, the student is considered to have withdrawn from the payment period or period of enrollment and the student’s withdrawal date and the total number of calendar days in the payment period or period of enrollment would be the withdrawal date and total number of calendar days that would have applied if the student had not provided written confirmation of future attendance.

How a Withdraw from Class or School Affects Financial Aid

Though your aid is posted to your account at the start of each period, you earn the funds as you complete the period. If you withdraw during your payment period or period of enrollment, the amount of Title IV program assistance that you have earned up to that point is determined by a specific formula. If you received (or your school or parent received on your behalf) less assistance than the amount that you earned, you may be able to receive those additional funds. If you received more assistance than you earned, the excess funds must be returned by the school and/or you.

How “Earned” Financial Aid is Calculated

The amount of assistance that you have earned is determined on a pro rata basis. This calculation must be completed within 30 days of the date the school determines that the student has withdrawn. The school is required to return any unearned funds within 45 days. The calculation is completed by the Office of Financial Support and Scholarships. For example, if you completed 25% of your payment period or period of enrollment, you earn 25% of the assistance you were originally scheduled to receive. That means that 75% of the disbursement aid is considered to be “unearned” and must be returned to the federal government. The total number of days used in the calculation will exclude any scheduled breaks of 5 or more days.

Once you have completed more than 60% of the payment period or period of enrollment, you earn all the assistance that you were scheduled to receive for that period.

IMPORTANT: You may receive a partial cancellation of your tuition and fees because of your withdraw. UNO’s refund policy is separate from the federal regulations on repayment of unearned aid. It is possible that financial aid
will not cover a student’s balance following the return of funds calculation – even after the tuition and fees cancellation policy has been applied.

What Happens When a Student Fails to Begin Attendance?

Federal regulations require that a procedure be in place to know whether a student has begun attendance in all classes for purposes of the Federal Pell Grant Program. Instructors will be contacted to verify attendance for all Pell Grant recipients if they withdraw from class. The Pell Grant will be recalculated based on the student’s enrollment status to reflect only those classes for which the student actually began attendance. Instructors will also be contacted to verify attendance for Federal Direct Loan recipients if they withdraw from all classes. If a student does not begin attendance in any class in the loan period they will lose eligibility and the Federal Direct Loan will be canceled.

Student Notification of Results of Calculation

Upon completion of the Return of Title IV Funds calculation, students will receive notification indicating the amount of aid that will be returned. UNO will return the required funds on the student’s behalf to the appropriate federal program(s) by charging the student’s account. Students will be able to view the return and any resulting account balance on MavLINK after the return of funds has been processed. The student is responsible for all charges resulting from a Return of Title IV calculation.

Which Funds are Subject to the Return of Funds Calculation?

The Title IV funds that are covered by this law, in order of their required return are:

1. Unsubsidized Direct Loans
2. Subsidized Direct Loans
3. Direct PLUS Loan
4. Federal Pell Grant
5. Federal Supplemental Educational Opportunity Grant (FSEOG)
6. Federal TEACH Grant
7. Federal Iraq Afghanistan Service Grant

Post-Withdrawal Disbursements

If a student has accepted Title IV, HEA financial aid by the date of the withdrawal, but the financial aid has not disbursed, the student may be eligible for a post-withdrawal disbursement. If the amount disbursed to the student is less than the amount the student earned, and for which the student is otherwise eligible, he or she is eligible to receive a post-withdrawal disbursement for the earned aid that was not received.

Under these circumstances, a R2T4 calculation must be performed to determine whether the student is actually eligible for a post-withdrawal disbursement. If your post-withdrawal disbursement includes loan funds, the University must get your permission before it can disburse them. You may choose to decline some or all of the loan funds so that you don’t incur additional debt. The University may automatically use all or a portion of your post-withdrawal disbursement of grant funds for tuition, fees, and room and board charges (as contracted with the school). The University needs your permission to use the post-withdrawal grant disbursement for all other school charges.

Students will be notified of post-withdrawal disbursement eligibility within 30 days of the date of withdrawal determination. The school must return the Title IV funds within 45 days of the date the school determines the student withdrew.

Return of Title IV Funds Procedure

When a student officially, or unofficially withdraws (i.e. quits attending class), during the first 60 percent of the semester, and has received or was eligible to receive federal Title IV funds, the Office of Financial Support and Scholarships is required to perform a Return of Title IV funds calculation. Each semester the Office of Financial Support and Scholarships will review those students who have received, or could have received Title IV assistance, and who have officially withdrawn from all classes.

Additional students who must also be considered are those who have not formally withdrawn, but have stopped attending classes (unofficial withdrawals). UNO grading policy requires faculty to report the last date a student who failed a class participated in any academic activity. Each semester an “All F” report will be run to determine students who have not officially withdrawn, but instead have unofficially withdrawn from all of their classes.

The calculation steps are as follows:

Step One: Establish the withdrawal date and determine how much Title IV aid was earned by the student. The percentage of enrollment period completed by the student is calculated by dividing the number of days a student attended by the total number of days in the semester (percent of aid earned), and then multiplying that percentage by the total amount of Title IV aid disbursed, or could have been disbursed.

Step Two: Determine the Title IV aid to be disbursed to student. If the student received less Title IV aid than earned from step one, a post-withdrawal disbursement may be made. This situation may occur in a case where federal aid was approved, or a loan certified, but not yet disbursed before the student withdrew.

Step Three: Determine the amount of unearned Title IV aid that must be returned by UNO. UNO must return the lesser of the amount of Title IV aid which the student does not earn, or the amount of institutional charges the student incurred for the semester multiplied by the percentage of Title IV aid not earned. Title IV funds that have to be returned by the school will result in a university obligation to the student. The student will receive a bill from the Cashiering and Student Accounts Office.

Step Four: Determine the amount of unearned Title IV aid to be returned by student. Any federal grant and federal loan funds that are calculated to be returned by the student will be returned by the school so a federal overpayment situation does not result and will be included in the amount billed in step three. The balance of any loan not paid by the school will go into repayment in accordance with the terms of the promissory note.

An aid recipient should contact the Office of Financial Support and Scholarships prior to withdrawal from the University. Upon request, the Office of Financial Support and Scholarships will provide written examples of various return of funds calculations.

Below is an example of the Return of Title IV Funds calculation.

<table>
<thead>
<tr>
<th>Title IV Return of Funds</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Institutional Charges</td>
<td>$5,000</td>
</tr>
<tr>
<td>Title IV Loans</td>
<td>$2,000</td>
</tr>
<tr>
<td>Title IV Grants</td>
<td>$1,000</td>
</tr>
<tr>
<td>Total Title IV aid</td>
<td>$3,000</td>
</tr>
</tbody>
</table>

Student withdrew on 29th day of a 116-day enrollment period.

Percent Earned 29/116 = 25%

Percent Unearned 100% - 25% = 75%

Amount of Title IV aid unearned $3,000 x 75% = $2,250

UNO is responsible for returning the lesser of unearned Title IV aid ($2,250 from above) or unearned institutional charges ($5,000 x 75% = $3,750). UNO will return aid as follows:
• Title IV Loans $2,000
• Title IV Grants $250

Aid the student must personally return - student’s aid is returned on his/her behalf by the school and therefore becomes part of the bill that must be repaid to the school. The balance of student’s loan not paid by the school will go into repayment in accordance with the terms of the promissory note.

Standards of Satisfactory Academic Progress

Federal regulations require a student to maintain satisfactory academic progress in the course of study he/she is pursuing in order to receive federal financial assistance. The Satisfactory Academic Progress Policy standards are applied consistently within all institutionally-defined categories of students (undergraduate, master’s and doctoral level students) and enrollment levels (full-time and part-time), regardless of whether the student previously received financial aid.

In order to comply with these regulations, the University of Nebraska at Omaha has established the following Satisfactory Academic Progress (SAP) policy.

Satisfactory Academic Progress Requirements

Satisfactory Academic Progress standards are reviewed annually after the final posting of Spring semester grades and apply to a student’s entire academic record. Students returning to UNO following a withdrawal or dismissal will be evaluated upon receipt of the electronic Student Aid Report. To maintain eligibility, you must meet the following criteria:

1. **Grade Point Average (GPA) Standard** You must be in “good academic standing” at UNO. For undergraduates, this is defined as having an earned UNO cumulative GPA of at least 2.00. For graduate students, this is defined as having an earned UNO cumulative GPA of at least 3.00.

2. **Pace of Progression** You must have successfully completed (“D” grade or higher) at least 67% of the total credit hours which you have attempted at UNO, plus any transfer hours accepted from other schools, upon completion of the Spring semester.

   - Grades of Failing (F); No-Credit (NC); No Report (NR); Unsatisfactory (U); Incomplete (I); IP; AU; and Withdraw (W); are considered unsuccessful completion of credit hours attempted. A grade of Failing (F) is used in calculating grade point averages.

3. **Maximum Time to Degree Completion** Undergraduate student must complete degree requirements within 180 attempted credit hours, master’s degree students must complete degree requirements within 250 credit hours, and doctoral students must complete degree requirements within 275 credit hours. For this requirement, students will be suspended from financial aid eligibility the semester following the semester their attempted hours exceed their limit.

   Attempted hours include both hours attempted at UNO and any transfer hours accepted from other schools you have attended. All credit hours for repeated courses will be included in the attempted hours calculation. Also, if the number of credit hours you still need to graduate, in addition to the number of hours you have already attempted exceeds the maximum attempted hour total above, your aid eligibility will be cancelled.

A course retaken beyond the first retake of a previously passed course cannot be included in the credit hour total when determining the total number of hours for disbursement of aid. “W” grades are not considered in this retake calculation, even though they are considered in the completion rate calculation in #2 above.

Please be aware of how each of the following affect your GPA and Pace of Progression

**Impact of earning an incomplete grade:** An incomplete course counts as credit hours attempted but will not count as credit hours completed/earned until a passing grade has been assigned. An incomplete grade such as a withdrawn course can negatively affect a student’s Pace and financial aid eligibility.

**Impact of withdrawing from a course:** Withdrawing from a course counts as credit hours attempted but will not count as credit hours completed/earned. A withdrawn course can negatively affect a student’s Pace and financial aid eligibility.

**Impact of repeating courses on GPA and Pace of Progression:** Repeating a course counts as attempted credit hours for each time the course is taken. If credit is earned (repeats as well), it will also count as completed/earned credit hours in Pace and Maximum Time to Degree Completion calculations. However, a course retaken beyond the first retake of a previously passed course cannot be included in the credit hour total when determining the total number of hours for disbursement of aid.

**Impact of transfer credits on GPA and Pace of Progression:** only transfer credits accepted by UNO will be counted as both attempted and completed hours.

Reinstatement of Eligibility

Students who do not meet one or more of the SAP standards are no longer eligible to receive federal student aid and will be notified by email. Financial aid programs include, but are not limited to, all federal grants, loans and work-study, state grants, and most University of Nebraska at Omaha need-based grants and scholarships.

If you have incurred circumstances such as a death of a close family member, serious illness or injury to yourself, or other serious extenuating circumstances that you feel have significantly contributed to your academic situation, you may appeal the Grade Point Average Standard or Pace of Progression. Appeals will not be allowed for maximum credit hour issues or multiple retake issues.

**Appeal Procedures:**

1. All appeals are completed via your To-Do List in MavLINK.
2. The appeal must provide a full explanation of why the standards were not originally met, and what changes students have made to ensure all SAP standards will be met in future semesters. Supporting documentation is required and can be uploaded via MavLINK after you submit the appeal.
3. No more than three appeals will be allowed per student for his/her entire academic career at UNO.
4. Appeals and supporting documentation must be submitted by the following deadlines: Fall semester by October 1st, Spring semester by March 1st, and Summer semester by July 1st.

**Possible Appeal Outcomes:**

1. **Appeal Denied:** If your appeal is denied, you will receive an email notification as to what steps you can take, if any, to regain aid eligibility.
2. **SAP Probation:** Financial aid eligibility is reinstated for one semester only, with the expectation that all SAP standards will be met after that semester. Upon review, if all SAP standards are not met in this timeframe, students will then become ineligible for aid.
3. **SAP Academic Plan:** In cases where an appeal is approved, but it is not possible to meet all SAP standards in one semester, you will be prescribed an individualized academic plan. You will remain aid eligible as long as you continue to meet the plan requirements. If you cease to
meet the plan criteria before you meet the minimum SAP standards, you will become ineligible for aid.

ALL APPEAL DETERMINATIONS BY THE OFFICE OF FINANCIAL SUPPORT & SCHOLARSHIPS ARE FINAL.

Veteran Standards of Progress Policy
A veteran and/or eligible person must make satisfactory progress toward an approved educational objective. Standard of Progress will be determined utilizing the Satisfactory Academic Progress policy as listed in the college catalog consisting of overall grade point average, pace, program length, maximum time for completion, attendance and/or conduct.

Veterans Benefits and Transition Act of 2018 Policy for Veteran Students
Utilizing VA GI Bill® Education Benefits
Consistent with the Veterans Benefits and Transition Act of 2018, Section 3679 of title 38, United States Code, Section 103, University of Nebraska at Omaha will not impose any penalties due to the delayed disbursement of a payment by the U.S. Department of Veteran Affairs on recipients of Chapter 31 and Chapter 33 VA Benefits. University of Nebraska at Omaha will permit any covered individual to attend or participate in the course of education during the period beginning on the date on which the individual provides University of Nebraska at Omaha a certificate of eligibility for entitlement to educational assistance under chapter 31 or 33, and ending on the earlier of the following dates: 1) The date on which payment from the VA is made to the institution or 2) 90 days after the date the institution certified tuition and fees following the receipt of the COE (Certificate of Eligibility).

Additionally, University of Nebraska at Omaha will not require that a covered individual borrow additional funds, on any covered individual because of the individual’s inability to meet his or her financial obligations to University of Nebraska at Omaha due to the delayed disbursement of funding from the Department of Veteran Affairs under chapter 31 or 33. A Covered Individual is any individual who is entitled to educational assistance under chapter 31, Vocational Rehabilitation, or chapter 33, Post 9/11 GI Bill® benefits, and has been verified by the school certifying official as benefit eligible. This requirement is limited to the portion of funds paid by VA.

“GI Bill®” is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill.

Graduate Assistantships
Academic Standards
A graduate assistantship is intended to award students who have demonstrated high academic performance and potential either at the graduate or undergraduate level. As a graduate assistant you will be considered a UNO employee with a tuition waiver, monthly salary, and subsidized health insurance.

• Graduate assistants must be students in good standing in a degree or certificate program in the UNO Graduate College.

• Dismissal from a graduate program for any reason shall result in simultaneous dismissal from any graduate assistantship position. The student will not be eligible for an assistantship thereafter until fully reinstated in a graduate degree or certificate program.

Apply, Recruitment, Selection, and Renewal of Graduate Assistants

• Each graduate department/school or other unit, as appropriate, shall establish its own procedure for graduate assistantship recruitment and selection in accordance with university policy on affirmative action/ equal opportunity. Graduate Assistantship positions are subject to a background check.

• Assistantships are not automatically renewable and are dependent upon assessment of work and classroom performance. The student is reminded that, whether or not outside work commitments are involved, graduate assistantships may not be renewed if either graduate class work or assistantship duties are not carried out in a satisfactory manner.

Workload

• The workload for a graduate assistant should average 20 hours per week for the duration of the appointment and shall be construed to be the equivalent of .33 FTE.

• The department/school or unit in which the graduate assistant is employed should make arrangements with its assistants regarding vacation periods.

• The graduate faculty considers a student who is pursuing graduate study and holding a graduate assistantship to be carrying the equivalent of a full-time workload (see course load below) and, therefore, discourages the practice of holding additional jobs which may interfere with satisfactory performance of assigned duties.

Course Load

• Graduate assistants are expected to carry a minimum of six graduate hours in each of the fall and spring semesters; graduate assistants working in the summer semester are not required to be concurrently enrolled.

• Graduate assistants may not register for more than 12 semester hours without the approval of both their supervisor and the dean for Graduate Studies. The graduate assistantship will not pay for more than 12 semester hours in a semester.

• The six-hour minimum may be waived if the student is in the last semester of graduate work and needs less than six hours of graduate credit in order to complete requirements for graduation. For doctoral candidates, the six-hour minimum enrollment also may be waived with the approval of their supervisor and dean for Graduate Studies, if all required course hours except the dissertation have been completed. In either case, students still must register for one course.

Duties
Duties assigned to graduate assistants should be directly related to and in support of graduate studies in their chosen field of study. Typical examples would be one or more of the following:

1. Teaching courses or discussion sections at the undergraduate level.
2. Instructing and supervising undergraduate-level laboratories or tutorial sections.
3. Grading or otherwise evaluating performance of undergraduate students.
4. Collecting and/or processing research data for faculty members.
5. Preparing materials for laboratories or classroom presentations.

In general, other duties which involve direct knowledge and application of knowledge related to the student’s field of study would be acceptable. Graduate assistants should not be utilized solely for clerical duties.
It shall be the responsibility of each graduate program committee, in consultation with the cognizant department chairperson or program director, to draw up an agreement with each graduate assistant at the time of the appointment which shall specify the stipend, duration and method of payment, the assistant’s duties, and the general conditions of employment. The agreement shall be reviewed by the graduate assistant before it is signed by him/her and the chairperson of the graduate program committee. The graduate program committee, upon the recommendation of the graduate assistant’s faculty supervisor and/or the department chairperson/school director or unit director, shall have the responsibility to review the assistant’s performance and to terminate the appointment for failure to discharge satisfactorily the duties specified in the agreement.

Lengths of Appointments
Assistantships may be awarded on an academic, calendar-year or semester-by-semester basis.

Graduate Assistantship Frequently Asked Questions

What is a graduate assistantship?
A graduate assistantship is based on academic and/or professional excellence. Recipients receive tuition remission, a monthly salary, and subsidized health insurance to work approximately 20 hours per week on assigned professional responsibilities. Graduate assistants are assigned responsibilities that provide supervised educational experiences at the graduate level.

How do I apply for an assistantship?
Contact the department/school/office you are interested in for any available positions and their application procedures. Also, check with Maverick Student Employment (https://www.unomaha.edu/maverick-student-employment/), they may have a list of the current open assistantships. One must be admitted to a graduate degree or certificate program to be a graduate assistant; non-degree & unclassified students are ineligible. Graduate Assistants must be in good standing in a degree or certificate program to receive or continue with an assistantship.

What do I receive monetary compensation for and when do I get paid?
Graduate Assistants typically work 20 hours per week. On the last working day of the month, your paycheck will be electronically deposited directly into your bank.

How many graduate hours do I need to take during the fall and spring semesters?
Graduate Assistants are required to carry a minimum of six (6) graduate hours in the fall and spring semesters (please note that undergraduate deficiencies do not count toward this minimum requirement). You must be aware that nine (9) graduate hours is a full-time course load for graduate students.

The minimum of six (6) graduate credit hours may be waived if you are in your last semester & need less than six (6) graduate credit hours to complete the requirements for graduation. The Office of Graduate Studies will review your plan of study and contact you to complete the “Student Social Security Tax Exemption Statement–Certification of Full–Time Graduate Status.”

What is the maximum number of graduate hours I can take each semester?
Your Assistantship will pay for a maximum of twelve (12) graduate credit hours a semester.

Can I register for an undergraduate course and have the tuition paid?
Yes, if the undergraduate course is required to fulfill a deficiency that is listed on your original plan of study. This can be accessed in MavLINK (https://mavlink.nebraska.edu/psp/mavlink/NBO/HRMS/?cmd=login) under the DegreeWorks link AND you are also enrolled in a minimum of six graduate credit hours.

If the undergraduate course is not listed as a deficiency on your original plan of study, your assistantship will not pay for the tuition.

How many graduate hours does a graduate assistant have to take in the summer?
None. * You are allowed to take a maximum of twelve (12) graduate hours.

Will my assistantship pay the tuition for graduate courses in the summer?
Yes, if you were a Graduate Assistant for the preceding fall and spring semesters or are working as a graduate assistant during the summer.

If you were a Graduate Assistant for the spring semester only and will be one in the upcoming fall, you will be eligible for reimbursement for your summer graduate courses. Please consult with the Office of Graduate Studies.

How do I pay for classes?
Once the necessary paperwork has been submitted to the Office of Graduate Studies by your department/school/office, Cashiering/Student Accounts will be notified of your assistantship. Your account will then be credited for the classes which are covered by your assistantship. Please be sure you pay the fees and any other charges not covered by your assistantship.

Will my assistantship pay for graduate courses taken at the other three University of Nebraska campuses (UNL, UNK and UNMC)?
Yes, if the courses are required in your plan of study, a tuition voucher will be completed by the Office of Graduate Studies at the time of verifying enrollment. You will need to complete the online Inter-campus Registration Form (https://csprdnu.nebraska.edu/psc/csprdnu/NBX/SA/s/WEBLIB_PTBR.ISCRIPT1.FieldFormula.IScript_StartPage?ghcmd=saml).

What happens if I resign my assistantship?
The Office of Graduate Studies will send you a prorated bill for both tuition and subsidized health insurance (if applicable) from the date you resigned your assistantship. You will be placed on stop enrollment until the bill is paid.

What happens if I don’t start my assistantship at the beginning of the semester?
Assistantships may be awarded on an academic-year basis, a calendar-year basis, or semester-by-semester basis. Normally these appointments start at the beginning of a semester. The department/school/office should contact the Office of Graduate Studies for prior approval if the assistantship is not starting at the beginning of a semester. If the late hiring is approved, the Office of Graduate Studies will send you a prorated bill for the graduate courses you are enrolled in; beginning with the date you started your assistantship.
May I hold another job (additional employment) in addition to my Assistantship?
The Graduate Faculty considers a student who is pursuing graduate study
and holding a Graduate Assistantship to be carrying the equivalent of
a full-time workload and therefore, discourages the practice of holding
additional jobs which may interfere with satisfactory performance of
assigned duties. With the approval of your graduate program committee
and the Office of Graduate Studies, an additional assignment may be
accepted if professionally relevant and if your total FTE does not exceed .49.

What if I become sick and miss work or take a vacation?
Graduate Assistants do not earn sick or vacation hours, please consult with
your department/school/office concerning their policies.

Do graduate assistants work when offices are open, but the university is closed for classes?
As a graduate assistant averages 20 hours per week, they are treated like
cracy depending on their assignment you may be expected to work, and
this must specifically be stated in their workload agreement (GA contract
letter) and discussed well in advance. You should check with your GA
supervisor regarding their policy.

How long may I hold a graduate assistantship?
Assistantships may be awarded on an academic-year basis, a calendar-year
basis, or semester by semester basis.

Students working towards a master’s degree may not hold an assistantship
for more than four (4) semesters: Educational Specialist students are
limited to four (4) semesters beyond their master’s degree; doctoral
students are limited to six (6) semesters beyond their master’s degree. These
appointments exclude summer sessions. An assistantship may be extended
on an individual basis upon the recommendation of the Graduate Program
Committee of the department and the approval of the Dean for Graduate
Studies.

Tuition and Fees

- Tuition and Fees (p. 1013)
- Residency for Tuition Purposes (p. 1014)

Tuition and Fees

Tuition, Fees, Refunds, and Deposits Deadlines
Tuition and fees for the fall and spring semesters are payable in full
on Sept. 23 (fall semester) and Feb. 23 (spring semester). Please see
the schedule below for approximate billing dates and due dates. Each
time a student fails to meet a payment due date, a Late Payment Fee
(https://www.unomaha.edu/accounting-services/cashiering-and-student-accounts/tuition-fees-and-refunds/late-payment-fees.php) will
be assessed to the tuition account. Note: Failure to receive the billing
notice will not excuse the student from payment responsibility, nor the late
payment penalties. Students may review their tuition and fees account
using MavLINK or on Cashiering and Student Accounts website (http://
cashiering.unomaha.edu/).

UNO accepts major credit cards for payment of tuition and fees online
only. Credit card payments may be made via MavLINK and are subject to a
2.75% convenience fee on domestic credit cards and 4.25% on international
credit cards. Payments by check, cashier’s check, or money order may
be mailed to the Cashiering and Student Accounts Office, 109 Eppley
Administration Building, 6001 Dodge Street, Omaha, NE 68182. When
mailing, please use the remittance form on the tuition and fees statement.
Payments of cash, check, money order, or cashier’s check may also be
brought to the Cashiering and Student Accounts Office during regular
business hours or deposited in the after-hours drop box located outside of
the office.

Fall Semester
- For students who register March through the first week of the semester:
  Bill Date: end of August
  Tuition Due: Sept. 23

Spring Semester
- For students who register November through the first week of the semester:
  Bill Date: end of January
  Tuition Due: Feb. 23

Summer Sessions
Students will be billed at the end of each month through July for their
summer registrations. Tuition and fees will be due and payable in full by the
23rd of each month.

Students who fail to pay tuition and fees by the due date will be assessed a
Late Payment Fee.

Failure to make payment on an account will prohibit registration for
future semesters. If an account remains unpaid, it may be forwarded to a
collection agency.

Students waiting until after the initial due date for payment of tuition and
fees to register or add courses will be required to pay the late registration
fee and the late payment fees retroactively.

Failure to pay tuition or fees when due, or to meet payments on loans when
due, may result in cancellation of registration, legal action, collection efforts
and withholding of transcripts. Outstanding financial obligations from
previous semesters must be paid prior to registration. Failure to do so will
prohibit registration for future semesters.

The university reserves the right to change the amount of tuition or fees at
any time and to assess charges for laboratory/special instructional fees,
breakage, lost property, fines, penalties, parking, books, supplies, food or
special services not listed in this schedule.

Application Fee
The application fee is payable at the time the application for admission form
is filed. This fee is non-refundable and does not apply toward tuition or any
other fee. Residency for the purpose of assessing tuition is determined by
the status of the applicant at the time the application for admission is filed.
The undergraduate application fee is not applicable toward the graduate
application fee and vice versa.

Undergraduate Application Fee
Application Fee

Graduate Application Fee (Graduate College)
Application Fee

Tuition
Tuition rates are established by the Board of Regents. Tuition is subject to
change. Tuition charges are assessed per credit hour.
Audit Fees
The audit fee is set at one-half of the resident undergraduate or graduate tuition rate. The audit tuition rate is effective only during the first week of the semester. In addition, students registering for audit must pay all student fees. Registration for audit requires the permission of the instructor and is subject to available class space after credit registration ends. Students who register to take a course for credit and who later change to audit registration will be required to pay the full resident or non-resident tuition rate. Audit fees are refundable in accordance with the Tuition Refund Schedule.

University and Student Fees
Fees rates listed are for the 2023-2024 academic year and are subject to change.

On- or Off-Campus Fees (https://www.unomaha.edu/accounting-services/cashiering-and-student-accounts/ tuition-fees-and-refunds/tuition-rates.php#fees)

Refund Schedule
Students who drop one or more courses or who completely withdraw will be obligated to the university for that portion of tuition cost based on the refund schedule. Students who completely withdraw are obligated to pay the non-refundable portion of tuition and fees for the course(s) from which they are withdrawing. Refunds are computed from the date application is received by the Registrar, not from the date of withdrawal of classes.

Failure to make payment will prohibit registration for future semesters and the release of academic transcripts. If an account remains unpaid, it may be forwarded to a collection agency.

Regular Semester
Before the first official day of the semester, 100 percent refunded.
First week of classes, 100 percent refunded.
Second week of classes, 75 percent refunded.
Third week of classes, 50 percent refunded.
Fourth week of classes, 25 percent refunded.
Fifth week of classes, 0 percent refunded.

Summer Sessions (5 and 6 weeks)
Before first official day of semester, 100 percent refunded.
First three days of classes, 100 percent refunded.
Remainder of first week, 50 percent refunded.
Second week of classes, 25 percent refunded.
Third week of classes, 0 percent refunded.

Summer Evening and Special Contracts (7 and 8 weeks)
Before first official day of semester, 100 percent refunded.
First three days of classes, 100 percent refunded.
Remainder of first week, 75 percent refunded.
Second week of classes, 50 percent refunded.
Third week of classes, 25 percent refunded.
Fourth week of classes, 0 percent refunded.

Courses that run less than ten weeks have unique refund schedules. Students considering withdrawal from such a course should check with the Office of the University Registrar for the applicable refund schedule.

Special Service Fees
Graduation Fee $35.00
Late Application for Degree $70.00

Residency for Tuition Purposes
Regulations for Determination of Residency for Tuition Purposes
Residency requirements are subject to change by the Board of Regents and/or the Nebraska State Legislature.

Preamble
Pursuant to Article VII, Section 10 of the Constitution of the State of Nebraska, and Neb. Rev. Stat., 85-501 and 85-502, the University has been...
authorized to develop regulations and make determinations regarding Nebraska residency for tuition purposes. These regulations provide the bases upon which university staff shall determine, on a uniform intercampus basis, whether an individual qualifies as a Nebraska resident for tuition purposes.

It should be emphasized that the statutes provide a set of minimum standards which will govern a determination of resident status for tuition purposes only. In some instances, it will be possible that an individual may qualify as a “resident” of Nebraska for one purpose (such as securing a Nebraska driver’s license) and still not meet the standards established by the Board of Regents for resident tuition status. Individuals seeking a Nebraska residency determination for tuition purposes should, therefore, carefully study all aspects of the law and these regulations before seeking resident tuition status.

Applying for Residence Classification for Tuition Purposes

The statutes of Nebraska provide that all state educational institutions shall charge nonresident tuition for each nonresident of Nebraska who matriculates at any state institution. Nonresident status is determined in accordance with these statutes and current institutional policies, and is based upon evidence provided in the application for admission and related documents. Additional written documents, affidavits, verification, or other evidence may be required as deemed necessary to establish the status of any applicant. The burden of establishing exemption from nonresident tuition is the responsibility of the student. Erroneous classification as a resident or willful evasion of nonresident tuition may result in disciplinary action as well as payment of required tuition for each semester attended.

Individuals seeking to establish resident status for tuition purposes will be required to have established a home in Nebraska for at least 12 months unless it is not required by the specific category listed on the residency application form. However, any individual who has moved to Nebraska primarily to enroll in a post-secondary institution in Nebraska will be considered a nonresident for tuition purposes for the duration of their attendance. Enrolling more than halftime for any term at a university, college, or community college in Nebraska during the 12 months immediately preceding the term or semester for which residence status is sought, will be considered as strong evidence that an individual moved to Nebraska primarily to enroll in a post-secondary institution in Nebraska. Students who have been classified as a nonresident and feel they qualify for resident status should review the "Application for Residence Classification for Tuition Purposes" (https://csprdnu.nebraska.edu/psc/csprdnu/NBX/HRMS/s/WEBLIB_ENTREDDIR.ISCRIPT1.FieldFormula.Iscript_Redirect/?nba-product=EF&cref=NBA_NVC_DS_FORM_RESAPP). A student should submit both the application and supporting documentation by the deadline noted within the application.

Nebraska State Income Tax Credit

Individuals who do not qualify for resident tuition status and/or reside outside of Nebraska but pay Nebraska income tax, and the spouses or dependents of such individuals, are entitled to tuition credit upon documented evidence of such payment to the State. The tuition credit granted shall equal up to the amount of Nebraska income tax paid for the immediately preceding calendar year except that the remaining obligation cannot be less than the amount of the resident tuition.

Applications for the Non-Resident Nebraska Income Tax Tuition Credit are available at UNO’s Cashiering and Student Accounts Office, 109 Eppley Administration Building, 402.554.2324. Additionally, the form can be downloaded from the Cashiering and Student Accounts website (https://www.unomaha.edu/accounting-services/cashiering-and-student-accounts/tax-information/). Specific qualifications and guidelines regarding the tax credit are provided on the applications.

Midwest Student Exchange Program

The University of Nebraska at Omaha (UNO) participates in the Midwest Student Exchange Program (MSEP), an interstate initiative established by the Midwestern Higher Education Compact (https://www.mhec.org/) to increase educational opportunities for students in its member states. This program serves residents from Indiana and Ohio.

Graduate students: The MSEP program enables residents from these states to enroll at reduced tuition rates. Students may review eligibility requirements/guidelines and complete the MSEP Agreement Form. (https://www.unomaha.edu/graduate-studies/financing-your-degree/midwest-student-exchange-program.php)

Undergraduate students: Those who are academically qualified are awarded scholarships to help offset the costs of out-of-state tuition. For more information visit the UNO Advantage Scholarship (https://www.unomaha.edu/admissions/financial-support-and-scholarships/types-of-aid/scholarships/uno.php?advantage).

Omaha Urban Rate (OUR) Tuition

Effective Fall 2023, the University of Nebraska at Omaha (UNO) is offering high school graduates (undergraduate applicants) or current residents (graduate and undergraduate applicants) of 11 states the opportunity to attend UNO at significantly reduced tuition rates through an initiative called Omaha Urban Rate (OUR) Tuition. OUR Tuition states include: Colorado, Illinois, Iowa, Kansas, Minnesota, Missouri, Montana, North Dakota, South Dakota, Wisconsin, and Wyoming.

Please visit the website (https://www.unomaha.edu/accounting-services/cashiering-and-student-accounts/tuition-fees-and-refunds/omaha-urban-rate-our-tuition.php) for more information.

Community Engagement Opportunities

As a UNO student, community engagement activities provide you with diverse ways to achieve your education while building your resume and networking in the community. Here’s some examples:

- Taking a class that brings you out into the community to complete your coursework (service learning or community-based learning)
- Volunteering and Civic Engagement
- Capstone projects/research involving a community organization
Service Learning Academy

Service learning is an experiential, collaborative method of teaching that incorporates community projects that promote academic learning. These projects are directly linked to academic curriculum and meet community-identified needs while engaging students in their community and provide real-world context to coursework. As such, service learning course "classrooms" often exist in the community and engage community partners (such as nonprofit organizations, business, governmental agencies, and P-12 schools) as co-teachers. Throughout the course students reflect on their experiences, consider the relationship to their reading and research, relevance to community growth, and impact on their personal values, development, and professional skills.

Every semester, there are a variety of courses in all UNO colleges that use service learning as a method of instruction. By choosing a service learning course, students can:

- Apply textbook knowledge to the real world and engage with homework
- Use and develop strengths
- Discover new skills & talents
- Explore their leadership style
- Learn to communicate with others and work in teams
- Sharpen skills that employers want such as problem solving, critical thinking, innovation, and creativity
- Explore the assets in the community
- Build their résumé

To search for service learning courses, choose service learning under the Program tab in the class search function.

To explore service learning course options and project examples, please visit sla.unomaha.edu.

Volunteer and Civic Engagement Programs

Volunteer Opportunities for Students

Each year, UNO organizes and sponsors annual Signature Service Days and volunteer events that students can participate in. As student volunteers, you engage in service projects that focus on some of the most important issue areas facing the community. These opportunities help you gain valuable skills and connections that you can utilize in different ways (i.e., interviewing, references, and more).

Here’s a list of annual Signature Service Days and events:

- MLK Jr. Day of Service
- Seven Days of Service
- Earth Day of Service
- International AIDS Day of Service
- 60 Minutes of Service

You can learn more about volunteer opportunities and events at serve.unomaha.edu.

Civic Engagement Opportunities

Civic Engagement allows students to address the social and cultural issues within our society. There are many ways for students to be civically engaged and UNO has a long history of being a top university in the nation in getting students registered to vote and participating in the process. Beyond this, students have opportunities to have meaningful dialogue with their peers and public officials on what it means to advocate, how government operates, and opportunities to engage in civic learning such as the annual "I Love NU Day" at the Nebraska state capitol. Civic Engagement opportunities for students bring life to why we serve and help students to gain valuable experience and skills in communication, collaboration, and how to be change agents while at UNO and beyond. Some examples of formula; ways to be civically engaged are:

- Taking advantage of Americorps VISTA opportunities
- Participating in domestic/international service and humanitarian efforts by serving in the Peace Corps

Community Engaged Scholarship Transcript Designation (CESTD)

The CESTD is a transcript designation that documents and recognizes undergraduate students for their community engagement experiences. This designation offers incentive and competitive edge for students who choose to tailor their involvement and academic work in a way that capitalizes on UNO’s comparative advantage.

- Completion of 1 community based-learning experience (3 credit hours)
- Completion of 6 hours of service-learning coursework
- Completion of 135 volunteer/community service hours (outside of the classroom)
- Completion of written reflection piece (one for each category along with a final reflection).
- Minimum 3.0 Cumulative GPA at graduation

Enroll Online

Barbara Weitz Community Engagement Center (CEC)

As a metropolitan university, UNO encourages its students to be active and civically engaged members and leaders in a diverse and evolving society. The CEC is a unique place where UNO students can access volunteer opportunities, service events, service learning inquiries, service learning projects and events, student jobs and internships, and community engagement-based events. The CEC is home to over 35 university and community building partner organizations that work side by side in flexible office spaces to improve the quality of life for those they serve.

Institutional Effectiveness & Student Support

The services provided by the Division of Institutional Effectiveness and Student Success are designed to promote the growth and development of the whole student – intellectually, physically, emotionally, socially, financially, environmentally, occupationally and spiritually – to allow students to develop skills that lead to success both during school and throughout life. An integrated, holistic approach to inclusion, civic and social responsibility, wellness, achievement, and involvement programs link students to both curricular and co-curricular learning by providing support, activities, and engagement that enriches the student experience on campus.
New Student and Family Programs (NSFP)

New Student and Family Programs helps you and your family transition to UNO. Learn more on the New Student and Family Programs website (https://www.unomaha.edu/student-life/achievement/new-student-and-family-programs/). NSFP is primarily responsible for Campus Visits, Recruitment Events, New Student Orientation (https://www.unomaha.edu/student-life/achievement/new-student-and-family-programs/orientation/) and Family Orientation.

Ambassadors

Our Ambassadors serve as guides for your transition experience. They are university students committed to helping first-year and transfer students by sharing all of the need-to-know information about policies and procedures, student services, academic support programs, and opportunities for involvement. The goal of our Ambassadors is to ensure that you know all about the university and to inspire you to make the most of your college experience.

Maverick Advising Center (the MAC)

The Maverick Advising Center (MAC) supports students in Exploratory Studies for up to 45 credit hours. The MAC prepares students to choose an academic major with confidence and guides them to stay on track for graduation. Students work with their advisors to strive for academic success by:

• Determining personal, career, and academic goals
• Exploring majors and courses of interest through Academic Focus Areas (https://www.unomaha.edu/academics/academic-focus-areas/)
• Working to find a balance between education, work, and family

Career Services

Career Services empowers students to explore, develop, and succeed at UNO and beyond. We prepare students for meaningful work by building bridges with campus, community, and employers. We offer career exploration advising, career readiness resources, job and internship preparation, career fair and hiring events, experiential education opportunities, and more. Students can explore internship and job opportunities using Handshake (https://www.unomaha.edu/student-life/achievement/academic-and-career-development-center/career-development/handshake.php), UNO’s official career platform.

The Student Service and Leadership Collaborative

The Student Service and Leadership Collaborative is dedicated to developing students into servant leaders who are self and culturally aware through nonprofit internships, experiential learning and local and national professional student leadership and development symposiums. UNO believes service and engagement are vital components for the educational development of all students in becoming global influencers of change. Learn more on the Student Service and Leadership Collaborative (https://www.unomaha.edu/student-service-and-leadership-collaborative/)

Maverick Student Employment

Maverick Student Employment (https://www.unomaha.edu/maverick-student-employment/) at the University of Nebraska at Omaha (UNO) represents all on-campus positions and is a great option for students interested in flexible scheduling, building campus connections, learning new professional skills, and more that will help with career readiness.

Student employees make up a large percentage of our workforce in the UNO community. Our students are engaged in the critical work that helps keep our colleges, divisions, and departments operating. It is in acknowledgment of this, that Maverick Student Employment provides an enriching experience for students to keep our university strong and focused on student success. Using Handshake (https://www.unomaha.edu/student-life/achievement/academic-and-career-development-center/career-development/handshake.php), UNO’s official career platform, students can review and apply for on-campus jobs.

Testing Center

The University of Nebraska at Omaha (UNO) Testing Center provides a variety of services to UNO students, faculty and staff. These services extend into the metropolitan Omaha region and beyond to persons needing testing related assistance. The types of services include university placement exams, university make-up exams, certification/licensure exams, online distance education exams, admission exams, proficiency exams, national exams, credit by examination, proctored correspondence exams and testing accommodations for students with disabilities. The Testing Center will also consider special requests associated with individual needs. For more information regarding testing services, please contact:

The University of Nebraska at Omaha
Testing Center
522 Kaysor Hall
Omaha, NE 68182-0318
402.554.4800
testingcenter.unomaha.edu (http://testingcenter.unomaha.edu/)

Placement Exams

Placement exams may need to be taken prior to registering for an English, mathematics, chemistry, or foreign language course. Placement exams help ensure that a student enrolls in the correct courses based on their academic skill level. Additional information for placement exams can be found here (https://www.unomaha.edu/enrollment-management/testing-center/information.php).

Accommodated Testing

UNO supports students with disabilities and encourages their full participation in all academic programs. The Testing Center is available to UNO students with a disabilities who require testing accommodations that are approved as part of their UNO Accessibility Services Center Accommodation Plan. The Testing Center works with the Accessibility Services Center to provide a secure, quiet, and controlled environment for accommodated testing exams.

Advanced scheduling is necessary for testing accommodations which are determined by referral from the Accessibility Services Center director. Available accommodations include, but are not limited to:

• A separate room
• Reduced distraction space
• Reader
• Scribe
• Word processor
• Large print
• Extended time
• Job Access With Speech (JAWS)

In accordance with Section II of the Americans Disabilities Act and Section 504 of the Rehabilitation Act, UNO’s Accessibility Services Center is the designated office to work with students with disabilities to identify and set up a plan to provide reasonable accommodation so they may enjoy the same benefits, experiences, and opportunities as persons without disabilities. The Testing Center is the designated office on campus to provide any identified student accommodations that involve testing. For
Credit by Examination at UNO

Credit by Examination allows students the opportunity to gain academic credit for prior learning they have acquired by self-study or experience. Tests may be taken in many subject areas and credit may be earned by achieving acceptable scores on these tests. Benefits include saving tuition dollars and shortening the time it takes to earn a degree.

Two types of examinations may be taken for credit at UNO: The College-Level Examination Program (CLEP) and UNO’s Special Examination Program – Challenge Exams.

Many postsecondary institutions now offer credit based on CLEP examinations annually. The CLEP exams include General Examinations and Subject Examinations. Both are designed to measure factual knowledge and understanding, problem-solving ability, and mastery of college-level, introductory course content in a wide range of disciplines.

UNO’s Special Examination procedure involves “challenging” one of the courses taught at this university by attempting a Departmental Examination. These examinations are constructed by the department for the purpose of measuring knowledge in a particular course being offered at UNO. Credit is granted for the course upon successful completion of the examination.

- An examination may not be attempted more than once.
- A student who has failed to earn credit in an attempted college course may not receive Credit by Examination in the same course. Neither will credit be granted to raise a grade earned in any course.
- A maximum of 30 hours Credit by Examination (the College of Business has a limit of 24 hours) may be applied toward graduation, e.g., CLEP, by Challenge, etc.
- Credits earned by examination may not be used as part of the terminal residency requirements, so you should check the requirements of your college.
- Students taking Departmental Examinations must be registered at UNO at the time they attempt the exam. (Registration is not required to take CLEP exams.) You must be a UNO student to have the credit applied to UNO.
- Students attempting Credit by Examination in courses in which they are currently enrolled must do so before they have completed one month of the course.
- Credit by examination will not be given for courses that are prerequisites for courses that the student has already earned credit. For exceptions, check with the department.
- Credit earned on a General Examination will be reduced by the amount of comparable credit already earned in the division.

The fee for each CLEP exam is $90.00. This is paid online directly to CLEP. A ticket containing the exam name and ticket number is printed after completing the online transaction and brought to the Testing Center (required) on exam day. (You must pay separately for each exam you take). There is also a $25.00 fee for administering the exam paid to the UNO Testing Center on exam day prior to taking the exam. Visit clep.collegeboard.org (https://clep.collegeboard.org/) to see the CLEP informational bulletin for more details and Military Benefits. There is a $40.00 fee for each Departmental Exam (Challenge Exam) paid to the UNO Testing Center. (Fees are subject to change.)

Credit earned by examination will be recorded as “CR” on the transcript, and this credit will not be used in calculating grade point average.

If you need additional information or have any questions, feel free to stop by (522 KH) or call the Testing Center at 402.554.4800. Questions regarding Departmental Challenge Examinations other than those noted should be directed to the appropriate department.

DE (Online Distance Education) Exams

Online Distance Education (DE) Exams are proctored for faculty who have made arrangements for this service with the Testing Center. A student enrolled in a DE course that has an exam to be taken at the Testing Center will need to register (https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/how-to-register.php) for their testing appointments via MavLINK (http://mavlink.unomaha.edu/).

Note: A student should check-in on the day, prior to the exam time they scheduled, when they registered in MavLINK. You will not be able to take the Exam if you check-in outside the date/time window established by your professor.

The UNO Testing Center administers Online Distance Education (DE) Exams Monday–Friday in the Testing Center, on the day and time scheduled by the student within the date/time window established by the professor.

Correspondence (Proctored Exams)

The UNO Testing Center offers proctoring services to individuals that need to take proctored exams from institutions other than UNO.

These include, but are not limited to:

- College course exams
- College entrance exams
- Certification exams

The examinee is responsible for following the institution’s procedures for completing the exam(s). This may include but not be limited to completing the institution’s proctor agreement form.

Examinees must contact the UNO Testing Center in advance with testing dates and any other institution requirements needed to schedule an appointment.

For additional information and/or to schedule an appointment for a Correspondence Proctored Exam, contact the UNO Testing Center Office at 402.554.4800.

National Exams

The Testing Center administers many types of national exams including those for Admission, Proficiency, Certification, or Licensure purposes. Among exams offered are the Graduate Record Exam (GRE), PRAXIS series exams, Law School Admission Test (LSAT), ACT Assessment, Miller Analogies Test (MAT), Test of English as a Foreign Language (TOEFL), Test of English for International Communications (TOEIC), DSST exams formerly known as DANTES Subject Standardized Tests, Counselor Education Comprehensive Exam (CECE), Crane Institute Certification (CIC) Exams, International Fluid Power Society (IFPS) Exams, and Major Field Test (MFT). The Testing Center contracts with the following testing companies to administer many other certification/licensure exams: PSI, PAN, Measure Learning, Kryterion, Isosoft, Quality, and Educational Testing Service (ETS). Each testing company may have a suite of 400-4,000 different exams.

Make-Up Exams

Make-Up Exams are proctored for all UNO faculty who have an arrangement with the Testing Center for this service.

Faculty approved students who have a Make-Up Exam to be taken at the Testing Center will need to schedule their testing appointment in MavLINK.

Students wanting to use their UNO Accessibility Services approved testing accommodations should contact the Testing Center at 402.554.4800 or...
email at unotestingcenter@unomaha.edu ahead of their scheduled test date and time to discuss their accommodations.

**Student Life and Wellbeing**

**Student Life & Wellbeing**

The services provided by the Division of Student Life and Wellbeing (SLW) are designed to promote the growth and development of the whole student – intellectually, physically, emotionally, socially, financially, environmentally, occupationally and spiritually – to allow students to develop skills that lead to success both during school and throughout life. The SLW Division provides an integrated, holistic approach to both curricular and co-curricular learning by providing support, activities, and engagement that enriches the student experience on campus and better prepares them to be an active and engaged citizens in our global community.

**Mission**

The Division of Student Life and Wellbeing cultivates an inclusive, caring, student centered community through meaningful connection and involvement.

**Vision**

Student Life and Wellbeing strives to be a division that fosters comprehensive opportunities that inspire and empower students towards self-compassion, self-advocacy, and holistic wellness.

**Wellness**

**Counseling and Psychological Services (CAPS)**

*Caring Staff*

Our office is staffed by licensed mental health practitioners and two graduate interns who are eager to create a vibrant and safe campus community in which psychological health and academic life flourish for our diverse student body. CAPS’ staff is committed to providing support and encouraging your personal growth.

*Personal Counseling*

Concerns, struggles, and changes are all normal parts of life. Sometimes we can work through them on our own; other times, talking to a professional can help. CAPS offers a safe, confidential atmosphere in which personal concerns can be openly explored and discussed within a culturally inclusive environment. Topics often include anxiety, depression, alcohol and drug issues, goal setting, grief and loss, relationships, sexual identity, self-esteem, and stress. CAPS can also assist with referrals to campus resources and community providers for students needing longer-term support. Appointments may be made by stopping by the CAPS office at the Wellness Center, 101 H&K, or by calling 402.554.2409. Learn more on the Counseling and Psychological Services website (https://www.unomaha.edu/student-life/wellness/counseling-center/).

**Health Services**

**Nebraska Medicine UNO Health Center**

The UNO Health Center is an on-campus medical clinic that helps UNO students stay healthy while they’re in school. It is staffed by Board Certified medical professionals who specialize in college health. Services include care for common illnesses and injuries, wellness exams, chronic illness management, sexually transmitted infections testing and treatment, gynecological care and birth control, a variety of immunizations, lab testing, radiology and more. In addition to medical services, the UNO Health Center offers health and wellness education through presentations, on-campus outreach booths and the Health Matters blog. The health center is in the Wellness Center, 102 H&K, and is open Monday through Friday from 8 a.m. to 4 p.m. year-round. In-person and telehealth visit options are available depending on the concern. Appointments are required for care and can be made by calling 402.554.2374.

**Costs**

The University Program and Facilities Fee covers the cost of certain services, but it does not cover all possible charges. Services not covered by student fees can be submitted to the student’s health insurance plan. Nebraska Medicine accepts most insurance plans. If you do not have insurance, financial assistance may be available through Nebraska Medicine. Learn more at https://healthcenter.unomaha.edu/

**Maverick Food Pantry**

The Maverick Food Pantry contributes to UNO’s culture of caring by providing healthy, sustainable, and culturally sensitive food items to those facing food insecurity as well as connecting them with resources in the greater Omaha area for other basic needs support. UNO students, faculty, and staff can request up to two food packages per week either online or in person and pick up in the Barbara Weitz Community Engagement Center. The Maverick Food Pantry’s model uses a full-time staff member, student workers, and volunteers to sort donations, assemble food packages, and assist those picking up packages as well as working to destigmatize and demystify basic need insecurity on UNO’s campus.

**Campus Recreation**

Campus Recreation (Campus Rec) supports students on their journey to living a healthy and balanced lifestyle while at UNO. If you are enrolled in at least one credit hour on-campus, a Campus Rec membership is included as part of your University Program and Facilities (UPF) Fees. There is no need to purchase a membership separately while taking an on-campus class. A valid membership is determined on a semester basis. If you are enrolled in an online, remote, research, or thesis class, a Campus Rec membership would need to be purchased. Campus Rec is located in the H&K Building. Learn more on the Campus Recreation website (https://www.unomaha.edu/student-life/wellness/campus-recreation/).

**UNO Care Team**

The Care Team (https://www.unomaha.edu/student-life/student-safety/how-to-report/uno-care-team.php) serves as the coordinating hub of a network of existing resources and focuses on prevention and early intervention in campus situations involving students experiencing distress or engaging in harmful or disruptive behaviors. If you wish to share or report a concern about yourself or someone else, please complete this form (https://cm.maxient.com/reportingform.php?UnivofNebraskaOmaha&layout_id=10) and a member of the Care Team will be in touch.

**Accessibility Services**

The Accessibility Services Center (ASC) collaborates with students, administrators, faculty, and staff to ensure access to reasonable and appropriate student disability accommodations. ASC strives to create a fully accessible, inclusive experience for student learning, campus engagement, and residential life.

*Student Accommodations*

Through an interactive process and collaboration, ASC provides individualized services to students with disabilities to establish appropriate accommodations to create equal access. ASC encourages students to become responsible decision makers, problem-solvers, and self-advocates who request and access their accommodations.

*Requesting Accommodations*

Once you are admitted to UNO, requesting accommodations steps is initiated through the ASC Online Portal. Students fill out an application and upload supporting disability documentation to begin the process.
Following this, an interactive discussion with an ASC Specialist is scheduled to complete the accommodation process.

Learn more about requesting accommodations and accessing the online portal on the Accessibility Services Center website (https://www.unomaha.edu/student-life/inclusion/disability-services/). If you are not sure if you qualify for support services, do not hesitate to contact ASC at 402.554.2872 or stop by the ASC in 104 Health and Kinesiology Building.

**Request for Reasonable Accommodation in Field Placements**

The University of Nebraska at Omaha (UNO) supports students with disabilities and encourages their full participation in all academic programs, including field placements of all kinds. "Field placements" for the purpose of this document include any practicum, field experience, clinical practice, internship, training, clinic, or work experiences (or similar) conducted for academic credit. In accordance with Section II of the Americans Disabilities Act and Section 504 of the Rehabilitation Act, UNO’s Accessibility Services Center is the designated office to work with students with disabilities to provide reasonable accommodation so they may enjoy the same benefits, experiences, and opportunities as persons without disabilities.

**Student Legal Services**

The office of Student Legal Services offers free legal assistance to all currently enrolled UNO students. All communication is completely confidential and cannot be shared with anyone. The office can provide court representation, document preparation, legal advice and counsel, and legal information. All legal matters are welcome, however, the office is unable to assist with legal issues with other students as well as issues with the University or its affiliates. Visit the Student Legal Services website (https://www.unomaha.edu/student-life/student-safety/student-legal-services/).

**Office of Hardship and Resiliency Support**

The office of Hardship & Resiliency Support provides direct support to students with lived experience in the foster care or justice systems, students with incarcerated parents, and students who are pregnant or parenting. Visit the Office of Hardship and Resiliency Support website (https://www.unomaha.edu/student-life-and-wellbeing/hardship-and-resiliency-support.php).

**Student Conduct and Community Standards**

The university has an obligation to maintain conditions under which the work of UNO can go forward freely, in accordance with the highest standards of quality, institutional integrity, and freedom of expression, with full recognition by all concerned of the right and privileges, as well as the responsibilities, of those who comprise the UNO community. UNO expects students to maintain standards of personal integrity that are in accordance with the goals of the institution. This means that students are expected to assume responsibility for their actions; observe national, state, and local laws and university policies; and respect the rights and property of other people. As members of the academic community, students are subject to the responsibilities laid out by the university and are urged to become familiar with all documents that pertain to your rights and responsibilities. View the full Student Code of Conduct (https://www.unomaha.edu/student-life/student-conduct-and-community-standards/policies/code-of-conduct.php). For more information, contact the Office of Student Conduct and Community Standards visit the Student Conduct and Community Standards website (https://www.unomaha.edu/student-life/student-conduct-and-community-standards/) or email unoconduct@unomaha.edu.

**Inclusion**

**The Military-Connected Resource Center**

The Military-Connected Resource Center (formerly the Office of Military and Veteran Services) exists to encourage a military community on campus, online, and overseas. This office supports UNO’s military community by providing military and veteran students and their family with resources and services developed to help them succeed. Learn more on the Military-Connected Resource Center website (https://www.unomaha.edu/military-and-veteran-services/).

**Gender & Sexuality Resource Center**

The Gender and Sexuality Resource Center welcomes and encourages people of all genders and sexualities to participate in the center’s offerings. The GSRC fosters and promotes equity, access, and inclusion for all genders and sexualities through education, resources, advocacy, and activism. This office provides specific programs and services for women, lesbian, gay, bisexual, queer spectrum, trans spectrum, intersex, asexual, non-straight, Two Spirit, and gender non-conforming (LGBTQIA2S peoples, and survivors of interpersonal violence in the UNO community. Learn more on the Gender and Sexuality Resource Center website (https://www.unomaha.edu/student-life/inclusion/gender-and-sexuality-resource-center/).

**Multicultural Affairs**

The Office of Multicultural Affairs (MCA) is responsible for developing and maintaining programs and services to ensure the successful recruitment, retention, and graduation of underrepresented students on UNO’s campus. Through scholarship aid, academic services, and personal support, students are empowered to attain their educational and professional goals. Cultural programming includes celebrating cultural months (including Black History Month, Latino Heritage Month, Native Heritage Month, and Diversity Month) as well as three annual Native American events. MCA is inclusive of all UNO students. Learn more on the Multicultural Affairs website (https://www.unomaha.edu/student-life/inclusion/multicultural-affairs/).

**Summer Scholars Pre-College Program**

The Summer Scholars Program provides college bound high school juniors the opportunity to enroll in a course at UNO to earn college credits, prepare for college life and connect with University of Nebraska at Omaha faculty, staff, and students. The goal of the Summer Scholars Program is to expose high school students to the dynamics of a college campus environment through a five-week pre-college summer session. Participants learn about college academic coursework, time management, college admissions, ACT/SAT preparation, college scholarships, and the financial aid process. They interact with university faculty and staff, explore career options and participate in community service activities. In addition to the academic benefits of the program, the scholars receive an increased awareness of social and cultural issues. Outside of the classroom, the Summer Scholars spend a week living at the Scott Residence Hall on UNO’s Scott Campus. Learn more about Summer Scholars (https://www.unomaha.edu/student-life/inclusion/multicultural-affairs/bridges-program-and-scholarships.php).

**UNO Success Academy**

The UNO Success Academy is a learning community aimed at supporting first-year and incoming transfer students. The Success Academy provides students with a foundation for future success through a wide range of meaningful activities, including participation in the US 1010 (Critical Thinking for the Modern Day College Student) first-year seminar class. The program exists to help prepare students to take advantage of their time on campus and support their transition to university life.

Success Academy helps students make connections with other students, staff, faculty, and the UNO campus, with program benefits including access to one-on-one academic and career coaching, support from a peer
mentor, access to the program office in the Milo Bail Student Center, and
the opportunity to earn scholarship dollars through an incentive program.

student-life/achievement/academic-and-career-development-center/success-
academy/)

**TRIO Project Achieve**

Project Achieve is open to University of Nebraska Omaha undergraduates who
qualify as first-generation, limited income, and/or disabled college
students. The program offers academic and life skills development;
guidance related to financial aid; career and graduate study preparation;
leadership development through community engagement; and personal
counseling. Activities and services emphasize growth in becoming more
efficient, engaged, and independent learners.

Project Achieve uses a flexible and personalized approach. Each student
is encouraged to participate in activities which meet his, her, or their own
learning needs. Students and staff work together in assessing students’
skills in relation to education and career goals. Personal interviews, review
of academic records, checklists and diagnostic tests may be used in this
process

Learn more about Project Achieve (https://www.unomaha.edu/project-
achieve/)

**Jim and Shirley Young Scholars Program**

The Jim and Shirley Young Scholars Program is a scholarship program that
supports a select group of first-generation college students attending UNO.
Students in Young Scholars participate in a variety of activities such as
weekly study sessions, various social and academic events, and service
projects throughout the school year, and have a support system at UNO
that includes a mentor with whom they meet regularly. In addition to this
support, the program provides a financial scholarship to the students
selected for the program.

Learn more about the Jim and Shirley Young Scholars Program (http://
www.unomaha.edu/youngscholars/)

**Student Involvement**

Getting involved is an important part of the college experience. With
new organizations being created almost every week, there is something
for everyone. Learn more on the Student Involvement website (https://
www.unomaha.edu/student-life/involvement/).

**Student Organizations**

There are tons of ways to get involved at UNO. Joining organizations that
complement your studies or appeal to your personal interests can enrich
your college experience. Organizations (https://unomaha.presence.io/
organizations/) on campus are created to suit the diverse interests of
students that range from academics to volunteerism to art and music and
beyond. They are a great way to get involved, make new connections, and
share a common interest with your peers.

**Fraternity & Sorority Life**

OMAHA GREEKS shapes amazing individuals with fascinating life stories
into students who are independent thinkers and hard workers. OMAHA
GREEKS operate upon the five pillars of leadership opportunities, lifelong
friendship, commitment to philanthropy, reach beyond Omaha, and
academic achievement.

**Student Government**

The UNO Student Government Association represents all UNO students
to administration, faculty, and staff, as well as the University of Nebraska
Board of Regents and the community. They strive to lead, support, and
advocate on behalf of the student body to make lasting and positive
contributions to the student experience.

**Maverick Productions**

Maverick Productions (MavPro) is a student led programming board that
plans and executes events for students by students. These events include
major concerts, fun giveaways, and other interactive events! MavPro strives
to plan events that bring in students from all parts of campus to support the
Maverick Community.

**Housing & Residence Life**

Housing and Residence life creates a positive residential experience and
supports the evolving needs of students at UNO. Six different on-campus
housing options are available to UNO students: Maverick Village (MV) and
University Village (UV) on Dodge Campus; Scott Court (SC), Scott Crossing
(SX), Scott Hall (SH), and Scott Village (SV) on Scott Campus. Housing and
Residence life is proud to offer apartment, traditional, and graduate-style
housing to UNO students. Learn more on the Housing and Residence Life
website (https://www.unomaha.edu/student-life/housing-and-residential-
life/).

**Gender-Inclusive Housing**

Students and allies of all sexual orientations, gender identities, and gender
expressions are eligible to live in designated Gender-Inclusive Housing.
Apartment features are the same as other housing facilities.

**Additional Campus Services and Support**

**Maverick Advising Center (the MAC)**

The Maverick Advising Center (MAC) supports students in Exploratory
Studies for up to 45 credit hours. The MAC prepares students to choose
an academic major with confidence and guides them to stay on track for
graduation. Students work with their advisors to strive for academic success
by:

• Determining personal, career, and academic goals
• Exploring majors and courses of interest through Academic Focus Areas
  (https://www.unomaha.edu/academics/academic-focus-areas/)
• Working to find a balance between education, work, and family

**Career Services**

Career Services empowers students to explore, develop, and succeed at
UNO and beyond. We prepare students for meaningful work by building
bridges with campus, community, and employers. We offer career
exploration advising, career readiness resources, job and internship
preparation, career fair and hiring events, experiential education
opportunities, and more. Students can explore internship and job
opportunities using Handshake (https://www.unomaha.edu/student-
life/achievement/academic-and-career-development-center/career-
development/handshake.php), UNO’s official career platform.

**Ombuds Services**

Ombuds Services provides informal, confidential help when you have a
conflict or problem with individuals, offices, or policies at the university.
The Ombuds (Ombudspersons) help you analyze your situation, obtain
information, identify your options, and develop a plan to address your
concerns. The Ombuds do not take sides in a dispute; they are advocates
for fairness and the equitable resolution of conflicts and problems.
Communicating with an Ombuds is off-the-record. If you wish to make
a record, or to make UNO aware of a problem, the Ombuds can provide information and help you do so. Exceptions to Ombuds confidentiality occur only when there is an imminent risk of serious harm and no other reasonable option to prevent it.

For more information or to make an appointment, please go to the Ombuds Services (https://www.unomaha.edu/ombuds-services/) web page. Services are free to all UNO students and employees.

**Office of Civil Rights Compliance**

The University of Nebraska does not discriminate based on race, color, ethnicity, national origin, sex, pregnancy, sexual orientation, gender identity, religion, disability, age, genetic information, veteran status, marital status, and/or political affiliation in its education programs or activities, including admissions and employment. The University prohibits any form of retaliation taken against anyone for reporting discrimination, harassment, or retaliation for otherwise engaging in protected activity.

Read the Full Statement (https://www.unomaha.edu/campus-policies/_docs/notice-of-nondiscrimination-032922.pdf)

Learn more about the Office of Diversity, Equity, Access and Inclusion (https://www.unomaha.edu/office-of-equity-access-and-diversity/)

UNO’s Office of Civil Rights Compliance is responsible for ensuring compliance with applicable laws, regulations, and policies governing discrimination and harassment.

- **Title IX & Sexual Misconduct** (https://www.unomaha.edu/university-compliance/civil-rights/title-ix-information/)
- **How to Request ADA/504 Accommodations** (https://www.unomaha.edu/student-life/accessibility/student-services.php)

Resources for support (https://www.unomaha.edu/university-compliance/civil-rights/title-ix-information/resources.php)

Sex based misconduct or discrimination should be reported to:

- **UNO Title IX Coordinator**
  Phone: 402-554-2120
  Email: equity@unomaha.edu

Other protected class discrimination should be reported to:

- **Compliance Administrator**
  Drew Nielsen
  Email: compliance@unomaha.edu

**International Programs (INPR)**

Current programs under INPR include:

International Student Advising (https://www.unomaha.edu/international-studies-and-programs/student-support/advising.php) for all international students and scholars.

The Education Abroad (https://www.unomaha.edu/international-studies-and-programs/study-abroad/) office assists students in exploring their many options for overseas academic programs.

International Student and Scholar Support (https://www.unomaha.edu/international-studies-and-programs/student-support/) helps current and new students get oriented to campus, supports academic and immigration-related issues, and offers involvement opportunities on campus and in the community.

ILUNO Intensive English (https://www.unomaha.edu/international-studies-and-programs/iluno/) is one of the oldest and most highly regarded English as a Second Language programs in the region.

The International Professional Development (IPD) Program (https://www.unomaha.edu/international-studies-and-programs/ipd/) offers an alternative way to learn English that is uniquely tailored to professionals.

The Center for Afghanistan Studies (https://www.unomaha.edu/international-studies-and-programs/center-for-afghanistan-studies/) continues to serve as America’s primary cultural and scholarly link between the two countries.

Young Southeast Asian Leaders Initiative (https://www.unomaha.edu/international-studies-and-programs/engagement/yseali-institute/) is an educational and cultural exchange to build the leadership capabilities of young professionals in the region, strengthen ties between the United States and Southeast Asia, and promote collaboration in the ASEAN community.

Global Partnerships and Recruiting (https://www.unomaha.edu/international-studies-and-programs/) supports the development, maintenance, and activities related international partnerships, and student mobility to UNO.

For further information, contact the International Programs office at 402.554.2293 or world@unomaha.edu

**Multicultural Affairs**

The Office of Multicultural Affairs (MCA) is responsible for developing and maintaining programs and services to ensure the successful recruitment, retention, and graduation of underrepresented students on UNO’s campus. Through scholarship aid, academic services, and personal support, students are empowered to attain their educational and professional goals. Cultural programming includes celebrating cultural months (including Black History Month, Latino Heritage Month, Native Heritage Month, and Diversity Month) as well as three annual Native American events. MCA is inclusive of all UNO students. Learn more on the Multicultural Affairs website (https://www.unomaha.edu/student-life/inclusion/multicultural-affairs/).

**UNO Graduate Studies**

UNO offers over 90 graduate programs at the doctoral, master’s, specialist, and graduate certificate levels. UNO is recognized as a Carnegie Doctoral Research University. Our graduate faculty represents the very best in their fields, earning national teaching awards, and they are dedicated to individual student instruction and mentoring. For additional information, including available scholarships, fellowships and other supports, please visit the Graduate Studies website (https://www.unomaha.edu/graduate-studies/).

**Scholarships**

UNO has established a wide range of scholarship programs to recognize excellent high school achievement by first-year students and exceptional scholastic performance by upper-class students already in attendance at the university. For more information:

Office of Financial Support and Scholarships
103 Eppley Administration Building
Omaha, NE, 68182
402.554.2327
financialaid.unomaha.edu (http://financialaid.unomaha.edu/)

**Digital Learning**

The Office of Digital Learning provides strategic direction to the campus for online and hybrid programs and courses, in addition to providing tier-two technology support for faculty. Digital Learning considers the areas of student support and preparedness for online learners, quality and instructional support for online instructors, and growth and process improvement for online initiatives at the institution. Working in close collaboration with UNO’s Center for Faculty Excellence, the instructional designers in the Office of Digital Learning support UNO faculty in
developing and re-envisioning the delivery of courses in online and blended formats.

Rick Murch-Shafer - Director of Academic Technology • 402.554.3539 • rmurch-shafer@nebraska.edu
Daniel Hawkins – Director of Online Development • 402.554.4935 • dhawkins@unomaha.edu

Math-Science Learning Center

The Math-Science Learning Center (https://www.unomaha.edu/college-of-arts-and-sciences/math-science-learning-center/) (MSLC) provides UNO students the assistance they need to be successful in their Math and Science courses. Undergraduate students serve as tutors, mentors and study group facilitators trained to assist their peers in achieving academic success. The MSLC has abundant study/tutoring space, computers, and reserve study materials suitable for individual and small-group study. Students seeking to increase their overall learning effectiveness and efficiency are encouraged to meet with the MSLC director to discuss strategies and make a success plan. For regular help with homework, lab, exam-prep, etc., please visit www.unomaha.edu/MSLC (http://www.unomaha.edu/MSLC) for course-specific schedule information. Then just stop by or log onto Zoom, we offer tutoring in-person and online. There’s no cost and (for most courses) no appointment needed.

The Math-Science Learning Center is located in 107 Durham Science Center.

Speech Center

The UNO Speech Center assists all UNO students, faculty, and staff in preparing oral presentations and/or incorporating them into their courses.

The Speech Consulting Room provides consulting and coaching services for all UNO students, graduate students, faculty, and staff from all disciplines, assistance to faculty in support of Speaking Across the Curriculum effort at UNO and assessment documentation for the UNO oral communication general education requirement.

The Speech Center (https://www.unomaha.edu/college-of-communication-fine-arts-and-media/speech-center/) is located in 183 and 185 Arts & Science Hall, or can be reached at 402.554.3201.

Writing Center

The Writing Center invites UNO students, faculty, and staff in all university divisions to work with writing consultants on writing projects. You may use this free service to work on writing assignments, application essays, business letters or other projects. Our goal is to help you become an effective, independent writer; we will not edit papers for you: we will help you develop the ability to edit your own work. The writing consultants are undergraduate students, graduate teaching assistants from the English Department, and graduate consultants funded by Graduate Studies and UNMC.

The Writing Center offers in-person and online services whenever classes are in session. To schedule a 30 or 60 minute appointment, visit the Writing Center website (http://www.unomaha.edu/college-of-arts-and-sciences/writing-center/) or call 402.554.2946.

Computer Science Learning Center

The Computer Science Learning Center (CSLC) provides UNO students with the assistance they need to be successful in their Computer Science and related technology courses. University students serve as tutors that help their fellow students gain understanding of computer science topics. This knowledge helps in the academic success of students who use the space as well as helps prepare students for potential career opportunities. For regular help with homework, labs, exam preparation, and more, please visit (https://www.unomaha.edu/college-of-information-science-and-technology/computer-science-learning-center/) to look through our hours of operation and how to contact us. Students are welcome to stop by in person or over Zoom. The CSLC is located in PKI 391 and our Zoom information is shared on the previously listed website. There is no cost for tutoring assistance and no appointment is needed.

MatheMavericks Zone

The MatheMavericks Zone is a communal mathematics study space with free tutoring available for Math 1950 and below. Visit MatheMavericks Zone (https://www.unomaha.edu/college-of-arts-and-sciences/mathematics/math-lab/) website for additional information.

UNO Libraries

The University of Nebraska Omaha (UNO) libraries include the Dr. C.C. and Mabel L. Criss Library (Criss Library) and the KANEKO-UNO Library. The Libraries fulfill the UNO mission through our dynamic services, highly qualified and adaptive personnel, unique and extensive collections, and accessible learning spaces and environments.

The KANEKO-UNO library, located within the KANEKO gallery at 11th and Jones Streets in Omaha’s Old Market, is a distinctive space for study, research, collaboration, and investigation. With a focus on stimulating and celebrating creativity, the space and collection inspire visitors to expand their awareness and knowledge within an atmosphere of flexible learning.

Criss Library is centrally located on UNO’s Dodge campus, and is an inclusive and engaged space for teaching, learning, research, and service. Collaborative spaces include flexible seating on our lower and main levels; group study rooms equipped with monitors, screen sharing technology, and whiteboards; and four instruction labs, including two with laptops and configurable seating. For focused learning, the library has individual study rooms, and maintains quiet study space throughout the third floor.

The Creative Production Lab offers one-on-one help for students, faculty, and staff to explore their creative interests and learn how to use cutting-edge hardware and software, including virtual reality, laser cutting, 3D printing and scanning, and multi-media production.

The Archives & Special Collections acquires and preserves unique, rare, and specialized materials, and provides expertise on incorporating these materials into creative projects. The department’s diverse collections include the University Archives, U.S. Senator Chuck Hagel Archives, as well as other special collections including regional history, rare books, and the Arthur Paul Afghanistan Collection.

Additional spaces of note include: an outdoor garden patio, café, theater room, and the H. Don and Connie Osborne Family Art Gallery.

The library’s collection supports the teaching, learning, research, and creative needs of students, faculty, and staff through a variety of formats including, print and e-books, physical and streaming media, digital image collections, journals, newspapers, electronic databases, and government documents. Material not available in the Criss Library collection can be borrowed from other libraries via Interlibrary Loan.

Librarians are available both in person and online to answer questions, help students and faculty use library resources, and assist with research when and where it is needed. Librarians also offer instruction sessions tailored toward a particular course or assignment.

For additional information, visit library.unomaha.edu (http://library.unomaha.edu/).

Research

At UNO, research is thriving because our students have access to resources they might not find at another university. Undergraduate and graduate
students work with our faculty to understand and uncover new and innovative methods for solving problems. Learn more about the research at UNO (https://www.unomaha.edu/research/).

**MaviGATION Station**
The MaviGATION Station, located on the first floor of the Eppeley Administration Building, provides general information and referrals to appropriate offices. The general information number is 402.554.2800 or 1.800.858.8648.

**Information Technology Services**
Information Technology Services (ITS) offers a broad range of services designed to meet the computing, communications, and networking needs of the University of Nebraska faculty, staff and students. See https://its.unomaha.edu.

**Milo Bail Student Center**

**Bookstore**
The UNO Bookstore, owned and operated by the University of Nebraska at Omaha, is located on the first level of MBSC. The Bookstore offers new and used textbooks, rental books, digital e-books, Omaha’s largest selection of UNO apparel, gifts, and home décor. The UNO Bookstore website, unobookstore.com (http://unobookstore.com/), offers free in-store pickup and free residence hall delivery for textbooks, apparel and more.

**Campus Recreation**
Campus Recreation (Campus Rec) supports students on their journey to living a healthy and balanced lifestyle while at UNO. If you are enrolled in at least one credit hour on-campus, a Campus Rec membership is included as part of your University Program and Facilities (UPF) Fees. There is no need to purchase a membership separately while taking an on-campus class. A valid membership is determined on a semester basis. If you are enrolled in an online, remote, research, or thesis class, a Campus Rec membership would need to be purchased. A purchase is necessary since these classes do not pay the University Program and Facilities (UPF) Fees. All students, whether you are taking in person or online classes, you are eligible to participate in Wellness Coaching (https://www.unomaha.edu/student-life/wellness/health-coaching-and-wellness-resources.php). Campus Rec is located in the H&K Building. Learn more on the Campus Recreation website (https://www.unomaha.edu/student-life/wellness/campus-recreation/).

**Housing & Residence Life**
Housing and Residence life creates a positive residential experience and supports the evolving needs of students at UNO. Six different on-campus housing options are available to UNO students: Maverick Village (MV) and University Village (UV) on Dodge Campus; Scott Court (SC), Scott Crossing (SX), Scott Hall (SH), and Scott Village (SV) on Scott Campus. Housing and Residence life is proud to offer apartment, traditional, and graduate-style housing to UNO students. Learn more on the Housing and Residence Life website (https://www.unomaha.edu/student-life/housing-and-residential-life/)

**Gender-Inclusive Housing**
Students and allies of all sexual orientations, gender identities, and gender expressions are eligible to live in designated Gender-Inclusive Housing. Apartment features are the same as other housing facilities.

**Parking Services**
For information on parking services, visit the parking services website (https://www.unomaha.edu/business-and-finance/support-services/parking-services/).

**Facilities**
Visit the UNO Buildings and Maps (https://www.unomaha.edu/about-uno/buildings-and-maps/) website for detailed information on buildings and locations.

**Alumni Engagement/NU Foundation**
The UNO Alumni Association (https://unoaalumni.org/) and the University of Nebraska Foundation have partnered to advance the overall mission and priorities of UNO, and to connect the dreams and passions of alumni and friends with the mission of the university. Click here (https://nufoundation.org/) for more information.

**Public Safety**
Department of Public Safety
6001 Dodge St.
Eppeley Administration Building Room 100
402.554.2648

For ON-CAMPUS EMERGENCIES dial 402.554-2911.

UNO Department of Public Safety is available to the University community 24-hours a day, protecting life and property, providing building and grounds patrol; enforcing traffic and parking rules and regulations, and encouraging everyone to follow University regulations; UNODPS also maintains the University key system, manages the safety of youth on campus, and provides crime prevention programs for all persons on campus.

**Title IX**
Title IX is a comprehensive federal law that prohibits discrimination on the basis of sex (including gender identity) in any federally funded education program or activity.

To contact the Title IX Coordinator:
Phone: 402.554.2120
Email: equity@unomaha.edu
Learn more about Title IX (https://www.unomaha.edu/office-of-equity-access-and-diversity/resources/title-ix/).

**Security**
Buildings are patrolled 24 hours daily. Anyone found in a UNO building after established closing hours, without a UNO identification card, will be asked to leave. Report items stolen or damaged to the Department of Public Safety.

**University Building Access**
Department of Public Safety is responsible for the control of the university electronic access and key system. Eligible University employees should make requests for access (electronic or keyed) through their department chairperson.

**Services**
The Department of Public Safety provides assistance to motorists 24 hours daily. Officers respond to help get your vehicle started, open a locked vehicle, and will assist in a tire inflation where possible.

**Parking Traffic**
All accidents should be reported to Department of Public Safety immediately.

**Personal Escorts**
Officers are available to escort individuals to/from campus buildings 24 hours a day for anyone who has a safety concern.

**Personal Safety Checks**
Individuals who may be working alone, outside normal working hours are encouraged to contact Department of Public Safety. Security officers will periodically check on your safety while you are here.

**Operation I.D.**
Your personal belongings may be engraved to aid in finding lost or stolen property. Stop by the Department of Public Safety Office and check out an engraver and instructions to engrave your property.

**Lost and Found**
Department of Public Safety maintains the lost and found system. Lost and found items are held for 30 days.

**Fingerprints**
The Department of Public Safety provides a fingerprinting service for individuals who require fingerprint for job applications and military needs. This service also applies for children of students, staff, faculty, and alumni. It is strictly for the benefit of the parents should a child ever be missing; no record will be maintained by Department of Public Safety. Contact Department of Public Safety for times of service or an appointment at 402.554.2648.

**Environmental Health and Safety**
It is the goal of the university to provide a safe, healthy environment to work and study. In order to achieve this, Environmental Health and Safety (EHS) provides a number of training programs and consultation services for students, faculty and staff. Programs directed by EHS include: employee safety and passenger van training, hazardous waste management, emergency preparedness, fire protection, and incident investigations.

Safety Data Sheets and other information related to the safe handling and disposal of chemicals can be obtained from the EHS website. Students can help maintain a safe environment at UNO by reporting unsafe conditions on campus. Visit the EHS website (https://www.unomaha.edu/business-and-finance/support-services/environmental-health-and-safety/); call 402.554.3596, or visit EHS in 211 Eppley Administration Building.

Accounting, MACC

School of Accounting, College of Business Administration

Vision Statement

The Master of Accounting (MACC) program at UNO offers graduates an affordable, high-quality graduate education from an AASCB-accounting-
accredited institution. Specialized accounting accreditation by the AACSBA (Association to Advance Collegiate Schools of Business) is earned by demonstrating that we meet international standards of excellence relating to delivering and managing undergraduate and graduate accounting programs, and 190 institutions worldwide hold AACSBA accounting accreditation. A very practical benefit of having our MACC program AACSBA-accounting-accredited is that the Nebraska Board of Public Accountancy recognizes AACSBA accounting accreditation as “Level 1 accreditation” and accepts the UNO MACC degree, without additional verification, as evidence that our graduates meet all educational requirements to sit for the CPA exam (see Chapter 9 of Rules and Regulations Title-288 (http://www.sos.state.ne.us/rules-and-reg/RegSearch/RegSearch.aspx?id=Board_of_Public_Accountancy&title=Title-288)).

The MACC program is designed for dedicated students with career aspirations demanding a high level of accounting expertise. As such, the program involves both intensive and extensive professional preparation. Our program provides a broad-based preparation for individuals seeking careers in public, private or not-for-profit organizations and also offers focused concentration choices. For more information regarding career options in accounting, please visit MAcc.unomaha.edu (https://MAcc.unomaha.edu).

Program Contact Information
Jennifer Riley, PhD, Graduate Program Chair (GPC)
Mammel Hall (MH)

jenriley@unomaha.edu

Program Website (https://MAcc.unomaha.edu)

Other Program Related Information

Financial Assistance
MACC students are eligible to apply for graduate scholarships, fellowships, and assistantships and will find information about these opportunities at MAcc.unomaha.edu (https://www.unomaha.edu/college-of-business-administration/accounting/graduate-program/). Employed applicants should explore tuition reimbursement plans from their employers.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Admissions Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements
- Applicants must have earned a minimum GPA of (3.0/4.0) in their undergraduate program. The baccalaureate degree must have been received from a properly accredited institution. If the applicant's undergraduate degree is in accounting, then we further require a minimum GPA of 3.0 overall and upper-division accounting GPA. Applicant’s with a GPA less than 3.0 may petition for admission after they have submitted a satisfactory GMAT score.
- Entrance Exam: Applicants may be admitted by taking the GMAT and scoring at least 550. The student must score at least 26 or in the 40th percentile on the verbal section and 35 or in the 40th percentile on the quantitative section of the GMAT.
- GMAT exemptions: Applicants may qualify for a GMAT exemption under one of the following four conditions:
  - Earned CPA license; OR
  - Successful completion a master’s degree in a business field from an AACSBA-accredited university; OR
  - ALL of the following must be met:
    - Completion of an undergraduate business degree with a major in accounting from an AACSBA-accredited school, AND
    - Upper-division (3000/4000-level) accounting GPA of 3.0 or higher, AND
    - Overall GPA of 3.0 or higher; OR
  - ALL of the following must be met:
    - Currently working on an undergraduate business degree with a major in accounting from an AACSBA-accredited school, AND
    - Earned a minimum of twelve upper-division (3000/4000-level) accounting credit hours with a GPA 3.0 or higher in these accounting courses, AND
    - Overall GPA of 3.0 or higher, AND
    - Maintaining the accounting and overall GPAs of 3.0 or higher through degree conferral
    - An applicant with an earned bachelor’s degree with a major in accounting from a non-AACSBA college or university with 3.0 or higher overall and upper-division accounting GPAs will be evaluated individually for a GMAT waiver. At a minimum this will require evidence of other accreditation credentials and a substantially earned accounting GPA (a minimum of 3.5 in all upper division accounting courses). Additional evidence may be required. The perspective student must contact the MACC director to submit a request for evaluation.
    - An applicant with an earned bachelor’s degree in a field other than accounting with a 3.0 or higher overall GPA will be evaluated individually for a GMAT waiver.
    - Credit received for internships is excluded from these calculations of overall and upper-division accounting GPAs.

- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 100, IELTS: 7.5, PTE: 68, Duolingo: 130
- Note: Applicants who have met the admission requirements above, but who have not completed all of the foundation course requirements, will be admitted provisionally. Provisionally admitted students must earn a minimum GPA of B (3.0/4.0) in all foundation courses taken to satisfy the requirements set out in their provisional admittance. Provisionally admitted students who do not earn a minimum GPA of B (3.0/4.0) in all foundation courses will be immediately dismissed from the MACC program.

Degree Requirements

Foundation Requirements
Accounting is a technical subject and graduate work in the discipline requires a solid understanding of the material covered in the undergraduate curriculum. To make sure our students are adequately prepared we have a list of foundation requirements below. Students may be provisionally accepted to the program before they have completed or attempted any of the foundation requirements. However, admission will be provisional and no graduate-only accounting classes may be taken before the foundation requirements have been successfully completed—except students enrolled in their final Foundation course may elect to enroll in graduate classes that do not require that course as a prerequisite.
Students who have completed the foundation requirements or their equivalents at a properly accredited institution before their application must have an overall GPA of (3.0/4.0) in these courses and earned no grade on any of the foundation courses lower than a C (2.0/4.0).

Note: ECON 1200 may substitute for ECON 2200 and ECON 2220. Contact the Director of the MACC Program.

**Degree Requirements**

The basic structure of the MACC program is as follows:

- 15 credit hours of Accounting Core Courses
- 6 credit hours of Contemporary Business Environment Courses
- 9 credit hours of Elective Courses

Students select one of the four concentration areas. The choice will determine the courses to be completed within the three sections above.

**Exit Requirement**

- Comprehensive Examination

**Other Program-Related Information**

**Transfer credits**: All transfer credits must be approved by the Director of the MACC Program. A maximum of 6 credit hours may be considered, and must be earned at an AACSB-accredited institution.

**Concentrations**

**Financial Reporting and Auditing Concentration**

### Electives

In consultation with the MACC advisor, select three credit hours of additional graduate coursework.

### Academic Performance

In addition to the Quality of Work Standards required by the UNO Graduate College, MACC students may repeat only once any ACCT 8–0 or ACCT 8–6 level course in which they receive any grade, including "W" or "I".

Students earning a third grade of "C+" or below (or any single grade of "C" -(1.67 on a 4.0 scale) will be automatically dismissed from the MACC program. Dismissed students will be immediately administratively withdrawn from all courses in which they are enrolled for MACC credit in any subsequent semester or summer session until reinstatement has been granted by the MACC graduate program committee (MACC GPC).

Students who have been dismissed from the MACC program may submit a written petition for reinstatement to the MACC GPC. Students who have petitioned the MACC GPC for reinstatement may not enroll in any courses for MACC credit. Upon receiving a petition for reinstatement, the MACC GPC will evaluate the student’s petition. As part of the reinstatement petitioning process, the MACC GPC reserves the right to examine the student’s academic record and reserves the right to speak to any previous instructor who has taught the student, and this information may be used by the MACC GPC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege, and not all students who are dismissed will be reinstated. Students who have been reinstated will be subject to reinstatement conditions as specified by the MACC GPC. These reinstatement conditions may include retaking one or more courses in which the student must earn a grade of "B" (3.0) or higher (the exact grade requirements for retaken courses may in fact be higher than "B" (3.0)). Students not achieving the reinstatement conditions will be automatically dismissed with no additional opportunity for reinstatement.
ACCT 8016  ADVANCED FINANCIAL ACCOUNTING (3 credits)
Specialized issues in financial accounting. Principal topics include business combinations and consolidated financial statements, partnership accounting, translation of foreign currency financial statements, accounting for foreign currency denominated transactions, and SEC reporting requirements. (Cross-listed with ACCT 4010).
Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3030 and ACCT 3040 with a grade of “C+” (2.33) or better in each. Not open to non-degree graduate students.

ACCT 8046  ADVANCED FEDERAL INCOME TAXATION (3 credits)
Analysis of various advanced tax issues, such as accounting methods, property transactions, and formation, operation, and liquidation of C-corporations, S-corporations and partnerships. (Cross-listed with ACCT 4040).
Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3020 with a grade of “C” (2.0) or better. Not open to non-degree graduate students.

ACCT 8050  FINANCIAL STATEMENT ANALYSIS (3 credits)
Using the financial statement and supplemental information as inputs, this course utilizes a systematic fundamental analysis approach across a variety of decision-making contexts to understand how a business generates value for shareholders.
Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 3040 with a “C” (2.0) or better. Not open to non-degree graduate students.

ACCT 8066  ADVANCED MANAGERIAL ACCOUNTING (3 credits)
Intensive study and discussion of the responsibilities of managerial accountants in the decision-making process in organizations and the consequences of the manner in which they use cost accounting information in decision-making. (Cross-listed with ACCT 4060).
Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3050 with a grade of “C” (2.0) or better. Not open to non-degree graduate students.

ACCT 8076  GOVERNMENTAL/NONPROFIT ACCOUNTING AND AUDITING (3 credits)
Study of budgeting, accounting, financial reporting and auditing in governmental and non-profit entities. (Cross-listed with ACCT 4070).
Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3030 with a grade of “C” (2.0) or better. Not open to non-degree graduate students.

ACCT 8080  CURRENT TECHNOLOGY USE IN ACCOUNTING (3 credits)
This course will cover tools and methods that facilitate business analytic techniques, with a focus on current and emerging technology. This may include tools for databases, spreadsheets, robotic process automation, data mining, artificial intelligence, and others.
Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. Successful completion of BSAD 8110, ACCT 2020, or equivalent. Not open to non-degree graduate students.

ACCT 8090  INFORMATION SYSTEMS AUDITING (3 credits)
This course presents a broad overview of the professional practice of information systems audit, emphasizing control and audit procedures related to security along with Information Technology General Controls. Content studied will include professional standards, guidelines, and procedures promulgated by the Information Systems Audit and Control Association.
Prerequisite(s): ACCT 4080 with a grade of C (2.0) or better. Admission to MAcc or MBA program or permission of instructor. Not open to non-degree graduate students.

ACCT 8210  FINANCIAL ACCOUNTING THEORY (3 credits)
The development of accounting, current accounting theory and present controversies and suggested theory and practice.
Prerequisite(s): ACCT 3040. Not open to non-degree graduate students.

ACCT 8220  GRADUATE TOPICS IN INCOME TAXATION (3 credits)
This course will discuss commonly encountered tax issues such as gift and estate taxation, income taxation of estates and trusts, and exempt organizations, as well discuss current events while introducing the student to practitioner-oriented research publications.
Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 4040 or ACCT 8046 with a “C” (2.0) or better, or concurrent enrollment in ACCT 4040 or ACCT 8046. Not open to non-degree students.

ACCT 8230  MANAGEMENT ACCOUNTING ISSUES (3 credits)
An analysis of information to assist managers in determining successful strategies, developing those strategies into plans and controlling operating activities to achieve strategic goals.
Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 3050 or BSAD 8210 with a “C” (2.0) of better. Not open to non-degree graduate students.

ACCT 8250  SEMINAR IN ACCOUNTING (3 credits)
A study of a specific area within the accounting discipline. Possible areas include: auditing, financial, managerial, systems and tax. May be repeated, but no area can be taken more than once.
Prerequisite(s): Admission to MAcc or MBA programs or permission of instructor. Not open to non-degree students.

ACCT 8260  FEDERAL TAX RESEARCH AND PLANNING (3 credits)
This course is intended to provide students with a working knowledge of the primary and secondary tax resources used in practice to solve tax problems, as well as basic tax planning concepts.
Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 4040 or ACCT 8046 with a “C” (2.0) or better. Not open to non-degree students.

ACCT 8280  SEMINAR IN ACCOUNTING INFORMATION SYSTEMS (3 credits)
This course examines current topics in Accounting Information Systems (AIS), how AIS contributes to business effectiveness and ineffectiveness, and the interaction between AIS and human decision-makers.
Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. Successful completion of BSAD 8110, ACCT 2020, or equivalent. Not open to non-degree graduate students.

ACCT 8290  ADVANCED FINANCIAL AUDITING (3 credits)
This course will provide students with an intense study of financial auditing in accordance with generally accepted auditing standards.
Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 4080 with a grade of “C” (2.0) or better.

ACCT 8900  INDEPENDENT RESEARCH (1-3 credits)
This is an independent research course in which the student completes a focused project, typically individual research, under faculty supervision to supplement graduate study in a specific area within the Accounting discipline.
Prerequisite(s): Completed contract and permission needed from director of MAcc program. Not open to non-degree graduate students.

ACCT 8910  SPECIAL TOPICS IN ACCOUNTING (3 credits)
A variable content course with accounting topics based on student and faculty interest. May be repeated to a maximum of six (6) hours.
Prerequisite(s): Admission to MAcc program and permission of instructor. Not open to non-degree graduate students.

Athletic Training, MA
School of Health and Kinesiology, College of Education, Health, and Human Sciences

Vision Statement
The mission of the athletic training program at the University of Nebraska at Omaha is to prepare students for successful careers or advanced academic studies in the field of athletic training by providing didactic and clinical education, resources, and opportunities which lead to the
growth and development of dedicated practitioners, reflective scholars, and responsible citizens.

**Accreditation**

This program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE).

**Program Contact Information**

Adam B. Rosen, PhD, Director, Athletic Training Programs and Graduate Program Chair (GPC)

207Y School of Health and Kinesiology (H&K)

402.554.2057

aroessen@unomaha.edu

Program Website ([https://www.unomaha.edu/college-of-education/health-kinesiology/graduate/athletic-training/](https://www.unomaha.edu/college-of-education/health-kinesiology/graduate/athletic-training/)

**Alternative Entry into the MA in Athletic Training from the BS in Kinesiology**

The School of Health and Kinesiology offers an alternative entry into the MA in athletic training, which allows outstanding students to complete the BS in Education undergraduate kinesiology degree and the MA in athletic training graduate degree. The alternative entry program is designed for dedicated students who are motivated and willing to take on early the challenges relating to graduate education. Interested students are encouraged to meet with their academic advisor for more information about this program.

**Admissions**

General Application Requirements and Admission Criteria (p. 974)

**Program-Specific Requirements**

**Application Deadlines (Summer 2024)**

- **Summer:** The priority candidate deadline is January 15. Applications will be accepted through April 15.

**Other Requirements**

- Minimum cumulative undergraduate GPA of 3.0/4.0 is required for unconditional admission.
  - Students with a 2.70-2.99 cumulative GPA may apply and be admitted provisionally. Provisional admission typically means that the admitted student must maintain a 3.0 GPA or higher, and earn “B” or higher on all courses during the first 12 hours of graduate coursework.
  - **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., OR a baccalaureate or other advanced degree from a predetermined country on the waiver list ([https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf](https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf)), must meet the minimum language proficiency score requirement in order to be considered for admission.
    - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110 in order to be considered a strong candidate for admission.
  - **Statement of Purpose:** Address the following in under 1000 words:
    - Why should you be selected for the University of Nebraska at Omaha Graduate Athletic Training Program?
    - Describe your **ATTRIBUTES** that you feel are clearly and directly related to the profession of Athletic Training.
    - What is/are your primary career goal(s)?
    - Letters of Recommendation: Two letters from individuals who should be able to speak about your abilities as a student, your leadership and problem-solving skills, and your potential as an athletic training student.
    - Applicants must complete a minimum of 25 hours of observation with an athletic trainer (ATC).
      - These hours should be completed in the 12-month period prior to application to the program. For students with more than 25 hours, a minimum of 25 hours must be completed in the 12-month period prior to application.
    - All graduate candidates accepted to the UNO Athletic Training Program:
      - Who received their bachelor’s degree from another institution must provide the course syllabi and course outlines/schedules in order to provide evidence that specific National Athletic Trainers’ Association Educational Competencies and Proficiencies were completed.
      - Must provide proof of physical examination and required vaccinations prior to admission. The physical exam must be completed within 12 months of the first day of our summer session course (typically the first week of July).

**Degree Requirements**

The following undergraduate prerequisites (deficiencies) must be completed prior to admission with a grade of “C” or better:

- Anatomy and Physiology (6 Credits)
- Biology (3 Credits)
- Biomechanics (3 Credits)
- Chemistry (3 Credits)
- Exercise Physiology (3 Credits)
- Nutrition (3 Credits)
- Physics (3 Credits)
- Psychology (3 Credits)

**Other Requirements**

Once admitted to the athletic training program, the student will obtain clinical hours as part of course requirements. Students will be expected to obtain an average of 20 hours of clinical experience per week during each fall and spring semester, which include some nights, weekends, and travel. Required clinical experiences must be obtained over a minimum of six (6) semesters.

Exit Requirements
In order to graduate with an MA in athletic training, the following criteria must be met:

• Successful completion ATHT 8900 administered during the student’s final semester.

• Successful completion of all clinical education requirements as given in course syllabi and the Athletic Training Student Handbook.

ATHT 8110  ATHLETIC TRAINING TECHNIQUES (2 credits)
Overview course including basic components of the athletic training profession including the prevention, recognition, evaluation and immediate care of athletic injuries. Medical terminology, tissue healing, taping procedures, and professional considerations will be covered.
Prerequisite(s): Admission to the Master of Arts in Athletic Training. Not open to non-degree graduate students.

ATHT 8120  EMERGENCY MANAGEMENT OF INJURY AND ILLNESS (2 credits)
The purpose of this course is to prepare students to respond to emergent conditions that affect patients involved in physical activity. Students will learn to recognize the signs and symptoms of acute injury and illness, assess patients using evidence-based methods, apply appropriate treatments, make appropriate referral decisions, and implement effective prevention strategies to reduce the risk of injury and illness.
Prerequisite(s): Admission to the Master of Arts in Athletic Training program. Not open to non-degree graduate students.

ATHT 8130  THERAPEUTIC INTERVENTIONS I (2 credits)
This course will cover the pathophysiology of musculoskeletal injuries as well as the theory, physiology and application of physical agents used in the treatment of these injuries. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.
Prerequisite(s): Not open to non-degree graduate students.

ATHT 8230  THERAPEUTIC INTERVENTIONS II (2 credits)
This course will introduce students to the use of basic theories and principles of athletic injury rehabilitation including therapeutic exercise. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.
Prerequisite(s): ATHT 8130/HEKI 8130. Not open to non-degree graduate students.

ATHT 8240  ORTHOPEDIC ASSESSMENT I (2 credits)
The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the lower extremity. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the foot, ankle, lower leg, knee, thigh and hip. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.
Prerequisite(s): Admission to the Master of Arts in Athletic Training Program. Not open to non-degree graduate students.

ATHT 8250  CLINICAL PRACTICUM IN ATHLETIC TRAINING I (2 credits)
Clinical Practicum in Athletic Training I is the first course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.
Prerequisite(s): Admission to the MA in Athletic Training program, instructor permission, & compliance with published Athletic Training Program Technical Standards for Admission. Not open to non-degree graduate students.

ATHT 8330  THERAPEUTIC INTERVENTIONS III (2 credits)
This course will introduce students to the use of basic theories and principles of physical agents and manual therapies. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.
Prerequisite(s): ATHT 8230/HEKI 8230. Not open to non-degree graduate students.

ATHT 8340  ORTHOPEDIC ASSESSMENT II (2 credits)
The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the upper extremity. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the shoulder, elbow, wrist, hand and fingers. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.
Prerequisite(s): ATHT 8240/HEKI 8240. Not open to non-degree graduate students.

ATHT 8350  CLINICAL PRACTICUM IN ATHLETIC TRAINING II (2 credits)
Clinical Practicum in Athletic Training II is the second course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills.
Prerequisite(s): ATHT 8250/HEKI 8250 Clinical Practicum I. Not open to non-degree graduate students.

ATHT 8360  ADVANCED ORTHOPEDIC & MEDICAL ASPECTS OF ATHLETIC TRAINING (3 credits)
This course will provide the student with knowledge and skill in the area of orthopedic and medical aspects of athletic training. Students will gain this knowledge through directed observation, experiential learning, literature review, and hands-on experience under the supervision of local medical professionals. The student will be exposed to advanced evaluation of medical conditions, systemic diseases, and other disorders; observe common surgical procedures for orthopedic conditions; and medical management of patients and physically active populations in conjunction with other healthcare providers.
Prerequisite(s): Admission to Master of Arts in Athletic Training Program
ATHT 8410 ATHLETIC TRAINING ADMINISTRATION (2 credits)
This course will introduce students to administrative topics related to athletic training. Management strategies for financial resources, personnel, facilities, medical records, and third-party reimbursement will be covered. Additionally, legal and ethical professional practice standards will be introduced.
Prerequisite(s): Not open to non-degree graduate students.

ATHT 8450 INTERNSHIP IN ATHLETIC TRAINING (2 credits)
This course is designed to provide an immersive athletic training clinical experience for students. The internship is a supervised, educational clinical work experience of at least 300 hours over a minimum of 4-weeks during a single semester. This experience will allow the student the opportunity to take more responsibility for the care, prevention, and rehabilitation of athletic injuries with a particular team or group of patients, as well as help plan and provide daily coverage for practices or clinical appointments.
Prerequisite(s): Permission from the instructor or program director. Not open to non-degree graduate students.

ATHT 8530 THERAPEUTIC INTERVENTIONS IV (2 credits)
This course will introduce students to the use of basic theories and principles of athletic training related to pharmacology, nutrition and psychosocial wellness. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.
Prerequisite(s): ATHT 8330/HEKI 8330. Not open to non-degree graduate students.

ATHT 8540 ORTHOPEDIC ASSESSMENT III (2 credits)
The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the head, face and spine. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the head, face and spine. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.
Prerequisite(s): ATHT 8340/HEKI 8340. Not open to non-degree graduate students.

ATHT 8550 CLINICAL PRACTICUM IN ATHLETIC TRAINING III (2 credits)
Clinical Practicum in Athletic Training III is the third course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.
Prerequisite(s): ATHT 8350/HEKI 8350 Clinical Practicum II. Not open to non-degree graduate students.

ATHT 8650 CLINICAL PRACTICUM IN ATHLETIC TRAINING IV (2 credits)
Clinical Practicum in Athletic Training IV is the fourth course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.
Prerequisite(s): ATHT 8550/HEKI 8550 Clinical Practicum III

ATHT 8900 ATHLETIC TRAINING PROGRAM COMPREHENSIVE ASSESSMENT (0 credits)
This zero-credit-hour course is used to assess the knowledge and skills that students accumulate over the course of the CAATE-accredited entry-level graduate Athletic Training Program. Students must enroll in this course in their final semester in the program to take and pass the comprehensive examination. The exam assesses the student on their knowledge of the domains of athletic training and preparedness to sit for and take the national Board of Certification exam. Students will receive a pass/fail grade for this course.
Prerequisite(s): Requires departmental approval. Not open to non-degree graduate students.

Biology
Degree Programs Offered
- Biology, MS (p. 1038)

Certificates Offered
- Biomedical Science Certificate (p. 1039)
- Business for Bioscientists Certificate (p. 1040)

BIOL 8010 SEMINAR IN BIOLOGY (1 credit)
A study of current research in any of the divisions of biology. Graduate students will complete this course once for credit.
Prerequisite(s): Graduate student in biology and written permission of graduate faculty supervisor. Not open to non-degree graduate students.

BIOL 8020 INDEPENDENT RESEARCH IN BIOLOGY (1-6 credits)
Research work under supervision of a member of the graduate faculty. May be taken more than once for credit; up to 4 credits for thesis option of M.S. degree and up to 6 credits for the non-thesis option of the M.S. degree.
Prerequisite(s): Graduate student in biology and written permission of graduate faculty supervisor. Not open to non-degree graduate students.

BIOL 8030 EVOLUTION: FROM GENOMES TO ECOSYSTEMS (3 credits)
This course will prepare students to evaluate and discuss evolution as an underlying concept in all of biology. Further, it will provide a comprehensive overview of evolutionary processes related to the evolution of genomes, development, physiology, morphology, behavior, and ecosystems. (Cross-listed with STEM 8030).
Prerequisite(s): Courses for graduate admission or equivalent, or with permission of instructor.

BIOL 8036 SPECIAL TOPICS IN BIOLOGY (3 credits)
A lecture and/or laboratory course for biology majors pertaining to a specific biological topic not available in the regular curriculum. Topics will be developed by individual faculty members reflecting their special interests and expertise. The course may be repeated for credit. (Cross-listed with BIOL 4030).
Prerequisite(s): Graduate standing.

BIOL 8040 TOPICS IN BIOLOGY (1 credit)
Lecture courses for graduate students designed to provide exposure to biological specialties not offered in the regular curriculum.
Prerequisite(s): Graduate and permission. Not open to nondegree students. Not open to non-degree graduate students.

BIOL 8046 SPECIAL TOPICS IN BIOLOGY-LAB (1 credit)
A laboratory course for biology majors pertaining to a specific biological topic not available in the regular curriculum, paired with a BIOL 8036/4030 Special Topics lecture course. Topics will be developed by individual faculty members reflecting their special interests and expertise. The course may be repeated for credit. (Cross-listed with BIOL 4034).
Prerequisite(s): Graduate standing.

BIOL 8060 ADVANCED TOPICS IN BIOLOGY (3 credits)
Lecture and/or laboratory courses for graduate students designed to provide exposure to biological specialties not offered in the regular curriculum.
Prerequisite(s): Graduate and permission. Not open to nondegree students.

BIOL 8070 ADVANCED READINGS IN BIOLOGY (1-3 credits)
An in-depth study of the literature in a limited segment of the biological sciences under the supervision of a graduate faculty member. May be taken more than once for credit up to a total of six credits.
Prerequisite(s): Graduate student in biology and written permission of graduate faculty supervisor. Not open to non-degree graduate students.
BIOL 8106 BIOGEOGRAPHY (3 credits)
This course is intended as an introduction to biogeography, the study of the distribution and evolution of organisms across space and through time. Usually offered every year. (Cross-listed with BIOL 4100, GEOG 4100, GEOG 8106, GEO 4100, GEO 8106)
Prerequisite(s): BIOL 1450 and 1750 or GEOL 3100 or BIOL 3100, junior-senior.

BIOL 8116 STATISTICS FOR BIOLOGICAL SCIENCES (4 credits)
Introduction to statistical methods and software used to display, summarize, analyze, and interpret biological and medical data. (Cross-listed with BIOL 4110)

BIOL 8126 CONSERVATION BIOLOGY (3 credits)
Study of biological diversity at the genetic, species and ecosystem levels, its values, and the factors that threaten it. We will explore the scientific basis of conservation biology and how it can be applied to the maintenance of biological diversity. Usually offered every year. (Cross-listed with BIOL 4120).
Prerequisite(s): Graduate student in Biology. Not open to non-degree graduate students.

BIOL 8136 MOLECULAR GENETICS (4 credits)
A lecture and lab course that explores the frontiers of molecular genetics research. Topics addressed will include DNA replication, gene function, gene expression, genetic manipulation, cloning, mutational analysis, genome sequencing, and epigenetics. Research techniques will include DNA/RNA isolation, PCR, cloning, gel electrophoresis, transgene generation, data analysis, and quantitative rTPCR. Students will get a solid grounding in scientific writing and presentations, as well as reading and assessing primary scientific literature. Lecture, discussion, and laboratory. Usually offered full semester. (Cross-listed with BIOL 4130)
Prerequisite(s): BIOL 2140, 3020 and CHEM 2210 or 2260 or their equivalents. Not open to nondegree graduate students.

BIOL 8146 CELLULAR BIOLOGY (4 credits)
This course is a modern study of mammalian cell function. Focus will be placed on developing skills in experimental cellular biology. Material covered will include tissue culture techniques, cell staining applications, fluorescent microscopy, determination of gene expression, and high-throughput assay design. (Cross-listed with BIOL 4140)
Prerequisite(s): BIOL 2140, 3020 and CHEM 2210 or 2250. Junior or senior undergraduate standing or graduate standing. Must enroll in laboratory section and lecture for this course. Not open to non-degree graduate students.

BIOL 8150 PROFESSIONAL DEVELOPMENT IN BIOLOGY (2 credits)
This course focuses on developing the skills needed for becoming a successful professional biologist. Students actively participate in developing key research and teaching skills including: developing and writing grant proposals and papers, communicating science to the general public and to professional audiences through oral and poster presentations, constructive reviews of the work of others in the context of teaching and as a working professional, and development of teaching materials and assessments. Professional and ethical norms in research and teaching are discussed throughout the course. By the end of the course, students will be able to evaluate alternative career paths within biology and devise development plans appropriate for those careers.
Prerequisite(s): Graduate student in biology and permission of graduate program chair.

BIOL 8156 CANCER BIOLOGY (3 credits)
The etiology of cancers, differences between types of malignancies, oncogenes and genetic modifiers, treatments, susceptibility, and tumor-induced immunosuppression are discussed. This is an active course focused on inquiry-based learning and the purpose of this course is to provide students a foundation in cancer biology while applying tools learned through cell biology, genetics, and immunology courses. (Cross-listed with BIOL 4150).

BIOL 8166 BIOINFORMATICS FOR BIOLOGISTS (3 credits)
This course intends to introduce fundamental concepts in bioinformatics with an emphasis on how to use biological databases and computational tools to solve common bioinformatics problems in biology and biomedicine. The topics consist of sequence database access and searching, sequence alignment and phylogeny, functional prediction of DNA and protein sequences, and genome sequencing and annotation. Students are expected to learn fundamental concepts in bioinformatics and gain extensive experience with the use of bioinformatics analysis tools. (Cross-listed with BIOL 4160).
Prerequisite(s): BIOL 2140 Genetics; BIOL 3020 Molecular Biology of the Cell; Or Permission of instructor

BIOL 8170 ECOSYSTEM ANALYSIS FOR EDUCATORS (3 credits)
This course is designed for education graduate students who wish to take a field-based biology course that uses an interdisciplinary approach to understanding the ecosystem of the tallgrass prairie. This course engages graduate students in methods reflecting multidisciplinary STEM strategies (e.g. scientific inquiry, modeling, geographic information system mapping, etc.) associated with research taking place at the Glacier Creek Preserve. Graduate students completing this course will develop advanced knowledge of ecology, restoration ecology, and monitoring of prairie habitat restoration. Graduate students will focus on the technical, biogeochemical, ecological and cultural aspects of analyzing and restoring the prairie ecosystem and its various habitats. (Cross-listed with STEM 8170)
Prerequisite(s): Graduate Standing or Permission from the Instructor.

BIOL 8186 FRESHWATER ECOLOGY (4 credits)
A study of the physical, chemical and biological relationships that serve to establish and maintain plant and animal communities in freshwater environments. (Cross-listed with BIOL 4180, ENVN 4180).
Prerequisite(s): Prerequisites: BIOL 1450 and BIOL 1750, junior-senior, or permission of instructor. Registration requirements: Must enroll in lab. Not open to non-degree graduate students.

BIOL 8190 COMMUNITIES AND ECOSYSTEMS (3 credits)
Advanced study of populations, communities and ecosystems; may require overnight weekend field trips.
Prerequisite(s): BIOL 3340/8345, graduate in biology. Not open to nondegree students.

BIOL 8200 PLANT ECOLOGY (4 credits)
Advanced study of plant communities and of individual plant species including relationships with the environment and vegetative dynamics. Emphasizes on methods of evaluation and analysis. May require overnight field trips.
Prerequisite(s): BIOL 3340/8345, graduate in biology. Recommended: BIOL 3530/8535.

BIOL 8216 FIRE ECOLOGY (3 credits)
Study of fire in ecosystems including characteristics of fire, effects on flora, fauna and the abiotic environment, and use in maintaining native ecosystems. May include two weekend field exercises. (Cross-listed with BIOL 4210).
Prerequisite(s): BIOL 3340; junior, senior, or graduate student

BIOL 8226 POPULATION BIOLOGY (4 credits)
Population biology takes a conceptual approach to study the dynamics, ecology, genetics, and evolution of populations. Topics include the growth and regulation of populations, population interactions, selection on individuals and groups, mating systems, and life history evolution. Implications of these topics for areas such as the ecology and evolution of disease, conservation, and resource management will be highlighted. Concepts are reinforced through labs emphasizing interpretation of results from population simulations and the relationship between theory and experimentation in population biology. Usually offered in alternate years. (Cross-listed with BIOL 4220).
Prerequisite(s): Graduate student in Biology or permission of instructor
BIOL 8236 EVOLUTION (3 credits)
The course emphasizes the general principles of evolution, particularly focusing on evolutionary changes and the mechanisms of evolution (natural selection, gene flow, mutation and genetic drift) that apply to all or most organisms. The course covers micro- and macroevolution, speciation, and human evolution. Students will discover how scientists can learn about what has happened in the evolutionary past and the most common patterns of change (i.e., changes that have characterized various groups of organisms). (Cross-listed with BIOL 4230).
Prerequisite(s): Prerequisites are BIOL 2140, junior or senior undergraduate status, Biology graduate status, or permission by the instructor. Not open to non-degree graduate students.

BIOL 8246 MARINE BIOLOGY (3 credits)
An introduction to the marine environment, this course explores physical conditions of the ocean including ocean chemistry, salinity, waves and currents, and tides as well as the ecology of planktonic, nektonic and benthic organisms— their communities and environments. Impacts of humans on the marine environment will also be covered. (Cross-listed with BIOL 4240)
Prerequisite(s): BIOL 1750

BIOL 8250 STATISTICAL ANALYSIS AND DESIGN FOR BIOLOGICAL RESEARCH (4 credits)
This course examines the statistical aspects of the design and analysis of laboratory and field experiments in biology. Basic statistical methods are reviewed and advanced methods presented. Lectures focus on an introduction to the theory behind experimental design and statistical analysis. Labs focus on how to properly complete and interpret statistical analyses, and also focus on how to use the R statistical computer package.
Prerequisite(s): Undergraduate course in statistics is recommended. Non-degree students must gain permission of the instructor before enrolling. Not open to non-degree graduate students.

BIOL 8256 FIELD MARINE BIOLOGY (1 credit)
This lab is a hands-on introduction to the marine environment using a field trip to the Gulf Coast. Students will observe first-hand examples of local marine habitats and organisms. Students will be required to take a trip to the Gulf Coast of Texas, Louisiana, Mississippi, and Alabama during Spring Break. Students will be required to provide their own basic camping and snorkeling gear. (Cross-listed with BIOL 4250)
Prerequisite(s): BIOL 1750, previous or concurrent enrollment in BIOL 4240 and permission of instructor.

BIOL 8266 BEHAVIORAL ECOLOGY (3 credits)
Behavioral ecology is the study of behavior from an evolutionary and ecological point of view. Through the integration of research at different organizational levels and the use of many different organisms, behavioral ecology is one of the most integrative fields in biological sciences. This course will provide an introduction to the basic concepts of behavioral ecology and the integrative approaches used in behavioral ecology. Further, the course will train students in critical reading and discussion of primary literature in writing and in an oral setting. (Cross-listed with BIOL 4260)
Prerequisite(s): Admission into the graduate college. Not open to non-degree graduate students.

BIOL 8276 ANIMAL BEHAVIOR (3 credits)
Behavior of diverse animals for the understanding of the relationships between nervous integration and the behavior manifested by the organism, as well as the evolution and adaptive significance of behavior as a functional unit. (Cross-listed with BIOL 4270, PSYC 4270, PSYC 8276)
Prerequisite(s): BIOL 1750 and PSYC 1010 or permission of instructor, junior-senior.

BIOL 8286 ANIMAL BEHAVIOR LABORATORY (3 credits)
Laboratory and field studies of animal behavior with an ethological emphasis. Classical laboratory experiences and independent studies will be conducted. (Cross-listed with BIOL 4280, PSYC 4280, PSYC 8286)
Prerequisite(s): PSYC 4270 or BIOL 4270 or PSYC 8276 or BIOL 8273. Not open to non-degree graduate students.

BIOL 8296 NEUROETHOLOGY (3 credits)
In the field of Neuroethology a major goal is to understand the neural bases of animal behaviors in a natural context. In this course students will investigate how behaviors are generated and modulated by the nervous system in organisms ranging from insects to mammals. We will explore the neural mechanisms underlying a variety of animal behaviors as they interact with their natural environment ranging from sensory perception of the world (e.g. echolocation, electrolocation), to locomotor movements (e.g. flying, swimming), to more complex behaviors (e.g. learning, memory). (Cross-listed with BIOL 4290, NEUR 4290, NEUR 8296, PSYC 8296).
Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

BIOL 8326 HORMONES & BEHAVIOR (3 credits)
In this course, students will examine the interaction between hormones, chemical messengers released from endocrine glands, and behavior in both human and animal systems. Methods for studying hormonal issues on behavior will be addressed. This course will provide students in psychology, biology, and related disciplines an understanding of how hormones affect sensory processing, motor activities, and processing of information in the central nervous system. (Cross-listed with BIOL 4320, PSYC 4320, PSYC 8326)
Prerequisite(s): Admission to graduate level PSYC program or permission of dept. Not open to non-degree graduate students.

BIOL 8345 ECOLOGY (4 credits)
Study of interrelationships between organisms and their biotic and abiotic environment; includes the physical environment, population biology, community dynamics, biotic interactions and evolution. Usually offered Fall, Spring, Summer. (Cross-listed with BIOL 3340).
Prerequisite(s): Prerequisites are BIOL 1450 and BIOL 1750; junior-senior or Biology graduate student; or permission by instructor. Not open to non-degree graduate students.

BIOL 8416 WETLAND ECOLOGY AND MANAGEMENT (3 credits)
This course will examine the principles and theory of wetland ecology with application towards wetland management and regulation. An interdisciplinary overview of physical, biological and regulatory aspects of wetlands will allow students to synthesize information from their backgrounds in geography, geology and ecology. Definitions, classifications, natural processes and functions of wetland environments will be presented. Labs concentrate on field techniques used to assess specific plant, animal, soil, and hydrological characteristics of wetlands. (Cross-listed with ENVN 4410 and BIOL 4410)
Prerequisite(s): BIOL 3340 or instructor permission.

BIOL 8426 RESTORATION ECOLOGY (3 credits)
Restoration Ecology examines how people assist with the recovery of ecosystems that have been degraded. The course will examine the theory and application of restoration ecology through lecture, discussion, field trips, and development of a restoration management plan for a degraded ecosystem near Omaha. The course will provide information and resources used by restoration and land management professionals to plan, implement, and manage restorations. (Cross-listed with BIOL 4420, ENVN 4420)
Prerequisite(s): Graduate standing.

BIOL 8446 PLANT PHYSIOLOGY (4 credits)
A study of plant processes and functions with emphasis on photosynthesis, growth and development, metabolism and mineral nutrition. (Cross-listed with BIOL 4440)
Prerequisite(s): BIOL1450, BIOL1750, and CHEM 2210 or CHEM 2250; or permission of instructor.
BIOL 8450 BIOLOGY EDUCATION RESEARCH METHODS (3 credits)
In this course, students will learn the methods of conducting pedagogical research in Biology, understand how people learn the concepts, practices, and ways of thinking in science and engineering; understand the nature and development of expertise in a discipline; help identify and measure appropriate learning objectives and instructional approaches that advance students toward those objectives; contribute to the knowledge base in a way that can guide the translation of statistical findings to classroom practice; and identify approaches to make science and engineering education broad and inclusive. Students will work with live data sets to evaluate effective pedagogical approaches in the biology classroom of various audiences (K-16).

BIOL 8454 VIROLOGY LABORATORY (1 credit)
A laboratory to accompany virology lecture. This course enables students to work with viruses in the laboratory and to conduct experiments using viral systems. Experimental design, data gathering, data analysis and manuscript writing will be integral parts of the course. The experiments include host cell characterization, viral infection, virus purification from infected cells, viral genome isolation and viral transfection. Sequence analysis and sequence comparison will also be introduced. Laboratory exercises will emphasize fundamental molecular biology techniques and instrumentation. Usually offered in Fall semester. (Cross-listed with BIOL 4454)

BIOL 8456 VIROLOGY (3 credits)
A comprehensive course about viruses. The course will address principles of viral infection, virus-host interaction, viral evolution and viral disease processes. Cellular and molecular aspects of viral infection will be the primary focus. This will include examination of viral particles, viral multiplication cycles, regulation of gene expression, viral assembly and viral escape. Viral immunology, viral defenses, viral vaccines and antiviral compounds will also be addressed. Emerging viruses and current viral topics will be a major part of the course. Usually offered in Fall semester. (Cross-listed with BIOL 4456)

BIOL 8466 COMPARATIVE IMMUNOLOGY (4 credits)
This course is an exploration of comparative immunology across kingdoms. There will be a strong focus on human as well as mouse immunology. Laboratory sessions require dissections to determine lymphoid anatomy of representative organisms. Samples will be prepared and analyzed using immunological techniques such as flow cytometry. (Cross-listed with BIOL 4460).
Prerequisite(s): Two classroom sessions and one laboratory session per week. Graduate standing. Not open to non-degree graduate students.

BIOL 8496 MEDICINAL USES OF PLANTS (3 credits)
A scientific study of the biochemical properties and physiological effects of medicinal plants, including their historical uses, current applications to varying systems of the human body, and pathways by which today's potent drugs have transitioned from wild flora. Usually offered Fall semesters of even-numbered years. (Cross-listed with BIOL 4490)

BIOL 8535 FLORA OF THE GREAT PLAINS (4 credits)
A study of common vascular plants found in the Great Plains region, including identification, description, and classification techniques and an introduction to the plant communities of Nebraska. Usually offered every Fall and Summer. (Cross-listed with BIOL 3530.)
Prerequisite(s): BIOL 1450-1750. Not open to nondegree students.

BIOL 8606 GIS APPLICATIONS FOR ENVIRONMENTAL SCIENCE (1 credit)
This course introduces the use of geographic information systems (GIS) and other geospatial tools for work in the fields of environmental science, ecology, and natural resource management. The course will develop a working knowledge of the common software and hardware tools used by ecologists through hands-on projects. (Cross-listed with BIOL 4600, ENVN 4600)
Prerequisite(s): BIOL 3340 or permission of instructor.

BIOL 8645 MOLECULAR MICROBIOLOGY LAB (1 credit)
This course will train students to perform techniques commonly used in microbiology labs, such as isolation of bacteria, staining of bacterial cells, use of different media, antibiotic susceptibility tests, polymerase chain reactions, and enzymatic assays. (Cross-listed with BIOL 4644).
Prerequisite(s): Prerequisites of BIOL 2140 and BIOL 3020 and either BIOL 3830/8835 or BIOL 4640/8646 prior or concurrent.

BIOL 8646 MOLECULAR MICROBIOLOGY (3 credits)
This course will cover the diversity observed in genomes, molecules, structures, metabolism, and regulation observed in microorganisms with a focus on bacteria and Archaea. Usually offered Fall semesters. (Cross-listed with BIOL 4640).
Prerequisite(s): Prerequisites are BIOL 2140 and BIOL 3020 or equivalents. Not open to non-degree graduate students.

BIOL 8654 BIOCHEMISTRY I LABORATORY (1 credit)
A laboratory course to help integrate the concepts learned in biochemistry lecture with the development of biochemical laboratory skills including experimental design, data analysis, presentation of results and communication of scientific information, with a focus on formal instruction in journal-style writing and notebook skills. There is an emphasis on protein properties, including enzyme activity. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. (Fall) (Cross-listed with BIOL 4654, CHEM 4654, CHEM 8654).

BIOL 8656 BIOCHEMISTRY I (3 credits)
A comprehensive introduction to biochemistry emphasizing: structure-function relationships for proteins, carbohydrates, lipids, and nucleic acids; protein purification; enzyme kinetics and mechanisms; membranes and membrane transport; carbohydrate metabolism including glycolysis, the citric acid cycle and oxidative phosphorylation; and important applications of thermodynamics and the properties of water to living systems. (Fall) (Cross-listed with BIOL 4650, CHEM 4650, CHEM 8656).
Prerequisite(s): CHEM 2260 and CHEM 2274; and either CHEM 2400 or BIOL 3020, all with a C- or better. Other comparable courses taken at accredited colleges or universities are acceptable. BIOL 8654 must be taken concurrently.

BIOL 8664 BIOCHEMISTRY II LABORATORY (1 credit)
A laboratory course to help integrate the concepts learned in Biochemistry II lecture with the development of biochemical laboratory skills, to gain practical experience in experimental design, data analysis, presentation of results and communication of scientific information, with a focus on formal instruction in journal-style writing and notebook skills. There is an emphasis on nucleic acid properties. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. (Spring) (Cross-listed with BIOL 4664, CHEM 4664, CHEM 8664).

BIOL 8666 BIOCHEMISTRY II (3 credits)
A continuation of the study of the structure and function of biomolecules and biochemical reactions with an emphasis on metabolism of carbohydrates, lipid, amino acids and nucleotides, and the chemistry of signal transduction and genetic information transfer. (Spring) (Cross-listed with BIOL 4660, CHEM 4660, CHEM 8666).
Prerequisite(s): CHEM 8656 and CHEM 8664 or BIOL 8656 and BIOL 8664 with a grade of B- or better. BIOL 8664 must be taken concurrently.

BIOL 8685 BIOLOGY OF AFRICA (3 credits)
Biology of Africa (3) Introduction to the plants, animals, and habitats of Africa. Although other groups are included, this course will focus on the large mammals of east Africa and will pay particular attention to elephant reproduction and biology. Other topics include Serengeti migrations, hippos, lions and other large cats, reptiles, and human evolution. Usually offered alternate Spring semesters. (Cross-listed with BIOL 3680).
**Biol 8695  BiologY of Africa lab (1 credit)**

Biol 3690/8695 Biology of Africa (1) A hands-on introduction to the major plants and animals of east Africa using a field trip to South Africa. Students will observe, first-hand, examples of the flora and fauna of the African savannah, partake in research on elephant reproductive biology, and observe historic African tribal culture. Students will be required to take a trip to South Africa including Johannesburg, Hoedspruit, Kruger National Park, and Skukuza. Students will be required to register their travel plans through Education Abroad. Usually offered alternate Summer semesters. Students enrolled in this course must have taken Biol 3680/8685 during the spring semester immediately prior to this class, or have taken it some semester prior. (Cross-listed with Biol 3690).

**Prerequisite(s):** Previous or concurrent enrollment in Biol 3680/ Biol 8685 lecture.

**Biol 8716 Toxicology (3 credits)**

An overview of the fundamentals of toxicology. Concepts include the dose-response relationship, absorption, distribution and excretion of toxicants, and the biotransformation of xenobiotics. Emphasis will be given to metals, pesticides, pharmaceutical compounds, chemical carcinogenesis and endocrine disruption. Usually offered Fall. (Cross-listed with Biol 4710)

**Prerequisite(s):** Chem 2210 or 2260 and Biol 1750, Biol 3020 or equivalent.

**Biol 8735 Fauna of the Great Plains (3 credits)**

A survey of the common animal groups found in the Great Plains, including their evolution, ecology, distribution and specific adaptations to the environment of the temperate North American grasslands.

**Prerequisite(s):** Biol 1750. Not open to nondegree students.

**Biol 8736 Vertebrate Endocrinology (4 credits)**

An overview of the fundamentals of vertebrate endocrinology. Concepts include: the mammalian hypothalamus-pituitary system, the endocrinology of mammalian reproduction, the mammalian adrenal glands, endocrine disruption, endocrinology and metabolism. (Cross-listed with Biol 4730)

**Prerequisite(s):** Biol 1750, Biol 3020 or equivalent. Not open to nondegree graduate students.

**Biol 8746 Animal Physiology (3 credits)**

An overview of the fundamentals of animal physiology. Concepts include: the physiology of nerve and muscle function, endocrine function, cardiovascular and respiratory function, oxygen and carbon dioxide delivery by the blood, and osmoregulation and excretion. The course is comparative in nature, including examples from humans, mammals, vertebrates and invertebrate animals. Usually offered Spring. (Cross-listed with Biol 4740.)

**Biol 8760 Clinical Reasoning (3 credits)**

This is an intensive class in which students will translate biological concepts into solving case-based scenarios in clinical medicine. Relevant readings will prepare students to address these challenges in small-group settings. Intended as an advanced preparatory course for healthcare professionals or students desiring exposure to clinical decision-making. Usually offered during Summer semester.

**Prerequisite(s):** Molecular Biology; Microbiology or Immunology; plus instructor approval.

**Biol 8766 Genome Technology and Analysis (3 credits)**

This course will introduce the latest genome sequencing technologies and their broad applications in biology and medicine. Students will learn how genome sequencing is conducted by different platforms and obtain practical experience of how to use bioinformatics tools for genome analysis. Students are expected to be able to perform sequence analysis efficiently and interpret the results properly. (Cross-listed with Biol 4760)

**Prerequisite(s):** Biol2140 Genetics; or Permission of instructor

**Biol 8770 Clinical Readings (3 credits)**

This course is a rigorous study of current biomedical, translational, and clinical primary literature spanning a wide range of human health and disease.

**Prerequisite(s):** Graduate and written permission of graduate faculty member.

**Biol 8786 Vertebrate Zoology (4 credits)**

A study of the general biology of the subphylum Vertebrata including the morphology, anatomy, physiology and ecology of Vertebrate representatives. (Cross-listed with Biol 4780)

**Prerequisite(s):** Prerequisites are Biol 1450, Biol 1750, and Junior or Senior standing.

**Biol 8796 Mammalogy (4 credits)**

The biology of mammals, including their evolution, functional morphology, physiology, ecology, zoogeography, behavior, classification and identification, with emphasis on North American groups. Field trips. Usually offered in alternate years. (Cross-listed with Biol 4790)

**Prerequisite(s):** Biol 1450, Biol 1750, Junior or Senior standing. Must enroll in laboratory section.

**Biol 8826 Introduction to Environmental Law & Regulations (3 credits)**

Seminar on environmental law and regulation. The course will address federal regulations, implementing instructions, legal principles and requirements. The major federal environmental laws, air and water quality, solid and hazardous waste, and pollution prevention and remediation will be discussed. Usually offered Fall semesters.

**Prerequisite(s):** Junior-senior and permission.

**Biol 8835 Biology of Pathogenic Microorganisms (3 credits)**

This course will cover diseases commonly caused by microorganisms and the features of the microorganisms that cause those diseases. The course will also cover terms used to describe infections, their transmission and their occurrence, and the defenses of humans against infections. The goal of the course is to provide students with the knowledge to be able to diagnose common infectious diseases based on symptoms and test results. Usually offered in Spring semesters. (Cross-listed with Biol 3830)

**Prerequisite(s):** Biol 2140 or Biol 2440 or Biol 3240 or the equivalent, or by instructor permission. Not open to non-degree graduate students.

**Biol 8836 Developmental Genetics (2 credits)**

This course considers experimental approaches in developmental genetics and provides students with first-hand experience in laboratory techniques used in developmental genetics. (Cross-listed to Biol 4830)

**Prerequisite(s):** This course considers experimental approaches in developmental genetics and provides students with first-hand experience in laboratory techniques used in developmental genetics.

**Biol 8846 Herpetology (4 credits)**

The biology of amphibians and reptiles, including their evolution, classification, anatomy, physiology, ecology, distribution and identification, with emphasis on North American groups. Methods for studying herptiles are examined. Usually offered in Spring semesters of even years. (Cross-listed with Biol 4840)

**Prerequisite(s):** Prerequisites are Biol 1450, Biol 1750 and Junior-Senior standing. Must enroll in lab. Not open to non-degree graduate students.

**Biol 8856 Developmental Biology (3 credits)**

This course explores principles underlying the development of multicellular organisms, stressing the environmental, genetic, molecular, cellular, tissue, and evolutionary mechanisms of animal development. Usually offered once per year. (Cross-listed with Biol 4850)

**Biol 8866 Comparative Genomics (3 credits)**

This course will introduce fundamental concepts in genomics and genome comparison. Students will learn how genomes are constructed, how they evolve, how individual genomes are unique, and what genomic knowledge means in terms of human health and medicine. (Cross-listed with Biol 4860)
BIOL 8876 MOLECULAR AND CELLULAR NEUROBIOLOGY (3 credits)
This course presents foundational topics in molecular and cellular neurobiology in the context of how the nervous system is functionally organized. Topics include: nervous system cell types and their subcellular organization; electrical properties of neurons and glia; energy metabolism and biochemistry of the brain; intra- and intercellular neuronal signaling; the regulation of gene expression in neuronal cells; synaptic plasticity; and how these are altered in disease. (Cross-listed with BIOL 4870, NEUR 4870, NEUR 8876).

Prerequisite(s): NEUR 1500, or both NEUR 1520 and NEUR 1540, or BIOL 3020, or permission of instructor.

BIOL 8896 GENES, BRAIN, AND BEHAVIOR (3 credits)
This course will evaluate the complex interaction between an organism’s genome and neural activity pattern in the nervous system as related to behavior. In this course students will explore how changes in gene expression (allelic variants, epigenetics, differential regulation) and gene networks within neural tissue can reciprocally influence behaviors such as communication, foraging, reproduction, and cognition. (Cross-listed with BIOL 4890, NEUR 4890, NEUR 8896, PSYC 8896)

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

BIOL 8946 ENTOMOLOGY (4 credits)
The study of insects; their classification, morphology, physiology, behavior, life histories, ecology and evolution. (Cross-listed with BIOL 4940)

Prerequisite(s): BIOL 1450, BIOL 1750. Junior or Senior standing.

BIOL 8966 ADVANCED GENETICS (3 credits)
An in-depth consideration of topics in genetics, including the conceptual and molecular definition of a gene, cytogenetics, mutation, population genetics, developmental genetics, gene regulation and the application of genetics to other areas of biology. (Cross-listed with BIOL 4960).

Prerequisite(s): BIOL 2140 and BIOL 3020 and concurrent enrollment or completion of either CHEM 3650 or CHEM 4610 or CHEM 4650 or BIOL 4650, or permission of the instructor.

BIOL 8976 ADVANCED BOTANY (4 credits)
Advanced Botany examines plant structures (cells, tissues, and organs) and their connections with plant functions (growth, reproduction, photosynthesis, respiration, and dispersal). Topics covered include energy metabolism, development and morphogenesis, genetics, ecology, and the latest in plant taxonomy and phylogeny, keeping students on the forefront of cutting-edge botanical research. In lab, students conduct activities such as dissecting plant organs, making microscope slides, and conducting plant-based experiments, using plants from the local area, from native Great Plains collections, and from around the world and grown in the greenhouse. Students compare and contrast both physiological and morphological adaptations to varying environments. (Cross-listed with BIOL 4970, ENVN 4970).

Prerequisite(s): Graduate Standing

BIOL 8986 ORNITHOLOGY (4 credits)
An introduction to the general biology of birds, including their anatomy, physiology, behavior, ecology, classification and identification with emphasis on North American groups. Usually offered in alternate years. (Cross-listed with BIOL 4980)

Prerequisite(s): BIOL 1750.

BIOL 8990 THESIS (1-6 credits)
An original and independent research project written under the supervision of a faculty thesis advisory committee.

Prerequisite(s): Graduate student in biology and written permission of graduate faculty supervisor. Not open to non-degree graduate students.

Biology, MS
Department of Biology, College of Arts and Sciences

Vision Statement
The goal of the Department of Biology is to provide students with individualized, broad training in biology leading to a Master of Science (MS) degree. Original research is an integral part of both the thesis and non-thesis degree options. Faculty areas of expertise include ecology, physiology, genetics, molecular biology, taxonomy, behavior, and developmental biology of a wide variety of organisms. The MS degree prepares students for employment in industry, private or government agencies, and academics, as well as further education in professional programs, such as the PhD or MD.

Program Contact Information

402.554.2840
rkellar@unomaha.edu

Program Website (https://www.unomaha.edu/college-of-arts-and-sciences/biology/)

Other Program Related Information
The Department of Biology annually awards graduate assistantships. New applicants should indicate their interest in applying for an assistantship as part of the admission application and should include your employment history along with names and contact information of three references in your resume or CV. The assistantships require 20 hours per week of teaching and/or other assignments.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the applicant has elected to begin coursework.

To receive full consideration for funding, applications for fall or summer must be received by January 15. Spring applicants must submit applications by September 15 for funding consideration. Applicants submitting applications after these priority deadlines will be considered for graduate teaching assistantships if funding is available and may apply for support in subsequent semesters.

Other Requirements

• The applicant’s GPA in undergraduate biology courses will be determined and must be 3.0 or above (on a 4.0 scale).
• Applicants should have a strong background in biology and related disciplines with a minimum of 24 credit hours in biology or related life sciences, including courses in ecology and molecular or cell biology, as well as college-level course work in chemistry and math or statistics. Applicants lacking courses in one or more of these areas may be admitted provisionally and required to complete additional courses during their graduate program as a condition of admission.
• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
• Internet-based TOEFL: 95, IELTS: 7, PTE: 64, Duolingo: 125
• Statement of Purpose: The Department of Biology strongly encourages applicants to contact a professor whose research interests overlap with their own goals for graduate research. Due to the
individualized nature of the biology graduate program, otherwise qualified applicants may not be admitted if appropriate faculty are not available to serve as advisors. Please indicate in your statement of purpose which faculty member has been contacted or plan to contact.

- **Resume or curriculum vitae (CV)**—including an outline of educational background, employment history, research experience, and a list of references.
- **Letters of Recommendation**: Three academic letters of recommendation are required.
- Applicants not meeting the GPA criteria may provide written evidence of experience or potential to perform outstanding graduate work and petition the department for provisional admission as long as their biology GPA is above the 2.7 minimum set by the Graduate College. Students seeking provisional admission should contact two or more biology faculty to discuss admission. Provisional admission will not be removed until the student has earned at least the grade of “B” (3.0 on a 4.0 scale) in each course involved in the first 12 hours of graduate study. Questions about requirements for admission should be directed to the Department of Biology.

**Degree Requirements**

**Thesis Option**
At least 50% of the 30 graduate credit hours must be graduate only courses (8xx0). The 30 credit hours of graduate course work must include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 8010</td>
<td>SEMINAR IN BIOLOGY</td>
<td>1</td>
</tr>
<tr>
<td>BIOL 8150</td>
<td>PROFESSIONAL DEVELOPMENT IN BIOLOGY</td>
<td>2</td>
</tr>
<tr>
<td>BIOL 8250</td>
<td>STATISTICAL ANALYSIS AND DESIGN FOR BIOLOGICAL RESEARCH</td>
<td>4</td>
</tr>
</tbody>
</table>

**Electives**
To be determined by the student, and approved by his/her graduate advisory committee; graduate courses in other departments may be included.

**Exit Requirement**
BIOL 8990 THESIS 6

**Total Credits** 30

**Non-Thesis Option**
At least 50% of the 36 graduate credit hours must be graduate only courses (8xx0). The 36 credit hours of graduate course work must include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 8010</td>
<td>SEMINAR IN BIOLOGY</td>

</tr>
</tbody>
</table>

**Electives**
To be determined by the student, and approved by his/her graduate advisory committee; graduate courses in other departments may be included.

**Total Credits** 36

Any substitutions to the required courses in the thesis or non-thesis options must be approved by the graduate program committee.

**Exit Requirements**
All degree students must form a supervisory committee of faculty, chaired by a major advisor from the Department of Biology. In consultation with the supervisory committee, students will develop a plan of study list courses required for graduation. This will include any deficiencies required as a condition of admission and a minimum of 30 graduate credits for the thesis option and a minimum of 36 credits for the non-thesis option. Graduate students are expected to attend the Graduate Seminar (BIOL 8010) even when not registered for it.

**Thesis Option (6 hours)**:
The thesis candidates must complete 6 credit hours of BIOL 8990, Thesis. All candidates should carefully review the Graduate College requirements for forming a Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of a thesis.

**Non-Thesis Option**: Comprehensive Examination administered by the supervisory committee.

**Biomedical Science Certificate**

**Department of Biology, College of Arts and Sciences**

**Vision Statement**
The goal of the proposed certificate is to provide a post-baccalaureate experience that will prepare students for future clinical training, particularly schooling for medicine, dentistry, pharmacy, physician assistant, or veterinarian. This certificate is distinct from the MS in biology, which aims to provide a broad experience in biological research. Certificate students receive integrated career and academic advising through the UNO Health Careers Resource Center (HCRC).

- Fall: February 15
- Spring: October 15

**Other Requirements**
- Applicants are required to have completed a bachelor’s degree and present a GPA of 3.0 or above (on a 4.0 scale).
- Applicants must complete the following prerequisite courses: applicants who have not completed all courses may apply for admission and will be expected to complete remaining prerequisites during their first semester.
- **English Language Proficiency**: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country...
Business for Bioscientists Certificate

Department of Business Administration, College of Business Administration; Department of Biology, College of Arts and Sciences

Vision Statement
This certificate program provides a basic understanding of business principles to biomedical PhD students. While UNMC PhD students receive extensive training in research methods and the principles of biology and medicine, they receive no formal training in business fundamentals. However, a significant portion of biomedical PhD students obtain employment in pharmaceutical, biotechnology, and other industries. For students with these career goals, formal training in business would markedly enhance their career options and competitiveness for these industry positions.

1 If a student has completed UNO CHEM 4660 within three years; CHEM 8666 and CHEM 8664 will be waived and four additional credit hours will be fulfilled with elective hours.
2 Courses taken for undergraduate credit cannot be retaken for graduate credit.
programs. With the high number of applicants in health professions, the medicine, physical therapy, occupational therapy, and other science based education beyond the bachelor's degree in the fields of biomechanics, designed to be an excellent choice for students planning to continue their interdisciplinary clinical and translational research. This program is enhanced by an evidence-based approach through these students. Other candidates for fellowships, assistantships, and scholarships given to quantitative sciences. This emphasis allows students to stand out among program areas. An additional strength of the coursework is its emphasis on pursing a doctoral degree. The coursework related to this degree program will provide the students with a strong and broad base which will enable students to enter the workforce at a professional level commensurate with a master’s degree or to continue their training in numerous doctoral areas. An additional strength of the coursework is its emphasis on quantitative sciences. This emphasis allows students to stand out among other candidates for fellowships, assistantships, and scholarships given to these students.

The program is enhanced by an evidence-based approach through interdisciplinary clinical and translational research. This program is designed to be an excellent choice for students planning to continue their education beyond the bachelor’s degree in the fields of biomechanics, medicine, physical therapy, occupational therapy, and other science based programs. With the high number of applicants in health professions, the MS in biomechanics gives applicants additional training in movement and quantitative sciences to stand out among other applicants.

**Other Program Related Information**

**Fast Track Program**
The Department of Biomechanics has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor’s degree and a master’s degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward completion of their undergraduate program as well as the graduate degree program.

Program Specifics:
- This program is available for undergraduate students pursuing a BS in Biomechanics desiring to pursue a MS in Biomechanics.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
  - Admission to Fast Track does NOT guarantee admission to the graduate program.
  - Applicants for this program are highly encouraged to pursue research opportunities in the Department of Biomechanics or comparable programs.
  - The admit term must be after the completion term of the undergraduate degree.

All 8000 level BMCH courses are eligible for students as part of the Fast Track program.

**Admissions**
General Application Requirements and Admission Criteria (p. 974)
Program-Specific Requirements

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework. Priority deadline of February 1 for consideration of department funded graduate assistantships.

Other Requirements

- GPA of 3.0 in undergraduate program
- Undergraduate Deficiency Courses:
  - MATH 1950 Calculus I
  - BMCH 2400 Human Physiology & Anatomy I (or equivalent)
  - BMCH 4630 Biomechanics (or equivalent)
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S. OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110, with no exceptions to this policy.
- Statement of Purpose: Written statement of goals and rationale for entering this graduate program. Also, identify the intended area of focus and the name of the faculty advisor with whom you wish to work (maximum one-page).
- Resume or Curriculum Vitae (CV)
- Letters of Recommendation: Two are required
- Applicants with International Transcripts: Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (https://www.wes.org/) (WES), Educational Credential Evaluators (https://www.ece.org/) (ECE), SpanTran (https://spantran.com/), or Educational Perspectives (https://www.edperspective.org/). This graduate program will conduct an in-house credential evaluation of the transcript(s).
  - UNO reserves the right to require a course-by-course evaluation from WES, ECE, SpanTran, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
  - *Note: If admitted, official transcripts and degree certificates (with an English translation) official course-by-course transcript evaluation, and any applicable official exam scores are required.

BMCH 8000 SEMINAR IN BIOMECHANICS (0 credits)

Required non-credit course for graduate students in biomechanics. Intended to familiarize the graduate student with current ongoing biomechanical research at UNO and other institutions. The seminar will additionally include topics focusing on professional development, job and educational opportunities, and biomechanical methodologies.

Prerequisite(s): Must be a student in BMCH graduate program. Not open to non-degree graduate students.

BMCH 8006 BIOMATERIALS (3 credits)

Students will learn the classification, properties, characterization methods, body interactions, applications, and design principles of biomaterials. (Cross-listed with BMKI 4000).

BMCH 8030 BIOSTATISTICS IN BIOMECHANICS I (3 credits)

The focus of the course is to prepare students to understand and apply research and biostatistical methods needed in the design and analysis of biomechanical investigations. The major topics to be covered include research design and multiple linear regression. (Cross-listed with BMKI 9031).

Prerequisite(s): Graduate Standing in Biomechanics program or Department Permission.

BMCH 8100 NONLINEAR ANALYSIS FOR MOVEMENT STUDIES (3 credits)

This course is to introduce different nonlinear methods for the analysis of biological and movement time series. Emphasis will be given on understanding the algorithms behind each nonlinear method. (Cross-listed with BMKI 9101).

Prerequisite(s): Instructor Permission.
BMCH 8106 BIOINSPIRED ROBOTICS (3 credits)
The goal of the course is to involve students in an interdisciplinary vision of biomechanics, biology, engineering and architecture by learning how humans and other animals function in their environment. These design principles from nature can be translated into novel devices, structures, and robots. (Cross-listed with BMCH 4100).

BMCH 8200 MATLAB FOR MOVEMENT SCIENCES (3 credits)
Introduction to Matlab software, plotting data, spectral analysis and the Fourier transform, data smoothing, and image analysis of movement related data. All topics will be implemented using Matlab. (Cross-listed with BMKI 9201).
Prerequisite(s): Instructor permission.

BMCH 8206 METHODS IN BIOMECHANICS I (3 credits)
In this course students learn about the methods and equipment used in biomechanics as well as the analysis of data collected from those methods. Course experiences include both lecture and lab based learning. (Cross-listed with BMCH 4200).
Prerequisite(s): Department Permission

BMCH 8216 METHODS IN BIOMECHANICS II (3 credits)
In this course students learn about advanced methods and equipment used in biomechanics, as well as the analysis of data collected from those methods. Course experiences include both lecture and lab based learning. This course builds on the experience gained in BMCH 4200/8206, Methods in Biomechanics I. (Cross-listed with BMCH 4210).
Prerequisite(s): BMCH 8206 or Department Permission

BMCH 8220 METHODS IN CARDIOVASCULAR BIOMATERIALS RESEARCH (3 credits)
This course contains lecture and lab components focused on cardiovascular biomaterial development and characterization methods used in academia and industry. The lecture component will provide the necessary clinical background of cardiovascular diseases and the theoretical background of cardiovascular biomaterials and state-of-the-art research methods. The lab component will provide practical experience focused on cardiovascular biomaterial design, manufacturing, and characterization methods. (Cross-listed with BMKI 9221).

BMCH 8300 STEM TEACHING METHODS FOR DEVICE DESIGN (3 credits)
STEM Teaching in Biomechanics focuses on principles in teaching including teaching models (Problem-Based, Team-Based, Inquiry-Based teaching), student assessment, classroom logistics/organization, and device design through a mentorship project. (Cross-listed with BMCH 4300).

BMCH 8400 MOTOR LEARNING I (3 credits)
Discussion and analysis of scientific principles related to the learning of motor skills; review related literature and research in motor learning. The focus of the course is on recent theories of how movements are acquired and performed, and on factors that have implications for motor learning throughout the life span. (Cross-listed with BMKI 9401).
Prerequisite(s): Department Permission.

BMCH 8410 MOTOR CONTROL I (3 credits)
The focus of the course is to explore the study of the conditions and factors that influence the control and performance of motor skills from both neurophysiological and psychobiological perspectives. (Cross-listed with BMKI 9411).
Prerequisite(s): Department Permission. Not open to non-degree graduate students.

BMCH 8420 MOTOR DEVELOPMENT (3 credits)
This course focuses on the study of motor development, the processes that underlie this development and the factors that influence it. Students will gain an understanding of the major theoretical perspectives of motor development across the life span with special emphasis given in child development. (Cross-listed with BMKI 9421).
Prerequisite(s): Department Permission.

BMCH 8450 ADVANCED BIOMECHANICS (3 credits)
The course will address the biomechanical basis of human performance including mechanical analysis of human gait, fundamental movement patterns and techniques used for collecting biomechanical data. (Cross-listed with BMKI 9451).
Prerequisite(s): BMCH 4630 (Biomechanics) (previously PE 4630) or Instructor Permission.

BMCH 8646 ORTHOPEDIC BIOMECHANICS (3 credits)
Orthopedic Biomechanics focuses on the use of biomechanical principles and scientific methods to address clinical questions that are of particular interest to professionals such as orthopedic surgeons, physical therapists, rehabilitation specialists, and others. (Cross-listed with BMCH 4640).
Prerequisite(s): Department Permission

BMCH 8666 CLINICAL IMMERSION FOR RESEARCH AND DESIGN (3 credits)
This course will involve exposure to current clinical practices, identification of unmet clinical needs, and information regarding future career options. In this course, students will be matched with local clinical sites to provide a unique opportunity for innovative and interdisciplinary approaches to problem solving subject to practical constraints. Concepts in clinical rehabilitation, integrated assessments, regulation of medical devices in health care will be covered. This course will review the latest research efforts for rehabilitation in the context of device design and implementation. (Cross-listed with BMCH 4660).
Prerequisite(s): Instructor Permission. Not open to non-degree graduate students.

BMCH 8676 INTRODUCTION TO MECHANICS OF BIOMATERIALS (3 credits)
In this course students will learn how to analyze the stresses and strains in different structures under complex loading conditions with extensive examples from biomaterials and materials generally used in the medical device field. (Cross-listed with BMCH 4670).
Prerequisite(s): BMCH 3000 or Department Permission

BMCH 8686 SPORTS BIOMECHANICS (3 credits)
This course is intended to provide students with a foundational knowledge on how to analyze sport movements through biomechanical analytical methods. Students will utilize foundational biomechanical principles and apply them to a variety of sports and associated movements. (Cross-listed with BMCH 4680).
Prerequisite(s): BMCH 4630

BMCH 8690 MATHEMATICS OF BIOMECHANICAL DATA PROCESSING (3 credits)
Biomechanics is a rapidly changing and technologically dependent field of study. A thorough understanding of the factors influencing outcome measures is critical to correctly interpreting results. Students will be exposed to various data acquisition systems, approaches, and choices required to assess the computational aspects of biomechanical data critically. This course will equip students to complete independent processing from raw data to 3D joint angles and forces. (Cross-listed with BMKI 9691).
Prerequisite(s): Departmental Permission

BMCH 8696 CARDIOVASCULAR BIOMECHANICS (3 credits)
This course will introduce students to cardiovascular biomechanics, emphasizing the integration of analytical and experimental methods to better understand the mechanobiology of tissues. (Cross-listed with BMCH 4690).
Prerequisite(s): BMCH 3000, BMCH 4670, or Department Permission

BMCH 8900 INDEPENDENT RESEARCH IN BIOMECHANICS (1-6 credits)
In this course individuals or groups will conduct research projects for the study and analysis of biomechanical topics.
Prerequisite(s): Permission of the Department and approval by Faculty Advisor. Not open to non-degree graduate students.
**BMCH 8910 INDEPENDENT STUDY IN BIOMECHANICS (1-6 credits)**

This is a variable credit course designed for graduate students in Biomechanics who would benefit from independent reading assignments and problems. Independent study enables individual students or a small group of students to focus on topics typically not explored in other offerings or to explore topics currently offered in further depth. (Cross-listed with BMKI 9911).  
**Prerequisite(s):** Graduate student in BMCH and approval by Faculty Advisor. Not open to non-degree graduate students.

**BMCH 8990 THESIS IN BIOMECHANICS (1-6 credits)**

A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's advisory committee. In this project the student will develop skills in research design, research conduct, data analysis, and reporting. The final product of this course will be an original thesis of independent scientific investigation.  
**Prerequisite(s):** Department Permission. Not open to non-degree graduate students.

### Biomedical Informatics

#### Degree Programs Offered

- Biomedical Informatics, MS (p. 1045)
- Biomedical Informatics, PhD (p. 1048)

**BMI 8000 ADVANCES IN BIOMEDICAL INFORMATICS (0 credits)**

BMI 8000 provides a regular forum for BMI graduate students, where the latest developments in the field of Biomedical Informatics are introduced and discussed. The course also functions as a central communication and collaboration hub for graduate students in BMI. Participation is required.  
**Prerequisite(s):** Students in the MS in BMI and PhD in BMI program may register. Not open to non-degree graduate students.

**BMI 8020 ADVANCED COURSE IN BIOINFORMATICS (3 credits)**

This is a special topics course designed to explore the research interests of faculty and students. Therefore, topics may include, but are not limited to, such areas of study as next-generational sequencing, biological networks, proteomics, metabolomics, and biomedical informatics.  
**Prerequisite(s):** Admission to the MS/PhD Program in the College of Information Science and Technology, or permission of the instructor. Not open to non-degree graduate students.

**BMI 8070 HEALTH INFORMATICS RESEARCH METHODS (3 credits)**

This is a foundational course for health informatics research methods. Health informatics is a broad term that denotes disciplines that encompass the use of computer and information science to manage all aspects of healthcare data and the use of healthcare information to foster better collaboration among a patient's various healthcare providers. This course takes a practical approach to understanding health informatics research methods through the use of real-life examples, step-by-step research method practices, and applying various analytical procedures. The course will guide the student through the process of designing research studies using a variety of research methods. Students are introduced to quantitative, qualitative and mixed methods designs through hands-on assignments and reviewing selected research studies. In addition, students will learn how to conduct a literature review. Students will learn about grant opportunities, the proposal writing process and IRB applications.  
**Prerequisite(s):** Graduate student status and prior or concurrent enrollment in BMI 8100, or by instructor approval.

**BMI 8000 SEMINAR IN BIOMEDICAL INFORMATICS (3 credits)**

This is a variable-content course that engages students in current research in Biomedical Informatics and develops skills in the oral and written presentation of scientific research.  
**Prerequisite(s):** Permission of the instructor. Additional prerequisite courses may be required for particular course offerings.

**BMI 8100 INTRODUCTION TO BIOMEDICAL INFORMATICS (3 credits)**

This course offers students an overview of the field of biomedical informatics, combining perspectives from computing, biosciences and medicine. The historical development of the field and its influence on biological, clinical, and translational research will be discussed. Issues related to bioinformatics, clinical, bioimaging and public health/population informatics will be explored.  
**Prerequisite(s):** Class standing of senior or above.

**BMI 8300 PUBLIC HEALTH GENOMICS (3 credits)**

This course will address the biopsychosocial issues that bridge genomics and public health, which are generally considered two vastly different disciplines. The focus will center on understanding how genomics may be incorporated into health promotion and disease prevention efforts for individuals and population.  
**Prerequisite(s):** Class standing of senior or above.

**BMI 8320 CONSUMER HEALTH INFORMATION SYSTEMS (1 credit)**

Consumer health informatics as a field focuses on health informatics from the perspective of the consumer or patient, health literacy, and consumer education. Creative problem solving and fluency in this subdiscipline requires competence in information structures and processes that empower consumers to manage their own health. In this course, students will strategically review publicly available databases, datasets, and projects involved in consumer health. With this information in hand, students will design their own consumer health information system geared towards addressing a consumer or patient education and literacy challenge of their interest.

**BMI 8400 LINEAR ALGEBRA FOR ADVANCED COMPUTING AND AI (3 credits)**

Matrix Analysis and Linear Algebra are at the core of several important algorithms and techniques that are widely used in machine learning for data analytics, imaging informatics, and bioinformatics. The course will explore fundamental concepts of matrix analysis and linear algebra as they apply to machine learning, emphasizing applications over proofs. Students will have an opportunity to perform “pencil and paper” calculations as well as more sophisticated numerical computations using a programming language/statistical environment of their choice. Applications of linear algebra to machine learning in the context of imaging informatics and biomedicine will be covered in depth.  
**Prerequisite(s):** Proficiency in programming and knowledge of calculus are required. Familiarity with concepts from biology is beneficial but not required.

**BMI 8540 FOUNDATIONS IN PROGRAMMING FOR BIOMEDICAL INFORMATICS (3 credits)**

Foundations in programming, software development, pipeline management, and version control are critical for developing a capable biomedical informatics workforce. This course will provide foundations in programming skills necessary for students with a limited computer science background to develop fluency and basic skills in the concepts of software development for biomedical informatics. Specific topics covered will include Unix/Linux shell programming, Python, databases, Applications Programming Interface (APIs), software versioning, and data management.  
**Prerequisite(s):** Experience with programming in a scripting, database management, or object-oriented programming language is strongly recommended but not required.
BMI 8850 BIOMEDICINE FOR THE NONMEDICAL PROFESSIONAL (3 credits)
This course will cover the basic principles of molecular and cellular biology, human anatomy, physiology, and pathology that are essential to an informed use of biomedical data. The biomedical topics will be interspersed and complemented with discussions about relevant data sources and datasets, emphasizing their strengths and weaknesses, and the lectures will be enriched with virtual anatomical dissections. Reading assignments from the primary literature and multimedia materials will supplement the textbook.
Prerequisite(s): Class standing of senior or above

BMI 8866 BIOINFORMATICS ALGORITHMS (3 credits)
The main objective of this course is to provide an organized forum for students to understand the foundations of algorithmic design and analysis in the context of health and biological data. The course will present fundamental concepts in algorithms (exhaustive, greedy, graph, heuristic, and more) and explore how those concepts extend to bioinformatics and related fields, such as biomedical informatics, and health informatics. Students will learn about historical context of these algorithms and how they were pivotal in forming more complex modern approaches, and will explore advanced algorithms in their area of interest. Students will also exercise their programming skills with the opportunity to implement and apply bioinformatics algorithms to real data, so to better grasp the technical components of algorithmic design and analysis. (Cross-listed with BIOI 4860).

BMI 8896 COMPUTERIZED GENETIC SEQUENCE ANALYSIS (3 credits)
The goal of this course is to introduce students to major topics in computerized analysis of genetic sequences. In particular the course will allow students to become familiar with the computational tools and software that aid in the modern molecular biology experiments and analysis of experimental results. Following the completion of this course, it is expected that the students will have a basic understanding of the theoretical foundations of the sequence analysis tools and develop competence in evaluating the output from these tools in a biological context. This course will emphasize hands-on experience with the programs for nucleotide and amino acid sequence analysis and molecular phylogeny. (Cross-listed with BIOI 4890).
Prerequisite(s): Permission from the instructor.

BMI 8900 INDEPENDENT RESEARCH IN BIOMEDICAL INFORMATICS (1-3 credits)
The content of the course will vary, however both the student and the faculty member must sign an Independent Research Agreement and file it with the Biomedical Informatics Graduate Program Committee before registration for the course. This agreement will detail the project, for the schedule of its completion, the form of the output, the method of evaluation and other relevant information pertaining to the project.
Prerequisite(s): Permission of instructor, and at least 12 hours of course work toward the MS BMI program should be completed.

BMI 8910 INTERNSHIP (1-3 credits)
The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the Biomedical Informatics graduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.
Prerequisite(s): Students must have completed a minimum of 12 credit hours towards the MS in BMI program. Not open to non-degree graduate students.

BMI 8950 BIOMEDICAL INFORMATICS GRADUATE CAPSTONE (3 credits)
The graduate capstone course challenges students to prove their mastery of the skills and domain knowledge they have gathered throughout their program of study. The course begins with a module on project management and research best practices. The majority of the course is structured around facilitating a non-trivial semester-long project, often in service to a third-party project sponsor, such as a community, industry, or government partner. The course is intended for students that have selected the coursework option, not thesis, and that are close to graduation.
Prerequisite(s): Students must have 9 credit hours or fewer left in the program, including this course. Students must have completed all core courses, and core electives are recommended but not required. Not open to non-degree graduate students.

BMI 8970 INDEPENDENT STUDY IN BIOINFORMATICS (1-3 credits)
This is a variable-credit course designed for graduate students in bioinformatics who would benefit from independent reading assignments and research-type problems. Independent study enables coverage of topics not taught in scheduled course offerings.
Prerequisite(s): Permission of a supervising faculty member and approval of the Bioinformatics Program Committee Chair. A formal description of the problem area to be investigated, the resources to be used, and the results to be produced must be prepared.

BMI 8990 THESIS IN BIOMEDICAL INFORMATICS (1-6 credits)
A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.
Prerequisite(s): Graduate major in BMI and approval of the Thesis Advisory Committee. Not open to non-degree graduate students.

BMI 9900 ADVANCED RESEARCH IN BIOMEDICAL INFORMATICS (3 credits)
This course provides a format for exploring advanced research areas for doctoral students in Biomedical Informatics and related fields. Specific topics will vary in keeping with research interest of faculty and students.
Prerequisite(s): Admission to graduate program in Biomedical Informatics. Not open to non-degree graduate students.

BMI 9980 INDEPENDENT STUDY IN BIOINFORMATICS (1-3 credits)
This course is not taught in scheduled course offerings. This is a variable-credit course designed for graduate students in bioinformatics who would benefit from independent reading assignments and research-type problems. Independent study enables coverage of topics not taught in scheduled course offerings.
Prerequisite(s): Admission to graduate program in Biomedical Informatics and permission of instructor. Not open to non-degree graduate students.

BMI 9990 DISSERTATION (1-12 credits)
The dissertation is an original research project conducted and written under the supervision of a faculty dissertation committee supervisory committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge in health or bioinformatics and demonstrate technical mastery of the discipline.
Prerequisite(s): Admission to the Ph.D. program in Biomedical Informatics and candidacy for the Ph.D. degree. Prior to enrolling for dissertation hours, the students must have permission of the supervisory committee. Not open to non-degree graduate students.

Biomedical Informatics, MS
School of Interdisciplinary Informatics, College of Information Science & Technology

Vision Statement
The vision of this program is to develop the next generation of biomedical specialists who are uniquely positioned to advance research and practice in contemporary information and knowledge management that impact
biomedical, clinical and translational research, healthcare services, healthcare practice, public health care, and healthcare delivery in general. Graduates will be able to use their preparation to apply and investigate information and communication technologies to solve problems in the related biomedical fields in a comprehensive, competitive and effective way.

The program is designed as a research-oriented program with the goals of preparing graduate students to conduct advanced basic and applied research while capably serving as prospective employees in academic research as well as the IT healthcare industry. The program is geared towards motivated traditional students and technology specialists with the appropriate educational background that are ready to expand their knowledge of contemporary biomedical informatics issues and become biomedical informatics in academic, clinical, and organizational settings.

Other Program Related Information

Fast Track
The School of Interdisciplinary Informatics (SII) has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor’s degree and a master’s degree in an accelerated time frame.** With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

• This program is available for undergraduate students pursuing any CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field.

• Students must have completed no less than 60 undergraduate hours.

• Students must have a minimum undergraduate GPA of 3.0.

• Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.

• Students will work with their undergraduate advisor to register for the graduate courses.

• A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.

• Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.

• Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.

• Admission to Fast Track does NOT guarantee admission to the graduate program.

• The admit term must be after the completion term of the undergraduate degree.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

• Fall: July 1
• Spring: December 1
• Summer: April 1

Other Requirements

• The minimum undergraduate grade point average (GPA) requirement for the MS in BMI program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a 4-year undergraduate degree.

• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.

• Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

• Statement of Purpose: a two-page, double-spaced, word-processed essay that addresses the following two topics:
  • Discussion of two accomplishments that demonstrate your potential for success in the graduate program
  • Discussion of your unique personal qualities and life experiences that distinguish you from other applicants to this graduate program

• Resume: Submit a detailed resume indicating your work experience and background.

• Letters of Recommendation: Two letters of recommendation from references who can evaluate your work and/or academic achievements are required

• Interview (optional): Although not required, applicants are strongly encouraged to arrange for an interview either one or more members of the Graduate Program Committee by directly contacting the committee chair. Telephone interviews are highly recommended for applicants outside the local area.

Degree Requirements

Science Foundation Requirements
Foundation courses ensure that all students in the Biomedical Informatics (BMI) MS program have a strong foundation on which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for subsequent classes in the program, but they also contain a distinct body of knowledge that is an important part of the BMI professional’s education. All foundation courses are required for all
students. However, applicants who have obtained an undergraduate BMI degree will typically already have this foundation. In such cases, most, if not all, foundation courses are waived. Applicants with undergraduate degrees in other disciplines, including computer science, management information systems, or engineering, will usually require one or more foundation courses. Occasionally, an applicant’s work experience may be sufficient to waive one or more of the foundation courses.

Waivers for foundation courses are granted by the chair of the graduate program committee upon the recommendation of the faculty member who is responsible for an individual course. Students requesting a waiver for a particular course should be prepared to meet with a faculty member and answer questions in the area of the course. They should bring to the meeting any relevant transcripts, course syllabi, course material, or evidence of practical experience. Some foundation courses may have an option for testing out.

Applicants should have background in anatomy, physiology, cell biology or equivalent (any health science degree). Applicants with degrees in other disciplines will usually have to take foundation courses.

Foundation courses cannot be used to satisfy the 36 semester hours required for the MS in biomedical informatics degree. Applicants who have not completed all the foundation course requirements may be admitted on a provisional status until those requirements have been completed. All foundation courses must be completed prior to or concurrent with the first six hours of MS in BMI graduate coursework.

Exit Requirements

- Thesis Option: BMI 8990 6 Hours
  - All candidates should carefully review the Graduate College requirements for forming a Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of a thesis. This committee will be responsible for planning and supervising the student's thesis in coordination with the BMI GPC. A supervisory committee shall be formally established for each student upon completion of at least nine hours of coursework or one year (which ever comes first) in the MS program. This committee will have responsible for planning and supervising the student's thesis in coordination with the campus-based BMI graduate program committee.
- Capstone Option: BMI 8950 3 Hours

- Students who select the capstone exit option will have to select another elective in order to fulfill the program's 36 credit hour requirement.

Biomedical Informatics, PhD

School of Interdisciplinary Informatics, College of Information Science & Technology

Vision Statement

The Doctor of Philosophy in biomedical informatics (BMI) degree is designed to prepare the next generation of biomedical informatics researchers who are uniquely positioned to advance research and practice in contemporary information and knowledge management that impact biomedical, clinical and translational research, healthcare services, healthcare practice, public health care, and healthcare delivery in general. Graduates will be able to use their preparation to investigate and apply information and computer technologies to solve problems in the biomedical domain.

The mission of the PhD program is to prepare students with the following abilities:

- Understand the theory and application of biomedical informatics focused around the core areas of computer science, medicine, biology, and healthcare
- Knowledge of the analysis, design, development, and implementation of current and future biomedical informatics systems & technologies
- Competence in conducting and managing high quality, basic and applied research in the BMI domain
- Solid grounding in the fundamentals of academic teaching
- Strong foundation in multidisciplinary and emergent areas in biomedical informatics

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

- Fall: July 1
- Spring: December 1
- Summer: April 1

Other Requirements

- Entrance Exam: Graduate Record Examination (GRE) scores are required for most applicants but are only one component of a holistic admission decision. GRE requirement may be waived for students on an individual basis based on a review by the Doctoral Program Committee.
• **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission. Minimum acceptable scores are:
  - Internet-based TOEFL: 90, IELTS: 7.0, PTE: 64, Duolingo: 120
• **Statement of Purpose** (not to exceed two pages) which address the following questions:
  - What do you hope to accomplish with a PhD in biomedical informatics?
  - Why you are applying to this specific program?
  - What background or qualifications do you have that you believe are essential to success in the doctoral program?
• **Writing Sample:** Evidence of graduate potential in the form of academic papers, publications, theses or project reports done in an academic or industrial setting.
• **Resume**
• **Letters of recommendation:** Three letters from references who are able to give an in-depth evaluation of your strengths and weaknesses with respect to academic work, and who are competent to judge your probability of success in graduate school.

Applicants must follow the formal procedures established for admission to the graduate program at the appropriate NU campus. Applicants must have:

• successfully completed a baccalaureate degree from an accredited institution: preference will be given to students with a masters or doctoral degree from a related field
• demonstrate superior performance in mathematics, including calculus, discrete mathematics and statistics, and a sequence of courses in the theory and practice of one or more information technology areas
• documented test aptitude, interest and commitment to scholarly activities and research
• proficiency in English, sufficient to engage in advanced studies

Evaluation for admission will be based on a portfolio approach that will include the following:

• class standing during the applicant’s baccalaureate and masters level studies.
• grade point average in the undergraduate degree that is equivalent to 3.5 or higher.
• verbal, quantitative, and analytic scores on the aptitude tests of the Graduate Record Examination (GRE)
• letters of recommendation
• other evidence of graduate potential, such as a portfolio of quality of papers or publications, projects, etc., completed by the applicant either in an academic or industrial setting.
• A personal interview, if warranted and feasible.

International students may be assessed for English proficiency and asked to take courses in English as a second language. All students will be encouraged to take courses to improve their technical writing and professional communication skills.

**Degree Requirements**

The doctoral BMI program typically requires 90 credit hours beyond a baccalaureate degree. It consists of common required foundation/core courses to include doctoral seminars and colloquia, a major field of study, and a cognate/minor field of study in a related discipline.

The doctoral program is divided into four phases from a student’s perspective: foundation/core coursework, major field of study/research coursework, additional elective coursework in cognate field/minor field of study (as advised by the student’s supervisory committee), and doctoral research and dissertation.

**Information Technology Prerequisites**

Applicants should have a background in programming languages, data structures, statistics, math or experimental methods (any engineering, computer science related degree). Students with degrees in other disciplines will usually have to take foundation courses. Occasionally, a student’s work experience may be sufficient to waive one or more foundation courses.

**Total Credits**

18

**Doctoral Program Supervisory Committee**

The supervisory committee shall be established before a doctoral student begins the last 45 credit hours of their program of study. This committee will have responsibility for planning and supervision of the student’s doctoral program in coordination with the BMI graduate program committee, including the development of the comprehensive exam, defense of the doctoral dissertation proposal, the approval of the completed dissertation, and the final oral examination. Review the BMI Doctoral Handbook for more information on requirements for selecting the supervisory committee members. The student’s dissertation advisor will nominate the individual to serve on the supervisory committee in consultation with the student. The
responsibilities, procedures, and actions of the supervisory committee are regulated by the rules and bylaws of the Graduate College as established in the UNO Graduate catalog.

Within three weeks of its appointment, the supervisory committee will meet to designate and subsequently file in the Office of Graduate Studies a complete program of studies conforming to the requirements for the degree. At least half of the total hours for the degree must be completed at the University of Nebraska after the filing of the program of study. Any subsequent change in the program or in the dissertation topic must be approved by the supervisory committee and recommended to the dean for Graduate Studies.

**Academic Requirements**

Up to 36 credit hours of the coursework in the preparatory and advanced studies of the doctoral program may be accepted if from an accredited institution. Academic requirements for the doctorate degree include:

- Doctoral research seminars in one or more of the thematic areas of the program.
- Advanced courses (subject to dissertation advisor and graduate committee approvals) related to the student’s expected field of study/research area.
- Courses in an associated field of study.
- Courses or colloquia relating to teaching, ethics and research.
- Participation in relevant graduate research seminars each semester.
- Successful passing of qualifying (comprehensive) examination.
- Presentation and defense of a dissertation research proposal on a topic in the approved major field of study/research area.
- Submission of the final dissertation manuscript in appropriate format after a successful dissertation defense.

**Requirements for Admission to Candidacy**

Students will follow the general candidacy requirements in the UNO Graduate College. Admission to the graduate program does not necessarily imply admission to candidacy for a higher degree.

To be admitted to candidacy for the doctorate degree, a doctoral student must:

- Pass the written qualifying (comprehensive) examination.
- Successfully complete all coursework with satisfactory grades.
- Receive the approval of his/her dissertation proposal before the supervisory committee (oral examination).

After the student has met these requirements, the supervisory committee will recommend to the Office of Graduate Studies his/her admission to candidacy for the doctorate degree, the recommendation will note the dates of completing the comprehensive exam. Such a recommendation must be filed at least seven months prior to the final oral examination for defending his/her dissertation in the presence of his/her supervisory committee. Following admission to candidacy, the student must register during each academic year semester until he/she receives the doctorate degree. Students not in residence may register for a minimum of one semester hour credit in dissertation. Failure to register during each academic year semester will result in termination of candidacy. The term of candidacy is limited to three years.

**Dissertation and Final Examination**

The dissertation should treat a subject in-depth from the candidate’s major field of study/research area and as approved by his/her supervisory committee. The student’s dissertation should show his/her technical mastery of the field and create novel material by advancing or modifying knowledge, creating new material, finding new results, drawing new conclusions, or interpreting old material in a new light.

If the dissertation proposal is approved, the student may conduct the dissertation research under the guidance of the dissertation advisor. The student is advised to consult with his/her supervisory committee until the committee accepts the dissertation. After the dissertation research is completed, the dissertation document and/or product must be presented to all the members of the supervisory committee in time to permit review and approval. Manuscripts must be turned in at least thirty days in advance of the final oral examination over the dissertation. The dissertation will be defended at an open meeting conducted by the student’s supervisory committee.

**Grade Requirements**

In addition to maintaining at least a 3.0 GPA for all course work, all doctoral students must obtain a grade of B or better in any of the required courses. Any student failing the grade requirements will be denied from taking the comprehensive examination and/or dismissed from the program.

**Exit Requirements**

**Completing Graduation Requirements**

After successfully defending his or her dissertation, the student should obtain signatures from all members of their supervisory committee on the Report on Completion of Degree form and submit the form along with a copy of their title and abstract page to the Office of Graduate Studies.

**Teaching Requirements**

All doctoral students are required to teach at least one course while studying in the program.

**Residency Requirements**

All full-time doctoral students must complete 27 hours within 18 months in order to meet the residency requirement of the University. Part-time students must complete 18 hours during the same period. The residency requirement ensures that progress toward the degree occurs within a reasonably compact time frame, enabling the doctoral student to integrate his or her course work with the dissertation.

**Progress Report**

At the end of each semester, every doctoral student (full-time or part-time) must complete the Progress Report form and submit it to the chair of the doctoral program committee.

**Satisfactory Progress**

A minimum of three years of full-time graduate study is normally required to complete a doctoral program. The maximum time allowed is eight years from the filing of the student’s plan of study in the Office of Graduate Studies. Students not making satisfactory progress will be counseled out of the program.

**Leave of Absence**

Under extraordinary circumstances, e.g., medical problems, a student may request a leave of absence from the program for a period of no more than one year. The request must be submitted to and approved by the student’s supervisory committee and/or doctoral program committee. The request should include necessary modifications to the plan of study as a result of the leave. The leave of absence stops the clock for the total time required for the program and the time required to meet the residency requirement. If a student withdraws in mid-semester and is approved for a leave of absence, the clock starts at the beginning of the following semester. A student does not have to have met the residency requirement in order to apply for a leave of absence. If a student does not return to the program within the one year approved for the leave of absence, then the student must submit an application to re-apply to the program. Re-admission to the program is not guaranteed at that point. Please refer to the Graduate Catalog for the complete policy on a leave of absence.
BAAD 8020 BUSINESS AND INFORMATION TECHNOLOGY: CONNECTING PEOPLE AND INFORMATION (2 credits)
This course is designed to equip students with the skills to effectively use information technology in creating competitive firms, manage global corporations, and provide useful products and services to customers. The course focuses on the use of information technology for competitive advantage. Students will develop case studies of firms that have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Not open to non-degree graduate students.

BSAD 8060 PEOPLE: CULTIVATING SKILLS FOR LEADERSHIP (2 credits)
This course will prepare students with the skills to effectively develop the critical leadership skills of listening, employee feedback and coaching, goal-setting, empowerment/delegation, influencing, interviewing, conflict negotiation, intercultural awareness, team/group discussions, and business etiquette.
Prerequisite(s): Admission to the MBA program. Not open to non-degree graduate students.

BSAD 8066 HEALTHCARE ANALYTICS FOR BUSINESS (3 credits)
This course will focus on the use of analytics to develop key performance indicators that integrate and evaluate clinical, administrative, and financial performance. Key concepts in this course include information management, performance metrics, data visualization, and communication of results across the healthcare ecosystem. Specific topics will include health outcomes analysis, financial performance, developing an analytics strategy, data quality and governance, and the four stages of actionable intelligence. (Cross-listed with MGMT 4060, SCMT 4060).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8070 COACHING & DEVELOPING OTHERS (2 credits)
Organizational leaders must effectively coach and develop others in order to ensure sustainable long-term organizational performance. This course will cover the skills of goal-setting, empowerment/delegation, influencing, interviewing, conflict negotiation, intercultural awareness, team/group discussions, and business etiquette.
Prerequisite(s): Admission to Executive MBA Program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8076 INTERNATIONAL LOGISTICS MANAGEMENT (3 credits)
This course will focus on the logistics of international trade and how managers facilitate the flow of goods and services in import and export environments. Students will learn about infrastructure and business practices needed to manage international transportation, communications, services, and regulatory requirements. Students will develop an understanding of international terms of trade, transaction risk management, and location decisions for placement of warehouses and distribution centers. (Cross-listed with SCMT 4070).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.
BSAD 8080 BUSINESS FORECASTING (3 credits)
The course will cover forecasting tools and applications applied to business settings. The first half of the course will cover traditional Econometric forecasting methods and the second half of the course will focus on predictive analytics models and machine learning. Time in the computer lab will be focused on teaching students how to implement the models discussed in lectures. (Cross-listed with ECON 8310).
Prerequisite(s): ECON 8320 (or equivalent programming experience) or permission of instructor. Not open to non-degree graduate students.

BSAD 8090 ESSENTIAL LEADERSHIP SKILLS (3 credits)
This course will teach students the interpersonal skills necessary to effectively manage others. Second, this course will serve as a vehicle to assess the business content knowledge and computer literacy of incoming MBA students in order to provide customized remediation recommendations for each student. Third, the course will collect information that will be used for assessment and accreditation purposes to evaluate the effectiveness of the MBA program. This course will address the following MBA program themes: communication, change agent, teamwork, information technology, critical thinking and information gathering and analysis.
Prerequisite(s): Admission to the MBA program and completion of MBA foundation courses (or equivalent) or may be taken concurrently with the final foundation course. Not open to nondegree students.

BSAD 8096 MANAGING COLLABORATIVE ENGAGEMENT (3 credits)
This course will provide students with the opportunity to develop knowledge and strategies for leading teams, enhancing collaboration, building consensus, problem solving in teams, facilitating group processes, and designing collaborative workspaces. (Cross-listed with MGMT 4090, ITIN 4090)
Prerequisite(s): Admission to a graduate program at UNO or the STRATCOM Leader Fellow Program. Not open to non-degree students.

BSAD 8100 MANAGERIAL ECONOMICS (3 credits)
The course will offer students tools of analysis drawn from consumer theory and the theory of the firm in order to improve the understanding of human behavior as it is constrained in the context of business decision-making. This course is intended for students who are seeking the degree of Master of Science in Economics or the degree of Master of Business Administration.
Prerequisite(s): ECON 2200 and 2220 or BSAD 8180 and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to nondegree students.

BSAD 8110 ACCOUNTING AND FINANCIAL FUNDAMENTALS (3 credits)
The course is designed to give incoming graduate students the foundation in accounting that is necessary for subsequent graduate courses. Emphasis is on introducing the students to as many accounting concepts as possible.
Prerequisite(s): Graduate admission or permission of the appropriate graduate advisor. This course cannot be used in a plan of study for any graduate program at UNO. Not open to non-degree graduate students.

BSAD 8136 HUMAN RESOURCE MANAGEMENT (3 credits)
This course is a comprehensive review of human resource management concepts and practices. The course is designed to educate future managers and leaders on the importance of utilizing effective human resource methods that comply with federal laws and provide the organization with high-quality talent that provides a competitive advantage. (Cross-listed with MGMT 4030).
Prerequisite(s): BSAD 8136 students do not have any prerequisite courses; however, BSAD 8250 (Organizational Behavior) is recommended prior to enrollment.

BSAD 8140 BUSINESS INTELLIGENCE ANALYSIS (2 credits)
In BSAD 8440 you learned how to extract and manipulate data in a business intelligence tool. In this class you will learn to use this data to extract business knowledge. To do this, you will learn about the data model, methods of aggregation, and visualizations in the business intelligence (BI) software.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8440. Not open to non-degree graduate students.

BSAD 8146 TOTAL REWARDS (3 credits)
This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee compensation and benefit programs. The course is designed to enable future managers and human resource professionals to utilize effective strategies for managing the single largest controllable expense for organizations: employee pay and benefits. (Cross-listed with MGMT 4010).
Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8150 ECONOMICS: ESSENTIAL CONCEPTS FOR MANAGERS (2 credits)
This course exposes MBA students to fundamental economic concepts necessary for successful business planning and financial success. Topics include: Comparative advantage and international trade, market dynamics, the role that the competitive landscape plays in company decision-making, macroeconomic growth and development, and monetary and fiscal policy and their impact on business activity.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in economics may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8156 TALENT DEVELOPMENT (3 credits)
This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee training and development programs to optimize human capital effectiveness in modern organizations. The course is designed to enable future managers and human resource professionals to utilize effective strategies for assessing employee training needs and developing appropriate solutions to maximize talent utilization. (Cross-listed with MGMT 4120).
Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8160 INTERMEDIATE ANALYTICS (2 credits)
Business Intelligence software tools are statistical in nature. Many of the visualizations/widgets use statistics “under the hood” to provide insights to you the user. Can you trust these insights? How are they calculated? When are they appropriate? In this class, you will learn the answers to these questions.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8140. Not open to non-degree graduate students.

BSAD 8166 STAFFING THE ORGANIZATION (3 credits)
This course is a comprehensive review of issues and techniques related to the acquisition of high-quality human resources for optimal organizational effectiveness. The course is designed to enable future managers and human resource professionals to utilize effective strategies for recruiting, selecting, placing, and integrating new employees into the organization’s workforce. (Cross-listed with MGMT 4110).
Prerequisite(s): BSAD 8136 is recommended but not required.
BSAD 8176 EMERGING TRENDS IN SUPPLY CHAIN MANAGEMENT (3 credits)
This course will focus on megatrends influencing supply chain management and design in the 21st century. Key concepts in this course will include contemporary opportunities and challenges in creating customer value via the supply chain with a focus on globalization, sustainability, and risk management. Specific topics will include the influence of the empowered customer on supply chain design, global supply chain trends, and the need for integration of technology and talent to create a competitive advantage. (Cross-listed with SCMT 4170).
**Prerequisite(s):** Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8190 APPLICATIONS IN ANALYTICS (2 credits)
What is a 'business question' and how do you answer it with data? In this class you will learn to form testable business questions. This course will build on the knowledge you gained in BSAD 8440, BSAD 8140, and BSAD 8160 to answer your business questions with the help of business intelligence software.
**Prerequisite(s):** Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8160. Not open to non-degree graduate students.

BSAD 8200 MANAGERIAL ACCOUNTING (3 credits)
A study of concepts, analysis and procedures of accounting utilizing internal financial and non-financial data which provides management with information for planning and controlling routine operations, for non-routine decisions, policy-making and long-range planning; and for external reporting to stockholders, governments and interested parties.
**Prerequisite(s):** ACCT 2010 and 2020 or BSAD 8110, and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to non-degree graduate students.

BSAD 8206 CONSULTATIVE SELLING PRINCIPLES (3 credits)
The primary focus of the Consultative Selling Principles course is to develop the behaviors, methodologies, principles, and processes required to successfully lead and manage complex selling initiatives to a win-win close. The course examines and applies, through role playing and other activities, the critical relationship building, critical thinking, problem solving, listening and negotiating capabilities which are the foundation skills underlying consultative selling. (Cross-listed with MKT 4200).
**Prerequisite(s):** MKT 3310 with 'C-' or better; MKT 3100 with C- or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8210 ACCOUNTING: DECISIONS & CONSEQUENCES (2 credits)
Managers and administrators must be able to understand, analyze, and use accounting information to make operational and strategic business decisions. In this course, we will study practical uses of accounting information to address the problems and decisions managers face in business. Emphasis is placed on the user of accounting information rather than the preparer. Upon completion of this course, a student should be able to use accounting information to make management decisions, understand how accounting rules inform those decisions, and consequently, how these decisions affect a company's financial reports.
**Prerequisite(s):** BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or graduate degree in accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8216 SELLING FINANCIAL SERVICES (3 credits)
Selling Financial Services concentrates on methods to effectively sell services and products in the financial services industry, including the banking, brokerage and insurance sectors. Targeting, initiating, and acquiring client relationships, expanding business opportunities, and maintaining long-term client relationships are the course's focal points. This integrative course is designed to provide students with a basic understanding of the selling profession and sales culture within the financial services industry. (Cross-listed with MKT 4210, FNBK 4210).
**Prerequisite(s):** Not open to non-degree graduate students.

BSAD 8220 ADVANCED APPLICATIONS IN ANALYTICS (2 credits)
Using the knowledge gained in BSAD 8440, BSAD 8140, BSAD 8160, and BSAD 8190, each student in this course will work individually to apply the entire business analytics process (starting with data collection and ending with using results to make informed decisions) to a real problem in their own organization.
**Prerequisite(s):** Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8190. Not open to non-degree graduate students.

BSAD 8226 GLOBAL STRATEGIC ACCOUNT MANAGEMENT (3 credits)
Throughout this course, the management of strategic account programs at national, multi-country, and global levels will be addressed. The primary focus of the curriculum is on the critical success factors for driving revenue, sustainable long-term growth and profitability with a base of core strategic buyers.
**Prerequisite(s):** Senior or graduate student standing and permission of the instructor. Not open to non-degree graduate students.

BSAD 8230 LEADING CHANGE & INNOVATION (2 credits)
This course focuses on providing leaders with the knowledge and ability to lead organizational change and enhance organizational innovation. Topics include organizational culture, organizational design, and organizational processes (including reward systems).
**Prerequisite(s):** Admission to the Executive MBA program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8240 EFFECTIVE LEADERSHIP OF PEOPLE (2 credits)
This course aims to enhance the leadership effectiveness of students by developing knowledge of what constitutes effective leadership and how to apply leadership concepts and models.
**Prerequisite(s):** Admission to the Executive MBA program or Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8250 ORGANIZATIONAL BEHAVIOR: ENHANCING HUMAN & ORGANIZATIONAL CAPABILITIES (2 credits)
This course will prepare students with the knowledge necessary to manage and lead organizations effectively. Students will learn management theories, understand important research findings in organizational behavior, and apply both theory and research results to real organizational situations, thus giving them the capacity to use OB theories to enhance organizational effectiveness.
**Prerequisite(s):** BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in management may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.
BSAD 8260 EFFECTIVE USE & REPORTING OF ACCOUNTING INFORMATION (2 credits)
This course focuses on the use and reporting of accounting information, with an emphasis on financial statements and how executive decisions can influence these statements. Financial statements, including footnotes and explanatory material, are the primary instruments utilized by parties external to the enterprise in making judgments about the enterprise. By understanding how management decisions are reflected in the financial statements, managers will understand how they can influence their judgment.
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8280 EMPLOYEE RECRUITMENT, ENGAGEMENT, AND RETENTION (2 credits)
Effective recruitment, engagement, and retention of highly motivated and high performing employees is critical for organizational success. This course will address the key organizational characteristics that must be in place for this to occur.
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership.

BSAD 8300 ORGANIZATION THEORY & DESIGN (3 credits)
This course is designed to increase students' understanding and knowledge of how organizations are designed and structured in order to create value and competitive advantage, and how organizations can operate in an effective and efficient manner in an ever-changing environment. The course will address topics such as: organizational effectiveness, organizational structure, organizational design, organizational culture, organizational technology, the external environment, organizational change, and the organizational life cycle. The ultimate goal is for students to be able to understand how organizations should be structured as a result of both external and internal factors.
Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8310 MANAGING PERFORMANCE IN ORGANIZATIONS (3 credits)
A human behavior course emphasizing the areas of individual behavior, interpersonal behavior, group behavior and the interplay of human and non-human factors.
Prerequisite(s): Essential Leadership Skills (BSAD 8060) or admission to the MAcc program. Not open to nondegree students.

BSAD 8326 SALES MANAGEMENT (3 credits)
The student will be exposed to current research findings in sales management and to business cases and simulations where sales management theories and concepts will be applied. This course will prepare students to develop and implement specific compensation, motivation, and evaluation strategies for managing sales professionals across a wide variety of organizations. (Cross-listed with MKT 4320.)
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8330 LEADING TEAMS (2 credits)
This course focuses on building and leading high-performing teams in organizations. Topics include how to evaluate team effectiveness, how to create and develop teams that are cohesive and high-performing, how to lead and facilitate teams, and how to diagnose and intervene when teams are experiencing problems.
Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8336 PROJECT MANAGEMENT (3 credits)
This course will focus on the planning and execution of complex projects within an organization. Students will learn how to conduct stakeholder analysis, plan the scope of a project, develop a project budget, lead a project team, and define the steps necessary to bring a complex project to a successful conclusion. Students will recognize how the strategy, structure, and culture of an organization can be used to identify and prioritize complex projects. (Cross-listed with MGMT 4330, SCMT 4330)
Prerequisite(s): Admission to Graduate College, MBA Program; or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8340 INTERNATIONAL BUSINESS STUDY ABROAD (3 credits)
This course provides students with an international business and cultural experience through a study tour in a selected international location. Students will develop an understanding of the factors that affect international business decisions by visiting American companies operating abroad and foreign companies that export goods and services to the U.S.
Prerequisite(s): Instructor Permission.

BSAD 8345 CONSUMER BEHAVIOR (3 credits)
Consumers purchase, use, experience, and dispose of products and services as part of their consumption process. How and why consumers choose various brand options, form judgments about these brands, and decide which options to buy and/or re-buy are essential knowledge for marketing professionals. The course covers the psychological and social issues that guide consumption decisions. (Cross-listed with MKT 3320)
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8356 GLOBAL SOURCING AND INNOVATION (3 credits)
This course focuses on global suppliers as partners in the development and commercialization of new products. Students will learn about open innovation and the integration of internal and external business systems in new product innovation. Students will develop an understanding of regulatory policies related to information sharing and the intellectual property rights of buyers and suppliers. (Cross-listed with SCMT 4350).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8360 EFFECTIVE MANAGEMENT OF CAPITAL STRUCTURE, CASH, & RISK (2 credits)
Students will develop strategic decision making skills by using financial concepts including time value of money, capital budgeting processes, cash flow forecasting and project risk analysis. Topics covered include: capital budgeting, financial statement analysis, capital structure, financial risk analysis.
Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8366 E-MARKETING (3 credits)
This course focuses on utilizing the Internet as a marketing platform. Course content includes discussion of how the Internet is used by businesses for designing products, pricing, promotions, distribution, positioning, gathering information, and cultivating relationships with stakeholders. The discussion about the rise of social media, sharing economy, virtual reality devices, and other relevant trends will also be part of the course. (Cross-listed with MKT 4360).
Prerequisite(s): BSAD 8400 with a grade of ‘B’ or above. Not open to non-degree graduate students.
BSAD 8370 LEADERSHIP IN DIVERSITY, EQUITY, ACCESS, AND INCLUSION (2 credits)
This course will focus on the role that organizational leaders play in proactively addressing organizational issues related to diversity, power, access, and equity. The course will explore tensions through the range of dimensions in which diversity is manifested among business leaders, staff, and stakeholders (which includes anyone impacted by the organization’s business decisions - e.g., employees, contractors, suppliers, customers, and the community). Policies, systems, histories, structures, and legislation will also be discussed.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8376 SUPPLY CHAIN ANALYTICS (3 credits)
This course focuses on integrating supply chain management through the use of key performance indicators. Key concepts in this course include data visualization, supplier performance metrics, service-dominant logic, and the supply chain for data. Specific topics include the influence of the empowered customer on supply chain metrics, using metrics to develop a competitive advantage, data-driven decision making, and the four stages of actionable intelligence. (Cross-listed with SCMT 4370).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8380 EFFECTIVE SYSTEMS, OPERATIONS, AND IT (2 credits)
Students will learn how to employ decision-making skills to create a long-term competitive advantage for an organization through operational and technical excellence. Key concepts in this course will include developing a view of organizations as technical and behavioral systems, operations management, quality management, strategies related to IT procurement, deployment, maintenance and security, and the supply chain. Specific topics will include applied systems theory, process improvement, quality assurance, supply chain management, IT systems development strategies, and issues related to systems security, data security, and data privacy.
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business

BSAD 8386 INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT (3 credits)
This course will focus on the strategic procurement of products and services in order to gain a competitive advantage through integrated supply management. Students will learn about strategic supply management, contract negotiation, and supplier quality management. Students will develop an understanding of supplier performance management through the use of supply chain information systems. (Cross-listed with MKT 4380, SCMT 4380)
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8396 MARKETING ANALYTICS (3 credits)
This course focuses on the application of data analytics in marketing decision making (e.g., segmentation, sales forecasting, and resource allocation). Students will learn to apply statistics and econometrics to solve marketing problems. Key topics in this course include marketing data visualization, marketing metrics, descriptive and predictive analytics, and digital marketing analytics. This course takes a very hands-on approach with real-world databases and equips students with tools that can be used immediately on the job. (Cross-listed with MKT 4370).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8400 MARKETING POLICIES (3 credits)
This course provides an introduction to the fundamental concepts of marketing, including a customer orientation, matched with attention to competition and core strengths. The course will illustrate strategies and principles that will help you understand how marketing managers, product managers or service managers must think through their situations, determine their goals and lay a course to achieve those goals.
Prerequisite(s): Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent); or admission to MAcc program. Not open to nondegree students.

BSAD 8416 DIVERSITY, EQUITY, ACCESS AND INCLUSION SOLUTIONS FOR MINIMIZING RISK (3 credits)
This course provides students an opportunity to explore the various aspects of power, access, and equity as it relates to the business environment. Students will explore tensions through the range of dimensions in which diversity is manifested among business leaders, staff, and stakeholders (include anyone impacted by business decisions, such as: employees, contractors, suppliers, customers, and the community) through policies, systems, histories, structures, and legislation. Students will have the opportunity to learn differences that individuals bring to a business environment and how stakeholders can capitalize on those differences by creating long-term inclusive environments. (Cross-listed with LAWS 4410).
Prerequisite(s): Admission to the MBA program. Not open to non-degree graduate students.

BSAD 8420 MARKETING: UNDERSTANDING CONSUMERS AND MARKETS (2 credits)
This course exposes MBA students to the fundamental concepts, practices and issues of marketing. A wide range of marketing practices and structures will be explored including product and service firms, consumer and business markets, profit and not-for-profit organizations, domestic and global companies, and small and large businesses.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent)
Students with an undergraduate major or a graduate degree in marketing may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8426 BUSINESS DEMOGRAPHICS (3 credits)
The goal of this course is to develop a demographic perspective in order to assist in understanding the business environment and business policy. How population change impacts consumer markets and all of the functions (for example, accounting, finance and management) that must exist for these markets to perform. Includes a history of population change and policy as well as a view toward international population considerations. (Cross-listed with MKT 4420).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8430 STRATEGIC BRAND MANAGEMENT (3 credits)
An exploration of the characteristics, meanings, and management of brands in the business world. The course examines brands as a strategic asset, and draws on managerial, consumer, and cultural perspectives.
Prerequisite(s): BSAD 8420 or permission of instructor. Not open to nondegree students.
BSAD 8435 MARKETING INNOVATION (3 credits)
Product, service, and process innovation are essential drivers of firm performance. However, firms face considerable and complex challenges when bringing innovative ideas to life. For example, what marketing research methods should we employ to uncover vital consumer insights? How do these insights influence the development and launch of new products and services? What differentiated value are we delivering to our consumers? How do we successfully bring this new product or service to market? How does a brand’s purpose and personality influence consumers’ perceptions, purchase decisions, adoption, and engagement? This course will cover key marketing principles involved in the development and launch of new and innovative products and services - from conception to commercialization. Furthermore, we will explore how new-age technologies impact each stage of the development and launch processes. (Cross-listed with MKT 3400).
Prerequisite(s): BSAD 8420 or equivalent; and admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8440 BUSINESS INTELLIGENCE DATA EXPLORATION (2 credits)
The first in any analytics project is to get data ready for analysis. In this class you will learn to extract data from a business data source and ready it for analysis in a business intelligence software tool. In the process you will learn tools necessary for this process including SQL, Power Query, M, and DAX.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics. Not open to non-degree graduate students.

BSAD 8450 SEMINAR IN MARKETING (3 credits)
Exploration, study and critical analysis of contemporary marketing problems, trends, methods and approaches for seminar discussion and written report.
Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8456 MANAGERIAL NEGOTIATION STRATEGIES (3 credits)
This course introduces students to the theory and practice of negotiation. The ability to negotiate successfully rests on a combination of analytical and interpersonal skills. In this course we will develop a set of conceptual frameworks that should help students better analyze negotiations in general and prepare more effectively for future negotiations in which they may be involved. This course is designed to help students better understand the theories, processes, and practices of negotiation, as well as conflict resolution and relationship management so that students can be more effective negotiators in a wide variety of situations. (Cross-listed with MGMT 4450, SCMT 4450).
Prerequisite(s): Admission to Graduate College, MBA Program, or by permission of the instructor.

BSAD 8466 SUPPLY CHAIN INTEGRATION (3 credits)
This course will focus on the integration of internal and external systems designed to maximize the efficiency and effectiveness of supply chain networks developed by industrial organizations, government agencies, and not-for-profit organizations. Key concepts will include supply chain design, trends in technology, and cross-functional collaboration, coordination, and communication along the value chain. Specific topics will include the influence of empowered customers on supply chain integration, global supply chain trends, closed-loop supply chains, and the challenges and benefits of integrating technology and talent in the workplace. (Cross-listed with SCMT 4460).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8476 BEHAVIORAL FINANCE & INVESTING (3 credits)
This course focuses on how actual investor behaviors and market behaviors differ from traditional theories of finance. This course will examine psychological biases, identify how such biases influence financial markets and settings, and explore methods that can be utilized to recognize and overcome such behavioral pitfalls. (Cross-listed with FNBK 4470).
Prerequisite(s): Admission to graduate college, MBA program, or by permission of instructor. Not open to non-degree graduate students.

BSAD 8480 GLOBAL ECONOMICS AND CORPORATE SOCIAL RESPONSIBILITY (2 credits)
In this course students will learn both how to apply global economic issues business strategy and how to balance socially responsible activities with the profit motive. With respect to global economics, topics include gains from trade, international trade patterns, foreign exchange markets, and barriers to trade. With respect to corporate social responsibility, topics include social responsibility and working conditions, socially responsible stewardship of the environment, and socially responsible strategies concerning human rights issues.
Prerequisite(s): Admittance to the Executive MBA Program or the Executive Certificate in Business.

BSAD 8510 SECURITY ANALYSIS (3 credits)
Study of the efficient market, fundamental and technical analysis approaches for the valuation of marketable securities. Methods of analysis are considered for the economy, industry groups and individual corporations.

BSAD 8520 SEMINAR INVESTMENT MANAGEMENT (3 credits)
This course focuses upon the modern portfolio theory of investment management and its application in formulation of policies for individuals and institutional investors. Topics addressed will include qualitative and quantitative analysis of the risks and returns of portfolio management using efficient market, fundamental analysis, and technical analysis approaches.
Prerequisite(s): BSAD 8510. Not open to nondegree students.

BSAD 8530 BANK & FINANCIAL MARKETS (3 credits)
This course focuses on the theory and practice in managing commercial banks. Topics covered include but not limited to: bank regulations, bank performance analysis, asset liability management, credit analysis and consumer loans. The course emphasizes the link between theory and practice through assigned course related readings, guest lecturers from industry experts, and a comprehensive bank research project on a local bank of your choice. At the end of the course, students should have a good understanding of basic banking theories as well as banking practices, and current issues and challenges facing the banking industry.
Prerequisite(s): BSAD 8500. Not open to non-degree graduate students.

BSAD 8540 MULTINATIONAL FINANCIAL MANAGEMENT (3 credits)
The focus of this course is on multinational financial management as viewed and practiced by the multinational firm and on current developments in international financial markets, including global banking. Familiarity with certain areas of the firm’s environment, such as the international monetary system, the European Monetary System, and determination of exchange rates under alternative regimes, is essential to the international financial manager.

BSAD 8550 SEMINAR IN FINANCE (3 credits)
This course will address specific financial management topics which will vary by semester and is intended for graduate students.

BSAD 8560 MARKETING STRATEGY: CUSTOMERS AND MARKETS (2 credits)
This course will focus on how successful businesses match their objectives and resources with opportunities in the marketplace by identifying and measuring consumer needs, determining target markets and deciding which products and services to offer. This course will also address pricing, promotion, and distribution strategies to create competitive advantage in domestic and international markets.
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business. Not open to non-degree graduate students.
BSAD 8570 EFFECTIVE STRATEGIC MANAGEMENT (2 credits)
This course centers around the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. Students will develop the strategic thinking skills needed to formulate and execute successful strategies for firms/organizations in a variety of industries and dynamic environments. Emphasis is given to the contributions of several business disciplines of study, such as marketing, finance and management, to understanding both the internal operations of the organization and the influences of the external environment. This course is integrative and introduces both the theory and practice that enables that integrative process.
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8576 INVESTMENT MANAGEMENT FOR FINANCIAL ANALYSTS (3 credits)
This course provides critical knowledge needed for students pursuing a career in investment management. The topic areas bridge academic theory, current industry practice, and ethical and professional standards and comprehensively address the areas assessed in the Chartered Financial Analyst examinations. (Cross-listed with FNBK 4570)
Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

BSAD 8590 EXECUTIVE MBA CAPSTONE PROJECT (4 credits)
Students in the Executive MBA capstone project course will complete an applied consulting project for an organization that requires them to integrate knowledge across multiple Executive MBA program knowledge areas. Students will identify the key problem(s) to be solved, use sound methodologies to gather necessary data, identify and employ relevant evidence-based research and practitioner literatures, apply relevant models and theories to guide the generation of potential solutions and implementation strategies, and identify the feasibility and financial implications of their proposed solution(s).
Prerequisite(s): Admission to the Executive MBA Program. Not open to non-degree graduate students.

BSAD 8596 RISK MANAGEMENT FOR BUSINESS MANAGERS (3 credits)
An analysis of risk management techniques for handling the risk exposures most businesses face, including insurance, self insurance, risk control, and risk avoidance, among others. (Cross-listed with FNBK 4590.)

BSAD 8600 REAL ESTATE FINANCE THEORY AND APPLICATIONS (3 credits)
This course explores advanced financial analysis tools and methodologies used to quantify complex factors surrounding real estate productivity, value, investment, and project feasibility. Specific course topics will coincide with student interest in one of three focus areas: Investment, Development, or Commercial Finance.
Prerequisite(s): RELU 3410 and BSAD 8630, or permission of Real Estate Program Director.

BSAD 8605 REAL ESTATE PRINCIPLES AND PRACTICES (3 credits)
This is a survey course in real estate principles and practices, which is designed to familiarize students with industry terminology, current practices, and cover the following topics: Licensure, property rights, legal descriptions, real estate law and contracts, appraisal, financing, investments, Fair Housing, and related topic areas. This course provides foundational knowledge of the real estate field and will prepare students to successfully complete more advanced real estate coursework. NOTE: Students cannot receive credit for both RELU 2410 and RELU 3410. (Cross-listed with RELU 3410).
Prerequisite(s): Admission to Graduate College, MBA Program, or permission of Real Estate Program Director.

BSAD 8606 FINANCIAL RISK MANAGEMENT (3 credits)
The course provides students with an intermediate level analysis of financial derivatives, and the use of these instruments for managing risk in financial institutions. (Cross-listed with FNBK 4600.)
Prerequisite(s): BSAD 8500 and 8510 or their equivalent, and graduate standing. Not open to non-degree students.

BSAD 8610 REAL ESTATE APPRAISAL (3 credits)
This course addresses the fundamentals of real estate valuation and appraising, including factors affecting value, valuing land, improvements, and special classes of residential property, appraisal practice and rules, depreciation and obsolescence, and the mathematics of appraising.
Prerequisite(s): RELU 3410 and BSAD 8630, or permission of instructor.

BSAD 8616 REAL ESTATE INVESTMENTS (3 credits)
This course focuses on methods used to analyze existing and proposed commercial and residential real estate investments through dynamic programming models, and explores strategies to finance commercial real estate. The class ultimately prepares students to understand the risks and rewards associated with financing and investing in real estate. (Cross-listed with RELU 4390).
Prerequisite(s): RELU 2410 or RELU 3410 or FNBK 3250 or BSAD 8605 or BSAD 8630

BSAD 8625 PROPERTY MANAGEMENT (3 credits)
This course focuses on commercial and residential property management concepts and their application to the operation, control, and oversight of real property. The course will study leasing, tenant selection and relations, maintenance, marketing, contract management, asset management principles, as well as Fair Housing Laws and the Americans With Disabilities Act as they pertain to property management. (Cross-listed with RELU 3450).
Prerequisite(s): BSAD 8605, or permission of the Real Estate Program Director.

BSAD 8626 REAL ESTATE DEVELOPMENT (3 credits)
This course focuses on the procedures and complexities in developing and redeveloping various commercial property types and mixed-use real estate. Topics include an overview of the real estate development process, assembling a team, identifying project stakeholders, financial analysis, site selection, market analysis, and the regulatory environment. (Cross-listed with RELU 4440).
Prerequisite(s): BSAD 8605 or BSAD 8630, or permission of the Real Estate Program Director.

BSAD 8630 FINANCE: UNDERSTANDING CAPITAL AND CASH (2 credits)
As a comprehensive introduction to financial management, the course will cover various fields of finance and discuss topics including the time value of money, bond and stock valuation, capital budgeting.
Prerequisite(s): BSAD 8060 or BSAD 8070, 8150 and 8210. Students with an undergraduate major or a graduate degree in finance or accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8640 IT: STRATEGIC DEVELOPMENT AND DEPLOYMENT (1 credit)
Students will gain a strategic perspective of information technology management, including current trends and best practices, and understand how technology can be used in competitive positioning. Processes for innovation and research and development spending and new business models will be covered.

BSAD 8650 VISION & STRATEGIC LEADERSHIP (2 credits)
This course focuses on the critical role that organizational leaders play in ensuring that the organization has a clear vision and a clear mission which are in alignment with the organization’s business strategy and unit goals and effectiveness metrics. This course focuses on the mission and vision creation and communication process as well as vertical and horizontal goal alignment.
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.
BSAD 8660 FRONTIERS OF ANALYTICS (2 credits)
In this program, you have learned many analytics techniques. However, analytics is a constantly evolving field with increasingly advanced methods. What techniques might be presented to you as a manager? How do you interpret these results? In this class we will explore cutting-edge analytics methods and when they are appropriate for your business.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8160. Not open to non-degree graduate students.

BSAD 8696 EMERGING TECHNOLOGY AND INNOVATION (3 credits)
This course equips entrepreneurially-minded students with a more complete range and vision of the viability of various startup opportunities (with a specific focus on innovative technologies and innovative business models). Students will become familiarized with the new and emerging technologies and innovations that define modern industries and product categories, as well as the various shifts in the way cutting-edge business gets done, regardless of industry. (Cross-listed with ENTR 4690, MGMT 4690).
Prerequisite(s): Admission to a UNO graduate degree program or permission of instructor

BSAD 8700 BUSINESS ANALYTICS: MAKING SENSE OF DATA (2 credits)
The purpose of this course is to provide business managers with an understanding of the important role data analytics has assumed in today's organizations. Data analytics has become a key component in accomplishing strategic and operational goals. This course is designed to familiarize students with the concepts and principles of analytics. It is targeted for graduate or MBA students who have little or no background in analytics. Therefore, it focuses on breadth of coverage rather than depth in any specific area.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent); or admission to the MAcc program. Not open to non-degree graduate students.

BSAD 8710 SUPPLY CHAIN MANAGEMENT (3 credits)
This course will focus on supply chain management as a key functional area of organizational success. Students will learn about current techniques used by supply chain practitioners to make strategic and tactical decisions that support the overall strategy and day-to-day operations of an organization. Students will develop an understanding of how supply chain decisions and appropriate metrics of performance can be utilized to improve the operational efficiency and effectiveness of an organization.
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8720 STRATEGIC FINANCIAL MANAGEMENT (2 credits)
This course is intended to be advanced financial management. It will stress the theory and application of topics including, but not limited to capital budgeting, cash flow estimation, real options, capital structure, dividends and share repurchases, working capital management, budgeting, planning and forecasting, and lease management. The material covered in Strategic Financial Management will increase the student's knowledge of how to strategically manage financial resources to increase the intrinsic value of the organization.
Prerequisite(s): For MBA students, BSAD 8630. For MAcc students, completion of all Master of Accounting (MAcc) foundation courses. Not open to non-degree graduate students.

BSAD 8726 INNOVATION VENTURES (3 credits)
This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with ENTR 4720, ITIN 4720, ITIN 8256, MGMT 4720, MKT 4720).
Prerequisite(s): Admission to a graduate program or by instructor permission

BSAD 8736 ECONOMICS OF ENTREPRENEURSHIP (3 credits)
This course will review economic theories of entrepreneurship with special emphasis on Schumpeter's theory of creative destruction. The main focus of the seminar will be on the "high-level" entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 4730, ECON 8436)
Prerequisite(s): ECON 2200 or permission of the instructor for all students

BSAD 8766 SELLING IN AN ENTREPRENEURIAL CONTEXT (3 credits)
Successful entrepreneurs are able to identify unmet needs in the marketplace and then design and sell products or services that fulfill those needs. Sales effectiveness is essential for entrepreneurs because they must be able to build sustainable sales pipelines that ensure profitable growth while simultaneously addressing other pressing issues including financing, staffing, and product development. This course will focus on consultative solution-based sales fundamentals that can be applied in an entrepreneurial selling environment. (Cross-listed with ENTR 4760, MKT 4760)
Prerequisite(s): GPA 2.5 or better; MKT 3100 with a "C+" or better; MKT 3310 with a "C+" or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8776 INTRODUCTORY MAVERICK VENTURE FUND (1 credit)
This course teaches the basics of venture capital, including, the topics of term sheets, due diligence and learning the perspectives of the entrepreneur and investor. Students in this course have the opportunity to observe more advanced students making investments, ranging from 5,000 dollars to 10,000 dollars plus. This course is the first of three, one-credit courses where students gain more advanced venture funding knowledge and application at each level. (Cross-listed with ENTR 4770). Prerequisite(s): This course requires instructor approval. Students must apply and interview to take this course. Preference is given to students in their junior year, and must have three semesters of school left before graduating.

BSAD 8786 INTERMEDIATE MAVERICK VENTURE FUND (1 credit)
In this course, students source deals, listen to pitches, and select start-ups to be funded. Investments typically range from 5,000 dollars to 10,000 dollars plus. This course is the second in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4780).
Prerequisite(s): This course requires instructor approval. Students must have completed BSAD 8776 with a grade of C or better.

BSAD 8796 ADVANCED MAVERICK VENTURE FUND (1 credit)
This course applies advanced concepts of venture capital. Students will learn how to monitor and assist start-ups in the scaling process. Students learn how to leverage community partners to amplify investment opportunities. This course is the third in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4790).
Prerequisite(s): This course requires instructor approval. Students must have completed BSAD 8786 with a grade of C or better.

BSAD 8800 MBA PROJECT-FOCUSED CAPSTONE (2 credits)
In this Master's of Business Administration (MBA) required project-focused capstone course, students complete a service-learning consulting project for a non-profit or other type of organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program. Prerequisite(s): Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 prior to Capstone and must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Not open to non-degree graduate students.
BSAD 8820 CONTEMPORARY BUSINESS ISSUES (1 credit)
This course exposes students to contemporary business issues that they are likely to experience as leaders. Students will examine and synthesize academic literature relevant to an instructor-approved specific topic associated with the contemporary business issue of focus. This course can be used for MBA students who need a one credit hour course to meet their credit hour graduation requirements.
Prerequisite(s): BSAD 8150 or permission of instructor. Not open to non-degree graduate students.

BSAD 8830 STRATEGY: DEVELOPING SUSTAINABLE COMPETITIVE ADVANTAGE (2 credits)
This course centers on the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. The primary objective of this course is to sharpen the ability of students to think strategically, to diagnose situations from a strategic perspective and to develop creative solutions to enable firms to achieve a sustainable competitive advantage.
Prerequisite(s): Students must successfully complete BSAD 8150 and BSAD 8210 before enrolling in this course. This course must be taken within the first 20 hours of the MBA program. Not open to non-degree graduate students.

BSAD 8880 ARTS AND THE EXECUTIVE (3 credits)
The course will provide the graduate student with an understanding of the organizational and managerial issues involved in an arts organization as the role of the arts in the business community.
Prerequisite(s): Graduate. Not open to non-degree students.

BSAD 8900 INDEPENDENT STUDY (1-6 credits)
In this independent study course, individual students are able to complete independent research in a business-related topic area under the supervision of a faculty member. Written independent study reports are expected to include appropriate academic citations and references.
Prerequisite(s): Graduate and permission of MBA Advisor. Requires submission of completed Independent Study Contract to MBA Advisor prior to registration. Not open to non-degree graduate students.

BSAD 8926 SPECIAL TOPICS IN BUSINESS (3 credits)
This business-focused special topics course is designed to provide students the opportunity to focus on a current or emerging topic in any area of business. An in-depth exploration of the topic will be undertaken with the expectation that students will play an active role in the course and engage deeply with the material and concepts addressed within the focal topic area. (Cross-listed with BSAD 4920).
Prerequisite(s): Not open to non-degree graduate students.

BSAD 8990 THESIS (1-6 credits)
A research project, under the supervision of a faculty thesis adviser in the College of Business Administration, in which the student establishes his capacity to design, conduct and complete an independent, scholarly investigation of a high originality. The research topic and the completed project must be approved by the student's faculty thesis adviser and two other faculty members, one of whom must be from outside the program area.
Prerequisite(s): Permission of graduate adviser. Not open to non-degree graduate students.

Business Administration, MBA
Department of Business Administration, College of Business Administration

Mission Statement
The mission of the MBA program at the University of Nebraska at Omaha (UNO) is to prepare students to contribute significantly to organizational productivity through learning experiences, emphasizing the application of sound and innovative business techniques. By acquiring the knowledge and abilities necessary to be a problem solver who is influential, innovative, and socially responsible, the graduate of the UNO MBA program will be an effective leader in enhancing organizational capabilities. The graduate will be well prepared for a responsible management position and will have an understanding of the technological and global business environment.

In addition to developing a strong background in the functional areas of business, the UNO MBA program focuses on developing essential leadership capabilities in its graduates.

Triple Bottom Line (TBL)
The TBL framework that has been incorporated into the curriculum provides a distinctive structure to the program that we can communicate to students, employers and others. TBL will help students see relationships between issues in a turbulent business environment. It compels students to understand the relationship between social, economic and environmental trends. A TBL framework for the MBA program will develop principled leaders who can effectively anticipate unfortunate surprises and uncover new opportunities. These leaders can position their firms to be a step ahead of competitors.

Other Program Related Information
FastTrack Program
The College of Business Administration MBA program has developed a FastTrack program for highly qualified and motivated students providing the opportunity to complete a BSBA or BMS degree and an MBA degree in an accelerated time frame. With FastTrack, students may count up to nine graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:
• This program is available for undergraduate students pursuing a BSBA or BMS degree and desiring to pursue an MBA
• Students must have completed no less than 60 undergraduate hours
• Students must have a minimum undergraduate GPA of 3.0
• Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
• Students will work with their undergraduate advisor to register for the graduate courses
• A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing
• Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
• Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
• Admission to Fast Track does NOT guarantee admission to the graduate program.
• The admit term must be after the completion term of the undergraduate degree.
• Please note, BSAD 8110 will apply toward the completion of the BMS degree program requirements, but only as a foundation course for the MBA.

Enrollment of Non-Degree Students
Following a review of their transcripts by the MBA advisor, non-degree students may be permitted to enroll in MBA foundation courses only, BSAD 8110 and ECON 1200 (3.0 junior/senior GPA required).

Admissions
General Application Requirements and Admission Criteria (p. 974)
Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
• Spring: November 1
• Summer: April 1
• Fall: July 1 (June 1 for international students)

Other Requirements
• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf) must meet the minimum language proficiency score requirement in order to be considered for admission.
• Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
• Resume (employment and educational history)
• Unconditional Admission: may be granted to an applicant whose record includes the following:
  • 2.85 undergraduate junior/senior GPA, or cumulative graduate GPA
  • Applicants qualifying for unconditional admission, based on the standards outlined above, but lacking some foundation courses, will be granted provisional status until all foundation courses are completed with grades of “B” (3.0/4.0) or above.
• Provisional Admission: Applicants who do not meet the conditions for unconditional admission may be considered for provisional admission status. These applicants will be notified that the CBA Graduate Program Council (CBA GPC) will evaluate the files of all applicants being considered for provisional admission. Candidates being considered for admission on this basis will receive notification from the UNO Office of Graduate Studies. If granted provisional admission, the student must earn minimum “B” (3.0/4.0) grades in each of the MBA courses completed in the first 12 hours of the program. Students not meeting this standard are subject to dismissal.
• Foundation courses: An applicant must have completed basic courses in the following areas, either as an undergraduate student or prior to enrolling in the first MBA course:

1 ENGL 1150 is required as a foundation course for all students admitted to the MBA program who are required to complete the TOEFL/IELTS. The English composition requirement must be satisfied within the first two semesters of a student’s program.

• Courses successfully completed with a grade of A, B, or C (2.0 on 4.0 scale) in the applicant’s undergraduate program are considered as sufficient preparation. Otherwise, the applicant must complete foundation requirements prior to enrolling in the first MBA course with a minimum B (3.0 on 4.0 scale) grade. Foundation courses, including BSAD 8110 and ECON 1200, may not be used on a plan of study.

Total Credits  22

1 BSAD 8060 This is the first graduate-level course MBA students have to complete.
2 BSAD 8630 (prereq: completion of BSAD 8150 and BSAD 8210)
3 BSAD 8720 (prereq: completion of BSAD 8630)
4 BSAD 8830 (prereq: completion of BSAD 8150 and BSAD 8210)

### Project Capstone Course (2 hours)

**BSAD 8800 - MBA Project-Focused Capstone**: As the project-focused capstone course for the Master of Business Administration (MBA) degree, this course will focus on students completing a service-learning consulting project for a non-profit or other organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite**: Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the Capstone course. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Permission from MBA advisor is required to register for this class. Not open to non-degree graduate students.

**ECON 8330 - Data Analysis from Scratch**: This course may be substituted for BSAD 8800 as the Capstone requirement for MBA students. Students in the course will work on a service-learning consulting project, specifically focused on a client data project. The consulting project will focus on the application of knowledge and skills learned in the MBA program and the Business Analytics concentration. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite(s)/Corequisite(s)**: A multivariate or regression analysis course such as ECON 8300 (https://catalog.unomaha.edu/search/?P=ECON%208300), ISQA 9130 (https://catalog.unomaha.edu/search/?P=ISQA%209130) or STAT 8436 (https://catalog.unomaha.edu/search/?P=STAT%208436), and a programming class such as BSAD 8210 (https://catalog.unomaha.edu/search/?P=BSAD%208210) or equivalent programming experience; or instructor approval. Students also must successfully complete BSAD 8630 (https://catalog.unomaha.edu/search/?P=BSAD%208630), BSAD 8420 (https://catalog.unomaha.edu/search/?P=BSAD%208420), and BSAD 8830 (https://catalog.unomaha.edu/search/?P=BSAD%208830) before taking this course for the Capstone requirement. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Not open to non-degree graduate students.

### Directed Elective Requirement

For students who have earned an undergraduate or graduate degree in accounting, economics, management, management information systems, or marketing, the core course(s) corresponding to the student's previously earned degree(s) will be waived. To satisfy degree requirements, the student must complete a directed elective in the waived field as indicated. For students who have earned an undergraduate or graduate degree in finance, the core course(s) corresponding to the student's previously earned degree may be waived upon request. Students with more than one core course waiver will be required to take an additional 1-credit hour seminar or 3-credit hour elective to fulfill degree requirements.

**MBA Electives (9 hours)**

Electives (8000-level) may be chosen from MBA, master’s level Accounting and Economics, as well as courses in other departments as listed below.

A directed elective, if required, is part of the nine (9) hours of electives required for degree completion.

A maximum of nine (9) hours of dual-level (graduate/undergraduate) electives may be included in the plan of study for an MBA degree.

MBA policy limits the number of Special Topics/Special Studies (BSAD 8910) electives to a maximum of nine hours, which may be applied to the MBA program as electives.

Not all elective courses are offered each semester.

**Accounting Electives**

Transfer of Graduate Credit

Students who have completed graduate courses at other approved AACSB (Association to Advance Collegiate Schools of Business) graduate schools may request permission to transfer as many as nine (9) semester hours of credit, provided the courses are pertinent to the student’s graduate program. Grades in courses for transfer credit must be equivalent to “B” (3.0/4.0) or higher. All work for transfer of credit must have been taken within the ten-year period allowed for the master’s in business administration degree. Petitions for the transfer of credit are submitted by the student to the MBA advisor who forwards the petition with a recommendation to the Dean for Graduate Studies for approval. Visit the AACSB website (http://www.aacsb.edu) for the listing of AACSB accredited institutions.

MBA Exit Requirements

Comprehensive Examination

All students earning an MBA degree must complete a comprehensive examination or a comprehensive examination equivalent. The comprehensive examination requires the student to demonstrate the knowledge gained from the core courses and the ability to synthesize that knowledge in the analysis of questions involving more than one concept. Completion of the project focused capstone course (BSAD 8800) with a grade of “B” (3.0/4.0 scale) or better is equivalent to completion of the comprehensive examination. If a student transfers in credit for the non-comprehensive examination components of the project focused capstone course, then the student must pass a written comprehensive examination prepared by and graded by the graduate program council.

Thesis Option

MBA students may elect to complete a 6-hour thesis under the guidance of a supervisory committee. The student is responsible for compliance with all Graduate College and MBA program council rules and procedures with respect to formation of a supervisory committee and completion of a thesis. The student shall submit to the supervisory committee a document including: 1) a proposed plan of study; 2) a description of the student’s research topic; and 3) the student’s research methodology. The student shall make an oral defense of the document to the supervisory committee. The supervisory committee’s approval shall be in writing. A supervisory committee’s approval should be obtained at least seven months before the intended graduation date. If a student elects to complete a thesis, then the supervisory committee of the thesis shall decide how the student will satisfy the comprehensive examination requirement and the business case requirement. The supervisory committee’s written approval of the plan of study shall require either the student’s completion of the project focused capstone course or a comprehensive examination (either written or oral) prepared by and graded by the supervisory committee.

Other Requirements to Complete the Program

All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

Total Credit Hours: 33

Concentrations

The MBA Program offers concentrations in the areas listed below. A concentration shall include at least nine (9) credit hours.

With the prior, written approval of the College of Business Administration graduate program council and the dean for Graduate Studies, an independent research, special studies, or special topics graduate-level course from accounting, business administration or economics, when such course has as its principal focus issues relevant to business administration or the concentration, may be substituted.

- GEOG 8166  URBAN SUSTAINABILITY
- PSCI 8276  GLOBAL ENVIRONMENTAL POLITICS
- PSCI 8296/CACT 8306  INTERNATIONAL DEVELOPMENT & SUSTAINABILITY

**Total Credits** 9

### Academic Performance

Each semester, student files will be reviewed where a student received a grade lower than a "B" (3.0 out of 4.0). Following this review, the College of Business Administration’s Graduate Program Council (CBA GPC) may place conditions or restrictions on the student. Following notification to the student, the student may petition the CBA GPC for a review of the conditions or restrictions imposed.

Students earning a third grade of "C+" or lower (or any single grade below "C" [1.67 on a 4.0 scale]) will be automatically dismissed from the MBA program. Dismissed students will be immediately administratively withdrawn from all courses in which they are enrolled for MBA credit.

Students who have been dismissed may not enroll in any courses for MBA
credit in any subsequent semester or summer session until reinstatement has been granted by the CBA GPC and the graduate dean.

Students who have been dismissed from the MBA program may submit a written petition for reinstatement to the CBA GPC. Students who have petitioned the CBA GPC for reinstatement may not enroll in any courses for MBA credit. Upon receiving a petition for reinstatement, the CBA GPC will evaluate the student’s written petition for reinstatement. As part of the reinstatement petitioning process, the CBA GPC reserves the right to examine the student’s academic record and reserves the right to speak to any previous instructor who has taught the student. This information may be used by the CBA GPC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege and not all students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period of the CBA GPC’s discretion and must satisfy the probationary conditions specified by the CBA GPC. In addition to probationary conditions, reinstated students will be subject to additional reinstatement conditions as specified by the CBA GPC. These reinstatement conditions will include retaking one or more courses in which the student must earn a grade of “B” (3.0) or higher [the exact grade requirements for retaken courses may in fact be higher than “B” (3.0)]. Students not achieving the probationary or reinstatement conditions will be automatically dismissed.

MBA Probation Policy
If granted Provisional Admission, the student must earn minimum “B” grades (3.0 on 4.0 scale) in each of the MBA courses completed in the first 12 hours of the program. Students not meeting this standard will be immediately placed on probation. A letter will be sent to the student regarding violation of the terms of provisional admission and the probation status. The student must submit a written letter to the CBA GPC acknowledging the basis for probation and requesting continuation in the MBA program within two weeks of receipt of the notification. Students who have petitioned the CBA GPC for continuation in the program may remain in the program and enroll in courses for MBA credit. Students who have not petitioned the CBA GPC for continuation within two weeks of notification, will not be allowed to remain in the program or register for courses, and will be administratively withdrawn. Upon receiving a petition for continuation, the CBA GPC will evaluate the student’s written petition. As part of the petitioning process, the CBA GPC reserves the right to examine the student’s academic record and reserves the right to speak to any previous instructor who has taught the student. This information may be used by the CBA GPC in the decision. Information provided by previous instructors will not be shared with the student. If a student’s provisional status is restored, then the student will need to earn a B grade or better in the affected course at the earliest opportunity.

MBA Program Two Strikes Rule
A UNO MBA student may enroll only twice in each MBA course. If the class is not successfully completed on the second attempt, then the student will be dismissed from the MBA program. An enrollment is defined as being enrolled in the course after the last day to withdraw via MavLINK and receive a 100% refund. The last day for withdrawal will be as stated in the current academic calendar for a full semester course (3 credits) http://registrar.unomaha.edu/calendar/ for an eight-week graduate course (2 credits) the last day for withdrawal will be the third day (including the start date) of the course as designated in MavLINK.

In addition to the Quality of Work Standards established by the Graduate College, MBA students may repeat only once a BSAD 8xx0 level course in which they receive any grade, including “W” or “I.”

GPC Will Consider Grades Earned in Repeated Courses
When making decisions based on Quality of Work Standards issues, the CBA GPC will consider the initial grade(s) received in a course as well as the most recent grade received for the course. This approach differs from the method used to calculate GPA in a student’s MavLINK/Degree Works file, where the most recent grade replaces the grade received in the previous attempt.

Student Responsibilities
Each student admitted to graduate studies is responsible for knowing the procedures and regulations of the Graduate College.

Each student should consult with the MBA advisor at least once each semester to assure continued progress toward the degree objective. Students must maintain a 3.0 (“B”) average to fulfill the program and graduation requirements. No more than two “C’s” or two “C+’s” in graduate courses are permitted.

Business Administration, Executive MBA

Department of Business Administration, College of Business Administration

Vision Statement
The mission and overarching themes of the Executive MBA program are to provide experienced managers and professionals with an applied and integrative business management education that develops and furthers their critical thinking, decision-making, and leadership abilities. Graduates of this program will be better prepared to drive and lead change, manage resources, and effectively address strategic issues in a dynamic global economy.

The Executive MBA program is designed for middle- and upper-level managers, experienced professionals, and established business owners who have a vision for themselves and their firms.

**Total Credits**: 12

### BSAD 8000 BUSINESS ETHICS: ACHIEVING SOCIAL RESPONSIBILITY (2 credits)

This core MBA course will explore the relationship between law and ethics, and will examine the generally-accepted theoretical principles associated with doing business ethically, and will examine practical ethical issues associated with various facets of business. **Prerequisite(s)**: BSAD 8060 or BSAD 8070 (prior to or concurrent) or admission to the MAcc program. Not open to non-degree students.

### BSAD 8020 ENVIRONMENTAL ECONOMICS AND MANAGEMENT (3 credits)

This course covers topics related to environmental economics and policy, with an emphasis on comparative policy analysis and business strategies towards the environment. (Cross-listed with ECON 8020) **Prerequisite(s)**: Principles of Microeconomics (ECON 2200) and Principles of Macroeconomics (ECON 2220), or Analytical Foundations of Economics (BSAD 8180), or permission of the instructor. Not open to non-degree graduate students.

### BSAD 8026 RESEARCH METHODS IN ECONOMICS AND BUSINESS (3 credits)

Covers the methodology of economics: choosing a research topic, literature search tools, data source identification, data summary techniques, basic statistical data analysis using statistical packages, and clear economics writing. The student will become familiar with these techniques through text materials, journal studies, and completion of an empirical economics paper. **Prerequisite(s)**: Graduate standing. Not open to nondegree students.

### BSAD 8030 INFORMATION TECHNOLOGY IN BUSINESS (3 credits)

The premise of this course is that today’s managers must learn to use information technology to create competitive firms, manage global corporations and provide useful products and services to customers. Accordingly, the content of this course is focused on use of information technology for competitive advantage. Students will develop case studies of firms who have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application. **Prerequisite(s)**: Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent). Not open to nondegree students.

### BSAD 8040 BUSINESS AND INFORMATION TECHNOLOGY: CONNECTING PEOPLE AND INFORMATION (2 credits)

The premise of this course is that today’s managers must learn to use information technology to create competitive firms, manage global corporations and provide useful products and services to customers. Accordingly, the content of this course is focused on use of information technology for competitive advantage. Students will develop case studies of firms who have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application. **Prerequisite(s)**: BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in management information systems may not include this course in a plan of study for the MBA degree. Not open to non-degree graduate students.

### BSAD 8060 PEOPLE: CULTIVATING SKILLS FOR LEADERSHIP (2 credits)

This course will prepare students with the skills to effectively enact the critical leadership skills of listening, employee feedback and coaching, goal-setting, empowerment/delegation, influencing, interviewing, conflict, negotiation, intercultural awareness, team/group discussions, and business etiquette. **Prerequisite(s)**: Admission to the MBA program. Not open to non-degree graduate students.
BSAD 8066 HEALTHCARE ANALYTICS FOR BUSINESS (3 credits)
This course will focus on the use of analytics to develop key performance indicators that integrate and evaluate clinical, administrative, and financial performance. Key concepts in this course will include information management, performance metrics, data visualization, and communication of results across the healthcare ecosystem. Specific topics will include health outcomes analysis, financial performance, developing an analytics strategy, data quality and governance, and the four stages of actionable intelligence. (Cross-listed with MGMT 4060, SCMT 4060).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8070 COACHING & DEVELOPING OTHERS (2 credits)
Organizational leaders must effectively coach and develop others in order to ensure sustainable long-term organizational performance. Both through one-on-one feedback and coaching as well as through strategy-aligned organizational-level talent development programs, leaders establish the organization's culture of employee development and growth.
Prerequisite(s): Admission to Executive MBA Program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8076 INTERNATIONAL LOGISTICS MANAGEMENT (3 credits)
This course will focus on the logistics of international trade and how managers facilitate the flow of goods and services in import and export environments. Students will learn about infrastructure and business practices needed to manage international transportation, communications, services, and regulatory requirements. Students will develop an understanding of international terms of trade, transaction risk management, and location decisions for placement of warehouses and distribution centers. (Cross-listed with SCMT 4070).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8080 BUSINESS FORECASTING (3 credits)
The course will cover forecasting tools and applications applied to business settings. The first half of the course will cover traditional Econometric forecasting methods and the second half of the course will focus on predictive analytics models and machine learning. Time in the computer lab will be focused on teaching students how to implement the models discussed in lectures. (Cross-listed with ECON 8310).
Prerequisite(s): ECON 8320 (or equivalent programming experience) or permission of instructor. Not open to non-degree graduate students.

BSAD 8090 ESSENTIAL LEADERSHIP SKILLS (3 credits)
This course will teach students the interpersonal skills necessary to effectively manage others. Second, this course will serve as a vehicle to assess the business content knowledge and computer literacy of incoming MBA students in order to provide customized remediation recommendations for each student. Third, the course will collect information that will be used for assessment and accreditation purposes to evaluate the effectiveness of the MBA program. This course will address the following MBA program themes: communication, change agent, teamwork, information technology, critical thinking and information gathering and analysis.
Prerequisite(s): Admission to the MBA program and completion of MBA foundation courses (or equivalent) or may be taken concurrently with the final foundation course. Not open to nondegree students.

BSAD 8096 MANAGING COLLABORATIVE ENGAGEMENT (3 credits)
This course will provide students with the opportunity to develop knowledge and strategies for leading teams, enhancing collaboration, building consensus, problem solving in teams, facilitating group processes, and designing collaborative workspaces. (Cross-listed with MGMT 4090, ITIN 4090)
Prerequisite(s): Admission to a graduate program at UNO or the STRATCOM Leader Fellows Program. Not open to non-degree students.

BSAD 8100 MANAGERIAL ECONOMICS (3 credits)
The course will offer students tools of analysis drawn from consumer theory and the theory of the firm in order to improve the understanding of human behavior as it is constrained in the context of business decision-making. This course is intended for students who are seeking the degree of Master of Science in Economics or the degree of Master of Business Administration. Prerequisite(s): ECON 2200 and 2220 or BSAD 8180 and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to nondegree students.

BSAD 8110 ACCOUNTING AND FINANCIAL FUNDAMENTALS (3 credits)
The course is designed to give incoming graduate students the foundation in accounting that is necessary for subsequent graduate courses. Emphasis is on introducing the students to as many accounting concepts as possible. Prerequisite(s): Graduate admission or permission of the appropriate graduate advisor. This course cannot be used in a plan of study for any graduate program at UNO. Not open to non-degree graduate students.

BSAD 8136 HUMAN RESOURCE MANAGEMENT (3 credits)
This course is a comprehensive review of human resource management concepts and practices. The course is designed to educate future managers and leaders on the importance of utilizing effective human resource methods that comply with federal laws and provide the organization with high-quality talent that provides a competitive advantage. (Cross-listed with MGMT 4030).
Prerequisite(s): BSAD 8136 students do not have any prerequisite courses; however, BSAD 8250 (Organizational Behavior) is recommended prior to enrollment.

BSAD 8140 BUSINESS INTELLIGENCE ANALYSIS (2 credits)
In BSAD 8440 you learned how to extract and manipulate data in a business intelligence tool. In this class you will learn to use this data to extract business knowledge. To do this, you will learn about the data model, methods of aggregation, and visualizations in the business intelligence (BI) software.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8440. Not open to non-degree graduate students.

BSAD 8146 TOTAL REWARDS (3 credits)
This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee compensation and benefit programs. The course is designed to enable future managers and human resource professionals to utilize effective strategies for managing the single largest controllable expense for organizations; employee pay and benefits. (Cross-listed with MGMT 4010).
Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8150 ECONOMICS: ESSENTIAL CONCEPTS FOR MANAGERS (2 credits)
This course exposes MBA students to fundamental economic concepts necessary for successful business planning and financial success. Topics include: Comparative advantage and international trade, market dynamics, the role that the competitive landscape plays in company decision-making, macroeconomic growth and development, and monetary and fiscal policy and their impact on business activity.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in economics may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8156 TALENT DEVELOPMENT (3 credits)
This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee training and development programs to optimize human capital effectiveness in modern organizations. The course is designed to enable future managers and human resource professionals to utilize effective strategies for assessing employee training needs and developing appropriate solutions to maximize talent utilization. (Cross-listed with MGMT 4120).
Prerequisite(s): BSAD 8136 is recommended but not required.
BSAD 8160 INTERMEDIATE ANALYTICS (2 credits)
Business Intelligence software tools are statistical in nature. Many of the visualizations/widgets use statistics "under the hood" to provide insights to you the user. Can you trust these insights? How are they calculated? When are they appropriate? In this class, you will learn the answers to these questions.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8140. Not open to non-degree graduate students.

BSAD 8166 STAFFING THE ORGANIZATION (3 credits)
This course is a comprehensive review of issues and techniques related to the acquisition of high-quality human resources for optimal organizational effectiveness. The course is designed to enable future managers and human resource professionals to utilize effective strategies for recruiting, selecting, placing, and integrating new employees into the organization's workforce. (Cross-listed with MGMT 4110).
Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8176 EMERGING TRENDS IN SUPPLY CHAIN MANAGEMENT (3 credits)
This course will focus on megatrends influencing supply chain management and design in the 21st century. Key concepts in this course will include contemporary opportunities and challenges in creating customer value via the supply chain with a focus on globalization, sustainability, and risk management. Specific topics will include the influence of the empowered customer on supply chain design, global supply chain trends, and the need for integration of technology and talent to create a competitive advantage. (Cross-listed with SCMT 4170).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8190 APPLICATIONS IN ANALYTICS (2 credits)
What is a 'business question' and how do you answer it with data? In this class you will learn to form testable business questions. This course will build on the knowledge you gained in BSAD 8440, BSAD 8140, and BSAD 8160 to answer your business questions with the help of business intelligence software.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8160. Not open to non-degree graduate students.

BSAD 8200 MANAGERIAL ACCOUNTING (3 credits)
A study of concepts, analysis and procedures of accounting utilizing internal financial and non-financial data which provides management with information for planning and controlling routine operations, for non-routine decisions, policy-making and long-range planning; and for external reporting to stockholders, governments and interested parties.
Prerequisite(s): ACCT 200 and 2020 or BSAD 8110, and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to nondegree students.

BSAD 8206 CONSULTATIVE SELLING PRINCIPLES (2 credits)
The primary focus of the Consultative Selling Principles course is to develop the behaviors, methodologies, principles, and processes required to successfully lead and manage complex selling initiatives to a win-win close. The course examines and applies, through role playing and other activities, the critical relationship building, critical thinking, problem solving, listening and negotiating capabilities which are the foundation skills underlying consultative selling. (Cross-listed with MKT 4200)
Prerequisite(s): MKT 3310 with 'C+' or better; MKT 3100 with C+ or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8210 ACCOUNTING: DECISIONS & CONSEQUENCES (2 credits)
Managers and administrators must be able to understand, analyze, and use accounting information to make operational and strategic business decisions. In this course, we will study practical uses of accounting information to address the problems and decisions managers face in business. Emphasis is placed on the user of accounting information rather than the preparer. Upon completion of this course, a student should be able to use accounting information to make management decisions, understand how accounting rules inform those decisions, and consequently, how those decisions affect a company's financial reports.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or graduate degree in accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8216 SELLING FINANCIAL SERVICES (3 credits)
Selling Financial Services concentrates on methods to effectively sell services and products in the financial services industry, including the banking, brokerage and insurance sectors. Targeting, initiating, and acquiring client relationships, expanding business opportunities, and maintaining long-term client relationships are the course's focal points. This integrative course is designed to provide students with a basic understanding of the selling profession and sales culture within the financial services industry. (Cross-listed with MKT 4210, FNBK 4210).
Prerequisite(s): Not open to non-degree graduate students.

BSAD 8220 ADVANCED APPLICATIONS IN ANALYTICS (2 credits)
Using the knowledge gained in BSAD 8440, BSAD 8140, BSAD 8160, and BSAD 8190, each student in this course will work individually to apply the entire business analytics process (starting with data collection and ending with results) to a real problem in their own organization.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8190. Not open to non-degree graduate students.

BSAD 8226 GLOBAL STRATEGIC ACCOUNT MANAGEMENT (3 credits)
Throughout this course, the management of strategic account programs at national, multi-country, and global levels will be addressed. The primary focus of the curriculum is on the critical success factors for driving revenue, sustainable long term-growth and profitability with a base of core strategic buyers.
Prerequisite(s): Senior or graduate student standing and permission of the instructor. Not open to non-degree graduate students.

BSAD 8230 LEADING CHANGE & INNOVATION (2 credits)
This course focuses on providing leaders with the knowledge and ability to lead organizational change and enhance organizational innovation. Topics include organizational culture, organizational design, and organizational processes (including reward systems).
Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8240 EFFECTIVE LEADERSHIP OF PEOPLE (2 credits)
This course aims to enhance the leadership effectiveness of students by developing knowledge of what constitutes effective leadership and how to apply leadership concepts and models.
Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business. Not open to non-degree graduate students.
BSAD 8250 ORGANIZATIONAL BEHAVIOR: ENHANCING HUMAN & ORGANIZATIONAL CAPABILITIES (2 credits)
This course will prepare students with the knowledge necessary to manage and lead organizations effectively. Students will learn management theories, understand important research findings in organizational behavior, and apply both theory and research results to real organizational situations, thus giving them the capacity to use OB theories to enhance organizational effectiveness.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in management may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8260 EFFECTIVE USE & REPORTING OF ACCOUNTING INFORMATION (2 credits)
This course focuses on the use and reporting of accounting information, with an emphasis on financial statements and how executive decisions can influence these statements. Financial statements, including footnotes and explanatory material, are the primary instruments utilized by parties external to the enterprise in making judgments about the enterprise. By understanding how management decisions are reflected in the financial statements, managers will understand how they can influence their judgment.
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8280 EMPLOYEE RECRUITMENT, ENGAGEMENT, AND RETENTION (2 credits)
Effective recruitment, engagement, and retention of highly motivated and high performing employees is critical for organizational success. This course will address the key organizational characteristics that must be in place for this to occur.
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership.

BSAD 8300 ORGANIZATION THEORY & DESIGN (3 credits)
This course is designed to increase students’ understanding and knowledge of how organizations are designed and structured in order to create value and competitive advantage, and how organizations can operate in an effective and efficient manner in an ever-changing environment. The course will address topics such as: organizational effectiveness, organizational structure, organizational design, organizational culture, organizational technology, the external environment, organizational change, and the organizational life cycle. The ultimate goal is for students to be able to understand how organizations should be structured as a result of both external and internal factors.
Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8310 MANAGING PERFORMANCE IN ORGANIZATIONS (3 credits)
A human behavior course emphasizing the areas of individual behavior, interpersonal behavior, group behavior and the interplay of human and non-human factors.
Prerequisite(s): Essential Leadership Skills (BSAD 8060) or admission to the MAcc program. Not open to nondegree students.

BSAD 8326 SALES MANAGEMENT (3 credits)
The student will be exposed to current research findings in sales management and to business cases and simulations where sales management theories and concepts will be applied. This course will prepare students to develop and implement specific compensation, motivation, and evaluation strategies for managing sales professionals across a wide variety of organizations. (Cross-listed with MKT 4320.)
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8330 LEADING TEAMS (2 credits)
This course focuses on building and leading high-performing teams in organizations. Topics include how to evaluate team effectiveness, how to create and develop teams that are cohesive and high-performing, how to lead and facilitate teams, and how to diagnose and intervene when teams are experiencing problems.
Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8336 PROJECT MANAGEMENT (3 credits)
This course will focus on the planning and execution of complex projects within an organization. Students will learn how to conduct stakeholder analysis, plan the scope of a project, develop a project budget, lead a project team, and define the steps necessary to bring a complex project to a successful conclusion. Students will recognize how the strategy, structure, and culture of an organization can be used to identify and prioritize complex projects. (Cross-listed with MGMT 4330, SCMT 4330)
Prerequisite(s): Admission to Graduate College, MBA Program; or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8340 INTERNATIONAL BUSINESS STUDY ABROAD (3 credits)
This course provides students with an international business and cultural experience through a study tour in a selected international location. Students will develop an understanding of the factors that affect international business decisions by visiting American companies operating abroad and foreign companies that export goods and services to the U.S.
Prerequisite(s): Instructor Permission.

BSAD 8345 CONSUMER BEHAVIOR (3 credits)
Consumers purchase, use, experience, and dispose of products and services as part of their consumption process. How and why consumers choose various brand options, form judgments about these brands, and decide which options to buy and/or re-buy are essential knowledge for marketing professionals. The course covers the psychological and social issues that guide consumption decisions. (Cross-listed with MKT 3320)
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8356 GLOBAL SOURCING AND INNOVATION (3 credits)
This course focuses on global suppliers as partners in the development and commercialization of new products. Students will learn about open innovation and the integration of internal and external business systems in new product innovation. Students will develop an understanding of regulatory policies related to information sharing and the intellectual property rights of buyers and suppliers. (Cross-listed with SCMT 4350)
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8360 EFFECTIVE MANAGEMENT OF CAPITAL STRUCTURE, CASH, & RISK (2 credits)
Students will develop strategic decision making skills by using financial concepts including time value of money, capital budgeting processes, cash flow forecasting and project risk analysis. Topics covered include: capital budgeting, financial statement analysis, capital structure, financial risk analysis.
Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8366 E-MARKETING (3 credits)
This course focuses on utilizing the Internet as a marketing platform. Course content includes discussion of how the Internet is used by businesses for designing products, pricing, promotions, distribution, positioning, gathering information, and cultivating relationships with stakeholders. The discussion about the rise of social media, sharing economy, virtual reality devices, and other relevant trends will also be part of the course. (Cross-listed with MKT 4360)
Prerequisite(s): BSAD 8400 with a grade of ‘B’ or above. Not open to non-degree graduate students.
BSAD 8370 LEADERSHIP IN DIVERSITY, EQUITY, ACCESS, AND INCLUSION (2 credits)
This course will focus on the role that organizational leaders play in proactively addressing organizational issues related to diversity, power, access, and equity. The course will explore tensions through the range of dimensions in which diversity is manifested among business leaders, staff, and stakeholders (which includes anyone impacted by the organization’s business decisions—e.g., employees, contractors, suppliers, customers, and the community). Policies, systems, histories, structures, and legislation will also be discussed.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8376 SUPPLY CHAIN ANALYTICS (3 credits)
This course focuses on integrating supply chain management through the use of key performance indicators. Key concepts in this course include data visualization, supplier performance metrics, service-dominant logic, and the supply chain for data. Specific topics include the influence of the empowered customer on supply chain metrics, using metrics to develop a competitive advantage, data-driven decision making, and the four stages of actionable intelligence. (Cross-listed with SCMT 4370).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8380 EFFECTIVE SYSTEMS, OPERATIONS, AND IT (2 credits)
Students will learn how to employ decision-making skills to create a long-term competitive advantage for an organization through operational and technical excellence. Key concepts in this course include developing a view of organizations as technical and behavioral systems, operations management, quality management, strategies related to IT procurement, deployment, maintenance and security, and the supply chain. Specific topics will include applied systems theory, process improvement, quality assurance, supply chain management, IT systems development strategies, and issues related to systems security, data security, and data privacy.
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business.

BSAD 8386 INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT (3 credits)
This course will focus on the strategic procurement of products and services in order to gain a competitive advantage through integrated supply management. Students will learn about strategic supply management, contract negotiation, and supplier quality management. Students will develop an understanding of supplier performance management through the use of supply chain information systems. (Cross-listed with MKT 4380, SCMT 4380)
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8396 MARKETING ANALYTICS (3 credits)
This course focuses on the application of data analytics in marketing decision making (e.g., segmentation, sales forecasting, and resource allocation). Students will learn to apply statistics and econometrics to solve marketing problems. Key topics in this course include marketing data visualization, marketing metrics, descriptive and predictive analytics, and digital marketing analytics. This course takes a very hands-on approach with real-world databases and equips students with tools that can be used immediately on the job. (Cross-listed with MKT 4370).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8400 MARKETING POLICIES (3 credits)
This course provides an introduction to the fundamental concepts of marketing, including a customer orientation, matched with attention to competition and core strengths. The course will illustrate strategies and principles that will help you understand how marketing managers, product managers or service managers must think through their situations, determine their goals and lay a course to achieve those goals.
Prerequisite(s): Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent); or admission to Macc program. Not open to nondegree students.

BSAD 8416 DIVERSITY, EQUITY, ACCESS AND INCLUSION SOLUTIONS FOR MINIMIZING RISK (3 credits)
This course provides students an opportunity to explore the various aspects of power, access, and equity as it relates to the business environment. Students will explore tensions through the range of dimensions in which diversity is manifested among business leaders, staff, and stakeholders (include anyone impacted by business decisions, such as: employees, contractors, suppliers, customers, and the community) through policies, systems, histories, structures, and legislation. Students will have the opportunity to learn differences that individuals bring to a business environment and how stakeholders can capitalize on those differences by creating long-term inclusive environments. (Cross-listed with LAWS 4410).
Prerequisite(s): Admission to the MBA program. Not open to non-degree graduate students.

BSAD 8420 MARKETING: UNDERSTANDING CONSUMERS AND MARKETS (2 credits)
This course exposes MBA students to the fundamental concepts, practices and issues of marketing. A wide range of marketing practices and structures will be explored including product and service firms, consumer and business markets, profit and not-for-profit organizations, domestic and global companies, and small and large businesses.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in marketing may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8426 BUSINESS DEMOGRAPHICS (3 credits)
The goal of this course is to develop a demographic perspective in order to assist in understanding the business environment and business policy. How population change impacts consumer markets and all of the functions (for example, accounting, finance and management) that must exist for these markets to perform. Includes a history of population change and policy as well as a view toward international population considerations. (Cross-listed with MKT 4420).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8430 STRATEGIC BRAND MANAGEMENT (3 credits)
An exploration of the characteristics, meanings, and management of brands in the business world. The course examines brands as a strategic asset, and draws on managerial, consumer, and cultural perspectives.
Prerequisite(s): BSAD 8420 or permission of instructor. Not open to nondegree students.
BSAD 8435 MARKETING INNOVATION (3 credits)
Product, service, and process innovation are essential drivers of firm performance. However, firms face considerable and complex challenges when bringing innovative ideas to life. For example, what marketing research methods should we employ to uncover vital consumer insights? How do these insights influence the development and launch of new products and services? What differentiated value are we delivering to our consumers? How do we successfully bring this new product or service to market? How does a brand’s purpose and personality influence consumers’ perceptions, purchase decisions, adoption, and engagement? This course will cover key marketing principles involved in the development and launch of new and innovative products and services - from conception to commercialization. Furthermore, we will explore how new-age technologies impact each stage of the development and launch processes. (Cross-listed with MKT 3400).
Prerequisite(s): BSAD 8420 or equivalent; and admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8440 BUSINESS INTELLIGENCE DATA EXPLORATION (2 credits)
The first in any analytics project is to get data ready for analysis. In this class you will learn to extract data from a business data source and ready it for analysis in a business intelligence software tool. In the process you will learn tools necessary for this process including SQL, Power Query, M, and DAX.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics. Not open to non-degree graduate students.

BSAD 8450 SEMINAR IN MARKETING (3 credits)
Exploration, study and critical analysis of contemporary marketing problems, trends, methods and approaches for seminar discussion and written report.
Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8456 MANAGERIAL NEGOTIATION STRATEGIES (3 credits)
This course introduces students to the theory and practice of negotiation. The ability to negotiate successfully rests on a combination of analytical and interpersonal skills. In this course we will develop a set of conceptual frameworks that should help students better analyze negotiations in general and prepare more effectively for future negotiations in which they may be involved. This course is designed to help students better understand the theories, processes, and practices of negotiation, as well as conflict resolution and relationship management so that students can be more effective negotiators in a wide variety of situations. (Cross-listed with MGMT 4450, SCMT 4450).
Prerequisite(s): Admission to Graduate College, MBA Program, or by permission of the instructor.

BSAD 8466 SUPPLY CHAIN INTEGRATION (3 credits)
This course will focus on the integration of internal and external systems designed to maximize the efficiency and effectiveness of supply chain networks developed by industrial organizations, government agencies, and not-for-profit organizations. Key concepts will include supply chain design, trends in technology, and cross-functional collaboration, coordination, and communication along the value chain. Specific topics will include the influence of empowered customers on supply chain integration, global supply chain trends, closed-loop supply chains, and the challenges and benefits of integrating technology and talent in the workplace. (Cross-listed with SCMT 4460).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8476 BEHAVIORAL FINANCE & INVESTING (3 credits)
This course focuses on how actual investor behaviors and market behaviors differ from traditional theories of finance. This course will examine psychological biases, identify how such biases influence financial markets and settings, and explore methods that can be utilized to recognize and overcome such behavioral pitfalls. (Cross-listed with FNBK 4470).
Prerequisite(s): Admission to graduate college, MBA program, or by permission of instructor. Not open to non-degree graduate students.

BSAD 8480 GLOBAL ECONOMICS AND CORPORATE SOCIAL RESPONSIBILITY (2 credits)
In this course students will learn both how to apply global economic issues business strategy and how to balance socially responsible activities with the profit motive. With respect to global economics, topics include gains from trade, international trade patterns, foreign exchange markets, and barriers to trade. With respect to corporate social responsibility, topics include social responsibility and working conditions, socially responsible stewardship of the environment, and socially responsible strategies concerning human rights issues.
Prerequisite(s): Admittance to the Executive MBA Program or the Executive Certificate in Business.

BSAD 8510 SECURITY ANALYSIS (3 credits)
Study of the efficient market, fundamental and technical analysis approaches for the valuation of marketable securities. Methods of analysis are considered for the economy, industry groups and individual corporations.

BSAD 8520 SEMINAR INVESTMENT MANAGEMENT (3 credits)
This course focuses upon the modern portfolio theory of investment management and its application in formulation of policies for individuals and institutional investors. Topics addressed will include qualitative and quantitative analysis of the risks and returns of portfolio management using efficient market, fundamental analysis, and technical analysis approaches.
Prerequisite(s): BSAD 8510. Not open to nondegree students.

BSAD 8530 BANK & FINANCIAL MARKETS (3 credits)
This course focuses on the theory and practice in managing commercial banks. Topics covered include but not limited to: bank regulations, bank performance analysis, asset liability management, credit analysis and consumer loans. The course emphasizes the link between theory and practice through assigned course related readings, guest lecturers from industry experts, and a comprehensive bank research project on a local bank of your choice. At the end of the course, students should have a good understanding of basic banking theories as well as banking practices, and current issues and challenges facing the banking industry.
Prerequisite(s): BSAD 8500. Not open to non-degree graduate students.

BSAD 8540 MULTINATIONAL FINANCIAL MANAGEMENT (3 credits)
The focus of this course is on multinational financial management as viewed and practiced by the multinational firm and on current developments in international financial markets, including global banking. Familiarity with certain areas of the firm’s environment, such as the international monetary system, the European Monetary System, and determination of exchange rates under alternative regimes, is essential to the international financial manager.

BSAD 8550 SEMINAR IN FINANCE (3 credits)
This course will address specific financial management topics which will vary by semester and is intended for graduate students.

BSAD 8560 MARKETING STRATEGY: CUSTOMERS AND MARKETS (2 credits)
This course will focus on how successful businesses match their objectives and resources with opportunities in the marketplace by identifying and measuring consumer needs, determining target markets and deciding which products and services to offer. This course will also address pricing, promotion, and distribution strategies to create competitive advantage in domestic and international markets.
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business. Not open to non-degree graduate students.
BSAD 8570 EFFECTIVE STRATEGIC MANAGEMENT (2 credits)
This course centers around the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. Students will develop the strategic thinking skills needed to formulate and execute successful strategies for firms/organizations in a variety of industries and dynamic environments. Emphasis is given to the contributions of several business disciplines of study, such as marketing, finance, and management, to understanding both the internal operations of the organization and the influences of the external environment. This course is integrative and introduces both the theory and practice that enables that integrative process. 
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8576 INVESTMENT MANAGEMENT FOR FINANCIAL ANALYSTS (3 credits)
This course provides critical knowledge needed for students pursuing a career in investment management. The topic areas bridge academic theory, current industry practice, and ethical and professional standards and comprehensively address the areas assessed in the Chartered Financial Analyst examinations. (Cross-listed with FNBK 4570)
Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

BSAD 8590 EXECUTIVE MBA CAPSTONE PROJECT (4 credits)
Students in the Executive MBA capstone project course will complete an applied consulting project for an organization that requires them to integrate knowledge across multiple Executive MBA program knowledge areas. Students will identify the key problem(s) to be solved, use sound methodologies to gather necessary data, identify and employ relevant evidence-based research and practitioner literatures, apply relevant models and theories to guide the generation of potential solutions and implementation strategies, and identify the feasibility and financial implications of their proposed solution(s).
Prerequisite(s): Admission to the Executive MBA Program. Not open to non-degree graduate students.

BSAD 8596 RISK MANAGEMENT FOR BUSINESS MANAGERS (3 credits)
An analysis of risk management techniques for handling the risk exposures most businesses face, including insurance, self insurance, risk control, and risk avoidance, among others. (Cross-listed with FNBK 4590.)

BSAD 8600 REAL ESTATE FINANCE THEORY AND APPLICATIONS (3 credits)
This course explores advanced financial analysis tools and methodologies used to quantify complex factors surrounding real estate productivity, value, investment, and project feasibility. Specific course topics will coincide with student interest in one of three focus areas: Investment, Development, or Commercial Finance. 
Prerequisite(s): RELU 3410 and BSAD 8630, or permission of Real Estate Program Director.

BSAD 8605 REAL ESTATE PRINCIPLES AND PRACTICES (3 credits)
This is a survey course in real estate principles and practices, which is designed to familiarize students with industry terminology, current practices, and cover the following topics: Licensure, property rights, legal descriptions, real estate law and contracts, appraisal, financing, investments, Fair Housing, and related topic areas. This course provides foundational knowledge of the real estate field and will prepare students to successfully complete more advanced real estate coursework. NOTE: Students cannot receive credit for both RELU 2410 and RELU 3410. (Cross-listed with RELU 3410).
Prerequisite(s): Admission to Graduate College, MBA Program, or permission of Real Estate Program Director.

BSAD 8606 FINANCIAL RISK MANAGEMENT (3 credits)
The course provides students with an intermediate level analysis of financial derivatives, and the use of these instruments for managing risk in financial institutions. (Cross-listed with FNBK 4600.)
Prerequisite(s): BSAD 8500 and 8510 or their equivalent, and graduate standing. Not open to non-degree students.

BSAD 8610 REAL ESTATE APPRAISAL (3 credits)
This course addresses the fundamentals of real estate valuation and appraising, including factors affecting value, valuing land, improvements, and special classes of residential property. The course focuses on the ethics and legal principles, as well as Fair Housing Laws and the Americans With Disabilities Act as they pertain to property management. (Cross-listed with RELU 3430).
Prerequisite(s): RELU 2410 or RELU 3410 or FNBK 3250 or BSAD 8605 or BSAD 8630

BSAD 8615 PROPERTY MANAGEMENT (3 credits)
This course focuses on commercial and residential property management concepts and their application to the operation, control, and oversight of real property. The course will study leasing, tenant selection and relations, maintenance, marketing, contract management, asset management principles, as well as Fair Housing Laws and the Americans With Disabilities Act as they pertain to property management. (Cross-listed with RELU 4440).
Prerequisite(s): BSAD 8605, or permission of the Real Estate Program Director.

BSAD 8616 REAL ESTATE INVESTMENTS (3 credits)
This course focuses on methods used to analyze existing and proposed commercial and residential real estate investments through dynamic programming models, and explores strategies to finance commercial real estate. The class ultimately prepares students to understand the risks and rewards associated with financing and investing in real estate. (Cross-listed with RELU 4390).
Prerequisite(s): RELU 2410 or RELU 3410 or FNBK 3250 or BSAD 8605 or BSAD 8630

BSAD 8618 REAL ESTATE DEVELOPMENT (3 credits)
As a comprehensive introduction to financial management, the course will cover various fields of finance and discuss topics including the time value of money, bond and stock valuation, capital budgeting. 
Prerequisite(s): BSAD 8060 or BSAD 8070, 8150 and 8210. Students with an undergraduate major or a graduate degree in finance or accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8640 IT: STRATEGIC DEVELOPMENT AND DEPLOYMENT (1 credit)
Students will gain a strategic perspective of information technology management, including current trends and best practices, and understand how technology can be used in competitive positioning. Processes for innovation and research and development spending and new business models will be covered.

BSAD 8650 VISION & STRATEGIC LEADERSHIP (2 credits)
This course focuses on the critical role that organizational leaders play in ensuring that the organization has a clear vision and a clear mission which are in alignment with the organization’s business strategy and unit goals and effectiveness metrics. This course focuses on the mission and vision creation and communication process as well as vertical and horizontal goal alignment. 
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.
BSAD 8660 FRONTIERS OF ANALYTICS (2 credits)
In this program, you have learned many analytics techniques. However, analytics is a constantly evolving field with increasingly advanced methods. What techniques might be presented to you as a manager? How do you interpret these results? In this class we will explore cutting-edge analytics methods and when they are appropriate for your business.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8160. Not open to non-degree graduate students.

BSAD 8696 EMERGING TECHNOLOGY AND INNOVATION (3 credits)
This course equips entrepreneurially-minded students with a more complete range and vision of the viability of various startup opportunities (with a specific focus on innovative technologies and innovative business models). Students will become familiarized with the new and emerging technologies and innovations that define modern industries and product categories, as well as the various shifts in the way cutting-edge business gets done, regardless of industry. (Cross-listed with ENTR 4690, MGMT 4690).
Prerequisite(s): Admission to a UNO graduate degree program or permission of instructor

BSAD 8700 BUSINESS ANALYTICS: MAKING SENSE OF DATA (2 credits)
The purpose of this course is to provide business managers with an understanding of the important role data analytics has assumed in today’s organizations. Data analytics has become a key component in accomplishing strategic and operational goals. This course is designed to familiarize students with the concepts and principles of analytics. It is targeted for graduate or MBA students who have little or no background in analytics. Therefore, it focuses on breadth of coverage rather than depth in any specific area.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent); or admission to the MAcc program. Not open to non-degree graduate students.

BSAD 8710 SUPPLY CHAIN MANAGEMENT (3 credits)
This course will focus on supply chain management as a key functional area of organizational success. Students will learn about current techniques used by supply chain practitioners to make strategic and tactical decisions that support the overall strategy and day-to-day operations of an organization. Students will develop an understanding of how supply chain decisions and appropriate metrics of performance can be utilized to improve the operational efficiency and effectiveness of an organization.
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8720 STRATEGIC FINANCIAL MANAGEMENT (2 credits)
This course is intended to be advanced financial management. It will stress the theory and application of topics including, but not limited to capital budgeting, cash flow estimation, real options, capital structure, dividends and share repurchases, working capital management, budgeting, planning and forecasting, and lease management. The material covered in Strategic Financial Management will increase the student’s knowledge of how to strategically manage financial resources to increase the intrinsic value of the organization.
Prerequisite(s): For MBA students, BSAD 8630. For MAcc students, completion of all Master of Accounting (MAcc) foundation courses. Not open to non-degree graduate students.

BSAD 8726 INNOVATION VENTURES (3 credits)
This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with ENTR 4720, ITIN 4720, ITIN 8256, MGMT 4720, MKT 4720).
Prerequisite(s): Admission to a graduate program or by instructor permission

BSAD 8736 ECONOMICS OF ENTREPRENEURSHIP (3 credits)
This course will review economic theories of entrepreneurship with special emphasis on Schumpeter’s theory of creative destruction. The main focus of the seminar will be on the “high-level” entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 4730, ECON 8436)
Prerequisite(s): ECON 2200 or permission of the instructor for all students

BSAD 8766 SELLING IN AN ENTREPRENEURIAL CONTEXT (3 credits)
Successful entrepreneurs are able to identify unmet needs in the marketplace and then design and sell products or services that fulfill those needs. Sales effectiveness is essential for entrepreneurs because they must be able to build sustainable sales pipelines that ensure profitable growth while simultaneously addressing other pressing issues including financing, staffing, and product development. This course will focus on consultative solution-based sales fundamentals that can be applied in an entrepreneurial selling environment. (Cross-listed with ENTR 4760, MKT 4760)
Prerequisite(s): GPA 2.5 or better; MKT 3100 with a “C+” or better; MKT 3310 with a “C+” or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8776 INTRODUCTORY MAVERICK VENTURE FUND (1 credit)
This course teaches the basics of venture capital, including, the topics of term sheets, due diligence and learning the perspectives of the entrepreneur and investor. Students in this course have the opportunity to observe more advanced students making investments, ranging from 5,000 dollars to 10,000 dollars plus. This course is the first of three, one-credit courses where students gain more advanced venture funding knowledge and application at each level. (Cross-listed with ENTR 4770).
Prerequisite(s): This course requires instructor approval. Students must apply and interview to take this course. Preference is given to students in their junior year, and must have three semesters of school left before graduating.

BSAD 8786 INTERMEDIATE MAVERICK VENTURE FUND (1 credit)
In this course, students source deals, listen to pitches, and select start-ups to be funded. Investments typically range from 5,000 dollars to 10,000 dollars plus. This course is the second in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4780).
Prerequisite(s): This course requires instructor approval. Students must have completed BSAD 8776 with a grade of C or better.

BSAD 8796 ADVANCED MAVERICK VENTURE FUND (1 credit)
This course applies advanced concepts of venture capital. Students will learn how to monitor and assist start-ups in the scaling process. Students learn how to leverage community partners to amplify investment opportunities. This course is the third in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4790).
Prerequisite(s): This course requires instructor approval. Students must have completed BSAD 8786 with a grade of C or better.

BSAD 8800 MBA PROJECT-FOCUSED CAPSTONE (2 credits)
In this Master’s of Business Administration (MBA) required project-focused capstone course, students complete a service-learning consulting project for a non-profit or other type of organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program.
Prerequisite(s): Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 prior to Capstone and must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Not open to non-degree graduate students.
Business Administration, MBA and Management Information Systems, MS (MBA/MIS)

Department of Business Administration, College of Business Administration

Department of Information Systems & Quantitative Analysis, College of Information Science & Technology

Vision Statement
In today's context of globally integrated and interdependent businesses, ubiquitous information technologies, and a mobile workforce, it is critical that graduate education provides students opportunities to develop integrated business and technology skills. The primary purpose of this dual degree program is to provide this integration by enabling students to complete the MBA and MS in MIS degrees simultaneously. This track is designed for dedicated students who are willing to take on the challenges related to graduate education from two perspectives—business administration and management information systems. As such, this program involves intensive preparation in both business administration and information systems and a specialization in an area that combines both backgrounds. The dual degree program requires a minimum of 55 hours of course work beyond foundation requirements. Students who wish to pursue this option must work closely with an advisor to develop an integrated plan of study at an early stage. Students who complete the dual degree program will receive two degrees, two diplomas, and will have both degrees recorded on their transcript.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

- Spring: November 1
- Summer: April 1
- Fall: July 1 (June 1 for international students)

Other Requirements
- All applicants must have earned a minimum junior/senior GPA of 3.0 for both the MBA and the MS in MIS programs.
- Entrance Exam: An entrance exam is waived for the academic year 2023/2024. Submitting GMAT or GRE scores with at least the the minimum scores (GRE
MBA Foundation Courses

Degree Requirements

English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., OR a baccalaureate or other advanced degree from a pre-determined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.

- Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

Statement of Purpose: Applicants are required to submit a statement of purpose (500-750 words) addressing the following. The statement must be written in the applicant's own words, reflecting their goals and aspirations. Plagiarism in the statement may result in the rejection of the entire application.

- Why you want to study at UNO
- Career goals
- Relevant qualifications or work experience that demonstrate potential for success in the graduate program
- Motivations for pursuing graduate education

Resume: Include work experience and education

Letters of Recommendation: Three letters of recommendation (names and addresses submitted as part of the online application) from individuals who can evaluate your work and/or academic achievement

Interview: optional

- Although not required, applicants are strongly encouraged to arrange for an interview with one or more members of the graduate program committees of the MBA and MIS programs by directly contacting the committee chairperson of the College of IS&T. Telephone interviews are highly recommended for applicants outside the local area.

- Students qualifying for admission based on the standard outlined above, but lacking some foundation courses, will be granted provisional status until all foundation courses are completed with grades of “B” (3.0 on a 4.0 scale) or better.

### MBA Directed Elective Requirements

#### Directed Elective Requirement

For students who have earned an undergraduate or graduate degrees in accounting, economics, management, or marketing, the core course(s) corresponding to the student’s previously earned degree(s) will be waived.

To satisfy degree requirements, the student must complete a directed elective in the waived field as indicated. For students who have earned an undergraduate or graduate degree in finance, the core course(s) corresponding to the student’s previously earned degree may be waived upon request. Students with more than one core course waiver will be required to take an additional 1-credit hour seminar or 3-credit hour elective to fulfill degree requirements.

MBA/MIS Exit Requirements

Capstone Courses (5 hours)

BSAD 8800 - MBA Project-Focused Capstone. As the project-focused capstone course for the Master of Business Administration (MBA) degree, this course will focus on students completing a service-learning consulting project for a non-profit or other organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite:** Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the Capstone course. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Permission from MBA advisor is required to register for this class.

OR

ECON 8330 - Data Analysis from Scratch. This course may be substituted for BSAD 8800 as the Capstone requirement for MBA students. Students in the course will work on a service-learning consulting project, specifically focused on a client data project. The consulting project will focus on the application of knowledge and skills learned in the MBA program and the Business Analytics concentration. A minimum B (3.0 on
subject to the following conditions: A student may transfer credits into the MBA/MIS dual-degree program.

Transfer Credits

Other Program-Related Information

ISQA 8950 MIS Capstone (3 credits) (taken within the last 6 hours or the final semester of the program, with all core courses completed).

</tr>
</tbody>
</table>

The thesis must be in an area that relates to both the business administration and information systems domains. The Supervisory Committee must include at least one CBA faculty member and one ISQA faculty member.

Other Requirements to Complete the Program

All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

Other Program-Related Information

Transfer Credits

A student may transfer credits into the MBA/MIS dual-degree program subject to the following conditions:

- No more than 1/3 of the credits for the dual-degree program may be transfer credits
- No more than 1/3 of the business credits for the dual-degree program may be transfer credits
- No more than 1/3 of the MIS credits for the dual-degree program may be transfer credits
- The transfer credits must conform to the transfer policies of the individual programs that make up the dual-degree program

Total Credit Hours: 55

Academic Performance

In addition to UNO Graduate College Quality of Work Standards, Dual Degree (DD) students may repeat only once a BSAD 80-0-level course in which they receive any grade, including "W" or "I". Students earning three "C+/C-" grades, or a grade of "C-" or below, will be automatically dismissed from the DD program. Dismissed students will be immediately administratively withdrawn from all courses in which they are enrolled for DD credit.

Students who have been dismissed may not enroll in any courses for DD credit in any subsequent semester or summer session until reinstatement has been granted by the Dual-Degree Program Academic Standards Committee (DDPASC) comprised of the 2 GPC Chairs and 1 faculty member from each GPC.

Students who have been dismissed from the DD program may submit a written petition for reinstatement to the DDPASC. Students petitioning the DDPASC for reinstatement may not enroll in any course for DD credit until the DDPASC has ruled on the petition. Upon receiving a petition for reinstatement, the DDPASC will evaluate the student's written petition for reinstatement. As part of the reinstatement petitioning process, the DDPASC reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student; this information may be used by the DDPASC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege and not all students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period at the DDPASC's discretion and must satisfy the probationary conditions specified by the DDPASC. In addition to probationary conditions, reinstated students will be subject to additional reinstatement conditions as specified by the DDPASC. These reinstatement conditions will include retaking one or more courses in which the student must earn a grade of "B" (3.0) or higher (the exact grade requirements for retaken courses may in fact be higher than "B" (3.0)). Students not satisfying the probationary or reinstatement conditions will be automatically dismissed.

Grades Earned in Repeated Courses

When making decisions related to the Quality of Work Standards issues outlined in the UNO Graduate Catalog, the Dual-Degree Program Academic Standards Committee (DDPASC) will consider the initial grade(s) received in a course as well as the most recent grade received for the course. This approach differs from the method used to calculate GPA in a student's MavLINK/DegreeWorks file, where the most recent grade replaces the grade received in the previous course attempt.

Business Administration, MBA and Economics, MS (MBA/ECON)

Departments of Business Administration and Economics, College of Business Administration

Vision Statement

In a world with increasingly more data, the quantitative focus of the graduate Economics degree is increasingly attractive to students and employers. Businesses generate data at an unprecedented rate, and the econometric and modeling skills of an applied economics degree allows graduates to make sense of business data in a systematic and scientific way. This specialization is enhanced with the broad knowledge provided by an MBA degree. Students in the MBA program demonstrate basic proficiency in a number of business-related disciplines, including marketing, management, accounting, and finance. This wide domain of knowledge allows students to apply the analytical skills learned in
economics courses to a wider set of business problems, thereby adding value to their organizations. Students who wish to pursue this option must work closely with an advisor to develop an integrated plan of study at an early stage. Students who complete the dual degree program will receive two degrees, two diplomas, and will have both degrees recorded on their transcript.

Electives must contain 9 from the approved MBA elective list, 9 credits from the Economics approved elective list, and 3 credits from from courses common to both lists.

**Exit Requirements**

**MBA Exit Requirement**

**BSAD 8800 - MBA Project-Focused Capstone.** As the project-focused capstone course for the Master of Business Administration (MBA) degree, this course will focus on students completing a service-learning consulting project for a non-profit or other organization. This consulting project will focus on the application of knowledge and skills learned in the MBA program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite:** Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the Capstone course. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Permission from MBA advisor is required to register for this class. Not open to non-degree graduate students.

**ECON 8330 - Data Analysis from Scratch.** This course may be substituted for BSAD 8800 as the Capstone requirement for MBA students. Students in the course will work on a service-learning consulting project, specifically focused on a client data project. The consulting project will focus on the application of knowledge and skills learned in the MBA program and the Business Analytics concentration. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite(s)/Corequisite(s):** A multivariate or regression analysis course such as ECON 8300 (https://catalog.unomaha.edu/search/?P=ECON%208300), ISQA 9130 (https://catalog.unomaha.edu/search/?P=ISQA%209130) or STAT 8436 (https://catalog.unomaha.edu/search/?P=STAT%208436), and a programming class such as ECON 8320 (https://catalog.unomaha.edu/search/?P=ECON%208320) or equivalent programming experience; or instructor approval. Students also must successfully complete BSAD 8630 (https://catalog.unomaha.edu/search/?P=BSAD%208630), BSAD 8420 (https://catalog.unomaha.edu/search/?P=BSAD%208420), and BSAD 8830 (https://catalog.unomaha.edu/search/?P=BSAD%208830) before taking this course for the Capstone requirement. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Not open to non-degree graduate students.

**Economics Exit Requirement**

Comprehensive Examination

**Other Requirements to Complete the Program**

All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

**Concentrations**

**Business Analytics Concentration**

In addition to UNO Graduate College Quality of Work Standards, Dual Degree (DD) students may repeat only once a BSAD 8-0-level course in which they receive any grade, including "W" or "I". Students earning three "C/C+" grades, or a grade of "C-" or below, will be automatically dismissed from the DD program. Dismissed students will be immediately administratively withdrawn from all courses in which they are enrolled for DD credit.

Students who have been dismissed may not enroll in any courses for DD credit in any subsequent semester or summer session until reinstatement has been granted by the Dual-Degree Program Academic Standards Committee (DDPASC) comprised of the 2 GPC Chairs and 1 faculty member from each GPC.

Students who have been dismissed from the DD program may submit a written petition for reinstatement to the DDPASC. Students petitioning the DDPASC for reinstatement may not enroll in any course for DD credit until after the DDPASC has ruled on the petition. Upon receiving a petition for reinstatement, the DDPASC will evaluate the student's written petition for reinstatement. As part of the reinstatement petitioning process, the DDPASC reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student; this information may be used by the DDPASC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege and not all students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period at the DDPASC's discretion and must satisfy the probationary conditions specified by the DDPASC. In addition to probationary conditions, reinstated students will be subject to additional reinstatement conditions as specified by the DDPASC. These reinstatement conditions will include retaking one or more courses in which the student must earn a grade of "B" (3.0) or higher (the exact grade requirements for retaken courses may in fact be higher than "B" (3.0)). Students not satisfying the probationary or reinstatement conditions will be automatically dismissed.

**Business Administration, MBA and Public Health, MPH (MBA/MPH)**

Department of Business Administration, College of Business Administration; College of Public Health, UNMC

**Vision Statement**
The MBA/MPH dual degree program is designed for students who desire specialized expertise and training in public health management and administration. Graduates will be equipped to work in a variety of public interest arenas, commercial or industrial employment, hospitals or insurance settings, or in universities.

**Program Contact Information**

**Business Administration:**
Kristi Lynch, Senior Director, Graduate, Executive & Professional Business Programs 100 Mammel Hall (MH) 6708 Pine Street 402.554.4836 mba@unomaha.edu

Jessica Kampfe, MBA Advisor 100 Mammel Hall 6708 Pine Street 402.554.3010 mba@unomaha.edu

Admissions

Application Deadlines (Spring 2024 and Fall 2024)
- Spring: October 1
- Fall: June 1

Apply Now! for the MBA program.

Apply Now! for the MPH program.

Program Admission Requirements
- Minimum junior/senior GPA of at least 2.85 in undergraduate courses related to proposed major
- Resume (employment and educational history)
- Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., OR a baccalaureate or other advanced degree from a pre-determined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
  - 80 on the TOEFL
  - 6.5 on the IELTS

Admission Criteria
- Students who have already graduated with the MBA or MPH degree are not eligible for the MBA/MPH dual degree program.
- The admission requirements for the MBA program can be found on the UNO MBA website (https://www.unomaha.edu/college-of-business-administration/mba/).
- Students qualifying for admission based on the standards outlined above but lacking MBA foundation courses will be granted provisional status until all foundation courses are completed with grades of "B" (3.0 on a 4.0 scale) or above.
- Students who are already enrolled in the MBA program at the College of Business Administration may apply for admission to the MBA/MPH dual degree program if they are in good academic standing and have not completed more than 12 semester hours within the MBA program.
- The admission requirements for the MPH program can be found on the UNMC College of Public Health – Master of Public Health website (http://www.unmc.edu/publichealth/programs/mphdualdegree/mba-mph.html).
- Students who are already enrolled in the MPH program at the College of Public Health may apply for admission to the MBA/MPH dual degree program if their GPA is at least 3.0 and have not completed more than 18 semester hours toward the MPH program.

Dual Admission

Applicants must complete the application process for each of the programs, MBA and MPH, separately, and MUST meet the requirements for each program. The student must indicate that he or she is applying for admission to the MBA/MPH dual degree program on the application.

Applications are evaluated by each degree program in separate admissions processes. It is possible that an applicant will be admitted to one program and not the other. In this case the applicant can matriculate into the accepted program, but not participate in the dual degree option.

Degree Requirements

Foundation Courses
A student must complete the foundation courses listed below prior to, or concurrent with enrollment in the first MBA course. Courses successfully completed A, B, or C (2.0 on a 4.0 scale) grades in the student’s undergraduate program are considered as sufficient preparation. Otherwise, the student must complete the foundation requirements with a grade of B (3.0 on a 4.0 scale) or above.

The degree requirements for the dual MBA and MPH program include the completion of a minimum of 60 semester hours of graduate credit beyond MBA foundation courses identified at the time of admission. These hours will be completed as follows. Each student admitted to the dual degree option will, within the first semester of their enrollment, file a plan of study in close consultation with a graduate advisor.

Core Courses: 37 credit hours

- MBA: 22 hours required
- MPH: 15 hours required

**Capstone Courses & Service Learning (8 credit hours)**

BSAD 8800 MBA Project-Focused Capstone (2 credits) The project-focused capstone course for the Master's of Business Administration (MBA) degree will focus on students completing a service-learning consulting project for a non-profit or other organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite:** Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the Capstone course. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Permission from MBA advisor is required to register for this class. Not open to non-degree graduate students.

- Students will complete the MPH program service learning course (CPH 528: Applied Practice Experience for MPH Students, 3 credit hours)
- Students will complete the MPH program capstone course (CPH 529: MPH Capstone Experience, 3 credit hours) with a grade of B (3.0) or higher.

**Prerequisite:**
CPH 505 or HPRO 805: Applied Research in Public Health

Students must complete all core and concentration area courses, be within 12 hours of graduation (including 6 hours of service learning/ capstone experience), and be in good academic standing to start the Service Learning/ MPH Capstone Experience.

**Elective and Concentration Courses (15 credit hours)**

MBA/MPH students qualifying for an MBA core course waiver based on their undergraduate major(s) or previous degree(s) will be required to complete a **Directed Elective** in the waived field(s). The waived core course will not satisfy degree requirements. For the list of approved directed electives please consult with your advisor.

MBA/MPH students are not eligible to choose a concentration area for the MBA program. Instead, they will have the option to complete a concentration in Biostatistics, Emergency Preparedness, Epidemiology, or Public Health Administration and Policy. If a student is completing one of these concentration, they will also need to complete the corresponding electives for that concentration.

**Biostatistics Concentration**

### GPC Will Consider Grades Earned in Related Courses

When making decisions based on Quality of Work Standards issues, the CBA GPC will consider the initial grade(s) received in a course as well as the most recent grade received for the course. This approach differs from the method used to calculate GPA in a student’s MavLINK file, where the most recent grade replaces the grade received in the previous attempt.

### Student Responsibilities

- Each student admitted to graduate studies is responsible for knowing the procedures and regulations of the Graduate College.
- Each student admitted to the dual degree option will, within the first semester of their enrollment, file a plan of study in close consultation with a graduate advisor.
- Once admitted to the MBA/MPH dual degree program, the MBA Director in the College of Business Administration will oversee the student’s progress in the MBA curriculum, and faculty in the College of Public Health will oversee the student’s progress in the MPH curriculum.
- Each student has to complete both the MBA and MPH orientations.
• Students must maintain academic eligibility as defined by each degree program.

Business Administration, MBA and UNMC PharmD (MBA/PharmD)

Department of Business Administration, College of Business Administration; UNMC College of Pharmacy

Vision Statement
The MBA/PharmD dual degree program is designed for pharmacy students who desire to possess both clinical skills and an understanding of business management, leadership, and strategic decision making. Graduates will be prepared to anticipate change and to make decisions that balance patient outcomes and the overall cost of care.

Admissions
MBA Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
• Spring: November 1
• Summer: April 1
• Fall: July 1 (June 1 for international students)

Program Specific Requirements
College of Pharmacy Students
To be eligible for enrollment in the UNO MBA program, the UNMC student must:
• Be in the top 50% of his/her pharmacy school class;
• Secure approval from the UNMC COP associate dean of Student Affairs;

• Secure approval from the MBA advisor;
• Meet UNO MBA admission requirements including the submission of required transcripts, test scores, and resume;
• Complete UNO’s Application for Graduate Admission;
• Applicants that did not complete a baccalaureate degree prior to enrollment in the PharmD program must have completed a minimum of ninety (90) college level credits to qualify for admission;
• Junior/Senior GPA calculation will be based on the most recent sixty (60) credits including PharmD credits.

MBA Program Specific Requirements
Admission may be granted to an applicant whose record includes at least the following:
• 2.85 junior/senior grade point average;
• Resume (employment and educational history);
• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  • 550; Paper-based TOEFL: Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

Admission Criteria
• Students who have already graduated with the MBA or PharmD degree are not eligible for the MBA/PharmD dual degree program.
• Students qualifying for admission based on the standards outlined above but lacking MBA foundation courses will be granted provisional status until all foundation courses are completed with grades of “B” (3.0 on a 4.0 scale) or above.

Total Credits 9

MBA/PharmD students qualifying for an MBA core course waiver based on their undergraduate major(s) or previous degree(s) will be required to complete a Directed Elective in the waived field in addition to the hours transferred from UNMC. The waived core course will not satisfy degree requirements. Please consult with your advisor for a complete list of approved directed electives.

MBA/PharmD students are not eligible to choose a concentration are for the MBA program.

Exit Requirement

BSAD 8800 MBA Project-Focused Capstone (2 credits) (taken within the last nine (9) hours or the final semester of the program). The project-focused capstone course for the Master's of Business Administration (MBA) degree will focus on the students completing a service-learning consulting project for a nonprofit or other organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. Prerequisite: Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the Capstone course. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Permission from MBA advisor is required to register for this class. Not open to non-degree graduate students.

</table>

Other MBA Requirements

All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

Academic Performance

MBA Program Two Strikes Rule

A UNO MBA student may enroll only twice in each MBA course. If the class is not successfully completed on the second attempt then the student will be dismissed from the MBA program. An enrollment is defined as being enrolled in the course after the last day to withdraw via MavLINK and receive a 100% refund. The last day for withdrawal will be as stated in the current academic calendar for a full semester course (3 credits); for an eight-week course (2 credits) the last day for withdrawal will be the third day (including the start date) of the course as designated in MavLINK.

MBA Program Academic Performance

Students earning a third grade of "C+" or lower (or any single grade below "C" 1.67 on a 4.0 scale) will be automatically dismissed from the MBA program. Dismissed students will be immediately administratively withdrawn from all courses in which they are enrolled for MBA credit. Students who have been dismissed may not enroll in any courses for MBA credit in any subsequent semester or summer session until reinstatement has been granted by the College of Business Administration's Graduate Program Council (CBA GPC) and graduate dean.

Students who have been dismissed from the MBA program may submit a written petition for reinstatement to the CBA GPC. Students who have petitioned the CBA GPC for reinstatement may not enroll in any courses for MBA credit. Upon receiving a petition for reinstatement, the CBA GPC will evaluate the student's written petition for reinstatement. As part of the reinstatement petitioning process, the CBA GPC reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student and this information may be used by the CBA GPC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege and not all students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period of the CBA GPC's discretion and must satisfy the probationary conditions specified by the CBA GPC. In addition to probationary conditions, reinstated students will be subject to additional reinstatement conditions as specified by the CBA GPC. These reinstatement conditions will include retaking one or more courses in which the student must earn a grade of "B" (3.0) or higher (the exact grade requirements for retaken courses may in fact be higher than "B" (3.0). Students not achieving the probationary or reinstatement conditions will be automatically dismissed.

CBA GPC Will Consider Grades Earned in Repeat Courses

When making decisions based on Quality of Work Standards issues, the CBA GPC will consider the initial grade(s) received in a course as well as the most recent grade received for the course. This approach differs from the
method used to calculate GPA in a student’s MavLINK file, where the most recent grade replaces the grade received in the previous attempt.

Student Responsibilities

- Each student admitted to graduate studies is responsible for knowing the procedures and regulations of the Graduate College.
- Each student admitted to the MBA/PharmD will, within the first semester of their enrollment in the MBA program, file a plan of study in close consultation with a graduate advisor.
- Once admitted to the MBA/PharmD dual degree program, the MBA director in the College of Business Administration will oversee the student’s progress in the MBA curriculum, and faculty in the College of Pharmacy will oversee the student’s progress in the PharmD curriculum.
- Each student has to complete the MBA orientation.
- Students must maintain academic eligibility as defined by each degree program.

Business Administration, MBA and UNMC Doctor of Physical Therapy

Department of Business Administration, College of Business Administration; UNMC College of Allied Health Professions (CAHP)

Vision Statement

The health care industry is an ever-changing landscape, requiring those in leadership positions to navigate complex issues associated with patient care, operations, change management and public policy, to name a few. Allied health professionals comprise approximately 60 percent of the total health care workforce, and together provide the fundamental framework critical to the success of the American health care system. Students jointly pursuing education in an allied health profession and in business are uniquely prepared not only for health care practice, but also for taking on key decision-making roles in health care organizations.

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

- Spring: November 1
- Summer: April 1
- Fall: July 1 (June 1 for international students)

Other Requirements

- Junior/senior GPA of at least 2.85 (on a 4.0 point scale)
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf) must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Resume: (employment and educational history)
- Applicants must be admitted to a graduate degree program in the CAHP and have completed no more than the first year of that program.

3 BSAD 8830 (prereq: completion of BSAD 8150 and BSAD 8210)

Exit Requirement
BSAD 8800-MBA Project-Focused Capstone (2 credits) The project-focused capstone course for the Master’s of Business Administration (MBA) degree will focus on the students completing a health care-related project for a nonprofit or other organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. Prerequisite: Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the Capstone course. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Permission from MBA advisor is required to register for this class. Not open to non-degree graduate students.

Code Title Credits
BSAD 8800 MBA PROJECT-FOCUSED CAPSTONE 2

Elective Courses (9 hours)
Students completing the MBA/DPT program will transfer nine hours of coursework from the courses listed below to fulfill elective requirements for the MBA program. Minimum of "B" (3.0 on a 4.0 scale) grade required in each course to be transferred.

Transfer and application of the "professional" hours from UNMC to the UNO MBA program will take place upon completion of the DPT degree. The courses are:

Code Title Credits
PHYT 622 Practice Management Skills for the Physical Therapist I and II 3
PHYT 640 Critical Inquiry I 3
PHYT 740 Critical Inquiry II 3

Total Credits 9

MBA/DPT students who have earned undergraduate or graduate degrees in accounting, economics, finance, management, management information systems, or marketing, the MBA core course(s) corresponding to the student's undergraduate major(s) or degree(s) will be waived and the student will complete a directed elective in the waived field in addition to the hours transferred from UNMC. The waived core course will not satisfy degree requirements. Please consult with your advisor for a complete list of approved directed electives.

MBA/DPT students are not eligible to choose an MBA concentration because UNMC CAHP courses will comprise all electives.

Other MBA Requirements
All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

Business Administration, MBA and UNMC Nursing (MBA/MSN)

Department of Business Administration, College of Business Administration; UNMC College of Nursing

Vision Statement
The MBA/MSN dual degree program is designed for nursing students who desire to possess both clinical skills and a clear understanding of business management, leadership, and strategic decision making. Graduates will be prepared to anticipate change and to make decisions that balance patient outcomes and the overall cost of care.

Admissions
MBA Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
• Spring: November 1
• Summer: April 1
• Fall: July 1 (June 1 for international students)

Admission Criteria
• Students who have already graduated with the MBA or MSN degree are not eligible for the MBA/MSN dual degree program.
• Students must complete separate applications for the MBA and MSN programs and must meet the requirements for each program.
• The admission requirements for the MSN program can be found on the UNMC MSN (https://www.unmc.edu/nursing/admissions/admissions-information/admissions-information-msn-pmc.html) website.

Program Website (https://www.unomaha.edu/college-of-business-administration/mba/program/other-programs.php)
• CON students seeking admission to the MBA portion of the dual degree program must complete the UNO Application for Graduate Admission (https://www.unomaha.edu/graduate-studies/prospective-students/application-process.php) and request admission to the MBA/MSN program.

• Students who are already enrolled in the Nurse Leader concentration in the CON MSN program may apply for admission to the MBA/MSN dual degree program if their GPA is at least 3.0 and they have not yet completed more than 18 semester hours towards the MSN program.

• Students who are already enrolled in the UNO MBA program may apply for admission to the MBA/MSN dual degree program if they are in good academic standing and have not completed more than 12 semester hours towards the MBA program.

• Students qualifying for admission based on the standards outlined above but lacking MBA foundation courses will be granted provisional status until all foundation courses are completed with grades of "B" (3.0 on a 4.0 scale) or above.

**MBA Program Specific Requirements**

Admission may be granted to an applicant whose record includes at least the following:

1. 2.85 junior/senior grade point average
2. Resume (employment and educational history)
3. English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
   • 550; Paper-basedTOEFL; Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

**Elective Courses (9 hours)**

Students completing the MBA/MSN program will transfer nine hours of coursework from the nursing courses listed below to fulfill elective requirements for the MBA program. Minimum of "B" (3.0 on a 4.0 scale) grade required in each course to be transferred.

Transfer and application of the "professional" hours from UNMC to the UNO MBA program will take place upon completion of the MSN degree. The courses are:
MBA/MSN students who have earned undergraduate or graduate degrees in accounting, economics, finance, management, management information systems, or marketing, the MBA core course(s) corresponding to the student's undergraduate major(s) or degree(s) will be waived and the student will complete a directed elective in the waived field in addition to the hours transferred from UNMC. The waived core course will not satisfy degree requirements. Please consult with your advisor for a complete list of approved directed electives.

MBA/MSN students are not eligible to choose an MBA concentration because UNMC CON courses will comprise all electives.

Other MBA Requirements
All MBA students must meet MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

Academic Performance
MBA Program Two Strikes Rule
A UNO MBA student may enroll only twice in each MBA course. If the class is not successfully completed on the second attempt then the student will be dismissed from the MBA program. An enrollment is defined as being enrolled in the course after the last day to withdraw via MavLINK and receive a 100% refund. The last day for withdrawal will be as stated in the current academic calendar for a full semester course (3 credits); for an eight-week course (2 credits) the last day for withdrawal will be the third day (including the start date) of the course as designated in MavLINK.

MBA Program Academic Performance
Students earning a third grade of “C-” or lower (or any single grade below “C” 1.67 on a 4.0 scale) will be automatically dismissed from the MBA program. Dismissed students will be immediately administratively withdrawn from all courses in which they are enrolled for MBA credit. Students who have been dismissed may not enroll in any courses for MBA credit in any subsequent semester or summer session until reinstatement has been granted by the College of Business Administration's Graduate Program Council (CBA GPC) and graduate dean.

Students who have been dismissed from the MBA program may submit a written petition for reinstatement to the CBA GPC. Students who have petitioned the CBA GPC for reinstatement may not enroll in any courses for MBA credit. Upon receiving a petition for reinstatement, the CBA GPC will evaluate the student's written petition for reinstatement. As part of the reinstatement petitioning process, the CBA GPC reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student and this information may be used by the CBA GPC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege and not all students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period of the CBA GPC’s discretion and must satisfy the probationary conditions specified by the CBA GPC. In addition to probationary conditions, reinstated students will be subject to additional reinstatement conditions as specified by the CBA GPC. These reinstatement conditions will include retaking one or more courses in which the student must earn a grade of "B" (3.0) or higher (the exact grade requirements for retaken courses may in fact be higher than "B" (3.0). Students not achieving the probationary or reinstatement conditions will be automatically dismissed.

CBA GPC Will Consider Grades Earned in Repeat Courses
When making decisions based on Quality of Work Standards issues, the CBA GPC will consider the initial grade(s) received in a course as well as the most recent grade received for the course. This approach differs from the method used to calculate GPA in a student's MavLINK file, where the most recent grade replaces the grade received in the previous attempt.

MBA/MPAS students are not eligible to choose an MBA concentration because UNMC courses will comprise all electives.

### Exit Requirement

**BSAD 8800 MBA Project-Focused Capstone** (2 credits) The project-focused capstone course for the Master’s of Business Administration (MBA) degree will focus on the students completing a health care-related project for a nonprofit or other organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. 

**Prerequisite:** Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the capstone course. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Permission from MBA advisor is required to register for this class. Not open to non-degree graduate students.

### Elective Courses (9 hours)

Students completing the MBA/MPAS program will transfer nine hours of coursework from the courses listed below to fulfill elective requirements for the MBA program. Minimum of "B" (3.0 on a 4.0 scale) grade required in each course to be transferred.

Transfer and application of the "professional" hours from UNMC to the UNO MBA program will take place upon completion of the MPAS degree. The courses are:

</tr>
</tbody>
</table>

### Total Credits 9

MBA/MPAS students who have earned undergraduate or graduate degrees in accounting, economics, finance, management, management information systems, or marketing, the MBA core course(s) corresponding to the student's undergraduate major(s) or degree(s) will be waived and the student will complete a directed elective in the waived field in addition to the hours transferred from UNMC. The waived core course will not satisfy degree requirements. Please consult with your advisor for a complete list of approved directed electives.

MBA/MPAS students are not eligible to choose an MBA concentration because UNMC courses will comprise all electives.

### Other MBA Requirements

All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

### Business for Bioscientists Certificate

Department of Business Administration, College of Business Administration; Department of Biology, College of Arts and Sciences

**Vision Statement**

This certificate program provides a basic understanding of business principles to biomedical PhD students. While UNMC PhD students receive extensive training in research methods and the principles of biology and medicine, they receive no formal training in business fundamentals. However, a significant portion of biomedical PhD students obtain employment in pharmaceutical, biotechnology, and other industries. For students with these career goals, formal training in business would markedly enhance their career options and competitiveness for these industry positions.

Executive Business Analytics Certificate

Department of Business Administration, College of Business Administration

Vision Statement
Today’s organizations have access to enormous amounts of data, and those that are able to translate it into meaningful insights can gain a competitive advantage in the marketplace. This certificate program is an excellent option for executives and managers who want to improve their data-informed decision-making skills. Courses focus on the accurate use of business intelligence tools to better evaluate, interpret, and utilize reports from their organizations’ analytics team.

Executive Business Leadership Certificate

Department of Business Administration, College of Business Administration

Vision Statement
Today’s organizational leadership goes beyond mere management. Successful leaders not only manage employees but also inspire and motivate them, drive performance, and create a positive workplace culture. This certificate is the ideal option for professionals looking to fast-track their leadership development. The program is designed to cover the latest trends and practices in leadership, with a focus on effective personnel management and strategic leadership in modern organizations.

Human Resources and Training Certificate

Department of Business Administration, College of Business Administration, School of Communication, College of Communication, Fine Arts & Media, Department of Psychology, College of Arts & Sciences

Vision Statement
The purpose of the graduate certificate in human resources and training (HRST) is to help post-baccalaureate students and working professionals expand their educational background and enhance their knowledge and skills in either human resources or training and development. The first concentration, human resources, focuses on enhancing organizational effectiveness through employee recruitment, selection, placement, performance evaluation, motivation, and retention. The second concentration, training and development, focuses on enhancing training skills and program design including developing, implementing, assessing, and delivering training programs. The HRST certificate is useful for individuals currently employed in the human resources or training fields and for individuals who desire to enter those fields. The graduate courses required for this certificate address both theory and application from the fields of communication, psychology, and business.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
Applications are accepted and reviewed on a rolling basis throughout the year.

Other Requirements
• Admission to the HRST graduate certificate program requires a baccalaureate degree with at least a 3.0 GPA, a major or a minor (or at least a 15 credit concentration) in communication studies, psychology, business, or related area, plus at least one three credit course in research methods or statistics.
• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., OR a baccalaureate or other advanced degree from a pre-determined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.

• Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

• Statement of Purpose: A 1000 word maximum statement of purpose essay describing which concentration you wish to pursue and why.

• Resume: A resume that includes your work history

• Letter of Recommendation: One letter of recommendation from a current or former supervisor or professor. During your online application process, you will be asked to provide the name and email address of the person writing your recommendation letter. The online application system will send an email to your recommender containing a link for online submission of the recommendation letter.

### Degree Requirements

Students must identify which area of concentration they are choosing:

- Human Resources or Training and Development

Courses must be completed in at least two of the three units (i.e., business administration, communication, or psychology) associated with this certificate program.

See human resources and training certificate concentrations

### Exit Requirements

**Portfolio**

Students admitted to the HRST graduate certificate program must create a portfolio (notebook) containing at least one sample project from each course. A portfolio review will be conducted by the student's advisor before the certificate is awarded. Contact your advisor during the last semester of your program.

**Total Credit Hours:** 15

### Other Program-Related Information

Many courses are offered online-check each semester schedule for details and availability. Students may need to obtain approval and/or a permit number to enroll in some courses. For psychology (PSYC) courses, please contact the instructor for approval; for business administration (BSAD) courses, please contact the MBA advisor at 402.554.3010, and for communication studies (CMST) courses, please contact the certificate advisor at 402.554.6079.

### Concentrations

#### Human Resources Concentration

This concentration focuses on enhancing organizational performance through improving employee recruitment, selection, placement, performance evaluation, motivation, and retention. You will need to complete all 15 credit hours with grades of "B" or better. All classes are 3 credit hours except for BSAD 8250 which is 2 credit hours (students who complete BSAD 8250 will need to complete an additional 1 credit hour independent study in order to earn the graduate certificate).

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
- Spring: November 1
- Summer: April 1
- Fall: July 1

Other Requirements
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Resume (employment and educational history)
- Statement of Purpose: In a minimum 250 words address the following:
  - What are your personal and/or professional reasons for pursuing the Logistics and Supply Chain Management graduate certificate?
- Unconditional Admission: may be granted to an applicant whose record includes:
  - A minimum 2.85 undergraduate junior/senior GPA
- Provisional Admission: Applicants who do not meet the conditions for unconditional admission may be considered for provisional admission status. These applicants will be notified that the CBA Graduate Program Council (CBA GPC) will evaluate the files of all applicants being considered for provisional admission. Candidates being considered for admission on this basis will receive notification from the UNO Office of Graduate Studies. If granted provisional admission, the student must earn minimum “B” (3.0/4.0) grades in each of the courses completed in 12 hours of the certificate program. Students not meeting this standard are subject to dismissal.
- Foundation courses: These courses are not applicable to the completion of the certificate requirements.

Academic Performance

In addition to the Quality of Work Standards established by the Graduate College, students in the Logistics & Supply Chain Management certificate program may repeat a BSAD 8xxx level course in which they receive any grade, including "W" or "I" one time. If the class is not successfully completed on the second attempt, the student will be dismissed from the Logistics & Supply Chain Management certificate program.

Each semester, student files will be reviewed where a student received a grade lower than a "B" (3.0 out of 4.0). Students earning more than one grade of "C+" or lower (or any single grade below "C" (1.67 on a 4.0 scale)] will be automatically dismissed from the Logistics & Supply Chain Management certificate program.

Dismissed students will be immediately administratively withdrawn from all MBA courses in which they are enrolled for credit. Students who have been dismissed may not enroll in any MBA courses for credit in any subsequent semester or summer session until reinstatement has been granted by the CBA GPC and the graduate dean.

Communication

Degree Programs Offered

- Communication, MA (p. 1109)

Certificates Offered

- Communication Certificate (p. 1111)
- Human Resources and Training Certificate (p. 1103)
- Technical Communication Certificate (p. 1226)

COMM 8000 FOUNDATIONS OF COMMUNICATION (3 credits)
This course is designed to introduce graduate students to the Communication discipline. This course will expose students to historical, theoretical, and philosophical perspectives across various contexts and areas of study. In addition to a foundational exploration of the discipline, this course also prepares MA students to conduct research, apply theory to practice, and declare their own expertise in the discipline. Through readings, guest lectures, writing, and discussions, students will work to understand the broad expanse of the discipline.

Prerequisite(s): Admission to the School of Communication MA program. Not open to non-degree graduate students.

COMM 8010 COMMUNICATION RESEARCH METHODS SEMINAR: QUANTITATIVE (3 credits)
Philosophy of scientific investigation from a quantitative standpoint, including process and products, in comparison to other ways of knowing. Introduces students to quantitative designs and statistical applications for communication research and to data gathering methods appropriate for such designs. Emphasis is placed on preparing, evaluating and writing quantitatively oriented communication research proposals and reports.

Prerequisite(s): Graduate majoring in communication or permission of instructor. Not open to non-degree graduate students.

COMM 8020 COMMUNICATION RESEARCH METHODS SEMINAR: QUALITATIVE (3 credits)
This course is an introduction to the methodology and practice of qualitative research. Within the course, students will be exposed to research paradigms, approaches to qualitative research, and ways to collect and analyze qualitative data. Students will be required to design and carry out their own qualitative research project.

Prerequisite(s): Open to School of Communication Graduate Students only

COMM 8030 TOPICAL SEMINAR: RESEARCH METHODS (3 credits)
This variable-content course provides students with in-depth knowledge about various communication research methods (e.g., survey or experimental, content analysis, legal, assessment strategies, ethnography, advanced critique, etc.) or other communication methods and assessment in context with particular areas of study.

Prerequisite(s): Graduate student status

COMM 8040 SEMINAR IN RHETORICAL CRITICISM (3 credits)
Students will engage with the history of rhetorical criticism in the field of communication, popular orientations toward criticism over the years, and new directions in methodology. A variety of rhetorical methods and theories as well as rhetorical artifacts will be explored.

Prerequisite(s): Graduate admission to School of Communication or permission of instructor. Not open to non-degree graduate students.

COMM 8110 GRADUATE TEACHING ASSISTANT SEMINAR (1 credit)
This course provides weekly training, assessment, and teaching strategies for graduate teaching assistants within the the School of Communication.

Prerequisite(s): School of Communication Graduate Teaching Assistants Only. Not open to non-degree graduate students.

COMM 8180 TOPICAL SEMINAR: COMMUNICATION STUDIES (3 credits)
A variable content course dealing with communication studies. Each offering will treat a single aspect of communication studies in-depth - e.g., interpersonal conflict, gender and communication, organizational culture, health systems communication, relational communication, political communication, marital and family communication, communication education, rhetorical critique, etc. Course may be repeated.

Prerequisite(s): Graduate Student Standing

COMM 8200 SEMINAR IN POPULAR CULTURE, MASS MEDIA AND VISUAL RHETORIC (3 credits)
This course studies how discursive meaning is made through established and emerging visual technologies and the impact visual symbol systems are having upon the field of rhetoric in general. Students will investigate how visual technologies, discourse theory, and semiotic theory has intersected with and expanded contemporary rhetorical theories, and they will apply these theories to visual texts. (Cross-listed with ENGL 8760).

COMM 8250 STRATEGIC COMMUNICATION (3 credits)
This course surveys the topic of strategic communication in business, nonprofit, and government sectors. Focused on management-level evaluation of effective strategic communication, the course prepares students to work in collaboration with strategic communication departments and optionally integrate strategic communication into a research agenda for further graduate study. Content includes determining motivations and reasons for campaigns, understanding relationships between stakeholders, and evaluating outcomes of campaigns.

COMM 8300 TOPICAL SEMINAR: JOURNALISM AND MEDIA COMMUNICATION (3 credits)
Substantive study of specialized areas and modes of journalism and media communication (broadcasting, film, print, public relations, advertising, social media, etc.). Content will vary. Course may be repeated.

Prerequisite(s): Graduate Student Status
COMM 8580 COMMUNICATION, IDENTITY, AND DIVERSITY (3 credits)
This course provides a theoretical exploration of the ways social identity may be formed and communicated in diverse contexts. The content of this class builds from communication scholarship on identity, drawing on a variety of approaches, such as rhetorical, intercultural, and interpersonal. It also includes both germinal and contemporary literature regarding social identity, diversity-equity-access-inclusion (DEAI), intersectionality, and power relationships. This class provides students with an academic lens for critically examining how identity is communicated through and to society. Additionally, this course encourages students to explore their personal identity and communicate their experiences of diversity and power in social contexts. Students who complete this class can expect to gain a greater understanding of the complex social dynamics that influence identity and its communicative power in diverse contexts.
Prerequisite(s): Admission to the graduate program or permission from the instructor

COMM 8970 GRADUATE PROJECT (3 credits)
Project Option students must complete a three-hour graduate project written under the supervision of an adviser. A two-member graduate committee (adviser and second committee member) must approve the project.
Prerequisite(s): COMM 8010, 8020, 8470, 8570 and student must be admitted to candidacy.

COMM 8980 INDEPENDENT STUDY (1-3 credits)
Students conduct independent research under the supervision of an adviser. May be taken multiple times with approval of graduate adviser.
Prerequisite(s): Completion of appropriate paperwork; Agreement of supervising faculty; Approval of independent study by supervising faculty, graduate program chair, and the School director's office.

COMM 8990 THESIS (1-6 credits)
Independent research project written under the supervision of an adviser. May be taken multiple times with approval of graduate adviser.
Prerequisite(s): Completion of or concurrent enrollment in final coursework in completion of the MA degree; Approval by Graduate Program Chair. Not open to non-degree graduate students.

COMM 9400 SEMINAR IN COMMUNICATION & TECHNOLOGY (3 credits)
A synthesis of speech and mass communication research as it relates to the study of computers and technology. Computer Mediated Communication (CMC) will be emphasized. Students write a research paper appropriate for submission to an academic conference.
Prerequisite(s): COMM 8470 or COMM 8570, and COMM 8010 or COMM 8020, or permission of instructor.

CMST 8116 RHETORICAL THEORY AND CRITICISM (3 credits)
Rhetoric is the art of persuasion. Rhetoric impacts our daily lives by influencing how we think about and respond to things. It pervades our political world, work environments, civic and social settings, and pop culture. Students will learn a variety of approaches to rhetorical criticism (theoretical and methodological) that enable them to critically analyze the messages that surround us. We will also unpack the ways rhetoric undergirds or undermines existing power structures, and how it might reshape them.
Prerequisite(s): Junior standing and (Journalism/Media Communication or CMST major). By permission of instructor.

CMST 8126 COMMUNICATION AND SOCIAL PROTEST (3 credits)
This class will examine the role played by communication in movements for social change in contemporary society. We will examine social movements which rely on speeches (i.e. women's rights movements), social movements which rely on the grassroots political efforts of their members (i.e. the environmental rights movement) and the overall strategies of persuasion utilized in movements which seek social change, including emerging communication technologies. (Cross-listed with CMST 4120)
Prerequisite(s): Non-degree or admission to School of Communication M.A. program.

CMST 8136 FAMILY COMMUNICATION (3 credits)
This course emphasizes the role of communication in family relationships. Theories, models, and research methods will be used to examine the family in various cultures and contexts (e.g., nuclear families, single-parent families, and blended families). Topics that will be covered in this course include: family conflict, family roles, family stories, family stress, family well-being, genograms, marriage, and divorce. (Cross-listed with CMST 4130)
Prerequisite(s): Graduate majoring in the School of Communication or permission of instructor. Not open to non-degree graduate students.

CMST 8146 COMMUNICATION AND HUMAN RELATIONSHIPS (3 credits)
This course applies theories of interpersonal processes and communication principles to the study of close, significant and personal human relationships. Discussion focuses on the communication in different types of relationships and relational stages, e.g., strangers, acquaintances, friendships and intimates. (Cross-listed with CMST 4140)
Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

CMST 8156 CORPORATE TRAINING AND DEVELOPMENT (3 credits)
This course introduces students to the process of designing communication training programs and workshops for a variety of professional settings. It provides students, especially those who are prospective trainers and/or consultants, with experiential and cognitive knowledge about needs assessment, adult learning, communication training research, objectives writing, module design, interactive delivery methods and program evaluation. (Cross-listed with CMST 4150)
Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

CMST 8166 COMMUNICATION FOR INSTRUCTIONAL SETTINGS (3 credits)
This course is designed to help prospective instructors and/or trainers understand and apply the principles of communication in instructional settings (i.e., classrooms, workshops, training programs). It introduces students to the research area in the speech communication discipline called ‘Instructional Communication’ by covering these five units: 1) Communication Strategies, Objectives, & Content; 2) Student Communication Needs & Expectations; 3) Feedback, Reinforcement, & Discussion; 4) Context, Climate, & Influence; and 5) Teacher Communicator Style, Characteristics, & Behaviors. (Cross-listed with CMST 4160)
Prerequisite(s): Graduate Standing.

CMST 8176 ORGANIZATIONAL COMMUNICATION (3 credits)
This course will help students understand organizational communication theories, models, and processes; apply these principles in organizational communication speaking exercises; and learn management and leadership skills. (Cross-listed with CMST 4170)
Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

CMST 8186 COMMUNICATION LEADERSHIP AND POWER AND ORGANIZATIONS (3 credits)
This course provides theoretical and experiential knowledge about such topics as communication leadership styles and tactics, superior and subordinate interactions, power, ethical responsibilities, and diversity gender issues related to communication leadership. (Cross-listed with CMST 4180)
Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

CMST 8196 COMPUTER-MEDIATED COMMUNICATION (3 credits)
Computer-Mediated Communication addressing emerging issues of virtual communities, identity, civic life and participation, online relationships, collaborative work environments, digital networks, gender race class issues, legal and ethical considerations of technology, and commodification of mediated communication. (Cross-listed with CMST 4190).
CMST 8226 HEALTH COMMUNICATION (3 credits)
This course introduces students to the interdisciplinary field of health communication. In this course, students will learn various theories of health communication as well as current research and trends in health communication and its related fields. To speak to the complexity and dynamism of health communication, this course will expose students to the multiple voices and perspectives involved in the delivery of health and healthcare. (Cross-listed with CMST 4220)
Prerequisite(s): Junior standing; a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

CMST 8516 PERSUASION AND SOCIAL INFLUENCE (3 credits)
The primary goal of this course is to provide students with a solid grounding in theories, principles, and strategies of persuasion social influence as they apply to everyday contexts in which influence attempts take place. Students should gain familiarity with findings from empirical investigations on persuasion, social influence, and compliance gaining, and will learn about strategies and techniques of persuasion relating. (Cross-listed with CMST 4510)
Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

CMST 8536 INTERCULTURAL COMMUNICATION-US (3 credits)
This course will provide a foundation that leads to Intercultural Communication competence. Specifically, this course is to introduce the concepts of cross-cultural communication. Theory and research are integrated with application and necessary skills are identified and developed. (Cross-listed with CMST 4530)

CMST 8556 NONVERBAL COMMUNICATION (3 credits)
This course is designed to familiarize the student with current knowledge and research about nonverbal communication and to provide a wide variety of practical experiences through which the student can analyze and evaluate his or her own nonverbal behavior and that of others. The course, also, reviews the functions, areas and applied contexts of nonverbal communication. (Cross-listed with CMST 4550)
Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

CMST 8566 COMMUNICATION, TEAMWORK, & FACILITATION (3 credits)
This course focuses on the communication practices, process tools, and theory associated with team problem solving, group discussion, facilitation skills, facilitative leadership, meeting management, and training in effective group interaction. (Cross-listed with CMST 4560)
Prerequisite(s): Graduate standing. Not open to nondegree students.

CMST 8576 INTERCULTURAL COMMUNICATION IN THE GLOBAL WORKPLACE (3 credits)
This course examines the intercultural perspective of organizational communication in a modern global world by focusing on the management of cultural differences in the global workplace. The trend towards a global economy is bringing people of different ethnic and cultural background together. Thus, the development of greater intercultural understanding has become an essential element of global workplace. After taking this course you will be more aware of cultural diversity in an organizational setting and further develop intercultural sensitivity and intercultural competence that will help you adapt to your future organizational life. (Cross-listed with CMST 4570)

CMST 8586 COMMUNICATING RACE, ETHNICITY & IDENTITY (3 credits)
This is an undergraduate/graduate course that provides students with definitional and experiential knowledge about the origin of racial concepts, theories, and practices, definitions of ethnicity and identity, and the communicative relationship between race, ethnicity, and identity. (Cross-listed with CMST 4580, BLST 4580, BLST 8586)

CMST 8606 COMMUNICATION THEORY AND APPLICATION (3 credits)
This course begins by introducing students to two broad categories of theory development - objective and interpretive. Then concepts and assumptions associated with each of these two perspectives are employed to critically evaluate several specific theories that fall within different of the sub-disciplines of the field of communication: interpersonal, group, organizational, mass, public/torhethorical, cultural, and intercultural/gender. Along with critically evaluating and comparing/contrasting different communication theories, emphasis is placed on how the theories can be effectively applied in concrete settings and circumstances. (Cross-listed with CMST 4600)
Prerequisite(s): Graduate standing

CMST 8706 INTERPERSONAL CONFLICT (3 credits)
This course provides an overview of interpersonal conflict processes. It examines perspectives on conflict, patterns of constructive and destructive conflict, conflict styles and tactics, interpersonal power, negotiation strategies, conflict assessment, and conflict skill development. (Cross-listed with CMST 4700)
Prerequisite(s): Communication major

JMC 8046 SOCIAL MEDIA MEASUREMENT AND MANAGEMENT (3 credits)
Social Media Measurement and Management explores the dynamic development of social media platforms within a journalism and media communication context. Students of journalism, broadcasting, public relations, advertising and marketing will examine theories and best practices of social media interaction and engagement. (Cross-listed with JMC 4040)
Prerequisite(s): Good standing as a UNO graduate student.

JMC 8246 PUBLIC RELATIONS CASE STUDIES (3 credits)
The course is designed to enable the student: 1) to integrate issue-management and decision-making theoretical models with the communication theory and research techniques presented in JMC 3230/ JMC 8236 and 2) to apply professional judgment to the public relations problem-solving process through the development of structured analysis of historical cases. (Cross-listed with JMC 4240).

JMC 8266 MEDIA RELATIONS (3 credits)
This course focuses on the communication tools used in media relations, the nuances of working with reporters from press and various media, news writing, news judgment, strategic planning, and the application of communication theories in understanding the relationship between news organizations and media relations representatives for organizations and corporations. (Cross-listed with JMC 4260).

JMC 8316 MEDIA & POLITICS (3 credits)
An in-depth study of the impact of the media on political communication. This course will explore the symbiotic relationship of media and political communication, including the influence of traditional mass media, digital media, and social media on the political communication process. Students will delve into media theories and critically examine the influence of the media on the political communication process. (Cross-listed with JMC 4310).

JMC 8346 MEDIA REGULATION & FREEDOM (3 credits)
Media and Internet regulation and free expression as defined and interpreted through First Amendment rights, prior restraint and obscenity case law, advertising and public relations, broadcast and cable TV regulation and deregulation policy, new telecommunications media, and privacy. (Cross-listed with JMC 4340).
Prerequisite(s): ENGL1160

JMC 8376 COMMUNICATION WORKSHOP (3 credits)
A workshop to explore communication theory and processes and to develop skills in their application. (Cross-listed with JMC 4370).
Prerequisite(s): Junior Standing, Permission of instructor
JMC 8396 MEDIA ENTREPRENEURSHIP (3 credits)
4390 Media Entrepreneurship explores new and emerging media business models from local, national and global perspectives. Students learn about and work within the start-up economy and entrepreneurial approaches.
The course offers professional and critical perspectives. (Cross-listed with JMC 4390, ENTR 4390).
Prerequisite(s): JMC 3340 and JMC 3350 or permission of instructor

JMC 8816 DIGITAL LITERACIES FOR TECHNICAL COMMUNICATORS (3 credits)
This course addresses emerging issues in digital literacies such as the rhetoric of technology, technological competency, technology and information ecologies, critical awareness of technology and human interactions, judicious application of technological knowledge, user-centered design, networking and online communities, ethics and technology, and culture and technology. (Cross-listed with ENGL 4810, ENGL 8816, JMC 4810).
Prerequisite(s): Graduate standing or permission of instructor

JMC 8826 POLITICS AND FILM (3 credits)
This course introduces students to the analysis of politics and film, focusing on how politics is portrayed in film and the politics of film making. (Cross-listed with PSCI 4820, JMC 4820, PSCI 8826).

JMC 8836 TECHNICAL COMMUNICATION (3 credits)
Technical Communication introduces students to the field of technical communication. Students will study the development of print and electronic genres common to industry settings, the design and production of technical documents, the writing processes and work practices of professional technical communicators, and the roles of technical communicators in organizational contexts. (Cross-listed with ENGL 4830, ENGL 8836, JMC 4830).
Prerequisite(s): Graduate standing or permission of instructor

JMC 8856 INFORMATION DESIGN FOR TECHNICAL COMMUNICATORS (3 credits)
This course introduces students to strategies for integrating visual and textual elements of technical documents. Instruction will focus on design theory and application through individual and collaborative projects. Students will develop the professional judgment necessary for making and implementing stylistic choices appropriate for communicating technical information to a lay audience. (Cross-listed with ENGL 4850, ENGL 8856, JMC 4850).
Prerequisite(s): Graduate standing or permission of instructor

JMC 8876 TECHNICAL EDITING (3 credits)
This course introduces students to the roles and responsibilities of technical editors: the editorial decision-making processes for genre, design, style, and production of technical information; the communication with technical experts, writers, and publishers; the collaborative processes of technical editing; and the techniques technical editors use during comprehensive, developmental, copyediting, and proofreading stages. (Cross-listed with ENGL 4870, ENGL 8876, JMC 4870).
Prerequisite(s): ENGL 1160 or permission of the instructor

JMC 8896 CAPSTONE COURSE IN TECHNICAL COMMUNICATION (3 credits)
In this capstone course, students will extend foundational skills learned in previous technical communication courses. Students will demonstrate their competency in the technical documentation process in organizational environments, the issues important to the technical communication profession, and the practices of writing and creating complex technical documents for specific purpose and audience. (Cross-listed with ENGL 4890, ENGL 8896, JMC 4890).
Prerequisite(s): Graduate standing or permission of instructor.

JMC 8906 SEMINAR MASS COMMUNICATION (3 credits)
A senior seminar applying historical and theoretical perspective to current issues and developments in mass communications. (Cross-listed with JMC 4900)
Prerequisite(s): Graduate standing

JMC 8926 MEDIA LITERACY (3 credits)
An advanced seminar on the study of media and information literacy through deconstruction of mass communication content, meaning construction, framing analyses and critical/cultural approaches. (Cross-listed with JMC 4920).

Communication, MA
School of Communication, College of Communication, Fine Arts & Media

Vision Statement
The School of Communication offers a Master of Arts degree emphasizing a blend of broad theoretical instruction and methodological instruction and application of the communication discipline. By exploring various discipline in all its iterations. Graduate students achieve in-depth knowledge of communication phenomena through both our Core classes processes and effects and a variety of elective options either on-campus or online, students work towards acquire the completion skills needed to discover new knowledge through research and other forms of final their thesis or project in preparation for personal and scholarly activity and professional successes after graduation. growth.

Once coursework is complete, graduate students conduct original research for a thesis or project. School of Communication graduate faculty offer an impressive blend of academic and professional experiences. experience. Our award-winning and nationally-recognized faculty Faculty are actively involved in the discovery of new knowledge through publication in top scholarly journals, published books, community outreach, and conference presentations. journals. The faculty seek to cultivate students’ breadth and depth of knowledge about communication, as well as foster a spirit of free investigation.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024 and Fall 2024)
• Fall: Review begins February 15th
• Spring: Review begins October 1st
• Summer: April 15

Note: Applications will still be received and reviewed until term begins

If you are applying for a graduate assistantship, both admissions and assistantship application materials must be completed by February 15 (for Fall Semester) and October 1 (for Spring Semester) for priority consideration.

Other Requirements
• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
• Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

**Statement of Purpose:** The statement should be 500 words in length and should answer the following questions:

- Why have you chosen the UNO School of Communication master’s degree program?
- What are your areas of scholarly interest and research?
- What are your personal or professional plans after you complete the master’s degree? How will this degree support your plans?

**Writing Sample:** An academic or otherwise-demonstrative writing sample (e.g., term paper, senior thesis, or research paper) that demonstrates the applicant's strengths as a writer and researcher.

**Resume or CV:** Identify major and minor field(s) of study, overall GPA, and GPA within major, as well as all relevant experience.

**Letters of Recommendation** - Three letters are required. A minimum of one letter from a faculty member of the applicant's undergraduate program should be included if at all possible. Other letters should address an applicant's ability to do advanced-level academic work.

**Optional:** The GRE exam is not required, but will be reviewed as part of the overall application if provided.

### Admission Status

**Unconditional Admission** may be granted to a student whose record includes at least the following:

- Certification of a bachelor’s degree from a regionally accredited institution
- Documentation through official transcripts using a 4.0 grade point scale of having earned at least:
  - A 3.25 in communication or undergraduate major work.
  - Either a 3.0 overall undergraduate average GPA or a 3.25 average GPA in the last half of undergraduate credit hours, and
  - Inclusion of nine (9) to 15 undergraduate (junior or senior level) theory and/or research courses in communication (e.g., communication studies, speech communication, broadcasting, journalism, mass communication, media communication or studies, rhetoric) in a related field as approved by the graduate program chair (GPC) and/or the graduate admissions committee.

**Provisional Admission** may be granted for reasons of experience, maturity or other circumstances to a student who does not meet the unconditional admission standards. A student will not be admitted who does not meet UNO Graduate College provisional admission standards (a 2.75 GPA for both undergraduate major and minor).

- The school's graduate admission committee may require any one or any combination of the following in deciding whether or not to recommend provisional admission:
  - Completion of prescribed course(s) (not for graduate credit) with a grade of "B" (3.0/4.0) or better, with course(s) approved in advance by the GPC and/or the graduate admission committee.
  - Completion of the first 12 graduate hours of coursework with a grade of "B" (3.0/4.0) or better as a non-declared student.

# Degree Requirements

## Required Courses

The core courses provide intensive and broad coverage of communication as a field of advanced study. The core integrates mass and speech communication theories and research methodologies from all aspects of the discipline. If a student fails to achieve an average grade of "B" (3.0/4.0) in the overall core, the student may retake each core course with a grade below "B" once, and must obtain an average grade of "B" or higher to remain in the program. The core courses must be completed within the first 18-21 credit hours of a student's program (This requirement may be waived for students entering the communication graduate program with approved graduate credits to be used in the plan of study).

Students are required to take one graduate only (8xx0/9xx0 level with no undergraduate dual-listing) three credit seminar during their program. This course may either come from the School of Communication or another graduate program in consultation and advisement with the GPC.

### Electives

Select 12 elective hours in consultation with the graduate program chair. These will be denoted as either COMM, CMST, or JMC. Three elective (3) hours (or up to six with approval from the graduate program chair) from outside the school may be counted toward degree requirements. Electives must be completed with an average grade of "B" or better to maintain GPA requirements for program and University.

COMM 8970  GRADUATE PROJECT  3.00

Total Credits  33

The project, in lieu of a thesis, is based on a proposal approved by the student’s committee. The student must complete a project which is defended orally before his or her project committee.

Exit Requirements
Students will take either six (6) thesis credit hours or three (3) project hours during the final semester(s) of their program. These credit hours must be 1) taken either concurrently or after the student's final semester of coursework and 2) must be taken and completed in order to successfully complete the program. The thesis or project is considered the final part of the program. With this in mind, coursework will be completed before or concurrently with the thesis or project (it is strongly encouraged that coursework is completed prior to the thesis or project). Students will meet with the GPC to discuss which option consider.

Thesis Option
All candidates should carefully review the Graduate College requirements for completing a supervisory committee, Thesis/Thesis Equivalent Proposal, Approval forms and final approval and submission of a thesis. Theses are defended orally before the student’s committee once completed.

Project Option
The project, in lieu of a thesis, is based on a proposal approved by the student’s committee. The student must complete a project that is defended orally before the student’s project committee.

Certificates Offered

- Communication Certificate (p. 1111)
- Human Resources and Training Certificate (p. 1103)
- Technical Communication Certificate (p. 1226)

Communication Certificate
School of Communication, College of Communication, Fine Arts & Media

Vision Statement
The communication graduate certificate program provides potential students who are not interested in a complete MA program the opportunity to expand their knowledge of the discipline or customize their learning toward a specific area of study. This can be helpful for career promotion, professional opportunities, teaching in-discipline at the community college/dual-enrollment level, personal exploration, etc.

Admissions
General Application Requirements and Admissions Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, Fall 2024)
- Fall: March 1
- Spring: October 1
- Summer: June 15

Note: Applications will still be received and reviewed until term begins

Other Requirements
- Admission to the graduate certificate program requires a bachelor’s degree with a minimum 3.0 GPA, a major or a minor (or at least 15 undergraduate credits) in communication (studies), journalism, media, or a related area, plus one 3 credit course in research methods or statistics.
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Statement of Purpose: 1000-word essay discussing why you wish to complete the certificate
- Resume/Curriculum Vitae
- Letters of recommendation: Two letters from professor(s) or supervisor(s).

Degree Requirements
Complete 18 credits as approved by the Graduate Program Committee chair.

Complete 18 credits as approved by the Graduate Program Committee chair.

Human Resources and Training Certificate

Department of Business Administration, College of Business Administration, School of Communication, College of Communication, Fine Arts & Media, Department of Psychology, College of Arts & Sciences

Vision Statement
The purpose of the graduate certificate in human resources and training (HRST) is to help post-baccalaureate students and working professionals expand their educational background and enhance their knowledge and skills in either human resources or training and development. The first concentration, human resources, focuses on enhancing organizational effectiveness through employee recruitment, selection, placement, performance evaluation, motivation, and retention. The second concentration, training and development, focuses on enhancing training skills and program design including developing, implementing, assessing, and delivering training programs. The HRST certificate is useful for individuals currently employed in the human resources or training fields and for individuals who desire to enter those fields. The graduate courses required for this certificate address both theory and application from the fields of communication, psychology, and business.

Program Contact Information

Program Website (https://www.unomaha.edu/college-of-communication-fine-arts-and-media/communication/graduate-programs/)

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
Applications are accepted and reviewed on a rolling basis throughout the year.

Other Requirements
- Admission to the HRST graduate certificate program requires a baccalaureate degree with at least a 3.0 GPA, a major or a minor (or at least a 15 credit concentration) in communication studies, psychology, business, or related area, plus at least one three credit course in research methods or statistics.
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., OR a baccalaureate or other advanced degree from a pre-determined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Statement of Purpose: A 1000 word maximum statement of purpose essay describing which concentration you wish to pursue and why.
- Resume: A resume that includes your work history
- Letter of Recommendation: One letter of recommendation from a current or former supervisor or professor. During your online application process, you will be asked to provide the name and email address of the person writing your recommendation letter. The online application system will send an email to your recommender containing a link for online submission of the recommendation letter.

Degree Requirements
Students must identify which area of concentration they are choosing:
Human Resources or Training and Development

Courses must be completed in at least two of the three units (i.e., business administration, communication, or psychology) associated with this certificate program.

See human resources and training certificate concentrations

Exit Requirements
Portfolio
Students admitted to the HRST graduate certificate program must create a portfolio (notebook) containing at least one sample project from each course. A portfolio review will be conducted by the student’s advisor before
the certificate is awarded. Contact your advisor during the last semester of your program.

**Total Credit Hours: 15**

**Other Program-Related Information**

Many courses are offered online—check each semester schedule for details and availability. Students may need to obtain approval and/or a permit number to enroll in some courses. For psychology (PSYC) courses, please contact the instructor for approval; for business administration (BSAD) courses, please contact the MBA advisor at 402.554.3010, and for communication studies (CMST) courses, please contact the certificate advisor at 402.554.6079.

**Concentrations**

**Human Resources Concentration**

This concentration focuses on enhancing organizational performance through improving employee recruitment, selection, placement, performance evaluation, motivation, and retention. You will need to complete all 15 credit hours with grades of "B" or better. All classes are 3 credit hours except for BSAD 8250 which is 2 credit hours (students who complete BSAD 8250 will need to complete an additional 1 credit hour independent study in order to earn the graduate certificate).

**Training and Development Concentration**

This concentration focuses on enhancing training program design, implementation, assessment skills, and the developmental process through which organizations enhance work performance, communication, job satisfaction, and future career preparation. You will need to complete all 15 credit hours with grades of "B" or better. All classes are 3 credit hours except for BSAD 8250 which is 2 credit hours (students who complete BSAD 8250 will need to complete a 1 credit hour independent study in order to earn the certificate).

**Computer Science**

**Degree Programs Offered**

- Computer Science, MS (p. 1119)
The graduate certificate programs provide focused, short-term programs of study beyond the baccalaureate degree for individuals seeking to improve their experience, advance in position and salary, expand their education background, and complete work that may potentially be applied to a master's degree. Students who are admitted to the MS in Computer Science program may transfer credits from certificate courses to a relevant concentration in the MS program. Students currently in the MS in Computer Science may also complete certificate programs as part of their studies.

**Certificates Offered**

- Artificial Intelligence Certificate (p. 1123)
- Communication Networks Certificate (p. 1124)
- Machine Learning Certificate
- Software Engineering Certificate (p. 1125)
- Systems and Architecture Certificate (p. 1126)

Applicants with an undergraduate degree in Computer Science or Computer Engineering from an accredited institution are expected to have a GPA of at least 3.0. Applicants who have degrees in other fields will also be considered for admission. Students may make up their deficiencies in Computer Science by completing transition courses.

Each certificate requires completion of four graduate courses and usually involve a combination of core and elective courses. Provisional admission courses (such as undergraduate prerequisites) for the certificate must be completed with a grad of "B-" or better. Provisional courses must be completed before continuing any certificate program. Each graduate level course might have prerequisites that must be satisfied before the associated graduate course can be taken. The exit requirements are the same as the MS in Computer Science program. This includes that students must maintain at least a 3.0 GPA and can have no grade lower than a "B-". The undergraduate transition courses assigned at the time of admission must be passed following the same policy.

**CSCI 8000 ADVANCED CONCEPTS IN PROGRAMMING LANGUAGES (3 credits)**

Logic/Declarative programming is an important programming paradigm in which problems are described in terms of the properties they possess. As a result, in this style of programming many algorithmic elements, which explicitly must be articulated when writing programs in other programming languages, can be omitted. Core elements of logic programming play important roles in AI.

**Prerequisite(s):** CSCI 3320; CSCI 3660; CSCI 4220. Not open to non-degree graduate students.

**CSCI 8010 FOUNDATIONS OF COMPUTER SCIENCE (3 credits)**

This is a foundational course for students enrolled in the graduate program in computer science. The objectives are to introduce students to a large body of concepts so that they are better prepared for undertaking the core courses in the graduate program. It is assumed that student would have programmed in a high-level language and have exposure to basic college level mathematical concepts such as logarithms, exponents, sequences, and counting principles.

**Prerequisite(s):** Students are expected to have written programs using a high-level programming language and should understand basic mathematical concepts including exponents, logarithms, sequences, and counting principles. Not open to non-degree graduate students.

**CSCI 8016 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)**

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with MATH 4010, MATH 8016, CSCI 4010).

**Prerequisite(s):** MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

**CSCI 8040 LARGE SCALE NETWORK ANALYSIS ALGORITHMS (3 credits)**

The course will provide a review of the properties of large complex network systems, such as those occurring in social networks, epidemiology and biological systems. We will discuss algorithms to analyze these properties, their implementations, their stability under information fluctuation and how information spreads through networks.

**Prerequisite(s):** Students should be comfortable w/ programming, have knowledge of data structures, preliminary graph algorithms, & linear algebra. Suggest Prep Courses: CSCI 4150 or CSCI 8156; CSCI 3320; MATH 4050 or Permission. Not open to non-degree graduate students.

**CSCI 8050 ALGORITHMIC GRAPH THEORY (3 credits)**

The overall goal is to introduce advanced concepts in graph theory, graph modeling, and graph algorithms and how they can be used to solve a wide range of problems in various application domains. The course introduces students to several applied path algorithms, clustering and partitioning techniques, network flow algorithms, and weighted matching algorithms. Other advanced concepts associated with complex networks include node centralities in graphs and community detection approaches. The course will also introduce students to key classes of graphs with a particular focus on the main classes of Perfect Graphs and their applications in scheduling, chip design, mobile computing, and Biomedical Informatics. (Cross-listed with MATH 8050).

**Prerequisite(s):** CSCI 3320 or CSCI 8325 and MATH 4150 or MATH 8156 or permission of instructor. Not open to non-degree graduate students.

**CSCI 8060 ALGORITHMIC COMBINATORICS (3 credits)**

This course includes classical combinatorial analysis graph theory, trees, network flow, matching theory, external problems, and block designs. (Cross-listed with MATH 8060).

**Prerequisite(s):** MATH 3100, CSCI 3100, MATH 8105 or CSCI 8105 or instructor's permission.

**CSCI 8080 DESIGN AND ANALYSIS OF ALGORITHMS (3 credits)**

The course provides students an understanding of advanced topics in algorithms. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, dynamic programming, greedy algorithms, graph algorithms, and the theory of NP-Completeness. (Cross-listed with MATH 8080).

**Prerequisite(s):** CSCI 3320 or CSCI 8325 or equivalent. Not open to non-degree graduate students.

**CSCI 8105 APPLIED COMBINATORICS (3 credits)**

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with MATH 8105, MATH 3100, CSCI 3100).

**CSCI 8110 ADVANCED TOPICS IN ARTIFICIAL INTELLIGENCE (3 credits)**

An in-depth study of one or more topics selected from: search techniques, knowledge representation, knowledge programming, parallel processing in Artificial Intelligence, natural language processing, image processing, current and future directions, etc. May be repeated with different topics, with permission of adviser.

**Prerequisite(s):** CSCI 4450 or CSCI 8456 or equivalent.
CSCI 8150  ADVANCED COMPUTER ARCHITECTURE (3 credits)
This course will provide an in-depth understanding of the key architectural concepts governing the design of state-of-the-art high-performance computers. It will introduce methods that are commonly used to trade-off the various architectural choices to design systems with the desired cost-performance requirements. The course will provide a systems level perspective to design. The emphasis will be on the cache, memory and I/O subsystems, system interconnects leading to distributed shared-memory multiprocessor systems. Multiprocessor clusters based on message passing and high-performance processor architecture will be covered. The course will also provide a brief overview of emerging system architectures including quantum computing and those used to facilitate machine learning applications.
Prerequisite(s): CSCI 4350, CSCI 4500 or equivalent with permission of the instructor. Not open to non-degree graduate students.

CSCI 8156  GRAPH THEORY & APPLICATIONS (3 credits)
Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 4150, MATH 4150, MATH 8156).
Prerequisite(s): MATH 2030 or permission of instructor.

CSCI 8160  INTRODUCTION TO VLSI DESIGN (3 credits)
Introduction to the principal concepts of integrated circuits layout. Presentation of the hardware foundations, algorithmic mathematical and graph theoretical foundations of circuit layout. Topics discussed in digital design and computer architecture classes are studied at the actual layout design level such as datapath subsystems and array subsystems. Design methodology tools and testing. Hardware descriptions languages.
Prerequisite(s): CSCI 3220 (or CSCI 8525), CSCI 3710 and CSCI 4350 (or CSCI 8356). Not open to non-degree graduate students.

CSCI 8206  NUMERICAL METHODS (3 credits)
This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 4200, MATH 4200, MATH 8206).
Prerequisite(s): MATH 1970 and MATH 2050 and MATH 2350 with a C- or better or permission of instructor.

CSCI 8210  ADVANCED COMMUNICATIONS NETWORKS (3 credits)
Advanced study of communication networks, analysis of communication needs, special problems encountered in different types of networks, efficiency and traffic analysis and emerging hardware software technologies. Detailed "hands-on" study of the TCP/IP networking protocols.
Prerequisite(s): CSCI 3550 or 8555 or equivalent. Not open to non-degree graduate students.

CSCI 8256  HUMAN COMPUTER INTERACTION (3 credits)
Human computer interaction is concerned with the joint performance of tasks by humans and machines; human capabilities to use machines (including learnability of interfaces); algorithms and programming of the interface; engineering concerns that arise in designing and building interfaces; the process of specification, design, and implementation of interfaces; and design trade-offs. (Cross-listed with CSCI 4250).

CSCI 8266  USER EXPERIENCE DESIGN (3 credits)
User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, ITIN 4260, ITIN 8266).

CSCI 8300  IMAGE PROCESSING AND COMPUTER VISION (3 credits)
This course introduces the computer system structures and programming methodologies for digital image processing and computer vision. The course will cover the mathematical models of digital image formation, image representation, image enhancement and image understanding. Techniques for edge detection, region growing, segmentation, two-dimensional and three-dimensional description of object shapes will be discussed. The course will concentrate on the study of knowledge-based approaches for computer interpretation and classification of natural and man-made scenes and objects.
Prerequisite(s): CSCI 1620 and CSCI 3320. Not open to non-degree graduate students.

CSCI 8306  DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)
This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, MATH 4300, MATH 8306).
Prerequisite(s): MATH 2050 with a C- or better or permission of instructor.

CSCI 8316  PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)
This is a survey course of probabilistic operations research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, MATH 4310, MATH 8316).
Prerequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

CSCI 8325  DATA STRUCTURES (3 credits)
This is a core that will cover a number of data structures such as tree, hashing, priority queues and graphs as well as different algorithm design methods by examining common problem-solving techniques. (Cross-listed with CSCI 3320)

CSCI 8326  COMPUTATIONAL OPERATIONS RESEARCH (3 credits)
Survey of computational methods used in the solution of operations research problems. Some topics may include scripting to guide optimization software, constraint programming, heuristics and metaheuristics for optimization, basic machine learning algorithms, and simulation. (Cross-listed with MATH 4320, MATH 8326, CSCI 4320).
Prerequisite(s): MATH 3200 or CSCI 1620, and MATH 4300 each with a grade of C- or better or permission of instructor.

CSCI 8340  DATABASE MANAGEMENT SYSTEMS II (3 credits)
This course is an in-depth coverage of database management systems. Students will learn important principles of query processing and query optimization, transaction processing, and various database systems architectures. After taking this course, students should also be able to identify useful resources to explore future developments in the area of database management systems.
Prerequisite(s): CSCI 4850 or CSCI 8856. Not open to non-degree graduate students.

CSCI 8350  DATA WAREHOUSING AND DATA MINING (3 credits)
This course is an in-depth coverage of data warehousing and data mining. This course starts with coverage of data warehousing (an enabling technology for data mining) and covers the entire data mining process and various data mining functionalities in detail. Students will get a chance to practice knowledge learned in the course to complete term projects related to data warehousing and/or data mining. After taking this course, students should also be able to identify useful resources to explore future developments in the area of data warehousing and data mining.
Prerequisite(s): CSCI 4850 or CSCI 8856. Not open to non-degree graduate students.
CSCI 8360 MACHINE LEARNING FOR TEXT (3 credits)
This course focuses on the fundamental techniques for extraction of various insights from text data which is ubiquitous on the Web, social media sites, emails, news articles, digital libraries, and other sources. The course topics will include concepts and techniques used by search engines to crawl, index, and rank web pages on the Web, machine learning techniques for categorization of news articles into different categories, sentiment and opinion analysis of social media chats, text summarization, and information extraction.
Prerequisite(s): Not open to non-degree graduate students.

CSCI 8366 FOUNDATIONS OF CYBERSECURITY (3 credits)
Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 4360, CYBR 8366)
Prerequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CSCI 8390 ADVANCED TOPICS IN DATA BASE MANAGEMENT (3 credits)
This course is an in-depth coverage of well-selected topic(s) in recent development of database management systems. Since new developments in DBMS are very diverse, when each time when this course is offered, it will focus on one or more specific topics, and the course can be taken multiple times for credit.
Prerequisite(s): CSCI 4850 or CSCI 8856. Not open to non-degree graduate students.

CSCI 8400 ADVANCED COMPUTER GRAPHICS (3 credits)
Computer graphics continues to play an important role in computer science. This course covers the mathematical foundations of three-dimensional representation and animation; ray tracing and path tracing rendering methods; using the graphical processing unit (GPU) for real time applications; and concludes with simulation of natural phenomenon.
Prerequisite(s): Bachelors degree or permission from the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8410 DISTRIBUTED SYSTEMS AND NETWORK SECURITY (3 credits)
The course aims at understanding the issues surrounding data security, integrity, confidentiality and availability in distributed systems. Further, we will discuss various network security issues, threats that exist and strategies to mitigate them. This course will cover topics in cryptography, public key infrastructure, authentication, hashing, digital signatures, ARP protection, IP and IPSEC, IP Tables, SSL/TLS, firewalls, etc. (Cross-listed with CYBR 8410)
Prerequisite(s): CSCI 8366 or equivalent(s). Not open to non-degree graduate students.

CSCI 8420 SOFTWARE ASSURANCE (3 credits)
Software assurance is a reasoned, auditable argument created to support the belief that the software will operate as expected. This course is an intersection of knowledge areas necessary to perform engineering activities or aspects of activities relevant for promoting software assurance. This course takes on a software development lifecycle perspective for the prevention of flaws. (Cross-listed with CYBR 8420)
Prerequisite(s): CSCI 8836 OR by permission of the Instructor. Not open to non-degree graduate students.

CSCI 8430 TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT (3 credits)
This course examines in detail: the principles of a security architecture, access control, policy and the threat of malicious code; the considerations of trusted system implementation to include hardware security mechanisms, security models, security kernels, and architectural alternatives; the related assurance measures associated with trusted systems to include documentation, formal specification and verification, and testing, and approaches that extend the trusted system, into applications and databases and into networks and distributed systems.
Prerequisite(s): CSCI 8366 or equivalents, or instructor permission. Not open to non-degree graduate students.

CSCI 8446 INTRODUCTION TO PARALLEL COMPUTING (3 credits)
This course is an introduction to parallel computing, that is using multiple processors to execute algorithms. Topics discussed include: classification of parallel computers; shared-memory versus message passing; forms of parallelism; measures of performance; designing parallel algorithms; parallel programming and parallel languages; synchronization constructs; and operating systems for parallel computers. (Cross-listed with CSCI 4440)
Prerequisite(s): CSCI 4500, which may be taken concurrently, with C- or better.

CSCI 8450 ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING (3 credits)
The course will provide in depth study of the topics in natural language processing and understanding, such as syntax, lexical and computational semantics, natural language ambiguities and their disambiguation, logical form construction and inference. The course will survey state-of-the-art natural language processing toolkits and knowledge bases that boost the development of modern language processing and understanding applications.
Prerequisite(s): CSCI 3320 OR CSCI 3660 OR CSCI 4450. Not open to non-degree graduate students.

CSCI 8456 INTRODUCTION TO ARTIFICIAL INTELLIGENCE (3 credits)
An introduction to artificial intelligence. The course will cover topics such as machine problem solving, uninformed and informed searching, propositional logic, first order logic, approximate reasoning using Bayesian networks, temporal reasoning, planning under uncertainty and machine learning. (Cross-listed with CSCI 4450).

CSCI 8476 PATTERN RECOGNITION (3 credits)
Structures and problems of pattern recognition. Mathematics model of statistical pattern recognition, multivariate probability, Bay's decision theory, maximum likelihood estimation, whitening transformations. Parametric and non-parametric techniques, linear discriminant function, gradient-descent procedure, clustering and unsupervised learning, and feature selection algorithms. (Cross-listed with CSCI 4470)
Prerequisite(s): CSCI 1620 with C- or better, and MATH 2050. Recommended: MATH 4740/8746 or STAT 3800/8805.

CSCI 8480 MULTI-AGENT SYSTEMS AND GAME THEORY (3 credits)
This course covers advanced topics in the area of coordination of distributed agent-based systems with a focus on computational aspects of game theory. The main topics covered in this course include distributed constraint satisfaction, distributed constraint optimization, and competitive and cooperative game theory. (Cross-listed with MATH 8480)
Prerequisite(s): CSCI 4450 or CSCI 8456. Suggested background courses: CSCI 4480 or CSCI 8486; CSCI 8080. Not open to non-degree graduate students.

CSCI 8486 ALGORITHMS FOR ROBOTICS (3 credits)
This course provides an introduction to software techniques and algorithms for autonomously controlling robots using software programs called controllers. Students will be taught how to program and use software controllers on simulated as well as physical robots. (Cross-listed with CSCI 4480).
Prerequisite(s): CSCI 3320 with C- or better. CSCI 4450/8456 is a recommended but not essential prerequisite.
CSCI 8500  NUMERICAL LINEAR ALGEBRA (3 credits)
Topics covered in this course include error propagation, solutions of nonlinear equations, solutions of linear and nonlinear systems by various schemes, matrix norms and conditioning, and computation of eigenvalues and eigenvectors. (Cross-listed with MATH 8500).
Prerequisite(s): MATH 1960 and MATH 2050, or permission of instructor. Familiarity with computer programming is assumed.

CSCI 8506  OPERATING SYSTEMS (3 credits)
Operating system principles. The operating system as a resource manager; I/O programming, interrupt programming and machine architecture as it relates to resource management; memory management techniques for uni-multiprogrammed systems; process description and implementation; processor management (scheduling); I/O device, controller, and channel management; file systems. Operating system implementation for large and small machines. (Cross-listed with CSCI 4500).
Prerequisite(s): CSCI 3710, CSCI 3320/8325, MATH 1950, and CSCI 4350/8356 with C- or better.

CSCI 8510  NUMERICAL DIFFERENTIAL EQUATIONS (3 credits)
Topics covered in this course include interpolation and approximations, numerical differentiation, numerical integration, and numerical solutions of ordinary and partial differential equations. (Cross-listed with MATH 8510).
Prerequisite(s): MATH 1970, MATH 2350, or permission of instructor. Familiarity with computer programming is assumed.

CSCI 8520  ADVANCED TOPICS IN OPERATIONS RESEARCH (3 credits)
Advanced treatment of a specific topic in the area of operations research not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with MATH 8520).
Prerequisite(s): MATH 4300 or MATH 8306 or CSCI 4300 or CSCI 8306 or permission of the instructor.

CSCI 8530  ADVANCED OPERATING SYSTEMS (3 credits)
State-of-the art techniques for operating system structuring and implementation. Special purpose operating systems. Pragmatic aspects of operating system design, implementation and use.

CSCI 8555  COMMUNICATION NETWORKS (3 credits)
This course is designed to bring students up to the state of the art in networking technologies with a focus on Internet. It will cover the principles of networking with an emphasis on protocols, implementations and design issues. (Cross-listed with CSCI 3550)
Prerequisite(s): CSCI 3320 or CSCI 8325 with grade of C- or better) AND (CSCI 2240 or CYBR 2250 with grade of C- or better)

CSCI 8566  NUMBER THEORY & CRYPTOGRAPHY (3 credits)
An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 4560, MATH 4560, MATH 8566).
Prerequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

CSCI 8570  FUNDAMENTALS OF DEEP LEARNING (3 credits)
This course is an introduction to deep learning, a branch of machine learning concerned with the development and application of neural networks. Deep learning trains the machine to learn patterns that it is presented with rather than requiring the human operator to define the patterns that the machine should look for. Deep learning is behind many recent advances in artificial intelligence, such as face recognition, speech recognition and autonomous driving. This course will cover the foundations of deep learning, learning theory, basic/advanced neural networks and problem domains of many selected applications.
Prerequisite(s): CSCI 3320 or instructor permission

CSCI 8610  FAULT TOLERANT DISTRIBUTED SYSTEMS (3 credits)
This course is to study the theory and practice of designing computer systems in the presence of faulty components. Emphasizes the basics of how faults can affect systems and what is required to mask or compensate for their efforts.
Prerequisite(s): Not open to non-degree graduate students.

CSCI 8620  MOBILE COMPUTING AND WIRELESS NETWORKS (3 credits)
The objective of the course is to introduce contemporary issues in mobile computing and wireless networks. The course covers the differences between mobile computing and the traditional distributed computing paradigm, impediments of the mobile and wireless environments, problems and limitations due to such impediments, various network layers solutions, location management techniques, mobile IP, wireless LANs, wireless TCP, ad hoc networks, and sensor networks.
Prerequisite(s): CSCI 3550 or CSCI 8555. Not open to non-degree graduate students.

CSCI 8626  COMPUTER GRAPHICS (3 credits)
Introduction to the acquisition, manipulation and display of graphical information using digital techniques. Topics include discussion of the various hardware devices used for input and output, the classical algorithms and data structures used in manipulation of graphical objects, the user interface to the graphics system, and applicable standards. (Cross-listed with CSCI 4620).
Prerequisite(s): ISQA 3300 or CSCI 3320.

CSCI 8656  INTRODUCTION TO CLOUD COMPUTING (3 credits)
This course is an introduction to cloud computing. The students will learn about core concepts of cloud computing such as cloud models (IaaS, PaaS, SaaS, etc.), deployment models (public, private, hybrid), cloud infrastructures (compute, networking, storage), cloud services (VMs, serverless, object storage, cache, CDN, etc.), and big-data driven systems. This course will revisit essential topics in CS-related courses such as data structure, operating systems, and distributed systems and show how they are utilized and applied in diverse cloud computing technologies and systems including Hadoop, Spark, and distributed databases. After taking this course, students will have basic knowledge of cloud computing and hand-on experiences with diverse projects (including cloud system demos) that utilize diverse and heterogeneous cloud resources. (Cross-listed with CSCI 4650).
Prerequisite(s): Prior experience and background knowledge of networking and operating systems are preferred

CSCI 8666  AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)
This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, MATH 4660, MATH 8666).
Prerequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

CSCI 8700  SOFTWARE SPECIFICATIONS AND DESIGN (3 credits)
A continuation of the study of software engineering with an emphasis on early phases of software development, namely requirements engineering/specification and architectural design. Includes an in-depth study of practices for effective software requirements specification and architectural design, as well as formal specifications of software systems. Related topics such as metrics and support tools are also covered.
Prerequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8706  COMPILER CONSTRUCTION (3 credits)
Assemblers, interpreters and compilers. Compilation of simple expressions and statements. Analysis of regular expressions. Organization of a compiler, including compile-time and run-time symbol tables, lexical scan, syntax scan, object code generation and error diagnostics. (Cross-listed with CSCI 4700).
CSCI 8710 MODERN SOFTWARE DEVELOPMENT METHODOLOGIES (3 credits)
Designed to introduce students to advanced object technology and other modern methodologies for developing software systems. Intended for graduate students who have mastered the basic concepts and issues of software engineering. Course covers advanced object-oriented software development. The course also covers several offshoots of object technology, including: component-based software engineering, aspect-oriented software development, software product line engineering, service-oriented computing, etc.
Prerequisite(s): CSCI 4830 or CSCI 8836.

CSCI 8760 FORMAL METHODS IN SOFTWARE ENGINEERING (3 credits)
In the high consequence system domain, a primary objective of any construction technique employed is to provide sufficiently convincing evidence that the system, if put into operation, will not experience a high consequence failure or that the likelihood of such a failure falls within acceptable probabilistically defined limits. Systems for which such evidence can be provided are called high assurance systems. The objective of this course is to examine software-engineering techniques across the development life cycle that are appropriate for high assurance systems. The course will analyze the nature of the evidence provided by various techniques (e.g., does a given technique provide sufficiently strong evidence in a given setting).
Prerequisite(s): CSCI 8000 and CSCI 8836 or CSCI 4830

CSCI 8766 TOPICS IN MODELING (3 credits)
Selection of such topics as formulation and analysis of various models involving Markov chains, Markov processes (including birth and death processes), queues, cellular automata, difference and differential equations, chaotic systems and fractal geometries. (Cross-listed with CSCI 4760).
Prerequisite(s): MATH 2350 and MATH 4740 or MATH 8746.

CSCI 8790 ADVANCED TOPICS IN SOFTWARE ENGINEERING (3 credits)
The main objective of this course is (1) to introduce advanced topics in software engineering approaches and (2) to provide an overview and in-depth understanding of software development and maintenance techniques. Many well-known software implementation problems, associated programming tools, and analysis techniques are also covered. At the end of this course, the student should be able to apply the practical skills and approaches in solving non-trivial problems in diverse fields of study.
Prerequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8836 INTRODUCTION SOFTWARE ENGINEERING (3 credits)
Basic concepts and major issues of software engineering, current tools and techniques providing a basis for analyzing, designing, developing, maintaining and evaluating the system. Technical, administrative and operating issues. Privacy, security and legal issues. (Cross-listed with CSCI 4830).

CSCI 8856 DATABASE MANAGEMENT SYSTEMS (3 credits)
Basic concepts of database management systems (DBMSs). The relational, hierarchical and network models and DBMSs which use them. Introduction to data base design. (Cross-listed with CSCI 4850).

CSCI 8876 DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS (3 credits)
This required course for undergraduate bioinformatics majors provides foundational knowledge on database aspects used in the field and an overview of their applications in bioinformatics, biomedical informatics, and health/clinical informatics. The course begins with a brief review of key concepts in computational molecular biology related to database search development, database management systems, the difference between primary and secondary databases, and bioinformatics-related aspects of modeling and theory in computer science. The major focus is on the multiple challenges and aspects of bio-database development, search, and pattern discovery. The course uses problem-based learning to help students develop database management skills as they apply to high throughput “omics.” data, the basics of data management, data provenance and governance, standards, and analysis through KDD-based workflows. This course will also consider the fundamentals of artificial intelligence and machine learning as they pertain to bioinformatics, from the perspective of database storage, I/O, and analysis. (Cross-listed with BIOI 4870)
Prerequisite(s): CSCI 3320 and BIOI 3500, or permission of instructor; BIOI 3500 can be taken concurrently. Prior completion of CSCI 4850 is strongly recommended but not required. Not open to non-degree graduate students.

CSCI 8910 MASTER OF SCIENCE CAPSTONE (3 credits)
The capstone course is to integrate coursework, knowledge, skills and experimental learning to enable the student to demonstrate a broad mastery of knowledge, skills, and techniques across the Master degree curriculum of Computer Science for a promise of initial employability and further career advancement. The course is designed to be in a student-centered and student-directed manner which requires the command, analysis and synthesis of knowledge and skills. Students may apply their knowledge and skill to a project which serves as an instrument of evaluation. Students are encouraged to foster an interdisciplinary research and cultivate industry alliances and cooperation in this course. This capstone course should be taken only after students have completed at least 3/4 of course requirements for the major.
Prerequisite(s): Master’s degree of Computer Science with course-only option (program III). Not open to nondegree students.

CSCI 8920 ADVANCED TOPICS COMPUTER SCIENCE (3 credits)
An in-depth study, at the graduate level, of one or more topics that are not treated in other courses. May be repeated with different topics with permission of adviser.
Prerequisite(s): Permission of instructor; will vary with offering. Not open to non-degree graduate students.

CSCI 8950 GRADUATE INTERNSHIP IN COMPUTER SCIENCE (1-3 credits)
The purpose of this course is to provide students with opportunities to apply their academic studies in environments such as those found in business, industry, and other non-academic organizations. The student interns will sharpen their academic focus and develop better understanding of non-academic application areas.
Prerequisite(s): Permission of the graduate program chairperson and a minimum grade point average of 3.0 (B), with at most one grade below B, but not lower than C+ for all CS graduate classes. Not open to non-degree graduate students.
CSCI 8960 THESIS EQUIVALENT PROJECT IN COMPUTER SCIENCE (1-6 credits)
This course allows a graduate student to conduct a research project in computer science or a related area. The project is expected to place an emphasis on applied, implementations-based, or experimental research. The process for development and approval of the project must include: appointment of supervisory committee (chaired by project adviser), a proposal approved by the supervisory committee, monitoring of the project by the supervisory committee, an oral examination over the completed written product conducted by the supervisory committee, and final approval by the supervisory committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines. 
Prerequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 8970 INDEPENDENT STUDY (1-3 credits)
Under this number a graduate student may pursue studies in an area that is not normally available in a formal course. The topics to be studied will be in a graduate area of computer science to be determined by the instructor.
Prerequisite(s): Permission of the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8980 GRADUATE SEMINAR (1 credit)
This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques and methodologies, and/or the current research results in the fundamental areas of computer science. Topics to be covered by the course will vary in different semesters.
Prerequisite(s): Permission of the Instructor. Not open to non-degree graduate students.

CSCI 8986 TOPICS IN COMPUTER SCIENCE (3 credits)
This is a variable topic course in computer science at the senior/graduate level. Topics not normally covered in the computer science degree program, but suitable for senior/graduate-level students can be offered. (Cross-listed with CSCI 4980).
Prerequisite(s): Permission of Instructor. Additional prerequisites may be required for particular topic offerings.

CSCI 8990 THESIS (1-6 credits)
A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.
Prerequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 9410 ADVANCED TOPICS IN LOGIC PROGRAMMING (3 credits)
This course will examine some advanced topics in logic programming, in particular logic programming under stable model (or answer set) semantics. Answer set programming is a common name of the field. Formal syntax, semantics, and proofs of correctness for logic programs will be considered. Elements of inductive and Prolog programming will also be introduced. Each advanced topic will be followed by how it has been applied in practice. Advanced applications of logic programming will be covered in detail.
Prerequisite(s): CSCI 8000 and doctoral student standing in Information Technology or the permission of the instructor.

CSCI 9420 INTELLIGENT AGENT SYSTEMS (3 credits)
This course covers the principles of interaction between agents in multi-agent systems using game theory. Relevant topics studied in this course include competitive games, statistical Bayesian games, cooperative games, and mechanism design. Students will have to implement projects related to the material studied in the course.
Prerequisite(s): CSCI 3320 or CSKI 8325 and CSCI 4450 or CSCI 8456. Not open to non-degree graduate students.

CSCI 9470 METHODS IN SOFTWARE ENGINEERING RESEARCH (3 credits)
This course provides guidelines on how to conduct research in the field of software engineering by presenting the research methods, classic readings, and development of theories and their application to real life problems. The main emphasis of the course is to provide opportunity for in-depth study of topics such as contemporary methods for software development. 
Prerequisite(s): CSCI 8836 or equivalent course and doctoral student standing in Information Technology or permission of the instructor. Not open to non-degree graduate students.

CSCI 9810 RESEARCH FOUNDATIONS IN THEORETICAL COMPUTING (3 credits)
This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques, and methodologies, and/or the current research results in the fundamental areas of theoretical computing. The course will examine advanced research topics in computer science and engineering, including foundations of automata theory, computability, complexity analysis, computational logics and algorithmic analysis, hybrid dynamic systems theory, number theory, adaptation and learning theory, concepts and principles in computational geometry, stochastic processes, and random optimization. Each topic will be discussed with a perspective of research issues and directions. Active student participation in investigation of the research topics, survey of the current state-of-art, and identifying the future research insights is required. Students will take turn presenting their research results on specific topics. Topics to be covered by the course will vary in different semesters.
Prerequisite(s): The prerequisites of this course vary depending on the areas to be covered in the semester the course is offered. Good standing in Ph.D. program is required. Permission of the instructor may be required. Not open to non-degree graduate students.

Computer Science, MS

Department of Computer Science, College of Information Science & Technology

Vision Statement
The vision of the department is to create and support dynamic research and teaching environments that promote a computationally empowered society ready to tackle complex problems in rapidly changing technological landscapes.

Other Program Related Information
Fast Track
The Department of Computer Science has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor’s degree and a master’s degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate credit hours towards the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and
graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:
- This program is available for undergraduate students pursuing any CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
- Admission to Fast Track does NOT guarantee admission to the graduate program.
- The admit term must be after the completion term of the undergraduate degree.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

Applicants are strongly encouraged to apply as early as possible, especially if applying for assistantships or scholarships. Some scholarships may have earlier deadlines or run out of funding.

- **Fall Admission:**
  - May 1 for international applicants who are required to secure a new student visa
  - July 1 for all other applicants
- **Spring Admission:**
  - October 1 for international applicants who are required to secure a new student visa
  - November 1 for all other applicants
- **Summer Admission:**
  - March 1 for international applicants who are required to secure a new student visa
  - March 15 for all other applicants

Other Requirements
- The minimum undergraduate grade point average (GPA) requirement for the MS in computer science program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a four-year undergraduate degree.
- **Entrance Exam:** The Graduate Record Exam (GRE) is not required, but those who are applying for a graduate assistantship are strongly encouraged to submit their official GRE results. GRE results cannot be older than five years. Successful applicants have typically had GRE scores of 150 verbal and 160 quantitative or better.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Resume:** Submit a detailed resume indicating your work experience and background.
- **Letters of Recommendation:** Two letters from references who can evaluate your work and/or academic achievements are required.
- **OPTIONAL: Application for Graduate Assistant Position**
  - If interested in applying for Graduate Assistant (GA) positions, please submit a letter stating your research area interests and why you feel you would make a good GA. Please note that GA positions will be considered after admission and program admission is not a guarantee of receiving a GA position.

Degree Requirements
Undergraduate Deficiencies

The curriculum for the MS in computer science requires a basic knowledge of computer fundamentals including mathematics, programming, data structures, computer architecture and operating systems. Successful completion of these courses with a “B-” or better in each course is required to become an unconditionally admitted student.

Core Courses

The five courses listed below provide an overall breadth in the areas of languages, algorithms, architecture, operating systems, and software engineering. Refer to the UNO Graduate College Quality of Work Standards for additional grade requirements.

Students selecting the thesis/project option or declaring a concentration area as part of their program are required to take three core courses; students selecting coursework option with no area of concentration must take all five core courses (note that some core courses are needed as prerequisites for certain areas of concentration).

Select either three or five graduate-level computer science courses depending on whether a computer science area of concentration is declared.

Concentrations
All areas of concentration require four classes selected according to the requirements of each concentration. See Computer Science Concentrations.

CSCI 8910 MASTER OF SCIENCE CAPSTONE 1  3

TOTAL  33

1 The Capstone course should be taken only after students have completed at least 75% of course requirements for the major, this includes all core classes. Students with insufficient progress toward degree completion are prohibited from enrolling. Students must have an overall GPA of at least a 3.0 to register for the Capstone Course.

Concentrations

Artificial Intelligence

The concentration in artificial intelligence provides students with an in-depth understanding of the principles and technologies used to embody machines with human-like intelligent capabilities. Students taking this concentration will have an opportunity to learn, as well as perform hands-on experiments in different areas of artificial intelligence such as software agents, multi-agent and multi-robot systems, machine vision and image processing technologies, neural network based adaptive software systems, heuristics and stochastic optimization techniques for critical decision making, machine learning and knowledge engineering techniques for embedding intelligence in computers and information systems.

Students must take any three (3) of the five (5) core courses listed under the Requirements tab (9 hours).

### Dependable Computing Systems Concentration

The objective of the Dependable Computing Systems (DCS) concentration is to provide the students with a broad introduction to the design and evaluation of secure and dependable distributed computing systems. The concentration focuses on the theory, development, performance evaluation, and testing of systems to cope with the today’s complex challenges such as failures, malicious adversaries, integrity, safety, and availability. The general domains include network security, software assurance, and fault tolerance. Students will be exposed to both software and hardware aspects for building such systems.

Students must take any three (3) of the five (5) core courses listed under the Requirement tab (9 hours).

#### Elective Courses

Select two of the following:

- CSCI 8420  SOFTWARE ASSURANCE
- CYBR 8436  QUANTUM COMPUTING AND CRYPTOGRAPHY
- CSCI 8450  ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING
- CSCI 8610  FAULT TOLERANT DISTRIBUTED SYSTEMS
- CSCI 8760  FORMAL METHODS IN SOFTWARE ENGINEERING
- CSCI 8790  ADVANCED TOPICS IN SOFTWARE ENGINEERING

### Software Engineering Concentration

The concentration in software engineering is designed to address the growing market demand for software engineers. The concentration covers fundamental and advanced principles in all aspects of software development, equipping students with the necessary technical background to quickly adapt to rapidly changing software engineering practices and technologies.

Students must take CSCI 8700 as one of the three (3) core courses chosen from the Requirements tab (9 hours).

</tbody>
</table>

### Systems Concentration

The systems concentration pertains to the advances in ubiquitous and emerging technologies that span over the complex cores of computing systems such as network communication, distributed computing, operating systems, and computer architecture. Recent advances in computing systems include cloud computing, social computing, Internet of Things, and cyber-physic-systems. The concentration provides the students with the fundamentals of computing systems that can be pursued in hardware, software or a combination of both.

Students must take CSCI 8150 and CSCI 8530 as two of the three (3) core courses chosen from the Requirements tab (9 hours).

#### Elective Courses

Select three of the following:

- CSCI 8040  LARGE SCALE NETWORK ANALYSIS ALGORITHMS
- CSCI 8050  ALGORITHMIC GRAPH THEORY
- CSCI 8156  GRAPH THEORY & APPLICATIONS
- CSCI 8430  TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT
CSCI 8450  ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING
CSCI 8620  MOBILE COMPUTING AND WIRELESS NETWORKS
CSCI 8626  COMPUTER GRAPHICS
Any course not taken listed under required courses Depending on student’s interest, a graduate course approved by GPC

Total Credits 12

Quality of Work Standards
The Graduate College Quality of Work Standards shall be applied to foundation courses (deficiency courses) as well as courses taken as part of the degree program. In particular, the GPC will recommend to the Graduate College that any

1. Student receiving a grade of "C-" or below in any graduate course or undergraduate foundation course will be dismissed from the program or, in the case of unclassified or non-degree students, be automatically denied admission.

2. Student receiving a grade of "C+" or "C" in any undergraduate foundation course or graduate course will be placed on probation or dismissed from the program. Graduate courses may be repeated once with GPC approval. Undergraduate foundation courses will follow the repeat policy for IS&T undergraduate courses.

3. At most three graduate courses ending in 6 (8xx6) will be counted toward the degree requirements. Graduate courses with an undergraduate component (listed under Undergraduate Deficiencies) are not eligible as elective courses.

4. Student must have a minimum grade point average (GPA) of 3.0 (“B”), with no grades lower than a “B-”.

Artificial Intelligence Certificate
Department of Computer Science, College of Information Science & Technology

Vision Statement
The objective of the certificate in artificial intelligence is to expose students to the principles and technologies used to embody machines with human-like intelligent capabilities and to enable the machines to assist humans in performing complex and hazardous tasks. Students completing this certificate program have an opportunity to learn as well as perform hands-on experiments in different areas of artificial intelligence, including automated software systems such as software agents, multi-agent and multi-robot systems, machine vision and image processing technologies, neural network-based adaptive software systems, heuristics and stochastic optimization techniques for critical decision making, and machine learning and knowledge engineering techniques that embed intelligence in computers and information systems.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
• Fall: July 1
• Spring: November 1
• Summer: March 1

Other Requirements
• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
  • Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

• Resume: Submit a resume detailing your work experience and background (if applicable)

Degree Requirements
Provisional Admission
Students who have not taken an undergraduate data structures course with a grade of "B-" or better must do so before they will be allowed to continue in the program.

Completion of the Certificate

During what is expected to be the semester the certificate is completed and prior to the posted deadline, students should apply for the certificate through MovILINK on or before the deadline. Information can be found here (http://www.ses.unomaha.edu/registrar/graduate.php). If you complete the application form and do not complete all of the requirements for the certificate, contact the Office of Graduate Studies as soon as possible. You must reapply during the next semester in which you expect to complete the certificate; no additional fee is charged to reactivate your application.

The following requirements are due 12 working days prior to commencement:

- “Incomplete” and “NR” grades from previous terms must be removed so that the grade will be in the Office of Graduate Studies.
- All fees, fines, and other obligations due the university must be settled.

For students currently enrolled in courses that are a part of their plan of study, enrollment must be maintained in order to complete the certificate. A grade for any current enrollment must be received by the Registrar's Office no later than the close of business on the fifteenth working day following the end of a semester.

Awarding of Graduate Certificates

The Office of Graduate Studies will mail the certificate to students when all requirements are completed and all obligations to the university are satisfied. The Graduate College will not approve any changes in the student’s permanent record once the certificate is awarded.

Communication Networks Certificate

Department of Computer Science, College of Information Science & Technology

Vision Statement

The communication network certificate program is a career program designed to meet the growing industry demand for qualified, highly trained individuals in the field of computer network systems. The certificate is designed to give the working professional both a conceptual view and an in-depth understanding of the latest technologies. The program includes courses ranging from basic concepts such as local area networks to advanced networking concepts such as mobile wireless communication systems and networks.

**Machine Learning Certificate**

**Department of Computer Science, College of Information Science & Technology**

**Vision Statement**

The recent advances in machine learning (ML) have made significant impacts in diverse fields such as health care, agriculture, transportation, education, global security, etc. Machine learning experts are in very high demand for right now and the foreseeable future. The ML graduate certificate will prepare students to become data scientists, machine learning algorithm designers, deep learning systems engineers, computer vision experts, software and application developers, and other machine learning related professionals.

**Software Engineering Certificate**

**Department of Computer Science, College of Information Science & Technology**

**Vision Statement**

Software engineering is the systematic application of engineering and computer science principles to the development, maintenance and analysis of complex software systems. The demand for software engineers is very high, and is expected to continue for many years to come. The certificate in software engineering will provide students with technical knowledge and skills to apply modern software engineering processes, methods, and tools to tackle real-world requirements, equipping them for career advancement as software professionals.

Systems and Architecture Certificate

Department of Computer Science, College of Information Science & Technology

Vision Statement
This certificate provides students with knowledge in the underlying architecture of computers. Students may choose either the hardware track or the software track. In the hardware track, students gain more in-depth knowledge of the field. Students in this track will develop skills to perform system and component design, quality assurance, and testing. In the software track, knowledge in the underlying architecture helps in generating and understanding optimized software. Students in this track will develop skills to perform systems programming, language processing, and system administration.

## Computer Science Education

### Degree Programs Offered

- **Computer Science Education, MS** (p. 1128)
- **Computer Science Education Certificate** (p. 1129)

#### CSTE 8020 EXPLORING COMPUTER SCIENCE FOR TEACHERS (3 credits)

This course provides a breadth first introduction to computer science for pre-service and in-service teachers. The Exploring Computer Science curriculum (http://www.exploringcs.org) serves as a guiding framework for this course, which introduces domain knowledge and appropriate teaching techniques related to teaching human computer interaction, computational problem solving, web design, programming, data analysis, and artificial intelligence in school environments. The course also covers ethical and social issues in computing along with an overview of computing careers.

#### CSTE 8030 COMPUTER SCIENCE PRINCIPLES FOR TEACHERS (3 credits)

This course introduces pre-service and in-service teachers to the foundational principles of computer science. It aims to help them learn the essential thought processes used by computer scientists to solve problems, expressing those solutions as computer programs. It prepares them to teach the AP CS Principles course (https://apcentral.collegeboard.org/courses/ap-computer-science-principles) as defined by the College Board. Students explore several different curricula available through College Board endorsed providers.

**Prerequisite(s):** MATH 1120 or MATH 1130 or MATH 1220 or equivalent with C- or better.
CSTE 8040 OBJECT ORIENTED PROGRAMMING FOR TEACHERS (3 credits)
This course provides an in-depth treatment of the fundamentals of object-oriented programming (OOP) in Java programming language environment. Topics include data types and information representation, control structures, classes and objects, methods, encapsulation, and use of introductory data structures to solve real-world problems. Additionally, this course interleaves coverage of OOP content with discussion of common learner misconceptions and teaching strategies/tools that can be employed to aid learners' mastery of this material. This course prepares students to implement the Advanced Placement Computer Science A curriculum in a secondary school setting.
Prerequisite(s): CSTE 8020 or CSTE 8030.

CSTE 8910 CAPSTONE IN CS EDUCATION (3 credits)
This course will allow graduate students, as an individual or as part of a group, to study and analyze specific problems related to teaching computing in schools. Projects will be concerned with the curriculum and/or instruction of computing and should address a broad scope of application rather than a specific level. (Cross-listed with STEM 8910).
Prerequisite(s): The student must have completed at least 21 credit hours in the Masters of CS Education program.

CSTE 8920 SPECIAL TOPICS IN CS EDUCATION (3 credits)
This course will cover variable content focusing on CS education topics relevant to PK-12 teachers and based on current research trends. New curricula, tools, assessments, programming languages, or related standards may be covered.
Prerequisite(s): Advisor and/or instructor approval.

CSTE 8960 THESIS EQUIVALENT PROJECT IN CS EDUCATION (1-6 credits)
This course allows a graduate student to conduct a research project in computing education. The process for development and approval of the project must include: appointment of supervisory committee (chaired by project adviser), a proposal approved by the supervisory committee, monitoring of the project by the supervisory committee, an oral examination over the completed written product conducted by the supervisory committee, & final approval by the supervisory committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines. Project credits must be completed over two or more academic terms.
Prerequisite(s): Completion of required Core courses and approval of advisor.

CSTE 8970 CS ED INDEPENDENT STUDY (1-3 credits)
This is a specially designed course taken under the supervision of a graduate faculty member to accommodate the student who has identified a focus of study not currently available in the departmental offerings and who has demonstrated capability for working independently.
Prerequisite(s): Permission of the department and graduate faculty member.

CSTE 8990 THESIS (1-6 credits)
This course is an independent research project completed under the direction of a thesis advisor and required of all candidates pursuing a Master of Science with Thesis option. Thesis credits must be completed over two or more academic terms.
Prerequisite(s): Completion of Required Core Courses and approval of advisor. Not open to non-degree graduate students.

Computer Science Education, MS
Department of Computer Science, College of Information Science & Technology; Department of Teacher Education, College of Education, Health, and Human Sciences

Vision Statement
This degree program is intended for those with a passion for the teaching and learning of computational thinking, computer science, and information technology skills. By developing both content knowledge and pedagogical skills related to the computing disciplines, this program is ideal for educators looking to empower young people to become the creators of next generation technologies.

In completing program coursework, certified Nebraska teachers will also meet requirements for the IT supplemental endorsement. Teachers from other states should consult with their corresponding state officials to consider local credentialing applicability.

Program Website (http://www.unomaha.edu/college-of-information-science-and-technology/computer-science-education/graduate/ms-csed.php)

Other Program Related Information
Students who hold current Nebraska teaching certification are eligible for the IT Supplemental Endorsement upon successfully completing the 15 hour core courses.

Grades of ‘C’ or lower cannot be used when applying for the State of Nebraska IT Supplemental Endorsement.

Student Learning Outcomes
Upon completion of the MS in computer science education, students will be able to:

• Demonstrate the ability to create basic computational artifacts.
• Demonstrate practical knowledge and skills with computing systems.
• Explain how computing permeates today’s society, including security, privacy, and ethical considerations.
• Apply appropriate pedagogical content knowledge in the teaching of computing topics.
• Describe relevant and recent research findings in computer science education including how they might be applied in the classroom.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

• Fall: July 1
• Spring: December 1
• Summer: April 1

Other Requirements
• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a
baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet minimum language proficiency score requirement in order to be considered for graduate admission.

- **Statement of Purpose** addressing the following:
  - Describe your academic and professional journey. Discuss your background personal and professional experiences, and your current educational context. Be sure to explain your motivation for pursuing this program at this point in your career.
  - In order to advise you on initial coursework, please describe any prior formal or informal training you have completed in computing, computer science, and information technology. This includes, but is not limited to programming/coding, web design, systems administration, computing networking, databases, and computer applications.
  - Discuss your post-master’s degree plans. How will the MS in computer science education contribute to your future endeavors related to P-12 students, educators, administrators or other community stakeholders.

- **Resume**: Professional resume or curriculum vitae
- **Copy of your current teacher certification (if applicable)**
- **International students who do not intend to teach in the United States may be eligible for admission.**

### Computer Science Education Certificate

**Department of Computer Science, College of Information Science & Technology; Department of Teacher Education, College of Education, Health, and Human Sciences**

#### Vision Statement

This graduate certificate is intended for educators seeking to extend their knowledge and skills in the teaching computational thinking, computer science, and information technology. In completing program coursework, certified Nebraska teachers will also meet requirements for the IT supplemental endorsement. Teachers from other states should consult with their corresponding state officials to consider local credentialing applicability. Prior background in computer science is not required.

**Program Website** (http://www.unomaha.edu/college-of-information-science-and-technology/computer-science-education/graduate/csed-cert.php)

**Other Program Related Information**

Students who hold current Nebraska teaching certificates are eligible for the IT supplemental endorsement upon completing all required courses except CSCI 8010. Those who seek to earn only the IT supplemental endorsement should apply for this graduate certificate program.
Grades of ‘C’ or lower cannot be used when applying for the State of Nebraska IT supplemental endorsement.

All students must apply for completion of the graduate certificate through MavLINK. Please see the Academic Calendar for deadlines on applying.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

• Fall: July 1
• Spring: December 1
• Summer: April 1

Total Credits 18

Completion of the Certificate
During what is expected to be the semester the certificate is completed and prior to the posted deadline, students should apply for the certificate through MavLINK on or before the deadline. Information can be found here (http://www.ses.unomaha.edu/registrar/graduate.php). If you complete the application form and do not complete all of the requirements for the certificate, contact the Office of Graduate Studies as soon as possible. You must reapply during the next semester in which you expect to complete the certificate; no additional fee is charged to reactivate your application.

The following requirements are due 12 working days prior to commencement:
• “Incomplete” and “NR” grades from previous terms must be removed so that the grade will be in the Office of Graduate Studies.
• All fees, fines, and other obligations due the university must be settled.

For students currently enrolled in courses that are a part of their plan of study, enrollment must be maintained in order to complete the certificate. A grade for any current enrollment must be received by the Registrar’s Office no later than the close of business on the fifteenth working day following the end of a semester.

Awarding of Graduate Certificates
The Office of Graduate Studies will mail the certificate to students when all requirements are completed and all obligations to the university are satisfied. The Graduate College will not approve any changes in the student’s permanent record once the certificate is awarded.

Counseling, MS
Department of Counseling, College of Education, Health, and Human Sciences

Vision Statement
The purpose of the Department of Counseling is to prepare a diverse student population at the master’s degree level for professional service as school counselors, clinical mental health counselors, student affairs professionals, and/or for advanced study. Graduates of the program are prepared to function professionally within their area(s) of concentration.

As dedicated practitioners, reflective scholars, and responsible citizens, our graduates are prepared to fill the need for highly trained professionals. Graduates are trained to support the broad range of counseling needs of the metropolitan community including: individual, couples, family and group counseling.

Program Contact Information
Christine (Tina) Chasek, PhD, Graduate Program Chair (GPC)
107 Roskens Hall (RH)
402.554.3559
christinechasek@unomaha.edu

Program Website (http://www.unomaha.edu/college-of-education/counseling/)

Other Program Related Information
• Earning a graduate degree in clinical mental health counseling or school counseling satisfies only the academic requirements for licensure and/or certification in the state of Nebraska. Students should consult the appropriate state agency/department for guidance on gaining state licensure and/or certification.
• Students should be aware that licensure and/or certification requirements often vary by state. Students interested in gaining
professional licensure and/or certification outside of Nebraska should consult their intended state’s licensing/certification office/department for appropriate guidelines and timelines.

- An alternative counseling endorsement is available for students in the school counseling concentration who do not hold degrees in education. This endorsement eliminates the two-year teaching requirement and includes an additional 12 credit hours. Students choosing the alternative endorsement route will complete a 60 credit school counseling curriculum instead of the 48 credit school counseling curriculum.
- Successful completion of all courses and a comprehensive exam in the student’s respective concentration are requirements for graduation.
- Graduates are recommended only for positions consistent with the concentration they completed.
- Professional background checks are required for all students following admission to the program and again prior to beginning their practicum experience.
- Candidates are admitted and permitted to continue programs in counseling on the basis of their potential for successful training and professional practice. Candidates are evaluated on an ongoing basis while enrolled with respect to their suitability for continuation in the program prior to taking the counseling practicum or internship courses. Specific course and grade requirements to take practicum courses are available in the Department of Counseling.
- The P-12 school counseling and clinical mental health counseling concentrations are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP; 2009), the national accrediting agency for counselor education programs.

Unclassified Students

Students who have already earned a master’s degree in counseling and need to enroll in additional courses for licensure should apply as unclassified students. Unclassified students are allowed to take courses for which they meet the prerequisite. Successful completion of graduate courses as an unclassified student does not obligate the department to accept those courses for credit toward the fulfillment of degree requirements. Formal advisement in an endorsement area is required.

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

- **Clinical Mental Health Counseling, P-12 Counseling and Unclassified**
  - Fall: February 15
  - Spring: September 15
  - Summer: February 15
- **Student Affairs Practice in Higher Education**
  - Applications for this concentration are accepted on a rolling basis. All materials must be submitted prior to the semester in which the applicant has elected to begin coursework.

Other Requirements

- Bachelor’s degree
- Three credit hours of behavioral science coursework is suggested.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, ([https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf](https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf)) must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** 2 pages (double-spaced) addressing the following:
  - Reason(s) for pursuing the counseling profession,
  - Relevant experience,
  - Personal career goals,
  - Reason(s) for choosing UNO’s Counseling program.
- **Resume or curriculum vitae**
- **Letters of Recommendation:**
  - Clinical Mental Health Counseling, P-12 Counseling and Unclassified require two letters of recommendation and should be from persons who can speak to the applicant’s professional competence and/or academic ability.
  - Student Affairs Practice in Higher Education concentration requires no letters of recommendation.
- **Group admissions interview (required for admission).**

**Ethical Conduct**: It should be understood that academic performance is not the only criterion for continuation in the program or for graduation. Candidates are expected to maintain the highest standards of ethical conduct pertaining to academic course work, professional practice, and research activity. Any breach in ethical conduct shall be subject to disciplinary action, regardless of the candidate's prior or current academic performance. See the "American Counseling Association Code of Ethics" for specific guidelines.

- **COUN 8740**: SCHOOL COUNSELING GROUPS

**Total Credits**: 48

**Prerequisite(s)**: Undergraduate Degree. Department permit required for non-degree seeking students (based on availability)
COUN 8030 COUNSELING PRACTICES (3 credits)
The major purpose of Counseling 8030 is to assist students in skill development as noted in Ivey's Intentional Interviewing and Counseling Model. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism. Candidates will continue to develop counseling skills through additional coursework leading to practicum and internship experiences.
Prerequisite(s): Open only to students admitted to the UNO Counseling Program; Department permission is required for students with non-degree status; and is based on availability.

COUN 8040 ETHICAL ISSUES FOR PROFESSIONAL COUNSELORS (3 credits)
This course examines the ethical, professional, and legal aspects of individual, couple and family counseling including liabilities incurred by the professional. The course addresses the appropriate ethical guidelines as stated by the American Counseling Association (ACA) code of ethics in a participatory format.
Prerequisite(s): Open only to students admitted to the UNO Counseling Program; Department permission is required for students with non-degree status; and is based on availability.

COUN 8050 INTRODUCTION TO PROFESSIONAL SCHOOL COUNSELING (1 credit)
This is an exploratory course for candidates considering entering the field of professional school counseling. This introductory course is required for candidates majoring in counseling, with a concentration in school counseling. Selected issues underlying the school counseling profession are studied.
Prerequisite(s): Admission to the Graduate College and/or the Counseling Department.

COUN 8100 RESEARCH PROJECT IN COUNSELING (1-3 credits)
Individual or group study and analysis of specific problems/issues in the field.
Prerequisite(s): Admission to Counseling program and permission of instructor. Not open to non-degree students.

COUN 8110 HUMAN DEVELOPMENT AND PSYCHO-SOCIAL INTERVENTION STRATEGIES (3 credits)
This course is designed to examine theories of human development covering the lifespan of the individual and the psychosocial interventions appropriate to various phases of the lifespan. The course will emphasize human development as an interactive process involving individuals in a number of contexts; hence human diversity factors (racial ethnic groups, gender, sexual orientation) also will be considered.
Prerequisite(s): Open only to students admitted to the UNO Counseling Program; Department permission is required for students with non-degree status; and is based on availability.

COUN 8150 STUDENT AND STUDENT PERSONNEL WORK IN HIGHER EDUCATION (3 credits)
An overview of the characteristics of college students and their interaction with campus environmental influences. The impact of student personnel work is considered as it affects personality growth, social development and career planning by college students.
Prerequisite(s): Admission to Counseling program. Not open to non-degree graduate students.

COUN 8200 COUNSELING THEORIES (3 credits)
This course is designed to examine counseling theories and the historical and geographic influence on counseling theory development.
Prerequisite(s): Open only to students admitted to the UNO Counseling Program. Not open to non-degree graduate students.

COUN 8210 ORGANIZATION & ADMINISTRATION OF SCHOOL COUNSELING PROGRAMS (3 credits)
The course introduces graduate candidates to an administrative systems approach to organizing comprehensive and developmental school counseling programs for all k-12 students. The American School Counselor Association’s (ASCA) National Model for School Counseling Programs provides the foundation for content. Topics include, but are not limited to, school counseling programs: Foundation, Delivery System, Management System, and Accountability domains. Special focus is also placed on developing educational leadership skills, advocacy for k-12 students, and bringing about positive systemic change. Teaching counselor candidates to effectively manage school counseling programs is an important part of our effort to prepare educational leaders.
Prerequisite(s): Admission to UNO Counseling Dept. Not open to non-degree graduate students.

COUN 8220 COUNSELING PRACTICUM (3 credits)
This course is the first of the clinical application courses of counseling knowledge, techniques, and specialty areas in clinical mental health settings. Candidates practice, develop and improve counseling skills in an environment of professional constructive criticism.
Prerequisite(s): Pre-Reqs: COUN 8010, COUN 8030, COUN 8040, COUN 8200, COUN 8280, COUN 8400, COUN 8516, COUN 8520,
COUN 8920 Co-Req: COUN 8360, COUN 8610, COUN 8800 Registration Reqs: Attend Practicum Orientation; Dept Consent. Not open to non-degree graduate students.

COUN 8230 APPRAISAL TECHNIQUES IN COUNSELING (3 credits)
Appraisal Techniques in Counseling includes the history of individual appraisal, the major technical considerations governing assessments, and a survey of measurement devices in the cognitive and affective domains. The course will include uses and implications of standardized and non-standardized assessment devices. Additionally, this course will cover the responsible use and interpretation of ability, aptitude, interest, personality, and career development assessment tools. Whenever it is applicable, a strengths-based, positive psychology approach will be integrated and utilized throughout this course.
Prerequisite(s): Admission to UNO Counseling Department as degree seeking student; Department permission for non-counseling/degree seeking student in UNO allied mental health discipline only (based on availability)

COUN 8250 INTERNSHIP: CLINICAL MENTAL HEALTH COUNSELING (3 credits)
This course is the first of the clinical application courses of counseling knowledge, techniques, and specialty areas in clinical mental health settings. Candidates practice, develop and improve counseling skills in an environment of professional constructive criticism. This course is required for all graduate students in counseling who meet the prerequisites.
Prerequisite(s): COUN 8220 with grade of B or better; Department Permission. Not open to non-degree graduate students.

COUN 8260 ADVANCED INTERNSHIP: CLINICAL MENTAL HEALTH COUNSELING (3 credits)
Field experience in an approved agency program under the supervision of a licensed counselor and university instructor.
Prerequisite(s): Completion of COUN 8250 with grade of B or higher. Not open to non-degree graduate students.

COUN 8270 GROUP TECHNIQUES (1 credit)
This course is intended to prepare students to effectively incorporate group principles appropriate to various counseling settings including schools, treatment centers, and agencies. This class includes a group experience.
Prerequisite(s): Admission to graduate program in Counseling or permission of instructor. Not open to non-degree graduate students.
COUN 8280 TRAUMA, CRISIS, AND GRIEF COUNSELING (3 credits)
This course will present approaches to trauma, crisis intervention, and grief counseling which include definitions and characteristics of trauma and crisis, a brief history of trauma and crisis intervention and associated theories/models and a practice of skills for intervention and crisis case management. Topics will include applied therapeutic counseling strategies in general casework and in crisis intervention cases, in particular, which describe actual techniques to alleviate the crisis and trauma. Grief topics will also be explored including counseling theory, techniques and interventions.

Prerequisite(s): Admission to UNO Counseling as degree seeking student; COUN 8030, COUN 8200, COUN 8040; Dept permission/graduate status as degree seeking student in allied mental/behavioral health (based on availability). Not open to non-degree graduate students.

COUN 8306 COUNSELING TECHNIQUES I (1 credit)
This course will present the counseling process, knowledge of beginning skills development and application of techniques related to a specific approach. Topics may include Adlerian counseling (specified in this syllabus), anger management, play therapy, solution focused, cognition, and other topics as needed. (Cross-listed with COUN 4310)

Prerequisite(s): Admission to Counseling program; must take prior to practicum.

COUN 8316 COUNSELING TECHNIQUES II (1 credit)
This course will present the counseling process, knowledge of beginning skills development and application of techniques related to a specific approach. Topics may include Rational Emotional Behavior Therapy (REBT) (specified in the syllabus), anger management, play therapy, solution focused, cognition, and other topics as needed. (Cross-listed with COUN 4310)

Prerequisite(s): Admission to Counseling program; must take prior to practicum. Not open to non-degree students.

COUN 8330 PRACTICUM FOR SCHOOL COUNSELORS (3 credits)
This course is the first of the clinical applications to provide the prospective school counselor with supervision in a school counseling setting. Candidates will continue to develop counseling skills and will become immersed in the work of a professional school counselor. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism.

Prerequisite(s): Instructor Consent; COUN 8030; COUN 8040; COUN 8200; COUN 8210; COUN 8280; COUN 8630; COUN 8650; COUN 8670; COUN 8700; COUN 8740; Grade of B or better in COUN 8030 and COUN 8040. Not open to non-degree graduate students.

COUN 8360 GROUP THEORY & TECHNIQUES (3 credits)
This course is intended to prepare students to effectively incorporate group principles appropriate to various counseling settings including schools, clinical mental health treatment facilities, and agencies. This class includes a group experience.

Prerequisite(s): Admission as degree seeking student in UNO Counseling Dept; Pre-Reqs: COUN 8030, COUN 8040; Completion of Group Experience and Department permission. Not open to non-degree graduate students.

COUN 8400 ADVANCED THEORY AND TECHNIQUES IN COUNSELING (3 credits)
This course introduces students to the basic knowledge and skills necessary to understand and apply counseling techniques related to differential approaches to treatment. Topics may include Solution-Focused, Adlerian, Cognitive-Behaviorial (CBT), Dialectical Behavioral (DBT), Motivational Interviewing, and other techniques as deemed to be relevant/appropriate.

Prerequisite(s): Admission to UNO Counseling program; Pre-Reqs: COUN 8030; COUN 8200

COUN 8406 COUNSELING TECHNIQUES III (1 credit)
This course will assist candidates in developing more systematic integration of previously learned information and skills and the application to specific counseling situations related to various approaches. Topics may include Solution Focused Counseling - SFC (specified in the syllabus), Dialectical Behavioral Therapy, anger management, art therapy, play therapy, solution focused, cognition, and other topics as needed. (Cross-listed with COUN 4400)

Prerequisite(s): Admission to Counseling program. Not open to non-degree graduate students.

COUN 8430 INTERNSHIP IN SCHOOL COUNSELING (3 credits)
This course is the second of the clinical applications to provide the prospective school counselor with supervision in a school counseling setting. Candidates will continue to develop counseling skills and will become immersed in the work of a professional school counselor. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism.

Prerequisite(s): Pre-req: COUN 8330. Not open to non-degree graduate students.

COUN 8440 TRAUMA INFORMED EDUCATION (3 credits)
This course will present approaches to create trauma-informed classrooms which includes definitions and characteristics of trauma and how it impacts children, a brief history of trauma and associated theories/models, and a practice of skills for intervention in the classroom to support students and their families. Topics include applied teaching strategies which describe research-based techniques to support students with a history of trauma, as well as strategies to recognize signs of secondary trauma and burnout, followed by ways to mitigate them using research-based self-care techniques. (Cross-listed with TED 8290)

COUN 8450 COLLEGE STUDENT PERSONNEL INTERNSHIP (1-3 credits)
This course is designed to provide practical work experience under supervision in various areas within student personnel services.

Prerequisite(s): COUN 8030, COUN 8040, COUN 8060, COUN 8150, COUN 8360, COUN 8520. Not open to non-degree graduate students.

COUN 8460 ADVANCED INTERNSHIP IN SCHOOL COUNSELING (3-6 credits)
This course is the third of the clinical applications to provide the prospective school counselor with supervision in a school counseling setting. Candidates will continue to develop counseling skills and will become immersed in the work of a professional school counselor. Candidates practice, develop and improve counseling skills in an environment of professional and constructive criticism.

Prerequisite(s): COUN 8330. Not open to non-degree graduate students.

COUN 8500 CONSULTATION IN PROFESSIONAL COUNSELING (2 credits)
Instruction in this course is founded upon commitment to the beliefs that individuals are valuable, responsible and capable, and that all human service professionals should work to create the conditions in which people value themselves as human beings and behave accordingly. As reflective decision-makers, such professionals value human potential and purposefully design policies, processes and programs that facilitate the realization of that potential. The counselor learns that consultation and collaboration are first and foremost helping relationships that have as their foundation the dignity and respect of individuals/groups involved. Consultation and collaboration are characterized as problem-solving processes that involve a variety of key decision points. A generic model is provided for students as a "cognitive map" upon which they can reflect when attempting to determine effective practice.

Prerequisite(s): Admission to the Counseling Program. Not open to non-degree graduate students.
COUN 8516 TREATMENT ISSUES IN CHEMICAL DEPENDENCY (3 credits)
This course addresses chemical dependency treatment issues including denial, minimization, relapse and its prevention, resistance, family dynamics, poly-substance abuse, co-occurring disorders, spirituality and the influence of self-help groups. The education will include the clinical treatment needs of individuals suffering from chemical dependency, taking into consideration diversity, gender, culture and lifestyle. (Cross-listed with COUN 4510, SOWK 4510, SOWK 8516).
Prerequisite(s): Admission to counseling program or social work programs or permission of instructor. Not open to non-degree graduate students.

COUN 8520 COUNSELING MULTICULTURAL AND DIVERSE POPULATIONS (3 credits)
This course will make candidates more aware of the societal context in which counseling takes place and to help prepare candidates for work with persons who are members of populations which require special knowledge and skills of the counselor. Certain special populations will be considered in comparative detail as well as a general information which will emphasize acquiring broader understandings transferable to counseling with any special population.
Prerequisite(s): Not open to non-degree graduate students.

COUN 8610 INTRODUCTION TO MARITAL AND FAMILY THERAPY (3 credits)
This course is the first of the clinical mental health applications to provide the prospective mental health counselor with instruction in marital and family therapy. Students will continue to develop counseling skills and will become immersed in the work of a professional counselor. Students practice, develop and improve marital and family counseling skills in an environment of professional and constructive peer feedback.
Prerequisite(s): Admission to UNO Counseling program; COUN 8030, COUN 8200, COUN 8040. Not open to non-degree graduate students.

COUN 8620 SURVEY OF ISSUES IN SCHOOL COUNSELING (2 credits)
This course is designed to provide school counselors with information on topics that are current and relevant to secondary school settings. It will allow candidates and practicing counselors the opportunity to study and evaluate what activities school counselors are currently engaged in and consideration of strategies to deal with students and families.
Prerequisite(s): Admission to counseling program. Not open to non-degree graduate students.

COUN 8630 FOUNDATIONS AND ISSUES IN SCHOOL COUNSELING (3 credits)
This course is designed to introduce the history, current ASCA (American School Counselor Association) model, and the role of a professional school counselor; and to provide information on and practice with topics that are current and relevant to secondary, middle, and elementary school settings.
Prerequisite(s): Admission to UNO Counseling Dept. Not open to non-degree graduate students.

COUN 8650 ISSUES IN ELEMENTARY AND MIDDLE SCHOOL COUNSELING (3 credits)
This course is intended to prepare students to effectively implement an elementary and/or middle school counseling program. School counselors in training will develop awareness and skill sets through an overview of the unique issues, approaches, systems, and practice of elementary and middle school counseling.
Prerequisite(s): Admission to UNO Counseling Department. Not open to non-degree graduate students.

COUN 8656 TRANSITION PLANNING (3 credits)
Curriculum oriented for teachers and related professionals to work with the career development and transition of individuals with disabilities within a multicultural and global society. Includes information for elementary through adulthood with emphasis on transition from high school to community living.
Prerequisite(s): EDUC 2510 or SPED 1500. Not open to non-degree graduate students.

COUN 8670 CAREER DEVELOPMENT POST-SECONDARY TRANSITIONS (3 credits)
This course is an introduction to career counseling and career development and post-secondary planning in P-12 schools. This course is required for all graduate students seeking a masters degree in counseling with a concentration in school counseling.
Prerequisite(s): Admission to UNO Counseling Dept

COUN 8686 MEDICAL AND PSYCHOSOCIAL ASPECTS OF SUBSTANCE USE DISORDERS (3 credits)
This course introduces students to substance use disorders and their impact on the individual, family, and society. It covers psychopharmacology, alcohol and drug interactions, drug classifications, theories of substance use disorders, various models of treatment, vulnerable populations, and ethical and legal issues. (Cross-listed with SOWK 4680, SOWK 8686, COUN 4680).
Prerequisite(s): Admission to counseling program or social work program or permission of instructor.

COUN 8696 ASSESSMENT AND CASE MANAGEMENT IN SUBSTANCE USE DISORDERS (3 credits)
This course focuses on assessment of clients and their environment, and diagnosis and referral for substance use disorder treatment. Emphasis is given to assessment instruments, treatment levels, treatment planning, case management, and social justice. (Cross-listed with COUN 4690, SOWK 4690, SOWK 8696).
Prerequisite(s): Admission to counseling program or social work program or permission of instructor.

COUN 8700 CHILD AND ADOLESCENT COUNSELING (3 credits)
This course is an introduction to counseling children and adolescents and will examine the theories, techniques, professional settings, cultural, and ethical/lega issues associated with counseling children and adolescents in a diverse society. Although diagnosis of mental disorders will be discussed, the course is designed to build competencies in counseling children and adolescents, with specific attention to social, developmental, and behavioral issues across professional settings.
Prerequisite(s): Admission to UNO Counseling Department; COUN 8030 or Department Permission. Not open to non-degree graduate students.

COUN 8740 SCHOOL COUNSELING GROUPS (3 credits)
This course is designed to provide the school counselor candidate with a focused study of small group counseling and enrichment programs in schools.
Prerequisite(s): Instructor Consent; Documented completion of group experience. Not open to non-degree graduate students.

COUN 8750 SCHOOL COUNSELING GROUPS & ENRICHMENT PROGRAMS (2 credits)
This course is intended to prepare students to effectively incorporate small group design, implementation, and assessment as part of a school counseling program. Candidates will develop small group counseling skills and strategies for enrichment program development and delivery.
Prerequisite(s): Counseling Major. COUN 8030 and COUN 8270 and COUN 8406 or permission. Not open to non-degree graduate students.
COUN 8756 MID-LIFE, CAREER CHANGE, PRERETIREMENT PLANNING (3 credits)
This course is designed to involve candidates in the exploration of the developmental tasks of mid-life, myths and realities related to career change as well as the implication of preretirement planning. Factual information, as well as model examination and evaluation are presented to aid the candidate in becoming better equipped to understand some of the forces which affect the well-being of middle aged persons as they prepare for the later years. (Cross-listed with GERO 4750 and GERO 8756)
Prerequisite(s): Not open to non-degree graduate students.

COUN 8800 CLINICAL MENTAL HEALTH COUNSELING (3 credits)
This course is an introduction to the specialization of clinical mental health counseling. The course content examines the historical, philosophical, educational, ethical, and psychological concepts and foundations of clinical mental health counseling. Additionally, the course will explore key public and private professional settings and programs within the clinical mental health paradigm, professional advocacy and leadership, and the personal and professional skills and traits expected of professional counselors.
Prerequisite(s): Not open to non-degree graduate students.

COUN 8810 LAW AND ETHICS IN HIGHER EDUCATION AND STUDENT AFFAIRS (3 credits)
This introductory course is designed to ground future student affairs practitioners in the guiding ethical and legal standards and principles of higher education administrators and student affairs professionals. The course will examine ethical and legal principles through evidence-based readings, discussion/lecture, case studies, exams, and projects. The course will also challenge students to examine their personal values and beliefs and their potential influence on future decision making responses as a student affairs professional.
Prerequisite(s): Admission to the UNO Counseling Department or department permission.

COUN 8820 CRISIS AND EMERGENCY MANAGEMENT IN HIGHER EDUCATION (3 credits)
This course is designed to provide future student affairs professionals with an understanding of the role of higher education institutions respond and adapt to crises that affect institutional well-being and the well-being of faculty, staff, students, community, alumni. Specific focus will be given to examining the specific role of the student affairs professional in the design, implementation, and assessment of crisis and emergency management policy and procedures.
Prerequisite(s): Admission to the UNO Counseling Department and/or department permission

COUN 8830 CURRENT ISSUES IN HIGHER EDUCATION AND STUDENT AFFAIRS (3 credits)
This course involves a detailed exploration of current events and issues related to Student Affairs and Higher Education. The higher education ecological environment will be explored and issues pertaining to students will be investigated within the context of the current higher educational landscape. Finally, the college campus’s social, political, and physical landscapes will be discussed and current events facing student affairs and higher education professionals will be examined in order to provide students with information on conflicting perspectives related to relevant issues across academia and higher education as a whole.
Prerequisite(s): Admission to the UNO Counseling Department and/or department permission

COUN 8850 THE COLLEGE STUDENT EXPERIENCE (3 credits)
This course will examine the personal, academic, and psychosocial, and institutional variables common to the experience of students in public and private institutions of higher education in the United States.
Prerequisite(s): Full admission to the UNO Counseling Department and/or permission from the Counseling Department Chair.

COUN 8920 TREATMENT PLANNING AND THE DSM (3 credits)
This course is designed to orient students to the stages of treatment planning and use of the DSM-5 as a part of the treatment process in mental health settings. The course will examine the stages of treatment planning and offer opportunities to integrate counseling theories into practice. Factors such as psychopathology/pharmacology, ethics, and human diversity will be considered.
Prerequisite(s): Not open to non-degree graduate students.

COUN 8930 HISTORY OF HIGHER EDUCATION AND STUDENT AFFAIRS (3 credits)
This course will examine a range of topics relevant to understanding and working in higher education institutions. Specific topics will include the purpose of higher education, accessibility and student diversity issues, financial and legal factors, extracurricular activities, and issues related to faculty and staff experiences.
Prerequisite(s): Full admission to the UNO graduate program in Student Affairs in Higher Education or permission from Counseling Department Chair

COUN 8940 DIVERSITY AND WELLNESS ISSUES IN HIGHER EDUCATION (3 credits)
This course is an exploration of holistic wellness and of power, privilege, social identities, social justice theories and multicultural issues and practices within the context of higher education. We begin by offering foundational definitions of terminology used throughout the course and delve into understanding systems of oppression, privilege, power, and activism through a holistic wellness lens. We then explore and discuss specific social identities, returning again to think about identity through a social justice lens.
Prerequisite(s): Full admission to the UNO Counseling Department and/or permission from the Counseling Department Chair. Not open to non-degree graduate students.

COUN 8950 ORGANIZATION, ADMINISTRATION, AND LEADERSHIP IN HIGHER EDUCATION (3 credits)
This course will provide an analysis of leadership, management, and organizational theory and practice in US higher education with particular emphasis on student affairs/student development. An examination of current practices of management will include human, fiscal, and physical resource management. This course is required for all students who are seeking a master’s degree (M.S.) in Student Affairs in Higher Education.
Prerequisite(s): Full admission to the UNO Counseling Department and/or permission from the Counseling Department Chair.

COUN 8980 DIGITAL LEARNING: POLICY, PROGRAMMING, & SYSTEMS (3 credits)
This course is an exploration of digital learning organizational structures within the context of higher education. We begin by offering foundational definitions of terminology used throughout the course and delve into understanding how digital learning fits within the broader context of college and university operations. We then explore and discuss strategies for understanding relevant policies, technology systems and wrap-around support services to ultimately engage and retain digital learners in pursuit of post-secondary education.
Prerequisite(s): Admission to UNO Department of Counseling and/or department permission.

COUN 8986 COUNSELING SKILLS IN GERONTOLOGY (3 credits)
This course is intended to help develop basic counseling skills for application in gerontology. (Cross-listed with GERO 4980, GERO 8986).
Prerequisite(s): Not open to non-degree graduate students.

COUN 8990 THESIS (1-6 credits)
To develop the candidate's ability to carry out accepted procedures associated with the research process.
Prerequisite(s): Approval of the Thesis Review Committee and permission of student's thesis chairperson. Not open to non-degree graduate students.
Criminology and Criminal Justice

Degree Programs Offered

- Criminology and Criminal Justice, MA (p. 1140)
- Criminology and Criminal Justice, MS (p. 1141)
- Criminology and Criminal Justice, PhD (p. 1143)
- Master of Social Work, MSW-Criminology and Criminal Justice, MS (MSW/CRCJ) (p. 1145)

Certificates Offered

- Managing Juvenile and Adult Populations Certificate (p. 1147)

**CRCJ 8010 NATURE OF CRIME (3 credits)**
This course provides an overview of the major dimensions of crime in the U.S. Content areas included are the epidemiology of crime, the costs of crime and typologies of crime and criminals.

**Prerequisite(s):** Admission to UNO Graduate College.

**CRCJ 8020 SEMINAR IN ADMINISTRATION OF JUSTICE (3 credits)**
This course is designed to provide students with a critical understanding of responses to crime. Particular emphasis is placed on theory and research bearing upon the effectiveness of the policies and strategies of the principal institutions of the criminal justice system - the police, courts and corrections. Additionally, philosophical and practical matters pertaining to “justice” and “fairness” in the administration of the criminal law are explored.

**Prerequisite(s):** Admission to UNO Graduate College.

**CRCJ 8030 CRIMINAL JUSTICE RESEARCH THEORY AND METHODOLOGY (3 credits)**
Research theory and methodology in the social sciences as applicable to criminal justice; preparation of research designs, conceptual models; sampling procedures; and development of individual research papers.

**Prerequisite(s):** Admission to UNO Graduate College.

**CRCJ 8040 SEMINAR IN POLICE AND SOCIETY (3 credits)**
This course is designed to explore the role of the police in American society. Attention is given to the origins of policing, the nature of police organizations and police work, and patterns of relations between the police and the public. The values of a democratic society as they affect the law enforcement role are discussed.

**Prerequisite(s):** Admission to the graduate program in Criminal and Criminal Justice; or admission to the UNO graduate program and permission of instructor.

**CRCJ 8050 SEMINAR IN CORRECTIONS (3 credits)**
This course is designed to give an analytical perspective to the history, development, implementation and future of critical issues in the field of corrections. Primary focus will be directed toward an exploration of the various theoretical approaches to corrections and the research intended to support or refute these perspectives.

**Prerequisite(s):** Admission to the graduate program in Criminal and Criminal Justice; or admission to UNO graduate program and permission of instructor.

**CRCJ 8060 SEMINAR IN THE CRIMINAL COURT SYSTEM (3 credits)**
This course is designed to provide a social science perspective on the role of the courts in the criminal justice system. The ideals of the system will be compared with actual functioning, and court reform programs and proposals will be critically examined.

**Prerequisite(s):** Admission to Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

**CRCJ 8070 SEMINAR IN CRIMINAL LAW AND PROCEDURE (3 credits)**
This course is designed to examine substantive criminal law as the basis of social control in our country. Contemporary issues such as the insanity defense, decriminalization of so-called victimless crimes, sexual assault and abortion, and current proposals to assist victims of crimes will be among the topics explored. In addition, current criminal procedure problems relating to right to counsel, search and seizure and interrogation will be examined.

**Prerequisite(s):** Admission to graduate program in Criminal and Criminal Justice; or admission to UNO graduate program and permission of instructor.

**CRCJ 8080 SEMINAR IN JUVENILE JUSTICE (3 credits)**
An inquiry in the social ramifications of the entire juvenile delinquency process including labeling, detention, incarceration and tolerance. Pre- and post-adjudicatory issues are dealt with as well as a realistic perspective given to delinquency prevention strategies.

**Prerequisite(s):** Admission to UNO graduate program.

**CRCJ 8090 SEMINAR IN THEORETICAL CRIMINOLOGY (3 credits)**
A study of the etiology of crime as a social phenomenon and an objective analysis of the historical influences and thought which molded its development into an accepted contemporary science.

**Prerequisite(s):** Admission to graduate program in criminology and criminal justice; or admission to UNO graduate program and instructor permission.

**CRCJ 8100 CRIMINAL JUSTICE ORGANIZATION, ADMINISTRATION AND MANAGEMENT (3 credits)**
This course will deal with issues in the organization and administration of modern justice agencies. The students will be exposed to theories, concepts, and issues relating to the administration and organization of justice agencies.

**Prerequisite(s):** Admission to the graduate program in Criminal and Criminal Justice; or admission to UNO graduate program and permission of instructor.

**CRCJ 8110 VICTIMOLOGY (3 credits)**
The Victimology seminar provides an overview of key research areas on prevalence, predictors, and consequences of various forms of victimization. By the end of the course, students will develop a critical understanding and appreciation of the development and current state of theories of victimology, measurement of different types of victimization, and quantitative and qualitative results that have been used to inform research in the field. Furthermore, students will learn how to critically analyze and interpret primary research regarding victimization.

**Prerequisite(s):** Admission to UNO graduate program.

**CRCJ 8120 RACE, CRIME AND INJUSTICE (3 credits)**
This course examines inequities in the context of the cumulative effects of biases in the criminal justice system. Students learn how macro-structural conditions, community violence, depletion of male role models as the result of incarceration, and adversarial contacts with police can negatively impact young children residing in some lower socio-economic communities of color as well as increase their likelihood of early contact with the juvenile justice system.

**Prerequisite(s):** Admission to Criminal Justice graduate program; or admission to UNO graduate program and permission of the instructor.

**CRCJ 8130 SEMINAR IN WOMEN AND CRIMINAL JUSTICE (3 credits)**
This course focuses on the experiences of women in the criminal justice system. It will cover the history of criminological theory on women, application of mainstream criminological theory to women, and women as offenders, victims, and professionals in the criminal justice system.

**Prerequisite(s):** Admission to Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.
**CRCJ 8136 SOCIOLOGY OF DEVIANT BEHAVIOR (3 credits)**
This course is designed to investigate the etiology of many forms of norm-violating conduct. Emphasis will be placed on rule-breaking behavior as defined in the criminal statutes. (Cross-listed with CRCJ 4130).
**Prerequisite(s):** Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

**CRCJ 8180 CRIMINAL JUSTICE INTERNSHIP (3 credits)**
This course is designed to provide supervised individualized learning experiences in a selected criminal justice agency. The principal objective of the internship is to provide students with the opportunity to apply theoretical and methodological principles acquired in graduate courses to the analysis of problems in local criminal justice agencies.
**Prerequisite(s):** Admission to graduate program in Criminology and Criminal Justice, successful completion of 15 hours of graduate work, and permission of instructor. Not open to non-degree graduate students.

**CRCJ 8190 INDEPENDENT STUDY (1-3 credits)**
Individual projects in research, literature review or creative production which may or may not be an extension of course work. The work will be supervised and evaluated by departmental graduate faculty members.
**Prerequisite(s):** Admission to graduate program at UNO, and permission of instructor.

**CRCJ 8210 PROGRAM EVALUATION AND POLICY ANALYSIS (3 credits)**
This course is a survey of program evaluation and policy analysis techniques. The focus is on theoretical foundations of the Criminal Justice policy process, program development and implementation, research designs specific to program evaluation and policy research, and methodological techniques commonly used to evaluate criminal justice programs and policies.
**Prerequisite(s):** Admission to doctoral program in Criminology and Criminal Justice; or admission to graduate program at UNO and CRCJ 8030; or instructor permission.

**CRCJ 8230 TERRORISM (3 credits)**
A course devoted to an exploration and analysis of contemporary special problems in the broad spectrum of law enforcement and corrections.

**CRCJ 8300 COMMUNITIES AND CRIME (3 credits)**
This course is designed to provide an analytical perspective to the meaning of community, theories that explain community-level crime, and police decision-making at the community level. The primary focus will be directed toward an exploration of the various theoretical approaches to explaining community-level crime, with a special emphasis on police action. This course will enable students to become proficient in the topic of community-level theories of crime and determine whether communities perpetuate or prevent criminal behavior.
**Prerequisite(s):** Admission to a Criminology and Criminal Justice graduate degree program, or UNO SCCJ Graduate Program Coordinator permission. Not open to non-degree graduate students.

**CRCJ 8356 COMMUNITY-BASED CORRECTIONS (3 credits)**
This course is intended for advanced students with a special interest in the correctional process as applied in a community setting. It is designed to focus on innovative community-based strategies for dealing with the offender as well as the traditional processes of probation and parole.
**Prerequisite(s):** Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

**CRCJ 8400 INTIMATE PARTNER VIOLENCE (3 credits)**
This course examines the complex nature and dynamics of intimate partner violence (IPV). The course begins with a general presentation of IPV, such as definitions, characteristics, and the cycle of IPV. Then, theories of IPV are presented and various sources of IPV data and measurement issues are discussed. The majority of the course focuses on the historical development/evolution and current response of the criminal justice system to IPV including law enforcement response, the use of protection orders, domestic violence courts, and batterer intervention treatment programs. Additionally, the course examines "special topics" regarding IPV including teen dating violence, intimate partner homicide, and IPV within criminal careers.
**Prerequisite(s):** Admission to a UNO graduate degree program, or permission of the UNO School of Criminology and Criminal Justice Graduate Program Coordinator. Not open to non-degree graduate students.

**CRCJ 8430 HUMAN TRAFFICKING (3 credits)**
This course is designed to provide students with a systematic introduction to the study of human trafficking. Students will learn about the prevalence, predictors, and consequences of human trafficking. Additionally, students will develop a critical understanding and appreciation of the development and current state of theories, measurement, and quantitative and qualitative results that can be used to inform our understanding of the nature of these events, the victims who are harmed, the individuals who facilitate these crimes, and identification and response initiatives.
**Prerequisite(s):** Admission to a UNO graduate degree program, or UNO SCCJ Graduate Program Coordinator permission. Not open to non-degree graduate students.

**CRCJ 8516 VIOLENCE (3 credits)**
This course is a survey of the nature and extent of violence. The focus is on patterns of violence across social groups, the causes and correlates of violence and violent behavior, and programs/policies geared toward violence prevention and reduction. Also of interest is the relationship between theory and violence research.
**Prerequisite(s):** Upper-division CRCJ major; CRCJ minor; or CRCJ 1010 and jr/sr standing.

**CRCJ 8800 SPECIAL PROBLEMS IN CRIMINAL JUSTICE (3 credits)**
A course devoted to an exploration and analysis of contemporary special problems in the broad spectrum of criminal justice philosophy. This course looks at philosophical issues related to social control. The purpose of this course is to foster a deeper understanding of the reasons, justifications, and problems related to societal approaches to the control of its citizens.
**Prerequisite(s):** Admission to Criminology and Criminal Justice graduate program; or UNO graduate student and permission of instructor.

**CRCJ 8850 RISK/NEEDS ASSESSMENT INSTRUMENTS (3 credits)**
This course is designed to provide students with advanced knowledge and understanding in the area of risk/needs assessment tools used in the juvenile and adult justice system.
**Prerequisite(s):** Admission to graduate program in criminology and criminal justice; or, instructor permission.

**CRCJ 8850 STATISTICAL APPLICATIONS IN CRIMINAL JUSTICE & PUBLIC ADMIN (3 credits)**
This is a required course which provides a foundation for the use of statistical methods in criminal justice and public affairs research. It will review fundamentals of research, showing the interplay between the theory, the research, the statistical method, and the interpretation.
**Prerequisite(s):** Admission to UNO Graduate college.
CRCJ 8970 CAPSTONE PROJECT IN CRIMINOLOGY AND CRIMINAL JUSTICE (3 credits)
The Capstone Project offers each student the opportunity to demonstrate mastery of the theory and practice of Criminology and Criminal Justice by applying the knowledge and skills gained in the Master of Science program to a project of the student's choice. This involves completing a project report reflecting the cumulative knowledge gained from these experiences. This class is intended only for students who are completing their Master of Science degree in Criminology and Criminal Justice.
Prerequisite(s): Admission to Criminology and Criminal Justice MS program, and completion of a minimum of 24 credit hours; or permission of Masters Program Coordinator. Not open to non-degree graduate students.

CRCJ 8990 MASTERS THESIS (1-6 credits)
The thesis is required for all students in the MA program. It provides students with an opportunity to integrate theories, concepts, and aspects of the criminology and criminal justice literature with methods and techniques for conducting research, through the completion of an original research project. The thesis project should constitute original research and is conducted under the supervision of a Masters Thesis Committee.
Prerequisite(s): Admission to the MA program in Criminology and Criminal Justice; and, CRCJ 8010, CRCJ 8020, CRCJ 8030, CRCJ 8950 and 6 other 8000+ CRCJ courses. Not open to non-degree graduate students.

CRCJ 9010 SEMINAR ON LAW & SOCIAL CONTROL (3 credits)
This is a required course which will examine the relationships between the state, the law, and the citizen in a democratic society. It will also examine the relationship between social control, law and social change.
Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or UNO graduate student and permission of instructor.

CRCJ 9020 SEMINAR ON THEORIES OF CRIME (3 credits)
This is a required course which emphasizes conceptual and theoretical issues in contemporary criminological theory. It also provides students with a working knowledge of theory construction.
Prerequisite(s): Admission to Criminology and Criminal Justice MA or PhD graduate programs; or admission to UNO graduate program and instructor permission.

CRCJ 9030 SEMINAR ON RACE, ETHNICITY, AND CRIMINAL JUSTICE (3 credits)
This is a required course which introduces students to current empirical research and theory on racial minorities and the criminal justice system. It focuses on racial minorities as victims of crime, as offenders, and as criminal justice professionals.
Prerequisite(s): Admission to UNO graduate program.

CRCJ 9040 COMPARATIVE CRIMINOLOGY AND CRIMINAL JUSTICE SYSTEMS (3 credits)
This course provides a cross-national examination of the dynamics of criminality and the social response to crime. It also describes the extent and nature of crime in different countries.
Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and instructor permission.

CRCJ 9050 ACADEMIC WRITING (3 credits)
This course is designed to familiarize students with academic and professional writing with the goal of promoting the development of formal writing and organizational skills. Students will learn how to construct and organize scholarly papers to better prepare them for the comprehensive examination, the doctoral dissertation, the development of scholarly journal articles and monographs, and the development of funded project proposals.
Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and permission of instructor.

CRCJ 9080 ADVANCED STATISTICAL APPLICATIONS (3 credits)
This is a required course which will provide the student with fundamentals of modern statistical techniques used in criminal justice and public affairs research. (Cross-listed with PA 9080).
Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and CRCJ 8950 or PA 8950 and instructor permission.

CRCJ 9090 SPECIAL PROBLEMS IN RESEARCH METHODS (3 credits)
This course will explore specialized topics in research methodology. The course assumes that participants have a firm understanding of the basic principles of research methods and statistics.
Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9100 SPECIAL PROBLEMS IN STATISTICAL ANALYSIS (3 credits)
This course will explore advanced techniques of statistical analysis within the field of criminal justice. It assumes that participants have taken courses in basic descriptive and inferential statistics and advanced multivariate analysis of variance and regression.
Prerequisite(s): Admission to the graduate program in Criminology and Criminal Justice and CRCJ 9080; or admission to UNO graduate program, CRCJ 9080, and permission of the instructor.

CRCJ 9130 ADVANCED RESEARCH ON POLICING (3 credits)
This course will explore critical research issues in American policing. The focus of the course may vary and cover topics such as police discretion, police use of force, labor unions in law enforcement, gender differences in policing, and police organization management.
Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and permission of the instructor.

CRCJ 9150 SPECIAL TOPICS IN CRIMINAL JUSTICE RESEARCH (3 credits)
This course will focus on specialized topics in criminology & criminal justice research. The purpose of the course is to provide students with an opportunity to read and critique current research on topics such as the history of the criminal justice system, civilian review of the police, sentencing, or the application of the death penalty.
Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9160 SEMINAR IN COMMUNITY-BASED CORRECTIONS (3 credits)
This course will deal with strategies of correctional reform and with models and practices of community-based corrections. Recent innovations in community-based corrections will be examined to demonstrate how they fit into an overall correctional strategy.
Prerequisite(s): Admission to UNO graduate program.

CRCJ 9170 SEMINAR ON INSTITUTIONAL CORRECTIONS (3 credits)
This course will examine the role of correctional institutions in the criminal justice system. The student will be exposed to the historical, current, and projected role of these institutions.
Prerequisite(s): Admission to Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 9180 SEMINAR ON THE CRIMINAL COURT SYSTEM (3 credits)
This course will focus on the structure, organization, and operation of the state and federal court systems in the United States. The purpose of the course is to survey recent research on the dynamics of courthouse justice—charging, plea bargaining, bail decision making, jury decision making, and sentencing.
Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.
CRCJ 9200 SEMINAR ON VIOLENT CRIME AND CRIMINAL BEHAVIOR (3 credits)
This course exposes students to the leading theories and research in the area of violent criminal behavior. It addresses major violent crimes including rape, homicide, and child sexual physical abuse.
Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 9230 ADVANCED CRIMINOLOGICAL THEORY AND THEORY CONSTRUCTION (3 credits)
This course is designed to extend students' knowledge of theory and theory construction beyond the basics of the elements and propositions of particular criminological theories. Students will have an opportunity to examine in depth topics such as theory construction, theory integration, theory compatibility and synthesis, and new directions in criminological theory.
Prerequisite(s): CRCJ 8090 or CRCJ 9020 and admission to graduate program in Criminology and Criminal Justice; or permission of instructor.

CRCJ 9250 SEMINAR ON VICTIMIZATION ACROSS THE LIFE-COURSE (3 credits)
The Seminar on Victimization across the Life-course provides graduate students a survey of the primary topics regarding the predictors and consequences of victimization at various points in life. This an elective course for graduate students in Criminology and Criminal Justice. By the end of the course, students will understand major theories, research methods, and seminal research studies in the victimology field. Furthermore, students will learn how to critically analyze and interpret primary research regarding victimization.
Prerequisite(s): Admission to UNO graduate program. Not open to non-degree graduate students.

CRCJ 9700 TEACHING CRIMINAL JUSTICE AT THE COLLEGE/UNIVERSITY LEVEL (3 credits)
This seminar is a required course for doctoral students in criminal justice. The purpose of the course is to provide students with the knowledge and skills that will enable them to become informed, effective, and stimulating teachers. A variety of pedagogical issues will be covered during the course of the semester; theories of learning and student motivation; constructing a course syllabus; designing effective writing assignments and in-class exercises; leading class discussions; testing and grading; and managing the classroom.
Prerequisite(s): Admission to Criminology and Criminal Justice PhD graduate program; or admission to Criminology and Criminal Justice MA or MS graduate program and instructor permission. Not open to nondegree students.

CRCJ 9800 ADVANCED RESEARCH DESIGN (3 credits)
This is a required course which will expose students to advanced topics in research methods in preparation for writing their doctoral dissertation. It will also apply advanced methodological techniques to problems in the field.
Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9890 DIRECTED READINGS IN CRIMINOLOGY & CRIMINAL JUSTICE (1-6 credits)
This course is designed to provide the advanced graduate student with the opportunity to do extended readings on a specialized criminology or criminal justice topic.
Prerequisite(s): Admission to graduate program in criminology and criminal justice or UNO graduate program, and permission of instructor.

CRCJ 9990 DISSERTATION (1-20 credits)
The dissertation is an original research project conducted and written under the direction of a faculty dissertation committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge on crime and criminal justice.
Prerequisite(s): Completion of all coursework, completion of the comprehensive examination, and permission of Supervisory Committee Chair. Not open to non-degree graduate students.

Criminology and Criminal Justice, MA

School of Criminology & Criminal Justice, College of Public Affairs & Community Service

Vision Statement
The Master of Arts (MA) degree is a 30-hour non-terminal degree designed to emphasize research activity and independent inquiry. This degree is recommended for those students seeking an interim degree prior to pursuing a doctoral degree. To complete the MA degree, students must write and orally defend a thesis. The thesis is an independent research project and an academic exercise that is written to the standards of the faculty members on the thesis committee. A thesis requires a committee of three faculty members and typically takes two semesters to complete.

Other Program Related Information

Fast Track
The School of Criminology and Criminal Justice has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor’s degree and a master’s degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

• This program is available for undergraduate students pursuing any of the following:
  • BS in Criminology or Criminal Justice on either the UNO or UNL campuses
  • Double-major at UNO with a BS in Criminal Justice or Criminology and Criminal Justice as either the primary or secondary major
  • BMS with a concentration in Criminal Justice and Criminal Justice
• Students must have completed no less than 75 undergraduate hours.
• Students must have a minimum undergraduate GPA of 3.5.
• Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
• Students will work with their undergraduate advisor to register for the graduate courses.
• A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
• Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
• Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
• Admission to Fast Track does NOT guarantee admission to the graduate program. Successful completion of the graduate
courses will be a significant consideration during the evaluation of admission to the MA or MS in Criminology and Criminal Justice.

- The admit term must be after the completion term of the undergraduate degree.

Special Note: Eligible undergraduate students may enroll in any 8000-level CRCJ course approved by the SCCJ program.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework. For those interested being considered for a graduate research assistantship, an April 1 deadline for fall admission is recommended.

Other Requirements

- **Entrance Exam**: Graduate Record Exam (GRE), a score of 300 or higher is typically required for admission to the MA program, or to be considered for a research assistantship
- **English Language Proficiency**: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 95 with a minimum of 21 in each of the four areas, IELTS: 7.5 (8.0+ preferred), Duolingo: 125
  - All ESL students are required to take a proficiency assessment examination at UNO upon admission, which will be used to determine whether further assistance is required.
- **Statement of Purpose**: One page discussing reasons for pursuing a graduate degree, research interests, and career goals for the future
- **Letters of Recommendation**: Two letters of recommendation are required, preferably from faculty or instructors familiar with your academic ability
- **Unconditional Admission**:  
  - Possession of a bachelor’s degree from a regionally accredited institution
  - Student has a 3.00 GPA (average of “B”) overall in undergraduate work  
  - At least 12 credit hours of criminal justice courses or related courses that meet the requirements of the current school undergraduate curriculum, including a basic statistics course, a research methods course, an introductory criminal justice course, and a criminology course.
- **Provisional Admission**:  
  - Student has not completed all of the undergraduate prerequisite course requirements for unconditional admission to graduate study
  - Student has no less than a 2.75 overall GPA for the last two years of undergraduate work and not less than a 2.75 GPA in the undergraduate major

Optional Course

Students can also take a diversity class from any field at the 8000 level or higher with adviser approval.

Electives

Select nine hours of CRCJ courses at the 8000 level or higher, with adviser approval:¹

| CRCJ 8990 | MASTERS THESIS                                           | 6       |

Total Credits 30

¹ If CRCJ 8130, CRCJ 8120 or CRCJ 9030 is taken, they will serve as a diversity class, so another class should be selected to fulfill the 9 credit hours of CRCJ electives.

Exit Requirement

- Thesis 6 hours CRCJ 8990

All candidates should carefully review the Graduate College requirements for forming a Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of a thesis.

Criminology and Criminal Justice, MS

School of Criminology & Criminal Justice, College of Public Affairs & Community Service

Vision Statement

The Master of Science degree in criminology and criminal justice is a 36 hour program (11 classes and a capstone course) designed to meet the needs of professionals who are dedicated to a career in criminal justice. This educational opportunity is offered in a flexible online format, or alternatively through on-campus evening classes. Full-time students can complete the degree in 18 months; part-time students may choose to pursue the degree at a slower pace.

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 95 with a minimum of 21 in all four areas, IELTS: 7.5 (8.0+ preferred), PTE: 76, Duolingo: 115
  - All English as a second language students are required to take a proficiency assessment examination at UNO upon admission, which will be used to determine if further assistance is required

- Statement of Purpose: One page discussing reasons for pursuing a graduate degree, interests in the field, and career goals for the future

- Resume

- Letters of Recommendation: Three letters of recommendation are required, the recommendation requests are generated from your online application. These recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past two years, it is suggested that at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.

- Unconditional Admission:
  - Possession of a bachelor’s degree from a regionally accredited institution
  - Applicant has at least a 3.0 GPA (average of “B”) overall in the last two years of undergraduate work
  - At least 15 credit hours of criminal justice courses or related courses that meet the requirements of the current school undergraduate curriculum, including a basic statistics course, a research methods course, an introductory criminal justice course, a criminology course, and a criminal justice or criminology diversity course.

- Provisional Admission:
  - Applicant must have a bachelor’s degree from a regionally accredited institution (if the institution is non-accredited, 15 credit hours of graduate course work at UNO must be successfully completed before the student is eligible for unconditional admission)
  - Applicant has not completed all of the undergraduate prerequisite course requirements for unconditional admission to graduate study
  - Applicant has no less than a 2.75 overall GPA in the last two years of undergraduate work and not less than a 2.75 GPA in the undergraduate major.

Capstone course is offered in the fall and spring semesters. Once all required coursework has been completed, the student can register to take the capstone course. The course will require students to engage in a problem-solving project involving group work, which culminates in a written report and oral presentation.

**Criminology and Criminal Justice, PhD**

**School of Criminology & Criminal Justice, College of Public Affairs & Community Service**

**Vision Statement**

The vision of the School of Criminology and Criminal Justice is to be a program that is recognized nationally for its quality and impact on research and instruction. In terms of doctoral education, the aim is to foster a learning environment in which graduate students may gain the necessary knowledge, skills, and competencies to prepare them for careers in academia or in the public or private sectors. The curriculum emphasizes written and verbal communication skills, methodological competency, a strong statistical foundation, and hands-on research experience. Doctoral students will actively engage in research under the supervision of faculty, the Director of the School’s Nebraska Center for Justice Research, and/or the Director of the Juvenile Justice Institute.

**Program Contact Information**

Todd Armstrong, PhD, Doctoral Graduate Program Chair (GPC)

218 College of Public Affairs and Community Service Building (CPACS)

402.554.2326
toddarmstrong@unomaha.edu

**Admissions**

General Application Requirements and Admission Criteria (p. 974)

**Program-Specific Requirements**

**Application Deadline (Fall 2024)**

- The PhD program only admits students for the fall semester. The application deadline for fall admission with graduate assistantship funding consideration is January 20th.
- Application deadline for admission with no graduate assistantship funding is June 1.

**Other Requirements**

The School of Criminology and Criminal Justice uses a holistic approach when evaluating application materials including the extent to which the applicant's interests align with faculty research areas and an interest in attracting a diverse student body with varying lived experiences. Admissions decisions are competitive with a limited number of qualified students admitted each fall semester. Applicants are typically notified of decision by mid-spring.

- Official transcripts documenting completion of a master's degree. Degree may be in process at time of application.
  - A Master of Arts or Master of Science degree in criminology or criminal justice from an accredited institution is required for unconditional admission into the program.
  - Applicants holding a master’s degree in a related social science field (e.g., psychology, sociology, political science, public administration, etc.), but lacking substantive coursework in criminology and criminal justice may be granted provisional admission. Unconditional admission status will be granted upon successful completion of 18 hours of criminology and criminal justice core curriculum coursework.
- **English Language Proficiency:** Applicants must have a command of oral and written English. Applicants who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 95 with a minimum score of 21 in each of the four areas (the paper TOEFL will NOT be accepted), IELTS: 7.5 (8.0+ is preferred), PTE: 76, Duolingo: 125
  - **NOTE:** All English as second language students will be required to complete a proficiency assessment examination upon admission. This assessment will be used to determine if further assistance is required.
- **Entrance Exam:** Graduate Record Examination (GRE) scores are required.
  - A GRE score above 300 (combined verbal and quantitative portions) and writing score at or above 4.0 and above is preferred. Students not meeting this threshold but demonstrate their exceptional academic potential through other aspects of their application materials may also be considered.
- **Statement of Purpose/Statement of Research Interests:** (max. 5 pages)
  - A statement of purpose should describe the applicant’s prior education experience, research interests, any relevant professional experience, and long term career goals. Applicants may note their interests in working with specific faculty members with whom their research interests align.
- **Writing Sample:** This may be a chapter from a master’s thesis, a published article, or a term paper or manuscript written in a scholarly style.
- **Resume**
- **Letters of Recommendation:** Three letters are required with at least two of the three letters must be submitted by professors who can attest
to the applicant's academic strengths through experiences such as having the applicant as a student in their class and/or working under their direct supervision on research projects.

1 This course may be substituted with a course from another department. Permission for course substitution must be granted by a student's supervisory committee and doctoral program chair.

Both 8000- and 9000-level elective courses are available to doctoral students. A maximum of six (6) hours of dual-level courses (8—6 course number) can be included in the program of study.

A maximum of six hours of directed readings (CRCJ 9980) may be included in the program of study. These six hours can be used in preparation for the comprehensive examination. Directed readings intended for comprehensive exam prep may be taken in the semester before the administration of the comprehensive exam. All coursework, excluding coursework in the form of directed readings related to the comprehensive examination, must be completed within two and half (2.5) years from the time a student’s program of study is approved by the dean for graduate studies. All students will be required to complete all courses listed as required courses. Students also must take elective courses in criminal justice or related fields.

Students are expected to complete 36 hours of coursework within two years except in extraordinary circumstances. Some of these hours may be taken during summer semesters.

**Comprehensive Examination and Admission to Candidacy**

After completion of 36 hours of coursework, doctoral students will be required to pass a comprehensive examination. The examination has two parts: criminological theory and criminal justice systems. Students are expected to take both comprehensive examinations during the fall and spring semesters of their third year in the program.

**Dissertation**

Students may register for dissertation credits after successful completion of one comprehensive examination. The dissertation must reflect original scholarship and contribute to the body of knowledge on criminology and criminal justice. The dissertation topic must be approved by the student’s dissertation committee, which consists of a chair and three other members. One committee member must be a faculty member from outside the School of Criminology and Criminal Justice. The dissertation topic, prospectus, and the dissertation all require the approval of the dissertation committee. A doctoral student will be required to take at least one hour of CRCJ 9990 each fall and spring semester while working toward the completion of the dissertation. A minimum of 20 credit hours of CRCJ 9990 is required for all doctoral students.
Total Credit Hours
A minimum of 92 graduate hours beyond the baccalaureate degree. This includes up to 30 hours earned in a master’s degree. Satisfactory completion of a teaching practicum is also required.

Social Work, MS and Criminology and Criminal Justice, MS (MSW/CRCJ)
Grace Abbott School of Social Work, School of Criminology & Criminal Justice, College of Public Affairs & Community Service

Vision Statement
The MSW/MSCRCJ dual degree program is a collaborative effort between the University of Nebraska at Omaha, Grace Abbott School of Social Work and the School of Criminology and Criminal Justice. The MSW/MSCRCJ offers interdisciplinary preparation in the fields of social work and criminal justice leading to the master of social work and the master of criminal justice degrees, with fewer required credit hours than it would take to obtain these degrees independently.

This dual degree program prepares students to provide a range of advanced social work services for individuals, families, groups, organizations, and communities and assume leadership in the field of criminal justice and social work. Graduates with a dual MSW/MSCRCJ are prepared to respond to the needs of the community by working with delinquent and criminal populations and the systems that impact these populations. Students beginning the MSW/MSCRCJ program at the Advanced Standing level, must complete 57 credit hours total. Students beginning the MSW/MSCRCJ program at the MSW Foundation level must complete 81 credit hours total.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024 and Fall 2024)

- **Spring:** October 15
  - Foundation MSW/MSCRCJ students (those who do not have an undergraduate degree in social work, BSSW) admitted for the spring term are limited to only the MSCRCJ coursework in spring and summer terms. The MSW coursework will be added in the fall term.
  - Advanced MSW/MSCRCJ students (those with an undergraduate degree in social work, BSSW) can begin both MSCRCJ and MSW coursework in the spring term.

- **Fall:** February 15
  - Students admitted as either Foundation MSW/MSCRCJ or Advanced MSW/MSCRCJ can begin both MSW and MSCRCJ coursework in the fall term.

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

- **Statement of Purpose:** The statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, in no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.
  - If you have a compelling autobiographical story relevant to your application, but that falls outside of the items addressed within the statement, you may add a letter to the Admissions Committee. Your letter will be considered, but will not be scored.

- **What type of work are you planning to engage with once you attain your MSW degree?** Specifically, what are the issues, populations, and levels of practice you hope to work with after graduate school?

- **The social work profession is rooted in social justice. Social workers adopt a stance of cultural humility and strive towards cultural awareness. Discuss a time when you realized that one of your personal or cultural identities influenced your reaction to a social situation. Reflecting on that experience, how might it influence your future social work practice?**

- **Social workers are self-reflective, strengths-based, and growth-oriented. Identify a strength that you possess and an area for growth. Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.**

- **Social work is a values-based profession dedicated to mitigating inequality and enhancing human wellbeing, especially for vulnerable, marginalized, and oppressed populations. From the core values and ethical principles identified in the NASW Code of Ethics (https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/), identify and discuss one that resonates with you and one that may challenge you.**
- Why have you chosen social work? Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.

- **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:
  - Educational experiences since high school
    - List start and end dates with month and year
    - Identify whether the position is part or full-time
    - Identify whether the position is paid or volunteer
    - Field placements, internships or practicums
    - Honors or distinctions received

- **Letters of Recommendation:** Three letters of recommendation are required, the recommendation requests are generated from your online application. These recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past two years, it is suggested that at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.

- The MS application for criminology and criminal justice is completed and admission to the program will be used by the School of Criminology and Criminal Justice to admit students.

The MSW/CRCJ Foundation Program is a 81 credit hour program available to applicants who do not hold a BSSW degree from an accredited school of social work within the last 10 years.

The MSW/CRCJ Advanced Standing Program is a 57 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work within the last 10 years.

- CRCJ 8356 COMMUNITY-BASED CORRECTIONS
- CRCJ 8400 INTIMATE PARTNER VIOLENCE
- CRCJ 8430 HUMAN TRAFFICKING
- CRCJ 8516 VIOLENCE
- CRCJ 8800 SPECIAL PROBLEMS IN CRIMINAL JUSTICE
- CRCJ 8850 RISK/NEEDS ASSESSMENT INSTRUMENTS
- CRCJ 8950 STATISTICAL APPLICATIONS IN CRIMINAL JUSTICE & PUBLIC ADMIN

Total Credits 57

1. A student must receive a grade of "B" or higher in practicum courses (SOWK 8400 and SOWK 8410).
2. Courses not selected from among the three listed may be used as an elective.

Exit Requirements

- CRCJ 8970 Capstone course is offered in the fall and spring semesters. Once all required coursework has been completed, the student can register to take the capstone course. The course will require students to engage in a problem-solving project involving group work, which culminates in a written report and oral presentation.
- Satisfactory completion with a grade of B or better in SOWK 8400 and SOWK 8410

Academic Policies and Standards

- The MSW Student Handbook can be found here (https://www.unomaha.edu/college-of-public-affairs-and-community-service/social-work/student-resources/).

Managing Juvenile and Adult Populations Certificate

School of Criminology & Criminal Justice, Grace Abbott School of Social Work, College of Public Affairs & Community Service

Vision Statement

A unique program specifically designed for professionals working with juveniles and adults who are in contact with the criminal justice system as victims, offenders, or family members.

Program Contact Information

Robert Houston, Senior Community Service Associate
218 College of Public Affairs & Community Service (CPACS)
402.554.2610

Other Program Related Information:

Note: This certificate can be obtained entirely online. All courses for the certificate will be offered online in a two-year rotation. Elective courses in criminology and criminal justice are also offered in the spring, summer and fall semesters.

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

- Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- GPA of 2.75 or higher
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Paper-based TOEFL: 588, Internet-based TOEFL: 95 with a minimum of 21 in each of the four areas, IELTS: 7.5 (8.0 preferred), PTE: 76, Duolingo: 115
• All ESL students are required to take a proficiency assessment examination at UNO upon admission, which will be used to determine if further assistance is required.

• **Statement of Purpose:** The statement should include how the certificate will help you achieve your professional goals.

• **Resume**

### Critical and Creative Thinking, MA

#### Vision Statement

The Master of Arts in Critical and Creative Thinking (MA CCT) embodies the College of Arts and Sciences’ ongoing commitment to personal enrichment as well as to the practical application of analytical skills and knowledge in a diverse array of both for-profit and nonprofit professional environments. This interdisciplinary degree provides a unique opportunity to pursue both breadth and depth within the rich and diverse landscape of the liberal arts and sciences. Students pursuing this degree will enhance their career potential by developing advanced skills and abilities necessary for critical thinking, creativity, and leadership.

CACT 8000 INTRODUCTION TO CRITICAL AND CREATIVE THINKING (3 credits)
This course is the foundational introductory course for the Master of Arts in Critical and Creative Thinking program (MA CCT). It focuses on the development of students' skills as critical thinkers and creative problem solvers as well as the cultivation of students' capacity to recognize and leverage tools, resources, and ideas towards finding innovative solutions to everyday problems.
Prerequisite(s): Graduate status and acceptance into MA CACT program or permission of instructor.CACT8000

CACT 8060 TOPICS IN CRITICAL AND CREATIVE THINKING (3 credits)
This is a course on selected topics offered on a one-time or occasional basis. The course may be repeated as long as the topic is different each time. May be cross listed with other departments when topics are appropriate to other departments. A complete topics syllabus will be available on file in the Office of the Master of Arts in Critical and Creative Thinking program.
Prerequisite(s): Graduate standing.

CACT 8080 INDEPENDENT STUDY (1-3 credits)
This course is designed for those students who are independently pursuing an area of study that is not covered under the existing curriculum. The student will be supervised by a member of the faculty of the MA in Critical and Creative Thinking program. All course assignments, readings, requirements, and expectations will be clearly communicated to the student in advance. May be repeated for credit for a total of six credit hours.
Prerequisite(s): Admission into the MA CCT program, successful completion of 6 hours of CACT coursework, including CACT 8000, and permission of faculty member. Not open to non-degree graduate students.

CACT 8090 CRITICAL AND CREATIVE THINKING GRADUATE PROJECT (3 credits)
The Graduate Project is an applied student project under the direction of a faculty advisor. In the project, the student will apply interdisciplinary knowledge and skills gained within the program to address a problem or to expand knowledge within or across disciplines. The product or artifact produced by the student may take a variety of forms.
Prerequisite(s): Permission of faculty advisor and Graduate Program Committee Leadership (or its designee). Not open to non-degree graduate students.

CACT 8100 GLOBAL CINEMA (3 credits)
A critical and analytic study of foreign films focusing on overlapping global issues. This course supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking.
CACT 8106 CULTURAL PSYCHOLOGY (3 credits)
This course will provide an overview of the cultural, community and ecological factors that play a role in how people perceive their environments. The goal is to investigate the ways in which culture affects individual behaviors, attitudes and cognitions. It may be easy to tell that two cultures are different, but identifying exactly what is meant - and all that is encompassed - when speaking about "culture" can be much more difficult. Culture can include everything from gender constructs and race/ethnicity to the effects of new technologies. All of these aspects of culture affect individuals' psychological make-up and behavior. Although psychology has largely developed from a Western tradition, attention to research from non-Western perspectives will also be emphasized. This course supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 4530, PSYC 8536).
Prerequisite(s): Enrollment in MA in Critical & Creative Thinking program or by permission of the instructor.

CACT 8110 GLOBAL SOCIAL ISSUES: CREATIVE AND CRITICAL ANALYSES (3 credits)
This course focuses on global cultural and social forces and how they interact to form nexuses of both opportunity and obstacle to constructive human engagement on a wide array of social issues. An overview of topics covered in the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. This course will provide students with the analytical tools, collaborative engagement skills, and applied problem-solving techniques that will help students succeed in this concentration and program. (Cross-listed with BLST 8110)
Prerequisite(s): Graduate standing.

CACT 8116 GEOGRAPHY OF ECONOMIC GLOBALIZATION (3 credits)
A study of the geography of economic globalization and the geography of the world economy. The major topics include the historical development of the world economy and globalization from the geographical perspective, trends in geography of global production, trade and investment, the most important factors and actors in the globalization processes and its geographic effects, geography of transnational corporations, case studies of economic geography of selected industries and service activities, effects of globalization on the developed and developing countries. This course also supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with GEOG 4550, GEOG 8556)
Prerequisite(s): Graduate status.

CACT 8186 URBAN LATIN AMERICA (3 credits)
This course examines the experience of Latin American urbanization, attending to its contributions to urban sociology, social movements, and policymaking. Topics include urban transitions (e.g. pre-Hispanic to colonial, post-colonial to industrial, and the neoliberal turn), socio-spatial configurations (e.g. plazas, squatter settlements), urban marginality debates, urban politics, and planning as well as governance innovations (e.g. bus rapid transit systems, participatory budgeting). Students will compare city case studies across the region and to urban life in the United States. (Cross-listed with SOC 8786, SOC 4780, LLS 8786, LLS 4780).

CACT 8200 SEMINAR IN POLITICAL THEORY (3 credits)
This course introduces students to the history of political theory, from its origins in ancient Greece to its manifestations in contemporary thought. (Cross-listed with PSCI 8300)
Prerequisite(s): Permission of graduate advisor. Not open to non-degree graduate students.

CACT 8206 COMPARATIVE RELIGIOUS ETHICS (3 credits)
An introduction to historical and contemporary approaches to comparative religious ethics, with special focus on specific case studies as encountered in societies and religious communities across the globe. In addition to reading authors from a variety of perspectives (Aristotelians, natural law theorists, philosophers of law, pragmatists, theologians, and historians of religion), students will be introduced to special topics in the field, e.g., religion and public life, religion and law, syncretism, the secular/non-secular divide, etc. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 4200, RELI 8206)

CACT 8215 VALUES AND VIRTUES (3 credits)
This course explores advanced topics in ethics with particular emphasis on virtue theory and virtue ethics. Topics to be considered include the meaning and status of value claims, sources of value, intrinsic goods, agent-relative goods, practical reason, moral development, happiness, moral ambiguity, moral luck, the identification of virtues, and relationships of care, trust, and responsibility. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PHIL 3060)

CACT 8216 PUBLIC HEALTH, RELIGION, AND HUMAN RIGHTS (3 credits)
This course examines the intersections among public health, religion, and human rights. It considers how human rights impact public health and vice versa; how human rights and religious thought impact each other; how religious communities approach issues of public health; and how religious thought and practice affects people's health. Topics include infectious diseases such as HIV and COVID-19; issues of stigma and discrimination in public health; social determinants of health such as poverty and environmental quality; and women's and LGBTQ+ health. Students will gain skills of textual analysis, dialogue, and argumentative reasoning in both written and verbal form. (Cross-listed with RELI 8216, RELI 4210)
Prerequisite(s): Graduate standing.

CACT 8226 VIOLENT CONFLICTS, PEACEBUILDING, AND THE ETHICS OF INTERVENTION (3 credits)
This course is designed to familiarize the student with the nature of violent conflict, including terrorism, and a variety of the mechanisms for peacebuilding. The course will also explore human rights and the ethics of intervention. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 4220, RELI 8226)

CACT 8306 INTERNATIONAL DEVELOPMENT & SUSTAINABILITY (3 credits)
This course introduces students to different concepts of international development through the lens of sustainability. The course explores a broad range of activities related to international development, including international aid, trade, philanthropy, interventions in conflict, peacebuilding, public health, human rights, social justice, and the environment. (Cross-listed with PSCI 4290, PSCI 8296)
Prerequisite(s): PSCI 2210 or equivalent is recommended.

CACT 8310 ECOLOGICAL WRITING AND ANALYSIS (3 credits)
This course provides students with the opportunity to develop expertise in a wide range of foundational works and key techniques of ecological writing and theory in English. By engaging mindfully with these works and techniques, students will develop advanced skills in ecologically oriented critical analysis and creative thinking. This course supports the Writing and Critical Reflection and the Health and the Environment concentrations in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENGL 8310)
Prerequisite(s): Graduate standing.
CACT 8316 OUR ENERGY FUTURE: SOCIETY, THE ENVIRONMENT AND SUSTAINABILITY (3 credits)
In this course, students will analyze our energy options including the environmental, economic, and ethical connections with a particular emphasis on electrical energy. The course doesn't prescribe a particular energy future but rather emphasizes development of the knowledge and skills to more effectively contribute to the conversation. To understand our future, the course begins with the present energy landscape and its historical underpinnings, then focuses on developing a student's ability to critically assess energy options by examining the associated implications, consequences, intent, origins, and bias. Students' own work, life, and academic experience are used in the course to underscore the individual relevance of these energy choices. The course includes the necessary science, but the greater emphasis is on the associated critical and creative thinking so that ultimately students can make informed, creative, sustainable energy choices. (Cross-listed with ENVN 4310, ENVN 8316)
Prerequisite(s): Graduate standing.

CACT 8326 ECOLOGICAL SUSTAINABILITY AND HUMAN HEALTH (3 credits)
The course will explore and develop the complex context of the systemic links among ecosystems and human health (and more broadly human well-being) using case studies including climate change, water quality, infectious diseases and agricultural production. Students will develop skills in critical thinking and applied research by studying biological connections between humans and ecosystems and how social, economic and cultural processes and practices mediate these connections. This course supports the Health and the Environment concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENVN 4320)
Prerequisite(s): Graduate standing.

CACT 8400 A HISTORY OF AMERICAN IMMIGRATION POLICIES AND LAWS (3 credits)
This seminar will examine the evolution of American immigration policies and laws from the colonial period to the present day. Where appropriate, the course will examine American immigration laws in a comparative context. It will pay particular attention to how state policies create and/or sustain inclusionary or exclusionary practices for members of different racial, ethnic, religious, or gender groups in American society.
Prerequisite(s): Graduate standing.

CACT 8410 IMMIGRATION, MIGRATION, AND DIASPORA: CRITICAL APPROACHES AND THEORIES OF MOVEMENT IN LITERATURE (3 credits)
This seminar in literature and some film analyzes the depictions in non-fiction and fiction of displacement as a result of immigration, migration, refugee status, or any other considered movement, intentional or imposed. It will focus largely on the U.S. experiences of those displaced from all locales. (Cross-listed with ENGL 8410)
Prerequisite(s): Graduate standing.

CACT 8416 LITERATURE/CULTURE: CENTRAL AMERICA AND THE CARIBBEAN 1898-2000 (3 credits)
"Literature/ Culture: Central America and the Caribbean 1898-2000" studies major historical and socio-cultural events in Latin American history in the 20th century, through their articulation in literary texts, film, and other cultural expressions from Central America and the Hispanic Caribbean. (Cross-listed with SPAN 4150, SPAN 8156)

CACT 8420 MEXICO AND THE U.S. BORDERLANDS: TWO HISTORIES, ONE DESTINY (3 credits)

CACT 8436 INTERNATIONAL MIGRATION, DEVELOPMENT AND CITIZENSHIP (3 credits)
The course examines the forces driving contemporary global migration, the impact of migration in both sending and receiving nations' development, as well as the politics and practices of migration policy development. The course also discusses the current debates on immigrant incorporation and citizenship in the receiving countries. (Cross-listed with LLS 4430, LLS 8436).
Prerequisite(s): Graduate standing.

CACT 8500 COMPLEX ORGANIZATIONS (3 credits)
This graduate seminar provides an overview focused on the understanding and analysis of intricate internal and external organizational forces such as organizational bureaucracy, organizational culture, autonomy and control systems, which affect performance of organizational members as well as influence organizational survival. (Cross-listed with SOC 8500)
Prerequisite(s): Graduate enrollment or permission of class instructor.

CACT 8506 CREATIVITY AND INNOVATION IN ORGANIZATIONS (3 credits)
To provide a discussion of the antecedents of individual and organizational creativity, including measurement, models, characteristics of the individual and the environment that facilitate creativity and innovation in an organizational setting. Students in this course will be able to understand the research literature related to creativity and innovation and apply the findings to improve critical and creative thinking, implementation of creative ideas, and development of creative teams and organizations. This course supports the Organizational Science and Leadership concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 4650, PSYC 8656)

CACT 8510 SEMINAR IN LEADERSHIP (3 credits)
This course introduces students to classical and contemporary scholarship on leadership theory, research, and application. Students gain a foundation in models of leadership, assess their own leadership styles, and learn to integrate what they learn in corporate, governmental, non-profit, or community organizations. (Cross-listed with PSCI 8120)
Prerequisite(s): Permission of graduate adviser. Not open to non-degree graduate students.

CACT 8520 POSITIVE ORGANIZATIONAL PSYCHOLOGY AND LEADERSHIP (3 credits)
This course is a graduate seminar on organizational psychology and leadership that focuses on the understanding and critical analysis of theory and practice pertaining to individual functioning at work. Positive organizational psychology theories and practices will provide the overarching framework in understanding potential solutions to challenges and problems facing leaders and their employees. (Cross-listed with PSYC 9421).
Prerequisite(s): Graduate standing or permission of instructor.

CACT 8530 PERSONNEL PSYCHOLOGY AND LEADERSHIP (3 credits)
This course provides an overview of personnel psychology from a leadership perspective. Topics include methodology, employee selection, performance appraisal, organizational attitudes and behavior, motivation, and leadership style.
Prerequisite(s): Graduate standing or permission of instructor.

CACT 8540 SEMINAR ON INTERNATIONAL LEADERSHIP AND STRATEGY (3 credits)
This course introduces students to international leadership and strategy theory, research, and application. (Cross-listed with PSCI 8220).
Prerequisite(s): Not open to non-degree graduate students.

CACT 8610 PROFESSIONAL AND TECHNICAL WRITING (3 credits)
This course will introduce students to the theory, research, and practices of professional and technical writing. Through readings, discussions, and assignments, students will gain an understanding of the types and circumstances of communication challenges encountered in the workplace. The course will also consider the roles of persuasion and ethics in written communication. (Cross-listed with ENGL 8610)
Prerequisite(s): Graduate standing.
CACT 8630 DIGITAL RHETORIC (3 credits)
This course provides students with the opportunity to develop expertise in the theory and practice of digital rhetoric by considering technology's deep impact on how we define and engage in writing. Students examine contemporary writing practices as part of a rich rhetorical tradition while they design and create effective multimodal compositions and analyze foundational works in digital rhetoric. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENGL 8630)
Prerequisite(s): Graduate standing.

CACT 8640 CREATIVE NONFICTION IN DIGITAL ENVIRONMENTS (3 credits)
Students in this course will study creative nonfiction in digital environments, analyze rhetorical situations created in digital environments, which might include, in addition to other modalities, sounds, animations, and hypertext, and create multimodal essays. The course will also focus on the study and analysis of craft-elements of creative nonfiction: narrative persona, tone, rhythm and style, scenic construction, among others. Students taking this course will learn to read with interpretative and analytical proficiency a broad range of creative nonfiction in digital environments. (Cross-listed with ENGL 8640).
Prerequisite(s): Graduate standing

CACT 8650 WRITING ACROSS DIFFERENCES: RHETORICAL THEORY FOR PERSUASION AND PUBLIC ADVOCACY (3 credits)
This course provides students a theoretical foundation for understanding how language is used in various types of discourses and texts as a means of convincing others of a given viewpoint or idea. Students will apply this theory to real-world writing scenarios in their scholarly areas of interest, to advocacy and social issues movements, or to address workplace needs and goals. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with ENGL 8650)
Prerequisite(s): Graduate standing.

Cybersecurity

Degree Programs Offered
- Cybersecurity, MS (p. 1154)

Certificates Offered
- Cybersecurity Certificate (p. 1156)

CYBR 8000 CENTER OF ACADEMIC EXCELLENCE-CYBER OPERATIONS COMPLETION CERTIFICATE (0 credits)
This course is utilized to provide a specific designation for students that have completed the Center of Academic Excellence - Cyber Operations coursework. It is a zero credit hour class used to designate the completion of this focus area in the cybersecurity curriculum.
Prerequisite(s): Instructor Permission. The program committee will work with the UG advisors to ascertain that the student has fulfilled all requirements for this designation if he/she has or will within the last semester, they will be allowed to register for this class.

CYBR 8080 SPECIAL TOPICS IN INFORMATION ASSURANCE (1-6 credits)
The course provides a format for exploring advanced research areas for graduate students in Information Assurance and related fields. Specific topics vary, in keeping with research interests of faculty and students. Examples include applied data mining, mobile security, web services and applications, vulnerability assessments, cloud computing security, and other issues in Information Assurance research.
Prerequisite(s): Instructor Permission.

CYBR 8366 FOUNDATIONS OF CYBERSECURITY (3 credits)
Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 4360, CSCI 8366)
Prerequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CYBR 8396 MOBILE DEVICE FORENSICS (3 credits)
Mobile device forensics is the science of recovering digital evidence from a mobile device under forensically sound conditions using accepted methods. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a mobile device forensics investigation. Topics include: an introduction to digital and mobile device forensics, mobile forensics standards, acquisition methods (manual, logical, physical and provider-side), Android and iOS file system analysis, decoding approaches, application data analysis, and report writing. Students will be required to perform several investigations in a controlled lab environment, including acquiring forensically sound evidence and analyzing these using industry standard tools. (Cross-listed with CYBR 4390).

CYBR 8410 DISTRIBUTED SYSTEMS AND NETWORK SECURITY (3 credits)
The course aims at understanding the issues surrounding data security, integrity, confidentiality and availability in distributed systems. Further, we will discuss various network security issues, threats that exist and strategies to mitigate them. This course will cover topics in cryptography, public key infrastructure, authentication, hashing, digital signatures, ARP protection, IP and IPSEC, IP Tables, SSL/TLS, firewalls, etc. (Cross-listed with CSCI 8410)
Prerequisite(s): IASC 8366 or equivalent(s); or instructor permission. Not open to non-degree graduate students.

CYBR 8420 SOFTWARE ASSURANCE (3 credits)
Software assurance is a reasoned, audit able argument created to support the belief that the software will operate as expected. This course is an intersection of knowledge areas necessary to perform engineering activities or aspects of activities relevant for promoting software assurance. This course takes on a software development lifecycle perspective for the prevention of flaws. (Cross-listed with CSCI 8420)
Prerequisite(s): CSCI 8836 OR by permission of the Instructor. Not open to non-degree graduate students.

CYBR 8436 QUANTUM COMPUTING AND CRYPTOGRAPHY (3 credits)
The course builds an understanding of exciting concepts behind quantum computing and quantum cryptography. In doing so it will introduce the principles of qubits, superposition, entanglement, teleportation, measurement, quantum error correction, quantum algorithms such as quantum Fourier transformation, Shor's algorithm and Grover's algorithm, quantum key exchange, quantum encryption, and secure quantum channels that are built using these principles. It will also discuss advantages of quantum computing and cryptography over classical computing and cryptography and limitations thereof. The students will come out with a working understanding of the field of quantum computing and quantum cryptography. During the course, students will also implement several of the quantum algorithms. (Cross-listed with CYBR 4430, CSCI 4430).

CYBR 8446 INDUSTRIAL CONTROL SYSTEM SECURITY (3 credits)
The objective of this course is to research vulnerabilities into, and provide guidance for securing, industrial control systems (ICS). ICS is a general term that encompasses several types of control systems, including supervisory control and data acquisition (SCADA) systems, distributed control systems (DCS), and other control system items such as Programmable Logic Controllers (PLC). The student will learn to identify network and device vulnerabilities and potential countermeasures to these weaknesses. (Cross-listed with CYBR 4440)
CYBR 8450 APPLIED CRYPTOGRAPHY (3 credits)
In this course we will implement stream and block ciphers in different modes, public key algorithms, hash functions, message authentication codes, random number generators, etc. Along the way we will also explore weaknesses of these algorithms and implement well-known attacks on them. We will also solve crypto challenges and puzzles. This is a hand-on course and will require programming proficiency. The preferred language will be Python; you can, however, use other object oriented languages.
Prerequisite(s): CSCI 8410 or CYBR 8410

CYBR 8456 HOST-BASED VULNERABILITY DISCOVERY (3 credits)
The class will cover security issues at an implementation and hardware level. The students will learn assembly language and the use of a reverse assembler and debugger. This will allow the student to analyze various “packing” algorithms for computer viruses, the viruses themselves, operating system “hooking”, “fuzzing”, and other machine code, host-based exploits. The class will be using both Windows and Linux as operating systems. (Cross-listed with CYBR 4450.)
Prerequisite(s): CSCI 3710 and CYBR 2250.

CYBR 8466 NETWORK-BASED VULNERABILITY DISCOVERY (3 credits)
The course is an advanced class in which the students learn various techniques for testing for and identifying security flaws in network software and web applications. Internet technologies such as HTTP, DNS, DHCP, and others are examined in the context of cyber security. Students are expected to participate in numerous hands-on experiments related to Information Assurance with respect to web technologies. (Cross-listed with CYBR 4460)
Prerequisite(s): CSCI 3550

CYBR 8470 SECURE WEB APPLICATION DEVELOPMENT (3 credits)
Web applications are pervasive fixtures of 21st century culture. Web application security is an inclusive, amorphous term, that spans application level security, i.e. ensuring high level code cannot be exploited, server level security, i.e. ensuring server resources such as databases and file systems cannot be exploited, and network security, i.e. ensuring unauthorized parties cannot access a server or tamper with user sessions. This course cross-cuts the web application security concepts across the different categories above and takes a heavily hands-on approach to introduce students to the world of secure web opp. design and development.

CYBR 8480 SECURE MOBILE DEVELOPMENT (3 credits)
Mobile devices are already pervasive fixtures of 21st century culture and increasingly the internet of things (IoT) and wearables are proliferating throughout the world. As this proliferation occurs, numerous vendor-centric and third-party mobile, wearable, and internet of things apps are being created by developers and downloaded by end-users with little to no thought about the security and privacy of the information used and collected by the apps. This course examines this issue from a development point of view to a) introduce mobile/wearable/IoT architectures and technologies, b) increase student application development competencies with these technologies, and c) integrate secure design principles into the ideation, design, and testing phases during development.
Prerequisite(s): CYBR 8470 or Instructor Permission

CYBR 8490 CYBER INVESTIGATIONS (3 credits)
Security incidents and cybercrimes detected by organizations are escalating in both scale and complexity. As a result, cyber investigation capabilities have become a critical mechanism for organizations in an effort to minimize the damage from incidents and cybercrimes. These investigations often involve the preservation, identification, extraction, analysis and documentation of digital data (evidence) stored on a variety of electronic devices. The aim of this course is to introduce graduate students to acceptable approaches for collecting, analyzing and reporting data from a cyber investigation. Topics include but are not limited to: an introduction to cyber investigations, cyber investigations and the law, incident response and first responder actions, investigation techniques, operating system analysis, and network investigations Students will be required to perform several analyses in a controlled lab environment.
Prerequisite(s): CYBR 8366 or equivalent. CSCI 3550 or ISQA 3400, or equivalent. CYBR 3370 or equivalent. Alternatively, instructor permission can be sought before enrolling into the class for students who have not met all of the above requirements.

CYBR 8546 COMPUTER SECURITY MANAGEMENT (3 credits)
The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST 4540, CYBR 4540, ISQA 8546)
Prerequisite(s): IASC 4360 or permission of the instructor.

CYBR 8570 INFORMATION SECURITY POLICY AND ETHICS (3 credits)
The course will cover the development and need for information security policies, issues regarding privacy, and the application of computer ethics. (Cross-listed with ISQA 8570)
Prerequisite(s): CIST 2100 or BSAD 8030, or permission of instructor.

CYBR 8900 INDEPENDENT STUDY IN INFORMATION ASSURANCE (1-3 credits)
The course provides a format for exploring advanced research areas for graduate students in Information Assurance and related fields. The class is designed for students that would like to explore specific Information Assurance topics at a greater depth, or topics that are not currently a part of the IA curriculum. The class is proposed and organized by the student, with participating faculty mentoring.
Prerequisite(s): Instructor Permission

CYBR 8910 INTERNSHIP (1-3 credits)
The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the MS in CyberSecurity (CYBR) program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.
Prerequisite(s): Students must have completed a minimum of 12 credit hours towards the MS in CYBR program. Instructor permission is required to register. Not open to non-degree graduate students.

CYBR 8950 CYBERSECURITY GRADUATE CAPSTONE (3 credits)
The graduate capstone course challenges students to prove their mastery of the skills and domain knowledge they have gathered throughout their program of study. The course begins with a module on project management and research best practices. The majority of course is structured around facilitating a non-trivial semester-long project, often in service to a third-party project sponsor, such as a community, industry, or government partner. The course is intended for students that have selected the coursework option, not thesis, and that are close to graduation (see prerequisites). The course is considered summative and replaces the MS in CYBR comprehensive examination requirement.
Prerequisite(s): Students must have 9 credit hours or fewer left in the program. Students must have completed CYBR 8366, CYBR 8410, and CYBR 8420. Not open to non-degree graduate students.
Cybersecurity, MS

School of Interdisciplinary Informatics, College of Information, Science & Technology

Vision Statement
The School of Interdisciplinary Informatics (SI2) is the academic home of the Master of Science (MS) in cybersecurity (previously information assurance). Cybersecurity is a rapidly expanding, multi-faceted science that integrates a diverse set of disciplines to address fundamental problems in the design, development, implementation and support of secure information systems. The Master of Science is a full graduate degree program balancing theory with practice in order to provide students with the knowledge and skills necessary to protect information systems. Because of the wide variety of subject areas to which cybersecurity can be applied, this degree program has two paths; cyber operations, a concentration with highly technical content, and interdisciplinary, with the opportunity for the students to tailor the degree to specific management goals. Students may also choose between a thesis or capstone exit option based on their individual interests.

Other Program Related Information

Fast Track
The School of Interdisciplinary Informatics (SI2) has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor’s degree and a master’s degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate credit hours towards the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

• This program is available for undergraduate students pursuing any of the following:
  • Students pursuing a CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field
  • Students pursuing a Bachelor of Multidisciplinary Studies with a concentration in cybersecurity who wish to pursue the MS in cybersecurity.

• Students must have completed no less than 60 undergraduate hours.
• Students must have a minimum undergraduate GPA of 3.0.
• Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
• Students will work with their undergraduate advisor to register for the graduate courses.
• A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
• Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
• Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
  • Admission to Fast Track does NOT guarantee admission to the graduate program.
  • The admit term must be after the completion term of the undergraduate degree.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

• Fall: July 1
• Spring: December 1
• Summer: April 1

Other Requirements

• The minimum undergraduate grade point average (GPA) requirement for the MS in Cybersecurity program is 3.0 or equivalent
score on a 4.0 scale. Applicants should have the equivalent of a four-year undergraduate degree.

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission. Minimum acceptable scores are:
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

- **Statement of Purpose:** a two-page, double-spaced, word-processed essay that addresses the following two topics:
  - Discussion of two accomplishments that demonstrate your potential for success in the graduate program
  - Discussion of your unique personal qualities and life experiences that distinguish you from other applicants to this graduate program

- **Resume:** Submit a detailed resume indicating your work experience and background.

- **Letters of Recommendation:** At least one but no more than three letters of recommendation from references who can evaluate your work and/or academic achievements.

- **Interview (optional):** Although not required, the graduate program committee may ask to conduct a telephone interview to further assess the experiences of the applicant.

### Requirements

#### Foundation Courses

Foundation courses ensure that all students in the degree have a solid groundwork upon which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for other courses in the program, but they also contain a distinct body of knowledge that is an important part of the cybersecurity professional’s education. All foundation courses are required for all students, however, students who have obtained an undergraduate degree in a related field may already have this foundation. In such a case, most, if not all, foundation courses are waived. Students with undergraduate degrees in other disciplines, including computer science, management information systems, or engineering, will usually require one or more foundation courses. Occasionally, a student’s work experience may be sufficient to waive one or more of the foundation courses.

Waivers for foundation courses are potentially granted by the graduate program committee upon the recommendation of the faculty member who is responsible for an individual course. Students requesting a waiver for a particular course should be prepared to meet with a faculty member and answer questions in the area of the course. They should bring to the meeting any relevant transcripts, course syllabi, course material, or evidence of practical experience. Some foundation courses may have an option for testing out.

Foundation courses cannot be used to satisfy the 33 semester hours required for the MS in Cybersecurity (CYBR) degree. Students who have not completed all the foundation course requirements may be admitted on a provisional status until those requirements have been completed. All foundation courses must be completed prior to or concurrent with the first six (6) hours of MS in CYBR graduate coursework.

## Cybersecurity Certificate

### School of Interdisciplinary Informatics, College of Information, Science & Technology

#### Vision Statement
Cybersecurity is the practice of managing information related risks by ensuring confidentiality, integrity, authentication, availability, and non-repudiation of data. In addition to the national interest in cybersecurity, local businesses are increasingly reliant on secure computer infrastructures for their daily operations. A graduate-level certificate is a logical step to enhance the skill set of local and at-a-distance cybersecurity professionals. Additionally, the certificate program can serve as a feeder into the MS in cybersecurity degree should the students in the certificate choose to continue their graduate education.

### Program Website

### Admissions
General Application Requirements and Admission Criteria (p. 974)

### Program-Specific Requirements

#### Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
- Fall: July 1
- Spring: December 1
- Summer: April 1

#### Other Requirements
- The minimum undergraduate grade point average requirement for the program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a four-year undergraduate degree.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list [https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf](https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

### Quality of Work Standards

The Graduate College’s Quality of Work Standards shall be applied to foundation courses as well as courses taken as part of the degree program. In particular, the GPC will recommend to the Graduate College that any

1. Student receiving a grade of “C-” or below on any foundation course will be dismissed from the program or, in the case of unclassified or non-degree students, be automatically denied admission.
2. Student receiving a grade of “C+” or “C” in any foundation course will be placed on probation or dismissed from the program.

3. Student not maintaining a “B” (3.0 on a 4.0 scale”) average in foundation courses will be placed on probation or dismissed from the program.
The following requirements are due 12 working days prior to commencement:

- "Incomplete" and "NR" grades from previous terms must be removed so that the grade will be in the Office of Graduate Studies.
- All fees, fines, and other obligations due the university must be settled.

For students currently enrolled in courses that are a part of their plan of study, enrollment must be maintained in order to complete the certificate. A grade for any current enrollment must be received by the Registrar's Office no later than the close of business on the fifteenth working day following the end of a semester.

**Awarding of Graduate Certificates**

The Office of Graduate Studies will mail the certificate to students when all requirements are completed and all obligations to the university are satisfied. The Graduate College will not approve any changes in the student's permanent record once the certificate is awarded.

**Data Science, MS**

**College of Arts and Sciences, Business Administration, and Information Science & Technology**

**Vision Statement**

The vision of the Master of Science in data science program is to provide flexible, innovative, and technologically current education to rising data professionals who want to prepare for corporate leadership positions through their functional expertise. The interdisciplinary data science program brings together thought leaders in the fields of business, information technology, mathematics, and other units at UNO, including international university partners and local businesses.

This interdisciplinary graduate program is designed to be completed in 24 months. The curriculum includes course modules on topics that address the following major themes: data organization, manipulation, cleaning, and visualization; data analytics; working with massive amounts of data; dealing with missing and messy data; understanding the value of data and creating data products.

**Total Credits**

12

Incoming certificate students that do not have a cybersecurity background may also require foundation courses as needed prerequisites, depending on which core courses are selected and depending on the background of the student.

**Completion of the Certificate**

During what is expected to be the semester the certificate is completed and prior to the posted deadline, students should apply for the certificate through MovLINK on or before the deadline. Information can be found here ([https://www.unomaha.edu/registrar/graduate.php](https://www.unomaha.edu/registrar/graduate.php)). If you complete the application form and do not complete all of the requirements for the certificate, contact the Office of Graduate Studies as soon as possible. You must reapply during the next semester in which you expect to complete the certificate; no additional fee is charged to reactivate your application.
the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.

- Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- Resume: An up-to-date resume with details about all relevant IT experience and skills.
- Letters of Recommendation: Three letters of recommendation are required
- Interview: A personal, telephone or Skype interview is encouraged, but is optional.
- Applicants with International Transcripts: Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (https://www.wes.org/) (WES), Educational Credential Evaluators (https://www.ece.org/) (ECE), SpanTran (https://spantran.com/), or Educational Perspectives (https://www.edperspective.org/). This graduate program may conduct an in-house credential evaluation of the transcript(s).
- UNO reserves the right to require a course-by-course evaluation from WES, ECE, SpanTran, or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. The applicant will be notified by the individual program if an external course-by-course evaluation is required.
- “Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

### Foundation Courses
Students must have completed basic courses in the following areas, either as an undergraduate student or prior to enrolling in the first data science course.

- Introduction to Programming: one semester of Java, Python, C++, or other approved programming course
- Statistics: one semester of undergraduate statistics

Foundation courses do not count towards the plan of study/degree requirements.

BIOI 8850 SPECIAL TOPICS IN BIOINFORMATICS (3 credits)

This course is intended to provide a mechanism for offering instruction in subject areas that are not covered in other regularly scheduled courses. In general, courses offered under the BIOI 8850 designation will focus on evolving subject areas in bioinformatics.

Prerequisite(s): Course prerequisites of a specific offering of BIOI 8850 will be determined by the supervising faculty member and will be identified in the course proposal. It is anticipated that permission of the faculty member teaching the course will be required.
BMI 8000 ADVANCES IN BIOMEDICAL INFORMATICS (0 credits)
BMI 8000 provides a regular forum for BMI graduate students, where the latest developments in the field of Biomedical Informatics are introduced and discussed. The course also functions as a central communication and collaboration hub for graduate students in BMI. Participation is required.
Prerequisite(s): Students in the MS in BMI and PhD in BMI program may register. Not open to non-degree graduate students.

BMI 8020 ADVANCED COURSE IN BIOINFORMATICS (3 credits)
This is a special topics course designed to explore the research interests of faculty and students. Therefore, topics may include, but are not limited to, such areas as of study as next-generation sequencing, biological networks, proteomics, metabolomics, and biomedical informatics.
Prerequisite(s): Admission to the MS/PhD Program in the College of Information Science and Technology, or permission of the instructor. Not open to non-degree graduate students.

BMI 8070 HEALTH INFORMATICS RESEARCH METHODS (3 credits)
This is a foundational course for health informatics research methods. Health informatics is a broad term that denotes disciplines that encompass the use of computer and information science to manage all aspects of healthcare data and the use of healthcare information to foster better collaboration among a patient’s various healthcare providers. This course takes a practical approach to understanding health informatics research methods through the use of real-life examples, step-by-step research method practices, and applying various analytical procedures. The course will guide the student through the process of designing research studies using a variety of research methods. Students are introduced to quantitative, qualitative and mixed methods designs through hands-on assignments and reviewing selected research studies. In addition, students will learn how to conduct a literature review. Students will learn about grant opportunities, the proposal writing process and IRB applications.
Prerequisite(s): Graduate student status and prior or concurrent enrollment in BMI 8100, or by instructor approval.

BMI 8080 SEMINAR IN BIOMEDICAL INFORMATICS (3 credits)
This is a variable-content course that engages students in current research in Biomedical Informatics and develops skills in the oral and written presentation of scientific research.
Prerequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular course offerings.

BMI 8100 INTRODUCTION TO BIOMEDICAL INFORMATICS (3 credits)
This course offers students an overview of the field of biomedical informatics, combining perspectives from computing, biosciences and medicine. The historical development of the field and its influence on biological, clinical, and translational research will be discussed. Issues related to bioinformatics, clinical, bioimaging and public health/population informatics will be explored.
Prerequisite(s): Class standing of senior or above.

BMI 8200 PUBLIC HEALTH GENOMICS (3 credits)
This course will address the biopsychosocial issues that bridge genomics and public health, which are generally considered two vastly different disciplines. The focus will center on understanding how genomics may be incorporated into health promotion and disease prevention efforts for individuals and population.
Prerequisite(s): Class standing of senior or above.

BMI 8320 CONSUMER HEALTH INFORMATION SYSTEMS (1 credit)
Consumer health informatics as a field focuses on health informatics from the perspective of the consumer or patient, health literacy, and consumer education. Creative problem solving and fluency in this subdiscipline requires competence in information structures and processes that empower consumers to manage their own health. In this course, students will strategically review publicly available databases, datasets, and projects involved in consumer health. With this information in hand, students will design their own consumer health information system geared towards addressing a consumer or patient education and literacy challenge of their interest.

BMI 8400 LINEAR ALGEBRA FOR ADVANCED COMPUTING AND AI (3 credits)
Matrix Analysis and Linear Algebra are at the core of several important algorithms and techniques that are widely used in machine learning for data analytics, imaging informatics, and bioinformatics. The course will explore fundamental concepts of matrix analysis and linear algebra as they apply to machine learning, emphasizing applications over proofs. Students will have an opportunity to perform "pencil and paper" calculations as well as more sophisticated numerical computations using a programming language/statistical environment of their choice. Applications of linear algebra to machine learning in the context of imaging informatics and biomedicine will be covered in depth.
Prerequisite(s): Proficiency in programming and knowledge of calculus are required. Familiarity with concepts from biology is beneficial but not required.

BMI 8540 FOUNDATIONS IN PROGRAMMING FOR BIOMEDICAL INFORMATICS (3 credits)
Foundations in programming, software development, pipeline management, and version control are critical for developing a capable biomedical informatics workforce. This course will provide foundations in programming skills necessary for students with a limited computer science background to develop fluency and basic skills in the concepts of software development for biomedical informatics. Specific topics covered will include Unix/Linux shell programming, Python, databases, Applications Programming Interface (APIs), software versioning, and data management.
Prerequisite(s): Experience with programming in a scripting, database management, or object-oriented programming language is strongly recommended but not required.

BMI 8850 BIOMEDICINE FOR THE NONMEDICAL PROFESSIONAL (3 credits)
This course will cover the basic principles of molecular and cellular biology, human anatomy, physiology, and pathology that are essential to an informed use of biomedical data. The biomedical topics will be interspersed and complemented with discussions about relevant data sources and datasets, emphasizing their strengths and weaknesses, and the lectures will be enriched with virtual anatomical dissections. Reading assignments from the primary literature and multimedia materials will supplement the textbook.
Prerequisite(s): Class standing of senior or above

BMI 8866 BIOINFORMATICS ALGORITHMS (3 credits)
The main objective of this course is to provide an organized forum for students to understand the foundations of algorithmic design and analysis in the context of health and biological data. The course will present fundamental concepts in algorithms (exhaustive, greedy, graph, heuristic, and more) and explore how those concepts extend to bioinformatics and related fields, such as biomedical informatics, and health informatics. Students will learn about historical context of these algorithms and how they were pivotal in forming more complex modern approaches, and will explore advanced algorithms in their area of interest. Students will also exercise their programming skills with the opportunity to implement and apply bioinformatics algorithms to real data, so to better grasp the technical components of algorithmic design and analysis. (Cross-listed with BIOI 4860).
BMI 8896  COMPUTERIZED GENETIC SEQUENCE ANALYSIS (3 credits)
The goal of this course is to introduce students to major topics in computerized analysis of genetic sequences. In particular the course will allow students to become familiar with the computational tools and software that aid in the modern molecular biology experiments and analysis of experimental results. Following the completion of this course, it is expected that the students will have a basic understanding of the theoretical foundations of the sequence analysis tools and develop competence in evaluating the output from these tools in a biological context. This course will emphasize hands-on experience with the programs for nucleotide and amino acid sequence analysis and molecular phylogeny. (Cross-listed with BIOL 4890).
Prerequisite(s): Permission from the instructor.

BMI 8900  INDEPENDENT RESEARCH IN BIOMEDICAL INFORMATICS (1-3 credits)
The content of the course will vary, however both the student and the faculty member must sign an Independent Research Agreement and file it with the Biomedical Informatics Graduate Program Committee before registration for the course. This agreement will detail the project, the schedule for its completion, the form of the output, the method of evaluation and other relevant information pertaining to the project.
Prerequisite(s): Permission of instructor, and at least 12 hours of course work toward the MS BMI program should be completed.

BMI 8910  INTERNSHIP (1-3 credits)
The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the Biomedical Informatics graduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.
Prerequisite(s): Students must have completed a minimum of 12 credit hours towards the MS in BMI program. Not open to non-degree graduate students.

BMI 8950  BIOMEDICAL INFORMATICS GRADUATE CAPSTONE (3 credits)
The graduate capstone course challenges students to prove their mastery of the skills and domain knowledge they have gathered throughout their program of study. The course begins with a module on project management and research best practices. The majority of the course is structured around facilitating a non-trivial semester-long project, often in service to a third-party project sponsor, such as a community, industry, or government partner. The course is intended for students that have selected the coursework option, not thesis, and that are close to graduation.
Prerequisite(s): Students must have 9 credit hours or fewer left in the program, including this course. Students must have completed all core courses, and core electives are recommended but not required. Not open to non-degree graduate students.

BMI 8970  INDEPENDENT STUDY IN BIOINFORMATICS (1-3 credits)
This is a variable-credit course designed for graduate students in bioinformatics who would benefit from independent reading assignments and research-type problems. Independent study enables coverage of topics not taught in scheduled course offerings.
Prerequisite(s): Permission of a supervising faculty member and approval of the Bioinformatics Program Committee Chair. A formal description of the problem area to be investigated, the resources to be used, and the results to be produced must be prepared.

BMI 8990  THESIS IN BIOMEDICAL INFORMATICS (1-6 credits)
A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.
Prerequisite(s): Graduate major in BMI and approval of the Thesis Advisory Committee. Not open to non-degree graduate students.

BMI 9900  ADVANCED RESEARCH IN BIOMEDICAL INFORMATICS (3 credits)
This course provides a format for exploring advanced research areas for doctoral students in Biomedical Informatics and related fields. Specific topics will vary in keeping with research interest of faculty and students.
Prerequisite(s): Admission to graduate program in Biomedical Informatics. Not open to non-degree graduate students.

BMI 9980  INDEPENDENT RESEARCH IN BIOMEDICAL INFORMATICS (1-3 credits)
This course allows students to research a topic of their interest that is not available in a formal course. The topic to be studied must be agreed upon by the student and the instructor.
Prerequisite(s): Admission to Ph.D. program in Biomedical Informatics and permission of instructor. Not open to non-degree graduate students.

BMI 9990  DISSERTATION (1-12 credits)
The dissertation is an original research project conducted and written under the direction of a faculty dissertation committee supervisory committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge in health or bioinformatics and demonstrate technical mastery of the discipline.
Prerequisite(s): Admission to the Ph.D. program in Biomedical Informatics and candidacy for the Ph.D. degree. Prior to enrolling for dissertation hours, the students must have permission of the supervisory committee. Not open to non-degree graduate students.

BSAD 8000  BUSINESS ETHICS: ACHIEVING SOCIAL RESPONSIBILITY (2 credits)
This core MBA course will explore the relationship between law and ethics, will examine the generally-accepted theoretical principles associated with doing business ethically, and will examine practical ethical issues associated with various facets of business.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent) or admission to the MAcc program. Students with an undergraduate major or a graduate degree in Law may not include this course in a plan of study for the MBA degree. Not open to non-degree students.

BSAD 8020  ENVIRONMENTAL ECONOMICS AND MANAGEMENT (3 credits)
This course covers topics related to environmental economics and policy, with an emphasis on comparative policy analysis and business strategies towards the environment. (Cross-listed with ECON 8020)
Prerequisite(s): Principles of Microeconomics (ECON 2200) and Principles of Macroeconomics (ECON 2220), or Analytical Foundations of Economics (BSAD 8180), or permission of the instructor. Not open to non-degree graduate students.

BSAD 8026  RESEARCH METHODS IN ECONOMICS AND BUSINESS (3 credits)
Covers the methodology of economics: choosing a research topic, literature search tools, data source identification, data summary techniques, basic statistical data analysis using statistical packages, and clear economics writing. The student will become familiar with these techniques through text materials, journal studies, and completion of an empirical economics paper.
Prerequisite(s): Graduate standing. Not open to nondegree students.

BSAD 8030  INFORMATION TECHNOLOGY IN BUSINESS (3 credits)
The premise of this course is that today's managers must learn to use information technology to create competitive firms, manage global corporations and provide useful products and services to customers. Accordingly, the content of this course is focused on use of information technology for competitive advantage. Students will develop case studies of firms who have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application.
Prerequisite(s): Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent). Not open to nondegree students.
BSAD 8040 BUSINESS AND INFORMATION TECHNOLOGY: CONNECTING PEOPLE AND INFORMATION (2 credits)
The premise of this course is that today's managers must learn to use information technology to create competitive firms, manage global corporations and provide useful products and services to customers. Accordingly, the content of this course is focused on use of information technology for competitive advantage. Students will develop case studies of firms who have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent).
Students with an undergraduate major or a graduate degree in management information systems may not include this course in a plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8060 PEOPLE: CULTIVATING SKILLS FOR LEADERSHIP (2 credits)
This course will prepare students with the skills to effectively enact the critical leadership skills of listening, employee feedback and coaching, goal-setting, empowerment/delegation, influencing, interviewing, conflict, negotiation, intercultural awareness, team/group discussions, and business etiquette.
Prerequisite(s): Admission to the MBA program. Not open to non-degree graduate students.

BSAD 8066 HEALTHCARE ANALYTICS FOR BUSINESS (3 credits)
This course will focus on the use of analytics to develop key performance indicators that integrate and evaluate clinical, administrative, and financial performance. Key concepts in this course will include information management, performance metrics, data visualization, and communication of results across the healthcare ecosystem. Specific topics will include health outcomes analysis, financial performance, developing an analytics strategy, data quality and governance, and the four stages of actionable intelligence. (Cross-listed with MGMT 4060, SCMT 4060).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8070 COACHING & DEVELOPING OTHERS (2 credits)
Organizational leaders must effectively coach and develop others in order to ensure sustainable long-term organizational performance. Both through one-on-one feedback and coaching as well as through strategy-aligned organizational-level talent development programs, leaders establish the organization's culture of employee development and growth.
Prerequisite(s): Admission to Executive MBA Program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8076 INTERNATIONAL LOGISTICS MANAGEMENT (3 credits)
This course will focus on the logistics of international trade and how managers facilitate the flow of goods and services in import and export environments. Students will learn about infrastructure and business practices needed to manage international transportation, communications, services, and regulatory requirements. Students will develop an understanding of international terms of trade, transaction risk management, and location decisions for placement of warehouses and distribution centers. (Cross-listed with SCMT 4070).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8080 BUSINESS FORECASTING (3 credits)
The course will cover forecasting tools and applications applied to business settings. The first half of the course will cover traditional Econometric forecasting methods and the second half of the course will focus on predictive analytics models and machine learning. Time in the computer lab will be focused on teaching students how to implement the models discussed in lectures. (Cross-listed with ECON 8310).
Prerequisite(s): ECON 8320 (or equivalent programming experience) or permission of instructor. Not open to non-degree graduate students.

BSAD 8090 ESSENTIAL LEADERSHIP SKILLS (3 credits)
This course will teach students the interpersonal skills necessary to effectively manage others. Second, this course will serve as a vehicle to assess the business content knowledge and computer literacy of incoming MBA students in order to provide customized remediation recommendations for each student. Third, the course will collect information that will be used for assessment and accreditation purposes to evaluate the effectiveness of the MBA program. This course will address the following MBA program themes: communication, change agent, teamwork, information technology, critical thinking and information gathering and analysis.
Prerequisite(s): Admission to the MBA program and completion of MBA foundation courses (or equivalent) or may be taken concurrently with the final foundation course. Not open to non-degree students.

BSAD 8096 MANAGING COLLABORATIVE ENGAGEMENT (3 credits)
This course will provide students with the opportunity to develop knowledge and strategies for leading teams, enhancing collaboration, building consensus, problem solving in teams, facilitating group processes, and designing collaborative workspaces. (Cross-listed with MGMT 4090, ITIN 4090)
Prerequisite(s): Admission to a graduate program at UNO or the STRATCOM Leader Fellow Program. Not open to non-degree students.

BSAD 8100 MANAGERIAL ECONOMICS (3 credits)
The course will offer students tools of analysis drawn from consumer theory and the theory of the firm in order to improve the understanding of human behavior as it is constrained in the context of business decision-making. This course is intended for students who are seeking the degree of Master of Science in Economics or the degree of Master of Business Administration.
Prerequisite(s): ECON 2200 and 2220 or BSAD 8180 and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to non-degree students.

BSAD 8110 ACCOUNTING AND FINANCIAL FUNDAMENTALS (3 credits)
The course is designed to give incoming graduate students the foundation in accounting that is necessary for subsequent graduate courses. Emphasis is on introducing the students to as many accounting concepts as possible.
Prerequisite(s): Graduation admission or permission of the appropriate graduate advisor. This course cannot be used in a plan of study for any graduate program at UNO. Not open to non-degree graduate students.

BSAD 8136 HUMAN RESOURCE MANAGEMENT (3 credits)
This course is a comprehensive review of human resource management concepts and practices. The course is designed to educate future managers and leaders on the importance of utilizing effective human resource methods that comply with federal laws and provide the organization with high-quality talent that provides a competitive advantage. (Cross-listed with MGMT 4030).
Prerequisite(s): BSAD 8136 students do not have any prerequisite courses; however, BSAD 8250 (Organizational Behavior) is recommended prior to enrollment.

BSAD 8140 BUSINESS INTELLIGENCE ANALYSIS (2 credits)
In BSAD 8440 you learned how to extract and manipulate data in a business intelligence tool. In this class you will learn to use this data to extract business knowledge. To do this, you will learn about the data model, methods of aggregation, and visualizations in the business intelligence (BI) software.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8440. Not open to non-degree graduate students.
BSAD 8146 TOTAL REWARDS (3 credits)
This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee compensation and benefit programs. The course is designed to enable future managers and human resource professionals to utilize effective strategies for managing the single largest controllable expense for organizations; employee pay and benefits. (Cross-listed with MGMT 4010).
Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8150 ECONOMICS: ESSENTIAL CONCEPTS FOR MANAGERS (2 credits)
This course exposes MBA students to fundamental economic concepts necessary for successful business planning and financial success. Topics include: Comparative advantage and international trade, market dynamics, the role that the competitive landscape plays in company decision-making, macroeconomic growth and development, and monetary and fiscal policy and their impact on business activity.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in economics may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8156 TALENT DEVELOPMENT (3 credits)
This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee training and development programs to optimize human capital effectiveness in modern organizations. The course is designed to enable future managers and human resource professionals to utilize effective strategies for assessing employee training needs and developing appropriate solutions to maximize talent utilization. (Cross-listed with MGMT 4120).
Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8160 INTERMEDIATE ANALYTICS (2 credits)
Business Intelligence software tools are statistical in nature. Many of the visualizations/widgets use statistics "under the hood" to provide insights to you the user. Can you trust these insights? How are they calculated? When are they appropriate? In this class, you will learn the answers to these questions.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8140. Not open to non-degree graduate students.

BSAD 8166 STAFFING THE ORGANIZATION (3 credits)
This course is a comprehensive review of issues and techniques related to the acquisition of high-quality human resources for optimal organizational effectiveness. The course is designed to enable future managers and human resource professionals to utilize effective strategies for recruiting, selecting, placing, and integrating new employees into the organization’s workforce. (Cross-listed with MGMT 4110).
Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8176 EMERGING TRENDS IN SUPPLY CHAIN MANAGEMENT (3 credits)
This course will focus on megatrends influencing supply chain management and design in the 21st century. Key concepts in this course will include contemporary opportunities and challenges in creating customer value via the supply chain with a focus on globalization, sustainability, and risk management. Specific topics will include the influence of the empowered customer on supply chain design, global supply chain trends, and the need for integration of technology and talent to create a competitive advantage. (Cross-listed with SCMT 4170).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8190 APPLICATIONS IN ANALYTICS (2 credits)
What is a ‘business question’ and how do you answer it with data? In this class you will learn to form testable business questions. This course will build on the knowledge you gained in BSAD 8440, BSAD 8140, and BSAD 8160 to answer your business questions with the help of business intelligence software.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8160. Not open to non-degree graduate students.

BSAD 8200 MANAGERIAL ACCOUNTING (3 credits)
A study of concepts, analysis and procedures of accounting utilizing internal financial and non-financial data which provides management with information for planning and controlling routine operations, for non-routine decisions, policy-making and long-range planning; and for external reporting to stockholders, governments and interested parties.
Prerequisite(s): ACCT 2010 and 2020 or BSAD 8110, and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to non-degree graduate students.

BSAD 8206 CONSULTATIVE SELLING PRINCIPLES (3 credits)
The primary focus of the Consultative Selling Principles course is to develop the behaviors, methodologies, principles, and processes required to successfully lead and manage complex selling initiatives to a win-win close. The course examines and applies, through role playing and other activities, the critical relationship building, critical thinking, problem solving, listening and negotiating capabilities which are the foundation skills underlying consultative selling. (Cross-listed with MKT 4200)
Prerequisite(s): MKT 3310 with ‘C-‘ or better; MKT 3100 with C+ or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8210 ACCOUNTING: DECISIONS & CONSEQUENCES (2 credits)
Managers and administrators must be able to understand, analyze, and use accounting information to make operational and strategic business decisions. In this course, we will study practical uses of accounting information to address the problems and decisions managers face in business. Emphasis is placed on the user of accounting information rather than the preparer. Upon completion of this course, a student should be able to use accounting information to make management decisions, understand how accounting rules inform those decisions, and consequently, how those decisions affect a company’s financial reports.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or graduate degree in accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8216 SELLING FINANCIAL SERVICES (3 credits)
Selling Financial Services concentrates on methods to effectively sell services and products in the financial services industry, including the banking, brokerage and insurance sectors. Targeting, initiating, and acquiring client relationships, expanding business opportunities, and maintaining long-term client relationships are the course’s focal points. This integrative course is designed to provide students with a basic understanding of the selling profession and sales culture within the financial services industry. (Cross-listed with MKT 4210, FN8K 4210).
Prerequisite(s): Not open to non-degree graduate students.

BSAD 8220 ADVANCED APPLICATIONS IN ANALYTICS (2 credits)
Using the knowledge gained in BSAD 8440, BSAD 8140, BSAD 8160, and BSAD 8190, each student in this course will work individually to apply the entire business analytics process (starting with data collection and ending with results to make informed decisions) to a real problem in their own organization.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8190. Not open to non-degree graduate students.
BSAD 8226 GLOBAL STRATEGIC ACCOUNT MANAGEMENT (3 credits)
Throughout this course, the management of strategic account programs at national, multi-country, and global levels will be addressed. The primary focus of the curriculum is on the critical success factors for driving revenue, sustainable long-term growth and profitability with a base of core strategic buyers.
Prerequisite(s): Senior or graduate student standing and permission of the instructor. Not open to non-degree graduate students.

BSAD 8230 LEADING CHANGE & INNOVATION (2 credits)
This course focuses on providing leaders with the knowledge and ability to lead organizational change and enhance organizational innovation. Topics include organizational culture, organizational design, and organizational processes (including reward systems).
Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8240 EFFECTIVE LEADERSHIP OF PEOPLE (2 credits)
This course aims to enhance the leadership effectiveness of students by developing knowledge of what constitutes effective leadership and how to apply leadership concepts and models.
Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8250 ORGANIZATIONAL BEHAVIOR: ENHANCING HUMAN & ORGANIZATIONAL CAPABILITIES (2 credits)
This course will prepare students with the knowledge necessary to manage and lead organizations effectively. Students will learn management theories, understand important research findings in organizational behavior, and apply both theory and research results to real organizational situations, thus giving them the capacity to use OB theories to enhance organizational effectiveness.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in management may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8260 EFFECTIVE USE & REPORTING OF ACCOUNTING INFORMATION (2 credits)
This course focuses on the use and reporting of accounting information, with an emphasis on financial statements and how executive decisions can influence these statements. Financial statements, including footnotes and explanatory material, are the primary instruments utilized by parties external to the enterprise in making judgments about the enterprise. By understanding how management decisions are reflected in the financial statements, managers will understand how they can influence their judgment.
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8280 EMPLOYEE RECRUITMENT, ENGAGEMENT, AND RETENTION (2 credits)
Effective recruitment, engagement, and retention of highly motivated and high performing employees is critical for organizational success. This course will address the key organizational characteristics that must be in place for this to occur.
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership.

BSAD 8300 ORGANIZATION THEORY & DESIGN (3 credits)
This course is designed to increase students' understanding and knowledge of how organizations are designed and structured in order to create value and competitive advantage, and how organizations can operate in an effective and efficient manner in an ever-changing environment. The course will address topics such as: organizational effectiveness, organizational structure, organizational design, organizational culture, organizational technology, the external environment, organizational change, and the organizational life cycle. The ultimate goal is for students to be able to understand how organizations should be structured as a result of both external and internal factors.
Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8310 MANAGING PERFORMANCE IN ORGANIZATIONS (3 credits)
A human behavior course emphasizing the areas of individual behavior, interpersonal behavior, group behavior and the interplay of human and non-human factors.
Prerequisite(s): Essential Leadership Skills (BSAD 8060) or admission to the MAcc program. Not open to nondegree students.

BSAD 8325 SALES MANAGEMENT (3 credits)
The student will be exposed to current research findings in sales management and to business cases and simulations where sales management theories and concepts will be applied. This course will prepare students to develop and implement specific compensation, motivation, and evaluation strategies for managing sales professionals across a wide variety of organizations. (Cross-listed with MKT 4320.)
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8330 LEADING TEAMS (2 credits)
This course focuses on building and leading high-performing teams in organizations. Topics include how to evaluate team effectiveness, how to create and develop teams that are cohesive and high-performing, how to lead and facilitate teams, and how to diagnose and intervene when teams are experiencing problems.
Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8335 PROJECT MANAGEMENT (3 credits)
This course will focus on the planning and execution of complex projects within an organization. Students will learn how to conduct stakeholder analysis, plan the scope of a project, develop a project budget, lead a project team, and define the steps necessary to bring a complex project to a successful conclusion. Students will recognize how the strategy, structure, and culture of an organization can be used to identify and prioritize complex projects. (Cross-listed with MGMT 4330, SCMT 4330.)
Prerequisite(s): Admission to Graduate College, MBA Program; or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8340 INTERNATIONAL BUSINESS STUDY ABROAD (3 credits)
This course provides students with an international business and cultural experience through a study tour in a selected international location. Students will develop an understanding of the factors that affect international business decisions by visiting American companies operating abroad and foreign companies that export goods and services to the U.S.
Prerequisite(s): Instructor Permission.

BSAD 8345 CONSUMER BEHAVIOR (3 credits)
Consumers purchase, use, experience, and dispose of products and services as part of their consumption process. How and why consumers choose various brand options, form judgments about these brands, and decide which options to buy and/or re-buy are essential knowledge for marketing professionals. The course covers the psychological and social issues that guide consumption decisions. (Cross-listed with MKT 3320.)
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor.
BSAD 8356 GLOBAL SOURCING AND INNOVATION (3 credits)
This course focuses on global suppliers as partners in the development and commercialization of new products. Students will learn about open innovation and the integration of internal and external business systems in new product innovation. Students will develop an understanding of regulatory policies related to information sharing and the intellectual property rights of buyers and suppliers. (Cross-listed with SCMT 4350).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8360 EFFECTIVE MANAGEMENT OF CAPITAL STRUCTURE, CASH, & RISK (2 credits)
Students will develop strategic decision making skills by using financial concepts including time value of money, capital budgeting processes, cash flow forecasting and project risk analysis. Topics covered include: capital budgeting, financial statement analysis, capital structure, financial risk analysis.
Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8366 E-MARKETING (3 credits)
This course focuses on utilizing the Internet as a marketing platform. Course content includes discussion of how the Internet is used by businesses for designing products, pricing, promotions, distribution, positioning, gathering information, and cultivating relationships with stakeholders. The discussion about the rise of social media, sharing economy, virtual reality devices, and other relevant trends will also be part of the course. (Cross-listed with MKT 4360).
Prerequisite(s): BSAD 8400 with a grade of ‘B’ or above. Not open to non-degree graduate students.

BSAD 8370 LEADERSHIP IN DIVERSITY, EQUITY, ACCESS, AND INCLUSION (2 credits)
This course will focus on the role that organizational leaders play in proactively addressing organizational issues related to diversity, power, access, and equity. the course will explore tensions through the range of dimensions in which diversity is manifested among business leaders, staff, and stakeholders (which includes anyone impacted by the organization’s business decisions - e.g., employees, contractors, suppliers, customers, and the community). Policies, systems, histories, structures, and legislation will also be discussed. 
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8376 SUPPLY CHAIN ANALYTICS (3 credits)
This course focuses on integrating supply chain management through the use of key performance indicators. Key concepts in this course include data visualization, supplier performance metrics, service-dominant logic, and the supply chain for data. Specific topics include the influence of the empowered customer on supply chain metrics, using metrics to develop a competitive advantage, data-driven decision making, and the four stages of actionable intelligence. (Cross-listed with SCMT 4370).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8380 EFFECTIVE SYSTEMS, OPERATIONS, AND IT (2 credits)
Students will learn how to employ decision-making skills to create a long-term competitive advantage for an organization through operational and technical excellence. Key concepts in this course will include developing a view of organizations as technical and behavioral systems, operations management, quality management, strategies related to IT procurement, deployment, maintenance and security, and the supply chain. Specific topics will include applied systems theory, process improvement, quality assurance, supply chain management, IT systems development strategies, and issues related to systems security, data security, and data privacy.
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business

BSAD 8386 INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT (3 credits)
This course will focus on the strategic procurement of products and services in order to gain a competitive advantage through integrated supply management. Students will learn about strategic supply management, contract negotiation, and supplier quality management. Students will develop an understanding of supplier performance management through the use of supply chain information systems. (Cross-listed with MKT 4380, SCMT 4380)
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8396 MARKETING ANALYTICS (3 credits)
This course focuses on the application of data analytics in marketing decision making (e.g., segmentation, sales forecasting, and resource allocation). Students will learn to apply statistics and econometrics to solve marketing problems. Key topics in this course include marketing data visualization, marketing metrics, descriptive and predictive analytics, and digital marketing analytics. This course takes a very hands-on approach with real-world databases and equips students with tools that can be used immediately on the job. (Cross-listed with MKT 4370).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8400 MARKETING POLICIES (3 credits)
This course provides an introduction to the fundamental concepts of marketing, including a customer orientation, matched with attention to competition and core strengths. The course will illustrate strategies and principles that will help you understand how marketing managers, product managers or service managers must think through their situations, determine their goals and lay a course to achieve those goals.
Prerequisite(s): Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent); or admission to MAcc program. Not open to nondegree students.

BSAD 8416 DIVERSITY, EQUITY, ACCESS AND INCLUSION SOLUTIONS FOR MINIMIZING RISK (3 credits)
This course provides students an opportunity to explore the various aspects of diversity, power, access, and equity as it relates to the business environment. Students will explore tensions through the range of dimensions in which diversity is manifested among business leaders, staff, and stakeholders (include anyone impacted by business decisions, such as: employees, contractors, suppliers, customers, and the community) through policies, systems, histories, structures, and legislation. Students will have the opportunity to learn differences that individuals bring to a business environment and how stakeholders can capitalize on those differences by creating long-term inclusive environments. (Cross-listed with LAWS 4410).
Prerequisite(s): Admission to the MBA program. Not open to non-degree graduate students.

BSAD 8420 MARKETING: UNDERSTANDING CONSUMERS AND MARKETS (2 credits)
This course exposes MBA students to the fundamental concepts, practices and issues of marketing. A wide range of marketing practices and structures will be explored including product and service firms, consumer and business markets, profit and not-for-profit organizations, domestic and global companies, and small and large businesses.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent).
Students with an undergraduate major or a graduate degree in marketing may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.
BSAD 8426 BUSINESS DEMOGRAPHICS (3 credits)
The goal of this course is to develop a demographic perspective in order to assist in understanding the business environment and business policy. How population change impacts consumer markets and all of the functions (for example, accounting, finance and management) that must exist for these markets to perform. Includes a history of population change and policy as well as a view toward international population considerations. (Cross-listed with MKT 4420).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8430 STRATEGIC BRAND MANAGEMENT (3 credits)
An exploration of the characteristics, meanings, and management of brands in the business world. The course examines brands as a strategic asset, and draws on managerial, consumer, and cultural perspectives.
Prerequisite(s): BSAD 8420 or permission of instructor. Not open to non-degree students.

BSAD 8435 MARKETING INNOVATION (3 credits)
Product, service, and process innovation are essential drivers of firm performance. However, firms face considerable and complex challenges when bringing innovative ideas to life. For example, what marketing research methods should we employ to uncover vital consumer insights? How do these insights influence the development and launch of new products and services? What differentiated value are we delivering to our consumers? How do we successfully bring this new product or service to market? How does a brand’s purpose and personality influence consumers’ perceptions, purchase decisions, adoption, and engagement? This course will cover key marketing principles involved in the development and launch of new and innovative products and services - from conception to commercialization. Furthermore, we will explore how new-age technologies impact each stage of the development and launch processes. (Cross-listed with MKT 3400).
Prerequisite(s): BSAD 8420 or equivalent; and admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8440 BUSINESS INTELLIGENCE DATA EXPLORATION (2 credits)
The first in any analytics project is to get data ready for analysis. In this class you will learn to extract data from a business data source and ready it for analysis in a business intelligence software tool. In the process you will learn tools necessary for this process including SQL, Power Query, M, and DAX.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics. Not open to non-degree graduate students.

BSAD 8450 SEMINAR IN MARKETING (3 credits)
Exploration, study and critical analysis of contemporary marketing problems, trends, methods and approaches for seminar discussion and written report.
Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8456 MANAGERIAL NEGOTIATION STRATEGIES (3 credits)
This course introduces students to the theory and practice of negotiation. The ability to negotiate successfully rests on a combination of analytical and interpersonal skills. In this course we will develop a set of conceptual frameworks that should help students better analyze negotiations in general and prepare more effectively for future negotiations in which they may be involved. This course is designed to help students better understand the theories, processes, and practices of negotiation, as well as conflict resolution and relationship management so that students can be more effective negotiators in a wide variety of situations. (Cross-listed with MGMT 4450, SCMT 4450).
Prerequisite(s): Admission to Graduate College, MBA Program, or by permission of the instructor.

BSAD 8466 SUPPLY CHAIN INTEGRATION (3 credits)
This course will focus on the integration of internal and external systems designed to maximize the efficiency and effectiveness of supply chain networks developed by industrial organizations, government agencies, and not-for-profit organizations. Key concepts will include supply chain design, trends in technology, and cross-functional collaboration, coordination, and communication along the value chain. Specific topics will include the influence of empowered customers on supply chain integration, global supply chain trends, closed-loop supply chains, and the challenges and benefits of integrating technology and talent in the workplace. (Cross-listed with SCMT 4440).
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8476 BEHAVIORAL FINANCE & INVESTING (3 credits)
This course focuses on how actual investor behaviors and market behaviors differ from traditional theories of finance. This course will examine psychological biases, identify how such biases influence financial markets and settings, and explore methods that can be utilized to recognize and overcome such behavioral pitfalls. (Cross-listed with FNBK 4470).
Prerequisite(s): Admission to graduate college, MBA program, or by permission of instructor. Not open to non-degree graduate students.

BSAD 8480 GLOBAL ECONOMICS AND CORPORATE SOCIAL RESPONSIBILITY (2 credits)
In this course students will learn both how to apply global economic issues business strategy and how to balance socially responsible activities with the profit motive. With respect to global economics, topics include gains from trade, international trade patterns, foreign exchange markets, and barriers to trade. With respect to corporate social responsibility, topics include social responsibility and working conditions, socially responsible stewardship of the environment, and socially responsible strategies concerning human rights issues.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business.

BSAD 8510 SECURITY ANALYSIS (3 credits)
Study of the efficient market, fundamental and technical analysis approaches for the valuation of marketable securities. Methods of analysis are considered for the economy, industry groups and individual corporations.

BSAD 8520 SEMINAR INVESTMENT MANAGEMENT (3 credits)
This course focuses upon the modern portfolio theory of investment management and its application in formulation of policies for individuals and institutional investors. Topics addressed will include qualitative and quantitative analysis of the risks and returns of portfolio management using efficient market, fundamental analysis, and technical analysis approaches.
Prerequisite(s): BSAD 8510. Not open to nondegree students.

BSAD 8530 BANK & FINANCIAL MARKETS (3 credits)
This course focuses on the theory and practice in managing commercial banks. Topics covered include but not limited to: bank regulations, bank performance analysis, asset liability management, credit analysis and consumer loans. The course emphasizes the link between theory and practice through assigned course related readings, guest lecturers from industry experts, and a comprehensive bank research project on a local bank of your choice. At the end of the course, students should have a good understanding of basic banking theories as well as banking practices, and current issues and challenges facing the banking industry.
Prerequisite(s): BSAD 8500. Not open to non-degree graduate students.

BSAD 8540 MULTINATIONAL FINANCIAL MANAGEMENT (2 credits)
The focus of this course is on multinational financial management as viewed and practiced by the multinational firm and on current developments in international financial markets, including global banking. Familiarity with certain areas of the firm's environment, such as the international monetary system, the European Monetary System, and determination of exchange rates under alternative regimes, is essential to the international financial manager.
BSAD 8550 SEMINAR IN FINANCE (3 credits)
This course will address specific financial management topics which will vary by semester and is intended for graduate students.

BSAD 8560 MARKETING STRATEGY: CUSTOMERS AND MARKETS (2 credits)
This course will focus on how successful businesses match their objectives and resources with opportunities in the marketplace by identifying and measuring consumer needs, determining target markets and deciding which products and services to offer. This course will also address pricing, promotion, and distribution strategies to create competitive advantage in domestic and international markets.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8570 EFFECTIVE STRATEGIC MANAGEMENT (2 credits)
This course centers around the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. Students will develop the strategic thinking skills needed to formulate and execute successful strategies for firms/organizations in a variety of industries and dynamic environments. Emphasis is given to the contributions of several business disciplines of study, such as marketing, finance and management, to understanding both the internal operations of the organization and the influences of the external environment. This course is integrative and introduces both the theory and practice that enables that integrative process.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8576 INVESTMENT MANAGEMENT FOR FINANCIAL ANALYSTS (3 credits)
This course provides critical knowledge needed for students pursuing a career in investment management. The topic areas bridge academic theory, current industry practice, and ethical and professional standards and comprehensively address the areas assessed in the Chartered Financial Analyst examinations. (Cross-listed with FNBK 4570)

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

BSAD 8590 EXECUTIVE MBA CAPSTONE PROJECT (4 credits)
Students in the Executive MBA capstone project course will complete an applied consulting project for an organization that requires them to integrate knowledge across multiple Executive MBA program knowledge areas. Students will identify the key problem(s) to be solved, use sound methodologies to gather necessary data, identify and employ relevant evidence-based research and practitioner literatures, apply relevant models and theories to guide the generation of potential solutions and implementation strategies, and identify the feasibility and financial implications of their proposed solution(s).

Prerequisite(s): Admission to the Executive MBA Program. Not open to non-degree graduate students.

BSAD 8596 RISK MANAGEMENT FOR BUSINESS MANAGERS (3 credits)
An analysis of risk management techniques for handling the risk exposures most businesses face, including insurance, self insurance, risk control, and risk avoidance, among others. (Cross-listed with FNBK 4590.)

BSAD 8600 REAL ESTATE FINANCE THEORY AND APPLICATIONS (3 credits)
This course explores advanced financial analysis tools and methodologies used to quantify complex factors surrounding real estate productivity, value, investment, and project feasibility. Specific course topics will coincide with student interest in one of three focus areas: Investment, Development, or Commercial Finance.

Prerequisite(s): RELU 3410 and BSAD 8630, or permission of Real Estate Program Director.

BSAD 8605 REAL ESTATE PRINCIPLES AND PRACTICES (3 credits)
This is a survey course in real estate principles and practices, which is designed to familiarize students with industry terminology, current practices, and cover the following topics: Licensure, property rights, legal descriptions, real estate law and contracts, appraisal, financing, investments, Fair Housing, and related topic areas. This course provides foundational knowledge of the real estate field and will prepare students to successfully complete more advanced real estate coursework. NOTE: Students cannot receive credit for both RELU 2410 and RELU 3410. (Cross-listed with RELU 3410).

Prerequisite(s): Admission to Graduate College, MBA Program, or permission of Real Estate Program Director.

BSAD 8606 FINANCIAL RISK MANAGEMENT (3 credits)
The course provides students with an intermediate level analysis of financial derivatives, and the use of these instruments for managing risk in financial institutions. (Cross-listed with FNBK 4600.)

Prerequisite(s): BSAD 8500 and 8510 or their equivalent, and graduate standing. Not open to non-degree students.

BSAD 8610 REAL ESTATE APPRAISAL (3 credits)
This course addresses the fundamentals of real estate valuation and appraising, including factors affecting value, valuing land, improvements, and special classes of residential property, appraisal practice and rules, depreciation and obsolescence, and the mathematics of appraising.

Prerequisite(s): RELU 3410 and BSAD 8630, or permission of instructor.

BSAD 8616 REAL ESTATE INVESTMENTS (3 credits)
This course focuses on methods used to analyze existing and proposed commercial and residential real estate investments through dynamic programming models, and explores strategies to finance commercial real estate. The class ultimately prepares students to understand the risks and rewards associated with financing and investing in real estate. (Cross-listed with RELU 4390).

Prerequisite(s): RELU 2410 or RELU 3410 or FN BK 3250 or BSAD 8605 or BSAD 8630

BSAD 8625 PROPERTY MANAGEMENT (3 credits)
This course focuses on commercial and residential property management concepts and their application to the operation, control, and oversight of real property. The course will study leasing, tenant selection and relations, maintenance, marketing, contract management, asset management principles, as well as Fair Housing Laws and the Americans With Disabilities Act as they pertain to property management. (Cross-listed with RELU 3450).

Prerequisite(s): BSAD 8605, or permission of the Real Estate Program Director.

BSAD 8626 REAL ESTATE DEVELOPMENT (3 credits)
This course focuses on the procedures and complexities in developing and redeveloping various commercial property types and mixed-use real estate. Topics include an overview of the real estate development process, assembling a team, identifying project stakeholders, financial analysis, site selection, market analysis, and the regulatory environment. (Cross-listed with RELU 4440).

Prerequisite(s): BSAD 8605 or BSAD 8630, or permission of the Real Estate Program Director.

BSAD 8630 FINANCE: UNDERSTANDING CAPITAL AND CASH (2 credits)
As a comprehensive introduction to financial management, the course will cover various fields of finance and discuss topics including the time value of money, bond and stock valuation, capital budgeting.

Prerequisite(s): BSAD 8060 or BSAD 8070, 8150 and 8210. Students with an undergraduate major or a graduate degree in finance or accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.
BSAD 8640 IT: STRATEGIC DEVELOPMENT AND DEPLOYMENT (1 credit)
Students will gain a strategic perspective of information technology management, including current trends and best practices, and understand how technology can be used in competitive positioning. Processes for innovation and research and development spending and new business models will be covered.

BSAD 8650 VISION & STRATEGIC LEADERSHIP (2 credits)
This course focuses on the critical role that organizational leaders play in ensuring that the organization has a clear vision and a clear mission which are in alignment with the organization's business strategy and unit goals and effectiveness metrics. This course focuses on the mission and vision creation and communication process as well as vertical and horizontal goal alignment.
Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8660 FRONTIERS OF ANALYTICS (2 credits)
In this program, you have learned many analytics techniques. However, analytics is a constantly evolving field with increasingly advanced methods. What techniques might be presented to you as a manager? How do you interpret these results? In this class we will explore cutting-edge analytics methods and when they are appropriate for your business.
Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8160. Not open to non-degree graduate students.

BSAD 8696 EMERGING TECHNOLOGY AND INNOVATION (3 credits)
This course equips entrepreneurially-minded students with a more complete range and vision of the viability of various startup opportunities (with a specific focus on innovative technologies and innovative business models). Students will become familiarized with the new and emerging technologies and innovations that define modern industries and product categories, as well as the various shifts in the way cutting-edge business gets done, regardless of industry. (Cross-listed with ENTR 4690, MGMT 4690).
Prerequisite(s): Admission to a UNO graduate degree program or permission of instructor.

BSAD 8700 BUSINESS ANALYTICS: MAKING SENSE OF DATA (2 credits)
The purpose of this course is to provide business managers with an understanding of the important role data analytics has assumed in today's organizations. Data analytics has become a key component in accomplishing strategic and operational goals. This course is designed to familiarize students with the concepts and principles of analytics. It is targeted for graduate or MBA students who have little or no background in analytics. Therefore, it focuses on breadth of coverage rather than depth in any specific area.
Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent); or admission to the MAcc program. Not open to non-degree graduate students.

BSAD 8710 SUPPLY CHAIN MANAGEMENT (3 credits)
This course will focus on supply chain management as a key functional area of organizational success. Students will learn about current techniques used by supply chain practitioners to make strategic and tactical decisions that support the overall strategy and day-to-day operations of an organization. Students will develop an understanding of how supply chain decisions and appropriate metrics of performance can be utilized to improve the operational efficiency and effectiveness of an organization.
Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8720 STRATEGIC FINANCIAL MANAGEMENT (2 credits)
This course is intended to be advanced financial management. It will stress the theory and application of topics including, but not limited to capital budgeting, cash flow estimation, real options, capital structure, dividends and share repurchases, working capital management, budgeting, planning and forecasting, and lease management. The material covered in Strategic Financial Management will increase the student’s knowledge of how to strategically manage financial resources to increase the intrinsic value of the organization.
Prerequisite(s): For MBA students, BSAD 8630. For MAcc students, completion of all Master of Accounting (MAcc) foundation courses. Not open to non-degree graduate students.

BSAD 8725 INNOVATION VENTURES (3 credits)
This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with ENTR 4720, ITIN 4720, ITIN 8256, MGMT 4720, MKT 4720).
Prerequisite(s): Admission to a graduate program or by instructor permission.

BSAD 8736 ECONOMICS OF ENTREPRENEURSHIP (3 credits)
This course will review economic theories of entrepreneurship with special emphasis on Schumpeter’s theory of creative destruction. The main focus of the seminar will be on the “high-level” entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 4730, ECON 8436).
Prerequisite(s): ECON 2200 or permission of the instructor for all students.

BSAD 8766 SELLING IN AN ENTREPRENEURIAL CONTEXT (3 credits)
Successful entrepreneurs are able to identify unmet needs in the marketplace and then design and sell products or services that fulfill those needs. Sales effectiveness is essential for entrepreneurs because they must be able to build sustainable sales pipelines that ensure profitable growth while simultaneously addressing other pressing issues including financing, staffing, and product development. This course will focus on consultative solution-based sales fundamentals that can be applied in an entrepreneurial selling environment. (Cross-listed with ENTR 4760, MGMT 4760).
Prerequisite(s): GPA 2.5 or better; MKT 3100 with a "C-" or better; MKT 3310 with a "C-" or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8776 INTRODUCTORY MAVERICK VENTURE FUND (1 credit)
This course teaches the basics of venture capital, including, the topics of term sheets, due diligence and learning the perspectives of the entrepreneur and investor. Students in this course have the opportunity to observe more advanced students making investments, ranging from 5,000 dollars to 10,000 dollars plus. This course is the first of three, one-credit courses where students gain more advanced venture funding knowledge and application at each level. (Cross-listed with ENTR 4770).
Prerequisite(s): This course requires instructor approval. Students must apply and interview to take this course. Preference is given to students in their junior year, and must have three semesters of school left before graduating.

BSAD 8786 INTERMEDIATE MAVERICK VENTURE FUND (1 credit)
In this course, students source deals, listen to pitches, and select start-ups to be funded. Investments typically range from 5,000 dollars to 10,000 dollars plus. This course is the second in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4780).
Prerequisite(s): This course requires instructor approval. Students must have completed BSAD 8776 with a grade of C or better.
BSAD 8796 ADVANCED MAVERICK VENTURE FUND (1 credit)
This course applies advanced concepts of venture capital. Students will learn how to monitor and assist start-ups in the scaling process. Students learn how to leverage community partners to amplify investment opportunities. This course is the third in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4790).
Prerequisite(s): This course requires instructor approval. Students must have completed BSAD 8786 with a grade of C or better.

BSAD 8800 MBA PROJECT-FOCUSED CAPSTONE (2 credits)
In this Master's of Business Administration (MBA) required project-focused capstone course, students complete a service-learning consulting project for a non-profit or other type of organization. This consulting project will on the application of the knowledge and skills learned in the MBA program.
Prerequisite(s): Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 prior to Capstone and must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Not open to non-degree graduate students.

BSAD 8820 CONTEMPORARY BUSINESS ISSUES (1 credit)
This course exposes students to contemporary business issues that they are likely to experience as leaders. Students will examine and synthesize academic literature relevant to an instructor-approved specific topic associated with the contemporary business issue of focus. This course can be used for MBA students who need a one credit hour course to meet their credit hour graduation requirements.
Prerequisite(s): BSAD 8150 or permission of instructor. Not open to non-degree graduate students.

BSAD 8830 STRATEGY: DEVELOPING SUSTAINABLE COMPETITIVE ADVANTAGE (2 credits)
This course centers on the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. The primary objective of this course is to sharpen the ability of students to think strategically, to diagnose situations from a strategic perspective and to develop creative solutions to enable firms to achieve a sustainable competitive advantage.
Prerequisite(s): Students must successfully complete BSAD 8150 and BSAD 8210 before enrolling in this course. This course must be taken within the first 20 hours of the MBA program. Not open to non-degree graduate students.

BSAD 8880 ARTS AND THE EXECUTIVE (3 credits)
The course will provide the graduate student with an understanding of the organizational and managerial issues involved in an arts organization as the role of the arts in the business community.
Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8900 INDEPENDENT STUDY (1-6 credits)
In this independent study course, individual students are able to complete independent research in a business-related topic area under the supervision of a faculty member. Written independent study reports are expected to include appropriate academic citations and references.
Prerequisite(s): Graduate and permission of MBA Advisor. Requires submission of completed Independent Study Contract to MBA Advisor prior to registration. Not open to non-degree graduate students.

BSAD 8926 SPECIAL TOPICS IN BUSINESS (3 credits)
This business-focused special topics course is designed to provide students the opportunity to focus on a current or emerging topic in any area of business. An in depth exploration of the topic will be undertaken with the expectation that students will play an active role in the course and engage deeply with the material and concepts addressed within the focal topic area. (Cross-listed with BSAD 4920).
Prerequisite(s): Not open to non-degree graduate students.

BSAD 8990 THESIS (1-6 credits)
A research project, under the supervision of a faculty thesis adviser in the College of Business Administration, in which the student establishes his capacity to design, conduct and complete an independent, scholarly investigation of a high originality. The research topic and the completed project must be approved by the student's faculty thesis adviser and two other faculty members, one of whom must be from outside the program area.
Prerequisite(s): Permission of graduate adviser. Not open to non-degree graduate students.

CSCI 8000 ADVANCED CONCEPTS IN PROGRAMMING LANGUAGES (3 credits)
Logic/Declarative programming is an important programming paradigm in which problems are described in terms of the properties they possess. A result, in this style of programming many algorithmic elements, which explicitly must be articulated when writing programs in other programming languages, can be omitted. Core elements of logic programming play important roles in AI.
Prerequisite(s): CSCI 3320; CSCI 3660; CSCI 4220. Not open to non-degree graduate students.

CSCI 8010 FOUNDATIONS OF COMPUTER SCIENCE (3 credits)
This is a foundational course for students enrolled in the graduate program in computer science. The objectives are to introduce students to a large body of concepts so that they are better prepared for undertaking the core courses in the graduate program. It is assumed that student would have programmed in a high-level language and have exposure to basic college level mathematical concepts such as logarithms, exponents, sequences, and counting principles.
Prerequisite(s): Students are expected to have written programs using a high-level programming language and should understand basic mathematical concepts including exponents, logarithms, sequences, and counting principles. Not open to non-degree graduate students.

CSCI 8016 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)
This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with MATH 4010, MATH 8016, CSCI 4010).
Prerequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

CSCI 8040 LARGE SCALE NETWORK ANALYSIS ALGORITHMS (3 credits)
The course will provide a review of the properties of large complex network systems, such as those occurring in social networks, epidemiology and biological systems. We will discuss algorithms to analyze these properties, their implementations, their stability under information fluctuation and how information spreads through networks.
Prerequisite(s): Students should be comfortable w/ programming, have knowledge of data structures, preliminary graph algorithms, & linear algebra. Suggest Prep Courses: CSCI 4150 or CSCI 8156; CSCI 3320; MATH 4050 or Permission. Not open to non-degree graduate students.
CSCI 8050 ALGORITHMIC GRAPH THEORY (3 credits)
The overall goal is to introduce advanced concepts in graph theory, graph modeling, and graph algorithms and how they can be used to solve a wide range of problems in various application domains. The course introduces students to several applied path algorithms, clustering and partitioning techniques, network flow algorithms, and weighted matching algorithms. Other advanced concepts associated with complex networks include node centralities in graphs and community detection approaches. The course will also introduce students to key classes of graphs with a particular focus on the main classes of Perfect Graphs and their applications in scheduling, chip design, mobile computing, and Biomedical Informatics. (Cross-listed with MATH 8050).
Prerequisite(s): CSCI 3320 or CSCI 8325 and MATH 4150 or MATH 8156 or permission of instructor. Not open to non-degree graduate students.

CSCI 8060 ALGORITHMIC COMBINATORICS (3 credits)
This course includes classical combinatorial analysis graph theory, trees, network flow, matching theory, external problems, and block designs. (Cross-listed with MATH 8060).
Prerequisite(s): MATH 3100, CSCI 3100, MATH 8105 or CSCI 8105 or instructor's permission.

CSCI 8080 DESIGN AND ANALYSIS OF ALGORITHMS (3 credits)
The course provides students with an understanding of advanced topics in algorithms. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, dynamic programming, greedy algorithms, graph algorithms, and the theory of NP-Completeness. (Cross-listed with MATH 8080).
Prerequisite(s): CSCI 3320 or CSCI 8325 or equivalent. Not open to non-degree graduate students.

CSCI 8105 APPLIED COMBINATORICS (3 credits)
Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with MATH 8105, MATH 3100, CSCI 3100).

CSCI 8110 ADVANCED TOPICS IN ARTIFICIAL INTELLIGENCE (3 credits)
An in-depth study of one or more topics selected from: search techniques, knowledge representation, knowledge programming, parallel processing in Artificial Intelligence, natural language processing, image processing, current and future directions, etc. May be repeated with different topics, with permission of advisor.
Prerequisite(s): CSCI 4450 or CSCI 8456 or equivalent.

CSCI 8150 ADVANCED COMPUTER ARCHITECTURE (3 credits)
This course will provide an in-depth understanding of the key architectural concepts governing the design of state-of-the-art high-performance computers. It will introduce methods that are commonly used to trade-off the various architectural choices to design systems with the desired cost-performance requirements. The course will provide a systems level perspective to design. The emphasis will be on the cache, memory and I/O subsystems, system interconnects leading to distributed shared-memory multiprocessor systems. Multiprocessor clusters based on message passing and high-performance processor architecture will be covered. The course will also provide a brief overview of emerging system architectures including quantum computing and those used to facilitate machine learning applications.
Prerequisite(s): CSCI 4350, CSCI 4500 or equivalent with permission of the instructor. Not open to non-degree graduate students.

CSCI 8156 GRAPH THEORY & APPLICATIONS (3 credits)
Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 4150, MATH 4150, MATH 8156).
Prerequisite(s): MATH 2030 or permission of instructor.

CSCI 8160 INTRODUCTION TO VLSI DESIGN (3 credits)
Introduction to the principal concepts of VLSI design. Presentation of the hardware foundations, algorithmic mathematical and graph theoretical foundations of circuit layout. Topics discussed in digital design and computer architecture classes are studied at the actual layout design level such as datapath subsystems and array subsystems. Design methodology tools and testing. Hardware descriptions languages.
Prerequisite(s): CSCI 3320 or CSCI 8325, CSCI 3710 and CSCI 4350 or CSCI 8356. Not open to non-degree graduate students.

CSCI 8206 NUMERICAL METHODS (3 credits)
This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 4200, MATH 4200, MATH 8206).
Prerequisite(s): MATH 1970 and MATH 2050 and MATH 2350 with a C- or better or permission of instructor.

CSCI 8210 ADVANCED COMMUNICATIONS NETWORKS (3 credits)
Advanced study of communication networks, analysis of communication needs, special problems encountered in different types of networks, efficiency and traffic analysis and emerging hardware/software technologies. Detailed "hands-on" study of the TCP/IP networking protocols.
Prerequisite(s): CSCI 3550 or 8555 or equivalent. Not open to non-degree graduate students.

CSCI 8256 HUMAN COMPUTER INTERACTION (3 credits)
Human computer interaction is concerned with the joint performance of tasks by humans and machines; human capabilities to use machines (including learnability of interfaces); algorithms and programming of the interface; engineering concerns that arise in designing and building interfaces; the process of specification, design, and implementation of interfaces; and design trade-offs. (Cross-listed with CSCI 4250).

CSCI 8266 USER EXPERIENCE DESIGN (3 credits)
User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, ITIN 4260, ITIN 8266).

CSCI 8300 IMAGE PROCESSING AND COMPUTER VISION (3 credits)
This course introduces the computer system structures and programming methodologies for digital image processing and computer vision. The course will cover the mathematical models of digital image formation, image representation, image enhancement and image understanding. Techniques for edge detection, region growing, segmentation, two-dimensional and three-dimensional description of object shapes will be discussed. The course will concentrate on the study of knowledge-based approaches for computer interpretation and classification of natural and man-made scenes and objects.
Prerequisite(s): CSCI 1620 and CSCI 3320. Not open to non-degree graduate students.

CSCI 8306 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)
This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, MATH 4300, MATH 8306).
Prerequisite(s): MATH 2050 with a C- or better or permission of instructor.
CSCI 8316 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)
This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, MATH 4310, MATH 8316).
Prerequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

CSCI 8325 DATA STRUCTURES (3 credits)
This is a core that will cover a number of data structures such as tree, hashing, priority queues and graphs as well as different algorithm design methods by examining common problem-solving techniques. (Cross-listed with CSCI 3320)

CSCI 8326 COMPUTATIONAL OPERATIONS RESEARCH (3 credits)
Survey of computational methods used in the solution of operations research problems. Some topics may include scripting to guide optimization software, constraint programming, heuristics and metaheuristics for optimization, basic machine learning algorithms, and simulation. (Cross-listed with MATH 4320, MATH 8326, CSCI 4320).
Prerequisite(s): MATH 3200 or CSCI 1620, and MATH 4300 each with a grade of C- or better or permission of instructor.

CSCI 8340 DATABASE MANAGEMENT SYSTEMS II (3 credits)
This course is an in-depth coverage of database management systems. Students will learn important principles of query processing and query optimization, transaction processing, and various database systems architectures. After taking this course, students should also be able to identify useful resources to explore future developments in the area of database management systems.
Prerequisite(s): CSCI 4850 or CSCI 8856. Not open to non-degree graduate students.

CSCI 8350 DATA WAREHOUSING AND DATA MINING (3 credits)
This course is an in-depth coverage of data warehousing and data mining. This course starts with coverage of data warehousing (an enabling technology for data mining) and covers the entire data mining process and various data mining functionalities in detail. Students will get a chance to practice knowledge learned in the course to complete term projects related to data warehousing and/or data mining. After taking this course, students should also be able to identify useful resources to explore future developments in the area of data warehousing and data mining.
Prerequisite(s): CSCI 4850 or CSCI 8856. Not open to non-degree graduate students.

CSCI 8360 MACHINE LEARNING FOR TEXT (3 credits)
This course focuses on the fundamental techniques for extraction of various insights from text data which is ubiquitous on the Web, social media sites, emails, news articles, digital libraries, and other sources. The course topics will include concepts and techniques used by search engines to crawl, index, and rank web pages on the Web, machine learning techniques for categorization of news articles into different categories, sentiment and opinion analysis of social media chats, text summarization, and information extraction.
Prerequisite(s): Not open to non-degree graduate students.

CSCI 8366 FOUNDATIONS OF CYBERSECURITY (3 credits)
Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 4360, CYBR 8366)
Prerequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CSCI 8390 ADVANCED TOPICS IN DATA BASE MANAGEMENT (3 credits)
This course is an in-depth coverage of well-selected topic(s) in recent development of database management systems. Since new developments in DBMS are very diverse, when each time when this course is offered, it will focus on one or more specific topics, and the course can be taken multiple times for credit.
Prerequisite(s): CSCI 4850 or CSCI 8856. Not open to non-degree graduate students.

CSCI 8400 ADVANCED COMPUTER GRAPHICS (3 credits)
Computer graphics continues to play an important role in computer science. This course covers the mathematical foundations of three-dimensional representation and animation; ray tracing and path tracing rendering methods; using the graphical processing unit (GPU) for real-time applications; and concludes with simulation of natural phenomenon.
Prerequisite(s): Bachelors degree or permission from the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8410 DISTRIBUTED SYSTEMS AND NETWORK SECURITY (3 credits)
The course aims at understanding the issues surrounding data security, integrity, confidentiality and availability in distributed systems. Further, we will discuss various network security issues, threats that exist and strategies to mitigate them. This course will cover topics in cryptography, public key infrastructure, authentication, hashing, digital signatures, ARP protection, IP and IPSEC, IP Tables, SSL/TLS, firewalls, etc. (Cross-listed with CYBR 8410)
Prerequisite(s): CSCI 8366 or equivalent(s). Not open to non-degree graduate students.

CSCI 8420 SOFTWARE ASSURANCE (3 credits)
Software assurance is a reasoned, auditable argument created to support the belief that the software will operate as expected. This course is an intersection of knowledge areas necessary to perform engineering activities or aspects of activities relevant for promoting software assurance. This course takes on a software development lifecycle perspective for the prevention of flaws. (Cross-listed with CYBR 8420)
Prerequisite(s): CSCI 8836 OR by permission of the Instructor. Not open to non-degree graduate students.

CSCI 8430 TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT (3 credits)
This course examines in detail: the principles of a security architecture, access control, policy and the threat of malicious code; the considerations of trusted system implementation to include hardware security mechanisms, security models, security kernels, and architectural alternatives; the related assurance measures associated with trusted systems to include documentation, formal specification and verification, and testing, and approaches that extend the trusted system, into applications and databases and into networks and distributed systems.
Prerequisite(s): CSCI 8366 or equivalents, or instructor permission. Not open to non-degree graduate students.

CSCI 8440 INTRODUCTION TO PARALLEL COMPUTING (3 credits)
This course is an introduction to parallel computing, that is using multiple processors to execute algorithms. Topics discussed include: classification of parallel computers; shared-memory versus message passing; forms of parallelism; measures of performance; designing parallel algorithms; parallel programming and parallel languages; synchronization constructs; and operating systems for parallel computers. (Cross-listed with CSCI 4440)
Prerequisite(s): CSCI 4500, which may be taken concurrently, with C- or better.
CSCI 8450 ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING (3 credits)
The course will provide in depth study of the topics in natural language processing and understanding, such as syntax, lexical and computational semantics, natural language ambiguities and their disambiguation, logical form construction and inference. The course will survey state-of-the-art natural language processing toolkits and knowledge bases that boost the development of modern language processing and understanding applications.
Prerequisite(s): CSCI 3320 OR CSCI 3660 OR CSCI 4450. Not open to non-degree graduate students.

CSCI 8456 INTRODUCTION TO ARTIFICIAL INTELLIGENCE (3 credits)
An introduction to artificial intelligence. The course will cover topics such as machine problem solving, uninformed and informed searching, propositional logic, first order logic, approximate reasoning using Bayesian networks, temporal reasoning, planning under uncertainty and machine learning. (Cross-listed with CSCI 4450).

CSCI 8476 PATTERN RECOGNITION (3 credits)
Structures and problems of pattern recognition. Mathematics model of statistical pattern recognition, multivariate probability, Bay's decision theory, maximum likelihood estimation, whitening transformations. Parametric and non-parametric techniques, linear discriminant function, gradient-descent procedure, clustering and unsupervised learning, and feature selection algorithms. (Cross-listed with CSCI 4470)
Prerequisite(s): CSCI 1620 with C- or better, and MATH 2050. Recommended: MATH 4740/8746 or STAT 3800/8805.

CSCI 8480 MULTI-AGENT SYSTEMS AND GAME THEORY (3 credits)
This course covers advanced topics in the area of coordination of distributed agent-based systems with a focus on computational aspects of game theory. The main topics covered in this course include distributed constraint satisfaction, distributed constraint optimization, and competitive and cooperative game theory. (Cross-listed with MATH 4840)
Prerequisite(s): CSCI 4450 or CSCI 8456. Suggested background courses: CSCI 4480 OR CSCI 8325; CSCI 8080. Not open to non-degree graduate students.

CSCI 8486 ALGORITHMS FOR ROBOTICS (3 credits)
This course provides an introduction to software techniques and algorithms for autonomously controlling robots using software programs called controllers. Students will be taught how to program and use software controllers on simulated as well as physical robots. (Cross-listed with CSCI 4480).
Prerequisite(s): CSCI 3320 with C- or better. CSCI 4450/8456 is a recommended but not essential pre-requisite.

CSCI 8500 NUMERICAL LINEAR ALGEBRA (3 credits)
Topics covered in this course include error propagation, solutions of nonlinear equations, solutions of linear and nonlinear systems by various schemes, matrix norms and conditioning, and computation of eigenvalues and eigenvectors. (Cross-listed with MATH 8500).
Prerequisite(s): MATH 1970 and MATH 2350, or permission of instructor. Familiarity with computer programming is assumed.

CSCI 8506 OPERATING SYSTEMS (3 credits)
Operating system principles. The operating system as a resource manager; I/O programming, interrupt programming and machine architecture as it relates to resource management; memory management techniques for uni-programmed systems; process description and implementation; processor management (scheduling); I/O device, controller, and channel management; file systems. Operating system implementation for large and small machines. (Cross-listed with CSCI 4500).
Prerequisite(s): CSCI 3710, CSCI 3320/8325, MATH 1950, and CSCI 4350/8356 with C- or better.

CSCI 8510 NUMERICAL DIFFERENTIAL EQUATIONS (3 credits)
Topics covered in this course include interpolation and approximations, numerical differentiation, numerical integration, and numerical solutions of ordinary and partial differential equations. (Cross-listed with MATH 8510).
Prerequisite(s): CSCI 1620, MATH 2350, or permission of instructor. Familiarity with computer programming is assumed.

CSCI 8520 ADVANCED TOPICS IN OPERATIONS RESEARCH (3 credits)
Advanced treatment of a specific topic in the area of operations research not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with MATH 8520).
Prerequisite(s): MATH 4300 or MATH 8306 or CSCI 4300 or CSCI 8306 or permission of the instructor.

CSCI 8530 ADVANCED OPERATING SYSTEMS (3 credits)
State-of-the-art techniques for operating system structuring and implementation. Special purpose operating systems. Pragmatic aspects of operating system design, implementation and use.

CSCI 8555 COMMUNICATION NETWORKS (3 credits)
This course is designed to bring students up to the state of the art in networking technologies with a focus on Internet. It will cover the principles of networking with an emphasis on protocols, implementations and design issues. (Cross-listed with CSCI 3550)
Prerequisite(s): CSCI 3320 or CSCI 8325 with grade of C- or better AND (CSCI 2240 or CYBR 2250 with grade of C- or better)

CSCI 8556 NUMBER THEORY & CRYPTOGRAPHY (3 credits)
An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 4560, MATH 4560, MATH 8566).
Prerequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor.

CSCI 8590 FUNDAMENTALS OF DEEP LEARNING (3 credits)
This course is an introduction to deep learning, a branch of machine learning concerned with the development and application of neural networks. Deep learning trains the machine to learn patterns that it is presented with rather than requiring the human operator to define the patterns that the machine should look for. Deep learning is behind many recent advances in artificial intelligence, such as face recognition, speech recognition and autonomous driving. This course will cover the foundations of deep learning, learning theory, basic/advanced neural networks and problem domains of many selected applications.
Prerequisite(s): CSCI 3320 or instructor permission.

CSCI 8560 FAULT TOLERANT DISTRIBUTED SYSTEMS (3 credits)
This course is to study the theory and practice of designing computer systems in the presence of faulty components. Emphasizes the basics of how faults can affect systems and what is required to mask or compensate for their efforts.
Prerequisite(s): Not open to non-degree graduate students.

CSCI 8562 MOBILE COMPUTING AND WIRELESS NETWORKS (3 credits)
The objective of the course is to introduce contemporary issues in mobile computing and wireless networks. The course covers the differences between mobile computing and the traditional distributed computing paradigm, impediments of the mobile and wireless environments, problems and limitations due to such impediments, various network layers solutions, location management techniques, mobile IP, wireless LANs, wireless TCP, ad hoc networks, and sensor networks.
Prerequisite(s): CSCI 3550 or CSCI 8555. Not open to non-degree graduate students.
CSCI 8626 COMPUTER GRAPHICS (3 credits)
An introduction to the acquisition, manipulation and display of graphical information using digital techniques. Topics include discussion of the various hardware devices used for input and output, the classical algorithms and data structures used in manipulation of graphical objects, the user interface to the graphics system, and applicable standards. (Cross-listed with CSCI 4620).
Prerequisite(s): ISQA 3300 or CSCI 3320.

CSCI 8656 INTRODUCTION TO CLOUD COMPUTING (3 credits)
This course is an introduction to cloud computing. The students will learn about core concepts of cloud computing such as cloud models (IaaS, PaaS, SaaS, etc.), deployment models (public, private, hybrid), cloud infrastructures (compute, networking, storage), cloud services (VMs, serverless, object storage, cache, CDN, etc.), and big-data driven systems. This course will revisit essential topics in CS-related courses such as data structure, operating systems, and distributed systems and show how they are utilized and applied in diverse cloud computing technologies and systems including Hadoop, Spark, and distributed databases. After taking this course, students will have basic knowledge of cloud computing and hand-on experiences with diverse projects (including cloud system demos) that utilize diverse and heterogeneous cloud resources. (Cross-listed with CSCI 4650).
Prerequisite(s): Prior experience and background knowledge of networking and operating systems are preferred.

CSCI 8666 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)
This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, MATH 4660, MATH 8666).
Prerequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

CSCI 8700 SOFTWARE SPECIFICATIONS AND DESIGN (3 credits)
A continuation of the study of software engineering with an emphasis on early phases of software development, namely requirements engineering/specification and architectural design. Includes an in-depth study of practices for effective software requirements specification and architectural design, as well as formal specifications of software systems. Related topics such as metrics and support tools are also covered.
Prerequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8706 COMPILER CONSTRUCTION (3 credits)
Assemblers, interpreters and compilers. Compilation of simple expressions and statements. Analysis of regular expressions. Organization of a compiler, including compile-time and run-time symbol tables, lexical scan, syntax scan, object code generation and error diagnostics. (Cross-listed with CSCI 4700).

CSCI 8710 MODERN SOFTWARE DEVELOPMENT METHODOLOGIES (3 credits)
Designed to introduce students to advanced object technology and other modern methodologies for developing software systems. Intended for graduate students who have mastered the basic concepts and issues of software engineering. Course covers advanced object-oriented software development. The course also covers several offshoots of object technology, including: component-based software engineering, aspect-oriented software development, software product line engineering, service-oriented computing, etc.
Prerequisite(s): CSCI 4830 or CSCI 8836.

CSCI 8760 FORMAL METHODS IN SOFTWARE ENGINEERING (3 credits)
In the high consequence system domain, a primary objective of any construction technique employed is to provide sufficiently convincing evidence that the system, if put into operation, will not experience a high consequence failure or that the likelihood of such a failure falls within acceptable probabilistically defined limits. Systems for which such evidence can be provided are called high assurance systems. The objective of this course is to examine software-engineering techniques across the development life cycle that are appropriate for high assurance systems. The course will analyze the nature of the evidence provided by various techniques (e.g., does a given technique provide sufficiently strong evidence in a given setting).
Prerequisite(s): CSCI 8000 and CSCI 8836 or CSCI 4830

CSCI 8766 TOPICS IN MODELING (3 credits)
Selection of such topics as formulation and analysis of various models involving Markov chains, Markov processes (including birth and death processes), queues, cellular automata, difference and differential equations, chaotic systems and fractal geometries. (Cross-listed with CSCI 4760).
Prerequisite(s): MATH 2350 and MATH 4740 or MATH 8746.

CSCI 8790 ADVANCED TOPICS IN SOFTWARE ENGINEERING (3 credits)
The main objective of this course is (1) to introduce advanced topics in software engineering approaches and (2) to provide an overview and in-depth understanding of software development and maintenance techniques. Many well-known software implementation problems, associated programming tools, and analysis techniques are also covered. At the end of this course, the student should be able to apply the practical skills and approaches in solving non-trivial problems in diverse fields of study.
Prerequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8836 INTRODUCTION SOFTWARE ENGINEERING (3 credits)
Basic concepts and major issues of software engineering, current tools and techniques providing a basis for analyzing, designing, developing, maintaining and evaluating the system. Technical, administrative and operating issues. Privacy, security and legal issues. (Cross-listed with CSCI 4830).

CSCI 8856 DATABASE MANAGEMENT SYSTEMS (3 credits)
Basic concepts of data base management systems (DBMSs). The relational, hierarchical and network models and DBMSs which use them. Introduction to data base design. (Cross-listed with CSCI 4850).

CSCI 8876 DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS (3 credits)
This required course for undergraduate bioinformatics majors provides foundational knowledge on database aspects used in the field and an overview of their applications in bioinformatics, biomedical informatics, and health/clinical informatics. The course begins with a brief review of key concepts in computational molecular biology related to database search/development, database management systems, the difference between primary and secondary databases, and bioinformatics-related aspects of modeling and theory in computer science. The major focus is on the multiple challenges and aspects of bio-database development, search, and pattern discovery. The course uses problem-based learning to help students develop database management skills as they apply to high throughput "omics." data, the basics of data management, data provenance and governance, standards, and analysis through KDD-based workflows. This course will also consider the fundamentals of artificial intelligence and machine learning as they pertain to bioinformatics, from the perspective of database storage, I/O, and analysis. (Cross-listed with BIOI 4870)
Prerequisite(s): CSCI 3320 and BIOI 3500, or permission of instructor; BIOI 3500 can be taken concurrently. Prior completion of CSCI 4850 is strongly recommended but not required. Not open to non-degree graduate students.
CSCI 8910 MASTER OF SCIENCE CAPSTONE (3 credits)
The capstone course is to integrate coursework, knowledge, skills and experimental learning to enable the student to demonstrate a broad mastery of knowledge, skills, and techniques across the Master degree curriculum of Computer Science for a promise of initial employability and further career advancement. The course is designed to be in a student-centered and student-directed manner which requires the command, analysis and synthesis of knowledge and skills. Students may apply their knowledge and skill to a project which serves as an instrument of evaluation. Students are encouraged to foster an interdisciplinary research and cultivate industry alliances and cooperation in this course. This capstone course should be taken only after students have completed at least 3/4 of course requirements for the major.
Prerequisite(s): Master’s degree of Computer Science with course-only option (program III). Not open to non-degree graduate students.

CSCI 8920 ADVANCED TOPICS COMPUTER SCIENCE (3 credits)
An in-depth study, at the graduate level, of one or more topics that are not treated in other courses. May be repeated with different topics with permission of adviser.
Prerequisite(s): Permission of instructor; will vary with offering. Not open to non-degree graduate students.

CSCI 8950 GRADUATE INTERNSHIP IN COMPUTER SCIENCE (1-3 credits)
The purpose of this course is to provide students with opportunities to apply their academic studies in environments such as those found in business, industry, and other non-academic organizations. The student interns will sharpen their academic focus and develop better understanding of non-academic application areas.
Prerequisite(s): Permission of the graduate program chairperson and a minimum grade point average of 3.0 (B), with at most one grade below B, but not lower than C+ for all CS graduate classes. Not open to non-degree graduate students.

CSCI 8960 THESIS EQUIVALENT PROJECT IN COMPUTER SCIENCE (1-6 credits)
This course allows a graduate student to conduct a research project in computer science or a related area. The project is expected to place an emphasis on applied, implementations-based, or experimental research. The process for development and approval of the project must include: appointment of supervisory committee (chaired by project adviser), a proposal approved by the supervisory committee, monitoring of the project by the supervisory committee, an oral examination over the completed written product conducted by the supervisory committee, and final approval by the supervisory committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines.
Prerequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 8970 INDEPENDENT STUDY (1-3 credits)
Under this number a graduate student may pursue studies in an area that is not normally available in a formal course. The topics to be studied will be in a graduate area of computer science to be determined by the instructor.
Prerequisite(s): Permission of the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8980 GRADUATE SEMINAR (1 credit)
This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques and methodologies, and/or the current research results in the fundamental areas of computer science. Topics to be covered by the course will vary in different semesters.
Prerequisite(s): Permission of the Instructor. Not open to non-degree graduate students.

CSCI 8986 TOPICS IN COMPUTER SCIENCE (3 credits)
This is a variable topic course in computer science at the senior/graduate level. Topics not normally covered in the computer science degree program, but suitable for senior/graduate-level students can be offered. (Cross-listed with CSCI 4980).
Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

CSCI 8990 THESIS (1-6 credits)
A research project, designed and executed under the supervision of the chair and approval by members of the graduate student’s thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.
Prerequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 9410 ADVANCED TOPICS IN LOGIC PROGRAMMING (3 credits)
This course provides guidelines on how to conduct research in the field of logic programming, in particular logic programming under stable model (or answer set) semantics. Answer set programming is a common name of the field. Formal syntax, semantics, and proofs of correctness for logic programs will be considered. Elements of inductive and Prolog programming will also be introduced. Each advanced topic will be followed by how it has been applied in practice. Advanced applications of logic programming will be covered in detail.
Prerequisite(s): CSCI 8000 and doctoral student standing in Information Technology or the permission of the instructor.

CSCI 9420 INTELLIGENT AGENT SYSTEMS (3 credits)
This course covers the principles of interaction between agents in multi-agent systems using game theory. Relevant topics studied in this course include competitive games, statistical Bayesian games, cooperative games, and mechanism design. Students will have to implement projects related to the material studied in the course.
Prerequisite(s): CSCI 3320 or CSCI 8325 and CSCI 4450 or CSCI 8456. Not open to non-degree graduate students.

CSCI 9710 METHODS IN SOFTWARE ENGINEERING RESEARCH (3 credits)
This course provides guidelines on how to conduct research in the field of software engineering by presenting the research methods, classic readings, and development of theories and their application to real life problems. The main emphasis of the course is to provide opportunity for in-depth study of topics such as contemporary methods for software development.
Prerequisite(s): CSCI 8836 or equivalent course and doctoral student standing in Information Technology or permission of the instructor. Not open to non-degree graduate students.

CSCI 9810 RESEARCH FOUNDATIONS IN THEORETICAL COMPUTING (3 credits)
This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques, and methodologies, and/or the current research results in the fundamental areas of theoretic computing. The course will examine advanced research topics in computer science and engineering, including foundations of automata theory, computability, complexity analysis, computational logics and algorithmic analysis, hybrid dynamic systems theory, number theory, adaptation and learning theory, concepts and principles in computational geometry, stochastic processes, and random optimization. Each topic will be discussed with a perspective of research issues and directions. Active student participation in investigation of the research topics, survey of the current state-of-art, and identifying the future research insights is required. Students will take turn presenting their research results on specific topics. Topics to be covered by the course will vary in different semesters.
Prerequisite(s): The prerequisites of this course vary depending on the areas to be covered in the semester the course is offered. Good standing in Ph.D. program is required. Permission of the instructor may be required. Not open to non-degree graduate students.

CSCI 9860 RESEARCH FOUNDATIONS IN THEORETICAL COMPUTING (3 credits)
This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques, and methodologies, and/or the current research results in the fundamental areas of theoretic computing. The course will examine advanced research topics in computer science and engineering, including foundations of automata theory, computability, complexity analysis, computational logics and algorithmic analysis, hybrid dynamic systems theory, number theory, adaptation and learning theory, concepts and principles in computational geometry, stochastic processes, and random optimization. Each topic will be discussed with a perspective of research issues and directions. Active student participation in investigation of the research topics, survey of the current state-of-art, and identifying the future research insights is required. Students will take turn presenting their research results on specific topics. Topics to be covered by the course will vary in different semesters.
Prerequisite(s): The prerequisites of this course vary depending on the areas to be covered in the semester the course is offered. Good standing in Ph.D. program is required. Permission of the instructor may be required. Not open to non-degree graduate students.
ECON 8010 SEMINAR IN PUBLIC FINANCE (3 credits)
This course is designed to develop the tools of applied welfare economics and to use these tools to evaluate the expenditure and tax decisions of governments. The structure, effects and reform of the U.S. individual and corporate income taxes, social security and healthcare system will be emphasized. Government debt and deficits will also be discussed.
Prerequisite(s): ECON 3200 or ECON 8210 or BSAD 8100 or permission.

ECON 8020 ENVIRONMENTAL ECONOMICS AND MANAGEMENT (3 credits)
This course covers topics related to environmental economics and policy, with an emphasis on comparative policy analysis and business strategies towards the environment. (Cross-listed with BSAD 8020).
Prerequisite(s): ECON 2200 and ECON 2220 or BSAD 8180, or permission of the instructor. Not open to non-degree graduate students.

ECON 8050 ECONOMIC EDUCATION (3 credits)
A study and examination of economic principles and how they can be related to the teacher's classroom presentation. This course is designed to furnish the K-12 teacher with sufficient background and understanding to aid in the recognition of economic issues and the teaching of economic concepts and principles.
Prerequisite(s): No previous course work in economics. Not open to Economics majors.

ECON 8080 MONEY AND FINANCIAL INSTITUTIONS (3 credits)
This course examines the financial system (institutions, instruments, markets, practices, and public authorities), and the implementation of monetary policy that aims to maintain financial stability and support economic growth. The course discusses current events reported in the financial press and uses the analytic frameworks developed in class to analyze these issues. This course trains students to think systematically about the current state of the economy and use quantitative tools to analyze the interactions between monetary policy and the financial system.
Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 8200 SEMINAR IN MICRO ECONOMIC THEORY (3 credits)
The course covers major topics in microeconomic theory. The major topics covered are the theory of consumer behavior, theory of production and cost, theory of the firm, pure exchange economy, general equilibrium, and welfare theory.
Prerequisite(s): ECON 3200, ECON 3220 and ECON 8306 or permission.

ECON 8210 APPLIED MANAGERIAL ECONOMICS (3 credits)
This is a course in empirical economic modeling techniques deployed by economists and other business consultants in the use and public policy applications. There are four main themes: 1) techniques used in demand analysis and economic forecasting, 2) techniques used in production and cost analysis, 3) supply chain and trade analysis, and 4) analysis and measurement of competitive interactions.
Prerequisite(s): ECON 2200 or equivalent, or permission of the instructor.

ECON 8216 INDUSTRIAL ORGANIZATION (3 credits)
In this class we will examine why firms and industries behave the way that they do. We will explore why some industries face intense competition while others enjoy large profits, why some industries offer only bundles, and why some firms buy up their supply chain when others do not. This theoretical course will illuminate un-theoretical implications to your life and future business ventures. This course will use your economic knowledge, a bit of psychology (behavioral economics) and game theory to answer questions like "Why does everyone hate the cable company?" and "Why are CEOs given so many stock options?" (Cross-listed with ECON 4210).
Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 8220 SEMINAR IN MACRO THEORY (3 credits)
This course traces the development of macroeconomic theory from the classical point of view to current schools of thought. Keynesian, neo-Keynesian and neo-classical models are developed.
Prerequisite(s): ECON 3200 or ECON 8210 or BSAD 8100, ECON 3220, and ECON 8306, or permission.

ECON 8230 BUSINESS CONDITIONS ANALYSIS (3 credits)
This course is concerned with the statistical measurement and evaluation of general business conditions, as well as the adaptation of business policies to changing business conditions. Emphasis is placed upon the practical application of statistical analysis techniques to business situations within the framework of the aggregate economy.
Prerequisite(s): ECON 2200 and ECON 2220.

ECON 8246 LABOR ECONOMICS (3 credits)
The course will cover essential topics in Labor Economics including factors leading to equilibrium conditions in the labor market, human capital accumulation, discrimination in the workplace, compensation for undesirable work, mobility, unionization, and more. (Cross-listed with ECON 4240).
Prerequisite(s): ECON 2200 OR BSAD 8150

ECON 8290 RESEARCH METHODS IN ECONOMICS AND BUSINESS (3 credits)
Covers the methodology of economics: choosing a research topic, literature search tools, data source identification, data summary techniques, basic statistical data analysis using statistical packages, and clear economics writing. The student will become familiar with these techniques through text materials, journal studies, and completion of an empirical economics paper.
Prerequisite(s): ECON 3200, ECON 3220, or equivalents, or permission of the instructor. Not open to non-degree graduate students.

ECON 8300 ECONOMETRICS (3 credits)
The study of the underlying assumptions, techniques and applications of single and multiple equation regression analysis in economics.
Prerequisite(s): Basic Statistics, ECON 8306/ECON 4300, or permission. Not open to non-degree graduate students.

ECON 8306 QUANTITATIVE APPLICATIONS IN ECONOMICS AND BUSINESS (3 credits)
The study and application of modern quantitative techniques to problem-solving in economics and business. It is designed to help the student to translate verbal arguments in economics and business into their mathematical equivalents, to improve analytical skills, and to attain proficiency in marginal analysis, equilibrium analysis, static optimization, and comparative statics analysis. It covers topics such as exponential and logarithmic functions and their applications, linear algebra and its applications, derivatives and their applications, maximization of functions with one variable and multi variables, maximization with non negativity constraints, and integral calculus and its applications in economics and business. (Cross-listed with ECON 4300).
Prerequisite(s): ECON 2200 and ECON 2220, or BSAD 8180.

ECON 8310 BUSINESS FORECASTING (3 credits)
The course will cover forecasting tools and applications applied to business settings. The first half of the course will cover traditional Econometric forecasting methods and the second half of the course will focus on predictive analytics models and machine learning. Time in the computer lab will be focused on teaching students how to implement the models discussed in lectures. (Cross-listed with BSAD 8080).
Prerequisite(s): ECON 8320 (or equivalent programming experience) or permission of instructor. Not open to non-degree graduate students.

ECON 8316 BUSINESS INTELLIGENCE AND REPORTING (3 credits)
The course will teach students to use state-of-the-art Business Intelligence (BI) software to generate reports and information from data. BI software is used to inform decision-making in industries from transportation to medicine, from marketing to government, and is facilitated by rapidly increasing access to data in all industries. Students will learn to employ best practices in visualization and verbal communication as they are trained to create valuable insights from data and convey these insights to stakeholders. Additionally, the course will aid students in preparing for certification in the use of state-of-the-art BI software. (Cross-listed with ECON 4350).
Prerequisite(s): BSAD 2130 (or equivalent) OR Instructor Approval
ECON 8320 TOOLs FOR DATA ANALYSIS (3 credits)
The course will cover basic principles of programming languages, as well as libraries useful in collecting, cleaning and analyzing data to answer research questions. The course will utilize basic Economic principles and Econometric methods as inspiration for assignments and projects throughout the duration of the course, and will do so in a way that is accessible to non-Economists. This course is intended to introduce the student to the Python programming language as a tool for conducting data analysis. While the course uses Python, the student should be able to move to other languages frequently used in data analysis using the principles taught in this course.
Prerequisite(s): BSAD 2130 or equivalent; or instructor approval.

ECON 8325 NATURAL RESoURCE ECONoMICS (3 credits)
This course introduces students to the economics and management of Earth's natural resources. We address questions such as: Are we running out of natural resources? Are we using resources in a sustainable fashion? What role do markets play in resource use? We will address issues related to fossil-based resources, minerals, fisheries, water, land, forests and other associated topics. The course covers the basic theoretical framework for understanding the optimal rate of resource use, identifies the factors that determine the actual rate of use, and considers and evaluates various public policy prescriptions. (Cross-listed with ECON 4320).
Prerequisite(s): ECON 2200 and ECON 2220, BSAD 8150 or permission of instructor.

ECON 8330 DATA ANALYSIS FROM SCRATCH (3 credits)
Econometrics is routinely taught as an application class using a 'black box' like Stata or SAS to perform calculations. This class takes a different approach. Using the Python programming language, we build all estimators from scratch. Additionally, we introduce numerous non-parametric and simulation techniques. This approach to econometrics results in a stronger understanding of statistical assumptions and methods, a better understanding of when a method is appropriate, and stronger programming techniques. Furthermore, a deeper understanding of the underlying mechanics provides the student the ability to program custom procedures not already built into popular software packages. As part of the course, students will work with a community partner to answer a real question with data; MBA students should consult with their advisor about this course satisfying the project-focused capstone requirement.
Prerequisite(s): A multivariate or regression analysis course such as ECON 8300, ISQA 9130 or STAT 8436, and a programming class such as ECON 8320 or equivalent programming experience; or instructor approval.

ECON 8340 ECONOMICS OF TECHNOLOGY (3 credits)
Innovative dynamism is the economic system which brings us the new goods and processes that make life longer and better. We will examine how the system works, including: The role of the breakthrough inventor and the innovative entrepreneur; whether the system improves or hurts ethical behavior, culture, equality, and the environment; the costs to workers in terms of job loss, and the benefits to workers in terms of the creation of better jobs; how funding, regulatory, and patent policies affect innovative dynamism; and how innovative dynamism in medicine can result in more and faster cures for cancer and other diseases. (Cross-listed with ECON 4340).
Prerequisite(s): ECON 2200 or BSAD 8180 or permission of the instructor.

ECON 8456 DOMESTIC MONETARY THEORY AND POLICY (3 credits)
The course will introduce students to topics in money and banking, financial institutions, markets, financial instruments, and monetary theory in order to enhance financial decision making and enable students to effectively analyze economic news in media such as the Wall Street Journal, The New York Times, Business Week, Barrons, The Economist, and other related business publications. This knowledge will enable students to formulate their own views about the current economic environment, government policies, and responses to economic environments. (Cross-listed with ECON 4450).
Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.
ECON 8910 SPECIAL STUDIES IN ECONOMICS (3 credits)
This course will focus on issues or developments in a specific area of economics or business.
Prerequisite(s): Graduate student in good standing and as indicated for specific workshop or seminar.

ECON 8920 INDEPENDENT STUDY (1-3 credits)
Guided independent study and research.
Prerequisite(s): Graduate student in economics and permission of instructor.

ECON 8940 ECONOMIC INTERNSHIP (1-3 credits)
Guided internship in a firm or organization that makes use of, or extends, the student's skills in economics.
Prerequisite(s): Completion of at least nine hours of graduate level economics and permission of instructor.

ECON 8990 THESIS (1-6 credits)
An independent research project, written under the supervision of a graduate adviser in the department of economics. Approval of the topic and the completed project by departmental committee is required.
Prerequisite(s): Approval of the topic and the completed project by departmental committee is required.

ISQA 8016 BUSINESS INTELLIGENCE (3 credits)
This course intends to provide graduate students in-depth exposure to the growing field of business intelligence. Business intelligence (BI) consists of the set of concepts and techniques used to analyze business data in support of decision-making and planning. BI spans a number of areas of management information systems, including Decision Support Systems (DSS), Enterprise Resource Planning (ERP), Data Warehousing, Knowledge Management, Customer Relationship Management, Data Mining, and others.
Prerequisite(s): (ISQA 4150 or ISQA 8156) and ISQA 8040 and ISQA 8050. Not open to non-degree graduate students.

ISQA 8030 INFORMATION SYSTEMS AND ETHICS (3 credits)
This course gives you an introduction to organizations and the role that information and information systems play in supporting an organization's operations, decision-making processes, quality management, and strategic activities. The course provides an introduction to the management of information systems function, the strategic and regulatory issues of telecommunications, and ethical and legal issues related to information systems.
Prerequisite(s): Admission into the MS in MIS program.

ISQA 8040 AN OVERVIEW OF SYSTEMS DEVELOPMENT (3 credits)
The course presents an overview of the systems development lifecycle and database development. The course will focus on theory, current tools and techniques that the system developer can use to develop and document information systems. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8050 DATA ORGANIZATION AND STORAGE (3 credits)
The course will provide concepts of data organization, data storage, and data transfer through computer networks. The performance implications of various design decisions will be explored. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8060 RESEARCH IN MIS (3 credits)
This course covers research methods and their application to the development and evaluation of management information systems. Also covered is the relationship between organization theory and IS research.
Prerequisite(s): CIST 2500, CIST 2100, and ISQA 8040, or permission of the instructor.

ISQA 8070 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (1 credit)
This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.
Prerequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular course offerings.

ISQA 8080 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (3 credits)
This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.
Prerequisite(s): 1) Permission of the instructor. 2) Additional prerequisite courses may be required for particular course offerings.

ISQA 8086 SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS (1-5 credits)
This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ISQA 4000)
Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 8090 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (2 credits)
This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.
Prerequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular course offerings.

ISQA 8106 INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION (3 credits)
This course examines the frameworks and tools used to develop an organization's information system architecture. It provides the analytical skills and conceptual frameworks with which to make recommendations and decisions regarding the integration of information technology components into an information system architecture. (Cross-listed with ISQA 4100)
Prerequisite(s): CIST 2100 and ISQA 3310

ISQA 8136 INFORMATION TECHNOLOGY FOR DEVELOPMENT (3 credits)
Information Technology for Development (ITD) is the implementation and evaluation of information technology infrastructures to stimulate economic, social and human development. In this service-learning course, students will learn and apply ITD concepts for developing and adding value through IT by working with small business entrepreneurs in Omaha or rural Nebraska. Students will evaluate micro-business technology needs, prepare business technology plans, provide training, and implement appropriate solutions, to the extent possible within a semester class. (Cross-listed with ISQA 4130)
Prerequisite(s): Though not required, the following courses or their equivalent would provide the necessary background : CIST 1100, CIST 1300, ISQA 3210, ISQA 3310, ISQA 3400. Not open to non-degree graduate students.

ISQA 8156 ADVANCED STATISTICAL METHODS FOR ISAT (3 credits)
This course emphasizes the application and interpretation of statistical methods including design of experiments, analysis of variance, multiple regression, and nonparametric procedures and the use of statistical computer packages. The intent is to develop quantitative abilities needed for quantitatively intensive jobs and for advanced study in management information systems, computer science and information technology. (Cross-listed with ISQA 4150)
Prerequisite(s): CIST 2500 or equivalent (at least one course in statistics)
ISQA 8160 APPLIED DISTRIBUTION FREE STATISTICS (3 credits)
The primary objective of this course is to expose students to methods of analyzing data from non-normal populations including binomial tests, contingency tables, use of ranks, Kolmogorov-Smirnov type statistics and other selected topics. 
**Prerequisite(s):** Admission to MS program in Management Information Systems or permission of instructor. This course assumes prior knowledge with basic descriptive and inferential statistics from an introductory undergraduate course (e.g., CIST 2500).

ISQA 8166 INTRODUCTION TO ENTERPRISE RESOURCE PLANNING (3 credits)
Introduction to Enterprise Resource Planning (ERP) is designed to expose students to the primary enterprise application that forms the information systems (IS) infrastructure for most large organizations today. The primary purpose of this course is for students to gain an understanding of the enterprise wide, cross functional nature of ERP software. In the process of learning about ERPs, the students develop “hands on” experience with the largest and most well-known ERP application, SAP. (Cross-listed with ISQA 4160, SCMT 4160)
**Prerequisite(s):** CIST 2100 or equivalent. Not open to non-degree graduate students.

ISQA 8176 DIGITAL SUPPLY CHAIN & LOGISTICS (3 credits)
Global Supply Chains are being disrupted by digital transformation driven by emerging technologies such as IoT (internet of things) and AI/ML (Artificial Intelligence/Machine Learning). This course will take a closer look at global supply chains and logistics with an emphasis on the impact of digitalization. We will explore the typical global supply chain processes and how state-of-the-art and emerging technologies impact them. Thus, the class views global digital supply chains by integrating business and technological perspectives. The course will start with an overview of technologies relevant to digital supply chains. We will then discuss digitalization strategy and digital supply chains, fundamental GSCM (Global Supply Chain Management) processes and their potential for digitalization, and discussion of IT/software systems, IoT, AI/ML, Data Analytics/Visualization, and related facets that impact digital supply chains. The course will culminate with an integrated case study and/or research paper (graduate). (Cross-listed with ISQA 4170).
**Prerequisite(s):** Permission of instructor. It is preferable that students have taken an introductory supply chain class or have some experience in the transportation, logistics and supply chain management sector. Undergraduate students must have Junior standing.

ISQA 8180 ELECTRONIC COMMERCE (3 credits)
Electronic Commerce is the digital enablement of transactions between multiple parties. A multitude of technologies, tools and applications have brought about changes in business, and society that require careful consideration. Students are given an overview of electronic commerce business models and required to apply these to solve business problems or take on opportunities presented. They will cover topics such as social networking, electronic markets, and political and ethical issues associated with electronic commerce, and business plans for technology ventures. They will apply these concepts using Web 2.0 tools, mobile applications and website design assignments.

ISQA 8196 PROCESS REENGINEERING WITH INFORMATION TECHNOLOGY (3 credits)
Business process reengineering issues are examined. Reengineering concepts and methods are introduced. Additional special project(s) are required. SAP will be introduced. (Cross-listed with ISQA 4190)
**Prerequisite(s):** CIST 2500; prerequisite/co-requisite ISQA 4110.

ISQA 8206 INFORMATION AND DATA QUALITY MANAGEMENT (3 credits)
The course primarily focuses on developing an in-depth understanding of Data and Information Quality (DQ and IQ) concepts and issues. On completing this course students will be able to understand and use DQ and IQ Concepts in Information Systems projects, be able to recognize various patterns of Data and Design Deficiencies in Systems and be able to suggest appropriate DQ and IQ improvement plans in light of known deficiencies in systems. (Cross-listed with ISQA 4200)
**Prerequisite(s):** CIST 2500

ISQA 8210 MANAGEMENT OF SOFTWARE DEVELOPMENT (3 credits)
This course should encourage you to think critically about aspects of software development that make it difficult and strategies to mitigate these challenges. This course integrates concepts from software engineering, management science, psychology, and organizational behavior to identify, understand, and propose solutions to problems associated with software development. We examine and consider issues from various perspectives, such as the project manager, development team, senior management, and project sponsor. This course prepares students for various roles within a software development effort including leadership positions in software development. Students will practice software project management and agile methods of managing projects in a semester long team project using contemporary project and development methods.
**Prerequisite(s):** ISQA 8040 or equivalent. Not open to non-degree graduate students.

ISQA 8220 ADVANCED SYSTEMS ANALYSIS AND DESIGN (3 credits)
This course is a systems analysis and design course for systems and business analysts. The course presents an overview of object-oriented system analysis and design. The course will then focus on theory, best practices, and modern methodologies that analysts can use to analyze and design information systems.
**Prerequisite(s):** ISQA 8040 or (ISQA 4110 and ISQA 4120) or equivalent and ISQA 8050 or ISQA 3310 or equivalent

ISQA 8306 DATABASE ADMINISTRATION (3 credits)
This course is designed to give students an applied, practical introduction to database administration. Students will gain an understanding of the functioning of a database management system and its relationship to the computing environment in which it runs. They will learn the concepts, principles, and techniques necessary to carry out such functions as database object creation, storage management, capacity planning, performance tuning, backup and recovery, and security management. Each Semester the course will focus on one commercial database management system (DBMS), such as Oracle. (Cross-listed with ISQA 4300)
**Prerequisite(s):** ISQA 8040 or ISQA 3310 or CSCI 4850. Not open to non-degree graduate students.

ISQA 8310 IT INFRASTRUCTURE & CLOUD COMPUTING (3 credits)
This course provides a graduate-level introduction to the business and technical decisions around technical infrastructure. It covers topics related to computer and systems architecture and communications networks, with a focus on the technical and business decisions around technology. Students completing the course will be able to understand and design network infrastructure, evaluate cloud computing offerings, and communicate their decisions. The course covers hardware, software, and cloud computing technologies.

ISQA 8340 APPLIED REGRESSION ANALYSIS (3 credits)
The primary objective of this course is to expose students to regression models and applications with particular emphasis on applying these concepts to IT research. Topics to be discussed include: Foundations of regression analysis using least squares procedures; model formulation, stepwise regression, transformations; graphical methods, estimation; inference; influence diagnosis; matrix formulation, multicollinearity, time series, and nonlinear models.
**Prerequisite(s):** ISQA 4150 or ISQA 8156, not open to non-degree graduate students.
ISQA 8380 ENTERPRISE ARCHITECTURE AND SYSTEMS INTEGRATION (3 credits)
This course is designed to give students grounding in the concepts, issues, and tools needed to manage enterprise architecture, distributed systems & Internet-based environments. The goal of the course is to equip students to make the architecture and infrastructure-related decisions needed for successful development and use of contemporary client/server and Internet-based systems. Topics include middleware, architecture, XML, JSON, web services, service-oriented architecture, enterprise application integration, distributed computing services, Model View Controller (MVC) development frameworks.
Prerequisite(s): ISQA 8310 and ISQA 8050 or equivalent; permit required.

ISQA 8410 DATA MANAGEMENT (3 credits)
The course provides in-depth coverage of such areas as: the relational model, SQL data modeling, data quality management, database design, data warehousing, business intelligence, document and content management, NoSQL systems, and data governance. The course offers a mix of theoretical treatment and hands-on application. Current DBMS and data modeling software will be used.
Prerequisite(s): ISQA 8050 or equivalent, permit only.

ISQA 8420 MANAGING THE I.S. FUNCTION (3 credits)
The course provides a focus on the business management implications of the information explosion. The course is organized around a management audit of the information services activity to help present and future managers recognize and implement effective information services management.
Prerequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8450 NOSQL AND BIG DATA TECHNOLOGIES (3 credits)
The course will cover topics in the area of NoSQL and Big Data management. The course is intended to get students familiarized with NoSQL and Big Data technologies, explore how these database technologies differ conceptually from traditional relational database technologies, understand their applications, uses, advantages, and disadvantages, and provide hands-on experience with NoSQL and Big Data databases. The course offers a mix of theoretical treatment and hands-on application of the discussed NoSQL and Big Data technologies.
Prerequisite(s): Prior exposure to data management is expected. The preq is: ISQA 3310, ISQA 8040, CSCI 4850, or work experience that has given you a comparable grounding in database concepts and technologies; in this case permission by the instructor is needed.

ISQA 8460 INTERNET OF THINGS (IOT), BIG DATA AND THE CLOUD (3 credits)
This course introduces the Internet of Things (IoT). It provides an overview of a number of technologies and research disciplines that enable the Internet to reach out into the real world of physical objects. In the future, the "Things" in question may have identities and virtual personalities, operating in smart spaces using intelligent interfaces to connect and communicate with the social, environmental, and user context.
Prerequisite(s): Basic Web Development using HTML/CSS and some MVC framework. The equivalent of two semester exposure to programming.

ISQA 8525 GRAPHICAL USER INTERFACE DESIGN (3 credits)
This course is an introduction to interaction design with a primary emphasis on designing usable and useful computer interfaces. Students will learn the principles of interface design grounded in a fundamental understanding of human cognitive processes. They will learn how end-users develop and use mental models of interaction and will apply this knowledge to the design of interfaces for real-world applications. A design project will challenge students to plan their own designs, to develop interfaces and to integrate them into a working application prototype, to test their application with real users, and to effectively communicate the overall results. (Cross-listed with ISQA 3520)
Prerequisite(s): CIST 1300

ISQA 8546 COMPUTER SECURITY MANAGEMENT (3 credits)
The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST4540, CYBR 4540, CYBR 8546)
Prerequisite(s): IASC 4360 or permission of the instructor.

ISQA 8560 INFORMATION WARFARE AND SECURITY (3 credits)
This course will study the nature of information warfare, including computer crime and information terrorism, as it relates to international, national, economic, organizational, and personal security. Information warfare policy and ethical issues will be examined.
Prerequisite(s): CIST 2100 or BSAD 8030 or ISQA 8030, or permission of instructor required.

ISQA 8570 INFORMATION SECURITY POLICY AND ETHICS (3 credits)
The course will cover the development and need for information security policies, issues regarding privacy, and the application of computer ethics. (Cross-listed with IASC 8570)
Prerequisite(s): CIST 2100 or BSAD 8030, or permission of instructor.

ISQA 8580 SECURITY RISK MANAGEMENT AND ASSESSMENT (3 credits)
The purpose of this course is to prepare the student for managing information security at the organizational level. This course will combine concepts from strategic management, decision science and risk analysis to prepare the student to integrate security issues into an organizational strategic planning process.
Prerequisite(s): CIST 2100 or ISQA 8030. Not open to non-degree graduate students.

ISQA 8600 FROM DATA TO DECISIONS (3 credits)
This course focuses on inquiry-driven data preparation and exploratory analysis skills for audience-driven, decision-oriented data analysis. Students gain experience in data evaluation, cleaning, documentation, and exploration with basic descriptive statistics and visualizations.

ISQA 8700 DATA MINING: THEORY AND PRACTICE (3 credits)
This course provides students theoretical issues as well as practical methods for conducting data mining process, including the implementation of a warehouse. After covering the essential concepts, issues, techniques to build an effective data warehouse, this course emphasizes the various techniques of data mining, such as association, classification, clustering and prediction for on-line analyses within the framework of data warehouse architectures. This course also promotes students to conduct a real-life data analyzing project in Big Data Era.
Prerequisite(s): ISQA 8050 and ISQA 8310 and ISQA 8040, not open to non-degree graduate students.

ISQA 8720 APPLIED STATISTICAL MACHINE LEARNING (3 credits)
This course focuses on advanced techniques in the analysis and evaluation of data, using both supervised and unsupervised methods. It covers the main types of statistical learning models needed for complex data analytics problems, as well as aspects of model development and optimization. Topics include: Linear and Non-Linear Regression Models, Classification, Resampling Methods, Model Selection and Regularization, Decision Trees, Model Boosting and Bagging, Support Vector Machines, and Clustering methods. This is an applied, hands-on course that will use a state-of-the-art statistical tool to implement the discussed approaches in assignments and a course project and focuses on the understanding and application of the concepts.
Prerequisite(s): ISQA 8156 (B- grade or better) and the following topics: The equivalent of two classes of statistics and/or advanced mathematics and a minimum of one semester of applying R in courses and/or projects
ISQA 8736 DECISION SUPPORT SYSTEMS (3 credits)
This course examines a set of information systems which specifically support managerial decision makers: Decision Support Systems, Group Decision Support Systems, Executive Information Systems, Data Warehouses, Expert Systems, and Neural Networks. This course explores the development, implementation, and application of these systems, how these systems can be applied to current business problems, as well as how organizational issues impact the implementation and usage of these systems. (Cross-listed with ISQA 4730)
Prerequisite(s): ISQA 8030 or equivalent.

ISQA 8750 STORYTELLING WITH DATA (3 credits)
This course provides an in-depth study of how to build a compelling story using data for business professionals to make winning arguments, it provides an overview of a number of technologies and research disciplines that enabled the power of data visualization. Data visualization is critical to managing large volumes of data, and can be defined as the science (analytical) and art (design) of manipulating and presenting data for expression and cognitive recognition. Data visualization involves using data in a way that humans can clearly understand, supporting efforts by organization to gain competitive advantage by changing operations, decision-making, and strategic initiatives.
Prerequisite(s): CSCI 1620 or equivalent. Admission into the UNO graduate program, basic web development or work experience with comparable grounding in programing, scripting concepts & technologies and permission by the instructor is needed.

ISQA 8810 INFORMATION TECHNOLOGY PROJECT FUNDAMENTALS (3 credits)
The course will integrate concepts and techniques from management science, psychology, organizational behavior, & administration change to identify, understand & propose solutions to the problems of project management. The purpose of the course is to prepare the graduate for project participation and leadership.
Prerequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8820 PROJECT RISK MANAGEMENT (3 credits)
This course will cover project risk management, i.e., the process of measuring or assessing risk in projects and then developing strategies to manage the risk. The topics covered will include: Risk Management Planning, Risk Identification, Quantitative Risk Analysis, Qualitative Risk Analysis, Risk Response Planning, and Risk Monitoring and Control will be covered in detail. Students will learn how to apply and use the tools and techniques needed to perform these project management tasks. A collection of readings on risk management from the empirical literature coupled with risk management standards from organizations such as IEEE and the Project Management Institute (PMI) will be used to provide the student with an excellent foundation in risk management and control.
Prerequisite(s): ISQA 8810 or permission of instructor.

ISQA 8900 INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS (1-3 credits)
The content of the course will vary. However, both the student and the faculty member must sign an Independent Research Agreement and file it with the Master of Science in Management Information Systems Graduate Program Committee before registration for the course. This agreement will detail the project, the schedule for its completion, the form of the output, the method of evaluation and other relevant information pertaining to the project.
Prerequisite(s): Permission of instructor, and at least 12 hours of course work toward a M.S. in MIS should be completed.

ISQA 8910 INFORMATION SYSTEMS INTERNSHIP (1-3 credits)
Information Systems Internship provides students with an opportunity for practical application and further development of knowledge and skills acquired in the MS MIS degree program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.
Prerequisite(s): Permission of the instructor required. Students must have completed a minimum of 18 credit hours towards the MS MIS program. Not open to non-degree graduate students.

ISQA 8950 CAPSTONE MANAGEMENT INFORMATION SYSTEMS (3 credits)
The course consists of a student executed Information Systems design project providing an in-depth practical experience. It typically covers system conceptualization, analysis, and design. It may also involve prototyping. The project will typically not include the actual implementation of the system. This course replaces the MS in MIS comprehensive exam requirement.
Prerequisite(s): Students must have 6 credit hours or fewer left in the program. Students must have completed all core classes. Not open to non-degree graduate students.

ISQA 8990 THESIS (1-6 credits)
This course is a research project designed and executed under supervision of a thesis supervisory committee. Student will develop skills, including the ability to design, conduct, analyze, and report results in writing (i.e., thesis) of an original, independent, scientific investigation. The student’s thesis supervisory committee must approve the project plan.
Prerequisite(s): ISQA 8060 research methods or equivalent. Graduate major in MIS and approval of the thesis supervisory committee. Not open to non-degree graduate students.

ISQA 9010 FOUNDATIONS OF INFORMATION SYSTEMS RESEARCH (3 credits)
This course covers the following areas: (1) information systems as an academic discipline including classic readings in IS and its reference disciplines, (2) theory development and evaluation, (3) research methods applicability in IS.
Prerequisite(s): Doctoral student standing in the information systems areas or with the permission of the instructor; ISQA 8060 or equivalent. Not open to non-degree graduate students.

ISQA 9020 TECHNICAL AND PROCESS ISSUES IN INFORMATION SYSTEMS RESEARCH (3 credits)
This seminar is a survey course on the technical and process issues in information systems research. The course balances the acquisition of knowledge about the conduct of research in technical and process issues with the application of that knowledge to research on information systems. Major topics include: software engineering, programming, data base systems, decision support systems, data warehousing and mining systems, object-oriented systems, adaptive and expert systems, client-service systems, information filtering and multimedia systems, information agents, mobile computing, telecommunications, and electronic commerce.
Prerequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 9010 is recommended. Not open to non-degree graduate students.

ISQA 9030 BEHAVIORAL AND ORGANIZATIONAL ISSUES IN INFORMATION SYSTEMS (3 credits)
This seminar is a survey course on behavioral and organizational issues in information systems research. The course balances the acquisition of knowledge about the conduct of research in behavioral and organizational issues with the application of that knowledge to research on information systems. The course is intended for doctoral students in Information Technology or related areas.
Prerequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 9010 is recommended. Not open to non-degree graduate students.
ISQA 9120 APPLIED EXPERIMENTAL DESIGN AND ANALYSIS (3 credits)
Constructing and analyzing designs for experimental investigations; completely randomized, randomized complete block and Latin-square designs, split-plot designs, incomplete block designs, confounded factorial designs, nested designs, and treatment of missing data, comparison of designs. The course will use computer-assisted analysis and graphic techniques included in software such as Statistical Analysis Software (SAS) or Statistical Package for Social Sciences (SPSS) or R (a programming language that provides a wide variety of statistical and graphical techniques. Similar to the S language).
Prerequisite(s): ISQA 4150 or ISQA 8156 or consent of instructor. Not open to non-degree graduate students.

ISQA 9130 APPLIED MULTIVARIATE ANALYSIS (3 credits)
The use of multivariate analysis for solving business problems. Multivariate Analysis of Variance (MANOVA), factor, cluster, and discriminant analysis techniques in IT research. The course will use computer-assisted analysis and graphic techniques included in software such as Statistical Analysis Software (SAS) or Statistical Package for Social Sciences (SPSS) or R (A programming language that provides a wide variety of statistical and graphical techniques. Similar to the S language).
Prerequisite(s): ISQA 4150 or ISQA 8156 or consent of instructor. Not open to non-degree graduate students.

ISQA 9150 RESEARCH IN INFORMATION TECHNOLOGY (3 credits)
Research methods in Information Technology involves an overview of the research process specific to problems in IT. Students will learn about theories in IT relevant to their areas of research. They will identify key components of research problems in IT, understand different types of research processes, develop research questions, and design research projects. They will learn to construct research instruments that enable them to collect data. They will also learn about the different data collection and analysis tools and techniques. As part of this course, students will take the CITI training and achieve the research readiness they need to succeed in the PhD in IT program.
Prerequisite(s): Permission of the instructor. Not open to non-degree graduate students.

ISQA 9900 ADVANCED RESEARCH IN INFORMATION SYSTEMS (3 credits)
This course provides a format for exploration of advanced research areas that are of interest to doctoral students in the information systems and/or information technology area. The specific research area will vary from semester to semester, in keeping with research interests of faculty and students. Examples of areas include, but are not limited to, e-commerce technology, mobile commerce, intelligent agents e-enabled decision support, electronic collaboration, computer-mediated communications, human-computer interaction and information assurance.
Prerequisite(s): Admission to PhD program in Information Technology or permission of instructor

ITIN 8000 TECHNOLOGY & INNOVATION STUDIO (3 credits)
ITIN 8000 is a studio course that provides a foundation to incoming MSc ITIN students from all disciplines through self-guided modules covering topics from technology, innovation, design, and computing. Students will use the modules to practice applying and mastering skills in a self-guided collaborative environment. Each module will consist of three levels of difficulty. Student performance will be assessed by students' personal progress and skills improvement as shown by them completing increasingly difficult levels of the modules. Students will be graded on a satisfactory/unsatisfactory basis. The class requires in-person participation and attendance.
Prerequisite(s): Students in the MS in IT Innovation program must register during their first three terms. Not open to non-degree graduate students.

ITIN 8006 SPECIAL TOPICS IN IT INNOVATION (3 credits)
This course is designed to acquaint students with issues which are current to the field or emerging trends in the IT Innovation area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ITIN 4000).
Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ITIN 8100 INTERMEDIA (3 credits)
This is an ongoing course that brings together students of the arts and students of scientific disciplines in order to facilitate and promote the creation of intermedia art, and to further explore shared resources, joint research, and exhibition/performance opportunities.
Prerequisite(s): Graduate Standing

ITIN 8210 DESIGN SCIENCE AND THEORY DEVELOPMENT (3 credits)
The purpose of this course is to help students understand theory, theoretical contributions, and design science. Students will approach such questions as: What is a theory? What makes a good theory? Why are theories just theories and not laws? What is not a theory? Following this introduction, we explore design science as a research methodology and Information Technology design theories. Ultimately, students create their own new studies around some design concept.
Prerequisite(s): Graduate standing / permission of the instructor

ITIN 8220 DESIGN PROCESS (3 credits)
Inter-disciplinary design teams will work together to design and innovate products of the future. The design projects in the course are developed to directly address a problem brought forward by a technology company in the Omaha area in order to provide students with a design experience that directly impacts real-world product development. Students will focus on the technological (interface), physical (ergonomics) and aesthetic quality of design, and will learn how to conduct rigorous user studies in a laboratory setting. Teams will be cross disciplinary and consider all aspects of the design, creation, testing, and fabrication of the products.

ITIN 8256 INNOVATION VENTURES (3 credits)
This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with BSAD 8726, ENTR 4720, ITIN 4720, MGMT 4720, MKT 4720).
Prerequisite(s): Admission to a graduate program or instructor permission.

ITIN 8266 USER EXPERIENCE DESIGN (3 credits)
User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, CSCI 8266, ITIN 4260).

ITIN 8300 RESEARCH FOUNDATIONS (3 credits)
This course serves as an introduction to research literature and research methodology in the innovation and creativity research domain. Students are introduced to skills, methodological issues, and bibliographic resources to enhance their ability in critically evaluating and conducting research in the IT Innovation field. Through a series of readings, in-class discussions, and lectures the student will select and define a research question, explore the various types of research designs and complete a literature review. This course is structured to make research meaningful and significant and enable students to write effectively.
Prerequisite(s): CIST 2500 or equivalent
ITIN 8900 INDEPENDENT STUDIES (1-3 credits)  
A variable credit course for the graduate student who will benefit from independent reading assignments and research type problems. Independent study makes available courses of study not available in scheduled course offerings. The student wishing to take an independent study course should find a faculty member willing to supervise the course and then submit, for approval, a written proposal (including amount of credit) to the IT Innovation Graduate Program Committee Chair at least three weeks prior to registration.  
Prerequisite(s): Written permission required  

ITIN 8910 INTERNSHIP (1-3 credits)  
The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the MS in IT Innovation program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.  
Prerequisite(s): Students must have completed a minimum of 12 credit hours towards the MS in ITIN program. Instructor permission is required to register. Not open to non-degree graduate students.  

ITIN 8940 ITIN CAPSTONE I (3 credits)  
The purpose of the Information Technology Innovation (ITIN) capstone courses is for ITIN majors to explore, identify, evaluate, design, construct and implement a new innovative product that leverages information technology and includes an interdisciplinary field of study. The capstone is the culmination product of the specific various disciplines a student has selected as the unique combination for his or her degree. This course serves as part one of the capstone project for the ITIN Masters degree. The two courses for the ITIN capstone project are intended to be completed in two consecutive semesters (Fall/Spring).  
Prerequisite(s): Must be pursuing ITIN MS degree and have completed: two sections of ITIN 8000, ITIN 8220, 8300, and 3 hours of upper division courses in interdisciplinary area identified in the student’s course plan. Not open to non-degree graduate students.  

ITIN 8950 ITIN CAPSTONE II (3 credits)  
The purpose of the ITIN capstone courses is for ITIN majors to explore, identify, evaluate, design, construct and implement a new innovative product that leverages information technology and an interdisciplinary field. The capstone is the culmination product for prospective graduate and utilizes the discipline(s) a student has selected as the unique combination for his or her degree. This course serves as part two of the capstone project for the Information Technology Innovation (ITIN) program. The two courses for the ITIN capstone project are taught in two consecutive semesters.  
Prerequisite(s): Must be pursuing ITIN MS degree and have completed: three sections of ITIN 8000, ITIN 8220, 8300, 8940 and 6 hours of upper division courses in interdisciplinary area identified in the student’s course plan. Not open to non-degree graduate students.  

ITIN 8960 THESIS EQUIVALENT PROJECT IN IT INNOVATION (1-6 credits)  
This course allows a graduate student to conduct a research project in IT Innovation or a related area. The project is expected to place an emphasis on applied, implementations-based, or experimental research. The process for development and approval of the project must include: 1) apply for eligibility to take ITIN 8960 with a chosen faculty advisor, 2) register for 6 credits of ITIN 8960 to complete the chosen project, 3) participate in a public oral defense of their project work to the Graduate Concentration Committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines.  
Prerequisite(s): Permission of graduate advisor. Not open to non-degree graduate students.  

ITIN 8990 THESIS (1-6 credits)  
This course is required for the Master of Science degree in the MS in IT Innovation Program. The purpose of this course is to conduct original research in IT Innovation, under supervision of a faculty member, culminating in a paper document that represents the student’s competency in their chosen field, as well as scholarly contributions. With consultation from their committee, MS in IT Innovation thesis students should be prepared to independently complete the writing of their thesis and successfully defend their thesis.  
Prerequisite(s): Graduate major in ITIN and approval of the Thesis Advisory Committee.  

ITIN 9300 SOCIAL COMPUTING AND ITS APPLICATIONS (3 credits)  
It is indisputable that social media and the Internet more broadly reshaped information disbursement and processing. Digital participation and communication has become the ‘new normal’ and the dividing line between off- and online communities is increasingly blurred. This leads to specific challenges in the extraction and analysis of online social media data, and the management of new communication.  
Prerequisite(s): Open to all currently-admitted doctoral students. Students should have a technical aptitude; experience with at least one web scripting language, (e.g. PHP, rails, python etc) is helpful. Experience with JSON is advantageous but not essential.  

MATH 8016 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)  
This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice’s Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post’s theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with CSCI 4010, CSCI 8016, MATH 4010).  
Prerequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor’s permission.  

MATH 8036 MODERN ALGEBRA (3 credits)  
Algebra is the study of mathematical manipulations that preserve something (like equality - when solving equations). The areas in which Algebra finds application are quite diverse, from Ancient Greek Geometry through to Modern Information Protection and Security (error correcting codes, data compression, and cryptography). This course begins with topics that should be familiar (such as ruler-and-compass constructions, and modular arithmetic) and builds upon this foundation through polynomial rings up to finite fields and basic group theory. (Cross-listed with MATH 4030).  
Prerequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better  

MATH 8050 ALGORITHMIC GRAPH THEORY (3 credits)  
The overall goal of the course is to introduce advanced concepts in graph theory, graph modeling, and graph algorithms and how they can be used to solve a wide range of problems in various application domains. The course introduces students to several advanced path algorithms, clustering and partitioning techniques, network flow algorithms, and weighted matching algorithms. Other advanced concepts associated with complex networks include node centrality in graphs and community detection approaches. The course will also introduce students to key classes of graphs with a particular focus on the main classes of Perfect Graphs and their applications in scheduling, chip design, mobile computing, and Biomedical Informatics. (Cross-listed with CSCI 8050).  
Prerequisite(s): CSCI 3320 or CSCI 8325 and MATH 4150 or MATH 8156 or permission of instructor. Not open to non-degree graduate students.
MATH 8056 LINEAR ALGEBRA (3 credits)
Linear algebra is extensively utilized in the mathematical modeling of many natural phenomena. Many scientific and engineering disciplines, such as data science, chemical engineering and biology, make extensive use of the theory and techniques commonly present in basic to advanced linear algebra courses. The goal of this course is to help students to grasp a solid theoretical understanding of vectors, vector spaces, inner product spaces, linear transformations, eigenvalues, canonical forms, complex vectors, matrices, and orthogonality. By going through the materials in a mathematically rigorous way, students will develop deeper and more accurate intuitions of the basic concepts in linear algebra. Consequently, the applications of linear algebra will become much more transparent. (Cross-listed with MATH 4050).
Prerequisite(s): MATH 2050 with a grade of C- or better; MATH 2030 or MATH 2230 or equivalent with a grade of C- or better; or permission

MATH 8060 ALGORITHMIC COMBINATORICS (3 credits)
This course includes classical combinatorial analysis graph theory, trees, network flow, matching theory, external problems, and block designs. (Cross-listed with CSCI 8060).
Prerequisite(s): MATH 3100, CSCI 3100, MATH 8105 or CSCI 8105 or instructor's permission.

MATH 8080 DESIGN AND ANALYSIS OF ALGORITHMS (3 credits)
The course provides students an understanding of advanced topics in algorithms. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, dynamic programming, greedy algorithms, graph algorithms, and the theory of NP-Completeness. (Cross-listed with CSCI 8080).
Prerequisite(s): CSCI 3320 or CSCI 8325 or equivalent. Not open to non-degree graduate students.

MATH 8105 APPLIED COMBINATORICS (3 credits)
Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with CSCI 3100, CSCI 8105, MATH 3100).

MATH 8116 ABSTRACT ALGEBRA I (3 credits)
An introduction to group theory. Various classes of group are studied: symmetric groups, abelian, cyclic, and permutation groups. Basic tools are developed and used: subgroups, normal subgroups, cosets, the Lagrange theorem, group homomorphisms, quotient groups, direct products, and group actions on a set. The course culminates with the Sylow theorems in finite group theory. The theory is illustrated with examples from geometry, linear algebra, number theory, crystallography, and combinatorics. (Cross-listed with MATH 4110).
Prerequisite(s): MATH 4050/MATH 8056 with a C- or better or MATH 4560/MATH 8566 with a C- or better or permission of instructor

MATH 8126 ABSTRACT ALGEBRA II (3 credits)
An introduction to ring and field theory. Various classes of commutative rings are considered including polynomial rings, and the Gaussian integers. Examples of fields include finite fields and various extensions of the rational numbers. Concepts such as that of an ideal, integral domain, characteristic and extension field are studied. The course culminates with the Sylow theorems in finite group theory. The theory is illustrated with examples from geometry, linear algebra, number theory, crystallography, and combinatorics. (Cross-listed with MATH 4110).
Prerequisite(s): MATH 4110/MATH 8116 with a C- or better or permission of instructor

MATH 8156 GRAPH THEORY & APPLICATIONS (3 credits)
Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 4150, CSCI 8156, MATH 4150).
Prerequisite(s): MATH 2030 or permission of instructor.

MATH 8206 NUMERICAL METHODS (3 credits)
This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 4200, CSCI 8206, MATH 4200).
Prerequisite(s): MATH 1970 and MATH 2050 and MATH 2350 with a C- or better or permission of instructor.

MATH 8235 INTRODUCTION TO ANALYSIS (3 credits)
This course provides a theoretical foundation for the concepts of elementary calculus. Topics include real number system, topology of the real line, limits, functions of one variable, continuity, differentiation. (Cross-listed with MATH 2330).
Prerequisite(s): MATH 1960 and MATH 2230 each with a grade of C- or better.

MATH 8236 MATHEMATICAL ANALYSIS I (3 credits)
Provides a theoretical foundation for the concepts of classical calculus. Topics include ordered fields, the real and complex number system, basic metric space topology, numerical sequences and series, limits and continuity in metric spaces, monotonic functions, differentiation, (functions of several variables included). (Cross-listed with MATH 4230).
Prerequisite(s): MATH 3230/MATH 8235 or equivalent with a grade of C- or better.

MATH 8246 MATHEMATICAL ANALYSIS II (3 credits)
Provides a theoretical foundation for the concepts of classical Calculus (vector calculus included). Topics include sequences and series of functions, uniform convergence, power series, Fourier series, multivariable real differential and integral calculus, the Implicit Function Theorem, integration of different forms, and the important formulas, connecting those integrals, due to: Green, Gauss, Riemann, and Ostrogradski. (Cross-listed with MATH 4240).
Prerequisite(s): MATH 4230/MATH 8236 with a grade of C- or better.

MATH 8250 PARTIAL DIFFERENTIAL EQUATIONS (3 credits)
Partial differential equations (PDEs) are fundamental in the application of mathematics to science and engineering. Topics to be covered will include: Linear and nonlinear first-order equations, classification of second-order linear equations, elliptic, hyperbolic and parabolic equations and boundary value problems, and Green's functions.
Prerequisite(s): MATH 1970, MATH 2350, or instructor's permission.

MATH 8253 INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS (3 credits)
This course emphasizes the implementation of several numerical methods to problems that arise in science and engineering. It involves the application of the computer to solve mathematical problems using the following computational techniques: Taylor Series approximation, numerical differentiation, root-finding methods, interpolation, extrapolation, curve fitting, solution methods for matrix equations, numerical differentiation, numerical integration, and the solution of differential equations. (Cross-listed with MATH 3250).
Prerequisite(s): MATH 1960 with a C or better.

MATH 8270 COMPLEX ANALYSIS I (3 credits)
This course is an introduction to the theory of functions of a complex variable, a fundamental area of mathematics with multiple applications to science and engineering. Topics include Cauchy's integral theorem, Cauchy's integral formula, Taylor expansions and analytic functions, conformal mapping and Riemann's conformal equivalence theorem, residue theory and Laurent series, harmonic functions, and applications. (Cross-listed with MATH 4270).
Prerequisite(s): MATH 3230/MATH 8235 with a grade of C- or better or permission of the instructor.
MATH 8306 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)
This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, CSCI 8306, MATH 4300).
Prerequisite(s): MATH 2050 with a C- or better or permission of instructor.

MATH 8316 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)
This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queuing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, CSCI 8316, MATH 4310).
Prerequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

MATH 8326 COMPUTATIONAL OPERATIONS RESEARCH (3 credits)
Survey of computational methods used in the solution of operations research problems. Some topics may include scripting to guide optimization software, constraint programming, heuristics and metaheuristics for optimization, basic machine learning algorithms, and simulation. (Cross-listed with MATH 4320, CSCI 4320, CSCI 8326).
Prerequisite(s): MATH 3200 or CSCI 1620, and MATH 4300 each with a grade of C- or better or permission of instructor.

MATH 8336 INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS (3 credits)
This course introduces the basic methods of PDEs guided by applications in physics and engineering. The main topics to be covered include The Linear First order PDEs, Transport equations, Characteristics, Classification of PDEs, Separation of variables, Heat conduction, vibrating membranes, boundary value problems, Maximum principle, Sturm-Liouville problems, Fourier series, Fourier integrals, Harmonic functions, Legendre polynomials, Distributions, Green's functions. (Cross-listed with MATH 4330).
Prerequisite(s): MATH 1970 with a C- or better and MATH 2350 with a C- or better, or permission of instructor; MATH 2050 recommended, not required.

MATH 8356 ORDINARY DIFFERENTIAL EQUATIONS (3 credits)
This course covers the theory of initial-, boundary-, and eigenvalue problems, existence theorems, real and complex linear systems of differential equations, and stability theory. There will be a strong emphasis on methods for finding solutions of initial and boundary value problems and analyzing properties of these solutions for various ordinary differential equations. (Cross-listed with MATH 4350).
Prerequisite(s): MATH 1970 with a C- or better, MATH 2050 with a C- or better, and MATH 2350 with a C-, or better or instructor's permission.

MATH 8400 DYNAMICAL SYSTEMS AND CHAOS (3 credits)
Prerequisite(s): Permission from Instructor (If you have a background that covers introduction to analysis, differential equations, linear algebra, and you are somewhat familiar with computer codes, it is easy to obtain permission.)

MATH 8406 THE FINITE ELEMENT METHOD (3 credits)
Prerequisite(s): MATH 1970, MATH 2050 and MATH 2350 all with a C- or better or instructor permission. MATH 3300/MATH 8305 and MATH 4330/MATH 8336 recommended. Students should be able to use a programming language (ie MATLAB) to complete computational assignments.

MATH 8410 BOOLEAN NETWORKS (3 credits)
This course is focused on introduction to discrete dynamical networks, in particular logical networks, and their applications.
Prerequisite(s): MATH 1960 (Calculus II), MATH 2230 (proof writing skills), MATH 4740 or equivalent (basic probability theory), basic computer skills; or permission of the instructor.

MATH 8430 LINEAR PROGRAMMING (3 credits)
This course includes a complete development of theoretical and computational aspects of linear programming. Basic theoretical foundations covered include polyhedra, convexity, linear inequalities and duality. Advanced topics such as decomposition and column generation are covered. Both simplex methods and interior point methods are included.
Prerequisite(s): MATH 4300/MATH 8306

MATH 8440 NETWORK PROGRAMMING (3 credits)
A presentation of network flow models and optimization algorithms. Topics include pure, generalized, integer, and constrained network problems, plus special cases of each, including transportation, assignment, shortest-path, transshipment, and multimmodity.
Prerequisite(s): MATH 4300/MATH 8306

MATH 8456 INTRODUCTION TO MACHINE LEARNING AND DATA MINING (3 credits)
This is an introduction to machine learning and data mining which covers the following topics with an emphasis on mathematical and statistical analysis: linear and nonlinear regression models, model selection and regularization methods, resampling methods, classification methods, tree-based models, and unsupervised learning topics. If time allows, text mining and deep learning will also be introduced in the course. Statistical software will be used. (Cross-listed with MATH 4450, STAT 4450, STAT 8456)
Prerequisite(s): MATH 4740/8746 with a C- or better or STAT 3800/8805 with a C- or better or permission of instructor.

MATH 8460 INTEGER PROGRAMMING (3 credits)
Advanced study in mathematical programming with integer or mixed integer variables. Topics include integer programming, modeling, applications of integer programming, and exploration of solution algorithms based on linear programming and heuristic methods such as tabu search, simulated annealing, and genetic algorithms.
Prerequisite(s): MATH 4300/CSCI 4300/MATH 8306/CSCI 8306. Not open to non-degree graduate students.

MATH 8480 MULTI-AGENT SYSTEMS AND GAME THEORY (3 credits)
This course covers advanced topics in the area of coordination of distributed agent-based systems with a focus on computational aspects of game theory. The main topics covered in this course include distributed constraint satisfaction, distributed constraint optimization, and competitive and cooperative game theory. (Cross-listed with CSCI 8480).
Prerequisite(s): CSCI 4450 or CSCI 8456. Suggested background courses: CSCI 4480 or CSCI 8486; CSCI 8080. Open to non-degree graduate students.

MATH 8500 NUMERICAL LINEAR ALGEBRA (3 credits)
Topics covered in this course include error propagation, solutions of nonlinear equations, solutions of linear and nonlinear systems by various schemes, matrix norms and conditioning, and computation of eigenvalues and eigenvectors. (Cross-listed with CSCI 8500).
Prerequisite(s): MATH 1960 and MATH 2050, or permission of instructor. Familiarity with computer programming is assumed.

MATH 8510 NUMERICAL DIFFERENTIAL EQUATIONS (3 credits)
Topics covered in this course include interpolation and approximations, numerical differentiation, numerical integration, and numerical solutions of ordinary and partial differential equations. (Cross-listed with CSCI 8510).
Prerequisite(s): MATH 1970, MATH 2350, or permission of instructor. Familiarity with computer programming is assumed.
MATH 8520 ADVANCED TOPICS IN OPERATIONS RESEARCH (3 credits)
Advanced treatment of a specific topic in the area of operations research not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with CSCI 8520).
Prerequisite(s): MATH 4300 or MATH 8306 or CSCI 4300 or CSCI 8306 or permission of the instructor.

MATH 8566 NUMBER THEORY & CRYPTOGRAPHY (3 credits)
An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 4560, CSCI 8566, MATH 4560).
Prerequisite(s): MATH 2320 with a C- or better or MATH 2303 with a C- or better or CSCI 2030 with a C- or better or permission of instructor.

MATH 8616 INTRODUCTION TO TOPOLOGY (3 credits)
This is a proof-oriented course presenting the foundations of topology. Metric spaces and general topological spaces are introduced. The course explores the properties of connectedness, compactness and completeness, and operations of Tychonoff product and hyperspace. (Cross-listed with MATH 4610).
Prerequisite(s): MATH 3230/8235 with a C- or better or permission of instructor.

MATH 8620 GENERAL TOPOLOGY (3 credits)
General topology has roots in geometry and analysis through the study of spaces, dimensions, and transformations. Its development was influenced by the parallel development of (axiomatic) set theory. This course introduces topological spaces from the point of view of separation axioms, countability axioms, compactifications, Baire property, and other completeness properties. Basic concepts of Descriptive Set Theory are also introduced.
Prerequisite(s): MATH 4610/8616 or permission of instructor.

MATH 8626 ITERATED FUNCTION SYSTEMS AND FRACTALS (3 credits)
This is a proof-oriented course presenting the foundations of fractal geometry. It introduces students to the beauty, magic, and applications of fractals and iterated function systems, with emphasis on the mathematics behind it all. Topics range from contractions on hyperspaces and their fixed points to fractal dimensions to Julia and Mandelbrot sets. (Cross-listed with MATH 4620).
Prerequisite(s): MATH 8616 with a C- or better or permission of instructor.

MATH 8645 MODERN GEOMETRY (3 credits)
This course will study the modern foundations of Euclidean and Non-Euclidean Geometry. Included will be a study of the principles of axiomatic systems. Euclidean Geometry will be investigated using Hilbert’s axioms for Euclidean geometry (or another equivalent Euclidean geometry axiom set). Hyperbolic geometry will be encountered through the models of Klein and Poincare. Neutral geometry with Lambert and Saccheri quadrilaterals will be studied. Finite geometries and projective geometries will also be explored. (Cross-listed with MATH 3640).
Prerequisite(s): MATH 2230 with a grade of C- or better.

MATH 8650 INTRODUCTION TO PROBABILITY MODELS (3 credits)
This is an introduction to probability modeling including Poisson Processes, Markov chains, birth-death processes, queueing models and renewal theory. Applications will be an important part of the course.
Prerequisite(s): MATH 4740/MATH 8746 or STAT 3800/STAT 8805 or permission of instructor.

MATH 8666 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)
This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, CSCI 8666, MATH 4660).
Prerequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

MATH 8670 TOPICS IN PROBABILITY AND STATISTICS (3 credits)
Advanced treatment of a specific topic in the area of probability and/or statistics not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with STAT 8670).
Prerequisite(s): MATH 4750/MATH 8756 or STAT 3800/STAT 8805 or permission from instructor

MATH 8720 RELIABILITY THEORY (3 credits)
This course covers the probabilistic and statistical aspects of reliability theory. Reliability theory is concerned with the probability that a component or system is successfully working over a given time period or at a specific time instance. (Cross-listed with STAT 8720).

MATH 8746 INTRODUCTION TO PROBABILITY AND STATISTICS I (3 credits)
A mathematical introduction to probability theory including the properties of probability; probability distributions; expected values and moments; specific discrete and continuous distributions; and transformations of random variables. (Cross-listed with MATH 4740).
Prerequisite(s): MATH 1960 and either MATH 2230 or MATH 2303 all with a grade of C- or better or permission of instructor.

MATH 8756 INTRODUCTION TO PROBABILITY AND STATISTICS II (3 credits)
Theory and methods of statistical inference including sampling distributions, estimators, estimation, and statistical hypotheses. (Cross-listed with MATH 4750).
Prerequisite(s): MATH 4740/MATH 8746 with a grade of C- or better.

MATH 8766 TOPICS IN APPLIED MATHEMATICS (3 credits)
Selection of such topics such as dynamical systems and chaos, Boolean networks, modeling of discrete or continuous systems, matrix theory, difference equations, information theory, discrete events simulation and other approved by Upper Curriculum Committee. (Cross-listed with MATH 4760).
Prerequisite(s): MATH 3100/CSCI 3100 with a grade of C- or better, or permission of instructor.

MATH 8855 HISTORY OF MATHEMATICS (3 credits)
An overview of the history of mathematics and famous mathematicians via studying and solving famous mathematical problems, exploring famous mathematical theorems, and studying the biographies of famous mathematicians. (Cross-listed with MATH 3850).
Prerequisite(s): MATH 1950 with a grade of C- or higher and one of either MATH 2230 or CSCI 2030 with a grade of C- or higher.

MATH 8956 TOPICS IN THEORETICAL MATHEMATICS (3 credits)
This course introduces students to a specialized subject matter in the areas of theoretical mathematics not covered in existing courses. The course may be repeated for different topics up to a maximum of six credit hours. The specific topics will vary, depending upon when the course is offered. One example of a course is Axiomatic Set Theory. (Cross-listed with MATH 4950).
Prerequisite(s): Permission of instructor.
MATH 8960 MASTER’S PROJECT (1-6 credits)
An applied project, designed and executed under the supervision of both a faculty and industry advisor. In the project, the student will apply their mathematical and/or statistical skills to an applied problem. The student will present their results via a written report and oral presentation. (Cross-listed with STAT 8960).
Prerequisite(s): Permission of faculty advisor and graduate program chair. Not open to non-degree graduate students.

MATH 8970 INDEPENDENT GRADUATE STUDIES (1-3 credits)
Under this number a graduate student may pursue studies in an area that is not normally available to him/her in a formal course. The topics studied will be a graduate area in mathematics to be determined by the instructor.
Prerequisite(s): Permission of instructor and graduate classification.

MATH 8980 GRADUATE SEMINAR (3 credits)
A graduate seminar in mathematics offering coverage of advanced areas of mathematics. Topics to be covered by the course will vary in different semesters.
Prerequisite(s): Permission of the Instructor.

MATH 8990 THESIS (1-6 credits)
An independent research project, written under the supervision of a graduate advisor in the department of mathematics. Approval of the topic and the completed project by thesis committee is required.
Prerequisite(s): Approval of the topic and the completed project by thesis committee is required.

MATH 9110 ADVANCED TOPICS IN APPLIED MATHEMATICS (3 credits)
Advanced treatment of a specific topic in the area of applied mathematics not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ.
Prerequisite(s): Permission of instructor.

MATH 9230 THEORY OF FUNCTION OF REAL VARIABLES (3 credits)
A theoretical foundation for the concepts of measure theory and integration on a measure space as developed by Henry Lebesgue (followed by others) starting the first decade of the 20th century including a comparison with Riemann's classical construction of integration theory known from classical calculus. Topics include: Real number system, convergence, continuity, bounded variation, differentiation, Lebesque-Stieltjes integration, abstract measure theory, and the Lp spaces.
Prerequisite(s): MATH 4230/MATH 8236 or permission of the instructor.

STAT 8005 STATISTICAL METHODS I (3 credits)
An introduction to descriptive statistics, measures of central value and dispersion, probability and distributions, population and sample, simple linear regression, statistical inference: point estimation, confidence intervals, hypotheses testing, two population comparison, goodness-of-fit tests, analysis of variance. Statistical software like Minitab or Excel will be utilized in the course. (Cross-listed with STAT 3000).
Prerequisite(s): MATH 1220 or MATH 1300 or MATH 1320 or equivalent with a grade of C- or better, or permission of instructor.

STAT 8416 INTRODUCTION TO DATA SCIENCE (3 credits)
Topics covered in this course include Data Technology, Methods of gathering and cleaning structured or unstructured data, Exploratory data analysis & Dynamic and interactive data visualization, Modeling data for prediction, forecasting or classification. (Cross-listed with STAT 4410).
Prerequisite(s): MATH 4740 with a C- or better or concurrent; or STAT 3800 with a C- or better or concurrent; or permission of instructor. Students should be comfortable with computer programming & have knowledge of data structures & preliminary statistical methods.

STAT 8426 EXPLORATORY DATA VISUALIZATION AND QUANTIFICATION (3 credits)
Topics covered in this course include Exploratory Data Visualization for categorical/qualitative single/multivariate data, Grammar of Graphics, Organizing Data for Visualization, Methods of Displaying Data that include dynamic and interactive visualization, Visual Diagnostics of Statistical Models and Visual Statistical Inference. Students planning to enroll in this course should be comfortable with computer programming and have knowledge of data structures and preliminary statistical methods. (Cross-listed with STAT 4420)
Prerequisite(s): STAT 3800 or STAT 8805 or MATH 4740 or MATH 8746 with a grade of C- or better or another introductory probability/statistics course with a grade of C- or better, and MATH 3200 or CSCI 1620 with a grade of C- or better, or permission of instructor.

STAT 8436 LINEAR MODELS (3 credits)
This is an introduction to linear statistical models which will include: simple linear regression models, multiple linear regression models, ANOVA models including one way ANOVA, randomized block design, and other designs. Also, logistic regression models, Poisson regression models, bootstrapping/resampling models, survival analysis. Some necessary linear algebra and mathematical statistics ideas will be covered in the course also. If time allows, some mixed models and/or survival models. Much use of computer software will be made. (Cross-listed with STAT 4430)
Prerequisite(s): MATH 4750 or MATH 8756 w/ a grade of C- or better or STAT 3800 or STAT 8805 w/ a C- or better or instructor permission based on students' having taken a basic statistics course w/ a grade of C- or better & having at least a basic knowledge of calculus.

STAT 8446 TIME SERIES ANALYSIS (3 credits)
The objective of this course is to learn and apply statistical methods for the analysis of data that have been observed over time. Topics covered include: Models for Stationary and Non-Stationary Time Series, Model Specification, Parameter Estimation, Model Diagnostics, Forecasting, Seasonal Models, Time Series Regression, and Spectral Analysis. Statistical software will be used. (Cross-listed with STAT 4440)
Prerequisite(s): MATH 4750 or MATH 8756 w/ a grade of C- or better or STAT 3800 or STAT 8805 w/ a C- or better or another introductory probability/statistics course w/ a grade of C- or better, or permission of instructor.

STAT 8456 INTRODUCTION TO MACHINE LEARNING AND DATA MINING (3 credits)
This is an introduction to machine learning and data mining which covers the following topics with an emphasis on mathematical and statistical analysis: linear and nonlinear regression models, model selection and regularization methods, resampling methods, classification models, tree-based models, and unsupervised learning topics. If time allows, some mixed models and/or survival models. Much use of computer software will be used. (Cross-listed with MATH 4450, MATH 8456, STAT 4450)
Prerequisite(s): MATH 4750 or MATH 8756 w/ a grade of C- or better or STAT 3800 or STAT 8805 w/ a C- or better or another introductory probability/statistics course w/ a grade of C- or better, or permission of instructor.

STAT 8640 TOPICS IN PROBABILITY AND STATISTICS (3 credits)
Advanced treatment of a specific topic in the area of probability and/or statistics not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with MATH 8670).
Prerequisite(s): MATH 4750/MATH 8756 or STAT 3800/STAT 8805 or MATH 8746 or permission from instructor.

STAT 8700 BAYESIAN STATISTICS (3 credits)
The objective of this course is to introduce the Bayesian approach to statistical inference. Topics covered include: Review of probability, Bayes theorem, and Likelihood; The Bayesian methodology, prior and posterior distributions; Choices of prior distribution, conjugate and Jeffreys priors; Credible intervals and inference; Bayesian computation - Markov Chain Monte Carlo and the Gibbs Sampler; Hierarchical models; Regression models.
Prerequisite(s): MATH 8756 or equivalent or permission of instructor.
ECON 8200 ENVIRONMENTAL ECONOMICS AND MANAGEMENT (3 credits)
This course covers topics related to environmental economics and policy, with an emphasis on comparative policy analysis and business strategies towards the environment. (Cross-listed with BSAD 8020)
Prerequisite(s): ECON 2200 and ECON 2220 or BSAD 8180, or permission of the instructor. Not open to non-degree graduate students.

ECON 8050 ECONOMIC EDUCATION (3 credits)
A study and examination of economic principles and how they can be related to the teacher's classroom presentation. This course is designed to furnish the k-12 teacher with sufficient background and understanding to aid in the recognition of economic issues and the teaching of economic concepts and principles.
Prerequisite(s): No previous course work in economics. Not open to Economics majors.

ECON 8080 MONEY AND FINANCIAL INSTITUTIONS (3 credits)
This course examines the financial system (institutions, instruments, markets, practices, and public authorities), and the implementation of monetary policy that aims to maintain financial stability and support economic growth. The course discusses current events reported in the financial press and uses the analytic frameworks developed in class to analyze these issues. This course trains students to think systematically about the current state of the economy and use quantitative tools to analyze the interactions between monetary policy and the financial system.
Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 8200 SEMINAR IN MICRO ECONOMIC THEORY (3 credits)
The course covers major topics in microeconomic theory. The major topics covered are the theory of consumer behavior, theory of production and cost, theory of the firm, pure exchange economy, general equilibrium, and welfare theory.
Prerequisite(s): ECON 3200, ECON 3220 and ECON 8306 or permission.

ECON 8210 APPLIED MANAGERIAL ECONOMICS (3 credits)
This is a course in empirical economic modeling techniques deployed by economists and other business consultants used in business and public policy applications. There are four main themes: 1) techniques used in demand analysis and economic forecasting, 2) techniques used in production and cost analysis, 3) supply chain and trade analysis, and 4) analysis and measurement of competitive interactions.
Prerequisite(s): ECON 2200 or equivalent, or permission of the instructor.

ECON 8216 INDUSTRIAL ORGANIZATION (3 credits)
In this class we will examine why firms and industries behave the way that they do. We will explore why some industries face intense competition while others enjoy large profits, why some industries offer only bundles, and why some firms buy up their supply chain when others do not. This theoretical course will illuminate un-theoretical implications to your life and future business ventures. This course will use your economic knowledge, a bit of psychology (behavioral economics) and game theory to answer questions like "Why does everyone hate the cable company?" and "Why are CEOs given so many stock options?" (Cross-listed with ECON 4210).
Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 8220 SEMINAR IN MACRO THEORY (3 credits)
This course traces the development of macroeconomic theory from the classical point of view to current schools of thought. Keynesian, neo-Keynesian and neo-classical models are developed.
Prerequisite(s): ECON 3200 or ECON 8210 or BSAD 8100, ECON 3220, and ECON 8306, or permission.

ECON 8230 BUSINESS CONDITIONS ANALYSIS (3 credits)
This course is concerned with the statistical measurement and evaluation of general business conditions, as well as the adaptation of business policies to changing business conditions. Emphasis is placed upon the practical application of statistical analysis techniques to business situations within the framework of the aggregate economy.
Prerequisite(s): ECON 2200 and ECON 2220.
ECON 8246 LABOR ECONOMICS (3 credits)
The course will cover essential topics in Labor Economics including factors leading to equilibrium conditions in the labor market, human capital accumulation, discrimination in the workplace, compensation for undesirable work, mobility, unionization, and more. (Cross-listed with ECON 4240).
Prerequisite(s): ECON 2200 OR BSAD 8150

ECON 8290 RESEARCH METHODS IN ECONOMICS AND BUSINESS (3 credits)
Covers the methodology of economics: choosing a research topic, literature search tools, data source identification, data summary techniques, basic statistical data analysis using statistical packages, and clear economics writing. The student will become familiar with these techniques through text materials, journal studies, and completion of an empirical economics paper.
Prerequisite(s): ECON 3200, ECON 3220, or equivalents, or permission of the instructor. Not open to non-degree graduate students.

ECON 8300 ECONOMETRICS (3 credits)
The study of the underlying assumptions, techniques and applications of single and multiple equation regression analysis in economics.
Prerequisite(s): Basic Statistics, ECON 8306/ECON 4300, or permission. Not open to non-degree graduate students.

ECON 8306 QUANTITATIVE APPLICATIONS IN ECONOMICS AND BUSINESS (3 credits)
The study and application of modern quantitative techniques to problem-solving in economics and business. It is designed to help the student to translate verbal arguments in economics and business into their mathematical equivalents, to improve analytical skills, and to attain proficiency in marginal analysis, equilibrium analysis, static optimization, and comparative statics analysis. It covers topics such as exponential and logarithmic functions and their applications, linear algebra and its applications, derivatives and their applications, maximization of functions with one variable and multi variables, maximization with non negativity constraints, and integral calculus and its applications in economics and business. (Cross-listed with ECON 4300).
Prerequisite(s): ECON 2200 and ECON 2220, or BSAD 8180.

ECON 8310 BUSINESS FORECASTING (3 credits)
The course will cover forecasting tools and applications applied to business settings. The first half of the course will cover traditional Econometric forecasting methods and the second half of the course will focus on predictive analytics models and machine learning. Time in the computer lab will be focused on teaching students how to implement the models discussed in lectures. (Cross-listed with BSAD 8080).
Prerequisite(s): ECON 8320 (or equivalent programming experience) or permission of instructor. Not open to non-degree graduate students.

ECON 8316 BUSINESS INTELLIGENCE AND REPORTING (3 credits)
The course will teach students to use state-of-the-art Business Intelligence (BI) software to generate reports and information from data. BI software is used to inform decision-making in industries from transportation to medicine, from marketing to government, and is facilitated by rapidly increasing access to data in all industries. Students will learn to employ best practices in visualization and verbal communication as they are trained to create valuable insights from data and convey those insights to stakeholders. Additionally, the course will aid students in preparing for certification in the use of state-of-the-art BI software. (Cross-listed with ECON 4350).
Prerequisite(s): BSAD 2130 (or equivalent) OR Instructor Approval

ECON 8320 TOOLS FOR DATA ANALYSIS (3 credits)
The course will cover basic principles of programming languages, as well as libraries useful in collecting, cleaning and analyzing data to answer research questions. The course will utilize basic Economic principles and Econometric methods as inspiration for assignments and projects throughout the duration of the course, and will do so in a way that is accessible to non-Economists. This course is intended to introduce the student to the Python programming language as a tool for conducting data analysis. While the course uses Python, the student should be able to move to other languages frequently used in data analysis using the principles taught in this course.
Prerequisite(s): BSAD 2130 or equivalent; or instructor approval.

ECON 8326 NATURAL RESOURCE ECONOMICS (3 credits)
This course introduces students to the economics and management of Earth’s natural resources. We address questions such as: Are we running out of natural resources? Are we using resources in a sustainable fashion? What role to markets play in resource use? We will address issues related to fossil-based resources, minerals, fisheries, water, land, forests and other associated topics. The course covers the basic theoretical framework for understanding the optimal rate of resource use, identifies the factors that determine the actual rate of use, and considers and evaluates various public policy prescriptions. (Cross-listed with ECON 4320).
Prerequisite(s): ECON 2200 and ECON 2220, BSAD 8150 or permission of instructor.

ECON 8330 DATA ANALYSIS FROM SCRATCH (3 credits)
Econometrics is routinely taught as an application class using a ‘black box’ like Stata or SAS to perform calculations. This class takes a different approach. Using the Python programming language, we build all estimators from scratch. Additionally, we introduce numerous non-parametric and simulation techniques. This approach to econometrics results in a stronger understanding of statistical assumptions and methods, a better understanding of when a method is appropriate, and stronger programming techniques. Furthermore, a deeper understanding of the underlying mechanics provides the student the ability to program custom procedures not already built into popular software packages. As part of the course, students will work with a community partner to answer a real question with data; MBA students should consult with their advisor about this course satisfying the project-focused capstone requirement.
Prerequisite(s): A multivariate or regression analysis course such as ECON 8300, ISQA 9130 or STAT 8436, and a programming class such as ECON 8320 or equivalent programming experience; or instructor approval. Not open to non-degree graduate students.

ECON 8346 ECONOMICS OF TECHNOLOGY (3 credits)
Innovative dynamism is the economic system which brings us the new goods and processes that make life longer and better. We will examine how the system works, including: The role of the breakthrough inventor and the innovative entrepreneur; whether the system improves or hurts ethical behavior, culture, equality, and the environment; the costs to workers in terms of job loss, and the benefits to workers in terms of the creation of better jobs; how funding, regulatory, and patent policies affect innovative dynamism; and how innovative dynamism in medicine can result in more and faster cures for cancer and other diseases. (Cross-listed with ECON 4340).
Prerequisite(s): ECON 2200 or BSAD 8180 or permission of the instructor.

ECON 8456 DOMESTIC MONETARY THEORY AND POLICY (3 credits)
The course will introduce students to topics in money and banking, financial institutions, markets, financial instruments, and monetary theory in order to enhance financial decision making and enable students to effectively analyze economic news in media such as the Wall Street Journal, The New York Times, Business Week, Barrons, The Economist, and other related business publications. This knowledge will enable students to formulate their own views about the current economic environment, government policies, and responses to economic environments. (Cross-listed with ECON 4450).
ECON 8576 ECONOMIC CONDITIONS ANALYSIS (3 credits)
This course teaches students how to conduct an economic analysis of, and produce an economic forecast for, a local economy such as a state, county, or metropolitan area. Students will learn where to find data, how to analyze that data, how to develop models with the data, and how to present the data in a clear, concise, and jargon-free manner. The final published report will be authored by the students registered in the course. All students will contribute equally to the final report. The instructor will ensure equal participation. (Cross-listed with ECON 4570).
Prerequisite(s): ECON 2200 and ECON 2220, or Permission from the instructor

ECON 8616 INTERNATIONAL TRADE (3 credits)
An analysis of the character of international economic relations. Subjects covered include the economic basis for international specialization and trade, the economic gains from trade, commercial policy, economic integration and economic growth. (Cross-listed with ECON 4610).
Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8626 INTERNATIONAL MONETARY THEORY (3 credits)
This course is designed to introduce students to topic areas in International Macroeconomics and International Finance. Students will examine the mechanisms of the foreign exchange market, and how exchange rates are determined in the short-run as well as in the long-run. Students will investigate the different exchange rate regimes around the world, including fixed exchange rates, floating exchange rates, crawling pegs, and other arrangements. Students will examine the European Union and ask whether such a system is economically viable. This is especially important in the current economic environment facing Europe. Students will also examine exchange rate crises over history, and examine how they all have common elements. (Cross-listed with ECON 4620).
Prerequisite(s): ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8666 INTERNATIONAL ECONOMIC DEVELOPMENT (3 credits)
This course introduces theories and application of economic development and growth, economic problems facing developing countries, analyzes domestic economic issues (e.g., per capita GDP, income distribution, population, unemployment, urbanization, education, fiscal policies, and financial policies), and international economic issues (e.g., trade, foreign investment, and foreign debt). Financial crises, debt crises, and economic recovery will be discussed. (Cross-listed with ECON 4660).
Prerequisite(s): ECON 2200 and ECON 2220, or BSAD 8180, or permission of instructor.

ECON 8736 ECONOMICS OF ENTREPRENEURSHIP (3 credits)
This course will review economic theories of entrepreneurship with special emphasis on Schumpeter's theory of creative destruction. The main focus of the seminar will be on the "high-level" entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 4730, BSAD 8736.)
Prerequisite(s): ECON 2200 or permission of the instructor for all students.

ECON 8856 ECONOMICS OF URBAN AND REGIONAL DEVELOPMENT (3 credits)
This course will consider factors and trends in development at the global and national level but will focus primarily on economic development at the state, local, and regional levels in the United States. The focus of this course will be world strategic planning for economic development. (Cross-listed with ECON 4850).
Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 8910 SPECIAL STUDIES IN ECONOMICS (3 credits)
This course will focus on issues or developments in a specific area of economics or business.
Prerequisite(s): Graduate student in good standing and as indicated for specific workshop or seminar.

ECON 8920 INDEPENDENT STUDY (1-3 credits)
Guided independent study and research.
Prerequisite(s): Graduate student in economics and permission of instructor.

ECON 8940 ECONOMIC INTERNSHIP (1-3 credits)
Guided internship in a firm or organization that makes use of, or extends, the student's skill in economics.
Prerequisite(s): Completion of at least nine hours of graduate level economics and permission of instructor.

ECON 8990 THESIS (1-6 credits)
An independent research project, written under the supervision of a graduate adviser in the department of economics. Approval of the topic and the completed project by departmental committee is required.
Prerequisite(s): Approval of the topic and the completed project by departmental committee is required.

Economics, MA
Department of Economics, College of Business Administration

Vision Statement
The science of economics creates a deep understanding of individual behavior, firm dynamics, markets, and some of the world’s most interesting and challenging problems. Economics is a way of thinking that provides generalized tools to the practitioner to solve business, social, political, and many other issues faced by the modern organization.

The graduate program in economics is designed to provide a solid background in theory, quantitative methods and application appropriate to the needs of economists involved in the analysis of domestic and international business and economic conditions, financial analysis, policy analysis, forecasting, simulation and related work. In addition, the program prepares students for further graduate work in economics and related fields.

Program Contact Information

Admissions
Application Deadlines
NOT APPLICABLE

New economics graduate students will be admitted only to the MS economics program (non-thesis option). After completing nine (9) hours of coursework in the MS in economics program, a student may submit a written request to the economics graduate program committee to transfer from the MS program to the MA (thesis option) program. Students are strongly encouraged to seek the advice of the economics graduate program advisor prior to submitting the written request. The student’s request should include a thesis proposal written in consultation with a student-identified main thesis advisor (must be a tenure-track faculty in the economics department) who will serve as the chair of the thesis committee. In addition,
the student should include an unofficial graduate transcript, a writing sample, and any other relevant information in the request. The graduate program committee, based on its evaluation of the student’s potential to complete a quality master’s thesis, will approve or deny this request. Upon transfer to the MA program an oral defense of the proposal will be scheduled and the thesis committee members will approve the scope of work. If the graduate program committee denies the student’s request to transfer to the MA program, the student may submit a second (and final) written request to transfer to the MA program with supporting materials to the graduate program committee after he/she has completed 18 credit hours of coursework in the MS in economics program.

1 ECON 8306: This course is not required for students demonstrating satisfactory mathematical skills. If this course is not taken, students should take three (3) additional hours of elective courses.

### Exit Requirement

- Thesis 6 hours ECON 8990

All candidates should carefully review the Graduate College requirements for forming a supervisory committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of a thesis.

Total Credits: 9
As soon as possible, addressing the following points at the minimum:

1. Request for reinstatement;
2. Explanations for below par performance;
3. Arguments for why despite item #2 student be reinstated back into the program;
4. Describe activities student will do to ensure that performance moving forward will meet the quality of work standards set by Graduate Studies.

The economics graduate program committee will evaluate the student’s request and inform the student of its decision as soon as practically possible.

**Economics, MS**

**Department of Economics, College of Business Administration**

**Vision Statement**

The science of economics creates a deep understanding of individual behavior, firm dynamics, markets, and some of the world’s most interesting and challenging problems. Economics is a way of thinking that provides generalized tools to the practitioner to solve business, social, political, and many other issues faced by the modern organization.

The graduate program in economics is designed to provide a solid background in theory, quantitative methods and application appropriate to the needs of economists involved in the analysis of domestic and international business and economic conditions, financial analysis, policy analysis, forecasting, simulation and related work. In addition, the program prepares students for further graduate work in economics and related fields.

**Other Program Related Information**

**FastTrack Program**

The Department of Economics has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor’s degree and a master’s degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

**Program Specifics:**

- This program is available for undergraduate students pursuing Bachelor of Science in Business Administration (with a concentration in Economics), Bachelor of Science in Economics, or Bachelor of Arts in Economics, desiring to pursue a Master of Science in Economics.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.5.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.

**Academic Performance**

Students dismissed from the MS/MA economics program may request for reinstatement to the program by following this procedure. Write a reinstatement letter addressed to the economics graduate program committee and hand delivered to the economics graduate program advisor as soon as possible addressing the following points at the minimum:

1. Request for reinstatement;
2. Explanations for below par performance;
3. Arguments for why despite item #2 student be reinstated back into the program;
4. Describe activities student will do to ensure that performance moving forward will meet the quality of work standards set by Graduate Studies.

The economics graduate program committee will evaluate the student’s request and inform the student of its decision as soon as practically possible.
• Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
• Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
  • Admission to Fast Track does NOT guarantee admission to the graduate program.
  • The admit term must be after the completion term of the undergraduate degree.

Students in the Fast Track program must only enroll in dual-level ECON courses (ECON 8xx6) as their graduate coursework prior to admittance to the graduate program.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

Students are strongly encouraged to apply as early as possible, especially if applying for assistantships or scholarships.

• Fall Admission:
  June 1 for international applicants who are required to secure a new student visa
  July 15 for all other applicants

• Spring Admission:
  October 1 for international applicants who are required to secure a new student visa
  December 1 for all other applicants

• Summer Admission:
  March 1 for international applicants who are required to secure a new student visa
  April 15 for all other applicants

Other Requirements
• Junior/senior GPA of at least 2.85 (on a 4.0 point scale)
• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
  • Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
• Applicants must have completed courses equivalent to the following five foundation courses (UNO undergraduate courses):

Electives and Concentrations

Elective coursework will be selected in consultation with the graduate program chair and advisor. At least six hours must be graduate only courses. Students are strongly encouraged to complete an area of concentration which requires nine hours of elective courses. Students’ area(s) of concentration will appear on the transcript. Dual-level (“6--8”) course(s) completed as an undergraduate cannot be repeated for graduate credit.

</table>

Applicants meeting the minimum GPA and language requirement but lacking some foundation courses will be granted provisional admission status until all foundation courses are completed with grades of “B” (3.0/4.0) or above.

New economics graduate students will be admitted only to the MS economics program (non-thesis option). After completing nine (9) hours of coursework in the MS in economics program, a student may submit a written request to the economics graduate program committee to transfer from the MS program to the MA (thesis option) program. Students are strongly encouraged to seek the advice of the economics graduate program advisor prior to submitting the written request.

The student’s request should include a thesis proposal written in consultation with a student-identified main thesis advisor (must be a tenure-track faculty in the economics department) who will serve as the chair of the thesis committee. In addition, the student should include an unofficial graduate transcript, a writing sample, and any other relevant information in the request. The graduate program committee, based on its evaluation of the student’s potential to complete a quality master’s thesis, will approve or deny this request. Upon transfer to the MA program, an oral defense of the proposal will be scheduled, and the thesis committee members will approve the scope of work. If the graduate program committee denies the student’s request to transfer to the MA program, the student may submit a second (and final) written request to transfer to the MA program with supporting materials to the graduate program committee after he/she has completed 18 credit hours of coursework in the MS in economics program.

Students in the Fast Track program must only enroll in dual-level ECON courses (ECON 8xx6) as their graduate coursework prior to admittance to the graduate program.

Admissions

Electives and Concentrations

Elective coursework will be selected in consultation with the graduate program chair and advisor. At least six hours must be graduate only courses. Students are strongly encouraged to complete an area of concentration which requires nine hours of elective courses. Students’ area(s) of concentration will appear on the transcript. Dual-level (“6--8”) course(s) completed as an undergraduate cannot be repeated for graduate credit.

Applicants meeting the minimum GPA and language requirement but lacking some foundation courses will be granted provisional admission status until all foundation courses are completed with grades of “B” (3.0/4.0) or above.

New economics graduate students will be admitted only to the MS economics program (non-thesis option). After completing nine (9) hours of coursework in the MS in economics program, a student may submit
ECON 8616  INTERNATIONAL TRADE
ECON 8626  INTERNATIONAL MONETARY THEORY
ECON 8666  INTERNATIONAL ECONOMIC DEVELOPMENT
ECON 8736  ECONOMICS OF ENTREPRENEURSHIP
ECON 8856  ECONOMICS OF URBAN AND REGIONAL DEVELOPMENT

Students dismissed from the MS/MA Economics program may request for reinstatement to the program by following this procedure. Write a reinstatement letter addressed to the economics graduate program committee and hand delivered to the economics graduate program advisor as soon as possible addressing the following points at the minimum:

1. Request for reinstatement;
2. Explanations for below par performance;
3. Arguments for why despite item #2 student be reinstated back into the program;
4. Describe activities student will do to ensure that performance moving forward will meet the quality of work standards set by Graduate Studies.

The economics graduate program committee will evaluate the student’s request and inform the student of its decision as soon as practically possible.
Economic Education Certificate

Department of Economics, College of Business Administration

Vision Statement
The graduate certificate in economic education is to assist high school instructors who teach economics to obtain the 18 graduate credit hours needed to teach economics as a dual enrollment course. The Higher Learning Commission (HLC) requires that teachers must have at least 18 graduate credit hours in a given subject to teach classes that can be considered dual-enrollment. The graduate certificate is designed to expand high school teachers’ economics knowledge both in theory and practice so they can deliver high quality classes at the college-level.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
Students are strongly encouraged to apply as early as possible, especially if applying for assistantships or scholarships.

- Fall: July 15
- Spring: December 1
- Summer: April 15

Other Requirements
- All applicants must have earned a minimum junior/senior GPA of 2.85
- Students must have completed ECON 2200 and ECON 2220.
  - Students with a secondary education degree from UNO may substitute ECON 2400—Economics for Educators in lieu of Principles of Macroeconomics and Principles of Microeconomics.
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

Homeland Security Focused Business Analytics Certificate

Department of Economics, College of Business Administration

Vision Statement
The Homeland Security Focused Business Analytics certificate augments the security professional’s existing domain knowledge with advanced business analytics skills. Throughout the program, students with focus on quantitative applications, forecasting, data analysis and machine learning techniques. Students in this program will have the opportunity to work on unclassified Department of Homeland Security specific problem sets. All coursework will partially satisfy requirements toward a UNO Master of Science in economics degree.

Total Credits 18

Due to class sequencing, all students must start the certificate in a fall semester and can expect to take a year and a half to complete the certificate.

Educational Leadership

Degree Programs Offered
- Educational Leadership, MS (p. 1200)
- Educational Administration & Supervision, EdS (p. 1202)
- Educational Administration, EdD (p. 1203)

EDL 8000 SPECIAL STUDIES IN EDUCATIONAL LEADERSHIP (3 credits)
This course will provide candidates in educational leadership with the opportunities and experiences of in-depth study of a specialized area of practice and research in school leadership.
Prerequisite(s): Admission to Graduate Studies or permission of instructor.

EDL 8010 INTRODUCTORY RESEARCH METHODS (3 credits)
The Introductory Research Methods course will introduce graduate degree candidates to foundational topics in quantitative, qualitative, and mixed methods research. Particular attention will be given to aligning evidence based literature frameworks with research methodology and data analysis techniques. The course will also prepare graduate students to generate ethically considered research topics and formally evaluate and present research findings in written form.
Prerequisite(s): Graduate Standing

EDL 8020 EDUCATIONAL POLICY AND LEADERSHIP (1 credit)
This course explores the expanded federal and state presence in local school districts. Historical and political factors influencing the governance of today’s schools are explored, as well as current trends and policy decisions.
Prerequisite(s): Acceptance to Graduate Studies or department permission.

EDL 8030 INTRODUCTION TO EDUCATIONAL LEADERSHIP (3 credits)
This course is designed to introduce the beginning school leadership candidate to theories and practices of organization, motivation, leadership, and change processes, in order to develop an understanding of schools as complex organizations and the nature and challenges of leadership.
Prerequisite(s): Admission to UNO Graduate Studies or department permission.

EDL 8050 SCHOOL-COMMUNITY CONNECTIONS (3 credits)
School leaders engage the external and internal communities in their buildings and districts. This course assists candidates in developing an understanding of school-community relations, practicing the skills of positive influence with education stakeholders, and refining the dispositions of responsible citizenship by connecting to diverse community needs.
Prerequisite(s): Admission to Graduate Studies or department permission.

EDL 8100 INDEPENDENT STUDY IN EDUCATIONAL LEADERSHIP (1-6 credits)
This course is designed to allow graduate candidates in educational leadership to pursue independent study of a topic under the direction and guidance of a faculty member. Topics studied and the nature of the learning activities are mutually agreed upon by the candidate and instructor. This course will prepare school leaders as practitioners and researchers who can meet the dynamic challenges of education.
Prerequisite(s): Admittance to the doctoral program in educational administration/leadership, or instructor permission.

EDL 8310 ISSUES IN TECHNOLOGY FOR SCHOOL LEADERS (1 credit)
This course addresses the unique needs that those in administrative positions encounter in the constantly changing world of technology. Topics include: managing sustainability and obsolescence; ethics and policies for faculty, staff and students—including prevention of cyberbullying; technology for teaching and learning; and technology for business and accountability.

EDL 8320 ESSENTIALS OF DATA ANALYSIS AND PRESENTATION (1 credit)
This course is designed to give graduate students a foundational understanding of how information is processed, interpreted, and presented to provide school leaders with the ability to make data informed decisions. Major topics include how usable information can be extracted from tests and surveys, how probability is used to make claims from data sets, how charts and tables can be most effectively leveraged to understand the full scope of data sets, and how to publish results.

EDL 8340 ISSUES IN IDENTITY, CULTURE, AND POWER (1 credit)
This class promotes personal reflection and content awareness needed for educational leaders to promote racial equity in education. Topics include structural racism, bias, historical context of educational policy, and a call to action for racial justice in education.
EDL 8350 ISSUES IN MANAGEMENT FOR SCHOOL LEADERS (1 credit)
This class addresses the unique needs that those in educational leadership positions encounter when determining resource management of non-instructional systems. Topics include resource acquisition and management, using resources effectively, and oversight of facilities.

EDL 8360 CURRENT ISSUES IN SPECIAL EDUCATION ADMINISTRATION (1 credit)
The purpose of this course is to examine special education administration and leadership issues. This course will focus on policies and procedures necessary to effectively provide leadership to programs for children and youth with disabilities.

Prerequisite(s): Graduate standing.

EDL 8400 ELEMENTARY SCHOOL INTERNSHIP IN EDUCATIONAL LEADERSHIP (3 credits)
Elementary internship is designed to provide practice in elementary and general and special education administration and supervision according to the interests and needs of the candidates. Candidates will work with practicing administrators and a university supervisor.

Prerequisite(s): Candidates must be enrolled in the Master’s and/or the Building Administration Endorsement program in Educational Leadership and be in their last year of the program or have department permission. Permit to enroll from department is required.

EDL 8410 SECONDARY SCHOOL INTERNSHIP IN EDUCATIONAL LEADERSHIP (3 credits)
Secondary school internship is designed to provide practice in 7-12 and general and special education administration and supervision according to the interests and needs of the candidates. Candidates will work with practicing administrators and a university supervisor.

Prerequisite(s): Candidates must be enrolled in the Master’s and/or the School Administration Endorsement program in Educational Leadership and be in their last year of the program or have department permission. Permit to enroll from department is required.

EDL 8470 ADMINISTRATION AND SUPERVISION IN SCHOOLS (3 credits)
This course is designed to prepare educational leaders as dedicated practitioners, reflective scholars, and responsible citizens as they relate to the administration of a school site and system. This course is specifically designed to address the problems, issues, and opportunities of building level leadership.

Prerequisite(s): Admission to Graduate College. Not open to non-degree graduate students.

EDL 8490 INSTRUCTIONAL LEADERSHIP (3 credits)
School leaders serve as instructional leaders in their buildings and districts. This course assists candidates in developing knowledge and practicing skills necessary to lead educators and schools in the areas of instruction and curriculum.

Prerequisite(s): Admission to the Graduate College

EDL 8550 SCHOOL BUSINESS MANAGEMENT (3 credits)
This course will analyze the functions of school business management: budgetary processes, financial accounting, auditing and reporting, management of funds, purchasing procedures, transportation, food services, insurance and inventory control.

Prerequisite(s): EDAD8030 (previously or concurrently). Not open to non-degree graduate students.

EDL 8560 SCHOOL FINANCE (1 credit)
This course provides a study of the current sources of school financing: local, state, and federal. In addition to a review of the history of school finance, emphasis is placed on current problems in school finance, especially those related to overseeing the financial aspects of a school district.

Prerequisite(s): EDL 8350 or permission of the instructor.

EDL 8596 FOUNDATIONS OF LEADERSHIP DEVELOPMENT (3 credits)
Leadership development is an educational outcome for college students, and at UNO, is strongly encouraged. This course will expose students to foundational leadership theories and challenge them to explore personal and social competencies associated with effective collaboration and leadership. (Cross-listed with EDL 4590).

EDL 8620 SCHOOL PLANTS AND EQUIPMENT (3 credits)
This course is designed for aspiring superintendents and central office leaders. It will prepare school leaders to be proactive in developing specifications for school buildings that will enhance educational processes. It includes planning procedures for new and remodeled buildings, soliciting support for projects, site selection, design, maintenance and operations of school buildings.

Prerequisite(s): Admission to Graduate College

EDL 8710 INTERPERSONAL RELATIONSHIPS IN EDUCATIONAL LEADERSHIP (3 credits)
This course deals with the establishment of quality interpersonal and group relations among adults in school settings. Candidates will develop an increased awareness of their own and others’ perspectives and will develop dispositions and skills that will allow them to work more productively. This course does not meet the requirements of Nebraska law LB 250 (Multi-Cultural and Interpersonal Relations).

Prerequisite(s): Admission to the Graduate Studies and Department of Educational Leadership or department permission.

EDL 8720 MULTICULTURAL AND NON-SEXIST AWARENESS (1 credit)
This course is designed for certificated educational employees, both teachers and administrators, seeking renewal of Nebraska certification under Nebraska law LB 250 (Multi-Cultural and Interpersonal Relations). This course meets the requirements of Nebraska law LB 250 (Multi-Cultural and Interpersonal Relations). The purpose of the course is to develop awareness of cultural diversity in American society and to develop skills to effectively meet the needs of students, parents, and school community members.

Prerequisite(s): Graduate level. Permit of department required.

EDL 8730 COMMUNICATION AND CULTURE IN EDUCATIONAL HUMAN RESOURCES (1 credit)
This course focuses upon the interpersonal and professional knowledge, skills, and dispositions of human resources issues and functions for effective leadership in education.

Prerequisite(s): Admission to Graduate College.

EDL 8740 PROFESSIONAL DEVELOPMENT FOR SCHOOL LEADERSHIP (1 credit)
This course addresses strategies and models of planning, implementing, and evaluating adult and organizational learning for effective leadership in education.

Prerequisite(s): Admittance to Graduate College. Not open to non-degree graduate students.

EDL 8750 FUNDAMENTALS OF HUMAN RESOURCES IN EDUCATION (1 credit)
This course examines the frameworks that schools utilize to recruit, select, place, and support faculty and staff. School leaders need human resources skills and knowledge in order to effectively implement strategies and polices related to staff management, motivation, and evaluation.

Prerequisite(s): Admission to Graduate College. Not open to non-degree graduate students.

EDL 8760 EDUCATIONAL LEADERSHIP SUMMIT (2 credits)
The leadership summit in educational leadership synthesizes the program of school administration, supervision, and management in a manner that can be professionally presented and clearly articulated.

Prerequisite(s): Twenty four credit hours must be completed or taken concurrently in educational leadership. Department permit to enroll is required. Not open to non-degree graduate students.
EDL 8800 SCHOOL LEADERSHIP ACADEMY (3 credits)
A leadership course designed for current and aspiring school administrators and teacher-leaders. The course content will relate administrative theory to operations of schools drawing on research, models, and various organizational structures. This course is specifically designed to bridge leadership and management theory to the practical operations of schools.
Prerequisite(s): Advisor's approval.

EDL 8810 URBAN SCHOOL LEADERSHIP (3 credits)
This course is designed to acquaint candidates with urban concerns and issues which most significantly affect the administration of schools in and around metropolitan areas.
Prerequisite(s): Admission to Graduate College.

EDL 8900 SPECIAL EDUCATION LAW (3 credits)
The purpose of this course is to research and explore legal and policy issues affecting special education within our schools. Case law will be examined to ensure effective special education programs for children and youth with disabilities. (Cross-listed with SPED 8900).
Prerequisite(s): Graduate Standing. Not open to non-degree graduate students.

EDL 9000 FUNDAMENTALS OF RESEARCH DESIGN (3 credits)
This course will provide direction and assistance concerning principles of empirical research design as related to topics in educational leadership. Instruction as to appropriate format, style, and content of educational research as well as designing methodology for dissertation proposal will be emphasized.
Prerequisite(s): Admission to Graduate College. Students should be degree-seeking to take the course. Not open to non-degree graduate students.

EDL 9010 ADVANCED SEMINAR IN EDUCATIONAL RESEARCH (1 credit)
This seminar will provide support for doctoral candidates in applying skills of educational research to the development of a successful dissertation proposal.
Prerequisite(s): Admission to Graduate College. Completion of EDL 9000 or permission from instructor. Not open to non-degree graduate students.

EDL 9020 CONCEPTS AND CONTEXTS FOR LEADERSHIP IN SCHOOL LIBRARIES (3 credits)
Concepts and Context for School Libraries will introduce candidates to the broad landscape of school librarianship and its relationship to the greater library and information profession.
Prerequisite(s): Admission to the University of Nebraska Doctoral Program in Educational Administration or other University of Nebraska doctoral program in education, and instructor permission. Not open to non-degree graduate students.

EDL 9110 FIELD PROJECT IN EDUCATIONAL ADMINISTRATION (1-3 credits)
Administrative practitioners will study a current or anticipated educational problem using research techniques. Candidates will review a change process to their school or district that has recently been implemented or is under consideration for future implementation as the capstone work for the Educational Specialist degree.
Prerequisite(s): Admittance to the Ed.S. program and completion of EDL 9200. Candidates are encouraged, but not required, to utilize the project from EDL 9200 for the focus of the field project. Not open to non-degree students.

EDL 9200 ADVANCED PRACTICUM IN EDUCATIONAL ADMINISTRATION (3 credits)
This course is an independent, advanced practicum course meant to help practitioners prepare to be reflective scholars. It builds upon theory and practice of educational leadership and provides a guided experience.
Prerequisite(s): Admittance to the Ed.S. program and completion of EDL 9200. Candidates are encouraged, but not required, to utilize the project from EDL 9200 for the focus of the field project. Not open to non-degree students.

EDL 9310 ISSUES IN STRATEGIC PLANNING FOR SCHOOL LEADERS (1 credit)
Strategic planning is critical to the health, growth and sustainability of a school district. The process provides an opportunity to prioritize goals, actions, time and resources on key initiative. This course will examine the strategic planning processes used by leaders to guide educational change and improvement.

EDL 9320 LEGAL ISSUES IN SPECIAL EDUCATION (1 credit)
School Leaders have an obligation to know the rights of students with disabilities and the laws and policies that protect those rights. This course will focus on the mandatory requirements of Individuals with Disabilities Education Improvement Act (IDEIA) of 2004; the Americans with Disabilities Act (ADA) of 1990, amended in 2008 and the Rehabilitation Act of 1973, Section 504 along with program mandates and the case law that protects these students.

EDL 9330 ISSUES IN SCHOOL OPERATIONS (1 credit)
This course addresses leadership issues that current and prospective school leaders will find applicable as they earn certification as a superintendent, principal, curriculum supervisor, or special education leader. This one-hour course will provide knowledge and skills educational leaders will need to effectively and efficiently lead a public or private school building, program, or school district. Course modules will engage candidates in developing a leadership entry/transition plan, a leadership succession plan, and a leadership succession board policy and administrative procedures.

EDL 9340 CONTEMPORARY ISSUES IN SCHOOL LAW (1 credit)
This course is concerned with the most recent legal challenges and judicial decisions that are impacting schools. Topics include the most recent decisions from all levels of the courts up to the Supreme Court. School leaders will help prevent litigation by understanding the implications of current cases for the purpose of work with students, staff, faculty and community members without infringing upon their due process rights. School leaders may use the current decisions to update student and faculty handbooks and understand the critical need for guidance by school district legal counsel.
Prerequisite(s): School Law 9540 Legal Issues in Special Education Law 8920 or Instructor permission.

EDL 9500 FRAMEWORKS OF BEST PRACTICE: LEADERSHIP IN SCHOOL LIBRARIES (3 credits)
This class will explore best practice in school libraries using the framework of current national standards for school librarianship preparation programs. Major areas for exploration include but are not limited to teaching for learning, literacy and reading, information and access, advocacy and leadership, and program management and administration.
Prerequisite(s): Admission to the University of Nebraska Joint Doctoral Program in Educational Administration pursuing studies in educational leadership with an emphasis in school librarianship or with instructor permission. Not open to non-degree graduate students.

EDL 9510 SEMINAR IN CULTURE AND CONTEXT OF SCHOOLING (3 credits)
An advanced seminar designed to enhance understanding of the cultural and social forces, trends, and issues that influence the delivery and effectiveness of schooling.
Prerequisite(s): Admission to the Department of Educational Administration and Supervision and the Ed.D. Program. Not open to non-degree graduate students.

EDL 9520 ACHIEVING SCHOOL EXCELLENCE (3 credits)
An advanced seminar on the pursuit of improvement in education and the role of administration in guiding positive school change through influence, persuasion, power, ethics, and research.
Prerequisite(s): Admission to the University of Nebraska Joint Doctoral Degree program or admission to another University of Nebraska doctoral program. Not open to non-degree graduate students.
EDL 9530 PARADIGMS AND PRACTICES OF SCHOOLING (3 credits)
This is an advanced seminar to explore leadership and supervisory practices. Particular attention will be given to organizational conceptualizations (paradigms) for addressing current educational problems and issues. Candidates will be encouraged to think outside the traditional frames of education in order to improve student achievement in PK-12 schools. When a paradigm shifts, the way we view the world and what we assume to be true dramatically changes. When faced with shifting circumstances, school leaders can turn change into opportunity and opportunity into success.
Prerequisite(s): Admittance to the UNO-UNL Joint Doctorate Program. Not open to non-degree graduate students.

EDL 9540 SCHOOL LAW (3 credits)
This course is concerned with laws related to schools. Topics include certification, contract, negligence, student rights, due process, curriculum, and discipline. Each topic is approached through study of most recent court cases.
Prerequisite(s): Admission to Graduate Studies or instructor permission. Not open to non-degree graduate students.

EDL 9550 SYMPOSIUM ON SCHOOL LEADERSHIP (3 credits)
The purpose of this seminar is to relate research, theory, and practice in educational organizations. The course is designed to engage candidates with a systematic examination of school reform, best practices, and the implications for practitioners. The symposium will involve candidates with the changing roles and functions of educational leaders in rapidly changing metropolitan educational environments.
Prerequisite(s): Admission to Graduate Studies or permission of instructor.

EDL 9610 STATISTICAL METHODS FOR THE BEHAVIORAL SCIENCES (2 credits)
This course is designed to help graduate students develop competence in understanding and applying statistical methods for the behavioral and social sciences. The course introduces broad historically based topics in statistics such as probability theory, the Law of Large Numbers, and the Central Limit Theorem to develop conceptually based models for hypothesis testing, description of data, and statistical inference. Emphasis is placed on the evaluation and interpretation of statistical methods used in published research and the development of analytic models in dissertation research.
Prerequisite(s): Admission to the Doctor of Education (Ed.D.) program in Educational Leadership or Department/Instructor's permission.

EDL 9620 NON PARAMETRIC STATISTICS FOR THE BEHAVIORAL AND SOCIAL SCIENCES (2 credits)
This course is designed to help graduate students develop skills in calculating and interpreting Non-Parametric data analytics. The course includes the application of nonparametric inferential and relational techniques. The statistical analyses include: Chi-squared family of tests, Mann-Whitney U, Wilcoxon Signed-Ranks and Rank-Sums, Kruskal-Wallis ANOVA, Spearman and Biserial correlations, Graphical analytics of Hierarchical Clustering, Dendrograms, K-Means Clustering, and Logistical Regression. Technology applications will include Excel statistical packages for Non-Parametric testing.

EDL 9630 QUALITATIVE RESEARCH (3 credits)
Qualitative Research develops skills and competence in designing, collecting, and analyzing data for studies in educational research.
Prerequisite(s): EDL 9610 or equivalent. Not open to non-degree graduate students.

EDL 9650 PROGRAM EVALUATION FOR EDUCATIONAL ADMINISTRATORS (3 credits)
This course provides an introduction to program evaluation theory and practice. It will address the range of approaches within education human service program evaluation, the standards established by the profession, the “how to” of program evaluation, and the skills needed to conduct program evaluation.
Prerequisite(s): Admission to the Graduate College or instructor's permission.

EDL 9660 STRATEGIC LEADERSHIP FOR SCHOOL LIBRARIES (3 credits)
This course will focus on the political, economic and social trends that have shaped school libraries and develop the skills and dispositions required for leaders of 21st Century school library programs.
Prerequisite(s): Admission to the University of Nebraska Joint Doctoral Program in Educational Administration or to any other doctoral program in the University of Nebraska, or instructor permission. Not open to non-degree graduate students.

EDL 9670 INQUIRY AND RESEARCH FOR LEADERSHIP IN SCHOOL LIBRARIES (3 credits)
Inquiry and Research for Leadership in School Librarianship will examine current research in the school library field and focus on action research based on authentic need.
Prerequisite(s): Admission to the University of Nebraska Joint Doctoral Program in Educational Administration or to any other doctoral program in the University of Nebraska, or instructor permission. Not open to non-degree graduate students.

EDL 9680 QUALITATIVE RESEARCH: FOUNDATIONS & APPROACHES (2 credits)
Qualitative research is social research that aims to investigate how people make sense of their ideas. This course will engage students in considering perspective, acknowledging positions, framing a study, and choosing a research approach (methodology).
Prerequisite(s): Admission to the Doctor of Education (Ed.D.) program in Educational Leadership or Department/Instructor's permission.

EDL 9690 QUALITATIVE RESEARCH: COLLECTION & ANALYSIS (2 credits)
Qualitative research is social research that aims to investigate how people make sense of their ideas. This course is about collecting data, applying qualitative data analysis strategies, and academic writing.
Prerequisite(s): Admission to the Doctor of Education (Ed.D.) program in Educational Leadership or Department/Instructor's permission.

EDL 9980 SUPERINTENDENT INTERNSHIP IN EDUCATIONAL ADMINISTRATION (3 credits)
This course is a guided, field-based internship for candidates seeking the school superintendent endorsement from the Nebraska Department of Education (NDE). The internship will provide candidates with experiences in the various roles and responsibilities of a superintendent.
Prerequisite(s): Admittance to the the EdD or EdS in educational administration or departmental permission. Candidates must submit an internship application by April 1 for following fall term.

EDL 9990 DISSERTATION (1-12 credits)
The course provides doctoral candidates in Educational Administration and Supervision with a process to complete a dissertation research plan. The course learning activities will focus on the completion of a candidate’s dissertation. The course is designed to allow advanced doctoral candidates to demonstrate technical mastery of the discipline and to advance knowledge by completing an investigation.
Prerequisite(s): Admittance to the EdD in Educational Administration. Department permit to enroll required. Not open to non-degree graduate students.

Educational Leadership, MS
Department of Educational Leadership, College of Education, Health, and Human Sciences

Vision Statement
The mission of the Department of Educational Leadership is to develop effective visionary, intellectual, and moral leaders who can cause positive change in education to promote the success of all students. The department's degree and endorsement programs have a distinctive metropolitan education orientation. The Department of Educational Leadership offers a master of science degree (MS) as well as non-degree
administration endorsement programs for students who have completed a master’s degree.

Program Contact Information
Tami Williams, EdD, Department Chair
312 Roskens Hall (RH)
402.554.2721
tamarawilliams@unomaha.edu

Program Website (http://www.unomaha.edu/college-of-education/educational-leadership/)

Other Program Related Information
To be considered for financial aid students must be admitted to the MS in educational leadership. Unclassified and non-degree admission students are not eligible for financial aid consideration.

Students who have earned a previous master’s degree in the education field should apply as unclassified in educational administration.

Students needing fewer than 12 credits for re-certification or professional advancement may apply as non-degree. Note that non-degree students will need to speak with the department to enroll in required classes.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission. Minimum scores for this program are:
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Statement of Purpose: 1-2 pages that addresses such topics as why you want to become a school administrator; interests; experiences; and career goals
- Resume
- Letters of Recommendation: Two letters are required
- Copy of Teaching Certificate
- Evidence that the candidate has met the State of Nebraska's Special Education and Human Resources requirements. Most candidates will probably have satisfied this requirement while earning their teaching endorsements; if not, they will be required to complete relevant coursework.

Unclassified Admission: Those educators with a master’s degree in education may apply as unclassified and complete the required and concentration hours needed for principal or special education director state certification. The application requirements are the same as the master’s degree listed above.

General Application Requirements and Admission Criteria (p. 974)

**Program-Specific Requirements**

**Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)**

- Fall: June 1
- Spring: October 1

---

**Other Requirements**

An applicant for admission to the Specialist in Education degree in the Department of Educational Leadership must have earned at least a master's degree from an accredited institution and an administrative endorsement. This is a terminal degree and if an EdD is planned at any time in the future, advising to the best degree path should take place before application.

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission. Minimum scores for this program are:
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** A 1-2 page document describing relevant professional roles and experience as well as career goals for the EdS
- **Writing Sample:** Three samples, including one with a reference section (or thesis/specialist field project)
- **Resume**
- **Letters of Recommendation:** Three required letters; one letter must be from current supervisor confirming applicant's school administrative role.
- **Administration certificate**

Together with previous graduate work, the candidate's course of study must total a minimum of 69 graduate semester hours with 30 hours meeting the time limit requirement for graduate degrees. The program of study must be approved by the department and the dean for Graduate Studies, and include a minimum of 15 semester hours after admission to the EdS program.

Elementary Education, MS

Department of Teacher Education, College of Education, Health, and Human Sciences

Vision Statement
The master’s degree in elementary education will:

- Extend 21st century teaching skills and technology applications.
- Enhance the ability to design engaging, authentic instruction for today’s students.
- Emphasize diversity and culturally responsive teaching.
- Expand professional connections with educators from midwestern and metro school districts with diverse perspectives.
- Encourage engagement with the community.
- Enable graduate students to make course selections that best fit their individual learning needs in a flexible program.

Program Website (http://www.unomaha.edu/college-of-education/teacher-education/graduate/elementary-education.php)

Other Program-Related Information
The master’s degree in elementary education does not lead to initial teacher certification.

Unclassified Students
Students who are not planning to pursue a program leading to a graduate certificate or a master’s degree can be admitted to the elementary education program as unclassified students. Candidates holding a previous master’s degree in education who are seeking additional teaching endorsements may wish to choose an unclassified status. Unclassified students are allowed to take courses for which they meet the prerequisite. Successful completion of graduate courses as an unclassified student does not obligate the department to accept those courses for credit toward the fulfillment of degree requirements. Formal advisement in an endorsement area is required.

Formal advisement in an endorsement area is required.

- Candidates should apply for endorsements as soon as they are eligible.
- If a candidate applies 10 years or more after completing all coursework, a review is required to determine if more coursework is needed.
- To add an endorsement 1/3 of the coursework must be completed at UNO in the endorsement area.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
- Fall: August 1
- Spring: January 10
- Summer: June 1

Other Requirements
- A minimum undergraduate GPA of 3.0 (on a 4.0 scale)
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proiciency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Applicants working toward the master’s degree must have a valid teaching certificate or application to the concentration that leads to certification (e.g. Accelerated Certification for Teachers concentration). Exceptions to this will be considered on an individual basis. If needed, please contact Chris Wilcoxen, the graduate program chair. Please note, a master’s degree does not lead to initial certification.
- International students who do not intend to teach in the United States may be eligible for admission.

Must receive a grade of B or better in the capstone for program completion. This class is intended to be the last class in the program.

1 A diversity course must be taken within the first half of the program.
2 Each student will include in their plan of study an area of concentration in a special field that provides depth in an area of their interest. Courses within the concentrations will be decided upon in conference with the student's advisor. Possible concentrations include: Accelerated Certification for Teachers Concentration (EACT), Bilingual Education, Early Childhood Education, English as a Second Language (ESL), Equity and Social Justice in Education, Curriculum Instruction and Assessment, Instructional Technology Leadership, School Library, Language and Learning, and Science, Technology, Engineering and Mathematics (STEM).

Exit Requirements:
Capstone TED 8700 or TED 8730. The professional project completed in this course takes the place of the comprehensive exam. Registration for the course is by permission only. This course is intended to be the last course in your program. A grade of B or better must be received to show satisfactory completion of the course and for program completion.

Electives 9

Consult with your advisor prior to enrolling in elective hours as these credits can be used toward completion of an endorsement.

Total Credits 36

- A diversity course must be taken within the first half of the program.
- TED 8700 or TED 8730 Capstone is intended to be the last course in your program. A grade of B or better must be received to show satisfactory completion of the course and for program completion.

TED 8000 SPECIAL STUDIES (3 credits)
A series of intensive studies especially for in-service teachers scheduled as regular semesters or classes, according to purpose. Possible topics may include Reading Intervention, Mental Health, Social Emotional Learning, Math in the Community, etc.
Prerequisite(s): Graduate status

TED 8006 SPECIAL METHODS IN THE CONTENT AREA (3 credits)
This course is designed to develop knowledge, skills, and dispositions requisite of teachers. Course content is determined by the discipline area. For some content areas a field experience will be required. This is an in-school, guided practicum completed in conjunction with TED 4000 math, science, language arts, world languages, Business, Information Technology, ESL and social studies sections. Candidates must demonstrate competencies related to performance in 7-12 classrooms. This is the final practicum experience prior to the clinical practice semester. (Cross-listed with TED 4000).

TED 8010 INTRODUCTION TO RESEARCH (3 credits)
This course will introduce advanced degree candidates to: A) an understanding of the scientific method as applied to behavioral research, both qualitative and quantitative; B) assessment, evaluation, descriptive, causal-comparative, experimental, and qualitative data gathering procedures and analytical strategies; C) sampling theory, techniques, distribution and hypothesis testing; D) specific designs, methods, and tools of qualitative and quantitative research; E) search and retrieval of published research, both American and international (global); F) basic statistics, both descriptive and inferential; G) the ethical requirements of conducting research with human participants as outlined by Institutional Review Boards; H) a project involving critical evaluation of both qualitative and quantitative research studies.
Prerequisite(s): Graduate standing.

TED 8030 SEMINAR IN EDUCATION (3 credits)
This is a variable content course focusing on topics of current relevance to PK-12 teachers.
Prerequisite(s): Graduate standing.

TED 8040 SEMINAR ON STUDENT TEACHING/NEW TEACHER INDUCTION (3 credits)
The seminar is designed for experienced teachers who are, or may be, serving as cooperating teachers for student teachers or as mentor teachers for beginning teachers. Participants will study the purposes, techniques, and trends involved in serving as a cooperating teacher or as a mentor.
Prerequisite(s): Successful teaching experience is required for this course.

TED 8050 DATA-DRIVEN DECISION MAKING FOR EDUCATORS (3 credits)
This course provides graduate students with hands-on experiences that model data-driven decision making for educational success in today’s classroom. Students will learn how to create valid and reliable assessments; interpret standardized test data; build data models that identify student, classroom, program, and school needs; and in general, to systematically enhance educational decision making from a base of carefully collected information. Graduate students will also explore data collection and analysis strategies associated with technologies such as cloud computing, tablet computers, and smart phones. In addition, they will experience data-driven decision-making models that can be integrated into student lessons to not only teach more effectively with data-driven decisions, but also to help teach students about data-driven decision-making. The course will use real data sets and cases, in interesting, hands on and technology-rich activities, to help educators learn how to find the “educational story” represented by a set of carefully collected data points. (Cross-listed with STEM 8050).
Prerequisite(s): Graduate standing.

TED 8055 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)
This course is designed to enhance candidates’ understanding of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs) in the U.S. context. As dedicated practitioners, reflective scholars, and responsible citizens, students will have knowledge of factors that contribute to an effective multicultural and multilingual learning environment. TED 3050 includes an in school, guided practicum. Candidates must demonstrate competencies related to teaching English Learners (ELs) in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education.
Prerequisite(s): TED 2300 (EDUC 2010) OR TED 2380; and TED 2050.

TED 8060 CURRENT ISSUES AND TRENDS IN EDUCATION (3 credits)
The course is an advanced study of current issues and trends which have substantial impact on PK-12 education. The graduate candidates who take this class will read, analyze, and evaluate relevant research in order to become conversant in those issues.
Prerequisite(s): Graduate status is required.
TED 8070 TEACHING MULTIPLE INTELLIGENCE (3 credits)
This course focuses on the utilization of the multiple intelligences (MI) theory by teachers to enhance children’s understanding of various disciplines. Graduate candidates will have the opportunity to explore, evaluate, and develop various methodologies that foster understanding.
Prerequisite(s): Graduate status.

TED 8080 STORYTELLING AND EDUCATION (3 credits)
This course is designed to consider the importance of storytelling, to provide teachers candidates with the background materials for storytelling, to study resource material for storytelling from a variety of cultures, and to develop techniques for storytelling. Actual experience in storytelling and opportunities for evaluating storytelling experiences will be provided.
Prerequisite(s): Graduate status

TED 8100 RESEARCH PROJECT (1-3 credits)
This course is designed for individual or group study and analysis of specific problems in schools dealing with curriculum and instruction in areas which have a broad scope of application rather than a specific level.
Prerequisite(s): Approval of Advisor.

TED 8120 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)
TED 8120 is designed to enhance graduate candidates' knowledge of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs). As dedicated practitioners, reflective scholars, and responsible citizens, graduate candidates will learn strategies for designing and promoting effective multicultural and multilingual learning environments. This course includes an in-school, guided practicum through which graduate candidates must demonstrate competencies related to standards related to teaching ELs in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education's ESL teaching endorsement.
Prerequisite(s): Not open to non-degree graduate students.

TED 8130 LANGUAGE, CULTURE, AND POWER (3 credits)
This course will focus on the intersection of language, culture, and power in the schools. This seminar will research how each component impacts the students and teachers in the classroom.

TED 8150 ANTI-RACISM EDUCATION: PRINCIPLES AND PRACTICES (3 credits)
This course provides a theoretical analysis of race, racism and the implications for anti-racist education. In addition to exploring the key features of anti-racism education, the course also addresses other axes of oppression, namely, class and gender, with a critical focus on racialized power and privilege, and how such features function in the broader U.S. context as well as the schooling environment. Of equal importance is a critical interrogation of the historical, ideological, and political processes that produce and maintain racism. Course participants explore pedagogies, curriculum, and school leadership strategies as mechanisms for instituting anti-racism work in schools and community.
Prerequisite(s): Graduate Status

TED 8160 ENGLISH AS A SECOND LANGUAGE STRATEGIES FOR PK-12 EDUCATORS (3 credits)
This course is designed to enhance graduate candidates' knowledge of PK-12 English as a Second Language (ESL) pedagogical and assessment strategies that address the needs of English Language Learners (ELs) in content area classrooms. As dedicated practitioners, reflective scholars, and responsible citizens, graduate candidates will be able to explore evidence-based pedagogical and assessment strategies to use in educational contexts serving ELs.
Prerequisite(s): Graduate candidate status. Not open to non-degree graduate students.

TED 8170 DEVELOPMENTAL ASSESSMENT OF THE YOUNG CHILD (3 credits)
This course is designed as a survey of developmental assessment in early childhood education (ages birth to eight years). Selection of assessment tools and strategies, implementation, data collection, analysis of results, and teaching impact are addressed in context of key assessment purposes in the early childhood field.
Prerequisite(s): Graduate status.

TED 8180 CULTURALLY RESPONSIVE TEACHING (3 credits)
This course includes an introductory analysis of the societal and institutional processes and problems which have bearing upon the education of children in urban settings. In addition, the course will focus on knowledge, skills and dispositions related to instructional strategies and classroom management needed for effective teaching in an urban environment.
Prerequisite(s): Graduate status

TED 8190 CONTEMPORARY ISSUES IN URBAN EDUCATION (3 credits)
This course is designed for candidates who wish to keep abreast of contemporary issues which confront the educational institution and teaching profession within the urban milieu.
Prerequisite(s): Graduate Status

TED 8200 SOCIAL WORLDS OF THE YOUNG CHILD (3 credits)
This course will explore theoretical and cultural perspectives on the social and emotional development of young children. This course will also examine the relationship between social emotional development, guidance practices, democratic life skills, and school readiness.
Prerequisite(s): Graduate status.

TED 8210 THE PRINCIPLES OF MULTICULTURAL EDUCATION (3 credits)
This course will develop practicing teachers’ awareness of and skill in meeting the needs of P-12 students with regards to the areas of human understanding, acceptance and value. Candidates will examine existing attitudes towards various minority groups such as racial, ethnic, gender, exceptionality, etc. School materials and attitudes will also be examined in determining the effect they have on PK-12 students.
Prerequisite(s): Graduate status.

TED 8220 PLAY AS A LEARNING MEDIUM IN EARLY CHILDHOOD EDUCATION (3 credits)
This course provides an in-depth examination of young children’s play and its curricular role in the early childhood classroom. The origins, developmental outcomes, assessment, curricular implementation, and evaluation of play will be covered, with an emphasis on play as a major component of developmentally appropriate practice with young children. The focus is on teachers learning to help children become partners in the operation of the learning environment.

TED 8230 LITERATURE FOR THE YOUNG CHILD (3 credits)
Literature for the young child is examined through the lens of developmentally appropriate practice for informing educators’ interactions with children and also for developing high-quality, literature-related projects of study across the early childhood (birth-through-age-eight) continuum.
Prerequisite(s): Graduate Status.

TED 8240 FAMILY, SCHOOL, AND COMMUNITY PARTNERS (3 credits)
This course will examine the purposes and methods for developing family, school, and community partnerships. Candidates will explore characteristics of diverse families and develop the skills necessary for planning, design, implementation, and evaluation of effective partnerships in early childhood settings.
Prerequisite(s): Graduate Status.
TED 8250 ASSESSMENT FOR CLASSROOM TEACHER (3 credits)
This course studies assessment principles, effective practices, and classroom assessment processes throughout the curriculum. The research regarding assessment for learning is studied and application is made to classroom practices.
Prerequisite(s): Graduate status.

TED 8260 ADVANCED CURRICULUM IN EARLY CHILDHOOD (3 credits)
This course is designed to provide an in-depth examination of the processes used in selecting and implementing appropriate curricular content in programs for children ages three to eight years. Particular emphasis is on the role of the teacher as a dedicated practitioner and reflective scholar in the early learning environment.

TED 8270 TRENDS IN EARLY CHILDHOOD EDUCATION (3 credits)
This course provides a context for examining socio-political and research-based influences underlying trends in early childhood education at the local, national and international levels.
Prerequisite(s): Graduate Status.

TED 8280 INTRODUCTION TO HUMAN RIGHTS IN P-12 EDUCATION (3 credits)
The course examines the intersection of human rights and P-12 education and prepares individuals to effectively work with and advocate for children and adolescents in educational settings. Students completing the course will be able to 1) demonstrate an increased understanding of fundamental human rights with a specific emphasis on education rights and the human rights of children and adolescents 2) create learning environments that elevate human rights in educational settings and 3) design developmentally appropriate instruction for children and adolescents on varied human rights topics.
Prerequisite(s): Graduate Status

TED 8290 TRAUMA INFORMED EDUCATION (3 credits)
This course will present approaches to create trauma-informed classrooms which includes definitions and characteristics of trauma and how it impacts children, a brief history of trauma and associated theories/models, and a practice of skills for intervention in the classroom to support students and their families. Topics include applied teaching strategies which describe research-based techniques to support students with a history of trauma, as well as strategies to recognize signs of secondary trauma and burnout, followed by ways to mitigate them using research-based self-care techniques. (Cross-listed with COUN 8440).

TED 8300 EFFECTIVE TEACHING PRACTICES (3 credits)
This course focuses on specific characteristics and behaviors of effective teachers. Course content will be derived from research on teaching and learning.
Prerequisite(s): Graduate status

TED 8310 HUMAN DEVELOPMENT - CONTEMPORARY IMPLICATIONS FOR TEACHING & LEARNING (3 credits)
This course examines human growth and learning from birth through late adolescence. It is designed to prepare teachers to synthesize information regarding developmental theory and subsequently apply this to lesson design and effective content-area pedagogy. Candidates will examine multiple frameworks related to the cognitive, social/emotional, and physical development of children and use those to analyze current educational practices in PK-12 schools. Cultural influences impacting human development and implications for educational practices will also be examined. The course will include field-based experiences.
Prerequisite(s): Admission into a Teacher Education Department graduate program.

TED 8320 STRENGTHENING LEADERSHIP CAPACITY THROUGH RESEARCH AND COMMUNITY COLLABORATION (3 credits)
In Strengthening Leadership Capacity through Research and Community Collaboration, students extend their knowledge, reflective practice, and leadership to a community context. The course is designed create a mutually beneficial partnership between students’ research agendas and community agencies. The goal is to enhance students’ learning of content, understand the community, and perpetuate a sense of civic agency. Additionally, students further their research by submitting an article for publication.

TED 8370 DATA VISUALIZATION AND MODELING FOR EDUCATORS (3 credits)
In the growing context of data informed decisions there is a need to answer “what if” questions in a variety of decision-making situations, as well as to display data both visually and interactively. This course will provide foundational skills in data visualization and modeling for educational decision making and instruction. It draws upon key fundamentals in data visualization (representing data trends visually) as well as key strategies in data modeling (interactive representations to explore possible outcomes). The course also explores the use of visualization and modeling technologies as well as assisting student learning with these tools. (Cross-listed with STEM 8370).

TED 8376 TEACHING AT THE MIDDLE LEVEL (3 credits)
This course will provide candidates with a variety of middle level teaching techniques and strategies in their classrooms that have been identified in current research literature as appropriate for the middle level. This course is designed to introduce candidates to the unique characteristics of the middle student, school, curriculum, history, and philosophy. (Cross-listed with TED 4370).
Prerequisite(s): TED 2300 or EDUC 2010 or TED 2380.

TED 8390 CLASSROOM MANAGEMENT IN PRACTICE (3 credits)
This course will provide graduate students with a survey of general classroom management methods for classrooms. Candidates will enhance their understanding of three basic components of effective pedagogy: 1) proactive classroom management, 2) high-impact instructional strategies that impact student engagement and learning, 3) behavior management techniques that incorporate practice, feedback, research, and reflection.
Prerequisite(s): Graduate standing

TED 8400 ASSESSMENT AND INTERVENTIONS OF PK-12 READERS (3 credits)
This course is designed for graduate candidates enrolled in the Literacy MS or reading specialist endorsement program. The purpose of this course is to develop an understanding of theory and research as it relates to assessment, evaluation and instructional approaches that support Pk-12 reading development. This knowledge is applied through a practicum experience with Pk-12 students in which candidates integrate knowledge and practices related to assessment and evaluation of readers' strengths and needs.
Prerequisite(s): Graduate Standing

TED 8410 IMPROVEMENT OF INSTRUCTION: SPECIAL TOPICS (3 credits)
This course provides an in-depth study of instructional theory, research, and methodology designed to extend teachers' professional knowledge base and enhance their pedagogical skills. When offered, a course may be limited to improvement of instruction in a selected subject area. (Cross-listed with STEM 8410).
Prerequisite(s): Graduate standing.
TED 8420 TRENDS AND TEACHING STRATEGIES IN SCIENCE EDUCATION (3 credits)
This course is designed for the graduate candidate in the Department of Teacher Education whose study program emphasis is in the area of science education. The course will describe and analyze past and present trends in science education, including curricula, teaching-learning strategies, the laboratory and instructional materials. The course focus will be K-12 and as such is meant to serve both elementary and secondary graduate candidates. (Cross-listed with STEM 8420).

TED 8430 SCHOOL CURRICULUM PLANNING (3 credits)
This course is designed to provide advanced degree candidates with an understanding of the theory, principles, and practices utilized in curriculum planning in American schools. This course focuses on the principles and practices of effective curriculum planning and teachers' part in these processes as curriculum developers. (Cross-listed with STEM 8430).

TED 8470 TEACHING THE LANGUAGE ARTS (3 credits)
This course is designed to enhance candidates' knowledge of best practices in teaching reading, writing, listening, and speaking. Candidates will learn about research supported appropriate language arts instruction strategies and assessments. This course will inform graduate students as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

TED 8480 FOUNDATIONS OF BILINGUAL EDUCATION (3 credits)
This course is designed to give future and current teachers a thorough understanding of the theoretical, political, historical, and practical foundations of bilingual/multicultural education in the United States. As dedicated practitioners, reflective scholars, and responsible citizens, graduate students will have knowledge of factors that contribute to effective multilingual and multicultural learning environments that promote individual and societal bilingualism. Advanced Spanish language proficiency required.
Prerequisite(s): Graduate status

TED 8490 SPANISH LANGUAGE ARTS (3 credits)
This course is designed to reinforce first and second language acquisition theory as it relates to dual immersion settings. Best practices for developing and reinforcing bilingualism and biliteracy are presented and used for planning and delivering instruction. Spanish fluency is required for the course.
Prerequisite(s): Graduate status required for graduate students pursuing the bilingual education endorsement and concentration (does not lead to a Nebraska Department of Education teaching endorsement). Advanced Spanish language proficiency required.

TED 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)
This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with AVN 8510, STEM 8510).
Prerequisite(s): Graduate standing.

TED 8520 SCHOOL LIBRARY PRACTICUM (3 credits)
Candidates will gain direct experience and an understanding of the theories, concepts and activities integral to public services, technical services, and the administration in a 21st Century library and information agency at an assigned field site. Candidates will demonstrate the ability to plan, develop, and implement programming and services for patrons and diverse learners in their schools and communities.
Prerequisite(s): Candidates must be in the final 2 semesters of their school library program & must complete an application for the Practicum the semester prior to their practicum. Not open to non-degree graduate students.

TED 8530 INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS (3 credits)
This course is designed to provide graduate candidates with the opportunity to enhance interdisciplinary instructional strategies, curricular understanding, and lesson preparation in the areas of science, technology, engineering, the arts, and mathematics (STEAM) through analysis and reflective practices in STEAM. This course provides hands-on experiences that model STEAM integration techniques, including how to effectively engage with community agencies and partners to bring STEAM into the classroom. This course emphasizes not only the technical aspects of STEM, but also the creativity and innovation that arts integration can add to enhance STEM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. (Cross-listed with STEM 8530).
Prerequisite(s): This course includes both teacher education and STEAM related topics and therefore fits into both TED and STEM program coursework.

TED 8540 DIGITAL CITIZENSHIP (3 credits)
The course explores key concepts of Digital Citizenship pertaining to digital law, digital ethics, digital interaction, digital literacy, and cyber-security. The course addresses an educator’s role as technology leader in both policy and practice to establish a responsible and robust digital learning community in P-12 schools.
Prerequisite(s): Graduate Standing/Status

TED 8550 TECHNOLOGY FOR CREATIVE AND CRITICAL THINKING (3 credits)
Technology for Creativity and Critical Thinking investigates the use of visual media tools in P-12 digital learning environments. This course provides candidates an opportunity to develop leadership skills and dispositions relevant to advocacy initiatives addressing policy and best practice in the use of technology in P-12 schools. The course encourages educators to critically evaluate and analyze digital tools supporting creativity and critical thinking through research and project development.

TED 8560 TECHNOLOGY FOR DIVERSE LEARNERS (3 credits)
This course will explore categories of diverse learners and how to effectively enhance STEM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. Throughout the course, candidates will be challenged as a leader to connect professionally, locally, and nationally to learn and share from professional peers.

TED 8570 INTERNET IN THE LEARNING PROCESS (3 credits)
This course is designed to help educators actively explore instructional implementations of Internet use appropriate for use in K-12 classrooms, successful diffusion of Internet innovations in educational environments, and emerging multicultural “breaking down the walls of the classroom” concepts available to educators through Internet use.

TED 8580 ONLINE TEACHING AND LEARNING (3 credits)
Online Teaching and Learning is a course for education professionals that investigates the use of online tools for planning, preparing and assessing student learning in an online teaching and learning environment. The course will prepare candidates to provide leadership for online teaching and learning initiatives within learning organizations. The course encourages education professionals to explore methods of virtual lesson delivery and online assessment through direct instruction, discussion, and project development.
Prerequisite(s): Graduate Admissions status
TED 8590 TEACHING AND LEARNING IN DIGITAL ENVIRONMENTS (3 credits)
This course is an introduction to future-ready information, digital learning environments, and instructional technologies for use with children and youth. Course will cover a diverse array of technical literacies that serve as content and skill goals for today's children and youth in P-12 schools and other learning environments.

TED 8610 TEACHING OF WRITING THROUGHOUT THE CURRICULUM (3 credits)
This course will develop candidates' understanding of the various aspects of writing to integrate throughout the content areas. Candidates will acquire and apply a common language for teaching and assessing student writing and investigate the varied ways writing genres extend throughout the curriculum. Candidates will examine research-supported writing instruction and the role write-to-learn strategies play in supporting diverse students in accessing and understanding content-specific information.
Prerequisite(s): Graduate status.

TED 8640 OPEN EDUCATIONAL RESOURCES FOR P-12 TEACHERS (3 credits)
TED 8640 Open Educational Resources for P-12 Teachers affords opportunities to study, evaluate, plan, and implement the open educational resources (OERs) to meet state, district, or diocese content standards and support equitable remote learning experiences. Graduate candidates will develop respective P-12 grade- and/or content-appropriate content/curriculum utilizing OERs focused on STEM (Science, Technology, Engineering, and Mathematics) education and the use of technology integration to foster effective teaching and learning.

TED 8650 CHILDREN’S LITERATURE AND EDUCATION (3 credits)
Candidates in this graduate course will explore story, poetry, drama, and informational materials for elementary students with an emphasis on methods for including literature in school curricula with an awareness of diverse children’s lives, discourses, and understandings. Examines current issues, recent materials, and the theoretical and research base of this field to develop meaningful and creative learning, literacy, and library experiences for children.

TED 8660 YOUNG ADULT LITERATURE (3 credits)
This course extends candidates' knowledge of literature for young adults. The course addresses current trends in the genre and engages candidates in activities that support pedagogies in basic, visual, information and cultural literacies.
Prerequisite(s): Graduate status.

TED 8695 LITERACY AND LEARNING (3 credits)
This course examines ways in which reading and writing can facilitate student learning in content areas studies (e.g., science, social studies, physical education, art, music, and math). The main focus is on teaching practices that engage students and contribute to their learning, integrating their background knowledge and cultural experiences with content area literacy. (Cross-listed with TED 3690).

TED 8700 ELEMENTARY EDUCATION CAPSTONE (3 credits)
This course is designed as a required, final capstone course for Elementary Education graduate students to be taken in the last nine hours of the Master of Science program. A grade of B or better must be received in TED 8700 to show satisfactory completion of the course and for program completion.
Prerequisite(s): Permission of the Elementary Education Program Chair. Not open to non-degree graduate students.

TED 8710 RESEARCH AND INQUIRY (3 credits)
The purpose of this course is for candidates to gain an overview and understanding of questioning, inquiry, and research strategies used in future ready P-12 libraries in order to ensure access to reference services and resources in a variety of formats and to design and support information literacy and inquiry-based instruction for all members of the learning community.

TED 8720 INTRODUCTION TO INSTRUCTIONAL COACHING IN PK-12 EDUCATION (3 credits)
This course examines the prominent coaching models used in PK-12 schools (i.e. teacher-centered coaching, student-centered coaching, cognitive coaching, transformational coaching). Candidates completing this course will be able to: develop an understanding of best practices in coaching, create a common lexicon for the role of an instructional coach, engage in the coaching cycle, and create a personal vision for their work as a coach. Candidates will engage in a field based experience to apply their learning.
Prerequisite(s): Graduate Status.

TED 8726 SPECIAL LIBRARIES AND INFORMATION AGENCIES (3 credits)
Candidates will demonstrate an understanding of the major types of 21st Century special libraries and information agencies. Candidates will demonstrate an understanding of social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the special libraries and information agencies. (Cross-listed with TED 4720).

TED 8730 PK-12 CAPSTONE (3 credits)
The PK-12 Graduate Capstone course provides candidates with an opportunity to apply the knowledge, skills, and dispositions acquired during their program to content specific synthesis activities in their respective disciplines. Students will demonstrate their ability to integrate information from program coursework in the design, development and presentation of a final capstone project related to teaching and learning.
Prerequisite(s): Graduate standing. Limited to those in online pathways. Not open to non-degree graduate students.

TED 8740 ORGANIZATION OF INFORMATION (3 credits)
Candidates will demonstrate the ability to integrate the legal and ethical standards of their discipline in ensuring access to information and ideas for a diverse array of learners in schools and communities. This course also addresses current theory and best practice in descriptive and subject cataloging and classification of information resources that align with school library standards and guidelines.

TED 8746 ORGANIZATION OF INFORMATION (3 credits)
Candidates will demonstrate a basic understanding of the theories, concepts and activities of descriptive and subject cataloging and classification procedures of information resources in 21st Century libraries and information agencies.

TED 8750 OXBOW WRITING PROJECT (3 credits)
Oxbow Writing Project summer institute immerses K-16 educators in writing pedagogy via their own writing, presentations about writing and pedagogy, reading and discussing professional literature, designing and implementing an in-depth inquiry project, and developing leadership strengths. Oxbow is a National Writing Project Site. (Cross-listed with ENGL 8750).
Prerequisite(s): Acceptance into Oxbow Writing Project Summer Institute.

TED 8760 MANAGING COLLECTIONS IN LIBRARIES AND INFORMATION AGENCIES (3 credits)
Candidates will demonstrate an understanding of the theories, concepts and activities integral to proactive collection management in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of community analysis, collection analysis, and the ability to conduct critical evaluations of a diverse array of information resources.
**TED 8770 INTEGRATING TECHNOLOGY INTO INSTRUCTIONAL DESIGN (3 credits)**
The purpose of this course is to introduce participants to effective methods for the integration of educational media into instructional design and provides participants (1) knowledge of broad instructional design theories and models with a concentration on constructivism, (2) experience in designing instruction that effectively integrates technology into the teaching-learning process, and (3) experience in producing instructional media. The course is intended to provide fundamentals in the selection, evaluation, production, application and utilization of educational media. This course is designed for in-service library media or instructional technology specialists as well as regular classroom teachers.

**Prerequisite(s):** Graduate status

**TED 8780 FOUNDATIONAL SKILLS OF EARLY LITERACY (3 credits)**
This course builds knowledge and instructional practices focused on early literacy foundational skills. With a focus on the components of foundational skills: (print concepts, phonological awareness, phonics and word recognition, and fluency) candidates will be able to identify concrete strategies to support Pk-3 student learning and practice. The course helps to build knowledge and skills of evidence-based early literacy instruction and provides resources to support teachers' planning and instruction.

**Prerequisite(s):** Graduate status

**TED 8800 MULTICULTURAL LITERATURE FOR CHILDREN AND YOUTH (3 credits)**
This is designed as a graduate-level course dealing with utilization of literary materials representing authors and content from multiple perspectives, particularly authors whose cultural and ethnic backgrounds differ from the mainstream.

**TED 8810 STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH (3 credits)**
This course will explore theoretical and foundational pedagogical strategies in early childhood education used to deliver integrative STEM education in the preK-12 setting. In order to understand the research and practice of STEM disciplines in preK-12, it is necessary to examine the social, cultural, political, and functional aspects that influence them. Candidates will investigate the nature of STEM education, Early Childhood Education (ECE) pedagogy and perspectives of learning, content knowledge and dispositions for educators of STEM topics, and issues of access and equity for STEM education through literature, discussion, and practice. This course includes a community outreach component in which candidates will use qualitative methods to observe class topics in public settings. (Cross-listed with STEM 8810)

**Prerequisite(s):** Graduate status

**TED 8816 PRINCIPLES AND PHILOSOPHY OF INTEGRATING CAREER AND ACADEMIC EDUCATION (3 credits)**
This course presents the philosophies and principles/practices underlying how schools can better prepare students for the workplaces of the future with emphasis on the integration of career education within broader academic preparation. The roles and responsibilities of teachers, counselors, and administrators in implementing integrated approaches will be examined. (Cross-listed with TED 4810).

**TED 8820 CAPSTONE IN STEM EDUCATION (3 credits)**
This course will prepare graduate students for the integration, articulation, and differentiation of curriculum and instruction in and between the STEM core areas of Science, Technology, Engineering, and Mathematics. Special emphasis will be on using the STEM core content to help provide applications and context to existing science and mathematics curriculum and instruction and on providing leadership in developing curriculum for mathematics and science dependent courses in engineering and technology.

**Prerequisite(s):** The student must be enrolled in one of the following concentrations: STEM, mathematics, science, technology; and be enrolled in the last six hours of their program of study. Not open to non-degree graduate students.

**TED 8830 LEADERSHIP AND MANAGEMENT IN SCHOOL LIBRARIES (3 credits)**
The course explores best practice for effective leadership and management of 21st Century school libraries. Candidates will gain a comprehensive knowledge of the theories, policies and processes involved in directing a school library in support of the personal and academic success of P-12 students. Candidates will explore and employ ethical codes of conduct in their profession to ensure school libraries meet the needs of their diverse array of patrons.

**TED 8840 ENGINEERING EDUCATION EXTERNSHIP (3 credits)**
This graduate course will address the best practice of effective teaching and learning in Engineering Education through professional collaboration between K-12 STEM (Science, Technology, Engineering, and Mathematics) teachers and practicing engineering professionals. K-12 STEM teachers, as graduate students in the course, will learn about and address real-world applications and career opportunities in STEM education through the externship. K-12 STEM teachers will research and develop authentic, experiential learning opportunities and projects for the classroom through course supports associated with lecture, discussion, and partnerships with practicing engineering professionals. The externship will be integral to the K-12 STEM teachers’ experiences and work in this course, as the course models effective professional collaboration founded on experience, knowledge, and skills to achieve a curriculum enhancement goal. (Cross-listed with STEM 8840).

**Prerequisite(s):** Graduate status. Not open to non-degree graduate students.

**TED 8850 PROFESSIONAL COLLABORATION (3 credits)**
This course is designed to prepare candidates to work in collaboration with other professionals and parents to create a learning environment that enhances the potential for academic success and improvement of instructional practices. The focus will be on collaborative problem solving. (Cross-listed with SPED 8980).

**Prerequisite(s):** Admission to Graduate College.

**TED 8856 COORDINATION TECHNIQUES IN WORK-BASED LEARNING (3 credits)**
This course reviews responsibilities and techniques of coordination for the work-based learning teacher-coordinator and/or work-based learning coordinator, with special emphasis on administration of the part-time cooperative program and analysis of the laws and regulations governing this program. (Cross-listed with TED 4850).

**TED 8860 INVENTION & INNOVATION IN ENGINEERING EDUCATION (3 credits)**
This course will address emerging trends in STEM education for in-service K-12 STEM teachers with a focus on the use of engineering education practices in teaching and learning content. STEM teachers will receive applicable, hands-on, classroom-ready experiences through lecture, professional instruction, and projects that will emphasize product design and creation through the Engineering Design Process. The Engineering Design Process will be central to the candidates' experiences in this course and will be used by the candidates to develop curriculum utilizing emerging trends to supplement current course content and standards. Interdisciplinary planning will be central to the course. (Cross-listed with STEM 8860).

**Prerequisite(s):** Graduate status is required.
TED 8880 LEADERSHIP IN EARLY CHILDHOOD EDUCATION (3 credits)
This course seeks to prepare candidates with leadership skills in the early childhood field that will empower them to initiate and implement changes in programs serving young children and families. Candidates will explore and apply frameworks of leadership and analyze policy, governance, and power structures that can impact change. Candidates will also learn effective advocacy skills to positively influence policies and practices in program and governance structures. Lastly, candidates will examine approaches for developing new leaders in early childhood education through reflective supervision and mentorship.
Prerequisite(s): Graduate status.

TED 8900 SECONDARY EDUCATION GRADUATE CAPSTONE (3 credits)
The Secondary Education Graduate Capstone course provides candidates with an opportunity to apply the knowledge, skills, and dispositions acquired during their program to content specific synthesis activities in their respective disciplines. Candidates will demonstrate their ability to integrate information from program coursework in the design, development and presentation of a final capstone project related to teaching and learning in 21st Century educational environments.
Prerequisite(s): 30 credit hours towards degree completion; Permission required by Program Advisor. Not open to non-degree graduate students.

TED 8970 INDEPENDENT STUDY (1-3 credits)
This is a specially designed course taken under the supervision of a graduate faculty member to accommodate the student who has identified a focus of study not currently available in the departmental offerings and who has demonstrated capability for working independently.
Prerequisite(s): Permission of Department and Graduate Faculty member.

TED 8980 PRACTICUM: VARIOUS CONTENT AREAS (1-6 credits)
This course is designed to provide school professionals with a guided, supervised, field experience that will develop and enhance the knowledge, skills, and dispositions requisite of a successful educational practitioner.
Prerequisite(s): Prerequisites for the course will vary, depending on the content/discipline area. See syllabus for specific discipline area.

TED 8990 THESIS (1-6 credits)
This course is an independent research project completed under the direction of a thesis advisor and required of all candidates pursuing a Master of Science with Thesis option.
Prerequisite(s): Completion of Selective Retention and approval of advisor. Not open to non-degree graduate students.

TED 9100 THEORIES, MODELS, AND PRACTICES OF LITERACY (3 credits)
This course helps candidates develop a framework about the theories, models, practices, processes, and related research associated with literacy. The content looks across grade levels and student populations, and across social and cultural contexts in an examination of factors that impact theories and processes of literacy.
Prerequisite(s): Graduate status.

TED 9110 PRINCIPLES AND PRACTICES FOR TEACHING READERS (3 credits)
This foundational reading course is to provide candidates with a broad understanding of the core reading principles (phonological awareness, phonemic awareness, fluency, vocabulary and comprehension) as they relate to research, evidence-based practices and diverse students' literacy development. Candidates will also explore educational trends and shifts in literacy policies and approaches, and the impact these trends and shifts have on PK-12 classroom practices.

TED 9120 GRADUATE IN-SERVICE TEACHING (3 credits)
This is a graduate experience for in-service teachers pursuing teacher certification. Candidates must successfully complete a minimum of 100 hours (or per program of study) of field experience prior to completing their in-service teaching experience.
Prerequisite(s): Graduate standing. Permission. Applications go to the Office of Field Experiences. Not open to non-degree graduate students.

TED 9130 ASSESSMENTS AND INTERVENTIONS - ELEMENTARY (3 credits)
This course is designed for graduate candidates enrolled in the Literacy Masters or Reading Specialist endorsement program. The purpose of this course is to develop an understanding of theory and research as it relates to assessment and evaluation and instructional approaches that support reading development. This knowledge is applied through a practicum experience with elementary students in which candidates integrate knowledge and practices related to assessment and evaluation of readers' strengths and needs.

TED 9140 ASSESSMENT AND INTERVENTION - SECONDARY (3 credits)
This course is designed for graduate candidates in literacy endorsement and Master's programs. The purpose of this course is to develop an understanding of the theory and research driving assessment and evaluation and instructional approaches as they relate to reading differences for middle and high school students. Included in this course is knowledge about the role and responsibility of a literacy leader with regard to coaching, mentoring, supervision, and evaluation of a reading program. Application of this information is demonstrated through a practicum experience with middle and high school students.
Prerequisite(s): TED 9100; TED 9110 concurrent with, or prior to TED 9140.

TED 9180 LITERACY RESEARCH SEMINAR (3 credits)
This course will enhance candidates' understanding and ability to critically examine, apply, and conduct current literacy research by developing understandings of how to (1) discuss historical trends in literacy research, (2) critically evaluate the designs, theories, methods and tools of literacy research, and (3) develop understandings of action research to plan and implement a preliminary literacy research study in their own context. Candidates will develop a research proposal that is grounded in theory and action research methods within their own learning context.

TED 9190 LITERACY GRADUATE CAPSTONE (3 credits)
The Literacy Program Graduate Capstone course provides candidates with an opportunity to synthesize the knowledge, skills, and dispositions acquired during their program to honor the interrelationships among classroom, school, sociocultural, and community contexts as they relate to diverse students' literacy development. Candidates will demonstrate their ability to integrate information from program coursework in the design, development, and presentation of a final capstone project related to teaching, learning, and literacy advocacy in 21st Century educational environments.
Prerequisite(s): This course is designed as a capstone event. Accordingly, students must have no more than 6 additional remaining credit hours of coursework. Permit to enroll required.

TED 9200 CRITICAL PEDAGOGY: TEACHING FOR SOCIAL JUSTICE (3 credits)
This course examines ways in which ideology, power, and culture intersect in P-12 educational settings. Undemocratic, inequitable, and oppressive structures are identified. Possibilities for democratic, equitable transformations are proposed.
Prerequisite(s): Graduate status.

STEM 8030 EVOLUTION: FROM GENOMES TO ECOSYSTEMS (3 credits)
This course will prepare students to evaluate and discuss evolution as an underlying concept in all of biology. Further, it will provide a comprehensive overview of evolutionary processes related to the evolution of genomes, development, physiology, morphology, behavior, and ecosystems. (Cross-listed with BIOL 8030).
Prerequisite(s): Courses for graduate admission or equivalent, or with permission of instructor.
STEM 8040 TOPICS IN MATHEMATICAL COMPUTING (3 credits)  
This course focuses on the current state-of-the-art technology that is either designed for or is uniquely suitable for teaching mathematics. (Cross-listed with MTCH 8040)  
Prerequisite(s): MATH 2200 or equivalent or approval of instructor.

STEM 8050 DATA-DRIVEN DECISION MAKING FOR EDUCATORS (3 credits)  
This course provides graduate students with hands-on experiences that model data-driven decision making for educational success in today's classroom. Students will learn how to create valid and reliable assessments; interpret standardized test data; build data models that identify student, classroom, program, and school needs; and in general, to systematically enhance educational decision making from a base of carefully collected information. Graduate students will also explore data collection and analysis strategies associated with technologies such as cloud computing, tablet computers, and smart phones. In addition, they will experience data-driven decision-making models that can be integrated into student lessons to not only teach more effectively with data-driven decisions, but also to help teach students about data-driven decision-making. The course will use real data sets and cases, in interesting, hands on and technology-rich activities, to help educators learn how to find the "educational story" represented by a set of carefully collected data points. (Cross-listed with TED 8050)  
Prerequisite(s): Graduate Standing.

STEM 8170 ECOSYSTEM ANALYSIS FOR EDUCATORS (3 credits)  
This course is designed for education graduate students who wish to take a field-based biology course that uses an interdisciplinary approach to understanding the ecosystem of the tallgrass prairie. This course engages graduate students in methods reflecting multidisciplinary STEM strategies (e.g. scientific inquiry, modeling, geographic information system mapping, etc.) associated with research taking place at the Glacier Creek Preserve. Graduate students completing this course will develop advanced knowledge of ecology, restoration ecology, and monitoring of prairie habitat restoration. Graduate students will focus on the technical, biogeochemical, ecological and cultural aspects of analyzing and restoring the prairie ecosystem and its various habitats. (Cross-listed with BIOL 8170)  
Prerequisite(s): Graduate Standing or Permission from the Instructor.

STEM 8300 STEM TEACHING METHODS FOR DEVICE DESIGN (3 credits)  
STEM Teaching in Biomechanics focuses on principles in teaching including teaching models (Problem-Based, Team-Based, Inquiry-Based teaching), student assessment, classroom logistics/organization, and device design through a mentorship project. (Cross-listed with BMKI 9301, BMCH 8300).

STEM 8370 DATA VISUALIZATION AND MODELING FOR EDUCATORS (3 credits)  
In the growing context of data-informed decisions there is a need to answer "what if" questions in a variety of decision-making situations, as well as to display data both visually and interactively. This course will provide foundational skills in data visualization and modeling for educational decision making and instruction. It draws upon key fundamentals in data visualization (representing data trends visually) as well as key strategies in data modeling (interactive representations to explore possible outcomes). The course also explores the use of visualization and modeling technologies as well as assisting student learning with these tools. (Cross-listed with TED 8370).

STEM 8410 IMPROVEMENT OF INSTRUCTION: SPECIAL TOPICS (3 credits)  
This course provides an in-depth study of instructional theory, research, and methodology designed to extend teachers' professional knowledge base and enhance their pedagogical skills. When offered, a course may be limited to improvement of instruction in a selected subject area. (Cross-listed with TED 8410).

STEM 8420 TRENDS AND TEACHING STRATEGIES IN SCIENCE EDUCATION (3 credits)  
This course is designed for the graduate candidate in the Department of Teacher Education whose study program emphasis is in the area of science education. The course will describe and analyze past and present trends in science education, including curricula, teaching-learning strategies, the laboratory and instructional materials. The course focus will be K-12 and as such is meant to serve both elementary and secondary graduate candidates. (Cross-listed with TED 8420).  
Prerequisite(s): Graduate standing.

STEM 8430 SCHOOL CURRICULUM PLANNING (3 credits)  
This course is designed to provide advanced degree candidates with an understanding of the theory, principles, and practices utilized in curriculum planning in American schools. This course focuses on the principles and practices of effective curriculum planning and teachers' part in these processes as curriculum developers. (Cross-listed with TED 8430).

STEM 8450 BIOLOGY EDUCATION RESEARCH METHODS (3 credits)  
In this course, students will learn the methods of conducting pedagogical research in Biology, understand how people learn the concepts, practices, and ways of thinking in science and engineering; understand the nature and development of expertise in a discipline; help identify and measure appropriate learning objectives and instructional approaches that advance students toward those objectives; contribute to the knowledge base in a way that can guide the translation of statistical findings to classroom practice; and identify approaches to make science and engineering education broad and inclusive. Students will work with live data sets to evaluate effective pedagogical approaches in the biology classroom of various audiences (K-16).

STEM 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)  
This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with TED 8510, AVN 8510)  
Prerequisite(s): Graduate standing.

STEM 8530 INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS (3 credits)  
This course is designed to provide graduate candidates with the opportunity to enhance interdisciplinary instructional strategies, curricular understanding, and lesson preparation in the areas of science, technology, engineering, the arts, and mathematics (STEAM) through analysis and reflective practices in STEAM. This course provides hands-on experiences that model STEAM integration techniques, including how to effectively engage with community agencies and partners to bring STEAM into the classroom. This course emphasizes not only the technical aspects of STEM, but also the creativity and innovation that arts integration can add to enhance STEM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. (Cross-listed with TED 8530)  
Prerequisite(s): This course includes both teacher education and STEAM related topics and therefore fits into both TED and STEM program coursework.
STEM 8810 STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH (3 credits)
This course will explore theoretical and foundational pedagogical strategies in early childhood education used to deliver integrative STEM education in the preK-12 setting. In order to understand the research and practice of STEM disciplines in preK-12, it is necessary to examine the social, cultural, political, and functional aspects that influence them. Candidates will investigate the nature of STEM education, Early Childhood Education (ECE) pedagogy and perspectives of learning, content knowledge and dispositions for educators of STEM topics, and issues of access and equity for STEM education through literature, discussion, and practice. This course includes a community outreach component in which candidates will use qualitative methods to observe class topics in public settings. (Cross-listed with TED 8810)
Prerequisite(s): Graduate status

STEM 8840 ENGINEERING EDUCATION EXTERNSHIP (3 credits)
This graduate course will address the best practice of effective teaching and learning in Engineering Education through professional collaboration between K-12 STEM (Science, Technology, Engineering, and Mathematics) teachers and practicing engineering professionals. K-12 STEM teachers, as graduate students in the course, will learn about and address real-world applications and career opportunities in STEM education through the externship. K-12 STEM teachers will research and develop authentic, experiential learning opportunities and projects for the classroom through course supports associated with lecture, discussion, and partnerships with practicing engineering professionals. The externship will be integral to the K-12 STEM teachers’ experiences and work in this course, as the course models effective professional collaboration founded on experience, knowledge, and skills to achieve a curriculum enhancement goal. (Cross-listed with TED 8840).
Prerequisite(s): Graduate status. Not open to non-degree graduate students.

STEM 8860 INVENTION & INNOVATION IN ENGINEERING EDUCATION (3 credits)
This course will address emerging trends in STEM education for in-service K-12 STEM teachers with a focus on the use of engineering education practices in teaching and learning content. STEM teachers will receive applicable, hands-on, classroom-ready experiences through lecture, professional instruction, and projects that will emphasize product design and creation through the Engineering Design Process. The Engineering Design Process will be central to the candidates’ experiences in this course and will be used by the candidates to develop curriculum utilizing emerging trends to supplement current course content and standards. Interdisciplinary planning will be central to the course. (Cross-listed with TED 8860).
Prerequisite(s): Graduate status is required.

STEM 8910 CAPSTONE IN CS EDUCATION (3 credits)
This course will allow graduate students, as an individual or as part of a group, to study and analyze specific problems related to teaching computing in schools. Projects will be concerned with the curriculum and/or instruction of computing and should address a broad scope of application rather than a specific level. (Cross-listed with CSTE 8910).
Prerequisite(s): Student must have completed 21 hours in the Masters of CS Education program.

English
Degree Programs Offered
• English, MA (p. 1222)

Certificates Offered
• Advanced Writing Certificate (p. 1223)
• Literature and Culture Certificate (p. 1224)

ENGL 8010 SEMINAR: TEXT-BASED RESEARCH METHODS FOR ENGLISH STUDIES (3 credits)
An overview of the theories, methods and practices for conducting text-based research in English and related disciplines; graduate students gain experience conducting textual analysis and interpretation using relevant theories and methods, and reporting findings. Prerequisite(s): Admission to the graduate program in English or permission of instructor.

ENGL 8020 SEMINAR: COLLEGE WRITING INSTRUCTION (5 credits)
The seminar in college writing instruction prepares Graduate Teaching Assistants to fulfill their responsibilities as teachers of first-year composition. Prerequisite(s): Graduate status and a teaching assistantship. Not open to non-degree graduate students.

ENGL 8025 AMERICAN POETRY TO 1900 (3 credits)
A comprehensive survey of the American poetic tradition from the 17th to the end of the 19th century. (Cross-listed with ENGL 4020).
Prerequisite(s): Graduate standing; ENGL 8010 or ENGL 8030 recommended.

ENGL 8030 FIELD-BASED RESEARCH METHODS IN ENGLISH STUDIES (3 credits)
An overview of resources and methods for conducting qualitative, field-based research in English and related disciplines; students gain experience collecting data and analyzing data and reporting findings. Prerequisite(s): Admission to the graduate program in English or permission of instructor. Not open to non-degree graduate students.

ENGL 8036 AMERICAN POETRY SINCE 1900 (3 credits)
A survey of the American poetic tradition from the turn of the twentieth-century to the present, focusing on various "schools" such as Imagism, High Modernism, the Harlem Renaissance, Confessional, Beats, and New Formalism. (Cross-listed with ENGL 4030).
Prerequisite(s): Graduate Standing; ENGL 8010 or ENGL 8030 recommended

ENGL 8040 WRITING FOR PUBLICATION (3 credits)
In this seminar, students will study and practice methods for transforming their scholarly research and/or creative nonfiction into publishable articles and essays, as well as conference papers and other modes of sharing that work publicly. Students will edit and revise previously drafted work with the guidance of instructor feedback, advice from faculty mentors in their fields, and peer review. They will also research the larger structures and expectations of professional publishing in their fields. Prerequisite(s): Graduate standing and instructor permission.

ENGL 8066 THE AMERICAN NOVEL (3 credits)
A comprehensive survey of the evolution of the American Novel from the 1780s to the present day. Special emphasis will be placed on how a broad range of authors have responded to changing cultural and historical circumstances, and on how they have expressed widely varying viewpoints depending on their own gender, race, geographic region, and/or ethnicity. (Cross-listed with ENGL 4060).
Prerequisite(s): Graduate standing in English

ENGL 8070 SEMINAR: WALT WHITMAN AND EMILY DICKINSON (3 credits)
A comprehensive examination of the poetry of Walt Whitman and Emily Dickinson. Prerequisite(s): Graduate Program admission. ENGL 8010 or ENGL 8030 recommended.
ENGL 8100 SEMINAR: TOPICS IN AMERICAN LITERATURE (3 credits)
This course involves the investigation of a particular topic (genre, author or group of authors, time period, subject area) in American literature. (The course may be repeated for additional credits under different topics.) Formerly ENGL 8060.
Prerequisite(s): Graduate standing; ENGL 8010 or 8030 recommended

ENGL 8146 AMERICAN LITERARY REALISM AND NATURALISM (3 credits)
In the late nineteenth and early twentieth century two major literary genres - Realism and Naturalism - emerged in the United States not only to challenge the primacy of Romanticism and its generally optimistic view of life but also to actively engage with the modern America created after the Civil War. This course examines a wide range of realist and naturalist works, written between 1865 and 1914, by an extremely diverse group of male and female authors from different races, ethnicities, regions, religions, and socioeconomic classes. Emphasis will be placed on how various cultural, economic, political, and social factors influenced the construction and reception of these works. (Cross-listed with ENGL 4140).
Prerequisite(s): Graduate standing in English

ENGL 8160 SEMINAR: POSTMODERN FICTION OF THE UNITED STATES (3 credits)
A seminar in American Fiction from the second half of the twentieth century into the twenty-first century which presents and discusses some of the major trends and issues associated with postmodern culture in America.

ENGL 8166 TOPICS IN AMERICAN REGIONALISM (3 credits)
A study of major topics in American literary regionalism, with special emphasis on particular social, cultural, and geographical contexts. Focus will be determined by instructor, but may include particular historical periods, geographic regions, authors, or literary themes. (Cross-listed with ENGL 4160).
Prerequisite(s): Graduate standing in English

ENGL 8190 BOOK-SMART: EDUCATION IN LITERATURES AND CULTURES (3 credits)
The purpose of this course is to enable a critical consideration of how education is tied inextricably to issues of class, gender, religion, culture, and politics as well as an examination of how literature responds to and represents the theme of education, often also powerfully making the case for outsiders excluded by systems of privilege.

ENGL 8196 THE AMERICAN NIGHTMARE (3 credits)
The literature in this course represents and explores major trends that subvert America's fascination with the "American Dream" narrative and even contend its opposite, an "American Nightmare." Over the twentieth century, many writers expressed a disillusionment with the breach that separates experiences in America from the "America" idealized by narratives of the founding roots and the constructed American Dream. Writers who have experienced or witnessed the marginalization or helplessness of large portions of the American population write in a variety of ways about the failures of this American Dream narrative. This course will analyze these expressions in American literature. (Cross-listed with ENGL 4190).
Prerequisite(s): ENGL 1160 or permission.

ENGL 8216 THE HARLEM RENAissance (3 credits)
"The Harlem Renaissance" was the name given to the explosion in cultural, artistic, and social awareness that occurred primarily in Harlem, an area of New York City, between the end of World War I and the middle of the 1930s. This course will familiarize students with the general characteristics of African American literature produced during this period and its relation to African American literature and American literature write large. The selected texts and writers will provide particular insight into the historical experiences of African Americans in the U.S. primarily between the two world wars and inform the subsequent cultural production of African Americans in later years. (Cross-listed with ENGL 4210, BLST 4210, BLST 8216).
Prerequisite(s): Graduate standing in English

ENGL 8236 LATINO LITERATURE (3 credits)
A study of representative works of Mexican-American, Spanish-American, and American writers, along with their cultural and historical antecedents. Formerly ENGL 4180/8186 Chicano Literature and Culture. (Cross-listed with ENGL 4230).
Prerequisite(s): Graduate program admission

ENGL 8246 TEACHING LATINO LITERATURE (3 credits)
This course is designed specifically for current or future teachers of high school students. It introduces pedagogical approaches of contemporary literature by Latinos/as in the United States. The course provides an overview of Mexican American, Chicano/a, and other Latino/a voices in American literature from mid-19th Century to the present and complement that with social, cultural, historical and other approaches to developing teaching strategies. (Cross-listed with ENGL 4240)

ENGL 8256 WOMEN'S STUDIES IN LITERATURE (3 credits)
A critical study of literature by and/or about women in which students learn about contributions of women to literature, ask what literature reveals about the identity and roles of women in various contexts, and evaluates standard interpretations from the perspectives of current research and individual experience. (Cross-listed with ENGL 4250, WGST 4250).

ENGL 8266 WOMEN OF COLOR WRITERS (3 credits)
Women of Color Writers is designed to introduce students to the multicultural, literary experience and contributions of women of color writers. The course will elucidate the multi-ethnic and feminist/womanist perspectives reflected in literary works by examining the themes, motifs and idioms about a womanist perspective. The course examines critically the implications and conceptual grounds of literary study which have been based almost entirely on white, male literary experiences and criteria. (Cross-listed with ENGL 4260).

ENGL 8276 WOMEN WRITERS OF THE NORTH AMERICAN WEST (3 credits)
A survey of U.S. and Canadian women writers (18th century to the present) enabling students to examine issues of gender and sexuality across a wide thematic range, including settlement, land use, cultural displacement, and survival in western territories, states, and provinces of North America. (Cross-listed with ENGL 4270, WGST 4270).
Prerequisite(s): Graduate standing; ENGL 8010 or ENGL 8030 recommended.

ENGL 8286 QUEER AMERICAN WESTS (3 credits)
A survey of queer literatures about the American West. The course will explore a variety of genres, including poetry, short stories, plays, novels, creative nonfiction, and, depending on time, film/television. "Queer" will be construed as including any "non-normative" sexualities and sexual identities (e.g., genderqueer, winkte, two-spirit, 3rd/4th gender). Non-western writers (e.g., Walt Whitman) imagining the West queerly may also be included. (Cross-listed with ENGL 4280, WGST 3160).
Prerequisite(s): ENGL 8010 or ENGL 8030 recommended.

ENGL 8300 SEMINAR: SHAKESPEARE (3 credits)
A study of Shakespeare's plays and poetry, in historical and modern contexts.
Prerequisite(s): ENGL 8010 recommended.

ENGL 8306 ANGLO-SAXON LITERATURE (3 credits)
From the sixth to the eleventh centuries, a people known collectively as the Anglo-Saxons ruled Britain, giving it a new name and establishing the roots of the modern English language. Anglo-Saxon culture continues to haunt the modern imagination. We study the historic, artistic and intellectual environment that produced this influential literary tradition. We also place these people, their language, and their writings within the context of the broader early medieval world. Finally, we engage with some of the foremost modern scholars of this fascinating culture. (Cross-listed with ENGL 4300).
Prerequisite(s): Graduate standing.
ENGL 8310 ECOLOGICAL WRITING AND ANALYSIS (3 credits)
This course provides students with the opportunity to develop expertise in a wide range of foundational works and key techniques of ecological writing and theory in English. By engaging mindfully with these works and techniques, students will develop advanced skills in ecologically oriented critical analysis and creative thinking. This course supports the Writing and Critical Reflection and the Health and the Environment concentrations in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8310)

ENGL 8326 CHAUCER (3 credits)
A literary, linguistic, and historical study of the works of Geoffrey Chaucer: his dream visions, Troilus and Criseyde, and the Canterbury Tales. (Cross-listed with ENGL 4320).

ENGL 8336 RENAISSANCE SATIRE (3 credits)
Satirical traditions and the literature of critique and invective as inherited from medieval and classical forms. Considerations will include satire as an aesthetic, philosophical, and political mode of expression; topicality as it relates to and portrays cultural history; and self-representation through humanist learning and response. (Cross-listed with ENGL 4330).

Prerequisite(s): Graduate standing

ENGL 8346 SHAKESPEARE (3 credits)
A critical study of selected plays and poetry from Shakespeare's works, in the context of the historical and cultural moment of the English Renaissance and as a set of texts inherited and reinvented by modernity. (Cross-listed with ENGL 4340).

Prerequisite(s): ENGL 1160

ENGL 8376 RESTORATION AND EIGHTEENTH CENTURY LITERATURE (3 credits)
Poetry, prose (exclusive of the novel), and drama of England in the Restoration and 18th century (1660-1800), with emphasis on Swift and Johnson. Formerly ENGL 4620/8626. (Cross-listed with ENGL 4370).

ENGL 8396 MEDIEVAL CELTIC LITERATURE (3 credits)
This course examines the literature and culture of the Celtic civilizations. The course examines the archeological record and texts about the Celts by Greek and Roman authors, as well as later medieval tales from the Irish, Welsh, and Breton traditions. All texts are in translation with guided reference to the original languages. (Cross-listed with ENGL 4390).

Prerequisite(s): ENGL 2410 or ENGL 2420 and one ENGL course above 3299, or instructor permission; ENGL 2310 recommended. Not open to non-degree graduate students.

ENGL 8400 SEMINAR: ENGLISH RENAISSANCE (3 credits)
A seminar in a few significant literary figures of the English Renaissance. Formerly ENGL 8080.

ENGL 8406 KING ARTHUR THROUGH THE AGES (3 credits)
Starting with post-medieval selections from the Arthurian corpus, this course follows Arthur back through his many literary incarnations, until we reach the "historical" Arthur (c.1000). We consider the different aesthetic additions, subtractions, and changes made to this secular king of kings within the social and historical contexts of each reincarnation. We also examine Arthur in other media, such as film, with divergent artistic agendas. These other media, too, will be considered within their social and historical contexts in terms of what they have to say about what modern audiences look for in their versions of Arthur and the stories from the Arthurian corpus. All texts are in translation, with guided reference to the original languages. (Cross-listed with ENGL 4400).

ENGL 8410 IMMIGRATION, MIGRATION, AND DIASPORA: CRITICAL APPROACHES AND THEORIES OF MOVEMENT IN LITERATURE (3 credits)
This seminar in literature and some film analyzes the depictions in non-fiction and fiction of displacement as a result of immigration, migration, refugee status, or any other considered movement, intentional or imposed. It will focus largely on the U.S. experiences of those displaced from all locales. (Cross-listed with CACT 8410).

Prerequisite(s): Graduate standing.

ENGL 8416 LITERATURE OF THE ROMANTIC PERIOD (3 credits)
This course surveys literary works published in the Romantic period (roughly, 1789-1832), focusing specifically on those by British, Irish, and Anglophone authors. It considers what these works signify about literary as well as cultural, political, and historical events, movements, or trends. (Cross-listed with ENGL 4410).

ENGL 8426 NINETEENTH-CENTURY ENGLISH AND ANGLOPHONE LITERATURES (3 credits)
English and Anglophone poetry and prose (excluding the novel) in the nineteenth century. (Cross-listed with ENGL 4420).

Prerequisite(s): Graduate standing

ENGL 8436 THE BRITISH AND ANGLOPHONE NOVEL (19TH AND 20TH CENTURY) (3 credits)
Introduction to the British and Anglophone novel in the nineteenth and twentieth century. (Cross-listed with ENGL 4430).

Prerequisite(s): Graduate standing

ENGL 8446 BRAM STOKER: BEYOND DRACULA (3 credits)
This course examines several major works from Stoker's literary oeuvre: The Snake's Pass (1890), Dracula (1897), The Jewel of Seven Stars (1903), The Lady of the Shroud (1909), and The Lair of the White Worm (1911) and selected short stories. Stoker is one of the more complex figures among the Anglo-Irish literary tradition, so the author and his writing is placed within the social and cultural contexts of late 19th and early 20th century Ireland and England, as well as within broader literary theoretical frameworks - psychoanalytic, gender, and postcolonial criticism among them - for which Stoker's tales continue to provide such rich fodder. (Cross-listed with ENGL 4440).

ENGL 8456 MODERN IRISH DRAMA (3 credits)
A survey of the major movements and significant figures associated with Irish drama from the mid-nineteenth to the twenty-first centuries, with special attention to the socio-cultural and historical contexts in Ireland. (Cross-listed with ENGL 4450).

Prerequisite(s): ENGL 1160 required; ENGL 2410 or ENGL 2420 recommended

ENGL 8496 GREAT WORKS OF BRITISH LITERATURE (3 credits)
This course pursues a trans-historical approach to literary study while interrogating what makes a literary work "great" within the field of British Literature. It allows students to engage with great works of British literature from across the ages - starting with the foundations of British literary history in the medieval period and extending to the present. Attending to formal, thematic, and historical dimensions of a wide array of literary texts, we will increase our appreciation of the many ways texts make meaning while developing a deep understanding of the British literary tradition. Reading literature with a sense of purpose and comparatively across time will allow us not only to appreciate great works but also to enhance the impact they have on us. Furthermore, we will recognize how culture and politics inform what literary works become deemed "great," thereby developing a critical understanding of the process of canon formation. (Cross-listed with ENGL 4490).

Prerequisite(s): Graduate standing in English

ENGL 8510 PROFESSIONAL AND TECHNICAL WRITING (3 credits)
This course will introduce students to the theory, research, and practices of professional and technical writing. Through readings, discussions, and assignments, students will gain an understanding of the types and circumstances of communication challenges encountered in the workplace. The course will also consider the roles of persuasion and ethics in written communication. (Cross-listed with CACT 8510).

ENGL 8615 INTRODUCTION TO LINGUISTICS (3 credits)
An introduction to the concepts and methodology of the scientific study of language; includes language description, history, theory, variation, and semantics as well as first and second language acquisition. (Cross-listed with ENGL 3610).
ENGL 8626 HISTORY OF ENGLISH (3 credits)
A critical study of both the internal and external histories of English. Includes historical development of English phonology, morphology, graphics, syntax, diction, dialects, and semantics. (Cross-listed with ENGL 4620).

ENGL 8630 DIGITAL RHETORIC (3 credits)
This course provides students with the opportunity to develop expertise in the theory and practice of digital rhetoric by considering technology’s deep impact on how we define and engage in writing. Students examine contemporary writing practices as part of a rich rhetorical tradition while they design and create effective multimodal compositions and analyze foundational works in digital rhetoric. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8630).

ENGL 8640 CREATIVE NONFICTION IN DIGITAL ENVIRONMENTS (3 credits)
Students in this course will study creative nonfiction in digital environments, analyze rhetorical situations created in digital environments, which might include, in addition to other modalities, sounds, animations, and hypertext, and create multimodal essays. The course will also focus on the study and analysis of craft-elements of creative nonfiction: narrative persona, tone, rhythm and style, scenic construction, among others. Students taking this course will learn to read with interpretative and analytical proficiency a broad range of creative nonfiction in digital environments. (Cross-listed with CACT 8640).

ENGL 8646 APPLIED LINGUISTICS (3 credits)
This course is designed to develop knowledge and skills for second language instructors and others interested in second language learning and instruction. Content covers relevant second language acquisition (SLA) theory and second language pedagogy. (Cross-listed with ENGL 4640)
Prerequisite(s): ENGL 3610 and Junior standing or with permission from instructor.

ENGL 8650 WRITING ACROSS DIFFERENCES: RHETORICAL THEORY FOR PERSUASION AND PUBLIC ADVOCACY (3 credits)
This course provides students a theoretical foundation for understanding how language is used in various types of discourses and texts as a means of convincing others of a given viewpoint or idea. Students will apply this theory to real-world writing scenarios in their scholarly areas of interest, to advocacy and social issues movements, or to address workplace needs and goals. This course supports the Writing and Critical Reflection concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8650).

ENGL 8656 STRUCTURE OF ENGLISH (3 credits)
A study of grammar as it has been conceived through history, including traditional prescriptive and descriptive approaches as well as transformational-generative grammar. (Cross-listed with ENGL 4650).
Prerequisite(s): ENGL 3610 / ENGL 8615 or permission

ENGL 8676 SOCIOLINGUISTICS (3 credits)
An exploration of interconnections between language, culture, and communicative meaning, stressing interactional, situational, and social functions of language as they take place and are created within social contexts. (Cross-listed with ENGL 4670).
Prerequisite(s): ENGL 3610/ENGL 8615, or permission.

ENGL 8696 TOPICS IN LINGUISTICS (3 credits)
This course introduces students to a specialized subject matter in the discipline of Linguistics not covered in existing courses. This course may be repeated for different topics. (Cross-listed with ENGL 4690).
Prerequisite(s): ENGL 3610/ENGL 8615, or permission.

ENGL 8736 CONTEMPORARY RHETORIC (3 credits)
A study of contemporary theories and their application with particular attention to invention, form, style, and cultural context. The course will include an overview of ancient rhetoric and address non-Western rhetorics, such as Native-American, Chinese, and Japanese rhetorical theories. Formerly, ENGL 4530/8536. (Cross-listed with ENGL 4730).

ENGL 8740 SEMINAR: DISCOURSE, CULTURE, AND POWER (3 credits)
A graduate-level introduction to theories and methodologies of analyzing spoken and written discourse. Students will employ various methods to collect natural language data, including field research, and analyze the data using appropriate theoretical orientations to discourse analysis.

ENGL 8750 OXBO W R I T I N G PROJE C T (3 credits)
Oxbow Writing Project summer institute immerses K-16 educators in writing pedagogy via their own writing, presentations about writing and pedagogy, reading and discussing professional literature, designing and implementing an in-depth inquiry project, and developing leadership strengths. Oxbow is a National Writing Project Site. (Cross-listed with TED 8750).
Prerequisite(s): Acceptance into Oxbow Writing Project Summer Institute

ENGL 8756 COMPOSITION THEORY & PEDAGOGY (3 credits)
This course is an overview of composition theories and pedagogies since 1968 and focuses on how historical movements in education and theoretical frameworks (rhetorical, expressivist, socio-cognitivist, collaborative, social constructionist, critical pedagogy, cultural studies, feminist, technological, and linguistic theories) both enrich and complicate the teaching of composition. (Cross-listed with ENGL 4750).

ENGL 8760 SEMINAR IN POPULAR CULTURE, MASS MEDIA AND VISUAL RHETORIC (3 credits)
This course studies how discursive meaning is made through established and emerging visual technologies and the impact visual symbol systems are having upon the field of rhetoric in general. Students will investigate how visual technologies, discourse theory, and semiotic theory has intersected with and expanded contemporary rhetorical theories, and they will apply these theories to visual texts. (Cross-listed with COMM 8200).

ENGL 8770 L2 COMPOSITION PEDAGOGY (3 credits)
This course helps prepare students to teach writing to Language Learners. Students will review principles of Second Language Acquisition Theory, study theories of teaching writing, and learn tenets of curriculum design. Students who complete the course will be able to design curricula, courses, syllabi, and lesson plans.
Prerequisite(s): Graduate Standing

ENGL 8775 WRITING CENTER THEORY, PEDAGOGY, AND RESEARCH (3 credits)
This course is an introduction to writing center theory, pedagogy, research, and history. The course is designed for undergraduate and graduate students interested in or already working in a writing center. Throughout the course we will explore a wide range of models for writing center work and the often problematic metaphors associated with those models. The overall aim in this course will be to help students develop multiple strategies for teaching writing one-to-one, for conducting research in writing centers, and for understanding writing center administration. (Cross-listed with ENGL 3770).

ENGL 8796 ENGLISH CAREER PREPARATION (1 credit)
This course will prepare students for an internship or a career, addressing topics such as finding and applying for internships, workplace and industry, resume and cover letters, interviewing techniques, developing a professional portfolio, and statement of goals. Taking this course prior to an internship is highly recommended. (Cross-listed with ENGL 4790).
Prerequisite(s): The course is restricted to undergraduate Majors and graduate students in English.

ENGL 8800 SEMINAR: TOPICS IN ENGLISH LANGUAGE AND LITERATURE (3 credits)
An intensive study of one or more authors, genres in literature and language not covered by regular courses.
Prerequisite(s): Graduate standing
ENGL 8806 ENGLISH INTERNSHIP (1-3 credits)
Supervised internship in a professional setting with a local employer or nonprofit organization. Hands-on experience. Work hours, activities, and responsibilities must be specified in a written agreement between the employer and the student in consultation with the internship director. Some internships will be paid and some will not. (Cross-listed with ENGL 4800).
Prerequisite(s): ENGL 2410 or ENGL 2420, or an ENGL 4000-level writing course, and permission of internship director.

ENGL 8816 DIGITAL LITERACIES FOR TECHNICAL COMMUNICATORS (3 credits)
This course addresses emerging issues in digital literacies such as the rhetoric of technology, technological competency, technology and information ecologies, critical awareness of technology and human interactions, judicious application of technological knowledge, user-centered design, networking and online communities, ethics and technology, and culture and technology. (Cross-listed with ENGL 4810, JMC 8816, JMC 4810).
Prerequisite(s): Graduate Standing or permission of instructor

ENGL 8826 AUTOBIOGRAPHY (3 credits)
In this creative nonfiction writing course, students will craft, workshop, and revise original works of autobiographical nonfiction. Students will read, discuss and critically analyze writing techniques found in diverse autobiographical prose by published authors and student peers. A final project will invite students to research and summarize a book-length autobiography of their own. (Cross-listed with ENGL 4820).
Prerequisite(s): Graduate standing

ENGL 8836 TECHNICAL COMMUNICATION (3 credits)
Technical Communication introduces students to the field of technical communication. Students will study the development of print and electronic genres common to industry settings, the design and production of technical documents, the writing processes and work practices of professional technical communicators, and the roles of technical communicators in organizational contexts. (Cross-listed with ENGL 4830, JMC 4830, JMC 8836).
Prerequisite(s): Graduate standing

ENGL 8846 TRAVEL WRITING (3 credits)
Travel Writing is a course in professional writing. Although the course includes critical examinations of texts, the primary focus is on the composition of various kinds of travel essays. (Cross-listed with ENGL 4840).
Prerequisite(s): Graduate standing

ENGL 8850 SEMINAR: SPIRITUAL NONFICTION (3 credits)
Spiritual Nonfiction is a creative nonfiction writing seminar where students study and practice various forms and styles of spiritual nonfiction. The comparative study of spirituality and religion is not the focus of this course. Writing is the focus. Discussion of the characteristics of spiritual experiences and ideas will be limited to their formalistic treatment within individual works.
Prerequisite(s): Graduate Standing. At least one creative nonfiction writing course at 4000/8000 level.

ENGL 8856 INFORMATION DESIGN FOR TECHNICAL COMMUNICATORS (3 credits)
This course introduces students to strategies for integrating visual and textual elements of technical documents. Instruction will focus on design theory and application through individual and collaborative projects. Students will develop the professional judgment necessary for making and implementing stylistic choices appropriate for communicating technical information to a lay audience. (Cross-listed with ENGL 4850, JMC 4850, JMC 8856).
Prerequisite(s): Graduate standing or permission of instructor.

ENGL 8860 ADVANCED PLACEMENT INSTITUTE: LITERATURE & COMPOSITION (3 credits)
An intensive Advanced Placement Summer Institute focusing on curricular and pedagogical questions, paired with independent specialized research into various topics related to the planning, organization, implementation, and improvement of Advanced Placement English Literature and Composition instruction and learning at the secondary educational level. Course may be repeated if the APSI topic is different.
Prerequisite(s): Must register for and successfully complete the UNO Advanced Placement Summer Institute for English Literature and Composition.

ENGL 8866 THE MODERN FAMILIAR ESSAY (3 credits)
Students in this course will read as well as write the Modern Familiar Essay, a sub-genre of Creative Nonfiction, with an emphasis on writing the informal essay. Essays will represent a wide scope of perspectives and issues, including gender, social class, education, politics, culture, sexuality, health, race, and ethnicity, and will range from the the sixteenth century "inventor" of the modern essay to twenty-first century practitioners of the form. This course will also cover a wide range of sub-genres and stylistic forms, such as memoir, autobiography, flash, experimental, and more. (Cross-listed with ENGL 4860).
Prerequisite(s): Graduate standing and/or admittance to the Advanced Writing program

ENGL 8870 SEMINAR: PUBLISHING NON-FICTION (3 credits)
A seminar in the process leading to publication of essays in one or more of the following genres: scholarly essay, personal essay, travel essay, pedagogical essay, autobiographical essay.
Prerequisite(s): Graduate standing and 6 hours of graduate credit.

ENGL 8876 TECHNICAL EDITING (3 credits)
This course introduces students to the roles and responsibilities of technical editors: the editorial decision-making processes for genre, design, style, and production of technical information; the communication with technical experts, writers, and publishers; the collaborative processes of technical editing; and the techniques technical editors use during comprehensive, developmental, copyediting, and proofreading stages. (Cross-listed with ENGL 4870, JMC 4870, JMC 8876).
Prerequisite(s): ENGL 1150 or permission of the instructor

ENGL 8880 ADVANCED PLACEMENT INSTITUTE: LANGUAGE & COMPOSITION (3 credits)
An intensive Advanced Placement Summer Institute focusing on curricular and pedagogical questions, paired with independent specialized research into various topics related to the planning, organization, implementation, and improvement of Advanced Placement English Language and Composition instruction and learning at the secondary educational level. Course may be repeated if the APSI topic is different.
Prerequisite(s): Must register for and successfully complete the UNO Advanced Placement Summer Institute for English Language and Composition.

ENGL 8890 SEMINAR: EXPERIMENTS IN CREATIVE NONFICTION (3 credits)
This is a graduate seminar in creative nonfiction. This course explores, through an intensive engagement with long and short forms of creative nonfiction, the ways in which contemporary practitioners of the genre have experimented with form and meaning. Students will attempt their own experiments in writing.
Prerequisite(s): Graduate Standing. Two graduate-level creative nonfiction courses from ENGL 8846, ENGL 8866, ENGL 8870, or ENGL 8880, when topic is appropriate.
ENGL 8896 CAPSTONE COURSE IN TECHNICAL COMMUNICATION (3 credits)
In this capstone course, students will extend foundational skills learned in previous technical communication courses. Students will demonstrate their competency in the technical documentation process in organizational environments, the issues important to the technical communication profession, and the practices of writing and creating complex technical documents for specific purpose and audience. (Cross-listed with ENGL 4890, JMC 8896, JMC 4890).
Prerequisite(s): Graduate standing or permission of instructor.

ENGL 8900 INDEPENDENT STUDY (1-3 credits)
Specially planned readings in a well-defined field of literature or language, carried out under the supervision of a member of the graduate faculty. Designed primarily for the student who has need of work not currently available in the departmental offering and who has demonstrated capability of working independently.
Prerequisite(s): Graduate, permission of instructor, and no "incompletes" outstanding.

ENGL 8910 SEMINAR: CRITICAL THEORY (3 credits)
Seminar in critical theory with readings in New Criticism, semiotics, structuralism, deconstruction, New Historicism, feminist and gender theory, cultural materialism, psychoanalytic theory, queer theory, postcolonial theory, New Formalism, and other more recent theoretical developments in literary study.
Prerequisite(s): ENGL 8010 recommended.

ENGL 8936 NARRATIVE NONFICTION (3 credits)
Students will read, discuss, and write critical analyses of narrative nonfiction by published and student writers. They will craft, workshop, and revise original works of narrative nonfiction. (Cross-listed with ENGL 4930).
Prerequisite(s): One creative nonfiction course or permission from the instructor

ENGL 8956 BRINGING THE WAR HOME: DEPICTIONS OF WAR VETERANS IN LITERATURE AND FILM (3 credits)
Course explores the impact of war on combatants, their families and communities as represented in literary fiction, film, historical documentation, first-person accounts, and other texts written in or translated to English. (Cross-listed with ENGL 4950, MEDH 4950).
Prerequisite(s): Graduate standing

ENGL 8966 TOPICS IN LANGUAGE AND LITERATURE (3 credits)
This course introduces students to a specialized subject matter in the discipline of English Studies not covered in existing courses. This course may be repeated for different topics. (Cross-listed with ENGL 4960).
Prerequisite(s): Graduate Standing

ENGL 8976 WRITING ABOUT SICKNESS AND HEALTH (3 credits)
Students will explore many themes of the human experience in healthcare through reading and discussion of selected poems, short stories, excerpts from fiction, and essays and creative nonfiction. To help students generate their own poems, stories, and essays, the class will incorporate the work of community writing programs and projects. (Cross-listed with ENGL 4970).

ENGL 8990 THESIS (3-6 credits)
Independent research or creative project written under the supervision of a director.
Prerequisite(s): Graduate, permission of thesis director. Not open to non-degree graduate students.

English, MA
Department of English, College of Arts & Sciences
Vision Statement
The Department of English reflects the centrality of language to human endeavors and its effectiveness in achieving awareness of the human complexities that are part of us, our relationships, and our roles in the world.

Program Website (https://www.unomaha.edu/college-of-arts-and-sciences/english/academics/graduate-programs/)

Fast Track Program
The Department of English has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor’s degree and a master’s degree in an accelerated time frame. With Fast Track, students may count up to nine graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:
• This program is available for undergraduate students pursuing the BA degree in English desiring to pursue an MA in English
• Students must have completed no fewer than 60 undergraduate hours
• Students must have a minimum undergraduate GPA of 3.5
• Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
• Students will work with their undergraduate advisor to register for the graduate courses
• A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good academic standing
• Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted to undergraduate status including financial aid
• Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code
  • Admission to Fast Track does NOT guarantee admission to the graduate program
  • The admit term must be after the completion term of the undergraduate degree
• Students may enroll in dual-level courses (8xx6 or 8xx5) for Fast Track credit, but not seminars

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements
• To be admitted to graduate study in English, a student should have completed at least 18 credit hours in undergraduate English courses
above the freshman level with an average grade of "B" (3.0/4.0) or higher.

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.

  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
  - If interested in a graduate assistantship ship minimum scores are as follows. Internet-based TOEFL: 100, IELTS: 7.5, PTE: 68, Duolingo: 130

- **Statement of Purpose:** The statement (of about 500-1000 words) should convey the applicant’s previous study in the field of English, any relevant work or life experience, the applicant’s philosophy of learning and reason for pursuing a master’s degree in English, and anything else that might help convey the applicant’s personality, spirit, or intellectual character.

### Teaching Assistantship

The application for a graduate assistantship requires the following additional materials, which should all be sent directly to the attention of the Graduate Program Chair, Department of English, ASH 192D, University of Nebraska at Omaha, 6001 Dodge St., Omaha, NE 68182-0175 or by e-mail to englishTAapplications@unomaha.edu

- Application coversheet (available online [here](https://www.unomaha.edu/college-of-arts-and-sciences/english/academics/graduate-programs/englt-a-application-20231.pdf))

- **Statement of Purpose:** 500-1000 words detailing the applicant’s ambitions in the graduate program and his or her motivation for pursuing an assistantship. In addition, this statement should convey some sense of the applicant's identity and philosophy of learning.

- **Writing Sample or Samples** of academic or creative non-fiction prose by the applicant totaling 10-20 pages in length. The sample(s) should reflect the applicant's best writing, demonstrating a cohesive argument and/or sustained thematic focus and excellent control of syntax and style.

- **Three Letters of Recommendation** from past teachers or anyone else reasonably able to offer an objective assessment of the applicant’s writing, critical reasoning skills, and promise as a teacher. These letters should be sent to the above address directly by the recommenders, along with waiver forms.

### Degree Requirements

#### Option 1: Thesis

(24 hours of coursework; 6 hours of thesis)

- For this option at least 12 hours of coursework must be seminar-level.

### Advanced Writing Certificate

Department of English, College of Arts & Sciences

**Vision Statement**

The graduate certificate in advanced writing is designed for students interested in becoming more expressive, powerful writers of nonfiction prose. Students interested in securing publication of their writing are mentored in the publication process by the faculty.

The advanced writing certificate is designed for the following students:

- Writers interested in developing and publishing their creative nonfiction
- Graduate students in English and related fields;
- Educators seeking writing-specific training and credentials;
- Working professionals who either are currently employed or will be seeking employment as experts in written communication;
- Individuals who work in community service organizations;
- Individuals dedicated to cultural activities in the community.

Total Credits 15

1 Students may elect to take all 15 credits from the Required Core List. Alternatively, students may elect to take up to 6 of those credits from the Electives List.
2 For ENGL 8800, topics must be related to advanced writing such as rhetoric and memory, nature writing, etc.
3 For ENGL 8966, topics must be related to advanced writing such as narrative nonfiction, graphic memoir, food writing, writing women’s lives, etc.
4 For ENGL 8100, topic must be Native American Nonfiction.

Exit Requirements:
Portfolio Requirement
Students will assemble a portfolio representing their achievement in the five courses (15 hours) applied toward the advanced writing certificate. The portfolio will contain at least one writing sample from each course and will be reviewed by the student’s advisor and one other graduate faculty member involved in offering courses approved for the advanced writing certificate. As part of the portfolio requirement, each student will make an oral presentation to the reviewing professors. During that discussion, special attention will be given to each student’s professional goals for their writing. Please see the website (http://www.unomaha.edu/college-of-arts-and-sciences/english/academics/graduate-programs/) for the advanced writing graduate certificate for a more detailed description of the portfolio requirement and the deadlines for submission.

Literature and Culture Certificate
Department of English, College of Arts & Sciences

Vision Statement
The graduate certificate in literature and culture offers an education in the intersection between literature written in English—either originally or in translation—with human culture broadly considered. The certificate will give high school teachers the credential to teach preparatory coursework worthy of college credit at UNO and other universities. And it is also designed as a continuing education option for anyone wishing to study literature at a post-baccalaureate level for personal enrichment. The certificate can...
be earned as part of the larger MA in English at UNO, and it can also be applied toward completion of that larger program retroactively.

The certificate will teach:

• literature of every period, from ancient to modern, in a variety of thematic and historical contexts;
• cultural encounters captured imaginatively on the pages of the literary text;
• the relationship of a culture to the literature produced within it, both harmonious and discordant;
• theories of literary effects on the course of human culture and history; and
• literature as a celebrated artifact of human hope, critique, and beauty.

Although applicants need no formal training in literature to enroll, they should expect to be immersed in a professional discipline of literary study with a research component. One especially designated course required for the certificate will provide training for students in the methodology of literary research.

Program Website (https://www.unomaha.edu/college-of-arts-and-sciences/english/academics/graduate-programs/)

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

• Applicants must have completed a baccalaureate degree with at least a 3.0 (on a 4.0 scale) GPA. Undergraduate study of literature is required. Students who do not bring 18 hours of undergraduate study in English, however, would be obligated to enroll in ENGL 8010 as their first course of study in the certificate.

• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.

• Internet-based TOEFL: 100, IELTS: 7.5, PTE: 68, Duolingo: 130

Total Credits: 18
Teaching English to Speakers of Other Languages Certificate

Department of English, College of Arts & Sciences

Vision Statement

In the United States, the need for well-prepared language teachers is constant. Teachers are more likely than ever to have the opportunity to teach students who come from a variety of cultural and linguistic backgrounds.

The Department of English offers students the opportunity to obtain a certificate in teaching English to speakers of other languages (TESOL). This is a rigorous 12-hour/4-course graduate certificate. Normally, students are able to complete the certificate requirements within three semesters.

The graduate TESOL certificate is a rigorous academic credential that includes a focus on the structure of the English language, theories of second language learning, and approaches to classroom pedagogy. All teachers will eventually work with nonnative speakers, so all teaching concentrations—like math, history, science, and social studies—are welcome.

A TESOL certificate does not certify a graduate to teach in Nebraska public schools. Instead, it is an academic credential meant for teachers already certified in other areas, for people who plan to teach in venues other than public schools, and for anyone who works in some capacity with non-native speakers of English.

Students in teacher education or in speech/language pathology should contact the TESOL director prior to applying to this program.

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)

Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

• An Introduction to Linguistics course is required. Equivalent course(s) from other institutions will be considered.
• Students in the College of Education, Health, and Human Sciences should meet with the TESOL director to plan a program of study.
• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
  • Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
  • If interested in a graduate assistantship minimum scores are as follows. Internet-based TOEFL: 100, IELTS: 7.5, PTE: 68, Duolingo: 130

Substitutions

Under special circumstances, the TESOL certificate director may approve up to six hours of substitutions.

Total Credits 12

1 With a TESOL focus

Students are encouraged to take more than the minimum number of required courses and may not repeat any courses already taken at the undergraduate level. The linguistics faculty strongly recommends that all TESOL certificate students achieve an oral and written proficiency in a language other than English.

Technical Communication Certificate

Department of English, College of Arts & Sciences, and School of Communication, College of Communication, Fine Arts and Media

Vision Statement

The graduate certificate in technical communication is designed for graduate students and industry professionals seeking a foundation in the theory and practice of technical communication. This foundation provides students with the kinds of competencies expected from technical communication professionals, including writing, editing, design, and software applications.
The technical communication certificate is designed for the following students:

- Part- and full-time UNO students pursuing graduate degrees, who are seeking a cognate area outside, but relevant to, their primary program of study;
- Industry professionals seeking to develop the knowledge and skills for a career in technical communication; and
- Business or technical professionals seeking to enhance their employment opportunities through a professional development program.

Program Contact Information

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements
- Applicants must have completed a baccalaureate degree in English or a related degree with at least a 3.0 (on a 4.0 scale) GPA.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S. OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - If interested in a graduate assistantshipship minimum scores are as follows: Paper-based TOEFL: 600, Internet-based TOEFL: 100, IELTS: 8, PTE: 68, Duolingo: 120
- **Statement of Purpose:** The statement, about 500-1000 words, should articulate the applicant’s career goals regarding interest in technical communication, any relevant work or life experience, reason for pursuing a graduate certificate in technical communication, and anything else that might help convey the applicant’s personality, spirit, or intellectual character.

Some courses from English or the School of Communication may be substituted with the director’s approval.

Total Credits: 15

Exit Requirements
Students will assemble a final portfolio representing their achievement in the five courses (15 hours). The portfolio will contain at least one writing sample/project from each course and will be reviewed by the technical communication program director and one other member of the graduate faculty from the Department of English or the School of Communication. Faculty teaching these courses will be aware of this portfolio requirement and will assign work that can be used as part of the portfolio (e.g., a report, user’s manual, website, etc.).

Biomechanics and Kinesiology, PhD

School of Health and Kinesiology, Department of Biomechanics, College of Education, Health, and Human Sciences

Vision Statement
The doctoral degree in biomechanics and kinesiology at the University of Nebraska at Omaha (UNO) is a joint program between the Department of Biomechanics and the School of Health and Kinesiology. The degree is based on the physiology, biochemistry, biophysics, motor control and development, and psychology of human movement. The program is aimed at developing researchers who are working to improve movement function and physical activity using evidence-based approaches through interdisciplinary clinical and translational research. A problem-solving approach is used across the age and health spectrum for disease prevention, health enhancement, physical rehabilitation, and motivation for physical activity. The program offers four areas of concentration in biomechanics, physiology of exercise, motor development and control, and physical activity.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework. To receive full consideration for departmental assistantships, applications must be received by January 31st.

Other Requirements
• GPA of 3.2 in master’s program or in the last 30 hours of previous graduate work
• Master’s degree, or minimum of 30 graduate hours in a related field, e.g., health, physical therapy
• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  • Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53 with a score of at least 20 in all categories (listening, reading, writing, and speaking), Duolingo: 110
  • Statement of Purpose: Needs to state goals and objectives for seeking the degree. Students will identify their intended area of focus and the name of the faculty advisor with whom they wish to work (maximum 500 words).
  • Writing Sample: Provide a writing sample which could include: first-author scientific paper, thesis proposal, research paper, or similar example showcasing the student’s aptitude for writing.
  • Resume/CV
  • Letters of Recommendation: Three are required
• Undergraduate Course Deficiencies: these courses are determined by the student’s mentor in collaboration with their supervisory committee. Each student’s individual deficiency courses will be approved in their program of study.
• Identification and confirmation by a faculty member willing to act as advisor and mentor to the student (see program-related information). The applicant is expected to contact a potential advisor to determine if a suitable match in interests exists. This assures that the student will be able to develop a program of study that meets the specific goals intended. Please note that assistantship funding is a separate process and should be discussed with your faculty mentor.
• Applicants with International Transcripts: Any applicant to this program who has completed undergraduate or graduate coursework at an international higher education institution outside of the United States may submit transcripts and degree certificates (with an English translation) in lieu of a course-by-course transcript evaluation from World Education Services (https://www.wes.org/) (WES), Educational Credential Evaluations (https://www.ece.org/) (ECE), SpanTran (https://spantran.com/), or Educational Perspectives (https://www.edperspective.org/). This graduate program will conduct an in-house credential evaluation of the transcript(s).
  • UNO reserves the right to require a course-by-course evaluation from WES, ECE, SpanTran or Educational Perspectives if the program is unable to complete an evaluation or should there be any questions or concerns about the documentation that is received. Applicants will be notified by the individual program if an external course-by-course evaluation is required.
  • Note: If admitted, official transcripts and degree certificates (with an English translation)/official course-by-course transcript evaluation, and any applicable official exam scores are required.

Take the following course for a minimum of 9 credit hours:

BMKI 9910 DOCTORAL SEMINAR

Concentrations
See Biomechanics and Kinesiology, PhD Concentrations

BMKI 9990 DISSERTATION

Total Credits 60

1 If required courses have previously been taken, additional research core courses must be taken in order to meet the 21-hour requirement.
2 This seminar is designed to enhance success in academia and maximize the student’s research experiences. The student will be required to register for at least 9 credit hours (typically 3 hours per semester following their first year in the program). In these credit hours the student will attend formal reading clubs with the advisor where he/she will be engaged in reviewing the related literature via journal articles, conducting research projects, reviews of literature, meta-analyses, etc. In addition, the student will be taught how to write successful grants and develop a successful line of research. Each semester for a graded outcome, the student will have to produce material such as a manuscript based on data acquired in the laboratory from the ideas developed in the seminar, a grant that will support the research ideas developed, or significant progress on a research-related project. Students will co-develop these graded outcomes each semester and submit them for approval to the doctoral program committee.

Exit Requirements
• Comprehensive Examination
• Dissertation
Program-Related Information

Advisor

• Preliminary contact is made with a potential advisor prior to applying to the program. Prior to being admitted, a student must confirm mentorship with an advisor based on mutual interests and willingness of the advisor to take on the student.

Program of Study (must have 45 hours remaining after approval)

• The student and his/her advisor will determine the program of study, including the required courses, deficiency courses, and general area of research for the dissertation. The program of study must be completed by the end of the first year and approved by the faculty mentor and one additional faculty member from their respective school or department (considered the program committee) as well as the Doctoral Program Committee chair. After this approval, the student will submit the program of study form with course information to the Office of Graduate. Please note, no more than six independent study/research credit hours are recommended, however, the program of study is determined by the student, faculty mentor, and an additional faculty member in the school or department.

Comprehensive Exam

• The required comprehensive exam will be taken towards the end of the student's coursework. The supervisory committee, in conjunction with the student will determine the nature of the exam; the exam could include a take-home exam followed by an oral defense, or writing an NIH-type grant followed by an oral exam. The supervisory committee will evaluate the exam. Once a student passes their comprehensive exam they are considered a doctoral candidate.

Dissertation Committee

• In the first semester of a students’ third year, the student must form a dissertation committee. The student must submit the Appointment of Dissertation Committee form consisting of at least four University of Nebraska graduate faculty members, one of whom must be from outside the student’s academic department/school in which the doctoral is to be granted. The chair of the dissertation committee must be a member of the graduate faculty. The outside representative must hold graduate faculty status within the NU system. The dean for Graduate Studies at UNO will appoint the committee upon recommendation of the advisor. The committee will be responsible for approving the comprehensive exam, dissertation proposal, dissertation, and its oral defense. Please note, if the potential objectives of a dissertation topic change, the dissertation committee can be altered at any time.

Dissertation Proposal Form

• Within one year of successfully completing the comprehensive exam and being admitted to candidacy, a formal research proposal for the dissertation topic should be presented to the supervisory committee. The format of the proposal is subject to approval by the advisor and the supervisory committee. The proposal could include a formal written proposal with an oral defense or oral presentation of the proposed research project.

Dissertation

• After successfully completing the comprehensive exam and being admitted to degree candidacy, the student must register for at least one credit hour of dissertation for each semester until completion of the degree. A minimum of 15 hours of dissertation credit must be completed within the course of the degree.

• It is expected that the dissertation will result in manuscript submissions in referred journals in the discipline.

• Upon completion of the dissertation, an updated CV must be submitted to the Doctoral Program Committee chair.

Residency

• The residency will be reasonably compact, continuous, and coherent, and a substantial portion done at and under close supervision of the university. Most of the students in the program will be full-time and continuously enrolled.

**UNMC: BIOS 823, BIOS 825, BIOS 810, EPI 821, EPI 835, EPI 845, HPRO 902, HPRO 910, HPRO 998.**

**Total Credits:** 24
BMCH 8000 SEMINAR IN BIOMECHANICS (0 credits)
Required non-credit course for graduate students in biomechanics. Intended to familiarize the graduate student with current ongoing biomechanical research at UNO and other institutions. The seminar will additionally include topics focusing on professional development, job and educational opportunities, and biomechanical methodologies. 
Prerequisite(s): Must be a student in BMCH graduate program. Not open to non-degree graduate students.

BMCH 8006 BIOMATERIALS (3 credits)
Students will learn the classification, properties, characterization methods, body interactions, applications, and design principles of biomaterials. 
(Cross-listed with BMCH 4000).

BMCH 8030 BIOSTATISTICS IN BIOMECHANICS I (3 credits)
The focus of the course is to prepare students to understand and apply research and biostatistical methods needed in the design and analysis of biomechanical investigations. The major topics to be covered include research design and multiple linear regression. 
(Cross-listed with BMKI 9301).
Prerequisite(s): Graduate Standing in Biomechanics program or Department Permission.

BMCH 8100 NONLINEAR ANALYSIS FOR MOVEMENT STUDIES (3 credits)
This course is to introduce different nonlinear methods for the analysis of biological and movement time series. Emphasis will be given on understanding the algorithms behind each nonlinear method. 
(Cross-listed with BMKI 9101).
Prerequisite(s): Instructor Permission.

BMCH 8106 BIOINSPIRED ROBOTICS (3 credits)
The goal of the course is to involve students in an interdisciplinary vision of biomechanics, biology, engineering and architecture by learning how humans and other animals function in their environment. These design principles from nature can be translated into novel devices, structures, and robots. 
(Cross-listed with BMCH 4100).

BMCH 8200 MATLAB FOR MOVEMENT SCIENCES (3 credits)
Introduction to Matlab software, plotting data, spectral analysis and the Fourier transform, data smoothing, and image analysis of movement related data. All topics will be implemented using Matlab. 
(Cross-listed with BMKI 9201).
Prerequisite(s): Instructor permission.

BMCH 8206 METHODS IN BIOMECHANICS I (3 credits)
In this course students learn about the methods and equipment used in biomechanics as well as the analysis of data collected from those methods. Course experiences include both lecture and lab based learning. 
(Cross-listed with BMCH 4200).
Prerequisite(s): Department Permission

BMCH 8216 METHODS IN BIOMECHANICS II (3 credits)
In this course students learn about advanced methods and equipment used in biomechanics, as well as the analysis of data collected from those methods. Course experiences include both lecture and lab based learning. This course builds on the experience gained in BMCH 4200/8206, Methods in Biomechanics I. 
(Cross-listed with BMCH 4210).
Prerequisite(s): BMCH 8206 or Department Permission

BMCH 8220 METHODS IN CARDIOVASCULAR BIOMATERIALS RESEARCH (3 credits)
This course contains lecture and lab components focused on cardiovascular biomaterial development and characterization methods used in academia and industry. The lecture component will provide the necessary clinical background of cardiovascular diseases and the theoretical background of cardiovascular biomaterials and state-of-the-art research methods. The lab component will provide practical experience focused on cardiovascular biomaterial design, manufacturing, and characterization methods. 
(Cross-listed with BMKI 9221).

BMCH 8300 STEM TEACHING METHODS FOR DEVICE DESIGN (3 credits)
STEM Teaching in Biomechanics focuses on principles in teaching including teaching models (Problem-Based, Team-Based, Inquiry-Based teaching), student assessment, classroom logistics/organization, and device design through a mentorship project. 
(Cross-listed with BMKI 9301, STEM 8300).

BMCH 8400 MOTOR LEARNING I (3 credits)
Discussion and analysis of scientific principles related to the learning of motor skills; review related literature and research in motor learning. The focus of the course is on recent theories of how movements are acquired and performed, and on factors that have implications for motor learning throughout the life span. 
(Cross-listed with BMKI 9401).
Prerequisite(s): Department Permission.

BMCH 8410 MOTOR CONTROL I (3 credits)
The focus of the course is to explore the study of the conditions and factors that influence the control and performance of motor skills from both neurophysiological and psychobiological perspectives. 
(Cross-listed with BMKI 9411).
Prerequisite(s): Department Permission. Not open to non-degree graduate students.

BMCH 8420 MOTOR DEVELOPMENT (3 credits)
This course focuses on the study of motor development, the processes that underlie this development and the factors that influence it. Students will gain an understanding of the major theoretical perspectives of motor development across the life span with special emphasis given in child development. 
(Cross-listed with BMKI 9421).
Prerequisite(s): Department Permission.

BMCH 8450 ADVANCED BIOMECHANICS (3 credits)
The course will address the biomechanical basis of human performance including mechanical analysis of human gait, fundamental movement patterns and techniques used for collecting biomechanical data. 
(Cross-listed with BMKI 9451).
Prerequisite(s): BMCH 4630 (Biomechanics) [previously PE 4630] or Instructor Permission.

BMCH 8466 CLINICAL IMMERSION FOR RESEARCH AND DESIGN (3 credits)
Orthopedic Biomechanics focuses on the use of biomechanical principles and scientific methods to address clinical questions that are of particular interest to professionals such as orthopedic surgeons, physical therapists, rehabilitation specialists, and others. 
(Cross-listed with BMCH 4640).
Prerequisite(s): Department Permission

BMCH 8666 CLINICAL IMMERSION FOR RESEARCH AND DESIGN (3 credits)
This course will involve exposure to current clinical practices, identification of unmet clinical needs, and information regarding future career options. In this course, students will be matched with local clinical sites to provide a unique opportunity for innovative and interdisciplinary approaches to problem solving subject to practical constraints. Concepts in clinical rehabilitation, integrated assessments, regulation of medical devices in health care will be covered. This course will review the latest research efforts for rehabilitation in the context of device design and implementation. 
(Cross-listed with BMCH 4660).
Prerequisite(s): Instructor Permission. Not open to non-degree graduate students.

BMCH 8676 INTRODUCTION TO MECHANICS OF BIOMATERIALS (3 credits)
In this course students will learn how to analyze the stresses and strains in different structures under complex loading conditions with extensive examples from biomaterials and materials generally used in the medical device field. 
(Cross-listed with BMCH 4670).
Prerequisite(s): BMCH 3000 or Department Permission
BMCH 8686 SPORTS BIOMECHANICS (3 credits)
This course is intended to provide students with a foundational knowledge on how to analyze sport movements through biomechanical analytical methods. Students will utilize foundational biomechanical principles and apply them to a variety of sports and associated movements. (Cross-listed with BMCH 4680).
Prerequisite(s): BMCH 4630

BMCH 8690 MATHEMATICS OF BIOMECHANICAL DATA PROCESSING (3 credits)
Biomechanics is a rapidly changing and technologically dependent field of study. A thorough understanding of the factors influencing outcome measures is critical to correctly interpreting results. Students will be exposed to various data acquisition systems, approaches, and choices required to assess the computational aspects of biomechanical data critically. This course will equip students to complete independent processing from raw data to 3D joint angles and forces. (Cross-listed with BMCH 4690).
Prerequisite(s): BMCH 3000, BMCH 4670, or Department Permission

BMCH 8900 INDEPENDENT RESEARCH IN BIOMECHANICS (1-6 credits)
In this course individuals or groups will conduct research projects for the study and analysis of biomechanical topics.
Prerequisite(s): Permission of the Department and approval by Faculty Advisor. Not open to non-degree graduate students.

BMCH 8910 INDEPENDENT STUDY IN BIOMECHANICS (1-6 credits)
This is a variable credit course designed for graduate students in Biomechanics who would benefit from independent reading assignments and problems. Independent study enables individual students or a small group of students to focus on topics typically not explored in other offerings or to explore topics currently offered in further depth. (Cross-listed with BMCH 9911).
Prerequisite(s): Graduate student in BMCH and approval by Faculty Advisor. Not open to non-degree graduate students.

BMCH 8990 THESIS IN BIOMECHANICS (1-6 credits)
A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's advisory committee. In this project the student will develop skills in research design, research conduct, data analysis, and reporting. The final product of this course will be an original thesis of independent scientific investigation.
Prerequisite(s): Department Permission. Not open to non-degree graduate students.

GEOG 8000 HISTORY AND PHILOSOPHY OF GEOGRAPHY (3 credits)
Introduction to history of geography. Emphasis on significant concepts, methodologies, and philosophies in geography from classical Greeks to the present.
Prerequisite(s): Permission

GEOG 8016 CONSERVATION OF NATURAL RESOURCES (3 credits)
This course provides a diverse overview of the principles and contemporary issues related to ecology and management of wildlife, fisheries, forests, soils, rangeland, minerals, and water. It includes the philosophical, economic and social aspects of resource management. Current local, regional, and global issues are examined. (Cross-listed with GEOG 4010).
Prerequisite(s): Three hours of geography

GEOG 8026 SPATIAL ANALYSIS IN GEOGRAPHY (3 credits)
An introduction to spatial analysis with a focus on spatial statistics. Emphasis will be placed on the nature of geographic data, spatial data handling, modeling logic, sampling theory, and design. Both descriptive and spatial statistics methods are covered. Students will receive hands-on experience working with statistical data sets, software, and scientific visualization of research results. (Cross-listed with GEOG 4020).
Prerequisite(s): STAT 1530 or STAT 3000 and GEOG 4050 or permission

GEOG 8036 COMPUTER MAPPING AND VISUALIZATION (3 credits)
Computer techniques in the mapping and visualization of spatial data. Various forms of spatial data manipulation and computer graphic output techniques are examined. Particular attention is given to the creation of maps for the internet and the incorporation of interaction and animation in their display. (Cross-listed with GEOG 4030).
Prerequisite(s): GEOG 1090 or permission of instructor. Background in programming, particularly JavaScript, highly recommended.

GEOG 8040 SEMINAR IN EDUCATION GEOGRAPHY (3 credits)
This seminar surveys the goals, methods, and content associated with teaching geography in elementary, secondary, and in higher education. It is designed to aid current and future teachers in teaching geography.
Prerequisite(s): Permission

GEOG 8046 GEOARCHAEOLOGY (3 credits)
An introduction to geoarchaeology: the application of methods and techniques of geography, geology and other earth sciences to solve archaeological problems and reconstruct past environments. (Cross-listed with GEOL 4040, GEOG 4040).

GEOG 8056 GEOGRAPHIC INFORMATION SYSTEMS I (4 credits)
An introduction to the concepts and principles of geographic information systems (GIS). Emphasis will be placed on geographic data inputs, manipulation, analysis, and output functions. Exercises introduce students to GIS software and applications. Usually offered Fall, Spring, Summer. (Cross-listed with GEOG 4050).
Prerequisite(s): 3 hours in Geography or by permission

GEOG 8106 BIOGEOGRAPHY (3 credits)
This course is intended as an introduction to biogeography, the study of the distribution and evolution of organisms across space and through time. Usually offered every year. (Cross-listed with BIOL 4100, GEOL 4100, BIOL 8106, GEOL 8106, GEOG 4100).
Prerequisite(s): BIOL 1450 and BIOL 1750 or GEOL 3100 or BIOL 3100, junior-senior

GEOG 8126 URBAN GEOGRAPHY (3 credits)
This course is designed to serve as an introduction to the complex and dynamic urban system, including the physical, economic, political, cultural, social, and environmental forces that shape the form and function of cities, as well as how individuals and groups experience urban life. We make ample use of geographic information systems (GIS) to analyze cities and better understand crucial urban concepts such as urban growth and development, patterns of urban form, segregation and neighborhood change, economic specialization and agglomeration, urban sprawl, and environmental justice. (Offered Fall) (Cross-listed with GEOG 4120).
GEOG 8130  SEMINAR IN ECONOMIC GEOGRAPHY (3 credits)
This seminar course investigates the development of current world economic systems through the elements of primary, secondary, tertiary, quaternary and quinary production on a micro and macro scale. Exchange and transactional systems, consumption linkages, resource management, economic health on global and local scales, and location decision-making are major topics.
Prerequisite(s): Graduate in geography and permission of instructor

GEOG 8136  POLITICAL GEOGRAPHY (3 credits)
An introduction to the basic concepts and approaches in contemporary political geography at the global, national and local scales. Core topics to be examined include geopolitics, imperialism, war and peace, global ecopolitics, states, nationalism and electoral geography. (Offered Fall) (Cross-listed with GEOG 4130).
Prerequisite(s): Graduate status

GEOG 8156  GEOGRAPHY, GENDER AND ENTREPRENEURSHIP (3 credits)
An advanced seminar focused on links among geography, gender and work, emphasizing leadership and entrepreneurship. The course considers theory and method in addition to empirical work. The nature of space, of gender, and of work, are examined. Topics include the gendering of work, the geography of entrepreneurship, gender and leadership. (Cross-listed with WGST 4150, GEOG 4150, ENTR 4150, ENTR 8156, WGST 8156).
Prerequisite(s): Junior, senior, or graduate standing, or permission of instructor.

GEOG 8166  URBAN SUSTAINABILITY (3 credits)
Using sustainability as a conceptual framework, students in this course will investigate a variety of social, economic, and environmental challenges facing cities of the 21st century. Topics and issues explored include urban growth and expansion, livability, equity & gentrification, energy use & production, urban farming, poverty, automobile & transportation, water security, urban pollution, and the role of cities in climate change. (Cross-listed with GEOG 4160)
Prerequisite(s): Graduate standing.

GEOG 8176  ADVANCED CULTURAL GEOGRAPHY (3 credits)
This course examines current theoretical debate and research practice in a select topic in Cultural Geography. Emphasis will be on readings and discussion with students engaging in original research. Specific thematic focus will vary from year to year. This course may be taken multiple times as long as topics differ. (Cross-listed with GEOG 4170).
Prerequisite(s): Graduate standing and permission of the instructor.

GEOG 8210  SEMINAR IN CULTURAL GEOGRAPHY (3 credits)
This course explores the different theoretical, methodological and empirical approaches in cultural geography, while also addressing its development, its evolution, its competing schools of thought, and new frontiers.
Prerequisite(s): Permission

GEOG 8236  GREAT PLAINS & NEBRASKA (3 credits)
This course is a comprehensive examination of the Great Plains region from a geographical perspective. It considers both the physical and human geography of the Plains, with particular attention to our home, Nebraska. Topics to be covered include: the Plains' unique ecosystems, its early human inhabitants, its later settlers, its evolving land-use patterns, and current issues. (Cross-listed with GEOG 4230).

GEOG 8266  PROCESS GEOMORPHOLOGY (4 credits)
A lecture and laboratory course focused on understanding Earth surface processes and the evolution of landforms across spatial and temporal scales. The course emphasizes applying unifying concepts in geomorphology, quantitative methodology and modern process-oriented geomorphology to interpret landscape evolution. (Cross-listed with GEOG 4260, GEOL 4260).
Prerequisite(s): One of the following: GEOL 1010, GEOL 1170, GEOG 1030, GEOG 1050 or instructor permission.

GEOG 8310  GEOGRAPHY OF AGRICULTURE (3 credits)
A systematic study of the characteristics and patterns of world agriculture. Usually offered on demand.
Prerequisite(s): Permission

GEOG 8326  CLIMATOLOGY (3 credits)
A study of climatic processes and their effect on shaping the physical landscape. Emphasis on physical and applied aspects of the field. (Cross-listed with GEOG 4320).
Prerequisite(s): GEOG 1030, GEOG 1050, GEOG 3510, or permission of instructor.

GEOG 8336  SOIL GENESIS, MORPHOLOGY AND CLASSIFICATION (4 credits)
This course is designed to familiarize students with basic soil chemical, physical and biological properties, soil morphological characteristics, soil classification and soil forming processes. The course focuses on relationships between soils and environmental factors and how such factors alter soil forming processes. The lab will focus on developing basic field skills, including soil morphological descriptions and soil mapping, as well as common laboratory methods used to analyze soils. (Cross-listed with GEOG 4330, GEOL 4330).
Prerequisite(s): One of the following: GEOG 1030, GEOG 1050, GEOG 1010, GEOG 1170 or instructor permission.

GEOG 8346  WATER RESOURCES (3 credits)
This course explores the applied principles of hydrology, water systems modeling, river basin development, and water management issues and practices in the United States and other parts of the world. Two local Saturday field trips will be required. (Cross-listed with GEOG 4340).
Prerequisite(s): Six hours of Physical Geography or equivalent and graduate standing.

GEOG 8356  GLOBAL CLIMATE CHANGE (3 credits)
The primary objective of this course is for students to form a scientific, evidence-based, stance on current and future changes to the Earth's climate. To this end, this course will be based on scientific inquiry into the current state of knowledge. Particular emphases are placed on evidence and causes of change, and the associated environmental and social impacts, including: water resources, extreme weather, human health, and others of interest to the class. (Cross-listed with GEOG 4350, ENVN 8356, ENVN 4350).
Prerequisite(s): Graduate standing

GEOG 8406  EMERGING TOPICS IN GEOGRAPHY (3 credits)
Emerging Topics in Geography focuses on the latest research areas in the field of geography. The specific topic of each course set will be based on the research trends in geography. This course will be offered on demand. (Cross-listed with GEOG 4400).
Prerequisite(s): Permission of the instructor

GEOG 8500  SPECIAL TOPICS IN GEOGRAPHY (3 credits)
This course will provide for an in-depth study of a geographical or geological subject (as specified in the course subtitle). Subjects will be offered as sections of GEOG 8500, but will be separate from one another. Students may repeat GEOG 8500 as often as they like as long as no specific subject is duplicated. Course to be offered with approval of Graduate Program Committee and Dean for Graduate Studies.
Prerequisite(s): Permission of instructor

GEOG 8535  CARTOGRAPHY AND DATA VISUALIZATION (4 credits)
An introduction to the concepts and techniques of map construction and visual data communication. Topics include map scale, map projections, thematic cartography, history of cartography, computer mapping, and global positioning systems. Particular attention is given to designing both paper and Internet distributed maps. This course is offered in both the Fall and Spring semesters. (Cross-listed with GEOG 3535).
Prerequisite(s): GEOG 1000 or GEOG 1020 and GEOG 1030 or GEOG 1050.
GEOG 8536 HISTORICAL GEOGRAPHY OF THE UNITED STATES (3 credits)
This course examines the geography, physical and human, real, perceived, or theoretical, of the United States' historical development. It considers the ways history has and has not been affected by geography. It will also cover the field of historical geography, its theories and practices. (Cross-listed with GEOG 4550).
Prerequisite(s): Graduate status.

GEOG 8556 GEOGRAPHY OF ECONOMIC GLOBALIZATION (3 credits)
A study of the geography of economic globalization and the geography of the world economy. The major topics include the historical development of the world economy and globalization from the geographical perspective, trends in geography of global production, trade and investment, the most important factors and actors in the globalization processes and its geographic effects, geography of transnational corporations, case studies of economic geography of selected industries and service activities, effects of globalization on the developed and developing countries. This course also supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with GEOG 4550, CACT 8116).
Prerequisite(s): Graduate status.

GEOG 8600 INDEPENDENT RESEARCH (1-3 credits)
This is an independent research course, where students undertake and complete a focused independent project under faculty supervision, exploring an aspect of geography in greater depth.
Prerequisite(s): Completed independent research contract between faculty and student and permission of adviser or the Graduate Studies Coordinator.

GEOG 8616 ENVIRONMENTAL MONITORING AND ASSESSMENT (3 credits)
An interdisciplinary approach to techniques for the design and implementation of environmental inventory and monitoring schemes used to evaluate natural resources. Students work as teams to synthesize information from their backgrounds in geography, geology and ecology to evaluate the impacts of human actions on environmental quality following the framework for environmental assessments provided by the National Environmental Policy Act. Course is organized to accommodate variable needs of students with different backgrounds and career choices. Usually offered every year. (Cross-listed with BIOL 4610, ENVN 4610, GEOG 4610, GEOL 4610, GEOL 8616)
Prerequisite(s): Permission of instructor.

GEOG 8626 GEOGRAPHICAL FIELD STUDIES (3 credits)
Field experience course based on variable topics and themes. Students must attend the multiple day field trip that will require overnight stays. (Cross-listed with GEOG 4620).
Prerequisite(s): Instructor Permission. Not open to non-degree graduate students.

GEOG 8636 ENVIRONMENTAL REMOTE SENSING (4 credits)
An introduction to remote sensing science and technology. Emphasis will be placed on multispectral data, matter/energy interactions, sensor system characteristics, photogrammetry, image interpretation, digital image processing, and environmental applications. Formal laboratory instruction will provide students with problem-solving skills and hands-on experience with remote sensing and GIS software. (Cross-listed with GEOG 4630).
Prerequisite(s): GEOG 1050 or GEOG 1070 or GEOL 1170. Introductory statistics highly recommended.

GEOG 8640 REMOTE SENSING ADVANCED CONCEPTS AND APPLICATIONS (3 credits)
Designed for the graduate student desiring to do advanced work in remote sensing. The emphasis of the course is on non-photographic sensors and especially digital processing of multispectral satellite data. The applications are multidisciplinary in nature. Usually offered on demand.
Prerequisite(s): GEOG 4630 / GEOG 8636

GEOG 8646 CRITICAL ZONE SCIENCE (4 credits)
This course examines the Critical Zone (CZ), Earth's permeable layer that extends from the top of vegetation to the bottom of groundwater. The CZ is a constantly evolving layer where rock, soil, water, air, and living organisms interact to regulate the landscape and natural habitats; it also determines the availability of life-sustaining resources, including our food production and water quality. CZ science is an interdisciplinary and international endeavor focused on cross-disciplinary science. In this course, we will focus on using data available from the existing National Science Foundation (NSF)-funded CZ Observatories (CZOIs) along with readings, discussions and activities to explore interactions within the CZ. (Cross-listed with GEOG 4640, GEOL 4640)
Prerequisite(s): One of the following: GEOL 1170, GEOL 1010, GEOG 1030 or GEOG 1050; one chemistry or physics course recommended; or instructor permission.

GEOG 8650 LAND USE (3 credits)
Introduction to the theories and practices of land use planning. Land use planning considers the natural environment and the human activities utilizing it, studying the decisions made in human land use, in order to understand and critique current land use practices. Local, state, nation, and international case studies of land use will be considered.
Prerequisite(s): GEOG 4120 / GEOG 8126 Urban Geography

GEOG 8666 GEOGRAPHIC INFORMATION SYSTEMS II (4 credits)
An introduction to advanced geographic information systems (GIS) topics. Emphasis will be placed on algorithms and analysis for information extraction. Topics include spatial interpolation, remote sensing GIS integration, software development, spatial analysis, GIS modeling, and future advances in GIS. Formal laboratory instruction will provide students with GIS experience to solve application problems. Usually offered in Fall. (Cross-listed with GEOG 4660).
Prerequisite(s): GEOG 4050 / GEOG 8056

GEOG 8670 CARTOGRAPHIC METHODS (3 credits)
An applied graduate seminar in cartography and geospatial science. The course examines advanced methods for the representation of spatial data. Emphasis is placed on the design of interactive Internet-based maps. Projects will be directed toward the creation of map-based web pages.
Prerequisite(s): A junior/senior course in cartography, GIS, computer mapping, or visualization.

GEOG 8680 SEMINAR IN GEOSPATIAL SCIENCE (3 credits)
Seminar in Geospatial Science examines the origins, development and prospects of spatial information technology to understand people, places, and processes of the earth. The overall approach is to examine the three main components of geospatial science: 1) Geographic Information Systems (GIS), the software, hardware, outputs, personnel, and practices that together facilitate the analysis and mapping of geographic entities and phenomena; 2) Remote Sensing, the use and processing of aerial photographs and satellite imagery; and 3) Cartography, the general processing and display of geographic information for both analysis and communication.
Prerequisite(s): Graduate standing. Prior coursework in geographic information systems, remote sensing or cartography.

GEOG 8700 RESEARCH METHODS (3 credits)
The course provides students with an overview of research approaches and methods used by geographers. Students are expected to put these methods into practice by drafting a full thesis proposal by semester's end.

GEOG 8800 INTERNSHIP IN ENVIRONMENTAL/REGIONAL PLANNING (1-6 credits)
(repeatable up to six hours) Internship with local planning agencies enabling students to gain knowledge and experience in comprehensive regional or environmental planning. Usually offered Fall, Spring, and Summer.
Prerequisite(s): Permission and 12 graduate hours in geography.
GEOG 8826 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)
An introduction to environmental law and regulations intended for students pursuing careers in environmental sciences or related fields. The course emphasizes the origins, implementation, and enforcement of U.S. state and federal laws and regulations. Major federal environmental laws, covering air and water quality, solid and hazardous waste, pollution prevention and remediation, and natural resources will be discussed. Usually offered Fall semesters. (Cross-listed with ENVN 8826, ENVN 4820, BIOL 4820, GEOG 4820, PA 8826).
Prerequisite(s): Graduate Standing or Permission from the Instructor.

GEOG 8830 SEMINAR IN URBAN STUDIES (3 credits)
This course provides an interdisciplinary overview of the forces influencing and influenced by urbanization and urbanism. (Cross-listed with UBNS 8000)
Prerequisite(s): Not open to non-degree graduate students.

GEOG 8840 DIRECTED RESEARCH IN URBAN STUDIES (3 credits)
The course is intended for advanced graduate students in urban studies or geography. It is especially suited for those in-career students who have had their internships waived and who might profit more by in-depth research on a problem of urban studies rather than additional classroom courses. (Cross-listed with UBNS 8940).
Prerequisite(s): Completed 9 graduate hours in Urban Studies. Permission from the School. For Geography students, GEOG 8126 (Urban Geography) or permission from the School.

GEOG 8990 THESIS (1-6 credits)
Independent research project conducted under the supervision of an adviser and thesis committee.
Prerequisite(s): Graduate student in geography who has successfully presented and defended their thesis proposal.

Geography, MS
Department of Geography & Geology, College of Arts & Sciences

Vision Statement
The mission of the geography graduate program is to provide quality graduate education in physical geography, human geography and spatial analysis (GIS, cartography and remote sensing). The department offers a rich learning environment for students with close interaction between faculty and students, technology-enhanced instruction, and opportunities for fieldwork. Courses enhance student’s perception and appreciation of the earth’s human and physical environments as well as geography’s essential role in both understanding and navigating our increasingly interconnected world. The department, an active participant in its community, has ties throughout the city and state, leading to a wide variety of internship opportunities. The department is committed to providing students with the essential knowledge and skills needed to succeed, be it in professional employment or further graduate education.

Other Program Related Information
Fast Track Program
The Department of Geography/Geology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor’s degree and a master’s degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:
- This program is available for undergraduate students pursuing a BA/BS in Geography or BS in Environmental Science (Geography & Planning Option) desiring to pursue an MS in Geography.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must have a graduate faculty member in the department of Geography/Geology provide a short letter of support for their application to Fast Track as a faculty sponsor/mentor.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 for graduate coursework is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the graduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived; the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
  - Admission to Fast Track does NOT guarantee admission to the graduate program.
  - The admit term must be after the completion term of the undergraduate degree.

The Department of Geography/Geology offers graduate assistantships. Applications should be directed to the department and are due April 1 for the Fall Semester and November 1 for the Spring Semester. The assistantship requires 20 hours per week of teaching or similar duties. Applications received after the deadline will be considered for the next available opening.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
- Fall: July 1
- Spring: December 1
- Summer: May 1

Other Requirements
- Applicants must have a GPA in geography of at least a 3.0 on a 4.0 scale.
- Present as a prerequisite a minimum of 15 undergraduate semester hours of geography including physical and human geography and cartography, plus at least three hours in spatial analysis, quantitative methods or statistics.
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

See Geography, MS Concentrations.

**Total Credits** 30

1 GEOG 8026: or an approved graduate level statistics course from another department

Exit Requirements:

- **Thesis Option** - 6 hours GEOG 8990
- **Non-Thesis Option** - Comprehensive Examination or Professional Conference
  - An alternative to the oral and written non-thesis exams, students pursuing the non-thesis option can instead present a paper or a poster at a professional conference. The poster or paper must be based on the student’s original research. Students must create a three-person committee and defend a research proposal first. The committee must be approved by the graduate studies coordinator. Once their research is complete, their paper and poster or PowerPoint must be reviewed and approved by their committee. Once approved, the presentation or poster must be presented to the department before the conference and the Poster/ Presentation Non-Thesis Option form completed. Students must then present at the conference and write up a one-page reflection of their experience presenting, giving the form and the reflection to the graduate studies coordinator.

**Concentrations**

Select an area of concentration (9 hours)

Courses offered through GEOG 8500 and GEOG 8600 will be submitted for inclusion in a concentration accompanied by a letter from the student's advisor or from the graduate program chair with the course title and specifying the concentration to which it applies.

## Gerontology

### Degree Programs Offered

- Gerontology, PhD (p. 1241)
- Gerontology, MA (p. 1242)
- Gerontology Certificate (p. 1243)

**Ger 8020 Introduction to Research Methods (3 credits)**

An introduction to research methods and statistical procedures in the social and behavioral sciences.

**Ger 8056 Advanced Biology of Aging (3 credits)**

This course covers biological aging topics at an advanced level, and is designed for undergraduate and graduate students who have some prior knowledge about biology or aging. The course will be interdisciplinary in nature and focus on topics relevant to gerontology, biology, psychology, and exercise science. Students will learn how to think critically about primary research in the biology of aging. Furthermore, they will apply their knowledge of the biology of aging field by creating a handbook of healthy aging for older adults. (Cross-listed with Ger 4050, Neur 4050).

**Prerequisite(s):** Junior or senior standing for undergraduate students or graduate level standing

**Ger 8106 Educational Gerontology (3 credits)**

An introduction to the field of education for and about the aging. The institutions and processes of education will be analyzed to determine their relationships and value to persons who are now old and those who are aging. (Cross-listed with Ger 4100).

**Prerequisite(s):** Students must have a junior, senior or graduate student status.

**Ger 8206 Volunteer Management (3 credits)**

The purpose of this course is to equip managers of volunteers in aging services to develop, maintain, assess impact and evaluate a sustainable volunteer program that will provide reliable and necessary services to older adults and further to be embraced as a valuable asset by professionals working in the field of aging. (Cross-listed with Ger 4200).

**Prerequisite(s):** Graduate Student

**Ger 8356 Issues in Aging (3 credits)**

This course is intended for students in gerontology and in other fields who are interested in a humanistic approach to understanding significant issues which affect the lives of older people. (Cross-listed with Ger 4350).

**Ger 8426 Recreation for the Aging (3 credits)**

Role of leisure services as related to understanding and working with elders. Emphasis on recreation programming as a mode of intervention. Analysis and study of the phases of aging, with reference to psychomotor, affective, and cognitive changes; introduction to the theories of aging and how they relate to the lifestyle of this population; recreational therapy intervention, activity adaptation and program design; leisure education and issues and trends. (Cross-listed with Ger 4420, Rls 4420, Rls 8426).

**Ger 8446 Sociology of Aging (3 credits)**

This course will introduce students to important theories and concepts in the sociological study of aging and give deeper understanding of the experiences that people encounter as they grow older, including retirement, disease and disability, and long-term care. In addition to exploring the challenges faced by older adults, this course will focus on factors that contribute to successful aging. (Cross-listed with Ger 4440).

**Prerequisite(s):** Graduate Students

**Ger 8466 Psychology of Adult Development and Aging (3 credits)**

The focus of this course is on the major social and psychological changes that occur as a function of aging. Both normal and abnormal patterns of developmental change are examined, along with their implications for behavior. (Cross-listed with Ger 4460, Psyc 4460)

**Prerequisite(s):** Junior or Senior.

**Ger 8476 Mental Health and Aging (3 credits)**

The goal of this course is to survey the mental health needs of older adults. Consideration is given to identifying both positive mental health and pathological conditions. Treatment interventions effective with older adults and their families are also discussed. (Cross-listed with Ger 4470, Psyc 4470, Psyc 8476).

**Prerequisite(s):** Junior or Senior

**Ger 8486 Global Ageing (3 credits)**

An investigation of the broad range of policy issues, theoretical concerns and issues of special importance to older persons. (Cross-listed with Gero 4480).

**Ger 8500 Politics and Aging (3 credits)**

The purpose of this course is to provide an understanding of the role of the political process in the emergence of public policy towards older adults in the United States, particularly during the past century.

**Ger 8506 Legal Aspects of Aging (3 credits)**

This course centers on the legal concerns likely to arise as people age. We will discuss the American legal system with an emphasis on underlying legal concepts and issues of special importance to older persons. Some of the topics include guardianship, finances in retirement, abuse and neglect, Social Security, and Medicare and Medicaid. Consideration of the legal concerns which are likely to arise as people age. Includes introduction to American legal system, and emphasis on underlying legal concepts and issues of special importance to older persons. (Cross-listed with Ger 4500).

**Ger 8516 Long-Term Care Administration (3 credits)**

An investigation of the broad range of policy issues, theoretical concerns and practical management strategies influencing the design, organization and delivery of long-term care services. (Cross-listed with Ger 4510, Pa 4510, Pa 8516).

**Ger 8526 Senior Housing (3 credits)**

The senior housing course is designed to provide students with an in-depth understanding of the various housing options available to older adults including aging in place to hospice. At the end of the course students will have a working knowledge of the needs of older adults and how this is used in making decisions about housing. (Cross-listed with Ger 4520).

**Prerequisite(s):** Graduate student

**Ger 8556 Health Aspects of Aging (3 credits)**

This course emphasizes health promotion for older adults. Special health needs of older Americans are compared and contrasted with health needs for other age groups. Prevention or delaying of chronic diseases and disorders are emphasized. (Cross-listed with Ger 4550, Phhb 4550, Phhb 8556, WGst 4550).
GERO 8566 NUTRITION AND AGING (3 credits)
The goal of this course is to provide an understanding of the relationship between nutrition and successful or usual aging. This course will review the basics of good nutrition and relate them to the usual food intake of older adults. It will identify the impact of poor nutrition. This course will also look at the role nutrition plays in various disease processes that are associated with aging. It will provide information about support services that are available to assure good nutrition into old age for those living independently. (Cross-listed with GERO 4560).

GERO 8576 REHABILITATIVE DESIGN (3 credits)
The purpose of this interdisciplinary course is to provide students with a greater appreciation and understanding of impairment as a platform for professional activities. This course will also provide an understanding of how Rehab Engineering, Universal and Inclusive Design and the implementation of Assistive Technology allow for greater levels of independence and quality of life for all members of our community, with an emphasis on the applications in the aging process. (Cross-listed with GERO 4570).

GERO 8606 MANAGEMENT AND ADMINISTRATION OF AGING PROGRAMS (3 credits)
This course is designed to give students a broad overview of theories, models, issues and approaches related to the administration of services and programs for older adults. (Cross-listed with GERO 4600).

GERO 8676 PROGRAMS AND SERVICES FOR OLDER ADULTS (3 credits)
This course is provided to give the student an historical overview of programs for older adults; examine the national policy process as it relates to the older American; and review the principles and practices relative to the existing national programs for the aged. (Cross-listed with GERO 4670, PA 8676).

Prerequisite(s): Not open to non-degree graduate students.

GERO 8696 WORKING WITH MINORITY ELDERLY (3 credits)
This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 4690, SOWK 4040, SOWK 8046).

GERO 8726 BABY BOOMERS AND THE 21ST CENTURY (3 credits)
Marketing decisions and strategies apply to all businesses and are influenced by the target market. The economic realities and the character of America will change due to shifting demographics of baby boomers. Businesses that understand the power of the baby boomer will succeed; failure to understand that power may lead to economic consequences. Students from many disciplines will benefit from this cross-referenced course blending the realities of gerontology with the predictions of baby boomer behavior and the resulting impact to all businesses. (Cross-listed with GERO 4720).

Prerequisite(s): Junior, Senior and Graduate Level Standing.

GERO 8730 DYING, DEATH & GRIEVING (3 credits)
An examination of theory and research relevant to interaction with the older, terminally ill person, focusing on communication with widows and other survivors as well as the dying patient. (Cross-listed with PHHB 8730).

Prerequisite(s): Graduate Students

GERO 8756 MID-LIFE, CAREER CHANGE, PRERETIREMENT PLANNING (3 credits)
This course is designed to involve candidates in the exploration of the developmental tasks of mid-life, myths and realities related to career change as well as the implication of preretirement planning. Factual information, as well as model examination and evaluation are presented to aid the candidate in becoming better equipped to understand some of the forces which affect the well-being of middle aged persons as they prepare for the later years. (Cross-listed with COUN 8756, GERO 4750).

Prerequisite(s): Not open to non-degree graduate students.

GERO 8800 GRADUATE SEMINAR IN THE AGING BRAIN (3 credits)
The Graduate Seminar in the Aging Brain is a graduate level gerontology course focused on understanding the changes to the brain due to normal aging and aging-related diseases. This is an elective course for the Gerontology graduate program at UNO. The content matter of this course also makes it a relevant fit for graduate students from disciplines such as biology, psychology, geriatric medicine, nursing, social work, and exercise science. By the end of the course, students should have a thorough understanding of the changes to the brain in healthy aging and aging-related disease that affect cognitive and emotional functioning. (Cross-listed with PSYC 8800).

Prerequisite(s): Graduate level standing

GERO 8810 GRADUATE SEMINAR IN THE BIOLOGY OF AGING (3 credits)
This course provides an in-depth investigation of key topics in the biology of aging for graduate students. The course will be interdisciplinary in nature and focus on topics relevant to gerontology, biology, psychology, neuroscience, and exercise science. Students will learn about theory, primary research, and hypotheses within the biology of aging field. Students will be asked to think critically and apply their knowledge through assignments and class discussions.

Prerequisite(s): Graduate level standing

GERO 8856 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)
This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 4850, SOWK 4850, SOWK 8856).

GERO 8920 SPECIAL STUDIES IN GERONTOLOGY (1-3 credits)
Special studies designed around the interests and needs of the individual student in such areas as the psychology, sociology, economics, biology, or politics of aging, as well as operation of various service systems. This independent study may include a literature review or a field project in which experience is gained in the community, identifying and analyzing needs and services related to older people.

Prerequisite(s): Instructor permission

GERO 8940 GRADUATE PRACTICUM (3 credits)
This course provides the opportunity to students to share field experiences; to obtain guidance concerning various relationships with agency, staff and clients; and to develop a broadly based perspective of the field of aging.

Prerequisite(s): Nine hours in gerontology and permission. Students must be enrolled in the certificate or degree program (MA, PhD) as well as have a minimum GPA of 3.0. Not open to non-degree students.

GERO 8956 PALLIATIVE CARE: MENTORING A HEALTHCARE APPROACH OF PATIENT-CENTERED CARE WITH FOCUS ON WELL-BEING (3 credits)
This course provides a foundation for the recognition of the need to implement palliative medical care. Using current texts and literature, video and podcast lectures by colleagues, and review of cases and topics, a student will understand the definitions, purposes, and benefits of palliative medical care. The student will learn the avenues and ways to implement palliative care to provide care that promotes well-being. (Cross-listed with GERO 4950).

GERO 8980 LITERATURE AND AGING (3 credits)
In this course, we will examine the experience of aging and of being an older person through the world's great literature. We will study this universal experience by reading novels, short stories, poems, plays, and personal narratives from across different eras and cultures. In this way we hope to come to a better understanding of: 1) the older adults we serve as patients and clients; 2) our own aging process and those of our close family members and friends; 3) literary works and their relevance in our everyday lives.

Prerequisite(s): Graduate students only.
GERO 8986 COUNSELING SKILLS IN GERONTOLOGY (3 credits)
This course is intended to help develop basic counseling skills for application in gerontology. (Cross-listed with COUN 8986, GERO 4980).
Prerequisite(s): Not open to non-degree graduate students.

GERO 8990 THESIS (1-6 credits)
Independent research project required of all students working toward the Master of Arts degree. The thesis is written under the supervision of the thesis adviser and the thesis committee.
Prerequisite(s): Permission from adviser.

GERO 9020 GRADUATE SEMINAR IN STATISTICAL APPLICATIONS (3 credits)
Provides an introduction to statistical methods and data management used in the social, behavioral and health sciences.

GERO 9110 THEORIES OF AGING (3 credits)
An overview of social gerontology with an emphasis on the interplay between social, psychological and physical elements in later life. Restricted to graduate students only; required of gerontology students. (Cross-listed with SOC 9110).
Prerequisite(s): Graduate.

GERO 9460 SEMINAR IN AGING AND HUMAN BEHAVIOR (3 credits)
This course will examine in detail age-related changes in psychological processes and explore the implications of these changes for behavior. The course is intended primarily for graduate students in psychology and gerontology. (Cross-listed with PSYC 9460).
Prerequisite(s): Graduate standing in gerontology or psychology or permission of the instructor.

GERO 9990 DISSERTATION (1-6 credits)
This course provides doctoral students pursuing the PhD in Human Sciences with a specialization in gerontology to complete a dissertation research plan. The course learning activities will focus on the completion of an approved dissertation.
Prerequisite(s): Admittance to the PhD in Human Sciences with a specialization in gerontology. Not open to non-degree graduate students.

Gerontology, PhD
Department of Gerontology, College of Public Affairs & Community Service

Vision Statement
Our program provides interdisciplinary training, preparing students to be leaders in the field of gerontology. Due to the multidisciplinary nature of the field, our students have much flexibility as we create individualized programs tailored to each student’s research and substantive interests to ensure that their training has enough breadth and depth. Our graduates acquire knowledge through various approaches including symposia, formal classes, directed studies, research projects and workshops. All students develop abilities to understand, analyze and evaluate the challenges and opportunities of an aging population. Finally, through training by our multidisciplinary faculty, students strengthen their research and writing skills to produce quality research suitable for peer-reviewed publication and presentation at national conferences.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Doctoral students begin in the Fall semester):
- Fall: January 15 (Priority deadline if interested in scholarship or graduate assistantship); Applications accepted through April 15

Other Requirements
- Entrance Exam: Graduate Record Exam (GRE)
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
- Internet-based TOEFL: 90, IELTS: 6.5, PTE: 64, Duolingo: 120
- Statement of Purpose: This should describe prior education, relevant professional experience, career goals, and the specific relationship of the PhD degree to the achievement of those goals. If there are particular faculty you are interested in working with, or areas of study that you would like to pursue please include in your statement. If you are interested in a graduate assistantship, please indicate your interest and the skills you have to assist the faculty.
- Writing Sample: this may be a master’s or honors thesis, a published article, or any similar manuscript or paper written in a scholarly style.
- Resume
- Letters of Recommendation: Three academic letters of recommendation are required.

Methodology/Statistics Courses 6
Electives 46
Dissertation (GERO 9990) 20
Total Credits 90

1 Students may take either GERO 8800 or 8056; both courses are not required.
2 Students may begin work on the dissertation after successful completion of the comprehensive examination and admission to candidacy. The dissertation topic must be approved by the student’s dissertation committee, which consists of a chair and three other members. One
Program Specifics:
The Department of Gerontology. The dissertation topic, prospectus, and the dissertation all require the approval of the dissertation committee. A doctoral student will be required to take at least one hour of GERO 9990 Dissertation each fall and spring semester while working toward the completion of the dissertation. A minimum of 20 credit hours of GERO 9990 is required for all doctoral students.

Comprehensive Examination and Admission to Candidacy
When all or most of the coursework is completed on the plan of study, you must pass a written comprehensive examination. Once these exams are passed the supervisory committee will submit the necessary Application for Candidacy form for approval by the Office of Graduate Studies.

Gerontology, MA
Department of Gerontology, College of Public Affairs & Community Service

Vision Statement
Students pursuing the MA in gerontology are seeking a formalized and in-depth understanding of the aging process by either pursuing a thesis or non-thesis option.

Program Contact Information
Lindsay Wilkinson, PhD, Graduate Program Chair (GPC)
210N College of Public Affairs & Community Service (CPACS)

Program Website (http://www.unomaha.edu/college-of-public-affairs-and-community-service/gerontology/academics/)

Other Program Related Information
Alternative Delivery
Distance courses are available (online) for both the MA and the certificate programs.

Dual Degree in Gerontology and Law
Prospective students must apply to both UNO and UNL. Please refer to the Gerontology Departmental Handbook for more information.

Fast Track Program
The Department of Gerontology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor’s degree and a master’s degree in an accelerated time frame. With Fast Track, students may count up to nine graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:
- This program is available for undergraduate students pursuing the Bachelor of Multidisciplinary Studies desiring to pursue the MA in gerontology
- Students must have completed no fewer than 60 undergraduate hours
- Students must have a minimum undergraduate GPA of 3.0
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their undergraduate advisor to register for the graduate courses
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good academic standing
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted to undergraduate status including financial aid
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code
  - Admission to Fast Track does NOT guarantee admission to the graduate program
  - The admit term must be after the completion term of the undergraduate degree

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Statement of Purpose: The personal statement should be a minimum of two pages.
- Letters of Recommendation: Two academic letters of recommendation are required.

Health and Kinesiology, MS

School of Health and Kinesiology, College of Education, Health, and Human Sciences

Vision Statement

The School of Health and Kinesiology (H&K’s) graduate program prepares students for careers in health, physical education, exercise science, athletic training, and physical activity. By fostering the development of evidence-based work, we train students to be lifelong learners who can perform leadership roles as educators, practitioners and researchers.

History

Degree Programs Offered

- History, MA (p. 1247)
- History Certificate (p. 1250)

HIST 8010 RESEARCH DIRECTED READINGS PROJECT (1-3 credits)
Special research problems and or directed readings arranged individually with students on topics not explored in other graduate offerings. If students do not complete all the readings during the semester in which they enroll in the course, they must complete all the readings within one academic year of their enrollment.
Prerequisite(s): Minimum of nine graduate hours in history completed. Permission of history Graduate Program Chair. Open only to students enrolled in the History MA program. Not open to non-degree graduate students.

HIST 8016 RELIGION IN EARLY AMERICA (3 credits)
This course examines the history and nature of religion in North America to c. 1770 with an emphasis on the British colonies. (Cross-listed with HIST 4010, RELI 4050).
Prerequisite(s): Must be a graduate student enrolled in History MA program. Not open to non-degree graduate students.

HIST 8020 GRADUATE INTERNSHIP (1-3 credits)
The graduate student is supervised by a member of the faculty in a project involving part-time employment or service with a museum, historic site, historical society or other institution. Work hours, activities, reporting requirements, and responsibilities must be specified in written agreement between employer, student, Graduate Program Chair, and/or supervising faculty member. Normally taken for 3 hours. If a hosting institution cannot commit to a supervised workload which the departmental advisor and/or Graduate Program Chair believe to be equivalent to 3 hours, course may be taken for fewer hours. In such circumstances, student may repeat course up to a total of 3 hours.
Prerequisite(s): Must be in the History/History & Government MA program, have completed at least 6 hours of graduate credit, and have History Graduate Program Chair (GPC) and/or supervising faculty approval before enrolling. Not open to non-degree graduate students.

HIST 8030 GRADUATE HISTORICAL METHODOLOGY (3 credits)
This course will examine various historical methodologies which have been employed by historians to provide structural interpretations of the past. Although exact content may vary, examples of methodologies include the Whig Interpretation, Marxism, Structuralism, Postmodernism, and the New Social History.
Prerequisite(s): Graduate student in History/History & Government program. Not open to non-degree graduate students.

HIST 8046 HOMESCAPES: THE MATERIAL CULTURE OF EVERYDAY LIFE IN AMERICA, 1600-1860 (3 credits)
This course examines the culture and technologies of house forms and work landscapes in North America, 1600-1860. (Cross-listed with HIST 4040).
Prerequisite(s): Graduate student in history, or permission of the graduate chair.

HIST 8056 HISTORY OF WOMEN IN AMERICA TO 1875 (3 credits)
This course examines the history of women in what is now the United States from the seventeenth century to 1875. Topics include law, work, sexuality and reproduction, slavery, cross-cultural encounters, religion, political activism, and the transformation of gender by the market and industrial revolutions. (Cross-listed with HIST 4050).
Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

HIST 8066 HISTORY OF WOMEN IN AMERICA FROM 1875 - 1992 (3 credits)
This course examines the history of women in the United States from 1875 to 1992. Topics include law, work, sexuality and reproduction, immigration, civil rights, political participation and party politics, and changes to the American gender system, including family structure and employment. (Cross-listed with HIST 4060, WGST 4060, WGST 8066).
Prerequisite(s): Graduate standing. Not open to non-degree graduate students.
HIST 8076 SLAVERY AND RACE RELATIONS IN THE AMERICAS (3 credits)
Slavery and Race Relations in the Americas examines the historical relationship between the trans-Atlantic slave trade and American race relations, connecting the enslavement of Africans in the Americas to race relations in the Caribbean, Latin America, and the United States. (Cross-listed with HIST 4070, BLST 4650, BLST 8656, LLS 4650, LLS 8656).
Prerequisite(s): Graduate standing

HIST 8086 THE BLACK ATLANTIC (3 credits)
This course examines the cultural and ethnic history of Black people who comprised “The Black Atlantic.” The course is organized historically and begins with a brief overview of the European slave trade on the West African Coast in the 15th century. From there, we look critically at the arrival of Africans to the New World, examine varieties of slavery and freedom in the Americas, and conclude with slave revolts and emancipation activism in the 18th and 19th century. We will use the Haitian Revolution (in which Haiti became the first country to be founded by formerly enslaved people) as a special case study, a conduit for our exploration of this socio-cultural, economic, and Diasporic space. (Cross-listed with BLST 8356, BLST 4350, HIST 4080).
Prerequisite(s): Graduate standing

HIST 8146 COLONIAL AMERICAN HISTORY (3 credits)
This course provides a study of the settlement and development of North America to c. 1763 with an emphasis on the British colonies. (Cross-listed with HIST 4140).

HIST 8156 THE AMERICAN REVOLUTIONARY ERA, 1763-89 (3 credits)
This course examines the period of the American Revolution beginning with the changed circumstances in the British North American colonies following the end of the French and Indian War and concluding with the ratification of the United States Constitution. The course analyses social, political, and military themes from this period. (Cross-listed with HIST 4150).
Prerequisite(s): graduate standing

HIST 8166 THE EARLY AMERICAN REPUBLIC: FROM THE CONSTITUTION TO THE SECOND PARTY SYSTEM (3 credits)
This course covers an important period of American history beginning with the first federal government and ending with an analysis of the consolidation of the Second American Party system. Topics to be covered include the earliest debates over the nature of the federal government, foreign relations, the emergence of political parties, and the rise of the Jacksonian democracy. (Cross-listed with HIST 4160).
Prerequisite(s): graduate standing

HIST 8176 HISTORY OF THE AMERICAN WEST (3 credits)
An examination of the unique aspects of the region of the United States known as "the west." Students will learn about the multiple peoples, cultures, and environments which combined to form this region. Content will also include an examination of how the myths of the west were created. (Cross-listed with HIST 4170).
Prerequisite(s): Graduate standing

HIST 8186 THE AMERICAN CIVIL WAR PERIOD: FROM THE TEXAS REVOLUTION THROUGH RECONSTRUCTION (3 credits)
This course focuses on the period of the American Civil War. It will begin with the background to, and events of the Texas Revolution. It will then consider the growing national tensions over slavery, particularly as a consequence of the Mexican-American War before examining the immediate causes of the civil war. The course will then examine the war itself before concluding with analysis of Reconstruction. (Cross-listed with HIST 4180).
Prerequisite(s): graduate standing

HIST 8246 EMERGENCE OF MODERN AMERICA (3 credits)
This course examines American history from the end of Reconstruction to the end of World War II. Among the topics covered are western expansion, industrialization, immigration, and the expanding international footprint of the United States. (Cross-listed with HIST 4240).
Prerequisite(s): graduate standing

HIST 8336 U.S. CONSTITUTIONAL HISTORY TO 1860 (3 credits)
This course will examine the history of the United States constitution from its promulgation in 1787 through the end of the Civil War. This will include consideration of both English and colonial precedents. The course will analyze the process of writing and ratifying the document in the late 1780s and will then look at some of the key legal decisions between 1790 and 1860. (Cross-listed with HIST 4330).
Prerequisite(s): graduate standing

HIST 8346 U.S. CONSTITUTIONAL HISTORY SINCE 1860 (3 credits)
This course examine the increasingly important role played by competing interpretations of the United States constitution since the outbreak of he Civil War. This will include the emergence of the idea of a "living constitution," the extension of constitutional guarantees to the states, and examination of critical Supreme Court cases. (Cross-listed with HIST 4340).
Prerequisite(s): Graduate standing

HIST 8366 THE U.S. IN THE COLD WAR (3 credits)
This course will examine the impact of the Cold War in modern American history on two levels. First it will seek to understand how the Cold War influenced American foreign policy decisions since the end of World War II and examine the long term consequences of those policies for both the U.S. and the world. Secondly, this course will examine how the Cold War impacted or shaped American culture, domestic politics, and social movements in the postwar period. (Cross-listed with HIST 4360).
Prerequisite(s): Graduate student in history, or permission of the graduate chair.

HIST 8406 HISTORY OF NATIVE AMERICAN INDIGENOUS PEOPLES (3 credits)
This survey of North American Indigenous peoples provides a historical overview of the peoples and their interactions with settlers, wars, policies, and other events that have shaped modern Tribal and U.S. relations. (Cross-listed with HIST 4400, NAMS 4400).
Prerequisite(s): Graduate standing

HIST 8416 HISTORY OF NEBRASKA (3 credits)
An examination of the history of Nebraska from Native American occupation to the present, with emphasis on environmental factors that have shaped the region and its people. (Cross-listed with HIST 4410).
Prerequisite(s): Graduate standing

HIST 8426 THE SIOUX TRIBE (3 credits)
A cultural and historical study of the Sioux tribes emphasizing the earliest historic period to the present. (Cross-listed with HIST 4420).

HIST 8456 NATIVE AMERICAN ENVIRONMENTALISM (3 credits)
This course studies North American tribal subsistence and natural resource use practices from the early historic period to the present, Native Americans as environmentalists, and modern tribal environmentalism. (Cross-listed with HIST 4450).

HIST 8466 AMERICAN IMMIGRATION HISTORY (3 credits)
A study of American immigration from the colonial era to the present. Topics covered include Old World origins of migration, the old immigrants from western Europe, the new immigrants from southern and eastern Europe, non-European immigrants, native-born American responses to immigrants, the periods of immigrant adjustment in the new physical environment, and the contemporary revival of ethnicity. (Cross-listed with HIST 4460).
Prerequisite(s): Graduate student standing or permission of the graduate chair

HIST 8486 THE UNITED STATES IN THE 1960S (3 credits)
This course is a review of the economic, social, cultural, and political changes that marked the United States in the 1960s. (Cross-listed with HIST 4480).
HIST 8536 EUROPE: RENAISSANCE & REFORMATION (3 credits)
This course will examine European history from the fifteenth through the seventeenth centuries. Among the topics which will be covered are the Renaissance, the Protestant Reformation, the Catholic Reformation, Wars of Religion, the beginning of European overseas expansion, and the Scientific Revolution. In addition to examining the religious ideas and revolutions of the period, there will also be analysis of economic, social, and political change. (Cross-listed with HIST 4530).
Prerequisite(s): graduate standing

HIST 8546 MEDIEVAL EUROPE (3 credits)
A dive into the history of medieval Europe through the stories of men and women, their beliefs, struggles, contradictions and achievements. (Cross-listed with HIST 4540).
Prerequisite(s): graduate standing

HIST 8616 TUDOR AND STUART ENGLAND (3 credits)
English history from the end of the Wars of the Roses in 1485 to the death of Queen Anne in 1714. The course will examine the efforts of the Tudors and Stuarts to establish dynasties, the religious upheavals in the sixteenth and seventeenth centuries, changes in the role of Parliament, the Civil Wars, and the beginning of English overseas expansion. (Cross-listed with HIST 4610).
Prerequisite(s): graduate standing

HIST 8726 THE HOLOCAUST (3 credits)
An interdisciplinary approach in a seminar oriented format discussing various aspects of the most notorious genocide in modern times. The course will explore the history of anti-Semitism, the rise of Nazi Germany and the road to the ‘final solution.’ It will further explore psychological, sociological and intellectual aspects of the dark side of humanity. (Cross-listed with HIST 4720, RELI 4160, RELI 8166).

HIST 8736 ISRAEL AND PALESTINE (3 credits)
This course will outline the history of the conflict over Palestine/Israel, examine its present status, and explore its likely unfolding in the future. It seeks to provide a broad and concise understanding of the historical events which have shaped the relations between Israelis and Palestinians, as well as a keen awareness of the challenges and prospects related to their future. (Cross-listed with HIST 4730).
Prerequisite(s): graduate standing

HIST 8746 COMPARATIVE GENOCIDE (3 credits)
This course explores genocide and its many forms throughout history. It begins by considering the varied elements and definitions of the term. Next it looks at what makes people kill before going on to examine many different genocides throughout history. Finally, the course addresses the prosecution and prevention of genocide. (Cross-listed with HIST 4740).
Prerequisite(s): Graduate student enrolled in History MA program. Not open to non-degree graduate students

HIST 8806 U.S. AND THE MIDDLE EAST (3 credits)
This course focuses on the evolution of US relations with and Foreign Policy vis-a-vis the Middle East over the last six decades. It seeks to illuminate the constant features in contrast to the changes in direction, examining the agendas of varying administrations as well as the treatment by the media of this region. It follows a chronological framework with particular emphasis on key thematic topics. While emphasizing the political dimensions of international relations, the class will also explore cultural and social aspects of the ties between the US and the peoples of the Middle East. (Cross-listed with HIST 4800).
Prerequisite(s): Not open to non-degree graduate students

HIST 8826 MESOPOTAMIA AND PRE-ISLAMIC PERSIA (3 credits)
Examination of the Ancient Near East from the emergence of its earliest civilizations—Sumer, Akkad and Babylonia—through the Bronze and Iron Ages, concluding with Persia in the Common Era (CE) just before the rise of Islam. (Cross-listed with HIST 4820).

HIST 8836 ANCIENT GREEK MYTH, RELIGION & MAGIC (3 credits)
Students will examine the impact of ancient Greek myth and belief on actual religious practice: e.g., “lived” religion. Areas covered include formal civic sacrifice, war-time religion, family and personal devotions, mystery cults, oracles and seers, plus the popular pursuit of magic. (Cross-listed with HIST 4830, RELI 4830, RELI 8836).
Prerequisite(s): Junior standing

HIST 8846 ALEXANDER THE GREAT AND THE MACEDONIAN ORIGIN (3 credits)
Examination of the conquests of Alexander the Great, as well as controversies in Alexander studies. Includes discussion of both the Macedonian culture that produced him and the career of his father, Philip II. (Cross-listed with HIST 4840).
Prerequisite(s): Graduate standing

HIST 8856 ROME AND THE EARLY CHURCH (3 credits)
Students will cover Roman-Christian-Jewish interactions from just before the birth of Jesus of Nazareth to c. 450 CE, with emphasis on social and political history. We catalogue Christianity’s transformation from its origins as a Jewish movement and an illegal “superstition” to the dominant religion of the Roman empire. (Cross-listed with HIST 4850, RELI 4850, RELI 8856).
Prerequisite(s): Junior standing.

HIST 8916 TOPICS IN HISTORY (3 credits)
This course introduces students to specialized subject matter not available in existing History courses. Course may be repeated as long as the topic is substantially different each time. Course may be cross-listed with other programs e.g. Native American Studies (NAMS), Women’s and Gender Studies (WGST) when topics are appropriate. (Cross-listed with HIST 4910).
Prerequisite(s): Graduate standing

HIST 8990 THESIS (1-6 credits)
Thesis research project written under supervision of an adviser.
Prerequisite(s): Completion of twenty-four hours of History or History & Government graduate work. Permission of History Graduate Program Chair. Not open to non-degree graduate students.

HIST 9100 SEMINAR IN HISTORY (3 credits)
This seminar guides advanced graduate students through critical readings and practices in historical research or historiography. Topics will vary and course can be repeated under different topics.
Prerequisite(s): Graduate students in History/History & Government who have completed HIST 2980 or equivalent, or approval of GPC. Non-History grad students may be admitted after consultation with History GPC and instructors. Not open to non-degree graduate students.

HIST 9200 COLLOQUIUM (3 credits)
The colloquium guides advanced graduate students through the historiography of a specific subject. Topics will vary and course can be repeated under different topics. Open only to students enrolled in MA program in history unless permission granted by History Department Graduate Program Chair.
Prerequisite(s): Graduate students in History/History & Government who have completed HIST 2980 or equivalent, or approval of GPC. Non-History grad students may be admitted after consultation with History GPC and instructors. Not open to non-degree graduate students.

History, MA
Department of History, College of Arts & Sciences

Vision Statement
The mission of the Master of Arts in history program is to develop in students an understanding both of history itself and of history as a profession. In so doing, students will move beyond thinking of history as simply a series of events.

Since the professionalization of history in the late nineteenth century, historians have sought to explain not only what happened but why events unfolded the way they do. In subsequent years, this has led to

University of Nebraska at Omaha Catalog 1247
an increasingly sophisticated volume of materials which deepen our understanding of the past. The process has also led to the formulation, and frequently the subsequent refutation, of models of interpretation.

In order to develop a proper understanding of the past, graduates in history need to understand not only the events of the past but how historians have interpreted those events. As such the Master of Arts history program is committed to exposing our students to the events of history, the records of history, as well as to those who have sought to explain them. In so doing, our graduate will understand history at a much deeper level than when they entered the program.

Other Program Related Information
Fast Track
The Department of History has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor’s degree and a master’s degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:
• This program is available for undergraduate students pursuing BA/BS in History desiring to pursue a MA in History.
• Students must have completed no less than 95 undergraduate hours.
• Students must have a minimum undergraduate GPA of 3.0.
• Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
• Students will work with their undergraduate advisor to register for the graduate courses.
• A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good academic standing.
• Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
• Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
  • Admission to Fast Track does NOT guarantee admission to the graduate program.
  • If students obtain a minimum GPA of 3.8 in the graduate courses taken within the Fast Track Program, this will be considered a plus factor for admission to the master’s degree program.
• The admit term must be after the completion term of the undergraduate degree.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
• Fall: June 15 (February 15 for funding consideration)
• Spring: November 15
• Summer: April 15

Other Requirements
• Complete 21 semester hours of undergraduate work in history, including a course on historical research, with a 3.0 grade point average (on a 4.0 scale).
• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  • Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
• Statement of Purpose: Submit an essay of 250-500 words describing the applicant’s interests in history and why he or she wishes to earn an MA degree in History.
• Writing Sample: 10-12 pages in length from an upper-division history (or cognate) course, or an equivalent-length history-related article published in a peer-reviewed publication.
• Letters of Recommendation: Two letters of recommendation are required.
  • Because we seek to determine your potential as a historian, letters of recommendation should be solicited primarily from historians with whom you have worked during your academic career. If you did not major in history and therefore cannot get letters from historians, then the best remaining option is to obtain letters from professors in the field in which you majored.
  • The History graduate program committee may choose, in rare cases, to admit provisionally any student who does not meet all of the above requirements, with the understanding that all conditions for unconditional admission must be met before HIST 8010 or HIST 9100 courses may be taken.
• Students who have no undergraduate course in historical research and methodology must successfully complete HIST 8030 with a grade of B or better during one of the first two semesters of their enrollment.
• Interpretation of this requirement rests with the History graduate program committee. Students who believe that they have taken a comparable course may be asked to submit examples of their work, which will enable the graduate program committee to assess their proficiency.

Degree Requirements
Thesis Option (36 hours)
The 36-hour thesis program includes six (6) hours of thesis credit, plus 30 credit hours in graduate coursework. This program is especially recommended for students who wish to continue work toward a PhD, but is open to any student.

Students who intend to write a thesis should bear in mind that this is a substantial undertaking and one that normally takes at least a year of focused research, background reading, writing, and revision to complete, in addition to previous coursework. An MA thesis must present original research and provide evidence of both extensive work in primary sources and engagement with the current scholarship on the subject matter in question. Students should develop some idea of a topic well before they complete their coursework and, in conjunction with the GPC, identify the
department member best suited to supervise the thesis. Each faculty member of the department has complete discretion as to whether he or she will work with a particular student and whether the proposed topic is acceptable. Further discussion on thesis topics will be addressed during advising and/or new student orientation.

Total Credits 36

Students completing an MA with thesis may include no more than three (3) hours total from among HIST 8010 and HIST 8020.

**Non-Thesis Option (36 hours)**

Thirty-six (36) hours of graduate coursework in history.

The 36-hour non-thesis program consists entirely of coursework. This program is especially recommended for students who wish to pursue work in public history, archiving, secondary-school teaching, park-service work, etc. Students will receive guidance and support regarding future career paths from their comprehensive exam or portfolio committee.

Total Credits 36

Students completing an MA without thesis may include no more than six (6) hours total from among HIST 8010 and HIST 8020.

**Exit Requirements**

**Thesis Option**

**MA Thesis Contract**

Any faculty member in the Department of History who agrees to chair a MA thesis committee or who agrees to be a member of an MA thesis committee, may ask the student in question to sign a MA Thesis Contract. The basic model for such a contract will be available to students on the history graduate student Canvas page. The faculty member in question may choose to modify this basic model if they think appropriate.

All candidates should carefully review the Graduate College requirements for forming a supervisory committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of a thesis.

**Non-thesis Option**

Students opting for the Non-thesis Option can choose between taking a comprehensive examination or submitting a portfolio.

**Comprehensive Examination**

Successfully pass comprehensive exams which may only be taken after the candidate has successfully completed all other requirements for the MA. Full details on comprehensive examinations will be provided during advising and/or new student orientation.

Exams will be offered in each semester of the academic year i.e. fall, spring, and summer. Students generally may not take their exams until they have completed all the required coursework for their MA program. Rare exceptions may be considered at the discretion of the GPC.

As comps are not a course, they are graded only as pass/fail – with a B being the minimum grade to pass. The three questions will be graded separately – students must pass all questions in order to earn their MA. Retaking all or part of a comprehensive exam should be scheduled within two semesters (including summer) of the original exam, except in extraordinary circumstances and with the special permission of the graduate committee. Failure of one question will require a rewrite of that question (new or revised to be determined by the committee); failure of two or more questions will require a retake of the entire exam (new or revised, again to be determined by the committee). Retakes will be limited to one attempt. Further details on comprehensive exams will be provided during advising and/or new student orientation.

As is the case with regular courses, students may appeal comprehensive exam grades ONLY IF they believe such grading was “prejudiced or capricious” (see Bylaws of the Board of Regents of the University of Nebraska. Details here [http://www.unomaha.edu/policies/]). The process of appeal will follow that provided in the Department of History Grade Appeal outlined here [http://www.unomaha.edu/cas/gradeappeal.php], with the GPC standing as Instructor of Record.

**Portfolio**

Successfully pass the examination of a portfolio which may only be submitted after the candidate has completed all other requirements for the MA. Full details on the portfolio option will be provided during advising and/or new student orientation.

Examination of the portfolio will be offered in each semester of the academic year i.e., fall, spring, and summer. As the portfolio is not a course, it is graded only as pass/fail with a B being the minimum grade to pass. As is the case with regular courses, students may appeal portfolio grades ONLY IF they believe such grading was “prejudiced or capricious” (see Bylaws of the Board of Regents of the University of Nebraska. Details here [http://www.unomaha.edu/policies/]). The process of appeal will follow that provided in the Department of History Grade Appeal outlined here [http://www.unomaha.edu/cas/gradeappeal.php], with the GPC standing as Instructor of Record.

**Course Attendance Requirement and Withdrawal Policy**

- All Department of History faculty may, at their own discretion, remove from any class any graduate student who misses three or more classes during a single semester.
• The Department of History graduate program committee may remove from the program any student who withdraws from three or more courses.

Academic Progress
• Each candidate must complete his or her MA degree within eight (8) years of starting the program. A candidate who, owing to extenuating circumstances, is unable to meet this requirement may appeal in writing to the Graduate Program Chair (GPC) and/or the Department of History graduate committee for an extension of time. Such extensions will normally be granted only in cases of serious illness or military deployment.
• In addition to conforming to all requirements for academic progress laid down by the Office of Graduate Studies, the Department of History notes the following: pursuant to the section "Automatic Dismissal," wherein is noted "Departments/Schools may have additional and more stringent criteria for evaluating a student’s performance and may demand a higher level of performance than that demanded by the Graduate College," please note:
  • The Department of History at UNO will automatically dismiss from the program any student who is awarded any grade below B- in two (or more) classes, regardless of whether or not they have complied with other requirements of satisfactory progress.

History Certificate
Department of History, College of Arts & Sciences

Vision Statement
UNO’s Department of History offers an 18 credit hour graduate certificate in history for educators and other professionals who already have an advanced degree in another field and wish to expand their knowledge of History. This certificate is designed to help educators meet the new requirements set by the Higher Learning Commission to teach history-related courses in institutions of higher education or dual enrollment/concurrent enrollment courses in high schools. This certificate can be earned completely online.

Students must earn a 3.0 GPA to graduate with this certificate.

History and Government, MA
Department of History and Department of Political Science, College of Arts & Sciences

Vision Statement
The Master of Arts in history and government offers a broad foundation in the disciplines of history and political science. Students can earn the degree completely on-line, on-campus, or with a mix of in-person and online courses.

The program offers flexible schedule opportunities to working professionals in the areas of government and education. The students can fuel their careers with a purposeful and versatile curriculum.

History Electives selected from any other HIST graduate courses: 9

Political Science Required Seminars: 6
- Select two of the following:
  - PSCI 8040 SEMINAR IN AMERICAN GOVERNMENT AND POLITICS
  - PSCI 8250 SEMINAR IN INTERNATIONAL RELATIONS
  - PSCI 8300 SEMINAR IN POLITICAL THEORY
  - PSCI 8500 SEMINAR IN COMPARATIVE POLITICS

Political Science Electives selected from any other PSCI graduate courses: 12

Total Credits: 36

Coursework policies:
- No more than two courses can end in 5.
- Former UNO undergraduates cannot take a cross-listed graduate course that they took at the undergraduate level.

Exit Requirements
A portfolio of coursework will be evaluated by relevant faculty other than the instructor for said course. As the portfolio is not a course, it is graded only as pass/fail with a B being the minimum grade to pass.

HIST 8010 RESEARCH DIRECTED READINGS PROJECT (1-3 credits)
Special research problems and/or directed readings arranged individually with students on topics not explored in other graduate offerings. If students do not complete all the readings during the semester in which they enroll in the course, they must complete all the readings within one academic year of their enrollment.

Prerequisite(s): Minimum of nine graduate hours in history completed. Permission of history Graduate Program Chair. Open only to students enrolled in the History MA program. Not open to non-degree graduate students.

HIST 8016 RELIGION IN EARLY AMERICA (3 credits)
This course examines the history and nature of religion in North America to c. 1770 with an emphasis on the British colonies. (Cross-listed with HIST 4010, RELI 4050).

Prerequisite(s): Must be a graduate student enrolled in History MA program. Not open to non-degree graduate students.
HIST 8020 GRADUATE INTERNSHIP (1-3 credits)
The graduate student is supervised by a member of the faculty in a project involving part-time employment or service with a museum, historic site, historical society or other institution. Work hours, activities, reporting requirements, and responsibilities must be specified in written agreement between employer, student, Graduate Program Chair, and/or supervising faculty member. Normally taken for 3 hours. If a hosting institution cannot commit to a supervised workload which the departmental advisor and/or Graduate Program Chair believe to be equivalent to 3 hours, course may be taken for fewer hours. In such circumstances, student may repeat course up to a total of 3 hours.
Prerequisite(s): Must be in the History/History & Government MA program, have completed at least 6 hours of graduate credit, and have History Graduate Program Chair (GPC) and/or supervising faculty approval before enrolling. Not open to non-degree graduate students.

HIST 8030 GRADUATE HISTORICAL METHODOLOGY (3 credits)
This course will examine various historical methodologies which have been employed by historians to provide structural interpretations of the past. Although exact content may vary, examples of methodologies include the Whig Interpretation, Marxism, Structuralism, Postmodernism, and the New Social History.
Prerequisite(s): Graduate student in History/History & Government program. Not open to non-degree graduate students.

HIST 8046 HOMESCAPES: THE MATERIAL CULTURE OF EVERYDAY LIFE IN AMERICA, 1600-1860 (3 credits)
This course examines the culture and technologies of house forms and work landscapes in North America, 1600-1860. (Cross-listed with HIST 4040).
Prerequisite(s): Graduate student in history, or permission of the graduate chair.

HIST 8056 HISTORY OF WOMEN IN AMERICA TO 1875 (3 credits)
This course examines the history of women in what is now the United States from the seventeenth century to 1875. Topics include law, work, sexuality and reproduction, slavery, cross-cultural encounters, religion, political activism, and the transformation of gender by the market and industrial revolutions. (Cross-listed with HIST 4050).
Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

HIST 8066 HISTORY OF WOMEN IN AMERICA FROM 1875 - 1992 (3 credits)
This course examines the history of women in the United States from 1875 to 1992. Topics include law, work, sexuality and reproduction, immigration, civil rights, political participation and party politics, and changes to the American gender system, including family structure and employment. (Cross-listed with HIST 4060, WGST 4060, WGST 8066).
Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

HIST 8076 SLAVERY AND RACE RELATIONS IN THE AMERICAS (3 credits)
Slavery and Race Relations in the Americas examines the historical relationship between the trans-Atlantic slave trade and American race relations, connecting the enslavement of Africans in the Americas to race relations in the Caribbean, Latin America, and the United States. (Cross-listed with HIST 4070, BLST 4650, BLST 8656, LLS 4650, LLS 8656).
Prerequisite(s): Graduate standing

HIST 8086 THE BLACK ATLANTIC (3 credits)
This course examines the cultural and ethnic history of Black people who comprised “The Black Atlantic.” The course is organized historically and begins with a brief overview of the European slave trade on the West African Coast in the 15th century. From there, we look critically at the arrival of Africans to the New World, examine varieties of slavery and freedom in the Americas, and conclude with slave revolts and emancipation activism in the 18th and 19th century. We will use the Haitian Revolution (in which Haiti became the first country to be founded by formerly enslaved people) as a special case study, a conduit for our exploration of this socio-cultural, economic, and Diasporic space. (Cross-listed with BLST 8356, BLST 4350, HIST 4080).
Prerequisite(s): Graduate standing

HIST 8146 COLONIAL AMERICAN HISTORY (3 credits)
This course provides a study of the settlement and development of North America to c. 1763 with an emphasis on the British colonies. (Cross-listed with HIST 4140).

HIST 8156 THE AMERICAN REVOLUTIONARY ERA, 1763-89 (3 credits)
This course examines the period of the American Revolution beginning with the changed circumstances in the British North American colonies following the end of the French and Indian War and concluding with the ratification of the United States Constitution. The course analyses social, political, and military themes from this period. (Cross-listed with HIST 4150).
Prerequisite(s): graduate standing

HIST 8166 THE EARLY AMERICAN REPUBLIC: FROM THE CONSTITUTION TO THE SECOND PARTY SYSTEM (3 credits)
This course covers an important period of American history beginning with the first federal government and ending with an analysis of the consolidation of the Second American Party system. Topics to be covered include the earliest debates over the nature of the federal government, foreign relations, the emergence of political parties, and the rise of the Jacksonian democracy. (Cross-listed with HIST 4160).
Prerequisite(s): graduate standing

HIST 8176 HISTORY OF THE AMERICAN WEST (3 credits)
An examination of the unique aspects of the region of the United States known as "the west." Students will learn about the multiple peoples, cultures, and environments which combined to form this region. Content will also include an examination of how the myths of the west were created. (Cross-listed with HIST 4170).
Prerequisite(s): Graduate standing

HIST 8186 THE AMERICAN CIVIL WAR PERIOD: FROM THE TEXAS REVOLUTION THROUGH RECONSTRUCTION (3 credits)
This course focuses on the period of the American Civil War. It will begin with the background to, and events of the Texas Revolution. It will then consider the growing national tensions over slavery, particularly as a consequence of the Mexican-American War before examining the immediate causes of the civil war. The course will then examine the war itself before concluding with analysis of Reconstruction. (Cross-listed with HIST 4180).
Prerequisite(s): graduate standing

HIST 8246 EMERGENCE OF MODERN AMERICA (3 credits)
This course examines American history from the end of Reconstruction to the end of World War II. Among the topics covered are western expansion, industrialization, immigration, and the expanding international footprint of the United States. (Cross-listed with HIST 4240).
Prerequisite(s): graduate standing

HIST 8336 U.S. CONSTITUTIONAL HISTORY TO 1860 (3 credits)
This course will examine the history of the United States constitution from its promulgation in 1787 through the end of the Civil War. This will include consideration of both English and colonial precedents. The course will analyze the process of writing and ratifying the document in the late 1780s and will then look at some of the key legal decisions between 1790 and 1860. (Cross-listed with HIST 4330).
Prerequisite(s): graduate standing
HIST 8346 U.S. CONSTITUTIONAL HISTORY SINCE 1860 (3 credits)
This course examine the increasingly important role played by competing interpretations of the United States constitution since the outbreak of the Civil War. This will include the emergence of the idea of a "living constitution," the extension of constitutional guarantees to the states, and examination of critical Supreme Court cases. (Cross-listed with HIST 4340).
Prerequisite(s): graduate standing

HIST 8366 THE U.S. IN THE COLD WAR (3 credits)
This course will examine the impact of the Cold War in modern American history on two levels. First it will seek to understand how the Cold War influenced American foreign policy decisions since the end of World War II and examine the long term consequences of those policies for both the U.S. and the world. Secondly, this course will examine how the Cold War impacted or shaped American culture, domestic politics, and social movements in the postwar period. (Cross-listed with HIST 4360).
Prerequisite(s): Graduate student in history, or permission of the graduate chair.

HIST 8406 HISTORY OF NATIVE AMERICAN INDIGENOUS PEOPLES (3 credits)
This survey of North American Indigenous peoples provides a historical overview of the peoples and their interactions with settlers, wars, policies, and other events that have shaped modern Tribal and U.S. relations. (Cross-listed with HIST 4400, NAMS 4400).
Prerequisite(s): Graduate standing

HIST 8416 HISTORY OF NEBRASKA (3 credits)
An examination of the history of Nebraska from Native American occupation to the present, with emphasis on environmental factors that have shaped the region and its people. (Cross-listed with HIST 4410).
Prerequisite(s): Graduate standing

HIST 8426 THE SIOUX TRIBE (3 credits)
A cultural and historical study of the Sioux tribes emphasizing the earliest historic period to the present. (Cross-listed with HIST 4420).

HIST 8456 NATIVE AMERICAN ENVIRONMENTALISM (3 credits)
This course studies North American tribal subsistence and natural resource use practices from the early historic period to the present, Native Americans as environmentalists, and modern tribal environmentalism. (Cross-listed with HIST 4450).

HIST 8466 AMERICAN IMMIGRATION HISTORY (3 credits)
A study of American immigration from the colonial era to the present. Topics covered include Old World origins of migration, the old immigrants from western Europe, the new immigrants from southern and eastern Europe, non-European immigrants, native-born American responses to immigrants, the periods of immigrant adjustment in the new physical environment, and the contemporary revival of ethnicity. (Cross-listed with HIST 4460).
Prerequisite(s): Graduate student standing or permission of the graduate chair

HIST 8486 THE UNITED STATES IN THE 1960S (3 credits)
This course is a review of the economic, social, cultural, and political changes that marked the United States in the 1960s. (Cross-listed with HIST 4480).

HIST 8536 EUROPE: RENAISSANCE & REFORMATION (3 credits)
This course will examine European history from the fifteenth through the seventeenth centuries. Among the topics which will be covered are the Renaissance, the Protestant Reformation, the Catholic Reformation, Wars of Religion, the beginning of European overseas expansion, and the Scientific Revolution. In addition to examining the religious ideas and revolutions of the period, there will also be analysis of economic, social, and political change. (Cross-listed with HIST 4530).
Prerequisite(s): graduate standing

HIST 8546 MEDIEVAL EUROPE (3 credits)
A dive into the history of medieval Europe through the stories of men and women, their beliefs, struggles, contradictions and achievements. (Cross-listed with HIST 4540).
Prerequisite(s): graduate standing

HIST 8616 TUDOR AND STUART ENGLAND (3 credits)
English history from the end of the Wars of the Roses in 1485 to the death of Queen Anne in 1714. The course will examine the efforts of the Tudors and Stuarts to establish dynasties, the religious upheavals in the sixteenth and seventeenth centuries, changes in the role of Parliament, the Civil Wars, and the beginning of English overseas expansion. (Cross-listed with HIST 4610).
Prerequisite(s): graduate standing

HIST 8726 THE HOLOCAUST (3 credits)
An interdisciplinary approach in a seminar oriented format discussing various aspects of the most notorious genocide in modern times. The course will explore the history of anti-Semitism, the rise of Nazi Germany and the road to the "final solution." It will further explore psychological, sociological and intellectual aspects of the dark side of humanity. (Cross-listed with HIST 4720, RELI 4160, RELI 8166).

HIST 8736 ISRAEL AND PALESTINE (3 credits)
This course will outline the history of the conflict over Palestine/Israel, examine its present status, and explore its likely unfolding in the future. It seeks to provide a broad and concise understanding of the historical events which have shaped the relations between Israelis and Palestinians, as well as a keen awareness of the challenges and prospects related to their future. (Cross-listed with HIST 4730).

HIST 8746 COMPARATIVE GENOCIDE (3 credits)
This course explores genocide and its many forms throughout history. It begins by considering the varied elements and definitions of the term. Next it looks at what makes people kill before going on to examine many different genocides throughout history. Finally, the course addresses the prosecution and prevention of genocide. (Cross-listed with HIST 4740).
Prerequisite(s): Graduate student enrolled in History MA program. Not open to non-degree graduate students.

HIST 8806 U.S. AND THE MIDDLE EAST (3 credits)
This course focuses on the evolution of US relations with and Foreign Policy vis-a-vis the Middle East over the last six decades. It seeks to illuminate the constant features in contrast to the changes in direction, examining the agendas of varying administrations as well as the treatment by the media of this region. It follows a chronological framework with particular emphasis on key thematic topics. While emphasizing the political dimensions of international relations, the class will also explore cultural and social aspects of the ties between the US and the peoples of the Middle East. (Cross-listed with HIST 4800).
Prerequisite(s): Not open to non-degree graduate students

HIST 8826 MESOPOTAMIA AND PRE-ISLAMIC PERSIA (3 credits)
Examination of the Ancient Near East from the emergence of its earliest civilizations—Sumer, Akkad and Babylonia—through the Bronze and Iron Ages, concluding with Persia in the Common Era (CE) just before the rise of Islam. (Cross-listed with HIST 4820).

HIST 8836 ANCIENT GREEK MYTH, RELIGION & MAGIC (3 credits)
Students will examine the impact of ancient Greek myth and belief on actual religious practice: e.g., "lived" religion. Areas covered include formal civic sacrifice, wartime religion, family and personal devotions, mystery cults, oracles and seers, plus the popular pursuit of magic. (Cross-listed with HIST 4830, RELI 4830, RELI 8836).
Prerequisite(s): Junior standing

HIST 8846 ALEXANDER THE GREAT AND THE MACEDONIAN ORIGIN (3 credits)
Examination of the conquests of Alexander the Great, as well as controversies in Alexander studies. Includes discussion of both the Macedonian culture that produced him and the career of his father, Philip II. (Cross-listed with HIST 4840).
Prerequisite(s): Graduate standing
HIST 8856 ROME AND THE EARLY CHURCH (3 credits)
Students will cover Roman-Christian-Jewish interactions from just before the birth of Jesus of Nazareth to c. 450 CE, with an emphasis on social and political history. We catalogue Christianity’s transformation from its origins as a Jewish movement and an illegal “superstition” to the dominant religion of the Roman empire. (Cross-listed with HIST 4850, RELI 4850, RELI 8856).
Prerequisite(s): Junior standing.

HIST 8916 TOPICS IN HISTORY (3 credits)
This course introduces students to specialized subject matter not available in existing History courses. Course may be repeated as long as the topic is substantially different each time. Course may be cross-listed with other programs e.g. Native American Studies (NAMS), Women’s and Gender Studies (WGST) when topics are appropriate. (Cross-listed with HIST 4910).
Prerequisite(s): Graduate standing.

HIST 8990 THESIS (1-6 credits)
The thesis research project written under supervision of an adviser.
Prerequisite(s): Completion of twenty-four hours of History or History & Government graduate work. Permission of History Graduate Program Chair. Not open to non-degree graduate students.

HIST 9100 SEMINAR IN HISTORY (3 credits)
This seminar guides advanced graduate students through critical readings and practices in historical research or historiography. Topics will vary and course can be repeated under different topics.
Prerequisite(s): Graduate students in History/History & Government who have completed HIST 2980 or equivalent, or approval of GPC. Non-History grad students may be admitted after consultation with History GPC and instructors. Not open to non-degree graduate students.

HIST 9200 COLLOQUIUM (3 credits)
The colloquium guides advanced graduate students through the historiography of a specific subject. Topics will vary and course can be repeated under different topics. Open only to students enrolled in MA program in history unless permission granted by History Department Graduate Program Chair.
Prerequisite(s): Graduate students in History/History & Government who have completed HIST 2980 or equivalent, or approval of GPC. Non-History grad students may be admitted after consultation with History GPC and instructors. Not open to non-degree graduate students.

PSCI 8000 SEMINAR IN THE RESEARCH METHODS IN POLITICAL SCIENCE (3 credits)
This course introduces students to the methods of data collection and analysis for political science research.
Prerequisite(s): Permission of graduate adviser.

PSCI 8005 QUANTITATIVE ANALYSIS IN POLITICAL SCIENCE (3 credits)
This course introduces students to the techniques that political scientists use to answer research questions with quantitative data, as well as issues of research design, hypothesis formation, and causation. The course emphasizes the methods used to collect, analyze, and extract information from data using statistical computer software. (Cross-listed with PSCI 3000)
Prerequisite(s): Permission of graduate advisor.

PSCI 8015 URBAN POLITICS (3 credits)
This course introduces students to the development, powers, forms of government, and functions of cities and their suburbs as well as the problems faced by elected officials, business and community leaders, and citizens in the urban setting. (Cross-listed with PSCI 3010)
Prerequisite(s): PSCI 1100.

PSCI 8036 THE PRESIDENCY (3 credits)
This course introduces students to the development and modern application of presidential leadership through examination of presidential selection, presidential decision-making, the relationship of the presidency with other governmental and non-governmental actors, and the role of the presidency in modern application of the legislative process through examination of decisions and policy-making. (Cross-listed with PSCI 4036)
Prerequisite(s): PSCI 1100.

PSCI 8040 SEMINAR IN AMERICAN GOVERNMENT AND POLITICS (3 credits)
This course introduces students to classic and contemporary scholarship on the principles, institutions, processes, and policies of national government in the United States with an emphasis on engaging in thoughtful discussion and individual research.
Prerequisite(s): Not open to non-degree graduate students.

PSCI 8045 GOVERNMENT AND POLITICS OF NEBRASKA (3 credits)
This course introduces students to the development, structures, functions and public policies of the government of the state of Nebraska. (Cross-listed with PSCI 3040)
Prerequisite(s): PSCI 1100.

PSCI 8046 CONGRESS AND THE LEGISLATIVE PROCESS (3 credits)
This course introduces students to the development of the Congress and modern application of the legislative process through examination of congressional elections, congressional leadership, congressional decision-making, legislative rules and procedures, the relationship of the Congress with other governmental and non-governmental actors, and the role of the Congress in making public policy. (Cross-listed with PSCI 4040)
Prerequisite(s): PSCI 1100.

PSCI 8055 STATE GOVERNMENT AND POLITICS (3 credits)
This course introduces students to the development, structures, functions and public policies of states. (Cross-listed with PSCI 3050)
Prerequisite(s): PSCI 1100.

PSCI 8056 THE JUDICIAL PROCESS (3 credits)
This course introduces students to the administration of law in federal and state courts with respect to the organization of the courts, judicial selection, judicial powers, judicial decision-making, judicial policy-making, the bar, and reform movements in the pursuit of justice. (Cross-listed with PSCI 4050)
Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 8100 SEMINAR IN POLITICAL ECONOMY (3 credits)
A comprehensive study of theories of political economy, linkages between politics and economics, and major contemporary issues.
Prerequisite(s): Not open to non-degree graduate students.

PSCI 8105 LGBT POLITICS (3 credits)
This course introduces students to the political struggle for Lesbian, Gay, Bisexual, and Transgender (LGBT) equal rights in the United States using a model of political empowerment, which may be applied for all minority or identity groups and social movements, generating operationalized measures of progress toward the goals of political power. (Cross-listed with PSCI 3100, WGST 3100, WGST 8105).

PSCI 8106 MONEY IN AMERICAN POLITICS (3 credits)
This course surveys facts and scholarship about two types of money in American politics: money as a political resource and money as policy. As a political resource, money is critically important for candidates to win elections, for interest groups to exert influence on government, and for policy expertise from civil society to inform government policy. As policy itself, in history or in modern times money has lain at the heart of policy debates like the creation of a national bank, gold and silver as legal tender, and financial regulations, as well as perennial governmental processes like federal budgeting and appropriations and the selection of congressional party leaders. This course trains students to comprehend, analyze, critically evaluate, and build on key research on these topics. (Cross-listed with PSCI 4100).
Prerequisite(s): PSCI 1100 or equivalent is strongly recommended prerequisite.

PSCI 8116 POLITICAL PSYCHOLOGY (3 credits)
This course introduces students to the role of human thought, emotion, and behavior in politics through examination of the psychological factors that motivate political elites and the mass public. (Cross-listed with PSYC 4110, PSYC 4110, PSYC 8116)
Prerequisite(s): PSCI 1100 is recommended.
PSCI 8120 SEMINAR IN LEADERSHIP (3 credits)
This course introduces students to classical and contemporary scholarship on leadership theory, research, and application. Students gain a foundation in models of leadership, assess their own leadership styles, and learn to integrate what they learn in corporate, governmental, non-profit, or community organizations. (Cross-listed with CACT 8510).
Prerequisite(s): Not open to non-degree graduate students.

PSCI 8126 PUBLIC OPINION AND POLLING (3 credits)
This course introduces students to the origins, nature, measurement, and consequences of public opinion on policymaking. (Cross-listed with PSCI 4120).

PSCI 8135 WOMEN AND POLITICS (3 credits)
This course introduces students to women's political participation, including holding elective office, socialization, the feminist movement and its opposition, and public policies with particular impact on women. The focus is on contemporary perspectives on women in American political ideas and behavior. (Cross-listed with PSCI 3130, WGST 3130, WGST 8135)

PSCI 8136 BROWN V. BOARD OF EDUCATION (3 credits)
Brown v. Board of Education traces the educational history of African Americans from segregation to desegregation to re-segregation. This course will review the legal cases before and after the Supreme Court’s Brown decision, their aftermath, and the effects on educational policies and practices. (Cross-listed with BLST 8176, BLST 4710, PSCI 4130).
Prerequisite(s): Graduate standing or instructor permission

PSCI 8145 LATINO/-A POLITICS (3 credits)
This course introduces students to the dynamism and growth of the role of Latinos, as a group of political actors, in the United States. This course provides students with an exposure to and understanding of various concepts and dimensions of this phenomenon, including historical and contemporary Latino political thought and the efforts to increase political empowerment (representation and participation) and influence through grassroots, social, and political movements. (Cross-listed with PSCI 3140, LLS 3140, LLS 8145)

PSCI 8146 CONSTITUTIONAL LAW: CIVIL RIGHTS (3 credits)
This course introduces students to the history, principles, and judicial interpretation of key constitutional provisions and federal statutes regarding civil rights in the United States. (Cross-listed with PSCI 4140).
Prerequisite(s): PSCI 1100 or equivalent.

PSCI 8150 SEMINAR IN CONSTITUTIONAL LAW (3 credits)
This course introduces students to the Constitution and the Supreme Court’s exercise of judicial review in relation to governmental powers, civil rights, and civil liberties.
Prerequisite(s): Not open to non-degree graduate students.

PSCI 8165 POLITICAL PARTIES (3 credits)
This course introduces students to the origin, development, structure, and functions of political parties in the United States as political organizations, coalitions of voters, and governing coalitions that seek to hold office and influence public policy. (Cross-listed with PSCI 3160).
Prerequisite(s): PSCI 1100

PSCI 8175 INTEREST GROUPS (3 credits)
This course introduces students to the theories, formation, organization, and activities of interest groups and their impact on public policy, particularly through their role in campaigns and elections and lobbying. (Cross-listed with PSCI 3170).
Prerequisite(s): PSCI 1100

PSCI 8176 CONSTITUTIONAL LAW: FOUNDATIONS (3 credits)
This course introduces students to the principles, design and operation of the American constitutional system with emphasis on analysis of the Declaration of Independence, the Articles of Confederation, the proceedings of the Constitutional Convention, and the Federalist Papers. (Cross-listed with PSCI 4170).
Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 8175 CAMPAIGNS AND ELECTIONS (3 credits)
This course introduces students to the evolution and modern application of campaigns and elections in the United States through examination of campaign management and campaign strategy in congressional and presidential elections. (Cross-listed with PSCI 3180).
Prerequisite(s): PSCI 1100

PSCI 8186 CONSTITUTIONAL LAW: THE FEDERAL SYSTEM (3 credits)
This course introduces students to American constitutional law as it relates to issues of federalism, the relation of the nation and the states, and separation of powers, the relation of the three branches of the national government. (Cross-listed with PSCI 4180).
Prerequisite(s): PSCI 1100

PSCI 8196 CONSTITUTIONAL LAW: CIVIL LIBERTIES (3 credits)
This course introduces students to the philosophy, history, and development of the personal liberties guaranteed by the Constitution including freedom of speech, religion, assembly, petition, and the right of privacy, primarily through examination of Supreme Court decisions. (Cross-listed with PSCI 4190).
Prerequisite(s): Not open to non-degree graduate students.

PSCI 8200 SEMINAR IN FOREIGN POLICY AND NATIONAL SECURITY (3 credits)
This course introduces students to classic and contemporary scholarship on the formulation and implementation of foreign and national security policy in the United States with an emphasis on engaging in thoughtful discussion and individual research.
Prerequisite(s): Not open to non-degree graduate students.

PSCI 8206 INTERNATIONAL RELATIONS OF EAST ASIA (3 credits)
This course introduces students to the international politics of East Asia with an emphasis on the contemporary relations among major East Asian states (China, Japan, the Korean peninsula) and the United States. (Cross-listed with PSCI 4200).

PSCI 8216 INTERNATIONAL RELATIONS OF THE MIDDLE EAST (3 credits)
This course focuses on the international politics of the Middle East region, specifically looking at conditions for peace and causes of war. It examines how the international system, domestic politics, ideologies, and leaders influence international politics in the Middle East. (Cross-listed with PSCI 4210).

PSCI 8220 SEMINAR ON INTERNATIONAL LEADERSHIP AND STRATEGY (3 credits)
This course introduces students to international leadership and strategy theory, research, and application. (Cross-listed with CACT 8540).
Prerequisite(s): Not open to non-degree graduate students.

PSCI 8225 DIPLOMACY AND INTERNATIONAL PROBLEM SOLVING (3 credits)
This course introduces students to the history, principles, structures, and processes developed to organize and legitimize peaceful reconciliation of the differences of nation-states and to advance their mutual interests in the contemporary global political and economic system. (Cross-listed with PSCI 3220).
Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8235 GENDER AND GLOBAL POLITICS (3 credits)
This seminar introduces students to gender politics in comparative and international politics. (Cross-listed with PSCI 3230, WGST 3230, WGST 8235).

PSCI 8245 THE POLITICS AND PRACTICE OF HUMAN RIGHTS (3 credits)
This course introduces students to human rights issues across the globe and explores the theoretical foundations of human rights as well as human rights institutions and transitional justice. (Cross-listed with PSCI 3240).
Prerequisite(s): PSCI 2210 or equivalent is recommended.
PSCI 8246 INTERNATIONAL CONFLICT RESOLUTION (3 credits)
This course introduces students to different approaches to peace, their basic assumptions, and their application to current conflicts. (Cross-listed with PSCI 4240)
Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8250 SEMINAR IN INTERNATIONAL RELATIONS (3 credits)
This course introduces students to classic and contemporary scholarship on the issues, theories, and methodological approaches associated with the study of the nation-state system, international law, international organizations, international security, and globalization.
Prerequisite(s): Not open to non-degree graduate students.

PSCI 8255 GLOBAL SECURITY ISSUES (3 credits)
This course introduces students to issues of national and international security that cross boundaries and threaten all countries including issues such as climate change, environmental deterioration, population and demographics, gender issues, disease and public health, the media, asymmetrical warfare, drugs/organized crime, and cyberthreats. (Cross-listed with PSCI 3250)
Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8256 INTELLIGENCE AND NATIONAL SECURITY (3 credits)
This course introduces students to the United States intelligence services, and their relation to broader U.S. national security policy. (Cross-listed with PSCI 4250)
Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8265 UNITED STATES FOREIGN POLICY (3 credits)
This course introduces students to the analysis of foreign and defense policy processes in the United States, including the role of the President, Congress, Departments of State and Defense, the intelligence community, and other actors/factors affecting policy formulation and implementation. (Cross-listed with PSCI 3260)
Prerequisite(s): PSCI 2210.

PSCI 8266 INTERNATIONAL LAW (3 credits)
The course introduces students to the general principles of international law, including the key actors, the creation and sources of international law, the interpretation of international law by courts and tribunals, and its enforcement. (Cross-listed with PSCI 4260)
Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8276 GLOBAL ENVIRONMENTAL POLITICS (3 credits)
This course introduces students to issues of global environmental politics and policy, including the science behind issues such as climate change, how environmental policy is made at the national and international levels, and what role politics plays in determining environmental resource use. (Cross-listed with ENVN 4270, PSCI 4270)
Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8286 INTERNATIONAL RELATIONS OF LATIN AMERICA (3 credits)
Analysis of the role of Latin American states in the international political arena. Emphasis upon developing, applying and testing an explanatory theory of international politics through the study of the inter-American system: the regional, institutional and ideological environment, power relations, policies and contemporary problems. (This course fulfills the department’s international politics requirement). (Cross-listed with PSCI 4280, LLS 4280, LLS 8286)

PSCI 8296 INTERNATIONAL DEVELOPMENT & SUSTAINABILITY (3 credits)
This course introduces students to different concepts of international development through the lens of sustainability. The course explores a broad range of activities related to international development, including international aid, trade, philanthropy, interventions in conflict, peacebuilding, public health, human rights, social justice, and the environment. (Cross-listed with PSCI 4290, CACT 8306)
Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8300 SEMINAR IN POLITICAL THEORY (3 credits)
This course introduces students to the history of political theory, from its origins in ancient Greece to its manifestations in contemporary thought. (Cross-listed with CACT 8200)
Prerequisite(s): Not open to non-degree graduate students.

PSCI 8316 CLASSICAL POLITICAL THOUGHT (3 credits)
This course introduces students to key works representative of premodern political thought. Authors examined may include Plato, Aristotle, Xenophon, Cicero, Augustine, and Aquinas. (Cross-listed with PSCI 4310).
Prerequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8326 EARLY MODERN POLITICAL THOUGHT (3 credits)
This course introduces students to key works of the 16th through mid-18th centuries. Authors examined may include Machiavelli, Hobbes, Hume, Smith and Montesquieu. (Cross-listed with PSCI 4320)
Prerequisite(s): PSCI 2310 or equivalent is recommended.

PSCI 8336 LATE MODERN POLITICAL THOUGHT (3 credits)
This course introduces students to key texts of the mid-18th through 19th centuries. Authors to be examined may include Rousseau, Burke, Mill, Tocqueville, Marx, and Nietzsche. (Cross-listed with PSCI 4330).
Prerequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8345 AMERICAN POLITICAL THOUGHT (3 credits)
This course introduces students to the ideals, ideologies, identities, and institutions of American political thought from the country’s origins to the present. Topics to be covered may include the political thought of the early American settlers and of the founding generation, the debates over the creation and implementation of the Constitution, the 19th century arguments over slavery, the rise of progressivism, the New Deal and its critics, and contemporary American conservatism and liberalism. (Cross-listed with PSCI 3340)
Prerequisite(s): PSCI 2310 is recommended

PSCI 8346 CONTEMPORARY POLITICAL THOUGHT (3 credits)
This course introduces students to leading works of contemporary political thought, including Marx, Spencer, Dahl, Rawls, feminism, and rational choice. The theories, their interrelationships, the theorists, and the manifestations of these works will be discussed and analyzed. (Cross-listed with PSCI 4340)
Prerequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8356 DEMOCRACY (3 credits)
A basic study of theory, practice and practitioners of political democracy, its roots, development, present application and problems and future. (Cross-listed with PSCI 4350)
Prerequisite(s): PSCI 2500 or equivalent is recommended.

PSCI 8366 AUTHORITARIAN REGIMES (3 credits)
An analysis of various types of authoritarian regimes, their differences from democratic governments, and the causes of their establishment, maintenance, and failure. (Cross-listed with PSCI 4360).

PSCI 8376 GENERALS AND POLITICIANS: CIVIL-MILITARY RELATIONS (3 credits)
This course introduces students to civil-military relations and military politics across the globe. (Cross-listed with PSCI 4370).
Prerequisite(s): PSCI 2500 or equivalent is recommended.

PSCI 8476 SOUTH AFRICA & THE SOCIO POLITICS OF APARTHEID (3 credits)
South Africa and the Socio Politics of Apartheid examines the lived experiences of South African people under the Apartheid system, and their long struggle against European colonial oppression and racial segregation throughout the 20th century. Students will examine the laws, tools, and strategies that developed and sustained Apartheid, and the anti-Apartheid movements and international pressure that led to its repeal and South African democratic elections. (Cross-listed with BLST 8476, BLST 4470, PSCI 4470, SOC 8476, SOC 4470).
Prerequisite(s): Graduate standing
PSCI 8500 SEMINAR IN COMPARATIVE POLITICS (3 credits)
This course introduces students to classic and contemporary scholarship on the issues, theories, and methodological approaches associated with the systematic and comparative study of nation-states and their political systems with an emphasis on engaging in thoughtful discussion and individual research.
Prerequisite(s): Not open to non-degree graduate students.

PSCI 8505 EUROPEAN POLITICS (3 credits)
This course introduces students to the political institutions, processes, and public policies of the states of Europe, including the European Union. (Cross-listed with PSCI 3500)

PSCI 8506 GOVERNMENT AND POLITICS OF GREAT BRITAIN (3 credits)
A comprehensive study of contemporary British politics and government. Emphasis will be focused on the formal institutions and informal customs and practices of the British political system. (Cross-listed with PSCI 4500).

PSCI 8526 POLITICS OF FRANCE (3 credits)
This course introduces students to the political heritage of France, contemporary political institutions and problems, and political and policy responses to these problems. (Cross-listed with PSCI 4520)

PSCI 8556 POLITICAL VIOLENCE, INSURGENCY, AND TERRORISM (3 credits)
This course is a survey on the types of violence used within a political context, focusing on its causes, forms and consequences. Specifically, this course details why and how violence occurs, and its impact on institutions and the people operating within that system. (Cross-listed with PSCI 4550).

PSCI 8585 GOVERNMENT AND POLITICS OF RUSSIA AND THE POST-SOVIET STATES (3 credits)
This course introduces students to the political cultures, institutions, processes, and public policies of Russia and the states of the former Soviet Union. (Cross-listed with PSCI 3580)

PSCI 8626 ISLAM AND POLITICS (3 credits)
This course introduces students to the interaction between religion and politics in the Muslim world, covering various political ideologies in the Muslim world and different experiences of Muslim-majority countries such as Saudi Arabia, Pakistan, Iran, Turkey, Indonesia, and Egypt. It will also analyze mainstream and radical transnational Islamic movements. (Cross-listed with PSCI 4620)

PSCI 8645 GOVERNMENT AND POLITICS OF CHINA AND EAST ASIA (3 credits)
This course introduces students to the political cultures, institutions, processes, policies, and other characteristics of China and neighboring states, with reference to other major powers engaged in the region. (Cross-listed with PSCI 3640)

PSCI 8646 ASIAN POLITICS (3 credits)
This course provides students with a broad understanding of Asian Politics with a focus on Northeast Asia (Mainland China, Japan, South Korea, North Korea, and Taiwan) and some emphasis on Southeast Asia (Singapore, Philippines, Thailand, and Vietnam). Students in this course will investigate these Asian societies and discuss their shared history as well as their common political themes, patterns, and connections. Students will explore state institutions, political parties, and state-society relations through the overarching themes of development, democracy, and nationalism. Specific themes include the economic rise of East Asian states, the emergence and development of democracy in the region, and the persistence of authoritarianism. By the end of the course, students will be able to describe, explain, and critically evaluate from a social science perspective the principal political features and processes of these Asian societies and develop their own research projects based on a topic discussed in the course. (Cross-listed with PSCI 4630).
Prerequisite(s): PSCI 2500 or junior standing or permission of the instructor.

PSCI 8665 GOVERNMENT AND POLITICS OF JAPAN AND EAST ASIA (3 credits)
This course introduces students to the political cultures, institutions, processes, policies and other characteristics of Japan and neighboring states, with reference to other major powers engaged in the region. (Cross-listed with PSCI 3660)

PSCI 8685 GOVERNMENT AND POLITICS OF LATIN AMERICA (3 credits)
This course introduces students to the political institutions, processes, and public policies of the states of Latin America. (Cross-listed with PSCI 3680, LLS 3680, LLS 8685)

PSCI 8705 GOVERNMENT AND POLITICS OF THE MIDDLE EAST (3 credits)
This course introduces students to government and politics in the contemporary Middle East, including considerations of state formation, authoritarianism and democratization, state-society relations, religion, culture, gender, and economy. (Cross-listed with PSCI 3700)

PSCI 8716 COMPARATIVE INTERNATIONAL DEVELOPMENT AND INNOVATION (3 credits)
Comparative International Development and Innovation will analyze the rise and fall of civilizations from a historical and theoretical perspective in a comparative manner. The course will address issues concerning political, social, economic, and environmental change in national, and international contexts. Among its major emphases are state institutions, economic growth, entrepreneurship, and the transformation of social structure and culture. (Cross-listed with PSCI 4710, ENTR 4710, ENTR 8716).

PSCI 8776 POLITICAL SOCIOLOGY (3 credits)
This course explores political sociology, focusing on political processes and power. Political sociologists investigate relationships between political institutions and various other institutions, including but not limited to the economy, education, media, and religion, and the impacts that these relationships have on society and the individuals that comprise the society. This course will explore the concepts, theories, and knowledge that comprise this field such as power, legitimacy, the state, networks, stratification, and collective action. (Cross-listed with PSCI 4770, SOC 4770, SOC 8776).
Prerequisite(s): Graduate standing

PSCI 8826 POLITICS AND FILM (3 credits)
This course introduces students to the analysis of politics and film, focusing on how politics is portrayed in film and the politics of film making. (Cross-listed with JMC 4820, JMC 8826, PSCI 4820)

PSCI 8900 READINGS IN POLITICAL SCIENCE (1-3 credits)
This course provides students an opportunity to study an advanced and specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours.
Prerequisite(s): Permission of graduate adviser

PSCI 8910 POLITICAL SCIENCE INTERNSHIP (3 credits)
This course offers students an opportunity to experience the resolution of public issues through direct involvement in career-oriented policy organizations. The host organization must be approved in advance in consultation with the internship coordinator. This course may be repeated for a maximum of six credit hours.
Prerequisite(s): Permission of instructor.

PSCI 8920 SEMINAR IN SPECIAL TOPICS IN POLITICAL SCIENCE (1-3 credits)
This course introduces students to an advanced and specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of twelve credit hours.
Prerequisite(s): Permission of graduate advisor.
PSCI 8926 ADVANCED SPECIAL TOPICS IN POLITICAL SCIENCE (1-3 credits)
This course introduces students to an advanced and specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours. (Cross-listed with PSCI 4920)

PSCI 8950 GRADUATE PROGRAM COMPREHENSIVE ASSESSMENT (0 credits)
This zero-credit-hour course is used to assess the knowledge and skills that are imparted by the Political Science Graduate Program to its students. Graduating must enroll in the class and take the comprehensive exam. The exam will test how students can synthesize knowledge in three subfields of Political Science. The students will get pass/fail grades for the course.
Prerequisite(s): At least 21 credit hours taken, at least 3 subfield seminars taken, and permission of Graduate Program Chair. Not open to non-degree graduate students.

PSCI 8980 RESEARCH IN POLITICAL SCIENCE (3 credits)
This course provides students an opportunity to conduct research in a specialized subject matter in the field of political science. The student must be capable of pursuing a highly independent course of study, which must be approved in consultation with the instructor in advance. This course may be repeated for different topics up to a maximum of six credit hours.
Prerequisite(s): Permission of graduate advisor, not open to non-degree graduate students.

PSCI 8990 THESIS (3-6 credits)
A research project, written under the supervision of a graduate adviser in the Department of Political Science, in which the students establish their capacity to design, conduct and complete an original, independent, scholarly investigation of a high order. The research topic and the completed project must be approved by the student's departmental committee.
Prerequisite(s): Permission of graduate program chair. Not open to non-degree graduate students.

Other Requirements
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, or a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission. TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 105
- The TOEFL or IELTS scores are valid for two years. Your TOEFL or IELTS score must be valid when you submit your application.
- Statement of Purpose: Through your resume, we have a clear sense of your professional path to date. Please respond to the following question in a statement of purpose (maximum 500 words): What are your career goals going forward, and how will the UNO EMIT program help you achieve them?
- Resume: A two page (maximum) abbreviated resume highlighting the candidate's key education and IT related experience is required. This will need to be uploaded with the application.
- Employer Sponsorship: Applicants to the EMIT program are required—regardless of the level of financial support from their employer—to submit a signed sponsorship letter from an authorized representative of their organization, briefly stating the terms of support. Financial sponsorship is not required, but the organization must agree to keep the applicant's travel time to a minimum and completely release them or her from all job responsibilities on class days. Sponsorship letters must be uploaded into the online application system. Independent professionals or consultants and applicants who head their own firms are eligible, though these applicants will have to write their own sponsorship letters.
- Supplemental Questions:
  - Essay 1: UNO's Executive MS in Information Technology (EMIT) program will challenge you by offering a rigorous and innovative academic experience and the opportunity to immediately apply what you learn to your career. How will you approach balancing the demands of the program with your professional and personal life while you are in school? (Maximum 250 words)
  - Essay 2: What is your immediate post-EMIT professional goal? (Maximum 50 characters)
    - Examples of possible responses:
      - "Work as CTO for an insurance company."
      - "Join an IT consulting firm."
      - "Launch a new technology start-up."
  - Interview: Interviews are required for admission to the EMIT program. Once your online application is complete and under review, you may be contacted by a member of the Admissions Office and/or the Director of the EMIT Program to schedule an on-
Degree Requirements

Fall 2023 Requirements

The EMIT curriculum includes course modules on topics that address the following major themes: globalization; data analytics & visualization; information assurance; IT leadership; distributed project management; and IT infrastructure and emerging technologies. Students will take the coursework in the same sequence and as a cohort. Classes will be offered in a variety of flexible and hybrid formats, including on the UNO campus, online via the internet, and in partner locations (when applicable).

Total Credits 30

EMIT 8000 MANAGING & LEADING IN A DIGITAL WORLD (2 credits)
This course introduces Executive Master of Science in Information Technology (EMIT) students to the challenges and opportunities of managing and leading in a digital world within the context of a dynamic environment of technology workforce diversity, a global and emerging collaborative economy, and concern for ethics and social responsibility in the development of systems/technologies.
Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8050 IT LEADERSHIP (2 credits)
This course equips students with the knowledge, skills and tools to be an effective information technology (IT) leader. The primary focus of the course is on developing leadership capability and ability to contribute, both strategically and operationally, to the performance of an organization through IT.
Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8100 IT STRATEGY AND CHANGE MANAGEMENT (2 credits)
This course introduces students to a critical view of both strategic and tactical levels of IT management. The course also addresses the challenges of managing IT-enabled change and the complexities associated with managing people, processes, and technology.
Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8150 BIG DATA ANALYTICS AND VISUALIZATION (2 credits)
This course introduces students to data analytics including big data analytics, data quality, and visualization. Topics will include concepts, exercises, tools and techniques surrounding data analytics, quality, visualization, IoT and cloud computing within the context of addressing business challenges and/or to create competitive advantage.
Prerequisite(s): This course is intended exclusively for IT professionals in the EMIT program. Not open to non-degree graduate students.

EMIT 8200 MANAGING INFORMATION TECHNOLOGY INNOVATION (2 credits)
This course introduces students to concepts, applications and tools for facilitating IT Innovation, Creativity, Entrepreneurship and Risk Taking.
Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8250 MANAGING INFORMATION ASSURANCE (2 credits)
This course introduces Executive Master of Science in Information Technology (EMIT) students to information assurance topics including areas such as managing cloud and mobile security, IT governance and policy, and information assurance planning and deployment.
Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8300 SYSTEMS DEVELOPMENT AND MAINTENANCE (2 credits)
This course introduces Executive Master of Science in Information Technology (EMIT) students to the development and maintenance of software-intensive systems.
Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8350 ENTERPRISE COMPUTING IN THE ERA OF BIG DATA (2 credits)
This course explores design, managerial and technical issues relevant to creating big data based solutions from a holistic viewpoint. Students will develop an understanding of both the technical and business aspects by exploring a balanced view of the theoretical foundation and practical implications of Enterprise Computing in the context of Big Data and other related (emerging) technologies.
Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8400 LEADING TEAMS AND MANAGING VIRTUAL WORK (2 credits)
This course introduces students in the Executive Master of Science in Information Technology (EMIT) program to fundamental concepts, principles, theories, and practices related to organizational teamwork. Students will learn and practice skills to run productive & effective collaborative problem solving efforts, using modern collaboration technology.
Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

EMIT 8450 EVALUATION OF ENTERPRISE I.T. (2 credits)
This course introduces students to concepts associated with evaluation of enterprise IT investments. Topics addressed will include understanding financial statements, IT investment value vs risk tradeoffs, understanding cost of adopting IT innovations and/or emerging technologies, designing reports, designing of IT-KPIs, performance measurement systems such as balanced scorecard and more.
Prerequisite(s): Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.

Admission to the executive Master of Science in IT (EMIT) program. Not open to non-degree graduate students.
EMIT 8500 MANAGING AND LEVERAGING EMERGING TECHNOLOGIES (2 credits)
This course introduces Executive Master of Science in Information Technology (EMIT) students to industry models and processes to identify, track, pilot and eventually adopt business innovations and/or emerging technologies that could provide an advantage for a business. Students will also learn how IT can facilitate business process change. Concepts and exercises surrounding Lean IT will be covered to optimize the processes in the IT organization.

Prerequisite(s): Admission to the Executive Master of Science in Information Technology (EMIT) program. Not open to non-degree graduate students.

EMIT 8700 EMERGING CHALLENGES FOR IT EXECUTIVES (2 credits)
This course introduces Executive Master of Science in Information Technology (EMIT) students to emerging challenges that will be faced by IT executives.

Prerequisite(s): Admission to the Executive Master of Science in Information Technology (EMIT) program. Not open to non-degree graduate students.

EMIT 8990 INTEGRATED EMIT CAPSTONE PROJECT (2 credits)
This course serves as the integrated capstone project for the Executive Master of Science in Information Technology (EMIT) program.

Prerequisite(s): Admission to the Executive Master of Science in Information Technology (EMIT) program and completion of all cohort modules prior to submission of integrated project. Concurrent enrollment with other EMIT modules will be required. Not open to non-degree graduate students.

Computing & Information Science, PhD

College of Information, Science & Technology

Vision Statement
The PhD program in computing and information science at the University of Nebraska Omaha (UNO) is a research-intensive, multidisciplinary program focused around the core areas of computer science, management information systems and interdisciplinary informatics.

Other Program Related Information

Student Learning Outcomes
Upon completion of a PhD in Computing and Information Science:

• Students will be able to interpret and synthesize research literature from multiple areas of the IT discipline.
• Students will be able to identify open research questions and design appropriate approaches to investigate them.
• Students will demonstrate the ability to contribute to scholarly literature.
• Students will be able to effectively engage students in learning about IT content.

Admissions

Applicants with an earned undergraduate or graduate degree in a computing discipline (e.g., computer science, management information systems, bioinformatics, cybersecurity or a closely related discipline) can apply for admission to the PhD program. Applicants whose prior degrees are outside of a computing discipline are encouraged to discuss their interests with the program director prior to application.

Admission decisions are based on a holistic review of application materials by the College of IS&T’s Doctoral Program Committee (DPC). During this review process the committee is looking for candidates that demonstrate:

• Technical Interest. Our program is a PhD in computing & information science. As such, you will be expected to demonstrate an interest and aptitude in computing that fits with the nature of our program.
• Prior Experience with Research. A PhD is fundamentally a research degree. Highlight your involvement in existing research projects, thesis work, and/or publications. Be specific about the roles you played in various projects in your statement of purpose and seek reference letters from those who can speak to your research experience and potential.
• Alignment with UNO Faculty Expertise. Alignment of your research interests with the expertise of graduate faculty in the College of IS&T is an important consideration during admissions in order to ensure successful applicants will have access to appropriate research mentors from the start of the program. Review IS&T faculty profiles on the web, identify specific research areas that interest you in your statement of purpose, and explicitly mention faculty names with whom you see a good match. Feel free to reach out via email to our faculty prior to submitting your application to discuss your interest.
• Independence and Initiative. A PhD is largely self-motivated and self-directed work. As such, successful PhD applicants should demonstrate a history of taking the initiative to perform beyond expectations and work independently.
• Proficiency in Written and Verbal English Communication. The ability to read, comprehend and write scholarly papers is key to success as a doctoral student.

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024 and Fall 2024)
• Fall: January 15
• Spring: September 15

NOTE: All materials, including recommendation letters, transcripts, and applicable test scores, must be received by the application deadline. Applications which are incomplete after the published deadline will not be reviewed.

Other Requirements

• Entrance Exam: Graduate Record Examination (GRE) scores are required for most applicants but are only one component of a holistic admission decision. Successful applicants have typically had GRE scores of 150 verbal and 160 quantitative or better. The GRE requirement may be waived for exceptional applicants subject to the GRE waiver procedures documented below.
  • The GRE may be automatically waived for applicants holding a master’s degree from an accredited US institution provided that (1) the degree is in a computing discipline and (2) that the graduate GPA for that degree is 3.3 or higher.
  • A GRE waiver may also be requested for candidates meeting one or more of the conditions below.
    • Those who hold a bachelor’s degree in a computing discipline from an accredited US institution with a GPA of 3.6 or higher.
• Those with a minimum of 5 years of professional experience in the IT industry in the United States.
• Those with a history of high-quality, peer-reviewed publications in a computing field who have made significant contributions to the authorship of those papers.
• GRE waiver requests must be submitted to the Doctoral Program Committee Chair using the form located on the program website along with supporting documentation. Requests must be received at least 1 month prior to the published application deadline for the applicable term. Note that eligibility to apply for a GRE waiver does not guarantee it will be granted, and waivers will only be approved by the DPC in cases where the candidate’s record permits an evaluation of their research potential without reference to GRE scores.

• **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.

• Internet-based TOEFL: 90, IELTS: 7.0, PTE: 61, Duolingo: 120

• **Statement of Purpose:** A written statement (not to exceed two single-spaced pages) which addresses the following:
  - How is a PhD in computing & information science going to advance your career?
  - Why is UNO the right place for you to pursue doctoral studies?
  - In answering the questions above the statement should:
    • Describe your research interests and how they align with the work of current IS&T faculty members.
    • Describe any relevant technical knowledge/skills or professional experiences that relate to the research you hope to conduct in computing and information science.
    • Describe your prior research experiences. If you have participated in collaborative research, what was your role on those projects?
    • Lastly, if you have included optional supporting materials as part of your application, explain them.

• **Current resume or CV:** In addition to listing prior academic accomplishments and professional positions, please include complete citations for all prior authored academic publications if applicable.

• **Letters of Recommendation:** Three letters of recommendation are required. The best recommendation letters are from those who can give an in-depth evaluation of your strengths and weaknesses with respect to academic work.

  • We strongly recommend that at least one letter writer be able to speak directly about your prior research experiences.
  • Letters must be submitted directly to the application system by the letter writers. The DPC reserves the right to verify the content of recommendation letters with their authors.

• **Transcripts:** Transcripts from all higher-education institutions previously attended are required.

• **Optional Supporting Materials:** Applicants are encouraged to include a PDF portfolio of supporting materials that may provide additional evidence of research potential. This may include:
  • Copies of academic papers, publications, theses or project reports done in an academic or industrial setting
  • Documentation of technical accomplishments like a portfolio of significant software development projects
  • Documentation of certifications or other forms of micro-credentials not otherwise reflected on transcripts
  • Other materials you would like to share with the committee

### Admission Process and Timeline
Eligible students who request a GRE waiver must do so no later than one month prior to the published program application deadline for the term. These requests will be reviewed by the DPC, and applicants will be notified via email of the GRE waiver outcome prior to the admission deadline.

Following the admission deadline, the DPC will begin review of all complete applications. It is the applicant’s responsibility to ensure all materials are available for review (including reference letters, transcripts, and others supporting materials) in the admission system by the deadline. Incomplete applications will not be considered by the committee.

Candidates identified for further consideration may be invited by the committee to take part in an interview with a small group of faculty to learn more. These interviews are usually conducted within 4-8 weeks following the application deadline. Final admission decisions are usually made within 2-3 weeks following those interviews.

### Degree Requirements

#### Coursework

The PhD in computing & information science program requires 90 credit hours of graduate-level studies. The coursework taken by a student is entered into a plan of study that must be approved by the doctoral program committee before the beginning of the PhD student’s second year of studies. The coursework consists of foundation courses, doctoral seminar and colloquia, a major field of study, and the dissertation. General rules applying to all plans of study include:

• Undergraduate course credits taken at UNO or another institution cannot be counted toward the PhD degree in computing & information science.
• Dual-listed undergraduate courses ending in 8xx5 cannot be counted as course credits in the PhD program.
• Only three courses ending in 8xx6 are allowed outside the Foundation Course section of a plan of study.
• Graduate internship credit (CSCI 8950, ISQA 8910, CYBR 8910, or equivalent) may not be used in a doctoral plan of study.
• A maximum of three directed study type courses may be counted in the plan of study, including CIST 9970, CIST 9980, masters-level independent study courses, or other equivalents.

The different categories of credit-hour requirements for the program are outlined below.

#### Foundation Courses 24 credit hours

Foundation courses constitute any of the courses offered in the master’s degree in a computing-related field (e.g.: computer science, management information systems, cybersecurity, IT innovation).

Credit for graduate computing-related coursework in a prior degree may only be used to satisfy foundation course hours in the plan of study. A grade of B- or better is required in all coursework from a prior degree applied to foundation requirements, and thesis, thesis-equivalent project, independent study credits, or their equivalents from a prior degree may not be counted towards foundation requirements.

#### Core Courses 12 credit hours

ITIN 9300 SOCIAL COMPUTING AND ITS APPLICATIONS
or a concentration-designated research methods course for students in a concentration
or an alternate course with faculty advisor and DPC approval
(8xx0 or 9xxx level only)

A Graduate-Level Statistics Course, selected from
ISQA 8160 APPLIED DISTRIBUTION FREE STATISTICS
ISQA 8340 APPLIED REGRESSION ANALYSIS
ISQA 9130 APPLIED MULTIVARIATE ANALYSIS
or an alternate course with faculty advisor and DPC approval
(8xx0 or 9xxx level only)

Total Credits 12

Major Field of Study 18 credit hours
Coursework in the major field of study provides students the advanced study needed to develop an in-depth knowledge of their chosen field of research. For students who have indicated a concentration within their PhD in computing & information science plan of study, this comprises the concentration credit hours. At least three courses (9 hours) must be in 9000-level graduate courses. The remaining courses should include at least one 8000-level graduate-only course.

Electives 12 credit hours
Selected in consultation with your faculty advisor.

Dissertation 24 credit hours
90 Total credit hours
Comprehensive Examination & Admission to Candidacy
Comprehensive exams will typically be scheduled around the middle of the fall and spring semester, as needed. Students intending to take comprehensive exams must apply to do so at least one semester prior to the term in which they plan to take the exam. Comprehensive exams may not be taken without an approved plan of study in place and the student has completed all core coursework in the plan. Typically, the comprehensive exam will be administered between the fourth and sixth semesters of study in the PhD program (not including summers).

Comprehensive exams consist of three parts. Parts one and two must be completed within the same week, but may be scheduled on non-consecutive days.

• Part 1: Written Breadth Examination (one day)
  • When applying for the comprehensive examination, the student will select one area-of-interest on which to be tested from the list of available breadth examination areas published on the PhD in computing & information science program website. The area will specify a reading list of publications from which the student should prepare. Reading lists may be updated by faculty annually and must be updated after three years. Lists to be used in breadth exams the subsequent academic year will be posted online in April. Graduate faculty members responsible for each selected area of interest will prepare four essay style questions to be answered based on the published reading list.
  • Student responses to the breadth questions will be assessed by at least two graduate faculty members from each corresponding area of interest, excluding the student’s direct faculty advisor.

• Part 2: Written Depth Examination (one day)
  • When applying for the exam, students without an approved dissertation committee must name a depth examining committee. This committee shall consist of the student’s faculty advisor and at least two graduate faculty members from IS&T with relevant expertise in the student’s intended area of research. For students with an approved dissertation committee on file, that committee will serve in this capacity.
  • The student and their faculty advisor will prepare a personal reading list of publications aligned with the student's intended dissertation research specialization. This reading list should be finalized no later than when the student applies to take the comprehensive exam.
  • The faculty advisor, in consultation with other depth examining committee members, will prepare a minimum of two essay questions that assess the student’s depth of knowledge in their individual research trajectory.
  • Responses to depth questions will be assessed by the student’s depth examining committee members.

• Part 3: Oral Examination
  • Prior to taking either part of the written exam, the student will prepare and submit a research pre-proposal about their intended dissertation focus to their depth examining committee members. Details about the structure and content of the pre-proposal can be found on the PhD in computing & information science program website.
  • Within two weeks of being notified of a passing result on parts one and two of the comprehensive examination, the student will give a brief presentation (approximately 20 minutes) of their research pre-proposal to their depth examining committee members, followed by a question and answer period.
  • Students receiving a failing result on either part one or two of the exam may not proceed to the oral examination.

Faculty members assessing the different components of the exams will be responsible for communicating a strictly pass/fail result to the DPC. A student may not be asked to revise any part of their examination after submission. Should the student fail one or more part of the comprehensive exam, they may be allowed to re-take it during the following academic term upon specific recommendation by the DPC. For students who fail only one area of the breadth exam, retaking only the deficient area will be required with appropriate adjustments for breadth exam time limits. However, a student may only attempt comprehensive exams a maximum of two times.

Upon successfully completing all three parts of the comprehensive examination and meeting the general residency requirements outlined in the Graduate Catalog, the student will advance to candidacy and should file the necessary paperwork with graduate studies.

Dissertation
Dissertation Committee
Students must establish their full dissertation committee no later than the end of the semester when they complete their comprehensive examination. Makeup of the dissertation committee is subject to general Graduate College rules governing dissertation committees. For purposes of the computing and information science program, all graduate faculty members in the College of Information Science & Technology are considered internal to the student’s academic program.

Dissertation Credits
The dissertation of a PhD candidate is supervised by the chair or co-chairs of the student’s dissertation committee in consultation with other members of the committee. While working on his or her dissertation, the candidate should take hours for the course CIST 9990. A minimum of 24 hours of this course is required for graduation. Dissertation course credits
should be taken only after the PhD student has passed all elements of the comprehensive exam and advances to candidacy.

IMPORTANT NOTE: A minimum of seven months must elapse between the date of the PhD student’s advancement to candidacy and the date of his or her dissertation defense.

**Dissertation Proposal**
Students must formally propose their dissertation to their approved dissertation committee. A written proposal should be prepared under the guidance of the dissertation committee, and a public oral defense of the proposal should be scheduled with the committee members allowing for sufficient time to review the written document. The result of the proposal defense should be recorded on the appropriate form by the dissertation committee and submitted to DPC. To ensure timely progress in the program, the proposal milestone should be completed no later than when students have accumulated 12 hours of CIST 9900.

**Scheduling Dissertation Defense**
When the dissertation committee deems it appropriate for the PhD candidate to defend their dissertation, the PhD candidate should prepare a dissertation and submit it to the dissertation committee members. While submitting the dissertation to the dissertation committee, the candidate should also submit a final oral exam form to the Office of Graduate Studies. The final oral exam form requires the signatures of the dissertation committee members and the doctoral program committee chair, and should be submitted at least four weeks before the desired date of the public dissertation defense. Dissertation committee members should sign this form after receiving the final draft of the dissertation.

IMPORTANT NOTE: Before scheduling the dissertation defense, the student should refer to the Office of Graduate Studies website and/or the current Graduate Catalog for the graduation checklist, dissertation filing deadlines and commencement dates for the semester in which they plan to graduate. Be sure to apply to graduate in MovLINK prior to the deadline.

**Teaching Requirement**
PhD students are encouraged to teach at least one course in the College of IS&T at the undergraduate level as instructors of record during their PhD studies. Students typically will complete this requirement in their second or third year of studies. Further information about qualifications, timing, and funding related to teaching assignments can be found on the program website.

Electives, selected from

- CMST 8196 COMPUTER-MEDIATED COMMUNICATION
- CSCI/ITIN 8266 USER EXPERIENCE DESIGN
- ISQA 9010 FOUNDATIONS OF INFORMATION SYSTEMS RESEARCH
- ITIN 8300 RESEARCH FOUNDATIONS
- ITIN 8220 DESIGN PROCESS
- ITIN 9300 SOCIAL COMPUTING AND ITS APPLICATIONS
- SOC 8060 QUALITATIVE METHODS

Other elective courses can be considered with faculty advisor, concentration, and DPC approval.

Total Credits: 18

* If not used as an HCC elective, SOC 8060 or ITIN 8300 can satisfy the IT PhD core requirement for a research methods course for students in the HCC concentration.
* Any required course completed while pursuing a master's degree may be substituted with any of the concentration electives.

Electives

Select 9 elective hours from below, with at least one elective at 9xxx level

- CIST 9900 SPECIAL TOPICS IN INFORMATION TECHNOLOGY
- ISQA 9020 TECHNICAL AND PROCESS ISSUES IN INFORMATION SYSTEMS RESEARCH
- ISQA 9030 BEHAVIORAL AND ORGANIZATIONAL ISSUES IN INFORMATION SYSTEMS
- PSYC 9070 PROSEMINAR: COGNITIVE PSYCHOLOGY
- PSYC 9630 LEADERSHIP THEORIES AND RESEARCH
- CSCI 8710 MODERN SOFTWARE DEVELOPMENT METHODOLOGIES
- CSCI 8790 ADVANCED TOPICS IN SOFTWARE ENGINEERING

Other elective courses may be selected with the by approval of the student’s supervisory committee.

* Any required course completed while pursuing a master's degree may be substituted with any of the concentration electives.

Academic Performance

Progress Report

Every doctoral student (full time or part time) and must complete an annual Progress Report in consultation with their faculty advisor. These forms must be submitted for review by the Doctoral Program Committee to assess the student’s progress in the program and track program level Student Learning Outcomes. Students will report on their completion of program milestones, outcomes of teaching assignments, and publications or measures of scholarly output. An electronic copy of the current form is available on the IT PhD program website.

The DPC will review progress reports and provide the student and their faculty advisor with a written assessment of progress. Any items of concern identified in this written assessment should be addressed in a timely manner by the student and their faculty advisor to ensure continued satisfactory progress in the program. If the DPC deems progress as not satisfactory, the student will be placed on probationary status and the student will be ineligible for funding as a graduate assistant. Students placed on probation must complete an additional progress report in the next semester updating DPC of their progress. After one semester on probation, a student whose performance has not improved will be recommended for dismissal by the Graduate College.

If student progress reports are not completed by the specified deadline, an advising hold will be placed on the student record and the student will be contacted and given an opportunity to submit the progress report within five days of being notified. If no progress report is received, the student’s progress will be considered unsatisfactory and they may lose their funding and be counseled out of the PhD program.

CIST 9040 COLLOQUIUM ON IT RESEARCH (1 credit)
The purpose of the course is to provide a forum for interaction among doctoral students and faculty on topics of relevance to professional success as researchers. Topics to be discussed include: nature of research in information technology; research problem selection, development, and presentation with special emphasis on the doctoral dissertation; dissertation process; development and crafting of papers for journals; collaboration on research projects; and review process for journal papers. Prerequisite(s): Admission to PhD program in Information Technology or permission of instructor.

CIST 9050 COLLOQUIUM ON IT TEACHING (1 credit)
The purpose of the course is to provide a forum for interaction among doctoral student and faculty on topics of relevance to professional success as teachers/educators in university settings. Topics to be discussed include: issues and challenges of teaching; getting started in teaching; course preparation; teaching methods; assessment of students; on-going course development; diversity in the classroom; use of technology in teaching including online education; and developing and maintaining a teaching portfolio. Prerequisite(s): Doctoral students in Information Technology and Biomedical informatics. Students from doctoral programs across the University of Nebraska are welcome to register with permission of instructor. Not open to non-degree graduate students.
CIST 9060  COLLOQUIUM ON IT PROFESSION AND ETHICS (1 credit)
The purpose of this course is to provide a forum for interaction among doctoral students and faculty on topics of relevance to professional success as members of the academy. Some of the topics to be discussed will include: ethics and professional code of conduct; strategies for dealing with academic dishonesty/plagiarism; academic and professional organizations in the IT profession (e.g., IEEE, ACM, AIS, PMI, AITP); challenges of human subjects research; developing survival skills: balancing teaching and research, etc.; career development and progression; and role and nature of local, national, and international service.
Prerequisite(s): Any IS&T PhD student is eligible to attend; other doctoral students can attend with permission of instructor. Not open to non-degree graduate students.

CIST 9080  RESEARCH DIRECTIONS IN I.T. (3 credits)
The purpose of this course is to provide a forum for interaction among doctoral students and faculty on topics of relevance to IT research and make them familiar with current and future research directions in IT. Students will examine what constitutes a research contribution, gain hands-on experience with directed research, and explore the breadth of sub-disciplines within IT research.
Prerequisite(s): Doctoral standing in Information Technology or permission of course coordinators. Not open to non-degree graduate students.

CIST 9100  SEMINAR ON READINGS IN IT (1 credit)
Seminars focused on IT literature within a topic area aligned with PhD in IT concentrations, providing opportunity for in-depth review and discussion of materials in the concentration reading list. Provides exposure to current topics, research methods, and professional practice for the concentration.
Prerequisite(s): Open to all currently admitted PhD students and other graduate students by instructor permission. May be repeated up to 3 times for credit in Major Field of Study, and up to 3 times as an elective.

CIST 9900  SPECIAL TOPICS IN INFORMATION TECHNOLOGY (3 credits)
This course is designed to acquaint students with issues which are current to the field or emerging trends in the information technology area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.
Prerequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular topic offerings.

CIST 9970  RESEARCH OTHER THAN THESIS (1-3 credits)
This is a directed research course enabling students to pursue a research topic individually under the direction of a graduate faculty member. Research problems should help introduce students to practical research methods in the field of computing, and they should be framed in such a way to enable the student to complete the work in the course of one semester.
Prerequisite(s): Requires instructor permission. Only open to doctoral students in the IT PhD program. Course cannot be taken for credit after candidacy nor count towards core/major field of study requirements in the IT PhD. Not open to non-degree graduate students.

CIST 9980  INDEPENDENT STUDY IN INFORMATION TECHNOLOGY (1-3 credits)
This course allows students to conduct an in-depth study of a specific topic of their interest that is not available in a formal course. The topic to be studied must be agreed upon by the student and the instructor, including a structured schedule and grading criteria, and should be distinct from students' thesis work or Research Other Than Thesis (CIST 9970) course credits.
Prerequisite(s): Requires instructor permission. Only open to doctoral students in the IT PhD program. Not open to non-degree graduate students.

CIST 9990  DISSERTATION (1-12 credits)
The dissertation is an original research project conducted and written under the direction of a faculty supervisory committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge in information systems and/or information technology.
Prerequisite(s): Admission to the Ph.D. program in Information Technology. Admission to candidacy for the Ph.D. degree. Prior to enrolling for dissertation hours, the students must have permission of the supervisory committee. Not open to non-degree graduate students.

CSCI 8000  ADVANCED CONCEPTS IN PROGRAMMING LANGUAGES (3 credits)
Logic/Declarative programming is an important programming paradigm in which problems are described in terms of the properties they possess. As a result, in this style of programming many algorithmic elements, which explicitly must be articulated when writing programs in other programming languages, can be omitted. Core elements of logic programming play important roles in AI.
Prerequisite(s): CSCI 3320; CSCI 3660; CSCI 4220. Not open to non-degree graduate students.

CSCI 8010  FOUNDATIONS OF COMPUTER SCIENCE (3 credits)
This is a foundational course for students enrolled in the graduate program in computer science. The objectives are to introduce students to a large body of concepts so that they are better prepared for undertaking the core courses in the graduate program. It is assumed that student would have programmed in a high-level language and have exposure to basic college level mathematical concepts such as logarithms, exponents, sequences, and counting principles.
Prerequisite(s): Students are expected to have written programs using a high-level programming language and should understand basic mathematical concepts including exponents, logarithms, sequences, and counting principles. Not open to non-degree graduate students.

CSCI 8016  INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)
This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with MATH 4010, MATH 8016, CSCI 4010).
Prerequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

CSCI 8040  LARGE SCALE NETWORK ANALYSIS ALGORITHMS (3 credits)
The course will provide a review of the properties of large complex network systems, such as those occurring in social networks, epidemiology and biological systems. We will discuss algorithms to analyze these properties, their implementations, their stability under information fluctuation and how information spreads through networks.
Prerequisite(s): Students should be comfortable with programming, have knowledge of data structures, preliminary graph algorithms, & linear algebra. Suggest Prep Courses: CSCI 4150 or CSCI 8156; CSCI 3320; MATH 4050 or Permission. Not open to non-degree graduate students.
CSCI 8050 ALGORITHMIC GRAPH THEORY (3 credits)
The overall goal is to introduce advanced concepts in graph theory, graph modeling, and graph algorithms and how they can be used to solve a wide range of problems in various application domains. The course introduces students to several applied path algorithms, clustering and partitioning techniques, network flow algorithms, and weighted matching algorithms. Other advanced concepts associated with complex networks include node centralities in graphs and community detection approaches. The course will also introduce students to key classes of graphs with a particular focus on the main classes of Perfect Graphs and their applications in scheduling, chip design, mobile computing, and Biomedical Informatics. (Cross-listed with MATH 8050).
Prerequisite(s): CSCI 3320 or CSCI 8325 and MATH 4150 or MATH 8156 or permission of instructor. Not open to non-degree graduate students.

CSCI 8060 ALGORITHMIC COMBINATORICS (3 credits)
This course includes classical combinatorial analysis graph theory, trees, network flow, matching theory, external problems, and block designs. (Cross-listed with MATH 8060).
Prerequisite(s): MATH 3100, CSCI 3100, MATH 8105 or CSCI 8105 or instructor's permission.

CSCI 8080 DESIGN AND ANALYSIS OF ALGORITHMS (3 credits)
The course provides students with an understanding of advanced topics in algorithms. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, dynamic programming, greedy algorithms, graph algorithms, and the theory of NP-Completeness. (Cross-listed with MATH 8080).
Prerequisite(s): CSCI 3320 or CSCI 8325 or equivalent. Not open to non-degree graduate students.

CSCI 8105 APPLIED COMBINATORICS (3 credits)
Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion, Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with MATH 8105, MATH 3100, CSCI 3100).

CSCI 8110 ADVANCED TOPICS IN ARTIFICIAL INTELLIGENCE (3 credits)
An in-depth study of one or more topics selected from: search techniques, knowledge representation, knowledge programming, parallel processing in Artificial Intelligence, natural language processing, image processing, current and future directions, etc. May be repeated with different topics, with permission of adviser.
Prerequisite(s): CSCI 4450 or CSCI 8456 or equivalent.

CSCI 8150 ADVANCED COMPUTER ARCHITECTURE (3 credits)
This course will provide an in-depth understanding of the key architectural concepts governing the design of state-of-the-art high-performance computers. It will introduce methods that are commonly used to trade-off the various architectural choices to design systems with the desired cost-performance requirements. The course will provide a systems level perspective to design. The emphasis will be on the cache, memory and I/O subsystems, system interconnects leading to distributed shared-memory multiprocessor systems. Multiprocessor clusters based on message passing and high-performance processor architecture will be covered. The course will also provide a brief overview of emerging system architectures including quantum computing and those used to facilitate machine learning applications.
Prerequisite(s): CSCI 4350, CSCI 4500 or equivalent with permission of the instructor. Not open to non-degree graduate students.

CSCI 8156 GRAPH THEORY & APPLICATIONS (3 credits)
Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 4150, MATH 4150, MATH 8156).
Prerequisite(s): MATH 2030 or permission of instructor.

CSCI 8160 INTRODUCTION TO VLSI DESIGN (3 credits)
Introduction to the principal concepts of integrated circuits layout. Presentation of the hardware foundations, algorithmic mathematical and graph theoretical foundations of circuit layout. Topics discussed in digital design and computer architecture classes are studied at the actual layout design level such as datapath subsystems and array subsystems. Design methodology tools and testing. Hardware descriptions languages.
Prerequisite(s): CSCI 3320 or CSCI 8325, CSCI 3710 and CSCI 4350 or CSCI 8356. Not open to non-degree graduate students.

CSCI 8206 NUMERICAL METHODS (3 credits)
This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 4200, MATH 4200, MATH 8206).
Prerequisite(s): MATH 1970 and MATH 2050 and MATH 2350 with a C- or better or permission of instructor.

CSCI 8210 ADVANCED COMMUNICATIONS NETWORKS (3 credits)
Advanced study of communication networks, analysis of communication needs, special problems encountered in different types of networks, efficiency and traffic analysis and emerging hardware and software technologies. Detailed "hands-on" study of the TCP/IP networking protocols.
Prerequisite(s): CSCI 3550 or 8555 or equivalent. Not open to non-degree graduate students.

CSCI 8256 HUMAN COMPUTER INTERACTION (3 credits)
Human computer interaction is concerned with the joint performance of tasks by humans and machines; human capabilities to use machines (including learnability of interfaces); algorithms and programming of the interface; engineering concerns that arise in designing and building interfaces; the process of specification, design, and implementation of interfaces; and design trade-offs. (Cross-listed with CSCI 4250).

CSCI 8266 USER EXPERIENCE DESIGN (3 credits)
User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, ITIN 4260, ITIN 8266).

CSCI 8300 IMAGE PROCESSING AND COMPUTER VISION (3 credits)
This course introduces the computer system structures and programming methodologies for digital image processing and computer vision. The course will cover the mathematical models of digital image formation, image representation, image enhancement and image understanding. Techniques for edge detection, region growing, segmentation, two-dimensional and three-dimensional description of object shapes will be discussed. The course will concentrate on the study of knowledge-based approaches for computer interpretation and classification of natural and man-made scenes and objects.
Prerequisite(s): CSCI 1620 and CSCI 3320. Not open to non-degree graduate students.

CSCI 8306 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)
This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, MATH 4300, MATH 8306).
Prerequisite(s): MATH 2050 with a C- or better or permission of instructor.
CSCI 8316 PROBABILITY OPERATIONS RESEARCH MODELS (3 credits)
This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queuing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, MATH 4310, MATH 8316).
Prerequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

CSCI 8325 DATA STRUCTURES (3 credits)
This is a core that will cover a number of data structures such as tree, hashing, priority queues and graphs as well as different algorithm design methods by examining common problem-solving techniques. (Cross-listed with CSCI 3320)

CSCI 8326 COMPUTATIONAL OPERATIONS RESEARCH (3 credits)
Survey of computational methods used in the solution of operations research problems. Some topics may include scripting to guide optimization software, constraint programming, heuristics and metaheuristics for optimization, basic machine learning algorithms, and simulation. (Cross-listed with MATH 4320, MATH 8326, CSCI 4320).
Prerequisite(s): MATH 3200 or CSCI 1620, and MATH 4300 each with a grade of C- or better or permission of instructor.

CSCI 8340 DATABASE MANAGEMENT SYSTEMS II (3 credits)
This course is an in-depth coverage of database management systems. Students will learn important principles of query processing and query optimization, transaction processing, and various database systems architectures. After taking this course, students should also be able to identify useful resources to explore future developments in the area of database management systems.
Prerequisite(s): CSCI 4850 or CSCI 8856. Not open to non-degree graduate students.

CSCI 8350 DATA WAREHOUSING AND DATA MINING (3 credits)
This course is an in-depth coverage of data warehousing and data mining. This course starts with coverage of data warehousing (an enabling technology for data mining) and covers the entire data mining process and various data mining functionalities in detail. Students will get a chance to practice knowledge learned in the course to complete term projects related to data warehousing and/or data mining. After taking this course, students should also be able to identify useful resources to explore future developments in the area of data warehousing and data mining.
Prerequisite(s): CSCI 4850 or CSCI 8856. Not open to non-degree graduate students.

CSCI 8360 MACHINE LEARNING FOR TEXT (3 credits)
This course focuses on the fundamental techniques for extraction of various insights from text data which is ubiquitous on the Web, social media sites, emails, news articles, digital libraries, and other sources. The course topics will include concepts and techniques used by search engines to crawl, index, and rank web pages on the Web, machine learning techniques for categorization of news articles into different categories, sentiment and opinion analysis of social media chats, text summarization, and information extraction.
Prerequisite(s): Not open to non-degree graduate students.

CSCI 8366 FOUNDATIONS OF CYBERSECURITY (3 credits)
Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 4360, CYBR 8366)
Prerequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CSCI 8390 ADVANCED TOPICS IN DATABASE MANAGEMENT (3 credits)
This course is an in-depth coverage of well-selected topic(s) in recent development of database management systems. Since new developments in DBMS are very diverse, when each time when this course is offered, it will focus on one or more specific topics, and the course can be taken multiple times for credit.
Prerequisite(s): CSCI 4850 or CSCI 8856. Not open to non-degree graduate students.

CSCI 8400 ADVANCED COMPUTER GRAPHICS (3 credits)
Computer graphics continues to play an important role in computer science. This course covers the mathematical foundations of three-dimensional representation and animation; ray tracing and path tracing rendering methods; using the graphical processing unit (GPU) for real time applications; and concludes with simulation of natural phenomenon.
Prerequisite(s): Bachelors degree or permission from the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8410 DISTRIBUTED SYSTEMS AND NETWORK SECURITY (3 credits)
The course aims at understanding the issues surrounding data security, integrity, confidentiality and availability in distributed systems. Further, we will discuss various network security issues, threats that exist and strategies to mitigate them. This course will cover topics in cryptography, public key infrastructure, authentication, hashing, digital signatures, ARP protection, IP and IPSEC, IP Tables, SSL/TLS, firewalls, etc. (Cross-listed with CYBR 8410).
Prerequisite(s): CSCI 8366 or equivalent(s). Not open to non-degree graduate students.

CSCI 8420 SOFTWARE ASSURANCE (3 credits)
Software assurance is a reasoned, auditable argument created to support the belief that the software will operate as expected. This course is an intersection of knowledge areas necessary to perform engineering activities or aspects of activities relevant for promoting software assurance. This course takes on a software development lifecycle perspective for the prevention of flaws. (Cross-listed with CYBR 8420).
Prerequisite(s): CSCI 8856 OR by permission of the Instructor. Not open to non-degree graduate students.

CSCI 8430 TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT (3 credits)
This course examines in detail: the principles of a security architecture, access control, policy and the threat of malicious code; the considerations of trusted system implementation to include hardware security mechanisms, security models, security kernels, and architectural alternatives; the related assurance measures associated with trusted systems to include documentation, formal specification and verification, and testing, and approaches that extend the trusted system, into applications and databases and into networks and distributed systems.
Prerequisite(s): CSCI 8366 or equivalents, or instructor permission. Not open to non-degree graduate students.

CSCI 8440 INTRODUCTION TO PARALLEL COMPUTING (3 credits)
This course is an introduction to parallel computing, that is using multiple processors to execute algorithms. Topics discussed include: classification of parallel computers; shared-memory versus message passing; forms of parallelism; measures of performance; designing parallel algorithms; parallel programming and parallel languages; synchronization constructs; and operating systems for parallel computers. (Cross-listed with CSCI 4440).
Prerequisite(s): CSCI 4500, which may be taken concurrently, with C- or better.
CSCI 8450 ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING (3 credits)
The course will provide in depth study of the topics in natural language processing and understanding, such as syntax, lexical and computational semantics, natural language ambiguities and their disambiguation, logical form construction and inference. The course will survey state-of-the-art natural language processing toolkits and knowledge bases that boost the development of modern language processing and understanding applications.
Prerequisite(s): CSCI 3320 OR CSCI 3660 OR CSCI 4450. Not open to non-degree graduate students.
CSCI 8456 INTRODUCTION TO ARTIFICIAL INTELLIGENCE (3 credits)
An introduction to artificial intelligence. The course will cover topics such as machine problem solving, uninformed and informed searching, propositional logic, first order logic, approximate reasoning using Bayesian networks, temporal reasoning, planning under uncertainty and machine learning. (Cross-listed with CSCI 4450).

CSCI 8476 PATTERN RECOGNITION (3 credits)
Structures and problems of pattern recognition. Mathematics model of statistical pattern recognition, multivariate probability, Bay's decision theory, maximum likelihood estimation, whitening transformations. Parametric and non-parametric techniques, linear discriminant function, gradient-descent procedure, clustering and unsupervised learning, and feature selection algorithms. (Cross-listed with CSCI 4470)
Prerequisite(s): CSCI 1620 with C- or better, and MATH 2050. Recommended: MATH 4740/8746 or STAT 3800/8805.
CSCI 8480 MULTI-AGENT SYSTEMS AND GAME THEORY (3 credits)
This course covers advanced topics in the area of coordination of distributed agent-based systems with a focus on computational aspects of game theory. The main topics covered in this course include distributed constraint satisfaction, distributed constraint optimization, and competitive and cooperative game theory. (Cross-listed with MATH 8480)
Prerequisite(s): CSCI 4450 or CSCI 8456. Suggested background courses: CSCI 4480 or CSCI 8468; CSCI 8080. Not open to non-degree graduate students.
CSCI 8486 ALGORITHMS FOR ROBOTICS (3 credits)
This course provides an introduction to software techniques and algorithms for autonomously controlling robots using software programs called controllers. Students will be taught how to program and use software controllers on simulated as well as physical robots. (Cross-listed with CSCI 4480).
Prerequisite(s): CSCI 3320 with C- or better. CSCI 4450/8456 is a recommended but not essential pre-requisite.
CSCI 8500 NUMERICAL LINEAR ALGEBRA (3 credits)
Topics covered in this course include error propagation, solutions of nonlinear equations, solutions of linear and nonlinear systems by various schemes, matrix norms and conditioning, and computation of eigenvalues and eigenvectors. (Cross-listed with MATH 8500).
Prerequisite(s): MATH 1960 and MATH 2050, or permission of instructor. Familiarity with computer programming is assumed.
CSCI 8506 OPERATING SYSTEMS (3 credits)
Operating system principles. The operating system as a resource manager; I/O programming, interrupt programming and machine architecture as it relates to resource management; memory management techniques for uni-programmed systems; process description and implementation; processor management (scheduling); I/O device, controller, and channel management; file systems. Operating system implementation for large and small machines. (Cross-listed with CSCI 4500).
Prerequisite(s): CSCI 3710, CSCI 3320/8325, MATH 1950, and CSCI 4350/8356 with C- or better.
CSCI 8510 NUMERICAL DIFFERENTIAL EQUATIONS (3 credits)
Topics covered in this course include interpolation and approximations, numerical differentiation, numerical integration, and numerical solutions of ordinary and partial differential equations. (Cross-listed with MATH 8510).
Prerequisite(s): MATH 1970, MATH 2350, or permission of instructor. Familiarity with computer programming is assumed.
CSCI 8520 ADVANCED TOPICS IN OPERATIONS RESEARCH (3 credits)
Advanced treatment of a specific topic in the area of operations research not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with MATH 8520).
Prerequisite(s): MATH 4300 or MATH 8306 or CSCI 4300 or CSCI 8306 or permission of the instructor.
CSCI 8530 ADVANCED OPERATING SYSTEMS (3 credits)
State-of-the-art techniques for operating system structuring and implementation. Special purpose operating systems. Pragmatic aspects of operating system design, implementation and use.
CSCI 8555 COMMUNICATION NETWORKS (3 credits)
This course is designed to bring students up to the state of the art in networking technologies with a focus on Internet. It will cover the principles of networking with an emphasis on protocols, implementations and design issues. (Cross-listed with CSCI 3550)
Prerequisite(s): (CSCI 3320 or CSCI 8325 with grade of C- or better) AND (CSCI 2240 or CYBR 2250 with grade of C- or better)
CSCI 8566 NUMBER THEORY & CRYPTOGRAPHY (3 credits)
An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 4560, MATH 4560, MATH 8566).
Prerequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor
CSCI 8590 FUNDAMENTALS OF DEEP LEARNING (3 credits)
This course is an introduction to deep learning, a branch of machine learning concerned with the development and application of neural networks. Deep learning trains the machine to learn patterns that it is presented with rather than requiring the human operator to define the patterns that the machine should look for. Deep learning is behind many recent advances in artificial intelligence, such as face recognition, speech recognition and autonomous driving. This course will cover the foundations of deep learning, learning theory, basic/advanced neural networks and problem domains of many selected applications.
Prerequisite(s): CSCI 3320 or instructor permission
CSCI 8610 FAULT TOLERANT DISTRIBUTED SYSTEMS (3 credits)
This course is to study the theory and practice of designing computer systems in the presence of faulty components. Emphasizes the basics of how faults can affect systems and what is required to mask or compensate for their efforts.
Prerequisite(s): Not open to non-degree graduate students.
CSCI 8620 MOBILE COMPUTING AND WIRELESS NETWORKS (3 credits)
The objective of the course is to introduce contemporary issues in mobile computing and wireless networks. The course covers the differences between mobile computing and the traditional distributed computing paradigm, impediments of the mobile and wireless environments, problems and limitations due to such impediments, various network layers solutions, location management techniques, mobile IP, wireless LANs, wireless TCP, ad hoc networks, and sensor networks.
Prerequisite(s): CSCI 3550 or CSCI 8555. Not open to non-degree graduate students.
CSCI 8626 COMPUTER GRAPHICS (3 credits)
An introduction to the acquisition, manipulation and display of graphical information using digital techniques. Topics include discussion of the various hardware devices used for input and output, the classical algorithms and data structures used in manipulation of graphical objects, the user interface to the graphics system, and applicable standards. (Cross-listed with CSCI 4620).
Prerequisite(s): ISQA 3300 or CSCI 3320.

CSCI 8656 INTRODUCTION TO CLOUD COMPUTING (3 credits)
This course is an introduction to cloud computing. The students will learn about core concepts of cloud computing and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4650).
Prerequisite(s): Prior experience and background knowledge of networking and operating systems are preferred.

CSCI 8666 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)
This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, MATH 4660, MATH 8666).
Prerequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

CSCI 8700 SOFTWARE SPECIFICATIONS AND DESIGN (3 credits)
A continuation of the study of software engineering with an emphasis on early phases of software development, namely requirements engineering/specification and architectural design. Includes an in-depth study of practices for effective software requirements specification and architectural design, as well as formal specifications of software systems. Related topics such as metrics and support tools are also covered.
Prerequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8706 COMPILER CONSTRUCTION (3 credits)
Assemblers, interpreters and compilers. Compilation of simple expressions and statements. Analysis of regular expressions. Organization of a compiler, including compile-time and run-time symbol tables, lexical scan, syntax scan, object code generation and error diagnostics. (Cross-listed with CSCI 4700).

CSCI 8710 MODERN SOFTWARE DEVELOPMENT METHODOLOGIES (3 credits)
Designed to introduce students to advanced object technology and other modern methodologies for developing software systems. Intended for graduate students who have mastered the basic concepts and issues of software engineering. Course covers advanced object-oriented software development. The course also covers several offshoots of object technology, including: component-based software engineering, aspect-oriented software development, software product line engineering, service-oriented computing, etc.
Prerequisite(s): CSCI 4830 or CSCI 8836.

CSCI 8760 FORMAL METHODS IN SOFTWARE ENGINEERING (3 credits)
In the high consequence system domain, a primary objective of any construction technique employed is to provide sufficiently convincing evidence that the system, if put into operation, will not experience a high consequence failure or that the likelihood of such a failure falls within acceptable probabilistically defined limits. Systems for which such evidence can be provided are called high assurance systems. The objective of this course is to examine software-engineering techniques across the development life cycle that are appropriate for high assurance systems. The course will analyze the nature of the evidence provided by various techniques (e.g., does a given technique provide sufficiently strong evidence in a given setting).
Prerequisite(s): CSCI 8000 and CSCI 8836 or CSCI 4830.

CSCI 8766 TOPICS IN MODELING (3 credits)
Selection of such topics as formulation and analysis of various models involving Markov chains, Markov processes (including birth and death processes), queues, cellular automata, difference and differential equations, chaotic systems and fractal geometries. (Cross-listed with CSCI 4760).
Prerequisite(s): MATH 2350 and MATH 4740 or MATH 8746.

CSCI 8790 ADVANCED TOPICS IN SOFTWARE ENGINEERING (3 credits)
The main objective of this course is (1) to introduce advanced topics in software engineering approaches and (2) to provide an overview and in-depth understanding of software development and maintenance techniques. Many well-known software implementation problems, associated programming tools, and analysis techniques are also covered. At the end of this course, the student should be able to apply the practical skills and approaches in solving non-trivial problems in diverse fields of study.
Prerequisite(s): CSCI 4830 or CSCI 8836. Not open to non-degree graduate students.

CSCI 8836 INTRODUCTION SOFTWARE ENGINEERING (3 credits)
Basic concepts and major issues of software engineering, current tools and techniques providing a basis for analyzing, designing, developing, maintaining and evaluating the system. Technical, administrative and operating issues. Privacy, security and legal issues. (Cross-listed with CSCI 4830).

CSCI 8856 DATABASE MANAGEMENT SYSTEMS (3 credits)
Basic concepts of database management systems (DBMSs). The relational, hierarchical and network models and DBMSs which use them. Introduction to data base design. (Cross-listed with CSCI 4850).

CSCI 8876 DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS (3 credits)
This required course for undergraduate bioinformatics majors provides foundational knowledge on database aspects used in the field and an overview of their applications in bioinformatics, biomedical informatics, and health/clinical informatics. The course begins with a brief review of key concepts in computational molecular biology related to database search-development, database management systems, the difference between primary and secondary databases, and bioinformatics-related aspects of modeling and theory in computer science. The major focus is on the multiple challenges and aspects of bio-database development, search, and pattern discovery. The course uses problem-based learning to help students develop database management skills as they apply to high throughput “omics.”

University of Nebraska at Omaha Catalog 1269
CSCI 8910 MASTER OF SCIENCE CAPSTONE (3 credits)
The capstone course is to integrate coursework, knowledge, skills and experimental learning to enable the student to demonstrate a broad mastery of knowledge, skills, and techniques across the Master degree curriculum of Computer Science for a promise of initial employability and further career advancement. The course is designed to be in a student-centered and student-directed manner which requires the command, analysis and synthesis of knowledge and skills. Students may apply their knowledge and skill to a project which serves as an instrument of evaluation. Students are encouraged to foster an interdisciplinary research and cultivate industry alliances and cooperation in this course. This capstone course should be taken only after students have completed at least 3/4 of course requirements for the major.
Prerequisite(s): Master's degree of Computer Science with course-only option (program III). Not open to non-degree students.

CSCI 8920 ADVANCED TOPICS COMPUTER SCIENCE (3 credits)
An in-depth study, at the graduate level, of one or more topics that are not treated in other courses. May be repeated with different topics with permission of advisor.
Prerequisite(s): Permission of instructor; will vary with offering. Not open to non-degree graduate students.

CSCI 8950 GRADUATE INTERNSHIP IN COMPUTER SCIENCE (1-3 credits)
The purpose of this course is to provide students with opportunities to apply their academic studies in environments such as those found in business, industry, and other non-academic organizations. The student interns will sharpen their academic focus and develop better understanding of non-academic application areas.
Prerequisite(s): Permission of the graduate program chairperson and a minimum grade point average of 3.0 (B), with at most one grade below B, but not lower than C+ for all CS graduate classes. Not open to non-degree graduate students.

CSCI 8960 THESIS EQUIVALENT PROJECT IN COMPUTER SCIENCE (1-6 credits)
This course allows a graduate student to conduct a research project in computer science or a related area. The project is expected to place an emphasis on applied, implementations-based, or experimental research. The process for development and approval of the project must include: appointment of supervisory committee (chaired by project advisor), a proposal approved by the supervisory committee, monitoring of the project by the supervisory committee, an oral examination over the completed written product conducted by the supervisory committee, and final approval by the supervisory committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines.
Prerequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 8970 INDEPENDENT STUDY (1-3 credits)
Under this number a graduate student may pursue studies in an area that is not normally available in a formal course. The topics to be studied will be in a graduate area of computer science to be determined by the instructor.
Prerequisite(s): Permission of the Graduate Program Committee. Not open to non-degree graduate students.

CSCI 8980 GRADUATE SEMINAR (1 credit)
This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques and methodologies, and/or the current research results in the fundamental areas of computer science. Topics to be covered by the course will vary in different semesters.
Prerequisite(s): Permission of the Instructor. Not open to non-degree graduate students.

CSCI 8986 TOPICS IN COMPUTER SCIENCE (3 credits)
This is a variable topic course in computer science at the senior/graduate level. Topics not normally covered in the computer science degree program, but suitable for senior/graduate-level students can be offered. (Cross-listed with CSCI 4980).
Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

CSCI 8990 THESIS (1-6 credits)
A research project, designed and executed under the supervision of the chair and approval by members of the graduate student's thesis advisory committee. In this project the student will develop and perfect a number of skills including the ability to design, conduct, analyze and report the results in writing (i.e., thesis) of an original, independent scientific investigation.
Prerequisite(s): Permission of Graduate Adviser. Not open to non-degree graduate students.

CSCI 9410 ADVANCED TOPICS IN LOGIC PROGRAMMING (3 credits)
This course will examine some advanced topics in logic programming, in particular logic programming under stable model (or answer set) semantics. Answer set programming is a common name of the field. Formal syntax, semantics, and proofs of correctness for logic programs will be considered. Elements of inductive and Prolog programming will also be introduced. Each advanced topic will be followed by how it has been applied in practice. Advanced applications of logic programming will be covered in detail.
Prerequisite(s): CSCI 8000 and doctoral student standing in Information Technology or the permission of the instructor.

CSCI 9420 INTELLIGENT AGENT SYSTEMS (3 credits)
This course covers the principles of interaction between agents in multi-agent systems using game theory. Relevant topics studied in this course include competitive games, statistical Bayesian games, cooperative games, and mechanism design. Students will have to implement projects related to the material studied in the course.
Prerequisite(s): CSCI 3320 or CSCI 8325 and CSCI 4450 or CSCI 8456.
Not open to non-degree graduate students.

CSCI 9710 METHODS IN SOFTWARE ENGINEERING RESEARCH (3 credits)
This course provides guidelines on how to conduct research in the field of software engineering by presenting the research methods, classic readings, and development of theories and their application to real life problems. The main emphasis of the course is to provide opportunity for in-depth study of topics such as contemporary methods for software development.
Prerequisite(s): CSCI 8836 or equivalent course and doctoral student standing in Information Technology or permission of the instructor. Not open to non-degree graduate students.

CSCI 9810 RESEARCH FOUNDATIONS IN THEORETICAL COMPUTING (3 credits)
This course offers an up-to-date coverage of the contemporary and emerging concepts, models, techniques, and methodologies, and/or the current research results in the fundamental areas of theoretic computing. The course will examine advanced research topics in computer science and engineering, including foundations of automata theory, computability, complexity analysis, computational logics and algorithmic analysis, hybrid dynamic systems theory, number theory, adaptation and learning theory, concepts and principles in computational geometry, stochastic processes, and random optimization. Each topic will be discussed with a perspective of research issues and directions. Active student participation in investigation of the research topics, survey of the current state-of-art, and identifying the future research insights is required. Students will take turn presenting their research results on specific topics. Topics to be covered by the course will vary in different semesters.
Prerequisite(s): The prerequisites of this course vary depending on the areas to be covered in the semester the course is offered. Good standing in Ph.D. program is required. Permission of the instructor may be required. Not open to non-degree graduate students.
ISQA 8016 BUSINESS INTELLIGENCE (3 credits)
This course intends to provide graduate students in-depth exposure to the growing field of business intelligence. Business intelligence (BI) consists of the set of concepts and techniques used to analyze business data in support of decision-making and planning. BI spans a number of areas of management information systems, including Decision Support Systems (DSS), Enterprise Resource Planning (ERP), Data Warehousing, Knowledge Management, Customer Relationship Management, Data Mining, and others.
Prerequisite(s): (ISQA 4150 or ISQA 8156) and ISQA 8040 and ISQA 8050. Not open to non-degree graduate students.

ISQA 8030 INFORMATION SYSTEMS AND ETHICS (3 credits)
This course gives you an introduction to organizations and the role that information and information systems play in supporting an organization’s operations, decision-making processes, quality management, and strategic activities. The course provides an introduction to the management of information systems function, the strategic and regulatory issues of telecommunications, and ethical and legal issues related to information systems.
Prerequisite(s): Admission into the MS in MIS program.

ISQA 8040 AN OVERVIEW OF SYSTEMS DEVELOPMENT (3 credits)
The course presents an overview of the systems development lifecycle and database development. The course will focus on theory, current tools and techniques that the system developer can use to develop and document information systems. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8050 DATA ORGANIZATION AND STORAGE (3 credits)
The course will provide concepts of data organization, data storage, and data transfer through computer networks. The performance implications of various design decisions will be explored. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8060 RESEARCH IN MIS (3 credits)
This course covers research methods and their application to the development and evaluation of management information systems. Also covered is the relationship between organization theory and IS research.
Prerequisite(s): CIST 2500, CIST 2100, and ISQA 8040, or permission of the instructor.

ISQA 8070 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (1 credit)
This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.
Prerequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular course offerings.

ISQA 8080 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (3 credits)
This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.
Prerequisite(s): 1) Permission of the instructor. 2) Additional prerequisite courses may be required for particular course offerings.

ISQA 8086 SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS (1-5 credits)
This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ISQA 4000)
Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 8090 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (2 credits)
This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.
Prerequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular course offerings.

ISQA 8106 INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION (3 credits)
This course examines the frameworks and tools used to develop an organization’s information system architecture. It provides the analytical skills and conceptual frameworks with which to make recommendations and decisions regarding the integration of information technology components into an information system architecture. (Cross-listed with ISQA 4100)
Prerequisite(s): CIST 2100 and ISQA 3310

ISQA 8136 INFORMATION TECHNOLOGY FOR DEVELOPMENT (3 credits)
Information Technology for Development (ITD) is the implementation and evaluation of information technology infrastructures to stimulate economic, social and human development. In this service-learning course, students will learn and apply ITD concepts for developing and adding value through IT by working with small business entrepreneurs in Omaha or rural Nebraska. Students will evaluate micro-business technology needs, prepare business technology plans, provide training, and implement appropriate solutions, to the extent possible within a semester class. (Cross-listed with ISQA 4130)
Prerequisite(s): Though not required, the following courses or their equivalent would provide the necessary background: CIST 1100, CIST 1300, ISQA 3210, ISQA 3310, ISQA 3400. Not open to non-degree graduate students.

ISQA 8156 ADVANCED STATISTICAL METHODS FOR IS&T (3 credits)
This course emphasizes the application and interpretation of statistical methods including design of experiments, analysis of variance, multiple regression, and nonparametric procedures and the use of statistical computer packages. The intent is to develop quantitative abilities needed for quantitatively intensive jobs and for advanced study in management information systems, computer science and information technology. (Cross-listed with ISQA 4150)
Prerequisite(s): CIST 2500 or equivalent (at least one course in statistics)

ISQA 8160 APPLIED DISTRIBUTION FREE STATISTICS (3 credits)
The primary objective of this course is to expose students to methods of analyzing data from non-normal populations including binomial tests, contingency tables, use of ranks, Kolmogorov-Smirnov type statistics and other selected topics.
Prerequisite(s): Admission to MS program in Management Information Systems or permission of instructor. This course assumes prior knowledge with basic descriptive and inferential statistics from an introductory undergraduate course (e.g., CIST 2500).

ISQA 8166 INTRODUCTION TO ENTERPRISE RESOURCE PLANNING (3 credits)
Introduction to Enterprise Resource Planning (ERP) is designed to expose students to the primary enterprise application that forms the information systems (IS) infrastructure for most large organizations today. The primary purpose of this course is for students to gain an understanding of the enterprise wide, cross functional nature of ERP software. In the process of learning about ERPs, the students develop “hands on” experience with the largest and most well-known ERP application, SAP. (Cross-listed with ISQA 4160, SCMT 4160)
Prerequisite(s): CIST 2100 or equivalent. Not open to non-degree graduate students.
ISQA 8176 DIGITAL SUPPLY CHAIN & LOGISTICS (3 credits)
Global Supply Chains are being disrupted by digital transformation driven by emerging technologies such as IoT (internet of things) and AI/ML (Artificial Intelligence/Machine Learning). This course will take a closer look at global supply chains and logistics with an emphasis on the impact of digitalization. We will explore the typical global supply chain processes and how state-of-the-art and emerging technologies impact them. Thus, the class views global digital supply chains by integrating business and technological perspectives. The course will start with an overview of digitalization strategy and digital supply chains, fundamental GSCM (Global Supply Chain Management) processes and their potential for digitalization, and discussion of IT/software systems, IoT, AI/ML, Data Analytics/Visualization, and related facets that impact digital supply chains. The course will culminate with an integrated case study and/or research paper (graduate). (Cross-listed with ISQA 4170).
Prerequisite(s): Permission of instructor. It is preferable that students have taken an introductory supply chain class or have some experience in the transportation, logistics and supply chain management sector. Undergraduate students must have Junior standing.

ISQA 8180 ELECTRONIC COMMERCE (3 credits)
Electronic Commerce is the digital enablement of transactions between multiple parties. A multitude of technologies, tools and applications have brought about changes in business, and society that require careful consideration. Students are given an overview of electronic commerce business models and required to apply these to solve business problems or take on opportunities presented. They will cover topics such as social networking, electronic markets, and political and ethical issues associated with electronic commerce, and business plans for technology ventures. They will apply these concepts using Web 2.0 tools, mobile applications and website design assignments.

ISQA 8196 PROCESS REENGINEERING WITH INFORMATION TECHNOLOGY (3 credits)
Business process reengineering issues are examined. Reengineering concepts and methods are introduced. Additional special project(s) are required. SAP will be introduced. (Cross-listed with ISQA 4190)
Prerequisite(s): CIST 2500; prerequisite/co-requisite ISQA 4110.

ISQA 8206 INFORMATION AND DATA QUALITY MANAGEMENT (3 credits)
The course primarily focuses on developing an in-depth understanding of Data and Information Quality (DQ and IQ) concepts and issues. On completing this course students will be able to understand and use DQ and IQ Concepts in Information Systems projects, be able to recognize various patterns of Data and Design Deficiencies in Systems and be able to suggest appropriate DQ and IQ improvement plans in light of known deficiencies in systems. (Cross-listed with ISQA 4200)
Prerequisite(s): CIST 2500

ISQA 8210 MANAGEMENT OF SOFTWARE DEVELOPMENT (3 credits)
This course should encourage you to think critically about aspects of software development that make it difficult and strategies to mitigate these challenges. This course integrates concepts from software engineering, management science, psychology, and organizational behavior to identify, understand, and propose solutions to problems associated with software development. We examine and consider issues from various perspectives, such as the project manager, development team, senior management, and project sponsor. This course prepares students for various roles within a software development effort including leadership positions in software development. Students will practice software project management and agile methods of managing projects in a semester long team project using contemporary project and development methods.
Prerequisite(s): ISQA 8040 or equivalent. Not open to non-degree graduate students.

ISQA 8220 ADVANCED SYSTEMS ANALYSIS AND DESIGN (3 credits)
This course is a systems analysis and design course for systems and business analysts. The course presents an overview of object-oriented system analysis and design. The course will then focus on theory, best practices, and modern methodologies that analysts can use to analyze and design information systems.
Prerequisite(s): ISQA 8040 or (ISQA 4110 and ISQA 4120) or equivalent and ISQA 8050 or ISQA 3310 or equivalent

ISQA 8306 DATABASE ADMINISTRATION (3 credits)
This course is designed to give students an applied, practical introduction to database administration. Students will gain an understanding of the functioning of a database management system and its relationship to the computing environment in which it runs. They will learn the concepts, principles, and techniques necessary to carry out such functions as database object creation, storage management, capacity planning, performance tuning, backup and recovery, and security management. Each semester the course will focus on one commercial database management system (DBMS), such as Oracle. (Cross-listed with ISQA 4300)
Prerequisite(s): ISQA 8040 or ISQA 3310 or CSCI 4850. Not open to non-degree graduate students.

ISQA 8310 IT INFRASTRUCTURE & CLOUD COMPUTING (3 credits)
This course provides a graduate-level introduction to the business and technical decisions around technical infrastructure. It covers topics related to computer and systems architecture and communications networks, with a focus on the technical and business decisions around technology. Students completing the course will be able to understand and design network infrastructure, evaluate cloud computing offerings, and communicate their decisions. The course covers hardware, software, and cloud computing technologies.

ISQA 8340 APPLIED REGRESSION ANALYSIS (3 credits)
The primary objective of this course is to expose students to regression models and applications with particular emphasis on applying these concepts to IT research. Topics to be discussed include: Foundations of regression analysis using least squares procedures; model formulation, stepwise regression, transformations; graphical methods, estimation; inference; influence diagnosis; matrix formulation, multicollinearity, time series, and nonlinear models.
Prerequisite(s): ISQA 4150 or ISQA 8156, not open to non-degree graduate students.

ISQA 8380 ENTERPRISE ARCHITECTURE AND SYSTEMS INTEGRATION (3 credits)
This course is designed to give students grounding in the concepts, issues, and tools needed to manage enterprise architecture, distributed systems & Internet-based environments. The goal of the course is to equip students to make the architecture and infrastructure-related decisions needed for successful development and use of contemporary client/server and Internet-based systems. Topics include middleware, architecture, XML, JSON, web services, service-oriented architecture, enterprise application integration, distributed computing services, Model View Controller (MVC) development frameworks.
Prerequisite(s): ISQA 8310 and ISQA 8050 or equivalent; permit required.

ISQA 8410 DATA MANAGEMENT (3 credits)
The course provides in-depth coverage of such areas as: the relational model, SQL, data modeling, data quality management, database design, data warehousing, business intelligence, document and content management, NoSQL systems, and data governance. The course offers a mix of theoretical treatment and hands-on application. Current DBMS and data modeling software will be used.
Prerequisite(s): ISQA 8050 or equivalent, permit only.
ISQA 8420 MANAGING THE I.S. FUNCTION (3 credits)
The course provides a focus on the business management implications of the information explosion. The course is organized around a management audit of the information services activity to help present and future managers recognize and implement effective information services management.
Prerequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8450 NOSQL AND BIG DATA TECHNOLOGIES (3 credits)
The course will cover topics in the area of NoSQL and Big Data management. The course is intended to get students familiarized with NoSQL and Big Data technologies, explore how these database technologies differ conceptually from traditional relational database technologies, understand their applications, uses, advantages, and disadvantages, and provide hands-on experience with NoSQL and Big Data databases. The course offers a mix of theoretical treatment and hands-on application of the discussed NoSQL and Big Data technologies.
Prerequisite(s): Prior exposure to data management is expected. The prerequisite is ISQA 3310, ISQA 8040, CSCI 4850, or work experience that has given you a comparable grounding in database concepts and technologies; in this case permission by the instructor is needed.

ISQA 8460 INTERNET OF THINGS (IOT), BIG DATA AND THE CLOUD (3 credits)
This course introduces the Internet of Things (IoT). It provides an overview of a number of technologies and research disciplines that enable the Internet to reach out into the real world of physical objects. In the future, the "Things" in question may have identities and virtual personalities, operating in smart spaces using intelligent interfaces to connect and communicate with the social, environmental, and user context.
Prerequisite(s): Basic Web Development using HTML/CSS and some MVC framework. The equivalent of two semester exposure to programming.

ISQA 8525 GRAPHICAL USER INTERFACE DESIGN (3 credits)
This course is an introduction to interaction design with a primary emphasis on designing usable and useful computer interfaces. Students will learn the principles of interface design grounded in a fundamental understanding of human cognitive processes. They will learn how end-users develop and use mental models of interaction and will apply this knowledge to the design of interfaces for real-world applications. A design project will challenge students to plan their own designs, to develop interfaces and to integrate them into a working application prototype, to test their application with real users, and to effectively communicate the overall results. (Cross-listed with ISQA 3520)
Prerequisite(s): CIST 1300

ISQA 8546 COMPUTER SECURITY MANAGEMENT (3 credits)
The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST4540, CYBR 4540, CYBR 8546)
Prerequisite(s): IASC 4360 or permission of the instructor.

ISQA 8560 INFORMATION WARFARE AND SECURITY (3 credits)
This course will study the nature of information warfare, including computer crime and information terrorism, as it relates to international, national, economic, organizational, and personal security. Information warfare policy and ethical issues will be examined.
Prerequisite(s): CIST 2100 or BSAD 8030 or ISQA 8030, or permission of instructor required.

ISQA 8570 INFORMATION SECURITY POLICY AND ETHICS (3 credits)
The course will cover the development and need for information security policies, issues regarding privacy, and the application of computer ethics. (Cross-listed with IASC 8570)
Prerequisite(s): CIST 2100 or BSAD 8030, or permission of instructor.

ISQA 8580 SECURITY RISK MANAGEMENT AND ASSESSMENT (3 credits)
The purpose of this course is to prepare the student for managing information security at the organizational level. This course will combine concepts from strategic management, decision science and risk analysis to prepare the student to integrate security issues into an organizational strategic planning process.
Prerequisite(s): CIST 2100 or ISQA 8030. Not open to non-degree graduate students.

ISQA 8600 FROM DATA TO DECISIONS (3 credits)
This course focuses on inquiry-driven data preparation and exploratory analysis skills for audience-driven, decision-oriented data analysis. Students gain experience in data evaluation, cleaning, documentation, and exploration with basic descriptive statistics and visualizations.

ISQA 8700 DATA MINING: THEORY AND PRACTICE (3 credits)
This course provides students theoretical issues as well as practical methods for conducting data mining process, including the implementation of a warehouse. After covering the essential concepts, issues, techniques to build an effective data warehouse, this course emphasizes the various techniques of data mining, such as association, classification, clustering and prediction for on-line analyses within the framework of data warehouse architectures. This course also promotes students to conduct a real-life data analyzing project in Big Data Era.
Prerequisite(s): ISQA 8050 and ISQA 8310 and ISQA 8040, not open to non-degree graduate students.

ISQA 8720 APPLIED STATISTICAL MACHINE LEARNING (3 credits)
This course focuses on advanced techniques in the analysis and evaluation of data, using both supervised and unsupervised methods. It covers the main types of statistical learning models needed for complex data analytics problems, as well as aspects of model development and optimization. Topics include: Linear and Non-Linear Regression Models, Classification, Resampling Methods, Model Selection and Regularization, Decision Trees, Model Boosting and Bagging, Support Vector Machines, and Clustering methods. This is an applied, hands-on course that will use a state-of-the-art statistical tool to implement the discussed approaches in assignments and a course project and focuses on the understanding and application of the concepts.
Prerequisite(s): ISQA 8156 (B- grade or better) and the following topics: The equivalent of two classes of statistics and/or advanced mathematics and a minimum of one semester of applying R in courses and/or projects

ISQA 8736 DECISION SUPPORT SYSTEMS (3 credits)
This course examines a set of information systems which specifically support managerial decision makers: Decision Support Systems, Group Decision Support Systems, Executive Information Systems, Data Warehouses, Expert Systems, and Neural Networks. This course explores the development, implementation, and application of these systems, how these systems can be applied to current business problems, as well as how organizational issues impact the implementation and usage of these systems. (Cross-listed with ISQA 4730)
Prerequisite(s): ISQA 8030 or equivalent.

ISQA 8750 STORYTELLING WITH DATA (3 credits)
This course provides an in-depth study of how to build a compelling story using data for business professionals to make winning arguments, it provides an overview of a number of technologies and research disciplines that enabled the power of data visualization. Data visualization is critical to managing large volumes of data, and can be defined as the science (analytical) and art (design) of manipulating and presenting data for expression and cognitive recognition. Data visualization involves using data in a way that humans can clearly understand, supporting efforts by organization to gain competitive advantage by changing operations, decision-making, and strategic initiatives.
Prerequisite(s): CSCI 1620 or equivalent. Admission into the UNO graduate program, basic web development or work experience with comparable grounding in programming, scripting concepts & technologies and permission by the instructor is needed.
ISQA 9010 FOUNDATIONS OF INFORMATION SYSTEMS RESEARCH (3 credits)
This course covers the following areas: (1) information systems as an academic discipline including classic readings in IS and its reference disciplines, (2) theory development and evaluation, (3) research methods applicability in IS.
Prerequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 8060 or equivalent. Not open to non-degree graduate students.

ISQA 8820 PROJECT RISK MANAGEMENT (3 credits)
This course will cover project risk management, i.e., the process of measuring or assessing risk in projects and then developing strategies to manage the risk. The topics covered will include: Risk Management Planning, Risk Identification, Qualitative Risk Analysis, Risk Analysis, Risk Response Planning, and Risk Monitoring and Control will be covered in detail. Students will learn how to apply and use the tools and techniques needed to perform these project management tasks. A collection of readings on risk management from the empirical literature coupled with risk management standards from organizations such as IEEE and the Project Management Institute (PMI) will be used to provide the student with an excellent foundation in risk management and control.
Prerequisite(s): ISQA 8810 or permission of instructor.

ISQA 8900 INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS (1-3 credits)
The content of the course will vary. However, both the student and the faculty member must sign an Independent Research Agreement and file it with the Master of Science in Management Information Systems Graduate Program Committee before registration for the course. This agreement will detail the project, the schedule for its completion, the form of the output, the method of evaluation and other relevant information pertaining to the project.
Prerequisite(s): Permission of instructor, and at least 12 hours of course work toward a M.S. in MIS should be completed.

ISQA 8910 INFORMATION SYSTEMS INTERNSHIP (1-3 credits)
Information Systems Internship provides students with an opportunity for practical application and further development of knowledge and skills acquired in the MS MIS degree program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.
Prerequisite(s): Permission of the instructor required. Students must have completed a minimum of 18 credit hours towards the MS MIS program. Not open to non-degree graduate students.

ISQA 8950 CAPSTONE MANAGEMENT INFORMATION SYSTEMS (3 credits)
The course consists of a student executed Information Systems design project providing an in-depth practical experience. It typically covers system conceptualization, analysis, and design. It may also involve prototyping. The project will typically not include the actual implementation of the system. This course replaces the MS in MIS comprehensive exam requirement.
Prerequisite(s): Students must have 6 credit hours or fewer left in the program. Students must have completed all core classes. Not open to non-degree graduate students.

ISQA 8990 THESIS (1-6 credits)
This course is a research project designed and executed under supervision of a thesis supervisory committee. Student will develop skills, including the ability to design, conduct, analyze, and report results in writing (i.e., thesis) of an original, independent, scientific investigation. The student's thesis supervisory committee must approve the project plan.
Prerequisite(s): ISQA 8060 research methods or equivalent. Graduate major in MIS and approval of the thesis supervisory committee. Not open to non-degree graduate students.
Research methods in Information Technology involves an overview of the research process specific to problems in IT. Students will learn about theories in IT relevant to their areas of research. They will identify key components of research problems in IT, understand different types of research processes, develop research questions, and design research projects. They will learn to construct research instruments that enable them to collect data. They will also learn about the different data collection and analysis tools and techniques. As part of this course, students will take the CITI training and achieve the research readiness they need to succeed in the PhD in IT program.

Prerequisite(s): Permission of the instructor. Not open to non-degree graduate students.

This course provides a format for exploration of advanced research areas that are of interest to doctoral students in the information systems and/or information technology area. The specific research area will vary from semester to semester, in keeping with research interests of faculty and students. Examples of areas include, but are not limited to, e-business technology, mobile commerce, intelligent agents e-enabled decision support, electronic collaboration, computer-mediated communications, human-computer interaction and information assurance.

Prerequisite(s): Admission to PhD program in Information Technology or permission of instructor

**IT Innovation, MS**

**School of Interdisciplinary Informatics, College of Information Science & Technology**

**Vision Statement**

Information technology innovation (ITIN) is the interdisciplinary practice of conceptualizing, designing, prototyping, and fielding an IT-based product or service. It focuses both on the technological and entrepreneurial aspects of IT products. Being many-faceted by definition, IT innovation brings together aspects of computer science and management information systems with other disciplines that inform IT design and application such as health care, business, psychology, art, music, or public administration, among many others. It integrates and interfaces a diverse set of disciplines in addition to information technology. In addition, IT Innovation takes a more holistic and immersive approach to idea/product development: It focuses on the ideation, design, and development of an IT-based innovation, as well as on the entrepreneurial realization of this innovation as a profitable or sustainable product or service. There is a great demand for ITIN entrepreneurs and professionals locally, regionally, and nationally, and the MS in ITIN program was created, in part, to prepare a workforce to meet those demands, in addition to satisfying the intellectual curiosity and honing the intellectual capacity of passionate creatives who work in and with technology.

**Program Website** (https://www.unomaha.edu/college-of-information-science-and-technology/academics/it-innovation.php)

**Other Program Related Information**

**Fast Track**

The School of Interdisciplinary Informatics (SI2) has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor’s degree and a master’s degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following:
  - Students pursuing a CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field
  - Students pursuing the Bachelor of Multidisciplinary Studies desiring to pursue the MS in ITIN.
- Students must have completed no less than 60 undergraduate hours and with at least 24 undergraduate credits yet to complete.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit it to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
  - Admission to Fast Track does NOT guarantee admission to the graduate program.
  - The admit term must be after the completion term of the undergraduate degree.

**Admissions**

General Application Requirements and Admission Criteria (p. 974)

**Program-Specific Requirements**

**Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)**

- Fall: July 1
- Spring: December 1
- Summer: April 1

**Other Requirements**

- The minimum undergraduate grade point average (GPA) requirement for the MS in IT Innovation program is 3.0 or equivalent score on a 4.0 scale. Provisional admission may be granted to applicants with a GPA
of 2.7 or above (see categories of admission below). Applicants should have the equivalent of a four-year undergraduate degree.

- **English Language Proficiency**: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

- **Writing Sample**: Applicants are required to submit a writing sample about an area of innovation, information technology, or design that is of specific interest to them. This should be a two page double-spaced word processed essay that showcases your unique interest in interdisciplinary ideas and applications in technology, and demonstrates your potential for success in a hands-on and self-directed graduate program.

- **Resume**: Submit a detailed resume indicating your work experience and background.

- **Letter of Recommendation**: One letter of recommendation from a reference who can evaluate your work and/or academic achievements on the following criteria: technical interest, independence and initiative, proficiency with written English, and alignment with the IT Innovation program.

Non-Degree students interested in taking courses without admission to the MS in IT Innovation degree program may do so with permission of the graduate program committee.

**Categories of Admission**

**Unconditional Admission** status may be granted to applicants considered fully qualified to undertake the program to which they were admitted. An applicant must have a baccalaureate degree from a regionally accredited institution. Other qualifications might include, but are not limited to academic foundation requirements, an interview, area of subject tests, advanced tests, a portfolio or performance, grade point average, and/or letters of recommendation.

**Provisional Admission** status may be granted to applicants who have not met all of the conditions for unconditional admission. Departments/schools and/or the dean for Graduate Studies may impose certain requirements which must be fulfilled by the student in order to maintain this status.

- Provisional admission may be granted to an applicant who has less than a "B" average (3.0 on a 4.0 scale) in the undergraduate work in the proposed graduate major and minor (but in no case less than a 2.7 GPA). This admission may be granted for reasons of maturity, experience, or other circumstances under which the student may be deemed capable of high quality graduate study.
  - Provisional admission remains in effect until the student has earned at least a grade of "B" (3.0 on a 4.0 scale) in each course involved in the first 12 hours of graduate study. The provisions are noted in DegreeWorks for reference.

- Provisional admission may occasionally be granted to an applicant who has graduated from an unaccredited institution. Unconditional status may be attained upon completion of 12 hours of graduate courses with a "B" (3.0 on a 4.0 scale) average, providing all other requirements are met.

- Provisional admission may occasionally be granted to seniors at UNO needing more than nine hours of undergraduate credit to complete their baccalaureate degree and wishing to register for graduate credit, subject to receiving a baccalaureate degree within the 12-month period immediately following such registration. They must, however, apply for admission to graduate studies and, if admitted, they should register as graduate students. Graduate coursework taken prior to receipt of the baccalaureate degree may not always be accepted for transfer to other institutions, as graduate work, or for completion of degree requirements at UNO.

- Provisional admission may occasionally be granted to an applicant who has not submitted the required aptitude or advanced knowledge test score(s). The student must, however, submit the score prior to second semester registration as a graduate student.

Provisional status will continue until provisions of admission are fulfilled or changed by the recommendation of the graduate program committee and approved by the dean for Graduate Studies.

**Degree Requirements**

**Electives** 15-18

A total of 15-18 graduate-level credits from any program in the NU system that aligns with the student’s area of interest. Students are encouraged to consider the following examples of acceptable electives from within the ITIN program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ITIN 8210</td>
<td>FOUNDATIONS OF IT INNOVATION</td>

**Exit Requirement (choose one)** 3-6

- ITIN 8960 THERESIS EQUIVALENT PROJECT IN IT INNOVATION
  - or
  - ITIN 8990 THERESIS
  - or
  - CYBR 8950 CYBERSECURITY GRADUATE CAPSTONE

**Total Credits** 30

1. A maximum of 6 credit hours of internship may be used towards degree requirements.
2. A maximum of 6 credit hours of independent study may be used towards degree requirements.
3. Students choosing the capstone exit option are required to take 3 additional credits of electives to earn 30 credit hours total.

**Exit Requirements**

Specific guidance and requirements for each exit requirement option are described below:

**Guidance for Thesis-Equivalent Project Exit Option**

Students who choose this exit option will identify a project topic that they would like to pursue. Thesis-equivalent projects are independent (each student is responsible for their own project) and involve a substantial development component (e.g., application, website, algorithm, hardware systems) of an artifact, system, or product of interest to the student. Students are highly encouraged work with IS&T faculty members to refine their ideas and seek mentors prior to starting the project. Students who choose this exit option are required to:

1. Apply for eligibility to take ITIN 8960 with a chosen faculty advisor who will serve as their supervisory committee chair. The ITIN Graduate
Concentration Committee will act as the de facto supervisory committee for the thesis equivalent project.

2. Register for 6 credits of ITIN 8960 to complete the chosen project.
3. Participate in a public oral defense of their project work to their supervisory committee.

**Guidance for Thesis Exit Option**

All candidates completing the thesis option should carefully review the Graduate College requirements for forming the supervisory committee, Thesis/Thesis-Equivalent Proposal Approval forms, and final approval and submission of the thesis. Students who choose this exit option are required to:

1. Apply for eligibility to take ITIN 8990 with a chosen ITIN faculty advisor who will serve as their thesis committee chair.
2. Form a supervisory thesis committee composed of 2 ITIN faculty and 1 outside member. All supervisory committee members will then sign the Proposed Supervisory Committee form.
3. Students will draft a written thesis proposal outlining the proposed research activities to be conducted for their thesis. The scope and contributions are to be developed with the guidance of the supervisory committee chair. This proposal is distributed to their supervisory committee members for review.
4. Present their thesis proposal in a presentation to their supervisory committee members, and feedback received from this presentation is used to guide the student to refine their proposal. Once all changes have been finalized, the supervisory committee signs the Thesis Proposal Approval form.
5. Register for 6 credits of ITIN 8990 to conduct the research under the supervision of their thesis committee chair.
6. At the conclusion of the student’s thesis work, they will finalize a draft of the thesis and send it to their supervisory committee for review. Students will then schedule a public thesis defense session where they will present the work done to date and answer questions from their committee about the research. The committee will then either approve the thesis outright or request changes. Once all changes have been finalized, the Report of Completion of Degree form will be signed by all committee members.

Since disciplinary norms can vary, students are strongly encouraged to work with their supervisory committee chair to make sure expectations are met.

**Guidance for Capstone Exit Option**

Students who choose this exit option will enroll in CYBR 8950, which is an interdisciplinary capstone course in the final semester of their program. Students who choose this option are required to take 3 credits of additional electives, subject to the requirements outlined above. Students choosing this option are highly encouraged to take ITIN 8210 and ITIN 8220 prior to enrolling in CYBR 8950.

**Quality of Work Standards**

The Graduate College’s Quality of Work standards shall be applied to foundation courses as well as courses taken as part of the degree program. In particular, the GPC will recommend to the Graduate College that any

1. Student receiving a grade of “C-” or below in any foundation courses will be automatically dismissed from the program or, in the case of unclassified or non-degree students, be automatically denied admission.
2. Student receiving a grade of “C+” or “C” in any foundation course will be placed on probation or dismissed from the program.
3. Student not maintaining a “B” (3.0 on 4.0 scale) average in foundation courses will be placed on probation or dismissed from the program.

**ITIN 8000 TECHNOLOGY & INNOVATION STUDIO (3 credits)**

ITIN 8000 is a studio course that provides a foundation to incoming MSc ITIN students from all disciplines through self-guided modules covering topics from technology, innovation, design, and computing. Students will use the modules to practice applying and mastering skills in a self-guided collaborative environment. Each module will consist of three levels of difficulty. Student performance will be assessed by students’ personal progress and skills improvement as shown by them completing increasingly difficult levels of the modules. Students will be graded on a satisfactory/unsatisfactory basis. The class requires in-person participation and attendance.

**Prerequisite(s):** Students in the MS in IT Innovation program must register during their first three terms. Not open to non-degree graduate students.

**ITIN 8006 SPECIAL TOPICS IN IT INNOVATION (3 credits)**

This course is designed to acquaint students with issues which are current to the field or emerging trends in the IT Innovation area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ITIN 4000).

**Prerequisite(s):** Permission of instructor. Additional prerequisites may be required for particular topic offerings.

**ITIN 8100 INTERMEDIA (3 credits)**

This is an ongoing course that brings together students of the arts and students of scientific disciplines in order to facilitate and promote the creation of intermedia art, and to further explore shared resources, joint research, and exhibition/performance opportunities.

**Prerequisite(s):** Graduate Standing

**ITIN 8210 DESIGN SCIENCE AND THEORY DEVELOPMENT (3 credits)**

The purpose of this course is to help students understand theory, theoretical contributions, and design science. Students will approach such questions as: What is a theory? What makes a good theory? Why are theories just theories and not laws? What is not a theory? Following this introduction, we explore design science as a research methodology and Information Technology design theories. Ultimately, students create their own new studies around some design concept.

**Prerequisite(s):** Graduate standing / permission of the instructor

**ITIN 8220 DESIGN PROCESS (3 credits)**

Inter-disciplinary design teams will work together to design and innovate products of the future. The design projects in the course are developed to directly address a problem brought forward by a technology company in the Omaha area in order to provide students with a design experience that directly impacts real-world product development. Students will focus on the technological (interface), physical (ergonomics) and aesthetic quality of design, and will learn how to conduct rigorous user studies in a laboratory setting. Teams will be cross-disciplinary and consider all aspects of the design, creation, testing, and fabrication of the products.

**ITIN 8256 INNOVATION VENTURES (3 credits)**

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation, both as an instrument for new venture formation and as a core capability for addressing challenges in competitive landscapes. As such, the course lies at the intersection of innovation, entrepreneurship and strategy. Students will develop practical experience by experimenting with and refining business ideas. (Cross-listed with BSAD 8726, ENTR 4720, ITIN 4720, MGMT 4720, MKT 4720).

**Prerequisite(s):** Admission to a graduate program or instructor permission.

**ITIN 8266 USER EXPERIENCE DESIGN (3 credits)**

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, CSCI 8266, ITIN 4260).
ITIN 8300 RESEARCH FOUNDATIONS (3 credits)
This course serves as an introduction to research literature and research methodology in the innovation and creativity research domain. Students are introduced to skills, methodological issues, and bibliographic resources to enhance their ability in critically evaluating and conducting research in the IT Innovation field. Through a series of readings, in-class discussions, and lectures the student will select and define a research question, explore the various types of research designs and complete a literature review. This course is structured to make research meaningful and significant and enable students to write effectively.
Prerequisite(s): CIST 2500 or equivalent

ITIN 8900 INDEPENDENT STUDIES (1-3 credits)
A variable credit course for the graduate student who will benefit from independent reading assignments and research type problems. Independent study makes available courses of study not available in scheduled course offerings. The student wishing to take an independent study course should find a faculty member willing to supervise the course and then submit, for approval, a written proposal (including amount of credit) to the IT Innovation Graduate Program Committee Chair at least three weeks prior to registration.
Prerequisite(s): Written permission required

ITIN 8910 INTERNSHIP (1-3 credits)
The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the MS in IT Innovation program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.
Prerequisite(s): Students must have completed a minimum of 12 credit hours towards the MS in ITIN program. Instructor permission is required to register. Not open to non-degree graduate students.

ITIN 8940 ITIN CAPSTONE I (3 credits)
The purpose of the Information Technology Innovation (ITIN) capstone courses is for ITIN majors to explore, identify, evaluate, design, construct and implement a new innovative product that leverages information technology and includes an interdisciplinary field of study. The capstone is the culmination product of the specific various disciplines a student has selected as the unique combination for his or her degree. This course serves as part one of the capstone project for the ITIN Masters degree. The two courses for the ITIN capstone project are intended to be completed in two consecutive semesters (Fall/Spring).
Prerequisite(s): Must be pursuing ITIN MS degree and have completed: two sections of ITIN 8000, ITIN 8220, 8300, and 3 hours of upper division courses in interdisciplinary area identified in the student’s course plan. Not open to non-degree graduate students.

ITIN 8950 ITIN CAPSTONE II (3 credits)
The purpose of the ITIN capstone courses is for ITIN majors to explore, identify, evaluate, design, construct and implement a new innovative product that leverages information technology and an interdisciplinary field. The capstone is the culmination product for prospective graduate and utilizes the discipline(s) a student has selected as the unique combination for his or her degree. This course serves as part two of the capstone project for the Information Technology Innovation (ITIN) program. The two courses for the ITIN capstone project are taught in two consecutive semesters.
Prerequisite(s): Must be pursuing ITIN MS degree and have completed: three sections of ITIN 8000, ITIN 8220, 8300, 8940 and 6 hours of upper division courses in interdisciplinary area identified in the student’s course plan. Not open to non-degree graduate students.

ITIN 8960 THESIS EQUIVALENT PROJECT IN IT INNOVATION (1-6 credits)
This course allows a graduate student to conduct a research project in IT Innovation or a related area. The project is expected to place an emphasis on applied, implementations-based, or experimental research. The process for development and approval of the project must include: 1) apply for eligibility to take ITIN 8960 with a chosen faculty advisor, 2) register for 6 credits of ITIN 8960 to complete the chosen project, 3) participate in a public oral defense of their project work to the Graduate Concentration Committee. The approved written project will be submitted to the Office of Graduate Studies by the advertised deadlines.
Prerequisite(s): Permission of graduate advisor. Not open to non-degree graduate students.

ITIN 8990 THESIS (1-6 credits)
This course is required for the Master of Science degree in the MS in IT Innovation Program. The purpose of this course is to conduct original research in IT Innovation, under supervision of a faculty member, culminating in a paper document that represents the student’s competency in their chosen field, as well as scholarly contributions. With consultation from their committee, MS in IT Innovation thesis students should be prepared to independently complete the writing of their thesis and successfully defend their thesis.
Prerequisite(s): Graduate major in ITIN and approval of the Thesis Advisory Committee.

ITIN 9300 SOCIAL COMPUTING AND ITS APPLICATIONS (3 credits)
It is indisputable that social media and the Internet more broadly reshaped information disbursement and processing. Digital participation and communication has become the ‘new normal’ and the dividing line between off- and online communities is increasingly blurred. This leads to specific challenges in the extraction and analysis of online social media data, and the management of new communication.
Prerequisite(s): Open to all currently-admitted doctoral students. Students should have a technical aptitude; experience with at least one web scripting language, (e.g. PHP, rails, python etc) is helpful. Experience with JSON is advantageous but not essential.

Language Teaching

Degree Programs Offered

• Language Teaching, MA (p. 1281)

Certificate Programs Offered

• French Certificate (p. 1283)
• Spanish Certificate (p. 1284)
• Teaching Spanish to Heritage/Bilingual Learners Certificate (p. 1285)

French

FREN 8036 ADVANCED FRENCH CONVERSATION (3 credits)
This course focuses on the development of oral skills in French through the use of complex and sophisticated conversational structures and nuanced lexicon. Students will be involved in expressing or presenting their ideas and opinions, interpersonal speaking activities, and a variety of activities including reading short literary and cultural texts and screening films. (Cross-listed with FREN 4030).
Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

FREN 8056 SEMINAR IN THE CULTURE AND CIVILIZATION OF QUEBEC (3 credits)
An introduction to the many facets of Quebec Culture & Civilization, through readings on Quebec’s history and contemporary culture and also through films and other media related to Quebec. (Cross-listed with FREN 4050).
Prerequisite(s): FREN 2120 or departmental permission.
FREN 8076  FRANCOPHONE WEST AFRICA CULTURES (3 credits)
This course is intended as an introduction and exploration to the history, literary traditions and cinema of Francophone West Africa from 1945 to today. It seeks to familiarize students with the practice of reading literary texts, discussing seminal films and articulating critically informed reaction in writing. The course will focus on a selection of canonical and seminal films from Burkina Faso, Guinea, Ivory Coast, Mali, Mauritania and Senegal. The texts and films will provide a point of entry to the study of history, society, and culture. Historical, socio-political and cultural issues covered in the course will include: Ancient rites and oral literature, French colonization and post-colonialism, women and gender issues, childhood, immigration, the "Afropean" literature and West African Francophone countries contemporary challenges (politics and economies) with presentations on Benin, Niger and Togo today. (Cross-listed with FREN 4070).
Prerequisite(s): One French course at the 3000 or 4000 level - must be a graduate student

FREN 8156  CONTEMPORARY FRENCH NOVEL (3 credits)
Selected contemporary French novels are analyzed and discussed. The main objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the texts under consideration. In addition, students will examine the sociopolitical and cultural contexts of these literary works. (Cross-listed with FREN 4150).
Prerequisite(s): FREN 3060 or departmental permission. Not open to non-degree graduate students.

FREN 8176  CONTEMPORARY FRENCH THEATER (3 credits)
Selected contemporary French plays are analyzed and discussed. The main objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the texts under consideration. (Cross-listed with FREN 4170).
Prerequisite(s): FREN 3060 or permission of instructor. Not open to non-degree graduate students.

FREN 8226  THE STRUCTURE OF FRENCH (3 credits)
A survey of the linguistic structure of modern French, including phonology, morphology, and syntax. (Cross-listed with FREN 4220).
Prerequisite(s): FREN 3040 or departmental permission. Not open to non-degree graduate students.

FREN 8440  SEMINAR: FRENCH COMPOSITION (3 credits)
This course provides opportunities for students to refine their composition skills in French through extensive writing workshops and peer editing. Computer applications to composition will be employed.
Prerequisite(s): Admission to the Graduate College.

FREN 8866  MODERN FRENCH WOMEN AUTHORS (3 credits)
Selected contemporary French literary texts written by women are analyzed and discussed. This may include novels, short stories, poetry, and graphic novels. The primary objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the works under consideration. In addition, students will examine the sociopolitical and cultural contexts of these works. (Cross-listed with FREN 4860).
Prerequisite(s): FREN 3060 or permission. Not open to non-degree graduate students.

FREN 8900  FRENCH INDEPENDENT STUDY (1-3 credits)
Specifiically planned projects and readings in a well-defined field of French literature or linguistics carried out under the supervision of a member of the foreign languages faculty holding graduate faculty status.

FREN 8906  INDEPENDENT STUDY (1-3 credits)
Specially planned readings in a well-defined field of literature, carried out under the supervision of a member of the foreign language faculty. Designed primarily for the student who has need of work not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated for credit once. (Cross-listed with FREN 4900).
Prerequisite(s): Permission of the instructor, junior or senior standing, and no incompetes outstanding.

FREN 8956  PRO-SEMINAR: LITERATURE AND/OR FILM (3 credits)
This course is dedicated to the study of a narrow field of the literature and/or cinema of the Francophone world. (Cross-listed with FREN 4950).
Prerequisite(s): Graduate student status.

FREN 8966  PRO-SEMINAR: CULTURE AND SOCIETY (3 credits)
This course will address narrow field of study of the civilization, history, film, contemporary culture, art, politics, and or cultural studies of the Francophone world. (Cross-listed with FREN 4960).
Prerequisite(s): FREN 3030, FREN 3040, and FREN 3060

GERM 8046  ADVANCED GERMAN COMPOSITION AND STYLISTICS (3 credits)
Advanced grammatical principles, composition and stylistics.

GERM 8166  BLACK GERMANY: PEOPLE AND CULTURE (3 credits)
The course addresses fiction, film, photography, music and journalism to dive into Black people's contribution to German culture. From the formation of a Black community in imperial Germany, to the African American GI's role in postwar democratization process, the artistic output of so-called "occupation babies" born in the wake of WWII, to contemporary artists who continue to expand and refine German culture. The African Diaspora in Germany is a rich field to expand our notion of global connectedness and cultural identity, while taking a deep dive into contemporary German culture and social developments. (Cross-listed with GERM 4160).

GERM 8226  THE STRUCTURE OF GERMAN (3 credits)
A survey of the linguistic structure of modern German, including phonology, morphology, and syntax. (Cross-listed with GERM 4220).
Prerequisite(s): GERM 3040 and GERM 4610, or permission.

GERM 8440  SEMINAR: GERMAN COMPOSITION (3 credits)
This course will provide opportunities for students to refine their composition skills in German through extensive writing workshops and peer editing. Computer applications to composition will be employed.
Prerequisite(s): Admission to Graduate College.

GERM 8866  MODERN GERMAN WOMEN AUTHORS (3 credits)
This course will address narrow field of study of linguistics, translation/interpretation or the professional language of the Francophone world. (Cross-listed with FREN 4960).
Prerequisite(s): Graduate student status.
GERM 8966 PRO-SEMINAR: SOCIETY AND CULTURE (3 credits)
This course will address a narrow field of study of the civilization, history, film, contemporary culture, art, politics, and/or cultural studies of the German-speaking world. (Cross-listed with GERM 4960).
Prerequisite(s): GERM 3030, GERM 3040, and GERM 3060

GERM 8976 PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS (3 credits)
This course will address a narrow field of study of linguistics, translation/interpretation or the professional language of the German-speaking world. (Cross-listed with GERM 4970).
Prerequisite(s): Graduate student status.

Spanish

SPAN 8026 LANGUAGE ENHANCEMENT THROUGH VOCABULARY LEARNING (3 credits)
This class aims to expand students’ vocabulary in Spanish. This will be achieved through doing an overview of current research that investigates how vocabulary is learned; identifying effective vocabulary learning strategies; and exploring topics not commonly encountered in Spanish classes such as commerce and science. The course also includes points of contact with the Spanish-speaking community in Omaha, where students can participate in interactions that connect what has been learned in the classroom to language use in real life. (Cross-listed with SPAN 4020).
Prerequisite(s): Graduate standing

SPAN 8036 ADVANCED SPANISH CONVERSATION (3 credits)
This course targets the development of oral skills in Spanish through the incorporation of complex and sophisticated conversational structures and nuanced lexicon. In particular, the course focuses on presentational (i.e., expressing or exposing ideas or opinions), and interpersonal speaking (i.e., engaging in conversation where learners narrate and describe in the major time frames of past, present, and future in paragraph-length discourse with control of aspect). (Cross-listed with SPAN 4030).
Prerequisite(s): Graduate standing

SPAN 8046 ADVANCED COMPOSITION AND STYLISTICS (3 credits)
In this capstone course, required for the completion of the major, learners will explore and practice advanced grammatical structures, write compositions in a variety of genres, and familiarize themselves with advanced stylistics. (Cross-listed with SPAN 4040).
Prerequisite(s): Not open to non-degree graduate students.

SPAN 8066 INTRODUCTION TO TRANSLATION AND INTERPRETATION (3 credits)
This course offers an introduction to the translation and interpretation field. Course objectives include (a) understanding translation theory; (b) comprehending the role of communication in translation and interpretation; (c) targeting common grammatical and pragmatic errors; (d) increasing vocabulary knowledge in a variety of fields; and (e) gaining an increased awareness of the rigor and demands innate to the translation and interpretation fields. (Cross-listed with SPAN 4060).
Prerequisite(s): Admission to MALIT program or permission of instructor

SPAN 8076 HISPANIC BILINGUALISM (3 credits)
This course explores bilingualism among Spanish speaking populations. Topics include societal bilingualism, the history of Spanish and language policy in Spain, Latin America, and the U.S., psychological aspects of bilingualism, monolingual vs. bilingual acquisition, first vs second language acquisition, and Spanish as a heritage language in the U.S. (Cross-listed with SPAN 4070).

SPAN 8086 INTRODUCTION TO HISPANIC LINGUISTICS (3 credits)
This course introduces students to the field of linguistics by exploring the following areas: phonetics and phonology (sound systems), morphology (word formation), historical linguistics (language development over time), and sociolinguistics and pragmatics (language in society and context), among others, as framed within the study of the Spanish language. (Cross-listed with SPAN 4080).
Prerequisite(s): SPAN 3030 and SPAN 3040 OR SPAN 3010 and SPAN 3020; Graduate standing

SPAN 8126 HISPANIC SOCIOLINGUISTICS (3 credits)
This course introduces sociolinguistics, the study of the relationship between language and society, with an emphasis on the Spanish language. Its focus will be on correlational linguistics (how social factors such as age, gender and socioeconomic status affect language) and language and society (the role language plays in human conduct and social organization). Course topics will include the concept of speech communities, sociolinguistic variables, phonological and syntactic variation as well as languages in contact, bilingualism, Spanish in the U.S., Spanish as a heritage language, and language attitudes and ideologies. (Cross-listed with SPAN 4120).
Prerequisite(s): SPAN 8086 or instructor permission

SPAN 8136 SPANISH IN THE UNITED STATES (3 credits)
This course looks at Spanish in the U.S. from a sociolinguistic perspective. Course topics include: Dialectal/regional differences, dialect contact, Spanish-English bilingualism and code-switching, "Spanglish", language maintenance, language ideologies surrounding Spanish in the U.S., and Spanish in public spheres (e.g., TV, movies, radio, music, stand-up comedy). (Cross-listed with SPAN 4130).
Prerequisite(s): SPAN 8086 or instructor permission

SPAN 8146 INTRODUCTION TO LATIN AMERICAN FILM (3 credits)
The course will be a thematic study of significant Latin American films emphasizing and further investigating their relationship to history, culture, society and political issues that have often given rise to social movements. Films from a variety of Spanish-speaking countries including Mexico, Argentina, Chile, Cuba, Bolivia, etc. will be studied in their socio-political context. At the 8146 level, students will be introduced to theoretical approaches such as early film theory, montage theory, feminist theory, race theory, and phenomenological film theory in order to deepen their understanding these themes. (Cross-listed with SPAN 4140, LLS 4140).

SPAN 8156 LITERATURE/CULTURE: CENTRAL AMERICA AND THE CARIBBEAN 1598-2000 (3 credits)
"Literature/ Culture: Central America and the Caribbean 1598-2000" studies major historical and socio-cultural events in Latin American history in the 20th century, through their articulation in literary texts, film, and other cultural expressions from Central America and the Hispanic Caribbean. (Cross-listed with SPAN 4150, CACT 8416)
Prerequisite(s): SPAN 3030, SPAN 3040 and SPAN 3060 or permission of instructor

SPAN 8176 INTRODUCTION TO LATIN AMERICAN LITERATURES (3 credits)
The course is intended as an introduction to the study of canonical and non-canonical texts in Latin American literatures, from the 16th to 21st centuries. It seeks to acquaint students with the rich literary traditions of a large region, from South America to Central America and Mexico, as well as with the historical challenges posed by the salient heterogeneity of texts included in the Latin American corpus, from the standpoint of ethnicity, gender, social class, and literary genre. The course also focuses on continuing to develop Spanish language skills, specifically reading for comprehension and interpretation of metaphorical meaning, writing, and presentational speaking skills in Spanish. (Cross-listed with SPAN 4170, LLS 4170).
Prerequisite(s): SPAN 3030 and SPAN 3040, or SPAN 3010 and SPAN 3020; Graduate standing
SPAN 8196 REPRESENTATIONS OF THE SPANISH CIVIL WAR IN FILM AND POPULAR CULTURE (3 credits)
This course explores the principal social, economic, political, and cultural implications of the Spanish Civil War, including its antecedents and consequences, in order to critically analyze the ways in which such historical matters have been represented over time through film, as well as through other media. The course also focuses on the continued development of Spanish language skills, such as formal and informal essay writing, presentational speaking skills in Spanish, advanced reading, and interpretation of film theory and criticism. (Cross-listed with SPAN 4190).
Prerequisite(s): Graduate standing

SPAN 8226 THE STRUCTURE OF SPANISH (3 credits)
This course introduces students to the structure of the Spanish language with a focus on its morphology and syntax seen as the study of constituents of a sentence, lexical categories, content and function words, the pronominal system, the structure of simple and complex sentences, and the verbal system, among others. It reviews frequent syntactical errors in Spanish L2 and Heritage learners with the purpose of advancing their linguistic competence. (Cross-listed with SPAN 4220).
Prerequisite(s): SPAN 3030 and 3040 or SPAN 3010 and SPAN 3020; graduate standing

SPAN 8336 LINGUISTIC JUSTICE AND LATINO HEALTH (3 credits)
Language barriers compromise the quality of health care for millions of Spanish-speaking patients each year. Spanish-speaking patients, for example, have disease (e.g., musculoskeletal diseases, pesticide poisoning, cervical cancer, HIV/AIDS), mortality, and pain burdens at least twice as high as English-speaking patients. At the same time, they have been disproportionately affected by infectious diseases such as the tuberculosis outbreaks or the COVID-19 pandemic. These facts make language a crucial concern for the improvement of health among Latinos in the US. Students in this course examine the relationship between language, health care, and health among Spanish speakers in the US through the dual lens of sociolinguistics and public health. We consider the effect of linguistic and discursive practices on access to health information and examine some of the measures currently in place to improve the transmission of health information across language boundaries. (Cross-listed with SPAN 4330).
Prerequisite(s): Instructor permission

SPAN 8440 SEMINAR: SPANISH COMPOSITION (3 credits)
This course provides opportunities for students to refine their composition skills in Spanish through extensive writing workshops and peer editing. Computer applications to composition will be employed.
Prerequisite(s): Admission to the Graduate College.

SPAN 8516 ILLNESS AND DISEASE IN SOUTHERN CONE LATIN AMERICAN LITERATURES AND CULTURES (3 credits)
The course will examine representations of illness, disease, and afflictions in literary and cultural texts from the Latin American Southern Cone, focusing in Argentina, Uruguay, and Chile. It will explore notions of health and disease, as embedded in literary and cultural texts from the late 19th to the 21st centuries. We will examine the ways in which physical ailments, mental health symptoms, and other conditions or disorders have been conceptualized and portrayed, co-relating the individual “disruptions” caused by unwellness with a host of social and cultural factors. The course will also explore current treatments and therapies for the illnesses discussed in the texts, taking into account the integration of western and alternative medicine and practices. (Cross-listed with SPAN 4510, LLS 4510, LLS 8516).
Prerequisite(s): Graduate student standing

SPAN 8536 DIALECTS OF THE SPANISH-SPEAKING WORLD (3 credits)
This course explores the diversity and variation of the various dialects within the Spanish-speaking world. Special attention will be devoted to understanding phonetic and phonological processes that make up these dialects. Students will increase their familiarity with the diversity of the Spanish-speaking world and the complexity of the relationship between languages and dialects. Through the course, students will employ data-collection skills and methods commonly used in the field of linguistics. Course will be conducted in Spanish. (Cross-listed with SPAN 4530).
Prerequisite(s): SPAN 8086 or instructor permission; Graduate standing

SPAN 8766 FORENSIC LINGUISTICS (3 credits)
This course will present an overview of forensic linguistics with an emphasis on the areas where linguistics (i.e., the study of language and its structures) and the law intersect. We will especially focus on these items: the nature of legal language, linguistic methods for determining the meaning of laws and statutes, types of linguistic analysis used for investigating deception and fraud, language used for profiling and identifying suspects in criminal cases, the relationship between language proficiency and defendants’ ability to understand their rights, the legal and linguistic complexities of invoking one's rights, the language-related factors that lead to false confessions, the role of linguistic analysis in civil cases, and the challenges faced by court interpreters and other linguistic complexities of the courtroom. (Cross-listed with SPAN 4760).

SPAN 8900 SPANISH INDEPENDENT STUDY (1-3 credits)
Specifically planned projects and readings in a well-defined field within the areas of language, literature, culture, linguistics, or language acquisition, carried out under the supervision of a member of the foreign languages faculty holding graduate faculty status.
Prerequisite(s): (1) Acceptance into the Master of Arts in Language Teaching Program (MALT). Must have completed a minimum of six graduate credit hours, (2) Acceptance in Graduate Certificates. Must have completed a minimum of 6 graduate credit hours.

SPAN 8905 INDEPENDENT STUDY (1-3 credits)
Specially planned readings in a well-defined field of literature, carried out under the supervision of a member of the foreign language faculty. Designed primarily for the student who has need of work not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated for credit once.
Prerequisite(s): Senior status, no incompletes outstanding, and departmental permission.

SPAN 8956 PRO-SEMINAR: LITERATURE AND/OR FILM (3 credits)
This course is dedicated to the study of a narrower field of the literature and/or cinema of the Spanish-speaking world. (Cross-listed with SPAN 4950)
Prerequisite(s): Graduate standing

SPAN 8956 PRO-SEMINAR: CULTURE AND SOCIETY (3 credits)
This course will address a narrow field of study of the civilization, history, film, contemporary culture, art, politics, and/or cultural studies of the Spanish-speaking world. (Cross-listed with SPAN 4950)
Prerequisite(s): SPAN 3030 and SPAN 3010 or SPAN 3570 and enrolled in minor in Spanish for Health Sciences or SPAN 3050 and enrolled in minor in Spanish for Health Sciences

SPAN 8976 PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS (3 credits)
This course addresses a narrow field of study in linguistics or the professional language of the Spanish-speaking world. (Cross-listed with SPAN 4970)
Prerequisite(s): Graduate standing.

Language Teaching, MA

Department of Foreign Languages, College of Arts & Sciences
Vision Statement
The Master of Arts in language teaching program at the University of Nebraska at Omaha (UNO) is the only graduate program in the region that provides practicing and future teachers of Spanish, French, and English as a second or other language with a rigorous, practically oriented education founded on scholarship specifically in the pedagogy of language teaching. Students expand not only their familiarity with the latest research on applied linguistics and effective instructional techniques for L2 and heritage learners, but also the literature and culture of their language of focus. The program strives to strengthen language education in the region by equipping its students with the knowledge and skills to apply best pedagogical practices in world language and TESOL classrooms.

Program Contact Information

Program Website (https://www.unomaha.edu/college-of-arts-and-sciences/foreign-languages-and-literature/)

Other Program Related Information
Note that completion of the MALT program by itself does not certify you to teach in the Nebraska public school system. If you are interested in pursuing teacher certification along with your MALT degree, please contact the MALT program’s GPC.

Fast Track Program
The Department of Foreign Languages and Literature has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor’s degree and a master’s degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:
• This program is available for undergraduate students pursuing the BA degree with Foreign Languages & Literature major with concentrations in Spanish and/or French desiring to pursue an MA in Language Teaching. In addition, students pursuing the BA in English with a concentration in Language Studies or students pursuing the TESOL certificate desiring to pursue an MA in Language Teaching.
• Students must have completed no fewer than 60 undergraduate hours
• Students must have a minimum undergraduate GPA of 3.0
• Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
• Students will work with their undergraduate advisor to register for the graduate courses
• A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good academic standing
• Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted to undergraduate status including financial aid
• Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.

• Admission to Fast Track does NOT guarantee admission to the graduate program.
• The admit term must be after the completion term of the undergraduate degree.
• Students can complete 9 credit hours in the target language (cross-listed courses at the 4000 level).

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
• Fall: June 30
• Spring: November 15
• Summer: April 15

Note: Applications will still be received and reviewed until term begins.

Other Requirements
• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
  • Internet-based TOEFL: 100, IELTS: 7.5, PTE: 68, Duolingo: 130
• Statement of Purpose: A personal statement (700-900 words, double space), written in the language of the concentration you are applying for. If applying for a double major or a minor, you should also include a personal statement in those languages. Some topics you might want to consider:
  • Interests and qualifications for graduate study
  • Description of yourself and your intellectual development
  • Strengths and weaknesses, and how you overcame them or challenges to overcoming them
  • Reasons why you want to join this program
  • Possible areas of research or deeper study
  • What you want to do after graduation
• Letters of Recommendation: Two letters of recommendation are required
  • Applicant must have taken ENGL 3610 or SPAN 4080 or an equivalent course. Those who do not meet this requirement may be admitted provisionally.
  • Applicant must schedule an oral target language interview with a MALT faculty member. This includes an interview in English for non-native speakers who apply to the TESOL concentration. Please contact the Graduate Program Chair for assistance.

Total Credits 36

Exit Requirements
The final requirements of the degree for all concentrations are as follows:

1. Successful completion of a poster presentation during the Colloquium on Language Teaching. Students should have completed at least nine credit hours in the program (or obtain special permission from their advisor) in order to give their poster presentation.
2. Successful completion of the student’s portfolio at the end of the second to the last semester in the program.
3. Successful completion of a written and oral comprehensive examination. The exam is administered in the student’s final semester in the program.

Concentrations
French Concentration

Objectives

The graduate certificate in French provides students with intensive language proficiency training in the target language through six courses (18 credits) in French/Francophone cultures and literatures. Students interested in language teaching can also meet course requirements with up to six credits in language teaching pedagogy courses.

The graduate certificate in French is designed for individuals wishing to improve their overall proficiency in French, as well as those interested in pursuing additional graduate credits so they can be accredited to teach

Total Credits 18

Electives

These course are approved in consultation with the graduate advisor during the advising process (12 hours in target language).

Total Credits 12

French Certificate

Department of Foreign Languages, College of Arts & Sciences

Vision Statement

The graduate certificate in French provides students with intensive language proficiency training in the target language through six courses (18 credits) in French/Francophone cultures and literatures. Students interested in language teaching can also meet course requirements with up to six credits in language teaching pedagogy courses.

The graduate certificate in French is designed for individuals wishing to improve their overall proficiency in French, as well as those interested in pursuing additional graduate credits so they can be accredited to teach
courses for the dual-enrollment programs at UNO or at other metropolitan and regional universities.

Spanish Certificate
Department of Foreign Languages, College of Arts & Sciences

Vision Statement
The graduate certificate in Spanish provides students with the opportunity to earn a certificate degree after successful completion of 18 credit hours of intensive language proficiency training in Spanish. The program includes courses in Hispanic cultures, literature, linguistics, and, for those students interested in language teaching, language teaching pedagogy.

The graduate certificate in Spanish presents a rigorous language program that seeks to serve these student populations: (a) High school faculty interested in teaching dual enrollment classes and who are required to have 18 graduate credit hours in their discipline to be eligible. (b) Bilingual instructors who support dual language and world language programs. (c) Individuals in various fields (e.g., law enforcement, social work, psychological services, healthcare) who work with Spanish-speaking individuals.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements
- Undergraduate grade point average of at least 3.0
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 100, IELTS: 7.5, PTE: 68, Duolingo: 130
  - Statement of Purpose: A statement of purpose (700-900 words, double space), written in Spanish is required. Some topics you might want to include:
    - Your interests and qualifications for graduate study
    - Description of yourself and your intellectual development

| FLNG 8030 | SEMINAR: SECOND AND BILINGUAL LANGUAGE ACQUISITION THEORY |         |
| FLNG 8040 | SEMINAR: ASSESSMENT & CURRICULUM DESIGN                 |         |
| FLNG 8960 | SEMINAR: SPECIAL TOPICS                                 |         |

Total Credits 18
• Strengths and weaknesses, and how you overcame them or challenges to overcoming them
• Reasons why you want to join this program
• Possible areas of research or deeper study
• What you want to do after completion of the certificate

• **Letters of Recommendation:** Two letters of recommendation are required.

### Teaching Spanish to Heritage/Bilingual Learners Certificate

**Department of Foreign Languages, College of Arts & Sciences**

**Vision Statement**

A graduate certificate in teaching Spanish to heritage/bilingual learners will provide students with the opportunity to earn a graduate certificate after completion of 18 credit hours. Courses will focus on the study of sociolinguistic and pedagogical (theory and practice) subjects relevant to the intricacies and challenges of teaching Spanish to bilingual learners (children who are bilingual) and heritage learners (bilingual adults).

**Program Contact Information**

Cecilia Tocaimaza-Hatch, PhD, Graduate Program Chair (GPC)

301 Arts & Sciences Hall (ASH)

402.554.4841
ctocaimazahatch@unomaha.edu

**Admissions**

General Application Requirements and Admission Criteria ([https://catalog.unomaha.edu/graduate/admission/](https://catalog.unomaha.edu/graduate/admission/))

**Program-Specific Requirements**

**Application Deadlines (Spring 2024, Summer, 2024, and Fall 2024)**

Applications for this program are accepted on a rolling basis with a priority deadline of June 30 for fall admission, November 15 for spring admission, and April 15 for summer admission.

**Other Requirements**

- Undergraduate grade point average of at least 3.0
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list ([https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf](https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf)), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 100, IELTS: 7.5, PTE: 68, Duolingo: 130
- **Letters of Recommendation:** Two letters of recommendation are required.
• If Spanish was not the applicant’s major and it is not his/her native language, he/she must schedule an oral entrance interview with a MALT faculty member. Applicant needs to be rated as advanced-low. See the ACTFL 2012 guidelines for criteria information: https://www.actfl.org/resources/actfl-proficiency-guidelines-2012 (https://www.actfl.org/resources/actfl-proficiency-guidelines-2012/)

**Select one of the following:**

- SPAN 8076 | HISPANIC BILINGUALISM
- SPAN 8126 | HISPANIC SOCIOLINGUISTICS
- SPAN 8136 | SPANISH IN THE UNITED STATES

**Select two of the following:**

- SPAN 8026 | LANGUAGE ENHANCEMENT THROUGH VOCABULARY LEARNING
- SPAN 8086 | INTRODUCTION TO HISPANIC LINGUISTICS
- SPAN 8176 | INTRODUCTION TO LATIN AMERICAN LITERATURES
- SPAN 8226 | THE STRUCTURE OF SPANISH
- FLNG 8020 | SEMINAR: FL/TESOL RESEARCH
- FLNG 8030 | SEMINAR: SECOND AND BILINGUAL LANGUAGE ACQUISITION THEORY
- FLNG 8040 | SEMINAR: ASSESSMENT & CURRICULUM DESIGN

**Total Credits**: 18

Students must complete all required coursework with a grade of B or better.

**Literacy, MS**

**Teacher Education Department, College of Education, Health, and Human Sciences**

**Vision Statement**

Literacy is foundational to every part of teaching and learning. The Master of Science in literacy focuses on literacy pedagogy, as well as supporting candidates to become critically engaged teachers who are prepared to support diverse learners in all aspects of literacy learning. Candidates will engage in experiences to bridge theory to practice, while working toward professional goals as leaders in the field.

For candidates who hold a current teaching certificate, the Master of Science in literacy leads to eligibility for an added PK-12 Reading Specialist endorsement. During the program candidates will:

- Bridge theory, research, and practice to support PK-12 students in authentic literacy experiences;
- Support, assess, and develop interventions to help students thrive as literacy learners in PK-12 settings;
- Create classrooms that engage culturally responsive teaching practices to support diverse students;
- Critically examine various types of literature to increase students’ skills and perspectives;
- Engage as literacy leaders at local and national levels;
- Develop skills to navigate and to build action research in classrooms.

Special Note: To add the endorsement to your teaching certificate, the Nebraska Department of Education requires a minimum of two years of teaching experience and successful completion of the Praxis II.

**Program Contact Information**

jenniferlemke@unomaha.edu (kdanielson@unomaha.edu)

Chris Wilcoxen, EdD, Graduate Program Chair (GPC)
308 Roskens Hall (RH)
402.554.2119
cwilcoxen@unomaha.edu (cwilcoxen@unomaha.edu)

**Program Website** (http://www.unomaha.edu/college-of-education/teacher-education/graduate/literacy.php)

**Other Program-Related Information**

The master's degree in literacy does not lead to initial teacher certification.

**Unclassified Students**

Students who are not planning to pursue a program leading to a graduate certificate or a master’s degree can be admitted to the literacy program with unclassified status. Candidates holding a previous master’s degree in education who are seeking additional teaching endorsements may wish to choose an unclassified status. Unclassified students are allowed to take courses for which they meet the prerequisite. Successful completion of graduate courses as an unclassified student does not obligate the department to accept those courses for credit toward the fulfillment of degree requirements. Formal advisement in an endorsement area is required. Students admitted as unclassified are not eligible for financial aid.

Formal advisement in an endorsement area is required.

- Candidates should apply for endorsements as soon as they are eligible. If a candidate applies 10 years or more after completing all coursework, a review is required to determine if more coursework is needed.
- To add an endorsement 1/3 of the coursework must be completed at UNO in the endorsement area.

**Admissions**

General Application Requirements and Admission Criteria (p. 974)

**Program-Specific Requirements**

**Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)**

- Fall: August 1
- Spring: December 1
- Summer: June 1

**Other Requirements**

- A minimum undergraduate GPA of 3.0 (on a 4.0 scale).
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a pre-determined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-
must meet the minimum language proficiency score requirement in order to be considered for admission.

- Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Valid teaching certificate
- International students who do not expect to teach in the US may be eligible for admission.

The requirements displayed below are for students not pursuing a concentration.

**Total Credits** 36

**TED 8000 SPECIAL STUDIES (3 credits)**

A series of intensive studies especially for in-service teachers scheduled as regular seminars or classes, according to purpose. Possible topics may include Reading Intervention, Mental Health, Social Emotional Learning, Math in the Community, etc.

**Prerequisite(s):** Graduate status
TED 8006 SPECIAL METHODS IN THE CONTENT AREA (3 credits)
This course is designed to develop knowledge, skills, and dispositions requisite of teachers. Course content is determined by the discipline area. For some content areas a field experience will be required. This is an in-school, guided practicum completed in conjunction with TED 4000 math, science, language arts, world languages, Business, Information Technology, ESL and social studies sections. Candidates must demonstrate competencies related to performance in 7-12 classrooms. This is the final practicum experience prior to the clinical practice semester. (Cross-listed with TED 4000).

TED 8010 INTRODUCTION TO RESEARCH (3 credits)
This course will introduce advanced degree candidates to: A) an understanding of the scientific method as applied to behavioral research, both qualitative and quantitative; B) assessment, evaluation, descriptive, causal-comparative, experimental, and qualitative data gathering procedures and analytical strategies; C) sampling theory, techniques, distribution and hypothesis testing; D) specific designs, methods, and tools of qualitative and quantitative research; E) search and retrieval of published research, both American and international (global); F) basic statistics, both descriptive and inferential; G) the ethical requirements of conducting research with human participants as outlined by Institutional Review Boards; H) a project involving critical evaluation of both qualitative and quantitative research studies.

Prerequisite(s): Graduate standing.

TED 8030 SEMINAR IN EDUCATION (3 credits)
This is a variable content course focusing on topics of current relevance to PK-12 teachers.

Prerequisite(s): Graduate standing.

TED 8040 SEMINAR ON STUDENT TEACHING/NEW TEACHER INDUCTION (3 credits)
The seminar is designed for experienced teachers who are, or may be, serving as cooperating teachers for student teachers or as mentor teachers for beginning teachers. Participants will study the purposes, techniques, and trends involved in serving as a cooperating teacher or as a mentor.

Prerequisite(s): Successful teaching experience is required for this course.

TED 8050 DATA-DRIVEN DECISION MAKING FOR EDUCATORS (3 credits)
This course provides graduate students with hands-on experiences that model data-driven decision making for educational success in today’s classroom. Students will learn how to create valid and reliable assessments; interpret standardized test data; build data models that identify student, classroom, program, and school needs; and in general, to systematically enhance educational decision making from a base of carefully collected information. Graduate students will also explore data collection and analysis strategies associated with technologies such as cloud computing, tablet computers, and smart phones. In addition, they will experience data-driven decision-making models that can be integrated into student lessons to not only teach more effectively with data-driven decisions, but also to help teach students about data-driven decision-making. The course will use real data sets and cases, in interesting, hands on and technology-rich activities, to help educators learn how to find the "educational story" represented by a set of carefully collected data points. (Cross-listed with STEM 8050).

Prerequisite(s): Graduate standing.

TED 8055 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)
This course is designed to enhance candidates’ understanding of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs) in the U.S. context. As dedicated practitioners, reflective scholars, and responsible citizens, students will have knowledge of factors that contribute to an effective multicultural and multilingual learning environment. TED 3050 includes an in-school, guided practicum. Candidates must demonstrate competencies related to teaching English Learners (ELs) in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education.

Prerequisite(s): TED 2300 (EDUC 2010) OR TED 2380; and TED 2050.

TED 8060 CURRENT ISSUES AND TRENDS IN EDUCATION (3 credits)
The course is an advanced study of current issues and trends which have substantial impact on PK-12 education. The graduate candidates who take this class will read, analyze, and evaluate relevant research in order to become conversant in those issues.

Prerequisite(s): Graduate status is required.

TED 8070 TEACHING MULTIPLE INTELLIGENCE (3 credits)
This course focuses on the utilization of the multiple intelligences (MI) theory by teachers to enhance children’s understanding of various disciplines. Graduate candidates will have the opportunity to explore, evaluate, and develop various methodologies that foster understanding.

Prerequisite(s): Graduate status.

TED 8080 STORYTELLING AND EDUCATION (3 credits)
This course is designed to consider the importance of storytelling, to provide teacher candidates with the background materials for storytelling, to study resource material for storytelling from a variety of cultures, and to develop techniques for storytelling. Actual experience in storytelling and opportunities for evaluating storytelling experiences will be provided.

Prerequisite(s): Graduate status

TED 8100 RESEARCH PROJECT (1-3 credits)
This course is designed for individual or group study and analysis of specific problems in schools dealing with curriculum and instruction in areas which have a broad scope of application rather than a specific level.

Prerequisite(s): Approval of Advisor.

TED 8120 FOUNDATIONS OF ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)
TED 8120 is designed to enhance graduate candidates’ knowledge of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs). As dedicated practitioners, reflective scholars, and responsible citizens, graduate candidates will learn strategies for designing and promoting effective multicultural and multilingual learning environments. This course includes an in-school, guided practicum through which graduate candidates must demonstrate competencies related to standards related to teaching ELs in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education’s ESL teaching endorsement.

Prerequisite(s): Not open to non-degree graduate students.

TED 8130 LANGUAGE, CULTURE, AND POWER (3 credits)
This course will focus on the intersection of language, culture, and power in the schools. This seminar will research how each component impacts the students and teachers in the classroom.
**TED 8150 ANTI-RACISM EDUCATION: PRINCIPLES AND PRACTICES (3 credits)**
This course provides a theoretical analysis of race, racism and the implications for anti-racist education. In addition to exploring the key features of anti-racism education, the course also addresses other axes of oppression, namely, class and gender, with a critical focus on racialized power and privilege, and how such features function in the broader U.S context as well as the schooling environment. Of equal importance is a critical interrogation of the historical, ideological, and political processes that produce and maintain racism. Course participants explore pedagogies, curriculum, and school leadership strategies as mechanisms for instituting anti-racism work in schools and community.

**Prerequisite(s):** Graduate Status

**TED 8160 ENGLISH AS A SECOND LANGUAGE STRATEGIES FOR PK-12 EDUCATORS (3 credits)**
This course is designed to enhance graduate candidates' knowledge of PK-12 English as a Second Language (ESL) pedagogical and assessment strategies that address the needs of English Language Learners (ELs) in content area classrooms. As dedicated practitioners, reflective scholars, and responsible citizens, graduate candidates will be able to explore evidence-based pedagogical and assessment strategies to use in educational contexts serving ELs.

**Prerequisite(s):** Graduate candidate status. Not open to non-degree graduate students.

**TED 8170 DEVELOPMENTAL ASSESSMENT OF THE YOUNG CHILD (3 credits)**
This course is designed as a survey of developmental assessment in early childhood education (ages birth to eight years). Selection of assessment tools and strategies, implementation, data collection, analysis of results, and teaching impact are addressed in context of key assessment purposes in the early childhood field.

**Prerequisite(s):** Graduate status.

**TED 8180 CULTURALLY RESPONSIVE TEACHING (3 credits)**
This course includes an introductory analysis of the societal and institutional processes and problems which have bearing upon the education of children in urban settings. In addition, the course will focus on knowledge, skills and dispositions related to instructional strategies and classroom management needed for effective teaching in an urban environment.

**Prerequisite(s):** Graduate status

**TED 8190 CONTEMPORARY ISSUES IN URBAN EDUCATION (3 credits)**
This course is designed for candidates who wish to keep abreast of contemporary issues which confront the educational institution and teaching profession within the urban milieu.

**Prerequisite(s):** Graduate Status

**TED 8200 SOCIAL WORLDS OF THE YOUNG CHILD (3 credits)**
This course will explore theoretical and cultural perspectives on the social and emotional development of young children. This course will also examine the relationship between social emotional development, guidance practices, democratic life skills, and school readiness.

**Prerequisite(s):** Graduate status

**TED 8210 THE PRINCIPLES OF MULTICULTURAL EDUCATION (3 credits)**
This course will develop practicing teachers' awareness of and skill in meeting the needs of P-12 students with regards to the areas of human understanding, acceptance and value. Candidates will examine existing attitudes towards various minority groups such as racial, ethnic, gender, exceptionality, etc. School materials and attitudes will also be examined in determining the effect they have on PK-12 students.

**Prerequisite(s):** Graduate status

**TED 8220 PLAY AS A LEARNING MEDIUM IN EARLY CHILDHOOD EDUCATION (3 credits)**
This course provides an in-depth examination of young children's play and its curricular role in the early childhood classroom. The origins, developmental outcomes, assessment, curricular implementation, and evaluation of play will be covered, with an emphasis on play as a major component of developmentally appropriate practice with young children. The focus is on teachers learning to help children become partners in the operation of the learning environment.

**TED 8230 LITERATURE FOR THE YOUNG CHILD (3 credits)**
Literature for the young child is examined through the lens of developmentally appropriate practice for informing educators' interactions with children and also for developing high-quality, literature-related projects of study across the early childhood (birth-through-age-eight) continuum.

**Prerequisite(s):** Graduate Status

**TED 8240 FAMILY, SCHOOL, AND COMMUNITY PARTNERS (3 credits)**
This course will examine the purposes and methods for developing family, school, and community partnerships. Candidates will explore characteristics of diverse families and develop the skills necessary for planning, design, implementation, and evaluation of effective partnerships in early childhood settings.

**Prerequisite(s):** Graduate Status

**TED 8250 ASSESSMENT FOR CLASSROOM TEACHER (3 credits)**
This course studies assessment principles, effective practices, and classroom assessment processes throughout the curriculum. The research regarding assessment for learning is studied and application is made to classroom practices.

**Prerequisite(s):** Graduate status

**TED 8260 ADVANCED CURRICULUM IN EARLY CHILDHOOD (3 credits)**
This course is designed to provide an in-depth examination of the processes used in selecting and implementing appropriate curricular content in programs for children ages three to eight years. Particular emphasis is on the role of the teacher as a dedicated practitioner and reflective scholar in the early learning environment.

**TED 8270 TRENDS IN EARLY CHILDHOOD EDUCATION (3 credits)**
This course provides a context for examining socio-political and research-based influences underlying trends in early childhood education at the local, national and international levels.

**Prerequisite(s):** Graduate Status

**TED 8280 INTRODUCTION TO HUMAN RIGHTS IN P-12 EDUCATION (3 credits)**
The course examines the intersection of human rights and P-12 education and prepares individuals to effectively work with and advocate for children and adolescents in educational settings. Students completing the course will be able to 1) demonstrate an increased understanding of fundamental human rights with a specific emphasis on education rights and the human rights of children and adolescents 2) create learning environments that elevate human rights in educational settings and 3) design developmentally appropriate instruction for children and adolescents on varied human rights topics.

**Prerequisite(s):** Graduate Status

**TED 8290 TRAUMA INFORMED EDUCATION (3 credits)**
This course will present approaches to create trauma-informed classrooms which includes definitions and characteristics of trauma and how it impacts children, a brief history of trauma and associated theories/models, and a practice of skills for intervention in the classroom to support students and their families. Topics include applied teaching strategies which describe research-based techniques to support students with a history of trauma, as well as strategies to recognize signs of secondary trauma and burnout, followed by ways to mitigate them using research-based self-care techniques. (Cross-listed with COUN 8440).
TED 8300 EFFECTIVE TEACHING PRACTICES (3 credits)
This course focuses on specific characteristics and behaviors of effective teachers. Course content will be derived from research on teaching and learning.
Prerequisite(s): Graduate status

TED 8310 HUMAN DEVELOPMENT - CONTEMPORARY IMPLICATIONS FOR TEACHING & LEARNING (3 credits)
This course examines human growth and learning from birth through late adolescence. It is designed to prepare teachers to synthesize information regarding developmental theory and subsequently apply this to lesson design and effective content-area pedagogy. Candidates will examine multiple frameworks related to the cognitive, social/emotional, and physical development of children and use those to analyze current educational practices in PK-12 schools. Cultural influences impacting human development and implications for educational practices will also be examined. The course will include field-based experiences.
Prerequisite(s): Admission into a Teacher Education Department graduate program.

TED 8320 STRENGTHENING LEADERSHIP CAPACITY THROUGH RESEARCH AND COMMUNITY COLLABORATION (3 credits)
In Strengthening Leadership Capacity through Research and Community Collaboration, students extend their knowledge, reflective practice, and leadership to a community context. The course is designed create a mutually beneficial partnership between students' research agendas and community agencies. The goal is to enhance students' learning of content, understand the community, and perpetuate a sense of civic agency. Additionally, students further their research by submitting an article for publication.

TED 8370 DATA VISUALIZATION AND MODELING FOR EDUCATORS (3 credits)
In the growing context of data informed decisions there is a need to answer "what if" questions in a variety of decision-making situations, as well as to display data both visually and interactively. This course will provide foundational skills in data visualization and modeling for educational decision making and instruction. It draws upon key fundamentals in data visualization (representing data trends visually) as well as key strategies in data modeling (interactive representations to explore possible outcomes). The course also explores the use of visualization and modeling technologies as well as assisting student learning with these tools. (Cross-listed with STEM 8370).

TED 8376 TEACHING AT THE MIDDLE LEVEL (3 credits)
This course will provide candidates with a variety of middle level teaching techniques and strategies in their classrooms that have been identified in current research literature as appropriate for the middle level. This course is designed to introduce candidates to the unique characteristics of the middle student, school, curriculum, history, and philosophy. (Cross-listed with TED 4370).
Prerequisite(s): TED 2300 or EDUC 2010 or TED 2380.

TED 8390 CLASSROOM MANAGEMENT IN PRACTICE (3 credits)
This course will provide graduate students with a survey of general classroom management methods for classrooms. Candidates will enhance their understanding of three basic components of effective pedagogy: 1) proactive classroom management, 2) high-impact instructional strategies that impact student engagement and learning, 3) behavior management techniques that incorporate practice, feedback, research, and reflection.
Prerequisite(s): Graduate standing

TED 8400 ASSESSMENT AND INTERVENTIONS OF PK-12 READERS (3 credits)
This course is designed for graduate candidates enrolled in the Literacy MS or reading specialist endorsement program. The purpose of this course is to develop an understanding of theory and research as it relates to assessment, evaluation and instructional approaches that support PK-12 reading development. This knowledge is applied through a practicum experience with PK-12 students in which candidates integrate knowledge and practices related to assessment and evaluation of readers' strengths and needs.
Prerequisite(s): Graduate status

TED 8410 IMPROVEMENT OF INSTRUCTION: SPECIAL TOPICS (3 credits)
This course provides an in-depth study of instructional theory, research, and methodology designed to extend teachers' professional knowledge base and enhance their pedagogical skills. When offered, a course may be limited to improvement of instruction in a selected subject area. (Cross-listed with STEM 8410).
Prerequisite(s): Graduate standing.

TED 8420 TRENDS AND TEACHING STRATEGIES IN SCIENCE EDUCATION (3 credits)
This course is designed for the graduate candidate in the Department of Teacher Education whose study program emphasis is in the area of science education. The course will describe and analyze past and present trends in science education, including curricula, teaching-learning strategies, the laboratory and instructional materials. The course focus will be K-12 and as such is meant to serve both elementary and secondary graduate candidates. (Cross-listed with STEM 8420).

TED 8430 SCHOOL CURRICULUM PLANNING (3 credits)
This course is designed to provide advanced degree candidates with an understanding of the theory, principles, and practices utilized in curriculum planning in American schools. This course focuses on the principles and practices of effective curriculum planning and teachers' part in these processes as curriculum developers. (Cross-listed with STEM 8430).

TED 8470 TEACHING THE LANGUAGE ARTS (3 credits)
This course is designed to enhance candidates’ knowledge of best practices in teaching reading, writing, listening, and speaking. Candidates will learn about research supported appropriate language arts instruction strategies and assessments. This course will inform graduate students as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

TED 8480 FOUNDATIONS OF BILINGUAL EDUCATION (3 credits)
This course is designed to give future and current teachers a thorough understanding of the theoretical, political, historical, and practical foundations of bilingual/multicultural education in the United States. As dedicated practitioners, reflective scholars, and responsible citizens, graduate students will have knowledge of factors that contribute to effective multilingual and multicultural learning environments that promote individual and societal bilingualism. Advanced Spanish language proficiency required.
Prerequisite(s): Graduate status

TED 8490 SPANISH LANGUAGE ARTS (3 credits)
This course is designed to reinforce first and second language acquisition theory as it relates to dual immersion settings. Best practices for developing and reinforcing bilingualism and biliteracy are presented and used for planning and delivering instruction. Spanish fluency is required for the course.
Prerequisite(s): Graduate status required for graduate students pursuing the bilingual education endorsement and concentration (does not lead to a Nebraska Department of Education teaching endorsement). Advanced Spanish language proficiency required.
TED 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)
This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with AVN 8510, STEM 8510).
Prerequisite(s): Graduate standing.

TED 8520 SCHOOL LIBRARY PRACTICUM (3 credits)
Candidates will gain direct experience and an understanding of the theories, concepts and activities integral to public services, technical services, and the administration in a 21st Century library and information agency at an assigned field site. Candidates will demonstrate the ability to plan, develop, and implement programming and services for patrons and diverse learners in their schools and communities.
Prerequisite(s): Candidates must be in the final 2 semesters of their school library program & must complete an application for the Practicum the semester prior to their practicum. Not open to non-degree graduate students.

TED 8530 INSTRUCTIONAL DESIGN STRATEGIES FOR STEAM EDUCATORS (3 credits)
This course is designed to provide graduate candidates with the opportunity to enhance interdisciplinary instructional strategies, curricular understanding, and lesson preparation in the areas of science, technology, engineering, the arts, and mathematics (STEAM) through analysis and reflective practices in STEAM. This course provides hands-on experiences that model STEAM integration techniques, including how to effectively engage with community agencies and partners to bring STEAM into the classroom. This course emphasizes not only the technical aspects of STEM, but also the creativity and innovation that arts integration can add to enhance STEM curriculum. Teacher professionals will be provided with tools, resources, and strategies to help them explore and enhance current, new, or supplemental curriculum activities that will enhance STEAM learning, student engagement, and motivation. (Cross-listed with STEM 8530).
Prerequisite(s): This course includes both teacher education and STEAM related topics and therefore fits into both TED and STEM program coursework.

TED 8540 DIGITAL CITIZENSHIP (3 credits)
The course explores key concepts of Digital Citizenship pertaining to digital law, digital ethics, digital interaction, digital literacy, and cyber-security. The course addresses an educator’s role as technology leader in both policy and practice to establish a responsible and robust digital learning community in P-12 schools.
Prerequisite(s): Graduate Standing/Status

TED 8550 TECHNOLOGY FOR CREATIVE AND CRITICAL THINKING (3 credits)
Technology for Creativity and Critical Thinking investigates the use of visual media tools in P-12 digital learning environments. This course provides candidates an opportunity to develop leadership skills and dispositions relevant to advocacy initiatives addressing policy and best practice in the use of technology in P-12 schools. The course encourages educators to critically evaluate and analyze digital tools supporting creativity and critical thinking through research and project development.

TED 8560 TECHNOLOGY FOR DIVERSE LEARNERS (3 credits)
This course will explore categories of diverse learners and how to effectively research and implement assistive technology, software, and tools to enhance their learning opportunities. Candidates will learn how to facilitate the use of instructional technology, pedagogy, and strategies to better meet the needs of diverse learners. With a focus on Universal Design for Learning paired with technology resources, candidates will become proficient in their ability to create learning activities that increase student learning outcomes. Throughout the course, candidates will be challenged as a leader to connect professionally, locally, and nationally to learn and share from professional peers.

TED 8570 INTERNET IN THE LEARNING PROCESS (3 credits)
This course is designed to help educators actively explore instructional implementations of Internet use appropriate for use in K-12 classrooms, successful diffusion of Internet innovations in educational environments, and emerging multicultural “breaking down the walls of the classroom” concepts available to educators through Internet use.

TED 8580 ONLINE TEACHING AND LEARNING (3 credits)
Online Teaching and Learning is a course for education professionals that investigates the use of online tools for planning, preparing and assessing student learning in an online teaching and learning environment. The course will prepare candidates to provide leadership for online teaching and learning initiatives within learning organizations. The course encourages education professionals to explore methods of virtual lesson delivery and online assessment through direct instruction, discussion, and project development.
Prerequisite(s): Graduate Admissions status

TED 8590 TEACHING AND LEARNING IN DIGITAL ENVIRONMENTS (3 credits)
This course is an introduction to future-ready information, digital learning environments, and instructional technologies for use with children and youth. Course will cover a diverse array of technical literacies that serve as content and skill goals for today’s children and youth in P-12 schools and other learning environments.

TED 8610 TEACHING OF WRITING THROUGHOUT THE CURRICULUM (3 credits)
This course will develop candidates’ understanding of the various aspects of writing to integrate throughout the content areas. Candidates will acquire and apply a common language for teaching and assessing student writing and investigate the varied ways writing genres extend throughout the curriculum. Candidates will examine research-supported writing instruction and the role write-to-learn strategies play in supporting diverse students in accessing and understanding content-specific information.
Prerequisite(s): Graduate status.

TED 8640 OPEN EDUCATIONAL RESOURCES FOR P-12 TEACHERS (3 credits)
TED 8640 Open Educational Resources for P-12 Teachers affords opportunities to study, evaluate, plan, and implement the open educational resources (OERs) to meet state, district, or diocese content standards and support equitable remote learning experiences. Graduate candidates will develop respective P-12 grade- and/or content-appropriate content/curriculum utilizing OERs focused on STEM (Science, Technology, Engineering, and Mathematics) education and the use of technology integration to foster effective teaching and learning.

TED 8650 CHILDREN’S LITERATURE AND EDUCATION (3 credits)
Candidates in this graduate course will explore story, poetry, drama, and informational materials for elementary students with an emphasis on methods for including literature in school curricula with an awareness of diverse children’s lives, discourses, and understandings. Examines current issues, recent materials, and the theoretical and research base of this field to develop meaningful and creative learning, literacy, and library experiences for children.

TED 8660 YOUNG ADULT LITERATURE (3 credits)
This course extends candidates’ knowledge of literature for young adults. The course addresses current trends in the genre and engages candidates in activities that support pedagogies in basic, visual, information and cultural literacies.

TED 8695 LITERACY AND LEARNING (3 credits)
This course examines ways in which reading and writing can facilitate student learning in content areas studies (e.g., science, social studies, physical education, art, music, and math). The main focus is on teaching practices that engage students and contribute to their learning, integrating their background knowledge and cultural experiences with content area literacy. (Cross-listed with TED 3690).
TED 8700 ELEMENTARY EDUCATION CAPSTONE (3 credits)
This course is designed as a required, final capstone course for Elementary Education graduate students to be taken in the last nine hours of the Master of Science program. A grade of B or better must be received in TED 8700 to show satisfactory completion of the course and for program completion.
Prerequisite(s): Permission of the Elementary Education Program Chair. Not open to non-degree graduate students.

TED 8710 RESEARCH AND INQUIRY (3 credits)
The purpose of this course is for candidates to gain an overview and understanding of questioning, inquiry, and research strategies used in future ready P-12 libraries in order to ensure access to reference services and resources in a variety of formats and to design and support information literacy and inquiry-based instruction for all members of the learning community.

TED 8720 INTRODUCTION TO INSTRUCTIONAL COACHING IN PK-12 EDUCATION (3 credits)
This course examines the prominent coaching models used in PK-12 schools (i.e. teacher-centered coaching, student-centered coaching, cognitive coaching, transformational coaching). Candidates completing this course will be able to: develop an understanding of best practices in coaching, create a common lexicon for the role of an instructional coach, engage in the coaching cycle, and create a personal vision for their work as a coach. Candidates will engage in a field-based experience to apply their learning.
Prerequisite(s): Graduate Status

TED 8726 SPECIAL LIBRARIES AND INFORMATION AGENCIES (3 credits)
Candidates will demonstrate an understanding of the major types of 21st Century special libraries and information agencies. Candidates will demonstrate an understanding of social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the special libraries and information agencies. (Cross-listed with TED 4720).

TED 8730 PK-12 CAPSTONE (3 credits)
The PK-12 Graduate Capstone course provides candidates with an opportunity to apply the knowledge, skills, and dispositions acquired during their program to content specific synthesis activities in their respective disciplines. Students will demonstrate their ability to integrate information from program coursework in the design, development and presentation of a final capstone project related to teaching and learning.
Prerequisite(s): Graduate standing. Limited to those in online pathways. Not open to non-degree graduate students.

TED 8740 ORGANIZATION OF INFORMATION (3 credits)
Candidates will demonstrate the ability to integrate the legal and ethical standards of their discipline in ensuring access to information and ideas for a diverse array of learners in schools and communities. This course also addresses current theory and best practice in descriptive and subject cataloging and classification of information resources that align with school library standards and guidelines.

TED 8746 ORGANIZATION OF INFORMATION (3 credits)
Candidates will demonstrate a basic understanding of the theories, concepts and activities of descriptive and subject cataloging and classification procedures of information resources in 21st Century libraries and information agencies.

TED 8750 OXBOW WRITING PROJECT (3 credits)
Oxbow Writing Project summer institute immerses K-16 educators in writing pedagogy via their own writing, presentations about writing and pedagogy, reading and discussing professional literature, designing and implementing an in-depth inquiry project, and developing leadership strengths. Oxbow is a National Writing Project Site. (Cross-listed with ENGL 8750).
Prerequisite(s): Acceptance into Oxbow Writing Project Summer Institute

TED 8760 MANAGING COLLECTIONS IN LIBRARIES AND INFORMATION AGENCIES (3 credits)
Candidates will demonstrate an understanding of the theories, concepts and activities integral to proactive collection management in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of community analysis, collection analysis, and the ability to conduct critical evaluations of a diverse array of information resources.

TED 8770 INTEGRATING TECHNOLOGY INTO INSTRUCTIONAL DESIGN (3 credits)
The purpose of this course is to introduce participants to effective methods for the integration of educational media into instructional design and provides participants (1) knowledge of broad instructional design theories and models with a concentration on constructivism, (2) experience in designing instruction that effectively integrates technology into the teaching-learning process, and (3) experience in producing instructional media. The course is intended to provide fundamentals in the selection, evaluation, production, application and utilization of educational media. This course is designed for in-service library media or instructional technology specialists as well as regular classroom teachers.
Prerequisite(s): Graduate status

TED 8780 FOUNDATIONAL SKILLS OF EARLY LITERACY (3 credits)
This course builds knowledge and instructional practices focused on early literacy foundational skills. With a focus on the components of foundational skills: (print concepts, phonological awareness, phonics and word recognition, and fluency) candidates will be able to identify concrete strategies to support Pre-K student learning and practice. The course helps to build knowledge and skills of evidence-based early literacy instruction and provides resources to support teachers’ planning and instruction.
Prerequisite(s): Graduate Standing

TED 8800 MULTICULTURAL LITERATURE FOR CHILDREN AND YOUTH (3 credits)
This is designed as a graduate-level course dealing with utilization of literary materials representing authors and content from multiple perspectives, particularly authors whose cultural and ethnic backgrounds differ from the mainstream.

TED 8810 STEM IN EARLY CHILDHOOD EDUCATION: CURRICULUM AND RESEARCH (3 credits)
This course will explore theoretical and foundational pedagogical strategies in early childhood education used to deliver integrative STEM education in the preK-12 setting. In order to understand the research and practice of STEM disciplines in preK-12, it is necessary to examine the social, cultural, political, and functional aspects that influence them. Candidates will investigate the nature of STEM education, Early Childhood Education (ECE) pedagogy and perspectives of learning, content knowledge and dispositions for educators of STEM topics, and issues of access and equity for STEM education through literature, discussion, and practice. This course includes a community outreach component in which candidates will use qualitative methods to observe class topics in public settings. (Cross-listed with STEM 8810)
Prerequisite(s): Graduate status

TED 8816 PRINCIPLES AND PHILOSOPHY OF INTEGRATING CAREER AND ACADEMIC EDUCATION (3 credits)
This course presents the philosophies and principles/practices underlying how schools can better prepare students for the workplaces of the future with emphasis on the integration of career education within broader academic preparation. The roles and responsibilities of teachers, counselors, and administrators in implementing integrated approaches will be examined. (Cross-listed with TED 4810).
TED 8820  CAPSTONE IN STEM EDUCATION (3 credits)
This course will prepare graduate students for the integration, articulation, and differentiation of curriculum and instruction in and between the STEM core areas of Science, Technology, Engineering, and Mathematics. Special emphasis will be on using the STEM core content to help provide applications and context to existing science and mathematics curriculum and instruction and on providing leadership in developing curriculum for mathematics and science dependent courses in engineering and technology. 
Prerequisite(s): The student must be enrolled in one of the following concentrations: STEM, mathematics, science, technology; and be enrolled in the last six hours of their program of study. Not open to non-degree graduate students.

TED 8830  LEADERSHIP AND MANAGEMENT IN SCHOOL LIBRARIES (3 credits)
The course explores best practice for effective leadership and management of 21st Century school libraries. Candidates will gain a comprehensive knowledge of the theories, policies and processes involved in directing a school library in support of the personal and academic success of P-12 students. Candidates will explore and employ ethical codes of conduct in their profession to ensure school libraries meet the needs of their diverse array of patrons.

TED 8840  ENGINEERING EDUCATION EXTERNSHIP (3 credits)
This graduate course will address the best practice of effective teaching and learning in Engineering Education through professional collaboration between K-12 STEM (Science, Technology, Engineering, and Mathematics) teachers and practicing engineering professionals. K-12 STEM teachers, as graduate students in the course, will learn about and address real-world applications and career opportunities in STEM education through the externship. K-12 STEM teachers will research and develop authentic, experiential learning opportunities and projects for the classroom through course supports associated with lecture, discussion, and partnerships with practicing engineering professionals. The externship will be integral to the K-12 STEM teachers’ experiences and work in this course, as the course models effective professional collaboration founded on experience, knowledge, and skills to achieve a curriculum enhancement goal. (Cross-listed with STEM 8840).
Prerequisite(s): Graduate status. Not open to non-degree graduate students.

TED 8850  PROFESSIONAL COLLABORATION (3 credits)
This course is designed to prepare candidates to work in collaboration with other professionals and parents to create a learning environment that enhances the potential for academic success and improvement of instructional practices. The focus will be on collaborative problem solving. (Cross-listed with SPED 8980).
Prerequisite(s): Admission to Graduate College.

TED 8856  COORDINATION TECHNIQUES IN WORK-BASED LEARNING (3 credits)
This course reviews responsibilities and techniques of coordination for the work-based learning teacher-coordinator and/or work-based learning coordinator, with special emphasis on administration of the part-time cooperative program and analysis of the laws and regulations governing this program. (Cross-listed with TED 4850).

TED 8860  INVENTION & INNOVATION IN ENGINEERING EDUCATION (3 credits)
This course will address emerging trends in STEM education for in-service K-12 STEM teachers with a focus on the use of engineering education practices in teaching and learning content. STEM teachers will receive applicable, hands-on, classroom-ready experiences through lecture, professional instruction, and projects that will emphasize product design and creation through the Engineering Design Process. The Engineering Design Process will be central to the candidates' experiences in this course and will be used by the candidates to develop curriculum utilizing emerging trends to supplement current course content and standards. Interdisciplinary planning will be central to the course. (Cross-listed with STEM 8860).
Prerequisite(s): Graduate status is required.

TED 8880  LEADERSHIP IN EARLY CHILDHOOD EDUCATION (3 credits)
This course seeks to prepare candidates with leadership skills in the early childhood field that will empower them to initiate and implement changes in programs serving young children and families. Candidates will explore and apply frameworks of leadership and analyze policy, governance, and power structures that can impact change. Candidates will also learn effective advocacy skills to positively influence policies and practices in program and governance structures. Lastly, candidates will examine approaches for developing new leaders in early childhood education through reflective supervision and mentorship.
Prerequisite(s): Graduate status.

TED 8900  SECONDARY EDUCATION GRADUATE CAPSTONE (3 credits)
The Secondary Education Graduate Capstone course provides candidates with an opportunity to apply the knowledge, skills, and dispositions acquired during their program to content-specific synthesis activities in their respective disciplines. Candidates will demonstrate their ability to integrate information from program coursework in the design, development and presentation of a final capstone project related to teaching and learning in 21st Century educational environments.
Prerequisite(s): 30 credit hours towards degree completion; Permission required by Program Advisor. Not open to non-degree graduate students.

TED 8970  INDEPENDENT STUDY (1-3 credits)
This is a specially designed course taken under the supervision of a graduate faculty member to accommodate the student who has identified a focus of study not currently available in the departmental offerings and who has demonstrated capability for working independently.
Prerequisite(s): Permission of Department and Graduate Faculty member.

TED 8980  PRACTICUM: VARIOUS CONTENT AREAS (1-6 credits)
This course is designed to provide school professionals with a guided, supervised, field experience that will develop and enhance the knowledge, skills, and dispositions requisite of a successful educational practitioner.
Prerequisite(s): Prerequisites for the course will vary, depending on the content/discipline area. See syllabus for specific discipline area.

TED 8990  THESIS (1-6 credits)
This course is an independent research project completed under the direction of a thesis advisor and required of all candidates pursuing a Master of Science with Thesis option.
Prerequisite(s): Completion of Selective Retention and approval of advisor. Not open to non-degree graduate students.

TED 9100  THEORIES, MODELS, AND PRACTICES OF LITERACY (3 credits)
This course helps candidates develop a framework about the theories, models, practices, processes, and related research associated with literacy. The content looks across grade levels and student populations, and across social and cultural contexts in an examination of factors that impact theories and processes of literacy.
Prerequisite(s): Graduate status.
TED 9110 PRINCIPLES AND PRACTICES FOR TEACHING READERS (3 credits)
This foundational reading course is to provide candidates with a broad understanding of the core reading principles (phonological awareness, phonemic awareness, fluency, vocabulary and comprehension) as they relate to research, evidence-based practices and diverse students' literacy development. Candidates will also explore educational trends and shifts in literacy policies and approaches, and the impact these trends and shifts have on PK-12 classroom practices.

TED 9120 GRADUATE IN-SERVICE TEACHING (3 credits)
This is a graduate experience for in-service teachers pursuing teacher certification. Candidates must successfully complete a minimum of 100 hours (or per program of study) of field experience prior to completing their in-service teaching experience.
Prerequisite(s): Graduate standing. Permission. Applications go to the Office of Field Experiences. Not open to non-degree graduate students.

TED 9130 ASSESSMENTS AND INTERVENTIONS - ELEMENTARY (3 credits)
This course is designed for graduate candidates enrolled in the Literacy Masters or Reading Specialist endorsement program. The purpose of this course is to develop an understanding of theory and research as it relates to assessment and evaluation and instructional approaches that support reading development. This knowledge is applied through a practicum experience with elementary students in which candidates integrate knowledge and practices related to assessment and evaluation of readers' strengths and needs.

TED 9140 ASSESSMENT AND INTERVENTION - SECONDARY (3 credits)
This course is designed for graduate candidates in literacy endorsement and Master's programs. The purpose of this course is to develop an understanding of the theory and research driving assessment and evaluation and instructional approaches as they relate to reading differences for middle and high school students. Included in this course is knowledge about the role and responsibility of a literacy leader with regard to coaching, mentoring, supervision, and evaluation of a reading program. Application of this information is demonstrated through a practicum experience with middle and high school students.
Prerequisite(s): TED 9100; TED 9110 concurrent with, or prior to TED 9140.

TED 9180 LITERACY RESEARCH SEMINAR (3 credits)
This course will enhance candidates' understanding and ability to critically examine, apply, and conduct current literacy research by developing understandings of how to (1) discuss historical trends in literacy research, (2) critically evaluate the designs, theories, methods and tools of literacy research, and (3) develop understandings of action research to plan and implement a preliminary literacy research study in their own context. Candidates will develop a research proposal that is grounded in theory and action research methods within their own learning context.

TED 9190 LITERACY GRADUATE CAPSTONE (3 credits)
The Literacy Program Graduate Capstone course provides candidates with an opportunity to synthesize the knowledge, skills, and dispositions acquired during their program to honor the interrelationships among classroom, school, sociocultural, and community contexts as they relate to diverse students' literacy development. Candidates will demonstrate their ability to integrate information from program coursework in the design, development, and presentation of a final capstone project related to teaching, learning, and literacy advocacy in 21st Century educational environments.
Prerequisite(s): This course is designed as a capstone event. Accordingly, students must have no more than 6 additional remaining credit hours of coursework. Permit to enroll required.

TED 9200 CRITICAL PEDAGOGY: TEACHING FOR SOCIAL JUSTICE (3 credits)
This course examines ways in which ideology, power, and culture intersect in P-12 educational settings. Undemocratic, inequitable, and oppressive structures are identified. Possibilities for democratic, equitable transformations are proposed.
Prerequisite(s): Graduate status

Management Information Systems

Degree Programs Offered
- Management Information Systems, MS (p. 1299)
- Business Administration, MBA and Management Information Systems, MS (MBA/MIS (p. 1078))
- Public Administration, MPA and Management Information Systems, MS (MPA/MIS (p. 1309))

Certificates Offered
- Data Analytics Certificate (p. 1310)
- Data Management Certificate (p. 1312)
- Information Assurance Certificate (p. 1313)
- Project Management Certificate (p. 1314)
- Systems Analysis and Design Certificate (p. 1315)

ISQA 8016 BUSINESS INTELLIGENCE (3 credits)
This course intends to provide graduate students in-depth exposure to the growing field of business intelligence. Business intelligence (BI) consists of the set of concepts and techniques used to analyze business data in support of decision-making and planning. BI spans a number of areas of management information systems, including Decision Support Systems (DSS), Enterprise Resource Planning (ERP), Data Warehousing, Knowledge Management, Customer Relationship Management, Data Mining, and others.
Prerequisite(s): ISQA 4150 or ISQA 8156 and ISQA 8040 and ISQA 8050. Not open to non-degree graduate students.

ISQA 8030 INFORMATION SYSTEMS AND ETHICS (3 credits)
This course gives you an introduction to organizations and the role that information and information systems play in supporting an organization's operations, decision-making processes, quality management, and strategic activities. The course provides an introduction to the management of information systems function, the strategic and regulatory issues of telecommunications, and ethical and legal issues related to information systems.
Prerequisite(s): Admission into the MS in MIS program.

ISQA 8040 AN OVERVIEW OF SYSTEMS DEVELOPMENT (3 credits)
The course presents an overview of the systems development lifecycle and database development. The course will focus on theory, current tools and techniques that the system developer can use to develop and document information systems. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.

ISQA 8050 DATA ORGANIZATION AND STORAGE (3 credits)
The course will provide concepts of data organization, data storage, and data transfer through computer networks. The performance implications of various design decisions will be explored. The purpose of this course is to prepare the student for further graduate-level study of information systems. This course may not be used in a plan of study for any graduate program at UNO.
ISQA 8060 RESEARCH IN MIS (3 credits)
This course covers research methods and their application to the development and evaluation of management information systems. Also covered is the relationship between organization theory and IS research. 
Prerequisite(s): CIST 2500, CIST 2100, and ISQA 8040, or permission of the instructor.

ISQA 8070 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (1 credit)
This course is designed to acquaint students with issues which are current to the field or harbinger or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.
Prerequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular course offerings.

ISQA 8080 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (3 credits)
This course is designed to acquaint students with issues which are current to the field or harbinger or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.
Prerequisite(s): 1) Permission of the instructor. 2) Additional prerequisite courses may be required for particular course offerings.

ISQA 8086 SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS (1-5 credits)
This course is designed to acquaint students with issues which are current to the field or harbinger or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ISQA 4000)
Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 8090 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS (2 credits)
This course is designed to acquaint students with issues which are current to the field or harbinger or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.
Prerequisite(s): Permission of the instructor. Additional prerequisite courses may be required for particular course offerings.

ISQA 8106 INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION (3 credits)
This course examines the frameworks and tools used to develop an organization's information system architecture. It includes the analytical skills and conceptual frameworks with which to make recommendations and decisions regarding the integration of information technology components into an information system architecture. (Cross-listed with ISQA 4100)
Prerequisite(s): CIST 2100 and ISQA 3310

ISQA 8136 INFORMATION TECHNOLOGY FOR DEVELOPMENT (3 credits)
Information Technology for Development (ITD) is the implementation and evaluation of information technology infrastructures to stimulate economic, social and human development. In this service-learning course, students will learn and apply ITD concepts for developing and adding value through IT by working with small business entrepreneurs in Omaha or rural Nebraska. Students will evaluate micro-business technology needs, prepare business technology plans, provide training, and implement appropriate solutions, to the extent possible within a semester class. (Cross-listed with ISQA 4130)
Prerequisite(s): Though not required, the following courses or their equivalent would provide the necessary background: CIST 1100, CIST 1300, ISQA 3210, ISQA 3310, ISQA 3400. Not open to non-degree graduate students.

ISQA 8156 ADVANCED STATISTICAL METHODS FOR IS&T (3 credits)
This course emphasizes the application and interpretation of statistical methods including design of experiments, analysis of variance, multiple regression, and nonparametric procedures and the use of statistical computer packages. The intent is to develop quantitative abilities needed for quantitatively intensive jobs and for advanced study in management information systems, computer science and information technology. (Cross-listed with ISQA 4150)
Prerequisite(s): CIST 2500 or equivalent (at least one course in statistics)

ISQA 8160 APPLIED DISTRIBUTION FREE STATISTICS (3 credits)
The primary objective of this course is to expose students to methods of analyzing data from non-normal populations including binomial tests, contingency tables, use of ranks, Kolmogorov-Smirnov type statistics and other selected topics.
Prerequisite(s): Admission to MS program in Management Information Systems or permission of instructor. This course assumes prior knowledge with basic descriptive and inferential statistics from an introductory undergraduate course (e.g., CIST 2500).

ISQA 8166 INTRODUCTION TO ENTERPRISE RESOURCE PLANNING (3 credits)
Introduction to Enterprise Resource Planning (ERP) is designed to expose students to the primary enterprise application that forms the information systems (IS) infrastructure for most large organizations today. The primary purpose of this course is for students to gain an understanding of the enterprise wide, cross functional nature of ERP software. In the process of learning about ERPs, the students develop “hands on” experience with the largest and most well-known ERP application, SAP. (Cross-listed with ISQA 4160, SCMT 4160)
Prerequisite(s): CIST 2100 or equivalent. Not open to non-degree graduate students.

ISQA 8176 DIGITAL SUPPLY CHAIN & LOGISTICS (3 credits)
Global Supply Chains are being disrupted by digital transformation driven by emerging technologies such as IoT (internet of things) and AI/ML (Artificial Intelligence/Machine Learning). This course will take a closer look at global supply chains and logistics with an emphasis on the impact of digitalization. We will explore the typical global supply chain processes and how state-of-the-art and emerging technologies impact them. Thus, the class views global digital supply chains by integrating business and technological perspectives. The course will start with an overview of technologies relevant to digital supply chains. We will then discuss digitalization strategy and digital supply chains, fundamental GSCM (Global Supply Chain Management) processes and their potential for digitalization, and discussion of IT/software systems, IoT, AI/ML, Data Analytics/Visualization, and related facets that impact digital supply chains. The course will culminate with an integrated case study and/or research paper (graduate). (Cross-listed with ISQA 4170).
Prerequisite(s): Permission of instructor. It is preferable that students have taken an introductory supply chain class or have some experience in the transportation, logistics and supply chain management sector. Undergraduate students must have Junior standing.

ISQA 8180 ELECTRONIC COMMERCE (3 credits)
Electronic Commerce is the digital enablement of transactions between multiple parties. A multitude of technologies, tools and applications have brought about changes in business, and society that require careful consideration. Students are given an overview of electronic commerce business models and required to apply these to solve business problems or take on opportunities presented. They will cover topics such as social networking, electronic markets, and political and ethical issues associated with electronic commerce, and business plans for technology ventures. They will apply these concepts using Web 2.0 tools, mobile applications and website design assignments.
ISQA 8196 PROCESS REENGINEERING WITH INFORMATION TECHNOLOGY (3 credits)
Business process reengineering issues are examined. Reengineering concepts and methods are introduced. Additional special project(s) are required. SAP will be introduced. (Cross-listed with ISQA 4190).
Prerequisite(s): CIST 2500; prerequisite/co-requisite ISQA 4110.

ISQA 8206 INFORMATION AND DATA QUALITY MANAGEMENT (3 credits)
The course primarily focuses on developing an in-depth understanding of Data and Information Quality (DQ and IQ) concepts and issues. On completing this course students will be able to understand and use DQ and IQ Concepts in Information Systems projects, be able to recognize various patterns of Data and Design Deficiencies in Systems and be able to suggest appropriate DQ and IQ improvement plans in light of known deficiencies in systems. (Cross-listed with ISQA 4200)
Prerequisite(s): CIST 2500

ISQA 8210 MANAGEMENT OF SOFTWARE DEVELOPMENT (3 credits)
This course should encourage you to think critically about aspects of software development that make it difficult and strategies to mitigate these challenges. This course integrates concepts from software engineering, management science, psychology, and organizational behavior to identify, understand, and propose solutions to problems associated with software development. We examine and consider issues from various perspectives, such as the project manager, development team, senior management, and project sponsor. This course prepares students for various roles within a software development effort including leadership positions in software development. Students will practice software project management and agile methods of managing projects in a semester long team project using contemporary project and development methods.
Prerequisite(s): ISQA 8040 or equivalent. Not open to non-degree graduate students.

ISQA 8220 ADVANCED SYSTEMS ANALYSIS AND DESIGN (3 credits)
This course is a systems analysis and design course for systems and business analysts. The course presents an overview of object-oriented system analysis and design. The course will then focus on theory, best practices, and modern methodologies that analysts can use to analyze and design information systems.
Prerequisite(s): ISQA 8040 or (ISQA 4110 and ISQA 4120) or equivalent and ISQA 8050 or ISQA 3310 or equivalent

ISQA 8306 DATABASE ADMINISTRATION (3 credits)
This course is designed to give students an applied, practical introduction to database administration. Students will gain an understanding of the functional advantages of database management systems and their interrelationship to the computing environment in which it runs. They will learn the concepts, principles, and techniques necessary to carry out such functions as database object creation, storage management, capacity planning, performance tuning, backup and recovery, and security management. Each semester the course will focus on one commercial database management system (DBMS), such as Oracle. (Cross-listed with ISQA 4300)
Prerequisite(s): ISQA 8040 or ISQA 3310 or CSCI 4850. Not open to non-degree graduate students.

ISQA 8310 IT INFRASTRUCTURE & CLOUD COMPUTING (3 credits)
This course provides a graduate-level introduction to the business and technical decisions around technical infrastructure. It covers topics related to computer and systems architecture and communications networks, with a focus on the technical and business decisions around technology. Students completing the course will be able to understand and design network infrastructure, evaluate cloud computing offerings, and communicate their decisions. The course covers hardware, software, and cloud computing technologies.

ISQA 8340 APPLIED REGRESSION ANALYSIS (3 credits)
The primary objective of this course is to expose students to regression models and applications with particular emphasis on applying these concepts to IT research. Topics to be discussed include: Foundations of regression analysis using least squares procedures; model formulation, stepwise regression, transformations; graphical methods, estimation; inference; influence diagnosis; matrix formulation, multicollinearity, time series, and nonlinear models.
Prerequisite(s): ISQA 4150 or ISQA 8156, not open to non-degree graduate students.

ISQA 8380 ENTERPRISE ARCHITECTURE AND SYSTEMS INTEGRATION (3 credits)
This course is designed to give students grounding in the concepts, issues, and tools needed to manage enterprise architecture, distributed systems & Internet-based environments. The goal of the course is to equip students to make the architecture and infrastructure-related decisions needed for successful development and use of contemporary client/server and Internet-based systems. Topics include middleware, architecture, XML, JSON, web services, service-oriented architecture, enterprise application integration, distributed computing services, Model View Controller (MVC) development frameworks.
Prerequisite(s): ISQA 8310 and ISQA 8050 or equivalent; permit required.

ISQA 8410 DATA MANAGEMENT (3 credits)
The course provides in-depth coverage of such areas as: the relational model, SQL, data modeling, data quality management, database design, data warehousing, business intelligence, document and content management, NoSQL systems, and data governance. The course offers a mix of theoretical treatment and hands-on application. Current DBMS and data modeling software will be used.
Prerequisite(s): ISQA 8050 or equivalent, permit only.

ISQA 8420 MANAGING THE I.S. FUNCTION (3 credits)
The course provides a focus on the business management implications of the information explosion. The course is organized around a management audit of the information services activity to help present and future managers recognize and implement effective information services management.
Prerequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8450 NOSQL AND BIG DATA TECHNOLOGIES (3 credits)
The course will cover topics in the area of NoSQL and Big Data management. The course is intended to get students familiarized with NoSQL and Big Data technologies, explore how these database technologies differ conceptually from traditional relational database technologies, understand their applications, uses, advantages, and disadvantages, and provide hands-on experience with NoSQL and Big Data databases. The course offers a mix of theoretical treatment and hands-on application of the discussed NoSQL and Big Data technologies.
Prerequisite(s): Prior exposure to data management is expected. The prerequisite is: ISQA 3310, ISQA 8040, CSCI 4850, or work experience that has given you a comparable grounding in database concepts and technologies; in this case permission by the instructor is needed.

ISQA 8460 INTERNET OF THINGS (IOT), BIG DATA AND THE CLOUD (3 credits)
This course introduces the Internet of Things (IoT). It provides an overview of a number of technologies and research disciplines that enable the Internet to reach out into the real world of physical objects. In the future, the "Things" in question may have identities and virtual personalities, operating in smart spaces using intelligent interfaces to connect and communicate with the social, environmental, and user context.
Prerequisite(s): Basic Web Development using HTML/CSS and some MVC framework. The equivalent of two semester exposure to programming.
ISQA 8525  GRAPHICAL USER INTERFACE DESIGN (3 credits)
This course is an introduction to interaction design with a primary emphasis on designing usable and useful computer interfaces. Students will learn the principles of interface design grounded in a fundamental understanding of human cognitive processes. They will learn how end-users develop and use mental models of interaction and will apply this knowledge to the design of interfaces for real-world applications. A design project will challenge students to plan their own designs, to develop interfaces and to integrate them into a working application prototype, to test their application with real users, and to effectively communicate the overall results. (Cross-listed with ISQA 3520)
Prerequisite(s): CIST 1300

ISQA 8546  COMPUTER SECURITY MANAGEMENT (3 credits)
The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST4540, CYBR 4540, CYBR 8546)
Prerequisite(s): IASC 4360 or permission of the instructor.

ISQA 8560  INFORMATION WARFARE AND SECURITY (3 credits)
This course will study the nature of information warfare, including computer crime and information terrorism, as it relates to international, national, economic, organizational, and personal security. Information warfare policy and ethical issues will be examined.
Prerequisite(s): CIST 2100 or BSAD 8030 or ISQA 8030, or permission of instructor required.

ISQA 8570  INFORMATION SECURITY POLICY AND ETHICS (3 credits)
The course will cover the development and need for information security policies, issues regarding privacy, and the application of computer ethics. (Cross-listed with IASC 8570)
Prerequisite(s): CIST 2100 or BSAD 8030, or permission of instructor.

ISQA 8580  SECURITY RISK MANAGEMENT AND ASSESSMENT (3 credits)
The purpose of this course is to prepare the student for managing information security at the organizational level. This course will combine concepts from strategic management, decision science and risk analysis to prepare the student to integrate security issues into an organizational strategic planning process.
Prerequisite(s): CIST 2100 or ISQA 8030. Not open to non-degree graduate students.

ISQA 8600  FROM DATA TO DECISIONS (3 credits)
This course focuses on inquiry-driven data preparation and exploratory analysis skills for audience-driven, decision-oriented data analysis. Students gain experience in data evaluation, cleaning, documentation, and exploration with basic descriptive statistics and visualizations.

ISQA 8700  DATA MINING: THEORY AND PRACTICE (3 credits)
This course provides students theoretical issues as well as practical methods for conducting data mining process, including the implementation of a warehouse. After covering the essential concepts, issues, techniques to build an effective data warehouse, this course emphasizes the various techniques of data mining, such as association, classification, clustering and prediction for on-line analyses within the framework of data warehouse architectures. This course also promotes students to conduct a real-life data analyzing project in Big Data Era.
Prerequisite(s): ISQA 8050 and ISQA 8310 and ISQA 8040, not open to non-degree graduate students.

ISQA 8720  APPLIED STATISTICAL MACHINE LEARNING (3 credits)
This course focuses on advanced techniques in the analysis and evaluation of data, using both supervised and unsupervised methods. It covers the main types of statistical learning models needed for complex data analytics problems, as well as aspects of model development and optimization. Topics include: Linear and Non-Linear Regression Models, Classification, Resampling Methods, Model Selection and Regularization, Decision Trees, Model Boosting and Bagging, Support Vector Machines, and Clustering methods. This is an applied, hands-on course that will use a state-of-the-art statistical tool to implement the discussed approaches in assignments and a course project and focuses on the understanding and application of the concepts.
Prerequisite(s): ISQA 8156 (B- grade or better) and the following topics: The equivalent of two classes of statistics and/or advanced mathematics and a minimum of one semester of applying R in courses and/or projects

ISQA 8736  DECISION SUPPORT SYSTEMS (3 credits)
This course examines a set of information systems which specifically support managerial decision makers: Decision Support Systems, Group Decision Support Systems, Executive Information Systems, Data Warehouses, Expert Systems, and Neural Networks. This course explores the development, implementation, and application of these systems, how these systems can be applied to current business problems, as well as how organizational issues impact the implementation and usage of these systems. (Cross-listed with ISQA 4730)
Prerequisite(s): ISQA 8030 or equivalent.

ISQA 8750  STORYTELLING WITH DATA (3 credits)
This course provides an in-depth study of how to build a compelling story using data for business professionals to make winning arguments, it provides an overview of a number of technologies and research disciplines that enabled the power of data visualization. Data visualization is critical to managing large volumes of data, and can be defined as the science (analytical) and art (design) of manipulating and presenting data for expression and cognitive recognition. Data visualization involves using data in a way that humans can clearly understand, supporting efforts by organization to gain competitive advantage by changing operations, decision-making, and strategic initiatives.
Prerequisite(s): CSCI 1620 or equivalent. Admission into the UNO graduate program, basic web development or work experience with comparable grounding in programing, scripting concepts & technologies and permission by the instructor is needed.

ISQA 8810  INFORMATION TECHNOLOGY PROJECT FUNDAMENTALS (3 credits)
The course will integrate concepts and techniques from management science, psychology, organizational behavior, & administration change to identify, understand & propose solutions to the problems of project management. The purpose of the course is to prepare the graduate for project participation and leadership.
Prerequisite(s): CIST 2100 and ISQA 8040. Not open to non-degree graduate students.

ISQA 8820  PROJECT RISK MANAGEMENT (3 credits)
This course will cover project risk management, i.e., the process of measuring or assessing risk in projects and then developing strategies to manage the risk. The topics covered will include: Risk Management Planning, Risk Identification, Quantitative Risk Analysis, Qualitative Risk Analysis, Risk Response Planning, and Risk Monitoring and Control will be covered in detail. Students will learn how to apply and use the tools and techniques needed to perform these project management tasks. A collection of readings on risk management from the empirical literature coupled with risk management standards from organizations such as IEEE and the Project Management Institute (PMI) will be used to provide the student with an excellent foundation in risk management and control.
Prerequisite(s): ISQA 8810 or permission of instructor.
ISQA 8900 INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS (1-3 credits)
The content of the course will vary. However, both the student and the faculty member must sign an Independent Research Agreement and file it with the Master of Science in Management Information Systems Graduate Program Committee before registration for the course. This agreement will detail the project, the schedule for its completion, the form of the output, the method of evaluation and other relevant information pertaining to the project.
Prerequisite(s): Permission of instructor, and at least 12 hours of course work toward a M.S. in MIS should be completed.

ISQA 8910 INFORMATION SYSTEMS INTERNSHIP (1-3 credits)
Information Systems Internship provides students with an opportunity for practical application and further development of knowledge and skills acquired in the MS MIS degree program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.
Prerequisite(s): Permission of the instructor required. Students must have completed a minimum of 18 credit hours towards the MS MIS program. Not open to non-degree graduate students.

ISQA 8950 CAPSTONE MANAGEMENT INFORMATION SYSTEMS (3 credits)
The course consists of a student executed Information Systems design project providing an in-depth practical experience. It typically covers system conceptualization, analysis, and design. It may also involve prototyping. The project will typically not include the actual implementation of the system. This course replaces the MS in MIS comprehensive exam requirement.
Prerequisite(s): Students must have 6 credit hours or fewer left in the program. Students must have completed all core classes. Not open to non-degree graduate students.

ISQA 8990 THESIS (1-6 credits)
This course is a research project designed and executed under supervision of a thesis supervisory committee. Student will develop skills, including the ability to design, conduct, analyze, and report results in writing (i.e., thesis) of an original, independent, scientific investigation. The student's thesis supervisory committee must approve the project plan.
Prerequisite(s): ISQA 8060 research methods or equivalent. Graduate major in MIS and approval of the thesis supervisory committee. Not open to non-degree graduate students.

ISQA 9000 INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS RESEARCH (3 credits)
This course covers the following areas: (1) information systems as an academic discipline including classic readings in IS and its reference disciplines, (2) theory development and evaluation, (3) research methods applicability in IS.
Prerequisite(s): Doctoral student standing in the information systems areas or with the permission of the instructor; ISQA 8060 or equivalent. Not open to non-degree graduate students.

ISQA 9020 TECHNICAL AND PROCESS ISSUES IN INFORMATION SYSTEMS RESEARCH (3 credits)
This seminar is a survey course on the technical and process issues in information systems research. The course balances the acquisition of knowledge about the conduct of research in technical and process issues with the application of that knowledge to research on information systems. Major topics include: software engineering, programming, data base systems, decision support systems, data warehousing and mining systems, object-oriented systems, adaptive and expert systems, client-service systems, information filtering and multimedia systems, information agents, mobile computing, telecommunications, and electronic commerce.
Prerequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 9010 is recommended. Not open to non-degree graduate students.

ISQA 9030 BEHAVIORAL AND ORGANIZATIONAL ISSUES IN INFORMATION SYSTEMS (3 credits)
This seminar is a survey course on behavioral and organizational issues in information systems research. The course balances the acquisition of knowledge about the conduct of research in behavioral and organizational issues with the application of that knowledge to research on information systems. The course is intended for doctoral students in Information Technology or related areas.
Prerequisite(s): Doctoral student standing in the information systems area or with the permission of the instructor; ISQA 9010 is recommended. Not open to non-degree graduate students.

ISQA 9120 APPLIED EXPERIMENTAL DESIGN AND ANALYSIS (3 credits)
Constructing and analyzing designs for experimental investigations; completely randomized, randomized complete block and Latin-square designs, split-plot designs, incomplete block designs, confounded factorial designs, nested designs, and treatment of missing data, comparison of designs. The course will use computer-assisted analysis and graphic techniques included in software such as Statistical Analysis Software (SAS) or Statistical Package for Social Sciences (SPSS) or R (a programming language that provides a wide variety of statistical and graphical techniques. Similar to the S language).
Prerequisite(s): ISQA 4150 or ISQA 8156 or consent of instructor. Not open to non-degree graduate students.

ISQA 9130 APPLIED MULTIVARIATE ANALYSIS (3 credits)
The use of multivariate analysis for solving business problems. Multivariate Analysis of Variance (MANOVA), factor, cluster, and discriminant analysis techniques in IT research. The course will use computer-assisted analysis and graphic techniques included in software such as Statistical Analysis Software (SAS) or Statistical Package for Social Sciences (SPSS) or R (A programming language that provides a wide variety of statistical and graphical techniques. Similar to the S language).
Prerequisite(s): ISQA 4150 or ISQA 8156 or consent of instructor. Not open to non-degree graduate students.

ISQA 9150 RESEARCH IN INFORMATION TECHNOLOGY (3 credits)
Research methods in Information Technology involves an overview of the research process specific to problems in IT. Students will learn about theories in IT relevant to their areas of research. They will identify key components of research problems in IT, understand different types of research processes, develop research questions, and design research projects. They will learn to construct research instruments that enable them to collect data. They will also learn about the different data collection and analysis tools and techniques. As part of this course, students will take the CITI training and achieve the research readiness they need to succeed in the PhD in IT program.
Prerequisite(s): Permission of the instructor. Not open to non-degree graduate students.

ISQA 9900 ADVANCED RESEARCH IN INFORMATION SYSTEMS (3 credits)
This course provides a format for exploration of advanced research areas that are of interest to doctoral students in the information systems and/or information technology area. The specific research area will vary from semester to semester, in keeping with research interests of faculty and students. Examples of areas include, but are not limited to, e-business technology, mobile commerce, intelligent agents e-enabled decision support, electronic collaboration, computer-mediated communications, human-computer interaction and information assurance.
Prerequisite(s): Admission to PhD program in Information Technology or permission of instructor.
Management Information Systems, MS

Department of Information Systems and Quantitative Analysis, College of Information Science & Technology

Vision Statement
The Master of Science in management information systems (MIS) degree is designed to give students the skills and background needed to develop and manage an organization’s information resources, technology, and infrastructure. It will serve as a source of added knowledge and experience for MIS graduates and practitioners interested in obtaining an advanced degree. It will also provide career growth opportunities for the non-MIS and non-business degree holders who find that their careers demand graduate level MIS education. The MS in MIS prepares students for a variety of positions, including applications and web-site developer, computer network manager, business system analyst/manager, consultant, and technology manager. The MS in MIS also prepares students for admission to doctoral programs in information systems. A community advisory committee helps keep the program current with the needs of the business community. The MS in MIS program is a STEM designated program (CP code: 11.0401).

Other Program Related Information

Fast Track
The Department of Information Systems and Quantitative Analysis has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor’s degree and a master’s degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- Students must complete the Fast Track Approval form, obtain all signatures and submit it to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
  - Admission to Fast Track does NOT guarantee admission to the graduate program.
  - The admittance term must be after the completion term of the undergraduate degree.

International Dual Degree
The College of IS&T, in conjunction with the Management Center Innsbruck (Austria) (MCI) and the Technical University of Braunschweig (Germany) (TUB), offers a small number of interested students the opportunity to receive both the MS in MIS (UNO) degree and the MA in Management, Communications and Information Technology (MCI) or the Masters in MIS (TUB) degree in a two-year, full-time equivalent period. This is implemented as an international dual degree track within the MS in MIS degree with courses that transfer in both directions. The international dual degree track, like the traditional MS in MIS program, requires the equivalent of 36 U.S. credit hours of course work beyond any foundation requirements. Students who wish to pursue this option will work closely with an advisor to develop a detailed plan of study.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
- Fall: July 1
- Spring: December 1
- Summer: April 1

Other Requirements
- The minimum undergraduate grade point average (GPA) requirement for the MS in MIS program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a four year undergraduate degree.
- Entrance Exam: An entrance exam is waived for the academic year 2023/2024. Submitting GMAT or GRE scores with at least the minimum scores (GRE verbal: 144, GRE quantitative: 148, GMAT: 500) may strengthen your application.
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, or a baccalaureate or other advanced degree from a predetermined country on the waiver list (https://www.unomaha.edu/graduates-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
• Statement of Purpose: Applicants are required to submit a statement of purpose (500-750 words) addressing the following. The statement must be written in the applicant’s own words, reflecting their goals and aspirations. Plagiarism in the statement may result in the rejection of the entire application.
  • Motivations for pursuing graduate education
  • Relevant qualifications or work experience that demonstrate potential for success in the graduate program
  • Career goals
  • Why you want to study at UNO

• Resume: Submit a detailed resume indicating your work experience and background.
  • OPTIONAL: One letter of recommendation from a reference who can evaluate your work and/or academic achievements.
  • OPTIONAL: Application for Graduate Assistant Position

The MS in MIS program hires departmental Graduate Assistants (GA) after successful completion of at least a seminar in the program. However, a few research positions may be available to incoming students. If you are interested in applying for one of those positions, please submit a letter stating your research area interests and why you feel you would make a good GA. Please note that GA positions will be considered after admission and program admission is not a guarantee of receiving a GA position.

Students interested in taking courses without admission to the MS in MIS degree program may do so with permission of the graduate program committee. Contact mgreiner@unomaha.edu.

Requirements

Foundation Courses

Foundation courses ensure that all students in the MS Management Information Systems (MIS) program have a strong foundation on which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for other courses in the program, but they also contain a distinct body of knowledge that is an important part of the MIS professional’s education. All foundation courses are required for all students. Students who have obtained an undergraduate MIS degree will typically have this foundation. Other students, including computer science or engineering majors, will usually have to take one or more foundation courses. Occasionally, a student’s work experience may be sufficient to waive one or more foundation courses.

Waivers for foundation courses are granted by the chair of the graduate program committee upon the recommendation of the faculty member who is responsible for an individual foundation course. Students requesting a waiver for a particular course should be prepared to meet with a faculty member and answer questions in the area of the course. They should bring to the meeting any relevant transcripts, course syllabi, course material, or evidence of practical experience. Some foundation courses may have an option for testing out.

Foundation courses cannot be used to satisfy the 36 semester hours required for the MS in MIS degree. Students who have not completed all the foundation course requirements may be admitted on provisional status until those requirements have satisfactorily been completed. All must be completed prior to or concurrent with the first six hours of MS in MIS graduate course work.

Total Credits 12-15

Degree Requirements

Complete ISQA 8310 as early as possible in your program. Students should meet with the program’s graduate advisor in order to formulate a plan of study.

Earn a total of 36 credit hours with a number 8000 or above (excluding foundation courses listed in the admissions requirements). The 36 credit hours may be earned in two ways:

• Capstone option: 18 hours core classes (6 courses) + 15 hours electives (5 courses) + 3 hours capstone (ISQA 8950)
• Thesis option: 18 hours core classes (6 courses) + 9 hours electives (3 courses) + 3 hours research methods (ISQA 8060) + 6 hours thesis (ISQA 8990)

Electives

Select 15 credits from the following, with a minimum of 3 credits from ISQA electives:

MIS Concentrations (see Concentrations)

Approved electives are all graduate course offered by the College of IS&T, not counted elsewhere in the plan of study, including ISQA, BMI, CIST, CSC, CYBR, and ITIN 8xx0 and 8xx6 level courses. Graduate level courses from other departments or colleges need approval by the Graduate Program Chair.

ISQA 8950  CAPSTONE MANAGEMENT INFORMATION SYSTEMS  3

Total Credits 36

Concentrations

The ISQA faculty has developed a set of concentrations to assist students as they work to complete the MS in MIS program. Concentrations consist of a set of elective courses that are related to a particular subject area. Students may choose to take courses that make up a concentration, or not, as they see fit. Concentrations are not minors in the traditional sense, but rather reflect areas in demand in the community. If you have any questions regarding these concentrations, please contact the MS in MIS graduate advisor.

Analytics Concentration

Data analytics uses a variety of techniques to examine large amounts of data to discover patterns that can lead to business insights. Data analytics has broad applicability in customer behavior analysis, fraud detection, scientific inquiry, process improvement, financial analysis, trend analysis, forecasting, and decision-making. Techniques may include statistical methods, data mining, modeling and simulation, and data visualization. The analytics concentration prepares students for work in the area of analytics, and also offers the necessary methodological foundation for thesis work in a master’s or PhD program.

Data Management Concentration

The effective management of data and information is a fundamental task not only in the information society, but also for civilization as a whole. This concentration will prepare students to manage a growing variety of types of data throughout the data lifecycle. The curriculum gives students theoretical and practical training in database design, database administration, data quality management, knowledge management, business intelligence, data integration, and data governance. Students will gain exposure to transaction processing systems, data warehouses, and XML data stores. Students may also gain experience managing geospatial data.

Electives
Select one of the following: ¹
ISQA 8016 BUSINESS INTELLIGENCE ³
ISQA 8450 NOSQL AND BIG DATA TECHNOLOGIES ³
ISQA 8736 DECISION SUPPORT SYSTEMS ³
GEOG 8535 CARTOGRAPHY AND DATA VISUALIZATION ²
GEOG 8056 GEOGRAPHIC INFORMATION SYSTEMS I
ISQA 8080 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS ³
ISQA 8086 SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS ³
ISQA 8900 INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS ²
ISQA 8990 THESIS ²,³,⁴

Total Credits ¹²

¹ This is not an exhaustive list. Other courses may be taken as electives with approval of the GPC.
² Topic must be related to Data Management concentration area. Prior approval from the GPC is required to use this course.
³ Only three hours of the required six hours of thesis credit may be applied to the concentration.

Geographic Information Systems Concentration

The use of spatial data for management, analysis, and decision-making has grown dramatically in both the public and private sectors, as global positioning systems, mobile devices, and geographic information systems (GIS) have become widespread. The concentration in GIS provides students with the technical and conceptual skills to manage geospatial data and apply it to solving geospatial problems. Students will learn the principles of geospatial data and mapping systems, global positioning systems, representation and management of geospatial data within computer systems, construction and use of maps, and the use of geospatial functions for decision-support.

Electives
Select two of the following: ¹
ISQA 8525 GRAPHICAL USER INTERFACE DESIGN ⁶
ISQA 8460 INTERNET OF THINGS (IOT), BIG DATA AND THE CLOUD
ISQA 8750 STORYTELLING WITH DATA
ISQA 8080 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS ²
ISQA 8086 SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS ²
ISQA 8900 INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS ²
ISQA 8990 THESIS ²,³

Total Credits ¹²

¹ This is not an exhaustive list. Other courses may be taken as electives with approval of the GPC.
² Topic must be related to e-Commerce concentration area. Prior approval from the GPC is required to use this course.
³ Only three hours of the required six hours of thesis credit may be applied to the concentration.

Electronic Commerce Concentration

The rise of electronic commerce offers opportunities for both research and practice. Yet a critical examination of the electronic commerce landscape is required to make sense of this subject. A multitude of technologies and applications have brought about changes in business and society that require careful consideration. Some key topics include understanding the effects of new information technologies on the value proposition, market opportunities, revenue models for business through electronic commerce, that inform the design of web and mobile applications. This concentration is suited for students who would like to pursue careers in IT consulting, start-up companies, and technology venues. Students interested in Electronic Commerce are encouraged to declare a formal concentration by contacting the graduate advisor.

Health Informatics Concentration

Students interested in health informatics or working in the health care industry are encouraged to declare a formal concentration by contacting a MS in MIS advisor. The health informatics concentration integrates MIS with biomedical informatics. The AMIA defines biomedical informatics as a multidisciplinary field that studies and pursues the effective uses of biomedical data, information, and knowledge for scientific inquiry, problem solving, and decision making, driven by efforts to improve human health. Biomedical informatics as the core scientific discipline that supports applied research
and practice in several disciplines including health informatics and clinical informatics.

**Total Credits**: 12

1. This is not an exhaustive list. Other courses may be taken as electives with approval of the GPC.
2. Topic must be related to Information Assurance concentration area. Prior approval from the GPC is required to use this course.
3. Only three hours of the required six hours of thesis credit may be applied to the concentration.

### IT Audit and Control Concentration

The IT Audit and Control concentration will provide students with the technical, organizational, accounting/auditing, and managerial background to plan and conduct IT audit and control activities. The concentration will cover the following conceptual areas: business risks and the management of business risk, IT risk as a component of business risk, the need to manage IT risks, basic type of controls required in a business system in order to control IT risks, controls associated with top management, system development, programming, data resource management, database, security, operations management, quality assurance, boundary controls, and communications. Issues associated with new system control risks created by the use of the Internet for business applications and electronic business will also be covered in one or more courses. Students will learn and apply and integrate technical, managerial and conceptual skills needed to plan and conduct IT audits and establish appropriate controls.

### Prerequisite Courses

Students must have completed at least 9 hours of the MS in MIS core courses (beyond foundation requirements) prior to enrolling for the concentration. In addition, the following preparation is required for this concentration:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BSAD 8110</td>
<td>ACCOUNTING AND FINANCIAL FUNDAMENTALS</td>
<td>3</td>
</tr>
</tbody>
</table>

(This course is only required for students who have had no exposure to accounting fundamentals. Students will be given an automatic waiver if they have taken two semesters of accounting in their undergraduate degree.)

</table>
Completion of at least 9 hours of the core courses, including psychology, organization behavior, and organization change. Students as project management, software engineering, management science, and information technology managers, technical, organizational and managerial background to be effective project managers, project leaders, information technology managers, and software engineers. The curriculum in this concentration integrates project management standards developed by organizations such as IEEE (The Institute of Electrical and Electronics Engineers) and PMI (Project Management Institute) with conceptual background from disciplines such as project management, software engineering, management science, psychology, organization behavior, and organization change. Students are to start coursework in the project management concentration after completion of at least 9 hours of the core courses, including ISQA 8210.

### Project Management Concentration

The Project Management concentration will provide students with the technical, organizational and managerial background to be effective project managers, project leaders, information technology managers, and software engineers. The curriculum in this concentration integrates project management standards developed by organizations such as IEEE (The Institute of Electrical and Electronics Engineers) and PMI (Project Management Institute) with conceptual background from disciplines such as project management, software engineering, management science, psychology, organization behavior, and organization change. Students are to start coursework in the project management concentration after completion of at least 9 hours of the core courses, including ISQA 8210.

1. This is not an exhaustive list. Other courses may be taken as electives with approval of the GPC.
2. Topic must be related to IT Audit and Control concentration area. Prior approval from the GPC is required to use this course.
3. Only three hours of the required six hours of thesis credit may be applied to the concentration.

### Quality of Work Standards

The Graduate College’s Quality of Work standards shall be applied to foundation courses as well as courses taken as part of the degree program. In particular, the GPC will recommend to the Graduate College that any student receiving a grade of “C-” or below in any foundation courses will be automatically dismissed from the program, or, in the case of unclassified or non-degree students, be automatically denied admission. Student receiving a grade of “C+” or “C” in any foundation course will be placed on probation or dismissed from the program. Student not maintaining a “B” (3.0 on 4.0 scale) average in foundation courses will be placed on probation or dismissed from the program.

### Business Administration, MBA and Management Information Systems, MS (MBA/MIS)

#### Department of Business Administration, College of Business Administration

#### Department of Information Systems & Quantitative Analysis, College of Information Science & Technology

#### Vision Statement

In today’s context of globally integrated and interdependent businesses, ubiquitous information technologies, and a mobile workforce, it is critical that graduate education provides students opportunities to develop integrated business and technology skills. The primary purpose of this dual degree program is to provide this integration by enabling students to complete the MBA and MS in MIS degrees simultaneously. This track is designed for dedicated students who are willing to take on the challenges related to graduate education from two perspectives—business administration and management information systems. As such, this program involves intensive preparation in both business administration and information systems and a specialization in an area that combines both backgrounds. The dual degree program requires a minimum of 55 hours of course work beyond foundation requirements. Students who wish to pursue this option must work closely with an adviser to develop an integrated plan of study at an early stage. Students who complete the dual degree program will receive two degrees, two diplomas, and will have both degrees recorded on their transcript.

Admissions
General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements
Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
- Spring: November 1
- Summer: April 1
- Fall: July 1 (June 1 for international students)

Other Requirements
- All applicants must have earned a minimum junior/senior GPA of 3.0 for both the MBA and the MS in MIS programs.
- **Entrance Exam:** An entrance exam is waived for the academic year 2023/2024. Submitting GMAT or GRE scores with at least the the minimum scores (GRE verbal: scores: 144, GRE quantitative: 148, GMAT: 500) may strengthen your application.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., OR a baccalaureate or other advanced degree from a pre-determined country on the waiver list (https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf), must meet the minimum language proficiency score requirement in order to be considered for admission.
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** Applicants are required to submit a statement of purpose (500-750 words) addressing the following. The statement must be written in the applicant's own words, reflecting their goals and aspirations. Plagiarism in the statement may result in the rejection of the entire application.
  - Why you want to study at UNO
  - Career goals
  - Relevant qualifications or work experience that demonstrate potential for success in the graduate program
  - Motivations for pursuing graduate education
- **Resume:** Include work experience and education
- **Letters of Recommendation:** Three letters of recommendation (names and addresses submitted as part of the online application) from individuals who can evaluate your work and/or academic achievement
- **Interview:** optional
  - Although not required, applicants are strongly encouraged to arrange for an interview with one or more members of the graduate program committees of the MBA and MIS programs by directly contacting the committee chairperson of the College of IS&T. Telephone interviews are highly recommended for applicants outside the local area.
- Students qualifying for admission based on the standard outlined above, but lacking some foundation courses, will be granted provisional status until all foundation courses are completed with grades of "B" (3.0 on a 4.0 scale) or better.

### MBA Directed Elective Requirements

#### Directed Elective Requirement

For students who have earned an undergraduate or graduate degrees in accounting, economics, management, or marketing, the core course(s) corresponding to the student’s previously earned degree(s) will be waived.

To satisfy degree requirements, the student must complete a directed elective in the waived field as indicated. For students who have earned an undergraduate or graduate degree in finance, the core course(s) corresponding to the student’s previously earned degree may be waived upon request. Students with more than one core course waiver will be required to take an additional 1-credit hour seminar or 3-credit hour elective to fulfill degree requirements.

MBA/MIS Exit Requirements

Capstone Courses (5 hours)

BSAD 8800 - MBA Project-Focused Capstone. As the project-focused capstone course for the Master of Business Administration (MBA) degree, this course will focus on students completing a service-learning consulting project for a non-profit or other organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite:** Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the Capstone course. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Permission from MBA advisor is required to register for this class.

OR

ECON 8330 - Data Analysis from Scratch. This course may be substituted for BSAD 8800 as the Capstone requirement for MBA students. Students in the course will work on a service-learning consulting project, specifically focused on a client data project. The consulting project will focus on the application of knowledge and skills learned in the MBA program and the Business Analytics concentration. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite(s)/Corequisite(s):** A multivariate or regression analysis course such as ECON 8300 (https://catalog.unomaha.edu/search/?P=ECON%208300), ISQA 9130 (https://catalog.unomaha.edu/search/?P=ISQA%209130) or STAT 8436 (https://catalog.unomaha.edu/search/?P=STAT%208436), and a programming class such as ECON 8320 (https://catalog.unomaha.edu/search/?P=ECON%208320) or equivalent programming experience; or instructor approval. Students also must successfully complete BSAD 8630 (https://catalog.unomaha.edu/search/?P=BSAD%208630), BSAD 8420 (https://catalog.unomaha.edu/search/?P=BSAD%208420), and BSAD 8830 (https://catalog.unomaha.edu/search/?P=BSAD%208830) before taking this course for the Capstone requirement. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program.

ISQA 8950 MIS Capstone (3 credits) (taken within the last 6 hours or the final semester of the program, with all core courses completed).

### Code | Title | Credits
---|---|---
BSAD 8800 | MBA PROJECT-FOCUSED CAPSTONE | 2-3
or ECON 8330 | DATA ANALYSIS FROM SCRATCH | 
ISQA 8950 | CAPSTONE MANAGEMENT INFORMATION SYSTEMS | 3

**Thesis Option**

To take this option, a student will be required to enroll in six (6) hours of thesis credit:

### MBA Program

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BSAD 8990</td>
<td>THESIS</td>
<td>1-6</td>
</tr>
</tbody>
</table>

### MS-MIS Program

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISQA 8990</td>
<td>THESIS</td>
<td>3</td>
</tr>
</tbody>
</table>

The thesis must be in an area that relates to both the business administration and information systems domains. The Supervisory Committee must include at least one CBA faculty member and one ISQA faculty member.

**Other Requirements to Complete the Program**

All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

**Other Program-Related Information**

**Transfer Credits**

A student may transfer credits into the MBA/MIS dual-degree program subject to the following conditions:

- No more than 1/3 of the credits for the dual-degree program may be transfer credits
- No more than 1/3 of the business credits for the dual-degree program may be transfer credits
- No more than 1/3 of the MIS credits for the dual-degree program may be transfer credits
- The transfer credits must conform to the transfer policies of the individual programs that make up the dual-degree program

**Total Credit Hours: 55**

**Academic Performance**

In addition to UNO Graduate College Quality of Work Standards, Dual Degree (DD) students may repeat only once a BSAD 8-0-level course in which they receive any grade, including "W" or "I". Students earning three "C/C+" grades, or a grade of "C-" or below, will be automatically dismissed from the DD program. Dismissed students will be immediately administratively withdrawn from all courses in which they are enrolled for DD credit.

Students who have been dismissed may not enroll in any courses for DD credit in any subsequent semester or summer session until reinstatement has been granted by the Dual-Degree Program Academic Standards Committee (DDPASC) comprised of the 2 GPC Chairs and 1 faculty member from each GPC.

Students who have been dismissed from the DD program may submit a written petition for reinstatement to the DDPASC. Students petitioning the DDPASC for reinstatement may not enroll in any course for DD credit until after the DDPASC has ruled on the petition. Upon receiving a petition for reinstatement, the DDPASC will evaluate the student's written petition for reinstatement. As part of the reinstatement petitioning process, the DDPASC reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student; this information may be used by the DDPASC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege and not all students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period at the DDPASC's discretion and must satisfy the probationary conditions specified by the DDPASC. In addition to probationary conditions, reinstated students will be subject to additional reinstatement conditions as specified by the DDPASC. These reinstatement conditions will include retaking one or more courses in which the student must earn a grade of "B" (3.0) or higher (the exact grade requirements for retaken courses may in fact be higher than "B" (3.0)). Students not satisfying the probationary or reinstatement conditions will be automatically dismissed.

**Grades Earned in Repeated Courses**

When making decisions related to the Quality of Work Standards issues outlined in the UNO Graduate Catalog, the Dual-Degree Program Academic Standards Committee (DDPASC) will consider the initial grade(s) received...
in a course as well as the most recent grade received for the course. This approach differs from the method used to calculate GPA in a student’s MavLINK/DegreeWorks file, where the most recent grade replaces the grade received in the previous course attempt.

Public Administration, MPA and Management Information Systems, MS (MPA/MIS)

School of Public Administration, College of Public Affairs & Community Service, Department of Information Systems & Quantitative Analysis, College of Information Science & Technology

Vision Statement

In government and non-profit organizations, there is a significant need and a long-term demand for persons with advanced skills in information management technology. The primary purpose of this dual degree option is to prepare students to manage and lead organizations in the future. To meet this need, the School of Public Administration and the College of Information Science & Technology offer the option to complete both the MPA and the MS in MIS degree jointly by completing 54-57 hours of course work beyond foundation requirements. This joint degree program is designed for dedicated students who are able to successfully complete graduate intensive study from two perspectives—public administration and management information systems—while achieving a synergy between the two fields. As such, the program involves graduate coursework in both public administration and information systems, with integrative experiences that will attain the desired synergy. Students interested in this option will work closely with a faculty mentor to develop an integrated plan of study at an early stage.

Admissions

General Application Requirements and Admission Criteria (p. 974)

Program-Specific Requirements

Application Deadlines (Spring 2024, and Fall 2024)
• Fall: June 1
• Spring: October 1

Other Requirements

• The general prerequisite for admission to the program is a four year bachelors’ degree with a minimum of a 3.0 GPA of the junior-senior year (last 50-60 credit hours).
• Entrance Exam: An entrance exam is waived for the academic year 2023/2024. Submitting GMAT or GRE scores with at least the minimum scores (GRE verbal: 144, GRE quantitative: 148, GMAT: 500) may strengthen your application.
• English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
  • Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
• Statement of Purpose
• Writing Sample: From work or previous academic experiences. Alternatively, if you do not have a writing sample, please submit a two page double-spaced word processed essay that addresses the following two topics:
  • Your unique personal qualities and life experiences that distinguish you from other applicants to our graduate program
  • Two accomplishments that demonstrate your potential for success in the graduate program
• Resume: Indicate your work experience and background
• Letters of Recommendation: Two letters of recommendation are required

Degree Requirements

MPA/MIS Foundation Courses

A student must have completed some basic courses either as an undergraduate student or prior to enrolling in the first MS in MIS course. Students may start MPA courses while completing the MIS foundation courses.

Data Analytics Certificate

Department of Information Systems and Quantitative Analysis, College of Information Science & Technology

Vision Statement

Data analytics uses a variety of techniques to examine large amounts of data to discover patterns that can lead to business insights. Data analytics has broad applicability in customer behavior analysis, fraud detection, scientific inquiry, process improvement, financial analysis, trend analysis, forecasting, and decision-making. Techniques may include statistical methods, data mining, modeling and simulation, and data visualization. The certificate is designed to equip students to apply the theory and practice...
of data analytics to solving problems in a variety of economic, social, and scientific domains.

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
- Fall: July 1
- Spring: December 1
- Summer: April 1

Other Requirements
- Individuals with an undergraduate degree and one to two years of work experience in information systems (IS) related roles are eligible to apply for this certificate programs.
- The minimum undergraduate grade point average requirement for the data management certificate is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a 4-year undergraduate degree.
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission. Minimum scores required for this program are:
  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

Resumé: Submit a detailed resume indicating your work experience and background.

OPTIONAL Statement of Purpose: Applicants may submit a statement of purpose with a maximum of 750 words that address:
- motivations for pursuing graduate education
- relevant qualifications or work experience that demonstrate potential for success in the graduate program
- career goals
- why you want to study at UNO

The data management graduate certificate consists of three core courses (9 credits) and two electives (6 credits) for a total of 15 credit hours. Specific course requirements for the graduate certificate are described below.

There are three prerequisite courses which may be waived by the chair of the graduate program committee, based on courses already taken, applicable work experience, test out exams offered by the department, or the recommendation of faculty teaching the prerequisite courses.

Degree Requirements

Prerequisites
The following courses are prerequisites of the required courses. Elective courses may have additional prerequisites. All prerequisites must be completed with grades of “B” or better.

- One programming class such as CIST 1400 or equivalent
- One semester of undergraduate database management or equivalent, e.g.,
  - ISQA 3310 Managing the database environment
  - CSCI 4850 Database Management Systems
  - ISQA 8040 An overview of systems development
No more than two courses (6 credit hours maximum) can be used on two MIS-related certificates (Data Analytics, Information Assurance, Project Management, and Systems Analysis and Design).

**Total Credits** 15

1 Topic must be related to data management. Prior approval from the GPC is required to use this course.

Topic of ISQA 8080 and ISQA 8086 must be related to data management. Prior approval from the GPC is required to use this course. Other courses related to data management that are not included in the list of electives may count towards the certificate after approval by the GPC.

**Information Assurance Certificate**

**Department of Information Systems and Quantitative Analysis, College of Information Science & Technology**

**Vision Statement**

The goal of the ISQA graduate certificate program is to allow post-baccalaureate students and working professionals to expand their educational background and complete work that could count towards a graduate degree. Earning the graduate certificate will enhance skill sets; provide exposure to new information technologies, theories and practices; allow individuals to work toward various professional certifications; increase growth potential with employers; and increase prospects of obtaining a graduate degree. The graduate certificate program offers existing technical and managerial professionals the chance to improve and hone their communication skills to aide in their professional development.

The information assurance (IA) certificate will provide students with the technical, organizational and managerial background to assist in planning, deploying, and managing security technologies to achieve information assurance.

**Program Contact Information**

**Prospective Student Admission**

advising-cist@unomaha.edu

**Other Program Related Information**

The certificate in information assurance can be obtained online, but students will need to consult with the GPC on course offerings.

**Admissions**

General Application Requirements and Admission Criteria (p. 974)

**Program-Specific Requirements**

**Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)**

- Fall: July 1
- Spring: December 1
- Summer: April 1

**Other Requirements**

- The minimum undergraduate grade point average requirement for the Information Assurance certificate program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a four-year undergraduate degree.

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list ([https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf](https://www.unomaha.edu/graduate-studies/prospective-students/Proof%20of%20English%20Proficiency-%20International.pdf)), must meet the minimum language proficiency score requirement in order to be considered for admission.

  - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

- **Resume:** Submit a detailed resume indicating your work experience and background.

- **OPTIONAL Statement of Purpose:** Applicants may submit a statement of purpose with a maximum of 750 words that address:
  - motivations for pursuing graduate education
  - relevant qualifications or work experience that demonstrate potential for success in the graduate program
  - career goals
  - why you want to study at UNO

**Total Credits** 12

¹ Topic must be related to information assurance. Prior approval from the GPC is required to use this course.

### Completion of the Certificate

During what is expected to be the semester the certificate is completed and prior to the posted deadline, students should apply for the certificate through MavLINK on or before the deadline. If students complete the application form and do not complete all of the requirements for the certificate, contact the Office of Graduate Studies as soon as possible. Applicants must reapply during the next semester in which you expect to complete the certificate; no additional fee is charged to reactivate your application.

The following requirements are due 12 working days prior to commencement:

- “Incomplete” and “NR” grades from previous terms must be removed so that the grade will be in the Office of Graduate Studies.
- All fees, fines, and other obligations due the university must be settled.

For students currently enrolled in courses that are a part of their plan of study, enrollment must be maintained in order to complete the certificate. A grade for any current enrollment must be received by the Registrar’s Office no later than the close of business on the fifteenth working day following the end of a semester.

### Awarding of Graduate Certificates

The Office of Graduate Studies will mail the certificate to students when all requirements are completed and all obligations to the university are satisfied. The Graduate College will not approve any changes in the student's permanent record once the certificate is awarded.

## Project Management Certificate

**Department of Information Systems and Quantitative Analysis,**
**College of Information Science & Technology**

### Vision Statement

The goal of the ISQA graduate certificate program is to allow post-baccalaureate students and working professionals to expand their educational background and complete work that could count towards a graduate degree. Earning the graduate certificate will enhance skill sets; provide exposure to new information technologies, theories and practices; allow individuals to work towards various professional certifications; increase growth potential with employers; and increase prospects of obtaining a graduate degree. The graduate certificate programs offer existing technical and managerial professionals the chance to improve and hone their communication skills to aide in their professional development.

The project management certificate will provide students with the technical, organizational and managerial background to become project managers, project leaders, information technology managers, and software engineers.

**Mathematics**

**Degree Programs Offered**

- Mathematics, MA (p. 1321)
- Mathematics, MS (p. 1325)
- Mathematics, MAT (p. 1324)

**Certificates Offered**

- Secondary Mathematics Specialist Certificate (p. 1329)

**MATH 8016 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)**

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with CSCI 4010, CSCI 8016, MATH 4010).

**Prerequisite(s):** MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

**MATH 8036 MODERN ALGEBRA (3 credits)**

Algebra is the study of mathematical manipulations that preserve something (like equality - when solving equations). The areas in which Algebra finds application are quite diverse, from Ancient Greek Geometry through to Modern Information Protection and Security (error correcting codes, data compression, and cryptography). This course begins with topics that should be familiar (such as ruler-and-compass constructions, and modular arithmetic) and builds upon this foundation through polynomial rings up to finite fields and basic group theory. (Cross-listed with MATH 4030).

**Prerequisite(s):** MATH 2230 with a C- or better or MATH 2030 with a C- or better

**MATH 8050 ALGORITHMIC GRAPH THEORY (3 credits)**

The overall goal is to introduce advanced concepts in graph theory, graph modeling, and graph algorithms and how they can be used to solve a wide range of problems in various application domains. The course introduces students to several applied path algorithms, clustering and partitioning techniques, network flow algorithms, and weighted matching algorithms. Other advanced concepts associated with complex networks include node centralities in graphs and community detection approaches. The course will also introduce students to key classes of graphs with a particular focus on the main classes of Perfect Graphs and their applications in scheduling, chip design, mobile computing, and Biomedical Informatics. (Cross-listed with CSCI 8050).

**Prerequisite(s):** CSCI 3320 or CSCI 8325 and MATH 4150 or MATH 8156 or permission of instructor.

**MATH 8056 LINEAR ALGEBRA (3 credits)**

Linear algebra is extensively utilized in the mathematical modeling of many natural phenomena. Many scientific and engineering disciplines, such as data science, chemical engineering and biology, make extensive use of the theory and techniques commonly present in basic to advanced linear algebra courses. The goal of this course is to help students to grasp a solid theoretical understanding of vectors, vector spaces, inner product spaces, linear transformations, eigenvalues, canonical forms, complex vectors, matrices, and orthogonality. By going through the materials in a mathematically rigorous way, students will develop deeper and more accurate intuitions of the basic concepts in linear algebra. Consequently, the applications of linear algebra will become much more transparent. (Cross-listed with MATH 4050).

**Prerequisite(s):** MATH 2050 with a grade of C- or better; MATH 2030 or MATH 2230 or equivalent with a grade of C- or better; or permission

**MATH 8060 ALGORITHMIC COMBINATORICS (3 credits)**

This course includes classical combinatorial analysis graph theory, trees, network flow, matching theory, external problems, and block designs. (Cross-listed with CSCI 8060).

**Prerequisite(s):** MATH 3100, CSCI 3100, MATH 8105 or CSCI 8105 or instructor's permission.

**MATH 8080 DESIGN AND ANALYSIS OF ALGORITHMS (3 credits)**

The course provides students an understanding of advanced topics in algorithms. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, dynamic programming, greedy algorithms, graph algorithms, and the theory of NP-Completeness. (Cross-listed with CSCI 8080).

**Prerequisite(s):** CSCI 3320 or CSCI 8325 or equivalent. Not open to non-degree graduate students.

**MATH 8105 APPLIED COMBINATORICS (3 credits)**

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with CSCI 3100, CSCI 8105, MATH 3100).

**MATH 8116 ABSTRACT ALGEBRA I (3 credits)**

An introduction to group theory. Various classes of group are studied: symmetric groups, abelian, cyclic, and permutation groups. Basic tools are developed and used: subgroups, normal subgroups, cosets, the Lagrange theorem, group homomorphisms, quotient groups, direct products, and group actions on a set. The course culminates with the Sylow theorems in finite group theory. The theory is illustrated with examples from geometry, linear algebra, number theory, crystallography, and combinatorics. (Cross-listed with MATH 4110).

**Prerequisite(s):** MATH 4050/MATH 8056 with a C- or better or MATH 4560/MATH 8566 with a C- or better or permission of instructor
MATH 8126 ABSTRACT ALGEBRA II (3 credits)
An introduction to ring and field theory. Various classes of commutative rings are considered including polynomial rings, and the Gaussian integers. Examples of fields include finite fields and various extensions of the rational numbers. Concepts such as that of an ideal, integral domain, characteristic and extension field are studied. The course culminates with an introduction to Galois theory. Applications include the resolution of two classical problems: the impossibility of angle-trisection and the general insolvability of polynomial equations of degree 5 or higher. (Cross-listed with MATH 4120)
Prerequisite(s): MATH 4110/MATH 8116 with a C- or better or permission of instructor

MATH 8156 GRAPH THEORY & APPLICATIONS (3 credits)
Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 4150, CSCI 8156, MATH 4150).
Prerequisite(s): MATH 2030 or permission of instructor.

MATH 8206 NUMERICAL METHODS (3 credits)
This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 4200, CSCI 8206, MATH 4200).
Prerequisite(s): MATH 1970 and MATH 2050 and MATH 2350 with a C- or better or permission of instructor.

MATH 8235 INTRODUCTION TO ANALYSIS (3 credits)
This course provides a theoretical foundation for the concepts of elementary calculus. Topics include real number system, topology of the real line, limits, functions of one variable, continuity, differentiation. (Cross-listed with MATH 3230).
Prerequisite(s): MATH 1960 and MATH 2230 each with a grade of C- or better.

MATH 8236 MATHEMATICAL ANALYSIS I (3 credits)
Provides a theoretical foundation for the concepts of classical calculus. Topics include ordered fields, the real and complex number system, basic metric space topology, numerical sequences and series, limits and continuity in metric spaces, monotonic functions, differentiation, (functions of several variables included). (Cross-listed with MATH 4230).
Prerequisite(s): MATH 3230/MATH 8235 or equivalent with a grade of C- or better.

MATH 8246 MATHEMATICAL ANALYSIS II (3 credits)
Provides a theoretical foundation for the concepts of classical Calculus (vector calculus included). Topics include sequences and series of functions, uniform convergence, power series, Fourier series, multivariable real differential and integral calculus, the Implicit Function Theorem, integration of different forms, and the important formulas, connecting those integrals, due to: Green, Gauss, Riemann, and Ostrogradski. (Cross-listed with MATH 4240).
Prerequisite(s): MATH 4230/MATH 8236 with a grade of C- or better.

MATH 8250 PARTIAL DIFFERENTIAL EQUATIONS (3 credits)
Partial differential equations (PDEs) are fundamental in the application of mathematics to science and engineering. Topics to be covered will include: Linear and nonlinear first-order equations, classification of second-order linear equations, elliptic, hyperbolic and parabolic equations and boundary value problems, and Green's functions.
Prerequisite(s): MATH 1970, MATH 2350, or instructor's permission. MATH 4330/MATH 8336 is recommended, but not required.

MATH 8255 INTRODUCTION TO NUMERICAL METHODS (3 credits)
This course emphasizes the implementation of several numerical methods to problems that arise in science and engineering. It involves the application of the computer to solve mathematical problems using the following computational techniques: Taylor Series approximation, numerical differentiation, root-finding methods, interpolation, extrapolation, curve fitting, solution methods for matrix equations, numerical differentiation, numerical integration, and the solution of differential equations. (Cross-listed with MATH 3250).
Prerequisite(s): MATH 1960 with a C or better.

MATH 8276 COMPLEX ANALYSIS (3 credits)
This course is an introduction to the theory of functions of a complex variable, a fundamental area of mathematics with multiple applications to science and engineering. Topics include the field of complex numbers, complex differentiation, the complex contour integral and Cauchy’s integral formula, Taylor expansions and analytic functions, conformal mapping and Riemann’s conformal equivalence theorem, residue theory and Laurent series, harmonic functions, and applications. (Cross-listed with MATH 4270).
Prerequisite(s): MATH 3230/MATH 8235 with a grade of C- or better or permission of the instructor.

MATH 8306 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)
This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, CSCI 8306, MATH 4300).
Prerequisite(s): MATH 2050 with a C- or better or permission of instructor.

MATH 8316 PROBABLISTIC OPERATIONS RESEARCH MODELS (3 credits)
This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queuing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, CSCI 8316, MATH 4310).
Prerequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

MATH 8326 COMPUTATIONAL OPERATIONS RESEARCH (3 credits)
Survey of computational methods used in the solution of operations research problems. Some topics may include scripting to guide optimization software, constraint programming, heuristics and metaheuristics for optimization, basic machine learning algorithms, and simulation. (Cross-listed with MATH 4320, CSCI 4320, CSCI 8326).
Prerequisite(s): MATH 3200 or CSCI 1620, and MATH 4300 each with a grade of C- or better or permission of instructor.

MATH 8336 INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS (3 credits)
This course introduces the basic methods of PDEs guided by applications in physics and engineering. The main topics to be covered include The Linear First order PDEs, Transport equations, Characteristics, Classification of PDEs, Separation of variables, Heat conduction, vibrating membranes, boundary value problems, Maximum principle, Sturm-Liouville problems, Fourier series, Fourier Integrals, Harmonic functions, Legendre polynomials, Distributions, Green's functions. (Cross-listed with MATH 4330).
Prerequisite(s): MATH 1970 with a C- or better and MATH 2350 with a C- or better, or permission of instructor; MATH 2050 recommended, not required.

MATH 8356 ORDINARY DIFFERENTIAL EQUATIONS (3 credits)
This course covers the theory of initial-, boundary-, and eigenvalue problems, existence theorems, real and complex linear systems of differential equations, and stability theory. There will be a strong emphasis on methods for finding solutions of initial and boundary value problems and analyzing properties of these solutions for various ordinary differential equations. (Cross-listed with MATH 4350).
Prerequisite(s): MATH 1970 with a C- or better, MATH 2050 with a C- or better, and MATH 2350 with a C-, or better or instructor's permission.
MATH 8400 DYNAMICAL SYSTEMS AND CHAOS (3 credits)
Prerequisite(s): Permission from Instructor (If you have a background that covers introduction to analysis, differential equations, linear algebra, and you are somewhat familiar with computer codes, it is easy to obtain permission.)

MATH 8406 THE FINITE ELEMENT METHOD (3 credits)
Prerequisite(s): MATH 1970, MATH 2050 and MATH 2350 all with a C- or better or instructor permission. MATH 3300/MATH 8305 and MATH 4330/MATH 8336 recommended. Students should be able to use a programming language (ie MATLAB) to complete computational assignments

MATH 8410 BOOLEAN NETWORKS (3 credits)
This course is focused on introduction to discrete dynamical networks, in particular logical networks, and their applications.
Prerequisite(s): MATH 1960 (Calculus II), MATH 2230 (proof writing skills), MATH 4740 or equivalent (basic probability theory), basic computer skills; or permission of the instructor.

MATH 8430 LINEAR PROGRAMMING (3 credits)
This course includes a complete development of theoretical and computational aspects of linear programming. Basic theoretical foundations covered include polyhedra, convexity, linear inequalities and duality. Advanced topics such as decomposition and column generation are covered. Both simplex methods and interior point methods are included.
Prerequisite(s): MATH 4300/MATH 8306

MATH 8440 NETWORK PROGRAMMING (3 credits)
A presentation of network flow models and optimization algorithms. Topics include pure, generalized, integer, and constrained network problems, plus special cases of each, including transportation, assignment, shortest-path, transshipment, and multicommodity.
Prerequisite(s): MATH 4300/MATH 8306

MATH 8456 INTRODUCTION TO MACHINE LEARNING AND DATA MINING (3 credits)
This is an introduction to machine learning and data mining which covers the following topics with an emphasis on mathematical and statistical analysis: linear and nonlinear regression models, model selection and regularization methods, resampling methods, classification models, tree-based models, and unsupervised learning topics. If time allows, text mining and deep learning will also be introduced in the course. Statistical software will be used. (Cross-listed with MATH 4450, STAT 4450, STAT 8456)
Prerequisite(s): MATH 4740/8746 with a C- or better or STAT 3800/8805 with a C- or better or permission of instructor.

MATH 8460 INTEGER PROGRAMMING (3 credits)
Advanced study in mathematical programming with integer or mixed integer variables. Topics include integer programming, modeling, applications of integer programming, and exploration of solution algorithms based on linear programming and heuristic methods such as tabu search, simulated annealing, and genetic algorithms.
Prerequisite(s): MATH 4300/CSCI 4300/MATH 8306/CSCI 8306. Not open to non-degree graduate students.

MATH 8480 MULTI-AGENT SYSTEMS AND GAME THEORY (3 credits)
This course covers advanced topics in the area of coordination of distributed agent-based systems with a focus on computational aspects of game theory. The main topics covered in this course include distributed constraint satisfaction, distributed constraint optimization, and competitive and cooperative game theory. (Cross-listed with CSCI 8480).
Prerequisite(s): CSCI 4450 or CSCI 8456. Suggested background courses: CSCI 4480 or CSCI 8486; CSCI 8080. Not open to non-degree graduate students.

MATH 8500 NUMERICAL LINEAR ALGEBRA (3 credits)
Topics covered in this course include error propagation, solutions of nonlinear equations, solutions of linear and nonlinear systems by various schemes, matrix norms and conditioning, and computation of eigenvalues and eigenvectors. (Cross-listed with CSCI 8500).
Prerequisite(s): MATH 1960 and MATH 2050, or permission of instructor. Familiarity with computer programming is assumed.

MATH 8510 NUMERICAL DIFFERENTIAL EQUATIONS (3 credits)
Topics covered in this course include interpolation and approximations, numerical differentiation, numerical integration, and numerical solutions of ordinary and partial differential equations. (Cross-listed with CSCI 8510).
Prerequisite(s): MATH 1970, MATH 2350, or permission of instructor. Familiarity with computer programming is assumed.

MATH 8520 ADVANCED TOPICS IN OPERATIONS RESEARCH (3 credits)
Advanced treatment of a specific topic in the area of operations research not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with CSCI 8520).
Prerequisite(s): MATH 4300 or MATH 8306 or CSCI 4300 or CSCI 8306 or permission of the instructor.

MATH 8566 NUMBER THEORY & CRYPTOGRAPHY (3 credits)
An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 4560, CSCI 8566, MATH 4560).
Prerequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

MATH 8616 INTRODUCTION TO TOPOLOGY (3 credits)
This is a proof-oriented course presenting the foundations of topology. Metric spaces and general topological spaces are introduced. The course will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with CSCI 8616).
Prerequisite(s): MATH 3230/8235 with a C- or better or permission of instructor.

MATH 8620 GENERAL TOPOLOGY (3 credits)
General topology has roots in geometry and analysis through the study of spaces, dimensions, and transformations. Its development was influenced by the parallel development of (axiomatic) set theory. This course introduces topological spaces from the point of view of separation axioms, countability axioms, compactifications, Boire property, and other completeness properties. Basic concepts of Descriptive Set Theory are also introduced.
Prerequisite(s): MATH 4610/8616 or permission of instructor.
MATH 8626 ITERATED FUNCTION SYSTEMS AND FRACTALS (3 credits)
This is a proof-oriented course presenting the foundations of fractal geometry. It introduces students to the beauty, magic, and applications of fractals and iterated function systems, with emphasis on the mathematics behind it all. Topics range from contractions on hyperspaces and their fixed points to fractal dimensions to Julia and Mandelbrot sets. (Cross-listed with MATH 4620).
Prerequisite(s): MATH 8616 with a C or better or permission of instructor.

MATH 8645 MODERN GEOMETRY (3 credits)
This course will study the modern foundations of Euclidean and Non-Euclidian Geometry. Included will be a study of the principles of axiomatic systems. Euclidean Geometry will be investigated using Hilbert's axioms for Euclidean geometry (or another equivalent Euclidian geometry axiom set). Hyperbolic geometry will be encountered through the models of Klein and Poincare. Neutral geometry with Lambert and Saccheri quadrilaterals will be studied. Finite geometries and projective geometries will also be explored. (Cross-listed with MATH 3640).
Prerequisite(s): MATH 2230 with a grade of C- or better.

MATH 8650 INTRODUCTION TO PROBABILITY MODELS (3 credits)
This is an introduction to probability modeling including Poisson Processes, Markov chains, birth-death processes, queuing models and renewal theory. Applications will be an important part of the course.
Prerequisite(s): MATH 4740/MATH 8746 or STAT 3800/STAT 8805 or permission of instructor.

MATH 8666 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)
This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, CSCI 8666, MATH 4660).
Prerequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

MATH 8670 TOPICS IN PROBABILITY AND STATISTICS (3 credits)
Advanced treatment of a specific topic in the area of probability and/or statistics not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ. (Cross-listed with STAT 8670).
Prerequisite(s): MATH 4750/MATH 8756 or STAT 3800/STAT 8805 or permission from instructor

MATH 8720 RELIABILITY THEORY (3 credits)
This course covers the probabilistic and statistical aspects of reliability theory. Reliability theory is concerned with the probability that a component or system is successfully working over a given time period or at a specific time instance. (Cross-listed with STAT 8720).

MATH 8746 INTRODUCTION TO PROBABILITY AND STATISTICS I (3 credits)
A mathematical introduction to probability theory including the properties of probability; probability distributions; expected values and moments; specific discrete and continuous distributions; and transformations of random variables. (Cross-listed with MATH 4740).
Prerequisite(s): MATH 1970 and either MATH 2230 or MATH 2030 all with a grade of C- or better or permission of instructor.

MATH 8756 INTRODUCTION TO PROBABILITY AND STATISTICS II (3 credits)
Theory and methods of statistical inference including sampling distributions, estimators, estimation, and statistical hypotheses. (Cross-listed with MATH 4750).
Prerequisite(s): MATH 4740/MATH 8746 with a grade of C- or better.

MATH 8766 TOPICS IN APPLIED MATHEMATICS (3 credits)
Selection of such topics such as dynamical systems and chaos, Boolean networks, modeling of discrete or continuous systems, matrix theory, difference equations, information theory, discrete events simulation and other approved by Upper Curriculum Committee. (Cross-listed with MATH 4760).
Prerequisite(s): MATH 3100/CSCI 3100 with a grade of C- or better, or permission of instructor.

MATH 8855 HISTORY OF MATHEMATICS (3 credits)
An overview of the history of mathematics and famous mathematicians via studying and solving famous mathematical problems, exploring famous mathematical theorems, and studying the biographies of famous mathematicians. (Cross-listed with MATH 3850).
Prerequisite(s): MATH 1950 with a grade of C- or higher and one of either MATH 2230 or MTCH 2000 with a grade of C- or higher.

MATH 8956 TOPICS IN THEORETICAL MATHEMATICS (3 credits)
This course introduces students to a specialized subject matter in the areas of theoretical mathematics not covered in existing courses. The course may be repeated for different topics up to a maximum of six credit hours. The specific topics will vary, depending upon when the course is offered. One example of a course is Axiomatic Set Theory. (Cross-listed with MATH 4950).
Prerequisite(s): Permission of instructor.

MATH 8960 MASTER'S PROJECT (1-6 credits)
An applied project, designed and executed under the supervision of both a faculty and industry advisor. In the project the student will apply their mathematical and/or statistical skills to an applied problem. The student will present their results via a written report and oral presentation. (Cross-listed with STAT 8960).
Prerequisite(s): Permission of faculty advisor and graduate program chair. Not open to non-degree graduate students.

MATH 8970 INDEPENDENT GRADUATE STUDIES (1-3 credits)
Under this number a graduate student may pursue studies in an area that is not normally available to him/her in a formal course. The topics studied will be a graduate area in mathematics to be determined by the instructor.
Prerequisite(s): Permission of instructor and graduate classification.

MATH 8980 GRADUATE SEMINAR (3 credits)
A graduate seminar in mathematics offering coverage of advanced areas of mathematics. Topics to be covered by the course will vary in different semesters.
Prerequisite(s): Permission of the Instructor.

MATH 8990 THESIS (1-6 credits)
An independent research project, written under the supervision of a graduate adviser in the department of mathematics. Approval of the topic and the completed project by thesis committee is required.
Prerequisite(s): Approval of the topic and the completed project by thesis committee is required.

MATH 9110 ADVANCED TOPICS IN APPLIED MATHEMATICS (3 credits)
Advanced treatment of a specific topic in the area of applied mathematics not available in the regular curriculum. Topics, developed by individual faculty members, will reflect their special interests and expertise. The course may be repeated for credit as topics differ.
Prerequisite(s): Permission of instructor.

MATH 9230 THEORY OF FUNCTION OF REAL VARIABLES (3 credits)
A theoretical foundation for the concepts of measure theory and integration on a measure space as developed by Henry Leon Lebesgue (followed by others) starting the first decade of the 20th century including a comparison with Riemann's classical construction of integration theory known from classical calculus. Topics include: Real number system, convergence, continuity, bounded variation, differentiation, Lebesgue-Stieltjes integration, abstract measure theory, and the Lp spaces.
Prerequisite(s): MATH 4230/MATH 8236 or permission of the instructor
MTCH 8010 STATISTICAL RESEARCH FOR MATHEMATICS TEACHERS (3 credits)
This course is designed for graduate students in the MAT program who select the statistics option to complete their degree. The student will do a literature review, design a study involving mathematics education, gather and analyze the data, and prepare a manuscript for submission to a refereed journal. (The course will not count toward a major in the MA or MS program.) To prepare for the course, interested students should contact the instructor of the course several months before (8 is the norm) to have time to do the groundwork for the study.
Prerequisite(s): STAT 8015 and TED 8010.

MTCH 8020 MATHEMATICAL MODELING FOR SECONDARY TEACHERS (3 credits)
This course will examine the mathematics underlying several problem situations found in a variety of societal settings. Mathematical models of problems in current literature will be examined and other models will be constructed based on data collected through course activities. Topics relevant to these problems will include function analysis, algebra, geometry, trigonometry and probability and statistics. The role of mathematics in society will be evidenced as problems considered will be timely and sources utilized will include original documentation whenever possible (i.e. recent research reports, government reports and publications).

MTCH 8030 ALGEBRA FOR ALGEBRA TEACHERS (3 credits)
This course will use study interesting mathematical systems related to key algebraic ideas and study habits of mind that are key to effective problem solving. The properties about numbers and operations discovered will connect to the same properties taught in school algebraic course. Special attention will be paid to linear, quadratic, exponential, and logarithmic, polynomial functions in connection to their importance in school algebra.
Prerequisite(s): Admission to the Graduate Program

MTCH 8040 TOPICS IN MATHEMATICAL COMPUTING (3 credits)
This course focuses on the current state-of-the-art technology that is either designed for or is uniquely suitable for teaching mathematics. (Cross-listed with STEM 8040)
Prerequisite(s): MATH 2200 or equivalent or approval of instructor.

MTCH 8880 ADVANCED PLACEMENT INSTITUTE: CALCULUS (3 credits)
A workshop for teachers planning to offer an advanced placement course in calculus. Objectives include increasing teacher competencies in single-variable calculus, discussion and study of AP calculus exams, implementations of AP courses in calculus, and development and presentation of projects for graduate credit. (This course will not count toward the M.A. or M.S. degrees in Mathematics, or the Secondary Mathematics Specialist Graduate Certificate.)
Prerequisite(s): Graduate in mathematics or mathematics education.

Mathematics, MA
Department of Mathematics and Statistical Sciences, College of Arts & Sciences

Vision Statement
The Master of Arts in mathematics is designed to achieve two objectives:
• Provide a strong program of course work in mathematics beyond the undergraduate level and
• Be flexible enough to accommodate a wide variety of student interests and backgrounds. There are no required courses in the program, but students are strongly encouraged to develop an emphasis in the courses which make up their individual plan of study; such an emphasis provides both focus and depth in the graduate experience.

Whatever their objectives in their graduate programs, students should form a close working relationship with a faculty member having similar mathematical interests as soon as possible. This will ensure good advice in planning a coherent plan of study. In addition, an advisor may be able to suggest special topics courses, independent study, or the thesis option which could all be used to pursue one’s interests in greater depth.

Finally, students who plan to pursue a doctoral degree in mathematics should include a sequence in analysis and a sequence in algebra in their plans of study.

Other Program Related Information

Fast Track Program
The Department of Mathematics and Statistical Sciences has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor’s degree and a master’s degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:
• This program is available for undergraduate students pursuing a BA/BS in Mathematics or pursuing a double-major with BA/BS in Mathematics as the primary or secondary major desiring to pursue a MA/MS/MAT in Mathematics.
• Students must have completed no less than 60 undergraduate hours
• Students must have a minimum undergraduate GPA of 3.0.
• Students must complete the Fast Track Approval form, obtain all signatures, and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
• Students will work with their undergraduate advisor to register for the graduate courses.
• A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good academic standing.
• Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
• Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
  • Admission to Fast Track does NOT guarantee admission to the graduate program.
  • The admit term must be after the completion term of the undergraduate degree.

Graduate Assistantships
The Department of Mathematics and Statistical Sciences annually awards graduate assistantships for work within the department. All of these positions pay an annual stipend plus a waiver of tuition. For the details of the nature of the work, please visit the assistantships page of the Department of Mathematics and Statistical Sciences website.

Admissions
General Application Requirements and Admission Criteria (p. 974)
Program-Specific Requirements

Application Deadlines (Spring 2024, Summer 2024, and Fall 2024)
- Fall: July 31
- Spring: November 30
- Summer: April 15

Other Requirements
For unconditional admission, an applicant should:
- Have completed a bachelor’s degree with a grade point average of at least 3.0 in mathematics courses taken.
- Have completed 15 credit hours of mathematics courses beyond calculus, including MATH 3230/MATH 8235 or equivalent.
- Applicants lacking the 15 credit hours beyond calculus may be eligible for admission in a provisional or unclassified status with a deficiency to be made up in addition to the degree requirements listed.
- Applicants who satisfy the admission requirements above except for the GPA requirement may be granted provisional admission to the graduate program. They will be granted unconditional admission upon completion of 12 graduate hours with a grade of "B" or better in each course.
- English Language Proficiency: Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
- Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

Degree Requirements

Required Courses
There are no required courses. Choose mathematics courses with a MATH or STAT prefix numbered 8000 or above and ending in the digit zero or six, excluding MATH 8880. At least 15 of these must be in courses with a number ending in the zero digit. These 15 hours may include the six hours of thesis, MATH 8990, and three hours of independent study, MATH 8970.

Electives
Since all courses are electives with the exception of the six thesis credit hours, all courses taken must satisfy the above requirements for the 30 credit hours. Up to 12 hours of graduate work electives may be taken in areas related to mathematics such as physics, computer science, and economics, if permission is obtained from the Graduate Program Committee.

Exit Requirements
Students are required to take six hours of MATH 8990. All candidates should carefully review the Graduate College requirements for the Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval forms, and final approval and submission of the thesis.

Concentrations
Students may choose (although there is no requirement to do so) to add a concentration to their Mathematics MA degree. There are currently three available concentrations:

Mathematics, MA with Computational Mathematics Concentration
Mathematics, MA with Operations Research Concentration
Mathematics, MA with Statistics Concentration

Total Credit Hours: 30

Concentrations

Computational Mathematics Concentration

Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval Forms, should carefully review the Graduate College requirements for forming the Supervisory Committee. Students are required to take 6 hours of thesis, and final approval and submission of the thesis.

Electives
Select at least 9 credit hours of courses related to operations research (see below).

Students who were undergraduates at UNO and took MATH 4300, MATH 4310, or MATH 4320 may not take MATH 8306, MATH 8316, or MATH 8326 at the graduate level. Students will replace these requirements with additional elective courses.

Some suggested courses are provided below. Other elective courses may be possible with the prior permission of the graduate program chair.

If any of the core course requirements were waived, then additional electives should be taken in their place.

Electives
At least 9 credit hours of courses related to operations research. Students must have at least 15 hours of courses ending on 0, including the core courses and the 6 hours of thesis, MATH 8990.

Students who were undergraduates at UNO and took MATH 4310, MATH 4320, or STAT 4410, or STAT 4420 may not take MATH 8416, MATH 8756, or STAT 8436 at the graduate level. Students will replace these requirements with additional elective courses.

If any of the core course requirements were waived, then additional electives should be taken in their place.

Statistics Concentration

Electives
Select at least 12 credit hours of courses with a statistical nature (see below).

Some suggested courses are provided below. Other elective courses may be possible with the prior permission of the graduate program chair.

If any of the core course requirements were waived, then additional electives should be taken in their place.

Exit Requirement
Students are required to take 6 hours of MATH 8990. All candidates should carefully review the Graduate College requirements for forming the Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval Forms, and final approval and submission of the thesis.
Mathematics, MAT

Department of Mathematics and Statistical Sciences, College of Arts & Sciences

Vision Statement
The Master of Arts for Teachers of Mathematics degree is ideal for:

- Current high school teachers who are planning on teaching advanced secondary mathematics such as Dual-Enrollment calculus at their high school.
