The above student outcomes have been approved by the ABET Engineering Area Delegation for use beginning with the 2019-20 academic year, and have been adopted by the faculty of the Charles W. Durham School of Architectural Engineering and Construction.

Requirements

Students are required to enroll in a predetermined set of courses specifically designed for general construction education. Each student selects, with the approval of their advisor, a set of approved electives.

Course	Title	Credits
First Semester		
CHEM 1180	GENERAL CHEMISTRY I	3
CHEM 1184	GENERAL CHEMISTRY I LABORATORY	1
ENGR 100 or CMST 1110	INTERPERSONAL SKILLS FOR ENGINEERING LEADERS or PUBLIC SPEAKING FUNDS	3
CONE 103	INTRODUCTION TO CONSTRUCTION ENGINEERING	1
CIST 1600	INTRODUCTION TO PROGRAMMING USING PRACTICAL SCRIPTING	3
MATH 1950	CALCULUS I	5
ENGR 10	FRESHMAN ENGINEERING SEMINAR	0
Credits		16

Sixth Semester		
CIVE 331	INTRODUCTION TO GEOTECHNICAL ENGINEERING	4
CIVE 371	MATERIALS OF CONSTRUCTION	3
ECON 2200	PRINCIPLES OF ECONOMICS (MICRO) ³	3
STAT 3800	APPLIED ENGINEERING PROBABILITY AND STATISTICS	3
ACE Elective ²		3
Credits		16
Seventh Semester		
CNST 420	PROFESSIONAL PRACTICE AND ETHICS	3
CIVE 440	REINFORCED CONCRETE DESIGN I	3
CNST 444	CONSTRUCTION SITE SAFETY MANAGEMENT	3
CONE/CNST 476	PROJECT BUDGETS AND CONTROLS	3
CONE/CNST 485	CONSTRUCTION PLANNING, SCHEDULING, AND CONTROLS	3
Credits		15
Eighth Semester		
CIVE 441	STEEL DESIGN I	3
CONE 489	CONSTRUCTION ENGINEERING CAPSTONE	3
Technical Elective ⁴		3
Design Elective ⁴		3

ACE Elective ²	3
Credits	15
Total Credits	125

¹ PHYS 1154: PHYS 1164 is an acceptable substitute if taken with PHYS 2120.

² ACE elective: Choose one course from each ACE Student Learning Outcome (SLO) 5, 7 or 9 elective courses.

³ ECON 2200 satisfies SLO area 6.

⁴ See tables below for Design and Technical Elective options.

Additional Major Requirements

Grade Rules

C- and D Grades

All coursework must be of C grade level or higher to be credited toward graduation requirements or to be valid as a prerequisite for another course.

Electives

Students are required to enroll in a predetermined set of courses specifically designed for general construction education. Each student selects, with the approval of their advisor, a set of approved electives.

Technical electives are selected from the following list. One (3 credit hour) of the required two electives needs to be considered a design technical elective.

Code	Title	Credits
Design Electives		
CONE 416	WOOD/CONTEMPORARY MATERIALS DESIGN	3
CONE 417	FORMWORK SYSTEMS	3
CONE 481	HIGHWAY & BRIDGE CONSTRUCTION	3
CONE 483	SUPPORT OF EXCAVATION	3
CIVE 443	ADVANCED STRUCTURAL ANALYSIS	3
CIVE 444	STRUCTURAL DESIGN AND PLANNING	3
CIVE 446	STEEL DESIGN II	3
CIVE 447	REINFORCED CONCRETE II	3

Code	Title	Credits
Technical Electives		
All previously listed Design Electives		
CNST 379	CONSTRUCTION ESTIMATING II	3
CNST 434	THE DESIGN-BUILD PROJECT DELIVERY SYSTEM	3
CONE 450	SUSTAINABLE CONSTRUCTION	3
CONE 466	HEAVY AND/OR CIVIL ESTIMATING	3

ACE Requirements

The CONE program follows the University of Nebraska-Lincoln ACE general education requirements. Because of the specific needs of the program, several of these courses are specified in the curriculum. Please contact DurhamSchool@unl.edu (:durhamschool@unl.edu), if you are interested in more information about this program.

Construction Management, Bachelor of Science

Construction Management

Durham School of Architectural Engineering and Construction

Construction management (CNST) is a complete undergraduate degree program available to students within the Charles W. Durham School of Architectural Engineering and Construction located at Nebraska Hall on the Lincoln City Campus and at the Peter Kiewit Institute (PKI) on the Scott Campus in Omaha. Construction is one of the largest and most diversified industries in the country, accounting for approximately four percent of the U.S. gross domestic product (GDP). The key professional in this vast enterprise is the “constructor,” a term given to leaders and managers in the construction industry who are responsible for planning, scheduling, and building the projects designed by architects and engineers. These highly-specialized efforts are indispensable in meeting the country’s growing need for new structures, infrastructure and environmental controls that are of high quality and are cost effective, efficient and sustainable.

Construction firms vary in size from large corporations to small proprietorships and partnerships. These are often classified according to the kind of construction work they do—general contractors, heavy and highway contractors, specialty contractors—including mechanical and electrical—and residential builders and developers. Many firms engage in more than one category of work. Some larger companies incorporate the architectural and engineering design functions as part of their role as a design/build firm. Collectively, constructors manufacture our entire built environment—buildings for housing, commerce and industry, highways, railroads, waterways, airports, power plants, energy distribution systems, military bases and space center complexes. Thus, the construction management field is broad, requiring a unique educational background for its professional practitioners.

Although the range of construction activities appears wide and diverse, the general education requirements for construction management are universal regardless of a particular firm’s area of specialization. Since construction is primarily a business enterprise, the graduate must have a sound background in business management and administration as well as an understanding of the fundamentals of architecture and engineering as they relate to project design and the actual construction process in the field. Professional expertise lies in the fields of construction science, methods and management. A working knowledge of structural design, mechanical and electrical systems, methods and materials, soil mechanics and construction equipment is also essential.

The construction management curriculum embraces a course of study in:

1. Construction project management from pre-design through commissioning.
2. Project life-cycle and sustainability.
3. Health and safety, accident prevention and regulatory compliance.
4. Law, contract documents administration and dispute prevention and resolution.
5. Materials, labor and methods of construction.
6. Finance and accounting principles.
7. Planning and scheduling.
8. Cost management including plan reading, quantity take offs and estimating.
9. Project delivery methods.
10. Leadership and managing people.
11. Business and communication skills.

Program Educational Objectives

The following is a list of the Construction Management Program Educational Objectives (PEO) that graduates are expected to attain within a few years of graduation:

1. Develop construction project objectives and plans including delineation of scope, budget and schedule.
2. Select project participants and set performance requirements.
3. Maximize resource efficiency through judicious procurement and management of labor, materials and equipment.
4. Implement and complete construction activities through coordination and control of scheduling, contracting, estimating and cost control.
5. Develop effective communication protocols and mechanisms for resolving conflicts associated with the construction process.
6. Ensure quality and safety through design, measurement, analysis and control.

Educational standards and criteria were established by the construction faculty of The Charles W. Durham School of Architectural Engineering and Construction and approved by the Construction Industry Advisory Committee (CIAC) and ABET, the accrediting agency for the construction management program at the University of Nebraska–Lincoln.

Professional Admission Requirements

Before applying for admission to the construction management degree program, students must complete 28 semester hours, including the following courses with a C or better: MATH 1950, PHYS 1050 (or PHYS 1120 or PHYS 2120), ENGR 100 and at least one of ENGL 1160, ENGL 3980, STAT 1530, CNST 112. Additionally, a minimum cumulative GPA of 2.5 is required.

Learning Outcomes

Graduates of the construction management program will have:

1. An ability to identify, formulate and solve broadly defined technical or scientific problems by applying knowledge of mathematics and science and/or technical topics to areas relevant to the discipline.
2. An ability to formulate or design a system, process, procedure or program to meet desired needs.
3. An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions.
4. An ability to communicate effectively with a range of audiences.
5. An ability to understand ethical and professional responsibilities and the impact of technical and/or scientific solutions in global, economic, environmental and societal contexts.
6. An ability to function effectively on teams that establish goals, plan tasks, meet deadlines and analyze risk and uncertainty.

The above student outcomes have been approved by the ABET Applied and Natural Science Accreditation Commission for use beginning with the 2019-20 academic year, and have been adopted by the faculty of The Charles W. Durham School of Architectural Engineering and Construction.

Grade Rules

C- and D Grades

All required and elective courses must be passed with a grade of C or better to be included in the 120 credit hours needed for degree completion.

ACE Requirements

The CNST program follows the UNL ACE general education requirements. Because of the specific needs of the program, most of these courses are specified in the curriculum. Please contact DurhamSchool@unl.edu

(durhamschool@unl.edu), if you are interested in more information about this program.

Construction Management Minor

This minor is for engineering, architecture and business majors ONLY.

The College of Engineering enables its students to participate in this approved minor subject to the following conditions:

1. A minor will not reduce or alter the existing course or degree requirements for students electing to pursue a minor.
2. The minor program must be organized and approved by an advisor prior to the submission of the senior check to the department chair or head.
3. The minor must be approved by the advisor, the department chair or head, the dean, and the cognizant program offering the minor.
4. Minors on the Lincoln or Omaha campuses may be added by approval of the College of Engineering Curriculum Committee and faculty.
5. The minor requires taking one 3-credit course from each of the six required topics listed below for a total of 18 credit hours.

Course Requirements

Code	Title	Credits
CHOOSE ONE COURSE FOR EACH REQUIREMENT		
1) Communications		3

Grade Rules

C- and D Grades

A grade of C or better is required for all courses in the minor.

Pass/No Pass

All courses must be taken for a letter grade.

Achievement-Centered Education Electives

College of Engineering majors who will complete their undergraduate degree program on the UNL (City or East Campus in Lincoln) or Scott Campus in Omaha must satisfy the general education requirements of the Achievement Centered Education (ACE) program at UNL. The ACE program contains 4 Institutional Objectives with 10 Student Learning Outcomes (SLO). ACE electives are associated with SLO 5 through 9, and consists of course work primarily from the humanities, fine arts, social sciences, civics, ethics, human and cultural diversity areas. A minimum of one 3-credit hour course is to be selected from each of the following listed SLO areas to satisfy student learning outcomes 5 through 9. Although some courses are listed in more than one area, no individual course can be utilized to satisfy more than one SLO area.

Program Specific Notes

Please read the description under your specific major to find out more about flexible ACE requirements

Architectural Engineering

-Flexible ACE electives **include 5, 6, 7 and 9**

-Students **must complete one from each category**; for a total of four courses

-PSYC 1010 ust be the ACE 6 if completing the **Lighting and Electrical** option

-Students must complete **ART 3770 (ACE 5 or 7) or 3780 (ACE 7)** as either an **ACE 5 or 7**, then must complete **one more course to fulfill the missing elective**

Civil, Electrical, and Environmental Engineering

-Flexible ACE electives include **5, 6, 7, 8, and 9**

-Students must complete **one from each category**; for a total of five courses

Computer Engineering

-Flexible ACE electives **include 5, 6, 7 and 9**

-Students **must complete one from each category**; for a total of four courses

-Students must complete **ENGR 469** as their **ACE 8**

Construction Engineering and Management

-Flexible ACE electives include **5, 7, and 9**

-Students **must complete one from each category**; for a total of three courses

-Students must complete **ECON 2200** to fulfill the **ACE 6** elective

-Students must complete **CONE 206** to fulfill the **ACE 8** elective

Pre-Programs (Mechanical, Agricultural, and Biological Systems)

-Flexible ACE electives **include 5, 6, 7 and 9**

-Students **must complete one from each category**; for a total of four courses

-Students must complete **CONE 206** to fulfill the **ACE 8** elective

College of Information Science & Technology

Our Values

- **CREATE COMMUNITY:** Our faculty, students, and staff create community as we cannot shape technology without others.
- **INSPIRE DIVERSE VOICES:** The inspiration of diverse voices is our focus because the strongest communities empower all members, not just the majority.
- **SHAPE THE FUTURE:** The work our faculty, students, and staff do with and for these diverse communities shape the future.
- **TEACH LEADERSHIP:** We teach leadership as we cannot shape the future without creating more leaders.

Our Vision

We will be a premier college with excellence in education, research, and service in the disciplines necessary to meet the needs of our students and the communities we serve.

Our Mission

We deliver student-focused education and perform cutting-edge research, preparing professionals and developing solutions that benefit the world. (We do cool stuff.)

In order to accomplish the College of IS&T's vision and mission, the faculty and staff strive to achieve the following three strategic goals:

1. Keep students at the center of all College of IS&T efforts;
2. Strive to achieve the highest academic excellence; and
3. Actively lead and collaborate with academic, business, and community entities on various projects related to information science and technology.

The College of IS&T is focused on reaching the next level of information technology innovation through collaboration. This collaboration is fostered by the presence of the College in the Peter Kiewit Institute and is visible in the form of research, teaching, and service/outreach initiatives in partnership with our public and private stakeholders in the community, other academic units across the University of Nebraska at Omaha, and the rest of the University of Nebraska system.

General Information

Overview of Programs

The College is organized into three major units that manage the degree programs: the Department of Computer Science (CS), the Department of Information Systems and Quantitative Analysis (ISQA), and the School of Interdisciplinary Informatics (Si2).

The College of IS&T offers five undergraduate degree programs:

1. BS in Bioinformatics
2. BS in Computer Science
3. BS in Cybersecurity
4. BS in Information Technology Innovation
5. BS in Management Information Systems

The College of IS&T also offers a minor in each of these five undergraduate degree programs.

Accreditation/External Designation Information

Major	Degree	Accreditation Body
Computer Science	BS	ABET
Management Information Systems	BS	ABET
Cybersecurity	BS	NSA CAE-CD, CAE-CO

Choice of Catalog Policy

A student registering in the College of IS&T for the first time will work with an advisor to develop a matriculation form based on the current online catalog. The matriculation form is used to establish a plan of study for students in the College and will be the primary source for a student's most current academic plan, provided the student has continuous enrollment.

It is the responsibility of each student admitted to the College of Information Science & Technology to become familiar with the procedures and regulations in the undergraduate catalog for their degree program. The College of Information Science & Technology reserves the right, after due notice during the course of a student's work toward a degree, to institute and make effective any new ruling which may be necessary for the general good of the College and to substitute courses for those no longer offered.

College Contact Information

Dean's Office: 402.554.2380
Advising: 402.554.3819

Program Website (<http://www.ist.unomaha.edu>)

Admission Requirements for the College of IS&T

Application deadlines for the College of Information Science & Technology are as follows:

Fall Semester - First day of fall semester classes
Spring Semester - First day of spring semester classes
Summer Sessions - July 1

Incoming first year students must meet general university admission requirements to be admitted into the College of Information Science & Technology.

Transfer admission from other colleges or universities: Students may transfer into the College of Information Science & Technology from other institutions by completing the application process described above and meeting the minimum cumulative grade point average (GPA) of 2.5 (on a 4.00 scale) with a minimum of 12 credit hours.

Academic Requirements for Degrees in the College of IS&T

Number of Hours to Graduate

A minimum of 120 credit hours is required for a Bachelor of Science degree in the College of IS&T.

Minimum GPA

A GPA of 2.5 or higher is required to graduate with a Bachelor of Science degree from the College of IS&T.

College of IS&T Bachelor of Science Requirements

Please see individual College of IS&T degree subsections for specific Bachelor of Science requirements.

Transfer Credit Policy

A maximum of 64 credit hours are accepted from an accredited community college. A minimum grade of C- is required to transfer credits toward College of IS&T degree programs with the exception of business courses and the equivalent of UNO's CIST 1400 and CSCI 1620, which require a grade of C or better.

Unacceptable Credits

Courses such as ENGL 1090, ENGL 1100, MATH 1210, and orientation courses in other colleges or divisions may not be counted as part of the minimum 120 credit hours for College of IS&T degree programs. The course, US 1010 Critical Thinking and Problem Solving Skills for the Modern Day Student, can, however, be counted as elective credit if taken within the first 30 hours of the degree program. A maximum of four credit hours of different Physical Education Activities (PEA) courses may be applied toward the general elective area.

(p. 33)

Placement Exams and Credit by Examinations Policies/Practices

<https://nextcatalog.unomaha.edu/undergraduate/student-life-support-services/> (p. 66)

Residency Requirement

Thirty of the last 36 credit hours must be University of Nebraska at Omaha courses.

Quality of Work

Students in a College of IS&T undergraduate program must obtain a grade of C- or better in each class for the purpose of meeting General Education, College of Information Science & Technology (IS&T), and Departmental requirements for College of IS&T degrees with the exception of CIST 1400 and CSCI 1620, which require a minimum grade of C. Programs may have additional quality of work requirements.

Good Academic Standing Policy

A minimum cumulative grade point average (GPA) of 2.5 is required by the College of Information Science & Technology.

Student Academic Course Load

Students shall not carry 18 or more semester hours of work during the fall semester, 19 or more semester hours during the spring semester and 12 semester hours during the summer sessions unless they have maintained an average of "B" (3.0) in a regular 15-hour load during the preceding semester. Permission to register for additional semester hours should be obtained from the student's academic advisor. For more details, see the University Enrollment Policies (<https://catalog.unomaha.edu/undergraduate/enrollment/enrollment/>).

Credit/No Credit (CR/NC) Grades

Courses required for College of IS&T undergraduate programs may be taken on a Credit/No Credit basis as described by the University Policy (p. 35) with the following limitations:

- A minimum grade of C- is required in to be awarded Credit in undergraduate courses applied to IS&T undergraduate major, minor, or certificate program requirements.
- Credit/No Credit may not be used for completion of CIST1400 or CSCI1620 in any IS&T undergraduate major, minor, or certificate.
- A maximum of nine credit hours taken on a Credit/No Credit basis can be applied to College of IS&T undergraduate major requirements, excluding free electives and general education courses not specifically required by the major. Use of Credit/No Credit for free elective and unrestricted general education courses in an IS&T undergraduate degree program of study are subject to general University limits.
- A maximum of three hours taken as Credit/No Credit can be applied to meet graduation requirements for any IS&T minor or undergraduate certificate.

Individual majors, minors, or certificate programs within IS&T may place further limitations on the use of Credit/No Credit to meet program requirements. Any such restrictions must be published in the corresponding catalog entry for each program, and the College policy applies in the absence thereof. Students should consult with their academic advisors if they have questions about Credit/No Credit within specific programs.

Students taking IS&T-based courses that are majoring in degree programs outside of IS&T are encouraged to consult with advising staff from their major to determine whether an IS&T course taken as Credit/No Credit can be used towards their graduation requirements.

For deadlines related to electing CR/NC and other restrictions relative to its use based on a student's class standing, see the campus policy.

Completion of an Incomplete Grade

To receive an incomplete, students must contact their instructor prior to the end of the semester, request a grade of incomplete, and make arrangements to complete the work. The rules which govern the issuance of an incomplete are as follows:

1. The grade "I" is used by an instructor at the end of a semester or summer session to designate incomplete work in a course. It is given when a student, due to circumstances such as illness, military service, hardship, or death in the immediate family, is unable to complete the requirements of the course in the term in which the student is registered for credit. Incompletes will only be given if the student has already substantially completed the major requirements of the course.
2. Each instructor will judge each situation. The instructor will document the incomplete work and the conditions for removal of the incomplete grade, provide a copy to the student, and file this with the Assistant Dean for Student Success. If the instructor is at the University at the time of removal, they will supervise the makeup work and report the permanent grade.

3. In the event the instructor is not available at the time of the student's application for removal of an incomplete, the department chairperson will supervise the removal of the incomplete and turn in the permanent grade for the student.
4. A student shall have no longer than the end of the next regular semester following receipt of the "I" to remove the incomplete. After that time, the "I" will automatically become a "W," or such other grade specified by the instructor depending on the amount and quality of the coursework previously completed. Exceptions to this rule will be permitted if initiated by the student and approved by the instructor, department chairperson, and dean. Exceptions to this rule will be made only in response to circumstances over which the student has no control, and these must be detailed.
5. In registering for courses, students receiving one or more "I" grades from the previous semester should take into account the time needed to complete the required work and plan their schedules accordingly.

Repeatable Grades/Courses

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 35)

Grade Appeal Policy and Process

Students who wish to appeal a grade which they feel was capriciously or prejudicially given shall first attempt to resolve the issue through discussion with the instructor responsible for the course within 30 days of the final course grade being posted. If a satisfactory resolution is not possible after discussion with the instructor, the student may then submit a written grade appeal to the department/school chair/director, providing a detailed justification for the appeal, including any supporting materials, and indicating why the student believes the grade determination was prejudicial or capricious. The department chair or school director will try to resolve the grade issue with the student and the instructor. If the chair/director determines that the appeal cannot be resolved at their level, a faculty-student appeals committee will be appointed by them. This committee will consist of a student representative chosen from nominations made by IS&T undergraduate advisors; and, three members of the department faculty - one selected by the student submitting the appeal, one selected by the instructor for the class, and one selected by the chair/director to chair the committee. This committee will meet to evaluate the grade appeal. During that meeting the instructor, the student, and any other appropriate parties invited to speak by the committee may present their justifications. If the committee finds that the grade was not assigned in a prejudicial or capricious manner, the appeal is considered concluded, and the student and the instructor are so notified. If the grade appeal is supported, the chair/director will report the finding to the student and the instructor, and will direct the registrar to change the grade to that determined by the appeal committee.

Academic Amnesty

POLICY STATEMENT: Academic Amnesty provides relief from a poor academic record acquired within the University of Nebraska system by excluding substandard coursework with a final grade of "D" or "F" from a student's cumulative grade point average (GPA) calculation. Academic Amnesty will not remove course(s) or grade(s) from the transcript but once granted, will not count as part of the overall GPA.

Eligibility:

To be eligible for Academic Amnesty, students must:

- Have been out of the Nebraska system for at least one calendar year (12-month period).
- Have substandard coursework ("F" or "D" grades) earned within the University of Nebraska system (UNO, UNL, UNK, UNMC) prior to the

year out (substandard grades earned after the year out will not be included in the Academic Amnesty contract).

- Be admitted as a degree-seeking student at the University of Nebraska.

Amnesty Requirements:

- Academic Amnesty will begin with the first course(s) taken upon return to UNO.
- Students may apply for Academic Amnesty at any time after taking the one-year break.
- After returning from the one-year break, demonstrate academic success in new UNO coursework.
Academic success may be demonstrated by one of the following:
 - Completing at least 12 semester hours (simultaneous or sequential) with a minimum of 3.0 cumulative GPA,
 - Completing at least 24 semester hours (simultaneous or sequential) with a minimum of 2.5 cumulative GPA.
- Students must maintain continuous enrollment (at least six (6) semester hours completed within any 12-month period).
- Students will work with their academic advisor to select the coursework to be amnestyed.
- Students must inform an academic advisor when the Academic Amnesty requirements are met.

Notes:

- All amnestyed coursework will remain on the student's academic record (transcript); however, the courses will not be included in calculation of the student's grade point average. Courses will be annotated "Academic Amnesty Excluded from GPA" on the transcript.
- Once Academic Amnesty is granted, students will not be eligible for honors at graduation. Students are still eligible for Dean's List and Chancellor's List honors.
- While demonstrating academic success, no changes are made to the student's academic record. If a student's cumulative GPA is still below standard, the students will continue to be reported as "continued on probation." Should the student revert to substandard academic performance while working on Academic Amnesty, the student can still be suspended. Academic Amnesty is intended to provide relief from the past without providing immunity from future substandard academic performance.
- Students must still meet all university and college requirements to graduate.

Academic Probation and Suspension

Probation

Probation constitutes a period of formal warning that a student is doing unsatisfactory work. A student whose cumulative grade point average is below 2.0 after having attempted six or more semester hours of study will be placed on probation. Probationary status will remain in effect as long as the student's cumulative grade point average (GPA) remains below 2.0. No student will be allowed to enroll for any course on a Pass/Fail or Credit/No Credit basis while on probation.

The student is encouraged to use every opportunity while on probation to seek counsel and guidance from various university agencies which have been established to offer assistance and academic support. For information on such services, the student should consult with their academic advisor or counselor.

Suspension

Students who are on probation will be suspended at the end of the spring semester if their semester grade point average is lower than 2.0 and their cumulative grade point average (GPA) falls below the following standards:

Hours Attempted	Cumulative GPA
0-12	No Suspension
13-45	1.75
46 or more	2.00

Academic suspension under these conditions will be automatic and will be for a minimum period of one year.

Students placed on suspension will be notified by the College of Information Science & Technology and given instructions on how to appeal, should they choose to do so, as well as any applicable deadlines associated with an appeal.

Appeals properly filed shall delay implementation of the suspension until the appropriate appeal committee has ruled on the appeal. However, if the appeal is denied, the student shall be disenrolled and tuition shall be refunded.

Students will only be suspended at the end of the spring term. This rule applies to all UNO colleges, including the Division of Continuing Studies and all University of Nebraska-Lincoln Omaha-based programs in the Colleges of Architecture, Agriculture, Education and Human Resources, and Engineering.

Reinstatement Policy Following Academic Suspension

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 35)

Academic Advising

The College of IS&T's undergraduate academic advisors recognize that students have individual academic, career, and personal needs that may require special assistance. Below are some guidelines on how academic advisors help ensure success. Students are strongly encouraged to meet with their advisor regularly.

What do IS&T academic advisors do?

IS&T academic advisors explain the rules and requirements of College of IS&T programs and help students understand how they apply to individual situations. The advisors prepare each student record so that students meet all the requirements for the degree in the final audit process. In addition, advisors provide advice about which degree-program specific courses and scheduling will be most helpful. They can also help with difficult situations such as concerns about grades, course instruction, time management, scheduling conflicts, or other academic issues.

When should I see an academic advisor?

First and second-year students in the College of IS&T are required to meet with an advisor every semester. Third and fourth-year students in good academic standing are strongly encouraged, though not required, to continue to meet with an advisor at least once per semester to plan their classes, to make sure all records are up-to-date, and to catch any problems early. All fourth-year students are required to schedule a meeting for a graduation check when they reach 91 earned hours. Students majoring in IT Innovation are required to meet with an academic advisor every semester.

Any student whose GPA falls below 2.5 will be required to meet with an academic advisor regardless of class standing.

Advising Holds

Advising holds are automatically placed each semester for first-year students, second-year students, all IT Innovation students, and for any student whose GPA is below a 2.5.

Student Holds

[https://nextcatalog.unomaha.edu/undergraduate/enrollment/enrollment/\(p.28\)](https://nextcatalog.unomaha.edu/undergraduate/enrollment/enrollment/(p.28))

Graduation Check

When students reach 91 hours of completed coursework, they must request a graduation check to be done by an academic advisor. Assuming satisfactory completion of all approved courses and degree requirements, this process will assure the student's graduation date. Should this procedure not be followed, responsibility for meeting graduation requirements falls to the student and may prevent graduation on the anticipated date.

Application for Degree

Each student who expects to receive a diploma must file an Application for Degree whether or not that student plans to attend the commencement ceremony. The Application for Degree is available online by logging in to MavLINK. Announcements about deadlines are also posted in MavLINK.

It is the responsibility of the student to inform the Registrar's Office of their graduation plans and to provide a diploma mailing address. Failure to meet these stipulations may necessitate postponement of graduation until the following semester.

Computer Science

The Computer Science program provides a firm foundation in the theory and application of computing while allowing for additional concentration in areas of choice, such as information systems, mainframe computing, computer networking, telecommunications, data and knowledge engineering, and software development. This discipline is based on building software tools that make computers useful.

Mission and Vision

The mission of the Computer Science Department is:

- Pursue research promoting technological advances in computer science aligned with the needs of 21st century society.
- Leverage best practices to engage undergraduate and graduate students in unique research and learning experiences both in and out of the classroom, and
- Take a leading role in promoting computer science and computational thinking across communities we serve

The **vision** of the Department is to create dynamic research and teaching environments that promote a computationally empowered society ready to tackle complex problems in rapidly changing technological landscapes.

Bachelor of Science in Computer Science

The Bachelor of Science in Computer Science provides students with a solid background in the fundamentals of computing and prepares each individual for employment in a wide variety of positions and for graduate study in computer science. The content of the Department's courses is continually monitored to ensure they are consistent with the fast-changing developments in the discipline. Appropriate university and departmental computing resources are available to students taking computer sciences courses.

Accreditation

The Computer Science program is accredited by the Computing Accreditation Commission of ABET, Inc., which is the recognized accreditor of college and university programs in applied science, computing, engineering, and engineering technology. ABET accreditation demonstrates a program's commitment to providing its students with a quality education. General information about the College of IS&T's accreditation as well as specific educational objectives for its ABET accredited program in Compute Science can be found here (<https://www.unomaha.edu/college-of-information-science-and-technology/academics/abet-accreditation.php>).

Repeatable Grades/Courses

A repeated course may count only once for graduation. Exceptions are internships, independent studies, physical education activities courses, and special topic courses.

For students repeating any Computer Science courses (CSCI 1xxx-4xxx):

1. A formal warning shall be conveyed to the student upon receiving a grade below C- in CSCI courses for a second time.
2. The student shall not be allowed to enroll in the course after receiving a grade below C- for the third time.

Attendance Policy for Computer Science Courses

1. A formal warning shall be conveyed to the student upon the second instance (first instance for summer session) of unexcused absence from a class.
2. The student shall be withdrawn from the class after the third instance (second instance for summer session) of unexcused absence from the class.

Contact

For more information, contact the College of IS&T Academic Advising Office at 402.554.3819.

Degrees Offered

- Computer Science, Bachelor of Science (p. 825)

Minors Offered

- Computer Science Minor (p. 835)

Careers Options:

Computer Science majors have gone on to become the following and more. We will prepare you for jobs that do not even exist yet.

- Software Engineers and Programmers
- Web and Mobile Application Developers
- Enterprise Architect
- Project Managers
- Network and Cloud Architects
- Database Developers
- Game Developers
- User Experience Designers

- Data Scientists
- Artificial Intelligence Engineers

CSCI 1200 COMPUTER SCIENCE PRINCIPLES (3 credits)

This course introduces students to the foundational principles of computer science. It aims to help students learn the essential thought processes used by computer scientists to solve problems, expressing those solutions as computer programs. The exercises and projects make use of mobile devices and other emerging platforms.

Prerequisite(s): High school algebra or equivalent.

Distribution: Natural/Physical Sci General Education lecture

CSCI 1204 COMPUTER SCIENCE PRINCIPLES LABORATORY (1 credit)

This is a laboratory course for students enrolled in CSCI 1200. It consists of programming exercises designed to help students practice computational thinking and apply computational solutions to practical problems. The exercises make use of mobile devices and other emerging platforms.

Prerequisite(s): CSCI 1200, prior or concurrent.

Distribution: Natural/Physical Sci General Education lab course

CSCI 1280 INTRODUCTION TO COMPUTATIONAL SCIENCE (3 credits)

Introduction to Computational Science explores the role of computer science in scientific inquiry. Through the construction and analysis of block-based visual artifacts (e.g., pixel art and geometric patterns), this course aims to help students learn the essential thought processes used by computer scientists to solve problems, expressing those solutions as computer programs. When executed, these computer programs produce visual artifacts that can be displayed and interacted with using a variety of tools/software including LEGO Digital Designer, Minecraft, LDraw, 3D Builder, and Virtual Reality systems such as the HTC Vive.

Prerequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or equivalent with C- or better, or permission of the instructor

Distribution: Natural/Physical Science General Education course and Natural/Physical Sci General Education lecture

CSCI 1620 INTRODUCTION TO COMPUTER SCIENCE II (3 credits)

This course introduces students to advanced programming techniques and algorithm analysis. The topics covered will enable students develop large scale software with efficient algorithms that are maintainable. This course has a required laboratory component; students must register for the laboratory section attached to their lecture section.

Prerequisite(s): CIST 1400 AND MATH 1300/1320/1370 (both with a grade of C or better)

CSCI 2030 MATHEMATICAL FOUNDATIONS OF COMPUTER SCIENCE (3 credits)

This course introduces discrete mathematics concepts that are foundational for the study of computer science such as functions, relations, and sets, basic logic, methods of proof, mathematical induction, computational complexity, recursion, counting, recurrences, and relations.

Prerequisite(s): (CIST 1400 with grade of C or better) AND (MATH 1930 or MATH 1950 with grade of C- or better)

CSCI 2040 INTRODUCTION TO MATHEMATICAL PROOFS (1 credit)

This course will provide an introduction to mathematical proofs and the art of reading, writing, and debugging proof attempts including mathematical notations, proof and counterexample generation methods and strategies. It will develop the rigor and precision needed to establish and refute mathematical conjectures and reason about the correctness of programs.

Prerequisite(s): CSCI 2030 as corequisite.

CSCI 2240 INTRODUCTION TO C PROGRAMMING (3 credits)

Programming in 'C' in a UNIX operating system environment; algorithm and program development and file manipulation using 'C'; UNIX-like utility development.

Prerequisite(s): CSCI 1620 with grade of C or better

CSCI 2410 INTRODUCTION TO DATA ANALYTICS USING PYTHON (3 credits)

This course is an introduction to the basic concepts and principles of data analytics using the Python programming language. The first part of the course covers major Python language topics including procedures and functions, iteration, recursion, arrays and matrices, strings, operational model of procedure and function calls, algorithms, exceptions, object-oriented programming, and file input/output. The coverage of Python language features are aimed mainly at the data analytics studies of this course. The second part of the course emphasizes applying Python and its rich functional libraries and special software packages to data munging, analysis, mining, and visualization, and machine learning techniques including statistical analysis, parameter estimation, regression, classification, predictive modeling construction, etc.

Prerequisite(s): (CSCI 1620 with grade of C or better) AND (CIST 2500 or equivalent statistics course with grade of C- or better). Not open to non-degree graduate students.

CSCI 2510 INTRODUCTION TO GAME PROGRAMMING (3 credits)

The course will cover programming and development techniques used in a game programming environment. The course is designed for students who have an interest in game programming to be eased into the concepts in a familiar environment.

Prerequisite(s): CSCI 2240 with C- or better. Not open to non-degree graduate students.

CSCI 2620 2D GRAPHICS: IMAGE PROCESSING (3 credits)

This class introduces the 2D graphics area of image processing, which takes an image, creates an internal model of the image, modifies it using a computer program, and produces a new image. Specific techniques covered in this course include color spaces, image transformations, edge detection, file formats, object tracking, and background removal.

Prerequisite(s): CSCI 1620 with grade of C or better

CSCI 2830 OBJECT-ORIENTED SOFTWARE ENGINEERING FUNDAMENTALS (3 credits)

This course introduces students to the central principles and practices of object-oriented design and programming. Common strategies and practices for the systematic development of larger object-oriented systems are also covered.

Prerequisite(s): CSCI 1620 (in Python)

CSCI 2840 C++ & OBJECT-ORIENTED PROGRAMMING (3 credits)

C++ and Object Oriented Programming (OOP) is taught in the UNIX environment. Topics include C++ as a 'Better C,' OOP with C++, classes and data abstraction, operator overloading, inheritance, virtual functions and polymorphism, C++ stream I/O.

Prerequisite(s): CSCI 2240; High-level programming language like Pascal, Java, or C++; solid understanding of pointers & scope; ability to design & implement solutions to modest problems (with C- or better).

CSCI 2850 PROGRAMMING ON THE INTERNET (3 credits)

This course is intended as a continuation of the exploration of topics covered in CIST 1300 and CIST 1400. The course will provide students with a broad overview and understanding of the following topics: how web servers work, configuring web servers, using databases for data storage and retrieval, understanding model-view-controller design for web development, and configuring reverse proxy and WSGI servers for application deployment.

Prerequisite(s): (CIST 1300 with grade of C- or better) AND (CIST 1400 with grade of C or better)

CSCI 2880 INTRODUCTION TO GENERATIVE AI (3 credits)

Generative AI is a form of machine learning that can generate content. AI Image Generators like Midjourney are capable of creating images nearly indistinguishable from human artwork. Large Language Models (LLMs) like ChatGPT have advanced abilities concerning understanding human language. LLMs can carry on conversations, write essays and stories, and even generate code. Generative AI is the defining technology of our times. This course provides an introduction to this technology: How it works, and how to use it.

Prerequisite(s): CSCI 1620 (with a grade of C or better) and CSCI 2030 (with a grade of C or better)

CSCI 2960 SHORT TOPICS FOR PROGRAMMERS (1 credit)

This course provides a hands-on introduction to contemporary programming languages and tools for software development not covered in other courses. Each offering focuses on one such technology. The course emphasizes informal and practical learning, and points students to relevant coursework for more systematic coverage of underlying principles.

Prerequisite(s): CSCI 1620 or instructor permission

CSCI 2980 TOPICS IN COMPUTER SCIENCE (3 credits)

A variable topic course in computer science at the sophomore level. Topics not covered in the computer science degree program, but suitable for sophomore-level students.

Prerequisite(s): CSCI 1620. Permission of instructor. Additional prerequisites may be required for particular topic offerings with C- or better.

CSCI 3100 APPLIED COMBINATORICS (3 credits)

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with CSCI 8105, MATH 3100, MATH 8105).

Prerequisite(s): MATH 2030, MATH 2040, MATH 2230, or CSCI 2030 all with a C- or better. Mathematical logic; Set theory; Relations; Functions; Congruences; Inductive and recursive definitions; Discrete probability; sets, graphs, trees, & matrices

CSCI 3320 DATA STRUCTURES (3 credits)

This is a core that will cover a number of data structures such as tree, hashing, priority queues and graphs as well as different algorithm design methods by examining common problem-solving techniques. (Cross-listed with CSCI 8325)

Prerequisite(s): CSCI 1620 and CSCI 2030 or MATH 2030. Programming Languages: Java or C++ Topics: Arrays, Pointers, Introductory Lists, Storage Allocation (with C- or better).

CSCI 3450 NATURAL LANGUAGE PROCESSING (3 credits)

The course will provide overview of the topics in natural language processing such as word and sentence tokenization, syntactic parsing, semantic role labeling, text classification. We will discuss fundamental algorithms and mathematical models for processing natural language, and how these can be used to solve practical problems. We will touch on such applications of natural language processing technology as information extraction and sentiment analysis. (Cross-listed with CYBR 3450).

Prerequisite(s): Prereq: CSCI 2030 with C- or better; Co-req: CSCI 3320 with C- or better; Students should be comfortable w/ scripting (Python is the language extensively used in natural language processing tools including NLTK). Not open to non-degree graduate students.

CSCI 3470 FUNDAMENTALS AND ALGORITHMS OF MACHINE LEARNING (3 credits)

This course discusses the fundamentals and algorithms of machine learning and contains both theory and application. Machine learning, as a subset of artificial intelligence, is the scientific study of models that computer systems use to perform a specific task without explicit instructions. Topics in this course will include supervised learning such as Decision Tree, Perceptron, Support Vector Machine, Naive Bayes, and Regression, unsupervised learning such as clustering, dimensionality reduction, kernel methods, learning theory such as bias/variance trade-offs, Generalization and Overfitting and large margins. Other crucial topics will include discussions such as Stacking, Semi-Supervised Learning and Interactive Learning. This course will also discuss a few applications in problem domains such as in computer vision.

Prerequisite(s): CSCI 2410 or instructor permission. Not open to non-degree graduate students.

CSCI 3510 ADVANCED GAME PROGRAMMING (3 credits)

This course is intended for those with an interest in video game programming. This course introduces the advanced concepts of game programming including 3D programming, game networking, and development of a multiplayer, networked game by learning and using the XNA environment.

Prerequisite(s): CSCI 2510 and CSCI 3320 with C- or better, or Instructor permission. Not open to non-degree graduate students.

CSCI 3550 COMMUNICATION NETWORKS (3 credits)

This course is designed to bring students up to the state of the art in networking technologies with a focus on Internet. It will cover the principles of networking with an emphasis on protocols, implementations and design issues. (Cross-listed with CSCI 8555).

Prerequisite(s): (CSCI 3320 or CSCI 8325 with grade of C- or better) AND (CSCI 2240 or CYBR 2250 with grade of C- or better)

CSCI 3660 THEORY OF COMPUTATION (3 credits)

The course is intended to introduce the students to the theory of computation in a fashion that emphasizes breadth and away from detailed analysis found in a normal undergraduate automata course. The topics covered in the course include methods of proofs, finite automata, non-determinism, regular expressions, context-free grammars, pushdown automata, no-context free languages, Church-Turing Thesis, decidability, reducibility, and space and time complexity.

Prerequisite(s): CSCI 3320

CSCI 3710 INTRODUCTION TO DIGITAL DESIGN AND COMPUTER ORGANIZATION (3 credits)

The course is intended to introduce the students to the topics found in introductory digital design and computer organization classes.

Prerequisite(s): CSCI 3320 (could be taken concurrently)

CSCI 3830 ADVANCED JAVA PROGRAMMING (3 credits)

This course teaches students web application development using advanced concepts in the Java programming language. It introduces students to distributed computing models such as the client-server model and how it is implemented in web applications using modern Java technology stacks.

Prerequisite(s): ((CSCI 2830 with C- or better) OR Java programming proficiency) AND (CSCI 3320 with C- or better (can be taken as a co-requisite)) AND (basic knowledge of HTML and SQL)

CSCI 3850 FOUNDATIONS OF WEB SEARCH TECHNOLOGIES (3 credits)

This course provides students a basic understanding of how search and information flow works on the web. Main topics include: document representation, inverted indexing, ranking of web search results, vector-space model, web graph, PageRank, search-based advertising, information cascades, and web crawling.

Prerequisite(s): CSCI 2030 and CSCI 2850 with C- or better, or instructor Approval. Not open to non-degree graduate students.

CSCI 4000 ASSESSMENT (0 credits)

This course provides various resources to students about to graduate, and provides a mechanism that guarantees these students complete the final assessments required to maintain the currency and quality of the program. It is intended for undergraduate computer science majors in their last semester prior to graduation. It is required for all students entering after the spring 2004 semester. All degree requirements should be completed by the end of the semester during which this course is taken. Students taking this course will be expected to file an application for graduation during the semester.

Prerequisite(s): All degree requirements should be completed by the end of the semester during which this course is taken. Students taking this course will be expected to file an application for graduation during the semester. Not open to non-degree graduate students.

CSCI 4010 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with MATH 4010, MATH 8016, CSCI 8016).

Prerequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

CSCI 4100 INTRODUCTION TO ALGORITHMS (3 credits)

The course provides students a basic understanding of algorithm analyses. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, sorting and its lower bounds, dynamic programming, greedy algorithms, and graph traversal.

Prerequisite(s): CSCI 3320 with C- or better.

CSCI 4150 GRAPH THEORY & APPLICATIONS (3 credits)

Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 8156, MATH 4150, MATH 8156).

Prerequisite(s): CSCI 2030 with a C- or better, or MATH 2030 with a C- or better, or MATH 2230 with a C- or better, or permission of instructor.

CSCI 4200 NUMERICAL ANALYSIS (3 credits)

This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 8206, MATH 4200, MATH 8206).

Prerequisite(s): MATH 1970 and MATH 2050 and MATH 2350 with a C- or better or permission of instructor.

CSCI 4220 PRINCIPLES OF PROGRAMMING LANGUAGES (3 credits)

This course covers the foundational concepts and principles underlying the design and implementation of programming languages. Language constructs including assignment, equality, references, aggregations, scope, encapsulation, and parameter passing are discussed. A central theme is how a particular language construct relates to the concept of equational reasoning (referential transparency). Formal notations for describing syntax and semantics are presented.

Prerequisite(s): CSCI 3320 and CSCI 3660 with C- or better.

CSCI 4250 HUMAN COMPUTER INTERACTION (3 credits)

Human computer interaction is concerned with the joint performance of tasks by humans and machines; human capabilities to use machines (including learnability of interfaces); algorithms and programming of the interface; engineering concerns that arise in designing and building interfaces; the process of specification, design, and implementation of interfaces; and design trade-offs. (Cross-listed with CSCI 8256).

Prerequisite(s): Either CSCI 3320 or ITIN 3330 with a grade of C- or better.

CSCI 4260 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 8266, ACMP 4260, ACMP 8266).

Prerequisite(s): Required: C- or better in CIST 2500 and junior standing, or by permission of instructor. Recommended: C- or better in CSCI 4250 or ACMP 3330/ITIN 3330.

CSCI 4300 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 8306, MATH 4300, MATH 8306).

Prerequisite(s): MATH 2050 with a C- or better or permission of instructor.

CSCI 4310 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 8316, MATH 4310, MATH 8316).

Prerequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

CSCI 4320 COMPUTATIONAL OPERATIONS RESEARCH (3 credits)

Survey of computational methods used in the solution of operations research problems. Some topics may include scripting to guide optimization software, constraint programming, heuristics and metaheuristics for optimization, basic machine learning algorithms, and simulation. (Cross-listed with MATH 4320, MATH 8326, CSCI 8326).

Prerequisite(s): MATH 3200 or CSCI 1620, and MATH 4300 each with a grade of C- or better or permission of instructor.

CSCI 4350 COMPUTER ARCHITECTURE (3 credits)

The course deals with: Computer evolution, top view of processor design, cache memory and organization, hierarchical memory design and management, performance metrics, RISC versus CISC architecture, and pipeline computer design and architecture. The course also covers analytic design alternatives as needed.

Prerequisite(s): CSCI 3710, CSCI 3320 or CSCI 8325 with C- or better.

CSCI 4380 DIGITAL FORENSICS (3 credits)

Digital forensics involves the preservation, identification, extraction, analysis and documentation of digital evidence stored on a variety of electronic devices. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a forensics investigation. Topics include: an introduction to digital forensics, data acquisition, first response, memory forensics, operating system forensics, and network forensics. Students will be required to perform several forensics analyses in a controlled lab environment, including acquiring forensically sound hard drive images, memory images and analyzing these using industry standard tools, such as Forensic Toolkit (FTK). The Digital Forensics class is designed for Cybersecurity, Computer Science and other qualified students to learn what actions are both appropriate and required for preserving, collecting and analyzing digital evidence in cases of intrusion, data theft or other cybercrimes. (Cross-listed with CYBR 4380).

Prerequisite(s): CYBR 3600 or CIST 3600; CSCI 3550 or ISQA 3400; CYBR 2600 or CYBR 3350 or CYBR 3370.

CSCI 4430 QUANTUM COMPUTING AND CRYPTOGRAPHY (3 credits)

The course builds an understanding of exciting concepts behind quantum computing and quantum cryptography. In doing so it will introduce the principles of qubits, superposition, entanglement, teleportation, measurement, quantum error correction, quantum algorithms such as quantum Fourier transformation, Shor's algorithm and Grover's algorithm, quantum key exchange, quantum encryption, and secure quantum channels that are built using these principles. It will also discuss advantages of quantum computing and cryptography over classical computing and cryptography and limitations thereof. The students will come out with a working understanding of the field of quantum computing and quantum cryptography. During the course, students will also implement several of the quantum algorithms. (Cross-listed with CYBR 8436, CYBR 4430).

Prerequisite(s): Co-requisites: CYBR 3570 or CSCI 4560; or Instructor permission.

CSCI 4440 INTRODUCTION TO PARALLEL COMPUTING (3 credits)

This course is an introduction to parallel computing, that is using multiple processors to execute algorithms. Topics discussed include: classification of parallel computers; shared-memory versus message passing; forms of parallelism; measures of performance; designing parallel algorithms; parallel programming and parallel languages; synchronization constructs; and operating systems for parallel computers. (Cross-listed with CSCI 8446)

Prerequisite(s): CSCI 4500, which may be taken concurrently, with C- or better.

CSCI 4450 PRINCIPLES OF ARTIFICIAL INTELLIGENCE (3 credits)

An introduction to artificial intelligence. The course will cover topics such as machine problem-solving, uninformed and informed searching, propositional logic, first-order logic, approximate reasoning, temporal reasoning, planning under uncertainty, and machine learning. (Cross-listed with CSCI 8456).

Prerequisite(s): CSCI 3320 with C- or better.

CSCI 4470 PATTERN RECOGNITION (3 credits)

Structures and problems of pattern recognition. Mathematics model of statistical pattern recognition, multivariate probability, Bay's decision theory, maximum likelihood estimation, whitening transformations. Parametric and non-parametric techniques, linear discriminant function, gradient-descent procedure, clustering and unsupervised learning, and feature selection algorithms. (Cross-listed with CSCI 8476).

Prerequisite(s): CSCI 1620 with C- or better, and MATH 2050. Recommended: MATH 4740/8746 or STAT 3800/8805.

CSCI 4480 ALGORITHMS FOR ROBOTICS (3 credits)

This course provides an introduction to software techniques and algorithms for autonomously controlling robots using software programs called controllers. Students will be taught how to program and use software controllers on simulated as well as physical robots. (Cross-listed with CSCI 8486).

Prerequisite(s): CSCI 3320 with C- or better. CSCI 4450/8456 is a recommended but not essential pre-requisite.

CSCI 4500 OPERATING SYSTEMS (3 credits)

Operating system principles. The operating system as a resource manager; I/O programming, interrupt programming and machine architecture as it relates to resource management; memory management techniques for uni-multiprogrammed systems; process description and implementation; processor management (scheduling); I/O device, controller, and channel management; file systems. Operating system implementation for large and small machines. (Cross-listed with CSCI 8506).

Prerequisite(s): CSCI 3710, CSCI 3320/8325, MATH 1950, and CSCI 4350/8356 with C- or better.

CSCI 4560 NUMBER THEORY & CRYPTOGRAPHY (3 credits)

An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 8566, MATH 4560, MATH 8566).

Prerequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

CSCI 4620 COMPUTER GRAPHICS (3 credits)

An introduction to the acquisition, manipulation and display of graphical information using digital techniques. Topics include discussion of the various hardware devices used for input and output, the classical algorithms and data structures used in manipulation of graphical objects, the user interface to the graphics system, and applicable standards. (Cross-listed with CSCI 8626).

Prerequisite(s): ISQA 3300 or CSCI 3320

CSCI 4650 INTRODUCTION TO CLOUD COMPUTING (3 credits)

This course is an introduction to cloud computing. The students will learn about core concepts of cloud computing such as cloud models (IaaS, PaaS, SaaS, etc.), deployment models (public, private, hybrid), cloud infrastructures (compute, networking, storage), cloud services (VMs, serverless, object storage, cache, CDN, etc.), and big-data driven systems. This course will revisit essential topics in CS-related courses such as data structure, operating systems, and distributed systems and show how they are utilized and applied in diverse cloud computing technologies and systems including Hadoop, Spark, and distributed databases. After taking this course, students will have basic knowledge of cloud computing and hand-on experiences with diverse projects (including cloud system demos) that utilize diverse and heterogeneous cloud resources. (Cross-listed with CSCI 8656).

Prerequisite(s): CSCI 3550 and CSCI 4500

CSCI 4660 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)

This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation, and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 8666, MATH 4660, MATH 8666).

Prerequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

CSCI 4700 COMPILER CONSTRUCTION (3 credits)

Assemblers, interpreters and compilers. Compilation of simple expressions and statements. Analysis of regular expressions. Organization of a compiler, including compile-time and run-time symbol tables, lexical scan, syntax scan, object code generation and error diagnostics. (Cross-listed with CSCI 8706).

Prerequisite(s): CSCI 3320 and CSCI 4220 with C- or better. Recommended: CSCI 4500.

CSCI 4760 TOPICS IN MODELING (3 credits)

Selection of such topics as formulation and analysis of various models involving Markov chains, Markov processes (including birth and death processes), queues, cellular automata, difference and differential equations, chaotic systems and fractal geometries. (Cross-listed with CSCI 8766).

Prerequisite(s): MATH 2350 and MATH 4740 or MATH 8746.

CSCI 4830 INTRODUCTION SOFTWARE ENGINEERING (3 credits)

Basic concepts and major issues of software engineering, current tools and techniques providing a basis for analyzing, designing, developing, maintaining and evaluating the system. Technical, administrative and operating issues. Privacy, security and legal issues. (Cross-listed with CSCI 8836).

Prerequisite(s): CSCI 3320 with C- or better.

CSCI 4850 DATABASE MANAGEMENT SYSTEMS (3 credits)

Basic concepts of data base management systems (DBMSs). The relational, hierarchical and network models and DBMSs which use them. Introduction to data base design. (Cross-listed with CSCI 8856).

Prerequisite(s): CSCI 3320 or equivalent with C- or better.

CSCI 4890 DATA WAREHOUSING AND DATA MINING (3 credits)

This course provides students with a theoretical foundation and practical methods for designing and constructing data warehouse and implementing data mining. After covering the essential concepts, issues, techniques to build an effective data warehouse, this course emphasizes the various techniques of data mining, such as association, classification, clustering and prediction for on-line analyses within the framework of data warehouse architectures. This course gives students an opportunity to undertake a real-life data analysis project. (Cross-listed with ISQA 4890).

Prerequisite(s): ISQA 3310 or CSCI 4850

CSCI 4900 INTERNET SYSTEMS DEVELOPMENT (3 credits)

This course focuses on contemporary techniques and technologies in the design, development, and integration of web-enabled information systems. This is a rapidly moving, hands-on course that mirrors real-world development of internet-based applications.

Prerequisite(s): CSCI 1620, CSCI 2850, (recommended) CSCI 3830, CSCI 4830 with C- or better.

CSCI 4950 INTERNSHIP IN COMPUTER SCIENCE (1-3 credits)

The purpose of this course is to provide students with opportunities to apply their academic studies in non-academic environments such as those found in business, industry and other non-academic organizations. The student interns will sharpen their academic focus and develop better understanding of non-academic application areas. The course is intended primarily for juniors and seniors in computer science.

Prerequisite(s): Permission of the computer science program chair.

CSCI 4970 CAPSTONE PROJECT (3 credits)

The Capstone Project completes a Computer Science student's undergraduate experience. Students will work on a team-based real-world project, practicing software engineering skills and applying fundamental computer science principles acquired throughout their undergraduate study.

Prerequisite(s): CSCI 4830 with C- or better; Senior standing in Computer Science. Not open to non-degree graduate students.

CSCI 4980 TOPICS IN COMPUTER SCIENCE (3 credits)

This is a variable topic course in computer science at the senior/graduate level. Topics not normally covered in the computer science degree program, but suitable for senior/graduate-level students can be offered. (Cross-listed with CSCI 8986).

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

CSCI 4990 INDEPENDENT STUDIES (1-3 credits)

A variable credit course for the junior or senior who will benefit from independent reading assignments and research type problems. Independent study makes available courses of study not available in scheduled course offerings. The student wishing to take an independent study course should find a faculty member willing to supervise the course and then submit, for approval, a written proposal (including amount of credit) to the Computer Science Undergraduate Program Committee at least three weeks prior to registration.

Prerequisite(s): Written permission required. Independent study proposals must be approved by the Undergraduate Program Committee.

Computer Science, Bachelor of Science

The Bachelor of Science in Computer Science provides students with a solid background in the fundamentals of computing and prepares them for employment in a wide variety of positions and for graduate study in computer science. The content of the department's courses is continually monitored to ensure they are consistent with fast-changing developments in the discipline. Courses are offered in the day, evening, and some online sections for the convenience of our students. Appropriate university and departmental computing resources are available to students taking computer science courses.

Student Group

The Association of Computer Machinery (ACM) (<https://www.acm.org/>) is a major force in advancing the skills of information technology professionals and students worldwide, providing the industry's leading portal to computing literature and more. The College of Information Science & Technology has two student chapters: UNO ACM and UNO ACM-W.

Fast Track

The department of Computer Science has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate credit hours towards the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST

program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.

- Admission to Fast Track does NOT guarantee admission to the graduate program.
- The admit term must be after the completion term of the undergraduate degree.

Computer Science, Bachelor of Science in Computer Science Requirements

A minimum of 120 credit hours is required for a Bachelor of Science degree in Computer Science. Thirty of the last 36 hours must be University of Nebraska at Omaha courses. Registering for courses without having taken the stated prerequisites could result in administrative withdrawal. Students must have a C or better grade in CIST 1400 and CSCI 1620 to serve as the prerequisite for all subsequent Computer Science (CSCI) courses. For all other courses applied towards the major, a grade of C- or better will meet the prerequisite and degree requirements.

To obtain a computer science degree, a student must fulfill the University General Education, College, and Departmental requirements. Some courses may satisfy requirements in more than one area, but credit is awarded only once, thereby reducing the total number of credit hours for the degree to 120. (This total does not include prerequisites.)

Code	Title	Credits
General Education Requirements - 46 Hours Required

¹ MATH 1950 - Satisfies General Education Quantitative Literacy requirement

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change.

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific degree program to determine all requirements for the program. In order to graduate on time (four years for an undergraduate degree), you need to take 30 credit hours each year.

Placement Exams: For Math, English, and Foreign Languages, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

Please note that transfer credit or placement exam scores may change a suggested plan of study.

Artificial Intelligence Concentration

Computer Science, Bachelor of Science in Computer Science - Artificial Intelligence Concentration Requirements

The Artificial Intelligence concentration is intended to enable students to learn about the principal technologies and methods for programming autonomous behavior on software agents and robots as well as learn about the computational approaches towards solving problems that deemed to require human intelligence. Students will gain knowledge about the reasoning, planning and learning techniques and algorithms used by software agents for natural language understanding, and by robots and game-avatars for problem solving, mobility, and strategic decision making. Taking courses in this track will provide students the essential skills for writing programs for real-world problems that require software programs and robots to mimic human behavior and assist humans in performing complex, risky and tedious tasks. Students will also have an opportunity to participate in national and international AI and game programming competitions and do capstone course projects to explore selective topics in more in-depth manner.

ELECTIVES

Elective hours as required to reach a total of 120 hours

¹ CSCI 3450 and CSCI 3470 may only be used once each to meet concentration requirements.

Game Programming Concentration

Computer Science, Bachelor of Science in Computer Science - Game Programming Concentration Requirements

The game programming concentration provides students with the basic concepts involved in the video game development process. The required courses give the student an introductory knowledge of both 2D and 3D game programming, as well as resource management, concepts of designing games, and general graphics theory. The elective courses allow the student to focus on a particular aspect of game development: game design, game/player interaction, game programming, or graphics. This concentration is only open to undergraduate Computer Science majors in the College of IS&T.

Internet Technologies (iT) Concentration for Computer Science Majors

Computer Science, Bachelor of Science in Computer Science - Internet Technologies Concentration Requirements

The internet technologies (iT) concentration supplements the Computer Science (CS) curriculum by focusing on the concepts and technologies needed to implement modern web applications. The concentration is designed to supplement the CS core curriculum by introducing the programming aspects as well as the theoretical concepts needed to build the infrastructure for web systems such as search engines, social networking sites, etc. The iT concentration provides extensive hands-on, project-based experience for students.

Information Assurance Concentration

Computer Science, Bachelor of Science in Computer Science - Information Assurance Concentration Requirements

The information assurance concentration is intended for students who wish to specialize in the security aspects of the computer science field. The concentration focuses on fundamental principles, worked examples, theory, and skills necessary to analyze, design, and construct secure information systems. The courses in this concentration address fundamental technologies, security policy, assurance, and ethics involved in the protection of the information systems. Hands-on experience is gained through numerous programming exercises associated with each course.

Elective hours as required to reach a total of 120 hours

Computer Science Minor

Computer Science Minor Requirements

A minor in computer science can be obtained by completing the following 18 hours:

Code	Title	Credits
All of the following		12
CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I	
CSCI 1620	INTRODUCTION TO COMPUTER SCIENCE II	
CSCI 2030	MATHEMATICAL FOUNDATIONS OF COMPUTER SCIENCE	
CSCI 3320	DATA STRUCTURES	
Computer Science Courses - Select 6 additional hours at the 3000 level or above		6

In all cases, students are responsible for completing any courses identified as prerequisites or co-requisite for the courses in the minor.

In addition, students must have a grade of C- or better in any prerequisite for a CSCI course.

In addition, students must have a grade of C- or better in any prerequisite for a CSCI course.

Information Systems and Quantitative Analysis

The study of Information Systems and Quantitative Analysis involves application of computers, mathematics, statistics, and other quantitative techniques in the solutions of a wide variety of business problems. While computer science often concentrates on building the computer tools which make computers useful, it is information systems and quantitative analysis that specifically focus on effectively applying these tools in the solutions of everyday business problems.

Bachelor of Science in Management Information Systems

The Bachelor of Science in Management Information Systems degree will provide students with the educational background for pursuing an exciting career in applying information technology in business and government to process data and solve a wide variety of business problems.

Accreditation Information

The Bachelor of Science in Management Information Systems has been accredited by the Computing Accreditation Commission of ABET, Inc., the recognized accreditor of college and university programs in applied science, computing, engineering, and technology. ABET accreditation demonstrates a program's commitment to providing its students with a quality education.

General information about the College of IS&T's accreditation as well as specific educational objectives for its ABET accredited program in Management Information Systems can be found h (<https://www.unomaha.edu/college-of-information-science-and-technology/academics/abet-accreditation.php>)ere (<https://www.unomaha.edu/college-of-information-science-and-technology/academics/abet-accreditation.php>).

Contact

For more information about the MIS undergraduate program, contact the academic advising office at 402.554.3819.

Website (<https://www.unomaha.edu/college-of-information-science-and-technology/academics/management-information-systems.php>)

Degrees Offered:

- Management Information Systems, Bachelor of Science (p. 838)

Minor Offered

- Minor in Management Information Systems (p. 845)

Certificates Offered

- Data Management Certificate (p. 846)
- Systems Development Certificate (p. 846)
- Information Technology Administration Certificate (p. 846)

Undergraduate certificates allow the College of IS&T to offer a path for individuals who do not hold a bachelor's degree to advance their education along a focused, profession-oriented course of study and to have those studies acknowledged, documented, and later, should the student so desire, applied to a related bachelor's degree program.

The goal of the certificate is to provide non-traditional and traditional students an opportunity to take a focused set of undergraduate courses and earn a certificate of completion. For prospective certificate students already in the workforce who have earned an associate's degree, such certifications may fit with organizational professional development requirements and could be used, at the discretion of the organization, as professional development units (PDUs).

The Bachelor of Science in Management Information Systems degree will provide students with the educational background to solve problems using technology for businesses, government, and nonprofit organizations.

Career Options:

- Business Process Analyst
- Chief Information Officer
- Data Scientist
- Database Administrator
- Information Systems Manager
- IT Consultant
- IT Security Manager
- IT Technical Support Officer
- Network Architect
- Quality Assurance Specialist
- Software Engineer
- Systems Analyst

ISQA 2010 SPECIAL TOPICS IN INFORMATION SYSTEMS AND QUANTITATIVE ANALYSIS (1 credit)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 2020 SPECIAL TOPICS IN INFORMATION SYSTEMS AND QUANTITATIVE ANALYSIS (2 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 2030 SPECIAL TOPICS IN INFORMATION SYSTEMS AND QUANTITATIVE ANALYSIS (3 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 2610 R FOR DATA ANALYTICS (1 credit)

R is a core language and toolkit in data science due to its vast capabilities to facilitate various stages of data analytics activities, from loading and transforming data to building and evaluating different analytics models. The course will enable students to use R to work with and manipulate data, build and evaluate data analytics models, and create visualizations.

ISQA 2620 EVALUATING AND CLEANING DATA (1 credit)

Evaluating and cleaning data sets for analysis is a core skill for professionals in data analytics and other technical fields. The course will enable students to assess the state of existing data sets, identify appropriate remediation strategies to prepare data for analysis, and perform common data cleaning procedures.

Prerequisite(s): ISQA 2610

ISQA 3150 PRINCIPLES OF QUANTITATIVE ANALYSIS (3 credits)

An introduction to structuring real-life situations into mathematical models. The class covers four groups of decision making models: decision trees, inventory, linear programming, network planning, and winning strategy. A number of the existing commercial computer software packages will be used in the course.

Prerequisite(s): CIST 2500

ISQA 3310 MANAGING THE DATABASE ENVIRONMENT (3 credits)

Introduction to business database design and management functions. The focus is on the use of current database management systems (DBMS) to support the data management function of an organization. Topics include data modeling, database design, SQL, data management and database administration. Hands-on experience in database design, creation, and use is provided.

Prerequisite(s): CIST 2100.

ISQA 3330 FUNDAMENTALS OF DATABASE MANAGEMENT (1 credit)

Databases are at the core of modern application development. Their use extends to many other environments including scholarly, scientific information systems. The overall goal of this course is to provide an introduction to the use of database management systems for efficient storing, updating, retrieval and analysis of data.

ISQA 3340 SQL FOR DATA ANALYTICS (1 credit)

Using the Structured Query Language (SQL) to access and manipulate data is a core competency in data management, data analytics, data science, and other data-intensive fields. Starting with an overview of the relational model of database systems, the course will enable students use SQL to create database tables, and store, retrieve, and manipulate data at both basic and advanced levels.

ISQA 3400 INFORMATION TECHNOLOGY INFRASTRUCTURE (3 credits)

This course provides an introduction to IT infrastructure issues. It covers topics related to both computer and systems architecture and communication networks, with an overall focus on the services and capabilities that IT infrastructure solutions enable in an organizational context.

Prerequisite(s): CIST 2100

ISQA 3420 MANAGING IN A DIGITAL WORLD (3 credits)

This course introduces the fundamentals of information systems/technology (IS/T) management. Students are introduced to the various roles, responsibilities, skills, and concepts essential to successful management of IS/T in the context of a dynamic environment of technology workforce diversity, a global economy, and concern for ethics and social responsibility in the development of systems.

Prerequisite(s): CIST 2100

Distribution: Global Diversity General Education course

ISQA 3520 GRAPHICAL USER INTERFACE DESIGN (3 credits)

This course is an introduction to interaction design with a primary emphasis on designing usable and useful computer interfaces. Students will learn the principles of interface design grounded in a fundamental understanding of human cognitive processes. They will learn how end-users develop and use mental models of interaction and will apply this knowledge to the design of interfaces for real-world applications. A design project will challenge students to plan their own designs, to develop interfaces and to integrate them into a working application prototype, to test their application with real users, and to effectively communicate the overall results. (Cross-listed with ISQA 8525)

Prerequisite(s): CIST 1300

ISQA 3900 WEB APPLICATION DEVELOPMENT (3 credits)

This course focuses on contemporary techniques and technologies in the design, development, and integration of web-enabled information systems. Topics include: Multi-tiered systems architecture; agile application development; object-oriented analysis and design; prototyping; testing, verification, and validation; lifecycle models; and component-based development. This is a rapidly moving, hands-on course that mirrors real-world development.

Prerequisite(s): CIST 1300 or CSCI 2850, CIST 1400, ISQA 3310 or CSCI 4850 (or concurrent enrollment)

ISQA 3910 INTRODUCTION TO PROJECT MANAGEMENT (3 credits)

This course will cover the basics of project planning, scheduling and control. Earned value management techniques and project quality will be covered. Risk management will also be covered. The student will be introduced to the IEEE Standards for Project Management. The purpose of the course is to provide students with an introduction to the tools and techniques used to manage projects to achieve successful completion. The project management methods taught are suitable for a wide variety of project types such as software development or engineering projects (e.g. construction).

Prerequisite(s): CIST 2100; or equivalent.

ISQA 4000 SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS (1-5 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ISQA 8086)

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 4010 BUSINESS INTELLIGENCE (3 credits)

The course focuses on the various topics on knowledge management by utilizing both behavioral approaches and information technology tools. It includes data collection and analysis, intelligent agents, business concerns on data warehousing and data mining, customer relationship management. The course will also cover information overload, human expert systems vs. artificial intelligent systems and intelligent decision making.

Prerequisite(s): CIST 1400; CIST 2500

ISQA 4100 INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION (3 credits)

This course examines the frameworks and tools used to develop an organization's information system architecture. It provides the analytical skills and conceptual frameworks with which to make recommendations and decisions regarding the integration of information technology components into an information system architecture. (Cross-listed with ISQA 8106)

Prerequisite(s): CIST 2100 and ISQA 3310

ISQA 4110 INFORMATION SYSTEMS ANALYSIS (3 credits)

This course examines and applies the principles of information systems analysis, following a structured systems development methodology. It surveys project management, feasibility and analysis and systems requirement definition using modern systems analysis techniques and automated tools. Course utilizes a case approach where students initiate the analysis and logical design of a limited-scope information system.

Prerequisite(s): CIST 2100, ISQA 3910, and ISQA 3310; only ISQA 3310 can be taken concurrently.

ISQA 4120 SYSTEM DESIGN AND IMPLEMENTATION (3 credits)

This is the second course in a sequence in computer information systems analysis, design, and implementation. This course extends the basic foundations of systems development started in ISQA 4110 and examines the activities comprising the design, construction and implementation of information systems.

Prerequisite(s): ISQA 3310 and ISQA 4110

ISQA 4130 INFORMATION TECHNOLOGY FOR DEVELOPMENT (3 credits)

Information Technology for Development (ITD) is the implementation and evaluation of information technology infrastructures to stimulate economic, social and human development. In this service-learning course, students will learn and apply ITD concepts for developing and adding value through IT by working with small business entrepreneurs in Omaha or rural Nebraska. Students will evaluate micro-business technology needs, prepare business technology plans, provide training, and implement appropriate solutions, to the extent possible within a semester class. (Cross-listed with ISQA 8136)

Prerequisite(s): Though not required, the following courses or their equivalent would provide the necessary background : CIST 1100, CIST 1300, ISQA 3210, ISQA 3310, ISQA 3400. Not open to non-degree graduate students.

ISQA 4150 ADVANCED STATISTICAL METHODS FOR IS&T (3 credits)

This course emphasizes the application and interpretation of statistical methods including design of experiments, analysis of variance, multiple regression, and nonparametric procedures and the use of statistical computer packages. The intent is to develop quantitative abilities needed for quantitatively intensive jobs and for advanced study in management information systems, computer science and information technology. (Cross-listed with ISQA 8156)

Prerequisite(s): CIST 2500 or equivalent (at least one course in statistics)

ISQA 4160 ENTERPRISE RESOURCE PLANNING SOFTWARE CONSULTING (3 credits)

Enterprise Resource Planning (ERP) consulting is designed to provide students foundational knowledge required to become a consultant working with enterprise systems. ERP systems are used by most organizations to manage and integrate the core functions of a business. Students will be exposed to a broad range of consulting skills that spans package selection to the implementation process. Students will work with a live instance of an ERP system focusing on the cross-functional integration of core business processes primarily in a manufacturing environment including finance, operations/supply chain, procurement, and fulfillment. The goal of the course is to provide students a foundation for careers in the area of ERP systems and consulting. (Cross-listed with ISQA 8166, SCMT 4160)

ISQA 4170 DIGITAL SUPPLY CHAIN & LOGISTICS (3 credits)

Global Supply Chains are being disrupted by digital transformation driven by emerging technologies such as IoT (internet of things) and AI/ML (Artificial Intelligence/Machine Learning). This course will take a closer look at global supply chains and logistics with an emphasis on the impact of digitalization. We will explore the typical global supply chain processes and how state-of-the-art and emerging technologies impact them. Thus, the class views global digital supply chains by integrating business and technological perspectives. The course will start with an overview of technologies relevant to digital supply chains. We will then discuss digitalization strategy and digital supply chains, fundamental GSCM (Global Supply Chain Management) processes and their potential for digitalization, and discussion of IT/software systems, IoT, AI/ML, Data Analytics/Visualization, and related facets that impact digital supply chains. The course will culminate with an integrated case study and/or research paper (graduate). (Cross-listed with ISQA 8176).

Prerequisite(s): It is preferable that students have taken an introductory supply chain class or have some experience in the transportation, logistics and supply chain management sector. Undergraduate students must have Junior standing.

ISQA 4180 ELECTRONIC COMMERCE (3 credits)

Critical examination of the issues, technologies, standards and business and social implications of electronic commerce in Cyberspace.

Prerequisite(s): ISQA 3400 or equivalent.

ISQA 4190 PROCESS REENGINEERING WITH INFORMATION TECHNOLOGY (3 credits)

Business process reengineering issues are examined. Reengineering concepts and methods are introduced. Additional special project(s) are required. SAP will be introduced. (Cross-listed with ISQA 8196.)

Prerequisite(s): CIST 2500; prerequisite/co-requisite ISQA 4110.

ISQA 4200 INFORMATION AND DATA QUALITY MANAGEMENT (3 credits)

The course primarily focuses on developing an in-depth understanding of Data and Information Quality (DQ and IQ) concepts and issues. On completing this course students will be able to understand and use DQ and IQ Concepts in Information Systems projects, be able to recognize various patterns of Data and Design Deficiencies in Systems and be able to suggest appropriate DQ and IQ improvement plans in light of known deficiencies in systems. (Cross-listed with ISQA 8206)

Prerequisite(s): CIST 2500 and CIST 2100.

ISQA 4300 DATABASE ADMINISTRATION (3 credits)

This course is designed to give students an applied, practical introduction to database administration. Students will gain an understanding of the functioning of a database management system and its relationship to the computing environment in which it runs. They will learn the concepts, principles, and techniques necessary to carry out such functions as database object creation, storage management, capacity planning, performance tuning, backup and recovery, and security management. Each semester the course will focus on one commercial database management system (DBMS), such as Oracle. (Cross-listed with ISQA 8306)

Prerequisite(s): ISQA 3310 or CSCI 4850. Not open to non-degree graduate students.

ISQA 4380 DISTRIBUTED TECHNOLOGIES AND SYSTEMS (3 credits)

The course introduces students to concepts, issues and tools needed to develop distributed computing systems. Topics include distributed systems architecture, middleware, Internet-based systems development, security and performance. Hands-on systems development using current technologies is provided.

Prerequisite(s): ISQA 3310 or equivalent and knowledge of database design and SQL.

ISQA 4500 SPECIAL PROBLEMS IN INFORMATION SYSTEMS AND QUANTITATIVE ANALYSIS (2-3 credits)

Individual investigation of specific problems in information systems and quantitative analysis and related areas.

Prerequisite(s): Senior standing and permission of program chair.

ISQA 4510 INFORMATION SYSTEMS INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application of their academic studies in the business world to help prepare them for their professional career and to provide a view of the challenges they will face.

Prerequisite(s): Junior/senior standing and permission of department.

ISQA 4730 DECISION SUPPORT SYSTEMS (3 credits)

This course examines a set of information systems which specifically support managerial decision makers: Decision Support Systems, Group Decision Support Systems, Executive Information Systems, Data Warehouses, Expert Systems, and Neural Networks. This course explores the development, implementation, and application of these systems, how these systems can be applied to current business problems, as well as how organizational issues impact the implementation and usage of these systems. (Cross-listed with ISQA 8736)

Prerequisite(s): CIST 2100 or equivalent.

ISQA 4880 SYSTEMS SIMULATION AND MODELING (3 credits)

The course provides an introduction to the modeling and simulation with special emphasis on decision-theoretic models and rational decision-making. The ability to make good decisions is key to individuals and organizations and studying, understanding and improving decisions is vital to success. Students are given a background into systematic decision-making processes, and then are introduced to formal methods for decision modeling and analysis. Building on these foundational models, students learn how to perform process modeling and optimization. Finally, the course concludes with a look at psychological biases and traps that may affect decision-makers. (Cross-listed with ACMP 4880)

Prerequisite(s): CIST 1400 and CIST 2500 or equivalent

ISQA 4890 DATA WAREHOUSING AND DATA MINING (3 credits)

This course provides students with a theoretical foundation and practical methods for designing and constructing data warehouse and implementing data mining. After covering the essential concepts, issues, techniques to build an effective data warehouse, this course emphasizes the various techniques of data mining, such as association, classification, clustering and prediction for on-line analyses within the framework of data warehouse architectures. This course gives students an opportunity to undertake a real-life data analysis project. (Cross-listed with CSCI 4890).

Prerequisite(s): ISQA 3310 or CSCI 4850

ISQA 4900 FULL STACK DEVELOPMENT (3 credits)

Full stack development is the development of both client side and server side portions of web applications. Most organizations go beyond simply using HTML web pages with a small amount of JavaScript in applications and have moved to developing modern web applications with backend APIs and frontend JavaScript frameworks such as Vue.js. Students will learn how to build a backend application and REST APIs. Students will take that backend framework knowledge and learn to securely integrate these backend APIs with frontend JavaScript frameworks to build single page apps and hybrid mobile applications.

Prerequisite(s): CIST 1300 - Web Development or CSCI 2850

Programming on the Internet ISQA 3310 Managing the Database Environment or CSCI 4850 Database Management ISQA 3900 Web Application Development or equivalent

Management Information Systems, Bachelor of Science

Information is the lens through which we see the world. Information systems professionals use technology to put information to use to bring value to people, organizations, and societies. The Bachelor of Science in Management Information Systems degree provides students with the skills and educational background to develop & manage an organization's information resources, technology, and infrastructure.

Students pursuing a degree in Management Information Systems will learn how the computer-based information systems can be applied to improve

organizational operations and decision-making, enhance products and services, and create new opportunities for business success. The study of information systems and quantitative analysis prepares students for career opportunities in business data management; data analytics, management information systems, systems analysis and design, decision support, information security, digital transformation, and other related areas.

Fast Track

The department of Information Systems and Quantitative Analysis (ISQA) has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate credit hours towards the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Contact

For more information, contact the College of IS&T Academic Advising Office at 402.554.3819.

Website (<http://www.unomaha.edu/college-of-information-science-and-technology/academics/management-information-systems.php>)

Management Information Systems, Bachelor of Science in Management Information Systems Requirements

A minimum of 120 credit hours is required for a Bachelor of Science degree in Management Information Systems. Thirty of the last 36 hours must be University of Nebraska at Omaha (UNO) courses. Registering for courses without having taken the stated prerequisites could result in administrative withdrawal.

To obtain a Bachelor of Science in Management Information Systems, a student must fulfill the University, College and Departmental requirements. Some courses may satisfy requirements in more than one area, but credit is awarded only once, thereby reducing the total number of credit hours for the degree to 120. (This total does not include prerequisites; students are accountable for all prerequisite courses.)

Code	Title	Credits
General Education Requirements - 46 Hours Required

*This area may also be used to complete concentration requirements

ELECTIVES

#Elective hours as required to reach a total of 120 hours

Optional Concentrations

Coursework taken to complete an optional MIS concentration also satisfies the 12 hours of specialization coursework within the MIS degree.

The Management Information Systems (MIS) degree also includes 23 credit hours that can be used for prerequisite classes, free-choice elective classes, optional minors, optional certificates, or a combination of any of the aforementioned areas.

- Internet Technologies Concentration for MIS Majors (p. 843)
- i-Business Application Development and Management (p. 841)
- Information Assurance Concentration for MIS Majors (p. 842)
- IT Audit and Control (p. 844)

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change.

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific degree program to determine all requirements for the program. In order to graduate on time (four years for an undergraduate degree), you need to take 30 credit hours each year.

Placement Exams: For Math, English, and Foreign Languages, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

Please note that transfer credit or placement exam scores may change a suggested plan of study.

Management Information Systems Minor

Management Information Systems Minor Requirements

A grade of "C-" or better is required in each course applied toward the minor in Management Information Systems (MIS). Students are responsible for completing the prerequisites for all courses taken for the minor in MIS.

A minor in Management Information Systems may be obtained by completing the following courses:

Code	Title	Credits
15 Hours Required		
All of the following		6
ISQA 3310	MANAGING THE DATABASE ENVIRONMENT	
ISQA 3910	INTRODUCTION TO PROJECT MANAGEMENT	
Select one of the following: ¹		3
ISQA 3420	MANAGING IN A DIGITAL WORLD	
ISQA 3900	WEB APPLICATION DEVELOPMENT	
ISQA 4110	INFORMATION SYSTEMS ANALYSIS	
Select 6 hours from the following:		6
ISQA 3400	INFORMATION TECHNOLOGY INFRASTRUCTURE	
ISQA 3520	GRAPHICAL USER INTERFACE DESIGN	
ISQA 4000	SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS	
ISQA 4010	BUSINESS INTELLIGENCE	
ISQA 4100	INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION	
ISQA 4120	SYSTEM DESIGN AND IMPLEMENTATION	
ISQA 4130	INFORMATION TECHNOLOGY FOR DEVELOPMENT	
ISQA 4150	ADVANCED STATISTICAL METHODS FOR IS&T	
ISQA 4160	ENTERPRISE RESOURCE PLANNING SOFTWARE CONSULTING	
ISQA 4170	DIGITAL SUPPLY CHAIN & LOGISTICS	
ISQA 4180	ELECTRONIC COMMERCE	
ISQA 4200	INFORMATION AND DATA QUALITY MANAGEMENT	
ISQA 4300	DATABASE ADMINISTRATION	
ISQA 4380	DISTRIBUTED TECHNOLOGIES AND SYSTEMS	
ISQA 4730	DECISION SUPPORT SYSTEMS	
ISQA 4880	SYSTEMS SIMULATION AND MODELING	
ISQA/CSCI 4890	DATA WAREHOUSING AND DATA MINING	
CIST 4910	SYSTEMS DEVELOPMENT IN OPEN SOURCE COMMUNITIES	

¹ Additional courses can be used to satisfy the 6 additional credit hours needed for the minor.

Data Management Certificate

Data Management (DM) is the practice of managing data-related issues for an organization. Data management practitioners seek to optimize the design, storage, and use of organizational data.

Data Management Certificate Requirements

The certificate in Data Management is open to anyone with an associate's or bachelor's degree in IT. UNO students enrolled in the Division of Continuing Studies' Bachelor of Multidisciplinary Studies degree program with an IT-related concentration and students in any of the College of IS&T undergraduate degree programs are also eligible to enroll in this certificate program.

Students are responsible for completing the prerequisites for all courses taken for the Data Management Certificate.

Prerequisite Courses

Code	Title	Credits
CIST 2500	INTRODUCTION TO APPLIED STATISTICS FOR IS&T	3
CIST 2100 or MGMT 3100	ORGANIZATIONS, APPLICATIONS AND TECHNOLOGY MANAGEMENT INFORMATION SYSTEMS	3

Requirements

Information Technology Administration Certificate

The undergraduate certificate in Information Technology (IT) Administration is designed for students who are interested in managing the complex technical infrastructure of today's organizations. The certificate is offered in partnership with the University of Agder in Norway (UiA), a sister university to UNO. The certificate consists of 12 credit hours of courses covering such areas as systems administration, network administration, database administration, security administration, and distributed systems. All courses are offered online. Students will take courses taught by both UNO and UiA instructors and will have the opportunity to work with students residing in a country other than their own.

Information Technology (IT) Administration Certificate Requirements

The certificate in Information Technology (IT) Administration is open to anyone with an associate's or bachelor's degree in IT. UNO students enrolled in the Division of Continuing Studies' Bachelor of Multidisciplinary Studies degree program with an IT-related concentration and students in any of the College of IS&T undergraduate degree programs are also eligible to enroll in this certificate program.

Students are responsible for completing the prerequisites for all courses taken for the IT Administration Certificate.

Code	Title	Credits
Prerequisite Courses		
CIST 1400 or CIST 1600	INTRODUCTION TO COMPUTER SCIENCE I INTRODUCTION TO PROGRAMMING USING PRACTICAL SCRIPTING	3

¹ NOTE: The following substitutions will be accepted:
 IS 212 (UiA) IT Resource Operations (3 hours) in place of ISQA 3400.
 IS 309 (UiA) Advanced Database Systems (3 hours) in place of ISQA 4300 (<http://catalog.unomaha.edu/search/?P=ISQA%204300>).
 IS 213 (UiA) Open Source (3 hours) in place of CYBR 2600.

Interdisciplinary Informatics (Si2)

The mission of the School of Interdisciplinary Informatics (Si2) is to provide students and faculty the opportunity to pursue their passions, to use technology in all its facets, and to be transformative. We collaborate to deliver individualized education, world-class research, and immersive experiences to create and harmonize knowledge from multiple disciplines.

The School of Interdisciplinary Informatics reflects the role and mission of UNO's College of Information Science & Technology and the University of Nebraska at Omaha in a number of ways. It is a direct response to the opportunities and challenges presented by information technology as it relates to economic growth for the state and region in applied IT areas such as medical informatics, innovation, and cybersecurity. The School encourages the enhancement and fostering of new educational, research and creative activities by bringing together practitioners, researchers and students in interdisciplinary fields of importance to the state and the University. The School is unique in the country and leads to increased national visibility of the University of Nebraska in the area of interdisciplinary information technology applications.

The School of Interdisciplinary Informatics addresses the following needs and demands of our academic, business, and community stakeholders:

1. Growth of interdisciplinary areas;
2. Facilitation of innovative partnerships with external constituents, including leveraging the expertise of the local community;
3. Diversity of personnel;
4. Reduction of barriers to collaboration;
5. Flexible and agile structure for quick response to opportunities;
6. Solidification of regional and national recognition as an important resource for the study and advancement of IT in the domain of healthcare, biosciences, and information security;
7. Visibility of the college and its interdisciplinary focus;
8. A magnet for collaborative external funding;
9. Development of the next generation workforce to address local, regional and national needs in exciting, new interdisciplinary domains.

Accreditation

As a requirement of standards set by the Higher Learning Commission (HLC), the accrediting body of the University of Nebraska at Omaha, each of our undergraduate degree programs performs a regular assessment of student learning outcomes. The process of program assessment and program reviews helps to ensure students are being provided with an

academically rigorous curriculum that also reflects the demands of a rapidly changing job market.

Contact

For more information, contact the College of IS&T Academic Advising Office at 402.554.3819.

Website (<http://www.unomaha.edu/college-of-information-science-and-technology/school-of-interdisciplinary-informatics/>)

Degrees Offered

The three degrees offered by the School are:

- Bioinformatics, Bachelor of Science (p. 854)
- Cybersecurity, Bachelor of Science (p. 859)
- Applied Computing and Informatics, Bachelor of Science (p. 864)

The degrees offered in the School share an interdisciplinary spirit within their curriculum, which reflects the School's mission to provide our students a transformative, individualized education. Our graduates are trained by faculty with expertise in multiple domains so that they may rise to real-world challenges that require interdisciplinary solutions.

Minors Offered

- Applied Computing and Informatics Minor (p. 868)
- Cybersecurity Minor (p. 864)
- Bioinformatics Minor (p. 858)

Bachelor of Science in Bioinformatics

Graduates from UNO's Bioinformatics (BIOI) program in the College of IS&T will be able to use their preparation to apply and investigate technology to solve bioinformatics problems in a comprehensive, competitive and effective way. Students with an undergraduate degree in bioinformatics can expect to have a foundational knowledge in computer science, biology, statistics, and database administration.

The job outlook for Bioinformatics majors is excellent. Versatile and greatly in demand, our graduates have gone on to become programmers, data analysts, and senior-level scientists. Employment is available with private and public industries, research institutions, government institutions, non-profits, and universities around the globe. The Bioinformatics degree can also serve as a springboard to graduate work, opening the door to academic careers and other careers that require informatics skills coupled with biological background.

Careers Options:

- Bioinformatics Scientist/Analyst
- Scientific Curator
- Computational Biologist
- Database Programmer
- Database Administrator
- Software Developer
- Consultant
- Network Analyst
- Structural Analyst
- Biostatistician
- Software Engineer
- Research Scientist

- Data Scientist
- Biotech Entrepreneur

Bachelor of Science in Cybersecurity

Cybersecurity is a rapidly expanding field focused on keeping critical infrastructure, systems, and users safe. From phishing attacks on individuals to large-scale attacks on facilities like power plants, government systems, and industrial control systems, threaten the 21st century global economy. Adapting to these changing threat environments is a continual activity in which companies and governments must engage. These organizations rely on cybersecurity practitioners to identify threats, determine risk, and implement mitigating protections in their software, hardware, and online systems - such as those on mobile, web and Internet of Things (IoT) platforms. It is also important to build protections into new software and hardware during the design and development process, track and monitor developed systems for on-going risk, and assess them forensically when something goes wrong. The Bachelor of Science in Cybersecurity (CYBR) degree program at UNO focuses on technical curricula that prepare students for pathways into a range of careers that address these topics.

Careers Options:

- Entry Level
 - Cybersecurity Specialist/Technician
 - Cyber Crime Analyst/Investigator
 - Incident Analyst / Responder
 - IT Auditor
 - Secure Applications Developer
- Mid-Level
 - Cybersecurity Analyst
 - Cybersecurity Consultant
 - Penetration and Vulnerability Tester
 - Secure Systems Integrator
 - Cybersecurity Lead Programmer
- Advanced level
 - Cybersecurity Manager/Administrator
 - Cybersecurity Engineer
 - Cybersecurity Architect
 - Chief Information Security Officer

Bachelor of Science in Applied Computing and Informatics

The Applied Computing and Informatics major is the interdisciplinary practice of conceptualizing, designing, prototyping and fielding an IT-based product or service. IT focuses both on the technological and entrepreneurial aspects of IT products. Applied Computing and Informatics brings together aspects of Computer Science and Management Information Systems with other disciplines that inform IT design and application, such as health care, business, psychology, art, or music.

Careers Options:

In addition to more general IT professions, students in the Applied Computing and Informatics program have found employment in the Applied Computing and Informatics field as:

- Applications Designer
- Digital Artist
- Founder
- Graphics/Web Designer
- Innovation Consultant

- Innovation Evangelist
- IT Applications Consultant
- New Product Designer/Developer
- New Ventures Specialist
- Product Innovation Specialist
- User Experience Designer
- Video Game Designer

Applied Computing and Informatics

ACMP 1010 ACTIVATING INNOVATION IN SOCIETY (3 credits)

This course surveys and applies the use of qualitative methods, especially interview-based research, in order to maximize the insight that informs and activates the innovation process, with emphasis on technological innovation.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

ACMP 1110 INTRODUCTION TO IT INNOVATION (3 credits)

In almost every modern human endeavor, creativity and Information Technology are essential. In the Internet age, information has become a commodity that is available to everyone. Similarly, current technology has largely become commoditized. Therefore, creating new value is becoming the basis for successful professionals. This course introduces students to tools, techniques, and methods for generating innovative information technology ideas and solutions. It teaches them to think about future possibilities and equips them with the ability to critically evaluate proposed innovations and ideas. The goal of the course is to increase students' ability to creatively solve challenging problems in new ways using information technology. This class is inherently interdisciplinary as IT now touches every aspect of modern academic pursuits.

Prerequisite(s): Not open to non-degree graduate students.

ACMP 2150 AUDIO FOR MULTIMEDIA (3 credits)

This course provides an overview of audio production techniques as they pertain to multimedia.

Prerequisite(s): Not open to non-degree graduate students.

ACMP 2220 APPLIED IT INNOVATION (3 credits)

The course extends the concepts learned in the Introduction to IT Innovation course and focuses on market dynamics and monetizing innovations. It moves past idea generation and focuses on identifying and gathering resources, innovation implementation, sustainable innovation models and how ideas can be monetized. The goal is for students to take their original ideas from concept to initial implementation with thoughts towards commercialization. Upon completing the course, students will have created at least a rudimentary implementation of an original idea and have a defensible plan for how the idea can be monetized.

Prerequisite(s): ACMP 1110/ITIN 1110 & CIST 1400. Not open to non-degree graduate students.

ACMP 2990 IT INNOVATION SYMPOSIUM (1 credit)

The seminar exposes students to information technology innovators from multiple industries and varied backgrounds. It teaches the practical aspects of IT Innovation from those that have done it and are doing it in both research and practice. The purpose is to cause students to reflect on applying innovation to the real-world, connect them to the innovation community and to equip them with best practices and tools to make their innovations a reality.

Prerequisite(s): Enrollment in the IT Innovation Major or IT Innovation Minor. Not open to non-degree graduate students.

ACMP 3100 MUSIC INFORMATICS (3 credits)

Surveys the use of digital music data in the study, composition, performance, analysis, storage, and dissemination of music. Various computational approaches and technologies in music informatics including music information retrieval will be explored and implemented by students. (Cross-listed with MUS 3100).

Prerequisite(s): Successful completion of one of the following three courses satisfies the prerequisite requirement: CIST 1300 or MUS 3170 or MUS 3180. Not open to non-degree graduate students.

ACMP 3180 ELECTRONIC MUSIC PRODUCTION (3 credits)

An exploration of the potentials of electronic music. Concepts of electronic music are presented through the use of a computer, software, and appropriate hardware. Students create assignments that demonstrate the application of basic techniques. (Cross-listed with MUS 3180).

ACMP 3330 PRODUCT DESIGN AND DEVELOPMENT (3 credits)

This course will cover elements and principles of excellent product design and development. The history of design will be reviewed and overarching tenets of design will be introduced. The course will particularly focus on innovation and students will be expected to develop an original concept and create quality designs and low-fidelity prototype implementations of their unique idea. The proposed solutions must be novel and meet a real-world market need. This course will be hands-on and will examine developmental models for innovation.

Prerequisite(s): ACMP 2220/ITIN 2220. Not open to non-degree graduate students.

ACMP 4000 SPECIAL TOPICS IN IT INNOVATION (3 credits)

This course is designed to acquaint students with issues which are current to the field or emerging trends in the IT Innovation area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ACMP 8006).

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ACMP 4090 MANAGING COLLABORATIVE ENGAGEMENT (3 credits)

This course will provide students with the opportunity to develop knowledge and strategies for leading teams, enhancing collaboration, building consensus, problem solving in teams, facilitating group processes, and designing collaborative workspaces. (Cross-listed with BSAD 8096, MGMT 4090, SCMT 4090).

Prerequisite(s): Junior standing or permission of instructor.

ACMP 4260 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, CSCI 8266, ACMP 8266).

Prerequisite(s): Required: C- or better in CIST 2500 and junior standing, or by permission of instructor. Recommended: C- or better in CSCI 4250 or ACMP 3330/ITIN 3330.

ACMP 4440 AGILE DEVELOPMENT METHODS (3 credits)

The course presents an introduction to agile development methods for IT application development. Students will also learn Unified Modeling Techniques as they go through the agile iterations. This course is a foundation course for the IT Innovation capstone course.

Prerequisite(s): CSCI 4850 or ISQA 3310. Not open to non-degree graduate students.

ACMP 4500 INDEPENDENT STUDIES (1-3 credits)

A variable credit course for the junior or senior who will benefit from independent reading assignments and research type problems. Independent study makes available courses of study not available in scheduled course offerings. The student wishing to take an independent study course should find a faculty member willing to supervise the course and then submit, for approval, a written proposal (including amount of credit) to the IT Innovation Undergraduate Program Committee at least three weeks prior to registration.

Prerequisite(s): Written permission required.

ACMP 4510 INFORMATION TECHNOLOGY INNOVATION INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the ITIN undergraduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by professionals in the workplace.

Prerequisite(s): Junior/Senior standing and permission of School of interdisciplinary Informatics Director. Not open to non-degree graduate students.

ACMP 4720 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation. Concepts and techniques in innovation, entrepreneurship, and strategy will be used to aid students in the venture creation process. Important considerations impacting the viability of the venture post formation will also be explored. Practical real-world experimentation is the central component of the course and will help students to conceive, develop, and launch their own innovative ventures. (Cross-listed with BSAD 8726, ENTR 4720, ACMP 8256, MGMT 4720, MKT 4720).

Prerequisite(s): ACMP 1110/ITIN 1110 and junior standing or above or by instructor permission.

ACMP 4880 SYSTEMS SIMULATION AND MODELING (3 credits)

The course provides an introduction to the modeling and simulation with special emphasis on decision-theoretic models and rational decision-making. The ability to make good decisions is key to individuals and organizations and studying, understanding and improving decisions is vital to success. Students are given a background into systematic decision-making processes, and then are introduced to formal methods for decision modeling and analysis. Building on these foundational models, students learn how to perform process modeling and optimization. Finally, the course concludes with a look at psychological biases and traps that may affect decision-makers. (Cross-listed with ISQA 4880).

Prerequisite(s): CIST 1400, CIST 2500, or equivalent.

ACMP 4980 APPLIED COMPUTING AND INFORMATICS CAPSTONE PROJECT I (3 credits)

This course serves as Part 1 of the capstone project for the Applied Computing and Informatics program. As such the student will design a prototype of an IT product or service as well as a business case pertaining to what is required to launch their project commercially. This effort will be under the guidance of an advisory committee.

Prerequisite(s): ACMP 4440/ITIN 4440. ACMP 4980 is for seniors in the BS in Applied Computing & Informatics degree. Before enrolling in ACMP 4980 student must gain approval from the ACMP Program Committee, of their Emphasis Area. Not open to non-degree graduate students.

ACMP 4990 APPLIED COMPUTING AND INFORMATICS CAPSTONE PROJECT PART II (3 credits)

This course serves as Part 2 of the capstone project for the Information Technology Innovation program. Following the designs and business plan developed in Part I ACMP 4980, the student will create a prototype of an IT product or service as well as refine and implement the required business aspects involved in launching their project commercially. This effort will be under the guidance of an advisory committee.

Prerequisite(s): ACMP 4980/ITIN 4980. This course is for seniors who are enrolled in the BS in Applied Computing and Informatics degree. Not open to non-degree graduate students.

Bioinformatics**BIOI 1000 DIGITAL HEALTH AND BIOLOGICAL SYSTEMS (3 credits)**

This course is an introduction to how computing and technology can be applied to human health and biological systems in an interdisciplinary setting. Students will learn to discern between computing specializations such as bioinformatics and health informatics. The course will explore the application of computing to health, life sciences, and agriculture in both current and historical contexts, and how these applications impact society. Topics covered include bioinformatics, health informatics, user experience and design, data security and privacy, and more.

Distribution: Natural/Physical Science General Education course

BIOI 2000 FOUNDATIONS OF BIOINFORMATICS (3 credits)

Bioinformatics is a new scientific discipline that integrates mathematical and computational techniques with biological knowledge to develop and use computational tools to extract, organize and interpret information from genetic sequence data. The field is growing quickly due to rapid advances in sequencing and other biological techniques that allow the genomes of different organisms to be easily sequenced. This course provides an overview of the field and covers the chemical, biological, mathematical and computational foundations of bioinformatics upon which later courses will depend. In addition, it introduces problems of interest to bioinformaticians and the methods and tools used to address them.

Prerequisite(s): BIOI 1000 or BIOL 1450

BIOI 3000 APPLIED BIOINFORMATICS (3 credits)

This course will provide students with the practical skills needed for the analysis of -omics data. Topics covered will include biological databases, molecular biology tools (e.g., primer design, contig assembly), gene prediction and mining, database searches, genome comparison, sequence alignments, phylogenetic inference, gene expression data analyses, functional annotation of protein sequences, protein structure and modeling. Specialized software (e.g., Vector NTI) and widely used web-based computation tools (e.g., Entrez, BLAST, ClustalX, Phylip, PyMOL, and SwissPDBviewer) will be illustrated. Multiple approaches for solving particular problems will be presented.

Prerequisite(s): BIOI 2000 and CIST 1400; or permission of instructor.

BIOI 3500 ADVANCED BIOINFORMATICS PROGRAMMING (3 credits)

Because of the volume and complexity of biological data, advanced programming skills are required for researchers in order to get the most out of their data analyses. This course will provide the expanded programming skills necessary to develop software that can exploit the complex information landscape of bioinformatics. Specific topics covered will include molecular biology basics, Unix/Linux shell programming, Perl and BioPerl, databases and using the Perl DBI, and data visualization.

Prerequisite(s): BIOI 3000 and CSCI 1620; or permission of instructor. CSCI 3320 is strongly recommended but not required.

BIOI 4500 INDEPENDENT STUDY (1-3 credits)

This course allows students to research a topic of their interest that is not available in a formal course. The topic to be studied must be agreed upon by the student and the instructor.

Prerequisite(s): Junior or Senior within the Bioinformatics undergraduate program. Not open to non-degree graduate students.

BIOI 4510 BIOINFORMATICS INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the Bioinformatics undergraduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s): Junior/Senior standing and permission of Director of the School of Interdisciplinary Informatics. Not open to non-degree graduate students.

BIOI 4860 BIOINFORMATICS ALGORITHMS (3 credits)

The main objective of this course is to provide an organized forum for students to understand the foundations of algorithmic design and analysis in the context of health and biological data. The course will present fundamental concepts in algorithms (exhaustive, greedy, graph, heuristic, and more) and explore how those concepts extend to bioinformatics and related fields, such as biomedical informatics, and health informatics. Students will learn about historical context of these algorithms and how they were pivotal in forming more complex modern approaches, and will explore advanced algorithms in their area of interest. Students will also exercise their programming skills with the opportunity to implement and apply bioinformatics algorithms to real data, so to better grasp the technical components of algorithmic design and analysis. (Cross-listed with BMI 8866).

Prerequisite(s): CSCI 3320 or permission of instructor. Prior completion of CSCI 4850 is strongly recommended but not required.

BIOI 4870 DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS (3 credits)

This required course for undergraduate bioinformatics majors provides foundational knowledge on database aspects used in the field and an overview of their applications in bioinformatics, biomedical informatics, and health/clinical informatics. The course begins with a brief review of key concepts in computational molecular biology related to database search/development, database management systems, the difference between primary and secondary databases, and bioinformatics-related aspects of modeling and theory in computer science. The major focus is on the multiple challenges and aspects of bio-database development, search, and pattern discovery. The course uses problem-based learning to help students develop database management skills as they apply to high throughput "-omics." data, the basics of data management, data provenance and governance, standards, and analysis through KDD-based workflows. This course will also consider the fundamentals of artificial intelligence and machine learning as they pertain to bioinformatics, from the perspective of database storage, I/O, and analysis. (Cross-listed with CSCI 8876).

Prerequisite(s): CSCI 4850 or permission of instructor. Not open to non-degree graduate students.

BIOI 4890 COMPUTERIZED GENETIC SEQUENCE ANALYSIS (3 credits)

The goal of this course is to introduce students to major topics in computerized analysis of genetic sequences. In particular the course will allow students to become familiar with the computational tools and software that aid in the modern molecular biology experiments and analysis of experimental results. Following the completion of this course, it is expected that the students will have a basic understanding of the theoretical foundations of the sequence analysis tools and develop competence in evaluating the output from these tools in a biological context. This course will emphasize hands-on experience with the programs for nucleotide and amino acid sequence analysis and molecular phylogeny. (Cross-listed with BMI 8896).

Prerequisite(s): Junior or senior-level standing in the Bioinformatics program or permission from the instructor.

BIOI 4950 SPECIAL TOPICS IN BIOINFORMATICS (3 credits)

This course is intended to provide a mechanism for offering instruction in subject areas that are not covered in other regularly scheduled courses. In general, courses offered under the BIOI 4950 designation will focus on evolving subject areas in bioinformatics.

Prerequisite(s): Prerequisites of a specific offering of BIOI 4950 will be determined by the supervising faculty member and identified in the course proposal. It is anticipated that permission of the faculty member teaching the course will be required for registration.

BIOI 4970 SENIOR PROJECT IN BIOINFORMATICS I (1 credit)

This course is the first part of a two-part series that allows students to work on a guided research project on a specific topic in bioinformatics. The goal of this course is for the student to decide on a research topic and to write a detailed proposal based on this topic that outlines the goals and objectives of the proposed research. The topic and proposal will be approved by the supervising faculty member.

Prerequisite(s): BIOI 4860 and BIOI 4870; BIOI 4860 or BIOI 4870 can be taken concurrently. Senior level status in the Bioinformatics program. Not open to non-degree students.

BIOI 4980 SENIOR PROJECT IN BIOINFORMATICS II (2 credits)

This course is the second part of a two-part series that allows the student to work on a guided research project on a specific topic in bioinformatics. The goal of this course is for the student to perform the research proposed in Part I of the course and to present the results of his or her work. Presentations will be made in the form of a report, written as a scientific research paper, and an oral defense.

Prerequisite(s): Junior or senior-level standing in the Bioinformatics program or permission from the instructor.

Cybersecurity

CYBR 1100 INTRODUCTION TO INFORMATION SECURITY (3 credits)

This course emphasizes our current dependence on information technology and how its security in cyberspace (or lack thereof) is shaping the global landscape. Several historical and contemporary global events that have been influenced by the exploitation of information technology motivates topics on cyber crime, malware, intrusion detection, cryptography, among others, and how to secure one's own data and computer system. Several aspects of this course are geared towards developing an understanding of the "cyberspace" as a new medium that breaks all geographical boundaries, while highlighting noticeable influences on it from social, political, economic and cultural factors of a geographical region.

Distribution: Global Diversity General Education course

CYBR 2250 LOW-LEVEL PROGRAMMING (3 credits)

This course will teach the cybersecurity (CYBR) students low-level programming in the 'C' and assembly languages, and the interrelationship between these two programming paradigms. The student will learn the various control structures in 'C' and how they are implemented in machine code, memory allocation and management, and the basics of allocation classes such as static versus automatic variables. The students will also learn assembly language in the 'C' environment and will be able to write useful, functional, stand-alone assembly language programs with no help from external libraries.

Prerequisite(s): CSCI 1620. Not open to non-degree graduate students.

CYBR 2600 SYSTEM ADMINISTRATION (3 credits)

This course covers topics a system administrator would encounter in their profession. The student will learn how a system administrator fulfills various computer management requirements using both Windows and Linux operating systems on both physical and virtual machines. Topics include installation, creating and maintaining file systems, user and group administration, backup and restore processes, network configuration, system services, virtualization, and security administration.

Prerequisite(s): CIST 1400 or CIST 1600 or Instructor Permission

CYBR 2980 SPECIAL TOPICS IN CYBERSECURITY (3 credits)

The course provides a format for exploring subject areas in Cybersecurity and related fields for sophomore undergraduate students. Specific topics vary, in keeping with research interests of faculty and students. Examples include network configuration, network security, forensics, regulatory compliance, web services and applications, vulnerability assessments, cloud computing security, and other issues in Cybersecurity.

Prerequisite(s): Instructor permission required. Not open to non-degree graduate students.

CYBR 3450 NATURAL LANGUAGE PROCESSING (3 credits)

The course will provide overview of the topics in natural language processing such as word and sentence tokenization, syntactic parsing, semantic role labeling, text classification. We will discuss fundamental algorithms and mathematical models for processing natural language, and how these can be used to solve practical problems. We will touch on such applications of natural language processing technology as information extraction and sentiment analysis. (Cross-listed with CSCI 3450).

Prerequisite(s): Prereq: CSCI 2030 with C- or better; Co-req: CSCI 3320 with C- or better; Students should be comfortable w/ scripting (Python is the language extensively used in natural language processing tools including NLTK). Not open to non-degree graduate students.

CYBR 3570 CRYPTOGRAPHY (3 credits)

The course will provide a broad overview of the concepts, fundamental ideas, vocabulary, and literature base central to the study and development of cryptography and cryptanalysis. This course will explore historical development of cryptography, as well as methods used to defeat it. In addition, the course will cover the mathematical foundations of cryptography today, as well as some current uses of such cryptography, such as public key infrastructures, the Internet Key Exchange protocol, and more.

Prerequisite(s): CSCI 3320 or ISQA 3300. Not open to non-degree graduate students.

CYBR 3600 INFORMATION SECURITY POLICY AND AWARENESS (3 credits)

This course will cover the planning and development for information governance, security policies and procedures, and security awareness.

Prerequisite(s): CIST 2100; CIST 3110, which may be taken concurrently.

CYBR 4360 PRINCIPLES OF SECURE SYSTEM DESIGN (3 credits)

Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 8366, CSCI 8366).

Prerequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CYBR 4380 DIGITAL FORENSICS (3 credits)

Digital forensics involves the preservation, identification, extraction, analysis and documentation of digital evidence stored on a variety of electronic devices. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a forensics investigation. Topics include: an introduction to digital forensics, data acquisition, first response, memory forensics, operating system forensics, and network forensics. Students will be required to perform several forensics analyses in a controlled lab environment, including acquiring forensically sound hard drive images, memory images and analyzing these using industry standard tools, such as Forensic Toolkit (FTK). The Digital Forensics class is designed for Cybersecurity, Computer Science and other qualified students to learn what actions are both appropriate and required for preserving, collecting and analyzing digital evidence in cases of intrusion, data theft or other cybercrimes. (Cross-listed with CSCI 4380).

Prerequisite(s): CYBR 3600 or CIST 3600; CSCI 3550 or ISQA 3400; CYBR 2600 or CYBR 3350 or CYBR 3370.

CYBR 4390 MOBILE DEVICE FORENSICS (3 credits)

Mobile device forensics is the science of recovering digital evidence from a mobile device under forensically sound conditions using accepted methods. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a mobile device forensics investigation. Topics include: an introduction to digital and mobile device forensics, mobile forensics standards, acquisition methods (manual, logical, physical and provider-side), Android and iOS filesystem analysis, decoding approaches, application data analysis, and report writing. Students will be required to perform several investigations in a controlled lab environment, including acquiring forensically sound evidence and analyzing these using industry standard tools. (Cross-listed with CYBR 8396).

Prerequisite(s): CYBR 4380/8386 - Computer and Network Forensics or Instructors Permission

CYBR 4430 QUANTUM COMPUTING AND CRYPTOGRAPHY (3 credits)

The course builds an understanding of exciting concepts behind quantum computing and quantum cryptography. In doing so it will introduce the principles of qubits, superposition, entanglement, teleportation, measurement, quantum error correction, quantum algorithms such as quantum Fourier transformation, Shor's algorithm and Grover's algorithm, quantum key exchange, quantum encryption, and secure quantum channels that are built using these principles. It will also discuss advantages of quantum computing and cryptography over classical computing and cryptography and limitations thereof. The students will come out with a working understanding of the field of quantum computing and quantum cryptography. During the course, students will also implement several of the quantum algorithms. (Cross-listed with CYBR 8436, CSCI 4430).

Prerequisite(s): Co-requisites: CYBR 3570 or CSCI 4560; or Instructor permission.

CYBR 4440 INDUSTRIAL CONTROL SYSTEM SECURITY (3 credits)

The objective of this course is to research vulnerabilities into, and provide guidance for securing, industrial control systems (ICS). ICS is a general term that encompasses several types of control systems, including supervisory control and data acquisition (SCADA) systems, distributed control systems (DCS), and other control system items such as Programmable Logic Controllers (PLC). The student will learn to identify network and device vulnerabilities and potential countermeasures to these weaknesses. (Cross-listed with CYBR 8446)

Prerequisite(s): CSCI 3550.

CYBR 4450 HOST-BASED VULNERABILITY DISCOVERY (3 credits)

The class will cover security issues at an implementation and hardware level. The students will learn assembly language and the use of a reverse assembler and debugger. This will allow the student to analyze various "packing" algorithms for computer viruses, the viruses themselves, operating system "hooking", "fuzzing", and other machine code, host-based exploits. The class will be using both Windows and Linux as operating systems. (Cross-listed with CYBR 8456.)

Prerequisite(s): CSCI 3710 and CYBR 2250

CYBR 4460 NETWORK-BASED VULNERABILITY DISCOVERY (3 credits)

The course is an advanced class in which the students learn various techniques for testing for and identifying security flaws in network software and web applications. Internet technologies such as HTTP, DNS, DHCP, and others are examined in the context of cyber security. Students are expected to participate in numerous hands-on experiments related to Information Assurance with respect to web technologies. (Cross-listed with CYBR 8466)

Prerequisite(s): CSCI 3550

CYBR 4540 COMPUTER SECURITY MANAGEMENT (3 credits)

The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST 4540, CYBR 8546, ISQA 8546)

Prerequisite(s): CYBR 4360 or permission of the instructor.

CYBR 4580 CYBERSECURITY CAPSTONE (3 credits)

In this course, students will extend and apply the knowledge they've accumulated in their undergraduate studies in the cybersecurity program. The capstone course facilitates project management and teamwork for students to define, implement, assess, and secure information systems. Implementation and assessment activities happen over a non-trivial, semester-long project, typically through a partnership with external stakeholders in the industry, academia, community organizations, or government. The projects are evaluated based on their effectiveness in meeting market or customer needs for assessment, certification, or development of secure systems.

Prerequisite(s): CYBR 2600; and CYBR 3600; and CYBR 4360; and CYBR 4460; and CYBR 4380 or CYBR 4450. Not open to non-degree graduate students.

CYBR 4950 INTERNSHIP IN CYBERSECURITY (1-3 credits)

The course provides a format for a student to work with a local or national industry partner in a cyber-security oriented position, and to receive credit for this practical experience. The internship may or may not be a paid position, but will definitely be directly related to the Cybersecurity degree program. The class is proposed and organized by the student, with participating faculty supervising and input provided by the industry partner.

Prerequisite(s): Instructor Permission

CYBR 4980 SPECIAL TOPICS IN CYBERSECURITY (3 credits)

The course provides a format for exploring advanced research areas for undergraduate and graduate students in Cybersecurity and related fields. Specific topics vary, in keeping with the research interests of faculty and students. Examples include applied data mining, mobile security, web services and applications, vulnerability assessments, cloud computing security, and other issues in Cybersecurity research. (Cross-listed with CYBR 8986)

Prerequisite(s): Instructor Permission.

CYBR 4990 INDEPENDENT STUDY IN CYBERSECURITY (1-3 credits)

The course provides a format for exploring advanced research areas for undergraduate students in Cybersecurity and related fields. The class is designed for students that would like to explore specific Cybersecurity topics at a greater depth, or topics which are not currently a part of the CYBR curriculum. The class is proposed and organized by the student, with participating faculty mentoring.

Prerequisite(s): Instructor Permission

Biomedical Informatics Concentration

Applied Computing and Informatics, Bachelor of Science - Biomedical Informatics Concentration Requirements

Bioinformatics, Bachelor of Science (College of Information Science & Technology)

The Bioinformatics program in the College of Information Science and Technology (IS&T) specifically equips students with a strong foundation in computer science, scripting/programming, algorithms,

database development, data management, and reproducible workflow implementation. In addition, fundamental courses in biology, genetics, molecular biology, chemistry, statistics, and discrete mathematics provide students with the ability to analyze and interpret many different types of data. The program curriculum is designed to meet the current demand for professionals equipped with bioinformatics computing skills. The national demand for bioinformatics professionals exceeds current supply, and individuals with the interdisciplinary training that a bioinformatics degree provides are in high demand.

Graduates of our IS&T Bioinformatics degree program go on to careers in software development and engineering, database development and implementation, and positions in the agricultural sector, among other career pathways; our graduates also pursue graduate research and other professional degrees, including medical school (with the addition of only a few courses). The interdisciplinary nature of our program also allows our graduates to transition easily into informatics-adjacent careers in health informatics, public health, and health information technology. Students also have the opportunity to take up to nine graduate credits toward a College of IS&T Master's degree in Biomedical Informatics through our Fast Track program.

Program Educational Objectives

The goals of the Bioinformatics program in the College of IS&T are stated as Program Educational Objectives (PEOs) and are based on the needs of the program's constituencies. PEOs describe the career and professional accomplishments that our program is preparing graduates to achieve.

Graduates of the UNO IS&T Bachelor of Science in Bioinformatics program will:

1. Prepare a portfolio demonstrating strong analytic, problem solving, and critical thinking skills.
2. Apply the scientific method to draw evidence-based conclusions in digital health and biosystems-related areas.
3. Demonstrate proficiency in communication of digital health and biosystems-related topics in both written and oral formats.
4. Exhibit commitment to strong ethical and moral standards in the field.
5. Demonstrate professional competency on current real-world digital health and biosystems-related perspectives.
6. Demonstrate ability to design, implement, deliver, and manage technical solutions to digital health and biosystems-related problems.
7. Apply skills such as reading primary literature, developing testable hypotheses, designing experiments, and analyzing algorithms.
8. Demonstrate proficiency in statistical and quantitative methods in the field.

Fast Track

The School of Interdisciplinary Informatics (SI2) has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate credit hours towards the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.

- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Contact

For more information, contact the College of IS&T Academic Advising Office at 402.554.3819.

Bioinformatics, Bachelor of Science in Bioinformatics Requirements

A minimum of 120 credit hours is required for a Bachelor of Science degree in Bioinformatics. Thirty of the last 36 hours must be University of Nebraska at Omaha courses. Registering for courses without having taken the stated prerequisites could result in administrative withdrawal.

To obtain a Bachelor of Science in Bioinformatics, a student must fulfill the University, College and Departmental requirements. Some courses may satisfy requirements in more than one area, but credit is awarded only once, thereby reducing the total number of credit hours for the degree to 120. (This total does not include prerequisites.)

¹ MATH 1950 - Satisfies General Education Quantitative Literacy requirement

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change.

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific degree program to determine all requirements for the program. In order to graduate on time (four years for an undergraduate degree), you need to take 30 credit hours each year.

Placement Exams: For Math, English, and Foreign Languages, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

Please note that transfer credit or placement exam scores may change a suggested plan of study.

Overview

Graduates of UNO's Bioinformatics (BIOI) program in the College of Information Science & Technology (IS&T) will be able to use their degree to investigate and apply technology to solve bioinformatics problems effectively. Due to a great demand for experts in bioinformatics, the job outlook for those with appropriate training is excellent. The Bioinformatics degree can also serve as a springboard to graduate work or other careers requiring informatics skills coupled with a biological background.

In Nebraska, many current careers in Bioinformatics are classified by the Nebraska Department of Labor as H3 jobs (High Wage, High Skill, High Demand). According to their website, "Occupations are high wage when at least half of their wage measures are at or above the regional average for all occupations. Occupations that require some college, no degree, or a higher level of educational attainment are high skill, as well as occupations that require a high school diploma or equivalent plus long-term on-the-job training, an apprenticeship, or internship/residency. The number of annual openings, net change in employment, and growth rate determine whether an occupation is high demand. An occupation must be High Wage, High Skill, and High Demand to be an H3 occupation."

Jobs in software development and engineering, biostatistics, and bioinformatics are all currently qualified as H3 jobs in Nebraska. Nationally, the need for people with degrees in Bioinformatics is even more apparent, with institutions such as the National Institutes of Health (NIH) integrating the large need for a trained and competent biomedical data science workforce as a central theme in their current strategic plan. The College of IS&T's Bioinformatics degree program is one of the only programs in the Midwest that provides this type of preparation at the undergraduate level.

Examples of careers for graduates of our undergraduate Bioinformatics degree program include:

- Bioinformatics Specialist *
- Statistician/Biostatistician*
- Software Application Developer*
- Bioinformatics Scientist/Analyst
- Scientific Curator
- Computational Biologist
- Database Programmer
- Database Administrator*
- Consultant
- Data Scientist/Wrangler
- Software Engineer
- Research Scientist*
- Biotech Entrepreneur

*Classified by the Nebraska Department of Labor as an H3 Career

Bioinformatics Curriculum Advisory Committee

The College of IS&T's Bioinformatics (BIOI) and Biomedical Informatics (BMI) faculty hosts an annual BIOI/BMI Curriculum Advisory Committee (CAC) meeting. The CAC is designed to involve alumni and community stakeholders from industry, academia, government, and non-profit organizations to aid the BIOI Undergraduate Program Committee (UPC), BMI Graduate Program Committee (GPC), and BMI Doctoral Program Committee (DPC) in decisions regarding curriculum for each committee's respective program. The CAC's objectives are:

- To review the program curriculum and provide recommendations on how to develop or change programs to address the needs of students in making them "workforce ready."

- To discuss opportunities and potential pathways for students to transition into the workforce through formal (internships, apprenticeships) and informal means.
- To provide input to curriculum committees on how to manage or improve student recruitment to our programs.
- To provide input to curriculum committees on how to manage or improve student retention in our programs.
- To support and encourage involvement of the Omaha metropolitan community in our BIOI/BMI programs.

BIOI 1000 DIGITAL HEALTH AND BIOLOGICAL SYSTEMS (3 credits)

This course is an introduction to how computing and technology can be applied to human health and biological systems in an interdisciplinary setting. Students will learn to discern between computing specializations such as bioinformatics and health informatics. The course will explore the application of computing to health, life sciences, and agriculture in both current and historical contexts, and how these applications impact society. Topics covered include bioinformatics, health informatics, user experience and design, data security and privacy, and more.

Distribution: Natural/Physical Science General Education course

BIOI 2000 FOUNDATIONS OF BIOINFORMATICS (3 credits)

Bioinformatics is a new scientific discipline that integrates mathematical and computational techniques with biological knowledge to develop and use computational tools to extract, organize and interpret information from genetic sequence data. The field is growing quickly due to rapid advances in sequencing and other biological techniques that allow the genomes of different organisms to be easily sequenced. This course provides an overview of the field and covers the chemical, biological, mathematical and computational foundations of bioinformatics upon which later courses will depend. In addition, it introduces problems of interest to bioinformaticians and the methods and tools used to address them.

Prerequisite(s): BIOI 1000 or BIOL 1450

BIOI 3000 APPLIED BIOINFORMATICS (3 credits)

This course will provide students with the practical skills needed for the analysis of -omics data. Topics covered will include biological databases, molecular biology tools (e.g., primer design, contig assembly), gene prediction and mining, database searches, genome comparison, sequence alignments, phylogenetic inference, gene expression data analyses, functional annotation of protein sequences, protein structure and modeling. Specialized software (e.g., Vector NTI) and widely used web-based computation tools (e.g., Entrez, BLAST, ClustalX, Phylip, PyMOL, and SwissPDBviewer) will be illustrated. Multiple approaches for solving particular problems will be presented.

Prerequisite(s): BIOI 2000 and CIST 1400; or permission of instructor.

BIOI 3500 ADVANCED BIOINFORMATICS PROGRAMMING (3 credits)

Because of the volume and complexity of biological data, advanced programming skills are required for researchers in order to get the most out of their data analyses. This course will provide the expanded programming skills necessary to develop software that can exploit the complex information landscape of bioinformatics. Specific topics covered will include molecular biology basics, Unix/Linux shell programming, Perl and BioPerl, databases and using the Perl DBI, and data visualization.

Prerequisite(s): BIOI 3000 and CSCI 1620; or permission of instructor. CSCI 3320 is strongly recommended but not required.

BIOI 4500 INDEPENDENT STUDY (1-3 credits)

This course allows students to research a topic of their interest that is not available in a formal course. The topic to be studied must be agreed upon by the student and the instructor.

Prerequisite(s): Junior or Senior within the Bioinformatics undergraduate program. Not open to non-degree graduate students.

BIOI 4510 BIOINFORMATICS INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the Bioinformatics undergraduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.
Prerequisite(s): Junior/Senior standing and permission of Director of the School of Interdisciplinary Informatics. Not open to non-degree graduate students.

BIOI 4860 BIOINFORMATICS ALGORITHMS (3 credits)

The main objective of this course is to provide an organized forum for students to understand the foundations of algorithmic design and analysis in the context of health and biological data. The course will present fundamental concepts in algorithms (exhaustive, greedy, graph, heuristic, and more) and explore how those concepts extend to bioinformatics and related fields, such as biomedical informatics, and health informatics. Students will learn about historical context of these algorithms and how they were pivotal in forming more complex modern approaches, and will explore advanced algorithms in their area of interest. Students will also exercise their programming skills with the opportunity to implement and apply bioinformatics algorithms to real data, so to better grasp the technical components of algorithmic design and analysis. (Cross-listed with BMI 8866).
Prerequisite(s): CSCI 3320 or permission of instructor. Prior completion of CSCI 4850 is strongly recommended but not required.

BIOI 4870 DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS (3 credits)

This required course for undergraduate bioinformatics majors provides foundational knowledge on database aspects used in the field and an overview of their applications in bioinformatics, biomedical informatics, and health/clinical informatics. The course begins with a brief review of key concepts in computational molecular biology related to database search/development, database management systems, the difference between primary and secondary databases, and bioinformatics-related aspects of modeling and theory in computer science. The major focus is on the multiple challenges and aspects of bio-database development, search, and pattern discovery. The course uses problem-based learning to help students develop database management skills as they apply to high throughput "omics." data, the basics of data management, data provenance and governance, standards, and analysis through KDD-based workflows. This course will also consider the fundamentals of artificial intelligence and machine learning as they pertain to bioinformatics, from the perspective of database storage, I/O, and analysis. (Cross-listed with CSCI 8876).
Prerequisite(s): CSCI 4850 or permission of instructor. Not open to non-degree graduate students.

BIOI 4890 COMPUTERIZED GENETIC SEQUENCE ANALYSIS (3 credits)

The goal of this course is to introduce students to major topics in computerized analysis of genetic sequences. In particular the course will allow students to become familiar with the computational tools and software that aid in the modern molecular biology experiments and analysis of experimental results. Following the completion of this course, it is expected that the students will have a basic understanding of the theoretical foundations of the sequence analysis tools and develop competence in evaluating the output from these tools in a biological context. This course will emphasize hands-on experience with the programs for nucleotide and amino acid sequence analysis and molecular phylogeny. (Cross-listed with BMI 8896).
Prerequisite(s): Junior or senior-level standing in the Bioinformatics program or permission from the instructor.

BIOI 4950 SPECIAL TOPICS IN BIOINFORMATICS (3 credits)

This course is intended to provide a mechanism for offering instruction in subject areas that are not covered in other regularly scheduled courses. In general, courses offered under the BIOI 4950 designation will focus on evolving subject areas in bioinformatics.
Prerequisite(s): Prerequisites of a specific offering of BIOI 4950 will be determined by the supervising faculty member and identified in the course proposal. It is anticipated that permission of the faculty member teaching the course will be required for registration.

BIOI 4970 SENIOR PROJECT IN BIOINFORMATICS I (1 credit)

This course is the first part of a two-part series that allows students to work on a guided research project on a specific topic in bioinformatics. The goal of this course is for the student to decide on a research topic and to write a detailed proposal based on this topic that outlines the goals and objectives of the proposed research. The topic and proposal will be approved by the supervising faculty member.
Prerequisite(s): BIOI 4860 and BIOI 4870; BIOI 4860 or BIOI 4870 can be taken concurrently. Senior level status in the Bioinformatics program. Not open to non-degree students.

BIOI 4980 SENIOR PROJECT IN BIOINFORMATICS II (2 credits)

This course is the second part of a two-part series that allows the student to work on a guided research project on a specific topic in bioinformatics. The goal of this course is for the student to perform the research proposed in Part I of the course and to present the results of his or her work. Presentations will be made in the form of a report, written as a scientific research paper, and an oral defense.
Prerequisite(s): Junior or senior-level standing in the Bioinformatics program or permission from the instructor.

Bioinformatics Minor
 Bioinformatics Minor
 Requirements

Bioinformatics is a rapidly expanding interdisciplinary field focused on collecting, processing, and analyzing vast amounts of biological and biomedical data, and it has become an indispensable component of biomedical research. The Minor in Bioinformatics offers an opportunity for students majoring in other disciplines to acquire the foundations of the field and add in-demand skills to their portfolio.

Students are responsible for completing the prerequisites for all courses taken for the Bioinformatics minor.

Cybersecurity, Bachelor of Science

Bachelor of Science in Cybersecurity

Cybersecurity (CYBR) is an emerging, rapidly expanding science that addresses problems in the fundamental understanding of the design, development, implementation and lifecycle support of secure information systems. The need for secure information systems has become a paramount concern as the computer-enabled, internet-connected, digital-based global society of the 21st century continues to emerge. The lack of adequately secure information systems has been cited as one of the likely impediments to the emergence of the digital society.

Fast Track

The School of Interdisciplinary Informatics (SI2) has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate credit hours towards the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.

- Admission to Fast Track does NOT guarantee admission to the graduate program.
- The admit term must be after the completion term of the undergraduate degree.

#Elective hours as required to reach a total of 120 hours

Cyber Operations Designation (Optional)

The University of Nebraska at Omaha's undergraduate Cybersecurity degree program is one of the few National Security Agency (NSA) certified National Centers of Academic Excellence in Cyber Operations (CAE-CO). As a result, UNO's College of Information Science and Technology (IS&T) is able to offer undergraduate students majoring in Cybersecurity the option to pursue a specialized Cyber Operations (CO) designation and complete the requirements set out by the NSA's CAE-CO program. Students already enrolled in the Bachelor of Science in Cybersecurity degree program have very few additional requirements to meet in order to complete the Cyber Operations designation:

- CSCI 3660 Theory of Computation *
- PSCI 4260 International Law*
- CYBR 8420 Software Assurance **

*These courses also apply towards the Cybersecurity extension requirements.

**Graduate level courses required for Cyber Operations designation. Graduate level courses can be taken with special permission.

Minor Offered

- Cybersecurity Minor (p. 864)

Cybersecurity, Bachelor of Science in Cybersecurity Four Year Plan

First Year

Fall		Credits
ENGL 1150	ENGLISH COMPOSITION I	3

¹ MATH 1950 - Satisfies General Education Quantitative Literacy requirement

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change.

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific degree program to determine all requirements for the program. In order to graduate on time (four years for an undergraduate degree), you need to take 30 credit hours each year.

Placement Exams: For Math, English, and Foreign Languages, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

Please note that transfer credit or placement exam scores may change a suggested plan of study.

CYBR 1100 INTRODUCTION TO INFORMATION SECURITY (3 credits)

This course emphasizes our current dependence on information technology and how its security in cyberspace (or lack thereof) is shaping the global landscape. Several historical and contemporary global events that have been influenced by the exploitation of information technology motivates topics on cyber crime, malware, intrusion detection, cryptography, among others, and how to secure one's own data and computer system. Several aspects of this course are geared towards developing an understanding of the "cyberspace" as a new medium that breaks all geographical boundaries, while highlighting noticeable influences on it from social, political, economic and cultural factors of a geographical region.

Distribution: Global Diversity General Education course

CYBR 2250 LOW-LEVEL PROGRAMMING (3 credits)

This course will teach the cybersecurity (CYBR) students low-level programming in the 'C' and assembly languages, and the interrelationship between these two programming paradigms. The student will learn the various control structures in 'C' and how they are implemented in machine code, memory allocation and management, and the basics of allocation classes such as static versus automatic variables. The students will also learn assembly language in the 'C' environment and will be able to write useful, functional, stand-alone assembly language programs with no help from external libraries.

Prerequisite(s): CSCI 1620. Not open to non-degree graduate students.

CYBR 2600 SYSTEM ADMINISTRATION (3 credits)

This course covers topics a system administrator would encounter in their profession. The student will learn how a system administrator fulfills various computer management requirements using both Windows and Linux operating systems on both physical and virtual machines. Topics include installation, creating and maintaining file systems, user and group administration, backup and restore processes, network configuration, system services, virtualization, and security administration.

Prerequisite(s): CIST 1400 or CIST 1600 or Instructor Permission

CYBR 2980 SPECIAL TOPICS IN CYBERSECURITY (3 credits)

The course provides a format for exploring subject areas in Cybersecurity and related fields for sophomore undergraduate students. Specific topics vary, in keeping with research interests of faculty and students. Examples include network configuration, network security, forensics, regulatory compliance, web services and applications, vulnerability assessments, cloud computing security, and other issues in Cybersecurity.

Prerequisite(s): Instructor permission required. Not open to non-degree graduate students.

CYBR 3450 NATURAL LANGUAGE PROCESSING (3 credits)

The course will provide overview of the topics in natural language processing such as word and sentence tokenization, syntactic parsing, semantic role labeling, text classification. We will discuss fundamental algorithms and mathematical models for processing natural language, and how these can be used to solve practical problems. We will touch on such applications of natural language processing technology as information extraction and sentiment analysis. (Cross-listed with CSCI 3450).

Prerequisite(s): Prereq: CSCI 2030 with C- or better; Co-req: CSCI 3320 with C- or better; Students should be comfortable w/ scripting (Python is the language extensively used in natural language processing tools including NLTK). Not open to non-degree graduate students.

CYBR 3570 CRYPTOGRAPHY (3 credits)

The course will provide a broad overview of the concepts, fundamental ideas, vocabulary, and literature base central to the study and development of cryptography and cryptanalysis. This course will explore historical development of cryptography, as well as methods used to defeat it. In addition, the course will cover the mathematical foundations of cryptography today, as well as some current uses of such cryptography, such as public key infrastructures, the Internet Key Exchange protocol, and more.

Prerequisite(s): CSCI 3320 or ISQA 3300. Not open to non-degree graduate students.

CYBR 3600 INFORMATION SECURITY POLICY AND AWARENESS (3 credits)

This course will cover the planning and development for information governance, security policies and procedures, and security awareness.

Prerequisite(s): CIST 2100; CIST 3110, which may be taken concurrently.

CYBR 4360 PRINCIPLES OF SECURE SYSTEM DESIGN (3 credits)

Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 8366, CSCI 8366).

Prerequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CYBR 4380 DIGITAL FORENSICS (3 credits)

Digital forensics involves the preservation, identification, extraction, analysis and documentation of digital evidence stored on a variety of electronic devices. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a forensics investigation. Topics include: an introduction to digital forensics, data acquisition, first response, memory forensics, operating system forensics, and network forensics. Students will be required to perform several forensics analyses in a controlled lab environment, including acquiring forensically sound hard drive images, memory images and analyzing these using industry standard tools, such as Forensic Toolkit (FTK). The Digital Forensics class is designed for Cybersecurity, Computer Science and other qualified students to learn what actions are both appropriate and required for preserving, collecting and analyzing digital evidence in cases of intrusion, data theft or other cybercrimes. (Cross-listed with CSCI 4380).

Prerequisite(s): CYBR 3600 or CIST 3600; CSCI 3550 or ISQA 3400; CYBR 2600 or CYBR 3350 or CYBR 3370.

CYBR 4390 MOBILE DEVICE FORENSICS (3 credits)

Mobile device forensics is the science of recovering digital evidence from a mobile device under forensically sound conditions using accepted methods. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a mobile device forensics investigation. Topics include: an introduction to digital and mobile device forensics, mobile forensics standards, acquisition methods (manual, logical, physical and provider-side), Android and iOS filesystem analysis, decoding approaches, application data analysis, and report writing. Students will be required to perform several investigations in a controlled lab environment, including acquiring forensically sound evidence and analyzing these using industry standard tools. (Cross-listed with CYBR 8396).

Prerequisite(s): CYBR 4380/8386 - Computer and Network Forensics or Instructors Permission

CYBR 4430 QUANTUM COMPUTING AND CRYPTOGRAPHY (3 credits)

The course builds an understanding of exciting concepts behind quantum computing and quantum cryptography. In doing so it will introduce the principles of qubits, superposition, entanglement, teleportation, measurement, quantum error correction, quantum algorithms such as quantum Fourier transformation, Shor's algorithm and Grover's algorithm, quantum key exchange, quantum encryption, and secure quantum channels that are built using these principles. It will also discuss advantages of quantum computing and cryptography over classical computing and cryptography and limitations thereof. The students will come out with a working understanding of the field of quantum computing and quantum cryptography. During the course, students will also implement several of the quantum algorithms. (Cross-listed with CYBR 8436, CSCI 4430).

Prerequisite(s): Co-requisites: CYBR 3570 or CSCI 4560; or Instructor permission.

CYBR 4440 INDUSTRIAL CONTROL SYSTEM SECURITY (3 credits)

The objective of this course is to research vulnerabilities into, and provide guidance for securing, industrial control systems (ICS). ICS is a general term that encompasses several types of control systems, including supervisory control and data acquisition (SCADA) systems, distributed control systems (DCS), and other control system items such as Programmable Logic Controllers (PLC). The student will learn to identify network and device vulnerabilities and potential countermeasures to these weaknesses. (Cross-listed with CYBR 8446)

Prerequisite(s): CSCI 3550.

CYBR 4450 HOST-BASED VULNERABILITY DISCOVERY (3 credits)

The class will cover security issues at an implementation and hardware level. The students will learn assembly language and the use of a reverse assembler and debugger. This will allow the student to analyze various "packing" algorithms for computer viruses, the viruses themselves, operating system "hooking", "fuzzing", and other machine code, host-based exploits. The class will be using both Windows and Linux as operating systems. (Cross-listed with CYBR 8456.)

Prerequisite(s): CSCI 3710 and CYBR 2250

CYBR 4460 NETWORK-BASED VULNERABILITY DISCOVERY (3 credits)

The course is an advanced class in which the students learn various techniques for testing for and identifying security flaws in network software and web applications. Internet technologies such as HTTP, DNS, DHCP, and others are examined in the context of cyber security. Students are expected to participate in numerous hands-on experiments related to Information Assurance with respect to web technologies. (Cross-listed with CYBR 8466)

Prerequisite(s): CSCI 3550

CYBR 4540 COMPUTER SECURITY MANAGEMENT (3 credits)

The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST 4540, CYBR 8546, ISQA 8546)

Prerequisite(s): CYBR 4360 or permission of the instructor.

CYBR 4580 CYBERSECURITY CAPSTONE (3 credits)

In this course, students will extend and apply the knowledge they've accumulated in their undergraduate studies in the cybersecurity program. The capstone course facilitates project management and teamwork for students to define, implement, assess, and secure information systems. Implementation and assessment activities happen over a non-trivial, semester-long project, typically through a partnership with external stakeholders in the industry, academia, community organizations, or government. The projects are evaluated based on their effectiveness in meeting market or customer needs for assessment, certification, or development of secure systems.

Prerequisite(s): CYBR 2600; and CYBR 3600; and CYBR 4360; and CYBR 4460; and CYBR 4380 or CYBR 4450. Not open to non-degree graduate students.

CYBR 4950 INTERNSHIP IN CYBERSECURITY (1-3 credits)

The course provides a format for a student to work with a local or national industry partner in a cyber-security oriented position, and to receive credit for this practical experience. The internship may or may not be a paid position, but will definitely be directly related to the Cybersecurity degree program. The class is proposed and organized by the student, with participating faculty supervising and input provided by the industry partner.

Prerequisite(s): Instructor Permission

CYBR 4980 SPECIAL TOPICS IN CYBERSECURITY (3 credits)

The course provides a format for exploring advanced research areas for undergraduate and graduate students in Cybersecurity and related fields. Specific topics vary, in keeping with the research interests of faculty and students. Examples include applied data mining, mobile security, web services and applications, vulnerability assessments, cloud computing security, and other issues in Cybersecurity research. (Cross-listed with CYBR 8986)

Prerequisite(s): Instructor Permission.

CYBR 4990 INDEPENDENT STUDY IN CYBERSECURITY (1-3 credits)

The course provides a format for exploring advanced research areas for undergraduate students in Cybersecurity and related fields. The class is designed for students that would like to explore specific Cybersecurity topics at a greater depth, or topics which are not currently a part of the CYBR curriculum. The class is proposed and organized by the student, with participating faculty mentoring.

Prerequisite(s): Instructor Permission

Applied Computing and Informatics, Bachelor of Science

Applied Computing and Informatics Program (ACMP)

The Applied Computing and Informatics (ACMP) program is tailored for those who aspire to make a difference with computing in a range of domain areas from web development to healthcare to game design. Enrolling in ACMP is a choice to focus less on theory and more on solving real-world challenges. Our curriculum is designed to immerse students in the core areas of data analytics, software development, and user experience design, ensuring that the solutions developed are not only technologically advanced but also user-centric and engaging.

Pathways for Specialization

Design and Innovation: This pathway is ideal for students with a passion for creating aesthetically pleasing and functional technological solutions. It emphasizes the importance of understanding user needs and incorporates

principles of startup thinking into the design process, preparing students to become pioneers in technological innovation.

Biomedical Informatics: Tailored for students interested in the intersection of computing and healthcare, this pathway focuses on applying informatics principles to biomedicine and healthcare challenges, equipping students with the skills needed to make significant contributions to medical advancements and patient care.

Fast Track

The School of Interdisciplinary Informatics (SI2) has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate credit hours towards the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Applied Computing and Informatics, Bachelor of Science Requirements

A minimum of 120 credit hours is required for a Bachelor of Science degree in applied Computing and Informatics. Thirty of the last 36 hours must be University of Nebraska at Omaha (UNO) courses. Registering for courses without having taken the stated prerequisites could result in administrative withdrawal.

To obtain a Bachelor of Science degree in Applied Computing and Informatics, a student must fulfill the university, college and departmental requirements. Some courses may satisfy requirements in more than one area, but credit is awarded only once, thereby reducing the total number of credit hours for the degree to 120. (This total does not include prerequisites.)

Applied Computing and Informatics (ACMP)

ACMP 1010 ACTIVATING INNOVATION IN SOCIETY (3 credits)

This course surveys and applies the use of qualitative methods, especially interview-based research, in order to maximize the insight that informs and activates the innovation process, with emphasis on technological innovation.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

ACMP 1110 INTRODUCTION TO IT INNOVATION (3 credits)

In almost every modern human endeavor, creativity and Information Technology are essential. In the Internet age, information has become a commodity that is available to everyone. Similarly, current technology has largely become commoditized. Therefore, creating new value is becoming the basis for successful professionals. This course introduces students to tools, techniques, and methods for generating innovative information technology ideas and solutions. It teaches them to think about future possibilities and equips them with the ability to critically evaluate proposed innovations and ideas. The goal of the course is to increase students' ability to creatively solve challenging problems in new ways using information technology. This class is inherently interdisciplinary as IT now touches every aspect of modern academic pursuits.

Prerequisite(s): Not open to non-degree graduate students.

ACMP 2150 AUDIO FOR MULTIMEDIA (3 credits)

This course provides an overview of audio production techniques as they pertain to multimedia.

Prerequisite(s): Not open to non-degree graduate students.

ACMP 2220 APPLIED IT INNOVATION (3 credits)

The course extends the concepts learned in the Introduction to IT Innovation course and focuses on market dynamics and monetizing innovations. It moves past idea generation and focuses on identifying and gathering resources, innovation implementation, sustainable innovation models and how ideas can be monetized. The goal is for students to take their original ideas from concept to initial implementation with thoughts towards commercialization. Upon completing the course, students will have created at least a rudimentary implementation of an original idea and have a defensible plan for how the idea can be monetized.

Prerequisite(s): ACMP 1110/ITIN 1110 & CIST 1400. Not open to non-degree graduate students.

ACMP 2990 IT INNOVATION SYMPOSIUM (1 credit)

The seminar exposes students to information technology innovators from multiple industries and varied backgrounds. It teaches the practical aspects of IT Innovation from those that have done it and are doing it in both research and practice. The purpose is to cause students to reflect on applying innovation to the real-world, connect them to the innovation community and to equip them with best practices and tools to make their innovations a reality.

Prerequisite(s): Enrollment in the IT Innovation Major or IT Innovation Minor. Not open to non-degree graduate students.

ACMP 3100 MUSIC INFORMATICS (3 credits)

Surveys the use of digital music data in the study, composition, performance, analysis, storage, and dissemination of music. Various computational approaches and technologies in music informatics including music information retrieval will be explored and implemented by students. (Cross-listed with MUS 3100).

Prerequisite(s): Successful completion of one of the following three courses satisfies the prerequisite requirement: CIST 1300 or MUS 3170 or MUS 3180. Not open to non-degree graduate students.

ACMP 3180 ELECTRONIC MUSIC PRODUCTION (3 credits)

An exploration of the potentials of electronic music. Concepts of electronic music are presented through the use of a computer, software, and appropriate hardware. Students create assignments that demonstrate the application of basic techniques. (Cross-listed with MUS 3180).

ACMP 3330 PRODUCT DESIGN AND DEVELOPMENT (3 credits)

This course will cover elements and principles of excellent product design and development. The history of design will be reviewed and overarching tenets of design will be introduced. The course will particularly focus on innovation and students will be expected to develop an original concept and create quality designs and low-fidelity prototype implementations of their unique idea. The proposed solutions must be novel and meet a real-world market need. This course will be hands-on and will examine developmental models for innovation.

Prerequisite(s): ACMP 2220/ITIN 2220. Not open to non-degree graduate students.

ACMP 4000 SPECIAL TOPICS IN IT INNOVATION (3 credits)

This course is designed to acquaint students with issues which are current to the field or emerging trends in the IT Innovation area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ACMP 8006).

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ACMP 4090 MANAGING COLLABORATIVE ENGAGEMENT (3 credits)

This course will provide students with the opportunity to develop knowledge and strategies for leading teams, enhancing collaboration, building consensus, problem solving in teams, facilitating group processes, and designing collaborative workspaces. (Cross-listed with BSAD 8096, MGMT 4090, SCMT 4090).

Prerequisite(s): Junior standing or permission of instructor.

ACMP 4260 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, CSCI 8266, ACMP 8266).

Prerequisite(s): Required: C- or better in CIST 2500 and junior standing, or by permission of instructor. Recommended: C- or better in CSCI 4250 or ACMP 3330/ITIN 3330.

ACMP 4440 AGILE DEVELOPMENT METHODS (3 credits)

The course presents an introduction to agile development methods for IT application development. Students will also learn Unified Modeling Techniques as they go through the agile iterations. This course is a foundation course for the IT Innovation capstone course.

Prerequisite(s): CSCI 4850 or ISQA 3310. Not open to non-degree graduate students.

ACMP 4500 INDEPENDENT STUDIES (1-3 credits)

A variable credit course for the junior or senior who will benefit from independent reading assignments and research type problems. Independent study makes available courses of study not available in scheduled course offerings. The student wishing to take an independent study course should find a faculty member willing to supervise the course and then submit, for approval, a written proposal (including amount of credit) to the IT Innovation Undergraduate Program Committee at least three weeks prior to registration.

Prerequisite(s): Written permission required.

ACMP 4510 INFORMATION TECHNOLOGY INNOVATION INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the ITIN undergraduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by professionals in the workplace.

Prerequisite(s): Junior/Senior standing and permission of School of interdisciplinary Informatics Director. Not open to non-degree graduate students.

ACMP 4720 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation. Concepts and techniques in innovation, entrepreneurship, and strategy will be used to aid students in the venture creation process. Important considerations impacting the viability of the venture post formation will also be explored. Practical real-world experimentation is the central component of the course and will help students to conceive, develop, and launch their own innovative ventures. (Cross-listed with BSAD 8726, ENTR 4720, ACMP 8256, MGMT 4720, MKT 4720).

Prerequisite(s): ACMP 1110/ITIN 1110 and junior standing or above or by instructor permission.

ACMP 4880 SYSTEMS SIMULATION AND MODELING (3 credits)

The course provides an introduction to the modeling and simulation with special emphasis on decision-theoretic models and rational decision-making. The ability to make good decisions is key to individuals and organizations and studying, understanding and improving decisions is vital to success. Students are given a background into systematic decision-making processes, and then are introduced to formal methods for decision modeling and analysis. Building on these foundational models, students learn how to perform process modeling and optimization. Finally, the course concludes with a look at psychological biases and traps that may affect decision-makers. (Cross-listed with ISQA 4880).

Prerequisite(s): CIST 1400, CIST 2500, or equivalent.

ACMP 4980 APPLIED COMPUTING AND INFORMATICS CAPSTONE PROJECT I (3 credits)

This course serves as Part 1 of the capstone project for the Applied Computing and Informatics program. As such the student will design a prototype of an IT product or service as well as a business case pertaining to what is required to launch their project commercially. This effort will be under the guidance of an advisory committee.

Prerequisite(s): ACMP 4440/ITIN 4440. ACMP 4980 is for seniors in the BS in Applied Computing & Informatics degree. Before enrolling in ACMP 4980 student must gain approval from the ACMP Program Committee, of their Emphasis Area. Not open to non-degree graduate students.

ACMP 4990 APPLIED COMPUTING AND INFORMATICS CAPSTONE PROJECT PART II (3 credits)

This course serves as Part 2 of the capstone project for the Information Technology Innovation program. Following the designs and business plan developed in Part I ACMP 4980, the student will create a prototype of an IT product or service as well as refine and implement the required business aspects involved in launching their project commercially. This effort will be under the guidance of an advisory committee.

Prerequisite(s): ACMP 4980/ITIN 4980. This course is for seniors who are enrolled in the BS in Applied Computing and Informatics degree. Not open to non-degree graduate students.

Applied Computing and Informatics Minor

Applied Computing and Informatics Minor Requirements

The objective of the Applied Computing and Informatics minor is to provide students with a substantive qualification in information technology to augment their respective major and allow them to be even more innovative as to the application of Applied Computing and Informatics to their learning and career choices.

The Applied Computing and Informatics minor will serve all students that have a desire to pursue their academic major and wish to supplement it with an innovative approach of Applied Computing and Informatics to that major.

A minor may be earned by completing the following 18 hours:

Code	Title	Credits
All of the following		9
ACMP 1010	HUMAN-CENTERED COMPUTING	
ACMP 2220	CREATIVITY AND INNOVATION	
CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I	
or CIST 1600	INTRODUCTION TO PROGRAMMING USING PRACTICAL SCRIPTING	
Select 9 hours of 3000 level or above from the following		9
CIST 3110	INFORMATION TECHNOLOGY ETHICS	
ACMP 3330	DESIGN METHODS AND PROTOTYPING	
ART 3140	COMPUTER-GENERATED IMAGERY (CGI) I: INTERACTIVE 3D VIRTUAL SPACES	
ART 3150	VIDEO ART	
ART 3160	GAME DESIGN AS ART	
ART 3170	DIGITAL GAME DESIGN	
ART 4180	ADVANCED DIGITAL GAME DESIGN	
ACMP 4260	USER EXPERIENCE DESIGN	
ISQA 3310	MANAGING THE DATABASE ENVIRONMENT	
ISQA 3400	INFORMATION TECHNOLOGY INFRASTRUCTURE	
or CSCI 3550	COMMUNICATION NETWORKS	
ISQA 3520	GRAPHICAL USER INTERFACE DESIGN	
ENTR 3710	ENTREPRENEURIAL FOUNDATIONS	
MUS 3170	EXPLORING MUSIC TECHNOLOGY	
MUS 4200	AUDIO RECORDING TECHNIQUES I	
MUS 4210	AUDIO RECORDING TECHNIQUES II	

We encourage Applied Computing and Informatics students to think broadly. The courses listed above are recommendations for completing the minor; other courses tailored to your individual program of study can be approved with permission of the ACMP Program Committee.

College of Public Affairs and Community Service

Mission

The College of Public Affairs and Community Service (CPACS) was established in 1973 to ensure university responsiveness to the critical social needs of the community and state. The college was charged with the mission of providing educational programs of the highest caliber to prepare students for leadership in public service and reaching out to the community to help solve public problems.

The mission of the College of Public Affairs and Community Service is to:

1. Foster a learning environment in which undergraduate students, graduate students, adult learners and both traditional and nontraditional students can gain a comprehensive and quality education helpful in preparing for careers in their respective fields;
2. Conduct research, especially as it relates to concerns of local and statewide constituencies; and,
3. Offer professional services to the community, including continuing education opportunities designed to further personal, professional, organizational, and community improvement goals.

General Information

The College of Public Affairs and Community Service (CPACS) offers undergraduate coursework leading to the Bachelor of Science Degree in aviation, criminology and criminal justice, gerontology, social work, and emergency management. The Division of Continuing Studies administers the Bachelor of Multidisciplinary Studies (BMS) Degree. In addition to its undergraduate degree programs, CPACS offers courses in urban studies, nonprofit management, and public administration; the Goodrich Scholarship Program, a specialized program for students with marked financial need; and particular areas of independent study developed in conjunction with other UNO colleges or governmental units.

The College of Public Affairs and Community Service strives to make available to students an interdisciplinary education based on classroom learning, research, and community service. Students are expected to participate in each of these activities.

Goodrich Scholarship Program

The Goodrich Scholarship Program is designed to provide scholarship funds and supportive services for students with financial need. The overall intent of the program is to provide a college education for persons who might otherwise find college difficult to afford, while offering them a broad and meaningful experience in general education. The program has a three-pronged approach. It provides 1) financial aid in the form of tuition and general fees toward a bachelor's degree; 2) a specialized curriculum emphasizing the humanities and the social sciences via a multicultural perspective; and, 3) a comprehensive program of academic and non-academic student services support.

Admission to the Goodrich Scholarship Program

A composite of selection criteria is used to evaluate both merit and financial need. Criteria include the individual's application data, financial analysis, academic record, in-person interview, personal life-experience essay, and references. For more information, contact the Goodrich Scholarship Program:

Goodrich Scholarship Program
123 College of Public Affairs and Community Service
University of Nebraska at Omaha
6001 Dodge Street
Omaha, NE 68182
Phone – 402.554.2274

Website (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/goodrich-scholarship-program/>)

Center for Public Affairs Research

The Center for Public Affairs Research collaboratively produces and disseminates high-quality public scholarship about topics that impact the lives of Nebraskans. Ongoing projects from CPAR, include policy analyses for the Planning Committee of the Nebraska State Legislature, the Nebraska Rural Transit Project, governing.unomaha.edu, and designation by the U.S. Census Bureau as a statewide liaison for disseminating a range of data products. To learn more about CPAR and access many of our data resources go to cpar.unomaha.edu (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/center-for-public-affairs-research/>).

The William Brennan Institute for Labor Studies

The William Brennan Institute for Labor Studies provides relevant and timely education for Nebraska wage earners, union leaders, labor organizations,

and citizens to help attain the American Dream for all. Through non-credit educational instruction, wage earners gain knowledge and skills to be effective leaders in a democratic labor movement in a democratic society.

University Honors Program

The University Honors Program provides expanded educational opportunities for highly motivated students who have demonstrated outstanding academic achievement. Students entering or enrolled in any CPACS undergraduate program may apply for membership in UNO's Honors Program. For more information, contact the CPACS Honors Coordinator in the CPACS Dean's Office or a CPACS academic advisor.

Dean's List

Students enrolled in the College of Public Affairs and Community Service who maintain a GPA of 3.5 or better while carrying 12 hours or more of graded course work will earn the distinction of being placed on the Dean's Honor List at the end of each semester. Part-time students must earn a GPA of 3.5 or better for courses taken at UNO on a continuous part-time basis. These students may be placed on the Dean's List when they complete course work in 12 semester hour blocks at UNO (i.e., 12, 24, 48, etc.). Continuous part-time basis is defined as taking one or more courses totaling 1-11 semester hours during each fall and spring semester each academic year.

Accreditation Information

Major	Degree	Accreditation Body
Aviation: Specialization in Air Transport Administration	BS	Aviation Accreditation Board, International (AABI)
Public Administration	MPA	Network of Schools of Public Policy, Affairs and Administration (NASPAA)
Social Work	BSSW MSW	Council on Social Work Education (CSWE)

Choice of Catalog Policy

A student registering in the College of Public Affairs and Community Service for the first time may, except for the limitations described below, complete work for the degree according to the requirements of the catalog in effect the year the student enters the college or the catalog current at the time the student applies for the degree.

Students entering the college for the first time in the summer will be subject to the catalog for the academic year immediately following. Failure to complete the requirements for the degree within seven years after the date the student first enters the college will subject the student to graduation under the requirements of a later catalog to be approved by the Dean. CPACS reserves the right to institute and make effective, after due notice, during the course of a student's work toward a degree, any new ruling which may be necessary for the general good of the college and to substitute courses currently offered for those no longer offered. Contact a DCS academic advisor for Bachelor of Multidisciplinary Studies Degree catalog information.

Fax – 402.554.4871

College Website (<http://cpacs.unomaha.edu>)

Admission to the College of Public Affairs and Community Service

Students who have been admitted to the University of Nebraska at Omaha may apply for admission into the College of Public Affairs and Community Service by indicating their preference in the appropriate place on the university application for admission. Refer to the section "Division of Continuing Studies" for DCS and Bachelor of Multidisciplinary Studies Degree admission requirements.

Students who wish to transfer into CPACS from another college or school within UNO must request permission from the department offering the student's intended major.

A minimum cumulative grade point average (GPA) of 2.5 is required to transfer into CPACS.

The College of Public Affairs and Community Service does not accept undeclared students. Exceptions to this rule are made when the student can demonstrate (by written request) substantial reasons for the undeclared status. Permission is granted by the CPACS Dean.

Academic Requirements for the College Degrees

Number of Hours to Graduate

Each candidate must present a total of at least 120 credit hours of college credit to meet graduation requirements.

Minimum GPA/Additional Requirements

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 35)

College Requirements, BA/BS Requirements Major Field

Each student must present a major including at least 15 credit hours of upper division work designated as appropriate by the faculty of the department in which enrolled. A candidate meeting the requirements of each of two fields may present a double major in these fields. Individual departments should be consulted for the number of upper division hours required.

Requirements for the Bachelor of Multidisciplinary Studies Degree

Refer to the section "Division of Continuing Studies" for Bachelor of Multidisciplinary Studies (BMS) Degree requirements.

Prerequisite Courses

Completion of a course within the major with a grade below a "C-" will not be considered as having fulfilled prerequisite requirements for additional courses taken in the major field of study. A higher grade may be designated by the department/unit.

General Education Requirements

All students in a CPACS degree program must meet the university general education requirements. Certain majors/programs in the College of Public Affairs and Community Service require specific foundational coursework that may also count for general education requirements. For more information on the foundational coursework, contact the department academic advisor.

Transfer Credit Policy

All questions concerning the acceptability or transferability of credits earned at other institutions or via programs such as cooperative education and credit by examination should be directed to the department in which enrolled. Credit earned in courses below the 1000 level may not be applied toward the degree offered by the College of Public Affairs and Community Service.

Unacceptable Credits

Remedial, developmental, or technical coursework may not be used toward the fulfillment of the 120 credit hour requirement.

Courses taken at a community college that are upper-division level courses in the College of Public Affairs and Community Service may not be counted as equivalent to upper-division College of Public Affairs and Community Service courses. At the discretion of the advisor and the department, these courses may be used toward required or elective coursework but may not be used to meet upper-division requirements.

Technical credit may be awarded to students in the Division of Continuing Studies. Please see a DCS academic advisor for more information.

Retroactive Credit Policy

<https://nextcatalog.unomaha.edu/undergraduate/transfer-credit/> (p. 33)

Advanced Placement Credits

<https://nextcatalog.unomaha.edu/undergraduate/transfer-credit/> (p. 33)

Military Credit

<https://nextcatalog.unomaha.edu/undergraduate/transfer-credit/> (p. 33)

IB Credit

Placement Exams and Credit by Examinations Policies/Practices

<https://nextcatalog.unomaha.edu/undergraduate/student-life-support-services/testing-center/> (<http://catalog.unomaha.edu/undergraduate/student-life-support-services/testing-center/>)

Residency Requirement

Thirty of the last 36 hours required for the degree must be registered for and carried within the University of Nebraska System.

Quality of Work

Each candidate for the degree must attain a cumulative GPA of at least 2.0 ("C"). A grade of at least "C-" must be earned in all required courses within the major, unless a higher grade is designated by the department/unit. All grades reported by the faculty to the registrar become a part of the student's permanent record and are included in the computation of the grade point average, even though some of these grades may be for work done in excess of the 120 hours required for graduation.

Good Academic Standing Policy

Credit/No Credit (CR/NC) Grades

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 35)

Completion of Incomplete Grade

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 35)

Repeatable Grades/Courses

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 35)

Appeal Process

Students who wish to appeal a grade they believe was capriciously or prejudicially given shall first discuss the matter with the instructor within 30 days of the final course grade being posted. If the matter is not resolved, the student must then meet with the department/school chair or director. If a satisfactory agreement cannot be reached, the student must then appeal, in writing, to the department/school curriculum committee. If a satisfactory agreement cannot be reached, the student may submit a written appeal to the CPACS Dean's Office within 20 working days of the exhaustion of departmental procedures.

The Committee on Academic Standards and Curriculum for the College of Public Affairs and Community Service is the official body for handling the appeal.

In the event the instructor is unavailable for handling a grade complaint, the student will meet with the department chair and the Dean to determine the most appropriate course of action agreeable to all parties.

Academic Amnesty

The College of Public Affairs and Community Service (CPACS) academic amnesty policy gives students the opportunity to rebuild their University of Nebraska system cumulative grade point average (GPA). Review the following information and consult your academic advisor to learn more.

Eligibility:

To be eligible for Academic Amnesty, students must:

- Have been out of the Nebraska system for at least one calendar year (12-month period).
- Have substandard coursework ("F" or "D" grades) earned within the University of Nebraska system (UNO, UNL, UNK, UNMC) prior to the year out (substandard grades earned after the year out will not be included in the Academic Amnesty contract).
- Be admitted as a degree-seeking student at the University of Nebraska.

Amnesty Requirements:

- Academic Amnesty will begin with the first course(s) taken upon return to UNO.
- Students may apply for Academic Amnesty at any time after taking the one-year break.
- After returning from the one-year break, demonstrate academic success in new UNO coursework.
- Academic success may be demonstrated by one of the following:
 - Completing at least 12 semester hours (simultaneous or sequential) with a minimum of 3.0 cumulative GPA,
 - Completing at least 24 semester hours (simultaneous or sequential) with a minimum of 2.5 cumulative GPA.
- Students must maintain continuous enrollment (at least six (6) semester hours completed within any 12-month period).
- Students will work with their academic advisor to select the coursework to be amnestyed.
- Students must inform an academic advisor when the Academic Amnesty requirements are met.

Notes:

- All amnestyed coursework will remain on the student's academic record (transcript); however, the courses will not be included in calculation of the student's grade point average. Courses will be annotated "Academic Amnesty Excluded from GPA" on the transcript.
- Once Academic Amnesty is granted, students will not be eligible for honors at graduation. Students are still eligible for Dean's List and Chancellor's List honors.
- While demonstrating academic success, no changes are made to the student's academic record. If a student's cumulative GPA is still below standard, the students will continue to be reported as "continued on probation." Should the student revert to substandard academic performance while working on Academic Amnesty, the student can still be suspended. Academic Amnesty is intended to provide relief from the past without providing immunity from future substandard academic performance.
- Students must still meet all university and college requirements to graduate.

Academic Probation and Suspension

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 35)

Reinstatement Policy Following Academic Suspension

<https://nextcatalog.unomaha.edu/undergraduate/grades/> (p. 35)

Academic Advising

The purpose of academic advising within the College of Public Affairs and Community Service is to provide guidance and support to students striving to meet degree requirements. CPACS academic advising is provided at the departmental level. Students are encouraged to communicate with an academic advisor prior to registration each semester and should contact an advisor with any academic program questions. It is especially important for students nearing graduation to consult with an academic advisor to ensure all program requirements are met.

Advising Holds

Advising holds vary by academic unit. Please see your academic advisor for more information.

Student Holds

<https://nextcatalog.unomaha.edu/undergraduate/enrollment/enrollment/> (p. 28)

Senior Check

The College of Public Affairs and Community Service expects that students are working with their academic advisor throughout the course of their program. Once 91 credit hours are achieved, we encourage you to schedule an appointment with your academic advisor to ensure there is a graduation plan in place to complete your requirements.

Aviation

College Vision Statement Mission/Vision

The mission of the Aviation Institute is to:

- provide an environment where students are supported and challenged as they develop the skills, knowledge, and experiences that prepare them for personally and professionally rewarding careers in aviation and transportation;

- conduct research that enhances the safety, security, efficiency, reliability, and sustainability of aviation and transportation services, and improves mobility and quality of life for the citizens of the State of Nebraska;
- engage the community through partnerships and other collaborative initiatives that improve the lives of the citizens of the State of Nebraska and others through innovative education, training, research, and service projects; and
- maintain the highest standards of integrity and transparency in the conduct of the Institute's business and the management and stewardship of its resources.

Accreditation Information

One of the concentrations in the Bachelor of Science in Aviation, the Air Transport Administration Specialization, is accredited by the Aviation Accreditation Board, International

General Information

Maximum/Minimum Credits

Students are required to complete a minimum of 120 credit hours to complete a Bachelor of Science in Aviation.

Quality of Work

For purposes of meeting general education requirements, distribution requirements, and prerequisite requirements for courses, a grade of "C-" performs the role of a grade of "C", and a grade of "D-" performs the role of a grade of "D". A minimum grade of "C" (2.0) must be earned in each of the required courses within the major area of study.

Completion of Incomplete Grade

Students who receive instructor permission to take an incomplete must have the incomplete resolved the following semester or the incomplete changes to withdraw. If a student has a question in regard to this policy, they should see their academic adviser for clarification

Academic Advising

The Aviation Institute offers both academic and career advising to students. The academic advisor is available to assist students in meeting their career requirements and to interpret Institute and University policies regarding academic requirements. Students are encouraged to contact their advisor whenever questions arise concerning their academic program. As a minimum, students should see an advisor before registering for the next semester and review their academic progress, when choosing an area of specialty, and prior to registering for their senior year. The Aviation Institute faculty are also available to discuss career planning, opportunities, and advising. The faculty have a strong connection to the aviation industry and students are encouraged to use the faculty as a resource in determining their career goals. Students are encouraged to make an appointment as a freshman or sophomore with the Aviation Institute faculty to discuss their career path. For more information or to setup and appointment contact the Aviation Institute.

Senior Check

See your Academic Advisor

Application for Degree

Students apply for graduation through MavLINK.

Scholarship and Internship Opportunities

There are several scholarship and internship opportunities available to students within the Aviation Institute. Scholarships for current UNOAI students are awarded annually through an application process. The applications for these scholarships are available in November and are awarded at the Aviation Institute's annual honors convocation in April. Close partnerships with a number of Omaha metro organizations allow for several internship opportunities to current Aviation Institute students each semester. To apply for an internship, students must contact the internship coordinator, CPACS 120. A list of all UNOAI scholarships and internships can be found on the Aviation Institute Website (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/aviation/academics/>).

Advanced Simulation Facility

Flight students will use the Advanced Simulation Facility on a regular basis. Simulator fees are built into their student fees and are paid directly to the University of Nebraska at Omaha. The amount of time a student spends in the simulator will vary per semester depending on the flight lab requirements. Students will need to work with the Flight Training Coordinator to provide all necessary TSA documentation in order to use the flight simulators. The Aviation Institute currently has two Redbird MCX Simulators, one motion, one non-motion.

Aviation Resource Center

The Aviation Resource Center is available to all Aviation students. In the Aviation Resource Center, students can utilize the many resources offered to help them achieve academic success. Resources available are: computers for research, testing, and personal use, printing services, FAA Practical Test Study Guides, Gleim Test Prep Software, Jeppesen Study Materials, King CD-Rom Study Courses, free use of PC-ATD simulator, Current Trade Magazines and Publications, Complete AOPA Air Facts DVD Series, Sporty's Training DVDs, ASA Study Guides, complete collections of Jeppesen Training Videos, current copies of FAA's FAR/AIM, tutoring, various aviation related referencing textbooks, ASA-JSCH PP2 headsets, Garmin 396, and a Garmin 295.

In addition, the Aviation Resource Center is a certified FAA Testing Center, where students can take FAA Practical Exams.

Financial Aid

Students should apply for financial aid as directed by the Office of Financial Support and Scholarships and at the beginning of each calendar year thereafter. Priority is given to applicants who apply early. Additional financial aid may be available to qualified students to pay for the added cost of flight training. See the Aviation Institute academic advisor for information regarding additional financial aid for flight training. Flight training is optional and not required for students working toward the Air Transport Administration or Unmanned Aircraft Systems concentrations.

Language Fluency

International and other students enrolling in the Aviation Institute for whom English is not their primary language will be required to be sufficiently fluent in English as a second language. This requirement is particularly critical for successfully completing the flight training portion of the Institute's curriculum.

Program Contact Information

402.554.3424

unoaviation@unomaha.edu

Program Website (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/aviation/academics/>)

Admission Requirements

Incoming students who are not considered transfer students are guaranteed admission to the Bachelor of Science in Aviation program upon admission to the University of Nebraska at Omaha. Transfer students who want to complete the Bachelor of Science in Aviation Program must have a cumulative GPA of 2.5 to be accepted into the College of Public Affairs and Community Service. Current UNO students accepted for admission to any of the University's colleges may enroll in the Institute's aviation courses for elective credit.

Degrees Offered

- Aviation, Bachelor of Science (p. 877)

Writing in the Discipline

The writing in the discipline course in aviation is: AVN 3060 Writing in Aviation

Overview of Degree Programs

Air Transport Administration Concentration

The Air Transport Administration area of concentration is conferred under the Bachelor of Science in Aviation degree program. This option is oriented toward the public/private sector interface of individuals looking for administration careers. Potential career opportunities exist within the Federal Aviation Administration, Transportation Security Administration, National Transportation Safety Board, state aviation organizations, local and regional aviation organizations, airport administration, fixed-based operators, aviation consulting firms, airline operations, flight department operations, aircraft manufacturing companies, aviation marketing firms, and non-profit organizations such as Aircraft Owners and Pilot Association, National Business Aviation Association, and the Experimental Aircraft Association. The Air Transport Administration specialization gives the student the opportunity to gain knowledge in several aspects of the aviation and aerospace industry. Students will take specific classes in areas of general aviation, airport planning, statistical analysis, security, and airline operations. Students will also have the opportunity to become involved in an internship or cooperative education experience. This experience will expose

students to working in an area that relates to their potential career path; both local and national programs are available. Students who are looking to work in these highly competitive and regulated areas should choose the Air Transport Administration specialization program for their course of study.

Professional Flight Concentration

The Aviation Institute offers flight training from private pilot to certified flight instructor. Flight training is closely coordinated through local flight schools. Students who successfully complete any of the training under UNO requirements courses will receive appropriate academic credit. The Aviation Institute's Professional Flight curriculum is approved by the FAA to grant the Restricted Airline Transport Pilot (R-ATP) authorization to graduates. With the R-ATP, a pilot can be hired by a FAA Part 121 scheduled airline at age 21 with 1,000 flight hours versus at age 23 and 1,500 flight hours. Students who plan on enrollment in a flight training course should be able to successfully complete a first class aviation medical examination conducted by an FAA designated Aviation Medical Examiner accordance with Federal Aviation Regulation Part 67, *Medical Standards and Certification*. **Flight costs are paid directly to the flight provider where you conduct your training and are in addition to regular University tuition and fees.** Approximate costs for flight training are available in the Aviation Student Handbook. Costs for each training phase are based on the average number of hours required by the FAA for that particular phase. If a student requires additional flying or ground training to complete a particular training phase course, the student will be obligated to pay for the extra training. Additional financial aid is available for flight training, but does not cover 100% of flight training costs.

Flight training schedules are arranged by the student and flight instructor at each flight center. Students are responsible for contacting the flight training provider and establishing a schedule that will allow for completion of course requirements within the time allowed. It is suggested that students plan to fly three times a week. Instructors are available day, night, and weekends. For a current list of flight providers, see the Aviation Institute Web site at ai.unomaha.edu (<http://ai.unomaha.edu>). Consult with an aviation academic adviser for additional information.

Unmanned Aircraft Systems Operations Concentration

The Unmanned Aircraft Systems Operations area of concentration is conferred under the Bachelor of Science in Aviation degree program. This concentration will prepare a student for a career in operating unmanned aircraft as well as management and operations of a company or organization that utilizes unmanned aircraft.

Minors

- Minor in Aviation (p. 883)
- Uncrewed Aircraft System (UAS) Drone Technology (p. 883)

Bachelor of Science in Aviation-Air Transport Administration Concentration

The Bachelor of Science in Aviation-Air Transport Administration prepares students for careers in airport administration, corporate and general aviation, operations management, airline operations, consulting and federal government opportunities.

Career Opportunities

- Airline Management
- Airline Operations
- Airport Management
- Airport Operations
- Airport Planning

- Government (FAA, TSA, NTSB)
- Corporate Aviation Management
- Client Services
- Fleet Planning
- Safety & Security
- Aircraft Sales/Aviation Parts & Avionics Sales
- FBO Operations
- FBO Management

Bachelor of Science in Aviation-Professional Flight Specialization

The Bachelor of Science in Aviation-Professional Flight is designed for students interested in becoming a professional pilot. The program will prepare the student with a comprehensive general education program, aviation core of classes and take them through their Private, Instrument, Commercial, Certified Flight Instructor and Multi Engine Ratings. Graduates of this program will qualify for the Restricted Airline Transport Pilot program through the FAA.

Career Opportunities

- Airline Pilot
- Corporate Pilot
- Cargo Pilot
- Charter Pilot
- Certified Flight Instructor

Bachelor of Science in Aviation-Unmanned Aircraft Systems Operations Specialization

The Bachelor of Science in Aviation-Unmanned Aircraft Systems Operations is designed for students who would like to build a career in the new and developing world of UAS Operations. Courses will include a comprehensive general education curriculum, aviation core classes and concentrated areas in unmanned aircrafts. Students will not only focus on flying unmanned aircraft, but also developing the skills to manage a full operation and learn to utilize the data and imagery collected.

Career Opportunities

- Drone Operator
- Agriculture
- Aerial Systems Logistics
- Emergency Management
- Photography/Videography
- Transportation Industry (Aviation, Rail, etc.)
- Real Estate

AVN 1000 INTRODUCTION TO AVIATION AND AEROSPACE (3 credits)

This course provides a broad understanding of all aspects of the air transportation and aerospace industries. Lectures will cover what has happened in the industry to date, with emphasis on present and future developments in air transportation. The course will include the impact the airline industry is making on airports and other segments of aviation and aerospace.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

AVN 1020 PRIVATE PILOT THEORY (3 credits)

This course will familiarize the student with theories associated with flight. These include aerodynamics, weather, Federal Aviation Administration (FAA) regulations, navigation, airports, airspace, and aviation safety. There is no flight requirement associated with this course.

AVN 1024 PRIVATE PILOT FLIGHT LABORATORY (1 credit)

This laboratory course is designed for students pursuing flight requirements for the Federal Aviation Administration private pilot certificate. The student will complete all flight requirements for solo flight. Course will include flight in aircraft simulators and single-engine aircraft. Class is conducted off campus. Special fees apply.

Prerequisite(s): Completion of or concurrent enrollment in AVN 1020, or successful completion of the Federal Aviation Administration Private Knowledge Test.

AVN 1030 PRIVATE PILOT FLIGHT CERTIFICATE (2 credits)

This course will prepare the student for the Federal Aviation Administration practical flight examination for the private pilot certificate. Course involves flight in personal computer assisted training device and single-engine aircraft. Student is required to successfully complete all FAA certification requirements and obtain a private pilot certificate. Classes will be conducted off campus. Special fees apply.

Prerequisite(s): AVN 1020 and AVN 1024.

AVN 1040 HISTORY OF AVIATION AND AEROSPACE (3 credits)

The course introduces students to the history of aviation and aerospace with emphasis on the evolution of technologies, policies, business models, and transportation.

Distribution: Social Science General Education course

AVN 1160 AVIATION SAFETY (3 credits)

This course provides the student with a detailed introduction to aspects of aviation safety as well as the associated components of flight human factors, aircraft technology, weather related accidents and accident investigation.

Prerequisite(s): AVN 1000

AVN 1500 INTRODUCTION TO UNMANNED AIRCRAFT SYSTEMS (3 credits)

This course is an introductory overview of Unmanned Aircraft Systems including the regulatory process, history, application and career opportunities, ethical concerns, and safety management of UAS operations.

Prerequisite(s): Not open to non-degree graduate students.

AVN 2020 AIRLINE OPERATIONS (3 credits)

The purpose of this course is to introduce the student to operational aspects of airline management. Topics to be covered include management, leadership, labor relations, marketing, forecasting, and fleet planning.

Prerequisite(s): AVN 1000

AVN 2050 INTRODUCTION TO AIRPORT ADMINISTRATION (3 credits)

This course examines airport operations, safety and security, various administrative roles within the airport community, and the impact airports can have on local and regional economies. Students will explore the unique role public airports play as an interface between the traveling public and private airlines.

Prerequisite(s): AVN 1000

AVN 2100 FLIGHT TEAM (1 credit)

Students will learn and master the skills associated with the 9 different events associated with the National Intercollegiate Flying Association Regional and National Safety and Flight Evaluation Conferences or SAFECONs. The events include: Computer Accuracy, Simulated Comprehensive Aircraft Navigation (SCAN), Aircraft Recognition, Preflight Inspection, Ground Trainer, Message Drop, Navigation, Short-Field Landing, and Power-Off Landing.

Prerequisite(s): Permission of the Flight Team Advisor is required

AVN 2104 INSTRUMENT RATING 1 (2 credits)

The student will complete approximately 25 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator and FAA-approved Advanced Aviation Training Devices on the UNO Main Campus; objective is to complete the first portion of training needed for the FAA Instrument Rating. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s): Concurrent enrollment in AVN 2170 or instructor permission. Not open to non-degree graduate students.

AVN 2114 INSTRUMENT RATING 2 (1 credit)

The student will complete approximately 20 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator; objective is to complete the final portion of training needed for the FAA Instrument Rating. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s): AVN 2170 and AVN 2104 or instructor permission. Not open to non-degree graduate students.

AVN 2124 COMMERCIAL PILOT CERTIFICATE 1 (2 credits)

The student will complete approximately 40 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator and FAA-approved Advanced Aviation Training Devices on the UNO Main Campus; objective is to complete the first of three sections of training needed for the FAA Commercial Pilot Certificate. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s): Concurrent enrollment in AVN 2180 or instructor permission. Not open to non-degree graduate students.

AVN 2134 COMMERCIAL PILOT CERTIFICATE 2 (2 credits)

The student will complete approximately 40 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator; objective is to complete the second of three sections of training needed for the FAA Commercial Pilot Certificate. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s): AVN 2124 or instructor permission. Not open to non-degree graduate students.

AVN 2144 COMMERCIAL PILOT CERTIFICATE 3 (2 credits)

The student will complete approximately 40 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator; objective is to complete the final third of training needed for the FAA Commercial Pilot Certificate. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s): AVN 2134 or instructor permission. Not open to non-degree graduate students.

AVN 2164 PROFESSIONAL PILOT DEVELOPMENT (2 credits)

This course is intended to supplement the Instrument Rating and Commercial Certificate courses by providing flight experience and simulator training in the areas of instrument flying, complex airplane/multiengine operations, abnormal and emergency situations, and crew resource management.

Prerequisite(s): AVN 1030 or hold a valid US Private Pilot Certificate.

AVN 2170 INSTRUMENT FLIGHT THEORY (3 credits)

This course will provide the student with an understanding of theory and procedures required to be a safe and competent instrument pilot. It will include the study of flight instruments, aerodynamics, instrument flight maneuvers, navigation, flight planning, the national airspace system, air traffic control, weather, regulations, human factors and emergency operations. There is no formal flight training involved with this course.

Prerequisite(s): AVN 1030 or hold a valid U.S. Private Pilot Certificate; or instructor permission.

AVN 2180 COMMERCIAL PILOT THEORY (3 credits)

This course provides the student with an understanding of the theories involved in flight at the commercial level. Course will include extensive review and study of VFR and IFR cross-country procedures and night flight procedures to prepare the student for the FAA commercial Pilot Knowledge Test. There is no flight training involved in this course.

Prerequisite(s): AVN 2114 or possess a U.S. FAA issued Instrument Pilot Certificate; or instructor permission.

AVN 2500 UNMANNED AIRCRAFT SYSTEMS FLIGHT OPERATIONS (3 credits)

This course will give students hands-on flight training experience with small unmanned aircraft including mission planning, operational control, and working with different types of payloads.

Prerequisite(s): AVN 1500 and FAA Remote Pilot Certificate. Not open to non-degree graduate students.

AVN 2510 DIVERSITY IN AVIATION (3 credits)

This course provides an overview of the contributions women and minorities have made to the field of aviation. Emphasis is placed on past, present and future roles of women and minorities in aviation. The course includes other topics such as international aspects and issues of aviation.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

AVN 2750 AVIATION METEOROLOGY (3 credits)

An introductory study of the key elements of the atmosphere's structure from the earth's surface to the upper levels; weather systems and hazards to aviation operations plus impact of adverse weather on aeronautical operations. Course will include review of air mass characteristics, frontal weather, and pressure system structure.

Prerequisite(s): AVN 1020, and MATH 1310 or MATH 1220 or equivalent.

AVN 2900 INDEPENDENT STUDY IN GENERAL AVIATION (3 credits)

This course will cover various topics in aviation to be determined with the instructor and student. Possible topics include Ground Instructor Ratings, crew resource management, airline airport analysis, military history, effects of privatization, etc.

AVN 3000 BUSINESS AND CORPORATE AVIATION (3 credits)

This course will provide a broad understanding of aspects related to the field of business and corporate aviation. Information that will be covered includes: the history of business and corporate aviation; regulations and associations; the value of using business aircraft; aircraft selection; the differences between corporate flight department, fractional ownership, and charter departments; insurance requirements; and safety and security issues.

Prerequisite(s): AVN 1000 and Junior or Senior standing

AVN 3040 HUMAN FACTORS IN AVIATION SAFETY (3 credits)

The purpose of this course is to provide students with an understanding of human factors as it applies to pilots and administrators. Topics will include pilot physiological and psychological issues, work station design, crew resource management, and related public sector issues for managers.

Prerequisite(s): AVN 1160

AVN 3050 UNMANNED AIRCRAFT SYSTEM DESIGN, DEVELOPMENT, AND MAINTENANCE (3 credits)

This course offers students theoretical knowledge and hands-on experience with small unmanned aircraft system design, development, and maintenance. Students will learn principles of UAS design, development, and maintenance, and will apply interdisciplinary knowledge to build small UAS.

Prerequisite(s): AVN 2500. Not open to non-degree graduate students.

AVN 3060 WRITING IN AVIATION (3 credits)

This course will further develop the communication skills of aviation students through various forms of writing. Students will compose a research paper and other writing assignments.

Prerequisite(s): ENGL 1160 and AVN 1000

AVN 3070 AIR TRAFFIC CONTROL (3 credits)

The purpose of this course is to introduce students to the Federal Aviation Administration (FAA) Air Traffic Control system. Elements and requirements of the course will include: basic air traffic control procedures for pilots, navigation aids, control tower operations, radar approach and departure regulations, and airport traffic control (ATC).

AVN 3090 AIRPORT ADMINISTRATION AND PLANNING (3 credits)

This course covers the nation's airspace design, navigation and air traffic systems and their effect on airport capacity. Additionally, the national airport system will be investigated as well as airport design and development parameters, fiscal processes, and management considerations.

Prerequisite(s): AVN 2050

AVN 3150 AVIATION LAW (3 credits)

This course will increase the student's knowledge of aviation law. Particular attention will focus on the manner in which legal forces affect the aviation system.

Prerequisite(s): AVN 1000 and junior standing.

AVN 3190 CERTIFIED FLIGHT INSTRUCTOR THEORY (3 credits)

Provide the student with an understanding of the theories involved in flight instruction. Course will include extensive oral presentation of complex aeronautical information and use of the personal computer assisted training device. Students are expected to pass FAA Fundamentals of Instructing and Federal Aviation Administration (FAA) Flight Ground Instructor Knowledge tests. There is no flight training in this course.

Prerequisite(s): AVN 2144 and CMST 1110.

AVN 3194 CERTIFIED FLIGHT INSTRUCTOR I (2 credits)

This course consists of approximately 25 hours of flight training in flight instruction procedures required to obtain the FAA flight instructor certificate. Special Fees apply.

Prerequisite(s): AVN 2144 and AVN 3190 (may enroll concurrently).

AVN 3200 COOPERATIVE EDUCATION IN AVIATION (1-6 credits)

This course will complement course work with a relevant professional work experience or practicum in aviation. The practicum/field experience may be a special project in an aviation organization to be coordinated by the instructor. Offered as a credit/no-credit course.

Prerequisite(s): AVN 3060, junior/senior standing, aviation major, instructor permission by written proposal (contract), and approval of proposed work/field experience by instructor.

AVN 3304 CERTIFIED FLIGHT INSTRUCTOR II (2 credits)

Using a combination of lab session training at UNO and ground / flight instruction at the student's selected Flight Training Provider (FTP), the Flight Instructor Candidate will complete the FAA Flight Instructor-Instrument Certificate.

Prerequisite(s): AVN 3194 and AVN 3190 or instructor permission

AVN 3400 MULTI-ENGINE CERTIFICATION (2 credits)

Using a combination of lab session training, Advanced Aviation Training devices at UNO and ground/flight instruction at the student's selected Flight Training Provider (FTP), the student will complete the FAA Multi-Engine Rating at the Commercial level.

Prerequisite(s): AVN 2180 and AVN 2144 and Federal Aviation Administration Commercial Single Engine Land

AVN 3500 RESEARCH METHODS IN AVIATION (3 credits)

An introductory research methods course focused on contemporary as well as historical aviation problems and topics, but from an investigative perspective. The primary focus will be the preparation of standard research documents and the use of traditional statistical methods to evaluate various data sources.

Prerequisite(s): 60 hours of undergraduate credit and AVN 3060 completed or in progress.

AVN 3510 AEROSPACE SCIENCES (3 credits)

This introductory course will provide pre-service teacher candidates, aviation students, and students at large the opportunity for a science oriented general education course. The curriculum will be focused in the areas of earth and space science, geospatial technology, and aeronautics. Key topics for this course will include the geoscience practice of Geographic Information Systems, Global Positioning System, and the NASA Jet Propulsion Laboratory/ UNO designed Data-Slate remote sensing program. Also included will be space sciences focused solar system exploration, satellite technology, and astronautics. Students will engage in aeronautic science topics inclusive of the study of aerodynamics of flight, meteorological science and weather, and flight technology. All students will be provided opportunity to apply concepts of flight in the Aviation Institute's Advanced Simulation Facility.

AVN 3600 INTERNATIONAL AVIATION (3 credits)

This course examines global air transport and its impact on the development of the global economy. Lectures and readings will provide a solid foundation of historical knowledge about international air transport and its development in various countries, before exploring current policy debates about liberalization, global alliances, and other critical issues.

Prerequisite(s): AVN 2020

AVN 3700 TRANSPORTATION ANALYSIS (3 credits)

This course is an extension of introductory financial courses; special emphasis on service characteristics of air carriers. Review of airline revenue and expense streams, pricing and fares, fiscal market segmentation, and fleet planning. Focused approach to understanding the monetary forces that underlie the business practices of domestic and international passenger and cargo airlines.

Prerequisite(s): ECON1200 or higher and junior standing

AVN 4000 INDEPENDENT RESEARCH IN AVIATION (1-3 credits)

The purpose of this course is to provide the aviation student an opportunity to complete an in-depth analysis of a specific aviation topic. Examples: aerodynamics, airports rates/charges analysis, cost-allocation for airside/ landside, aviation marketing relating to aircraft manufacturing, airline promotion, flight component, off-airport subjects, comprehensive regional planning, environmental subject, etc.

Prerequisite(s): Aviation major, senior standing, and written permission of the instructor.

AVN 4010 AERODYNAMICS AND AIRCRAFT PERFORMANCE (3 credits)

Provides the student with an understanding of the factors affecting aircraft performance during various phases of flight. Topics will include aircraft performance requirements outlined in the Federal Aviation Administration Regulations, use of performance charts and tables, runway airport analysis, and climb cruise descent performance.

Prerequisite(s): AVN 1000, AVN 2144, MATH 1220 or instructor permission.

AVN 4020 AIRCRAFT SYSTEMS (3 credits)

Provides the student with an understanding of systems employed on technologically advanced, sophisticated aircraft. Systems covered will include electrical, hydraulic, engines, flight control and pneumatic systems.

Prerequisite(s): AVN 1000 and AVN 2144 or instructor permission.

AVN 4050 GENERAL AVIATION OPERATIONS (3 credits)

Organization and operation of general aviation facilities to include administration, aircraft maintenance considerations, flight line operations, and decision making.

Prerequisite(s): AVN 1000

AVN 4060 ADVANCED AIR TRANSPORT FLIGHT OPERATIONS (3 credits)

The course will be a capstone event in the professional pilot sequence. Specific emphasis will be on the pre-flight planning and execution of air carrier flight operations. Additional instructional segments will cover regional and corporate flight operations.

Prerequisite(s): AVN 4020 or instructor permission.

AVN 4080 AIRPORT SAFETY AND SECURITY (3 credits)

This course will explore the role of airports in relation to safety and security. Topics will include regulations, responsibilities, security issues, ramp safety, disaster preparedness, and emergency management.

Prerequisite(s): AVN 1000 or its equivalent or permission of the instructor.

AVN 4200 INTERNSHIP IN AVIATION (1-6 credits)

This course is designed to provide direct hands-on experience in the aviation industry for selected students. Students will be selected for internships competitively by a panel of Aviation Institute faculty and industry representatives from companies providing the internships. This experience will be in a full-time, preferably paid position in a highly structured environment using a syllabus designated by the faculty and industry committee.

Prerequisite(s): AVN 3060, junior/senior standing, aviation major, instructor permission.

AVN 4500 ADVANCED UNMANNED AIRCRAFT SYSTEMS PROCEDURES (3 credits)

This course will provide students with scenario based training sessions that focus on emergency procedures for inflight operations, risk assessment and mitigation tactics, and advanced communications procedures.

Prerequisite(s): AVN 2500. Not open to non-degree graduate students.

AVN 4900 SPECIAL TOPICS IN AVIATION (1-3 credits)

This course will discuss various topics in the Aviation Industry determined each time the course is offered. Possible topics include International Aviation, Current Issues, and Cockpit Resource Management along with other topics.

Prerequisite(s): AVN 1000 and junior standing

AVN 4990 AIR TRANSPORTATION (3 credits)

This course fulfills the Aviation Institute capstone projects for undergraduates. Lectures and readings will cover contemporary issues and problems in air transportation, as well as material related to research design and implementation.

Prerequisite(s): AVN 3700, junior or senior standing, or instructor permission.

Aviation, Bachelor of Science

Bachelor of Science in Aviation, Air Transport Administration Concentration:

The curriculum includes the University of Nebraska at Omaha's (UNO) general education requirements, departmental requirements, a core of aviation classes and specialized courses in air transport administration. All students in a degree program in the aviation department must meet the university general education requirements. Additional information on these requirements can be found in this catalog and on the University General Education website (<https://www.unomaha.edu/general-education/>). Please contact an academic advisor for recommended choices for the major. Certain majors/programs in the Aviation Institute require specific foundational coursework that may also count for General Education requirements. For further information and details, contact an academic advisor.

Bachelor of Science in Aviation, Professional Flight Concentration:

The curriculum includes the UNO's general education requirements, departmental requirements, a core of aviation classes and specialized courses in professional flight. All students in a degree program in the aviation department must meet the university general education requirements. Additional information on these requirements can be found in this catalog and on the University General Education website (<https://www.unomaha.edu/general-education/>). Please contact an academic advisor for recommended choices for the major. Certain majors/programs in the Aviation Institute require specific foundational coursework that may also count for General Education requirements. For further information and details, contact an academic advisor.

¹ Student could potentially test out of Math 1220 or based off testing need a lower level math course.

² It is highly recommended that a student consider a Minor to fill open Electives

³ Aviation Electives are classes a student chooses within the aviation department based on their specified interests. Each Administration student must complete 6 credit hours.

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

Minor in Aviation

Aviation Minor Requirements

An aviation minor is available to students who are interested in achieving an associated aviation background to supplement their major area of study. The aviation minor has been developed as an interdisciplinary program to broaden the educational opportunities for UNO students. Consistent with the current and future demands of the aviation industry is the need for quality educated and trained professionals from a variety of disciplines. This program will provide the aviation foundation to prepare a student from any major to meet those needs as a professional in an aviation-related field.

A minor in aviation requires a minimum of 18 credit hours, including at least nine hours of upper-level aviation courses. A minimum grade of "C-" is required in each course. The minor can complement any major at the University of Nebraska at Omaha and has been a popular choice among

students in criminology and criminal justice, computer science, international studies, geography, public administration, management and marketing.

For the minor to appear on the student's transcript, it must be declared by completing the minor application at the Aviation Institute. To obtain additional information about the minor options and to develop a plan of study, students should contact an academic adviser from the Aviation Institute, Room 120, CPACS Building, 402.554.3424.

Uncrewed Aircraft System (UAS) Drone Technology Minor

Uncrewed Aircraft System (UAS)/Drone Technology Minor Requirements

A minimum of 18 credit hours in total is required for the UAS minor.

Criminology and Criminal Justice

Mission

The School of Criminology and Criminal Justice offers high quality educational programming to support students in gaining the knowledge and skills necessary for a successful career in criminology and criminal justice or related social services fields. Students can participate in scholarly and applied research projects that involve collaborative partnerships with local and federal agencies. Students learn about emerging technologies as a means of improving and advancing criminology and criminal justice. We provide opportunities for students to connect with professionals in the classroom as well as through extracurricular events. Students are strongly encouraged to complete an internship to gain field experience prior to their graduation.

Student Learning Outcomes

- Demonstrate mastery of core content areas in criminology and criminal justice.
- Locate, integrate and use information from varied sources to effectively communicate in writing and other mediums.
- Apply specialized knowledge through field-based learning experiences, civic and/or community engagement activities, and/or policy analysis.
- Explain diverse positions, including those representing different cultural, economic, and geographic interests in the context of criminology and criminal justice.

Academic Advising

All CRCJ majors are strongly advised to schedule an appointment with our advising staff each semester. Advisors provide assistance with degree planning and course scheduling. They are also available to answer questions regarding major/minors, academic performance, and SCCJ policies or procedures. To contact an Omaha academic advisor, call 402.554.2610. To contact a Lincoln academic advisor, call 402.472.3677

Transferring to Criminology and Criminal Justice

Students wishing to transfer from another institution or department within the University of Nebraska must have a 2.0 cumulative grade point average

to be admitted into the criminology and criminal justice program. Contact the school for more details on the transfer policy.

Degree Requirements

- A minimum of 30 of the last 36 semester credit hours must be earned by the student in residence in the University of Nebraska System. (Summer independent study courses are not considered in residence.)
- At least 21 hours of criminal justice must be taken at the University of Nebraska, on either the Omaha or Lincoln campus.
- A minimum of 33 credit hours must be earned in upper division (3000/4000-level) courses. At least 21 of these upper division hours must be taken in the School of Criminology and Criminal Justice courses, and 12 hours of 3000/4000 level courses are required in a concentration/minor (see course requirements section).
- A maximum of 12 credit hours of departmental independent study and internship courses may be applied toward the BCCJ degree. No more than 6 hours of CRCJ 3970 and CRCJ 3980 may apply and no more than 6 hours of CRCJ 4950 may apply.
- A maximum of 30 hours from any one department may be applied toward the BCCJ degree.
- A maximum of 24 hours may be taken pass/no pass. Contact an advisor for more details.
- Credit for basic military and law enforcement training may be applied to the BCCJ degree. Contact an advisor for more details.
- Credit from an institution that is not regionally accredited cannot be applied to the BCCJ degree.

Fast Track

The School of Criminology and Criminal Justice has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following:
 - BS in Criminology or Criminal Justice on either the UNO or UNL campuses
 - Double-major at UNO with a BS in Criminology and Criminal Justice as either the primary or secondary major
 - BMS with a concentration in Criminology and Criminal Justice
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.25.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program. Successful completion of the graduate

courses will be a significant consideration during the evaluation of admission to the MA or MS in Criminology and Criminal Justice.

- The admit term must be after the completion term of the undergraduate degree.

Special Note: Eligible undergraduate students may enroll in any 8000-level CRCJ course approved by the SCCJ program.

Contact

The UNO School of Criminology and Criminal Justice offers courses on the Omaha and Lincoln campuses. The Omaha office is located in the College of Public Affairs and Community Service Building (CPACS), Room 218. Our office can be reached by phone at 402.554.2610. The Lincoln office is located in Nebraska Hall, Room 310 and can be reached by phone at 402.472.3677. Events for both campus locations are regularly posted on our Website (<http://www.unomaha.edu/college-of-public-affairs-and-community-service/criminology-and-criminal-justice/>), Facebook page #unosccj, Twitter feed @unosccj, and Instagram @unosccj1.

Degrees Offered

- Criminology & Criminal Justice (BCCJ), Bachelor of Science (p. 893)

**Criminal justice courses are offered on the Omaha and Lincoln campuses of the University of Nebraska. The BCCJ degree can be earned in its entirety on the Lincoln campus; however, the degree is conferred by the University of Nebraska at Omaha.

Minors Offered

- Criminology & Criminal Justice Minor (p. 897)
- Policing Minor (p. 897)
- V (p. 897)ictimology and Victim Services Minor (p. 897)

If you seek a career such as a police officer, DEA agent, probation officer or correctional counselor, a Bachelor of Science degree in Criminology and Criminal Justice is a key step towards turning that aspiration into reality. The CRCJ program at UNO provides undergraduates an excellent foundation in the theories of crime and the criminal justice response to crime while also introducing students to criminological research methods.

Law Enforcement

- Alcohol, Tobacco, & Firearms (ATF)
- Drug Enforcement Agency (DEA)
- FBI Agent
- Federal Protective Service Officer
- IRS Agent
- Military Police
- Postal Inspector
- Secret Service Agent
- United States Marshal

- Nonprofit Management
- Animal Control
- Police Officer
- Arson Investigation
- Campus Police
- Deputy Sheriff
- Fish & Game Officer
- Highway Patrol

Probation

- Diversion Program Coordinator
- Pretrial Services Officer
- Probation Officer (Juvenile/Adult)

Corrections

- Corrections Counselor
- Corrections Officer
- Juvenile Corrections
- Parole Officer (Juvenile/Adult)
- Prerelease Counselor
- Recreation Leader
- Warden

Courts/Law

- Bailiff
- Court Administrator
- Court Reporter
- Investigator for law offices
- Lawyer
- Legal Researcher
- Paralegal/Legal Assistant

Homeland Security

- Customs Inspector
- Emergency Management
- Coordinator
- Federal Air Marshal
- FEMA Positions
- Intelligence Analyst
- Investigative Specialist
- Immigration Inspector
- Linguists
- Surveillance Specialist
- TSA Officer
- Border Patrol Agent

Private Security

- Security Director
- Loss Prevention Specialist
- Private Security Officer
- Credit Investigator
- Bank Fraud Investigator
- Legal Researcher

Juvenile Services

- Aftercare Counselor
- Child Protective Services Worker
- Detention Counselor
- Group Home Worker
- Rehabilitation Coordinator
- Runaway Counselor
- School Attendance Officer
- Youth Advocate

Victim Services

- Caseworker
- Child Support Agency Worker
- Crisis Center Coordinator
- Crisis Counselor
- Domestic Violence
- Advocate/Counselor
- Social Worker
- Victim/Witness Service Coordinator

Research

- Legislative Assistant
- Professor
- Research Analyst

CRCJ 1010 SURVEY OF CRIMINAL JUSTICE (3 credits)

This course is designed to provide an overview of the justice process and the criminal justice system in general. Concepts of crime and justice are discussed as well as the rights of individuals in a democratic society. The law enforcement, judicial, juvenile justice, and corrections systems are explored.

Distribution: Social Science General Education course

CRCJ 2030 POLICE AND SOCIETY (3 credits)

This course is designed to explore the role of the police in American society. Attention is given to the origins of policing, the nature of police organizations and police work, and patterns of relations between the police and the public. The values of a democratic society as they affect the law enforcement role are discussed.

Prerequisite(s): CRCJ 1010, or permission

CRCJ 2110 CRIMINAL COURT SYSTEM (3 credits)

The purpose of this course is to give you a greater understanding of the U.S. criminal courts system. In this course we will cover topics such as judges, lawyers, litigants, criminal and civil procedure, state and federal courts, and theories of judicial decision making. We will analyze these concepts, actors and institutions from a variety of perspectives. The course will include discussions of the constitutional rules and case law as they apply to the courts process.

Prerequisite(s): CRCJ 1010, or permission

CRCJ 2210 SURVEY OF CORRECTIONS (3 credits)

This course provides an overview of the American criminal justice system correctional responses to criminal offending. We explore the history, philosophy, and law underlying corrections. We will focus on understanding risks and needs of offenders, treatment options and types of correctional sanctions in the U.S. These include, but are not limited to probation, jail, intermediate sanction, prison and the death penalty.

Prerequisite(s): CRCJ 1010, or permission

CRCJ 2220 COMMUNITY-BASED CORRECTIONS (3 credits)

This course is designed to familiarize the student with the most recent developments in community-based corrections. Discussion will focus on the issues related to implementation, management, effectiveness and challenges of community-based programs. Students will be provided a broad overview of the structure and functions of Community-based Corrections. By the end of the course, students should expect to understand the best practices in community corrections.

Prerequisite(s): CRCJ 1010, or permission

CRCJ 2410 CRIMINAL PROCEDURE (3 credits)

This course deals with the legal aspects of the investigation, arrest processes, and criminal trial proceedings, as well as the rules governing the admissibility of evidence in criminal court proceedings.

Prerequisite(s): CRCJ 1010, or permission

CRCJ 2510 RESEARCH METHODS (3 credits)

The primary goal of this course is to facilitate your growth as both consumers and producers of research. We will explore a variety of methodologies (e.g., survey research/self-report, official stats/secondary data, quasi-experimental design, etc.) used in criminological and criminal justice research. Further, we will evaluate these methodologies within the context of design concerns such as: research purpose, operationalization, validity, reliability, and ethics.

Prerequisite(s): CRCJ 1010, or instructor permission

CRCJ 3000 APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR (3 credits)

A course on the use of data and statistical methods to explore and make inferences about society, while critically considering the influence of context and the powers and limitations of quantitative evidence. (Cross-listed with PA 3000, SOWK 3000).

Prerequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or MATH 1300 or MATH 1320 or an ACT of 19, or above or permission from the department.

CRCJ 3010 PHILOSOPHY OF CRIMINAL JUSTICE (3 credits)

This course is designed to critically evaluate concepts like "justice", "morality", "crime", "criminal", etc. These concepts are used every day, and yet we often take it for granted that their meaning is common knowledge. The reality is that arriving at a definition for a term like "justice" varies greatly depending on who you are talking to. When you consider that the overarching goal of our criminal "justice" system is to dispense justice, the definition of "justice" becomes supremely important. Unlike many other classes you will take, much of what we talk about in this class will have no clear cut answers. You will leave this course with questions, but hopefully you will be equipped with the tools necessary to evaluate those questions and form an educated opinion.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission.

CRCJ 3100 WRITING FOR CRIMINAL JUSTICE (3 credits)

This is a writing course for all Criminology and Criminal Justice majors. Students will learn how to write effective cover letters, incident reports, position papers, and executive summaries.

Prerequisite(s): ENGL 1150, ENGL 1160, and CRCJ 1010. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

CRCJ 3310 CRIMINAL LAW (3 credits)

This course will examine the development of the criminal law, the elements and types of criminal offenses, as well as principles of criminal culpability.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or permission

CRCJ 3350 CRIMINOLOGY (3 credits)

This course is about facts and frameworks. The facts that we are interested in are facts about criminal behavior and the frameworks are theories that organize these facts in a coherent fashion. As we learn about criminological facts and the theories that organize these facts we will pay attention to research so that we understand how these facts are developed and how these theories are tested. We will also try to draw out the policy implications of the various facts and theories that we address.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission.

CRCJ 3370 JUVENILE DELINQUENCY AND JUVENILE JUSTICE (3 credits)

This course has been designed to provide and expose students to a broad base of information about juveniles, youth in need of supervision, youth crime and how these areas are handled within the juvenile justice system in the United States. This course will examine the juvenile justice system and the role of family, peers, school, courts, law enforcement, corrections, and the broader community as it pertains to the life of a juvenile.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours

CRCJ 3380 RACE, ETHNICITY, AND CRIMINAL JUSTICE (3 credits)

This course provides a survey of minority groups and their experiences with regard to crime and criminal justice in the United States. This course will focus on racial and ethnic minorities as victims, as offenders, as defendants, and as criminal justice professionals.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; OR instructor permission. Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course

CRCJ 3390 WOMEN, CRIME AND JUSTICE (3 credits)

This course focuses on women's experiences in the criminal justice system. The course will examine women's experiences as victims of crime, as offenders, as prisoners, and as criminal justice professionals. (Cross-listed with WGST 3390)

Prerequisite(s): WGST major; CRCJ or WGST minor; CRCJ 1010, ENGL 1150 and 45 credit hours; or instructor permission.

Distribution: U.S. Diversity General Education course

CRCJ 3410 LAW AND THE BLACK COMMUNITY (3 credits)

Law and the Black Community provides an in-depth examination of the racialized American legal process as it pertains to and affects African Americans in the U.S. From the formation of the U.S. Constitution to present day, this course analyzes intersections of race, law, politics and culture, and explores the administration of justice and Black experiences through a critical legal perspective. (Cross-listed with BLST 3410, PSCI 3410).

Prerequisite(s): BLST 1000 OR CRCJ 1010 OR Junior standing OR instructor permission.

Distribution: U.S. Diversity General Education course

CRCJ 3970 INTERNSHIP IN CRIMINAL JUSTICE (3 credits)

A minimum of 160 hours of experiential learning with criminal justice agencies. The internship program integrates learning with service. It allows students to learn occupational skills and competencies and develop professional relationships with organizations involved in the criminal justice sector, at the same time, students will apply criminological theories to their work. The internship prepares students to demonstrate the integration of professional ethics and values, knowledge and skills, and the capacity to think critically and constructively.

Prerequisite(s): CRCJ 1010, ENGL 1160, 75 credit hours completed, GPA of 2.5, and permission of instructor. Not open to non-degree graduate students.

CRCJ 3980 RESEARCH INTERNSHIP (3 credits)

This course will provide advanced student majors and minors with experience conducting research in the area of criminology and criminal justice. Students work under faculty supervision to complete research tasks that integrate learning with service. Tasks may include reviewing relevant literature, development of survey instrument(s), data collection, data entry and analysis, and presentation of findings.

Prerequisite(s): CRCJ 1010, 75 credit hours completed, GPA of 2.5, and permission of instructor.

CRCJ 4000 MENTAL HEALTH AND THE CRIMINAL JUSTICE SYSTEM (3 credits)

This course focuses on the intersection of individuals with mental health, substance abuse, and/or severe and persistent mental illness diagnoses and the criminal justice system. Students will examine how individuals become involved in the criminal justice system and how the criminal justice system and other social services respond to their involvement.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; OR instructor permission

CRCJ 4030 CRIMINAL JUSTICE ORGANIZATION AND ADMINISTRATION (3 credits)

This course covers contemporary concepts, principles and theories of organization and administration as they relate to criminal justice agencies. The historical development and modern principles of policy administration are also contrasted. The primary goal of this course is to identify the basic structure and function of criminal justice organizations, while paying particular attention to how criminal justice organizations are managed and led.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours

CRCJ 4060 CRIMINAL JUSTICE ETHICS (3 credits)

The principal objectives of this course will focus on creating an awareness of the ethical issues and dilemmas present in the criminal justice system, as well as the development of a more informed ability or basis to address them.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours. Not open to non-degree graduate students.

CRCJ 4110 BIOSOCIAL CRIMINOLOGY (3 credits)

This course is designed to acquaint students with the biological, genetic, and environmental origins to criminal and antisocial behavior. Toward this end, we will examine an array of topics including personality development, brain functioning, and the biosocial basis of crime. Discussion will also center on the manner in which various environmental influences operate through biological mechanisms to influence criminal behavior across different stages of the life course. Particular emphasis will be placed on using empirical-based research to understand the etiology of antisocial and criminal conduct and issues pertaining to the criminal justice system.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission.

CRCJ 4130 SOCIOLOGY OF DEVIANT BEHAVIOR (3 credits)

This course is designed to investigate the etiology of many forms of norm-violating conduct. Emphasis will be placed on rule-breaking behavior as defined in the criminal statutes. (Cross-listed with CRCJ 8136).

Prerequisite(s): Upper-division CRCJ major; CRCJ minor; CRCJ 1010 and jr/sr standing; or instructor permission.

CRCJ 4210 INSTITUTIONAL CORRECTIONS (3 credits)

The purpose of this course is to provide you with a practical and theoretical understanding of Institutional Corrections.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours.

CRCJ 4400 DOMESTIC VIOLENCE (3 credits)

This course examines the criminal justice system response to domestic violence/intimate partner violence. A focus on the interactions between battered victims and components of the criminal justice system, as well as the role of the community in addressing and preventing this violence serves as the foundation for this course. Students will also gain insight into factors contributing to the incidence of intimate partner violence, explore the background/history of domestic violence.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or permission

CRCJ 4410 VICTIMOLOGY (3 credits)

This course provides an introduction to the topics and issues that are pertinent to the study of victimology. Students will learn about the prevalence, predictors, and consequences of various forms of victimization, including child abuse, intimate partner violence, rape and sexual assault, stalking, and homicide over the life-course. In addition, students will learn about the nature of criminal justice victimization data, and the issues related to the measurement and costs of victimization.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or permission.

CRCJ 4420 CHILD ABUSE AND NEGLECT (3 credits)

This course addresses issues related to child abuse and neglect investigation, intervention and prevention efforts facilitated through criminal justice system processes. Course content discusses the history of child maltreatment, definitional challenges, statistical trends, physical and behavioral indicators, mandatory reporting, investigative processes, intervention strategies and prevention efforts.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission

CRCJ 4430 HUMAN TRAFFICKING (3 credits)

This course is designed to provide students with a systematic introduction to the study of human trafficking. Students will learn about what constitutes human trafficking, theories of victimization as they apply to trafficking, debates about the language and definitions surrounding sex trafficking and prostitution. Students will discuss the prevalence, predictors, and consequences of various forms of trafficking and critically assess efforts related to measurement, intervention, and prevention.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or permission.

CRCJ 4440 VICTIMS' RIGHTS AND SERVICES (3 credits)

This course focuses on the experiences of victims of crime through the criminal justice system, from reporting the crime to case closure. Students will learn about the types of victim services and advocacy throughout various points of the criminal justice system (e.g., police, courts, corrections), as well as about the history of victims' rights and the development of victim services over time.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or permission

CRCJ 4450 SEXUAL VIOLENCE (3 credits)

This course will examine the complicated nature and dynamics of sexual violence. Students will learn about the nature and extent of sexual violence. Data and measurement issues will be addressed as well as the history of system responses to sexual violence and victimization.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours or instructor permission

CRCJ 4510 VIOLENCE (3 credits)

This course will examine the social, political and psychological aspects of violence. It will identify various analytical approaches to the study of violence: identifying violent groups, reviewing societal response to violence, and examining police and governmental responses to reduce or control violence. Please note that a core competency of this course is critical thinking. Critical thinking requires students to think through situations, facts, and issues in an open-minded and objective way in an effort to analyze and evaluate information in an informed manner.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission

CRCJ 4520 DRUGS AND CRIME (3 credits)

Drugs and Crime is an introduction course to the major facts and issues concerning criminal justice and drug-taking behavior in America. It is specifically designed to provide the means for understanding (1) the multiple challenges that drug abuse brings to our society, (2) the drug control policies we have enacted to meet those challenges, (3) the range of international and domestic law enforcement efforts and drug control strategy, and (4) the systems of criminal justice that have been established to deal with the prosecution of drug law offenders.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours or instructor permission

CRCJ 4530 SEXUAL OFFENDING (3 credits)

In this course students will learn about sex offenses, sex offenders, and the responses of the criminal justice system. This course will examine applications of theory to sex offending, trends and patterns of behavior, characteristics of sex offenders, and the psychological and legal responses to sex crimes.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours or instructor permission

CRCJ 4540 CRIMINAL INVESTIGATIONS (3 credits)

This course examines the processes, practices, and people involved in the investigation of criminal acts, highlighting recent developments in policy, tactics and technology. We explore theoretical approaches to investigating various crimes, examining how aspects of each approach can benefit investigators. We will analyze, discuss, and learn how to complete thorough investigations that will ensure best chances for successful case prosecution in court.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission

CRCJ 4550 GANGS AND GANG CONTROL (3 credits)

This course will examine criminal street gangs, including these gangs' members, activities, underlying dynamics, and the roles that drugs and sex trafficking play in gang activity. We will consider the history and proliferation of gangs in the United States, common characteristics of U.S. gangs across different regions, how gangs obtain their power and the connection between street gangs and prison gangs. Lastly, we will evaluate multiple methods employed by communities and law enforcement to control and defeat criminal street gangs.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours

CRCJ 4560 HOMICIDE INVESTIGATIONS (3 credits)

This course is designed to present an overview of the crime of homicide. Attention is given to homicide data, theories of why homicides occur, types of homicide, investigating/solving homicides, prosecuting homicide cases, and the impact on co-victims and society as a whole. Students will use critical thinking skills while exploring various investigative techniques.

Prerequisite(s): CRCJ 1010, ENGL 1150 and 45 credit hours; or instructor permission

CRCJ 4710 COMPARATIVE CRIMINAL JUSTICE SYSTEMS: ENGLAND (3 credits)

This is a specialized course which provides a comparison of the criminal justice systems of the United States and the United Kingdom. The design of the course allows for an exploration of how the American system developed from the British system and why social and cultural factors influenced the differences/similarities in their development.

Prerequisite(s): CRCJ major or CRCJ minor and permission of the instructor. Not open to non-degree graduate students.

CRCJ 4740 HOMELAND SECURITY (3 credits)

Students will learn about the history of homeland security including historical laws and regulations constructing and modifying the current national structure of homeland security in the United States. They will examine the complexities of homeland security while exploring disciplinary subfields of threats to national security including counterterrorism studies, transportation security, border security and immigration, cybersecurity, community resilience, and the associated response of the homeland security apparatus. This course is recommended for students with an interest in criminal justice careers at the federal level.

Prerequisite(s): CRCJ 1010, ENGL 1150 and 45 credit hours; or instructor permission

CRCJ 4750 INTERNATIONAL CRIMINOLOGY AND CRIMINAL JUSTICE (3 credits)

This course analyzes the dynamics of criminality and the social response to criminality across countries. Differences in crime and justice between developed and developing countries and between socialist and capitalist nations are emphasized.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission.

Distribution: Global Diversity General Education course

CRCJ 4760 TERRORISM (3 credits)

This course is designed to assist the student in developing an understanding of terrorism as a political crime. It includes an examination of the social, political and psychological aspects of this behavior.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission.

Distribution: Global Diversity General Education course

CRCJ 4770 ORGANIZED CRIME (3 credits)

This course will deal with issues surrounding the phenomena of organizational crime. The student will be exposed to theories, concepts, case studies and issues relating to this topic. Organizational crimes are some of the most dangerous to American society and range from the commonly known offenses of gambling and narcotics trafficking to the more subtle and sophisticated crimes of extortion, commercial bribery, and political corruption.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission

CRCJ 4780 WHITE COLLAR CRIME (3 credits)

This course is designed to examine those illegal acts committed by nonphysical means and by concealment or guile, to obtain money or property, to avoid the payment or loss of money or property, or to obtain business or personal advantage.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours

CRCJ 4790 CYBER & COMPUTER CRIMES (3 credits)

This course is designed to provide students with an introduction to cybercrime. Cybercrime is an extremely broad term that encompasses a wide variety of criminal behaviors. Specifically, this course is designed to introduce students to the following: how the digital world has influenced crime, theories related to cybercrime, types of cybercrimes, the implications of computer crimes and cyber-terrorism, privacy and freedom of speech in the context of the digital world, and the challenges cybercrime poses for our criminal justice system.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours or instructor permission

CRCJ 4800 SPECIAL TOPICS (3 credits)

This course is a topical approach that explores various aspects of Criminology and Criminal Justice. Topics and disciplines will vary from term to term. Course description will be announced in advance. This course will be devoted to the exploration and analysis of contemporary problems in the criminal justice system.

Prerequisite(s): CRCJ major; CRCJ minor; CRCJ 1010 and jr/sr standing; or instructor permission.

CRCJ 4950 INDEPENDENT STUDY (1-3 credits)

Students explore a topic of interest under the close supervision of a faculty member. The student and faculty member work together to establish a plan of study which may include independent reading and writing, applied activities, research activities and products, and/or other activities deemed appropriate. The student is responsible for selecting a possible topic of study before contacting the faculty member.

Prerequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; instructor permission. Not open to non-degree graduate students.

CRCJ 4960 ISSUES IN CRIME AND JUSTICE (3 credits)

This is a capstone course. Each student will identify and explore a contemporary issue relevant to crime and justice policy. Students will develop multimedia packages designed to educate and advocate for their chosen policy action (e.g., adoption, reform, replacement). The purpose of the course is to allow students to integrate their previous course experiences and skills, independent research, and community stakeholder engagement (via interviews) into an activity that demonstrates critical thinking, synthesis, and evaluation.

Prerequisite(s): CRCJ majors with senior standing, OR permission of the instructor. Not open to non-degree graduate students.

CRCJ 4970 SENIOR HONORS PROJECT/THESIS (3-6 credits)

An independent research project supervised by School faculty. The senior honors project must be approved by the CPACS Honors Coordinator.

CRCJ 4990 APPLIED SENIOR ASSESSMENT (1 credit)

This course is intended to give students an opportunity to reflect on their curricular and personal development during their undergraduate career. Students will have the opportunity to develop several career development artifacts. It is also used as a tool to help monitor progress toward the SCCJ's student learning outcomes (SLOs) and identify needed changes.

Prerequisite(s): Graduating seniors must register for and complete CRCJ 4990 in the term in which they plan to graduate. Not open to non-degree graduate students.

CRCJ 4999 SENIOR ASSESSMENT (0 credits)

This assessment tool is part of the School's Student Outcomes effort. It is designed to monitor the School's performance and to identify changes needed. Graduating seniors must register for and complete CJUS4999 - Senior Assessment in the term in which they plan to graduate.

Prerequisite(s): Students must register for CJUS 4999 in the term in which they plan to graduate. Not open to non-degree graduate students.

CRCJ 8010 NATURE OF CRIME (3 credits)

This course provides an overview of the major dimensions of crime in the U.S. Content areas included are the epidemiology of crime, the costs of crime and typologies of crime and criminals.

Prerequisite(s): Admission to UNO Graduate College.

CRCJ 8020 SEMINAR IN ADMINISTRATION OF JUSTICE (3 credits)

This course is designed to provide students with a critical understanding of responses to crime. Particular emphasis is placed on theory and research bearing upon the effectiveness of the policies and strategies of the principal institutions of the criminal justice system - the police, courts and corrections. Additionally, philosophical and practical matters pertaining to "justice" and "fairness" in the administration of the criminal law are explored.

Prerequisite(s): Admission to UNO Graduate College.

CRCJ 8030 CRIMINAL JUSTICE RESEARCH THEORY AND METHODOLOGY (3 credits)

Research theory and methodology in the social sciences as applicable to criminal justice; preparation of research designs, conceptual models; sampling procedures; and development of individual research papers.

Prerequisite(s): Admission to UNO Graduate College.

CRCJ 8040 SEMINAR IN POLICE AND SOCIETY (3 credits)

This course is designed to explore the role of the police in American society. Attention is given to the origins of policing, the nature of police organizations and police work, and patterns of relations between the police and the public. The values of a democratic society as they affect the law enforcement role are discussed.

Prerequisite(s): Admission to the graduate program in Criminology and Criminal Justice; or admission to the UNO graduate program and permission of instructor.

CRCJ 8050 SEMINAR IN CORRECTIONS (3 credits)

This course is designed to give an analytical perspective to the history, development, implementation and future of critical issues in the field of corrections. Primary focus will be directed toward an exploration of the various theoretical approaches to corrections and the research intended to support or refute these perspectives.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8060 SEMINAR IN THE CRIMINAL COURT SYSTEM (3 credits)

This course is designed to provide a social science perspective on the role of the courts in the criminal justice system. The ideals of the system will be compared with actual functioning, and court reform programs and proposals will be critically examined.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8070 SEMINAR IN CRIMINAL LAW AND PROCEDURE (3 credits)

This course is designed to examine substantive criminal law as the basis of social control in our country. Contemporary issues such as the insanity defense, decriminalization of so-called victimless crimes, sexual assault and abortion, and current proposals to assist victims of crimes will be among the topics explored. In addition, current criminal procedure problems relating to right to counsel, search and seizure and interrogation will be examined.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8080 SEMINAR IN JUVENILE JUSTICE (3 credits)

An inquiry in the social ramifications of the entire juvenile delinquency process including labeling, detention, incarceration and tolerance. Pre- and post-adjudicatory issues are dealt with as well as a realistic perspective given to delinquency prevention strategies.

Prerequisite(s): Admission to UNO graduate program.

CRCJ 8090 SEMINAR IN THEORETICAL CRIMINOLOGY (3 credits)

A study of the etiology of crime as a social phenomenon and an objective analysis of the historical influences and thought which molded its development into an accepted contemporary science.

Prerequisite(s): Admission to graduate program in criminology and criminal justice; or admission to UNO graduate program and instructor permission.

CRCJ 8100 CRIMINAL JUSTICE ORGANIZATION, ADMINISTRATION AND MANAGEMENT (3 credits)

This course will deal with issues in the organization and administration of modern justice agencies. The students will be exposed to theories, concepts, and issues relating to the administration and organization of justice agencies.

Prerequisite(s): Admission to the graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8110 VICTIMOLOGY (3 credits)

The Victimology seminar provides an overview of key research areas on prevalence, predictors, and consequences of various forms of victimization. By the end of the course, students will develop a critical understanding and appreciation of the development and current state of theories of victimology, measurement of different types of victimization, and quantitative and qualitative results that have been used to inform research in the field. Furthermore, students will learn how to critically analyze and interpret primary research regarding victimization.

Prerequisite(s): Admission to UNO graduate program.

CRCJ 8120 RACE, CRIME AND INJUSTICE (3 credits)

This course examines inequities in the context of the cumulative effects of biases in the criminal justice system. Students learn how macro-structural conditions, community violence, depletion of male role models as the result of incarceration, and adversarial contacts with police can negatively impact young children residing in some lower socio-economic communities of color as well as increase their likelihood of early contact with the juvenile justice system.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and permission of the instructor.

CRCJ 8130 SEMINAR IN WOMEN AND CRIMINAL JUSTICE (3 credits)

This course focuses on the experiences of women in the criminal justice system. It will cover the history of criminological theory on women, application of mainstream criminological theory to women, and women as offenders, victims, and professionals in the criminal justice system.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8136 SOCIOLOGY OF DEVIANT BEHAVIOR (3 credits)

This course is designed to investigate the etiology of many forms of norm-violating conduct. Emphasis will be placed on rule-breaking behavior as defined in the criminal statutes. (Cross-listed with CRCJ 4130).

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8180 CRIMINAL JUSTICE INTERNSHIP (3 credits)

This course is designed to provide supervised individualized learning experiences in a selected criminal justice agency. The principal objective of the internship is to provide students with the opportunity to apply theoretical and methodological principles acquired in graduate courses to the analysis of problems in local criminal justice agencies.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice, successful completion of 15 hours of graduate work, and permission of instructor. Not open to non-degree graduate students.

CRCJ 8190 INDEPENDENT STUDY (1-3 credits)

Individual projects in research, literature review or creative production which may or may not be an extension of course work. The work will be supervised and evaluated by departmental graduate faculty members.

Prerequisite(s): Admission to graduate program at UNO, and permission of instructor.

CRCJ 8210 PROGRAM EVALUATION AND POLICY ANALYSIS (3 credits)

This course is a survey of program evaluation and policy analysis techniques. The focus is on theoretical foundations of the Criminal Justice policy process, program development and implementation, research designs specific to program evaluation and policy research, and methodological techniques commonly used to evaluate criminal justice programs and policies.

Prerequisite(s): Admission to doctoral program in Criminology and Criminal Justice; or admission to graduate program at UNO and CRCJ 8030; or instructor permission.

CRCJ 8230 TERRORISM (3 credits)

A course devoted to an exploration and analysis of contemporary special problems in the broad spectrum of law enforcement and corrections.

CRCJ 8300 COMMUNITIES AND CRIME (3 credits)

This course is designed to provide an analytical perspective to the meaning of community, theories that explain community-level crime, and police decision-making at the community level. The primary focus will be directed toward an exploration of the various theoretical approaches to explaining community-level crime, with a special emphasis on police action. This course will enable students to become proficient in the topic of community-level theories of crime and determine whether communities perpetuate or prevent criminal behavior.

Prerequisite(s): Admission to a Criminology and Criminal Justice graduate degree program, or UNO SCCJ Graduate Program Coordinator permission. Not open to non-degree graduate students.

CRCJ 8356 COMMUNITY-BASED CORRECTIONS (3 credits)

This course is intended for advanced students with a special interest in the correctional process as applied in a community setting. It is designed to focus on innovative community-based strategies for dealing with the offender as well as the traditional processes of probation and parole.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8400 INTIMATE PARTNER VIOLENCE (3 credits)

This course examines the complex nature and dynamics of intimate partner violence (IPV). The course begins with a general presentation of IPV, such as definitions, characteristics, and the cycle of IPV. Then, theories of IPV are presented and various sources of IPV data and measurement issues are discussed. The majority of the course focuses on the historical development/evolution and current response of the criminal justice system to IPV including law enforcement response, the use of protection orders, domestic violence courts, and batterer intervention treatment programs. Additionally, the course examines "special topics" regarding IPV including teen dating violence, intimate partner homicide, and IPV within criminal careers.

Prerequisite(s): Admission to a UNO graduate degree program, or permission of the UNO School of Criminology and Criminal Justice Graduate Program Coordinator. Not open to non-degree graduate students.

CRCJ 8430 HUMAN TRAFFICKING (3 credits)

This course is designed to provide students with a systematic introduction to the study of human trafficking. Students will learn about the prevalence, predictors, and consequences of human trafficking. Additionally, students will develop a critical understanding and appreciation of the development and current state of theories, measurement, and quantitative and qualitative results that can be used to inform our understanding of the nature of these events, the victims who are harmed, the individuals who facilitate these crimes, and identification and response initiatives.

Prerequisite(s): Admission to a UNO graduate degree program, or UNO SCCJ Graduate Program Coordinator permission. Not open to non-degree graduate students.

CRCJ 8450 SEXUAL VIOLENCE (3 credits)

This course will examine the complicated nature and dynamics of sexual violence (SV). The course will begin with a general presentation of sexual violence, such as definitions and the nature, characteristics, and extent of SV. We will also consider the impact of doing "sexual violence" work on criminal justice and victim service practitioners (e.g., vicarious trauma) and the importance of self-care. Next, various tools to measure SV, sources of SV data, and measurement issues will be discussed. Then, we will move on to the major focus of this class - the historical development and evolution of different legislative, criminal justice system, and victim service system responses to sexual violence. Finally, we will examine some of the responses to sexual violence that have been generated outside of formal systems of care.

Prerequisite(s): Admission to the University of Nebraska at Omaha Graduate School

CRCJ 8516 VIOLENCE (3 credits)

This course is a survey of the nature and extent of violence. The focus is on patterns of violence across social groups, the causes and correlates of violence and violent behavior, and programs/policies geared toward violence prevention and reduction. Also of interest is the relationship between theory and violence research.

Prerequisite(s): Upper-division CRCJ major; CRCJ minor; or CRCJ 1010 and jr/sr standing.

CRCJ 8800 SPECIAL PROBLEMS IN CRIMINAL JUSTICE (3 credits)

A course devoted to an exploration and analysis of contemporary special problems in the broad spectrum of criminal justice philosophy. This course looks at philosophical issues related to social control. The purpose of this course is to foster a deeper understanding of the reasons, justifications, and problems related to societal approaches to the control of its citizens.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or UNO graduate student and permission of instructor.

CRCJ 8850 RISK/NEEDS ASSESSMENT (3 credits)

This course is designed to provide students with advanced knowledge and understanding risk and needs assessment used in case management and classification within the criminal justice system and related social services.

Prerequisite(s): Admission to graduate program in criminology and criminal justice; or, instructor permission.

CRCJ 8950 STATISTICAL APPLICATIONS IN CRIMINAL JUSTICE & PUBLIC ADMIN (3 credits)

This is a required course which provides a foundation for the use of statistical methods in criminal justice and public affairs research. It will review fundamentals of research, showing the interplay between the theory, the research, the statistical method, and the interpretation.

Prerequisite(s): Admission to UNO Graduate college.

CRCJ 8970 CAPSTONE PROJECT IN CRIMINOLOGY AND CRIMINAL JUSTICE (3 credits)

The Capstone Project offers each student the opportunity to demonstrate mastery of the theory and practice of Criminology and Criminal Justice by applying the knowledge and skills gained in the Master of Science program to a project of the student's choice. This involves completing a project report reflecting the cumulative knowledge gained from these experiences. This class is intended only for students who are completing their Master of Science degree in Criminology and Criminal Justice.

Prerequisite(s): Admission to Criminology and Criminal Justice MS program, and completion of a minimum of 24 credit hours; or permission of Masters Program Coordinator. Not open to non-degree graduate students.

CRCJ 8990 MASTERS THESIS (1-6 credits)

The thesis is required for all students in the MA program. It provides students with an opportunity to integrate theories, concepts, and aspects of the criminology and criminal justice literature with methods and techniques for conducting research, through the completion of an original research project. The thesis project should constitute original research and is conducted under the supervision of a Masters Thesis Committee.

Prerequisite(s): Admission to the MA program in Criminology and Criminal Justice; and, CRCJ 8010, CRCJ 8020, CRCJ 8030, CRCJ 8950 and 6 other 8000+ CRCJ courses. Not open to non-degree graduate students.

CRCJ 9010 SEMINAR ON LAW & SOCIAL CONTROL (3 credits)

This is a required course which will examine the relationships between the state, the law, and the citizen in a democratic society. It will also examine the relationship between social control, law and social change.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or UNO graduate student and permission of instructor.

CRCJ 9020 SEMINAR ON THEORIES OF CRIME (3 credits)

This is a required course which emphasizes conceptual and theoretical issues in contemporary criminological theory. It also provides students with a working knowledge of theory construction.

Prerequisite(s): Admission to Criminology and Criminal Justice MA or PhD graduate programs; or admission to UNO graduate program and instructor permission.

CRCJ 9030 SEMINAR ON RACE, ETHNICITY, AND CRIMINAL JUSTICE (3 credits)

This is a required course which introduces students to current empirical research and theory on racial minorities and the criminal justice system. It focuses on racial minorities as victims of crime, as offenders, and as criminal justice professionals.

Prerequisite(s): Admission to UNO graduate program.

CRCJ 9040 COMPARATIVE CRIMINOLOGY AND CRIMINAL JUSTICE SYSTEMS (3 credits)

This course provides a cross-national examination of the dynamics of criminality and the social response to crime. It also describes the extent and nature of crime in different countries.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and instructor permission.

CRCJ 9050 ACADEMIC WRITING (3 credits)

This course is designed to familiarize students with academic and professional writing with the goal of promoting the development of formal writing and organizational skills. Students will learn how to construct and organize scholarly papers to better prepare them for the comprehensive examination, the doctoral dissertation, the development of scholarly journal articles and monographs, and the development of funded project proposals.

Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and permission of instructor.

CRCJ 9080 ADVANCED STATISTICAL APPLICATIONS (3 credits)

This is a required course which will provide the student with fundamentals of modern statistical techniques used in criminal justice and public affairs research. (Cross-listed with PA 9080).

Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and CRCJ 8950 or PA 8950 and instructor permission.

CRCJ 9090 SPECIAL PROBLEMS IN RESEARCH METHODS (3 credits)

This course will explore specialized topics in research methodology. The course assumes that participants have a firm understanding of the basic principles of research methods and statistics.

Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9100 SPECIAL PROBLEMS IN STATISTICAL ANALYSIS (3 credits)

This course will explore advanced techniques of statistical analysis within the field of criminal justice. It assumes that participants have taken courses in basic descriptive and inferential statistics and advanced multivariate analysis of variance and regression.

Prerequisite(s): Admission to the graduate program in Criminology and Criminal Justice and CRCJ 9080; or admission to UNO graduate program, CRCJ 9080, and permission of the instructor.

CRCJ 9130 ADVANCED RESEARCH ON POLICING (3 credits)

This course will explore critical research issues in American policing. The focus of the course may vary and cover topics such as police discretion, police use of force, labor unions in law enforcement, gender differences in policing, and police organization management.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and permission of the instructor.

CRCJ 9150 SPECIAL TOPICS IN CRIMINAL JUSTICE RESEARCH (3 credits)

This course will focus on specialized topics in criminology & criminal justice research. The purpose of the course is to provide students with an opportunity to read and critique current research on topics such as the history of the criminal justice system, civilian review of the police, sentencing, or the application of the death penalty.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9160 SEMINAR IN COMMUNITY-BASED CORRECTIONS (3 credits)

This course will deal with strategies of correctional reform and with models and practices of community-based corrections. Recent innovations in community-based corrections will be examined to demonstrate how they fit into an overall correctional strategy.

Prerequisite(s): Admission to UNO graduate program.

CRCJ 9170 ADVANCED SEMINAR ON CORRECTIONS (3 credits)

This graduate-level seminar provides an overview of critical areas in corrections research and discusses the many complexities facing corrections. Students will gain an understanding of correctional theory, practices, policies, and issues that impact different stages of correctional processing, incarcerated individuals, correctional staff and the organization. Students will develop a broad but critical understanding of the current state of correctional research.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to a UNO graduate program and instructor permission.

CRCJ 9180 SEMINAR ON THE CRIMINAL COURT SYSTEM (3 credits)

This course will focus on the structure, organization, and operation of the state and federal court systems in the United States. The purpose of the course is to survey recent research on the dynamics of courthouse justice—charging, plea bargaining, bail decision making, jury decision making, and sentencing.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 9200 SEMINAR ON VIOLENT CRIME AND CRIMINAL BEHAVIOR (3 credits)

This course exposes students to the leading theories and research in the area of violent criminal behavior. It addresses major violent crimes including rape, homicide, and child sexual physical abuse.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 9220 ADVANCED CRIMINOLOGICAL THEORY AND THEORY CONSTRUCTION (3 credits)

This course is designed to extend students' knowledge of theory and theory construction beyond the basics of the elements and propositions of particular criminological theories. Students will have an opportunity to examine in depth topics such as theory construction, theory integration, theory compatibility and synthesis, and new directions in criminological theory.

Prerequisite(s): CRCJ 8090 or CRCJ 9020 and admission to graduate program in Criminology and Criminal Justice; or permission of instructor.

CRCJ 9250 SEMINAR ON VICTIMIZATION ACROSS THE LIFE-COURSE (3 credits)

The Seminar on Victimization across the Life-course provides graduate students a survey of the primary topics regarding the predictors and consequences of victimization at various points in life. This an elective course for graduate students in Criminology and Criminal Justice. By the end of the course, students will understand major theories, research methods, and seminal research studies in the victimology field. Furthermore, students will learn how to critically analyze and interpret primary research regarding victimization.

Prerequisite(s): Admission to UNO graduate program. Not open to non-degree graduate students.

CRCJ 9700 TEACHING CRIMINAL JUSTICE AT THE COLLEGE/ UNIVERSITY LEVEL (3 credits)

This seminar is a required course for doctoral students in criminal justice. The purpose of the course is to provide students with the knowledge and skills that will enable them to become informed, effective, and stimulating teachers. A variety of pedagogical issues will be covered during the course of the semester; theories of learning and student motivation; constructing a course syllabus; designing effective writing assignments and in-class exercises; leading class discussions; testing and grading; and managing the classroom.

Prerequisite(s): Admission to Criminology and Criminal Justice PhD graduate program; or admission to Criminology and Criminal Justice MA or MS graduate program and instructor permission. Not open to nondegree students.

CRCJ 9800 ADVANCED RESEARCH DESIGN (3 credits)

This is a required course which will expose students to advanced topics in research methods in preparation for writing their doctoral dissertation. It will also apply advanced methodological techniques to problems in the field.

Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9980 DIRECTED READINGS IN CRIMINOLOGY & CRIMINAL JUSTICE (1-6 credits)

This course is designed to provide the advanced graduate student with the opportunity to do extended readings on a specialized criminology or criminal justice topic.

Prerequisite(s): Admission to graduate program in criminology and criminal justice or UNO graduate program, and permission of instructor.

CRCJ 9990 DISSERTATION (1-20 credits)

The dissertation is an original research project conducted and written under the direction of a faculty dissertation committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge on crime and criminal justice.

Prerequisite(s): Completion of all coursework, completion of the comprehensive examination, and permission of Supervisory Committee Chair. Not open to non-degree graduate students.

Criminology & Criminal Justice, Bachelor of Science

The Bachelor of Science in Criminology and Criminal Justice (BCCJ) degree requires the completion of 120 credit hours with a cumulative grade point average (GPA) of 2.0. Core major requirements are guided by a series of

student learning outcomes and include criminology and criminal justice electives.

Student Learning Outcomes:

- Demonstrate mastery of core areas in criminology and criminal justice.
- Locate, integrate and use information from varied sources to effectively communicate in writing and other mediums.
- Apply specialized knowledge through field-based learning experiences, civic and/or community engagement activities, and/or policy analysis.
- Explain diverse positions, including those representing different cultural, economic, and geographic interests in the context of criminology and criminal justice.

¹ A score of "ENGL 5" on the English Placement Exam is needed in order to enroll in ENGL 1150

² Natural & Physical Science courses must be selected from this list: <https://www.unomaha.edu/general-education/approved-courses/natural-and-physical-sciences.php>

³ Social Science courses must be selected from this list: <https://www.unomaha.edu/general-education/approved-courses/social-sciences.php>

⁴ CMST 1110 or CMST 2120 may be taken towards the Public Speaking Requirement

⁵ Humanities & Fine Arts courses must be selected from this list: <https://www.unomaha.edu/general-education/approved-courses/humanities-and-fine-arts.php>

⁶ Math ACT 0-18 must take MATH 1120 or MATH 1130, MATH ACT 19+ may take an elective

⁷ Statistics requires Math ACT 19+ or completion of MATH 1120 or MATH 1130

⁸ ENGL 2400, ENGL 3980 or MKT 3200 may be substituted for CRCJ 3100

⁹ An area of concentration or a minor is required for all CRCJ majors. The area of concentration must contain at least 18 credit hours chosen in consultation with the CRCJ academic advisor

¹⁰ Select any courses in the 3000 or 4000 levels of CRCJ for CRCJ upper level

¹¹ CRCJ 4990 must be taken during graduating semester

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found

at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

Division of Continuing Studies

Division of Continuing Studies

For over 70 years, the Division of Continuing Studies (DCS) has been dedicated exclusively to the needs of adult and contemporary learners by *meeting students where they are*. DCS works to elevate the adult student voice across the institution to foster a culture of inclusion. Although the higher education landscape has changed, our core beliefs and guiding principles have not. Since our beginning, we've worked to raise awareness of the characteristics and circumstances of adult learners, illustrate the value that our multigenerational students bring to UNO, and provide opportunities for undergraduate degree attainment that honors their unique and diverse needs.

DCS was founded with an entrepreneurial spirit and has sustained a culture of resilience, adaptability, and innovation. The nontraditional design of our unit and degree program is what has allowed us, and in turn, our students, to thrive. Our expertise is in serving the needs of adult and contemporary learners. Our commitment is to help our students realize their academic goals by honoring their unique needs and circumstances. Our passion is in

advocating for a diverse population of learners who do not fit the first-time, full-time mold for whom much of higher education has been designed.

Our Program

We offer one degree with multiple Concentrations. The Bachelor of Multidisciplinary Studies (BMS) degree program is available online, on-campus, or through a combination of online and on-campus classes. Awarded to over 27,000 students since 1950, it is one of the nation's oldest multidisciplinary degrees and is part of UNO's longstanding, rich tradition of serving military and veteran students.

Campus Locations/Services

UNO Campus Location

DCS is on the second floor of the College of Public Affairs and Community Service building (CPACS 207) on UNO's Dodge Street campus. This location serves as the headquarters of our operations. To provide high touch services to our students and to accommodate their busy lives, students are able to meet with staff over the phone, online, and in person. In addition to the normal 8-5 weekday business hours, students can meet with our professional advisors in the evening.

Offutt Air Force Base

A branch of DCS is located at Offutt AFB in Building C, Room 222. UNO/DCS at Offutt, in partnership with the Offutt AFB Education Office, offers a wide array of services to increase educational opportunities for active-duty military, as well as the larger Offutt AFB community. DCS also oversees the testing center at Offutt, offering CLEP, DSST, and Pearson Vue proctoring services. The testing center is located in Building C, Room 204.

Student-Centered Service

Through a holistic approach to student success, DCS works to support, empower, and advocate for the needs of adult and contemporary learners. DCS practices an assigned advising model to build relationships and offer personalized guidance to students from pre-admission exploration through graduation celebration. Our students take varied pathways and thus require individualized attention to create a smooth transition through their university experience.

DCS Course No Activity Drop Policy

DCS offers a variety of courses online each semester to support our learners' needs. This policy pertains to student activity in registered online courses offered through our division.

Students are considered to have "no activity" if they do not log in to Canvas and initiate active participation in an "academically related activity" during the designated drop period for the course as outlined below:

- Non-Accelerated Courses: At the end of the fifth day of the course.
- 6-Week Accelerated Courses: At the end of the second day of the course.

Note: Merely logging in to the Canvas course does not constitute engaging in an academically related activity.

Academic Related Activities in an online course include but are not limited to:

- Student submission of an academic assignment.
- Student submission of an exam.

- Documented student participation in an interactive tutorial or computer-assisted instruction.
- A posting by the student showing their participation in an online study group assigned by the institution.
- A posting by the student in a discussion forum showing the student's participation in an online discussion about academic matters.
- An email from the student or other documentation showing that the student-initiated contact with a faculty member to ask a question about the academic subject studied in the course.

If a student fails to meet these requirements, they are considered as having "no activity" and will be notified of administrative removal from the course.

If students are Financial Aid recipients and dropped for having "no activity" they will have their aid adjusted to reflect the actual number of credits for the courses they are attending.

Only students dropped in error will be enrolled back in the class. If the situation arises and a student is reenrolled in the course, they must contact the Financial Aid Office requesting that aid be reevaluated for reinstatement. If reinstated, aid will again be adjusted based on enrollment status and eligibility.

Students who wish to drop a class during the designated drop period should still follow the University policy to change their enrollment. A No Activity drop is different from a withdrawal. Please review the Withdrawal Policy for more details.

Civility Statement

Student learning is a priority in the Division of Continuing Studies (DCS). We value the inherent worth and dignity of every person, and work to foster a community of mutual respect. To achieve these ideals, all DCS students are expected, while in the role of student or representative of the University, to exhibit, and practice civil behaviors that exemplify:

- Respecting faculty, staff, fellow students, guests, and all University property, policies, rules, and regulations;
- Taking responsibility for one's choices and actions;
- Accepting the consequences of one's inappropriate choices and actions;
- Communicating in a professional and courteous manner in all forms, and all times, whether verbal, non-verbal, or written.

Behavior that is contradictory to the above and to the standards outlined in the UNO Student Code of Conduct (p. 40) will be taken seriously and appropriately reported.

Goals

DCS provides educational experiences, both curricular and co-curricular, for students to develop and enhance the skills, abilities, and perspectives to be self-directed, lifelong learners. DCS supports holistic growth and development; shaping the contribution our students and graduates make to their lives, their profession, and to society.

The following Program Goals & Graduate Expectations guide our programs and services:

- To ACT Responsibly
- To COMMUNICATE Effectively
- To CONNECT Meaningfully
- To LEARN Continuously
- To THINK Independently

Student Groups

Alpha Sigma Lambda Honor Society

Contact Information

- Main Campus | CPACS 207 | 402.554.2370 | unodcs@unomaha.edu
- Offutt Air Force Base | Building C | Room 222 | 402.554.6305 | unooffutt@unomaha.edu

Admission Requirements

The minimum age for admission to the Division of Continuing Studies is normally 21. However, students under the age of 21 pursuing an undergraduate degree who do not meet the definition of a "traditional" college student may also be eligible for admission to the BMS degree program. Examples may include military-affiliated students; students who are on the path to an alternate UNO academic degree/department/college; and students pursuing an area of study not represented by another UNO degree program.

In order to be considered for admission to DCS, applicants must submit the following:

- Completed UNO application for admission.
- Official high school transcript or high school equivalency examination (GED). This requirement is waived for transfer students with 24 or more credit hours.
- Official transcripts from post-secondary institutions (colleges and/or universities, including CCAF and DLI)

Although not required at the time of application, we recommend that students also submit documentation of credit for prior learning for a comprehensive credit evaluation. These documents may demonstrate college-level learning outside of the traditional classroom and may shorten the time to degree completion. Documents include:

- Official standardized examination scores (e.g., CLEP, DSST)
- Military training and education transcripts (Joint Services Transcript)
- Official transcripts from nationally accredited institutions
- Transcripts documenting evaluated non-college programs (e.g., American Council on Education, National College Credit Recommendation Service)

Degrees Offered

- Bachelor of Multidisciplinary Studies (p. 899)

The diverse, multigenerational student population enrolled in the Bachelor of Multidisciplinary Studies (BMS) degree program have varied prior learning experiences, personal interests, and career goals. BMS graduates pursue a wide range of careers in many fields depending on their selected content areas, previous work and life experiences, as well as the selection of courses taken within their program of study. As part of the Bachelor of Multidisciplinary Studies degree, students choose the content they want to study and explain their unique expertise and learning to potential employers.

BMS graduates stand out to employers for their wide range of perspectives and viewpoints, real-world life and work experiences, and transferrable skills developed in the degree program that are beneficial in the workplace and changing world, including:

- Critical thinking and problem solving
- Collaboration and connection
- Ethical judgement and decision making
- Adaptability and flexibility

The more than 27,000 graduates of our program have:

- Advanced in their current career
- Transitioned to new career fields
- Refreshed skills and knowledge
- Pursued graduate degrees
- Achieved personal fulfillment

Our academic advisors take a student-centered approach to advising. With a holistic and student-goal-oriented model of advising, we work with you to identify a degree program that best fits your reason for attending and completing your degree.

Note: Not all students pursue a Bachelors of Multidisciplinary Studies for career reasons.

Bachelor of Multidisciplinary Studies

Bachelor of Multidisciplinary Studies

The Bachelor of Multidisciplinary Studies (BMS) degree offers a distinct multidisciplinary learning opportunity that allows students to pursue areas of study that may be unrelated, cultivates an approach to problem-solving that appreciates and utilizes diverse perspectives and knowledge, and fosters an appreciation and thirst for lifelong learning. Recognizing the diverse needs, interests, and experiences of our multigenerational learners, the BMS program allows for flexibility in acceptance of transfer credit and other college-level learning outside the traditional classroom. The curriculum complements and connects prior learning and the discipline-specific learning students select as part of their degree program.

The BMS curriculum intentionally develops both intellectual and practical skills that enable students to be successful in the 21st Century.

A multidisciplinary approach to learning enhances our students' abilities to:

- Cope with uncertainty and ambiguity.
- Adapt to different contexts and environments in a complex, fast-changing world.
- Appreciate and understand multiple perspectives & viewpoints.
- Look across disciplinary boundaries to consider other viewpoints.
- Develop deeper evaluation skills.
- Draw on different frames of reference to identify solutions.

Student Learning Outcomes

The BMS curriculum is intentionally designed to observe, develop, and enrich program outcomes in our students. Throughout the program, students shape, articulate, and document their progress towards achievement of each Goal and Learning Outcome, independent of where, when, or how the learning was acquired.

All BMS students upon completion of the program will:

- Understand the interconnectedness of real-world issues and assess their own ethical values and responsibility.
- Demonstrate effective, context-appropriate communication.

- Apply and connect knowledge from multiple sources to collaboratively explore complex, real-world issues.
- Value and justify the importance of continuous development and lifelong learning and accurately appraise their capabilities and achievements.
- Utilize creative and independent thinking to ask questions, construct knowledge, and express their distinctive voice.

To learn more about the Bachelor of Multidisciplinary Studies Degree, visit or schedule a meeting with an academic advisor at one of our two Division of Continuing Studies locations:

- CPACS 207 | 402.554.2370 | unodcs@unomaha.edu
- Office at Offutt Air Force Base | 402.554.6305 | unooffutt@unomaha.edu

Fast Track - Business Administration

The College of Business Administration MBA program has developed a FastTrack program for highly qualified and motivated students providing the opportunity to complete a BMS degree and an MBA degree in an accelerated time frame. With FastTrack, students may count up to nine graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BMS degree and desiring to pursue an MBA
- Students must have completed no less than 60 undergraduate hours
- Students must have a minimum undergraduate GPA of 3.0
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their undergraduate advisor to register for the graduate courses
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.
- Please note, BSAD 8110 will apply toward the completion of the BMS degree program requirements, but only as a foundation course for the MBA.

Fast Track - Criminology and Criminal Justice

The School of Criminology and Criminal Justice has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9

graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BS in criminology and criminal justice or those pursuing a BMS with a concentration in criminology and criminal justice desiring to pursue either a MA or MS in criminology and criminal justice
- Students must have completed no less than 75 undergraduate credit hours
- Students must have a minimum undergraduate GPA of 3.5
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their academic advisor to register for the graduate courses
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program but successful completion of the graduate courses will be a significant consideration in admission to the MA or MS in criminology and criminal justice program.
 - The admit term must be after the completion term of the undergraduate degree.

Fast Track - Cybersecurity

The School of Interdisciplinary Informatics (SI2) has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate credit hours towards the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following:
 - Students pursuing a CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field
 - Students pursuing a Bachelor of Multidisciplinary Studies with a concentration in cybersecurity who wish to pursue the MS in cybersecurity.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.

- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in the selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Fast Track - Gerontology

The Department of Gerontology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing the Bachelor of Multidisciplinary Studies desiring to pursue the MA in gerontology
- Students must have completed no fewer than 60 undergraduate hours
- Students must have a minimum undergraduate GPA of 3.0
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their undergraduate advisor to register for the graduate courses
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good academic standing
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted to undergraduate status including financial aid
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code
 - Admission to Fast Track does NOT guarantee admission to the graduate program
 - The admit term must be after the completion term of the undergraduate degree

Fast Track - IT Innovation

The School of Interdisciplinary Informatics (SI2) has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following:

- Students pursuing a CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field
- Students pursuing the Bachelor of Multidisciplinary Studies desiring to pursue the MS in ITIN.
- Students must have completed no less than 60 undergraduate hours and with at least 24 undergraduate credits yet to complete.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit it to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in the selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Fast Track - Management Information Systems

The Department of Information Systems and Quantitative Analysis has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following:
 - Students pursuing a CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field.
 - Students pursuing a Bachelor of Multidisciplinary Studies who wish to pursue the MS in MIS.
- Students must have completed no less than 60 undergraduate hours and within at least 24 undergraduate credits yet to complete.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form, obtain all signatures and submit it to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.

- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
- Admission to Fast Track does NOT guarantee admission to the graduate program.
- The admit term must be after the completion term of the undergraduate degree.

Fast Track - Public Administration

The School of Public Administration has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following who wish to pursue a Master of Public Administration degree:
 - Students majoring in emergency management from the UNO School of Public Administration
 - Students pursuing the Bachelor of Multidisciplinary Studies
- Students should have senior status and must be within at least 30 undergraduate credits yet to complete their undergraduate degree. Exceptional students who do not meet this requirement may be considered.
- Students must have a minimum undergraduate GPA of 3.5.
- Students must complete the Fast-Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- Students must consult with the MPA advisor prior to enrollment in one of the courses listed below.
- A minimum cumulative GPA of 3.5 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the MPA program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - For this program, if students maintain at least a grade of B+ in courses taken, they will be recommended for admission to the MPA program.
 - The admit term must be after the completion term of the undergraduate degree.

The following courses may be taken under the Fast-Track program:

- PA 8050: Foundations of Public Service
- PA 8090: Organizational Theory and Behavior
- PA 8100: Advanced Management and Leadership for Public and Nonprofit Organizations (Note: This course may only be taken if both PA 8050 and PA 8090 are completed).

Fast Track - Urban Studies

The Master of Science in urban studies program has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following who wish to pursue a MS in urban studies:
 - BS in emergency management
 - BS in black studies
 - Bachelor of Multidisciplinary Studies.
- Students must be within at least 30 undergraduate credits yet to complete their undergraduate degree. Exceptional students who do not meet this requirement may be considered.
- Students must have a minimum undergraduate GPA of 3.5.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their undergraduate advisor to register for the graduate courses.
- Students must consult with the urban studies advisor prior to enrollment in one of the courses listed below.
- A minimum cumulative GPA of 3.5 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the MS in urban studies program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - For this program, if students maintain at least a grade of B+ in courses taken, they will be recommended for admission to the MS in urban studies.
 - The admit term must be after the completion term of the undergraduate degree.

The following courses may be taken under the Fast Track program:

- BLST 8886:Seminar on Black Leadership
- UBNS 8000:Seminar in Urban Studies
- UBNS 8060:Introduction to Urban Planning
- UBNS 8020:Race, Ethnicity and American Urban Culture**
- UBNS 8200:Community Organizing and Development**
 - PA 8010:The Public Economy (Must have completed or be concurrently enrolled in UBNS 8000)

Bachelor of Multidisciplinary Studies Requirements

To obtain a BMS, students must fulfill the university, college, and program requirements, including:

- A minimum of 120 credit hours is required, with at least 30 earned at UNO.
- A minimum of 30 credit hours in upper level (3000- or 4000-level) coursework; at least 12 credit hours in the major must be earned at UNO.
- Overall cumulative GPA of at least 2.00, calculated based on all courses in the University of Nebraska (NU) system.
- Grades of C- or better are required in the University General Education courses and in major coursework (MLTI Seminars and Blocks 1-3).

TOTAL HOURS (MINIMUM): 120

Multidisciplinary Studies Major Core

The Multidisciplinary Core consists of three (15-hour) blocks of credit and is designed to combine two or more areas of study, allowing students the opportunity to explore and connect varying perspectives and viewpoints. The Bachelor of Multidisciplinary Studies degree can be constructed in the following two ways:

- Bachelor of Multidisciplinary Studies - Concentration Required (p. 906)
- Bachelor of Multidisciplinary Studies - Concentration Not Required (p. 906)

Pathway Concentration Option

The Pathway concentration is for students who wish to move to another degree program at UNO, but do not currently meet entry requirements for that program. Students work with UNO academic advisors to navigate the transition to their program of choice. Students may not earn a degree through the Pathway concentration, however, may ultimately choose to complete their degree through the BMS program by selecting a Multidisciplinary Studies program of study.

Degree Policies

Second Degree

Students seeking a second degree must complete a NEW 30 hours at UNO, regardless of how many previous hours they have earned, to meet requirements of the additional degree. Students are required to complete the requirements for the Concentration (Blocks 1 & 2) and any required prerequisite coursework. A BGE/BGS/BMS graduate cannot earn a second BMS degree.

Double Area of Concentration

Students pursuing two Areas of Concentration may "double-count" courses to satisfy requirements for both concentrations. It is a students' responsibility to declare both concentrations.

Simultaneous Degrees

Students may simultaneously pursue two different degrees from UNO. The Registrar's Office requires students to complete a minimum of 150 hours for two degrees. Students do not have to receive both degrees at the same time - the Registrar's office will confer the second degree when the requirements are met. Students may not earn two of the same degree nor two of the same concentration/major (e.g., BMS with History concentration and a BA in History, BMS with General Administration concentration and a BSBA).

Academic Amnesty

Academic amnesty gives students the opportunity to rebuild their University of Nebraska system cumulative grade point average (GPA). Students must have been out of the Nebraska system for at least one year to be eligible for academic amnesty and only 'F' and 'D' grades earned within the University

of Nebraska system (UNO, UNL, UNK, UNMC) prior to the year out will be included in the amnesty. All UNO colleges will accept the results of the DCS amnesty. Consult a DCS academic advisor to learn more.

Credit/No Credit (CR/NC) Grades

DCS students may elect to receive a grade of Credit (CR) or No Credit (NC) in lieu of a letter grade. A student earns a CR with a C- grade or higher. Please see University policy regarding eligibility (<https://catalog.unomaha.edu/undergraduate/grades/#text>). In the Bachelor of Multidisciplinary Studies, a maximum of 24 hours may be taken on a Credit/No Credit basis, of which six hours maximum is allowed in the Multidisciplinary Core (Block 1, 2, 3). Students planning to apply to graduate or professional programs should consult with those programs on their acceptance of non-graded credit.

Credit for Prior Learning

The DCS office determines how Credit for Prior Learning (CPL) credits are applied toward graduation requirements in accordance with the policies of the institution, college, and program. Duplicate credit for the same learning is not awarded. For example, students who may have previously taken and passed an English Composition I course at two prior institutions will only get credit for the most recent course taken and passed.

Learning experiences vary, and as such, academic credit for prior learning is highly individualized and must be determined on a case-by-case basis. Many adult and contemporary learners apply some method of CPL towards their BMS degree. Our professional academic advisors work closely with you to determine how the credits may apply to your program of study and your future goals.

All modalities outlined are currently available only to degree-seeking students enrolled in the BMS program. Students enrolled in UNO programs outside of DCS should adhere to the policies established by the respective program and college. Due to the nature of our student population, the BMS program provides the broadest and most flexible CPL policy at UNO. As such, students who change to a non-BMS program at UNO may find that CPL credits do not apply to their new program in the same manner. Students are encouraged to work closely with a DCS academic advisor to determine if CPL is an option.

Students may apply a maximum of 64 credit hours from two-year institutions and a maximum of 65 credit hours from evaluated non-college programs and standardized exams towards their BMS degree. The Division of Continuing Studies does not offer portfolio evaluation of students' life experiences.

Standards for Assessing Learning

Since 1974 the Council for Adult and Experiential Learning (CAEL) has worked with colleges and universities in both the public and private sectors to support the learning goals of adults. CAEL has created standards for assessing CPL. The Division of Continuing Studies has adopted CAEL's ten standards for assessing learning: <https://www.cael.org/ten-standards-for-assessing-learning> (<https://www.cael.org/ten-standards-for-assessing-learning/>)

1. Credit or competencies are awarded only for evidence of learning, not for experience or time spent.
2. Assessment is integral to learning because it leads to and enables future learning.
3. Assessment is based on criteria for outcomes that are clearly articulated and shared among constituencies.
4. The determination of credit awards and competence levels are made by appropriate subject matter and credentialing experts.

5. Assessment advances the broader purpose of equity and access for diverse individuals and groups.
6. Institutions proactively provide guidance and support for learners' full engagement in the assessment process.
7. Assessment policies and procedures are the result of inclusive deliberation and are shared with all constituencies.
8. Fees charged for assessment are based on the services performed in the process rather than the credit awarded.
9. All practitioners involved in the assessment process pursue and receive adequate training and continuing professional development for the functions they perform.
10. Assessment programs are regularly monitored, evaluated and revised to respond to institutional and learner needs.

Transfer Credits from Postsecondary Institutions (Colleges and Universities)

In order to determine if coursework taken at a postsecondary institution other than UNO is eligible for transfer and how it applies to BMS curriculum, DCS relies on the recommendations of the Joint Statement on the Transfer and Award of Credit (AACRAO, CHEA, & ACE, 2021 (<https://www.acenet.edu/Documents/Joint-Statement-on-the-Transfer-and-Award-of-Credit.pdf>)). The three considerations that determine the transferability of credit includes:

1. The educational quality of the institution;
2. The comparability of nature, content, and level of the course that is to be transferred to UNO and applied to the BMS program;
3. The appropriateness and applicability of the credit in relation to BMS plan of study.

Institutional Accreditation

Accreditation serves as the basic indicator that an institution meets certain minimum standards in order to give students and policymakers confidence in the effectiveness of academic quality. As such, DCS recognizes the value of accreditation and has outlined a process for identifying postsecondary credit that may transfer to the BMS program.

Regionally Accredited Institutions

Coursework of comparable content and scope to the UNO and BMS curriculum will generally be transferred if it was completed at colleges and universities accredited by one of the six regional accrediting agencies recognized by the Council for Higher Education Accreditation (CHEA) and the U.S. Department of Education (USDE). Courses must be successfully completed with a grade of C- or better. The six regional accrediting agencies that operate in the U.S. are:

- Middle States Commission on Higher Education
- New England Association of Schools and Colleges
- North Central Association of Colleges and Schools
- Northwest Commission on Colleges and Universities
- Southern Association of Colleges and Schools
- Western Association of Schools and Colleges

Nationally Accredited Institutions

DCS recognizes that institutions may offer programs that are recognized by programmatic or specialized accrediting agencies. Students who have successfully completed coursework at colleges and universities that do not hold regional accreditation may request evaluation of credit for applicability of transfer. As a general rule, DCS requires that the institution and/or program be recognized by an accrediting body that is recognized by both CHEA and USDE during the time period of attendance.

Non-U.S. Tertiary Institutions

UNO takes great pride in the diversity of our student population and welcomes students who have completed postsecondary coursework outside of the U.S. higher education system. Due to the diversity of languages, curriculum, structure and grading schema of non-U.S. colleges and universities, UNO requires a certified translation to accompany transcripts not issued in English by World Education Services, www.wes.org (<http://www.wes.org>), or Educational Credential Evaluators, www.ece.org (<http://www.ece.org>). The translation should be literal and not interpretive. In many cases, international credits will be converted to the U.S. semester system. A DCS academic advisor can provide a list of organizations that provide transcript translation services.

Coursework Not Accepted for Transfer Credit

The following coursework will not be accepted for transfer credit and will not count toward a degree at UNO:

- Courses in which the grade earned is below a C- on 4.0 grading scale (except from the NU system).
- Courses identified by UNO as remedial, such as remedial English, Mathematics and developmental reading.
- Portfolio-based experiential credits awarded by another institution.

Standardized Exams

Standardized examinations are available in disciplines from physics to studio art, from computer science to foreign language. Typically, DCS awards credit for introductory-level courses; although, some students use examinations to demonstrate advanced knowledge.

Eligible Exams

Credit may be earned by successfully completing eligible examinations:

- Advanced Placement Exams (AP): <https://apcentral.collegeboard.com>
- International Baccalaureate Exams (IB): <https://ibo.org>
- College Level Exam Program (CLEP): <https://clep.collegeboard.org/>
- DANTES Subject Standardized Test (DSST) (formerly DANTES): <https://www.getcollegecredit.com/>

Note: AP and IB examinations are normally completed as part of a high school curriculum.

Course and Credit Equivalencies

Course and credit equivalencies for AP, IB, CLEP, and DSST examinations are regularly evaluated and updated. Be advised that examinations accepted for credit, the minimum score required and hours/courses awarded are

subject to change by UNO and DCS at any time without notice. A maximum of 30 hours of exam credit can be applied to the BMS degree.

Course and credit equivalencies for AP, IB, CLEP, and DSST are posted on the UNO website (<https://www.unomaha.edu/registrar/students/before-you-enroll/transfer-credit/clep-credit.php>). Courses not listed on the articulation guide may be eligible for transfer and fulfillment of general elective requirements in the BMS degree program.

Evaluated Non-College Programs

Adult and contemporary learners can demonstrate college-level knowledge and competencies gained from courses, examinations and certifications offered by employers, federal agencies, professional associations, apprenticeship programs, online education providers and other organizations. Courses and training are rigorously reviewed by a team of faculty experts who make recommendations for course-level and credit-hour equivalencies.

Eligible Credit Recommendations

Credit may be awarded for learning assessed by the following organizations:

- **American Council on Education (ACE)**

ACE's College Credit Recommendation Service (CREDIT) has reviewed over 35,000 courses, exams, and learning experiences for academic credits since it was founded in 1974. For more information, visit <http://www.acenet.edu/nationalguide> (<http://www.acenet.edu/nationalguide/>).

- **National College Credit Recommendation Service (NCCRS)**

Formerly known as National PONS, the NCCRS has been evaluating training and education programs for college credit equivalencies since 1973. For more information, visit <http://www.nationalccrs.org/course-credit-directory> (<http://www.nationalccrs.org/course-credit-directory/>).

- **DCS Faculty Academic Policy Committee (FAPC)**

The FAPC provides academic guidance and oversight for the BMS program. In conjunction with UNO faculty, the committee is responsible for reviewing and approving select nontraditional college credit recommendations that may be applied to the BMS program. The committee does not evaluate individual credit requests on an ad hoc basis.

Military Training and Experience

DCS is dedicated to bridging military service with undergraduate curriculum. As part of this commitment, we award academic credit for military training and learning experiences from all branches of the U.S. Armed Forces. As with all methods of CPL, credit awards are at the full discretion of the DCS Office.

- **Army, Coast Guard, Marine Corps and Navy**

In 2013, the Army, Coast Guard, Marine Corps and Navy transitioned to the Joint-Services Transcript (JST) for active-duty, reserve and veteran members. JST replaced the following systems: AARTS (Army), SMART (Navy and Marines), CGI (Coast Guard) and Form DD-295 (all branches). JST CPL credits are posted as other institutional credits, rather than transfer credits. For instructions on how to order a JST, visit <https://jst.doded.mil/faq.html>.

- **Air Force**

Air Force training is certified by the Community College of the Air Force (CCAF). CCAF is regionally accredited by the Southern Association of Colleges and Schools through Air University, therefore, CCAF courses are considered transfer credits at UNO. For instructions on how to order CCAF transcripts, visit <https://www.airuniversity.af.edu/Barnes/CCAF/Display/Article/803247/community-college-of-the-air-force-transcripts/>.

- **Defense Language Institute (DLI)**

Operated by the U.S. Department of Defense (DoD), DLI provides linguistic and cultural instruction to members of the DoD and federal agencies. DLI courses are considered transfer credits at UNO as it is regionally accredited by the Western Association of Schools and Colleges. For instructions on how to order an official transcript, visit www.dlilfc.edu (<http://www.dlilfc.edu>).

Bachelor of Multidisciplinary Studies Degree Concentrations

The curriculum of each BMS Concentration is determined by the faculty of the respective academic department(s). Concentration curricular revisions are made in partnership with academic departments.

- Applied Aging Studies (p. 907)
- Applied Leadership (p. 907)
- Aviation Studies (p. 908)
- Behavioral Health (p. 909)
- Biology (p. 909)
- Communication Studies (p. 910)
- Computer Science (p. 910)
- Criminology and Criminal Justice (p. 911)
- Cross Sector Leadership (p. 911)
- Cybersecurity (p. 912)
- Emergency Management (p. 912)
- English (p. 913)
- Environmental Sciences (p. 913)
- Fine Arts (p. 914)
- General Administration (p. 914)
- General Science (p. 915)
- Geography (p. 916)
- Health Care Administration (p. 916)
- History (p. 917)
- Industrial Distribution & Logistics (p. 918)
- Information Technology (p. 918)
- Library Science (p. 919)
- Management Information Systems (p. 920)
- Media Communication (p. 919)
- Native American Studies (p. 920)

Cross-Sector Leadership Concentration Requirements – 30 Hours		
All of the following		24
MGMT/PA 3800	CROSS-SECTOR COLLABORATIVE LEADERSHIP (^)	
MGMT 1500	INTRODUCTION TO BUSINESS (**)	
ACCT 2000	ACCOUNTING BASICS FOR NON-BUSINESS MAJORS (** ^)	
PA 2000	LEADERSHIP & ADMINISTRATION (**)	
PA 2170	INTRODUCTION TO PUBLIC ADMINISTRATION (**)	

PA 3200	PROGRAM PLANNING AND EVALUATION (^)	
PA 3700	FINANCIAL MANAGEMENT FOR NONPROFITS (^)	
PA 4960	CROSS-SECTOR COLLABORATIVE LEADERSHIP CAPSTONE (^)	
Select two from the following:		6
ENTR 3710	ENTREPRENEURIAL FOUNDATIONS (^)	
PA 3500	NONPROFIT ORGANIZATIONS AND MANAGEMENT (^)	
PA 4440	ORGANIZATIONAL DEVELOPMENT AND CHANGE	
PA 4530	STRATEGIC PLANNING (^)	
Required third content block		15
ELECTIVES		
Elective hours as required to reach a total of 120 hours		

Cybersecurity Concentration

Bachelor of Multidisciplinary Studies, Concentration Required - Cybersecurity Concentration Requirements

Code	Title	Credits
GENERAL EDUCATION REQUIREMENTS - 46 Hours Required		
Minimum of "C-"required		
Fundamental Academic Skills		15
ENGL 1150	ENGLISH COMPOSITION I	
ENGL 1160	ENGLISH COMPOSITION II	
Writing in the Discipline Course		
CMST 1110	PUBLIC SPEAKING FUNDS	
or CMST 2120	ARGUMENTATION AND DEBATE	
MATH 1120	INTRODUCTION TO MATHEMATICAL AND COMPUTATIONAL THINKING	
or MATH 1100	DATA LITERACY AND VISUALIZATION	
or MATH 1130	QUANTITATIVE LITERACY	
or MATH 1140	QUANTITATIVE REASONING FOR HEALTHCARE PROFESSIONALS	
or MATH 1300	COLLEGE ALGEBRA WITH SUPPORT	
or STAT 1100	DATA LITERACY AND VISUALIZATION	
or STAT 1530	ELEMENTARY STATISTICS	
Distribution Requirements		31
Natural Science - From two disciplines and one lab – 7 hrs		
Social Science - From two disciplines - 9 hrs		
Humanities and Fine Arts - From two disciplines – 9 hrs		
Global Diversity - 3 hrs		
US Diversity - 3 hrs		
MAJOR REQUIREMENTS - 51 Hours Required		
**Course will satisfy UNO's General Education requirement		
^Course requires pre-requisite(s)		
All of the following		6
MLTI 3000	MULTIDISCIPLINARY FOUNDATIONS SEMINAR (^)	
MLTI 4000	MULTIDISCIPLINARY CAPSTONE SEMINAR (** ^)	
Cybersecurity Concentration Requirements – 30 Hours		

All of the following		27
CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I (^)	
CIST 3110	INFORMATION TECHNOLOGY ETHICS (** ^)	
CSCI 1620	INTRODUCTION TO COMPUTER SCIENCE II (^)	
CSCI 2240	INTRODUCTION TO C PROGRAMMING (^)	
or CYBR 2250	LOW-LEVEL PROGRAMMING	
CYBR 2600	SYSTEM ADMINISTRATION (^)	
CYBR 3600	INFORMATION SECURITY POLICY AND AWARENESS (^)	
CYBR 4360	PRINCIPLES OF SECURE SYSTEM DESIGN (^)	
CIST 4540	COMPUTER SECURITY MANAGEMENT (^)	
ISQA 3400	INFORMATION TECHNOLOGY INFRASTRUCTURE (^)	
or CSCI 3550	COMMUNICATION NETWORKS	
An additional course from any IS&T department (BIOI, CIST, CSCI, CYBR, ISQA, ITIN)		3
Required third content block		15
ELECTIVES		
Elective hours as required to reach a total of 120 hours		

Emergency Management Concentration

Bachelor of Multidisciplinary Studies, Concentration Required - Emergency Management Concentration Requirements

Code	Title	Credits
GENERAL EDUCATION REQUIREMENTS - 46 Hours Required		
Minimum of "C-"required		
Fundamental Academic Skills		15
ENGL 1150	ENGLISH COMPOSITION I	
ENGL 1160	ENGLISH COMPOSITION II	
Writing in the Discipline Course		
CMST 1110	PUBLIC SPEAKING FUNDS	
or CMST 2120	ARGUMENTATION AND DEBATE	
MATH 1120	INTRODUCTION TO MATHEMATICAL AND COMPUTATIONAL THINKING	
or MATH 1100	DATA LITERACY AND VISUALIZATION	
or MATH 1130	QUANTITATIVE LITERACY	
or MATH 1140	QUANTITATIVE REASONING FOR HEALTHCARE PROFESSIONALS	
or MATH 1300	COLLEGE ALGEBRA WITH SUPPORT	
or STAT 1100	DATA LITERACY AND VISUALIZATION	
or STAT 1530	ELEMENTARY STATISTICS	
Distribution Requirements		31
Natural Science - From two disciplines and one lab – 7 hrs		
Social Science - From two disciplines - 9 hrs		
Humanities and Fine Arts - From two disciplines – 9 hrs		
Global Diversity - 3 hrs		

US Diversity - 3 hrs	
MAJOR REQUIREMENTS - 51 Hours Required	
**Course will satisfy UNO's General Education requirement	
^Course requires pre-requisite(s)	
All of the following	6
MLTI 3000	MULTIDISCIPLINARY FOUNDATIONS SEMINAR (^)
MLTI 4000	MULTIDISCIPLINARY CAPSTONE SEMINAR (** ^)
Emergency Management Concentration Requirements – 30 Hours	
All of the following	24
EMGT 1000	INTRODUCTION TO EMERGENCY MANAGEMENT (**)
EMGT 2020	EMERGENCY MANAGEMENT STRATEGIES AND COMMUNICATION (^)
EMGT 2050	POLITICAL AND LEGAL FOUNDATIONS IN EMERGENCY SERVICES (^)
PA 2170	INTRODUCTION TO PUBLIC ADMINISTRATION (**)
PA/CRCJ/SOWK 3000	APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR (^)
EMGT 3040	PREPAREDNESS/PLANNING AND RISK MITIGATION (^)
EMGT 3080	AGENCY COLLABORATION DURING DISASTERS (^)
EMGT 4060	DISASTER RESPONSE AND RECOVERY (^)
Additional courses from Emergency Management (EMGT) or other department with approval	6
Required third content block	15
ELECTIVES	
Elective hours as required to reach a total of 120 hours	

English Concentration

Bachelor of Multidisciplinary Studies, Concentration Required - English Concentration Requirements

Code	Title	Credits
GENERAL EDUCATION REQUIREMENTS - 46 Hours Required		
Minimum of "C-"required		
Fundamental Academic Skills		15
ENGL 1150	ENGLISH COMPOSITION I	
ENGL 1160	ENGLISH COMPOSITION II	
Writing in the Discipline Course		
CMST 1110	PUBLIC SPEAKING FUNDS	
or CMST 2120	ARGUMENTATION AND DEBATE	
MATH 1120	INTRODUCTION TO MATHEMATICAL AND COMPUTATIONAL THINKING	
or MATH 1100	DATA LITERACY AND VISUALIZATION	
or MATH 1130	QUANTITATIVE LITERACY	
or MATH 1140	QUANTITATIVE REASONING FOR HEALTHCARE PROFESSIONALS	
or MATH 1300	COLLEGE ALGEBRA WITH SUPPORT	
or STAT 1100	DATA LITERACY AND VISUALIZATION	

or STAT 1530	ELEMENTARY STATISTICS	
Distribution Requirements		31
Natural Science - From two disciplines and one lab – 7 hrs		
Social Science - From two disciplines - 9 hrs		
Humanities and Fine Arts - From two disciplines – 9 hrs		
Global Diversity - 3 hrs		
US Diversity - 3 hrs		
MAJOR REQUIREMENTS - 51 Hours Required		
**Course will satisfy UNO's General Education requirement		
^Course requires pre-requisite(s)		
All of the following		6
MLTI 3000	MULTIDISCIPLINARY FOUNDATIONS SEMINAR (^)	
MLTI 4000	MULTIDISCIPLINARY CAPSTONE SEMINAR (** ^)	
English Concentration Requirements – 30 Hours		
30 hours from the Department of English (ENGL). Up to 9 hours in related coursework outside of the English Department may count toward degree requirements with approval		30
Note: ENGL 1150 & ENGL 1160 English Composition I & II (or equivalents) will count toward University General Education requirements and not toward the 30 hours in ENGL coursework.		
Required third content block		15
ELECTIVES		
Elective hours as required to reach a total of 120 hours		

Environmental Sciences Concentration

Bachelor of Multidisciplinary Studies, Concentration Required - Environmental Science Concentration Requirements

Code	Title	Credits
GENERAL EDUCATION REQUIREMENTS - 46 Hours Required		
Minimum of "C-"required		
Fundamental Academic Skills		15
ENGL 1150	ENGLISH COMPOSITION I	
ENGL 1160	ENGLISH COMPOSITION II	
Writing in the Discipline Course		
CMST 1110	PUBLIC SPEAKING FUNDS	
or CMST 2120	ARGUMENTATION AND DEBATE	
MATH 1120	INTRODUCTION TO MATHEMATICAL AND COMPUTATIONAL THINKING	
or MATH 1100	DATA LITERACY AND VISUALIZATION	
or MATH 1130	QUANTITATIVE LITERACY	
or MATH 1140	QUANTITATIVE REASONING FOR HEALTHCARE PROFESSIONALS	
or MATH 1300	COLLEGE ALGEBRA WITH SUPPORT	
or STAT 1100	DATA LITERACY AND VISUALIZATION	
or STAT 1530	ELEMENTARY STATISTICS	
Distribution Requirements		31
Natural Science - From two disciplines and one lab – 7 hrs		

Social Science - From two disciplines - 9 hrs	
Humanities and Fine Arts - From two disciplines – 9 hrs	
Global Diversity - 3 hrs	
US Diversity - 3 hrs	
MAJOR REQUIREMENTS - 51 Hours Required	
**Course will satisfy UNO's General Education requirement	
^Course requires pre-requisite(s)	
All of the following	
MLTI 3000	MULTIDISCIPLINARY FOUNDATIONS SEMINAR (^)
MLTI 4000	MULTIDISCIPLINARY CAPSTONE SEMINAR (** ^)
Environmental Sciences Concentration Requirements – 30 Hours	
All of the following	
ENVN 2010	ENVIRONMENTAL PROBLEMS AND SOLUTIONS (^)
BIOL 1330	ENVIRONMENTAL BIOLOGY (**)
CHEM 1010 & CHEM 1014	CHEMISTRY IN THE ENVIRONMENT AND SOCIETY and CHEMISTRY IN THE ENVIRONMENT AND SOCIETY LABORATORY (** ^)
GEOL 1010	ENVIRONMENTAL GEOLOGY (**)
GEOG 1030	OUR DYNAMIC PLANET: INTRODUCTION TO PHYSICAL GEOGRAPHY (**)
or GEOG 1050	HUMAN-ENVIRONMENT GEOGRAPHY
Additional hours of coursework from Environmental Studies (ENVN) or coursework from any of the Environmental Sciences concentrations	
Courses for the Environmental Sciences concentrations can be found through the College of Arts & Science Environmental Science academic catalog pages	
Required third content block	
ELECTIVES	
Elective hours as required to reach a total of 120 hours	

Fine Arts Concentration

Bachelor of Multidisciplinary Studies, Concentration Required - Fine Arts Concentration Requirements

Code	Title	Credits
GENERAL EDUCATION REQUIREMENTS - 46 Hours Required		
Minimum of “C-”required		
Fundamental Academic Skills		15
ENGL 1150	ENGLISH COMPOSITION I	
ENGL 1160	ENGLISH COMPOSITION II	
Writing in the Discipline Course		
CMST 1110	PUBLIC SPEAKING FUNDS	
or CMST 2120	ARGUMENTATION AND DEBATE	
MATH 1120	INTRODUCTION TO MATHEMATICAL AND COMPUTATIONAL THINKING	
or MATH 1100	DATA LITERACY AND VISUALIZATION	
or MATH 1130	QUANTITATIVE LITERACY	

or MATH 1140	QUANTITATIVE REASONING FOR HEALTHCARE PROFESSIONALS	31
or MATH 1300	COLLEGE ALGEBRA WITH SUPPORT	
or STAT 1100	DATA LITERACY AND VISUALIZATION	
or STAT 1530	ELEMENTARY STATISTICS	
Distribution Requirements		
Natural Science - From two disciplines and one lab – 7 hrs		
Social Science - From two disciplines - 9 hrs		
Humanities and Fine Arts - From two disciplines – 9 hrs		
Global Diversity - 3 hrs		
US Diversity - 3 hrs		
MAJOR REQUIREMENTS - 51 Hours Required		
**Course will satisfy UNO's General Education requirement		
^Course requires pre-requisite(s)		
All of the following		6
MLTI 3000	MULTIDISCIPLINARY FOUNDATIONS SEMINAR (^)	
MLTI 4000	MULTIDISCIPLINARY CAPSTONE SEMINAR (** ^)	
Fine Arts Concentration Requirements		30
30 credit hours from Fine Arts content areas: Art and Art History (ART), Creative Writing (WRWS), Music (MUS), Theatre (THEA).		
Required third content block		15
ELECTIVES		
Elective hours as required to reach a total of 120 hours		

General Administration Concentration

Bachelor of Multidisciplinary Studies, Concentration Required - General Administration Concentration Requirements

Code	Title	Credits
GENERAL EDUCATION REQUIREMENTS - 46 Hours Required		
Minimum of “C-”required		
Fundamental Academic Skills		15
ENGL 1150	ENGLISH COMPOSITION I	
ENGL 1160	ENGLISH COMPOSITION II	
Writing in the Discipline Course		
CMST 1110	PUBLIC SPEAKING FUNDS	
or CMST 2120	ARGUMENTATION AND DEBATE	
MATH 1120	INTRODUCTION TO MATHEMATICAL AND COMPUTATIONAL THINKING	
or MATH 1100	DATA LITERACY AND VISUALIZATION	
or MATH 1130	QUANTITATIVE LITERACY	
or MATH 1140	QUANTITATIVE REASONING FOR HEALTHCARE PROFESSIONALS	
or MATH 1300	COLLEGE ALGEBRA WITH SUPPORT	
or STAT 1100	DATA LITERACY AND VISUALIZATION	
or STAT 1530	ELEMENTARY STATISTICS	
Distribution Requirements		31
Natural Science - From two disciplines and at least one lab - 7 hrs		

Social Science - From two disciplines - 9 hrs

Humanities and Fine Arts - From two disciplines - 9 hrs

Global Diversity- 3 hrs

US Diversity - 3 hrs

MAJOR REQUIREMENTS - 51 Hours Required

**Course will satisfy UNO's General Education requirement

^Course requires pre-requisite(s)

All of the following 6

MLTI 3000 MULTIDISCIPLINARY FOUNDATIONS SEMINAR (^)

MLTI 4000 MULTIDISCIPLINARY CAPSTONE SEMINAR (** ^)

General Administration Concentration Requirements 30

30 hours of Accounting (ACCT), Economics (ECON), Entrepreneurship (ENTR), Finance and Banking (FNBK), Business Administration (BSAD), Law and Society (LAWS), Management (MGMT), Marketing (MKT), Real Estate (RELU), Supply Chain Management (SCMT) and Public Administration (PA).

Up to 9 hours in Political Science (PSCI) coursework may count towards degree requirements with approval

NOTE: Due to the UNO College of Business' AACSB accreditation, students in the Division of Continuing Studies are permitted to use only 29 hours of UNO business credit towards their Bachelor of Multidisciplinary Studies degree. Students need to plan their 29 hours of UNO business courses carefully to make the best use of these hours. Exceptions are granted on a case-by-case basis, please check with your academic advisor.

Required third content block 15

ELECTIVES

Elective hours as required to reach a total of 120 hours

General Science Concentration Bachelor of Multidisciplinary Studies, Concentration Required - General Science Concentration Requirements

Code	Title	Credits
------	-------	---------

GENERAL EDUCATION REQUIREMENTS - 46 Hours Required

Minimum of "C-" required

Emergency Management and Disaster Science

Emergency Management and Disaster Science offers a Bachelor of Science in Emergency Management as well as minors in Emergency Management, Fire Service Management, and Tribal Management and Emergency Services. The program also offers an undergraduate certificate in Tribal Management and Emergency Services. Emergency Management and Disaster Science was developed over a two year period by an interdisciplinary group composed of faculty from diverse University departments and programs, as well as community and public safety leaders in related professions. The program was approved in the summer of 2012. The curriculum developed is intended to provide an education that encompasses the broad array of knowledge and experience necessary to conduct emergency services and emergency administration, and to meet the demand for Emergency Management professionals at the federal, state, and local government levels, in the business community, and within the nonprofit organizations active in disasters.

The Mission of Emergency Management and Disaster Science is to:

- Develop student talents, wisdom, and experiences in a supportive yet demanding academic environment that prepares them for a personally rewarding successful professional career in Emergency Management.
- Initiate and lead superior research initiatives while supporting continuous improvements in efficiency, reliability, safety, and sustainability for provision of emergency services in the State of Nebraska and beyond.
- Foster cooperative relationships with neighboring communities, state and federal agencies, and private enterprise through collaborative education, training, and service projects that enhance performance and productivity.
- Set, preserve, and promote the utmost standards of honesty, integrity, and transparency through the teaching of and adherence to ethical conduct and open dialogue while ensuring good stewardship and management of program resources

Emergency Management and Disaster Science is a division of the School of Public Administration in the College of Public Affairs and Community Service (CPACS).

Transfer Credit

Sixty-four credit hours from regionally accredited two-year institutions may be applied toward the degree. Twelve credit hours of American Council on Education (ACE) approved military credit may be applied toward electives in the BSEM degree. Credit from an institution that is not regionally accredited cannot be applied to the BSEM degree.

Fast Track

The School of Public Administration has developed a Fast-Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing the BS in Emergency Management desiring to pursue a MS in Urban Studies or the MPA degree.

- Students should have senior status and must be within at least 30 undergraduate credits yet to complete their undergraduate degree. Exceptional students who do not meet this requirement may be considered.
- Students must have a minimum undergraduate GPA of 3.5.
- Students must complete the Fast-Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor and consult with the graduate advisor prior to enrollment in one of the courses listed below.
- A minimum cumulative GPA of 3.5 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - For this program, if students maintain at least a grade of B+ in courses taken, they will be recommended for admission to the MSUS or MPA program.
 - The admit term must be after the completion term of the undergraduate degree.

The following MS in Urban Studies courses may be taken under the Fast-Track program:

- BLST 8886, Seminar on Black Leadership
- UBNS 8000, Seminar in Urban Studies
- UBNS 8060, Introduction to Urban Planning
- UBNS 8020, Race, Ethnicity and American Urban Culture**
- UBNS 8200, Community Organizing and Development**
- PA 8010, The Public Economy (Must have completed or be concurrently enrolled in UBNS 8000)

The following MPA courses may be taken under the Fast-Track program:

- PA 8050, Foundations of Public Service
- PA 8090, Organizational Theory and Behavior
- PA 8100, Advanced Management and Leadership for Public and Nonprofit Organizations (Note: This course may only be taken if both PA 8050 and PA 8090 are completed).

Academic Advising

Academic Advising is provided for all students. The program recommends advising each semester to ensure degree completion. The academic advisor assists students with goal setting, degree planning, course scheduling, addressing any questions or concerns regarding major/minor, academic performance, and/or policies and procedures. The faculty in Emergency Management and Disaster Science are also available to speak with students regarding careers and mentoring. To contact an advisor, visit 114 CPACS, email unoemgt@unomaha.edu, or call 402.554.4900.

Student Group

Emergency Management Student Association (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/emergency-management-and-disaster-science/student-involvement/>)

Contact

Emergency Management and Disaster Science is located in the College of Public Affairs and Community Service in room 114. The office can be reached by phone at 402.554.4900 or by email at unoemgt@unomaha.edu.

Website (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/emergency-services-program/>)

Admissions

Readmit students and students wishing to transfer from another institution or department within the University of Nebraska must have a 2.5 cumulative grade point average. Students with a GPA of 2.0 to 2.49 may be admitted to the Pre-Emergency Management program. Once students have achieved a 2.5 cumulative grade point average or better, they will be admitted to the BSEM program.

Degrees Offered

- Emergency Management (BSEM), Bachelor of Science (p. 932)

Writing in the Discipline

The writing in the discipline courses for emergency management are:

- AVN 3060 Writing in Aviation
- CRCJ 3100 Writing for Criminal Justice
- CIST 3000 Advanced Composition for IS&T
- ENGL 2400 Advanced Composition
- ENGL 3050 Writing for the Workplace
- ENGL 3980 Technical Writing Across the Disciplines
- MKT 3200 Business Communications
- or a course approved by the Academic Advisor.

Minors Offered

- Emergency Management Minor (p. 947)
- Fire Service Management Minor (p. 947)
- Tribal Management and Emergency Services Minor (p. 948)

Certificates Offered:

- Tribal Management and Emergency Services Certificate (p. 948)

Emergency Management is the profession of individuals who focus on helping communities prior to, during, and following natural and manmade disasters to minimize risk and vulnerability. Emergency Managers plan and direct disaster response or crisis management activities, provide disaster preparedness training, and prepare emergency plans and procedures for natural (tornadoes, floods) and manmade (technological, terrorism) disasters, as well as public health epidemics. Our program meets the demand for professionals at the federal, state, and local levels, and the business community.

Emergency Managers can work in many different industries including federal, state, county, and city governments, educational institutions, hospitals and public health agencies, nonprofits and community/international relief organizations, private industry, transportation, the military, and many others.

- Disaster Recovery Manager
- Emergency Management Specialist
- Emergency Management Coordinator
- Emergency Preparedness Specialist
- Emergency Response Coordinator
- Emergency Services Director

- Safety Manager
- Public Information Officer

Aviation Administration

- Federal Aviation Administration (FAA)
- Airport Security
- Commercial Aviation Companies
- Department of Transportation

Criminology and Criminal Justice

- Law Enforcement Officer
- Federal Agencies such as the FBI, ATF, DIA, DHS, etc.
- Corrections
- Homeland Security Officer
- Security Director

Fire Service Management

- City Firefighter
- Wildland Firefighter
- Commend Level Supervisor
- Fire Prevention Specialist

Geospatial Science

- Search and Rescue
- GIS Administrator, Analyst, Coordinator, or Manager
- Transportation Planner
- Data Collection for Drones

Gerontology

- Public Policy and Education
- Hospitals, Nursing and Assisted Living Homes
- Housing and Home Modification
- Evacuation Specialist

Information Technology and Communication

- Emergency Communication Specialist
- Information Security Analyst
- Information Security Director

Intelligence and Security

- Intelligence Analyst
- State, Federal and Local Government: FBI, CIA, DIA, DHS
- Military Intelligence

Logistics Management

- Logistics Engineer
- Transportation Manager
- Distribution Manager
- Transportation companies

Natural Disasters

- Environmental Protection Specialist
- Urban/Regional Planner
- Soil and Water Conservationist

Nonprofit Management

- Volunteer Coordinator/Manager
- Community Development Planner/Director
- Grant/Fundraising Manager

Planning and Preparing for Urban Hazards

- Urban/Regional Planner
- Community Development Planner
- Housing Department Specialist

Private Sector Management

- Business Continuity Planner
- Emergency Preparedness Planner
- Media Communications Specialist

Public Administration and Management

- City, Urban and Regional Planning
- City/County Government
- Policy/Budget Analyst
- School/University Emergency Manager

Public Health

- Public Health Preparedness
- Community Health Education Specialist
- Biopreparedness Coordinator
- Public Health Specialist
- Hospital/Public Health Administrators
- Hospital Emergency Preparedness Coordinator

Tribal Management and Emergency Services

- Tribal Emergency Manager
- Tribal Government
- Tribal Law

Unmanned Aircraft Systems (Drones)

- Unmanned Aircraft Systems Pilot
- Unmanned Aircraft Systems Operator
- Unmanned Aircraft Systems Management

EMGT 1000 INTRODUCTION TO EMERGENCY MANAGEMENT (3 credits)

This course is an introduction to the National Response Framework (NRF) and the National Incident Management System (NIMS) and their influence on modern community Emergency Management and Homeland Security. The course conceptually introduces the four phases of Emergency Management: Mitigation, Preparedness, Response, and Recovery.

Distribution: Social Science General Education course

EMGT 1150 INTRODUCTION TO TRIBAL MANAGEMENT AND EMERGENCY SERVICES (3 credits)

This course is an introduction to how Tribal history and contemporary governance affect the delivery of emergency management services on Tribal lands as well as how the National Response Framework (NRF) and the National Incident Management System (NIMS) are integrated to provide emergency services. The course focuses on the challenges of implementing the five mission areas of Emergency Management: Mitigation, Preparedness, Prevention, Response, and Recovery for Native American Communities.

Distribution: Social Science General Education course and U.S. Diversity General Education course

EMGT 2020 EMERGENCY MANAGEMENT STRATEGIES AND COMMUNICATION (3 credits)

This course covers tactical issues, current communication methods, and critical information channels utilized during actual disaster and emergency management field operations. Topics include inter-agency linkages, command and control tactics, National Incident Management System and the Incident Command System, (NIMS-ICS) and other crucial management requirements for successful disaster planning, mitigation, and recovery operations.

Prerequisite(s): EMGT 1000 or concurrent.

EMGT 2050 POLITICAL AND LEGAL FOUNDATIONS IN EMERGENCY SERVICES (3 credits)

The provision of Emergency Services in contemporary society occurs within an environment of legal requirements and community resource allocation that often requires difficult administrative and political decisions. Successful professionals who control, manage, and operate these services must understand and adhere to the demand and intent of the law. Also, they must master the practical art of politics related to the various community constituents and shareholders who fund and support them, staff them, and utilize them. This course examines the legal aspects and social consequences of emergency management provision. Environmental issues and Occupational Health and Safety policy and programs affecting emergency services are also examined.

Prerequisite(s): EMGT 1000 or taken concurrently with EMGT 1000.

EMGT 2060 FOUNDATIONAL INDIAN LAW & POLICY ISSUES (3 credits)

This course provides an examination of the federal and tribal legal cases and policies that affect the delivery of critical services on tribal lands. The course will also examine how such case law and resulting policy affects current U.S./Tribal/State relationship, specifically in the area of sovereignty and regulatory jurisdiction of emergency management principles. The student will gain an understanding of the legal obligations of Tribal Government and the emergency manager with regard to disaster response within the legal context of tribal law and policy.

Prerequisite(s): EMGT 1150 or concurrent.

EMGT 2500 DISASTERS AND VULNERABLE POPULATIONS (3 credits)

This course is an introduction to the sociological examination of disasters. In the course students will learn about vulnerability in terms of social, economic, political, geographical and cultural factors. Students will investigate how vulnerable groups such as children, elderly, racial and ethnic minorities, and low income, are affected and cope before, during and after hazardous events. Other topics covered include: disaster warning responses, evacuation behavior, survival behavior, roles of volunteers, and disaster impacts.

Distribution: U.S. Diversity General Education course and Social Science General Education course

EMGT 3020 FEDERAL/TRIBAL GOVERNMENT TO GOVERNMENT RELATIONS (3 credits)

This course will introduce the Federal/Tribal government to government relationship that has evolved through U.S. Supreme Court case law; federal Indian policy; and through the Indian Self Determination and Education Assistance Act of 1975. Specifically, this course will focus on overcoming the challenges of implementing Emergency Management principles between the U. S. and Tribal governments by understanding how the government to government relationship works.

Prerequisite(s): EMGT 1150 or concurrent.

EMGT 3040 PREPAREDNESS/PLANNING AND RISK MITIGATION (3 credits)

Provision of emergency and management of emergency services is dependent on extensive planning and preparedness. This process aids in the reduction of loss of property and life in extreme circumstances, even when confronted with a variety of environmental and politically motivated risks. An open society, which becomes ever more highly technological, demonstrates new sources of stress, complicated threats, and complex inter-relationships. Together, these factors present a significant challenge to those tasked with preventing and managing emergencies and disasters. This course provides a theoretical framework for the understanding of the ethical, sociological, organizational, political, and legal components of community risk analysis and mitigation, and a methodology for the development of comprehensive community risk preparedness planning.

Prerequisite(s): EMGT 2020, EMGT 2050, PA 3000 / CRCJ 3000 / SOWK 3000 or concurrent.

EMGT 3060 EMERGENCY MANAGEMENT IN COMPARATIVE PERSPECTIVE (3 credits)

Although many of the fundamental elements are similar across countries, there are also important differences in how emergency management is conducted around the world. In this course, we compare and contrast emergency management in different countries. The course is designed to provide students with a general, theoretical, and practical understanding of emergency management in other countries. This knowledge of the history, natural hazards, leadership, culture, experiences, and approaches of different countries will help us make connections and draw lessons for emergency management in the U.S.

Prerequisite(s): EMGT 1000 or EMGT 1150

EMGT 3080 AGENCY COLLABORATION DURING DISASTERS (3 credits)

Federal, state, and local agency cooperation and interoperability in the provision of emergency management will be studied in this course. Federal, state, and local government authority and roles will be explored in concert with collaborative management programs. The origins of collaborative partnerships will be presented along with introduction of the Emergency Management Assistance Compact, development of volunteer networks, and formation of partnerships with the Citizen Corps, Community emergency Response Teams, the Medical Reserve Corps and Mercy Medical Airlift, and other groups that have the potential to contribute to the emergency management and response effort.

Prerequisite(s): EMGT 2020, EMGT 2050, PA 3000 / CRCJ 3000 or concurrent.

EMGT 4020 PROTECTING AND SUSTAINING TRIBAL ECONOMIES (3 credits)

This course provides an understanding of unique tribal economies and how they operate under tribal law, constitutions and federal legislation, as well as an appreciation of how vulnerable tribal economies are to man-made and natural disasters. This course will also introduce Emergency Management principles and practices designed to assist tribal governments in protecting and sustaining their economies during crisis events.

Prerequisite(s): EMGT 1150 or concurrent.

EMGT 4050 INTEGRATION OF CONTEMPORARY ISSUES IN TRIBAL EMERGENCY MANAGEMENT (3 credits)

This course covers application and integration of Tribal Management and Emergency Service (TMES) principles and practices, as well as contemporary issues affecting Tribal nations and their citizens; recent federal/tribal TMES legislation and case law; Federal/Tribal agency collaborative efforts; TMES Tribal Code development and implementation; and TMES funding resources such as PL 93-638 Contracts, grants and tribal taxation.

Prerequisite(s): EMGT 1150 or concurrent.

EMGT 4060 DISASTER RESPONSE AND RECOVERY (3 credits)

This course examines concepts and principles of: 1) community risk assessment, 2) disaster recovery planning, 3) responses specific to fires and natural and man-made disasters, 3) National Incident Management System and the Incident Command System (NIMS ICS), 4) mutual aid and automatic response, 5) training and preparedness, 6) communications, 7) civil disturbances, 8) terrorist threats/incidents, 9) hazardous materials planning, 10) mass casualty incidents, 11) earthquake preparedness, and 12) disaster mitigation and recovery.

Prerequisite(s): EMGT 3040 (May be taken concurrently) or by instructor's permission

EMGT 4200 INTERNSHIP IN EMERGENCY MANAGEMENT (3 credits)

This course is designed to provide direct work experience in the emergency management field for selected students. This experience will be in a full-time or part-time, preferably paid position, in a highly structured environment. Student will be selected following formal job placement procedures and screening by Emergency Management Faculty and the participating organization. This course is intended for upper level, Emergency Management majors who have been selected following an application and interview process approved by both the School of Public Administration and the intern provider.

Prerequisite(s): PA 3000 / CRCJ 3000; EMGT 3040, EMGT 3080, EMGT 4060; Instructor's Permission Required.

EMGT 4800 SPECIAL READING IN EMERGENCY MANAGEMENT (3 credits)

This course is intended for upper-level Emergency Management degree students who are pursuing advanced specialized areas of knowledge in Emergency Management. The course is conducted under an independent study format, and subject matter will vary based on the interests of the student. Learning outcome objectives will be established by the instructor and shall remain consistent with Emergency Management curriculum goals. Faculty approval is required prior to registration.

Prerequisite(s): Prerequisites will be established by the coordinating instructor to meet the foundational knowledge requirements for the area being studied. Not open to non-degree or non-degree graduate students. Students will need faculty approval.

EMGT 4900 SPECIAL TOPICS IN EMERGENCY MANAGEMENT (3 credits)

This course is meant to provide upper-level EMGT students with an in-depth look at current and future issues affecting the Emergency Management industry and industry professionals. Possible topics include disaster case studies, comparative international studies, issues in federalism, and Continuity of Operations (COOP). Subject matter will vary by student interest and by faculty preference. Students may repeat the course for additional academic credit as long as the course topic is not duplicated.

Prerequisite(s): Prerequisites will be established by the coordinating instructor to meet the foundational knowledge requirements for the area being studied. Not open to non-degree or non-degree graduate students. Students will need faculty approval.

EMGT 4910 SPECIAL TOPICS IN EMERGENCY MANAGEMENT (1 credit)

This course introduces students to a specialized subject matter in the field of emergency management not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours.

EMGT 4950 SENIOR ASSESSMENT (0 credits)

This assessment tool is part of the EMDS Student Outcomes effort. It is designed to monitor performance and to identify changes needed. Graduating seniors must register for and complete EMGT 4950 - Senior Assessment in the term in which they plan to graduate.

Prerequisite(s): Students must register for EMGT 4950 in the term in which they plan to graduate. Not open to non-degree graduate students.

EMGT 4990 CAPSTONE PROJECT IN EMERGENCY MANAGEMENT (3 credits)

This course fulfills the Emergency Management Capstone senior project demonstrating expertise on a specific issue area and/or problem in emergency management. The student will be required to construct and execute a research project analyzing a contemporary operational, economic, or managerial issue within emergency management utilizing an appropriate research or analytical methodology. Both a written report and PowerPoint presentation will be presented as part of the course requirements.

Prerequisite(s): PA 3000 / CRCJ 3000; EMGT 3040, EMGT 3080, EMGT 4060; Writing in the Discipline course; all with a C- or better; Instructor's Permission Required.

FSMT 1600 FUNDAMENTALS OF FIRE SCIENCE (3 credits)

Fundamentals of Fire Science is an applied science which focuses on basic understanding of the chemical and physical nature of fire. Students will learn about common fire hazards, extinguishing agent properties, as well as fire ignition and growth phenomena.

Distribution: Natural/Physical Science General Education course

FSMT 2200 CODES AND INSPECTIONS (3 credits)

Fire protection requirements, including zoning laws and primary access routes for flammable and explosive materials will be discussed. Major considerations and rationales employed in the formulation and creation of zoning and building codes are examined and exploration and understanding of local, state and national codes are also introduced. Safety education program development and implementation, fire inspection techniques and fire investigation procedures are additionally covered.

Prerequisite(s): EMGT 1000 or concurrent.

FSMT 2300 FIRE INVESTIGATION (3 credits)

The origin and cause of fire and explosion incidents will be explored. Fire and arson investigation procedures such as on-site investigations and inspections, documentation, and fact gathering, collection of witness statements and canvassing, and procedures for gathering and storage of critical evidence will be presented. Legal and jurisdictional issues affecting fire investigation will also be discussed.

Prerequisite(s): EMGT 1000 or concurrent

FSMT 2310 FIRE PROTECTION SYSTEMS (3 credits)

A study of the procedures necessary to evaluate the firefighting requirements and how these needs drive the design and utilization of various types of fire protection equipment, including design of structural protection systems and associated construction materials, fire detection technology and fire suppression systems.

Prerequisite(s): EMGT 1000 or concurrent

FSMT 2410 STRATEGIES AND TACTICS IN FIRE AND EMERGENCY SERVICES (3 credits)

This course will provide examples of strategic and tactical considerations that members of the emergency services can employ during structure fires to include residential, commercial, high-rise, special hazard structures, and other types of emergencies like hazardous materials incidents, mass casualty emergencies, and technical rescues.

Prerequisite(s): EMGT 1000

FSMT 2510 BUILDING CONSTRUCTION FOR THE FIRE SERVICE (3 credits)

The visible and hidden dangers inherently involved with fighting structural fires are examined in this course. Characteristics of construction materials, construction types, fire protection systems, smoke development, fire containment, high rise construction and many other topics relevant to firefighter life safety as related to building construction issues will be studied and evaluated.

Prerequisite(s): EMGT 1000 or concurrent.

FSMT 3020 FIRE DYNAMICS (3 credits)

This course examines the underlying principles involved in structural fire protection systems, building furnishings, and fire protection systems including water-based fire suppression systems, fire alarm and detection systems, special hazard suppression systems, and smoke management systems.

Prerequisite(s): Students must have completed FSMT 1600.

FSMT 3140 FIRE RELATED HUMAN BEHAVIOR (3 credits)

The goal of Fire Related Human Behavior is to provide students with knowledge about how humans respond to fire and how that knowledge has been integrated into life safety systems design and development.

Prerequisite(s): FSMT 2200

FSMT 3350 FIRE PREVENTION, ORGANIZATION, AND MANAGEMENT (3 credits)

This course examines the factors that shape fire risk and the tools for fire prevention, including risk reduction education, codes and standards, inspection and plans review, fire investigation, research, master planning, various types of influences, and strategies.

Prerequisite(s): FSMT 2200

FSMT 3680 ANALYTICAL APPROACHES TO PUBLIC FIRE PROTECTION (3 credits)

This course examines rational decision making tools and techniques that can be used in Fire and Emergency Services agencies, including data collection, statistics, probability, decision analysis, utility modeling, resource allocation, and cost-benefit analysis.

Prerequisite(s): FSMT 2200.

FSMT 4300 ADVANCED PRINCIPLES OF FIRE AND EMERGENCY SERVICES SAFETY AND SURVIVAL (3 credits)

This course introduces the basic principles and history related to the national firefighter life safety initiatives, focusing on the need for cultural and behavioral change within the emergency services industry relating to safety, incorporating leadership, supervision, accountability, and personal responsibility. Instruction utilizes the lessons learned from case studies and other investigations that support cultural change throughout emergency services administration.

Prerequisite(s): FSMT 2410.

FSMT 4450 FIRE AND EMERGENCY SERVICES ADMINISTRATION (3 credits)

This course provides students with the knowledge to understand how to help the fire and emergency services administrator perform as an effective risk manager by recognizing legal and political issues affecting public safety, finding and applying appropriate legal rules and/or political constructs, and articulating supportable conclusions and recommendations.

Prerequisite(s): FSMT 2410.

FSMT 4800 SPECIAL READINGS IN FIRE SERVICE MANAGEMENT (3 credits)

This course is intended for upper-level Fire Service Management degree students who are pursuing specialized areas of knowledge in Fire Services. The course is conducted under an independent study format, and subject matter will vary based on the interests of the student and learning outcome objectives established by the instructor. Faculty approval is required prior to registration.

Prerequisite(s): Prerequisites will be established by the coordinating instructor to meet the foundational knowledge requirements for the area being studied. Not open to non-degree graduate students. EMGT students will need faculty approval.

FSMT 4860 APPLICATIONS OF FIRE RESEARCH (3 credits)

This course examines the basic principles of research and methodology for analyzing current fire-related research. The student will be able to understand the rationale that fire research organizations use for conducting fire-related research and evaluation.

Prerequisite(s): FSMT 2410.

FSMT 4900 SPECIAL TOPICS IN FIRE SERVICE MANAGEMENT (3 credits)

This course is meant to provide upper-level FSMT students with an in-depth look at current and future issues affecting the Fire Services industry and industry professionals. Possible topics include fire case studies, comparative international studies, issues in federalism, fire education, and fiscal administration. Subject matter will vary by student interest and by faculty preference. Students may repeat the course for additional academic credit as long as the course topic is not duplicated.

Prerequisite(s): Prerequisites will be established by the coordinating instructor to meet the foundational knowledge requirements for the area being studied. Not open to non-degree graduate students. EMGT students will need faculty approval.

Emergency Management (BSEM), Bachelor of Science

The Bachelor of Science in Emergency Management includes an interdisciplinary curriculum focusing on emergency management. The core coursework provides an overview of emergency management and the concentration areas sharpen student exposure to key areas of concern for disaster preparedness, hazard mitigation, response, and recovery. A minimum cumulative GPA of 2.0 is required to graduate.

The program prepares students academically for all levels of government employment as well as in nonprofit and private companies. Students will become adept at performing risk management, emergency preparedness planning and mitigation to support continuity of operations (COO), and sustainability of communities. Students will gain a thorough understanding of interagency cooperation, public/private partnership coordination, and communication as well as administrative issues involving policies and procedures, labor relations, and fiscal matters.

Freshman

Fall		Credits
EMGT 1000	INTRODUCTION TO EMERGENCY MANAGEMENT	3
General Education English and Writing		3
General Education Humanities and Fine Arts		3
General Education Public Speaking		3
General Education Natural/Physical Science		3

Credits **15**

Spring

General Education English and Writing		3
General Education Social Science		3
General Education Humanities and Fine Arts		3
General Education Quantitative Literacy		3
General Education Natural/Physical Science with Laboratory		4

Credits **16**

Sophomore

Fall		
EMGT 2020	EMERGENCY MANAGEMENT STRATEGIES AND COMMUNICATION	3
PA 2170	INTRODUCTION TO PUBLIC ADMINISTRATION	3
General Education Social Science		3
Concentration 1 ¹		3
Elective		3
Credits		15

Spring

EMGT 2050	POLITICAL AND LEGAL FOUNDATIONS IN EMERGENCY SERVICES	3
PA 3000	APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR	3
Concentration 2		3
General Education Humanities and Fine Arts		3
Elective Course		3
Credits		15

Junior**Fall**

EMGT 3040	PREPAREDNESS/PLANNING AND RISK MITIGATION	3
Concentration 1		3
Concentration 2		3
Elective Course		3
Elective Course		3
Credits		15

Spring

EMGT 3080	AGENCY COLLABORATION DURING DISASTERS	3
Concentration 1		3
Concentration 2		3
Elective Course		3
Elective Course		3
Credits		15

Senior**Fall**

EMGT 4060	DISASTER RESPONSE AND RECOVERY	3
Writing in the Discipline Course		3
Concentration 1		3
Concentration 2		3
Elective Course		3
Credits		15

Spring

EMGT 4990	CAPSTONE PROJECT IN EMERGENCY MANAGEMENT	3
EMGT 4200	INTERNSHIP IN EMERGENCY MANAGEMENT	3
Concentration 1		3
Concentration 2		3
Elective Course		2
Credits		14

Total Credits **120**

¹ For more information on Concentration requirements, please see academic advisor.

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

****Transfer credit or placement exam scores may change suggested plan of study**

GPA Requirements:

- A 2.0 GPA is required to graduate.
- Grades of C- or better are required for general education, major and concentration courses.

Graduation Requirements:

- 120 credit hours with a cumulative GPA of 2.0 or better
- 30 of the last 36 hours must be UNO courses

Aviation Administration Concentration

Emergency Management, Bachelor of Science in Emergency Management - Aviation Administration Concentration Requirements

Code	Title	Credits
GENERAL EDUCATION REQUIREMENTS - 46 Hours Required		
Minimum of “C-”required		
Fundamental Academic Skills		15
ENGL 1150	ENGLISH COMPOSITION I	
ENGL 1160	ENGLISH COMPOSITION II	
Writing in the Discipline Course		
CMST 1110	PUBLIC SPEAKING FUNDS	
or CMST 2120	ARGUMENTATION AND DEBATE	
MATH 1120	INTRODUCTION TO MATHEMATICAL AND COMPUTATIONAL THINKING	
or MATH 1100	DATA LITERACY AND VISUALIZATION	
or MATH 1130	QUANTITATIVE LITERACY	
or MATH 1140	QUANTITATIVE REASONING FOR HEALTHCARE PROFESSIONALS	
or MATH 1300	COLLEGE ALGEBRA WITH SUPPORT	
or STAT 1100	DATA LITERACY AND VISUALIZATION	
or STAT 1530	ELEMENTARY STATISTICS	
Distribution Requirements		31
Natural Science - From two disciplines and one lab – 7 hrs		
Social Science - From two disciplines - 9 hrs		
Humanities and Fine Arts - From two disciplines – 9 hrs		
Global Diversity - 3 hrs		

US Diversity - 3 hrs	
MAJOR REQUIREMENTS - 60 Hours Required	
**Course will satisfy UNO's General Education requirement	
^Course requires pre-requisite(s)	
All of the following Emergency Management Courses	30
Minimum of “C-”required	
EMGT 1000	INTRODUCTION TO EMERGENCY MANAGEMENT (**)
EMGT 2020	EMERGENCY MANAGEMENT STRATEGIES AND COMMUNICATION (^)
EMGT 2050	POLITICAL AND LEGAL FOUNDATIONS IN EMERGENCY SERVICES (^)
PA 2170	INTRODUCTION TO PUBLIC ADMINISTRATION (**)
PA/SOWK/CRCJ 3000	APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR (^)
EMGT 3040	PREPAREDNESS/PLANNING AND RISK MITIGATION (^)
EMGT 3080	AGENCY COLLABORATION DURING DISASTERS (^)
EMGT 4060	DISASTER RESPONSE AND RECOVERY (^)
EMGT 4200	INTERNSHIP IN EMERGENCY MANAGEMENT (^)
EMGT 4990	CAPSTONE PROJECT IN EMERGENCY MANAGEMENT (^)
Aviation Administration Concentrations Courses	15
AVN 1000	INTRODUCTION TO AVIATION AND AEROSPACE (** ^)
AVN 2020	AIRLINE OPERATIONS (^)
or AVN 2050	INTRODUCTION TO AIRPORT ADMINISTRATION
AVN 4080	AIRPORT SAFETY AND SECURITY (^)
Select 2 courses from the following:	
AVN 3000	BUSINESS AND CORPORATE AVIATION (^)
AVN 3090	AIRPORT ADMINISTRATION AND PLANNING (^)
AVN 3150	AVIATION LAW (^)
AVN 3600	INTERNATIONAL AVIATION (^)
AVN 3700	TRANSPORTATION ANALYSIS (^)
AVN 4050	GENERAL AVIATION OPERATIONS (^)
Additional 15-hour Concentration Area	15
Criminology and Criminal Justice	
Fire Service Management	
Gerontology	
Geospatial Science	
Information Technology and Communication	
Intelligence and Security	
Logistics Management	
Natural Disasters	
Nonprofit Management	
Planning and Preparing for Urban Hazards	
Private Sector Management	
Public Administration and Management	
Public Health	
Tribal Management and Emergency Services	
Unmanned Aircraft Systems	
ELECTIVES	
Elective hours as required to reach a total of 120 hours	

Criminology and Criminal Justice Concentration

Emergency Management, Bachelor of Science in Emergency Management - Criminology and Criminal Justice Concentration Requirements

EMGT 4060	DISASTER RESPONSE AND RECOVERY (^)

EMGT 4200	INTERNSHIP IN EMERGENCY MANAGEMENT (^)
EMGT 4990	CAPSTONE PROJECT IN EMERGENCY MANAGEMENT (^)

Geospatial Science Concentration Courses 15
Select one course from the following

GEOG 1000	WORLD REGIONAL GEOGRAPHY (**)
GEOG 1020	INTRODUCTION TO HUMAN GEOGRAPHY (**)
GEOG 1010	ENVIRONMENTAL GEOLOGY (**)

Select one course from the following

GEOG 1030	OUR DYNAMIC PLANET: INTRODUCTION TO PHYSICAL GEOGRAPHY (**)
GEOG 1050	HUMAN-ENVIRONMENT GEOGRAPHY (**)
GEOG 1090	INTRODUCTION TO GEOSPATIAL SCIENCES (** ^)

Select courses from the following to reach a 15-hour minimum

GEOG 3530	CARTOGRAPHY AND DATA VISUALIZATION (^)
or GEOG 3540	FUNDAMENTALS OF GEOSPATIAL DATA SCIENCE
GEOG 4020	SPATIAL ANALYSIS IN GEOGRAPHY (^)
GEOG 4030	COMPUTER MAPPING AND VISUALIZATION (^)
GEOG 4050	GEOGRAPHIC INFORMATION SYSTEMS I (^)
GEOG 4630	ENVIRONMENTAL REMOTE SENSING (^)
GEOG 4660	GEOGRAPHIC INFORMATION SYSTEMS II (^)

Additional 15-hour Concentration Area 15

Aviation Administration
Criminology and Criminal Justice
Fire Service Management
Gerontology
Information Technology and Communication
Intelligence and Security
Logistics Management
Natural Disasters
Nonprofit Management
Planning and Preparing for Urban Hazards
Private Sector Management
Public Administration and Management
Public Health
Tribal Management and Emergency Services
Unmanned Aircraft Systems

ELECTIVES

ELECTIVES

Elective hours as required to reach a total of 120 hours

Emergency Management Minor

Emergency Management Minor

A minor in emergency management is designed for students with an interest in applying emergency management principles to their area of study. The minor provides an in depth cross-section of the emergency management profession. Students will gain valuable information that will enhance their primary field of study as well as their marketability in the public, private, and nonprofit sectors.

Requirements

The minor requires the following 18 credit hours with grades of C- or better:

Code	Title	Credits
All of the following:		18
EMGT 1000	INTRODUCTION TO EMERGENCY MANAGEMENT	
EMGT 2020	EMERGENCY MANAGEMENT STRATEGIES AND COMMUNICATION	
EMGT 2050	POLITICAL AND LEGAL FOUNDATIONS IN EMERGENCY SERVICES	
EMGT 3040	PREPAREDNESS/PLANNING AND RISK MITIGATION	
EMGT 3080	AGENCY COLLABORATION DURING DISASTERS	
EMGT 4060	DISASTER RESPONSE AND RECOVERY	

Fire Service Management Minor

A minor in fire service management provides an in depth cross-section of the fire service profession. The minor provides expertise in emergency fire response, and prepares students for the management of fire service and public safety personnel, physical and financial resources, and risk identification. The minor is a stepping-stone for those interested in careers related to fire.

Fire Service Management Minor Requirements

The minor requires the following 18 credit hours with grades of C- or better:

Code	Title	Credits
All of the following		18
EMGT 1000	INTRODUCTION TO EMERGENCY MANAGEMENT	
FSMT 2200	CODES AND INSPECTIONS	
FSMT 2410	STRATEGIES AND TACTICS IN FIRE AND EMERGENCY SERVICES	
FSMT 3350	FIRE PREVENTION, ORGANIZATION, AND MANAGEMENT	
FSMT 3680	ANALYTICAL APPROACHES TO PUBLIC FIRE PROTECTION	
FSMT 4450	FIRE AND EMERGENCY SERVICES ADMINISTRATION	

Tribal Management and Emergency Services Minor

Tribal management and emergency services provides an in depth cross-section of the tribal management and emergency services profession.

Currently there are 570+ recognized U.S. Tribal Nations. Each of these nations possess inherent sovereignty and rights of self-governance. However, tribal nations are expected to comply with federal emergency and disaster laws and regulations in order to obtain federal assistance. Federal emergency and disaster laws and regulations are complex and require tribal nations to cooperate with local, state, and federal governments.

This complex system of administration presents many challenges for Native Governments, particularly when faced with natural or man-made disasters that threaten tribal lands and interests. These threats to tribal communities are often compounded by a lack of resources existing in reservation populations. Understanding the complex legal, historical, and cultural issues affecting tribal government management and provision of crisis response is essential to provide routine and emergency services to native communities.

Tribal Management and Emergency Services Minor Requirements

The minor requires the following 18 credit hours with grades of C- or better:

Code	Title	Credits
All of the following		18
EMGT 1150	INTRODUCTION TO TRIBAL MANAGEMENT AND EMERGENCY SERVICES	
EMGT 2060	FOUNDATIONAL INDIAN LAW & POLICY ISSUES	
EMGT 2500	DISASTERS AND VULNERABLE POPULATIONS	
EMGT 3020	FEDERAL/TRIBAL GOVERNMENT TO GOVERNMENT RELATIONS	
EMGT 4020	PROTECTING AND SUSTAINING TRIBAL ECONOMIES	

EMGT 4050	INTEGRATION OF CONTEMPORARY ISSUES IN TRIBAL EMERGENCY MANAGEMENT
-----------	---

Tribal Management and Emergency Services Certificate

Tribal management and emergency services provides an in depth cross-section of the tribal management and emergency services profession.

Currently there are 570+ recognized U.S. Tribal Nations. Each of these nations possess inherent sovereignty and rights of self-governance. However, tribal nations are expected to comply with federal emergency and disaster laws and regulations in order to obtain federal assistance. Federal emergency and disaster laws and regulations are complex and require tribal nations to cooperate with local, state, and federal governments.

This complex system of administration presents many challenges for Native Governments, particularly when faced with natural or man-made disasters that threaten tribal lands and interests. These threats to tribal communities are often compounded by a lack of resources existing in reservation populations. Understanding the complex legal, historical, and cultural issues affecting tribal government management and provision of crisis response is essential to provide routine and emergency services to native communities.

Tribal Management and Emergency Services Certificate Requirements

The certificate requires 15 credit hours of the following with grades of C- or better.

Code	Title	Credits
All of the following		15
EMGT 1150	INTRODUCTION TO TRIBAL MANAGEMENT AND EMERGENCY SERVICES	
EMGT 2060	FOUNDATIONAL INDIAN LAW & POLICY ISSUES	
EMGT 3020	FEDERAL/TRIBAL GOVERNMENT TO GOVERNMENT RELATIONS	
EMGT 4020	PROTECTING AND SUSTAINING TRIBAL ECONOMIES	
EMGT 4050	INTEGRATION OF CONTEMPORARY ISSUES IN TRIBAL EMERGENCY MANAGEMENT	

Gerontology

Mission:

We develop knowledge and inspire future leaders to positively influence the aging process and to advocate for older adults, their caregivers, and the communities in which they live.

General Information

Overview of Degree Programs

Bachelor of Science in Gerontology

The Bachelor of Science in Gerontology requires completion of 120 credit hours with a cumulative GPA of 2.0. Admission into the program requires a

2.50 GPA. The Bachelor of Science in Gerontology can be completed online with an Administration or Healthy Aging concentration or with certain minors.

Double Major or Double Degree in Gerontology

Due to the multidisciplinary nature of Gerontology, a double major or double degree may be applicable to many programs. Admission into the program requires a 2.50 GPA. A double major requires 42 credit hours.

Double Degree in Gerontology

Students must complete all general education, college requirements and major requirements for two programs with a minimum of 150 credit hours. Students will receive two diplomas and must meet the University Double Degree requirements outlined in the catalog.

Maximum/Minimum Credit Hours

Bachelor of Science in Gerontology – 120 credit hours

Certificate in Gerontology – 18 credit hours (15 credit hours of coursework, 3 credit hours of practicum)

Minor in Gerontology – 18 credit hours (at least 9 credits must be upper division)

Residency Requirement

Bachelor of Science in Gerontology:

Thirty out of the last thirty-six credit hours must be taken within the University of Nebraska System.

Twenty-one credit hours of Gerontology Core and Gerontology Electives must be taken at UNO or UNL.

Transfer Credit Policy

Transfer courses from other institutions must be a “C-” or higher.

Transfer coursework will only be accepted from regionally accredited institutions.

Bachelor of Science in Gerontology:

Sixty-four credit hours from regionally accredited two-year institutions may be applied toward the degree.

Twelve credit hours of military training can be applied to the degree.

Unacceptable Credits

Gerontology coursework from UNO, UNL and other institutions over 10 years old will be reviewed on an individual basis. Depending on current course content and updated research, older courses may not be applicable to the program.

Credit from technical programs such as Certificate Nursing Assistant (CNA) and Medical Assistant (MA) do not apply to Gerontology programs. Clinical hours from Nursing programs (RN, BSN & LPN) do not apply. Students with these types of transfer credits should consider the Gerontology concentration in the Division of Continuing Studies as an alternative.

Quality of Work

A 2.50 GPA is required for admission to any program.

A 2.5 GPA is required to enroll in a practicum.

Bachelor of Science in Gerontology:

All Gerontology coursework must be completed with a “C-” or higher.

Students must maintain a 2.0 GPA to be in good academic standing with the University.

Certificate in Gerontology:

All Gerontology courses must be completed with a C- or higher and a combined C (2.0) average.

Minor in Gerontology:

All Gerontology courses must be completed with a C- or higher and a combined C (2.0) average.

Completion of Incomplete Grade

Coursework must be completed by the end of the following semester, per University guidelines.

Repeating Courses

Allowed with no limit.

Administration of the Program

The Bachelor of Science is available on the UNO campus only (or online). The minor is available on the UNL and UNO campuses.

The UNO Department of Gerontology administers the Certificate in Gerontology program for all campuses of the University of Nebraska under an agreement approved by the Board of Regents in 1977. Students at UNL, UNO, UNK, and UNMC are thus able to earn the certificate as part of their academic work at the University of Nebraska.

In addition to undergraduate and graduate courses, the Department of Gerontology conducts research, community service, and provides educational programming for the community.

Student Group

Sigma Phi Omega

Academic Advising

Academic advising is provided for all students. The program recommends advising each semester to ensure degree completion. The academic advisor assists students with degree planning, course scheduling, addressing any questions or concerns regarding major/minor/certificate, academic performance, and/or policies and procedures. To contact an advisor, visit CPACS 210A, email hford@unomaha.edu or call 402.554.2114.

Gerontology Department Website (<http://www.unomaha.edu/gero/>)

Admission Requirements

All undergraduate Gerontology programs require a 2.50 GPA to be admitted. Students should consult with their academic advisor on the best program to fit their needs. To set up an appointment, students should contact the academic advisor directly.

Degrees Offered

- Gerontology, Bachelor of Science (p. 952)

Writing in the Discipline

Students must complete a writing in the discipline course to demonstrate further development of the writing skills learned in foundational composition courses, to engage the major discipline's research practices, and to demonstrate command of the major discipline's discourse practices, vocabulary, and style. Approved writing in the discipline

course are MKT 3200 Managerial Communication, ENGL 2400 Advanced Composition, ENGL 3050 Writing for the Workplace, and GERO 3250 Research Methods Gerontology.

Double Major in Gerontology

Students who choose a double major in gerontology will earn one diploma and will complete all general education, college requirements and major requirements for one program, while completing only Gerontology major coursework for their second major.

Minors Offered

- Gerontology Minor (p. 956)

Certificates Offered

- Gerontology Certificate (p. 956)

Gerontology is the study of the physical, psychological, and social aspects of aging. It also includes the built environment such as homes, buildings, streets, open spaces, and infrastructure. The field of aging is multidisciplinary. Because of this, the gerontology degree allows students to have flexibility with coursework and is tailored to each student's needs and goals. Students will choose a concentration within the major including pre-health, administration, or healthy aging. Students will complete a practicum in the community, providing students with invaluable real-world experience to prepare them to work with aging adults and their families. A degree in Gerontology can also easily be integrated with majors and minors in other disciplines to expand into many various career opportunities.

- Adult Day Program Director
- Aging Services Administrator
- Program Specialist/Director
- Social Services Coordinator
- Life Enrichment Coordinator
- Activity Director
- Information and Referral Specialist
- Volunteer coordinator/manager
- Geriatric Case Manager
- Long Term Care Administrator
- Adult Protective Services worker
- Advocate/Ombudsman
- Research/Data Analysis
- Professional programs including nursing, medicine, physical therapy, occupational therapy, law, interior design, etc.

GERO 2000 INTRODUCTION TO GERONTOLOGY (3 credits)

An introduction to social gerontology and human development in later life; emphasis is on important elements of aging, such as socialization, family interaction, retirement, physical and psychological aging, and perceptions of older persons in contemporary society.

Distribution: Social Science General Education course and U.S. Diversity General Education course

GERO 3000 COMMUNITY RESOURCES FOR OLDER ADULTS (3 credits)

This course is designed to introduce the student to community resources for older adults, to identify the organizations and individuals in the public and private sectors that help support aging in place, and to examine the impact of the efforts on older adults at the national, state and local levels.

Prerequisite(s): Completion of GERO 2000. Not open to non-degree graduate students.

GERO 3070 DEATH AND DYING (3 credits)

An interdisciplinary survey of literature in the field of thanatology, with an emphasis on working with the older patient and his or her family. (Cross-listed with PHHB 3070).

GERO 3250 RESEARCH METHODS IN GERONTOLOGY (3 credits)

This course will introduce undergraduate students to basic methodologies used in social and gerontological research. Students will explore the fundamentals of research methods, including learning how to formulate a research question, discuss and distinguish between multiple methods of data collection, perform various techniques used in quantitative and qualitative data analysis, and identify the ethics involved in social research. This course is intended for students in gerontology and in other fields who are interested in a humanistic approach to understanding significant issues which affect the lives of older people.

GERO 3500 BIOLOGICAL PRINCIPLES OF AGING (3 credits)

The Biological Bases of Aging Course provides a survey of the primary topics in the biology of aging field for undergraduate students. This a required course for the Gerontology major. By the end of the course, students will understand major theories, biological methods, and seminal research studies in the biology of aging field. Furthermore, students will learn how to critically analyze and interpret primary research about biological aging. This course provides preparation for students considering graduate school in gerontology or biology, geriatric nursing and social work, geriatric medicine, neuroscience, psychology, and exercise science. (Cross-listed with BIOL 3500, NEUR 3500)

Prerequisite(s): Sophomore/Junior/Senior Standing. Not open to non-degree graduate students.

GERO 4050 ADVANCED BIOLOGY OF AGING (3 credits)

This course covers biological aging topics at an advanced level, and is designed for undergraduate and graduate students who have some prior knowledge about biology or aging. The course will be interdisciplinary in nature and focus on topics relevant to gerontology, biology, psychology, and exercise science. Students will learn how to think critically about primary research in the biology of aging. Furthermore, they will apply their knowledge of the biology of aging field by creating a handbook of healthy aging for older adults. (Cross-listed with GERO 8056, NEUR 4050).

GERO 4100 EDUCATIONAL GERONTOLOGY (3 credits)

An introduction to the field of education for and about the aging. The institutions and processes of education will be analyzed to determine their relationships and value to persons who are now old and those who are aging. (Cross-listed with GERO 8106).

Prerequisite(s): Students must have a junior, senior or graduate student status.

GERO 4200 VOLUNTEER MANAGEMENT (3 credits)

The purpose of this course is to equip managers of volunteers in aging services to develop, maintain, assess impact and evaluate a sustainable volunteer program that will provide reliable and necessary services to older adults and further to be embraced as a valuable asset by professionals working in the field of aging. (Cross-listed with GERO 8206).

Prerequisite(s): Junior or Senior Standing

GERO 4350 ISSUES IN AGING (3 credits)

This course is intended for students in gerontology and in other fields who are interested in a humanistic approach to understanding significant issues which affect the lives of older people. (Cross-listed with GERO 8356).

GERO 4420 RECREATION FOR THE AGING (3 credits)

Role of leisure services as related to understanding and working with elders. Emphasis on recreation programming as a mode of intervention. Analysis and study of the phases of aging, with reference to psychomotor, affective, and cognitive changes; introduction to the theories of aging and how they relate to the lifestyle of this population; recreational therapy intervention, activity adaptation and program design; leisure education and issues and trends. (Cross-listed with GERO 8426, RLS 4420, RLS 8426).

GERO 4440 SOCIOLOGY OF AGING (3 credits)

This course will introduce students to important theories and concepts in the sociological study of aging and give deeper understanding of the experiences that people encounter as they grow older, including retirement, disease and disability, and long-term care. In addition to exploring the challenges faced by older adults, this course will focus on factors that contribute to successful aging. (Cross-listed with GERO 8446).

GERO 4460 PSYCHOLOGY OF ADULT DEVELOPMENT AND AGING (3 credits)

The focus of this course is on the major social and psychological changes that occur as a function of aging. Both normal and abnormal patterns of developmental change are examined, along with their implications for behavior. (Cross-listed with PSYC 4460, GERO 8466).

Prerequisite(s): Junior or senior.

GERO 4470 MENTAL HEALTH AND AGING (3 credits)

The goal of this courses is to survey the mental health needs of older adults. Consideration is given to identifying both positive mental health and pathological conditions. Treatment interventions effective with older adults and their families are also discussed. (Cross-listed with GERO 8476, PSYC 4470, PSYC 8476).

Prerequisite(s): Junior or Senior

GERO 4480 GLOBAL AGEING (3 credits)

The study of ageing around the world by a comparative method in a cross-cultural and cross-national framework. An explanation of some practical experiences and developments in Europe, Asia and Africa will be examined. (Cross-listed with GERO 8486).

GERO 4500 LEGAL ASPECTS OF AGING (3 credits)

This course centers on the legal concerns likely to arise as people age. We will discuss the American legal system with an emphasis on underlying legal concepts and issues of special importance to older persons. Some of the topics include guardianship, finances in retirement, abuse and neglect, Social Security, and Medicare and Medicaid. Consideration of the legal concerns which are likely to arise as people age. Includes introduction to American legal system, and emphasis on underlying legal concepts and issues of special importance to older persons. (Cross-listed with GERO 8506).

GERO 4510 LONG-TERM CARE ADMINISTRATION (3 credits)

An investigation of the broad range of policy issues, theoretical concerns and practical management strategies influencing the design, organization and delivery of long-term care services. (Cross-listed with GERO 8516, PA 4510, PA 8516).

GERO 4520 SENIOR HOUSING (3 credits)

The senior housing course is designed to provide students with an in-depth understanding of the various housing options available to older adults including aging in place to hospice. At the end of the course students will have a working knowledge of the needs of older adults and how this is used in making decisions about housing. (Cross-listed with GERO 8526).

Prerequisite(s): Junior/Senior Standing

GERO 4550 HEALTH ASPECTS OF AGING (3 credits)

This course emphasizes health promotion for older adults. Special health needs of older Americans are compared and contrasted with health needs for other age groups. Prevention or delaying of chronic diseases and disorders are emphasized. (Cross-listed with GERO 8556, PHHB 4550, PHHB 8556, WGST 4550).

GERO 4560 NUTRITION AND AGING (3 credits)

The goal of this course is to provide an understanding of the relationship between nutrition and successful or usual aging. This course will review the basics of good nutrition and relate them to the usual food intake of older adults. It will identify the impact of poor nutrition. This course will also look at the role nutrition plays in various disease processes that are associated with aging. It will provide information about support services that are available to assure good nutrition into old age for those living independently. (Cross-listed with GERO 8566).

Prerequisite(s): Junior Standing.

GERO 4570 REHABILITATIVE DESIGN (3 credits)

The purpose of this interdisciplinary course is to provide students with a greater appreciation and understanding of impairment as a platform for professional activities. This course will also provide an understanding of how Rehab Engineering, Universal and Inclusive Design and the implementation of Assistive Technology allow for greater levels of independence and quality of life for all members of our community, with an emphasis on the applications in the aging process. (Cross-listed with GERO 8576).

GERO 4600 MANAGEMENT AND ADMINISTRATION OF AGING PROGRAMS (3 credits)

This course is designed to give students a broad overview of theories, models, issues and approaches related to the administration of services and programs for older adults. (Cross-listed with GERO 8606).

Prerequisite(s): Junior/Senior Standing

GERO 4670 PROGRAMS AND SERVICES FOR OLDER ADULTS (3 credits)

This course is provided to give the student an historical overview of programs for older adults; examine the national policy process as it relates to the older American; and review the principles and practices relative to the existing national programs for the aged. (Cross-listed with GERO 8676, PA 8676).

Prerequisite(s): Junior or senior. Not open to non-degree graduate students.

GERO 4690 WORKING WITH MINORITY ELDERLY (3 credits)

This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 8696, SOWK 4040, SOWK 8046).

GERO 4720 BABY BOOMERS AND THE 21ST CENTURY (3 credits)

Marketing decisions and strategies apply to all businesses and are influenced by the target market. The economic realities and the character of America will change due to shifting demographics of baby boomers. Businesses that understand the power of the baby boomers will succeed; failure to understand that power may lead to economic consequences. Students from many disciplines will benefit from this cross-referenced course blending the realities of gerontology with the predictions of baby boomer behavior and the resulting impact to all businesses. (Cross-listed with GERO 8726).

Prerequisite(s): Junior, Senior or Graduate Level Standing.

GERO 4750 MID-LIFE, CAREER CHANGE, PRERETIREMENT PLANNING (3 credits)

This course is designed to involve candidates in the exploration of the developmental tasks of mid-life, myths and realities related to career change as well as the implication of preretirement planning. Factual information, as well as model examination and evaluation are presented to aid the candidate in becoming better equipped to understand some of the forces which affect the well-being of middle aged persons as they prepare for the later years. (Cross-listed with COUN 8756, GERO 8756).

Prerequisite(s): Not open to non-degree graduate students.

GERO 4850 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)

This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 8856, SOWK 4850, SOWK 8856.)

GERO 4920 SPECIAL STUDIES IN GERONTOLOGY (1 credit)

Special studies designed around the interests and needs of the individual student in such areas as the psychology, sociology, economics, biology, or politics of aging, as well as operation of various service systems. This independent study may include a literature review or a field project in which experience is gained in the community, identifying and analyzing needs and services related to older people.
Prerequisite(s): Instructor permission.

GERO 4940 PRACTICUM (3 credits)

This course provides the opportunity to students to share field experiences; to obtain guidance concerning various relationships with agency, staff and clients; and to develop a broadly based perspective of the field of aging.
Prerequisite(s): Nine hours in gerontology and permission. Students must be enrolled in the GERO program and have a minimum GPA of 2.5. Not open to non-degree graduate students.

GERO 4950 PALLIATIVE CARE: MENTORING A HEALTHCARE APPROACH OF PATIENT-CENTERED CARE WITH FOCUS ON WELL-BEING (3 credits)

This course provides a foundation for the recognition of the need to implement palliative medical care. Using current texts and literature, video and podcast lectures by colleagues, and review of cases and topics, a student will understand the definitions, purposes, and benefits of palliative medical care. The student will learn the avenues and ways to implement palliative care to provide care that promotes well-being. (Cross-listed with GERO 8956).
Prerequisite(s): Junior, senior, graduate standing

GERO 4970 SENIOR HONORS PROJECT/THESIS (3 credits)

An independent research project supervised by gerontology department/school faculty. The senior honors project must be approved by the University Honors Program.
Prerequisite(s): Senior in the University Honors Program.

GERO 4980 COUNSELING SKILLS IN GERONTOLOGY (3 credits)

This course is intended to help develop basic counseling skills for application in gerontology. (Cross-listed with COUN 8986, GERO 8986).
Prerequisite(s): Not open to non-degree graduate students.

Area of Concentration or Minor

Students choose a concentration or minor to complement their degree. Students may choose any approved UNO minor or from three Gerontology-approved concentrations: Pre-Health Concentration, Administration Concentration (available online), or Health Aging Concentration (available online). Students may also complete a double degree or double major to fulfill this requirement.

If a minor is chosen, students must abide by specific UNO minor requirements. All courses for Gerontology-approved concentrations must be completed with a "C-" or higher and no CR/NC is accepted.

Gerontology, Bachelor of Science Concentrations

- Administration (p. 954)
- Healthy Aging (p. 954)
- Pre-Health (p. 955)

¹ Gerontology students must choose an 18 credit concentration in Healthy Aging, Administration, Pre-Health OR any university minor.

² Gerontology students must take a total of 9 credits of elective courses from within the Gerontology department.

³ Approved Writing in the Discipline courses are MKT 3200, ENGL 2400, ENGL 3050 and GERO 3250

⁴ To enroll in practicum a student must have a cumulative 2.5 GPA.

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements:

The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams:

For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

^{**}Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

GERO courses must be a C- or higher

General Education must be a C- or higher

Gerontology Concentration courses must be C- or higher.

Graduation Requirements:

120 Credits and a 2.0 GPA is required to graduate from UNO.

Administration Concentration

Gerontology, Bachelor of Science in Gerontology - Administration Concentration Requirements

ELECTIVES

Elective hours as required to reach a total of 120 hours

Gerontology Certificate

Gerontology Certificate

The certificate in gerontology requires completion of 18 credit hours and a cumulative GPA of 2.0 for all gerontology coursework. Admission into the program requires a 2.50 GPA. The requirements for the certificate can be completed online or on campus.

Gerontology Coursework

(15 credit hours, an overall average of 2.0, no CR/NC can be applied.)

Students choose coursework based on career objectives and interest areas and should consult with a gerontology academic advisor for a plan of study.

Strongly recommended courses for all students: GERO 2000, GERO 4460 and GERO 4670

Strongly recommended course for Pre-Health: GERO 4050

Gerontology Practicum

To facilitate important real-world experience before graduation, all students will complete 156 hours in a practicum site of their choice.

In order to enroll in practicum, students must have completed a minimum of 9 credit hours of Gerontology courses and have a cumulative GPA of at least 2.5.

GERO 4940: Practicum (3 credit hours, course must be completed with a "C-" or higher.)

The certificate program may be used as a minor or a concentration within other degrees. Students should consult with their major/college academic advisor to determine how the certificate applies to their degree program. Students who wish to work toward the certificate must meet with an academic advisor in the Department of Gerontology to apply.

Gerontology Minor

Gerontology Minor Requirements

The minor in gerontology requires completion of 18 credit hours with a cumulative GPA of 2.0 for all gerontology coursework. Nine of these credits must be upper division. Admission into the program requires a 2.50 GPA. The requirements for the minor can be completed online or on campus.

Code	Title	Credits
Gerontology Coursework ¹		6
GERO 2000	INTRODUCTION TO GERONTOLOGY	
GERO 3000	COMMUNITY RESOURCES FOR OLDER ADULTS	
or GERO 4670	PROGRAMS AND SERVICES FOR OLDER ADULTS	
Gerontology Electives ¹		12

Select coursework based on career objectives and interest areas and consult with a Gerontology academic advisor for a plan of study.

¹ An overall average of 2.0.

For students pursuing a career path in the Pre-Health, GERO 3500 and GERO 4050 is strongly recommended.

GERO 4670 may be taken online in place of GERO 3000.

BSSW Program

The Bachelor of Science in Social Work (BSSW) program has received continuous accreditation from the Council on Social Work Education since 1975. The mission of the Grace Abbott School of Social Work is to educate students to become highly qualified social workers who serve people of all ages and influence the systems that affect them, to advance knowledge through teaching and research, and to engage with diverse communities to promote socially just societies.

The BSSW program prepares graduates for beginning social work practice within a variety of social service settings. This degree qualifies graduates to receive the Certified Social Worker credential (CSW) in the state of Nebraska. Other states with licensure and certification of BSSW level social workers will also recognize this degree for licensure or certification. It also prepares students for advanced graduate social work education (the MSW degree).

Website

Admission to the BSSW Program

Upon completion of at least 60 credit hours, UNO general education requirements, and three pre-social work courses (SOWK 1000, SOWK 1500, and SOWK 2120), the student may apply for formal admission into the BSSW degree program. Students begin the BSSW program every Fall semester and apply to the program the Spring prior. The BSSW application is open mid-January to mid-February each year. Admission to the BSSW Program is competitive, based on a combination of the following criteria:

- Completion of UNO general education.
- Successful performance in the three pre-professional social work courses (SOWK 1000, SOWK 1500 and SOWK 2120) with a grade of B or better.
- Minimum of 60 credit hours complete with a cumulative GPA of 2.5 or higher.
- Well written personal statement evidencing potential for successful practice in the field of Social Work.
- Positive references

Degrees Offered

- Social Work, Bachelor of Science (p. 959)

Writing in the Discipline

SOWK 3890 Writing for Social Work

Social Work is a profession for those with a strong desire to help improve people's lives. Social workers fight for social justice, build community, and strengthen those who are vulnerable, oppressed, or living in poverty. Social work is a versatile career choice. Social workers can specialize in service to a particular population, work in a certain setting, or focus on research,

social welfare planning and policy development. Social work is one of the fastest growing professions in the United States.

Social workers are employed in:

- hospitals and health care settings
- community mental health and private practice clinics
- Veterans Affairs
- child welfare agencies
- criminal justice, corrections, and victim advocacy programs
- elementary and secondary schools
- crisis and homeless shelters
- drug and alcohol treatment centers
- specialized non-profit organizations
- local, state, and federal government agencies

SOWK 1000 SOCIAL WORK AND SOCIAL WELFARE (3 credits)

This course is designed for the student who wants to learn about social welfare and to explore a possible major in social work. The student examines historical and current issues in social welfare, social services, and the social work profession. The course focuses on values, beliefs, and goals of social services and social work, and provides a historical perspective for present activities.

Distribution: Social Science General Education course and U.S. Diversity General Education course

SOWK 1500 SOCIAL WORK AND CIVIC ENGAGEMENT (3 credits)

This course is designed to acquaint the student with the social work profession, professional roles and functions, and social services delivery systems. Students will have an opportunity to observe and participate in social services activities within Nebraska and Iowa communities incorporated with didactic experiences. Students will also have an opportunity to explore their vocational aptitude for social work practice via interactive encounters with clients and helping professionals.

Prerequisite(s): Not open to non-degree graduate students.

SOWK 2120 RACE, CLASS AND GENDER IN THE UNITED STATES (3 credits)

This course examines the effects of race, class, and gender on social policy and social injustice. The focus is on how institutional oppression of racism, classism, and sexism are interconnected and are mutually reinforcing. The consequences of institutionalized oppression are examined at the individual, family, group, organization, community, and societal levels.

Distribution: U.S. Diversity General Education course

SOWK 3000 APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR (3 credits)

A course on the use of data and statistical methods to explore and make inferences about society, while critically considering the influence of context and the powers and limitations of quantitative evidence. (Cross-listed with CRCJ 3000, PA 3000).

Prerequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or MATH 1300 or MATH 1320 or an ACT of 19, or above or permission from the department.

SOWK 3010 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT I (3 credits)

This course is the first part of a two-semester sequence within the MSW required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan, within the social environment at the micro- and macro-level (e.g., individuals, families, groups, organizations, institutions, and communities), as they relate to effective social work generalist practice.

Prerequisite(s): Admission to BSSW Program. Not open to non-degree graduate students.

SOWK 3020 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT II (3 credits)

This course is the second part of a two-semester sequence within the BSSW required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan, emphasizing functioning at the mezzo and macro levels of practice. This class is designed to build upon the theories of lifespan development presented in the initial course of the sequence.

Prerequisite(s): SOWK 3010, SOWK 3320, SOWK 3890. Not open to non-degree graduate students.

SOWK 3110 SOCIAL WELFARE POLICY (3 credits)

This course is an introduction to social welfare policy analysis. It informs the BSSW student about the history of professional social work, the development of social services in the United States, and the values, beliefs, ethics and social welfare theories that frame professional policy practice. The course examines U.S. social welfare policy, taking into account historical social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy.

Prerequisite(s): SOWK 3010, SOWK 3320, SOWK 3890. Not open to non-degree graduate students.

SOWK 3320 GENERALIST PRACTICE WITH INDIVIDUALS AND FAMILIES (3 credits)

This course introduces students to the values, ethics, knowledge, and skills of generalist social work practice. Using constructs from the Generalist Intervention Model, systems theory, and the strengths-based perspective, students learn about engagement, assessment, planning and contracting, intervention, evaluation, and termination. Diversity and case management are emphasized as part of bringing planned change to client systems, including individuals, families, and groups.

Prerequisite(s): Admission to BSSW Program. Not open to non-degree graduate students.

SOWK 3350 GENERALIST PRACTICE WITH GROUPS, ORGANIZATIONS, AND COMMUNITIES (3 credits)

This course reinforces the values, ethics, knowledge, and skills of generalist social work practice with groups. Students gain specific knowledge and skills in group assessment, intervention, and termination. Students will learn about the process of group development and facilitation. This course looks at the various types of groups social workers may facilitate.

Prerequisite(s): SOWK 3010, SOWK 3320, SOWK 3890. Not open to non-degree graduate students.

SOWK 3890 WRITING FOR SOCIAL WORK (3 credits)

This course emphasizes the process of critical thinking and analysis and the process of effective professional writing as required for generalist social work practice. Students will apply selected generalist social work concepts to prepare writing samples such as research/term papers, client progress/psychosocial reports, analytical reviews, professional development papers, business communications, and grant proposals. Research and writing skills emphasized are: conducting electronic literature searches, outlining, paragraph and sentence structure, revising, using APA format, and proofreading for correct grammar, word usage, and punctuation.

Prerequisite(s): Admission to BSSW Program. Not open to non-degree graduate students.

SOWK 4010 SOCIAL WORK WITH AMERICAN INDIANS (3 credits)

This course provides the student with a broad study of the historical origins, influences and issues of American Indians in relation to social work practice. The application of generalist social work methods are explored, including anti-racism, diversity, equity, and inclusion (ADEI) framework. The student will learn and understand the political identities of American Indians, which are unique to this population. Methods of intervention applicable to American Indian populations and communities are reviewed, giving special attention to practice across the lifespan. (Cross-listed with SOWK 8016).

Prerequisite(s): Admission to the BSSW Program. Not open to non-degree graduate students.

SOWK 4020 SOCIAL WORK WITHIN THE AFRICAN AMERICAN COMMUNITY (3 credits)

This course seeks to develop in students an awareness and understanding of some of the social and psychological/cognitive realities influencing the behavior of African American youth and families across the lifespan. The content draws upon theories, research and social work practice skills relevant to African American youth and families, as well as the cognitive process and social systems which impact African youth and families. (Cross-listed with SOWK 8026)

Prerequisite(s): Admission to the BSSW program

SOWK 4030 SOCIAL WORK WITH LATINOS (3 credits)

The purpose of this course is to study and analyze cross-cultural social work practice with Latino populations. Students will learn what factors impact Latino communities and what skill sets are essential for diverse social work practice. (Cross-listed with SOWK 8036).

Prerequisite(s): Admission to the BSSW Program

SOWK 4040 WORKING WITH MINORITY ELDERLY (3 credits)

This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 4690, GERO 8696, SOWK 8046).

Prerequisite(s): Admitted to the BSSW program or [SOWK 1000, junior or senior standing, and permission of the School

SOWK 4050 ETHNIC DIVERSITY AND SOCIAL WORK PRACTICE (3 credits)

This course focuses on effective social work practice with ethnic diversity. Students critically examine different theoretical frameworks to understand ethnic diversity. Current major ethnic groups in American society are explored regarding demographics, history, worldviews, cultural traditions, and social welfare. The goal is to deepen student's basic knowledge, skills, and values of ethnic diversity in relation to family structure, gender roles, care giving, and help-seeking behaviors. In addition, attention is given to immigrants, refugees, and persons who identify as multi-ethnic. (Cross-listed with SOWK 8056)

Prerequisite(s): Admission to the BSSW Program

SOWK 4060 MEDICAL SOCIAL WORK (3 credits)

This course is an introduction to medical social work. BSSW and MSW students will focus on the knowledge base and practice skills needed to assess the holistic care of patients and their families. This course prepares students to 1) understand healthcare disparities and needs of individuals and their family, 2) apply theory and models of patient-centered care delivery, 3) develop skills for working on interprofessional teams, 4) formulate ideas for addressing barriers and improving health care access. (Cross-listed with SOWK 8066).

Prerequisite(s): SOWK 3320 prior to or concurrent

SOWK 4360 SOCIAL WORK PRACTICE III (3 credits)

This course is an introduction to a goal-oriented planned change process with an emphasis on task groups, organizations, and communities.

Prerequisite(s): SOWK 3320, SOWK 3110, SOWK 3020

SOWK 4400 RESEARCH METHODS IN SOCIAL WORK PRACTICE (3 credits)

The focus of the course will be to define research methods as they are applied in social work, using ethical, culturally informed, anti-racist, and anti-oppressive approaches. Students will use research to inform their practice decision-making. Values and ethical issues are infused throughout the content of the course as they relate to research processes and methods.

Prerequisite(s): Prior or concurrent STAT 1530, CRCJ 3000, PA 3000, PSYC 3130, SOWK 3000, or STAT 3000

SOWK 4410 GENERALIST SOCIAL WORK PRACTICUM I (5 credits)

This course is designed to provide supervised, individual, and experiential learning offered within the setting of a selected social service agency. The student is introduced to a variety of social work practice roles, develop professional relationships with client systems and learn to apply different interventions to effect change across the life span. In order to facilitate integration of classroom theory with practice, students will attend a seven-week field practicum lab/seminar (2 hours every other week in spring/fall; every week in summer).

Prerequisite(s): SOWK 4360 prior or concurrent

SOWK 4420 GENERALIST SOCIAL WORK PRACTICUM II (5 credits)

This course is designed to provide supervised, individual, and experiential learning offered within the setting of a social service agency, typically the same agency as in SOWK 4410. This course builds upon opportunities provided and competence achieved in Generalist Social Work Practicum I.

Prerequisite(s): SOWK 4410 prior or concurrent

SOWK 4450 SOCIAL WORK CAREER PREP (1 credit)

This course is an integrative senior seminar designed to be taken concurrently with practicum. This course facilitates the transition from BSSW student to professional social worker. To achieve this, students will reflect on the following: how to prepare for a job interview, personal financial planning, continuing education, licensure, and social work competencies.

Prerequisite(s): SOWK 4410 prior or concurrent

SOWK 4510 TREATMENT ISSUES IN CHEMICAL DEPENDENCY (3 credits)

This course addresses chemical dependency treatment issues including denial, minimization, relapse and its prevention, resistance, family dynamics, poly-substance abuse, co-occurring disorders, spirituality and the influence of self-help groups. The education will include the clinical treatment needs of individuals suffering from chemical dependency, taking into consideration diversity, gender, culture and lifestyle. (Cross-listed with COUN 4510, COUN 8516, SOWK 8516).

Prerequisite(s): Admission to counseling program or social work programs or permission of instructor. Not open to non-degree graduate students.

SOWK 4530 SCHOOL SOCIAL WORK (3 credits)

This course explores the field of social work practice in school settings. Major topics include: history of social work practice in schools; the school environment; roles of school social workers; mandated foundations for school social work services; eligibility for special education and 504 plans; theories of practice that include school and community based models; and interventions for target populations in schools. (Cross-listed with SOWK 8536).

Prerequisite(s): Admission to the BSSW Program

SOWK 4620 TRAUMA AND RESILIENCE (3 credits)

This course provides an overview of issues related to trauma including: the factors related to development of trauma, definitions of trauma, the impact of trauma on individuals, families and communities, and the programs and practices that are most effective and appropriate regarding the social work role in responding to trauma. (Cross-listed with SOWK 8626)

Prerequisite(s): Admission to the BSSW Program

SOWK 4640 PERMANENCE FOR CHILDREN (3 credits)

This course examines the history, challenges, and issues of governmental intervention in families to protect at-risk children. The course concentrates on the effects of social policies, like the 1980 federal legislation (PL 96-272) on child welfare delivery systems and practices. It provides a comprehensive overview of child welfare services, including child protective services, in-home services, foster care, group care, intergenerational childcare, and adoption. It also provides an overview of the juvenile justice system and its impact on children and their families. (Cross-listed with SOWK 8646).

Prerequisite(s): Admission to the BSSW Program

SOWK 4650 SOCIAL WORK IN MENTAL HEALTH (3 credits)

This is an undergraduate introductory social work course on mental health. The aim of the course is to acquire basic knowledge and skills for effective and culturally appropriate interventions. Students examine the history of psychiatric care to inform a social work perspective on mental health/illness, human rights, social justice, stigma, ethical/legal issues, and a continuum of care for families, communities, and service providers. Mental health/illness is taught from a distinct social work perspective using historical-critical analysis and case studies.

Prerequisite(s): Admission to the BSSW Program

SOWK 4660 SOCIAL WORK WITH INDIVIDUALS WITH DISABILITIES (3 credits)

This is an introductory course to explore contemporary social work practices pertaining to the experiences of individuals with intellectual and developmental disability (I/DD) across the lifespan. Law and policy trends will be examined through the lens of disability rights, advocacy, and ethics. The course will assess the impact of intersectionality and diversity on the health and well-being of individuals with I/DD.

Prerequisite(s): Admission to the BSSW Program

SOWK 4680 MEDICAL AND PSYCHOSOCIAL ASPECTS OF SUBSTANCE USE DISORDERS (3 credits)

This course introduces students to substance use disorders and their impact on the individual, family, and society. It covers psychopharmacology, alcohol and drug interactions, drug classifications, theories of substance use disorders, various models of treatment, vulnerable populations, and ethical and legal issues. (Cross-listed with SOWK 8686, COUN 4680, COUN 8686).

SOWK 4690 ASSESSMENT AND CASE MANAGEMENT IN SUBSTANCE USE DISORDERS (3 credits)

This course focuses on assessment of clients and their environment, and diagnosis and referral for substance use disorder treatment. Emphasis is given to assessment instruments, treatment levels, treatment planning, case management, and social justice. (Cross-listed with COUN 4690, COUN 8696, SOWK 8696).

Prerequisite(s): Admission to the BSSW Program

SOWK 4800 SOCIAL WORK AND THE LAW (3 credits)

This course presents the fundamental principles of criminal and civil law that have relevance to the practice of social work. Topics include the legal system; legal research methods; professional ethical/legal responsibilities and liabilities; family law; elder law; criminal law; juvenile law; personal injury law; employment discrimination law; capacity to make contracts and wills; rights of institutionalized patients; and rights of children with disabilities to an education. (Cross-listed with SOWK 8806).

Prerequisite(s): Admission to BSSW Program

SOWK 4810 SPIRITUALITY AND SOCIAL WORK PRACTICE (3 credits)

This course examines major issues and basic concepts pertaining to spirituality and social work practice. This course applies critical thinking to deepen understanding of spirituality in relation to clients of diverse religious and secular perspectives. The goal is to develop students' professional use of self and spirituality as the human striving for meaning, purpose, and wellbeing. Classroom time is organized around lectures, field trips, and reflective assignments. (Cross-listed with SOWK 8816)

Prerequisite(s): Admission to the BSSW Program

SOWK 4820 GLOBAL ENGAGEMENT: A SOCIAL WORK PERSPECTIVE (3 credits)

This course prepares students to work in a global setting. Students examine theories, concepts, and skills related to social development, cross-cultural engagement, and issues related to particular countries. The course is designed with two elements: 1) On-campus classroom learning focused on global social work knowledge, and, 2) Field-based labs that involve direct engagement with an international population. Students select one lab: i) faculty-led trip to China for two-weeks, ii) refugee resettlement service-learning project in Omaha. (Cross-listed with SOWK 8826).

Prerequisite(s): Admission to the BSSW Program

SOWK 4830 CRISIS INTERVENTION (3 credits)

Students will study Robert's 7-Stage Model of Crisis Intervention and how to ethically practice with diverse and vulnerable populations. Students will apply crisis intervention theory and models of intervention to various concern areas including but not limited to suicide, sexual assault, domestic violence, substance abuse, grief and loss, and violence. A systems, strengths, and cultural emphasis will be applied to the various crisis situations covered. (Cross-listed with SOWK 8836)

Prerequisite(s): Admission to the BSSW Program

SOWK 4850 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)

This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 4850, GERO 8856, SOWK 8856.)

Prerequisite(s): Admission to BSSW or permission of the school

SOWK 4880 TOPICAL SEMINAR IN SOCIAL WORK (3 credits)

Specific seminar topics will focus on advanced content in social work theory and practice. The course description will be announced when a specific topical seminar is proposed. The topics selected will be consistent with the Grace Abbott School of Social Work program objectives, faculty expertise, and student needs. (Cross-listed with SOWK 8886)

Prerequisite(s): Admission to the BSSW Program

SOWK 4890 SPECIAL STUDIES IN SOCIAL WORK (1-4 credits)

This independent study course allows students to pursue a special selected area or topic within social welfare in order to deepen knowledge and/or skills in that particular area.

Prerequisite(s): Admission to the BSSW Program

SOWK 4980 SENIOR HONORS PROJECT/THESIS (3-6 credits)

An independent research project supervised by an approved faculty member. The senior honors project must be approved by the CPACS Honors Coordinator.

Prerequisite(s): Senior in Honors Program and permission of the School.

Social Work, Bachelor of Science

Professional BSSW Program

Students who apply and are accepted into the BSSW program complete a sequence of professional social work courses as well as a practicum experience and social work specific electives.

¹ Must receive a grade of B or better in SOWK 1000

² Must receive a grade of B or better in SOWK 2120

This roadmap is a suggested plan of study and does not replace meeting with an advisor. Please note that students may need to adjust the actual sequence of courses based on course availability. Please consult an advisor in your major program for further guidance.

This plan is not a contract and curriculum is subject to change

Additional Information About this Plan:

University Degree Requirements: The minimum number of hours for a UNO undergraduate degree is 120 credit hours. Please review the requirements for your specific program to determine all requirements for the program. In order to graduate on-time (four years for an undergraduate degree), you need to take 30 hours each year.

Placement Exams: For Math, English, Foreign Language, a placement exam may be required. More information on these exams can be found at <https://www.unomaha.edu/enrollment-management/testing-center/placement-exams/information.php>

**Transfer credit or placement exam scores may change suggested plan of study

GPA Requirements:

Students can apply for the professional social work program in the spring semester of their sophomore year given that the proper pre-requisite courses will be complete by the end of the sophomore spring term. Students must have a minimum cumulative GPA at or above 2.5 in order to apply for and begin the professional social work courses in their junior and senior year. Students must maintain a minimum GPA of 2.5 in order to continue in the professional social work program.

Cross-Sector Collaborative Leadership Minor

The Need

Many societal challenges are complex in nature, with a variety of interdependent causal factors that cannot be addressed independently by public sector, private sector, or non-profit sector organizations working in isolation. Yet, through collaboration across those sectors, significant impact is possible.

The Goal

The goal of this cross-sector collaborative leadership minor is to prepare graduates to lead and serve effectively in such cross-sector collaborative initiatives.

Skills Acquired

Students who successfully complete the cross-sector collaborative leadership minor will have gained knowledge and experiences that will enable them to:

- Understand and apply collaborative leadership across the public, nonprofit and business sectors.
- Effectively approach and communicate with cross-sector partners.
- Analyze issues and challenges from the perspectives of all three sectors.
- Recognize the interconnectedness of all three sectors.
- Demonstrate cultural understanding.
- Develop and evaluate cross-sector collaboration initiatives.
- Apply strategic and project management skills.

Interdisciplinary

This interdisciplinary minor will prepare students to collaboratively address complex cross-sector challenges. Students will develop their leadership skills through developing and leading a collaborative cross-sector project and collaborating with private, nonprofit and public sectors.

Contact

Dr. Meagan Van Gelder | Cross-Sector Collaborative Leadership Minor Advisor | mvangelder@unomaha.edu | 402.554.3480

Cross-Sector Collaborative Leadership Minor Requirements

15 credit hours of courses completed with grades of C- or better are required for the minor.

Code	Title	Credits
Required Courses		9
PA/MGMT 3800	CROSS-SECTOR COLLABORATIVE LEADERSHIP	

PA 2000	LEADERSHIP & ADMINISTRATION
PA 4960	CROSS-SECTOR COLLABORATIVE LEADERSHIP CAPSTONE

6 hours from one of the below
6

Code
Title
Credits

Bachelor of Science in Business Administration (BSBA) majors are required to take the following two courses (6 credit hours):

PA 2170	INTRODUCTION TO PUBLIC ADMINISTRATION
PA 3700	FINANCIAL MANAGEMENT FOR NONPROFITS
or PA 4390	PUBLIC BUDGETING

Political Science undergraduate majors and Public Administration undergraduate minors are required to take the following two courses (6 credit hours):

MGMT 1500 INTRODUCTION TO BUSINESS

ACCT 2000 ACCOUNTING BASICS FOR NON-BUSINESS MAJORS

or ENTR 3710 ENTREPRENEURIAL FOUNDATIONS

Other UNO undergraduate majors are required to take the following two courses (6 credit hours):

MGMT 1500 INTRODUCTION TO BUSINESS

PA 2170 INTRODUCTION TO PUBLIC ADMINISTRATION

or PA 3500 NONPROFIT ORGANIZATIONS AND MANAGEMENT

Nonprofit Management Minor

As UNO continues to serve as the Nebraska's premiere metropolitan university, the nonprofit management minor exemplifies UNO's metropolitan and collaborative extension to the community.

Our Mission

Along with the University of Nebraska at Omaha's (UNO) strategic plan, the School of Public Administration upholds the esteemed pleasure of placing students first and achieving academic excellence all while engaging with the community.

By entrusting students with the necessary information to lead, manage, and ignite change within the nonprofit sector, our university continues to rise to the forefront of community engagement.

Skills Acquired

Upon completion of the nonprofit management minor, students will have the necessary skills needed to work in the nonprofit field.

- To equip students with the knowledge and competencies to successfully manage and lead organizations in the nonprofit sector.
- To provide a foundation in financial management, facilitating community change, marketing, and managing volunteers and staff with a nonprofit organization.
- To complement a wide variety of majors across the university system.

Student-Centered

The nonprofit sector is on the rise, with wages and employment exceeding both private and government entities the past decade. With 1.6 million registered nonprofits in the U.S., the need to educate and empower UNO students with the skills to lead the nonprofit sector in the Omaha metro is crucial. As interest in the nonprofit sector continues to climb, so will

the need to service the Omaha community and the State of Nebraska in its effort to meet the needs of its growing population. The nonprofit management minor is open to students in any discipline area at UNO.

Contact

To learn more about the nonprofit management minor, contact:

Meagan Van Gelder | Nonprofit Management Minor Advisor | mvangelder@unomaha.edu | 402.554.3480

Nonprofit Management Minor Requirements

The minor requires the following 18 credit hours with grades of C- or better:

Code	Title	Credits
Required Nonprofit Management Minor Courses (must complete all)		9
PA 2170	INTRODUCTION TO PUBLIC ADMINISTRATION	
PA 3500	NONPROFIT ORGANIZATIONS AND MANAGEMENT	
PA 4500	NONPROFIT FUNDRAISING	
Elective Nonprofit Management Minor Courses		
Select three of the following:		9
PA 2000	LEADERSHIP & ADMINISTRATION	
PA 3600	PERSONNEL AND VOLUNTEER MANAGEMENT IN NONPROFITS	
PA 3700	FINANCIAL MANAGEMENT FOR NONPROFITS	
PA 4100	MARKETING IN PUBLIC, NON-PROFIT AND AVIATION ORGANIZATIONS	
PA 4300	SEMINAR IN PUBLIC POLICY	
PA 4410	PUBLIC PERSONNEL MANAGEMENT	
PA 4440	ORGANIZATIONAL DEVELOPMENT AND CHANGE	
PA 4530	STRATEGIC PLANNING	
PA 4950	INTERNSHIP	

Public Administration Minor

As UNO continues to serve as the Nebraska's premiere metropolitan university, the public administration minor exemplifies UNO's metropolitan and collaborative extension to the community.

Our Mission

Along with the University of Nebraska at Omaha's (UNO) strategic plan, the School of Public Administration upholds the esteemed pleasure of placing students first and achieving academic excellence all while engaging with the community.

By entrusting students with the necessary information to lead, manage, and ignite change within the public sector, our university continues to rise to the forefront of community engagement.

Skills Acquired

Upon completion of the public administration minor, students will have the necessary skills needed to work in the public sector. The minor is designed to accomplish the following:

- Describe the political context of public administration as well as the historical development and evolution of these institutions of the United States;

- Explain the role of public administrators in policy development and policy implementation;
- Empower future leaders to serve communities, to advance the common good and to effect positive change; and
- Develop students to become professionals who are equipped with the skills needed to manage at all levels of government (local, state and federal) as well as nonprofit organizations.

Student-Centered

To continue the momentum of serving the UNO campus, the greater Omaha community and beyond, there is a great need to empower our students and the knowledge, skills and abilities necessary to lead the future of the public sector and public service. The public administration minor is open to students in any discipline area at UNO.

PA 4950	INTERNSHIP	

Goodrich Scholarship Program

The Goodrich Scholarship Program, established by the Nebraska legislature in 1972, is an academic unit of the College of Public Affairs and Community Service. The program offers a merit-and-need-based scholarship for Nebraska residents who qualify through the Goodrich scholarship application process. The program provides financial aid in the form of tuition and general fees for up to 135 credit hours or until graduation (whichever comes first). The Goodrich scholarship is designed for full-time students at UNO only. The program offers a special humanities/social science curriculum (which is also a part of UNO's General Education Curriculum); this Goodrich curriculum emphasizes intellectual and cultural diversity at local and global levels. Goodrich programming includes a comprehensive menu of academic and non-academic support services and activities that enhance or advance student success.

Mission

The mission of the Goodrich Scholarship Program is to offer affordable quality undergraduate education to eligible low-income Nebraska residents who qualify through the Goodrich scholarship application process.

Other Information

Strategic Goals

The Goodrich Scholarship Program's strategic goals are consistent with CPACS and the University of Nebraska Omaha's strategic goals of being student-centered, academic excellence-centered, and community-engaged.

Program Goals

- To provide scholars opportunities for sound and innovative educational experiences;
- To enable scholars to connect with each other, with faculty/staff, with the university, and with the community at large;
- To empower scholars to build strong positive self-concepts; and
- To equip scholars with skills that will enable them to assume leadership roles.

Scholarship Note

Applicants who receive tuition scholarships, including but not limited to Regents, Chancellor's, Dean's and Buffett Foundation, cannot combine or stack any of those awards with a Goodrich scholarship. For more information about stacking scholarships, please contact UNO's Office of Financial Support and Scholarships at 402.554.2327.

Student Group

The Goodrich Organization (GO!), Goodrich's student body, opens up leadership opportunities. GO!'s many activities include fundraising and community engagement with organizations such as Partnership4Kids and Big Brother Big Sisters. For suggestions or more specific GO! information, contact GO! faculty adviser Stevie Seibert Desjarlais at 402.554.6302.

Contact

Goodrich Scholarship Program
University of Nebraska at Omaha

Website (<http://www.unomaha.edu/college-of-public-affairs-and-community-service/goodrich-scholarship-program/>)

Admissions

Goodrich uses a composite of selection criteria to evaluate both merit and financial need. Criteria include the individual's application data, financial analysis, academic record, interview, English Placement/Proficiency Exam (EPPE), personal life-experience essay, and references. Note that applicants who will have earned more than 31 college credits by May of the application year are not eligible. For more information, contact the Goodrich Scholarship Program.

Accounting (ACCT)

Accounting Undergraduate Courses

ACCT 2000 ACCOUNTING BASICS FOR NON-BUSINESS MAJORS (3 credits)

This course is designed to provide non-business students with an understanding of basic accounting terms and concepts, an understanding of the usefulness of accounting data for decision-making by internal and external business stakeholders, and the skills to actually use accounting data in decision-making.

Prerequisite(s): Student must be a non-business student. ENGL 1150 and MATH 1310 or MATH 1220 with 'C'-(2.0) or better. Not open to non-degree graduate students

Distribution: Social Science General Education course

ACCT 2010 PRINCIPLES OF ACCOUNTING I (3 credits)

Basic concepts and assumptions underlying financial accounting; basic structure of accounting; the accounting cycle; external financial statements of the enterprise with emphasis on the corporation; income determination; accounting for and reporting of assets, liabilities and owners' equity; analysis and reporting of cash flows; financial statement analysis.

Prerequisite(s): ENGL 1150 with a 'C' (2.0) or better, a GPA of 2.5 or higher, and MATH 1370 or MATH 1930 with a 'C' (2.0) or better or concurrent enrollment in MATH 1370 or MATH 1930

ACCT 2020 PRINCIPLES OF ACCOUNTING II (3 credits)

A study of techniques and concepts affecting internal accounting in a business organization. These include budgeting in general, costing systems, variance analysis and generating reports for management decision-making. Special topics include segment reporting, control of decentralized operations, capital budgeting, and service department cost allocations.

Prerequisite(s): ACCT 2010, ENGL 1150, and MATH 1370 or MATH 1930, each with a C (2.0) or better, and a GPA of 2.5 or higher.

ACCT 3000 MANAGERIAL ACCOUNTING FOR SUPPLY CHAIN MANAGEMENT (3 credits)

This course highlights the important role of a managerial accountant in managing a global supply chain and covers the key accounting techniques for supply chain management. (Cross-listed with SCMT 3000)

Prerequisite(s): ACCT 2020 with a grade of C (2.0) or better or ACCT 2000 with a grade of C (2.0) or better and cumulative GPA of 2.5 or higher. ENGL 1160 with a grade of 'C' (2.0) or better or concurrent enrollment in ENGL 1160. Not open to non-degree graduate students.

ACCT 3020 BASIC FEDERAL INCOME TAXATION (3 credits)

This course provides an introduction to the basic concepts and principles of federal income tax with an emphasis on concepts unique to individual taxpayers.

Prerequisite(s): ACCT 2020, ENGL 1150, ECON 2200 and ECON 2220 with a 'C' (2.0) or better in each course. Cumulative GPA of at least 2.5.

ACCT 3030 INTERMEDIATE FINANCIAL ACCOUNTING I (3 credits)

A more intensive study of basic accounting theory and principles learned in ACCT 2010. Topics include a conceptual framework of accounting, net income concepts, financial statements, present value applications, revenue recognition, current assets, plant assets, and intangible assets.

Prerequisite(s): ACCT 2020, ECON 2200, and ECON 2220, with a grade of 'C' (2.0) or better in each course and a 2.5 GPA. ENGL 1160 with a grade of 'C' (2.0) or better or concurrent enrollment in ENGL 1160.

ACCT 3040 INTERMEDIATE FINANCIAL ACCOUNTING II (3 credits)

This is the second of two courses in intermediate financial accounting. This course focuses on financial reporting issues relating investments, debt financing, leases, contingencies, cash flows reporting and income taxes.

Prerequisite(s): ACCT 3030 and ENGL 1160, each with a 'C' (2.0) or better.

ACCT 3050 INTERMEDIATE MANAGERIAL ACCOUNTING (3 credits)

The objective of managerial accounting is to provide management with relevant and timely information to aid economic decision making. This course analyzes numerous economic decisions and identifies what information is relevant. Special attention is given to how different cost accumulation systems and different cost accounting and estimating techniques can aid the decision-making process.

Prerequisite(s): ACCT 2020, ECON 2200, ECON 2220, and BSAD 2130, BSAD 3140 or BSAD 3160, with a "C" (2.0) or better in each. Cumulative GPA of at least 2.5. ENGL 1160 with a grade of 'C' (2.0) or better or concurrent enrollment in ENGL 1160.

ACCT 3080 ACCOUNTING INFORMATION SYSTEMS (3 credits)

Introduction to professional accounting information systems, including information systems concepts, accounting and database software and research tools to provide a foundation for subsequent accounting courses.

Prerequisite(s): ACCT 2020, ECON 2200 and ECON 2220, with "C" (2.0) or better in each. Cumulative GPA of at least 2.5. ENGL 1160 with a grade of 'C' (2.0) or better or concurrent enrollment in ENGL 1160.

ACCT 4010 ADVANCED FINANCIAL ACCOUNTING (3 credits)

Specialized issues in financial accounting. Principal topics include business combinations and consolidated financial statements, partnership accounting, translation of foreign currency financial statements, accounting for foreign currency denominated transactions, and SEC reporting requirements. (Cross-listed with ACCT 8016)

Prerequisite(s): ACCT 3030 and ACCT 3040 with "C+" (2.33) or better in each and ENGL 1160 with "C" (2.0) or better. Cumulative GPA of at least 2.5. Cumulative upper-division Accounting GPA of at least 2.5. Not open to non-degree graduate students.

ACCT 4020 ANALYTICS FOR ACCOUNTING (3 credits)

Students develop an Analytics Mindset for the accounting profession, which includes the crossover competencies of accounting and business knowledge, data modeling and analytic abilities, and communication skills. Principal topics include fundamentals of data capture and cleansing, database development and implementation, visualization and presentation of information, and the use of accounting information for business decisions.

Prerequisite(s): ACCT 3030, ACCT 3080, and ENGL 1160 each with C (2.0) or better. Cumulative GPA of at least 2.5. Cumulative upper-division Accounting GPA of at least 2.5. Not open to non-degree graduate students.

ACCT 4040 ADVANCED FEDERAL INCOME TAXATION (3 credits)

Analysis of various advanced tax issues, such as accounting methods, property transactions, and formation, operation, and liquidation of C-corporations, S-corporations and partnerships. (Cross-listed with ACCT 8046.)

Prerequisite(s): ACCT 3020, ACCT 3030, and ENGL 1160, each with a "C" (2.0) or better. Cumulative GPA of at least 2.5. Cumulative upper-division Accounting GPA of at least 2.5. Not open to non-degree graduate students.

ACCT 4050 PRINCIPLES OF INTERNAL AUDIT (3 credits)

This course introduces students to the internal audit profession and the internal audit process. Topics include: the definition of internal auditing, The Institute of Internal Auditor's International Professional Practices Framework, risk, governance and control issues, fraud detection and mitigation, communicating results, and conducting internal audit engagements. (Cross-listed with ACCT 8056).

Prerequisite(s): ACCT 3030 and ACCT 3080, each with a grade of C or better, and overall and upper-level accounting GPAs of 2.5 or better. Not open to non-degree graduate students.

ACCT 4060 ADVANCED MANAGERIAL ACCOUNTING (3 credits)

Intensive study and discussion of the responsibilities of managerial accountants in the decision-making process in organizations and the consequences of the manner in which they use cost accounting information in decision-making. (Cross-listed with ACCT 8066.)

Prerequisite(s): ACCT 3050, ACCT 3030, and ENGL 1160, each with "C" (2.0) or better. Cumulative GPA of at least 2.5. Cumulative upper-division Accounting GPA of at least 2.5. Not open to non-degree graduate students.

ACCT 4070 GOVERNMENTAL/NONPROFIT ACCOUNTING AND AUDITING (3 credits)

Study of budgeting, accounting, financial reporting and auditing in governmental and nonprofit entities. (Cross-listed with ACCT 8076.)

Prerequisite(s): ACCT 3030 and ENGL 1160, each with a "C" (2.0) or better. Cumulative GPA of at least 2.5. Cumulative upper-division accounting GPA of at least 2.5. Not open to non-degree graduate students.

ACCT 4080 PRINCIPLES OF AUDITING (3 credits)

An introduction to auditing, Standards, responsibilities, professional ethics, the audit framework, evidence and reports are studied.

Prerequisite(s): ACCT 3030, ACCT 3080, ENGL 1160, and BSAD 2130 or BSAD 3160, with a "C" (2.0) or better in each. Cumulative GPA of at least 2.5. Cumulative upper-division Accounting GPA of at least 2.5.

ACCT 4090 INFORMATION SYSTEMS AUDITING (3 credits)

This course will provide an introduction of auditing an advanced accounting information system. Content studied will include professional standards, guidelines, and procedures promulgated by the Information Systems Audit and Control Association. Accounting information systems control and security practices, and their assessment, will be discussed in the areas of operations, physical and logical access, systems, networks, development and applications, and incorporating hands-on exposure to automated evaluation tools.

Prerequisite(s): ACCT 4080 with a grade of C (2.0) or better. Cumulative GPA of at least 2.5. Cumulative upper-division Accounting GPA of at least 2.5.

ACCT 4500 INDEPENDENT STUDY (1-3 credits)

Individual investigation of specific problems in the field of accounting.

Prerequisite(s): Must have permission of the School of Accounting director.

ACCT 4510 ACCOUNTING INTERNSHIP (1-3 credits)

A course for junior or senior accounting students to apply their academic accounting knowledge to accounting practice in an employment situation. A student report on the internship experience and an employer's evaluation of the student's performance are course requirements. Can be applied to free electives, but not accounting specialization electives. (Maximum of 3 hours)

Prerequisite(s): ACCT 3030 and ENGL 1160, each with a C (2.0) or better, and permission of internship coordinator.

Aerospace Studies (AERO)

Aerospace Studies Undergraduate Courses

AERO 1010 LEADERSHIP LABORATORY (0 credits)

AERO 1010, "Leadership Laboratory" (LLAB) augments the Air Force ROTC academic curriculum by providing prospective Air Force and Space Force officers opportunities and feedback needed to develop leadership, managerial, and supervisory skills. Applications include a study of Air Force and Space Force customs and courtesies, drill and ceremonies, problem solving, communication, and learning about career opportunities available to commissioned officers. During the junior and senior year, LLABs consist of activities classified as leadership and management experiences. Instruction is conducted within the framework of an organized cadet corps with a progression of experiences designed to develop leadership potential.

Prerequisite(s): Corequisite - Students need to register for respective year-level equivalent Aerospace Studies Course (AERO 1310/1320, AERO 2310/2320, AERO 3110/3120, AERO 4110/4120)

AERO 1310 HERITAGE AND VALUES I (1 credit)

AERO 1310, "Heritage and Values I," is a survey course designed to introduce students to the United States Air and Space Forces. It provides an overview of the basic characteristics, missions, and organization of the Air and Space Forces. As a foundational course, the topics covered in AERO 1310 will include Air Force Core Values, Formation of the Air Force, Customs and Courtesies, Writing and Verbal Communications, Benefits of Services as well as Introduction to Leadership to name a few. For students who continue in the Air Force ROTC (AFROTC) program, this course will be the foundation for becoming an Air or Space Force professional by outlining our heritage and values. Leadership Laboratory (AERO 1010) is mandatory for AFROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Fall)

Prerequisite(s): Corequisite - AERO 1010

AERO 1320 HERITAGE AND VALUES II (1 credit)

AERO 1320, "Heritage and Values II," is a survey course designed to introduce students to the United States Air and Space Forces. It provides an overview of the basic characteristics, missions, and organization of the Air and Space Forces. As a foundational course, the topics covered in AERO 1320 will include What is War?, Evolution of the Air Force, Principles of War and Tenets of Airpower, Ethical Decision-Making as well as Air Force Major Commands to name a few. For students who continue in the Air Force ROTC (AFROTC) program, this course will be the foundation for becoming an Air or Space Force professional by outlining our heritage and values. Leadership Laboratory (AERO 1010) is mandatory for AFROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Spring)

Prerequisite(s): Corequisite - AERO 1010

AERO 2310 TEAM AND LEADERSHIP FUNDAMENTALS I (1 credit)

AERO 2310, "Team and Leadership Fundamentals I," is designed to provide students the foundation for both leadership and team building. The topics covered will include Listening, Followership, Problem Solving, Motivation as well as Standards and Accountability to name a few. All these concepts will be applied during activities and class discussions. Students will also practice and apply their verbal and written communication skills throughout the course. The lessons and course flow are designed to prepare students for field training and leadership positions in the detachment. Leadership Laboratory (AERO 1010) is mandatory for AFROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Fall)

Prerequisite(s): Corequisite - AERO 1010, Prerequisite - AERO 1310/1320 or permission from instructor

AERO 2320 TEAM AND LEADERSHIP FUNDAMENTALS II (1 credit)

AERO 2320, "Team and Leadership Fundamentals II," is designed to provide students the foundation for both leadership and team building. The topics covered will include Team Building, Human Relations, Conflict Management, Stress Management and Resiliency as well as Ethical Decision Making to name a few. All these concepts will be applied during activities and class discussions. Students will also practice and apply their verbal and written communication skills throughout the course. The lessons and course flow are designed to prepare students for field training and leadership positions in the detachment. Leadership Laboratory (AERO 1010) is mandatory for Air Force ROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Spring)

Prerequisite(s): Corequisite - AERO 1010, Prerequisite - AERO 1310/1320/2310 or permission from instructor

AERO 3110 LEADING PEOPLE AND EFFECTIVE COMMUNICATION I (3 credits)

AERO 3110, "Leading People/Effective Communication I," focuses on the development of advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership and communication skills through case studies and practical application. The topics covered will include Critical Thinking, Change Management, Effective Supervision, Ethical Decision Making as well as Bias to name a few. As cadet officers in the Air Force ROTC program, students have an opportunity to apply these leadership and management techniques in a supervised environment. Leadership Laboratory (AERO 1010) is mandatory for Air Force ROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Fall)

Prerequisite(s): Corequisite - AERO 1010, Prerequisite - AERO 1310/1320/2310/2320 or permission from instructor

AERO 3120 LEADING PEOPLE AND EFFECTIVE COMMUNICATION II (3 credits)

AERO 3120, "Leading People/Effective Communication II," focuses on the development of advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership and communication skills through case studies and practical application. The topics covered will include Leadership Theory, Mentoring, Professionalism, Self-Awareness, Organizational Climate as well as Establishing Expectations to name a few. As cadet officers in the Air Force ROTC program, students have an opportunity to apply these leadership and management techniques in a supervised environment. Leadership Laboratory (AERO 1010) is mandatory for Air Force ROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Spring)

Prerequisite(s): Corequisite - AERO 1010, Prerequisite - AERO 1310/1320/2310/2320 or permission from instructor

AERO 4110 NATIONAL SECURITY AND PREPARATION I (3 credits)

AERO 4110, "National Security and Preparation I," is designed for college seniors and gives them the foundation to understand their role as Air or Space Force officers and how they are directly tied to our National Security Strategy. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The topics covered will include Civilian Control of the Military, National Security Strategy, the Department of Defense, Joint Operations, Unified Combatant Commands, How the Department of the Air Force Deploys as well as the Law of War to name a few. Leadership Laboratory (AERO 1010) is mandatory for Air Force ROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Fall)

Prerequisite(s): Corequisite - AERO 1010, Prerequisites - AERO 1310/1320/2310/2320/3110/3120 or permission from instructor

AERO 4120 NATIONAL SECURITY AND PREPARATION II (3 credits)

AERO 4120, "National Security and Preparation II," is designed for college seniors and gives them the foundation to understand their role as Air or Space Force officers. The topics covered will include Base Agencies, Ethical Decision-Making, Leadership Authority and Responsibility, Officer and Enlisted Evaluations Systems as well as Career Progression to name a few. As cadet officers in the Air Force ROTC program, students have an opportunity to apply these leadership and management techniques in a supervised environment. Leadership Laboratory (AERO 1010) is mandatory for Air Force ROTC cadets and complements this course by providing advanced leadership experiences in a hands-on, supervised environment. (Fall)

Prerequisite(s): Corequisite - AERO 1010, Prerequisite - AERO 1310/1320/2310/2320/3110/3120/4110

Anthropology (ANTH)

Anthropology Undergraduate Courses

ANTH 1050 INTRODUCTION TO ANTHROPOLOGY (3 credits)

Anthropology is the humanistic and scientific study of humans, past and present. This course will present an overview of the four subdisciplines of anthropology: sociocultural, archaeological, biological, and linguistic.

Distribution: Social Science General Education course

ANTH 2000 ETHNOGRAPHY INDEPENDENT STUDY (1-3 credits)

This is an independent study course in which the student views films and digital materials, reads books and articles regarding a specific culture from an ethnographic perspective. Each culture will be a one (1) credit hour module. The intent is to acquaint the student in some depth with cultures in the world.

Prerequisite(s): One course in the social sciences and the instructor's permission.

ANTH 2990 GUIDED READING IN ANTHROPOLOGY (1-6 credits)

Guided readings and/or independent research in a special anthropological topic under the supervision of an Anthropology faculty member. A formal contract specifying the nature of the work to be completed must be signed before enrolling in the course. May be taken for a maximum of six hours.

Prerequisite(s): Permission of instructor. Not open to non-degree graduate students.

ANTH 3210 CULTURES OF AFRICAN PEOPLE (3 credits)

An introduction to cultures and societies of Africa. Analysis of kinship systems; political, economic and religious institutions; social change. Emphasis on the dynamics of social organization of African people.

Prerequisite(s): Sophomore or above with one three-hour introductory social science course

ANTH 3220 PEOPLES AND CULTURES OF NATIVE NORTH AMERICA (3 credits)

A survey of the Native peoples and cultures of North America, past and present. Topics covered include: economics, religion, social organization, kinship, political organization, material culture, gender and culture change through time.

Prerequisite(s): ANTH 1050 or permission of Instructor

ANTH 3260 WORLD CULTURES AND PEOPLES (3 credits)

This course utilizes ethnography to examine human cultures in a specific geographic context. The area approach in cultural anthropology reveals how the physical environment shapes culture and how those cultures, in turn, shape their environments. This course will also examine the larger social milieu and cultural change over time. The specific area will be announced each time the course is offered.

Prerequisite(s): ANTH 1050 or permission of instructor.

ANTH 3910 INTRODUCTION TO PHYSICAL ANTHROPOLOGY (3 credits)

An introduction to physical anthropology through an examination of theories and techniques used to investigate human origins; the relationship between humans and their physical environment; human variation, growth and development; and the evolution of human diseases.

Prerequisite(s): ANTH 1050 or High School Biology recommended.

Distribution: Natural/Physical Science General Education course

ANTH 3920 ESSENTIALS OF ARCHAEOLOGY (3 credits)

This course introduces students to the essentials of scientific archaeology. Topics addressed include the history of archaeology, site survey, mapping, testing, excavation, laboratory methods, analysis, interpretation, and documentation. Scientific archaeology focuses upon the use of empirical data to test or evaluate our interpretations of past human behavior.

Prerequisite(s): Anthropology 1050 or permission of instructor.

ANTH 4210 CULTURAL ANTHROPOLOGY (3 credits)

Cultural Anthropology is the sub-discipline of Anthropology that systematically considers cultural diversity (similarities and differences) in all known human societies. The scope of cultural anthropology is one of the broadest in the social sciences and includes the study of subsistence strategies and economies, kinship and social organization, political organization, religion, gender, language, expressive arts, human-environment relationships, and globalization. (Cross-listed with ANTH 8216).

Prerequisite(s): Junior or senior with a minimum of six hours of social science.

ANTH 4220 NORTH AMERICAN ARCHAEOLOGY (3 credits)

This course explores more than 20,000 years of Native American culture and lifeways in North America. Indigenous peoples faced numerous challenges throughout this vast and diverse continent. Hunters, gatherers, fishers, and horticulturalists adapted to all regions of North America. Students will be introduced to a range of archaeological concepts, methods and theoretical perspectives central to learning about this rich heritage of American archaeology. (Cross-listed with ANTH 8226).

Prerequisite(s): ANTH 1050 or permission of instructor

ANTH 4230 ETHNOMEDICINES OF THE AMERICAS (3 credits)

An anthropological approach to the study of the cultural systems of specific American ethnomedicines (traditional medicines) of North, Central and South America. For each ethnomedicine, the historical context, philosophy, practice, therapeutics, and utilization will be examined to understand how and why each ethnomedicine has survived despite tremendous extermination pressure. (Cross-listed with ANTH 8236).

Prerequisite(s): ANTH 1050

ANTH 4240 MEDICAL ANTHROPOLOGY (3 credits)

Medical anthropology is the cross-cultural study of human culture, health and illness. Using multiple theoretical perspectives, this course examines how cultural, social, environmental, and biological factors interact to produce patterns of health and illness in past and present human societies. (Cross-listed with ANTH 8246)

ANTH 4250 ENVIRONMENTAL ANTHROPOLOGY AND NATIVE PEOPLES OF THE GREAT PLAINS (3 credits)

Environmental anthropology seeks to understand the interrelationships between human societies and their biophysical and social environments. This course introduces students to basic concepts and theories used by anthropologists to study environmental influences upon both past and present Native American societies on the North American Great Plains. Particular attention will be given to the rapid and dramatic environmental changes that continue to challenge Native Americans in the Great Plains today. (Cross-listed with ANTH 8256)

Prerequisite(s): Anthropology 1050 and junior standing; or permission of instructor.

ANTH 4260 TOPICS IN CULTURAL ANTHROPOLOGY (3 credits)

Cultural Anthropology (Ethnology) is the comparative study of cultures. Each semester the course is offered, one topic will be selected from the subfield of Cultural Anthropology, such as: Applied Anthropology, Economic Anthropology, Political Anthropology, Visual Anthropology, Anthropology of Gender and Sexualities, Comparative Analysis of Kinship, or the Anthropology of Religion. Since the topic will vary, students may elect to take this course more than once.

Prerequisite(s): ANTH 1050 or permission of instructor.

ANTH 4270 DECOLONIZING NATIVE AMERICAN HEALTH (3 credits)

This course will utilize an interdisciplinary lens to interrogate Native American health and wellness grounded in the decolonizing theoretical and methodological tools drawn from Medical Anthropology and Native American Studies. Topics covered will include: Health Disparities, Federal Indian Health Policy, Historical Trauma, Medical Mistrust, Traditional Healing, Food Sovereignty and Research Ethics. (Cross-listed with ANTH 8276, NAMS 4270, NAMS 8276).

Prerequisite(s): ANTH 1050 or Instructor permission

ANTH 4280 CLINICAL ETHNOGRAPHY (3 credits)

Using ethnographic texts, this course explores the clinical world from an anthropological perspective. Students will use anthropological theories and methods to learn about cultures of medical practices, diverse health professions, the contexts of health care delivery, and the structural, cultural, and historical forces that influence the practice of healthcare in the U.S. and cross-culturally. (Cross-listed with ANTH 8286, MEDH 4280).

Prerequisite(s): ANTH 1050 or MEDH 1000 or permission of the instructor.

ANTH 4920 SEMINAR IN ANTHROPOLOGY (3 credits)

This course reviews research and writing in an area of current interest in the field of anthropology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with ANTH 8926).

Prerequisite(s): ANTH 1050 or permission of instructor

ANTH 4940 ARCHAEOLOGICAL FIELD METHODS (3 credits)

This course introduces students to the field methods of scientific archaeology. These field methods include map reading, use of satellite and aerial photographs, instrument survey and mapping, pedestrian survey or reconnaissance, site survey data collection, identification of artifacts (stone tools, ceramics, etc.) and ecofacts (animal remains, macrobotanicals, etc.), systematic artifact collection and documentation, soil probes and coring methods, GPS-based mapping, excavation methods, and data recording. Additional topics include laboratory methods (artifact and ecofact analysis, interpretation, and documentation). This field course ultimately focuses upon the use of empirical data to test or evaluate our interpretations of past human behavior. (Cross-listed with ANTH 8946).

Prerequisite(s): ANTH 1050 or permission of instructor.

ANTH 4990 INDEPENDENT STUDY IN ANTHROPOLOGY (1-3 credits)

Guided readings and/or independent research in a special anthropological topic under the supervision of an Anthropology faculty member. A formal contract specifying the nature of the work to be completed must be signed before enrolling in the course. May be taken for a maximum of six hours.

Prerequisite(s): Permission of instructor.

Applied Computing and Informatics (ACMP)

Applied Computing and Informatics Undergraduate Courses

ACMP 1010 ACTIVATING INNOVATION IN SOCIETY (3 credits)

This course surveys and applies the use of qualitative methods, especially interview-based research, in order to maximize the insight that informs and activates the innovation process, with emphasis on technological innovation.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

ACMP 1110 INTRODUCTION TO IT INNOVATION (3 credits)

In almost every modern human endeavor, creativity and Information Technology are essential. In the Internet age, information has become a commodity that is available to everyone. Similarly, current technology has largely become commoditized. Therefore, creating new value is becoming the basis for successful professionals. This course introduces students to tools, techniques, and methods for generating innovative information technology ideas and solutions. It teaches them to think about future possibilities and equips them with the ability to critically evaluate proposed innovations and ideas. The goal of the course is to increase students' ability to creatively solve challenging problems in new ways using information technology. This class is inherently interdisciplinary as IT now touches every aspect of modern academic pursuits.

Prerequisite(s): Not open to non-degree graduate students.

ACMP 2150 AUDIO FOR MULTIMEDIA (3 credits)

This course provides an overview of audio production techniques as they pertain to multimedia.

Prerequisite(s): Not open to non-degree graduate students.

ACMP 2220 APPLIED IT INNOVATION (3 credits)

The course extends the concepts learned in the Introduction to IT Innovation course and focuses on market dynamics and monetizing innovations. It moves past idea generation and focuses on identifying and gathering resources, innovation implementation, sustainable innovation models and how ideas can be monetized. The goal is for students to take their original ideas from concept to initial implementation with thoughts towards commercialization. Upon completing the course, students will have created at least a rudimentary implementation of an original idea and have a defensible plan for how the idea can be monetized.

Prerequisite(s): ACMP 1110/ITIN 1110 & CIST 1400. Not open to non-degree graduate students.

ACMP 2990 IT INNOVATION SYMPOSIUM (1 credit)

The seminar exposes students to information technology innovators from multiple industries and varied backgrounds. It teaches the practical aspects of IT Innovation from those that have done it and are doing it in both research and practice. The purpose is to cause students to reflect on applying innovation to the real-world, connect them to the innovation community and to equip them with best practices and tools to make their innovations a reality.

Prerequisite(s): Enrollment in the IT Innovation Major or IT Innovation Minor. Not open to non-degree graduate students.

ACMP 3100 MUSIC INFORMATICS (3 credits)

Surveys the use of digital music data in the study, composition, performance, analysis, storage, and dissemination of music. Various computational approaches and technologies in music informatics including music information retrieval will be explored and implemented by students. (Cross-listed with MUS 3100).

Prerequisite(s): Successful completion of one of the following three courses satisfies the prerequisite requirement: CIST 1300 or MUS 3170 or MUS 3180. Not open to non-degree graduate students.

ACMP 3180 ELECTRONIC MUSIC PRODUCTION (3 credits)

An exploration of the potentials of electronic music. Concepts of electronic music are presented through the use of a computer, software, and appropriate hardware. Students create assignments that demonstrate the application of basic techniques. (Cross-listed with MUS 3180).

ACMP 3330 PRODUCT DESIGN AND DEVELOPMENT (3 credits)

This course will cover elements and principles of excellent product design and development. The history of design will be reviewed and overarching tenets of design will be introduced. The course will particularly focus on innovation and students will be expected to develop an original concept and create quality designs and low-fidelity prototype implementations of their unique idea. The proposed solutions must be novel and meet a real-world market need. This course will be hands-on and will examine developmental models for innovation.

Prerequisite(s): ACMP 2220/ITIN 2220. Not open to non-degree graduate students.

ACMP 4000 SPECIAL TOPICS IN IT INNOVATION (3 credits)

This course is designed to acquaint students with issues which are current to the field or emerging trends in the IT Innovation area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ACMP 8006).

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ACMP 4090 MANAGING COLLABORATIVE ENGAGEMENT (3 credits)

This course will provide students with the opportunity to develop knowledge and strategies for leading teams, enhancing collaboration, building consensus, problem solving in teams, facilitating group processes, and designing collaborative workspaces. (Cross-listed with BSAD 8096, MGMT 4090, SCMT 4090).

Prerequisite(s): Junior standing or permission of instructor.

ACMP 4260 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 4260, CSCI 8266, ACMP 8266).

Prerequisite(s): Required: C- or better in CIST 2500 and junior standing, or by permission of instructor. Recommended: C- or better in CSCI 4250 or ACMP 3330/ITIN 3330.

ACMP 4440 AGILE DEVELOPMENT METHODS (3 credits)

The course presents an introduction to agile development methods for IT application development. Students will also learn Unified Modeling Techniques as they go through the agile iterations. This course is a foundation course for the IT Innovation capstone course.

Prerequisite(s): CSCI 4850 or ISQA 3310. Not open to non-degree graduate students.

ACMP 4500 INDEPENDENT STUDIES (1-3 credits)

A variable credit course for the junior or senior who will benefit from independent reading assignments and research type problems. Independent study makes available courses of study not available in scheduled course offerings. The student wishing to take an independent study course should find a faculty member willing to supervise the course and then submit, for approval, a written proposal (including amount of credit) to the IT Innovation Undergraduate Program Committee at least three weeks prior to registration.

Prerequisite(s): Written permission required.

ACMP 4510 INFORMATION TECHNOLOGY INNOVATION INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the ITIN undergraduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by professionals in the workplace.

Prerequisite(s): Junior/Senior standing and permission of School of interdisciplinary Informatics Director. Not open to non-degree graduate students.

ACMP 4720 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation. Concepts and techniques in innovation, entrepreneurship, and strategy will be used to aid students in the venture creation process. Important considerations impacting the viability of the venture post formation will also be explored. Practical real-world experimentation is the central component of the course and will help students to conceive, develop, and launch their own innovative ventures. (Cross-listed with BSAD 8726, ENTR 4720, ACMP 8256, MGMT 4720, MKT 4720).

Prerequisite(s): ACMP 1110/ITIN 1110 and junior standing or above or by instructor permission.

ACMP 4880 SYSTEMS SIMULATION AND MODELING (3 credits)

The course provides an introduction to the modeling and simulation with special emphasis on decision-theoretic models and rational decision-making. The ability to make good decisions is key to individuals and organizations and studying, understanding and improving decisions is vital to success. Students are given a background into systematic decision-making processes, and then are introduced to formal methods for decision modeling and analysis. Building on these foundational models, students learn how to perform process modeling and optimization. Finally, the course concludes with a look at psychological biases and traps that may affect decision-makers. (Cross-listed with ISQA 4880).

Prerequisite(s): CIST 1400, CIST 2500, or equivalent.

ACMP 4980 APPLIED COMPUTING AND INFORMATICS CAPSTONE PROJECT I (3 credits)

This course serves as Part 1 of the capstone project for the Applied Computing and Informatics program. As such the student will design a prototype of an IT product or service as well as a business case pertaining to what is required to launch their project commercially. This effort will be under the guidance of an advisory committee.

Prerequisite(s): ACMP 4440/ITIN 4440. ACMP 4980 is for seniors in the BS in Applied Computing & Informatics degree. Before enrolling in ACMP 4980 student must gain approval from the ACMP Program Committee, of their Emphasis Area. Not open to non-degree graduate students.

ACMP 4990 APPLIED COMPUTING AND INFORMATICS CAPSTONE PROJECT PART II (3 credits)

This course serves as Part 2 of the capstone project for the Information Technology Innovation program. Following the designs and business plan developed in Part I ACMP 4980, the student will create a prototype of an IT product or service as well as refine and implement the required business aspects involved in launching their project commercially. This effort will be under the guidance of an advisory committee.

Prerequisite(s): ACMP 4980/ITIN 4980. This course is for seniors who are enrolled in the BS in Applied Computing and Informatics degree. Not open to non-degree graduate students.

Applied Learning (APLD)

Applied Learning Undergraduate Courses

APLD 2700 COOPERATIVE EDUCATION (1-3 credits)

A semester of off-campus relevant semi-professional and professional work experience coordinated to complement classroom academics with practical firsthand involvement in the business world.

Prerequisite(s): Permission of the dean of the College of Public Affairs and Community Service (CPACS)

APLD 3010 PRIOR LEARNING ASSESSMENT PORTFOLIO DEVELOPMENT (3 credits)

Prior Learning Assessment (PLA) enables students to earn college credit for prior learning. This course focuses on the principles and methodology of assessing college-level learning acquired outside the traditional classroom. Learners analyze personal learning in terms of adult learning theory. Learners identify, articulate, and document personal learning outcomes and relate what they have learned to the topics and learning outcomes of college courses and other college-level learning opportunities. The course promotes skill development in organizing information, writing, analyzing, and critical thinking. Learners prepare a prior learning portfolio to demonstrate learning equivalent to college-level coursework and are guided by a course mentor and a subject matter expert to develop, advance, and complete their PLA portfolio submission.

Prerequisite(s): ENGL 1150 or equivalent. Students must have permission to enroll after academic advisor confirmation that they have college-level learning experiences that could be evaluated for academic credit and applied towards their BMS degree program.

APLD 3700 COOPERATIVE EDUCATION (1-3 credits)

A semester of off-campus relevant semi-professional and professional work experience coordinated to complement classroom academics with practical firsthand involvement in the business world.

Prerequisite(s): Permission of the dean of the College of Public Affairs and Community Service (CPACS).

Architectural Engineering (AREN)

Architectural Engineering Undergraduate Courses

AREN 1000 DURHAM SCHOOL OF ARCHITECTURAL ENGINEERING AND CONSTRUCTION SEMINAR (0 credits)

Presentation of professional problems and practices by students, faculty, and professionals associated with careers in the Durham School of Architectural Engineering and Construction

AREN 1010 INTRODUCTION TO ARCHITECTURAL ENGINEERING (1 credit)

An overview of architectural engineering. Descriptions of structural, lighting and electrical, and mechanical engineered systems in buildings. Design and measurement exercises. Field visits to buildings.

AREN 1030 DESIGN AND SIMULATION STUDIO I (3 credits)

Focus on virtual modeling in the context of conceptual design. Study of fundamentals of Building Information Modeling (BIM), iterative design processes, early design analysis techniques, and technical problem-solving processes. Development of modeling skills in various software programs including Autodesk Revit, Formit, Dynamo, and Trimble Sketchup.

AREN 2010 ARCHITECTURAL ENGINEERING SEMINAR (1 credit)

This course will inform students about careers in Architectural Engineering and about non-technical issues of engineering practice. It will include visits to offices and job sites, and talks by practicing professionals. Professional, ethical, social, and environmental issues will be addressed. Students will gain experience in teamwork, and in presentation of information.

Prerequisite(s): AREN 1010 or AE 1010; 30 credit hours completed

AREN 2030 DESIGN AND SIMULATION STUDIO II (3 credits)

Focus on building systems as integral elements in architecture, building and construction assemblies, materials and methods, fabrication, and tectonic exploration using building information modeling (BIM) processes. Exposure to building construction systems, stereotomic and tectonic construction assemblies, and fundamentals of the architectural design process.

Prerequisite(s): AREN 1030 or AE 1030 Design and Simulation Studio I

AREN 2110 THERMODYNAMICS FOR ARCHITECTURAL ENGINEERING (3 credits)

First and Second Laws of Thermodynamics, properties of gases and vapors. Sources of energy and its conversion to work. Applications on Architectural Engineering and Construction.

Prerequisite(s): MATH 1960, PHYS 2110. Not open to non-degree graduate students.

AREN 2250 CONSTRUCTION GRAPHICS AND DESIGN PROCESS (3 credits)

Introduction to typical computer-graphics and calculation applications used in a contemporary architectural engineering design office. Extensive use of CADD and electronic spreadsheet software to solve typical analysis and design problems. Fundamentals of descriptive geometry and two and three-dimensional drawing systems. Use of drawing conventions common to construction design. Basics of personal computer applications. Conceptual review of engineering design and technical problem solving processes.

AREN 2400 BUILDING SYSTEMS (3 credits)

Building systems as integral elements in architecture; building assemblies and materials; building system relationships; communication of ideas between design professionals, clients, contractors and manufacturers; construction drawings and specifications.

Prerequisite(s): AREN 2250 or AE 2250

AREN 3030 AE DESIGN AND SIMULATION STUDIO III (3 credits)

A comprehensive focus on building design and construction through integrating program, structure, site, and enclosure aligned with architectural engineering. Topics include structure and construction assemblies; envelope performance; and whole building organization and space-making using BIM processes.

Prerequisite(s): AREN 2030 or permission of instructor

AREN 3070 MECHANICS OF MATERIALS LAB (1 credit)

Introduction to the behavior and testing of various building materials. The concepts of axial stress and strain, flexural stress and strain, beam deflections and column buckling.

Prerequisite(s): Coreq: MECH 3250.

AREN 3100 HVAC FUNDAMENTALS (3 credits)

Topics will include an introduction to the types of air conditioning systems; the properties of moist air, psychometric processes in HVAC equipment; indoor air quality; thermal comfort; heat transmission in buildings; solar radiation; and the calculation of building infiltration rates, space heating loads and space cooling loads.

Prerequisite(s): MECH 2000 or MENG 2000; corequisite AREN 4040

AREN 3120 MECHANICAL SYSTEMS FOR BUILDINGS (3 credits)

Fluid flow, pumps, and piping design; space air diffusion; fans, ducts, and building air distribution; refrigeration equipment.

Prerequisite(s): AREN 3100 or AE 3100 and CIVE 310 and CIVE 319

AREN 3130 HVAC LAB (1 credit)

Conduct experiments and prepare written reports involving fluid flow, pumps, fans, ducts, piping; basic heat transfer and thermodynamic principles.

Prerequisite(s): AREN 3100 or AE 3100 and CIVE 310 and CIVE 319

AREN 3200 LIGHTING I: FUND FOR DESIGN (3 credits)

Introduction to illumination engineering for building interiors. Topics include the fundamentals of light and vision, lighting equipment, requirements for building lighting, and basic illuminating engineering design methods.

Prerequisite(s): ECEN 211

AREN 3220 ELECTRICAL SYSTEMS FOR BUILDINGS I (3 credits)

Study of basic design of building electrical systems including circuit design, power distribution and service equipment, communications systems, and special electrical systems.

Prerequisite(s): ECEN 211

AREN 3230 LIGHTING AND ELECTRICAL SYSTEMS LAB (1 credit)

General introduction to lighting and electrical systems in building interiors, through hands-on exercises using a range of currently available lighting and electrical technologies. Topics include: principles of object modeling, lamp and luminaire workshops, field measurements of lighting and electrical systems, motor workshop, power consumption and power factor workshops.

Prerequisite(s): AREN 3200 or AE 3200; coreq AREN 3220

AREN 3300 BUILDING ACOUSTICS FUNDAMENTALS (3 credits)

An introduction to the acoustics of buildings. Topics include the fundamentals of sound generation, propagation, and measurement; human hearing; acoustic properties of materials and constructions; basic room acoustics; and noise control.

Prerequisite(s): PHYS 2120

AREN 3770 GLOBAL EXPERIENCES IN ARCHITECTURAL ENGINEERING (1-3 credits)

Individual or group educational experience in Architectural Engineering that combine classrooms, lectures, discussions, and/or seminars with field and/or classroom studies in a foreign country. Choice of subject matter and coordination of on- and off-campus activities are at the discretion of the instructor.

AREN 3920 INDIVIDUAL INSTRUCTION IN ARCHITECTURAL ENGINEERING III (1-3 credits)

Individual instruction in Architectural Engineering at the junior level in a selected area, under the supervision and guidance of an Architectural Engineering faculty member.

AREN 3940 SPECIAL TOPICS IN ARCHITECTURAL ENGINEERING III (3 credits)

Special topics in Architectural Engineering at the junior level that are not yet covered in other courses in the Architectural Engineering curriculum.

Prerequisite(s): Permission of instructor.

AREN 4020 ARCHITECTURAL ENGINEERING SENIOR DESIGN PROJECT IN LIGHTING (4 credits)

Senior design project that integrates lighting design and illuminating engineering through a semester long design problem. A self-directed execution of the lighting design process culminating with a professional design solution.

Prerequisite(s): AREN 3220 or AE 3220; AREN 4200 or AE 4200

AREN 4030 AE DESIGN AND SIMULATION STUDIO IV (3 credits)

Advanced topics in Building Information Modeling (BIM) are presented including modeling tools and processes for building engineers, designers, contractors, and operators. BIM management throughout the building lifecycle, technical engineering use cases, and specific topics in virtual reality, simulation, augmented reality, and graphical programming environments are covered. Advanced topics relevant to all AE fields include collaborative design and interoperability.

Prerequisite(s): AREN 3030

AREN 4040 BUILDING ENVELOPES (3 credits)

Design and analysis of building envelopes is an important and interdisciplinary topic within the Architectural Engineering field that relates to all AE subdisciplines (lighting, electrical systems, structures, mechanical systems, and acoustics). This introductory Building Envelopes course is created to supplement the sub-discipline specific introductory courses as well as combine some of these topics under the umbrella of building envelopes. It aims to fill an important gap in the BSAE curriculum and cover a comprehensive introduction to the processes of Building Energy Modeling.

Prerequisite(s): MECH 200 or MENG 2000; junior standing; corequisite: AREN 3100

AREN 4120 BUILDING ENERGY II: PRIMARY AND SECONDARY SYSTEMS (3 credits)

Analysis and design of building air distribution systems, fans, pumps, piping, space air diffusion and heat exchangers.

Prerequisite(s): AREN 3100 or AE 3100; CIVE 310

AREN 4150 HVAC DESIGN (4 credits)

Develop and design the mechanical system for an actual building, from the programming phase to the final construction documents.

Prerequisite(s): AREN 4120 or AE 4120. Not open to non-degree graduate students.

AREN 4200 LIGHTING II: THEORY, DESIGN & APPLICATION (3 credits)

Design and analysis of lighting systems; the emphasis is on the integration between the lighting design process and the technical foundations for building lighting; topics include design criteria; lighting design procedures, lighting modes and subjective effects; calculation tools. Lab sessions include photometric measurements and computer applications. (Cross-listed with AREN 8206).

Prerequisite(s): AREN 3200 or AE 3200

AREN 4250 LIGHTING DESIGN (4 credits)

Advanced design and analysis of lighting systems. Application of the lighting design process for advanced interior applications such as multimedia facilities, and outdoor applications such as sports lighting. (Requires the initiation of the design process, proceeding in a self-directed manner through intermediate steps, and producing professional lighting design solutions.)

Prerequisite(s): AREN 4200 or AE 4200. Not open to non-degree graduate students.

AREN 4300 ADVANCED NOISE CONTROL (3 credits)

Characterization of acoustic sources; use and measurement of sound power and intensity; sound-structure interaction; acoustic enclosures and barriers; muffling devices; vibration control; and active noise control. (Cross-listed with AREN 8306).

Prerequisite(s): AREN 3300 or AE 3300

AREN 4420 HEALTHCARE DESIGN AND CONSTRUCTION (3 credits)

Introduction to the design and construction of healthcare facilities. Healthcare regulations and standards, infection control, interim life safety measures, code requirements, medical equipment selection and coordination, healthcare design and construction techniques, and best practices will be addressed. Provides guidance in preparation for the Certified Healthcare Constructor credential offered by the American Healthcare Association. (Cross-listed with AREN 8426, CNST 842, CNST 442).

Prerequisite(s): Senior or graduate standing

AREN 4600 SMART BUILDING SENSORS AND PROGRAMMING (3 credits)

Principles of modeling, interfacing, and signal conditioning of sample building sensors, and acquisition and analysis of data utilizing engineering programming language such as LabVIEW and analysis of data from different types of building sensors. Overview of current sensing technology and control in buildings. (Cross-listed with AREN 8600).

Prerequisite(s): CIST 1400

AREN 4620 MEMS SENSORS DYNAMICS (3 credits)

Study of the dynamics of Microelectromechanical system (MEMS) beam-structures. Modeling principles and data analysis from different types of MEMS will be explained along with deep theoretical and experimental investigation of nonlinear MEMS dynamics. Learn to conduct experiments using state-of-the-art MEMS characterization tools. (Cross-listed with AREN 8626).

Prerequisite(s): Instructor Permission

AREN 4920 INDIVIDUAL INSTRUCTION IN ARCHITECTURAL ENGINEERING IV (1-3 credits)

Individual instruction in Architectural Engineering at the senior level in a selected area, under the supervision and guidance of an Architectural Engineering faculty member.

Prerequisite(s): Instructor Permission

AREN 4940 SPECIAL TOPICS IN ARCHITECTURAL ENGINEERING IV (3 credits)

Special topics in Architectural Engineering at the senior level that are not yet covered in other courses in the Architectural Engineering curriculum.

Prerequisite(s): Permission of instructor.

Art (ART)

Art Undergraduate Courses

ART 1010 ART APPRECIATION (3 credits)

This course is designed as an introductory-level art history for the non-art major. It surveys the aesthetic principles of the visual arts and their interpretation in a socio-historical context. (May not be taken for major credit.) Lab fee required.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

ART 1040 GLOBAL INDIGENOUS ART (3 credits)

This introductory course explores Indigenous architecture, paintings, sculpture, and decorative arts of six geographic regions: Africa, Mesoamerica, North America, South America, Asia, and Oceania. Students will examine the religious beliefs, ritual practices, and politics embedded within the production of Indigenous artworks. The class will also examine contemporary artworks to understand the continuity and innovation of cultural traditions and the importance of repatriation. Lab fee required.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

ART 1100 FOUNDATION: DRAWING (3 credits)

This course is an introduction to the essential tools of art making through an active exploration of drawing mediums and design concepts. The focus is on the development of conceptual and technical skills used in contemporary studio practice. The course will have a strong emphasis on learning to see in the context of an observational studio practice.

Prerequisite(s): Lab fee required.

ART 1110 FOUNDATION: 3D DESIGN (3 credits)

This course is an introduction to the technical and conceptual aspects of three dimensional design, focusing on drawing and sculpture problems. Students will develop an understanding of 3-D design components and principles, learn handmade and shop oriented technologies, and explore analytical and conceptual drawing. They will also address critical skills and the cultural analysis of art practice.

Prerequisite(s): Lab fee required.

ART 1210 FOUNDATION: 2-D DESIGN (3 credits)

This course is an introduction to the elements and principles of design utilizing a variety of 2-D media and formats. These will be investigated through compositional strategies, studio techniques, gestalt understanding, critical thinking and concepts of contemporary methodologies in art making. Lab fee required.

ART 1220 FOUNDATION: DIGITAL MEDIA (3 credits)

An introduction to digital art and design skills, nomenclature, and practice while learning aesthetics and art and design history. Students learn to balance practical knowledge with visual, theoretical, and historical frameworks, and they complete digital skills exercises that incorporate art and design history. These digital skills are then practiced and reinforced with more in-depth art and design projects.

Prerequisite(s): Lab fee required.

ART 1600 INTRODUCTION TO ARTS EDUCATION (1 credit)

This course is designed to provide an overview of the arts education profession. It will focus on the history, philosophy, and fundamentals of arts education in the United States. (Cross-listed with MUS 1600).

ART 1810 WATERCOLOR I (3 credits)

This course cover beginning watercolor techniques with basic water media skills taught in the class. No experience is necessary for students enrolled in 1810.

ART 1820 WATERCOLOR II (3 credits)

This course will review fundamental methods and techniques associated with watercolor painting and will introduce more advanced techniques. Advanced watercolor students submit a written contract for their semester plan which includes the concept or content and approximate number of paintings. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 credit hours.)

Prerequisite(s): ART 1810

ART 2000 CORE ONE PORTFOLIO REVIEW (0 credits)

ART 2000 Core One Portfolio Review is a zero credit hour course offered every Fall and Spring semester. All BASA majors on the 2013-14 catalog year and after must complete the ART 2000 Core I Portfolio review to graduate with the BASA or BFA major. ART 2000 will usually be completed during the sophomore year; i.e. between 27 and 57 credit hours, but may be completed later.

Prerequisite(s): Students must complete ART 1100; ART 1110; ART 1210; ART 1220. Not open to non-degree graduate students.

ART 2050 SURVEY OF WESTERN ART HISTORY I (3 credits)

A survey of the major developments in painting, sculpture and architecture from Paleolithic cave paintings through the Middle Ages.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

ART 2060 SURVEY OF WESTERN ART HISTORY II (3 credits)

This course is a survey of the major developments in painting, sculpture and architecture from the Renaissance to the 20th century. Lab fee required.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

ART 2070 ART OF INDIA AND SOUTHEAST ASIA (3 credits)

A study of the arts of India and cultures under its influence, with attention to religious and philosophical background. Lab fee required.

Prerequisite(s): Sophomore standing. Not open to non-degree graduate students.

ART 2080 ART OF CHINA AND JAPAN (3 credits)

This course is a study of the arts of China and Japan, with attention to religious and philosophical backgrounds. Lab fee required.

Prerequisite(s): Sophomore standing . Not open to non-degree graduate students.

ART 2100 LIFE DRAWING I (3 credits)

Life Drawing I is an introduction to drawing the human form. The goal of the course is to introduce drawing media and relate them to the problems of drawing the figure. Both perceptual and conceptual skill building are emphasized. Lab fee required.

Prerequisite(s): ART 1100 and ART 1210.

ART 2110 LIFE DRAWING II (3 credits)

Life Drawing II is an expansion of the instruction and skill set obtained during Life Drawing I. This course continues to assist the student become aware of unfamiliar forms in the figure. Perceptual and conceptual skill building is again emphasized. Lab Fee required.

Prerequisite(s): ART 2100

ART 2200 TYPEFACE DESIGN AND TYPOGRAPHY (3 credits)

Typeface Design and Typography is foundational to the practice of graphic design and the Graphic Design Concentration sequence. This intensive studio course focuses on the skills, theory, history and practice of typeface design as well as the theory and practice of typography and layout.

Prerequisite(s): ART 1220 ART 3130

ART 2300 WEB DESIGN (3 credits)

This course is an introduction to basic web design skills and topics, with an emphasis on design and visual communication.

Prerequisite(s): ART 1220. Not open to non-degree graduate students.

ART 2600 SURVEY OF COMICS: MORE THAN CAPES AND TIGHTS (3 credits)

This course is a survey of the history of the Western comic from its earliest days to the modern era.

Prerequisite(s): Not open to non-degree graduate students.

ART 2610 EXPLORATION OF GLOBAL COMICS (3 credits)

This course is a survey of the history, influences and evolution of comics from countries around the world such as France, Italy, the Middle East, Japan, South America and Africa. Students will come to understand how comics grew and evolved under different social, political and cultural climates around the world.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

ART 2910 OBSERVATIONAL DRAWING FOR SKETCHBOOK (3 credits)

This studio course focuses on drawing from observation in the studio and in public space. Students will work to develop a sketchbook drawing practice utilizing both dry and wet media. We will draw on-location around campus and around Omaha. Students will practice drawing the human figure without the use of a traditional model and develop their technical and expressive skills in drawing architecture, nature, and found objects.

Prerequisite(s): ART 1100 or by permission of instructor

ART 2920 ILLUSTRATION 1: INTRODUCTION TO ILLUSTRATION (3 credits)

This studio course focuses on the fundamentals of visual storytelling. Using a combination of digital and traditional techniques students will complete projects in editorial, sequential, instructional, advertisement, surface pattern design and visual development illustration. The primary emphasis for this course will be to learn the illustration process from initial research, ideation and comp sketching to drafts and finishes. Students will learn industry standards as they model the client-illustrator relationship through multiple rounds of review. Time will be spent looking at historic and contemporary examples. Students will collect and analyze illustrations that appeal to them in order to establish their visual taste and direct their personal styles. For Illustration concentration students the class will culminate in a mid-program review where students submit their work in order to qualify to continue in the concentration.

Prerequisite(s): ART 1100, ART 1220, or by permission of instructor

ART 3000 MEDIA ARTS 1 (3 credits)

This course is an introduction and overview to the concentration of Media Arts. The curriculum is designed to provide a basic knowledge of electronic imaging and production techniques for students wishing to continue in digital media or those working with media production artists. Areas introduced will be Digital Image Production, Digital Video Production, and Animation.

Prerequisite(s): Art 1220 or permission of instructor

ART 3100 ADVANCED DRAWING I (3 credits)

Instruction in drawing at an advanced level to develop practical skills and techniques through directed classroom projects.

Prerequisite(s): ART 1100

ART 3110 ADVANCED DRAWING II (3 credits)

Instruction in drawing at an advanced level to develop practical skills and techniques through directed classroom projects. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.)

Prerequisite(s): ART 1100 and ART 3100

ART 3120 MEDIA ARTS 2 (3 credits)

Advanced overview of Intermedia and digital production as well as critical theory for artists. The course includes both fine art and applied uses of Intermedia and digital art through the development of individual and group projects using digital and electronic media means.

Prerequisite(s): Art 3000 or permission of instructor.

ART 3130 GRAPHIC DESIGN 1 (3 credits)

The first course in the Graphic Design sequence, Graphic Design I is an upper division course focusing on the essential elements of Graphic Design as a discipline and practice. Working individually, students learn the tools, terminology, theory, and history of Graphic Design as a professional and artistic practice. Focused attention and time is spent learning conceptualization skills, digital skills, design practice and the relationship between the designer and their social and historical context.

Prerequisite(s): ART 1220, or permission of instructor

ART 3140 COMPUTER-GENERATED IMAGERY (CGI) I: INTERACTIVE 3D VIRTUAL SPACES (3 credits)

This course introduces students to basic principles and aesthetic considerations of computer-generated imagery and interactive virtual spaces. The course will focus on using computers as a tool to create three-dimensional virtual art forms and design interactive art spaces and navigable virtual/game worlds. The course exposes students to various theoretical and aesthetic positions and encourages them to think of CGI and virtual space building as an art-making process. Students will produce artwork by acquiring technical skills and exploring creative uses within the medium.

Prerequisite(s): ART 1220 or permission of the instructor

ART 3150 VIDEO ART (3 credits)

An introduction to video art production and critical theory for artists. The course exposes students to a variety of theoretical and aesthetic positions and encourages them to think of video as an art making process rather than mass media product. Students are required to produce a number of video art works. Production rather than consumption is stressed as a pedagogical mode.

Prerequisite(s): ART 3000 or permission of instructor

ART 3160 GAME DESIGN AS ART (3 credits)

This course will encompass theory and practice of game development, game creation as an art process, and an exploration of the work of artists who have created game based work. Areas of study during the course will include game design and mechanics, explorations of theory, narrative and storytelling with game paradigms, social and ethical concerns of gaming and gaming as cultural resistance.

Prerequisite(s): Not open to non-degree graduate students

ART 3170 DIGITAL GAME DESIGN (3 credits)

This course provides an introduction to digital game development. It will explore all aspects of creating 2d games. Students will work on individual and team projects. Students will learn to do concept art, pre-production planning, prototyping and testing, all working towards creating completed games.

Prerequisite(s): Non-degree graduate students not allowed.

ART 3200 THE HAND PRODUCED BOOK I: TYPOGRAPHY AND BOOK DESIGN (3 credits)

This course is an introduction to the typographic principles and fundamental letterpress techniques as applied to printed books. Each student learns hand typesetting and letterpress procedures, then designs and prints a small edition of their selected text. Lab fee required.

ART 3210 COLOR THEORY (3 credits)

Instruction in the study of color through directed classroom assignments.

Prerequisite(s): ART 1110 and ART 1210

ART 3220 HAND PRODUCED BOOK II: LETTERPRESS PRINTING (3 credits)

Continuing work in typography and book design with an emphasis on book illustration, multi-color printing, and the standardization and control of edition work. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required.

Prerequisite(s): ART 3200

ART 3230 BOOK STRUCTURES: INTRODUCTION TO BOOKBINDING (3 credits)

This course investigates basic approaches to bookbinding, introducing students to the history, tools and techniques of the discipline. In addition to the concertina structure and simple presentation wrappers, students execute a variety of non-adhesive bindings, both Western and Japanese, and learn basic case-binding methods. Lab fee required.

ART 3250 PATTERNED PAPER (3 credits)

This course examines various techniques employed in the creation of decorative patterned papers traditionally used in bookbinding for both cover material and/or end sheets. The emphasis of the course will be on effective pattern design, the mastery of pattern paper production methods, and fine craft standards. Lab fee required.

ART 3300 ELEMENTARY ART METHODS (3 credits)

Study of the theory, methods, curriculum and recent research affecting art education with emphasis on the elementary art program. Student must complete a 50-hour practicum which occurs outside of scheduled class time. Lab fee required.

Prerequisite(s): Students must be formally admitted to the College of Education Educator Preparation Program; PK-12 Art Education Majors only; 2.75 NU GPA. Lab Fee Required.

ART 3310 ELEMENTARY SCULPTURE (3 credits)

This course begins the exploration of the 3-dimensional artistic form which can be constructed using a variety of materials including clay, plaster, wood, steel and new media. Lab fee required..

Prerequisite(s): ART 1110

ART 3320 INTERMEDIATE SCULPTURE (3 credits)

Intermediate Sculpture continues and expands upon the elementary level of sculpture and builds upon methods, technologies, problem solving and professional practice. Lab fee required.

Prerequisite(s): ART 3310

ART 3330 ART IN PUBLIC PLACES (3 credits)

The goal of this course is to introduce students to the concepts and practice related to displaying artwork in public places. Following a thorough examination of the history of public art, the course will focus on the various visual languages and iconography appropriate for public venues. The course emphasizes building original artwork using both traditional and digital technologies, displaying work in public spaces, artist responsibilities and related professional practice.

Prerequisite(s): ART 1110

ART 3340 DIGITAL SCULPTURE - DESIGN AND BUILD TECHNOLOGIES (3 credits)

The goal of this course is to introduce students to the methods of designing objects in a digital environment and realizing them as objects in the physical world. Students will learn to create forms using a variety of 3D modeling software and scanning technologies. The course will introduce students to the Autodesk suite of programs, including 3D Studio Max, Maya Inventor, 123D Catch, as well as Zbrush. Once students have achieved a high level of competency on the computer, the class will begin exploring systems for building their creations. Using Make 123D, Pepakura and Makerware students will fabricate objects in plastic, cardboard and wood. Additionally, the class will address both the artistic and functional applications of these methods.

Prerequisite(s): ART 1110

ART 3360 APPLIED ART & DESIGN (3 credits)

This course is designed to present an opportunity for education and other undergraduate students to develop basic skills, knowledge and appreciation of the arts and crafts of our culture and other world cultures. The course content will be individualized for the purposes of adapting methods, values, content, and media for students working with special populations or in special settings. Lab fee required.

Prerequisite(s): Sophomore.

ART 3370 TECHNOLOGY IN ARTS EDUCATION (3 credits)

This course is specifically designed for pre-service art teachers to learn how to integrate media arts, visual and instructional technology, and digital visual culture into arts curriculum appropriate for application to K-12 contexts. Students will critically examine digital arts, digital art media and technology, and digital visual culture environments and address pedagogical and implementation issues as they simultaneously create their own digital art and digital visual culture. Lab fee required.

Prerequisite(s): Prereq: TED 2400; K-12 ART/ED majors only. Coreq: ART 3300. With permission of the instructor. Senior standing. Lab fee required. Not open to non-degree graduate students.

ART 3410 ELEMENTARY PAINTING (3 credits)

Instruction in oil painting permits each student the time and environment to work and develop individually. Perceptual and conceptual skill building emphasized. Knowledge of contemporary painting integral to painting practice. Lab fee required.

Prerequisite(s): ART 1100 and ART 1210

ART 3420 INTERMEDIATE PAINTING (3 credits)

Instruction in oil painting permits each student the time and environment to work and develop individually. Emphasis on developing cohesive body of work in context of experimentation. Knowledge of contemporary painting integral to painting practice. Lab fee required.

Prerequisite(s): ART 3410

ART 3510 ELEMENTARY PRINTMAKING (3 credits)

This is an introductory course to the history and studio practices of printmaking. Lab fee required.

Prerequisite(s): ART 1100 and ART 1210

ART 3520 PHOTOGRAPHIC DIGITAL PRINTMAKING (3 credits)

Introduction to photographic and digital printmaking technologies including pre-press and printing techniques. Lab fee required.

Prerequisite(s): ART 1100 and ART 1210

ART 3530 PAPERMAKING (3 credits)

This course examines the history and techniques of classic papermaking, sheet formation and producing edition sheets. Lab fee required.

Prerequisite(s): ART 1110 and ART 1210

ART 3610 ELEMENTARY CERAMICS (3 credits)

This course is an introduction to the medium of ceramics. The focus of this course will be the use of clay as a sculptural medium with the emphasis on various, basic techniques for creating objects in clay. Lab fee required.

Prerequisite(s): ART 1110

ART 3620 INTERMEDIATE CERAMICS (3 credits)

This course is a continuation of processes covered in the Elementary Ceramics course with basic pottery techniques utilizing the wheel, hand building, object prototyping and advanced mold making. Additional emphasis will be on scale and completion of mid-to large size projects.

Prerequisite(s): ART 3610. Lab fee required.

ART 3700 INTRODUCTION TO ANCIENT ART (3 credits)

This course provides an introduction into the art and cultures of the ancient Mediterranean areas. Lab fee required.

Prerequisite(s): ART 2050 or permission of instructor. Not open to non-degree graduate students.

ART 3710 EGYPTIAN ART (3 credits)

This course will examine ancient Egyptian culture through its art and architecture. Lab fee required.

Prerequisite(s): For Fine Arts majors, completion of Art 2050 & Art 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3720 GREEK ART (3 credits)

This course will immerse students in the art and culture of ancient Greece. Lab fee required.

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3730 ETRUSCAN & ROMAN ART (3 credits)

This course provides an in-depth investigation of Etruscan and Roman civilizations. Lab fee required.

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3750 AMERICAN ART (3 credits)

This course provides a study of art, architecture, and material culture produced in the United States approached through varied contexts (artistic, religious, political, economic, etc.) and methodologies. Lab fee required.

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3760 RESEARCH, WRITING, AND COMMUNICATION FOR CAREERS IN ART (3 credits)

This class prepares students for advanced level art history courses as well as a career in art history and/or related fields. Basic skills such as critical thinking, analytical reading, traditional and innovative research methods, writing, and public speaking will be emphasized.

Prerequisite(s): ART 2050 and ART 2060

ART 3770 HISTORY OF ARCHITECTURE TO 1850 (3 credits)

A survey of the history, aesthetics and technical developments in architecture from ancient times to the middle of the 19th century. Lab fee required.

Prerequisite(s): None. Recommended: ART 2050 or ART 2060 (prereq or coreq).

ART 3780 HISTORY OF ARCHITECTURE SINCE 1850 (3 credits)

This course is a survey of the history of architecture since the coming of the industrial age, including the major schools and movements in architecture of the 20th century.

Prerequisite(s): None. Recommended: ART 2050 or ART 2060. Lab fee required.

ART 3800 HISTORY OF DESIGN (3 credits)

The history of modern global design movements, primarily 1851 to present. The movements cover a range of media, from graphic arts and industrial design to furnishing and interior design.

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 3830 HISTORY OF PHOTOGRAPHY (3 credits)

This course provides an introduction to the history of photography from its earliest forms to that of contemporary society and culture. Lab fee required.

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 3860 WOMEN IN ANCIENT AND MEDIEVAL ART (3 credits)

The purpose of this course is to provide an introduction of women through the art and culture of the ancient Mediterranean and western Middle Ages.

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 3870 GENDER & SEXUALITY IN MODERN ART (3 credits)

This course provides an introduction to topics of gender and sexuality in modern art, from 1860 to the present.

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 3910 INTERMEDIATE PRINTMAKING (3 credits)

Intermediate Printmaking expands upon basic printmaking concepts and techniques and includes monotype variations, intaglio techniques, Moku Hanga woodcuts and other woodcut processes. Students will be involved with drawing, creating, problem solving and understanding the printmaking studio and its processes.

Prerequisite(s): ART 3510. Not open to non-degree graduate students.

ART 3920 ILLUSTRATION 2: THE STATIC IMAGE (3 credits)

This studio course will explore the static image, including but not limited to magazine illustration, book cover illustration, advertisement illustration, single-panel cartoons and background painting for animation. Students will develop their technical ability in digital painting and drawing and enhance their skill sets in ink and watercolor. Projects will be medium specific so that students can hone their craft as they respond to thematic prompts. Students will develop sketchbook practices for research and ideation. Emphasis will be placed on generating original visual ideas, utilizing visual metaphor and interpreting texts. Students will learn to compose and frame their illustrations and apply gestalt design principles to create readable images.

Prerequisite(s): ART 2920 or permission of instructor

ART 4000 SPECIAL SEMINARS IN ART EDUCATION (1-3 credits)

A series of intensive courses in the history and theory of art education designed specifically for elementary and secondary school art teachers. These courses are scheduled as special seminars or workshops according to purpose. (Cross-listed with ART 8006.)

Prerequisite(s): Junior and Department Permission

ART 4010 SPECIAL TOPICS IN STUDIO ART (3 credits)

This course concerns itself with a variety of limited topics in the field of Studio Art. At times this course is coordinated with an external event such as a visiting artist, exhibition or study trip. It may also be considered a testing ground for acceptance and interest in a relatively new topic in Studio Arts. Exact content will be determined by the offering instructor.

Prerequisite(s): Prerequisites of each 4010 course will be determined by the instructor and therefore will require special permission.

ART 4020 PROFESSIONAL STUDIO PRACTICES (3 credits)

This is a capstone course for the Studio Arts area that includes book arts, ceramics, drawing, painting, printmaking, sculpture and media (2D, 3D, and Media). During the semester, students will learn the administrative component that is essential for cultivating and maintaining a sustainable studio practice in art. Activities include writing artist statements, an artist curriculum vitae alongside participating in the simulated arts activities of applying for an exhibition and artist grant and understanding the benefits and liabilities of social media.

Prerequisite(s): Students must be of Junior standing. Not open to non-degree graduate students.

ART 4040 BASA SENIOR ART EXHIBITION (0 credits)

The BASA Senior Art Exhibition is the culminating experience of the studio art major. The exhibition is a group exhibition required of all senior majors. Although the exhibition is not a credit bearing course, a passing grade is required to graduate. Student work should demonstrate maturity in thought, execution and presentation. The artwork must come from advanced coursework within their chosen concentration and represent a high level of quality, depth of inquiry, and best critical judgement.

Prerequisite(s): BASA majors, Seniors in their last academic semester, or permission from instructor. Not open to non-degree graduate students.

ART 4130 MEDIA ART III (3 credits)

This is a digital studio course for students interested in exploring interactive digital projects using current or emerging technologies. The course includes both fine art and applied uses of digital art through the development of individual and group projects using digital and electronic media means. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.)

Prerequisite(s): ART 3120 or permission of instructor.

ART 4140 COMPUTER-GENERATED IMAGERY (CGI) II: 3D MODELING (3 credits)

This course is a continuation of principles and practices introduced in ART 3140. The goal of this course is intended for experienced students to explore advanced principles and aesthetic considerations of computer-generated imagery by creating 3D modeling and sculpting with professional programs (i.e. ZBrush, Maya, or others) for game design, virtual reality, and other applications.

Prerequisite(s): ART 3140 or permission of the instructor.

ART 4150 GRAPHIC DESIGN 2 (3 credits)

A continuation of the Graphic Design sequence, Graphic Design 2 is an advanced course utilizing the knowledge and skills acquired in Graphic Design 1. In Graphic Design 2 students apply acquired knowledge and skills to solve design problems for more complex systems. Intermediate digital skills are paired with intermediate production and materials problems as students complete product and package design systems. These design systems are then paired with companion web and video components. Additionally, students continue their study of professional practices and presentation skills.

Prerequisite(s): ART 3130, or permission of instructor.

ART 4160 GRAPHIC DESIGN 3 (3 credits)

A continuation of the Graphic Design sequence, Graphic Design 3 is an advanced, professional simulation course utilizing the knowledge and skills acquired in Graphic Design 1 and 2. Working individually and in teams, students create large-scale design systems over multiple communications channels for consumer product or services. The course culminates in a thesis presentation with accompanying brand book.

Prerequisite(s): ART 4150, or permission of instructor.

ART 4170 GRAPHIC DESIGN STUDIO (3 credits)

A continuation of the Graphic Design sequence, Design Studio is an advanced, capstone course utilizing the knowledge and skills acquired in Graphic Design 1, 2, and 3. Working individually and in teams, students design thesis research projects, create professional portfolios, present their work to the public, and work on client projects for on and off-campus organizations.

Prerequisite(s): ART 4160, or permission of instructor.

ART 4180 ADVANCED DIGITAL GAME DESIGN (3 credits)

This course provides an advanced experience to digital game development. It explores all aspects of creating 3d games. Students will work on individual and team projects and will learn concept art, pre-production planning, prototyping and testing while working towards creating completed games using a three dimensional platform.

Prerequisite(s): ART 3170 or permission of the instructor. Not open to non-degree graduate students.

ART 4190 GAME DESIGN STUDIO (3 credits)

This course provides a capstone study in game development. It explores game design, game prototyping, finalization, distribution and promotion. Students will work in teams to conceptualize, pitch, prototype, and present an audience ready game. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.)

Prerequisite(s): ART 3160, ART 3170, or ART 4180 or permission of instructor. Not open to non-degree graduate students.

ART 4210 PRINTED BOOKS (3 credits)

This course covers the invention of moveable type through the refinement in printing styles and technology to the present age.

Prerequisite(s): ART 3220 and ART 3230 or permission of instructor.

ART 4220 ILLUSTRATION 3: SEQUENTIAL IMAGES (3 credits)

This studio course focuses on sequential images. From picture books and comics to greeting cards and how-to instructions, students will learn to frame and pace their images to clearly communicate ideas and emotion. Emphasis will be placed on developing original narratives and understanding the rules of framing and pacing to create readable stories. The semester will culminate with a short self-published comic or picture book.

Prerequisite(s): ART 3920 or permission from instructor

ART 4290 ILLUSTRATION STUDIO (3 credits)

This is an advanced capstone course for Illustration students who have already taken Illustration 1, 2, and 3. In this course students will choose one illustration field to focus on. From there they will develop their professional portfolio, complete a book project, create an animation demo reel or develop a pitch package. This course will cover industry best practices, contracts, mainstream and alternative career pathways for illustrators.

Prerequisite(s): ART 2920, ART 3920, and ART 4220 or permission from instructor

ART 4300 SECONDARY ART METHODS (3 credits)

This course is the study of theory, methods, art curriculum content, and recent research in art education relative to art education in middle and high school settings. Students are required to complete a 50-hour practicum that occurs outside of scheduled class time. Lab fee required

Prerequisite(s): Students must be formally admitted to the College of Education Educator Preparation Program; ART 3300 or Permission; PK-12 Art Education Majors only; 2.75 NU GPA. Lab Fee Required.

ART 4310 ADVANCED SCULPTURE (3 credits)

Advanced work in area of student's choice with facilities for oxyacetylene welding, arc welding and wood working. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 8316.)

Prerequisite(s): ART 3310

ART 4320 BACHELOR OF FINE ARTS INDEPENDENT STUDY I (3 credits)

This course is an advanced individualized study in studio art concentration area of Ceramics, Drawing, Hand Produced Book, Sculpture, Painting, Printmaking or Graphic Design.

Prerequisite(s): Advanced level courses in area of concentration, and permission of instructor.

ART 4330 BACHELOR OF FINE ARTS INDEPENDENT STUDY II (3 credits)

BFA II is the second semester of an advanced individualized study in a studio art concentration area of Ceramics, Drawing, Hand Produced Book, Sculpture, Painting, Printmaking or Graphic Design. Lab fee required.

Prerequisite(s): Completion of ART 4320 (BFA I) in the area of emphasis.

ART 4340 BACHELOR OF FINE ARTS INDEPENDENT STUDY III (3 credits)

This course is the continuation of BFA II for the advanced individualized study in studio art concentration area of Ceramics, Drawing, Hand Produced Book, Sculpture, Painting, Printmaking or Graphic Design. This course is only used if, for some reason the student is unable to proceed to BFA Thesis after completing BFA II. Lab fee required.

Prerequisite(s): Completion of ART 4320 and 4330 and permission of instructor as this course is only used when the student is unable to proceed to the BFA Thesis.

ART 4350 TRENDING TOPICS IN ART EDUCATION (3 credits)

This is a series of intensive courses dealing with the theory and practice of current trends in art education designed specifically for pre-service art teachers. These courses are scheduled as special seminars or workshops according to purpose. Lab fee may be required.

Prerequisite(s): Prereq: TED 2400; K-12 ART/ED majors only. Senior standing or permission of instructor

ART 4410 ADVANCED PAINTING (3 credits)

Advanced instruction in oil painting permits students the time and environment to work and develop individually. Emphasis on developing cohesive body of work as continuation from work done in Intermediate painting. Knowledge of contemporary painting integral to painting practice. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 8416.)

Prerequisite(s): ART 3420

ART 4420 BACHELOR OF FINE ARTS THESIS (3 credits)

This course is the culmination of the BFA process with an individually designed study in studio art concentration area of Ceramics, Drawing, Hand Produced Book, Sculpture, Painting, Printmaking or Graphic Design. A faculty committee and thesis exhibition are required for completion of this course. Lab fee required.

Prerequisite(s): Completion of ART 4320 and ART 4330 and permission of instructor.

ART 4440 INDEPENDENT STUDY IN STUDIO ART (1-3 credits)

This course is an independent study with variable credit for studio art students who have already taken the most advanced level course in their chosen degree program.

Prerequisite(s): This course requires permission from instructor.

ART 4510 ADVANCED TECHNIQUES IN PRINTMAKING (3 credits)

This course allows students to develop their skills in both lithography and intaglio and the color processes for each printmaking technique. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 8516.)

Prerequisite(s): ART 3510

ART 4530 ART INTERNSHIP (0-3 credits)

A tutored internship at a local arts institution that will introduce students to following areas of concentration: Curatorial Collections Research, Education Outreach, and Preparation/Installation. Working as an Artist's Studio Assistant or in the areas of Web page design or graphic design are also appropriate internship projects. Ideally, the internship should provide the student with an opportunity to gain pre-professional experiences and skills. It should also increase his or her awareness of current issues and practices within the field of art.

Prerequisite(s): Reserved for studio art (BASA & BFA), Art Education, or Art History majors; junior standing & min GPA of 3.0. Permission of Faculty Advisor & Intern Sponsor required. Advanced art history, art education, or studio courses may be required.

ART 4610 ADVANCED CERAMICS (3 credits)

This course will consist of advanced work on the potter's wheel, casting and preparations in glaze composition, as well as loading and firing of a high-fire kiln. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 8616.)

Prerequisite(s): ART 3610

ART 4730 CLASSICAL ART HISTORY (3 credits)

This course is a study of painting, sculpture, architecture and minor arts of the classical world beginning with Cycladic art and including Minoan, Mycenaean, Greek, Etruscan and Roman art through 300 A.D. Lab fee required. (Cross-listed with ART 8736.)

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4740 INTRODUCTION TO COLLECTIONS MANAGEMENT (3 credits)

This course focuses on collections management and will offer insights into collections care practices and standards. It requires a team to provide the appropriate range of care necessary to maintaining diverse collections of objects. Lectures and talks will include those presented by top experts in the field. Students will gain invaluable insights and practical knowledge of effective collections management. Course content will include theoretical and practical components to introduce policies and procedures, database systems, fine art insurance and shipping, object handling, conservation and installation standards.

Prerequisite(s): Sophomore standing or permission of the instructor.

ART 4750 LATE ROMAN AND BYZANTINE ART HISTORY (3 credits)

A study of painting, sculpture and architecture of the Eastern Roman Empire from the founding of Constantinople, and of Western Europe from the time of Constantine to the dissolution of the Western Roman Empire. Lab fee required. (Cross-listed with ART 8756.)

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4760 TECHNICAL ART HISTORY (3 credits)

Technical art history, which investigates the materials and techniques of artworks and the scientific methods used to study them, is one of the fastest growing areas of art history. Knowledge of the physical properties of an art object, often revealed only through scientific tools, can provide crucial insights into its origins, creative genesis and development, dating, alterations and best approaches to restoring or conserving it. This course will focus primarily on the information yielded by technical studies of Renaissance panel paintings. After reviewing the context and style of Renaissance paintings, the course explores the techniques and materials used in their creation and the scientific methods of examination and their applications. The intersections between the technical examination of art and paintings conversation will also be briefly introduced.

Prerequisite(s): ART 2050 and ART 2060

ART 4770 EARLY MEDIEVAL ART (3 credits)

This course provides a study of painting, sculpture and architecture of Western Medieval Art. Lab fee required.

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4780 LATE MEDIEVAL ART HISTORY (3 credits)

This course is a study of painting, sculpture and architecture of the European Middle Age periods of Romanesque and Gothic Art. Lab fee required.

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 4810 NORTHERN EUROPEAN RENAISSANCE ART HISTORY (3 credits)

This course is a study of the paintings, sculpture and architecture during the 14th, 15th and 16th centuries in France, the Low Countries, Germany, Spain and England. Lab fee required.

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required. Not open to non-degree graduate students.

ART 4830 ITALIAN RENAISSANCE ART HISTORY (3 credits)

Study of painting, sculpture and architecture in Italy during the 14th, 15th and 16th centuries. Lab fee required. (Cross-listed with ART 8836.)

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4850 BAROQUE AND ROCOCO ART HISTORY (3 credits)

This course is a study of painting, sculpture and architecture in Europe during the 17th and 18th centuries. Lab fee required. (Cross-listed with ART 8856.)

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 4880 MODERN ART I (ART OF EUROPE AND THE AMERICAS, 1850-1920) (3 credits)

A study of the most significant developments in European art and architecture dating from the early Modern period and examined in varied contexts (artistic, religious, political, economic, etc.). (Cross-listed with ART 8886.)

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 plus junior standing. For non-majors, junior standing and permission of the instructor are required. Lab fee required.

ART 4890 MODERN ART II (ART OF EUROPE AND THE AMERICAS, 1918-1968) (3 credits)

This course explores the major artistic movements and artists active in Europe and the Americas between the end of WWI and the Vietnam Era circa 1968. (Cross-listed with ART 8896.)

Prerequisite(s): For Fine Arts majors, completion of Art 2050 & Art 2060 plus junior standing. For non-majors, junior standing and permission of the instructor are required. Lab fee required.

ART 4900 CONTEMPORARY ART HISTORY SINCE 1968 (3 credits)

This course introduces contemporary visual arts in a global context from 1968 to the present with topics of discussion including art, aesthetics, politics, gender and sexuality, race and economics. (Cross-listed with ART 8906.)

Prerequisite(s): For Fine Arts majors, completion of Art 2050 & Art 2060 plus junior standing. For non-majors, junior standing and permission of the instructor are required. Lab fee required.

ART 4910 INDEPENDENT STUDY IN ART HISTORY (1-3 credits)

This course is an independent research project under the direct supervision of the sponsoring faculty member, generally involving the writing of a paper. Lab fee required.

Prerequisite(s): Art History major in upper division and permission of instructor.

ART 4920 ART IN THEORY AND IN PRACTICE SINCE 1900 (3 credits)

This course introduces BFA students to the essential theories and critical positions that have shaped the practice of contemporary art in the West since 1900. It also addresses the purpose and nature of the artist's statement, the studio critique, the exhibition, and professionally written art criticism.

Prerequisite(s): Acceptance in BFA program, ART 2050 & ART 2060, & ART 4890 or ART 4900. Other students will need instructor's permission. Students not meeting the min qualifications or instructor's permission will be dropped. Not open to non-degree graduate students.

ART 4930 SPECIAL TOPICS IN ART HISTORY (3 credits)

These illustrated lecture courses deal with a limited topic in the field of art history. The course may be coordinated with an external event such as an exhibition, publication or study trip. Lab fee required. (Cross-listed with ART 8936)

Prerequisite(s): ART 2050 or ART 2060 or instructor permission.

ART 4940 ART HISTORY METHODS (3 credits)

This is a seminar course surveying major developments in aesthetics and selected problems in the discipline of Art History. Required for art history majors. Lab fee required.

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), and preferably, one other art history course.

ART 4950 ART CRITICISM (3 credits)

A study of art criticism from antiquity to the present. Students will both engage art critical writing as a creative and analytical tool.

Prerequisite(s): Senior standing in Art History and completion of or concurrent enrollment in ART 3760 or ART 4940) plus the approval of the Art History faculty.

ART 4990 ART HISTORY CAPSTONE (1 credit)

Art History majors will have the choice of either: 1) writing a thesis (20-25 pages) and giving a 20 min. public presentation, 2) taking a comprehensive exam with questions based on their coursework, or 3) completing an internship project and giving a 20 min. public presentation.

Prerequisite(s): Senior standing in Art History and completion of or concurrent enrollment in ART 3760 (Art History Seminar) or ART 4940 (Art History Methods) plus the approval of the Art History faculty.

Aviation (AVN)

Aviation Undergraduate Courses

AVN 1000 INTRODUCTION TO AVIATION AND AEROSPACE (3 credits)

This course provides a broad understanding of all aspects of the air transportation and aerospace industries. Lectures will cover what has happened in the industry to date, with emphasis on present and future developments in air transportation. The course will include the impact the airline industry is making on airports and other segments of aviation and aerospace.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

AVN 1020 PRIVATE PILOT THEORY (3 credits)

This course will familiarize the student with theories associated with flight. These include aerodynamics, weather, Federal Aviation Administration (FAA) regulations, navigation, airports, airspace, and aviation safety. There is no flight requirement associated with this course.

AVN 1024 PRIVATE PILOT FLIGHT LABORATORY (1 credit)

This laboratory course is designed for students pursuing flight requirements for the Federal Aviation Administration private pilot certificate. The student will complete all flight requirements for solo flight. Course will include flight in aircraft simulators and single-engine aircraft. Class is conducted off campus. Special fees apply.

Prerequisite(s): Completion of or concurrent enrollment in AVN 1020, or successful completion of the Federal Aviation Administration Private Knowledge Test.

AVN 1030 PRIVATE PILOT FLIGHT CERTIFICATE (2 credits)

This course will prepare the student for the Federal Aviation Administration practical flight examination for the private pilot certificate. Course involves flight in personal computer assisted training device and single-engine aircraft. Student is required to successfully complete all FAA certification requirements and obtain a private pilot certificate. Classes will be conducted off campus. Special fees apply.

Prerequisite(s): AVN 1020 and AVN 1024.

AVN 1040 HISTORY OF AVIATION AND AEROSPACE (3 credits)

The course introduces students to the history of aviation and aerospace with emphasis on the evolution of technologies, policies, business models, and transportation.

Distribution: Social Science General Education course

AVN 1160 AVIATION SAFETY (3 credits)

This course provides the student with a detailed introduction to aspects of aviation safety as well as the associated components of flight human factors, aircraft technology, weather related accidents and accident investigation.

Prerequisite(s): AVN 1000

AVN 1500 INTRODUCTION TO UNMANNED AIRCRAFT SYSTEMS (3 credits)

This course is an introductory overview of Unmanned Aircraft Systems including the regulatory process, history, application and career opportunities, ethical concerns, and safety management of UAS operations.

Prerequisite(s): Not open to non-degree graduate students.

AVN 2020 AIRLINE OPERATIONS (3 credits)

The purpose of this course is to introduce the student to operational aspects of airline management. Topics to be covered include management, leadership, labor relations, marketing, forecasting, and fleet planning.

Prerequisite(s): AVN 1000

AVN 2050 INTRODUCTION TO AIRPORT ADMINISTRATION (3 credits)

This course examines airport operations, safety and security, various administrative roles within the airport community, and the impact airports can have on local and regional economies. Students will explore the unique role public airports play as an interface between the traveling public and private airlines.

Prerequisite(s): AVN 1000

AVN 2100 FLIGHT TEAM (1 credit)

Students will learn and master the skills associated with the 9 different events associated with the National Intercollegiate Flying Association Regional and National Safety and Flight Evaluation Conferences or SAFECONs. The events include: Computer Accuracy, Simulated Comprehensive Aircraft Navigation (SCAN), Aircraft Recognition, Preflight Inspection, Ground Trainer, Message Drop, Navigation, Short-Field Landing, and Power-Off Landing.

Prerequisite(s): Permission of the Flight Team Advisor is required

AVN 2104 INSTRUMENT RATING 1 (2 credits)

The student will complete approximately 25 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator and FAA-approved Advanced Aviation Training Devices on the UNO Main Campus; objective is to complete the first portion of training needed for the FAA Instrument Rating. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s): Concurrent enrollment in AVN 2170 or instructor permission. Not open to non-degree graduate students.

AVN 2114 INSTRUMENT RATING 2 (1 credit)

The student will complete approximately 20 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator; objective is to complete the final portion of training needed for the FAA Instrument Rating. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s): AVN 2170 and AVN 2104 or instructor permission. Not open to non-degree graduate students.

AVN 2124 COMMERCIAL PILOT CERTIFICATE 1 (2 credits)

The student will complete approximately 40 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator and FAA-approved Advanced Aviation Training Devices on the UNO Main Campus; objective is to complete the first of three sections of training needed for the FAA Commercial Pilot Certificate. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s): Concurrent enrollment in AVN 2180 or instructor permission. Not open to non-degree graduate students.

AVN 2134 COMMERCIAL PILOT CERTIFICATE 2 (2 credits)

The student will complete approximately 40 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator; objective is to complete the second of three sections of training needed for the FAA Commercial Pilot Certificate. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s): AVN 2124 or instructor permission. Not open to non-degree graduate students.

AVN 2144 COMMERCIAL PILOT CERTIFICATE 3 (2 credits)

The student will complete approximately 40 hours of training in a single-engine aircraft at a UNO-approved Fixed Base Operator; objective is to complete the final third of training needed for the FAA Commercial Pilot Certificate. Special fees, FAA medical examination and TSA clearance required. (AC 61-139 Area 1)

Prerequisite(s): AVN 2134 or instructor permission. Not open to non-degree graduate students.

AVN 2164 PROFESSIONAL PILOT DEVELOPMENT (2 credits)

This course is intended to supplement the Instrument Rating and Commercial Certificate courses by providing flight experience and simulator training in the areas of instrument flying, complex airplane/multiengine operations, abnormal and emergency situations, and crew resource management.

Prerequisite(s): AVN 1030 or hold a valid US Private Pilot Certificate.

AVN 2170 INSTRUMENT FLIGHT THEORY (3 credits)

This course will provide the student with an understanding of theory and procedures required to be a safe and competent instrument pilot. It will include the study of flight instruments, aerodynamics, instrument flight maneuvers, navigation, flight planning, the national airspace system, air traffic control, weather, regulations, human factors and emergency operations. There is no formal flight training involved with this course.

Prerequisite(s): AVN 1030 or hold a valid U.S. Private Pilot Certificate; or instructor permission.

AVN 2180 COMMERCIAL PILOT THEORY (3 credits)

This course provides the student with an understanding of the theories involved in flight at the commercial level. Course will include extensive review and study of VFR and IFR cross-country procedures and night flight procedures to prepare the student for the FAA commercial Pilot Knowledge Test. There is no flight training involved in this course.

Prerequisite(s): AVN 2114 or possess a U.S. FAA issued Instrument Pilot Certificate; or instructor permission.

AVN 2500 UNMANNED AIRCRAFT SYSTEMS FLIGHT OPERATIONS (3 credits)

This course will give students hands-on flight training experience with small unmanned aircraft including mission planning, operational control, and working with different types of payloads.

Prerequisite(s): AVN 1500 and FAA Remote Pilot Certificate. Not open to non-degree graduate students.

AVN 2510 DIVERSITY IN AVIATION (3 credits)

This course provides an overview of the contributions women and minorities have made to the field of aviation. Emphasis is placed on past, present and future roles of women and minorities in aviation. The course includes other topics such as international aspects and issues of aviation.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

AVN 2750 AVIATION METEOROLOGY (3 credits)

An introductory study of the key elements of the atmosphere's structure from the earth's surface to the upper levels; weather systems and hazards to aviation operations plus impact of adverse weather on aeronautical operations. Course will include review of air mass characteristics, frontal weather, and pressure system structure.

Prerequisite(s): AVN 1020, and MATH 1310 or MATH 1220 or equivalent.

AVN 2900 INDEPENDENT STUDY IN GENERAL AVIATION (3 credits)

This course will cover various topics in aviation to be determined with the instructor and student. Possible topics include Ground Instructor Ratings, crew resource management, airline airport analysis, military history, effects of privatization, etc.

AVN 3000 BUSINESS AND CORPORATE AVIATION (3 credits)

This course will provide a broad understanding of aspects related to the field of business and corporate aviation. Information that will be covered includes: the history of business and corporate aviation; regulations and associations; the value of using business aircraft; aircraft selection; the differences between corporate flight department, fractional ownership, and charter departments; insurance requirements; and safety and security issues.

Prerequisite(s): AVN 1000 and Junior or Senior standing

AVN 3040 HUMAN FACTORS IN AVIATION SAFETY (3 credits)

The purpose of this course is to provide students with an understanding of human factors as it applies to pilots and administrators. Topics will include pilot physiological and psychological issues, work station design, crew resource management, and related public sector issues for managers.

Prerequisite(s): AVN 1160

AVN 3050 UNMANNED AIRCRAFT SYSTEM DESIGN, DEVELOPMENT, AND MAINTENANCE (3 credits)

This course offers students theoretical knowledge and hands-on experience with small unmanned aircraft system design, development, and maintenance. Students will learn principles of UAS design, development, and maintenance, and will apply interdisciplinary knowledge to build small UAS.

Prerequisite(s): AVN 2500. Not open to non-degree graduate students.

AVN 3060 WRITING IN AVIATION (3 credits)

This course will further develop the communication skills of aviation students through various forms of writing. Students will compose a research paper and other writing assignments.

Prerequisite(s): ENGL 1160 and AVN 1000

AVN 3070 AIR TRAFFIC CONTROL (3 credits)

The purpose of this course is to introduce students to the Federal Aviation Administration (FAA) Air Traffic Control system. Elements and requirements of the course will include: basic air traffic control procedures for pilots, navigation aids, control tower operations, radar approach and departure regulations, and airport traffic control (ATC).

AVN 3090 AIRPORT ADMINISTRATION AND PLANNING (3 credits)

This course covers the nation's airspace design, navigation and air traffic systems and their effect on airport capacity. Additionally, the national airport system will be investigated as well as airport design and development parameters, fiscal processes, and management considerations.

Prerequisite(s): AVN 2050

AVN 3150 AVIATION LAW (3 credits)

This course will increase the student's knowledge of aviation law. Particular attention will focus on the manner in which legal forces affect the aviation system.

Prerequisite(s): AVN 1000 and junior standing.

AVN 3190 CERTIFIED FLIGHT INSTRUCTOR THEORY (3 credits)

Provide the student with an understanding of the theories involved in flight instruction. Course will include extensive oral presentation of complex aeronautical information and use of the personal computer assisted training device. Students are expected to pass FAA Fundamentals of Instructing and Federal Aviation Administration (FAA) Flight Ground Instructor Knowledge tests. There is no flight training in this course.

Prerequisite(s): AVN 2144 and CMST 1110.

AVN 3194 CERTIFIED FLIGHT INSTRUCTOR I (2 credits)

This course consists of approximately 25 hours of flight training in flight instruction procedures required to obtain the FAA flight instructor certificate. Special Fees apply.

Prerequisite(s): AVN 2144 and AVN 3190 (may enroll concurrently).

AVN 3200 COOPERATIVE EDUCATION IN AVIATION (1-6 credits)

This course will complement course work with a relevant professional work experience or practicum in aviation. The practicum/field experience may be a special project in an aviation organization to be coordinated by the instructor. Offered as a credit/no-credit course.

Prerequisite(s): AVN 3060, junior/senior standing, aviation major, instructor permission by written proposal (contract), and approval of proposed work/field experience by instructor.

AVN 3304 CERTIFIED FLIGHT INSTRUCTOR II (2 credits)

Using a combination of lab session training at UNO and ground / flight instruction at the student's selected Flight Training Provider (FTP), the Flight Instructor Candidate will complete the FAA Flight Instructor-Instrument Certificate.

Prerequisite(s): AVN 3194 and AVN 3190 or instructor permission

AVN 3400 MULTI-ENGINE CERTIFICATION (2 credits)

Using a combination of lab session training, Advanced Aviation Training devices at UNO and ground/flight instruction at the student's selected Flight Training Provider (FTP), the student will complete the FAA Multi-Engine Rating at the Commercial level.

Prerequisite(s): AVN 2180 and AVN 2144 and Federal Aviation Administration Commercial Single Engine Land

AVN 3500 RESEARCH METHODS IN AVIATION (3 credits)

An introductory research methods course focused on contemporary as well as historical aviation problems and topics, but from an investigative perspective. The primary focus will be the preparation of standard research documents and the use of traditional statistical methods to evaluate various data sources.

Prerequisite(s): 60 hours of undergraduate credit and AVN 3060 completed or in progress.

AVN 3510 AEROSPACE SCIENCES (3 credits)

This introductory course will provide pre-service teacher candidates, aviation students, and students at large the opportunity for a science oriented general education course. The curriculum will be focused in the areas of earth and space science, geospatial technology, and aeronautics. Key topics for this course will include the geoscience practice of Geographic Information Systems, Global Positioning System, and the NASA Jet Propulsion Laboratory/ UNO designed Data-Slate remote sensing program. Also included will be space sciences focused solar system exploration, satellite technology, and astronautics. Students will engage in aeronautic science topics inclusive of the study of aerodynamics of flight, meteorological science and weather, and flight technology. All students will be provided opportunity to apply concepts of flight in the Aviation Institute's Advanced Simulation Facility.

AVN 3600 INTERNATIONAL AVIATION (3 credits)

This course examines global air transport and its impact on the development of the global economy. Lectures and readings will provide a solid foundation of historical knowledge about international air transport and its development in various countries, before exploring current policy debates about liberalization, global alliances, and other critical issues.

Prerequisite(s): AVN 2020

AVN 3700 TRANSPORTATION ANALYSIS (3 credits)

This course is an extension of introductory financial courses; special emphasis on service characteristics of air carriers. Review of airline revenue and expense streams, pricing and fares, fiscal market segmentation, and fleet planning. Focused approach to understanding the monetary forces that underlie the business practices of domestic and international passenger and cargo airlines.

Prerequisite(s): ECON1200 or higher and junior standing

AVN 4000 INDEPENDENT RESEARCH IN AVIATION (1-3 credits)

The purpose of this course is to provide the aviation student an opportunity to complete an in-depth analysis of a specific aviation topic. Examples: aerodynamics, airports rates/charges analysis, cost-allocation for airside/ landside, aviation marketing relating to aircraft manufacturing, airline promotion, flight component, off-airport subjects, comprehensive regional planning, environmental subject, etc.

Prerequisite(s): Aviation major, senior standing, and written permission of the instructor.

AVN 4010 AERODYNAMICS AND AIRCRAFT PERFORMANCE (3 credits)

Provides the student with an understanding of the factors affecting aircraft performance during various phases of flight. Topics will include aircraft performance requirements outlined in the Federal Aviation Administration Regulations, use of performance charts and tables, runway airport analysis, and climb cruise descent performance.

Prerequisite(s): AVN 1000, AVN 2144, MATH 1220 or instructor permission.

AVN 4020 AIRCRAFT SYSTEMS (3 credits)

Provides the student with an understanding of systems employed on technologically advanced, sophisticated aircraft. Systems covered will include electrical, hydraulic, engines, flight control and pneumatic systems.

Prerequisite(s): AVN 1000 and AVN 2144 or instructor permission.

AVN 4050 GENERAL AVIATION OPERATIONS (3 credits)

Organization and operation of general aviation facilities to include administration, aircraft maintenance considerations, flight line operations, and decision making.

Prerequisite(s): AVN 1000

AVN 4060 ADVANCED AIR TRANSPORT FLIGHT OPERATIONS (3 credits)

The course will be a capstone event in the professional pilot sequence. Specific emphasis will be on the pre-flight planning and execution of air carrier flight operations. Additional instructional segments will cover regional and corporate flight operations.

Prerequisite(s): AVN 4020 or instructor permission.

AVN 4080 AIRPORT SAFETY AND SECURITY (3 credits)

This course will explore the role of airports in relation to safety and security. Topics will include regulations, responsibilities, security issues, ramp safety, disaster preparedness, and emergency management.

Prerequisite(s): AVN 1000 or its equivalent or permission of the instructor.

AVN 4200 INTERNSHIP IN AVIATION (1-6 credits)

This course is designed to provide direct hands-on experience in the aviation industry for selected students. Students will be selected for internships competitively by a panel of Aviation Institute faculty and industry representatives from companies providing the internships. This experience will be in a full-time, preferably paid position in a highly structured environment using a syllabus designated by the faculty and industry committee.

Prerequisite(s): AVN 3060, junior/senior standing, aviation major, instructor permission.

AVN 4500 ADVANCED UNMANNED AIRCRAFT SYSTEMS PROCEDURES (3 credits)

This course will provide students with scenario based training sessions that focus on emergency procedures for inflight operations, risk assessment and mitigation tactics, and advanced communications procedures.

Prerequisite(s): AVN 2500. Not open to non-degree graduate students.

AVN 4900 SPECIAL TOPICS IN AVIATION (1-3 credits)

This course will discuss various topics in the Aviation Industry determined each time the course is offered. Possible topics include International Aviation, Current Issues, and Cockpit Resource Management along with other topics.

Prerequisite(s): AVN 1000 and junior standing

AVN 4990 AIR TRANSPORTATION (3 credits)

This course fulfills the Aviation Institute capstone projects for undergraduates. Lectures and readings will cover contemporary issues and problems in air transportation, as well as material related to research design and implementation.

Prerequisite(s): AVN 3700, junior or senior standing, or instructor permission.

Bioinformatics (BIOI)

Bioinformatics Undergraduate Courses

BIOI 1000 DIGITAL HEALTH AND BIOLOGICAL SYSTEMS (3 credits)

This course is an introduction to how computing and technology can be applied to human health and biological systems in an interdisciplinary setting. Students will learn to discern between computing specializations such as bioinformatics and health informatics. The course will explore the application of computing to health, life sciences, and agriculture in both current and historical contexts, and how these applications impact society. Topics covered include bioinformatics, health informatics, user experience and design, data security and privacy, and more.

Distribution: Natural/Physical Science General Education course

BIOI 2000 FOUNDATIONS OF BIOINFORMATICS (3 credits)

Bioinformatics is a new scientific discipline that integrates mathematical and computational techniques with biological knowledge to develop and use computational tools to extract, organize and interpret information from genetic sequence data. The field is growing quickly due to rapid advances in sequencing and other biological techniques that allow the genomes of different organisms to be easily sequenced. This course provides an overview of the field and covers the chemical, biological, mathematical and computational foundations of bioinformatics upon which later courses will depend. In addition, it introduces problems of interest to bioinformaticians and the methods and tools used to address them.

Prerequisite(s): BIOI 1000 or BIOL 1450

BIOI 3000 APPLIED BIOINFORMATICS (3 credits)

This course will provide students with the practical skills needed for the analysis of -omics data. Topics covered will include biological databases, molecular biology tools (e.g., primer design, contig assembly), gene prediction and mining, database searches, genome comparison, sequence alignments, phylogenetic inference, gene expression data analyses, functional annotation of protein sequences, protein structure and modeling. Specialized software (e.g., Vector NTI) and widely used web-based computation tools (e.g., Entrez, BLAST, ClustalX, Phylip, PyMOL, and SwissPDBviewer) will be illustrated. Multiple approaches for solving particular problems will be presented.

Prerequisite(s): BIOI 2000 and CIST 1400; or permission of instructor.

BIOI 3500 ADVANCED BIOINFORMATICS PROGRAMMING (3 credits)

Because of the volume and complexity of biological data, advanced programming skills are required for researchers in order to get the most out of their data analyses. This course will provide the expanded programming skills necessary to develop software that can exploit the complex information landscape of bioinformatics. Specific topics covered will include molecular biology basics, Unix/Linux shell programming, Perl and BioPerl, databases and using the Perl DBI, and data visualization.

Prerequisite(s): BIOI 3000 and CSCI 1620; or permission of instructor. CSCI 3320 is strongly recommended but not required.

BIOI 4500 INDEPENDENT STUDY (1-3 credits)

This course allows students to research a topic of their interest that is not available in a formal course. The topic to be studied must be agreed upon by the student and the instructor.

Prerequisite(s): Junior or Senior within the Bioinformatics undergraduate program. Not open to non-degree graduate students.

BIOI 4510 BIOINFORMATICS INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application and further development of knowledge and skills acquired in the Bioinformatics undergraduate program. The internship gives students professional work experience and exposure to the challenges and opportunities faced by IT professionals in the workplace.

Prerequisite(s): Junior/Senior standing and permission of Director of the School of Interdisciplinary Informatics. Not open to non-degree graduate students.

BIOI 4860 BIOINFORMATICS ALGORITHMS (3 credits)

The main objective of this course is to provide an organized forum for students to understand the foundations of algorithmic design and analysis in the context of health and biological data. The course will present fundamental concepts in algorithms (exhaustive, greedy, graph, heuristic, and more) and explore how those concepts extend to bioinformatics and related fields, such as biomedical informatics, and health informatics. Students will learn about historical context of these algorithms and how they were pivotal in forming more complex modern approaches, and will explore advanced algorithms in their area of interest. Students will also exercise their programming skills with the opportunity to implement and apply bioinformatics algorithms to real data, so to better grasp the technical components of algorithmic design and analysis. (Cross-listed with BMI 8866).

Prerequisite(s): CSCI 3320 or permission of instructor. Prior completion of CSCI 4850 is strongly recommended but not required.

BIOI 4870 DATABASE SEARCH AND PATTERN DISCOVERY IN BIOINFORMATICS (3 credits)

This required course for undergraduate bioinformatics majors provides foundational knowledge on database aspects used in the field and an overview of their applications in bioinformatics, biomedical informatics, and health/clinical informatics. The course begins with a brief review of key concepts in computational molecular biology related to database search/development, database management systems, the difference between primary and secondary databases, and bioinformatics-related aspects of modeling and theory in computer science. The major focus is on the multiple challenges and aspects of bio-database development, search, and pattern discovery. The course uses problem-based learning to help students develop database management skills as they apply to high throughput "omics" data, the basics of data management, data provenance and governance, standards, and analysis through KDD-based workflows. This course will also consider the fundamentals of artificial intelligence and machine learning as they pertain to bioinformatics, from the perspective of database storage, I/O, and analysis. (Cross-listed with CSCI 8876).

Prerequisite(s): CSCI 4850 or permission of instructor. Not open to non-degree graduate students.

BIOI 4890 COMPUTERIZED GENETIC SEQUENCE ANALYSIS (3 credits)

The goal of this course is to introduce students to major topics in computerized analysis of genetic sequences. In particular the course will allow students to become familiar with the computational tools and software that aid in the modern molecular biology experiments and analysis of experimental results. Following the completion of this course, it is expected that the students will have a basic understanding of the theoretical foundations of the sequence analysis tools and develop competence in evaluating the output from these tools in a biological context. This course will emphasize hands-on experience with the programs for nucleotide and amino acid sequence analysis and molecular phylogeny. (Cross-listed with BMI 8896).

Prerequisite(s): Junior or senior-level standing in the Bioinformatics program or permission from the instructor.

BIOI 4950 SPECIAL TOPICS IN BIOINFORMATICS (3 credits)

This course is intended to provide a mechanism for offering instruction in subject areas that are not covered in other regularly scheduled courses. In general, courses offered under the BIOI 4950 designation will focus on evolving subject areas in bioinformatics.

Prerequisite(s): Prerequisites of a specific offering of BIOI 4950 will be determined by the supervising faculty member and identified in the course proposal. It is anticipated that permission of the faculty member teaching the course will be required for registration.

BIOI 4970 SENIOR PROJECT IN BIOINFORMATICS I (1 credit)

This course is the first part of a two-part series that allows students to work on a guided research project on a specific topic in bioinformatics. The goal of this course is for the student to decide on a research topic and to write a detailed proposal based on this topic that outlines the goals and objectives of the proposed research. The topic and proposal will be approved by the supervising faculty member.

Prerequisite(s): BIOI 4860 and BIOI 4870; BIOI 4860 or BIOI 4870 can be taken concurrently. Senior level status in the Bioinformatics program. Not open to non-degree students.

BIOI 4980 SENIOR PROJECT IN BIOINFORMATICS II (2 credits)

This course is the second part of a two-part series that allows the student to work on a guided research project on a specific topic in bioinformatics. The goal of this course is for the student to perform the research proposed in Part I of the course and to present the results of his or her work. Presentations will be made in the form of a report, written as a scientific research paper, and an oral defense.

Prerequisite(s): Junior or senior-level standing in the Bioinformatics program or permission from the instructor.

Biology (BIOL)

Biology Undergraduate Courses

BIOL 1020 PRINCIPLES OF BIOLOGY (4 credits)

Principles of Biology introduces fundamental concepts at all levels of organization in biology. The laboratory emphasizes inquiry-based and problem-oriented approaches to these concepts. Must enroll in one laboratory. Usually offered Fall, Spring, Summer.

Prerequisite(s): ENGL1150 placement by the English Placement and Proficiency Exam (EPPE), grade of C- or better in English 1050 or 1100, ACT English subscore of 20 or higher, or permission of the department.

Distribution: Natural/Physical Sci General Education lecture&lab

BIOL 1060 INTRODUCTION TO MEDICAL CAREERS & ETHICS (2 credits)

A general overview of modern healthcare professions, plus foundational career concepts which include vocational discernment, undergraduate preparation, healthcare ethics, HIPAA certification, challenges and opportunities in healthcare, and evidence-based medicine. An exploration of various careers in healthcare is included. Intended as a preparatory healthcare professional course. Usually offered during the Fall, Spring, and Summer semesters.

BIOL 1160 TERMINOLOGY OF HUMAN HEALTH & DISEASE (2 credits)

This completely online course is designed to help students learn clinical terminology in relation to human health and disease. The course will cover root words, terms, and phrases relating to human anatomy, disease conditions, and clinical procedures. The course will also serve as a survey of human diseases across all major organ systems, and common procedural diagnostics and treatments.

BIOL 1330 ENVIRONMENTAL BIOLOGY (3 credits)

This course is a study of human ecology with emphasis on the effects of human populations on the earth's resources and on the environment. Usually offered Fall, Spring, Summer.

Distribution: Natural/Physical Science General Education course

BIOL 1450 BIOLOGY I (5 credits)

First semester of a two semester series on the general principles of biology. Concepts including the chemical and physical basis of living systems, cell structure and function, energy and metabolism, genetics and molecular genetics, and evolution of biological diversity will be presented. Laboratory will provide inquiries into these same topics. Intended as the first course for Biology majors. Must enroll in one lab section. Usually offered Fall, Spring and Summer.

Prerequisite(s): High school biology and chemistry. College level chemistry recommended.

Distribution: Natural/Physical Sci General Education lecture&lab

BIOL 1750 BIOLOGY II (5 credits)

Second semester of a two semester series on the general principles of biology. Introduction to the study of life, concentrating on whole organisms and their interactions with the environment. This course will focus on evolution and natural selection, biodiversity, physiologic responses to the environment, organ systems, population dynamics, community ecology, and energy and material flow through ecosystems. Laboratory will provide inquiries into these same topics. Intended as the second course for Biology majors. Must enroll in one lab section. Usually offered Fall, Spring and Summer.

Prerequisite(s): Prerequisite is BIOL 1450. College level chemistry is recommended.

BIOL 2020 STATISTICS FOR LIFE AND ENVIRONMENTAL SCIENCE (3 credits)

The course will train life and environmental science students in 1) searching and accessing public data repositories to address questions in the area of life and environmental science, 2) carrying out quality control of data files and preparing data files for statistical analysis, 3) summarizing data with tables and graphs for reports using the principles of descriptive statistics, and 4) applying basic principles of inferential statistics to test simple life and environmental science models. The students will also practice 1) using spreadsheet software (e.g., Excel) for basic data organization, clean-up, and manipulation and 2) carrying out basic descriptive and inferential statistics with R (the standard statistical software used in life and environmental science). In addition to using the frequentist approach (null hypothesis testing) for inferential statistics, the course will also emphasize effect sizes, because statistically significant, yet small effects, are generally of minor importance in biological and environmental systems. (Cross-listed with ENVN 2020).

Prerequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or MATH 1300 or MATH 1320 or Permission of Instructor.

BIOL 2030 INTRODUCTORY TOPICS IN BIOLOGY (3 credits)

This is course is a lecture and/or laboratory course for Biology and non-Biology majors pertaining to a specific biological topic not available in the regular curriculum. Topics will be developed by individual faculty members reflecting their special interests and expertise. The course may be repeated for credit if the topic differs.

Prerequisite(s): Instructor permission.

BIOL 2060 ART AND SCIENCE OF MEDICAL DECISION-MAKING (3 credits)

The course explores multiple facets of medical decision-making, including the perspective of the patient, the family, and the healthcare provider. Topics include basic anatomy and medical terminology, which will be used to understand decision-making in the context of the provider. Students use literature and other records to generate and critically evaluate clinical decisions. The course does not satisfy requirements for degree programs in the Department of Biology minor, BA, BS in Biology; BS in Biotechnology. (Cross-listed with MEDH 2060).

Prerequisite(s): BIOL 1060 or concurrent.

BIOL 2140 GENETICS (4 credits)

This course provides students with a foundational understanding of genetics. First, students will learn to analyze patterns of Mendelian inheritance. Then, they will develop molecular explanations for these patterns and understandings of how gene genes are defined and identified. They will also learn how variations in inheritance patterns arise, using analytical and statistical tools to distinguish between variations on inheritance patterns and to analyze quantitative traits. Then, students will focus in on the nucleus to examine the structure, organization, packaging, and inheritance of chromosomes. They will consider the consequences of genetic recombination on inheritance patterns and for genetic mapping.

Prerequisite(s): Prerequisites are BIOL 1450 and 1750, CHEM 1140 or 1180 or the equivalent or permission of the instructor. Must enroll in discussion.

BIOL 2440 THE BIOLOGY OF MICROORGANISMS (4 credits)

An introduction to the structure and properties of different types of microorganisms, the importance of microorganisms to our society and our environment, the methods used to control microorganisms, the diseases caused by microorganisms and the defenses of the human body against microorganisms including immune cells. Must enroll in one lab section. Usually offered in Fall, Spring, Summer.

Prerequisite(s): High school biology and chemistry.

BIOL 2740 HUMAN ANATOMY AND PHYSIOLOGY I (4 credits)

This course is designed for students interested in human healthcare professions and anyone interested in learning about the structures and functioning of the human body. Material covered will include introductory terminology as well as the anatomy and physiology of the integumentary, skeletal, muscular, and nervous systems and the special senses. Usually offered Fall, Summer.

Prerequisite(s): High school or college biology or zoology and high school or college chemistry. Must enroll in one lab section.

BIOL 2840 HUMAN ANATOMY AND PHYSIOLOGY II (4 credits)

This course is designed for students interested in human healthcare professions and anyone interested in learning about the structures and functioning of the human body. Material covered will include the anatomy and physiology of the endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive systems. Usually offered Spring, Summer.

Prerequisite(s): BIOL 2740 or permission of instructor. Must enroll in one lab section.

BIOL 3020 MOLECULAR BIOLOGY OF THE CELL (3 credits)

A study of molecular and cellular biology. Topics to be covered include gene expression and regulation, structure and function of biological macromolecules, metabolism, membrane function and transport, and cell differentiation. Usually offered Fall, Spring, Summer.

Prerequisite(s): BIOL 2140 and at least one semester of general chemistry.

BIOL 3030 MICROBIAL ECOLOGY (4 credits)

This course will introduce students to the diversity and ecology of microbes in various environments (soils, water, plants, insects, etc.) through an integrated lecture and laboratory course. Emphasis will be placed on molecular approaches to analyzing microbial diversity and evolution, and teacher-directed but student-led investigations. Students will participate in a continuum of course-based research experiences in molecular microbial ecology, from field work to laboratory techniques, and evolutionary analysis of DNA sequence data. The course explores ecological principles as they apply to microorganisms, while emphasizing the molecular, biochemical and evolutionary diversity in the microbial world. (Cross-listed with ENVN 3030).

Prerequisite(s): Students interested in class must have passing grades in BIOL 1450 and BIOL 1750. OR with instructor's permission.

BIOL 3100 PALEONTOLOGY (3 credits)

An introduction to the history of life through the study of the fossil assemblages, communities, diversity, evolution, extinction, and how fossils are created. We then explore the history of invertebrates, vertebrates, microfossils, and mass extinctions. (Cross-listed with GEOL 3100.)

Prerequisite(s): GEOL 1180 or with instructor permission

BIOL 3150 WRITING AND COMMUNICATION IN THE BIOLOGICAL SCIENCES (3 credits)

This is a course in writing for students majoring in the biological sciences. It is designed primarily to prepare students to report results of original research in a scientific, scholarly format. Topics will include scientific literature, the organization and presentation of data in biological reports, as well as the preparation of posters and oral presentations for scientific meetings. Usually offered Fall, Spring.

Prerequisite(s): Biology major, junior or senior standing, ENGL 1150 and ENGL 1160 or equivalent.

Distribution: Writing in the Discipline Single Course

BIOL 3240 INTRODUCTION TO IMMUNOLOGY (3 credits)

An introduction to the fundamentals of immunology including the immune system, the immune response, humoral and cellular immunity, and antibodies. In addition, immunoassay, immunopathology, cancer immunology, and histocompatibility will be considered. Usually offered Fall and Spring.

Prerequisite(s): Prerequisites are BIOL 1450, 1750 and 2140 and junior-senior standing. Recommended: BIOL 3020. Not open to non-degree graduate students.

BIOL 3340 ECOLOGY (4 credits)

Study of interrelationships between organisms and their biotic and abiotic environment; includes the physical environment, population biology, community dynamics, biotic interactions and evolution. Usually offered Fall, Spring, Summer. (Cross-listed with BIOL 8345).

Prerequisite(s): Prerequisites are BIOL 1450 and BIOL 1750, junior-senior. Must enroll in one lab section. Not open to non-degree graduate students.

BIOL 3500 BIOLOGICAL PRINCIPLES OF AGING (3 credits)

The Biological Bases of Aging Course provides a survey of the primary topics in the biology of aging field for undergraduate students. This a required course for the Gerontology major. By the end of the course, students will understand major theories, biological methods, and seminal research studies in the biology of aging field. Furthermore, students will learn how to critically analyze and interpret primary research about biological aging. This course provides preparation for students considering graduate school in gerontology or biology, geriatric nursing and social work, geriatric medicine, neuroscience, psychology, and exercise science. (Cross-listed with GERO 3500, NEUR 3500)

Prerequisite(s): Sophomore/Junior/Senior Standing. Not open to non-degree graduate students.

BIOL 3530 FLORA OF THE GREAT PLAINS (4 credits)

A study of common vascular plants found in the Great Plains region, including identification, description, and classification techniques and an introduction to the plant communities of Nebraska. Usually offered every Fall and Summer. (Cross-listed with BIOL 8535.)

Prerequisite(s): BIOL 1450, 1750 and junior-senior. Must enroll in lab.

Distribution: OBIOVRT3 - Tier III Biology Writing Course

BIOL 3680 BIOLOGY OF AFRICA (3 credits)

Biology of Africa (3) Introduction to the plants, animals, and habitats of Africa. Although other groups are included, this course will focus on the large mammals of east Africa and will pay particular attention to elephant reproduction and biology. Other topics include Serengeti migrations, hippos, lions and other large cats, reptiles, and human evolution. Usually offered alternate Spring semesters. (Cross-listed with BIOL 8685).

Prerequisite(s): BIOL 1750 or permission of the instructor

BIOL 3690 BIOLOGY OF AFRICA LAB (1 credit)

BIOL 3690/8695 Biology of Africa (1) A Hands-on introduction to the major plants and animals of east Africa using a field trip to South Africa. Students will observe, first hand, examples of the flora and fauna of the African savannah, partake in research on elephant reproductive biology, and observe historic African tribal culture.. Students will be required to take a trip to South Africa including Johannesburg, Hoedspruit, Kruger National Park, and Skukuza. Students will be required to register their travel plans through Education Abroad. Usually offered alternate Summer semesters. Students enrolled in this course must have taken BIOL 3680/8685 during the spring semester immediately prior to this class, or have taken it some semester prior. (Cross-listed with BIOL 8695).

Prerequisite(s): Previous or concurrent enrollment in BIOL 3680/BIOL 8685 lecture.

BIOL 3730 FAUNA OF THE GREAT PLAINS (3 credits)

A survey of the common animal groups in the Great Plains Region and field techniques used to study these groups, with an emphasis on ecosystems and representative animals of Nebraska. Must enroll in lab. Usually offered in fall semesters.

Prerequisite(s): BIOL 1450 and BIOL 1750 and junior/senior

BIOL 3800 ANATOMY ACADEMIC ASSISTANTSHIP PRACTICUM (1 credit)

Assistantships for students participating in the Anatomy Academic Assistantship (AAA) program provide advanced Human Physiology and Anatomy students with the opportunity to apply their knowledge while gaining leadership and communication skills via the mentorship of current Human Physiology and Anatomy I and II students. Additionally, STEM service learning activities will be offered. This course is not intended to replace other biology courses required for degrees offered by the Department of Biology.

Prerequisite(s): Students must have a cumulative GPA of 3.0 or above, a grade of B in BIOL 2740, and be accepted to the Anatomy Academic Assistantship (AAA) Practicum. Students must receive permission of instructor. Not open to non-degree graduate students.

BIOL 3830 BIOLOGY OF PATHOGENIC MICROORGANISMS (3 credits)

This course will cover diseases commonly caused by microorganisms and the features of the microorganisms that cause those diseases. The course will also cover terms used to describe infections, their transmission and their occurrence, and the defenses of humans against infections. The goal of the course is to provide students with the knowledge to be able to diagnose common infectious diseases based on symptoms and test results. Usually offered in Spring semesters. (Cross-listed with BIOL 8835).

Prerequisite(s): BIOL 2140 or BIOL 2440 or BIOL 3240 or the equivalent, or by instructor permission. Not open to non-degree graduate students.

BIOL 4030 SPECIAL TOPICS IN BIOLOGY (3 credits)

A lecture and/or laboratory course for biology majors pertaining to a specific biological topic not available in the regular curriculum. Topics will be developed by individual faculty members reflecting their special interests and expertise. The course may be repeated for credit. (Cross-listed with BIOL 8036).

Prerequisite(s): Junior-senior, BIOL 1450 and BIOL 1750 with a grade of C- or higher.

BIOL 4034 SPECIAL TOPICS IN BIOLOGY-LAB (1 credit)

A laboratory course for biology majors pertaining to a specific biological topic not available in the regular curriculum, paired with a BIOL 8036/4030 Special Topics lecture course. Topics will be developed by individual faculty members reflecting their special interests and expertise. The course may be repeated for credit. (Cross-listed with BIOL 8046).

Prerequisite(s): Junior/senior, BIOL 1450 and BIOL 1750 with a grade of C- or higher.

BIOL 4040 DIRECTED READINGS IN BIOLOGY (1-3 credits)

A faculty directed study of a biological subject through selected readings, oral reports and a final written report. May be repeated up to a total of six hours for 4040 and 4050 combined.

Prerequisite(s): Junior-senior and written permission of instructor.

BIOL 4050 SUPERVISED RESEARCH IN BIOLOGY (1-3 credits)

Completion of a faculty supervised research project involving experimental design, data collection and analysis, and a final written report. May be repeated up to a total of six hours of BIOL 4040 and BIOL 4050 combined.

Prerequisite(s): Junior-senior and written permission of instructor.

BIOL 4100 BIOGEOGRAPHY (3 credits)

This course is intended as an introduction to biogeography, the study of the distribution and evolution of organisms across space and through time. Usually offered every year. (Cross-listed with BIOL 8106, GEOG 4100, GEOG 8106, GEOL 4100, GEOL 8106)

Prerequisite(s): BIOL 1450 and 1750 or GEOL 3100 or BIOL 3100, junior-senior.

BIOL 4110 STATISTICS FOR BIOLOGICAL SCIENCES (4 credits)

Introduction to statistical methods and software used to display, summarize, analyze, and interpret biological and medical data. (Cross-listed with BIOL 8116)

Prerequisite(s): BIOL 1450 and BIOL 1750 and MATH 1220, MATH 1130, or MATH 1530

BIOL 4120 CONSERVATION BIOLOGY (3 credits)

Study of biological diversity at the genetic, species and ecosystem levels, its values, and the factors that threaten it. We will explore the scientific basis of conservation biology and how it can be applied to the maintenance of biological diversity. Usually offered every year. (Cross-listed with BIOL 8126).

Prerequisite(s): BIOL 1450, 1750, 2140 and Junior-Senior in biology. Not open to non-degree graduate students.

BIOL 4130 MOLECULAR GENETICS (4 credits)

A lecture and lab course that explores the frontiers of molecular genetics research. Topics addressed will include DNA replication, gene function, gene expression, genetic manipulation, cloning, mutational analysis, genome sequencing, and epigenetics. Research techniques will include DNA/RNA isolation, PCR, cloning, gel electrophoresis, transgene generation, data analysis, and quantitative rtPCR. Students will get a solid grounding in scientific writing and presentations, as well as reading and assessing primary scientific literature. Lecture, discussion, and laboratory. (Cross-listed with BIOL 8136)

Prerequisite(s): BIOL 2140, 3020 and CHEM 2210 or 2260; or their equivalents. Must enroll in one lab section.

BIOL 4140 CELLULAR BIOLOGY (4 credits)

This course is a modern study of mammalian cell function. Focus will be placed on developing skills in experimental cellular biology. Material covered will include tissue culture techniques, cell staining applications, fluorescent microscopy, determination of gene expression, and high-throughput assay design. (Cross-listed with BIOL 8146)

Prerequisite(s): BIOL 2140, 3020 and CHEM 2210 or 2250. Junior or senior undergraduate standing. Must enroll in laboratory section and lecture for this course. Not open to non-degree graduate students.

BIOL 4150 CANCER BIOLOGY (3 credits)

The etiology of cancers, differences between types of malignancies, oncogenes and genetic modifiers, treatments, susceptibility, and tumor-induced immunosuppression are discussed. This is an active course focused on inquiry-based learning and the purpose of this course is to provide students a foundation in cancer biology while applying tools learned through cell biology, genetics, and immunology courses. (Cross-listed with BIOL 8156).

Prerequisite(s): BIOL 3020 and BIOL 2140. Recommended: BIOL 3240.

BIOL 4160 BIOINFORMATICS FOR BIOLOGISTS (3 credits)

This course intends to introduce fundamental concepts in bioinformatics with an emphasis on how to use biological databases and computational tools to solve common bioinformatics problems in biology and biomedicine. The topics consist of sequence database access and searching, sequence alignment and phylogeny, functional prediction of DNA and protein sequences, and genome sequencing and annotation. Students are expected to learn fundamental concepts in bioinformatics and gain extensive experience with the use of bioinformatics analysis tools. (Cross-listed with BIOL 8166).

Prerequisite(s): BIOL 2140 Genetics; BIOL 3020 Molecular Biology of the Cell; Or Permission of instructor

BIOL 4180 FRESHWATER ECOLOGY (4 credits)

A study of the physical, chemical and biological relationships that serve to establish and maintain plant and animal communities in freshwater environments. (Cross-listed with BIOL 8186, ENVN 4180).

Prerequisite(s): BIOL 1450 and BIOL 1750, junior-senior, or permission of instructor. Must enroll in lab. Not open to non-degree graduate students.

BIOL 4210 FIRE ECOLOGY (3 credits)

Study of fire in ecosystems including characteristics of fire, effects on flora, fauna and the abiotic environment, and use in maintaining native ecosystems. May include two weekend field exercises. (Cross-listed with BIOL 8216)

Prerequisite(s): BIOL 3340, junior-senior.

BIOL 4220 POPULATION BIOLOGY (4 credits)

Population biology takes a conceptual approach to study the dynamics, ecology, genetics, and evolution of populations. Topics include the growth and regulation of populations, population interactions, selection on individuals and groups, mating systems, and life history evolution. Implications of these topics for areas such as the ecology and evolution of disease, conservation, and resource management will be highlighted. Concepts are reinforced through labs emphasizing interpretation of results from population simulations and the relationship between theory and experimentation in population biology. Usually offered in alternate years. (Cross-listed with BIOL 8226).

Prerequisite(s): BIOL 2140 and 3340, junior-senior, or permission of instructor

BIOL 4230 EVOLUTION (3 credits)

The course emphasizes the general principles of evolution, particularly focusing on evolutionary changes and the mechanisms of evolution (natural selection, gene flow, mutation and genetic drift) that apply to all or most organisms. The course covers micro- and macroevolution, speciation, and human evolution. Students will discover how scientists can learn about what has happened in the evolutionary past and the most common patterns of change (i.e., changes that have characterized various groups of organisms). (Cross-listed with BIOL 8236).

Prerequisite(s): BIOL 2140, junior-senior. Not open to non-degree graduate students.

BIOL 4240 MARINE BIOLOGY (3 credits)

An introduction to the marine environment, this course explores physical conditions of the ocean including ocean chemistry, salinity, waves and currents, and tides as well as the ecology of planktonic, nektonic and benthic organisms— their communities and environments. Impacts of humans on the marine environment will also be covered. (Cross-listed with BIOL 8246)

Prerequisite(s): BIOL 1750

BIOL 4250 FIELD MARINE BIOLOGY (1 credit)

This lab is a hands-on introduction to the marine environment using a field trip to the Gulf Coast. Students will observe first-hand examples of local marine habitats and organisms. Students will be required to take a trip to the Gulf Coast of Texas, Louisiana, Mississippi, and Alabama during Spring Break. Students will be required to provide their own basic camping and snorkeling gear. (Cross-listed with BIOL 8256)

Prerequisite(s): BIOL 1750, previous or concurrent enrollment in BIOL 4240 and permission of instructor.

BIOL 4260 BEHAVIORAL ECOLOGY (3 credits)

Behavioral ecology is the study of behavior from an evolutionary and ecological point of view. Through the integration of research at different organizational levels and the use of many different organisms, behavioral ecology is one of the most integrative fields in biological sciences. This course will provide an introduction to the basic concepts of behavioral ecology and the integrative approaches used in behavioral ecology. Further, the course will train students in critical reading and discussion of primary literature in writing and in an oral setting. (Cross-listed with BIOL 8266)

Prerequisite(s): For BIOL 4260: BIOL 2140 Genetics and BIOL 3340 Ecology; or permission by the instructor. Not open to non-degree graduate students.

BIOL 4270 ANIMAL BEHAVIOR (3 credits)

Behavior of diverse animals for the understanding of the relationships between nervous integration and the behavior manifested by the organism, as well as the evolution and adaptive significance of behavior as a functional unit. (Cross-listed with BIOL 8276, PSYC 4270, PSYC 8276)

Prerequisite(s): BIOL 1750 and PSYC 1010 or permission of instructor, junior-senior.

BIOL 4280 ANIMAL BEHAVIOR LABORATORY (3 credits)

Laboratory and field studies of animal behavior with an ethological emphasis. Classical laboratory experiences and independent studies will be conducted. (Cross-listed with BIOL 8286, PSYC 4280, PSYC 8286)

Prerequisite(s): PSYC 4270 or BIOL 4270 or PSYC 8276 or BIOL 8273. Not open to non-degree graduate students.

BIOL 4290 NEUROETHOLOGY (3 credits)

In the field of Neuroethology a major goal is to understand the neural bases of animal behaviors in a natural context. In this course students will investigate how behaviors are generated and modulated by the nervous system in organisms ranging from insects to mammals. We will explore the neural mechanisms underlying a variety of animal behaviors as they interact with their natural environment ranging from sensory perception of the world (e.g. echolocation, electrolocation), to locomotor movements (e.g. flying, swimming), to more complex behaviors (e.g. learning, memory). (Cross-listed with NEUR 4290, NEUR 8296, BIOL 8296, PSYC 8296).

Prerequisite(s): NEUR 1520, NEUR 1540 and BIOL 1750; or by permission of instructor. Not open to non-degree graduate students.

BIOL 4320 HORMONES & BEHAVIOR (3 credits)

In this course, students will examine the interaction between hormones, chemical messengers released from endocrine glands, and behavior in both human and animal systems. Methods for studying hormonal issues on behavior will be addressed. This course will provide students in psychology, biology, and related disciplines an understanding of how hormones affect sensory processing, motor activities, and processing of information in the central nervous system. (Cross-listed with BIOL 8326, PSYC 4320, PSYC 8326)

Prerequisite(s): PSYC 1010 and either BIOL 1020 or 1750. Not open to non-degree graduate students.

BIOL 4410 WETLAND ECOLOGY AND MANAGEMENT (3 credits)

This course will examine the principles and theory of wetland ecology with application towards wetland management and regulation. An interdisciplinary overview of physical, biological and regulatory aspects of wetlands will allow students to synthesize information from their backgrounds in geography, geology and ecology. Definitions, classifications, natural processes and functions of wetland environments will be presented. Labs concentrate on field techniques used to assess specific plant, animal, soil, and hydrological characteristics of wetlands. (Cross-listed with ENVN 4410 and BIOL 8416)

Prerequisite(s): BIOL 3340 or instructor permission.

BIOL 4420 RESTORATION ECOLOGY (3 credits)

Restoration Ecology examines how people assist with the recovery of ecosystems that have been degraded. The course will examine the theory and application of restoration ecology through lecture, discussion, field trips, and development of a restoration management plan for a degraded ecosystem near Omaha. The course will provide information and resources used by restoration and land management professionals to plan, implement, and manage restorations. (Cross-listed with BIOL 8426, ENVN 4420)

Prerequisite(s): Junior or Senior standing.

BIOL 4440 PLANT PHYSIOLOGY (4 credits)

A study of plant processes and functions with emphasis on photosynthesis, growth and development, metabolism and mineral nutrition. (Cross-listed with BIOL 8446)

Prerequisite(s): BIOL1450, BIOL1750, and CHEM2210 or CHEM2250; or permission of instructor.

BIOL 4450 VIROLOGY (3 credits)

A comprehensive course about viruses. The course will address principles of viral infection, virus-host interaction, viral evolution and viral disease processes. Cellular and molecular aspects of viral infection will be the primary focus. This will include examination of viral particles, viral multiplication cycles, regulation of gene expression, viral assembly and viral escape. Viral immunology, viral defenses, viral vaccines and antiviral compounds will also be addressed. Emerging viruses and current viral topics will be a major part of the course. Usually offered in Fall semester. (Cross-listed with BIOL 8456)

Prerequisite(s): Prerequisites are CHEM 2260 and 2274 or CHEM 2210 and 2214, BIOL 3020 and 2140. Recommended: Biochemistry.

BIOL 4454 VIROLOGY LABORATORY (1 credit)

A laboratory to accompany virology lecture. This course enables students to work with viruses in the laboratory and to conduct experiments using viral systems. Experimental design, data gathering, data analysis and manuscript writing will be integral parts of the course. The experiments include host cell characterization, viral infection, virus purification from infected cells, viral genome isolation and viral transfection. Sequence analysis and sequence comparison will also be introduced. Laboratory exercises will emphasize fundamental molecular biology techniques and instrumentation. Usually offered in Fall semester. (Cross-listed with BIOL 8454)

Prerequisite(s): Biology 4450 - Virology is a prerequisite or co-requisite.

BIOL 4460 COMPARATIVE IMMUNOLOGY (4 credits)

This course is an exploration of comparative immunology across kingdoms. There will be a strong focus on human as well as mouse immunology. Laboratory sessions require dissections to determine lymphoid anatomy of representative organisms. Samples will be prepared and analyzed using immunological techniques such as flow cytometry. (Cross-listed with BIOL 8466).

Prerequisite(s): BIOL 3240 or consent of the instructor. Two classroom sessions and one laboratory session per week. Permit code required to register. Not open to non-degree graduate students.

BIOL 4490 MEDICINAL USES OF PLANTS (3 credits)

A scientific study of the biochemical properties and physiological effects of medicinal plants, including their historical uses, current applications to varying systems of the human body, and pathways by which today's potent drugs have transitioned from wild flora. Usually offered Fall semesters of even-numbered years. (Cross-listed with BIOL 8496)

Prerequisite(s): BIOL 1450, 1750 and junior-senior.

BIOL 4540 PRINCIPLES OF SYSTEMATICS (3 credits)

A thorough study of phylogenetics, including tree inference techniques, proper interpretation of evolutionary relationships and character evolution, and applications to investigations in various fields of study. Usually offered in fall semesters of odd-numbered years.

Prerequisite(s): BIOL 1450 and 1750, junior-senior.

BIOL 4550 MOLECULAR AND BIOMEDICAL BIOLOGY INTERNSHIP (3 credits)

Practical laboratory experience for students in the bachelor's of science program in Molecular and Biomedical Biology. In consultation with the MBB adviser and principal investigators, students will select a research laboratory where they will carry out an independent investigation for one semester. Most placements will be at UNMC or UNO. Recommended: Biochemistry. Usually offered Fall, Spring, Summer.

Prerequisite(s): Prerequisite of at least one 4000 level BIOL laboratory course.

BIOL 4560 BIOINFORMATICS INTERNSHIP (1-3 credits)

This course is a practical experience for students in the Bachelor of Science program in Bioinformatics. In consultation with the bioinformatics adviser and principal investigators, students will select a research laboratory and conduct an independent research project in bioinformatics for one or two semesters. Students will write a report describing their research methods, project implementation, and results. The course is limited to Bioinformatics majors and does not satisfy any requirements for other programs in the Department of Biology.

Prerequisite(s): BIOL 2140 Genetics, BIOI 3500 Advanced Bioinformatics Programming, and Permission of Instructor. The course is for students in the Bachelor of Science program in Bioinformatics. Not open to non-degree graduate students.

BIOL 4600 GIS APPLICATIONS FOR ENVIRONMENTAL SCIENCE (1 credit)

This course introduces the use of geographic information systems (GIS) and other geospatial tools for work in the fields of environmental science, ecology, and natural resource management. The course will develop a working knowledge of the common software and hardware tools used by ecologists through hands-on projects. (Cross-listed with BIOL 8606, ENVN 4600)

Prerequisite(s): BIOL 3340 or permission of instructor.

BIOL 4610 ENVIRONMENTAL MONITORING AND ASSESSMENT (3 credits)

An interdisciplinary approach to techniques for the design and implementation of environmental inventory and monitoring schemes used to evaluate natural resources. Students work as teams to synthesize information from their backgrounds in geography, geology and ecology to evaluate the impacts of human actions on environmental quality following the framework for environmental assessments provided by the National Environmental Policy Act. Course is organized to accommodate variable needs of students with different backgrounds and career choices. Usually offered every year. Cross-listed with ENVN 4610, GEOG 4610, GEOG 8616, GEOL 4610, GEOL 8616.

Prerequisite(s): Permission of instructor.

BIOL 4640 MOLECULAR MICROBIOLOGY (3 credits)

This course will cover the diversity observed in genomes, molecules, structures, metabolism, and regulation observed in microorganisms with a focus on bacteria and Archaea. Usually offered Fall semesters. (Cross-listed with BIOL 8646).

Prerequisite(s): Prerequisites are BIOL 2140 and BIOL 3020 or equivalents. Not open to non-degree graduate students.

BIOL 4644 MOLECULAR MICROBIOLOGY LAB (1 credit)

This course will train students to perform techniques commonly used in microbiology labs, such as isolation of bacteria, staining of bacterial cells, use of different media, antibiotic susceptibility tests, polymerase chain reactions, and enzymatic assays. (Cross-listed with BIOL 8645).

Prerequisite(s): Prerequisites of BIOL 2140 and BIOL 3020 and either BIOL 3830/8835 or BIOL 4640/8646 prior or concurrent.

BIOL 4650 BIOCHEMISTRY I (3 credits)

A comprehensive introduction to biochemistry emphasizing: structure-function relationships for proteins, carbohydrates, lipids, and nucleic acids; protein purification; enzyme kinetics and mechanisms; membranes and membrane transport; carbohydrate metabolism including glycolysis, the citric acid cycle and oxidative phosphorylation; and important applications of thermodynamics and the properties of water to living systems. (Fall) (Cross-listed with BIOL 8656, CHEM 4650, CHEM 8656).

Prerequisite(s): CHEM 2260 and CHEM 2274; and either CHEM 2400 or BIOL 3020, all with a C- or better. Other comparable courses taken at accredited colleges or universities are acceptable. BIOL 4654 must be taken concurrently.

BIOL 4654 BIOCHEMISTRY I LABORATORY (1 credit)

A laboratory course to help integrate the concepts learned in biochemistry lecture with the development of biochemical laboratory skills including experimental design, data analysis, presentation of results and communication of scientific information, with a focus on formal instruction in journal-style writing and notebook skills. There is an emphasis on protein properties, including enzyme activity. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. (Fall) (Cross-listed with BIOL 8654, CHEM 4654, CHEM 8654).

Prerequisite(s): CHEM 2260 and CHEM 2274; and either CHEM 2400 or BIOL 3020, all with a C- or better. BIOL 4650 must be taken concurrently with BIOL 4654. CHEM 4650 must be taken concurrently with CHEM 4654.

Distribution: Writing in the Discipline Sequenced Course

BIOL 4660 BIOCHEMISTRY II (3 credits)

A continuation of the study of the structure and function of biomolecules and biochemical reactions with an emphasis on metabolism of carbohydrates, lipids, amino acids and nucleotides, and the chemistry of signal transduction and genetic information transfer. (Spring) (Cross-listed with BIOL 8666, CHEM 4660, CHEM 8666).

Prerequisite(s): CHEM 4650 and CHEM 4654 or BIOL 4650 and BIOL 4654. BIOL 4664 must be taken concurrently.

BIOL 4664 BIOCHEMISTRY II LABORATORY (1 credit)

A laboratory course to help integrate the concepts learned in Biochemistry II lecture with the development of biochemical laboratory skills, to gain practical experience in experimental design, data analysis, presentation of results and communication of scientific information, with a focus on formal instruction in journal-style writing and notebook skills. There is an emphasis on nucleic acid properties. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. (Spring) (Cross-listed with BIOL 8664, CHEM 4664, CHEM 8664).

Prerequisite(s): CHEM 4650 and CHEM 4654 or BIOL 4650 and BIOL 4654 with a C- or better. BIOL 4660 must be taken concurrently with BIOL 4664. CHEM 4660 must be taken concurrently with CHEM 4664.

Distribution: Writing in the Discipline Sequenced Course

BIOL 4710 TOXICOLOGY (3 credits)

An overview of the fundamentals of toxicology. Concepts include the dose-response relationship, absorption, distribution and excretion of toxicants, and the biotransformation of xenobiotics. Emphasis will be given to metals, pesticides, pharmaceutical compounds, chemical carcinogenesis and endocrine disruption. Usually offered Fall. (Cross-listed with BIOL 8716)

Prerequisite(s): CHEM 2210 or 2260 and BIOL 1750, BIOL 3020 or equivalent.

BIOL 4730 VERTEBRATE ENDOCRINOLOGY (4 credits)

An overview of the fundamentals of vertebrate endocrinology. Concepts include: the mammalian hypothalamus-pituitary system, the endocrinology of mammalian reproduction, the mammalian adrenal glands, endocrine disruption, endocrinology and metabolism. (Cross-listed with BIOL 8736)

Prerequisite(s): CHEM 2250, BIOL 1750, BIOL 3020 or equivalent. Not open to non-degree graduate students.

BIOL 4740 ANIMAL PHYSIOLOGY (3 credits)

An overview of the fundamentals of animal physiology. Concepts include: the physiology of nerve and muscle function, endocrine function, cardiovascular and respiratory function, oxygen and carbon dioxide delivery by the blood, and osmoregulation and excretion. The course is comparative in nature, including examples from humans, mammals, vertebrates and invertebrate animals. Usually offered Spring. (Cross-listed with BIOL 8746).

Prerequisite(s): BIOL 1450, BIOL 1750, and BIOL 2140 or permission of the instructor.

BIOL 4760 GENOME TECHNOLOGY AND ANALYSIS (3 credits)

This course will introduce the latest genome sequencing technologies and their broad applications in biology and medicine. Students will learn how genome sequencing is conducted by different platforms and obtain practical experience of how to use bioinformatics tools for genome analysis. Students are expected to be able to perform sequence analysis efficiently and interpret the results properly. (Cross-listed with BIOL 8766)

Prerequisite(s): BIOL2140 Genetics; or Permission of instructor

BIOL 4780 VERTEBRATE ZOOLOGY (4 credits)

A study of the general biology of the subphylum vertebrata including the morphology, anatomy, physiology and ecology of vertebrate representatives. (Cross-listed with BIOL 8786)

Prerequisite(s): Prerequisites are BIOL 1450, BIOL 1750, and junior-senior.

BIOL 4790 MAMMALOLOGY (4 credits)

The biology of mammals, including their evolution, functional morphology, physiology, ecology, zoogeography, behavior, classification and identification, with emphasis on North American groups. Field trips. Usually offered in alternate years. (Cross-listed with BIOL 8796)

Prerequisite(s): BIOL 1450, BIOL 1750, junior or senior standing. Must enroll in lab.

BIOL 4800 INTERNSHIP IN ENVIRONMENTAL MANAGEMENT AND PLANNING (1-3 credits)

Internship providing practical experience working with environmental organizations or government agencies for students interested in careers in environmental science and related fields. A proposed internship must be approved by the Environmental Studies Program prior to enrolling. Usually offered Fall, Spring, Summer. (Cross-listed with ENVN 4800)

Prerequisite(s): Permission of the Environmental Studies Program.

BIOL 4810 BEHAVIORAL GENETICS (4 credits)

This lecture and laboratory course will explore the interaction between behavior and genetics. Topics addressed will include research systems used in behavioral genetics research, ways of studying animal behavior, gene function, gene expression, genetic manipulation, genome sequencing, and bioinformatics. Research techniques will include behavioral observations, cognition assays, and traditional and cutting edge genetics research techniques and analyses (DNA/RNA isolation, PCR, gel electrophoresis, transgene generation, quantitative PCR, next generation sequencing). Students will design, conduct, analyze, and present semi-independent research projects over the course of the semester. (Cross-listed with NEUR 4810).

Prerequisite(s): BIOL 2140

BIOL 4820 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

An introduction to environmental law and regulations intended for students pursuing careers in environmental sciences or related fields. The course emphasizes the origins, implementation, and enforcement of U.S. state and federal laws and regulations. Major federal environmental laws, covering air and water quality, solid and hazardous waste, pollution prevention and remediation, and natural resources will be discussed. Usually offered Fall semesters. (Cross-listed with ENVN 8826, ENVN 4820, GEOG 4820, GEOG 8826, PA 8826).

Prerequisite(s): Junior-senior or permission of the instructor.

BIOL 4830 DEVELOPMENTAL GENETICS (2 credits)

This course considers experimental approaches in developmental genetics and provides students with first-hand experience in laboratory techniques used in developmental genetics. (Cross-listed with BIOL 8836)

Prerequisite(s): Completion of, or concurrent registration in, BIOL 4850.

BIOL 4840 HERPETOLOGY (4 credits)

The biology of amphibians and reptiles, including their evolution, classification, anatomy, physiology, ecology, distribution and identification, with emphasis on North American groups. Methods for studying herpetiles are examined. Usually offered in Spring semesters of even years. (Cross-listed with BIOL 8846).

Prerequisite(s): Prerequisites are BIOL 1450 and BIOL 1750. Must enroll in lab. Not open to non-degree graduate students.

BIOL 4850 DEVELOPMENTAL BIOLOGY (3 credits)

This course explores principles underlying the development of multicellular organisms, stressing the environmental, genetic, molecular, cellular, tissue, and evolutionary mechanisms of animal development. Usually offered once per year. (Cross-listed with BIOL 8856)

Prerequisite(s): Prerequisites are BIOL 1450, 1750, 2140, 3020, and CHEM 3650 or BIOL 4650 or CHEM 4650 and junior-senior status.

BIOL 4860 COMPARATIVE GENOMICS (3 credits)

This course will introduce fundamental concepts in genomics and genome comparison. Students will learn how genomes are constructed, how they evolve, how individual genomes are unique, and what genomic knowledge means in terms of human health and medicine. (Cross-listed with BIOL 8866)

Prerequisite(s): BIOL2140 Genetics; BIOL3020 Molecular Biology of the Cell; Or Permission of instructor. Not open to nondegree students.

BIOL 4870 MOLECULAR AND CELLULAR NEUROBIOLOGY (3 credits)

This course presents foundational topics in molecular and cellular neurobiology in the context of how the nervous system is functionally organized. Topics include: nervous system cell types and their subcellular organization; electrical properties of neurons and glia; energy metabolism and biochemistry of the brain; intra- and intercellular neuronal signaling; the regulation of gene expression in neuronal cells; synaptic plasticity; and how these are altered in disease. (Cross-listed with BIOL 8876, NEUR 4870, NEUR 8876).

Prerequisite(s): NEUR 1500, or both NEUR 1520 and NEUR 1540, or BIOL 3020, or permission of instructor.

BIOL 4890 GENES, BRAIN, AND BEHAVIOR (3 credits)

This course will evaluate the complex interaction between an organism's genome and neural activity pattern in the nervous system as related to behavior. In this course students will explore how changes in gene expression (allelic variants, epigenetics, differential regulation) and gene networks within neural tissue can reciprocally influence behaviors such as communication, foraging, reproduction, and cognition. (Cross-listed with NEUR 4890, NEUR 8896, BIOL 8896, PSYC 8896).

Prerequisite(s): NEUR 1520, NEUR 1540, and BIOL 2140. Or by permission of instructor. Not open to non-degree graduate students.

BIOL 4940 ENTOMOLOGY (4 credits)

The study of insects; their classification, morphology, physiology, behavior, life histories, ecology and evolution. (Cross-listed with BIOL 8946)

Prerequisite(s): BIOL 1450, BIOL 1750. Junior or Senior standing.

BIOL 4960 ADVANCED GENETICS (3 credits)

An in-depth consideration of topics in genetic analysis. Through reading and discussion of primary and secondary literature in genetics, students will develop a deeper understanding of genetic principles, including mutation, recombination, complementation, gene regulation, the genetic structure of populations and the genetic contributions to complex traits, and how these principles and associated methodologies, including next-generation sequencing and high throughput "omics" approaches, can be used to gain insight into fundamental biological questions. (Cross-listed with BIOL 8966).

Prerequisite(s): BIOL 2140 and BIOL 3020 and concurrent enrollment or completion of either CHEM 3650 or CHEM 4610 or CHEM 4650 or BIOL 4650, or permission of the instructor.

BIOL 4970 ADVANCED BOTANY (4 credits)

Advanced Botany examines plant structures (cells, tissues, and organs) and their connections with plant functions (growth, reproduction, photosynthesis, respiration, and dispersal). Topics covered include energy metabolism, development and morphogenesis, genetics, ecology, and the latest in plant taxonomy and phylogeny, keeping students on the forefront of cutting-edge botanical research. In lab, students conduct activities such as dissecting plant organs, making microscope slides, and conducting plant-based experiments, using plants from the local area, from native Great Plains collections, and from around the world and grown in the greenhouse. Students compare and contrast both physiological and morphological adaptations to varying environments. (Cross-listed with BIOL 8976, ENVN 4970).

Prerequisite(s): BIOL 1750 and junior or senior student status or above or instructor permission.

BIOL 4980 ORNITHOLOGY (4 credits)

An introduction to the general biology of birds, including their anatomy, physiology, behavior, ecology, classification and identification, with emphasis on North American groups. Usually offered in alternate years. (Cross-listed with BIOL 8986)

Prerequisite(s): BIOL 1750.

Distribution: OBIOVRT3 - Tier III Biology Writing Course

Biomechanics (BMCH)

Biomechanics Undergraduate Courses

BMCH 1000 INTRODUCTION TO BIOMECHANICS (3 credits)

This is an introductory course in biomechanics that provides a brief history, an orientation to the profession, and explores the current trends and problems and their implications for the discipline.

Distribution: Social Science General Education course

BMCH 1100 ETHICS OF SCIENTIFIC RESEARCH (3 credits)

This course is a survey of the main ethical issues in scientific research.

Distribution: Humanities and Fine Arts General Education course

BMCH 2200 ANALYTICAL METHODS IN BIOMECHANICS (3 credits)

Through this course, students will learn the fundamentals of programming and problem solving for biomechanics with Matlab and Excel. Students will also learn the attributes and uses of other programming languages.

BMCH 2400 HUMAN PHYSIOLOGY & ANATOMY I (4 credits)

The study of the structure and function of the systems of the body with an emphasis on the skeletal, muscular, cardiovascular and respiratory systems.

Distribution: Natural/Physical Sci General Education lecture&lab

BMCH 2500 HUMAN PHYSIOLOGY AND ANATOMY II (4 credits)

The study of the structure and function of the systems of the body with an emphasis on the nervous system, special senses, digestive system, endocrine system, metabolism and body temperature regulation, lymphatic system, and urinary system.

Prerequisite(s): PE 2400 or BMCH 2400 with a grade of C- or better.

BMCH 3000 BIOMECHANICAL STATICS & DYNAMICS (3 credits)

This course is the study and exploration of the effect of forces on biological systems, mainly the human body, during static and dynamic situations.

Prerequisite(s): PHYS 2110, PHYS 1154

BMCH 4000 BIOMATERIALS (3 credits)

Students will learn the classification, properties, characterization methods, body interactions, applications, and design principles of biomaterials. (Cross-listed with BMCH 8006).

BMCH 4010 WEARABLE MATERIALS FOR BIOMECHANICAL PERFORMANCE I (3 credits)

This course contains lecture and lab components focused on the design and characterization of wearable materials used in biomechanical and biomedical applications for heat management, moisture removal, and respiratory protection. Students will learn the classification, properties, evaluation methods, and design principles of wearable materials. (Cross-listed with BMCH 8016).

Prerequisite(s): BMCH 4000 or BMCH 4670 or Department Permission

BMCH 4100 BIOINSPIRED ROBOTICS (3 credits)

The goal of the course is to involve students in an interdisciplinary vision of biomechanics, biology, engineering and architecture by learning how humans and other animals function in their environment. These design principles from nature can be translated into novel devices, structures, and robots. (Cross-listed with BMCH 8106).

BMCH 4110 3D PRINTING IN HEALTHCARE (3 credits)

A study of basic principles and applications of additive manufacturing (i.e., 3D printing) in healthcare settings. This course will incorporate introductory lectures, practical applications, case studies, and hands-on experiences incorporating basic design techniques and 3D printing. Students will be exposed to various 3D printing techniques and approaches. This course will equip students with knowledge and hands-on experience of basic design techniques and 3D printing. Students will demonstrate, evaluate, and apply technical knowledge about computer aided design and 3D printing. The final project includes a presentation of short grant proposal. (Cross-listed with BMCH 8116).

BMCH 4200 METHODS IN BIOMECHANICS I (3 credits)

In this course students learn about the methods and equipment used in biomechanics as well as the analysis of data collected from those methods. Course experiences include both lecture and lab based learning. (Cross-listed with BMCH 8206).

Prerequisite(s): BMCH 3000, BMCH 2200 with a grade of C- or better or department permission.

BMCH 4210 METHODS IN BIOMECHANICS II (3 credits)

In this course students learn about advanced methods and equipment used in biomechanics, as well as the analysis of data collected from those methods. Course experiences include both lecture and lab based learning. This course builds on the experience gained in BMCH 4200/8206, Methods in Biomechanics I. (Cross-listed with BMCH 8216).

Prerequisite(s): BMCH 4200 with a grade of C- or better or department permission.

BMCH 4630 BIOMECHANICS (3 credits)

A study of the forces that act on a human body and the effects that they produce.

Prerequisite(s): BMCH 2400 [previously PE 2400] or PE 2880 or BIOL 2740 or equivalent, AND PHYS 1110 and PHYS 1154 OR MATH 1950 to be taken concurrently or completed previously with a grade of C- or better.

BMCH 4640 ORTHOPEDIC BIOMECHANICS (3 credits)

Orthopedic Biomechanics focuses on the use of biomechanical principles and scientific methods to address clinical questions that are of particular interest to professionals such as orthopedic surgeons, physical therapists, rehabilitation specialists, and others. (Cross-listed with BMCH 8646).

Prerequisite(s): BMCH 4630 or department permission.

BMCH 4650 NEUROMECHANICS OF HUMAN MOVEMENT (3 credits)

A study of basic principles of neural process as they relate to human voluntary movement. Applications of neural and mechanical principles through observations and assessment of movement, from learning to performance, as well as development. (Cross-listed with NEUR 4650).

Prerequisite(s): BMCH 1000 or PE 2430.

BMCH 4660 CLINICAL IMMERSION FOR RESEARCH AND DESIGN (3 credits)

This course will involve exposure to current clinical practices, identification of unmet clinical needs, and information regarding future career options. In this course, students will be matched with local clinical sites to provide a unique opportunity for innovative and interdisciplinary approaches to problem solving subject to practical constraints. Concepts in clinical rehabilitation, integrated assessments, regulation of medical devices in health care will be covered. This course will review the latest research efforts for rehabilitation in the context of device design and implementation. (Cross-listed with BMCH 8666).

Prerequisite(s): BMCH 4630 or equivalent and Instructor Permission. Not open to non-degree graduate students.

BMCH 4670 INTRODUCTION TO MECHANICS OF BIOMATERIALS (3 credits)

In this course students will learn how to analyze the stresses and strains in different structures under complex loading conditions with extensive examples from biomaterials and materials generally used in the medical device field. (Cross-listed with BMCH 8676).

Prerequisite(s): BMCH 3000 or Department Permission

BMCH 4680 SPORTS BIOMECHANICS (3 credits)

This course is intended to provide students with a foundational knowledge on how to analyze sport movements through biomechanical analytical methods. Students will utilize foundational biomechanical principles and apply them to a variety of sports and associated movements. (Cross-listed with BMCH 8686).

Prerequisite(s): BMCH 4630 or KINS 4100 or Instructor Permission

BMCH 4690 CARDIOVASCULAR BIOMECHANICS (3 credits)

This course will introduce students to cardiovascular biomechanics, emphasizing the integration of analytical and experimental methods to better understand the mechanobiology of tissues. (Cross-listed with BMCH 8696).

Prerequisite(s): BMCH 3000, BMCH 4670, or Department Permission

BMCH 4980 CAPSTONE DESIGN IN BIOMECHANICS I (4 credits)

Teams of senior-level students work with sponsors and faculty advisers to develop solutions to real problems in the biomechanics and health-care related fields.

Prerequisite(s): Department Permission.

BMCH 4990 CAPSTONE DESIGN IN BIOMECHANICS II (4 credits)

Teams of senior-level students work with sponsors and faculty advisers to develop solutions to real problems in the biomechanics and health-care related fields. The Capstone Design II course is intended to further develop and validate the concept direction chosen during Capstone Design I by designing the specific details necessary to build and test a proof-of-concept prototype.

Prerequisite(s): BMCH 4980, or department permission.

Black Studies (BLST)

Black Studies Undergraduate Courses

BLST 1000 INTRODUCTION TO BLACK STUDIES (3 credits)

BLST 1000 provides students with an overview of African culture and history and the black Diaspora. A key component of this course is to interrogate the meanings and dimensions of slavery and colonialism, and their continuing political, social and cultural implications. Approaches essentially include historical examination of African and African American societies and cultures from pre-colonial and slavery periods to the present.

Distribution: Social Science General Education course and U.S. Diversity General Education course

BLST 1050 CLASSICAL AFRICAN CIVILIZATIONS (3 credits)

Classical African Civilization is an introductory survey of the civilizations of Africa and African people prior to 1500 C.E., with emphasis on the evolution of the peoples and nations, their civilizations, and the rise and fall of indigenous states. In particular, this course will cover the classical civilizations of Kemet (Ancient Egypt), Nubia, Axum, Carthage, Ghana, Mali, and Songhay. (Cross-listed with HIST 1050)

Distribution: Global Diversity General Education course

BLST 1950 BLACK WOMEN IN AMERICA (3 credits)

This course will examine how Black women in America have evolved politically, economically, and socially under oppressive conditions of slavery, the Reconstruction Era, Jim Crow, and through the Civil Rights, Black Lives Matter, and "Me Too" Movements. The underlying themes of this course are the impact of gender and race on Black women, with an emphasis of how gender and race are fueled by white supremacy, patriarchy, colonialism, capitalism, and imperialism. (Cross-listed with WGST 1950)

Distribution: U.S. Diversity General Education course

BLST 2100 BLACK AMERICAN CULTURE (3 credits)

The course surveys the cultural forms, expressions, and patterns developed by African Americans, as well as the social contexts of their development. The course will introduce students to the cultural life of African Americans, and how that life has influenced the nature of the community, and its triumphs and tragedies in the larger socio-political context of U.S. American culture.

Distribution: U.S. Diversity General Education course

BLST 2110 CRITICAL ISSUES IN BLACK EDUCATION (3 credits)

Critical Issues in Black Education is an undergraduate course which provides students with foundational knowledge of the historical, legal, social, political, and economic conditions influencing pedagogical and epistemological experiences that impact educational opportunities of Black students.

Distribution: U.S. Diversity General Education course

BLST 2120 HISTORY OF MODERN AFRICA (3 credits)

This course covers the era of the beginning, development and decline of European colonialism in Africa. The movement for decolonization, the emergence of independent sovereign nations and the strategic role that Africa plays in the forum of industrialized and developed nations is investigated. It examines the impact of European cultures and forced labor on traditional Africa, and the struggle for a resolution of the conflict between the three major traditions on the continent - Western and Indigenous. Religious indigenous practices are also considered, along with Christian and Islamic cultures. (Cross-listed with HIST 2920).

BLST 2130 AFRICAN POLITICS (3 credits)

African Politics examines the socio-cultural and economic environments which characterize political life in contemporary Africa. This course examines contemporary African politics and government in post-independence Africa, and the pre-colonial political and economic systems which influence contemporary African politics. The course assesses the various approaches used to study the political development of the African continent; examines the processes, features, and institutions of the African states; addresses key and persistent issues about African politics; and examines dimensions of social change and political reform. (Cross-listed with PSCI 2130).

Distribution: Global Diversity General Education course

BLST 2240 READINGS OF AFRICAN AMERICAN WRITERS (3 credits)

Readings of African American Writers will cover an anthology of writings by African American authors from poetry to novels. This course seeks to improve students' abilities to read critically, to write analytically, and to substantially increase student knowledge of Black literary traditions and authors. Students taking this course will examine more than two centuries of writings by Black authors, from the colonial era to contemporary times, and will learn about the African experience in America through literature.

Prerequisite(s): ENGL 1150 or permission of Instructor

BLST 2260 BLACK SHORT STORY (3 credits)

A study of short stories written by black American authors as literature and as experience. The course explains and defines cultural terms and practices, and attempts to prepare students for multicultural living. (Cross-listed with ENGL 2260.)

Prerequisite(s): ENGL 1150, ENGL 1154, or permission of instructor.

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

BLST 2350 AFRICAN AMERICAN LITERATURE 1746-1939 (3 credits)

This course traces the development of black literature from 1746 to 1939. Included will be a study of multiple genres including: poetry, short story, novel, drama, and nonfiction. Trends to be studied will include early black writers, neoclassic and romantic traditions, and the Harlem Renaissance and Depression era schools of thought. (Cross-listed with ENGL 2350).

Prerequisite(s): ENGL 1160 or permission.

BLST 2360 AFRICAN AMERICAN LITERATURE 1940-PRESENT (3 credits)

This course traces the development of the literary contribution that black Americans have made from 1940 to the present. The course will study multiple genres including: poetry, short story, novel, drama, and nonfiction. Trends to be studied include an evolution in resistance in writing, a movement toward literary assimilation in the 1940s-1950s, and the subsequent movement toward "Black Arts" from the 1960s to the present. (Cross-listed with ENGL 2360).

Prerequisite(s): ENGL 1160 or instructor permission

BLST 2410 AFRICAN AMERICAN HISTORY I: 1619-1865 (3 credits)

The course examines the history of the earliest Africans in the Americas and briefly examines traditional African societies. It covers the transatlantic slave trade and its effects on Europe, Africa and the Americas, and analyzes the development of Afro-American culture and the struggle for freedom. (Cross-listed with HIST 2040)

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

BLST 2420 AFRICAN-AMERICAN HISTORY II: 1865-1954 (3 credits)

A survey of Afro-American history from the Civil War to the present. Covers Reconstruction and its overthrow, including the new methods of control which replaced slavery. Discusses the development of black ideologies and institutions. Traces urban migration and its impact on black society and culture. Follows black progress through World War II, the 1954 Supreme Court Decision, and rising militancy. (Cross-listed with HIST 2050)

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

BLST 2430 AFRICAN AMERICAN HISTORY III: 1954-PRESENT DAY (3 credits)

This course is divided into three main parts: the Civil Rights Phase (1954-1963), during which the dominant mood was optimism over the possibilities of integration; the Black Power Phase (1963-1974), and the Pragmatist Phase (1972-present), characterized by attempts to preserve and maintain gains already won. (Cross-listed with HIST 2060)

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

BLST 2510 MUSIC AND THE BLACK EXPERIENCE (3 credits)

Music and the Black Experience will provide students with historical and cultural knowledge of African Americans in the American music entertainment industry; the cultural influences of West African music traditions in African American music; and the American socio-political experiences that influenced music genres unique to Black people. Students will explore how West African music traditions survived and evolved through American slavery, reconstruction, the Civil Rights era, and into the 21st century; and how Black musical artists challenged racial discrimination in the music industry to create distinct music genres culturally unique to Black people. Overall, students taking this course will gain an understanding of the cultural role of music throughout the Black experience in America, and an appreciation for African American musical artists and composers who influenced all popular American music genres, from Spirituals to Broadway. (Cross-listed with MUS 2510).

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

BLST 2520 HIP HOP MUSIC & AFRICAN AMERICAN URBAN CULTURE (3 credits)

Hip-Hop Music and African American Urban Culture will provide students with a survey of the relationship between African Americans, music, and pop culture. In this course, students will discuss the historical role of African American musicians from the early 1900s that directly influenced contemporary Rap & Hip Hop genres; they will explore the politics of Rap and the links between incarceration and Hip Hop culture; and they will gain an overall understanding of the influence of African American culture on Rap and all other American music genres.

BLST 2540 INTRODUCTION TO EGYPTIAN HIEROGLYPHS (3 credits)

Introduction to Egyptian Hieroglyphics will provide students with fundamental elements of Kemetic (ancient Egyptian) grammar, vocabulary, transliteration, and translation. Egyptian hieroglyphs, classically referred to as the "medu netcher," is the oldest written language on the African continent. Students will embark on an examination of primary texts which reveal important features of classical Egyptian culture and civilization. By studying this ancient African language, students will gain historical knowledge of the ancient cultures of Kemet and other classical Nile Valley civilizations. (Cross-listed with HIST 2540).

BLST 2550 AFRICAN AMERICAN ECONOMICS AND CONSUMERISM (3 credits)

This course traces the evolution of African American business and economic development systems in the U.S. and will examine historical economic and political influences which impact African American business communities. Students will be exposed to various aspects of African American business and economics, including Black entrepreneurship and Black owned businesses before, during, and after slavery; an analysis of the role of Black churches in African-American communities; and the impact of modern economic and political systems on African American business communities. (Cross-listed with ENTR 2550).

Distribution: U.S. Diversity General Education course

BLST 2700 AFRICAN PHILOSOPHY (3 credits)

This course explores ancient, traditional and contemporary philosophical/theological concepts and doctrines of Africans through an investigation of their cosmological, metaphysical, ontological and ethical world views.

BLST 2710 AFRICANA SOCIAL & POLITICAL THOUGHT (3 credits)

Africana Social and Political Thought presents a survey of the basic elements of African-centered theories of knowledge and ways of being across time and throughout the African Diaspora. In this course, students will examine the Africana worldview through a broad multidisciplinary survey of African-centered social and political ideas. Students will critically compare and contrast classical European-centered and African-centered theories, with a focus on the significance of relational difference in understanding Africana worldviews.

BLST 2730 THE BLACK SPIRITUAL EXPERIENCE (3 credits)

The Black Spiritual Experience course examines the trajectory of early African religions and philosophies, and their syncretization with European settler religions in America that have been practiced and embraced by Blacks in the U.S. since slavery. Students will survey the historical development of the Black church in America, and the emergence of liberation and Black theologies to combat white supremacy, oppression, and exploitation. This course will explore the cultural importance of music, dance, and art in worship and Black spiritual expressions; the role of religion and theology in empowering and uplifting African Americans, particularly during the Black Power and Civil Rights movements; the political impact of Black religious institutions in the long fight against systemic racism, racial violence, police brutality, and voter suppression in America; and the challenges of inclusion, equity, and intersectionality within the Black church around issues of gender, class, and sexual orientation. (Cross-listed with RELI 2730).

Distribution: U.S. Diversity General Education course

BLST 3000 SURVEY OF BLACK EDUCATION (3 credits)

History of black education starting from its early origins in Timbuktu, Egypt and Ethiopia through the American black experience. Impact on western civilization. Black colleges and universities: the black scholar and the community. Contributions of black scholars to general knowledge. Myth of black intellectual inferiority. From interest to disenchantment. Role of educational institutions in American society. Proposed models for coping with urban education.

Prerequisite(s): BLST 1000 or permission of instructor.

BLST 3030 GEOGRAPHY OF AFRICA (3 credits)

This course is about the human geography of Africa. It offers an overview of the geography, economics, politics, history, oral and written literature, art, anthropology and sociology of the African continent, with particular focus on sub-Saharan Africa. The course attempts to dispel myths and stereotypes about the African continent and facilitates an understanding of the dynamics that shaped and continue to shape African systems and people. Students taking Geography of Africa will engage in a comprehensive and systematic survey of the environments, natural resources, populations, their cultures, and histories of the geographic regions of Africa and their development. (Cross-listed with GEOG 3030).

Prerequisite(s): Junior Standing or Instructor Permission

BLST 3120 THE AFRICAN AMERICAN EXPERIENCE IN POLITICS (3 credits)

This course will provide a historical and contemporary survey of the African American political experience in the United States, from the passage of the 15th Amendment in the late 1800s, to the 1965 Voting Rights Act, and continuing into the 21st century. Students will examine the evolution of the Black political experience, with emphasis on the fight against enslavement, segregation, lynchings and mass incarceration, and the long struggle of African Americans against institutional and structural racism in the American political system. (Cross-listed with PSCI 3120).

Prerequisite(s): BLST 1000

Distribution: U.S. Diversity General Education course

BLST 3250 RACE, PSYCHOLOGY & CULTURAL DIFFERENCE (3 credits)

Race, Psychology & Cultural Difference is an introductory course that teaches students the psychology behind prejudice, stereotyping, and implicit bias when encountering racial and cultural difference, with particular focus on African Americans. In this course, students will explore concepts of racial and cultural difference, examine fundamental psychological concepts relative to racial and cultural prejudice and stigmas, and discuss cognitive processes of categorization and stereotyping that shape perceptions of racial and cultural difference. Overall, students will explore a conceptual framework for understanding race, psychology, and cultural difference and will learn psychological well-being strategies and approaches for mindfulness, self-regulation, and self-affirmation as challenges to racial and cultural prejudice, stereotyping, and implicit bias. (Cross-listed with PSYC 3250).

Prerequisite(s): Sophomore standing or permission of instructor

BLST 3410 LAW AND THE BLACK COMMUNITY (3 credits)

Law and the Black Community provides an in-depth examination of the racialized American legal process as it pertains to and affects African Americans in the U.S. From the formation of the U.S. Constitution to present day, this course analyzes intersections of race, law, politics and culture, and explores the administration of justice and Black experiences through a critical legal perspective. (Cross-listed with CRCJ 3410, PSCI 3410).

Prerequisite(s): BLST 1000 OR CRCJ 1010 OR Junior standing OR instructor permission.

Distribution: U.S. Diversity General Education course

BLST 3450 AFRICAN ECONOMIC DEVELOPMENT (3 credits)

African Economic Development critically examines historical, political, and socioeconomic forces that have shaped African economies. Students taking this course will learn about the evolution of the modern economic systems, methods of production, distribution and exchange which affect African economies. The course examines the historical impact of colonialism, capitalism, and imperialism on the displacement of ancient trade routes and markets throughout the African continent; the historical impact of these foreign colonial states and tools on the development of contemporary African private sectors, economic institutions, and global competition; and contemporary strategies of economic development, regional cooperation, and international trade, particularly as they affect Sub-Saharan Africa. (Cross-listed with PSCI 3450).

Prerequisite(s): junior standing or permission of instructor

BLST 3510 CULTURAL COMMUNICATION IN AFRICAN-AMERICAN CINEMA (3 credits)

This course examines ways in which cultural identity is communicated through African-American cinema, defined as movies with predominantly African American filmmakers, producers, and/or actors. Cultural communication is integrated with historical, political, and social motivation for African-American cinema. (Cross-listed with CMST 3510)

Prerequisite(s): Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course

BLST 3700 CRITICAL WRITING FOR CULTURAL STUDIES (3 credits)

Critical Writing for Cultural Studies (BLST 3700) is a Writing in the Disciplines (WID) course that prepares undergraduate students, whose fields of interest include any area of humanities and/or social sciences, for the specific writing styles and research methodologies expected in cultural studies disciplines. This preparation includes instruction in resource evaluation, organization strategies, sentence style and vocabulary, documentation styles, and revision strategies.

Prerequisite(s): ENGL 1164 or by permission of the instructor.

Distribution: Writing in the Discipline Single Course

BLST 3970 INTERNSHIP IN BLACK STUDIES (1-3 credits)

A department-supervised project involving part-time employment or service with a community agency, business, non-profit organization, university or other educational unit, or another appropriate organization or setting. Students will gain relevant practical experience and will integrate theory, concepts, and empirical knowledge from their classrooms with their work in the internship setting. Permission of department head and/or Internship Coordinator and completion of an internship project form required.

Prerequisite(s): Completion of BLST 1000, enrollment either as a BLST major or minor or as a BGS concentration in BLST, permission of Department Head and/or Internship Coordinator and completion of an internship project form.

BLST 3980 SPECIAL TOPICS IN BLACK STUDIES (3 credits)

Special Topics in Black Studies will cover courses on a particular or specific topic, not otherwise specifically covered in the courses of the BLST curriculum, using the theoretical and methodological tools of the discipline of Black Studies. The course will trace the historical evolution of that topic from its points of origin into the present, presenting a survey of the Black Studies discipline and research concerning a specific topic. Students will read works about and within the topic area, situating it within its economic, political, and social contexts as they relate to the Black Studies discipline and Africana communities. The content of this course will change periodically. Each time this course is offered it will focus, in detail and in depth, on some aspect of the Black experience, such as language and dialect, historiography and historicity, theology and religion, musicology, literature, etc.

Prerequisite(s): Junior standing or permission of instructor.

BLST 3990 COMMUNITY STUDY PROJECT (3 credits)

The Community Study Project course is designed to teach interdisciplinary students to synthesize, apply, and integrate Black Studies research methods and tools with compatible disciplines and research areas to develop local, community-based research projects. Students taking this course will learn to identify and assess a local community's needs and assets; to collect, analyze, and present data about that community that is both participatory and inclusive of the community; and to identify strengths, limitations, and challenges when conducting research in local, urban communities. Research projects may be individual or in groups and may involve public or private community service organizations.

Prerequisite(s): Junior or senior standing or permission of instructor.

BLST 4030 AFRICANA RELIGIONS (3 credits)

An introduction to religions in Africa and the diaspora, including African Traditional Religions, Christianity, Islam, and Afro-Caribbean religious traditions, using anthropological, historical, and other academic approaches to the study of religious and spiritual traditions. In particular, students will learn about the role of spirits, ancestors, witches, and other invisible agents in ideas and practices regarding health and healing. Finally, the class will examine the complex inter-relationships between religious ideas and practices and contemporary post-colonial political-economic realities, including the consequences of genocide and other human rights violations and the role of religious communities in social and economic development. (Cross-listed with RELI 8036, RELI 4030, BLST 8036).

BLST 4120 BLACK WOMEN LEADERS IN LIBERATION MOVEMENTS (3 credits)

This course studies scholarship on race, gender, and leadership with a specific focus on African and African descended women's roles in liberation movements in the U.S. and worldwide. Especial focus will be on the use of their personal narratives to analyze the wide range of ideas in the conception and execution of leadership. (Cross-listed with WGST 4120, BLST 8126).

Prerequisite(s): Junior standing or permission of instructor.

BLST 4150 AFRICAN AMERICAN PSYCHOLOGY (3 credits)

African American Psychology traces the psychological history of Africans and African Americans from self-attributes and identity, through race and racism, to cognition, learning, and language. This course will review concepts relevant to understanding the psychology of African Americans, methodological and research issues, and best practices. (Cross-listed with BLST 8156, PSYC 4150, PSYC 8156).

Prerequisite(s): BLST 1000 and Junior standing or Instructor permission

Distribution: U.S. Diversity General Education course

BLST 4210 THE HARLEM RENAISSANCE (3 credits)

"The Harlem Renaissance" was the name given to the explosion in cultural, artistic, and social awareness that occurred primarily in Harlem, an area of New York City, between the end of World War I and the middle of the 1930s. This course will familiarize students with the general characteristics of African American literature produced during this period and its relation to African American literature and American literature writ large. The selected texts and writers will provide particular insight into the historical experiences of African Americans in the U.S. primarily between the two world wars and inform the subsequent cultural production of African Americans in later years. (Cross-listed with ENGL 8216, ENGL 4210, BLST 8216).

Prerequisite(s): ENGL 1150 or ENGL 1160, ENGL 2410 recommended

BLST 4220 PAN AFRICANISM & BLACK LIBERATION (3 credits)

The Pan-Africanism and Black Liberation course will expose students to the historical origins and development of Pan-Africanism, and the connection to global Black liberation movements. In this course, students will learn about the origin of Pan-Africanism, including major Pan-African leaders and historical events; the definitions of Pan-Africanism, Black Nationalism, Ethiopianism, and Negritude; and the commonalities and linkages between African continental and diasporic Pan-African liberation movements. Students will critically examine the differences between Pan-Africanism as an ideological, political, and cultural movement, and will explore the evolution of Pan-African ideology and philosophy in the 21st century. (Cross-listed with BLST 8226)

Prerequisite(s): Junior or senior standing or permission of instructor

BLST 4260 WOMEN OF COLOR WRITERS (3 credits)

Women of Color Writers is designed to introduce students to the multicultural, literary experience and contributions of women of color writers. The course will elucidate the multi-ethnic and feminist/womanist perspectives reflected in literary works by examining the themes, motifs and idioms used to portray woman. The course examines critically the implications and conceptual grounds of literary study which have been based almost entirely on male literary experiences. (Cross-listed with BLST 8266)

Prerequisite(s): Black studies major or permission of instructor.

BLST 4350 THE BLACK ATLANTIC (3 credits)

This course examines the cultural and ethnic history of Black people who comprised "The Black Atlantic." The course is organized historically and begins with a brief overview of the European slave trade on the West African Coast in the 15th century. From there, we look critically at the arrival of Africans to the New World, examine varieties of slavery and freedom in the Americas, and conclude with slave revolts and emancipation activism in the 18th and 19th century. We will use the Haitian Revolution (in which Haiti became the first country to be founded by formerly enslaved people) as a special case study, a conduit for our exploration of this socio-cultural, economic, and Diasporic space. (Cross-listed with BLST 8356, HIST 4080, HIST 8086).

Prerequisite(s): Junior or senior standing or permission of instructor

BLST 4470 SOUTH AFRICA & THE SOCIO POLITICS OF APARTHEID (3 credits)

South Africa and the Socio Politics of Apartheid examines the lived experiences of South African people under the Apartheid system, and their long struggle against European colonial oppression and racial segregation throughout the 20th century. Students will examine the laws, tools, and strategies that developed and sustained Apartheid, and the anti-Apartheid movements and international pressure that led to its repeal and South African democratic elections. (Cross-listed with BLST 8476, PSCI 8476, PSCI 4470, SOC 8476, SOC 4470).

Prerequisite(s): Junior standing or permission of instructor

Distribution: Global Diversity General Education course

BLST 4580 COMMUNICATING RACE, ETHNICITY & IDENTITY (3 credits)

This is an undergraduate/graduate course that provides students with definitional and experiential knowledge about the origin of racial concepts, theories, and practices, definitions of ethnicity and identity, and the communicative relationship between race, ethnicity, and identity. (Cross-listed with BLST 8586, CMST 4580, CMST 8586)

Prerequisite(s): CMST 4530 or Junior standing or instructor permission; minimum cumulative GPA of 2.25.

Distribution: U.S. Diversity General Education course

BLST 4590 AFRICAN-AMERICAN POPULAR MUSIC FROM BEBOP TO HIP-HOP (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of African-American popular music literature from c. 1900-present. The objective will be to provide the student with a broad overview with special attention given to musicians and individual works which typify a style or form. Listening assignments will be an integral part of the course, and attendance at live performances will supplement the lectures, discussions and readings. (Cross-listed with BLST 8596).

BLST 4650 SLAVERY AND RACE RELATIONS IN THE AMERICAS (3 credits)

Slavery and Race Relations in the Americas examines the historical relationship between the trans-Atlantic slave trade and American race relations, connecting the enslavement of Africans in the Americas to race relations in the Caribbean, Latin America, and the United States. (Cross-listed with BLST 8656, HIST 4070, HIST 8076, LLS 4650, LLS 8656).

Prerequisite(s): BLST 1000 and junior standing or permission of instructor

Distribution: U.S. Diversity General Education course

BLST 4710 BROWN V. BOARD OF EDUCATION (3 credits)

Brown v. Board of Education traces the educational history of African Americans from segregation to desegregation to re-segregation. This course will review the legal cases before and after the Supreme Court's Brown decision, their aftermath, and the effects on educational policies and practices. (Cross-listed with BLST 8716, PSCI 8136, PSCI 4130).

Prerequisite(s): Junior standing OR senior standing or permission of instructor.

Distribution: U.S. Diversity General Education course

BLST 4750 CRITICAL QUANTITATIVE RESEARCH METHODS (3 credits)

This online undergraduate/graduate course is a comprehensive source for foundational concepts in quantitative behavioral research. The course is designed to expose students to the role and importance of critical quantitative research of marginalized and underrepresented groups. Students will examine and gain definitional and empirical knowledge about conducting culturally relevant quantitative research and will learn both the logic behind and procedures for critical quantitative research, including research ethics, correlational and experimental designs, data collection, sampling, analysis, and reporting. (Cross-listed with BLST 8756).

Prerequisite(s): PSYC 3140 or Junior standing or instructor permission.

BLST 4880 BLACK LEADERSHIP IN AMERICA (3 credits)

Designed as a senior and graduate seminar, Black Leadership in America will examine the meaning and attributes of effective leadership strategies of African Americans, particularly as it relates to Black student leaders. The role of Black leadership will be explored using leadership and community theory, and will highlight the impact of Black culture within the broader American experience. (Cross-listed with BLST 8886).

Prerequisite(s): Senior or graduate student or instructor permission.

BLST 4900 INDEPENDENT STUDY (1-3 credits)

Individualized Study in Black Studies is a course that allows a student to register to conduct research on a particular topic, in conjunction with one or more faculty members in the department of Black Studies, using the theoretical and methodological tools of the discipline. The student will prepare and have approved by their faculty supervisor, an associated project proposal with a timetable for the research. The research deliverables may take the form of a paper, a project, a presentation, or some combination thereof. This course is designed for those students who are capable of pursuing, independently, an area of Black Studies that is not covered under the existing curriculum. The student will be supervised by a faculty member of the BLST department. All course assignments, requirements, and expectations will be clearly indicated in advance.

Prerequisite(s): Must have instructor permission

Business Administration (BSAD)

Business Administration Undergraduate Courses

BSAD 1010 CBA SCHOLARS ACADEMY SEMINAR (0 credits)

This course will provide CBA Scholars Academy students the opportunity to learn about their Gallup Strengths, network with other CBA Scholars and staff, and create strategies for connecting with business professionals.

Prerequisite(s): Limited to students who are first-year freshman members of the College of Business Administration Scholars Academy. Not open to non-degree graduate students.

BSAD 1020 CBA INTERNATIONAL STUDENT SEMINAR (0 credits)

This course will provide CBA International students the opportunity to learn more about U.S. & UNO culture. It will provide academic success skills, networking with other International students & staff & faculty.

Prerequisite(s): Limited to International students in the College of Business Administration.

BSAD 1100 CBA PROFESSIONAL DEVELOPMENT SEMINAR 1 (1 credit)

This course will provide Bachelor of Science in Business Administration (BSBA) students with academic success tools and techniques as well as initial career interest assessments and exploration opportunities.

Prerequisite(s): Bachelor of Science in Business Administration (BSBA) majors at UNO. Not open to non-degree graduate students.

BSAD 1200 CBA PROFESSIONAL DEVELOPMENT SEMINAR 2 (1 credit)

This course will provide knowledge that Bachelor of Science in Business Administration (BSBA) students can use to identify employers that best fit their academic and career goals, to determine their own personal brand, to develop effective resumes and cover letters, and to effectively build and utilize professional networks.

Prerequisite(s): BSBA majors at UNO.

BSAD 2100 PRINCIPLES OF SUSTAINABILITY: IMPACT OF INDIVIDUALS & ORGANIZATIONS ON ECOLOGY, EQUITY & ECONOMICS (3 credits)

This course introduces participants to the principles and practical applications of sustainability from science, engineering, policy, and business perspectives. The course will focus on systems thinking, analyzing the impact of human activities on the triple-bottom-line of People, Planet and Profits. We will examine and debate major environmental issues and trends in modern society from a scientific and practical perspective, including energy and resource use, pollution, climate change, water, and population. Current examples/case studies will be examined and critiqued. The course presents practical skills for participants in the area of integrating sustainability into business practices, consumer decisions, policies, and development.

Prerequisite(s): Admission to the University Honors Program.

Distribution: Social Science General Education course

BSAD 2130 PRINCIPLES OF BUSINESS STATISTICS (3 credits)

An accelerated course covering statistical methods used in business analysis. Topics include descriptive statistics, graphical and tabular methods of data presentation, probability, discrete and continuous distributions, hypothesis testing of means and proportions for single and multiple populations, and regression analysis.

Prerequisite(s): Math 1320 (for students who matriculated at or prior to Summer 2015) or Math 1360 or MATH 1370 or Math 1930 with a 'C'(2.0) or better and at least a 2.3 GPA.

BSAD 2600 ETHICS IN ORGANIZATIONS (3 credits)

This course will cover general ethics challenges, processes, and decision-making in organizations. Participants will learn the value of abiding by high ethical standards and will gain the knowledge necessary to make sound ethical decisions. This course is intended for all majors, and students who are permitted to enroll will receive a scholarship.

Prerequisite(s): ENGL 1150 and ENGL 1160, MATH 1310 or MATH 1220, CMST 1110, and a min GPA of 2.0. Students should contact instructor to apply for the Schumacher Scholarship that accompanies this course. Not open to non-degree graduate students.

Distribution: Social Science General Education course

BSAD 2700 GLOBALIZATION OF BUSINESS ENTERPRISE (3 credits)

This course is for students who are interested in gaining a framework for thinking broadly but systematically about international business and differences across countries.

Distribution: Social Science General Education course and Global Diversity General Education course

BSAD 3160 MANAGERIAL STATISTICS FOR BUSINESS (4 credits)

An accelerated course covering statistical methods used in business analysis. Topics include descriptive statistics, graphical and tabular presentation of data, probability, analysis of discrete and continuous data, regression analysis, forecasting methods.

Prerequisite(s): MATH 1320 or MATH 1370 with a 'C'(2.0) or better, 2.5 GPA.

BSAD 3600 BUSINESS ETHICS (3 credits)

Students will learn about the factors, opportunities and pressures that lead to ethical dilemmas, and will develop their understanding of foundations and processes that encourage and reward ethical decision making and behaviors. Lots of examples, sourced from case studies and current events will be provided. (Cross-listed with MGMT 3600, MKT 3600)

Prerequisite(s): Junior classification (minimum of 58 earned credit hours) with a minimum 2.5 cumulative GPA. Completion of MGMT 3200 or MKT 3200 with a minimum grade of "C" (2.0).

BSAD 4000 INTERNATIONAL BUSINESS STUDY ABROAD (3 credits)

The purpose of this course is to provide students with an international business and cultural experience through a study tour in a selected international location. Students will develop an understanding of the factors that affect international business decisions by visiting American companies operating abroad and foreign companies that export goods and services to the U.S.

Prerequisite(s): Junior standing or permission of the instructor

BSAD 4920 SPECIAL TOPICS IN BUSINESS (3 credits)

This business-focused special topics course is designed to provide students the opportunity to focus on a current or emerging topic in any area of business. An in depth exploration of the topic will be undertaken with the expectation that students will play an active role in the course and engage deeply with the material and concepts addressed within the focal topic area. (Cross-listed with BSAD 8926).

Prerequisite(s): Not open to non-degree graduate students.

Chemical Engineering (CHME)

Chemical Engineering Undergraduate Courses

CHME 1130 INTRODUCTION TO CHEMICAL ENGINEERING I (2 credits)

The profession of chemical engineering. Chemical engineers' impact on today's societal issues, team problem solving, communication skills, and the introduction of chemical process flow sheets. (Has guest lectures and requires field trips.)

Prerequisite(s): Not open to nondegree students

CHME 1140 INTRODUCTION TO CHEMICAL ENGINEERING II (2 credits)

Analytical and computational methods for solving problems related to chemical process measurements, properties of single compounds, properties of mixtures, stoichiometry.

Prerequisite(s): MATH 1950, CHEM 1180, CHEM 1184 (prereq or coreq). Not open to nondegree students.

CHME 2020 MASS & ENERGY BALANCES (3 credits)

Application of the principle of conservation of mass and energy in the analysis of steady-state chemical processes. Selected topics in physical, chemical and thermal property estimation.

Prerequisite(s): CHEM 1190 and CHME 1140 and coreq MATH 1960, not open to nondegree students

CHME 2030 EQUILIBRIUM STAGE OPERATIONS (3 credits)

Phase equilibria and mass and energy balances applied to staged mass transfer operations.

Prerequisite(s): MATH 1960 and CHME 2020 and coreq CIST 1400, not open to nondegree students

CHME 3120 CHEMICAL ENGINEERING COMPUTATION (3 credits)

Computational methods in orthogonal polynomials, numerical integration, matrix operations and ordinary differential equations as they apply to chemical engineering problems such as separations, reactor design, transport operations and control.

Prerequisite(s): Junior standing and CIST 1400 and MATH 2350, not open to nondegree students

CHME 3220 CHEMICAL ENGINEERING THERMODYNAMICS I (3 credits)

Application of three fundamental laws to chemical engineering problems.

Prerequisite(s): CHME 2020 and CSCI 1840.

CHME 3230 CHEMICAL ENGINEERING THERMODYNAMICS II (3 credits)

Application to multicomponent systems: thermodynamics, phase equilibria, chemical reaction equilibria, and process analysis.

Prerequisite(s): CHME 3220, not open to nondegree students

CHME 3320 TRANSPORT OPERATIONS I (3 credits)

Mass, momentum, and energy transport phenomena and their applications in chemical engineering.

Prerequisite(s): MATH 1970 and (CHME 2020, MENG 2000 or MECH 2000), not open to nondegree students

CHME 3330 TRANSPORT OPERATIONS II (3 credits)

Continuation of CHME 3320.

Prerequisite(s): CHME 3320, not open to nondegree students

CHME 4300 CHEMICAL ENGINEERING LAB (4 credits)

Selected experiments in chemical engineering. Emphasis on experimental design, interpretation of results, and formal oral and written reports. (Cross-listed with CHME 8306).

Prerequisite(s): CHME 2030 and CHME 3330 and coreq CHME 4420

CHME 4340 DIFFUSIONAL OPERATIONS (3 credits)

Application of diffusional theory to the design of processing equipment required for absorption, adsorption, leaching, drying, and chemical reactions. (Cross-listed with CHME 8346).

Prerequisite(s): CHME 3330 and CHME 4420 and MATH 3350

CHME 4420 CHEMICAL REACTOR ENGINEERING AND DESIGN (3 credits)

Basic principles of chemical kinetics are coupled with models descriptive of rates of energy and mass transfer for the analysis and design of reactor systems. (Cross-listed with CHME 8426).

Prerequisite(s): CHME 3230

CHME 4890 AIR POLLUTION, ASSESSMENT AND CONTROL (3 credits)

Survey of the present status of the air pollution problem and the application of engineering and scientific principles to its practical and effective coordinated control. (Cross-listed with CHME 8896).

Prerequisite(s): Senior standing

Chemistry (CHEM)

Chemistry Undergraduate Courses

CHEM 1010 CHEMISTRY IN THE ENVIRONMENT AND SOCIETY (3 credits)

An introduction to 1) the environment's impact on each of us, 2) our impacts on the environment, and 3) the chemistry needed to understand it. Is it in your lungs?...in your food?...on your skin? What are the sources of your electricity and why does it matter? Are your choices sustainable? Those and related questions will be addressed as you explore air quality, climate change, fossil fuel combustion (and its alternatives), polymers, medicine, nutrition, and more in the context of their social, political and economic connections. (Fall, spring) Fulfills a University General Education Natural/Physical Science Requirement.

Prerequisite(s): MATH 1220 or MATH 1300 or MATH 1320 or higher with a grade of C- or better or equivalent.

Distribution: Natural/Physical Sci General Education lecture

CHEM 1014 CHEMISTRY IN THE ENVIRONMENT AND SOCIETY LABORATORY (1 credit)

Laboratory for CHEM 1010, a survey of the relationship of chemistry to current problems in environmental control, medicine, technology and energy production. (Fall, Spring)

Prerequisite(s): CHEM 1010 to be taken concurrently or completed previously with grade of C- or better.

Distribution: Natural/Physical Sci General Education lab course

CHEM 1140 FUNDAMENTALS OF COLLEGE CHEMISTRY (4 credits)

A comprehensive introduction to the basic principles of chemistry. This course is intended for all students needing a one-semester introductory course with laboratory including allied health students continuing to CHEM 2210, or those seeking a stronger background before enrollment in CHEM 1180. (Fall, spring, possibly summer). Fulfills a University General Education Natural/Physical Science Requirement.

Prerequisite(s): MATH 1220, MATH 1300, MATH 1320 or equivalent/higher (C- or better) or ACT Math subscore 23+ or ALEKS/Accuplacer score 4+ or SAT Math subscore 540+ or SAT2016 Math subscore 570+.

Distribution: Natural/Physical Sci General Education lecture

CHEM 1144 FUNDAMENTALS OF COLLEGE CHEMISTRY LABORATORY (1 credit)

Laboratory explorations of chemical measurements, modeling, reactions and analyses. To be taken with CHEM 1140. (Fall, spring, possibly summer).

Prerequisite(s): CHEM 1140 concurrent or prior with C- or better.

Distribution: Natural/Physical Sci General Education lab course

CHEM 1170 GENERAL CHEMISTRY I-II (5 credits)

Intended for students with significant backgrounds in chemistry, the course is a combination of CHEM 1180 and CHEM 1190 completed in one semester. This course also includes a lab section. During lecture, the following topics will be covered: introductory quantum theory, electronic structures, bonding theory, gas laws, solution properties and reactions, acid-base theory, ionic equilibria, complexation, oxidation-reduction, thermodynamics and kinetics. The laboratory will include the introduction of basic laboratory skills and scientific experimental design.

Prerequisite(s): MATH 1330 or equivalent in the last two years (C- or better); OR ACT Math subscore of 26 in the last two years; OR ALEKS/Accuplacer score of at least 6 in the last two years; AND AP chemistry exam score 3 or greater; OR instructor permission.

Distribution: Natural/Physical Sci General Education lecture&lab

CHEM 1180 GENERAL CHEMISTRY I (3 credits)

A comprehensive survey of chemical principles; the first course in a two-semester sequence primarily for majors and those in the sciences. It is assumed that students will have a good background in elementary chemical principles. CHEM 1184 normally to be taken concurrently. (Fall, Spring, Summer) Fulfills a University General Education Natural/Physical Science Requirement.

Prerequisite(s): Minimum grade of C- in: MATH 1300; 1320; 1330; 1340; 1930; 1940; 1950; OR Math proficiency via ACT Math Subscore 25+; ALEKS/Accuplacer score 5+; SAT Math Subscore 570+; OR SAT2016 Math Subscore 590+; or CHEM 1140. CHEM 1184 concurrent/prior required.

Distribution: Natural/Physical Sci General Education lecture

CHEM 1184 GENERAL CHEMISTRY I LABORATORY (1 credit)

A laboratory program designed to enhance laboratory skills and illustrate chemical principles. (Fall, Spring, Summer) Fulfills a University General Education Natural/Physical Science requirement.

Prerequisite(s): CHEM 1180 concurrent or prior with a grade of C- or better.

Distribution: Natural/Physical Sci General Education lab course

CHEM 1190 GENERAL CHEMISTRY II (3 credits)

A study of acid-base theory, ionic equilibria, complexation, oxidation-reduction, thermodynamics and kinetics. CHEM 1194 to be taken concurrently. (Fall, Spring, Summer)

Prerequisite(s): Minimum grade of C- in CHEM 1180, CHEM 1184, & MATH 1300; 1320; 1330; 1340; 1930; 1940; 1950 (or approved higher level course) or ACT Math 25+ or SAT Math 570+ or SAT2016 Math 590+ or ALEKS/Accuplacer 5+. Required: CHEM 1194 concurrent

CHEM 1194 GENERAL CHEMISTRY II LABORATORY (1 credit)

A laboratory study of quantitative analysis and solution equilibria. Includes statistics applied to quantitative analysis. (Fall, Spring, Summer)

Prerequisite(s): CHEM 1180 and 1184 with a grade of C- or better or department recommendation of advanced placement. Prereq or coreq: CHEM 1190 (if prereq must be with a grade of C- or better).

CHEM 2210 FUNDAMENTALS OF ORGANIC CHEMISTRY (4 credits)

Chemistry 2210 is a course on basic organic chemistry, a one-semester course designed primarily for students in biology, elementary science education, and allied health fields.

Prerequisite(s): CHEM 1140 and CHEM 1144, or CHEM 1190 and CHEM 1194 with a grade of C- or better in each. CHEM 2214 to be taken concurrently.

CHEM 2214 FUNDAMENTALS OF ORGANIC CHEMISTRY LABORATORY (1 credit)

Elementary organic chemistry laboratory to be taken concurrently with CHEM 2210. This course is for students in biology (non-premed, non-pre-dental tracks), elementary education and allied health majors.

Prerequisite(s): CHEM 1140 and CHEM 1144, or CHEM 1190 and CHEM 1194 with a grade of C- or better in each. CHEM 2210 to be taken concurrently.

CHEM 2250 ORGANIC CHEMISTRY I (3 credits)

The fundamental chemistry of carbon compounds. (Fall, Spring, Summer)

Prerequisite(s): CHEM 1190 and CHEM 1194 with a grade of C- or better. CHEM 1194 may be taken concurrently.

CHEM 2260 ORGANIC CHEMISTRY II (3 credits)

A continuation of the foundational study of the compounds of carbon. (Fall, Spring)

Prerequisite(s): CHEM 2250 with a grade of C- or better. Taking CHEM 2274 concurrently is recommended. Students are encouraged to take CHEM 2260 within 12 months of completing CHEM 2250.

CHEM 2274 ORGANIC CHEMISTRY LABORATORY (2 credits)

A laboratory course in the skills and techniques of experimentation in organic chemistry. (Fall, Spring, Summer)

Prerequisite(s): Minimum grades of C- or better in both CHEM 2250 and CHEM 1194. Students are encouraged to enroll in CHEM 2260 concurrently.

CHEM 2400 QUANTITATIVE ANALYSIS (3 credits)

Theory of quantitative analysis applied to gravimetric and volumetric analysis; theory of error and evaluation of analytical data; introduction to instrumental analysis and separation methods. (Fall)

Prerequisite(s): CHEM 1190 and CHEM 1194 with a grade of C- or better or equivalent. CHEM 2404 to be taken concurrently.

CHEM 2404 QUANTITATIVE ANALYSIS LAB (1 credit)

Laboratory application of principles of quantitative analysis and experience with sample preparations, titrations, and instrumental methods of analysis. Use of reaction chemistry, separations, and spectrophotometry in determinations. Introduction to quality control. (Fall)

Prerequisite(s): CHEM 1190 and CHEM 1194 with a grade of C- or better or equivalent. CHEM 2400 to be taken concurrently.

CHEM 2500 INTRODUCTION TO INORGANIC CHEMISTRY (3 credits)

A survey of the inorganic chemistry of metallic and nonmetallic species, including atomic, molecular and crystal structures, composition, properties and reactivities. (Spring)

Prerequisite(s): CHEM 1190 with a grade of C- or better.

CHEM 2700 CHEMISTRY LEARNING ASSISTANTSHIP (0-1 credits)

This course will provide students with the opportunity to apply knowledge in a particular course while gaining leadership and communication skills in the classroom. As a Learning Assistant (LA), students will help teach and explain chemistry concepts and chemistry problems through small group breakout sessions during lecture and/or by holding weekly study sessions. Students may also monitor attendance and aid in the communication of students whose attendance is decreasing.

Prerequisite(s): Cumulative GPA of 3.0 or above AND a grade of B or above in the specific chemistry course for which students will be a Learning Assistant AND permission from the instructor.

CHEM 2910 APPLIED TOPICS IN CHEMISTRY (1 credit)

More thorough examination of a chemistry topic than in the regular curriculum. Content (e.g., polymers, forensics, brewing and cooking, chemical industry, historical chemistry, art and chemistry, glassblowing) will vary with offering.

Prerequisite(s): Completion of 4 credit hours of university chemistry with grade(s) of C+ or better, or 8 credit hours of chemistry with grades of C or better.

CHEM 2930 APPLIED TOPICS IN CHEMISTRY (3 credits)

More thorough examination of a chemistry topic than in the regular curriculum. Content (e.g. polymers, forensics, brewing and cooking, chemical industry, historical chemistry, art and chemistry, glassblowing) will vary with offering.

Prerequisite(s): Completion 4 credit hours of university chemistry with grade(s) of C+ or better, or 8 CH of chemistry with grades of C or better.

CHEM 2950 INTRODUCTION TO RESEARCH IN CHEMISTRY (1 credit)

This course is intended to give students, possessing at least a high school background in chemistry, the opportunity to work with faculty and/or advanced students on an established research project. The creativity and communication expectations of these students will be less than for students enrolled in the 4000 level research courses. Guided laboratory/library work on an established research project.

Prerequisite(s): Permission of instructor. Not open to non-degree graduate students.

CHEM 3030 ENVIRONMENTAL CHEMISTRY (3 credits)

This course connects fundamental chemical principles to processes observed in the environment. The environmental processes studied may or may not be anthropogenic in nature and will include every environmental domain (air, water, soil/minerals/rocks) and interactions between domains.

Prerequisite(s): CHEM 1180 and CHEM 1184, CHEM 1190 and CHEM 1194, CHEM 2400 and CHEM 2404, or consent of the instructor

CHEM 3210 INTRODUCTION TO MOLECULAR MODELING (3 credits)

The course covers the advantages and limitations of current modeling systems, the criteria for choosing the appropriate modeling system to best solve a given problem and the computer resources needed to conduct the modeling experiments. Following an introduction to the theory behind a variety of modeling systems, students model organic and bioorganic compounds in projects designed to mimic real world applications. (Alternate Spring semesters). (Cross-listed with CHEM 8215).

Prerequisite(s): CHEM 2260 and CHEM 2274 with a grade of C- or better.

CHEM 3350 PHYSICAL CHEMISTRY I (3 credits)

A presentation of selected topics from the laws of thermodynamics, chemical and physical equilibria, phase diagrams, thermodynamics of solutions, electrochemistry and kinetics. (Fall) (Cross-listed with CHEM 8355).

Prerequisite(s): CHEM 2260, CHEM 2274, CHEM 2400, CHEM 2404, PHYS 1120 or PHYS 2120; MATH 1960. (Chemistry courses must be with a grade of C or better). Concurrent enrollment in CHEM 3354.

CHEM 3354 PHYSICAL CHEMISTRY I LABORATORY (1 credit)

Physical chemistry laboratory covering topics in thermodynamics, kinetics and electrochemistry, to be taken concurrently with CHEM 3350/8355.

Instruction and practice in scientific writing is also an emphasis of the course. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. Offered in Fall. (Cross-listed with CHEM 8359)

Prerequisite(s): CHEM 2404, CHEM 2274; Coreq: CHEM 3350.

Distribution: Writing in the Discipline Sequenced Course

CHEM 3360 PHYSICAL CHEMISTRY II (3 credits)

A presentation of selected topics from the areas of quantum mechanics, spectroscopy, kinetics and statistical mechanics. (Cross-listed with CHEM 8365).

Prerequisite(s): CHEM 3350 and CHEM 3354 with a grade of C- or better.

CHEM 3364 PHYSICAL CHEMISTRY II LABORATORY (1 credit)

Physical chemistry laboratory covering topics in quantum mechanics, computational chemistry, spectroscopy, and kinetics, to be taken concurrently with CHEM 3360. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. Offered in Spring. (Cross-listed with CHEM 8369).

Prerequisite(s): CHEM 3350 and 3354 with a grade of C- or better, to be taken concurrently with CHEM 3360.

Distribution: Writing in the Discipline Sequenced Course

CHEM 3424 SPECTROMETRIC CHARACTERIZATIONS (1 credit)

A laboratory course intended to further develop the ability to determine chemical structure from focused spectrometric data especially IR, MS, 1D and 2D (proton and carbon) NMR. Lab time focuses on the spectrochemical data collection and interpretation. (Cross-listed with CHEM 8425).

Prerequisite(s): CHEM 2260, CHEM 2274, CHEM 2400 and CHEM 2404 with a grade of C or better.

CHEM 3514 INORGANIC PREPARATIONS (1 credit)

Laboratory preparation and characterization of representative types of inorganic compounds by various standard and special techniques. (Spring)

Prerequisite(s): CHEM 2274, CHEM 2400, CHEM 2404, CHEM 2500 with a grade of C- or better.

CHEM 3610 PRINCIPLES OF BIOCHEMISTRY FOR THE HEALTH SCIENCES (3 credits)

This course covers the introduction of biochemistry, biomolecules, and metabolism. It is primarily intended for students entering allied health fields.

Prerequisite(s): CHEM 2210 or CHEM 2260 with a C- or better. Not open to non-degree graduate students.

CHEM 3650 FUNDAMENTALS OF BIOCHEMISTRY (3 credits)

A survey of biochemistry emphasizing: cell structure, energy, and water; amino acid and protein structure/function, enzymes, and protein isolation; carbohydrates and carbohydrate metabolism (glycolysis, glycogen metabolism); aerobic metabolism (citric acid cycle and oxidative phosphorylation); lipids, membranes, transport, cholesterol, and lipid metabolism; and nucleic acids. (Fall, Spring)

Prerequisite(s): CHEM 2210 and CHEM 2214 or CHEM 2260 and CHEM 2274 with a grade of C- or better. Other comparable courses taken at accredited colleges or universities are acceptable. CHEM 3654 must be taken concurrently.

CHEM 3654 FUNDAMENTALS OF BIOCHEMISTRY LABORATORY (1 credit)

A laboratory course to help integrate the concepts learned in the fundamentals of biochemistry lecture with the development of biochemical laboratory skills including data analysis. (Fall, Spring)

Prerequisite(s): CHEM 2210 and CHEM 2214 or CHEM 2260 and CHEM 2274 with a grade of C- or better. Other comparable courses taken at accredited colleges or universities are acceptable. CHEM 3650 must be taken concurrently.

CHEM 3710 ESSENTIALS OF MEDICINAL CHEMISTRY (3 credits)

This course is an introduction to human drug discovery, mechanism of action, metabolism, and drug-drug interaction, while demonstrating the interdisciplinary nature of medicinal chemistry. An emphasis is placed on drug design, drug structure, and the relationship of structure to drug action and metabolism. (Spring)

Prerequisite(s): ENGL 1160 and CHEM 2260/CHEM 2274 with a grade of C- or better.

CHEM 3720 CHEMISTRY TEACHING STRATEGIES (3 credits)

A course exploring the pedagogical problems that chemistry teachers face and potential solutions to these problems. The purpose of the course is two-fold. To help with the professional development of chemistry teachers within the context of how people learn. To help students interested in chemical education research develop educational research ideas within the context of how people learn.

Prerequisite(s): CHEM 2250 or CHEM 2400 or by instructor consent.

CHEM 4230 ADVANCED ORGANIC CHEMISTRY - SYNTHESIS (3 credits)

An advanced lecture course in modern theories and organic reactions with application to synthesis. (Alternate Fall semesters) (Cross-listed with CHEM 8236).

Prerequisite(s): CHEM 2260 with a grade of C- or better.

CHEM 4240 ADVANCED ORGANIC CHEMISTRY - MECHANISM (3 credits)

An advanced lecture course in organic chemical reactions. (Cross-listed with CHEM 8246).

Prerequisite(s): CHEM 2260 and CHEM 2400 with a C- or better

CHEM 4244 ADVANCED ORGANIC CHEMISTRY-MOLECULAR MODELING LABORATORY (1 credit)

The use of molecular modeling software as means to predict structure, relative stabilities and reaction thermodynamics are covered in a hands-on environment. The course will survey various modeling methods and show its relevance to organic reactions and mechanisms therein. Students will learn how to use commercial software to obtain/supplement experimental data in a manner suitable for peer-review publication. (Cross-listed with CHEM 8276).

Prerequisite(s): CHEM 2260 and CHEM 2400 with a C- or better

CHEM 4250 ADVANCED ORGANIC CHEMISTRY: MECHANISMS AND MODELING (4 credits)

Presentation of advanced topics in organic chemistry focused on structure, bonding and reaction mechanisms. The use of molecular modeling software as means to predict structure, relative stabilities and reaction thermodynamics are covered in a hands-on environment. The course will survey various modeling methods and show its relevance to molecular orbital theory. The basic methodologies used to explore organic mechanisms are presented and then used to study mechanistic details of various reaction types. Students cannot count both Chem 4250 and Chem 4240 toward their degree. (Cross-listed with CHEM 8256).

Prerequisite(s): CHEM 2260 and CHEM 2274 with a C- or better

CHEM 4310 POLYMER CHEMISTRY (3 credits)

An introduction to the chemical and physical properties of polymers. Emphasis will be on physical properties and structure/property relationships. Topics will include kinetics and synthesis. Students will gain an understanding of the characteristics of polymers and their applications.

Prerequisite(s): CHEM 2260 and CHEM 3350, each with a grade of C- or better, or instructor permission. Not open to non-degree graduate students.

CHEM 4320 NUCLEAR CHEMISTRY (3 credits)

An introduction to nuclear chemistry. Topics will include nuclear structure and changes, applications of nuclear radioactivity including radiometric dating, nuclear power, nuclear weapons, chemical properties of radioactive elements as well as applications in the chemical laboratory, industrial and medical applications.

Prerequisite(s): CHEM 3360 (or CHEM 2500, PHYS 1110 and MATH 1960 as a group). Any of the classes can be taken concurrently.

CHEM 4400 INSTRUMENTAL ANALYSIS (3 credits)

Study of instrumentation for use in chemical analysis and chemistry research. Advanced instrumental methods and data analysis techniques are included. (Cross-listed with CHEM 8406).

Prerequisite(s): CHEM 3350 and CHEM 3354 both with a C- or better; or CHEM 3360 and CHEM 3364 both with a C- or better; or instructor permission. Concurrent enrollment in CHEM 4404.

CHEM 4404 INSTRUMENTAL ANALYSIS LABORATORY (1 credit)

Use of instrumentation in quantitative and trace analysis. Advanced instrumental methods and electronics for instrumentation are included. (Spring) (Cross-listed with CHEM 8409).

Prerequisite(s): CHEM 3360, CHEM 3364, CHEM 3414 with a grade of C or better. Concurrent enrollment in CHEM 4400.

CHEM 4500 ADVANCED INORGANIC CHEMISTRY (3 credits)

The application of bonding models for understanding of the composition, structure, and reactions of inorganic molecules, including organometallic and bioinorganic complexes. (Cross-listed with CHEM 8506).

Prerequisite(s): CHEM 2500 and CHEM 3350 with a grade of C- or better. CHEM 3350 may be taken concurrently.

CHEM 4510 SOLID STATE INORGANIC CHEMISTRY (3 credits)

A study of the structural and electronic basis of materials properties in the solid state. Properties examined include electrical conductivity, ferromagnetism, ferroelectricity, and superconductivity. Some experimental work will be conducted.

Prerequisite(s): CHEM 2500 and CHEM 3350 with a grade of C- or better; or permission of instructor.

CHEM 4540 GEOCHEMISTRY (3 credits)

This course will cover the application of chemical principles to geologic systems. Specific topics covered will include the origin of elements and their distribution in the earth, geochronology, stable isotope systems, aqueous geochemistry and crystal chemistry. These topics will be integrated to the study of soils, igneous, metamorphic and sedimentary rocks and ore deposits. (Every third semester). (Cross-listed with GEOL 4540).

Prerequisite(s): GEOL 1170, MATH 1950, CHEM 1190 and GEOL 2750 or CHEM 2500 (chemistry courses must have a grade of C or better)

CHEM 4610 BIOCHEMISTRY OF METABOLISM (4 credits)

The course covers the structure-function relationships of proteins, carbohydrates, lipids and nucleotides, with an emphasis on the biochemistry of metabolism and molecules of metabolism. It is primarily intended to prepare students for health-related professional schools. (Spring)

Prerequisite(s): CHEM 2260 and CHEM 2274 with a grade of C- or better.

CHEM 4650 BIOCHEMISTRY I (3 credits)

A comprehensive introduction to biochemistry emphasizing: structure-function relationships for proteins, carbohydrates, lipids, and nucleic acids; protein purification; enzyme kinetics and mechanisms; membranes and membrane transport; carbohydrate metabolism including glycolysis, the citric acid cycle and oxidative phosphorylation; and important applications of thermodynamics and the properties of water to living systems. (Fall) (Cross-listed with BIOL 4650, BIOL 8656, CHEM 8656).

Prerequisite(s): CHEM 2260 and CHEM 2274; and either CHEM 2400 or BIOL 3020, all with a C- or better. Other comparable courses taken at accredited colleges or universities are acceptable. CHEM 4654 must be taken concurrently.

CHEM 4654 BIOCHEMISTRY I LABORATORY (1 credit)

A laboratory course to help integrate the concepts learned in biochemistry lecture with the development of biochemical laboratory skills including experimental design, data analysis, presentation of results and communication of scientific information, with a focus on formal instruction in journal-style writing and notebook skills. There is an emphasis on protein properties, including enzyme activity. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. (Fall) (Cross-listed with BIOL 4654, BIOL 8654, CHEM 8654).

Prerequisite(s): CHEM 2260 and CHEM 2274; and either CHEM 2400 or BIOL 3020, all with a C- or better. BIOL 4650 must be taken concurrently with BIOL 4654. CHEM 4650 must be taken concurrently with CHEM 4654.

Distribution: Writing in the Discipline Sequenced Course

CHEM 4660 BIOCHEMISTRY II (3 credits)

A continuation of the study of the structure and function of biomolecules and biochemical reactions with an emphasis on metabolism of carbohydrates, lipids, amino acids and nucleotides, and the chemistry of signal transduction and genetic information transfer. (Spring) (Cross-listed with BIOL 4660, BIOL 8666, CHEM 8666).

Prerequisite(s): CHEM 4650 and CHEM 4654 or BIOL 4650 and BIOL 4654. CHEM 4664 must be taken concurrently (Chemistry courses must have a grade of C- or better)

CHEM 4664 BIOCHEMISTRY II LABORATORY (1 credit)

A laboratory course to help integrate the concepts learned in Biochemistry II lecture with the development of biochemical laboratory skills, to gain practical experience in experimental design, data analysis, presentation of results and communication of scientific information, with a focus on formal instruction in journal-style writing and notebook skills. There is an emphasis on nucleic acid properties. Fulfills the third writing course requirement for students majoring in chemistry when NSCI 3940 and another approved laboratory course have been completed with a C- or better. (Spring) (Cross-listed with BIOL 4664, BIOL 8664, CHEM 8664).

Prerequisite(s): CHEM 4650 and CHEM 4654 or BIOL 4650 and BIOL 4654 with a C- or better. BIOL 4660 must be taken concurrently with BIOL 4664. CHEM 4660 must be taken concurrently with CHEM 4664.

Distribution: Writing in the Discipline Sequenced Course

CHEM 4670 PROTEIN PURIFICATION AND CHARACTERIZATION (2 credits)

This course is a study of protein biochemistry, protein purification techniques, and characterization strategies with an emphasis on chromatography and crystallography. The course has a significant laboratory component. (Cross-listed with CHEM 8676).

CHEM 4810 CHEMISTRY INTERNSHIP (1-6 credits)

Application of chemical skills in a non-academic laboratory or workplace through part-time employment or contracted work.

Prerequisite(s): CHEM 2260, CHEM 2274, CHEM 2400, CHEM 2404 with a grade of C- or better and permission of department chair.

CHEM 4900 SENIOR ASSESSMENT IN CHEMISTRY (0 credits)

The zero-credit hour course is used by the Chemistry Department to assess the chemical understanding and knowledge of graduating seniors. Students are required to take the assessment in the semester in which they intend to graduate. The assessment is scored for purposes of departmental program assessment but not graded.

Prerequisite(s): Student must register for the course in the semester in which they intend to graduate. Not open to non-degree graduate students.

CHEM 4920 SEMINAR IN CHEMISTRY (1 credit)

The purpose of this course is to give chemistry students the opportunity to learn more about research design and the research being done both within the chemistry department at UNO and at other universities across the country. The course will also help chemistry students learn about research opportunities in graduate schools and industry by interacting with speakers from various sub-disciplines of chemistry.

Prerequisite(s): No specific registration requirements. Generally, sophomore standing.

CHEM 4930 SPECIAL TOPICS IN CHEMISTRY (1-3 credits)

Selected special topics in chemistry. (Cross-listed with CHEM 8936).

Prerequisite(s): CHEM 2260, CHEM 2400 with a grade of C or better.

Some topics will require more advanced prerequisites and will be accepted for advanced course work in chemistry.

CHEM 4950 CHEMISTRY PROJECTS (1 credit)

Initiation of an independent student research project, and communication of the results.

Prerequisite(s): Depends on the project. Generally, junior standing.

CHEM 4960 CHEMISTRY PROBLEMS (1-3 credits)

Independent student research and communication of results. (Cross-listed with CHEM 8966).

Prerequisite(s): CHEM 4950 with a grade of C or better and permission of instructor.

Chinese (CHIN)

Chinese Undergraduate Courses

CHIN 1110 ELEMENTARY MANDARIN CHINESE I (5 credits)

Elementary Mandarin Chinese I emphasizes the mastery of all four language skills: speaking, listening, reading, and writing, as well as introduces cultural issues from the Chinese speaking world.

CHIN 1120 ELEMENTARY MANDARIN CHINESE II (5 credits)

Elementary Mandarin Chinese II emphasizes the mastery of all four language skills: speaking, listening, reading, and writing, and also introduces cultural issues from the Chinese speaking world.

Prerequisite(s): CHIN 1110 or CHIN 1000.

Civil Engineering (CIVE)

Civil Engineering Undergraduate Courses

CIVE 101 INTRODUCTION TO CIVIL ENGINEERING (3 credits)

Introduction to engineering design process through hands-on projects supported by instruction of underlying engineering science and fundamentals, model development, and the required tools. Exploration of civil engineering disciplines and introduction to civil engineering profession with focus on ethics and professional skills.

CIVE 102 GEOMATICS FOR CIVIL ENGINEERING (3 credits)

Introduction to the theory and application of measurements and geospatial data for civil engineering. This includes error theory, measurements of elevation, distance, direction, and location using optical, mechanical, electronic, and global navigation satellite systems, and applications in geographic information systems (GIS). Project based.

Prerequisite(s): CIVE 101 or CIVE 131

CIVE 112 OVERVIEW OF CIVIL ENGINEERING (1 credit)

Overview of civil engineering as a career by use of case studies; alternate approaches to engineering designs illustrated by use of engineering principles.

Prerequisite(s): Prerequisites: Permission of the instructor

CIVE 131 CIVIL ENGINEERING GRAPHICS (2 credits)

Use of computer-aided design software to communicate engineering ideas. Specifications, dimensioning, tolerancing, 2- and 3-D model development, topographic mapping, and process layout with environmental, bioprocess, and biomedical emphases.

Prerequisite(s): Permission of the instructor

CIVE 201 CIVIL ENGINEERING ANALYSIS I (2 credits)

Incorporating programming logic into spreadsheet solutions in the context of authentic civil engineering projects; emphasis on integrating professional skills, data analysis and management, and technical skills. Project based.

Prerequisite(s): CIST 1600 (grade of C or better)

CIVE 202 CIVIL ENGINEERING ANALYSIS II (2 credits)

Expanding programming logic to data analysis & visualization, solution of linear systems of equations, and ordinary differential equations. Control of sensors and visualization of scientific data. Use of authentic civil engineering projects linking engineering mechanics and materials of construction. Emphasis on integrating professional skills, data analysis, and technical skills. Project based.

Prerequisite(s): Prerequisite: CIST 1600 or equivalent; Corequisite: CIVE 378

CIVE 301 CIVIL ENGINEERING SYNTHESIS I (1 credit)

Explores the co-disciplinary connections in civil engineering through authentic engineering projects; focus on synergies among fluid dynamics, transportation, and structures; emphasis on integrating professional skills, data analysis, and technical skills. Project based.

Prerequisite(s): Corequisite: CIVE 310 or CIVE 361 or CIVE 341

CIVE 302 CIVIL ENGINEERING SYNTHESIS II (1 credit)

Explores the co-disciplinary connections in civil engineering through authentic engineering projects; focus on synergies among geotechnical engineering, water resources, and environmental engineering; emphasis on integrating professional skills, data analysis, and technical skills. Project based.

Prerequisite(s): Corequisite: CIVE 331 or CIVE 351 or CIVE 321

CIVE 310 FLUID MECHANICS (3 credits)

Fluid statics, equations of continuity, momentum, and energy; dimensional analysis and dynamic similitude. Applications to: flow meters; fluid pumps and turbines; viscous flow and lubrication; flow in closed conduits and open channels. Two-dimensional potential flow.

Prerequisite(s): MATH 2350 (grade of C or better) and MECH 223 (grade of C or better)

CIVE 310L HYDRAULICS LAB (1 credit)

Hydraulic experiments and demonstrations. Velocity, pressure and flow measurements; pipe flow, open channel flow; hydraulic structures and machinery, hydrologic and sediment measurement and student projects.

Prerequisite(s): CIVE 310 pre-requisite/co-requisite

CIVE 321 PRINCIPLES OF ENVIRONMENTAL ENGINEERING (3 credits)

Introduction to the principles of environmental engineering, including water quality, atmospheric quality, pollution prevention, and solid and hazardous wastes engineering. Design of water, air, and waste management systems.

Prerequisite(s): MATH 1960 (grade of C or better), and CHEM 1180 (grade of C or better) and CHEM 1184, or CHEM 1190 (grade of C or better) and CHEM 1194

CIVE 321L ENVIRONMENTAL ENGINEERING LABORATORY (1 credit)

Environmental engineering experiments, demonstrations, field trips, and projects. Experiments include the measurement and determination of environmental quality parameters such as solids, dissolved oxygen, biochemical and chemical oxygen demand, and alkalinity.

Prerequisite(s): Pre or Coreq: CIVE 321.

CIVE 331 INTRODUCTION TO GEOTECHNICAL ENGINEERING (4 credits)

Soil composition, structure and phase relationships; soil classification. Principles of effective stress; loading induced subsurface stresses; load history; deformation and failure of soils. Elastic and limit analysis with applications to design for bearing capacity, settlement, retaining walls and slope stability. Steady state seepage.

Prerequisite(s): MECH 325 (grade of C or better); Pre or Coreq: CIVE 310.

CIVE 341 STRUCTURAL ANALYSIS FUNDAMENTALS (3 credits)

Introduction to the analysis of structural systems. Analyses of determinate and indeterminate trusses, beams, and frames.

Prerequisite(s): MECH 325 (C or better)

CIVE 342 STRUCTURAL DESIGN FUNDAMENTALS (1 credit)

Introduction to structural engineering design philosophy, steel and concrete design criteria, and procedures for trusses, simple beams, continuous beams, and frames. Introduction to structural experiments and software used in structural analysis and design.

Prerequisite(s): MECH 325 (C or better)

CIVE 351 INTRODUCTION TO WATER RESOURCES ENGINEERING (3 credits)

Introduction to water resources engineering design and planning, surface hydrology, groundwater hydraulics, reservoirs and other control structures. Introduction to field measurement and computational methods in water resources.

Prerequisite(s): CIVE 310

CIVE 361 PRINCIPLES OF TRANSPORTATION ENGINEERING (3 credits)

Introduction to the principles of transportation engineering including operator, user and vehicle characteristics, transportation facility design, traffic operations and control, and transportation planning.

Prerequisite(s): MECH 223 (C or better)

CIVE 371 MATERIALS OF CONSTRUCTION (3 credits)

Introduction to the behavior, testing and design of soil, portland cement concrete, steel, wood and composites. Experiments covering the concepts of stress and strain under axial, torsional, shear and flexural loading conditions. Common ASTM laboratory test procedures and specifications, field quality control tests and statistical applications.

Prerequisite(s): Prerequisite: MECH 223 (grade of C or better); Corequisite: MECH 325

CIVE 385 PROFESSIONAL PRACTICE AND MANAGEMENT IN CIVIL ENGINEERING (3 credits)

Basic elements of civil engineering practice. Roles of all participants in the process-owners, designers, architects, contractors, and suppliers. Basic concepts in business management, public policy, leadership, and professional licensure. Professional relations, civic responsibilities, and ethical obligations for engineering practice. Project management, contracts, allocation of resources, project estimating, planning, and controls.

Prerequisite(s): Junior standing and CIVE major. Not open to non-degree graduate students.

CIVE 395 CIVIL & ENVIRONMENTAL ENGINEERING INTERNSHIP EDUCATIONAL EXPERIENCE (1 credit)

Practical on-the-job experience to apply classroom theory in the civil & environmental engineering field.

Prerequisite(s): CIVE or ENVE major and permission of the Civil & Environmental Engineering curriculum chair

CIVE 401 CIVIL ENGINEERING DESIGN I (3 credits)

The first of two courses in the capstone sequence. Practical application of the engineering design process in a team project focused on an authentic and comprehensive civil engineering design project.

Prerequisite(s): CIVE 321, CIVE 331, CIVE 341, CIVE 351, and CIVE 361

CIVE 402 CIVIL ENGINEERING DESIGN II (3 credits)

The second of two courses in the capstone sequence. Practical application of the engineering design process in a team project focused on an authentic and comprehensive civil engineering design project.

Prerequisite(s): CIVE 401

CIVE 419 FLOW SYSTEMS DESIGN (3 credits)

Application of hydraulic principles to the design of water distribution systems, wastewater and stormwater collection systems, channelized flow systems and treatment facilities. (Cross-listed with CIVE 819)

Prerequisite(s): CIVE 321; Corequisite: CIVE 351

CIVE 420 ENVIRONMENTAL ENGINEERING PROCESS DESIGN (3 credits)

Design of unit operations and processes associated with drinking water and wastewater treatment facilities, and other environmental treatment systems.

Prerequisite(s): CIVE 321 and CIVE 310

CIVE 422 POLLUTION PREVENTION: PRINCIPLES AND PRACTICES (3 credits)

Introduction to pollution prevention (P2) and waste minimization methods. Practical applications to small businesses and industries. Legislative and historical development of P2 systems analysis, waste estimation, P2 methods, P2 economics, and sources of P2 information. (Cross-listed with CIVE 822).

Prerequisite(s): Permission

CIVE 424 SOLID WASTE MANAGEMENT ENGINEERING (3 credits)

Planning design and operation of solid and waste collection processing, treatment, and disposal systems including materials, resources and energy recovery systems. (Cross-listed with CIVE 824).

Prerequisite(s): CIVE 321

CIVE 425 DESIGN OF WATER TREATMENT FACILITIES (3 credits)

Analyses of water supplies and design of water treatment and distribution systems. (Cross-listed with CIVE 825).

Prerequisite(s): CIVE 420

CIVE 427 DESIGN OF WASTEWATER TREATMENT AND DISPOSAL FACILITIES (3 credits)

Analysis of systems for wastewater treatment and disposal. (Cross-listed with CIVE 827).

Prerequisite(s): CIVE 420

CIVE 430 FUNDAMENTALS OF WATER QUALITY MODELING (3 credits)

Comprehensive study of water quality and the effects of various water pollutants on the aquatic environment; modeling of water quality variables. (Cross-listed with CIVE 830).

Prerequisite(s): CIVE 321

CIVE 434 SOIL MECHANICS II (3 credits)

Application of the effective stress principle to shear strength of cohesive soils; analysis of stability of slopes. Development of continuum relationships for soils; solutions for stresses and displacements for an elastic continuum. Solution of the consolidation equation for various initial and boundary conditions.

Prerequisite(s): CIVE 334

CIVE 436 FOUNDATION ENGINEERING (3 credits)

Subsoil exploration and interpretation; selection of foundation systems; determination of allowable bearing capacity and settlement; design of deep foundations; pile driving analysis; control of groundwater.

Prerequisite(s): CIVE 331

CIVE 440 REINFORCED CONCRETE DESIGN I (3 credits)

Introduction to the design concepts of reinforced concrete building components. The design of flexural and compression members, simple walls, foundations, and floor systems using the latest American Concrete Institute (ACI) design requirements.

Prerequisite(s): CIVE 341

CIVE 441 STEEL DESIGN I (3 credits)

Introduction to the design concepts for structural steel building components. Design of tension members, bolted and welded connections, column members, and beam members. Limit states design concepts used throughout, and emphasis on behavior of members and code design procedures.

Prerequisite(s): CIVE 341

CIVE 443 ADVANCED STRUCTURAL ANALYSIS (3 credits)

Matrix analysis methods and computer solutions for indeterminate structures. Additional topics: static condensation, shear deformations, and non-prismatic members in matrix-based analyses, moment distribution method, load cases and load combinations for buildings and bridges, and influence lines and analysis for moving loads. (Cross-listed with CIVE 843)

Prerequisite(s): CIVE 341. Not open to non-degree graduate students.

CIVE 444 STRUCTURAL DESIGN AND PLANNING (3 credits)

Principles of design of steel and reinforced concrete structural building systems, planning of building vertical and horizontal load resisting systems, and bridge systems. Several design projects involve indeterminate analysis and design concepts for both steel and reinforced concrete. (Cross-listed with CIVE 844).

Prerequisite(s): CIVE 440 and CIVE 441

CIVE 446 STEEL DESIGN II (3 credits)

A continuation of the topics covered in CIVE 441. The principles and procedures used in design of steel buildings, design of plate girders, design and analysis of building systems, design and analysis of composite steel-concrete building systems, innovative building systems, and introduction to seismic design of steel buildings. Plate buckling, beam, column, and beam-column design, and frame stability. Introduction to connection design.

Prerequisite(s): CIVE 441

CIVE 447 REINFORCED CONCRETE II (3 credits)

Shear friction theory, strut-and-tie modeling, anchorage, deflection, slender and bi-axially loaded members, torsion, two-way action and punching shear, and footing design. Excel spreadsheets are developed and used for various design tasks. (Continuation of topics covered in CIVE 440/CIVE 840.) (Cross-listed with CIVE 847).

Prerequisite(s): CIVE 440 or CIVE 840

CIVE 448 RELIABILITY OF STRUCTURES (3 credits)

Fundamental concepts related to structural reliability, safety measures, load models, resistance models, system reliability, optimum safety levels, and optimization of design codes.

Prerequisite(s): CIVE 341.

CIVE 451 INTRODUCTION TO FINITE ELEMENT ANALYSIS (3 credits)

Matrix methods of analysis. The finite element stiffness method. Computer programs. Applications to structures and soils. Introduction to finite element analysis of fluid flow. (Cross-listed with CIVE 851)

CIVE 452 WATER RESOURCES DEVELOPMENT (3 credits)

Theory and application of systems engineering with emphasis on optimization and simulation techniques for evaluating alternatives in water resources developments related to water supply, flood control, hydroelectric power, drainage, water quality, water distribution, irrigation and water measurement. (Cross-listed with CIVE 852).

Prerequisite(s): CIVE 351

CIVE 454 HYDRAULIC ENGINEERING (3 credits)

Fundamentals of hydraulics with applications of mechanics of solids, mechanics of fluids, and engineering economics to the design of hydraulic structures. Continuity, momentum, and energy principles are applied to special problems from various branches of hydraulic engineering. (Cross-listed with CIVE 854).

Prerequisite(s): CIVE 351

CIVE 455 NONPOINT SOURCE POLLUTION CONTROL ENGINEERING (3 credits)

Identification, characterization, and assessment of nonpoint source pollutants; transport mechanisms and remediation technologies; design methodologies and case studies. (Cross-listed with CIVE 855).

Prerequisite(s): CIVE 326 and CIVE 352

CIVE 456 SURFACE WATER HYDROLOGY (3 credits)

Stochastic analysis of hydrological data and processes including rainfall, runoff, infiltration, temperature, solar radiation, wind, and non-point pollution. Space-time hydrologic modeling with emphasis on the application of techniques in the design of engineering projects. (Cross-listed with CIVE 856).

Prerequisite(s): CIVE 351

CIVE 458 GROUNDWATER ENGINEERING (3 credits)

Application of engineering principles to the movement of groundwater. Analysis and design of wells, well fields, and artificial recharge. Analysis of pollutant movement. (Cross-listed with CIVE 858).

Prerequisite(s): CIVE 351

CIVE 461 URBAN TRANSPORTATION PLANNING (3 credits)

Development of urban transportation planning objectives and goals. Data collection procedures, land use and travel forecasting techniques, trip generation, trip distribution, modal choice analysis, and traffic assignment. Site development and traffic impact analysis. (Cross-listed with CIVE 861).

Prerequisite(s): CIVE 361

CIVE 462 HIGHWAY DESIGN (3 credits)

Design of roadways, intersections, interchanges, parking facilities, and land development site access and circulation. Emphasis on design projects. (Cross-listed with CIVE862)

Prerequisite(s): CIVE361

CIVE 463 TRAFFIC ENGINEERING (3 credits)

Design of signalized intersections, arterial street and network signal systems, and freeway control systems. Emphasis on design projects. (Cross-listed with CIVE863)

Prerequisite(s): CIVE361

CIVE 468 AIRPORT PLANNING AND DESIGN (3 credits)

Planning and design of general aviation and air-carrier airports. Land-side components include vehicle ground access systems, vehicle circulation parking and terminal buildings. Air-side components include aircraft apron-gate area, taxi-way system, runway system and air traffic control facilities and airspace. Emphasis on design projects. (Cross-listed with CIVE868)

Prerequisite(s): CIVE 361

CIVE 471 BITUMINOUS MATERIALS AND MIXTURES (3 credits)

Understanding of the physical, chemical, geometrical, and mechanical characteristics and practical applications of bituminous materials and mixtures. Fundamental mechanics for elastic and inelastic materials and basic theories associated with mechanical data analyses and designs. Recent advances and significant research outcomes for further discussions. Applications of theories to laboratory and field testing. (Cross-listed with CIVE 871)

Prerequisite(s): CIVE 371. Not open to non-degree graduate students.

CIVE 472 PAVEMENT DESIGN AND EVALUATION (3 credits)

Thickness design of flexible and rigid pavement systems for highways and airports; design of paving materials; evaluation and strengthening of existing pavements. (Cross-listed with CIVE 872).

Prerequisite(s): CIVE 334

CIVE 475 WATER QUALITY STRATEGY (3 credits)

Holistic approach to the selection and analysis of planning strategies for protecting water quality from nonpoint sources of contamination. Introduction to the use of methods of analyzing the impact of strategies on whole systems and subsystems for selecting strategies; and for evaluating present strategies.

Prerequisite(s): Senior standing

CIVE 476 CONSTRUCTION COST CONTROLS (3 credits)

Development of cost accounting principles and financial controls appropriate for construction contractors. Includes purchasing policies and procedure, labor and equipment cost reporting techniques, accounting procedures for control of materials and supplies, billing methods, principles of financial reporting and analysis.

Prerequisite(s): ACCT 2010 and ACCT 2020.

CIVE 481 COMPUTATIONAL PROBLEM SOLVING IN CIVIL ENGINEERING (3 credits)

Introduction of numerical methods to solve problems in civil engineering, including finding roots of equations, solving linear algebra equations, optimization, curve fitting, numerical differentiation and integration, and finite difference method. Computational methods in numerical integration, matrix operations and ordinary differential equations as they apply to civil engineering problems. (Cross-listed with CIVE 881)

Prerequisite(s): MATH 2350; CIST 1600. Not open to non-degree graduate students.

CIVE 489 SENIOR DESIGN PROJECT (3 credits)

Requires the formulation and completion of a civil engineering design project. Course provides senior civil engineering students with the opportunity to apply engineering concepts and principles to a comprehensive design project of multiple sub-disciplinary nature. The principal objectives are for students to develop an understanding of the entire life-cycle of civil engineering projects with emphasis on the development of a unified and sustainable design that addresses the client's needs; project team work; strong engineer-client relationships; and effective project communications.

Prerequisite(s): Senior standing and CIVE 385

CIVE 491 SPECIAL TOPICS IN CIVIL ENGINEERING (1-6 credits)

Special topics in emerging areas of civil engineering which may not be covered in other courses in the civil engineering curriculum.

CIVE 494 INDEPENDENT STUDY IN CIVIL ENGINEERING (1-3 credits)

Individual study at the undergraduate level in a selected area of civil engineering under the supervision and guidance of a Civil & Environmental Engineering faculty member.

CIVE 498 INDEPENDENT RESEARCH IN CIVIL ENGINEERING (1-6 credits)

Independent research work and written findings in a selected area of civil engineering under the supervision and guidance of a Civil & Environmental Engineering faculty member.

Prerequisite(s): Permission

College of Information Science & Technology (CIST)

College of Information Science & Technology Undergraduate Courses

CIST 1010 LEARN AND EARN: COLLEGE AND CAREER SUCCESS (1 credit)

This course provides students the opportunity to identify their learning strengths and weaknesses along with academic strategies to support their success in traditional and online courses. Students will have opportunities to practice effective communication, problem solving, critical thinking, team work and career planning, with an emphasis on key elements of information technology professions. Students will gain skills and experience in establishing a personal brand, networking, and developing a professional career portfolio.

Prerequisite(s): Students may count only one of CIST 1010, US 1010, or US 1020 toward undergraduate degree requirements. Not open to non-degree graduate students.

CIST 1300 INTRODUCTION TO WEB DEVELOPMENT (3 credits)

This course covers the basics of web development with a focus on creating mobile-friendly websites. Students will learn HTML and CSS, the fundamental languages used to create web pages, and gain hands-on experience building responsive layouts and designing user interfaces. Additionally, the course covers best practices for mobile web development, including creating mobile-first designs and optimizing websites for different devices and screen sizes.

Prerequisite(s): High school algebra or equivalent

CIST 1400 INTRODUCTION TO COMPUTER SCIENCE I (3 credits)

This course is an introduction to computer science within the context of a high-level programming language. Students will be introduced to fundamental programming concepts and program design with the goal of solving computational problems. This course has a required laboratory component.

Prerequisite(s): MATH 1300, MATH 1320, or MATH 1370 (may be taken concurrently) and one of CIST 1300, CSCI 1200, or CSCI 1280 with a grade of C- or better.

CIST 1510 CULTURE AND HISTORY OF VIDEO GAMES (3 credits)

This course is an overview of the history of video gaming; its evolution, genres, and how games and gaming relate to their audience and the world in which we live. Topics include Project Management, HCI, GUI Design, Pattern Language(s), game design, console evolution, gaming/industry milestones, gaming cultures and subcultures, and the profound impact gaming has had on life in the modern world.

Prerequisite(s): Not open to non-degree graduate students.

CIST 1600 INTRODUCTION TO PROGRAMMING USING PRACTICAL SCRIPTING (3 credits)

Practical scripting is an introductory course using a script programming language. The course covers fundamental programming concepts and program design such as data types, condition and control statements, and managing program complexity. The focus of the course is on practical applications of programming in other academic areas, such as automation of tasks, and data visualization.

Prerequisite(s): Not intended for students who have completed CIST 1400 and CSCI 1620

CIST 2010 IS&T PROFESSIONAL DEVELOPMENT SEMINAR (2 credits)

This course provides students with strategies for developing and attaining personal and professional goals. Topics include learning how to synthesize career information using skills developed in the class such as self-awareness, professional communication, critical thinking, and self-advocacy. Students will engage in experiential learning and activities to facilitate the development of the career readiness competencies identified by the National Association of Colleges & Employers, which include critical thinking, oral/written communications, collaboration, digital technology, leadership, professionalism, career management, and global/intercultural fluency. The skills students learn in this class promote lifelong learning and career development.

Prerequisite(s): Not open to non-degree graduate students.

CIST 2100 ORGANIZATIONS, APPLICATIONS AND TECHNOLOGY (3 credits)

This survey course provides an introduction to organizations and the role information and information systems play in supporting operations, decision-making, processes, quality management, and strategic activities of an organization. In addition, the course covers management of the IS function, strategic and regulatory issues of telecommunications, and ethical and legal issues.

Prerequisite(s): Sophomore standing, or permission of the instructor.

Distribution: Social Science General Education course

CIST 2500 INTRODUCTION TO APPLIED STATISTICS FOR IS&T (3 credits)

The course emphasizes the function of statistics in information science and technology including topics such as descriptive statistical measures, probability discrete probability, sampling, estimation analysis, hypothesis testing, regression, and analysis of variance. A well-known computer package will be used to support the problem-solving process.

Prerequisite(s): MATH 1220 or permission of an instructor

CIST 3000 ADVANCED COMPOSITION FOR IS&T (3 credits)

Advanced Composition for IS&T provides students with instruction and practice in academic writing for the technical sciences. The course focuses on principles of rhetoric and composition, advanced library-based research techniques, academic modes of writing suited to the technical sciences, style, grammar, and punctuation, all with attention to adapting writing to suit the needs of various academic and professional audiences.

Prerequisite(s): ENGL 1160 (or placement in a 3rd year writing course) and junior standing, or permission of the instructor. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

CIST 3110 INFORMATION TECHNOLOGY ETHICS (3 credits)

The course will cover the development and need for issues regarding privacy and the application of computer ethics to information technology.

Prerequisite(s): ENGL 1150 or placement in a second or third-year writing class, and sophomore standing

Distribution: Humanities and Fine Arts General Education course

CIST 4540 COMPUTER SECURITY MANAGEMENT (3 credits)

The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CYBR 4540, CYBR 8546, ISQA 8546)

Prerequisite(s): CYBR 4360 or permission of the instructor.

CIST 4910 SYSTEMS DEVELOPMENT IN OPEN SOURCE COMMUNITIES (3 credits)

This course will expose students to systems development in open source communities. The course will engage existing open source communities in the advancement of open source code, tooling, processes, and methodologies.

Prerequisite(s): CIST 1400, CIST 2100, and CSCI 1620

Communication Disorders (CDIS)

Communication Disorders Undergraduate Courses

CDIS 1400 INTRODUCTION TO COMMUNICATION DISORDERS (3 credits)

This course is designed to introduce the candidate to the fields of speech-language pathology, audiology, and education of the deaf/hard of hearing. The course is an overview of normal development of speech, language, and hearing, and the disorders of human communication in children and adults.

Distribution: U.S. Diversity General Education course and Social Science General Education course

CDIS 2380 ANATOMY AND PHYSIOLOGY OF THE SPEECH MECHANISM (3 credits)

This course introduces candidates to the field of speech science. It examines the anatomy and physiology of the human communication process. The mechanisms of respiration, phonation, resonance, speech articulation, and basic neurology will be explored from the biological standpoint.

Prerequisite(s): Minimum 3.0 GPA

CDIS 2420 EARLY LANGUAGE DEVELOPMENT IN CHILDREN (3 credits)

This course is designed to introduce the candidate to the typical development of language in young children. Theories of development and the major developmental processes, which occur during the early childhood years, will be presented.

Prerequisite(s): Overall GPA of 3.0.

CDIS 2550 CULTURAL COMPETENCE IN SERVICE DELIVERY (3 credits)

The purpose of this course is to study the impact of cultural and linguistic diversity on communication, learning, and behavior. The contrast between what is considered typical language development and in the presence of culturally and linguistically diverse populations.

Prerequisite(s): Minimum GPA of 3.0

CDIS 3200 WRITING FOR THE PROFESSION OF SPEECH-LANGUAGE PATHOLOGY (3 credits)

This course provides candidates with instruction and practice in professional and scientific writing in the area of communication disorders. The focus is on principles of composition and modes of writing suited to scientific and clinical demands. Participants will learn to adapt writing for the needs of various academic and professional audiences including the ethical implications. Professional and evidence-based writing are essential functions for dedicated practitioners, reflective scholars and responsible citizens working in school, medical, and university settings.

Prerequisite(s): A minimum of 3.0 cumulative GPA

Distribution: Writing in the Discipline Single Course

CDIS 3330 AURAL REHABILITATION (3 credits)

This course examines the processes and procedures in determining the aural rehabilitation needs of individuals with hearing loss (children through adult) and developing effective intervention programs.

Prerequisite(s): GPA 3.0 or higher, or permission by the instructor for D/HH majors

CDIS 3370 BASIC AUDIOLOGY (3 credits)

The purposes of Basic Audiology are twofold: first, to acquaint the student with fundamental knowledge in the area of audiology so that he or she will be able to understand and to discuss basic hearing testing with an audiologist and to be able to read and understand written reports of audiological testing. The second purpose is to provide a broad theoretical background in audition, acoustics, sound and its measurement, hearing loss, and pathologies of the auditory system. This theoretical background will prepare the student for the more advanced concepts and clinical work that form the core of the graduate courses of Audiology.

Prerequisite(s): Minimum 3.0 GPA

CDIS 3390 HEARING SCIENCE (3 credits)

This course is designed for undergraduate majors in communication disorders. This course is designed to introduce the student to a detailed insight and coverage of basic principles of hearing science, relating to theory anatomy, acoustics, and physiology. To facilitate a working knowledge of acoustics, so that students may describe, integrate, and demonstrate understanding for clinical application.

Prerequisite(s): Minimum GPA of 3.0

CDIS 3430 ARTICULATION AND PHONOLOGICAL DISORDERS (3 credits)

The purpose of the course is to introduce candidates to the study of the disorders of articulation and of phonological patterns. The course will include the study of normal phonological development and typical acquisition of speech sounds in addition to the study of phonological simplification patterns and disordered articulation. This course will prepare pre-service speech-language pathology students as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. Functional and organic parameters will be discussed including etiology, characteristics, assessment tools and techniques, therapeutic intervention, and service delivery models. The availability and effects of technology tools in the areas of assessment and intervention will be discussed. The role of the speech language pathologist in addressing cultural, professional, and ethical issues will be included.

Prerequisite(s): Minimum 3.00 GPA; CDIS 3450. This course is designed for undergraduate students majoring in communication sciences and disorders.

CDIS 3450 PHONETICS (3 credits)

The course covers basic theories of phonetics and experience in the application and use of the IPA. It also addresses the use of phonetics in the assessment process. Candidates learn about one aspect of their career that will lead to their becoming dedicated professionals, reflective scholars, and responsible citizens.

Prerequisite(s): Minimum GPA of 3.0

CDIS 3460 SCHOOL AGE LANGUAGE DEVELOPMENT (3 credits)

This course is designed to introduce the student to the normal development of speech and language in children beyond five years of age. Theories of development and the major developmental processes which occur during school age and adolescent years will be presented. The relationship of language to academic performance and learning processes will be included.

Prerequisite(s): Minimum GPA of 3.0, successful completion of CDIS 2420 (early language development)

CDIS 4470 NEUROPHYSIOLOGY OF SPEECH AND LANGUAGE (3 credits)

The purpose of this course is to provide speech-language pathology undergraduate students an introduction to human neuroanatomy and neurophysiology of the speech, language and hearing mechanisms, across the lifespan. Emphasis is placed on developing an understanding of the neurophysiological underpinnings of human communication and its disorders.

Prerequisite(s): A minimum GPA of 3.0 and CDIS 2380 or equivalency. Not open to non-degree graduate students.

CDIS 4480 RESEARCH METHODS IN COMMUNICATION DISORDERS (3 credits)

This course will provide candidates with an introductory set of skills to interpret and evaluate research in communication disorders and closely related fields. In addition, this course will provide candidates with basic knowledge regarding research designs and analyses commonly used in communication disorders and related fields. The content addressed in this course will prepare candidates to judiciously evaluate evidence-based practice and apply the scientific method to clinical decision-making. It offers an opportunity to cultivate critical thinking skills imperative to becoming dedicated practitioners, reflective scholars, and responsible citizens who can adeptly meet the ever-evolving challenges of their profession.

Prerequisite(s): This course is designed for graduate and undergraduate students majoring in communication sciences and disorders. A minimum 3.0 GPA is required.

CDIS 4490 INTRODUCTION TO PROFESSIONAL PRACTICES (3 credits)

This course is designed to precede the candidates' first practicum experiences. Candidates will learn about issues affecting their roles and responsibilities as speech-language pathologists. Information about state and national certification, licensure and professional organizations, professional ethics, philosophical bases and professional practice patterns regarding the assessment process in speech-language pathology, and counseling parents in prevention of speech/language disorders is central to the course. Candidates will develop an understanding of how cultural/ethnic diversity affects the assessment process and learn how to identify speech/language differences vs. disorders.

Prerequisite(s): 3.0 GPA. Not open to non-degree graduate students.

CDIS 4500 PRINCIPLES OF ASSESSMENT AND INTERVENTION (3 credits)

The purpose of the course is to examine the various aspects of the profession of speech-language pathology as related to scope of practice, prescriptive methodology, models of assessment and service delivery and the selection and use of clinically-oriented technology and materials. Accountability (documentation, data collection, report writing, and service plans), multi/inter-disciplinary team membership, case selection and referral processes will also be examined. This course will provide the students with the knowledge and skills to implement appropriate assessment procedures and create an effective learning environment for each individual client.

Prerequisite(s): Min of 3.0 GPA, CDIS 4490

CDIS 4510 BASIC CLINICAL PRACTICUM IN SPEECH-LANGUAGE PATHOLOGY (3 credits)

This course is the entry level clinical course for undergraduate candidates majoring in Speech-Language Pathology. Candidates are offered their first opportunity to apply theoretical knowledge in a hands-on clinical experience under the direct supervision of licensed and certified speech-language pathologists.

Prerequisite(s): SPED 4490/CDIS 4490, overall 3.0 GPA in major, Senior standing, Speech-Language Pathology Major, Permission from program faculty. Not open to non-degree graduate students.

CDIS 4750 INTRODUCTION TO CHILDHOOD LANGUAGE DISORDERS (3 credits)

This course is designed to introduce the candidate to the theory and clinical practices related to assessment and management of language disorders in children and adolescents. It will cover specific strategies for identifying language disorders and evidence-based approaches to the management of language disorders, including data collection strategies and methods of evaluating efficacy of intervention.

Prerequisite(s): CDIS 2420 and CDIS 4460; 3.0 GPA. Not open to non-degree graduate students.

Communication Studies (CMST)

Communication Studies Undergraduate Courses

CMST 1110 PUBLIC SPEAKING FUNDS (3 credits)

Public Speaking Fundamentals helps students become effective public speakers, as well as critical listeners and evaluators of public communication. Students will learn the principles of audience adaptation, topic selection, organization, development of ideas and presentation of speeches. Each student will design and present a minimum of four public speeches.

Distribution: Fundamental Academic Skills-Public Speaking

CMST 1310 PERSPECTIVES IN COMMUNICATION STUDIES (3 credits)

This course surveys concepts in the dynamic field of speech communication. Students will examine how communication practices shape our worldviews and our relationships in both private and public contexts. This course emphasizes concepts including, but not limited to: a) interpersonal relationships, b) organizational communication & employee relations, c) public & political communication, d) communication technology & human relationships, e) culture & communication, f) health communication, g) communication training & instructional development and h) conflict resolution. Students will also have the opportunity to be informed about possible careers in speech communication.

Distribution: Social Science General Education course

CMST 1400 EXPLORING COMMUNICATION STUDIES (3 credits)

This course is an introduction to the field of Communication Studies. Students will learn the history of the discipline, the fundamental concepts, forms, and terms of the discipline, as well as the research methodologies often used by communication scholars. Various topics and areas of inquiry within the field (with specific focus on the areas offered and available to the students in the School of Communication) are discussed to set up students for success by developing a plan of study around their interests. Related careers will be included.

CMST 2010 INTERPERSONAL COMMUNICATION (3 credits)

This course is an introduction to the study of interpersonal communication. Within this course, students will be introduced to the theories, research, and concepts relevant to interpersonal communication and will be given opportunities to develop and enhance their own communication skills.

Distribution: Social Science General Education course

CMST 2100 INTRODUCTION TO COMMUNICATION THEORY (3 credits)

Communication Theory is an undergraduate course designed to introduce students to the major foundational theories that inform the field of communication. Special emphasis is placed on communication theories that examine the self, the message, relationship development, groups and organizations, the public and the media, as well as culture and diversity. Skills learned in this course are necessary foundations for the upper-level communication courses as well as the Communication Studies capstone course.

CMST 2120 ARGUMENTATION AND DEBATE (3 credits)

Theory and practice of effective argumentation and debate. Students will participate in a variety of speaking activities involving the application of argumentation principles to current political and social issues.

Distribution: Fundamental Academic Skills-Public Speaking

CMST 2300 INTERGROUP DIALOGUE (3 credits)

The increasing diversity in the US presents a growing need for communication skills one can apply whenever we work with, learn with, and relate to those with different social identities than our own. This course is designed to provide students with experiences and skills necessary to engage in open and constructive dialogue across social identity groups. The course incorporates content learning, structured interaction, peer facilitation, and self-reflection to support students as they explore issues of intergroup relations, conflict, and community.

Distribution: U.S. Diversity General Education course

CMST 2410 SMALL GROUP COMMUNICATION AND LEADERSHIP (3 credits)

This course is an introduction to the theory and practice of communication and leadership within small group settings. This course will provide students with broad knowledge about small group communication processes.

Distribution: Social Science General Education course

CMST 3130 SPEECH COMMUNICATION IN BUSINESS AND THE PROFESSIONS (3 credits)

This course is designed to introduce students to the important and varied role communication plays in the workplace and other professional settings. The course emphasizes informative and persuasive communication principles and practices in one-to-many presentational situations as well as group communication and interviewing.

Prerequisite(s): CMST 1110 or CMST 2120. Not open to non-degree graduate students.

CMST 3140 CONTEMPORARY PRESENTATIONS (3 credits)

This course helps students craft messages for an audience through assignments representing contemporary public address. Responsible public address emphasizes creating messages that encourage democratic deliberation through artful presentation of truth. Students will investigate practical aspects of public communication theory, engage in audience analysis, and explore language choices to develop their ability to responsibly practice public communication.

Prerequisite(s): CMST 1110 or CMST 2120

CMST 3150 INTERCOLLEGIATE FORENSICS I (1-3 credits)

This course familiarizes students to Intercollegiate Forensics. Students enrolled in this course will compete in a variety of speaking and performance events to develop their skills in prepared public speaking, oral interpretation of literature, and extemporaneous/improvised speaking. Students are required to compete in 1-3 speaking events during the semester.

Prerequisite(s): Permission of the Director of Forensics only

CMST 3160 INTERCOLLEGIATE FORENSICS II (1-3 credits)

This course is catered to communication, pre-law, and other interested students who desire to further their participation in intercollegiate forensics including informative, persuasive, impromptu, extemporaneous, and after-dinner speaking. This course advances students' skills in oral interpretation, solo and or duet acting, rhetorical criticism, and discussion.

Prerequisite(s): Permission of the Director of Forensics only

CMST 3300 LEADERSHIP FOR INTERGROUP DIALOGUE (3 credits)

This class instructs, coaches, supports, and empowers student-leaders to effectively facilitate important intergroup dialogues with their peers. Students are given leadership opportunities developing skills regarding facilitating difficult conversations, perspective sharing, and navigating conflict.

Prerequisite(s): CMST 2300 and permission of instructor. Not open to non-degree graduate students.

CMST 3340 RHETORICAL CRITICISM (3 credits)

Developing critical and analytical skills is vital to succeed in contemporary culture. In this course students will learn a variety of theoretical and critical approaches to rhetorical criticism enabling them to critically analyze the messages that surround us. This course offers students the tools to analyze the ways rhetoric undergirds or undermines existing power structures, and how it might reshape them.

Prerequisite(s): CMST 2100 or permission of instructor. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

CMST 3350 COMMUNICATION RESEARCH (3 credits)

Research is important to understand communication, messages, audiences, behaviors, and motivations. This course develops students' abilities to conduct communication research focusing on two overarching methodological approaches used by communication scholars and industry professionals - Quantitative and Qualitative. The topics include research design, data management, statistical analysis, and report writing.

Prerequisite(s): CMST 2100 or instructor permission. Not open to non-degree graduate students.

CMST 3510 CULTURAL COMMUNICATION IN AFRICAN-AMERICAN CINEMA (3 credits)

This course examines ways in which cultural identity is communicated through African-American cinema, defined as movies with predominantly African American filmmakers, producers, and/or actors. Cultural communication is integrated with historical, political, and social motivation for African-American cinema. (Cross-listed with BLST 3510)

Prerequisite(s): Sophomore standing and a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course

CMST 3520 INTERVIEWING (3 credits)

This course is a practical course that focuses on various types of interview performances. The course will explore interview types such as probing/journalistic, survey, recruiting/employment, performance, counseling, and persuasive

CMST 3530 INTERCULTURAL COMMUNICATION & POWER (3 credits)

The objective of this course is to examine the interplay of communication, power, and culture. In this class, culture is described as the normative standard of behavior espoused by members based on group's identity, values, attitudes, and beliefs. Power dynamics are explored for their impact on relations between dominant and non-dominant subcultures in the U.S. context. This curriculum demonstrates the role of communication for effective relations within and between cultures. By the end of this course students will be able to recognize, articulate, and actuate effective practices in cultural competency.

Prerequisite(s): Pre-req CMST 2100, CMST 2300, or permission of instructor

Distribution: U.S. Diversity General Education course

CMST 3600 SPECIAL TOPICS IN COMMUNICATION STUDIES (3 credits)

A variable topic course in communication studies at the Junior level. Topics to be covered may include but are not limited to: marital and family communication, instructional communication, organizational communication, intercultural communication, conflict, relational communication, communication competence, health communication, communication research or theory, communication and gender, social movements, political communication, listening, communication and the aged, etc. (May be repeated for credit as long as the topic is not the same.)

Prerequisite(s): CMST 2100, co or pre req CMST 3350 or CMST 3340, or permission of instructor

CMST 3750 GENDER AND COMMUNICATION (3 credits)

This course provides a survey of literature on communication about, by, and between women, men, and trans people in society, personal relationships, and organizations. Students develop an understanding of how cultural meanings of gender both shape and are shaped by communication. (Cross-listed with WGST 3750).

Prerequisite(s): Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course

CMST 4120 COMMUNICATION AND SOCIAL PROTEST (3 credits)

This class will examine the role played by communication in movements for social change in contemporary society. We will examine social movements which rely on speeches (i.e. women's rights movements), social movements which rely on the grassroots political efforts of their members (i.e. the environmental rights movement) and the overall strategies of persuasion utilized in movements which seek social change, including emerging communication technologies.

Prerequisite(s): Pre or co-req CMST 3340, or permission of instructor

CMST 4130 FAMILY COMMUNICATION (3 credits)

This course emphasizes the role of communication in family relationships. Theories, models, and research methods will be used to examine the family in various cultures and contexts (e.g., nuclear families, single-parent families, and blended families). Topics that will be covered in this course include: family conflict, family roles, family stories, family stress, family well-being, genograms, marriage, and divorce. (Cross-listed with CMST 8136)

Prerequisite(s): Pre or co-req CMST 3350, or permission of instructor. Not open to non-degree graduate students.

CMST 4140 COMMUNICATION AND HUMAN RELATIONSHIPS (3 credits)

This course applies theories of interpersonal processes and communication principles to the study of close, significant and personal human relationships. Discussion focuses on the communication in different types of relationships and relational stages, e.g., strangers, acquaintances, friendships and intimates.

Prerequisite(s): Pre or co req CMST 3350, or permission of instructor. Not open to non-degree graduate students.

CMST 4150 ORGANIZATIONAL TRAINING AND DEVELOPMENT (3 credits)

This course introduces students to the process of designing communication training programs and workshops for a variety of professional settings. It provides students, especially those who are prospective trainers and/or consultants, with experiential and cognitive knowledge about needs assessment, adult learning, communication training research, objectives writing, module design, interactive delivery methods and program evaluation. (Cross-listed with COMM 8156)

Prerequisite(s): Junior or Senior Standing, or permission of instructor. Not open to non-degree graduate students.

CMST 4160 COMMUNICATION FOR INSTRUCTIONAL SETTINGS (3 credits)

This course is designed to help prospective instructors and/or trainers understand and apply the principles of communication in instructional settings (i.e., classrooms, workshops, training programs). It introduces students to the research area in the speech communication discipline called 'Instructional Communication' by covering these five units:

1) Communication Strategies, Objectives, & Content; 2) Student Communication Needs & Expectations; 3) Feedback, Reinforcement, & Discussion; 4) Context, Climate, & Influence; and 5) Teacher Communicator Style, Characteristics, & Behaviors. (Cross-listed with COMM 8166)

Prerequisite(s): Junior or Senior Standing, or permission of instructor

CMST 4170 ORGANIZATIONAL COMMUNICATION (3 credits)

This course will help students understand organizational communication theories, models, and processes; apply these principles in organizational communication speaking exercises; and learn management and leadership skills. (Cross-listed with CMST 8176)

Prerequisite(s): Junior standing; and a minimum cumulative GPA of 2.25. Not open to non-degree graduate students.

CMST 4180 COMMUNICATION LEADERSHIP AND POWER AND ORGANIZATIONS (3 credits)

This course provides theoretical and experiential knowledge about such topics as communication leadership styles and tactics, superior and subordinate interactions, power, ethical responsibilities, and diversity gender issues related to communication leadership. (Cross-listed with COMM 8186)

Prerequisite(s): Junior or Senior Standing, or permission of instructor. Not open to non-degree graduate students.

CMST 4190 COMPUTER-MEDIATED COMMUNICATION (3 credits)

Computer-Mediated Communication addressing emerging issues of virtual communities, identity, civic life and participation, online relationships, collaborative work environments, digital networks, gender race class issues, legal and ethical considerations of technology, and commodification of mediated communication. (Cross-listed with CMST 8196).

CMST 4220 HEALTH COMMUNICATION (3 credits)

This course introduces students to the interdisciplinary field of health communication. In this course, students will learn various theories of health communication as well as current research and trends in health communication and its related fields. To speak to the complexity and dynamism of health communication, this course will expose students to the multiple voices and perspectives involved in the delivery of health and healthcare.

Prerequisite(s): Junior or Senior Standing, or permission of instructor. Not open to non-degree graduate students.

CMST 4300 RISK AND CRISIS COMMUNICATION (3 credits)

Risk/Crisis Communication, both as a discipline and a practice, has been discussed and enacted as long as there has been information to communicate because of an extraordinary event. Governments, businesses, universities, even individuals - all of engaged in one form of risk or crisis communication or another. Whether successful in its intentions or not, the act is there. This class is a theoretically-driven course to inform our practices as both creators of messages and critics of those same messages. (Cross-listed with JMC 4300).

Prerequisite(s): CMST 3350 OR Permission of Instructor.

CMST 4510 PERSUASION AND SOCIAL INFLUENCE (3 credits)

The primary goal of this course is to provide students with a solid grounding in theories, principles, and strategies of persuasion social influence as they apply to everyday contexts in which influence attempts take place. Students should gain familiarity with findings from empirical investigations on persuasion, social influence, and compliance gaining, and will learn about strategies and techniques of persuasion relating. (Cross-listed with COMM 8516)

Prerequisite(s): Junior or Senior Standing, or permission of instructor. Not open to non-degree graduate students.

CMST 4570 INTERCULTURAL COMMUNICATION IN THE GLOBAL WORKPLACE (3 credits)

This course examines the intercultural perspective of organizational communication in a modern global world by focusing on the management of cultural differences in the global workplace. The trend towards a global economy is bringing people of different ethnic and cultural background together. Thus, the development of greater intercultural understanding has become an essential element of global workplace. After taking this course you will be more aware of cultural diversity in an organizational setting and further develop intercultural sensitivity and intercultural competence that will help you adapt to your future organizational life. (Cross-listed with COMM 8576).

Prerequisite(s): CMST 3340 and CMST 3350 or permission of instructor

Distribution: Global Diversity General Education course

CMST 4580 COMMUNICATING RACE, ETHNICITY & IDENTITY (3 credits)

This is an undergraduate/graduate course that provides students with definitional and experiential knowledge about the origin of racial concepts, theories, and practices, definitions of ethnicity and identity, and the communicative relationship between race, ethnicity, and identity. (Cross-listed with CMST 8586, BLST 4580, BLST 8586)

Prerequisite(s): CMST 4530 or Junior standing or instructor permission; minimum cumulative GPA of 2.25.

Distribution: U.S. Diversity General Education course

CMST 4700 INTERPERSONAL CONFLICT (3 credits)

This course provides an overview of interpersonal conflict processes. It examines perspectives on conflict, patterns of constructive and destructive conflict, conflict styles and tactics, interpersonal power, negotiation strategies, conflict assessment, and conflict skill development. (Cross-listed with COMM 8706)

Prerequisite(s): Junior or Senior standing, or permission of instructor

CMST 4800 CONFLICT MEDIATION (3 credits)

This course develops knowledge of mediation theory, research, and practice and communication skills essential to the effective mediation of disputes in various contexts.

Prerequisite(s): CMST 2010 or CMST 2410 or CMST 2300 or CMST4700, or permission of instructor

CMST 4940 COMMUNICATION STUDIES CAPSTONE SEMINAR (3 credits)

Communication Studies Capstone Seminar is an undergraduate course designed to provide students with the opportunity to integrate the knowledge and skills they have acquired as communication majors and to prepare them to enter the job market or graduate school using their speech communication skills and knowledge.

Prerequisite(s): CMST 2300, CMST 3340 and CMST 3350 or permission of instructor

CMST 4970 INTERNSHIP EXPERIENCE (1-3 credits)

This course will provide students professional communication-related experience in an internship approved and supervised by the School of Communication. 3 credits = 150 hours at site. 2 credits = 100 hours at site. 1 credit = 50 hours at site. Additional coursework completed online will develop career competencies including resume, cover letter, portfolio, and interviewing skills.

Prerequisite(s): Sophomore standing; instructor permission; and minimum cumulative GPA of 3.0.

CMST 4980 INDEPENDENT STUDY COMMUNICATION (3 credits)

Specialized studies in communication supplementing regular courses: readings, research, tutorial.

Prerequisite(s): CMST 2300, CMST 3340 and CMST 3350 and permission of department

Computer Science (CSCI)

Computer Science Undergraduate Courses

CSCI 1200 COMPUTER SCIENCE PRINCIPLES (3 credits)

This course introduces students to the foundational principles of computer science. It aims to help students learn the essential thought processes used by computer scientists to solve problems, expressing those solutions as computer programs. The exercises and projects make use of mobile devices and other emerging platforms.

Prerequisite(s): High school algebra or equivalent.

Distribution: Natural/Physical Sci General Education lecture

CSCI 1204 COMPUTER SCIENCE PRINCIPLES LABORATORY (1 credit)

This is a laboratory course for students enrolled in CSCI 1200. It consists of programming exercises designed to help students practice computational thinking and apply computational solutions to practical problems. The exercises make use of mobile devices and other emerging platforms.

Prerequisite(s): CSCI 1200, prior or concurrent.

Distribution: Natural/Physical Sci General Education lab course

CSCI 1280 INTRODUCTION TO COMPUTATIONAL SCIENCE (3 credits)

Introduction to Computational Science explores the role of computer science in scientific inquiry. Through the construction and analysis of block-based visual artifacts (e.g., pixel art and geometric patterns), this course aims to help students learn the essential thought processes used by computer scientists to solve problems, expressing those solutions as computer programs. When executed, these computer programs produce visual artifacts that can be displayed and interacted with using a variety of tools/software including LEGO Digital Designer, Minecraft, LDraw, 3D Builder, and Virtual Reality systems such as the HTC Vive.

Prerequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or equivalent with C- or better, or permission of the instructor

Distribution: Natural/Physical Science General Education course and Natural/Physical Sci General Education lecture

CSCI 1620 INTRODUCTION TO COMPUTER SCIENCE II (3 credits)

This course introduces students to advanced programming techniques and algorithm analysis. The topics covered will enable students develop large scale software with efficient algorithms that are maintainable. This course has a required laboratory component; students must register for the laboratory section attached to their lecture section.

Prerequisite(s): CIST 1400 AND MATH 1300/1320/1370 (both with a grade of C or better)

CSCI 2030 MATHEMATICAL FOUNDATIONS OF COMPUTER SCIENCE (3 credits)

This course introduces discrete mathematics concepts that are foundational for the study of computer science such as functions, relations, and sets, basic logic, methods of proof, mathematical induction, computational complexity, recursion, counting, recurrences, and relations.

Prerequisite(s): (CIST 1400 with grade of C or better) AND (MATH 1930 or MATH 1950 with grade of C- or better)

CSCI 2040 INTRODUCTION TO MATHEMATICAL PROOFS (1 credit)

This course will provide an introduction to mathematical proofs and the art of reading, writing, and debugging proof attempts including mathematical notations, proof and counterexample generation methods and strategies. It will develop the rigor and precision needed to establish and refute mathematical conjectures and reason about the correctness of programs.

Prerequisite(s): CSCI 2030 as corequisite.

CSCI 2240 INTRODUCTION TO C PROGRAMMING (3 credits)

Programming in 'C' in a UNIX operating system environment; algorithm and program development and file manipulation using 'C'; UNIX-like utility development.

Prerequisite(s): CSCI 1620 with grade of C or better

CSCI 2410 INTRODUCTION TO DATA ANALYTICS USING PYTHON (3 credits)

This course is an introduction to the basic concepts and principles of data analytics using the Python programming language. The first part of the course covers major Python language topics including procedures and functions, iteration, recursion, arrays and matrices, strings, operational model of procedure and function calls, algorithms, exceptions, object-oriented programming, and file input/output. The coverage of Python language features are aimed mainly at the data analytics studies of this course. The second part of the course emphasizes applying Python and its rich functional libraries and special software packages to data munging, analysis, mining, and visualization, and machine learning techniques including statistical analysis, parameter estimation, regression, classification, predictive modeling construction, etc.

Prerequisite(s): (CSCI 1620 with grade of C or better) AND (CIST 2500 or equivalent statistics course with grade of C- or better). Not open to non-degree graduate students.

CSCI 2510 INTRODUCTION TO GAME PROGRAMMING (3 credits)

The course will cover programming and development techniques used in a game programming environment. The course is designed for students who have an interest in game programming to be eased into the concepts in a familiar environment.

Prerequisite(s): CSCI 2240 with C- or better. Not open to non-degree graduate students.

CSCI 2620 2D GRAPHICS: IMAGE PROCESSING (3 credits)

This class introduces the 2D graphics area of image processing, which takes an image, creates an internal model of the image, modifies it using a computer program, and produces a new image. Specific techniques covered in this course include color spaces, image transformations, edge detection, file formats, object tracking, and background removal.

Prerequisite(s): CSCI 1620 with grade of C or better

CSCI 2830 OBJECT-ORIENTED SOFTWARE ENGINEERING FUNDAMENTALS (3 credits)

This course introduces students to the central principles and practices of object-oriented design and programming. Common strategies and practices for the systematic development of larger object-oriented systems are also covered.

Prerequisite(s): CSCI 1620 (in Python)

CSCI 2840 C++ & OBJECT-ORIENTED PROGRAMMING (3 credits)

C++ and Object Oriented Programming (OOP) is taught in the UNIX environment. Topics include C++ as a 'Better C,' OOP with C++, classes and data abstraction, operator overloading, inheritance, virtual functions and polymorphism, C++ stream I/O.

Prerequisite(s): CSCI 2240; High-level programming language like Pascal, Java, or C++; solid understanding of pointers & scope; ability to design & implement solutions to modest problems (with C- or better).

CSCI 2850 PROGRAMMING ON THE INTERNET (3 credits)

This course is intended as a continuation of the exploration of topics covered in CIST 1300 and CIST 1400. The course will provide students with a broad overview and understanding of the following topics: how web servers work, configuring web servers, using databases for data storage and retrieval, understanding model-view-controller design for web development, and configuring reverse proxy and WSGI servers for application deployment.

Prerequisite(s): (CIST 1300 with grade of C- or better) AND (CIST 1400 with grade of C or better)

CSCI 2880 INTRODUCTION TO GENERATIVE AI (3 credits)

Generative AI is a form of machine learning that can generate content. AI Image Generators like Midjourney are capable of creating images nearly indistinguishable from human artwork. Large Language Models (LLMs) like ChatGPT have advanced abilities concerning understanding human language. LLMs can carry on conversations, write essays and stories, and even generate code. Generative AI is the defining technology of our times. This course provides an introduction to this technology: How it works, and how to use it.

Prerequisite(s): CSCI 1620 (with a grade of C or better) and CSCI 2030 (with a grade of C or better)

CSCI 2960 SHORT TOPICS FOR PROGRAMMERS (1 credit)

This course provides a hands-on introduction to contemporary programming languages and tools for software development not covered in other courses. Each offering focuses on one such technology. The course emphasizes informal and practical learning, and points students to relevant coursework for more systematic coverage of underlying principles.

Prerequisite(s): CSCI 1620 or instructor permission

CSCI 2980 TOPICS IN COMPUTER SCIENCE (3 credits)

A variable topic course in computer science at the sophomore level. Topics not covered in the computer science degree program, but suitable for sophomore-level students.

Prerequisite(s): CSCI 1620. Permission of instructor. Additional prerequisites may be required for particular topic offerings with C- or better.

CSCI 3100 APPLIED COMBINATORICS (3 credits)

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with CSCI 8105, MATH 3100, MATH 8105).

Prerequisite(s): MATH 2030, MATH 2040, MATH 2230, or CSCI 2030 all with a C- or better. Mathematical logic; Set theory; Relations; Functions; Congruences; Inductive and recursive definitions; Discrete probability; sets, graphs, trees, & matrices

CSCI 3320 DATA STRUCTURES (3 credits)

This is a core that will cover a number of data structures such as tree, hashing, priority queues and graphs as well as different algorithm design methods by examining common problem-solving techniques. (Cross-listed with CSCI 8325)

Prerequisite(s): CSCI 1620 and CSCI 2030 or MATH 2030. Programming Languages: Java or C++ Topics: Arrays, Pointers, Introductory Lists, Storage Allocation (with C- or better).

CSCI 3450 NATURAL LANGUAGE PROCESSING (3 credits)

The course will provide overview of the topics in natural language processing such as word and sentence tokenization, syntactic parsing, semantic role labeling, text classification. We will discuss fundamental algorithms and mathematical models for processing natural language, and how these can be used to solve practical problems. We will touch on such applications of natural language processing technology as information extraction and sentiment analysis. (Cross-listed with CYBR 3450).

Prerequisite(s): Prereq: CSCI 2030 with C- or better; Co-req: CSCI 3320 with C- or better; Students should be comfortable w/ scripting (Python is the language extensively used in natural language processing tools including NLTK). Not open to non-degree graduate students.

CSCI 3470 FUNDAMENTALS AND ALGORITHMS OF MACHINE LEARNING (3 credits)

This course discusses the fundamentals and algorithms of machine learning and contains both theory and application. Machine learning, as a subset of artificial intelligence, is the scientific study of models that computer systems use to perform a specific task without explicit instructions. Topics in this course will include supervised learning such as Decision Tree, Perceptron, Support Vector Machine, Naive Bayes, and Regression, unsupervised learning such as clustering, dimensionality reduction, kernel methods, learning theory such as bias/variance trade-offs, Generalization and Overfitting and large margins. Other crucial topics will include discussions such as Stacking, Semi-Supervised Learning and Interactive Learning. This course will also discuss a few applications in problem domains such as in computer vision.

Prerequisite(s): CSCI 2410 or instructor permission. Not open to non-degree graduate students.

CSCI 3510 ADVANCED GAME PROGRAMMING (3 credits)

This course is intended for those with an interest in video game programming. This course introduces the advanced concepts of game programming including 3D programming, game networking, and development of a multiplayer, networked game by learning and using the XNA environment.

Prerequisite(s): CSCI 2510 and CSCI 3320 with C- or better, or Instructor permission. Not open to non-degree graduate students.

CSCI 3550 COMMUNICATION NETWORKS (3 credits)

This course is designed to bring students up to the state of the art in networking technologies with a focus on Internet. It will cover the principles of networking with an emphasis on protocols, implementations and design issues. (Cross-listed with CSCI 8555).

Prerequisite(s): (CSCI 3320 or CSCI 8325 with grade of C- or better) AND (CSCI 2240 or CYBR 2250 with grade of C- or better)

CSCI 3660 THEORY OF COMPUTATION (3 credits)

The course is intended to introduce the students to the theory of computation in a fashion that emphasizes breadth and away from detailed analysis found in a normal undergraduate automata course. The topics covered in the course include methods of proofs, finite automata, non-determinism, regular expressions, context-free grammars, pushdown automata, no-context free languages, Church-Turing Thesis, decidability, reducibility, and space and time complexity.

Prerequisite(s): CSCI 3320

CSCI 3710 INTRODUCTION TO DIGITAL DESIGN AND COMPUTER ORGANIZATION (3 credits)

The course is intended to introduce the students to the topics found in introductory digital design and computer organization classes.

Prerequisite(s): CSCI 3320 (could be taken concurrently)

CSCI 3830 ADVANCED JAVA PROGRAMMING (3 credits)

This course teaches students web application development using advanced concepts in the Java programming language. It introduces students to distributed computing models such as the client-server model and how it is implemented in web applications using modern Java technology stacks.

Prerequisite(s): ((CSCI 2830 with C- or better) OR Java programming proficiency) AND (CSCI 3320 with C- or better (can be taken as a co-requisite)) AND (basic knowledge of HTML and SQL)

CSCI 3850 FOUNDATIONS OF WEB SEARCH TECHNOLOGIES (3 credits)

This course provides students a basic understanding of how search and information flow works on the web. Main topics include: document representation, inverted indexing, ranking of web search results, vector-space model, web graph, PageRank, search-based advertising, information cascades, and web crawling.

Prerequisite(s): CSCI 2030 and CSCI 2850 with C- or better, or instructor Approval. Not open to non-degree graduate students.

CSCI 4000 ASSESSMENT (0 credits)

This course provides various resources to students about to graduate, and provides a mechanism that guarantees these students complete the final assessments required to maintain the currency and quality of the program. It is intended for undergraduate computer science majors in their last semester prior to graduation. It is required for all students entering after the spring 2004 semester. All degree requirements should be completed by the end of the semester during which this course is taken. Students taking this course will be expected to file an application for graduation during the semester.

Prerequisite(s): All degree requirements should be completed by the end of the semester during which this course is taken. Students taking this course will be expected to file an application for graduation during the semester. Not open to non-degree graduate students.

CSCI 4010 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with MATH 4010, MATH 8016, CSCI 8016).

Prerequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

CSCI 4100 INTRODUCTION TO ALGORITHMS (3 credits)

The course provides students a basic understanding of algorithm analyses. Main topics include: growth of functions, asymptotic notation, recurrences, divide and conquer, sorting and its lower bounds, dynamic programming, greedy algorithms, and graph traversal.

Prerequisite(s): CSCI 3320 with C- or better.

CSCI 4150 GRAPH THEORY & APPLICATIONS (3 credits)

Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with CSCI 8156, MATH 4150, MATH 8156).

Prerequisite(s): CSCI 2030 with a C- or better, or MATH 2030 with a C- or better, or MATH 2230 with a C- or better, or permission of instructor.

CSCI 4200 NUMERICAL ANALYSIS (3 credits)

This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with CSCI 8206, MATH 4200, MATH 8206).

Prerequisite(s): MATH 1970 and MATH 2050 and MATH 2350 with a C- or better or permission of instructor.

CSCI 4220 PRINCIPLES OF PROGRAMMING LANGUAGES (3 credits)

This course covers the foundational concepts and principles underlying the design and implementation of programming languages. Language constructs including assignment, equality, references, aggregations, scope, encapsulation, and parameter passing are discussed. A central theme is how a particular language construct relates to the concept of equational reasoning (referential transparency). Formal notations for describing syntax and semantics are presented.

Prerequisite(s): CSCI 3320 and CSCI 3660 with C- or better.

CSCI 4250 HUMAN COMPUTER INTERACTION (3 credits)

Human computer interaction is concerned with the joint performance of tasks by humans and machines; human capabilities to use machines (including learnability of interfaces); algorithms and programming of the interface; engineering concerns that arise in designing and building interfaces; the process of specification, design, and implementation of interfaces; and design trade-offs. (Cross-listed with CSCI 8256).

Prerequisite(s): Either CSCI 3320 or ITIN 3330 with a grade of C- or better.

CSCI 4260 USER EXPERIENCE DESIGN (3 credits)

User experience (UX) design is concerned with the application of user-centered design principles to the creation of computer interfaces ranging from traditional desktop and web-based applications, mobile and embedded interfaces, and ubiquitous computing. This course provides in-depth, hands-on experience with real world application of the iterative user-centered process including contextual inquiry, task analysis, design ideation, rapid prototyping, interface evaluation, and reporting usability findings. (Cross-listed with CSCI 8266, ACMP 4260, ACMP 8266).

Prerequisite(s): Required: C- or better in CIST 2500 and junior standing, or by permission of instructor. Recommended: C- or better in CSCI 4250 or ACMP 3330/ITIN 3330.

CSCI 4300 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 8306, MATH 4300, MATH 8306).

Prerequisite(s): MATH 2050 with a C- or better or permission of instructor.

CSCI 4310 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 8316, MATH 4310, MATH 8316).

Prerequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

CSCI 4320 COMPUTATIONAL OPERATIONS RESEARCH (3 credits)

Survey of computational methods used in the solution of operations research problems. Some topics may include scripting to guide optimization software, constraint programming, heuristics and metaheuristics for optimization, basic machine learning algorithms, and simulation. (Cross-listed with MATH 4320, MATH 8326, CSCI 8326).

Prerequisite(s): MATH 3200 or CSCI 1620, and MATH 4300 each with a grade of C- or better or permission of instructor.

CSCI 4350 COMPUTER ARCHITECTURE (3 credits)

The course deals with: Computer evolution, top view of processor design, cache memory and organization, hierarchical memory design and management, performance metrics, RISC versus CISC architecture, and pipeline computer design and architecture. The course also covers analytic design alternatives as needed.

Prerequisite(s): CSCI 3710, CSCI 3320 or CSCI 8325 with C- or better.

CSCI 4380 DIGITAL FORENSICS (3 credits)

Digital forensics involves the preservation, identification, extraction, analysis and documentation of digital evidence stored on a variety of electronic devices. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a forensics investigation. Topics include: an introduction to digital forensics, data acquisition, first response, memory forensics, operating system forensics, and network forensics. Students will be required to perform several forensics analyses in a controlled lab environment, including acquiring forensically sound hard drive images, memory images and analyzing these using industry standard tools, such as Forensic Toolkit (FTK). The Digital Forensics class is designed for Cybersecurity, Computer Science and other qualified students to learn what actions are both appropriate and required for preserving, collecting and analyzing digital evidence in cases of intrusion, data theft or other cybercrimes. (Cross-listed with CYBR 4380).

Prerequisite(s): CYBR 3600 or CIST 3600; CSCI 3550 or ISQA 3400; CYBR 2600 or CYBR 3350 or CYBR 3370.

CSCI 4430 QUANTUM COMPUTING AND CRYPTOGRAPHY (3 credits)

The course builds an understanding of exciting concepts behind quantum computing and quantum cryptography. In doing so it will introduce the principles of qubits, superposition, entanglement, teleportation, measurement, quantum error correction, quantum algorithms such as quantum Fourier transformation, Shor's algorithm and Grover's algorithm, quantum key exchange, quantum encryption, and secure quantum channels that are built using these principles. It will also discuss advantages of quantum computing and cryptography over classical computing and cryptography and limitations thereof. The students will come out with a working understanding of the field of quantum computing and quantum cryptography. During the course, students will also implement several of the quantum algorithms. (Cross-listed with CYBR 8436, CYBR 4430).

Prerequisite(s): Co-requisites: CYBR 3570 or CSCI 4560; or Instructor permission.

CSCI 4440 INTRODUCTION TO PARALLEL COMPUTING (3 credits)

This course is an introduction to parallel computing, that is using multiple processors to execute algorithms. Topics discussed include: classification of parallel computers; shared-memory versus message passing; forms of parallelism; measures of performance; designing parallel algorithms; parallel programming and parallel languages; synchronization constructs; and operating systems for parallel computers. (Cross-listed with CSCI 8446)

Prerequisite(s): CSCI 4500, which may be taken concurrently, with C- or better.

CSCI 4450 PRINCIPLES OF ARTIFICIAL INTELLIGENCE (3 credits)

An introduction to artificial intelligence. The course will cover topics such as machine problem-solving, uninformed and informed searching, propositional logic, first-order logic, approximate reasoning, temporal reasoning, planning under uncertainty, and machine learning. (Cross-listed with CSCI 8456).

Prerequisite(s): CSCI 3320 with C- or better.

CSCI 4470 PATTERN RECOGNITION (3 credits)

Structures and problems of pattern recognition. Mathematics model of statistical pattern recognition, multivariate probability, Bay's decision theory, maximum likelihood estimation, whitening transformations. Parametric and non-parametric techniques, linear discriminant function, gradient-descent procedure, clustering and unsupervised learning, and feature selection algorithms. (Cross-listed with CSCI 8476).

Prerequisite(s): CSCI 1620 with C- or better, and MATH 2050. Recommended: MATH 4740/8746 or STAT 3800/8805.

CSCI 4480 ALGORITHMS FOR ROBOTICS (3 credits)

This course provides an introduction to software techniques and algorithms for autonomously controlling robots using software programs called controllers. Students will be taught how to program and use software controllers on simulated as well as physical robots. (Cross-listed with CSCI 8486).

Prerequisite(s): CSCI 3320 with C- or better. CSCI 4450/8456 is a recommended but not essential pre-requisite.

CSCI 4500 OPERATING SYSTEMS (3 credits)

Operating system principles. The operating system as a resource manager; I/O programming, interrupt programming and machine architecture as it relates to resource management; memory management techniques for uni-multiprogrammed systems; process description and implementation; processor management (scheduling); I/O device, controller, and channel management; file systems. Operating system implementation for large and small machines. (Cross-listed with CSCI 8506).

Prerequisite(s): CSCI 3710, CSCI 3320/8325, MATH 1950, and CSCI 4350/8356 with C- or better.

CSCI 4560 NUMBER THEORY & CRYPTOGRAPHY (3 credits)

An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with CSCI 8566, MATH 4560, MATH 8566).

Prerequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

CSCI 4620 COMPUTER GRAPHICS (3 credits)

An introduction to the acquisition, manipulation and display of graphical information using digital techniques. Topics include discussion of the various hardware devices used for input and output, the classical algorithms and data structures used in manipulation of graphical objects, the user interface to the graphics system, and applicable standards. (Cross-listed with CSCI 8626).

Prerequisite(s): ISQA 3300 or CSCI 3320

CSCI 4650 INTRODUCTION TO CLOUD COMPUTING (3 credits)

This course is an introduction to cloud computing. The students will learn about core concepts of cloud computing such as cloud models (IaaS, PaaS, SaaS, etc.), deployment models (public, private, hybrid), cloud infrastructures (compute, networking, storage), cloud services (VMs, serverless, object storage, cache, CDN, etc.), and big-data driven systems. This course will revisit essential topics in CS-related courses such as data structure, operating systems, and distributed systems and show how they are utilized and applied in diverse cloud computing technologies and systems including Hadoop, Spark, and distributed databases. After taking this course, students will have basic knowledge of cloud computing and hand-on experiences with diverse projects (including cloud system demos) that utilize diverse and heterogeneous cloud resources. (Cross-listed with CSCI 8656).

Prerequisite(s): CSCI 3550 and CSCI 4500

CSCI 4660 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)

This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation, and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 8666, MATH 4660, MATH 8666).

Prerequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

CSCI 4700 COMPILER CONSTRUCTION (3 credits)

Assemblers, interpreters and compilers. Compilation of simple expressions and statements. Analysis of regular expressions. Organization of a compiler, including compile-time and run-time symbol tables, lexical scan, syntax scan, object code generation and error diagnostics. (Cross-listed with CSCI 8706).

Prerequisite(s): CSCI 3320 and CSCI 4220 with C- or better. Recommended: CSCI 4500.

CSCI 4760 TOPICS IN MODELING (3 credits)

Selection of such topics as formulation and analysis of various models involving Markov chains, Markov processes (including birth and death processes), queues, cellular automata, difference and differential equations, chaotic systems and fractal geometries. (Cross-listed with CSCI 8766).

Prerequisite(s): MATH 2350 and MATH 4740 or MATH 8746.

CSCI 4830 INTRODUCTION SOFTWARE ENGINEERING (3 credits)

Basic concepts and major issues of software engineering, current tools and techniques providing a basis for analyzing, designing, developing, maintaining and evaluating the system. Technical, administrative and operating issues. Privacy, security and legal issues. (Cross-listed with CSCI 8836).

Prerequisite(s): CSCI 3320 with C- or better.

CSCI 4850 DATABASE MANAGEMENT SYSTEMS (3 credits)

Basic concepts of data base management systems (DBMSs). The relational, hierarchical and network models and DBMSs which use them. Introduction to data base design. (Cross-listed with CSCI 8856).

Prerequisite(s): CSCI 3320 or equivalent with C- or better.

CSCI 4890 DATA WAREHOUSING AND DATA MINING (3 credits)

This course provides students with a theoretical foundation and practical methods for designing and constructing data warehouse and implementing data mining. After covering the essential concepts, issues, techniques to build an effective data warehouse, this course emphasizes the various techniques of data mining, such as association, classification, clustering and prediction for on-line analyses within the framework of data warehouse architectures. This course gives students an opportunity to undertake a real-life data analysis project. (Cross-listed with ISQA 4890).

Prerequisite(s): ISQA 3310 or CSCI 4850

CSCI 4900 INTERNET SYSTEMS DEVELOPMENT (3 credits)

This course focuses on contemporary techniques and technologies in the design, development, and integration of web-enabled information systems. This is a rapidly moving, hands-on course that mirrors real-world development of internet-based applications.

Prerequisite(s): CSCI 1620, CSCI 2850, (recommended) CSCI 3830, CSCI 4830 with C- or better.

CSCI 4950 INTERNSHIP IN COMPUTER SCIENCE (1-3 credits)

The purpose of this course is to provide students with opportunities to apply their academic studies in non-academic environments such as those found in business, industry and other non-academic organizations. The student interns will sharpen their academic focus and develop better understanding of non-academic application areas. The course is intended primarily for juniors and seniors in computer science.

Prerequisite(s): Permission of the computer science program chair.

CSCI 4970 CAPSTONE PROJECT (3 credits)

The Capstone Project completes a Computer Science student's undergraduate experience. Students will work on a team-based real-world project, practicing software engineering skills and applying fundamental computer science principles acquired throughout their undergraduate study.

Prerequisite(s): CSCI 4830 with C- or better; Senior standing in Computer Science. Not open to non-degree graduate students.

CSCI 4980 TOPICS IN COMPUTER SCIENCE (3 credits)

This is a variable topic course in computer science at the senior/graduate level. Topics not normally covered in the computer science degree program, but suitable for senior/graduate-level students can be offered. (Cross-listed with CSCI 8986).

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

CSCI 4990 INDEPENDENT STUDIES (1-3 credits)

A variable credit course for the junior or senior who will benefit from independent reading assignments and research type problems. Independent study makes available courses of study not available in scheduled course offerings. The student wishing to take an independent study course should find a faculty member willing to supervise the course and then submit, for approval, a written proposal (including amount of credit) to the Computer Science Undergraduate Program Committee at least three weeks prior to registration.

Prerequisite(s): Written permission required. Independent study proposals must be approved by the Undergraduate Program Committee.

Construction Engineering (CONE)

Construction Engineering Undergraduate Courses

CONE 103 INTRODUCTION TO CONSTRUCTION ENGINEERING (1 credit)

Introduction to the organization and terminology of construction engineering. Overview of technical and management skills required to succeed in the construction engineering profession.

CONE 206 ENGINEERING ECONOMICS (3 credits)

Introduction to methods of economics comparisons of engineering alternatives: time value of money, depreciation, taxes, concepts of accounting, activity-based costing, ethical principles, civics and stewardship, and the importance to society.

Prerequisite(s): Sophomore Standing.

CONE 211 CONSTRUCTION BUSINESS METHODS (3 credits)

Business concepts and practices used by construction contractors. The construction industry, management principles, forms of business ownership, company organization, construction contracts, estimating and bidding, business ethics, bonds and insurance, financial statements, cost accounting, equipment management, planning and scheduling, labor relations and personnel management.

Prerequisite(s): CONE 103 or CNST 131 or AREN 1010

CONE 221 GEOMETRIC CONTROL SYSTEMS (3 credits)

Introduction to the theory and application of mensuration and geometric information processing in civil engineering. Measurement of distance, direction, elevation and location using mechanical, electronic and satellite systems. Collection of field data and error propagation. Elementary geometric data bases for design, construction, operation and control of civil works.

Prerequisite(s): MATH 1950

CONE 319 CONSTRUCTION METHODS AND EQUIPMENT (3 credits)

Characteristics, capabilities and selection of equipment and methods used in the building construction industry. Estimating job production, equipment production rates, machine operating costs, earth-moving equipment, hoisting equipment, operations analysis, and use of various other construction methods and equipment.

Prerequisite(s): CONE 206

CONE 378 CONSTRUCTION ESTIMATING I (3 credits)

Preparation of detailed cost estimates based on contract documents. Identify and analyze cost components of building and site scopes of work to perform detailed quantity take-offs. Apply labor, material, and equipment pricing from RS Means. Use production rates and quantity takeoffs to prepare a preliminary construction schedule. Complete quantity takeoffs from 2D plans and from 3D BIM software models. (Cross-listed with CNST 378).

Prerequisite(s): CNST 112.

CONE 414 ACCIDENT PREVENTION IN CONSTRUCTION (3 credits)

Safety practices in the construction industry and the national safety and health standards of the Occupational Safety and Health Administration (OSHA). The theory of accidents; personal attitudes; statistics and environment; accident occurrence; prevention and inspection in connection with the construction of buildings, highways, and associated heavy facilities. Nationally accepted safety codes and their relationship to accepted practices in the industry.

Prerequisite(s): Senior standing and CONE 211 and CONE 319

CONE 416 WOOD/CONTEMPORARY MATERIALS DESIGN (3 credits)

Design of structural timber, beams, columns, and connections. Introduction to applicable design philosophies and codes. Overview of materials design. Masonry, aluminum, and contemporary materials such as plastics and fiber reinforced systems and composite material groups. Design considerations, cost and constructability analysis. (Cross-listed with CONE 816)

Prerequisite(s): CIVE 341

CONE 417 FORMWORK SYSTEMS (3 credits)

Design of structural timber, beams, columns, and connections. Introduction to applicable design philosophies and codes. Overview of materials design, masonry, aluminum, and contemporary materials such as plastics and fiber reinforced systems and composite material groups. Design considerations, cost and constructability analysis. (Cross-listed with CONE 817)

Prerequisite(s): CONE 416; Pre/Co-req.: CIVE 441

CONE 450 SUSTAINABLE CONSTRUCTION (3 credits)

Sustainable construction and its application to the green building industry. Topics include: the LEED certification process, sustainable building site management, efficient wastewater applications, optimizing energy performance, indoor environmental issues, performance measurement/verification, recycled content and certified renewable materials. (Cross-listed with CONE 850)

Prerequisite(s): Senior standing

CONE 459 INTRODUCTION TO BUILDING INFORMATION MODELING (3 credits)

This course instructs CAD users on the effective use of Building Information Model (BIM) for integration of design, document and construction estimate. Topics include: model-based 3D design, file formats, interoperability, and MEP modeling. (Cross-listed with CONE 859)

Prerequisite(s): CNST 112, or Graduate standing in AREN, CIVE, CNST or CONE.

CONE 466 HEAVY AND/OR CIVIL ESTIMATING (3 credits)

Estimating techniques and strategies for heavy and/or civil construction. Unit pricing, heavy and civil construction takeoffs and estimating, equipment analysis, overhead cost and allocations, estimating software and government contracts. (Cross-listed with CONE 866).

Prerequisite(s): CONE 319 and CONE 378 and CONE 485

CONE 476 PROJECT BUDGETS AND CONTROLS (3 credits)

The basic systems related to revenues and expenses associated with record keeping of construction contracts. Managerial accounting related to planning and control of construction projects. (Cross-listed with CNST 476).

Prerequisite(s): CNST 378 and CONE 206.

CONE 481 HIGHWAY & BRIDGE CONSTRUCTION (3 credits)

The methods and equipment required in the construction of roads and bridges. Methods and equipment necessary for roads and bridges. Substructure and superstructures, precast and cast-in-place segments, and standard and specialized equipment. (Cross-listed with CONE 881)

Prerequisite(s): CONE 319 or CNST 241

CONE 482 HEAVY AND/OR CIVIL CONSTRUCTION (3 credits)

History, theory, methods, and management principles of planning and executing heavy and/or civil projects. Emerging and new equipment capabilities. Economical use of equipment and management of costs associated with production. (Cross-listed with CNST 482, CNST 882, CONE 882).

Prerequisite(s): CNST 379. Not open to non-degree graduate students.

CONE 483 SUPPORT OF EXCAVATION (3 credits)

The design and placement of excavation supports according to OSHA requirements and industry standards. A variety of routine to moderately complex support systems. Open excavations, sheet piling and cofferdams. Soil mechanics, lateral loads, hydrology, and pumping methods. (Cross-listed with CONE 883)

Prerequisite(s): CET 2180 and CET 3290

CONE 485 CONSTRUCTION PLANNING, SCHEDULING, AND CONTROLS (3 credits)

Planning and scheduling a project using the critical path methods (CPM) with computer applications. Project pre-planning, logic networks, precedence diagrams, time estimates, critical path, float time, crash programs, scheduling, short interval schedules, pull planning, and monitoring project activities. (Cross-listed with CNST 485, CNST 885, CONE 885)

Prerequisite(s): CNST 378. Not open to non-degree graduate students.

CONE 489 CONSTRUCTION ENGINEERING CAPSTONE (3 credits)

CONE 4890 embodies the cumulative CONE experience in a project format and uses teams to simulate actual construction enterprises operating in cooperative and competitive situations which replicate the construction industry. An integrated, comprehensive project; to be taken in the term prior to graduation.

Prerequisite(s): Senior standing

CONE 495 INTERNSHIP (3 credits)

Participation in a full-time summer internship associated with a construction-related entity. Includes weekly assignments and a final presentation designed to foster interactions between the intern and the business side of the entity. General topics include personnel and time management, structuring business plans, scheduling work, finance and budgets, marketing plans, contracts, risk analysis, and communication and leadership. (Cross-listed with CNST 495).

Prerequisite(s): Permission of instructor, Letter of application, Letter of agreement from industry mentor. Not open to non-degree graduate students.

CONE 498 SPECIAL TOPICS IN CONSTRUCTION MANAGEMENT (1-6 credits)

Individual or small group study of special topics in construction management. Topic varies. A signed student-instructor learning contract is required. (Cross-listed with CNST 498, CNST 898)

Construction Management (CNST)

Construction Management Undergraduate Courses

CNST 112 CONSTRUCTION COMMUNICATIONS (3 credits)

Development of communication skills including understanding of contract documents, working drawings, technical terminology, graphic symbols, and abbreviations. Fundamentals of drafting principles, sketching, and dimensioning techniques.

CNST 131 INTRODUCTION TO THE CONSTRUCTION INDUSTRY (1 credit)

Introduction to basic management principles and practices for labor, materials, machinery, and budgets.

CNST 225 INTRODUCTION TO BUILDING INFORMATION MODELING (3 credits)

Introduction to Building Information Modeling (BIM) concepts and techniques. Explore the use of the Revit Architecture platform to create detailed 3D models of construction projects and other BIM-related topics such as clash detection and point-cloud models.

Prerequisite(s): CNST 112

CNST 241 HORIZONTAL CONSTRUCTION (3 credits)

Introduction to earthmoving equipment and methods, labor, productivity, and economic aspects of excavation, material transportation, and fill work. Introduction to the financial principles of equipment ownership and operation.

Prerequisite(s): MATH 1950

CNST 242 VERTICAL CONSTRUCTION (3 credits)

Focus on vertical structures, from grade to topping out, with an emphasis on materials and material handling equipment. Includes the assembly process for a variety of applications including cast-in-place concrete, steel erection, wood framing, precast concrete, masonry structural elements, and material finishing.

Prerequisite(s): MATH 1950

CNST 251 CONSTRUCTION MATERIALS AND SPECIFICATIONS (3 credits)

Introduction to construction materials and proper methods of specifying to achieve design and construction goals, safety and inspection, and to meet zoning code and environmental requirements. Physical, mechanical and aesthetic properties of soils, concrete, masonry, metals, plastics and other materials will be studied as they relate to in-service conditions, acceptability, and performance.

Prerequisite(s): MATH 1950

CNST 252 CONSTRUCTION MATERIALS AND TESTING (3 credits)

Introduction to basic materials used in construction. Laboratory testing and evaluation of material properties of soil, aggregate, and concrete.

Prerequisite(s): MATH 1950; parallel registration in CNST 241 is recommended. Laboratory testing procedures emphasizing testing of aggregates, soil, and concrete.

CNST 305 BUILDING ENVIRONMENTAL TECHNICAL SYSTEMS I (3 credits)

Characteristics and performance of buildings with respect to thermal and psychrometric environment in buildings related to human comfort, heat gain/heat loss, ventilation, natural energy systems and sustainable design principles, and plumbing and life safety systems in the built environment.

Prerequisite(s): PHYS 1050

CNST 306 ELECTRICAL SYSTEMS (3 credits)

Fundamentals of electric power generation and distribution, service, and circuits in buildings with an emphasis on electrical equipment and systems, lighting principles and applications, and fire protection systems. Review of National Electric Code.

Prerequisite(s): MATH 1950, PHYS 1050.

CNST 331 STRUCTURAL MECHANICS (3 credits)

Introduction to various external force systems, and their resulting internal forces and deformations, which act on structural elements.

Prerequisite(s): Not open to non-degree graduate students.

CNST 332 STRUCTURAL OPTIMIZATION (3 credits)

Optimization of key properties of elements and systems of building structures: force, geometric, and material.

Prerequisite(s): CNST 331. Not open to non-degree graduate students.

CNST 378 CONSTRUCTION ESTIMATING I (3 credits)

Preparation of detailed cost estimates based on contract documents. Identify and analyze cost components of building and site scopes of work to perform detailed quantity take-offs. Apply labor, material, and equipment pricing from RS Means. Use production rates and quantity takeoffs to prepare a preliminary construction schedule. Complete quantity takeoffs from 2D plans and from 3D BIM software models. (Cross-listed with CONE 378).

Prerequisite(s): CNST 112.

CNST 379 CONSTRUCTION ESTIMATING II (3 credits)

Continuation of CNST 3780 with emphasis on the determination of total project cost and preparation of complete bid proposals for self-performed and subcontracted commercial projects. Evaluation and analysis of subcontractor bids to determine overall project costs by completing a hard bid simulation scenario. Exploration of contract delivery methods and their effect on overall project cost.

Prerequisite(s): CNST 378

CNST 405 MECHANICAL ESTIMATING (3 credits)

Application of estimating principles, quantity take-off, bidding strategies, and computerization to the specialty field of mechanical construction.

Prerequisite(s): CNST 305 and CNST 306 and CNST 379

CNST 406 ELECTRICAL ESTIMATING (3 credits)

Application of estimating principles, quantity take-off, bidding strategies, and computerization to the specialty field of electrical construction.

Prerequisite(s): CNST 305, CNST 306 and CNST 379.

CNST 411 PROJECT ADMINISTRATION (3 credits)

Ownership and administration of companies focusing on documentation and specifications, contracts, take-offs, estimating, bidding, bonds, insurance, project management and administration, scheduling, time and cost management, labor law and labor relations, and project safety. (Cross-listed with CNST 811).

Prerequisite(s): CNST 379. Not open to non-degree graduate students.

CNST 415 MECHANICAL/ELECTRICAL PROJECT MANAGEMENT (3 credits)

Fundamentals of project management within the mechanical and electrical contracting industry. Codes, contract documents, productivity, coordination, project control and administration, scheduling, safety, and project closeout, from a specialty contracting perspective. (Cross-listed with CNST 815).

Prerequisite(s): CNST 305, CNST 306 and CNST 379. CNST 405 and CNST 406 are recommended.

CNST 420 PROFESSIONAL PRACTICE AND ETHICS (3 credits)

Examination of professional practice considering the perspectives of designers and the contractors and their respective relationships to society, specific client types, and other collaborators in the design and construction fields. Focus on ethics, professional communication and responsibility, professional organization, office management, environmental stewardship, professional registration, and owner-designer-contractor relationships. (Cross-listed with CNST 820).

Prerequisite(s): CNST 378. Not open to non-degree graduate students.

CNST 425 ALTERNATIVE PROJECT DELIVERY METHODS (3 credits)

Historical and current project delivery methods (PDM) are explored. Procurement strategies, contractual arrangements, and compensation methods are also discussed in conjunction with risks, costs, and legal and ethical issues that need to be considered when determining which system is best for a particular project. (Cross-listed with CNST 825)

Prerequisite(s): CNST 379. Not open to non-degree graduate students.

CNST 434 THE DESIGN-BUILD PROJECT DELIVERY SYSTEM (3 credits)

The organizational, managerial, ethical and legal principles involved in design-build as a project delivery system. Advantages and disadvantages, growth, merits, and criticism of the design-build system. (Cross-listed with CNST 834)

Prerequisite(s): CNST 379. Not open to non-degree graduate students.

CNST 436 INTENT AND APPLICATION OF INTERNATIONAL BUILDING CODE (3 credits)

Fundamentals of how to research, interpret, and apply building code requirements to the design and construction of both new and renovated structures. (Cross-listed with CNST 836)

Prerequisite(s): CNST 379. Not open to non-degree graduate students.

CNST 440 BUILDING INFORMATION MODELING (BIM) II (3 credits)

Advance topics in building information modeling, including structural and MEP modeling, 4/5 dimensional construction animations and visualization. Good knowledge of Revit Architectural Modeling and knowledge of construction estimating and scheduling is required before registering in this class. (Cross-listed with CNST 840)

Prerequisite(s): CNST 225 and CNST 378.

CNST 442 HEALTHCARE DESIGN AND CONSTRUCTION (3 credits)

Introduction to the design and construction of healthcare facilities. Healthcare regulations and standards, infection control, interim life safety measures, code requirements, medical equipment selection and coordination, healthcare design and construction techniques, and best practices will be addressed. Provides guidance in preparation for the Certified Healthcare Constructor credential offered by the American Healthcare Association. (Cross-listed with AREN 8426, AREN 4420, CNST 842).

Prerequisite(s): Senior or graduate standing

CNST 444 CONSTRUCTION SITE SAFETY MANAGEMENT (3 credits)

Introduction to safety management for project engineers, project managers, safety teams, and company safety officers. Addresses basic accident and injury models, human accident costs, safety behavior, ethical issues in safety, workers' compensation and EMR, job safety analysis (JSA), project site safety audits, safety promotion and training, emergency planning and response, safety management programs and training, and OSHA record-keeping and reporting. (Cross-listed with CNST 844).

Prerequisite(s): CNST 241 or CONE 319. Not open to non-degree graduate students.

CNST 476 PROJECT BUDGETS AND CONTROLS (3 credits)

The basic systems related to revenues and expenses associated with record keeping of construction contracts. Managerial accounting related to planning and control of construction projects. (Cross-listed with CONE 476).

Prerequisite(s): CNST 378 and CONE 206.

CNST 480 PRODUCTIVITY AND HUMAN FACTORS IN CONSTRUCTION (3 credits)

Motivation and productivity improvement methods for management in typical job environments. Methods to improve working environments in the field and office. Procedures and mechanisms to implement human behavior and ergonomics concepts for enhanced productivity and safety. (Cross-listed with CNST 880).

Prerequisite(s): CNST 379 and senior standing. Not open to non-degree graduate students.

CNST 482 HEAVY AND/OR CIVIL CONSTRUCTION (3 credits)

History, theory, methods, and management principles of planning and executing heavy and/or civil projects. Emerging and new equipment capabilities. Economical use of equipment and management of costs associated with production. (Cross-listed with CNST 882, CONE 482, CONE 882).

Prerequisite(s): CNST 379. Not open to non-degree graduate students.

CNST 485 CONSTRUCTION PLANNING, SCHEDULING, AND CONTROLS (3 credits)

Planning and scheduling a project using the critical path methods (CPM) with computer applications. Project pre-planning, logic networks, precedence diagrams, time estimates, critical path, float time, crash programs, scheduling, short interval schedules, pull planning, and monitoring project activities. (Cross-listed with CNST 885, CONE 485, CONE 885)

Prerequisite(s): CNST 378. Not open to non-degree graduate students.

CNST 486 CONSTRUCTION MANAGEMENT SYSTEMS (3 credits)

Application of selected topics in systems analysis (operations research). Simulation, mathematical optimization, queuing theory, Markov decision processes, econometric modeling, neural networks, data envelopment analysis, decision analysis, and analytic hierarchy processes as used in the industry. (Cross-listed with CNST 886).

Prerequisite(s): CNST 379. Not open to non-degree graduate students.

CNST 488 RESIDENTIAL CONSTRUCTION AND REAL ESTATE DEVELOPMENT (3 credits)

Application of various strategies to real estate development including community and residential design, planning, site selection, land development, marketing and customer service. Methods used by construction companies to analyze, bid, and market their developments to customers through the preconstruction and bidding process. (Cross-listed with CNST 888).

Prerequisite(s): CNST 379.

CNST 489 SENIOR CONSTRUCTION PROJECT (3 credits)

Execution of a project from conceptual design and location through estimating, bidding, site layout, planning and scheduling, cost control, records management, and project completion and documentation. Capstone course.

Prerequisite(s): CNST 379; CNST 420; CNST 476 ; CNST 485. Pre/Coreq: CNST 480.

CNST 495 INTERNSHIP (3 credits)

Participation in a full-time summer internship associated with a construction-related entity. Includes weekly assignments and a final presentation designed to foster interactions between the intern and the business side of the entity. General topics include personnel and time management, structuring business plans, scheduling work, finance and budgets, marketing plans, contracts, risk analysis, and communication and leadership. (Cross-listed with CNE 495).

Prerequisite(s): Permission of instructor, Letter of application, Letter of agreement from industry mentor. Not open to non-degree graduate students.

CNST 498 SPECIAL TOPICS IN CONSTRUCTION MANAGEMENT (1-6 credits)

Individual or small group study of special topics in construction management. Topic varies. A signed student-instructor learning contract is required. (Cross-listed with CNST 898, CNE 498).

Counseling (COUN)

Counseling Undergraduate Courses

COUN 2020 INTRODUCTION TO COUNSELING THEORY AND PSYCHOTHERAPY (3 credits)

This course introduces the major theoretical paradigms and concepts of psychotherapy that are taught in graduate level counseling programs and utilized by professional counselors and allied mental health professionals in the provision of mental health services. Selected readings, video-based lectures, discussion boards, case studies, written assignments, and exams are utilized as means of introducing these concepts and their use and applicability with clients within and across different therapeutic contexts (i.e., individual, group, family, crisis).

Prerequisite(s): Completion of an introductory course in social sciences, human services, or human development. Consult your primary advisor, program coordinator, and/or program chair/director to determine viability of course for your plan of study.

COUN 4000 SPECIAL STUDIES IN COUNSELING (1-6 credits)

This course is designed to allow candidates to pursue independent study of a topic under the direction and guidance of a faculty member. Topics studied and the nature of the learning activities are mutually agreed upon by the candidate and instructor. This course will prepare graduate (or undergraduate) candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world.

COUN 4010 MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS (3 credits)

This course explores the role that educators and school mental health professionals play in identifying the risk factors and warning signs of children and youth with mental health concerns. Students will understand the risk and protective factors at the individual, family, school, and community level as related to children and youth's mental health. The course will provide an overview of externalizing and internalizing disorders as well as school-based and community-based treatments and interventions. (Cross-listed with COUN 8016, SPED 4010, SPED 8016).

Prerequisite(s): SPED 1500 or EDUC 2510, TED 2300, Minimum 2.75 GPA. Not open to non-degree graduate students.

COUN 4300 COUNSELING TECHNIQUES I (1 credit)

This course will present the counseling process, knowledge of beginning skills development and application of techniques related to a specific approach. Topics may include Adlerian counseling (specified in this syllabus), anger management, play therapy, solution focused, cognition, and other topics as needed.. (Cross-listed with COUN 8306)

Prerequisite(s): Not open to non-degree students. Must take prior to practicum.

COUN 4310 COUNSELING TECHNIQUES II (1 credit)

This course will present the counseling process, knowledge of beginning skills development and application of techniques related to a specific approach. Topics may include Rational Emotive Behavior Therapy (REBT) (specified in this syllabus), anger management, play therapy, solution focused, cognition, and other topics as needed. (Cross-listed with COUN 8316)

Prerequisite(s): Admission to students seeking a Bachelor degree in General Studies Option One Major with a concentration in Behavioral Health. Not open to non-degree graduate students

COUN 4400 COUNSELING TECHNIQUES III (1 credit)

This course will assist candidates in developing more systematic integration of previously learned information and skills and the application to specific counseling situations related to various approaches. Topics may include Solution Focused Counseling - SFC (specified in this syllabus), Dialectical Behavioral Therapy, anger management, art therapy, play therapy, solution focused, cognition, and other topics as needed. (Cross-listed with COUN 8406)

Prerequisite(s): Admission to students seeking a Bachelor degree in General Studies Option One Major with a concentration in Behavioral Health. Not open to non-degree graduate students.

COUN 4510 TREATMENT ISSUES IN CHEMICAL DEPENDENCY (3 credits)

This course addresses chemical dependency treatment issues including denial, minimization, relapse and its prevention, resistance, family dynamics, poly-substance abuse, co-occurring disorders, spirituality and the influence of self-help groups. The education will include the clinical treatment needs of individuals suffering from chemical dependency, taking into consideration diversity, gender, culture and lifestyle. (Cross-listed with COUN 8516, SOWK 4510, SOWK 8516).

Prerequisite(s): Admission to counseling program or social work programs or permission of instructor. Not open to non-degree graduate students.

COUN 4680 MEDICAL AND PSYCHOSOCIAL ASPECTS OF SUBSTANCE USE DISORDERS (3 credits)

This course introduces students to substance use disorders and their impact on the individual, family, and society. It covers psychopharmacology, alcohol and drug interactions, drug classifications, theories of substance use disorders, various models of treatment, vulnerable populations, and ethical and legal issues. (Cross-listed with SOWK 4680, SOWK 8686, COUN 8686).

COUN 4690 ASSESSMENT AND CASE MANAGEMENT IN SUBSTANCE USE DISORDERS (3 credits)

This course focuses on assessment of clients and their environment, and diagnosis and referral for substance use disorder treatment. Emphasis is given to assessment instruments, treatment levels, treatment planning, case management, and social justice. (Cross-listed with COUN 8696, SOWK 4690, SOWK 8696).

Criminology and Criminal Justice (CRCJ)

Criminology and Criminal Justice Undergraduate Courses

CRCJ 1010 SURVEY OF CRIMINAL JUSTICE (3 credits)

This course is designed to provide an overview of the justice process and the criminal justice system in general. Concepts of crime and justice are discussed as well as the rights of individuals in a democratic society. The law enforcement, judicial, juvenile justice, and corrections systems are explored.

Distribution: Social Science General Education course

CRCJ 2030 POLICE AND SOCIETY (3 credits)

This course is designed to explore the role of the police in American society. Attention is given to the origins of policing, the nature of police organizations and police work, and patterns of relations between the police and the public. The values of a democratic society as they affect the law enforcement role are discussed.

Prerequisite(s): CRCJ 1010, or permission

CRCJ 2110 CRIMINAL COURT SYSTEM (3 credits)

The purpose of this course is to give you a greater understanding of the U.S. criminal courts system. In this course we will cover topics such as judges, lawyers, litigants, criminal and civil procedure, state and federal courts, and theories of judicial decision making. We will analyze these concepts, actors and institutions from a variety of perspectives. The course will include discussions of the constitutional rules and case law as they apply to the courts process.

Prerequisite(s): CRCJ 1010, or permission

CRCJ 2210 SURVEY OF CORRECTIONS (3 credits)

This course provides an overview of the American criminal justice system correctional responses to criminal offending. We explore the history, philosophy, and law underlying corrections. We will focus on understanding risks and needs of offenders, treatment options and types of correctional sanctions in the U.S. These include, but are not limited to probation, jail, intermediate sanction, prison and the death penalty.

Prerequisite(s): CRCJ 1010, or permission

CRCJ 2220 COMMUNITY-BASED CORRECTIONS (3 credits)

This course is designed to familiarize the student with the most recent developments in community-based corrections. Discussion will focus on the issues related to implementation, management, effectiveness and challenges of community-based programs. Students will be provided a broad overview of the structure and functions of Community-based Corrections. By the end of the course, students should expect to understand the best practices in community corrections.

Prerequisite(s): CRCJ 1010, or permission

CRCJ 2410 CRIMINAL PROCEDURE (3 credits)

This course deals with the legal aspects of the investigation, arrest processes, and criminal trial proceedings, as well as the rules governing the admissibility of evidence in criminal court proceedings.

Prerequisite(s): CRCJ 1010, or permission

CRCJ 2510 RESEARCH METHODS (3 credits)

The primary goal of this course is to facilitate your growth as both consumers and producers of research. We will explore a variety of methodologies (e.g., survey research/self-report, official stats/secondary data, quasi-experimental design, etc.) used in criminological and criminal justice research. Further, we will evaluate these methodologies within the context of design concerns such as: research purpose, operationalization, validity, reliability, and ethics.

Prerequisite(s): CRCJ 1010, or instructor permission

CRCJ 3000 APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR (3 credits)

A course on the use of data and statistical methods to explore and make inferences about society, while critically considering the influence of context and the powers and limitations of quantitative evidence. (Cross-listed with PA 3000, SOWK 3000).

Prerequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or MATH 1300 or MATH 1320 or an ACT of 19, or above or permission from the department.

CRCJ 3010 PHILOSOPHY OF CRIMINAL JUSTICE (3 credits)

This course is designed to critically evaluate concepts like "justice", "morality", "crime", "criminal", etc. These concepts are used every day, and yet we often take it for granted that their meaning is common knowledge. The reality is that arriving at a definition for a term like "justice" varies greatly depending on who you are talking to. When you consider that the overarching goal of our criminal "justice" system is to dispense justice, the definition of "justice" becomes supremely important. Unlike many other classes you will take, much of what we talk about in this class will have no clear cut answers. You will leave this course with questions, but hopefully you will be equipped with the tools necessary to evaluate those questions and form an educated opinion.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission.

CRCJ 3100 WRITING FOR CRIMINAL JUSTICE (3 credits)

This is a writing course for all Criminology and Criminal Justice majors. Students will learn how to write effective cover letters, incident reports, position papers, and executive summaries.

Prerequisite(s): ENGL 1150, ENGL 1160, and CRCJ 1010. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

CRCJ 3310 CRIMINAL LAW (3 credits)

This course will examine the development of the criminal law, the elements and types of criminal offenses, as well as principles of criminal culpability.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or permission

CRCJ 3350 CRIMINOLOGY (3 credits)

This course is about facts and frameworks. The facts that we are interested in are facts about criminal behavior and the frameworks are theories that organize these facts in a coherent fashion. As we learn about criminological facts and the theories that organize these facts we will pay attention to research so that we understand how these facts are developed and how these theories are tested. We will also try to draw out the policy implications of the various facts and theories that we address.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission.

CRCJ 3370 JUVENILE DELINQUENCY AND JUVENILE JUSTICE (3 credits)

This course has been designed to provide and expose students to a broad base of information about juveniles, youth in need of supervision, youth crime and how these areas are handled within the juvenile justice system in the United States. This course will examine the juvenile justice system and the role of family, peers, school, courts, law enforcement, corrections, and the broader community as it pertains to the life of a juvenile.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours

CRCJ 3380 RACE, ETHNICITY, AND CRIMINAL JUSTICE (3 credits)

This course provides a survey of minority groups and their experiences with regard to crime and criminal justice in the United States. This course will focus on racial and ethnic minorities as victims, as offenders, as defendants, and as criminal justice professionals.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; OR instructor permission. Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course

CRCJ 3390 WOMEN, CRIME AND JUSTICE (3 credits)

This course focuses on women's experiences in the criminal justice system. The course will examine women's experiences as victims of crime, as offenders, as prisoners, and as criminal justice professionals. (Cross-listed with WGST 3390)

Prerequisite(s): WGST major; CRCJ or WGST minor; CRCJ 1010, ENGL 1150 and 45 credit hours; or instructor permission.

Distribution: U.S. Diversity General Education course

CRCJ 3410 LAW AND THE BLACK COMMUNITY (3 credits)

Law and the Black Community provides an in-depth examination of the racialized American legal process as it pertains to and affects African Americans in the U.S. From the formation of the U.S. Constitution to present day, this course analyzes intersections of race, law, politics and culture, and explores the administration of justice and Black experiences through a critical legal perspective. (Cross-listed with BLST 3410, PSCI 3410).

Prerequisite(s): BLST 1000 OR CRCJ 1010 OR Junior standing OR instructor permission.

Distribution: U.S. Diversity General Education course

CRCJ 3970 INTERNSHIP IN CRIMINAL JUSTICE (3 credits)

A minimum of 160 hours of experiential learning with criminal justice agencies. The internship program integrates learning with service. It allows students to learn occupational skills and competencies and develop professional relationships with organizations involved in the criminal justice sector, at the same time, students will apply criminological theories to their work. The internship prepares students to demonstrate the integration of professional ethics and values, knowledge and skills, and the capacity to think critically and constructively.

Prerequisite(s): CRCJ 1010, ENGL 1160, 75 credit hours completed, GPA of 2.5, and permission of instructor. Not open to non-degree graduate students.

CRCJ 3980 RESEARCH INTERNSHIP (3 credits)

This course will provide advanced student majors and minors with experience conducting research in the area of criminology and criminal justice. Students work under faculty supervision to complete research tasks that integrate learning with service. Tasks may include reviewing relevant literature, development of survey instrument(s), data collection, data entry and analysis, and presentation of findings.

Prerequisite(s): CRCJ 1010, 75 credit hours completed, GPA of 2.5, and permission of instructor.

CRCJ 4000 MENTAL HEALTH AND THE CRIMINAL JUSTICE SYSTEM (3 credits)

This course focuses on the intersection of individuals with mental health, substance abuse, and/or severe and persistent mental illness diagnoses and the criminal justice system. Students will examine how individuals become involved in the criminal justice system and how the criminal justice system and other social services respond to their involvement.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; OR instructor permission

CRCJ 4030 CRIMINAL JUSTICE ORGANIZATION AND ADMINISTRATION (3 credits)

This course covers contemporary concepts, principles and theories of organization and administration as they relate to criminal justice agencies. The historical development and modern principles of policy administration are also contrasted. The primary goal of this course is to identify the basic structure and function of criminal justice organizations, while paying particular attention to how criminal justice organizations are managed and led.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours

CRCJ 4060 CRIMINAL JUSTICE ETHICS (3 credits)

The principal objectives of this course will focus on creating an awareness of the ethical issues and dilemmas present in the criminal justice system, as well as the development of a more informed ability or basis to address them.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours. Not open to non-degree graduate students.

CRCJ 4110 BIOSOCIAL CRIMINOLOGY (3 credits)

This course is designed to acquaint students with the biological, genetic, and environmental origins to criminal and antisocial behavior. Toward this end, we will examine an array of topics including personality development, brain functioning, and the biosocial basis of crime. Discussion will also center on the manner in which various environmental influences operate through biological mechanisms to influence criminal behavior across different stages of the life course. Particular emphasis will be placed on using empirical-based research to understand the etiology of antisocial and criminal conduct and issues pertaining to the criminal justice system.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission.

CRCJ 4130 SOCIOLOGY OF DEVIANT BEHAVIOR (3 credits)

This course is designed to investigate the etiology of many forms of norm-violating conduct. Emphasis will be placed on rule-breaking behavior as defined in the criminal statutes. (Cross-listed with CRCJ 8136).

Prerequisite(s): Upper-division CRCJ major; CRCJ minor; CRCJ 1010 and jr/sr standing; or instructor permission.

CRCJ 4210 INSTITUTIONAL CORRECTIONS (3 credits)

The purpose of this course is to provide you with a practical and theoretical understanding of Institutional Corrections.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours.

CRCJ 4400 DOMESTIC VIOLENCE (3 credits)

This course examines the criminal justice system response to domestic violence/intimate partner violence. A focus on the interactions between battered victims and components of the criminal justice system, as well as the role of the community in addressing and preventing this violence serves as the foundation for this course. Students will also gain insight into factors contributing to the incidence of intimate partner violence, explore the background/history of domestic violence.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or permission

CRCJ 4410 VICTIMOLOGY (3 credits)

This course provides an introduction to the topics and issues that are pertinent to the study of victimology. Students will learn about the prevalence, predictors, and consequences of various forms of victimization, including child abuse, intimate partner violence, rape and sexual assault, stalking, and homicide over the life-course. In addition, students will learn about the nature of criminal justice victimization data, and the issues related to the measurement and costs of victimization.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or permission.

CRCJ 4420 CHILD ABUSE AND NEGLECT (3 credits)

This course addresses issues related to child abuse and neglect investigation, intervention and prevention efforts facilitated through criminal justice system processes. Course content discusses the history of child maltreatment, definitional challenges, statistical trends, physical and behavioral indicators, mandatory reporting, investigative processes, intervention strategies and prevention efforts.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission

CRCJ 4430 HUMAN TRAFFICKING (3 credits)

This course is designed to provide students with a systematic introduction to the study of human trafficking. Students will learn about what constitutes human trafficking, theories of victimization as they apply to trafficking, debates about the language and definitions surrounding sex trafficking and prostitution. Students will discuss the prevalence, predictors, and consequences of various forms of trafficking and critically assess efforts related to measurement, intervention, and prevention.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or permission.

CRCJ 4440 VICTIMS' RIGHTS AND SERVICES (3 credits)

This course focuses on the experiences of victims of crime through the criminal justice system, from reporting the crime to case closure. Students will learn about the types of victim services and advocacy throughout various points of the criminal justice system (e.g., police, courts, corrections), as well as about the history of victims' rights and the development of victim services over time.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or permission

CRCJ 4450 SEXUAL VIOLENCE (3 credits)

This course will examine the complicated nature and dynamics of sexual violence. Students will learn about the nature and extent of sexual violence. Data and measurement issues will be addressed as well as the history of system responses to sexual violence and victimization.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours or instructor permission

CRCJ 4510 VIOLENCE (3 credits)

This course will examine the social, political and psychological aspects of violence. It will identify various analytical approaches to the study of violence: identifying violent groups, reviewing societal response to violence, and examining police and governmental responses to reduce or control violence. Please note that a core competency of this course is critical thinking. Critical thinking requires students to think through situations, facts, and issues in an open-minded and objective way in an effort to analyze and evaluate information in an informed manner.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission

CRCJ 4520 DRUGS AND CRIME (3 credits)

Drugs and Crime is an introduction course to the major facts and issues concerning criminal justice and drug-taking behavior in America. It is specifically designed to provide the means for understanding (1) the multiple challenges that drug abuse brings to our society, (2) the drug control policies we have enacted to meet those challenges, (3) the range of international and domestic law enforcement efforts and drug control strategy, and (4) the systems of criminal justice that have been established to deal with the prosecution of drug law offenders.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours or instructor permission

CRCJ 4530 SEXUAL OFFENDING (3 credits)

In this course students will learn about sex offenses, sex offenders, and the responses of the criminal justice system. This course will examine applications of theory to sex offending, trends and patterns of behavior, characteristics of sex offenders, and the psychological and legal responses to sex crimes.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours or instructor permission

CRCJ 4540 CRIMINAL INVESTIGATIONS (3 credits)

This course examines the processes, practices, and people involved in the investigation of criminal acts, highlighting recent developments in policy, tactics and technology. We explore theoretical approaches to investigating various crimes, examining how aspects of each approach can benefit investigators. We will analyze, discuss, and learn how to complete thorough investigations that will ensure best chances for successful case prosecution in court.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission

CRCJ 4550 GANGS AND GANG CONTROL (3 credits)

This course will examine criminal street gangs, including these gangs' members, activities, underlying dynamics, and the roles that drugs and sex trafficking play in gang activity. We will consider the history and proliferation of gangs in the United States, common characteristics of U.S. gangs across different regions, how gangs obtain their power and the connection between street gangs and prison gangs. Lastly, we will evaluate multiple methods employed by communities and law enforcement to control and defeat criminal street gangs.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours

CRCJ 4560 HOMICIDE INVESTIGATIONS (3 credits)

This course is designed to present an overview of the crime of homicide. Attention is given to homicide data, theories of why homicides occur, types of homicide, investigating/solving homicides, prosecuting homicide cases, and the impact on co-victims and society as a whole. Students will use critical thinking skills while exploring various investigative techniques.

Prerequisite(s): CRCJ 1010, ENGL 1150 and 45 credit hours; or instructor permission

CRCJ 4710 COMPARATIVE CRIMINAL JUSTICE SYSTEMS: ENGLAND (3 credits)

This is a specialized course which provides a comparison of the criminal justice systems of the United States and the United Kingdom. The design of the course allows for an exploration of how the American system developed from the British system and why social and cultural factors influenced the differences/similarities in their development.

Prerequisite(s): CRCJ major or CRCJ minor and permission of the instructor. Not open to non-degree graduate students.

CRCJ 4740 HOMELAND SECURITY (3 credits)

Students will learn about the history of homeland security including historical laws and regulations constructing and modifying the current national structure of homeland security in the United States. They will examine the complexities of homeland security while exploring disciplinary subfields of threats to national security including counterterrorism studies, transportation security, border security and immigration, cybersecurity, community resilience, and the associated response of the homeland security apparatus. This course is recommended for students with an interest in criminal justice careers at the federal level.

Prerequisite(s): CRCJ 1010, ENGL 1150 and 45 credit hours; or instructor permission

CRCJ 4750 INTERNATIONAL CRIMINOLOGY AND CRIMINAL JUSTICE (3 credits)

This course analyzes the dynamics of criminality and the social response to criminality across countries. Differences in crime and justice between developed and developing countries and between socialist and capitalist nations are emphasized.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission.

Distribution: Global Diversity General Education course

CRCJ 4760 TERRORISM (3 credits)

This course is designed to assist the student in developing an understanding of terrorism as a political crime. It includes an examination of the social, political and psychological aspects of this behavior.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission.

Distribution: Global Diversity General Education course

CRCJ 4770 ORGANIZED CRIME (3 credits)

This course will deal with issues surrounding the phenomena of organizational crime. The student will be exposed to theories, concepts, case studies and issues relating to this topic. Organizational crimes are some of the most dangerous to American society and range from the commonly known offenses of gambling and narcotics trafficking to the more subtle and sophisticated crimes of extortion, commercial bribery, and political corruption.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours; or instructor permission

CRCJ 4780 WHITE COLLAR CRIME (3 credits)

This course is designed to examine those illegal acts committed by nonphysical means and by concealment or guile, to obtain money or property, to avoid the payment or loss of money or property, or to obtain business or personal advantage.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours

CRCJ 4790 CYBER & COMPUTER CRIMES (3 credits)

This course is designed to provide students with an introduction to cybercrime. Cybercrime is an extremely broad term that encompasses a wide variety of criminal behaviors. Specifically, this course is designed to introduce students to the following: how the digital world has influenced crime, theories related to cybercrime, types of cybercrimes, the implications of computer crimes and cyber-terrorism, privacy and freedom of speech in the context of the digital world, and the challenges cybercrime poses for our criminal justice system.

Prerequisite(s): CRCJ 1010, ENGL 1150, and 45 credit hours or instructor permission

CRCJ 4800 SPECIAL TOPICS (3 credits)

This course is a topical approach that explores various aspects of Criminology and Criminal Justice. Topics and disciplines will vary from term to term. Course description will be announced in advance. This course will be devoted to the exploration and analysis of contemporary problems in the criminal justice system.

Prerequisite(s): CRCJ major; CRCJ minor; CRCJ 1010 and jr/sr standing; or instructor permission.

CRCJ 4950 INDEPENDENT STUDY (1-3 credits)

Students explore a topic of interest under the close supervision of a faculty member. The student and faculty member work together to establish a plan of study which may include independent reading and writing, applied activities, research activities and products, and/or other activities deemed appropriate. The student is responsible for selecting a possible topic of study before contacting the faculty member.

Prerequisite(s): CRCJ 1010, ENGL 1160, and 45 credit hours; instructor permission. Not open to non-degree graduate students.

CRCJ 4960 ISSUES IN CRIME AND JUSTICE (3 credits)

This is a capstone course. Each student will identify and explore a contemporary issue relevant to crime and justice policy. Students will develop multimedia packages designed to educate and advocate for their chosen policy action (e.g., adoption, reform, replacement). The purpose of the course is to allow students to integrate their previous course experiences and skills, independent research, and community stakeholder engagement (via interviews) into an activity that demonstrates critical thinking, synthesis, and evaluation.

Prerequisite(s): CRCJ majors with senior standing, OR permission of the instructor. Not open to non-degree graduate students.

CRCJ 4970 SENIOR HONORS PROJECT/THESIS (3-6 credits)

An independent research project supervised by School faculty. The senior honors project must be approved by the CPACS Honors Coordinator.

CRCJ 4990 APPLIED SENIOR ASSESSMENT (1 credit)

This course is intended to give students an opportunity to reflect on their curricular and personal development during their undergraduate career. Students will have the opportunity to develop several career development artifacts. It is also used as a tool to help monitor progress toward the SCCJ's student learning outcomes (SLOs) and identify needed changes.

Prerequisite(s): Graduating seniors must register for and complete CRCJ 4990 in the term in which they plan to graduate. Not open to non-degree graduate students.

CRCJ 4999 SENIOR ASSESSMENT (0 credits)

This assessment tool is part of the School's Student Outcomes effort. It is designed to monitor the School's performance and to identify changes needed. Graduating seniors must register for and complete CJUS4999 - Senior Assessment in the term in which they plan to graduate.

Prerequisite(s): Students must register for CJUS 4999 in the term in which they plan to graduate. Not open to non-degree graduate students.

Cybersecurity (CYBR)

Cybersecurity Undergraduate Courses

CYBR 1100 INTRODUCTION TO INFORMATION SECURITY (3 credits)

This course emphasizes our current dependence on information technology and how its security in cyberspace (or lack thereof) is shaping the global landscape. Several historical and contemporary global events that have been influenced by the exploitation of information technology motivates topics on cyber crime, malware, intrusion detection, cryptography, among others, and how to secure one's own data and computer system. Several aspects of this course are geared towards developing an understanding of the "cyberspace" as a new medium that breaks all geographical boundaries, while highlighting noticeable influences on it from social, political, economic and cultural factors of a geographical region.

Distribution: Global Diversity General Education course

CYBR 2250 LOW-LEVEL PROGRAMMING (3 credits)

This course will teach the cybersecurity (CYBR) students low-level programming in the 'C' and assembly languages, and the interrelationship between these two programming paradigms. The student will learn the various control structures in 'C' and how they are implemented in machine code, memory allocation and management, and the basics of allocation classes such as static versus automatic variables. The students will also learn assembly language in the 'C' environment and will be able to write useful, functional, stand-alone assembly language programs with no help from external libraries.

Prerequisite(s): CSCI 1620. Not open to non-degree graduate students.

CYBR 2600 SYSTEM ADMINISTRATION (3 credits)

This course covers topics a system administrator would encounter in their profession. The student will learn how a system administrator fulfills various computer management requirements using both Windows and Linux operating systems on both physical and virtual machines. Topics include installation, creating and maintaining file systems, user and group administration, backup and restore processes, network configuration, system services, virtualization, and security administration.

Prerequisite(s): CIST 1400 or CIST 1600 or Instructor Permission

CYBR 2980 SPECIAL TOPICS IN CYBERSECURITY (3 credits)

The course provides a format for exploring subject areas in Cybersecurity and related fields for sophomore undergraduate students. Specific topics vary, in keeping with research interests of faculty and students. Examples include network configuration, network security, forensics, regulatory compliance, web services and applications, vulnerability assessments, cloud computing security, and other issues in Cybersecurity.

Prerequisite(s): Instructor permission required. Not open to non-degree graduate students.

CYBR 3450 NATURAL LANGUAGE PROCESSING (3 credits)

The course will provide overview of the topics in natural language processing such as word and sentence tokenization, syntactic parsing, semantic role labeling, text classification. We will discuss fundamental algorithms and mathematical models for processing natural language, and how these can be used to solve practical problems. We will touch on such applications of natural language processing technology as information extraction and sentiment analysis. (Cross-listed with CSCI 3450).

Prerequisite(s): Prereq: CSCI 2030 with C- or better; Co-req: CSCI 3320 with C- or better; Students should be comfortable w/ scripting (Python is the language extensively used in natural language processing tools including NLTK). Not open to non-degree graduate students.

CYBR 3570 CRYPTOGRAPHY (3 credits)

The course will provide a broad overview of the concepts, fundamental ideas, vocabulary, and literature base central to the study and development of cryptography and cryptanalysis. This course will explore historical development of cryptography, as well as methods used to defeat it. In addition, the course will cover the mathematical foundations of cryptography today, as well as some current uses of such cryptography, such as public key infrastructures, the Internet Key Exchange protocol, and more.

Prerequisite(s): CSCI 3320 or ISQA 3300. Not open to non-degree graduate students.

CYBR 3600 INFORMATION SECURITY POLICY AND AWARENESS (3 credits)

This course will cover the planning and development for information governance, security policies and procedures, and security awareness.

Prerequisite(s): CIST 2100; CIST 3110, which may be taken concurrently.

CYBR 4360 PRINCIPLES OF SECURE SYSTEM DESIGN (3 credits)

Contemporary issues in computer security, including sources for computer security threats and appropriate reactions; basic encryption and decryption; secure encryption systems; program security, trusted operating systems; database security, network and distributed systems security, administering security; legal and ethical issues. (Cross-listed with CYBR 8366, CSCI 8366).

Prerequisite(s): CSCI 3320 or CSCI 8325 OR ISQA 3400 OR By instructor permission

CYBR 4380 DIGITAL FORENSICS (3 credits)

Digital forensics involves the preservation, identification, extraction, analysis and documentation of digital evidence stored on a variety of electronic devices. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a forensics investigation. Topics include: an introduction to digital forensics, data acquisition, first response, memory forensics, operating system forensics, and network forensics. Students will be required to perform several forensics analyses in a controlled lab environment, including acquiring forensically sound hard drive images, memory images and analyzing these using industry standard tools, such as Forensic Toolkit (FTK). The Digital Forensics class is designed for Cybersecurity, Computer Science and other qualified students to learn what actions are both appropriate and required for preserving, collecting and analyzing digital evidence in cases of intrusion, data theft or other cybercrimes. (Cross-listed with CSCI 4380).

Prerequisite(s): CYBR 3600 or CIST 3600; CSCI 3550 or ISQA 3400; CYBR 2600 or CYBR 3350 or CYBR 3370.

CYBR 4390 MOBILE DEVICE FORENSICS (3 credits)

Mobile device forensics is the science of recovering digital evidence from a mobile device under forensically sound conditions using accepted methods. The aim of this course is to introduce students to acceptable approaches for collecting, analyzing and reporting data from a mobile device forensics investigation. Topics include: an introduction to digital and mobile device forensics, mobile forensics standards, acquisition methods (manual, logical, physical and provider-side), Android and iOS filesystem analysis, decoding approaches, application data analysis, and report writing. Students will be required to perform several investigations in a controlled lab environment, including acquiring forensically sound evidence and analyzing these using industry standard tools. (Cross-listed with CYBR 8396).

Prerequisite(s): CYBR 4380/8386 - Computer and Network Forensics or Instructors Permission

CYBR 4430 QUANTUM COMPUTING AND CRYPTOGRAPHY (3 credits)

The course builds an understanding of exciting concepts behind quantum computing and quantum cryptography. In doing so it will introduce the principles of qubits, superposition, entanglement, teleportation, measurement, quantum error correction, quantum algorithms such as quantum Fourier transformation, Shor's algorithm and Grover's algorithm, quantum key exchange, quantum encryption, and secure quantum channels that are built using these principles. It will also discuss advantages of quantum computing and cryptography over classical computing and cryptography and limitations thereof. The students will come out with a working understanding of the field of quantum computing and quantum cryptography. During the course, students will also implement several of the quantum algorithms. (Cross-listed with CYBR 8436, CSCI 4430).

Prerequisite(s): Co-requisites: CYBR 3570 or CSCI 4560; or Instructor permission.

CYBR 4440 INDUSTRIAL CONTROL SYSTEM SECURITY (3 credits)

The objective of this course is to research vulnerabilities into, and provide guidance for securing, industrial control systems (ICS). ICS is a general term that encompasses several types of control systems, including supervisory control and data acquisition (SCADA) systems, distributed control systems (DCS), and other control system items such as Programmable Logic Controllers (PLC). The student will learn to identify network and device vulnerabilities and potential countermeasures to these weaknesses. (Cross-listed with CYBR 8446)

Prerequisite(s): CSCI 3550.

CYBR 4450 HOST-BASED VULNERABILITY DISCOVERY (3 credits)

The class will cover security issues at an implementation and hardware level. The students will learn assembly language and the use of a reverse assembler and debugger. This will allow the student to analyze various "packing" algorithms for computer viruses, the viruses themselves, operating system "hooking", "fuzzing", and other machine code, host-based exploits. The class will be using both Windows and Linux as operating systems. (Cross-listed with CYBR 8456.)

Prerequisite(s): CSCI 3710 and CYBR 2250

CYBR 4460 NETWORK-BASED VULNERABILITY DISCOVERY (3 credits)

The course is an advanced class in which the students learn various techniques for testing for and identifying security flaws in network software and web applications. Internet technologies such as HTTP, DNS, DHCP, and others are examined in the context of cyber security. Students are expected to participate in numerous hands-on experiments related to Information Assurance with respect to web technologies. (Cross-listed with CYBR 8466)

Prerequisite(s): CSCI 3550

CYBR 4540 COMPUTER SECURITY MANAGEMENT (3 credits)

The purpose of this course is to integrate concepts and techniques from security assessment, risk mitigation, disaster planning, and auditing to identify, understand, and propose solutions to problems of computer security and security administration. (Cross-listed with CIST 4540, CYBR 8546, ISQA 8546)

Prerequisite(s): CYBR 4360 or permission of the instructor.

CYBR 4580 CYBERSECURITY CAPSTONE (3 credits)

In this course, students will extend and apply the knowledge they've accumulated in their undergraduate studies in the cybersecurity program. The capstone course facilitates project management and teamwork for students to define, implement, assess, and secure information systems. Implementation and assessment activities happen over a non-trivial, semester-long project, typically through a partnership with external stakeholders in the industry, academia, community organizations, or government. The projects are evaluated based on their effectiveness in meeting market or customer needs for assessment, certification, or development of secure systems.

Prerequisite(s): CYBR 2600; and CYBR 3600; and CYBR 4360; and CYBR 4460; and CYBR 4380 or CYBR 4450. Not open to non-degree graduate students.

CYBR 4950 INTERNSHIP IN CYBERSECURITY (1-3 credits)

The course provides a format for a student to work with a local or national industry partner in a cyber-security oriented position, and to receive credit for this practical experience. The internship may or may not be a paid position, but will definitely be directly related to the Cybersecurity degree program. The class is proposed and organized by the student, with participating faculty supervising and input provided by the industry partner.

Prerequisite(s): Instructor Permission

CYBR 4980 SPECIAL TOPICS IN CYBERSECURITY (3 credits)

The course provides a format for exploring advanced research areas for undergraduate and graduate students in Cybersecurity and related fields. Specific topics vary, in keeping with the research interests of faculty and students. Examples include applied data mining, mobile security, web services and applications, vulnerability assessments, cloud computing security, and other issues in Cybersecurity research. (Cross-listed with CYBR 8986)

Prerequisite(s): Instructor Permission.

CYBR 4990 INDEPENDENT STUDY IN CYBERSECURITY (1-3 credits)

The course provides a format for exploring advanced research areas for undergraduate students in Cybersecurity and related fields. The class is designed for students that would like to explore specific Cybersecurity topics at a greater depth, or topics which are not currently a part of the CYBR curriculum. The class is proposed and organized by the student, with participating faculty mentoring.

Prerequisite(s): Instructor Permission

Economics (ECON)

Economics Undergraduate Courses

ECON 1200 SURVEY OF ECONOMICS (3 credits)

An introduction to fundamental economic analysis, applying economic concepts to both domestic and international problems and policies.

Prerequisite(s): Not available to students who have completed either ECON 2200 or 2220.

Distribution: Social Science General Education course

ECON 2200 PRINCIPLES OF ECONOMICS (MICRO) (3 credits)

An introduction to economic principles, decision making and policies affecting product and resource markets. Particular emphasis is on price, output and input decisions by individuals and firms under various market conditions. An introduction to the fundamentals of international trade.

Prerequisite(s): ENGL 1150 and MATH 1310 or MATH 1220 with 'C-' (1.67) or better; or permission of CBA advisor

Distribution: Social Science General Education course

ECON 2220 PRINCIPLES OF ECONOMICS (MACRO) (3 credits)

An introduction to economic principles, decision making and policies on national income and output, employment, growth, money, the price level and the international economy.

Prerequisite(s): MATH 1310 or MATH 1220 and ENGL 1150 with a C-minus (1.67) or better; or permission of CBA advisor

Distribution: Social Science General Education course

ECON 2400 PRINCIPLES OF ECONOMICS FOR EDUCATORS (3 credits)

This course teaches principles of microeconomics and macroeconomics to K-12 educators. After taking this course students will be able to use the economic way of thinking to study current economic issues. Students will be introduced to macroeconomic principles, decision-making and policies on national income and output, employment, growth, money, price level, and fundamentals of international issues. Students will study microeconomic issues including product and resource markets, and prices output and input decisions under various market conditions. Economic concepts will be aligned to K-12 state social studies standards. This course cannot be substituted for ECON 2200 and/or ECON 2220.

Prerequisite(s): MATH 1310 or MATH 1220, ENGL 1150, ECON 2200 or ECON 2220. Not open to non-degree graduate students.

ECON 2600 SURVEY OF BEHAVIORAL ECONOMICS (3 credits)

This course examines the basic concepts behind behavioral economics and the application of behavioral economics across other fields of study. Students will be able to understand the basic variables influencing decision making, including framing and perception as well as the influence of social dynamics and psychological influences.

ECON 3130 ECONOMIC GEOGRAPHY (3 credits)

An introduction to the basic concepts and approaches in contemporary economic geography, stressing the importance of the spatial perspective for an understanding of how economic processes work at global, national, regional, and local scales. (Offered Fall) (Cross-listed with GEOG 3130).

Prerequisite(s): Majoring in Geography. Non-Geography majors: MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better.

ECON 3200 ECONOMIC THEORY: MICRO (3 credits)

Analysis of individual, firm and industry behavior in product and factor markets. Provides a theoretical foundation for managerial and public policy decision-making.

Prerequisite(s): MATH 1310 or MATH 1220 and ECON 2200, each with a "C" (2.0) or better.

ECON 3220 ECONOMIC THEORY: MACRO (3 credits)

This course is designed to follow introductory economics, to examine the determination of output, employment, the price level, inflation, interest rates, and the exchange rate in the economy. Piece-by-piece, theoretical models will be constructed describing how each of these and other variables are determined in both, the long-run and in the short-run. We will analyze how changes in a particular event affect different markets in the economy, and in turn, how one market interacts with another within a general equilibrium framework. A large part of the course will be devoted to business cycle theory, macroeconomic policy issues, and open economy macroeconomics. The world economies are very much integrated, and thus, a full understanding of macroeconomics requires knowledge of international aspects of macroeconomics. The purpose of this course is to provide the student with an understanding of the connection between macroeconomic theory and related policy issues.

Prerequisite(s): Completion of ECON 2200 with a C or better AND ECON 2220 with a C or better

ECON 3290 ECONOMICS OF PUBLIC ISSUES (3 credits)

Economics is frequently considered an abstract topic, with interesting results that are not easily applied in the real world. Through Economics of Public Issues, however, students will explore the real ways in which economics can be used to understand, explain, and answer tough questions that affect everyone. Students will explore and define capitalism and key economic institutions required for economies to develop and prosper. We will examine markets and market failures that exist today. Classes will focus on the outcomes - intended and unintended - of various policies (local, national, and global). While specific issues are going to be covered in the course the intent is that students will learn the tools and strategy of thinking like an economist to guide them through future issues that will come up in their personal, professional, and civic lives.

Prerequisite(s): ECON 2200 OR Instructor Approval.

ECON 3300 INTRODUCTION TO ECONOMETRICS (3 credits)

An introduction to empirical research methods in economics. Subjects covered include estimations of the basic linear regression model, hypothesis testing, correlation coefficients, analysis of variance, multicollinearity, dummy variables, specification error, auto-correlation, heteroscedasticity and unconditional forecasting. Empirical illustrations are provided by reference to contemporary economic questions.

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200, ECON 2220, BSAD 2130 or BSAD 3160, each with a "C" (2.0) or better, or permission of instructor.

ECON 3310 SQL, DATABASES, AND DATA CLEANING FOR DATA SCIENTISTS (3 credits)

Analytics requires data. Within an organization, this data is usually housed in databases. In this class, you will extract data from these systems using Structured Query Language (SQL), programmatically combine multiple datasets, and learn advanced programmatic data cleaning techniques, such as regular expression.

Prerequisite(s): ECON 2200 with a "C" or better

ECON 3550 PUBLIC FINANCE (3 credits)

This course explores the objectives and rationale of government activity in a market economy, including positive and normative analysis of public expenditures and taxes. Topics include Social Security, health insurance, education, food stamps, student aid, unemployment insurance, efficiency and incidence of major revenue sources, and tax reform proposals. (Cross-listed with FNBK 3550).

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better.

ECON 3600 INTRODUCTION TO INTERNATIONAL ECONOMICS (3 credits)

An introduction to analyses of international trade and the international monetary system. Subjects covered include the economic basis for international specialization and trade, the effect of trade on income distribution, commercial policy, economic integration, the balance of payments, adjustment mechanism, exchange rate determination, external effects of monetary and fiscal policy and foreign investment.

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better.

ECON 4000 SPECIAL TOPICS IN ECONOMICS (3 credits)

This course will explore a specified topic in the field of economics.

Prerequisite(s): Varies by offering

ECON 4210 INDUSTRIAL ORGANIZATION (3 credits)

In this class we will examine why firms and industries behave the way that they do. We will explore why some industries face intense competition while others enjoy large profits, why some industries offer only bundles, and why some firms buy up their supply chain when others do not. This theoretical course will illuminate un-theoretical implications to your life and future business ventures. This course will use your economic knowledge, a bit of psychology (behavioral economics) and game theory to answer questions like "Why does everyone hate the cable company?" and "Why are CEOs given so many stock options?" (Cross-listed with ECON 8216).

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 4240 LABOR ECONOMICS (3 credits)

The course will cover essential topics in Labor Economics including factors leading to equilibrium conditions in the labor market, human capital accumulation, discrimination in the workplace, compensation for undesirable work, mobility, unionization, and more. (Cross-listed with ECON 8246).

Prerequisite(s): ECON 2200 OR Equivalent OR Instructor Approval

ECON 4300 QUANTITATIVE APPLICATIONS IN ECONOMICS AND BUSINESS (3 credits)

The study and application of modern quantitative techniques to problem-solving in economics and business. It is designed to help the student to translate verbal arguments in economics and business into their mathematical equivalents, to improve analytical skills, and to attain proficiency in marginal analysis, equilibrium analysis, static optimization, and comparative statics analysis. It covers topics such as exponential and logarithmic functions and their applications, linear algebra and its applications, derivatives and their applications, maximization of functions with one variable and multi variables, maximization with non negativity constraints, and integral calculus and its applications in economics and business. (Cross-listed with ECON 8306).

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 4320 NATURAL RESOURCE ECONOMICS (3 credits)

This course introduces students to the economics and management of Earth's natural resources. We address questions such as: Are we running out of natural resources? Are we using resources in a sustainable fashion? What role to markets play in resource use? We will address issues related to fossil-based resources, minerals, fisheries, water, land, forests and other associated topics. The course covers the basic theoretical framework for understanding the optimal rate of resource use, identifies the factors that determine the actual rate of use, and considers and evaluates various public policy prescriptions. (Cross-listed with ECON 8326).

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 4330 ENVIRONMENTAL ECONOMICS AND SUSTAINABILITY (3 credits)

In this course students will apply economic concepts and models to environmental concerns and policy solutions that combat environmental degradation. Topics include: Air and water pollution, solid waste management, carbon taxation, cap-and-trade systems, and economic motivations for sustainable business management. (Cross-listed with ECON 8336).

Prerequisite(s): MATH 1310 or MATH 1220 and ECON 2200, each with a "C" (2.0) or better.

ECON 4340 ECONOMICS OF TECHNOLOGY (3 credits)

Innovative dynamism is the economic system which brings us the new goods and processes that make life longer and better. We will examine how the system works, including: The role of the breakthrough inventor and the innovative entrepreneur; whether the system improves or hurts ethical behavior, culture, equality, and the environment; the costs to workers in terms of job loss, and the benefits to workers in terms of the creation of better jobs; how funding, regulatory, and patent policies affect innovative dynamism; and how innovative dynamism in medicine can result in more and faster cures for cancer and other diseases. (Cross-listed with ECON 8346).

Prerequisite(s): MATH 1310 or MATH 1220 and ECON 2200, each with a "C" (2.0) or better, or BSAD 8180, or permission of instructor.

ECON 4350 BUSINESS INTELLIGENCE AND REPORTING (3 credits)

The course will teach students to use state-of-the-art Business Intelligence (BI) software to generate reports and information from data. BI software is used to inform decision-making in industries from transportation to medicine, from marketing to government, and is facilitated by rapidly increasing access to data in all industries. Students will learn to employ best practices in visualization and verbal communication as they are trained to create valuable insights from data and convey those insights to stakeholders. Additionally, the course will aid students in preparing for certification in the use of state-of-the-art BI software. (Cross-listed with ECON 8316).

Prerequisite(s): BSAD 2130 (or equivalent) OR Instructor Approval

ECON 4450 DOMESTIC MONETARY THEORY AND POLICY (3 credits)

The course will introduce students to topics in money and banking, financial institutions, markets, financial instruments, and monetary theory in order to enhance financial decision making and enable students to effectively analyze economic news in media such as the Wall Street Journal, The New York Times, Business Week, Barrons, The Economist, and other related business publications. This knowledge will enable students to formulate their own views about the current economic environment, government policies, and responses to economic environments. (Cross-listed with ECON 8456).

Prerequisite(s): ECON 3220, or permission of instructor.

ECON 4500 SPECIAL PROBLEMS IN ECONOMICS (2-3 credits)

Individual investigation of specific problems in the field of economics under the supervision of a faculty member.

Prerequisite(s): Senior and permission of department chair.

ECON 4510 ECONOMIC INTERNSHIP (1-3 credits)

Students engage in part time employment in their area of concentration to gain relevant business experience and to practice the skills and concepts learned in the classroom. Supplemental reports and/or reading may be required (maximum 3 credit hours).

Prerequisite(s): Permission of internship coordinator; 'C' (2.0) or better in ECON 2200 and ECON 2220; 2.5 Cumulative GPA; junior or senior standing.

ECON 4570 ECONOMIC CONDITIONS ANALYSIS (3 credits)

This course teaches students how to conduct an economic analysis of, and produce an economic forecast for, a local economy such as a state, county, or metropolitan area. Students will learn where to find data, how to analyze that data, how to develop models with the data, and how to present the data in a clear, concise, and jargon-free manner. The final published report will be authored by the students registered in the course. All students will contribute equally to the final report. The instructor will ensure equal participation. (Cross-listed with ECON 8576).

Prerequisite(s): ECON 2200 and ECON 2220, or permission of the instructor

ECON 4610 INTERNATIONAL TRADE (3 credits)

An analysis of the character of international economic relations. Subjects covered include the economic basis for international specialization and trade, the economic gains from trade, commercial policy, economic integration and economic growth. (Cross-listed with ECON 8616).

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 4620 INTERNATIONAL MONETARY THEORY (3 credits)

This course is designed to introduce students to topic areas in International Macroeconomics and International Finance. Students will examine the mechanisms of the foreign exchange market, and how exchange rates are determined in the short-run as well as in the long-run. Students will investigate the different exchange rate regimes around the world, including fixed exchange rates, floating exchange rates, crawling pegs, and other arrangements. Students will examine the European Union and ask whether such a system is economically viable. This is especially important in the current economic environment facing Europe. Students will also examine exchange rate crises over history, and examine how they all have common elements. (Cross-listed with ECON 8626).

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 4660 INTERNATIONAL ECONOMIC DEVELOPMENT (3 credits)

This course introduces theories and application of economic development and growth, economic problems facing developing countries, analyzes domestic economic issues (e.g., per capita GDP, income distribution, population, unemployment, urbanization, education, fiscal policies, and financial policies), and international economic issues (e.g., trade, foreign investment, and foreign debt). Financial crises, debt crises, and economic recovery will be discussed. (Cross-listed with ECON 8666).

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 4730 ECONOMICS OF ENTREPRENEURSHIP (3 credits)

This course will review economic theories of entrepreneurship with special emphasis on Schumpeter's theory of creative destruction. The main focus of the seminar will be on the "high-level" entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 8736, BSAD 8736).

Prerequisite(s): ECON 2200 or permission of the instructor for all students

ECON 4770 SPORTS ECONOMICS (3 credits)

Economics is frequently considered an abstract topic, with interesting results that are not easily applied in the real world. Through Sports Economics, students will explore the very real ways in which economics influences sporting competitions and the businesses surrounding them. Students will explore topics such as unionization in sports, discrimination, amateurism, monopoly power, game theory, and more in the context of sports, giving the student a deeper understanding of how these topics apply to real-world problems. After this course, students will understand how readily economics can be applied to businesses and problems in any industry or domain. (Cross-listed with ECON 8256).

Prerequisite(s): ECON 2200 OR Equivalent OR Instructor Approval. Not open to non-degree graduate students.

ECON 4850 ECONOMICS OF URBAN AND REGIONAL DEVELOPMENT (3 credits)

This course will consider factors and trends in development at the global and national level but will focus primarily on economic development at the state, local, and regional levels in the United States. The focus of this course will be real world strategic planning for economic development. (Cross-listed with ECON 8856)

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better, or permission of instructor.

ECON 4990 SENIOR ASSESSMENT (0 credits)

This assessment tool is part of the Department's Student Outcomes effort. It is designed to monitor the Department's performance and to identify changes needed. Graduating seniors must register for and complete this course in the term in which they plan to graduate.

Prerequisite(s): Students must register for ECON 4990 in the term in which they plan to graduate. Not open to non-degree graduate students.

Educational Professional Sequence (EDUC)

Educational Professional Sequence Undergraduate Courses

EDUC 2510 APPLIED SPECIAL EDUCATION (3 credits)

This course is designed to describe the characteristics and learning styles of students with various exceptional learning needs. This course is also intended to provide pre-service teachers with the knowledge base and many of the teaching strategies/techniques essential for modifying the learning environment and individualizing instruction for students with exceptional learning needs. This course will prepare pre-service teacher candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world.

Prerequisite(s): Undergraduate, EDUC 2010, EDUC 2030; GPA=2.75 or better; Co-requisites EDUC 2520 and EDUC 2524

EDUC 2514 INTERMEDIATE FIELD EXPERIENCES ORIENTATION (0 credits)

Orientation for intermediate field experiences.

Prerequisite(s): EDUC 2010

EDUC 2524 INTERMEDIATE FIELD EXPERIENCES PRACTICUM (0 credits)

Co-requisite for EDUC 2510 and EDUC 2520

Prerequisite(s): EDUC 2010

Electrical and Computer Engineering (ECEN)

Electrical and Computer Engineering Undergraduate Courses

ECEN 103 ELECTRICAL AND COMPUTER ENGINEERING FUNDAMENTALS (4 credits)

Introduction to DC circuit analysis and digital logic. Topics include Ohm's and Kirchoff's laws, mesh and nodal analysis, Boolean algebra, logic gates, minimization, counters and flip-flops. Uses of computer based resources for data analysis and report generation. Use of internet to locate and retrieve engineering resources.

Prerequisite(s): MATH 1950 (pre or coreq)

ECEN 106 MICROPROCESSOR APPLICATIONS (3 credits)

Introduction to assembly language programming of microprocessors/microcontrollers, assemblers, and debugging tool utilization.

Microprocessor system hardware components, control signals, and 'C' language micro-controller programming.

Prerequisite(s): ECEN 103, CIST 1400

ECEN 123 INTRODUCTION TO ELECTRICAL AND COMPUTER ENGINEERING (1 credit)

Laboratory design projects introducing some basic concepts and skills needed in electrical and computer engineering.

Prerequisite(s): Coreq: CIST 1400. Open to first year students only or by permission.

ECEN 155E COMPUTER SCIENCE I: SYSTEMS ENGINEERING FOCUS (3 credits)

Introduction to problem solving with computers. Topics include problem solving methods, software development principles, computer programming, and computing in society.

Prerequisite(s): MATH 1330 or an ALEKS score for MATH 1340 or higher.

ECEN 156 COMPUTER SCIENCE II (4 credits)

Data structures, including linked lists, stacks, queues, and trees; algorithms, including searching, sorting, and recursion; programming language topics, including object-oriented programming; pointers, references, and memory management; design and implementation of a multilayer application with SQL database.

Prerequisite(s): A grade of "P" or "C" or better in ECEN 155E; coreq: MATH 1950.

ECEN 192 INDIVIDUAL STUDY IN COMPUTER AND ELECTRONICS ENGINEERING I (1-3 credits)

Individual study at the freshman level in a selected electrical, computer, or electronics engineering area under the supervision and guidance of an electrical and computer engineering faculty member.

Prerequisite(s): Departmentally approved proposal

ECEN 194 SPECIAL TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING I (1-4 credits)

Special topics in the emerging areas of electrical, computer and electronics engineering which may not be covered in the other courses in the electrical and computer engineering curriculum.

Prerequisite(s): Freshman standing or permission.

ECEN 198 SPECIAL TOPICS IN ELECTRICAL ENGINEERING I (1-6 credits)

Offered as the need arises to treat electrical engineering topics for first-year students not covered in other courses.

Prerequisite(s): Permission. Not open to non-degree graduate students.

ECEN 211 ELEMENTS OF ELECTRICAL ENGINEERING (3 credits)

Basic circuit analysis including direct and alternating currents and operational amplifiers. Digital signals and circuits. Not for electrical engineering majors.

Prerequisite(s): MATH 1960 and PHYS 2110

ECEN 213 ELECTRICAL CIRCUITS I (3 credits)

Electrical circuit theory, Kirchoff's and Ohm's laws, circuit analysis theorems, Norton and Thevenin equivalence. The analysis of resistor circuits, with capacitors and inductors, in DC and AC steady state. Transients and variable frequency response are studied, including computer solutions to circuit problems.

Prerequisite(s): ECEN 103 and ECEN 225. MATH 2350 prior to or concurrent.

ECEN 214 ELECTRICAL CIRCUITS II (3 credits)

Introduction to the analysis of electrical circuits in sinusoidal steady states. The concepts of impedance, phasors, power, frequency response, resonance, magnetic circuits and two-part networks. Transform techniques for circuit analysis.

Prerequisite(s): ECEN 213 and ECEN 218. Pre or Corequisite: MATH 2050.

ECEN 215 ELECTRONICS AND CIRCUITS I (3 credits)

Introduction to electrical engineering circuit theory. Kirchoff's law and circuit analysis theorem applied to steady state DC resistive circuits.

Analysis of transient RLC and sinusoidal steady-state circuits. Modern computer methods are employed.

Prerequisite(s): Co-Req; MATH 1970

ECEN 216 ELECTRONICS AND CIRCUITS II (3 credits)

Steady-state power calculations for sinusoidal single-phase and balanced three-phase circuits. Mutual inductance. Frequency response. Introduction to the fundamentals of semiconductor theory and their applications to P-N junction devices. Kirchoff's laws and circuit analysis theorems applied to steady-state diode circuits. Modern computer methods employed.

Prerequisite(s): ECEN 215 with grade of C or higher. Coreq: MATH 2350.

ECEN 217 ELECTRICAL CIRCUITS III (1 credit)

Analysis of first and second order RLC circuits using differential equations and Laplace transforms. Variable frequency network performance analysis. This course is for computer engineering majors only.

Prerequisite(s): ECEN 213. Not open to non-degree graduate students.

ECEN 218 ELECTRICAL CIRCUITS LABORATORY I (1 credit)

The use of laboratory tools for measurement and verification of electrical concepts. Experiments using both passive and semiconductor devices at audio frequencies. Analysis verification with computer simulation.

Prerequisite(s): Coreq: ECEN 213.

ECEN 220 INTRODUCTION TO EMBEDDED SYSTEMS (3 credits)

Basic hardware and software concepts of embedded microprocessor systems and interfacing with other hardware components. Simple circuits are designed and drivers to run these circuits are written. Design and build hardware and write drivers in assembly language.

Prerequisite(s): CSCI 1200 or working knowledge of C programming. Not open to non-degree graduate students.

ECEN 222 ELECTRONIC CIRCUITS I (4 credits)

Analysis and design of modern electronic circuits. Diode circuits, bipolar and field effect transistor switching and amplifier circuits, and operational amplifier circuits.

Prerequisite(s): ECEN 213 with grade of C or better, and ECEN 218.

ECEN 224 INTRODUCTION TO SIGNAL PROCESSING (4 credits)

This course demonstrates the use of mathematical and digital computation tools key to engineering applications. Auditory and visual senses are used in the presentation and study of sinusoidal signals, sampling, frequency response and filtering theory.

Prerequisite(s): ECEN 106, CIST 1400, MATH 1960.

ECEN 225 ELECTRICAL AND COMPUTER ENGINEERING SEMINAR (1 credit)

An overview of electrical, computer, electronics and telecommunication fields. There will be information on professional careers available upon graduation. Professionalism and ethics are addressed as well as the need for lifelong learning experiences.

Prerequisite(s): ECEN 103 or parallel

ECEN 231 ELECTRICAL ENGINEERING LABORATORY (1 credit)

Laboratory accompanying ECEN 211.

Prerequisite(s): Coreq: ECEN 211. Not open to non-degree graduate students.

ECEN 235 INTRODUCTORY ELECTRICAL LABORATORY I (1 credit)

Laboratory accompanying ECEN 215.

Prerequisite(s): Coreq: ECEN 215.

ECEN 236 INTRODUCTORY ELECTRICAL LABORATORY II (1 credit)

Laboratory accompanying ECEN 216

Prerequisite(s): ECEN 235, Coreq: ECEN 216.

ECEN 292 INDIVIDUAL STUDY IN ELECTRICAL AND COMPUTER ENGINEERING II (1-3 credits)

Individual study in a selected electrical, computer or electronics engineering area under the supervision and guidance of a electrical and computer engineering faculty member.

Prerequisite(s): Sophomore Standing, ECE departmentally approved proposal.

ECEN 294 SPECIAL TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING II (1-4 credits)

Special topics in the emerging areas of electrical, computer and electronics engineering at the sophomore level which may not be covered in the other courses in the electrical and engineering curriculum.

Prerequisite(s): Sophomore standing or permission.

ECEN 304 SIGNALS AND SYSTEMS I (3 credits)

Mathematical modeling of physical systems and signals. Representation of signals in terms of basic functions. Fourier Series expansion, Fourier Transforms, Laplace and Z-Transforms. Input-output relations, convolution. Transfer functions. System Stability. Poles/zeros and s- and z-plane methods. Applications.

Prerequisite(s): ECEN 214 or ECEN 216 with a grade of C or better and MATH 2350.

ECEN 305 PROBABILITY THEORY AND STATISTICS FOR ELECTRICAL AND COMPUTER ENGINEERS (3 credits)

Random experiment model, random variables, functions of random variables, and introduction to random processes; statistics and practical data analysis.

Prerequisite(s): MATH 1970/(UNL)MATH 208

ECEN 306 ELECTROMAGNETIC FIELD THEORY (3 credits)

Complex vectors, Maxwell's equations. Uniform plane waves. Wave reflection and transmission at interfaces. Waveguides and resonators. Transmission line principles. Antennas. Topics in waves.

Prerequisite(s): ECEN 215 or ECEN 213 with grade of C or better, PHYS 2120, MATH 1970, MATH 2350., not open to non-degree graduate students.

ECEN 307 ELECTRICAL ENGINEERING LABORATORY I (2 credits)

Laboratory work on circuits and systems, digital and analog electronic circuits.

Prerequisite(s): ECEN 106; ECEN 222 or ECEN 236; Coreq: ECEN 313 or ECEN 370; Admission to College of Engineering; not open to non-degree graduate students.

ECEN 310 DIGITAL DESIGN AND INTERFACING (4 credits)

Digital design from both the circuit and system perspectives. Topics include the structure and analysis of digital integrated circuits, interface signal integrity, Field Programmable Gate Array (FPGA) design and synthesis, software simulation. Lab exercises provide hands-on experience with design tools and the design process.

Prerequisite(s): ECEN 222. Prereq or coreq: ECEN 313.

ECEN 313 SWITCHING CIRCUITS THEORY (4 credits)

Combinational circuit analysis and design. State machine analysis and design. Includes synchronous/clock mode circuits and asynchronous sequential circuits. Minimization, race and hazard elimination are covered. Circuits are implemented in discrete logic and in CPLD and FPGA devices. VHDL hardware description language is used to describe circuits. Circuits are implemented in discrete logic and in CPLD/FPGA devices.

Prerequisite(s): ECEN 106.

ECEN 316 ELECTRONICS AND CIRCUITS III (3 credits)

Kirchhoff's laws and circuit analysis theorems applied to steady state transistor circuits. Frequency response of filters and amplifiers. Basic power amplifier types. Advanced operational amplifier circuits. Introduction to the fundamentals of semiconductor theory and their application to p-n junction and field devices.

Prerequisite(s): ECEN 216 with grade of C or better.

ECEN 317 ELECTRICAL ENGINEERING LABORATORY II (2 credits)

Lab work on electromagnetic fields and waves, solid state devices, discrete systems, control systems, and communications.

Prerequisite(s): ECEN 304, ECEN 307 Coreq: ECEN 306, ECEN 316, not open to non-degree graduate students.

ECEN 325 COMMUNICATIONS SYSTEMS (4 credits)

Relevant communication systems; principles of transmission and reception; amplitude; frequency and phase modulation. Sampling theorem, pulse-code modulation and delta modulation.

Prerequisite(s): ECEN 222; Coreq: ECEN 305.

ECEN 327 DISCRETE SYSTEMS LABORATORY (1 credit)

Laboratory work on discrete systems.

Prerequisite(s): ECEN 106 or ECEN 220 and ECEN 307

ECEN 328 APPLIED FIELDS AND LINES I (3 credits)

Transmission lines. Discontinuities, different termination, and matching methods. Application of vector analysis to Maxwell's equations. Uniform plane waves including reflection/transmission. S-parameters. Principles of antennas. LW, MW, SW, USW propagation.

Prerequisite(s): MATH 1970 and MATH 2350

ECEN 329 APPLIED FIELDS AND LINES II (3 credits)

Metallic waveguides with rectangular, circular and coaxial cross section, antennas, free space, propagation in free space, applications.

Prerequisite(s): ECEN 328.

ECEN 332 ASSEMBLY LANGUAGE PROGRAMMING (1 credit)

Architecture and assembly language programming of 8-bit and 32-bit microcontrollers.

Prerequisite(s): ECEN 106

ECEN 338 INTRODUCTION TO POWER AND ENERGY SYSTEMS (3 credits)

Energy sources, environmental impacts, power systems principles, three phase circuits, transmission lines, transformers, per unit analysis, generators, loads, and power system modeling.

Prerequisite(s): ECEN 216 or ECEN 214 with grade of C or better. Not open to non-degree graduate students.

ECEN 345 MOBILE ROBOTICS I (4 credits)

Introduction to the primary issues spanning the field of mobile robotics, including robotics history, robot components (sensors, actuators), robot system design considerations, low-level control (feedback control) and robotics control architectures. The lab focuses on the practical implementation of autonomous robot control on a real mobile robot using behavior-based methods in the C language.

Prerequisite(s): ECEN 106, ECEN 213.

ECEN 347 ELECTRICAL ENGINEERING LABORATORY II (1 credit)

Lab work on electromagnetics, fields and waves, solid state devices and control systems.

ECEN 350 ELECTRICAL AND COMPUTER ENGINEERING COOPERATIVE EDUCATIONAL EXPERIENCE (1-3 credits)

For cooperatives primarily technical in nature lasting 4.5 months or greater. Weekly communication and/or final report required. Must be taken during or after the semester in which the Co-op occurs.

Prerequisite(s): Permission. Not open to non-degree graduate students.

ECEN 352 ELECTRONIC CIRCUITS II (4 credits)

Operational amplifier circuit design and analysis with emphasis on feedback and stability. Design and analysis of large signal power amplifiers. Other integrated devices such as regulators, comparators, Schmitt triggers, oscillators and active filters.

Prerequisite(s): ECEN 222

ECEN 355 SIGNALS AND LINEAR SYSTEMS (3 credits)

Continuous and discrete time representations of signals. System modeling and analysis using differential and difference equations. Fourier, Laplace and z transforms. State description of continuous and discrete time transfer functions. The primary mathematical tools used in the analysis of continuous and discrete time systems.

Prerequisite(s): ECEN 214

ECEN 361 ADVANCED ELECTRONICS AND CIRCUITS (3 credits)

Analog and digital electronics for discrete and integrated circuits. Multistage amplifiers, frequency response, feedback amplifiers, simple filters and amplifiers MOS and bipolar logic gates and families A/D and D/A converters.

Prerequisite(s): ECEN 316; not open to non-degree graduate students.

ECEN 362 DATA AND TELECOMMUNICATIONS TRANSCEIVERS (4 credits)

Noise and signal distortions in communication systems, impedance matching techniques, high frequency measurement techniques, design of high frequency amplifiers and oscillators, PLL and frequency synthesizers, data synchronization and multiplexing techniques, Antennas and their arrays.

Prerequisite(s): ECEN 352; Pre or Coreq.: ECEN 325, ECEN 328

ECEN 370 DIGITAL LOGIC DESIGN (3 credits)

Combinational and sequential logic circuits. MSI chips, programmable logic devices (PAL, ROM, PLA) used to design combinational and sequential circuits. CAD tools. LSI and PLD components and their use. Hardware design experience.

Prerequisite(s): ECEN 121, not open to non-degree graduate students.

ECEN 392 INDIVIDUAL STUDY IN ELECTRICAL AND COMPUTER ENGINEERING III (1-3 credits)

Individual study in a selected electrical, computer or electronics engineering area under the supervision and guidance of a electric and computer engineering faculty member.

Prerequisite(s): Junior standing and ECE departmentally approved proposal.

ECEN 394 SPECIAL TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING III (1-4 credits)

Special topics in the emerging areas in electrical, computer and electronics engineering which may not be covered in the other courses in the Electrical and Computer engineering curriculum.

Prerequisite(s): Junior standing or permission.

ECEN 398 SPECIAL TOPICS ELECTRICAL ENGINEERING III (1-6 credits)

Offered as the need arises to treat electrical engineering topics for third-year students not covered in other courses.

Prerequisite(s): Permission. Not open to nondegree students.

ECEN 399 UNDERGRADUATE RESEARCH (1-3 credits)

Research accompanied by a written report.

Prerequisite(s): Electrical engineering seniors or permission., not open to non-degree graduate students

ECEN 400 ELECTRONIC INSTRUMENTATION (3 credits)

Applications of analog and digital devices to electronic instrumentation. Includes transducers, instrumentation amplifiers, mechanical and solid state switches, data acquisition systems, phase-lock loops, and modulation techniques. Demonstrations with working circuits and systems. (Cross-listed with ECEN 800)

Prerequisite(s): Senior Standing in Engineering or Permission. Not open to non-degree graduate students.

ECEN 406 POWER SYSTEMS ANALYSIS (3 credits)

Symmetrical components and fault calculations, power system stability, generator modeling (circuit view point), voltage control system, high voltage DC transmission, and system protection. (Cross-listed with ECEN 806)

Prerequisite(s): ECEN 338, not open to non-degree graduate students.

ECEN 407 POWER SYSTEMS PLANNING (3 credits)

Economic evaluation, load forecasting, generation planning, transmission planning, production simulation, power plant reliability characteristics, and generation system reliability. (Cross-listed with ECEN 807)

Prerequisite(s): ECEN 305, not open to non-degree graduate students.

ECEN 408 ENGINEERING ELECTROMAGNETICS (3 credits)

Applied electromagnets: Transmission lines in digital electronics and communication. The quasistatic electric and magnetic fields; electric and magnetic circuits and electromechanical energy conversion. Guided waves; rectangular and cylindrical metallic waveguides and optical filters. Radiation and antennas; line and aperture antennas and arrays. (Cross-listed with ECEN 808)

Prerequisite(s): ECEN 306, not open to non-degree graduate students.

ECEN 410 MULTIVARIATE RANDOM PROCESSES (3 credits)

Probability space, random vectors, multivariate distributions, moment generating functions, conditional expectations, discrete and continuous-time random processes, random process characterization and representation, linear systems with random inputs. (Cross-listed with ECEN 810)

Prerequisite(s): ECEN 305. Not open to non-degree graduate students.

ECEN 416 MATERIALS AND DEVICES FOR COMPUTER MEMORY, LOGIC, AND DISPLAY (3 credits)

Survey of fundamentals and application of devices used for memory, logic, and display. Magnetic, superconductive, semi-conductive, and dielectric materials. (Cross-listed with ECEN 816)

Prerequisite(s): PHYS 2120, not open to non-degree graduate students.

ECEN 417 SEMICONDUCTOR FUNDAMENTALS II (3 credits)

Analysis of BJT's and MOSFET's from a first principle materials viewpoint. Statics and dynamic analysis and characterization. (Cross-listed with ECEN 817)

Prerequisite(s): ECEN 421 or ECEN 821. Not open to non-degree graduate students.

ECEN 420 PLASMA PROCESSING OF SEMICONDUCTORS (3 credits)

Physics of plasmas and gas discharges developed. Includes basic collisional theory, the Boltzman equation and the concept of electron energy distribution. Results are related to specific gas discharge systems used in semiconductor processing, such as sputtering, etching, and deposition systems. (Cross-listed with ECEN 820)

Prerequisite(s): Senior or graduate standing. Not open to non-degree graduate students.

ECEN 421 PRINCIPLES OF SEMICONDUCTOR MATERIALS AND DEVICES I (3 credits)

Introduction to semiconductor fundamentals, charge carrier concentration and carrier transport, energy bands, and recombination. PN junction, static and dynamic, and special PN junction diode devices. (Cross-listed with ECEN 821)

Prerequisite(s): PHYS 2130. Not open to non-degree graduate students.

ECEN 424 DIGITAL SIGNAL PROCESSING (3 credits)

The temporal and spectral analysis of digital signals and systems, the design of digital filters and systems, and advanced systems including multi-rate digital signal processing techniques. (Cross-listed with ECEN 824)

Prerequisite(s): ECEN 355

ECEN 428 POWER ELECTRONICS (3 credits)

Basic analysis and design of solid-state power electronic devices and converter circuitry. (Cross-listed with ECEN 828)

Prerequisite(s): ECEN 304, ECEN 316.

ECEN 430 WIND ENERGY (3 credits)

This broad multidisciplinary course will combine engineering principles of both the mechanical/aerodynamical and electrical components and systems, along with economic and environmental considerations for siting and public policy, to appropriately cover the relevant topics associated with all scales of wind energy implementations. (Cross-listed with ECEN 830)

Prerequisite(s): Senior standing or permission.

ECEN 433 MICROPROCESSOR SYSTEM DESIGN (4 credits)

Microprocessor based systems. Architecture; design and interfacing. Memory design, input/output ports, serial communications, and interrupts. Generating assembly ROM code, assembly/C firmware generation, and designing device drivers. (Cross-listed with ECEN 833)

Prerequisite(s): ECEN 310 with grade of C or better and ECEN 332 with grade of C or better.

ECEN 435 EMBEDDED MICROCONTROLLER DESIGN (4 credits)

Microcontroller architecture: design, programming, and interfacing for embedded systems. Timing issues, memory interfaces, serial and parallel interfacing, and functions for common microcontrollers. (Cross-listed with ECEN 835)

Prerequisite(s): ECEN 433/ECEN 833 with grade of C or better, STAT 3800.

ECEN 436 ELECTRIC MACHINES (3 credits)

Provides a solid background in electric machine analysis, covering fundamental concepts, techniques, and methods for analysis and design. Discussion of transformers and presentation of some new systems and applications. (Cross-listed with ECEN 836).

Prerequisite(s): PHYS 2120 and ECEN 216

ECEN 437 PARALLEL AND DISTRIBUTED PROCESS (3 credits)

Parallel and Distributed Processing concepts, principles, techniques and machines. (Cross-listed with ECEN 837).

Prerequisite(s): ECEN 435 or ECEN 835

ECEN 442 BASIC ANALYTICAL TECHNIQUES IN ELECTRICAL ENGINEERING (3 credits)

Applications of partial differential equations, matrices, vector analysis, complex variables, and infinite series to problems in electrical engineering. (Cross-listed with ECEN 842)

Prerequisite(s): MATH 2350. Not open to non-degree graduate students.

ECEN 444 LINEAR CONTROL SYSTEMS (3 credits)

Classical (transfer function) and modern (state variable) control techniques. Both time domain and frequency domain techniques are studied.

Traditional, lead, lag, and PID compensators are examined, as well as state variable feedback. (Cross-listed with ECEN 844)

Prerequisite(s): ECEN 304. Not open to non-degree graduate students.

ECEN 448 DECISION ANALYSIS (3 credits)

Principles of engineering economy including time value of money, net present value, and internal rate of return. Use of influence diagram and decision tree to structure and analyze decision situations under uncertainty including use of stochastic dominance, value of information, and utility theory. Fundamentals of two-person matrix games including Nash equilibrium. (Cross-listed with ECEN 848)

Prerequisite(s): ECEN 305 or STAT 3800.

ECEN 450 BIOINFORMATICS (3 credits)

This course examines how information is organized in biological sequences such as DNA and proteins and will look at computational techniques which make use of this structure. During this class various biochemical processes that involve these sequences are studied to understand how these processes effect the structure of these sequences. In the process bioinformatics algorithms, tools, and techniques which are used to explore genomic and amino acid sequences are also introduced. (Cross-listed with ECEN 850)

Prerequisite(s): Computer programming language and ECEN 305 or STAT 3800 or equivalent.

ECEN 451 INTRODUCTION TO VLSI SYSTEM DESIGN (3 credits)

The concepts, principles, and methodology at all levels of digital VLSI system design and focused on gate-level VLSI implementation. (Cross-listed with ECEN 851).

Prerequisite(s): ECEN 310

ECEN 452 INTRODUCTION TO COMPUTER-AIDED DIGITAL DESIGN (3 credits)

The concepts, simulation techniques and methodology in computer-aided digital design at system and logic levels. (Cross-listed with ECEN 852)

Prerequisite(s): ECEN 310

ECEN 453 COMPUTATIONAL AND SYSTEMS BIOLOGY (3 credits)

Provides the required biology primer and covers functional genomics, transcriptomics, differential expression, clustering, classification, prediction, biomarker discovery, pathway analysis and network based approaches to high throughput biological data analysis. Includes the development of databases, algorithms, web-based and other tools regarding management and analysis of life science data. Areas of study include DNA, RNA, and protein sequence analysis, functional genomics and proteomics, 3D macromolecule structure prediction, and systems/network approach. (Cross-listed with ECEN 853).

Prerequisite(s): By permission.

ECEN 454 POWER SYSTEMS OPERATION AND CONTROL (3 credits)

Characteristics and generating units. Control of generation, economic dispatch, transmission losses, unit commitment, generation with limited supply, hydrothermal coordination, and interchange evaluation and power pool. (Cross-listed with ECEN 854)

Prerequisite(s): ECEN 338 or ECEN 838. Not open to non-degree graduate students.

ECEN 460 LABVIEW PROGRAMMING (3 credits)

Labview as a programming language and for applications to acquire data, to access the network, control lab instruments, and for video and sound applications. (Cross-listed with ECEN 860)

Prerequisite(s): Prior programming experience.

ECEN 461 DIGITAL COMMUNICATIONS MEDIA (4 credits)

Topics related to the transport of bit streams from one geographical location to another over various physical media such as wire pairs, coaxial cable, optical fiber, and radio waves. Transmission characteristics, media interfacing, delay, distortion, noise, and error detection and correction techniques. (Cross-listed with ECEN 861)

Prerequisite(s): ECEN 325 or ECEN 462

ECEN 462 COMMUNICATION SYSTEMS (3 credits)

Mathematical descriptions of signals in communication systems. Principles of analog modulation and demodulation. Performance analysis of analog communication systems in the presence of noise. (Cross-listed with ECEN 862)

Prerequisite(s): ECEN 304 and ECEN 305. Not open to non-degree graduate students.

ECEN 463 DIGITAL SIGNAL PROCESSING (3 credits)

Discrete system analysis using Z-transforms. Analysis and design of digital filters. Discrete Fourier transforms. (Cross-listed with ECEN 863)

Prerequisite(s): ECEN 304. Not open to non-degree graduate students.

ECEN 464 DIGITAL COMMUNICATION SYSTEMS (3 credits)

Principles of digital transmission of information in the presence of noise. Design and analysis of baseband PAM transmission systems and various carrier systems including ASK, FSK, PSK. (Cross-listed with ECEN 864)

Prerequisite(s): ECEN 462. Not open to non-degree graduate students.

ECEN 465 INTRODUCTION TO DATA COMPRESSION (3 credits)

Introduction to the concepts of Information Theory and Redundancy removal. Simulation of various data compression schemes such as Delta Modulation, Differential Pulse Code Modulation, Transform Coding and Runlength Coding. (Cross-listed with ECEN 865)

Prerequisite(s): ECEN 305. Not open to non-degree graduate students.

ECEN 466 TELECOMMUNICATION ENGINEERING I (4 credits)

Standard telecommunications protocols, architecture of long distance integrated data networks, local area networks, wide area networks, radio and satellite networks. Network management, internetworking, system modeling and performance analysis. (Cross-listed with ECEN 866)

Prerequisite(s): ECEN 362; ECEN 461/ECEN 861 prior to or concurrent.

ECEN 467 ELECTROMAGNETIC THEORY AND APPLICATIONS (3 credits)

Engineering application of Maxwell's equations. Fundamental Parameters of Antennas, Radiation analysis, and synthesis of antenna arrays. Aperture Antennas. (Cross-listed with ECEN 867)

Prerequisite(s): ECEN 306. Not open to non-degree graduate students.

ECEN 468 MICROWAVE ENGINEERING (3 credits)

Applications of active and passive devices to microwave systems. Includes impedance matching, resonators, and microwave antennas. (Cross-listed with ECEN 868)

Prerequisite(s): ECEN 306. Not open to non-degree graduate students.

ECEN 469 ANALOG INTEGRATED CIRCUITS (3 credits)

Analysis and design of analog integrated circuits both bipolar and MOS. Basic circuit elements such as differential pairs, current sources, active loads, output drivers used in the design of more complex analog integrated circuits. (Cross-listed with ECEN 869)

Prerequisite(s): ECEN 361. Not open to non-degree graduate students.

ECEN 470 DIGITAL AND ANALOG VLSI DESIGN (3 credits)

Introduction to VLSI design techniques for analog and digital circuits. Fabrication technology and device modeling. Design rules for integrated circuit layout. LSI design options with emphasis on the standard cell approach of digital and analog circuits. Lab experiments, computer simulation and layout exercises. (Cross-listed with ECEN 870)

Prerequisite(s): ECEN 361. Not open to non-degree graduate students.

ECEN 471 COMPUTER COMMUNICATION NETWORKS (4 credits)

This course investigates the standard protocols and hardware solutions defined by the International Standard Organization (ISO) and Institute of Electrical and Electronics Engineers (IEEE) for the computer communications networks. Included are ISO OSI model, IEEE 802.X (Ethernet, token bus, token ring) and Asynchronous Transfer Modals (ATM) networks. (Cross-listed with ECEN 871)

Prerequisite(s): ECEN 325

ECEN 473 MOBILE AND PERSONAL COMMUNICATIONS (4 credits)

This course provides basic concepts on mobile and personal communications. Concepts on mobile and personal communications. Modulation techniques for mobile radio, equalization, diversity, channel coding, and speech coding. (Cross-listed with ECEN 873)

Prerequisite(s): ECEN 325

ECEN 474 DIGITAL SYSTEMS (3 credits)

Synthesis using state machines; design of digital systems; micro programming in small controller design; hardware description language for design and timing analysis. (Cross-listed with ECEN 874)

Prerequisite(s): ECEN 370. Not open to non-degree graduate students.

ECEN 475 SATELLITE COMMUNICATIONS (4 credits)

The fundamental concepts of satellite communications. Orbits, launching satellites, modulation and multiplexing, multiple access, earth stations, coding, interference and special problems in satellite communications. (Cross-listed with ECEN 875)

Prerequisite(s): ECEN 325

ECEN 476 WIRELESS COMMUNICATIONS (3 credits)

The fundamental concepts of wireless communications. Basic communications concepts such as multiple access, and spectrum. Propagation, radio, standards, and internetworking. Current issues in wireless communications. (Cross-listed with ECEN 876)

Prerequisite(s): ECEN 325 or ECEN 462 prior to or concurrent

ECEN 477 DIGITAL SYSTEMS ORGANIZATION AND DESIGN (3 credits)

Hardware development languages, hardware organization and realization, microprogramming, interrupt, intersystem communication, and peripheral interfacing. (Cross-listed with ECEN 877)

Prerequisite(s): ECEN 474 or ECEN 874. Not open to non-degree graduate students.

ECEN 479 OPTICAL FIBER COMMUNICATIONS (4 credits)

Fundamentals of lightwave communication in optical fiber waveguides, physical description of fiber optic systems. Properties of the optical fiber and fiber components. Electro-optic devices: light sources and modulators, detectors and amplifiers; optical transmitter and receiver systems. Fiber optic link design and specification; fiber optic networks. (Cross-listed with ECEN 879)

Prerequisite(s): ECEN 461 or permission

ECEN 480 INTRODUCTION TO LASERS AND LASER APPLICATIONS (3 credits)

Physics of electronic transition production stimulated emission of radiation. Threshold conditions for laser oscillation. Types of lasers and their applications in engineering. (Cross-listed with ECEN 880)

Prerequisite(s): PHYS 2130

ECEN 482 ANTENNAS AND RADIO PROPAGATION FOR WIRELESS COMMUNICATIONS (4 credits)

Fundamental theory of antennas and radio propagation for wireless communications. Basic antenna characteristics and various antennas and antenna arrays. Basic propagation mechanisms and various channel models, such as Friis free space model, Hata model, lognormal distribution, and multipath model. Includes practical antenna design for high radio frequency (RF) with modeling software tools such as Numerical Electromagnetic Code (NEC) and ADvanced Design System (ADS). Design projects will be assigned as the main part of course. (Cross-listed with ECEN 882)

Prerequisite(s): ECEN 328

ECEN 484 NETWORK SECURITY (4 credits)

Network security and cryptographic protocols. Classical encryption techniques, block ciphers and stream cyphers, public-key cryptography, authentications digital signatures, key management and distributions, network vulnerabilities, transport-level security, IP security. (Cross-listed with ECEN 884)

Prerequisite(s): ECEN 325

ECEN 486 APPLIED PHOTONICS (3 credits)

Introduction to the use of electromagnetic radiation for performing optical measurements in engineering applications. Basic electromagnetic theory and light interaction with matter are covered with corresponding laboratory experiments conducted. (Cross-listed with ECEN 886)

Prerequisite(s): ECEN 306 or permission. Not open to non-degree graduate students.

ECEN 488 WIRELESS SECURITY (4 credits)

A comprehensive overview on the recent advances in wireless network and system security. Covers security issues and solutions in emerging wireless access networks and systems as well as multihop wireless networks. (Cross-listed with ECEN 888)

Prerequisite(s): ECEN 325

ECEN 491 SPECIAL TOPICS IN ELECTRIC AND COMPUTER ENGINEERING IV (1-4 credits)

Special topics in the emerging areas of electrical, computer and electronics engineering which may not be covered in the other courses in the electrical, and computer engineering curriculum. (Cross-listed with ECEN 891)

Prerequisite(s): Senior standing

ECEN 492 INDIVIDUAL STUDY IN ELECTRICAL AND COMPUTER ENGINEERING IV (1-3 credits)

Individual study in a selected electrical, computer or electronics engineering area under the supervision and guidance of a Electrical and Computer Engineering faculty member. (Cross-listed with ECEN 892).

Prerequisite(s): Senior or graduate standing and departmentally approved proposal.

ECEN 494 ELECTRICAL ENGINEERING CAPSTONE I (2 credits)

A substantial design project that allows application of electrical engineering skills to a multidisciplinary project. Requires project definition, planning and scheduling, effective written and oral communication of technical ideas, incorporation of realistic constraints and engineering standards, functioning effectively on a multidisciplinary team, and applying new ideas as needed to meet project goals.

Prerequisite(s): ECEN 222, ECEN 304, ECEN 306, ECEN 313, and (UNO) ENGL 1160. The ECE department changed its English composition requirements to ENGL 1160 (UNO); ENGL 1160 is required, not technical writing.

ECEN 495 ELECTRICAL ENGINEERING CAPSTONE II (3 credits)

A substantial design project that allows application of electrical engineering skills to a multidisciplinary project. Requires project definition, planning and scheduling, effective written and oral communication of technical ideas, incorporation of realistic constraints and engineering standards, functioning effectively on a multidisciplinary team and applying new ideas as needed to meet project goals.

Prerequisite(s): ECEN 494

ECEN 496 COMPUTER ENGINEERING CAPSTONE I (2 credits)

A substantial design project that allows application of computer engineering skills to a multidisciplinary project. Requires project definition, planning and scheduling, effective written and oral communication of technical ideas, incorporation of realistic constraints and engineering standards, functioning effectively on a multidisciplinary team, and applying new ideas as needed to meet project goals. The first in a two semester computer engineering capstone senior design course sequence.

Prerequisite(s): ECEN 433; (UNO) ENGL 1160. The ECE department changed its English composition requirements to ENGL 1160 (UNO); ENGL 1160 is required, not technical writing.

ECEN 498 SPECIAL TOPICS IN ELECTRICAL ENGINEERING IV (1-6 credits)

Offered as the need arises to meet electrical engineering topics for fourth-year and graduate students not covered in other courses. (Cross-listed with ECEN 898)

Prerequisite(s): Permission.

ECEN 499 COMPUTER ENGINEERING CAPSTONE II (3 credits)

Requires the completion of a design project that demonstrates the ability to combine knowledge from individual courses in the program to complete a design task. The capstone design course for the B.S. in computer engineering, electrical engineering and electronics engineering.

Prerequisite(s): ECEN 496. Not open to non-degree graduate students.

ECEN 4220 INTRODUCTION TO PHYSICS AND CHEMISTRY OF SOLIDS (3 credits)

Introduction to structural, thermal, electrical, and magnetic properties of solids, based on concepts of atomic structure, chemical bonding in molecules, and electron states in solid state devices. (Cross-listed with ECEN 8226).

Prerequisite(s): PHYS 2130 or CHEM 3350, MATH 2350 or permission. Not open to non-degree graduate students.

Emergency Management (EMGT)

Emergency Management Undergraduate Courses

EMGT 1000 INTRODUCTION TO EMERGENCY MANAGEMENT (3 credits)

This course is an introduction to the National Response Framework (NRF) and the National Incident Management System (NIMS) and their influence on modern community Emergency Management and Homeland Security. The course conceptually introduces the four phases of Emergency Management: Mitigation, Preparedness, Response, and Recovery.

Distribution: Social Science General Education course

EMGT 1150 INTRODUCTION TO TRIBAL MANAGEMENT AND EMERGENCY SERVICES (3 credits)

This course is an introduction to how Tribal history and contemporary governance affect the delivery of emergency management services on Tribal lands as well as how the National Response Framework (NRF) and the National Incident Management System (NIMS) are integrated to provide emergency services. The course focuses on the challenges of implementing the five mission areas of Emergency Management: Mitigation, Preparedness, Prevention, Response, and Recovery for Native American Communities.

Distribution: Social Science General Education course and U.S. Diversity General Education course

EMGT 2020 EMERGENCY MANAGEMENT STRATEGIES AND COMMUNICATION (3 credits)

This course covers tactical issues, current communication methods, and critical information channels utilized during actual disaster and emergency management field operations. Topics include inter-agency linkages, command and control tactics, National Incident Management System and the Incident Command System, (NIMS-ICS) and other crucial management requirements for successful disaster planning, mitigation, and recovery operations.

Prerequisite(s): EMGT 1000 or concurrent.

EMGT 2050 POLITICAL AND LEGAL FOUNDATIONS IN EMERGENCY SERVICES (3 credits)

The provision of Emergency Services in contemporary society occurs within an environment of legal requirements and community resource allocation that often requires difficult administrative and political decisions. Successful professionals who control, manage, and operate these services must understand and adhere to the demand and intent of the law. Also, they must master the practical art of politics related to the various community constituents and shareholders who fund and support them, staff them, and utilize them. This course examines the legal aspects and social consequences of emergency management provision. Environmental issues and Occupational Health and Safety policy and programs affecting emergency services are also examined.

Prerequisite(s): EMGT 1000 or taken concurrently with EMGT 1000.

EMGT 2060 FOUNDATIONAL INDIAN LAW & POLICY ISSUES (3 credits)

This course provides an examination of the federal and tribal legal cases and policies that affect the delivery of critical services on tribal lands. The course will also examine how such case law and resulting policy affects current U.S./Tribal/State relationship, specifically in the area of sovereignty and regulatory jurisdiction of emergency management principles. The student will gain an understanding of the legal obligations of Tribal Government and the emergency manager with regard to disaster response within the legal context of tribal law and policy.

Prerequisite(s): EMGT 1150 or concurrent.

EMGT 2500 DISASTERS AND VULNERABLE POPULATIONS (3 credits)

This course is an introduction to the sociological examination of disasters. In the course students will learn about vulnerability in terms of social, economic, political, geographical and cultural factors. Students will investigate how vulnerable groups such as children, elderly, racial and ethnic minorities, and low income, are affected and cope before, during and after hazardous events. Other topics covered include: disaster warning responses, evacuation behavior, survival behavior, roles of volunteers, and disaster impacts.

Distribution: U.S. Diversity General Education course and Social Science General Education course

EMGT 3020 FEDERAL/TRIBAL GOVERNMENT TO GOVERNMENT RELATIONS (3 credits)

This course will introduce the Federal/Tribal government to government relationship that has evolved through U.S. Supreme Court case law; federal Indian policy; and through the Indian Self Determination and Education Assistance Act of 1975. Specifically, this course will focus on overcoming the challenges of implementing Emergency Management principles between the U. S. and Tribal governments by understanding how the government to government relationship works.

Prerequisite(s): EMGT 1150 or concurrent.

EMGT 3040 PREPAREDNESS/PLANNING AND RISK MITIGATION (3 credits)

Provision of emergency and management of emergency services is dependent on extensive planning and preparedness. This process aids in the reduction of loss of property and life in extreme circumstances, even when confronted with a variety of environmental and politically motivated risks. An open society, which becomes ever more highly technological, demonstrates new sources of stress, complicated threats, and complex inter-relationships. Together, these factors present a significant challenge to those tasked with preventing and managing emergencies and disasters. This course provides a theoretical framework for the understanding of the ethical, sociological, organizational, political, and legal components of community risk analysis and mitigation, and a methodology for the development of comprehensive community risk preparedness planning.

Prerequisite(s): EMGT 2020, EMGT 2050, PA 3000 / CRCJ 3000 / SOWK 3000 or concurrent.

EMGT 3060 EMERGENCY MANAGEMENT IN COMPARATIVE PERSPECTIVE (3 credits)

Although many of the fundamental elements are similar across countries, there are also important differences in how emergency management is conducted around the world. In this course, we compare and contrast emergency management in different countries. The course is designed to provide students with a general, theoretical, and practical understanding of emergency management in other countries. This knowledge of the history, natural hazards, leadership, culture, experiences, and approaches of different countries will help us make connections and draw lessons for emergency management in the U.S.

Prerequisite(s): EMGT 1000 or EMGT 1150

EMGT 3080 AGENCY COLLABORATION DURING DISASTERS (3 credits)

Federal, state, and local agency cooperation and interoperability in the provision of emergency management will be studied in this course. Federal, state, and local government authority and roles will be explored in concert with collaborative management programs. The origins of collaborative partnerships will be presented along with introduction of the Emergency Management Assistance Compact, development of volunteer networks, and formation of partnerships with the Citizen Corps, Community emergency Response Teams, the Medical Reserve Corps and Mercy Medical Airlift, and other groups that have the potential to contribute to the emergency management and response effort.

Prerequisite(s): EMGT 2020, EMGT 2050, PA 3000 / CRCJ 3000 or concurrent.

EMGT 4020 PROTECTING AND SUSTAINING TRIBAL ECONOMIES (3 credits)

This course provides an understanding of unique tribal economies and how they operate under tribal law, constitutions and federal legislation, as well as an appreciation of how vulnerable tribal economies are to man-made and natural disasters. This course will also introduce Emergency Management principles and practices designed to assist tribal governments in protecting and sustaining their economies during crisis events.

Prerequisite(s): EMGT 1150 or concurrent.

EMGT 4050 INTEGRATION OF CONTEMPORARY ISSUES IN TRIBAL EMERGENCY MANAGEMENT (3 credits)

This course covers application and integration of Tribal Management and Emergency Service (TMES) principles and practices, as well as contemporary issues affecting Tribal nations and their citizens; recent federal/tribal TMES legislation and case law; Federal/Tribal agency collaborative efforts; TMES Tribal Code development and implementation; and TMES funding resources such as PL 93-638 Contracts, grants and tribal taxation.

Prerequisite(s): EMGT 1150 or concurrent.

EMGT 4060 DISASTER RESPONSE AND RECOVERY (3 credits)

This course examines concepts and principles of: 1) community risk assessment, 2) disaster recovery planning, 3) responses specific to fires and natural and man-made disasters, 3) National Incident Management System and the Incident Command System (NIMS ICS), 4) mutual aid and automatic response, 5) training and preparedness, 6) communications, 7) civil disturbances, 8) terrorist threats/incidents, 9) hazardous materials planning, 10) mass casualty incidents, 11) earthquake preparedness, and 12) disaster mitigation and recovery.

Prerequisite(s): EMGT 3040 (May be taken concurrently) or by instructor's permission

EMGT 4200 INTERNSHIP IN EMERGENCY MANAGEMENT (3 credits)

This course is designed to provide direct work experience in the emergency management field for selected students. This experience will be in a full-time or part-time, preferably paid position, in a highly structured environment. Student will be selected following formal job placement procedures and screening by Emergency Management Faculty and the participating organization. This course is intended for upper level, Emergency Management majors who have been selected following an application and interview process approved by both the School of Public Administration and the intern provider.

Prerequisite(s): PA 3000 / CRCJ 3000; EMGT 3040, EMGT 3080, EMGT 4060; Instructor's Permission Required.

EMGT 4800 SPECIAL READING IN EMERGENCY MANAGEMENT (3 credits)

This course is intended for upper-level Emergency Management degree students who are pursuing advanced specialized areas of knowledge in Emergency Management. The course is conducted under an independent study format, and subject matter will vary based on the interests of the student. Learning outcome objectives will be established by the instructor and shall remain consistent with Emergency Management curriculum goals. Faculty approval is required prior to registration.

Prerequisite(s): Prerequisites will be established by the coordinating instructor to meet the foundational knowledge requirements for the area being studied. Not open to non-degree or non-degree graduate students. Students will need faculty approval.

EMGT 4900 SPECIAL TOPICS IN EMERGENCY MANAGEMENT (3 credits)

This course is meant to provide upper-level EMGT students with an in-depth look at current and future issues affecting the Emergency Management industry and industry professionals. Possible topics include disaster case studies, comparative international studies, issues in federalism, and Continuity of Operations (COOP). Subject matter will vary by student interest and by faculty preference. Students may repeat the course for additional academic credit as long as the course topic is not duplicated.

Prerequisite(s): Prerequisites will be established by the coordinating instructor to meet the foundational knowledge requirements for the area being studied. Not open to non-degree or non-degree graduate students. Students will need faculty approval.

EMGT 4910 SPECIAL TOPICS IN EMERGENCY MANAGEMENT (1 credit)

This course introduces students to a specialized subject matter in the field of emergency management not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours.

EMGT 4950 SENIOR ASSESSMENT (0 credits)

This assessment tool is part of the EMDS Student Outcomes effort. It is designed to monitor performance and to identify changes needed. Graduating seniors must register for and complete EMGT 4950 - Senior Assessment in the term in which they plan to graduate.

Prerequisite(s): Students must register for EMGT 4950 in the term in which they plan to graduate. Not open to non-degree graduate students.

EMGT 4990 CAPSTONE PROJECT IN EMERGENCY MANAGEMENT (3 credits)

This course fulfills the Emergency Management Capstone senior project demonstrating expertise on a specific issue area and/or problem in emergency management. The student will be required to construct and execute a research project analyzing a contemporary operational, economic, or managerial issue within emergency management utilizing an appropriate research or analytical methodology. Both a written report and PowerPoint presentation will be presented as part of the course requirements.

Prerequisite(s): PA 3000 / CRCJ 3000; EMGT 3040, EMGT 3080, EMGT 4060; Writing in the Discipline course; all with a C- or better; Instructor's Permission Required.

Engineering (ENGR)

Engineering Undergraduate Courses

ENGR 10 FRESHMAN ENGINEERING SEMINAR (0 credits)

Overview of the engineering field as well as major specific information. Information will be provided to help with transitional needs to UNL and the College of Engineering (time management, study skills, and resources), involvement opportunities (student organizations, research, and study abroad), learning about engineering, and interactive learning to increase non-technical complete engineer competencies. Open only to first-year students considering or admitted to the College of Engineering.

Prerequisite(s): First year College of Engineering students. Not open to non-degree graduate students.

ENGR 15 SPATIAL VISUALIZATION TRAINING (0 credits)

Develop and improve spatial visualization skills.

ENGR 20 SOPHOMORE ENGINEERING SEMINAR (0 credits)

Overview of career opportunities in engineering and construction management. Emphasizes internships, cooperative education and career placement.

Prerequisite(s): Not open to non-degree graduate students.

ENGR 30 TRANSFER STUDENT ENGINEERING SEMINAR (0 credits)

ENGR 30 is open only to students transferring to the College of Engineering from another institution. Overview of transfer credit analysis, degree audits, career opportunities in engineering and construction management. Emphasis on internships, cooperative education, and career placement.

Prerequisite(s): Not open to non-degree graduate students.

ENGR 100 INTERPERSONAL SKILLS FOR ENGINEERING LEADERS (3 credits)

Establishes a foundation in communication and leadership skills that is needed for engineering students to be successful in their academic endeavors and future career opportunities. Introduction to the principles and practices of positive interpersonal relationships for leadership development. Self-awareness, awareness of others, effective interpersonal communication, and the building of trust relationships as a basis for understanding and developing leadership.

Prerequisite(s): Not open to non-degree graduate students.

ENGR 101 INTRODUCTION TO ENGINEERING (3 credits)

Students will examine relevant and practical industrial and commercial engineering applications to gain necessary engineering skills that will help them succeed as a student as well as a professional engineer. A variety of engineering disciplines will be highlighted and discussed, as well as topics in the underlying physical, chemical, and biological scientific principles and processes related to each topic. The class will use a specified focus area that involves real world applications to aid in the conceptualization and learning of the course material. Students will develop engineering problem solving skills; gain expertise and experience using modern engineering and computational tools; and emulate an engineering team atmosphere - each of which can be applied to a professional engineering environment.

ENGR 191 FRESHMAN ENGINEERING SPECIAL TOPICS (1-3 credits)

Topics vary.

ENGR 200 PROFESSIONALISM & GLOBAL PERSPECTIVE (3 credits)

Enhance essential professional skills for personal and team success through investigating issues in a global context. Explore in-demand professional aptitudes (self-awareness, emotional intelligence, teamwork, communication, and workplace interaction expectations). Through industry/community interaction, explore cultural and business norms and the application of broader perspectives to identify issues/solutions responsive and adaptive to their global context.

ENGR 220 TECHNICAL COMMUNICATION I (3 credits)

Introduction to written and oral communication and document design principles and strategies as applied in the sciences and technology. Communications for various audiences and/or purposes and/or situations.

ENGR 250 ENGINEERING COOPERATIVE EDUCATION (1-12 credits)

Cooperative education work in a regularly established cooperative education work-study program in any engineering curriculum. Special approval is required to take course for credit hours. C/N only.

Prerequisite(s): Sophomore standing; permission of College of Engineering Dean's Office and department chair of student's engineering major. All engineering students participating in cooperative education must register each term prior to commencing work.

ENGR 291 SOPHOMORE ENGINEERING SPECIAL TOPICS (1-3 credits)

Topics vary.

ENGR 300 CREATIVITY AND WRITING FOR ENGINEERS (3 credits)

Writing technical engineering reports; creative thinking and brainstorming applied to a real engineering problem with individual solutions submitted in report form.

Prerequisite(s): ENGL 1160 and Sophomore

ENGR 301 INTRODUCTION TO NUCLEAR AND RADIATION ENGINEERING CONCEPTS (1 credit)

History of nuclear development, basic concepts of radiation and radioactivity, radioactive waste management, global warming, and the impact of nuclear power plants. Industrial applications, health, and nuclear medicine. Job opportunities at power plants, graduate school, and national laboratories. Tour of the University of Texas nuclear research reactor and demonstration experiments. (Requires off-campus travel.)

Prerequisite(s): Not open to nondegree students

ENGR 310 UTILIZATION OF NUCLEAR TECHNOLOGIES IN SOCIETY (3 credits)

The applications of nuclear science to society and the fundamental radiation principles utilized in these applications.

Prerequisite(s): Not open to non-degree graduate students.

ENGR 320 LEADERSHIP, MANAGEMENT, AND ETHICS (3 credits)

Explore professional leadership, ethics, project management tools and skills, and how to successfully implement and respond to change. In a team based environment, enhance essential professional skills for personal and team success by developing and presenting a responsive proposal considering: client needs, basic project controls and scheduling. Learn about personal styles, motivation and effectively implementing change. Examine ethical dilemmas regarding principles, stewardship, and civics from ethical, legal, and expediency perspectives.

Prerequisite(s): Not open to non-degree graduate students.

ENGR 350 ENGINEERING COOPERATIVE EDUCATION (0-12 credits)

Cooperative education work in a regularly established cooperative education work-study program in any engineering curriculum. Special approval is required to take course for credit hours. C/N only.

Prerequisite(s): Junior standing; permission of College of Engineering Dean's Office and department chair of student's engineering major. All engineering students participating in cooperative education must register each term prior to commencing work.

ENGR 391 JUNIOR ENGINEERING SPECIAL TOPICS (1-3 credits)

Topics vary

ENGR 395 ENGINEERING INTERNSHIP (0-1 credits)

Provides an opportunity to reflect on experience gained through an internship related to the major field of study and an integral or important part of their program of study. Develop non-technical professional skills through reflective writing assignments. May be repeated.

Prerequisite(s): Undergraduate major in the College of Engineering; sophomore standing; permission from instructor.

ENGR 400 PROFESSIONAL ETHICS AND SOCIAL RESPONSIBILITY (1 credit)

Discussions on professionalism and ethics of engineering practice; problems encountered by new graduates.

Prerequisite(s): Senior

ENGR 402 ENERGY SYSTEMS AND RESOURCES (3 credits)

Energy as a critical component of civilization. The critical role of energy from the economic and political point of view world wide. Energy resources available, the technology to use the resources, the economics of energy production, the environmental consequences of energy use, and energy policy.

Prerequisite(s): ENGR 301, not open to nondegree students

ENGR 410 RADIATION PROTECTION AND SHIELDING (3 credits)

Basic principles and concepts of radiation protection and shield design. Dosi-metric units and response functions, hazards of radiation doses, radiation sources, basic methods for dose evaluation, and shielding design techniques for photons and neutrons.

Prerequisite(s): MECH 4010 or ENGR 421

ENGR 411 NUCLEAR REACTOR THEORY (3 credits)

Introduction to neutron diffusion theory, neutron moderation, neutron thermalization, and criticality condition of nuclear reactor.

Prerequisite(s): ENGR 310. Not open to non-degree graduate students.

ENGR 412 NUCLEAR REACTOR ANALYSIS (3 credits)

Group diffusion method, multiregional reactors, heterogeneous reactors, reactor kinetics, and change in reactivity.

Prerequisite(s): ENGR 411. Not open to non-degree graduate students.

ENGR 420 NUCLEAR REACTOR ENGINEERING (3 credits)

The physics governing nuclear reactors and the design principles for commercial nuclear power plants. Reactor designs currently operating in the power industry.

ENGR 450 ENGINEERING COOPERATIVE EDUCATION (0-12 credits)

Cooperative education work in a regularly established cooperative education work-study program in any engineering curriculum. Special approval is required to take course for credit hours. C/N only.

Prerequisite(s): Senior standing; permission of College of Engineering Dean's Office and department chair of student's engineering major. All engineering students participating in cooperative education must register each term prior to commencing work.

ENGR 460 PACKAGING ENGINEERING (3 credits)

Investigation of packaging processes, materials, equipment and design. Container design, material handling, storage, packing and environmental regulations, and material selection.

Prerequisite(s): CONE 206; MECH 3210; MECH 3730

ENGR 461 RFID SYSTEMS IN THE SUPPLY CHAIN (3 credits)

Foundations of Radio Frequency Identification Systems (RFID). The fundamentals of how RFID components of tag, transponder, and antennae are utilized to create RFID systems. Best practices for implementation of RFID systems in common supply operations.

ENGR 469 TECHNOLOGY, SCIENCE AND CIVILIZATION (3 credits)

(Lect 2 Dis. 2) This course studies the development of technology as a trigger of change upon humankind, from the earliest tools of Homo Habilis to the advent of the radio telescope in exploring the creation of the universe. The course traces the paths from early science to development of the sciences and technologies that will dominate the new millennium. (869 is for non SET students.) (Cross-listed with ENGR 869).

Prerequisite(s): Senior or permission.

ENGR 481 SUPPLY CHAIN OPTIMIZATION (3 credits)

Foundations of supply chain network modeling. The concepts that support the economic and service trade-offs in supply chain and logistics management. Using decision support system (DSS) to design optimal logistics network models given data requirements and operational parameters. Using leading software packages to model problems arising in strategic management of logistics networks.

ENGR 483 LOGISTICS IN THE SUPPLY CHAIN (3 credits)

The process of planning, implementing and controlling the efficient, effective flow and storage of goods, services and related information from the point of origin to the point of consumption. Domestic transportation systems, distribution centers and warehousing, international logistics, logistic system controls, and reengineering logistics systems.

ENGR 490 GLOBAL EXPERIENCES IN ENGINEERING (1-3 credits)

Individual or group educational experience combining classroom lectures, discussions, and/or seminars with field and/or classroom studies in a foreign country. Choice of subject matter and coordination of on- and off-campus activities are at the discretion of the instructor.

ENGR 491 SENIOR ENGINEERING SPECIAL TOPICS (1-3 credits)

Topics vary.

ENGR 4070 PROJECT MANAGEMENT (3 credits)

Project development, role of the project manager, project selection, project planning, budgeting and cost estimation, project scheduling, and project termination.

English (ENGL)

English Undergraduate Courses

ENGL 1010 INTRODUCTION TO GENRE STUDIES: PROSE (3 credits)

This course introduces students to the study of short stories, novels, and creative non-fiction (optional; inclusion may vary by instructor).

Distribution: Humanities and Fine Arts General Education course

ENGL 1020 INTRODUCTION TO GENRE STUDIES: POETRY, DRAMA, FILM (3 credits)

This course introduces students to the study of poetry, drama, and film (optional; inclusion may vary by instructor).

Distribution: Humanities and Fine Arts General Education course

ENGL 1030 US CULTURES IN LITERATURE (3 credits)

The course introduces students to literary texts representing diverse U.S. groups: their ideologies, norms, and behaviors. Students will study conventions of various genres; ways in which those genres portray group identities; and attitudes toward group identities. Students will engage with texts through analysis, interpretation, and personal reflection.

Prerequisite(s): Placement of 4 or higher on the English Placement and Proficiency Exam (EPPE)

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

ENGL 1090 ENGLISH AS A SECOND LANGUAGE I (3 credits)

This class is an intermediate writing-intensive course that will help students learn about the nature of the academic essay in American university settings; it is intended for students whose language of nurture is not English. Students receive intensive instruction in vocabulary and grammatical conventions appropriate for writing in a variety of disciplines as they engage in expository essay writing. In addition, students study the conventions of a thesis-driven argument and appropriate use of evidence to support their assertions.

Prerequisite(s): A Score \geq 500 on the paper TOEFL, 61 on the Internet TOEFL, 6.0 on the IELTS, 44 on the PTE (Pearson Test of English), or a placement of 2 (ENGL 1090) by Dept of English diagnostic examination (called the English Placement and Proficiency Exam or EPPE).

ENGL 1100 ENGLISH AS A SECOND LANGUAGE II (3 credits)

This class is an advanced writing-intensive course in which students learn about the nature of the academic essay in American university settings; it is intended for students whose language of nurture is not English. Through a study of cultural rhetorics, students become acclimated to the more advanced academic environments they will encounter in American universities and learn the conventions of the writing they will be asked to perform in their major courses, for example, research standards demanded by US professors, including appropriate selection and integration of sources into a student's own writing and navigation of an academic library.

Prerequisite(s): Placement of 3 (ENGL 1100) by Department of English diagnostic examination (called the English Placement and Proficiency Exam or EPPE), or C- or better in ENGL 1090

ENGL 1140 ENGLISH COMPOSITION I WITH SUPPORT (4 credits)

Instruction and practice in academic literacy practices, especially writing summaries, analyses, and critical essays in response to assigned texts. ENGL 1140 is designed to give students extra support needed to fully develop their writing skills and is equivalent to ENGL 1150.

Prerequisite(s): Students with a composite ACT of <14 ; or SAT <761 ; or a high school GPA of <2.3 ; or who have successfully completed ENGL1090 ESL I with a C- or better; or TOEFL ITP 500-525, TOEFL iBT 58-69, or IELTS 6-6.5; EPPE of 3 or 4.

Distribution: Fundamental Academic Skills-Composition 1

ENGL 1150 ENGLISH COMPOSITION I (3 credits)

Instruction and practice in academic literacy practices, especially writing summaries, analyses, and critical essays in response to assigned texts. Rhetorical strategies, genre awareness, and language diversity are also taught. (Cross-listed with ENGL 1154).

Prerequisite(s): ACT Composite score of 14-26; SAT score of 761-1240; AP score of 3 in English Literature and Composition/AP English Literature and Composition; IELTS 7; TOEFL 526-600; TOEFL iBT 70-94; or EPPE of 5.

Distribution: Fundamental Academic Skills-Composition 1

ENGL 1154 ENGLISH COMPOSITION I (3 credits)

Instruction and practice in academic literacy practices, especially writing summaries, analyses, and critical essays in response to assigned texts. Rhetorical strategies, genre awareness, and language diversity are also taught. (Cross-listed with ENGL 1150).

Prerequisite(s): ACT Composite score of 14-26; SAT score of 761-1240; AP score of 3 in English Literature and Composition/AP English Literature and Composition; IELTS 7; TOEFL 526-600; TOEFL iBT 70-94; or EPPE of 5.

Distribution: Fundamental Academic Skills-Composition 1

ENGL 1160 ENGLISH COMPOSITION II (3 credits)

Instruction and practice in academic inquiry, research as discovery, academic exploration, source/information literacy, research process, and academic argument. (Cross-listed with ENGL 1164).

Prerequisite(s): Score of 4 in AP English Language and Composition/English Literature and Composition; 29+ on ACT Reading or English; 27+ ACT Composite; 1260+ on SAT; IELTS 7.5+; TOEFL 601+; TOEFL iBT 95+; C- or better in ENGL1140/1150; or EPPE of 6.

Distribution: Fundamental Academic Skills-Composition II

ENGL 1164 ENGLISH COMPOSITION II (3 credits)

Instruction and practice in academic inquiry, research as discovery, academic exploration, source/information literacy, research process, and academic argument. (Cross-listed with ENGL 1160).

Prerequisite(s): Score of 4 in AP English Language and Composition/English Literature and Composition; 29+ on ACT Reading or English; 27+ ACT Composite; 1260+ on SAT; IELTS 7.5+; TOEFL 601+; TOEFLiBT 95+; C- or better in ENGL1140/1150; or EPPE of 6.

Distribution: Fundamental Academic Skills-Composition II

ENGL 1200 AUTOBIOGRAPHICAL READING AND WRITING (3 credits)

This course helps students to write effectively by focusing on their own personal experience and by examining a variety of autobiographical writings. Students are exposed to multicultural perspectives throughout the course.

Prerequisite(s): English Placement and Proficiency Exam (EPPE) score of "3", score of 20+ on both the ACT Reading and English tests, score of 540+ on the SAT English test, grade of C- or better in ENGL 1100, or by Thompson Learning Community permission

Distribution: Humanities and Fine Arts General Education course

ENGL 2000 TOPICS IN LANGUAGE AND LITERATURE (3 credits)

A variety of topics primarily for the non-major. (For example, this course might study the image of the American businessman in American literature.) One or two such topics may be offered each term, depending upon current student interest and available faculty. Students should consult each term's class schedule in order to determine the specific topics for that term. (Cross-listed with WGST 2000 when topic is appropriate).

Prerequisite(s): Variable according to topic.

ENGL 2020 WOMEN'S, GENDER, & SEXUALITY STUDIES IN THE HUMANITIES (3 credits)

An introduction to gender, sexuality, and women's studies in the humanities, exploring both historical and contemporary representations of women and sexual/gender minorities in literature, film, fine arts, performance arts, religion, history, and philosophy.

Prerequisite(s): None; ENGL 1150 recommended.

ENGL 2110 INTRODUCTION TO CREATIVE NONFICTION WRITING (3 credits)

ENGL 2110 is an introduction to creative nonfiction writing. This course focuses on the study and analysis of creative nonfiction, which will focus primarily on the foundational elements of creative nonfiction writing, including characterization, dialogue, mood, rhythm and style, point-of-view, and voice.

Prerequisite(s): ENGL 1150, ENGL 1154, or equivalent, or special permission from instructor. Not open to non-degree graduate students.

Distribution: Humanities and Fine Arts General Education course

ENGL 2160 HONORS COMPOSITION: REASON AND RESEARCH (3 credits)

Instruction and practice in academic inquiry, especially researching, analyzing, and writing arguments. A variant of Composition II for honors students.

Prerequisite(s): Reserved for students in the Honors Program. Admission to the Honors Program and placement of 6 on the English Proficiency Placement Exam (EPPE), grade of C- or better in Composition I, or permission of the Honors Program.

Distribution: Fundamental Academic Skills-Composition II

ENGL 2230 SOCIO-CULTURAL REPRESENTATIONS IN LITERATURE (3 credits)

An introduction to the literature of Native Americans, black Americans, Hispanic Americans (Chicanos, Puerto Ricans or Cubans), and Asian Americans (Chinese and Japanese). Explains and defines cultural terms and practices, and attempts to prepare students for multicultural living.

Prerequisite(s): ENGL 1160 or permission.

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

ENGL 2250 THE SHORT STORY (3 credits)

Readings in the modern short story with particular attention to literature as a reflection of life and to form as an outgrowth of content.

Prerequisite(s): ENGL 1160 / ENGL 1164 or permission.

Distribution: Humanities and Fine Arts General Education course

ENGL 2260 BLACK SHORT STORY (3 credits)

A study of short stories written by black American authors as literature and as experience. The course explains and defines cultural terms and practices, and attempts to prepare students for multicultural living. (Cross-listed with BLST 2260).

Prerequisite(s): ENGL 1150, ENGL 1154, or permission of instructor.

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

ENGL 2280 INTRODUCTION TO LANGUAGE (3 credits)

A study of the nature of language and its role in human affairs.

Prerequisite(s): ENGL 1160 or permission.

Distribution: Social Science General Education course

ENGL 2310 INTRODUCTION TO BRITISH LITERATURE I (3 credits)

A survey of British literature from c.600 to the end of the 18th century.

Prerequisite(s): ENGL 1160 or permission

Distribution: Humanities and Fine Arts General Education course

ENGL 2320 INTRODUCTION TO BRITISH LITERATURE II (3 credits)

A survey of English literature from the Romantic period to the present.

Prerequisite(s): ENGL 1160 or permission

Distribution: Humanities and Fine Arts General Education course

ENGL 2350 AFRICAN AMERICAN LITERATURE 1746-1939 (3 credits)

This course traces the development of black literature from 1746 to 1939.

Included will be a study of multiple genres including: poetry, short story, novel, drama, and nonfiction. Trends to be studied will include early black writers, neoclassic and romantic traditions, and the Harlem Renaissance and Depression era schools of thought. (Cross-listed with BLST 2350).

Prerequisite(s): ENGL 1160 or permission.

ENGL 2360 AFRICAN AMERICAN LITERATURE 1940-PRESENT (3 credits)

This course traces the development of the literary contribution that black Americans have made from 1940 to the present. The course will study multiple genres including: poetry, short story, novel, drama, and nonfiction. Trends to be studied include an evolution in resistance in writing, a movement toward literary assimilation in the 1940s-1950s, and the subsequent movement toward "Black Arts" from the 1960s to the present. (Cross-listed with BLST 2360).

Prerequisite(s): ENGL 1160 or instructor permission

ENGL 2400 ADVANCED COMPOSITION (3 credits)

This course is an advanced study of writing, including careful examination of 1) written genres generally, 2) discourse conventions of a student's academic discipline, and 3) a student's own reading and writing strategies, processes, habits, and preferences. Students will develop understanding of how writing functions in academic and professional communities as well as gain proficiency in discipline-specific research and writing, including identification of audience and rhetorical situation.

Prerequisite(s): ENGL 1160 or permission

Distribution: Writing in the Discipline Single Course

ENGL 2410 CRITICAL APPROACHES TO LITERATURE (3 credits)

An introduction to research, theory, and writing about literary and cultural studies; includes, but is not limited to, reading literary works and a variety of critical interpretations of those works, specialized library research, learning the discipline's documentation style, and writing in diverse genres (e.g. synopses, abstracts, poetry explications, prose analyses, reviews, essay exams and research papers).

Prerequisite(s): ENGL 1160

Distribution: Writing in the Discipline Single Course

ENGL 2420 CRITICAL APPROACHES TO LANGUAGE STUDIES (3 credits)

This course introduces students to Language Studies, including disciplinary theories and discourses, key issues, and methodologies in rhetoric, composition, technical communication, and linguistics. Students will also practice and become familiar with the writing conventions within Language Studies.

Prerequisite(s): ENGL 1160.

Distribution: Writing in the Discipline Single Course

ENGL 2450 AMERICAN LITERATURE I (3 credits)

A survey of American literature to the Civil War.

Prerequisite(s): ENGL 1160 or permission of instructor.

Distribution: Humanities and Fine Arts General Education course

ENGL 2460 AMERICAN LITERATURE II (3 credits)

A survey of American literature since the Civil War.

Prerequisite(s): ENGL 1160 or permission.

Distribution: Humanities and Fine Arts General Education course

ENGL 2470 SURVEY OF NATIVE AMERICAN LITERATURE (3 credits)

An introduction to the literature of the oral tradition among the Native American peoples and to the written literature of post-contact and contemporary times.

Prerequisite(s): ENGL 1160 or permission.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

ENGL 2480 THE AMERICAN LANGUAGE (3 credits)

A study of the historical development, current condition, and diversity of English language varieties in America, including both linguistic and sociocultural factors that have influenced them.

Prerequisite(s): ENGL 1160 or permission

Distribution: U.S. Diversity General Education course

ENGL 2490 LATINO/A LITERATURE (3 credits)

This course is an introduction to contemporary literature by Latinos/as in the United States, providing an overview of Mexican American, Chicano/a, and other Latino/a voices in American literature from the mid-19th Century to the present.

Prerequisite(s): ENGL 1160 or by permission of the instructor. Not open to non-degree graduate students.

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

ENGL 2500 LITERATURE OF WESTERN CIVILIZATION: THE ANCIENT WORLD (3 credits)

A study of European literature in English translation. Includes the works of such writers as Homer, Sophocles, Sappho, Virgil, Horace, Ovid and St. Augustine.

Prerequisite(s): ENGL 1160 or permission.

Distribution: Humanities and Fine Arts General Education course

ENGL 2510 GLOBAL EXPLORATIONS: MEDIEVAL TO EARLY MODERN WORLD (3 credits)

A study of world (excluding English) literature and culture in English translation. May include the study of Norse mythology, medieval Jewish and Muslim writers of southern Spain, or the works of such writers as Dante, Chretien de Troyes, Averroes (Ibn Rushid), Maimonides, Christine de Pisan, Maria de Zayas, or Rousseau.

Prerequisite(s): ENGL 1150 or permission

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

ENGL 2520 LITERATURE OF WESTERN CIVILIZATION: THE MODERN WORLD (3 credits)

A study of the modern period in European literature (exclusive of English literature) from the 18th century Romantic movement to recent 20th century developments, including writings from Rousseau through Solzhenitsyn.

Prerequisite(s): ENGL 1160 or permission

ENGL 3000 SPECIAL TOPICS IN ENGLISH (3 credits)

This course introduces students to a specialized subject matter in the disciplines of English Studies not covered in existing courses. This course may be repeated for different topics.

Prerequisite(s): Variable according to topic.

ENGL 3050 WRITING FOR THE WORKPLACE (3 credits)

In this course students learn to write polished, professional communication, focusing content for specific audiences and contexts. Instruction stresses audience and situational analysis, clarity, and professional tone and style as well as elements of format and pattern, research, and revision techniques.

Prerequisite(s): ENGL 1160, ENGL 1164, or permission of instructor

Distribution: Writing in the Discipline Single Course

ENGL 3100 NATIVE AMERICAN LITERATURE: MAJOR FIGURES (3 credits)

An in-depth study of elements of Native American literature or of particular poets, novelists, biographers or short story writers.

Prerequisite(s): ENGL 1160 or permission

ENGL 3130 AMERICAN NONFICTION (3 credits)

This is an intermediate literature course intended to give students broad exposure to American nonfiction. Students will study and analyze a variety of literary forms, including the personal essay, memoir, and literary journalism, from a wide range of historical periods.

Prerequisite(s): ENGL 1160 or equivalent. Not open to non-degree graduate students.

Distribution: Humanities and Fine Arts General Education course

ENGL 3150 FORM AND STYLE IN CREATIVE NONFICTION (3 credits)

This is an introduction to creative nonfiction. This course focuses on the study and analysis of the art of creative nonfiction and its various subgenres: personal essay, memoir, literary journalism, travel writing, segmented/collage essay, and literary/cultural analysis.

Prerequisite(s): ENGL 1160 or ENGL 1164 or a composition II equivalent. Not open to non-degree graduate students.

Distribution: Humanities and Fine Arts General Education course

ENGL 3170 SUCCESSFUL FREELANCE JOURNAL WRITING (3 credits)

This course will address the steps necessary to successful freelance writing: selecting an interesting topic, choosing an innovative angle, understanding audience, researching a suitable publication, drafting a compelling query, editing work and rewriting all or parts of the essay, working with editors, understanding and accepting rejection letters. Ultimately, students in this course will work toward the end goal of submitting their polished work for publication in both paying and non-paying markets.

Prerequisite(s): ENGL 1150 and ENGL 1160 or equivalents

ENGL 3180 GENDER IDENTITY IN PERSONAL WRITING (3 credits)

Students will read a variety of memoirs and personal essays by both emerging and established LGBTQIA+ creative nonfiction writers and allies, with a focus on trans writers; analyze the craft choices each author makes; analyze textual and theoretical explorations of gender identity and gender performativity; and explore their gender identities, and gender experiences in the essays that they compose. (Cross-listed with WGST 3180).

Prerequisite(s): ENGL 1150 and ENGL 1160 or equivalents required.

ENGL 3280 IRISH LITERATURE I (3 credits)

This course explores Irish literature from the early medieval period (c. 600) to the late nineteenth century and the Irish Literary Renaissance. Texts include works written in Irish as well as in English, and cover a variety of genres, including but not limited to: early medieval monastic nature poetry, medieval prose saga literature, the Irish bardic and aisling traditions, political satire and laments, Anglo-Irish Ascendancy novels, and the Irish Gothic.

Prerequisite(s): ENGL 1160 or permission required; ENGL 2410 and ENGL 2310 recommended.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

ENGL 3290 IRISH LITERATURE II (3 credits)

A survey of Irish literature in both English and Irish from the beginning of the Irish Literary Renaissance (c. 1880) to the present.

Prerequisite(s): ENGL 1160 or permission required; ENGL 2410, and ENGL 2320 or ENGL 3280 recommended. Not open to non-degree graduate students.

Distribution: Global Diversity General Education course

ENGL 3300 JUNIOR TOPICS IN AMERICAN LITERATURE (3 credits)

This course is an introduction to topics in American literature, to include colonial, modern, and postmodern literature and also Native American and immigrant/diaspora literature written in English or read in translation. Readings will vary according to the topic specified.

Prerequisite(s): ENGL 2410 or ENGL 2420

ENGL 3400 JUNIOR TOPICS IN BRITISH/IRISH/ANGLOPHONE LITERATURE (3 credits)

This course introduces students to topics in British or Irish literature or the literature of the former British commonwealths. Readings will vary according to the topic specified.

Prerequisite(s): ENGL 2410 or ENGL 2420. Not open to non-degree graduate students.

ENGL 3500 JUNIOR TOPICS IN GLOBAL LITERATURE (3 credits)

Topics in world literature, to include trans-national and trans-continental literature written in English or read in translation. Readings will vary according to the topic specified.

Prerequisite(s): ENGL 2410 or ENGL 2420. Not open to non-degree graduate students.

ENGL 3610 INTRODUCTION TO LINGUISTICS (3 credits)

An introduction to the concepts and methodology of the scientific study of language; includes language description, history, theory, variation, and semantics as well as first and second language acquisition. (Cross-listed with ENGL 8615).

Prerequisite(s): ENGL 1160 or equivalent.

Distribution: Social Science General Education course and U.S. Diversity General Education course

ENGL 3770 WRITING CENTER THEORY, PEDAGOGY, AND RESEARCH (3 credits)

This course is an introduction to writing center theory, pedagogy, research, and history. The course is designed for undergraduate and graduate students interested in or already working in a writing center. Throughout the course we will explore a wide range of models for writing center work and the often problematic metaphors associated with those models. The overall aim in this course will be to help students develop multiple strategies for teaching writing one-to-one, for conducting research in writing centers, and for understanding writing center administration. (Cross-listed with ENGL 8775).

ENGL 3800 JUNIOR TOPICS IN LANGUAGE STUDIES (3 credits)

This is a special topics course in language studies intended primarily for juniors in the English major. Topics include specific study in the areas of composition, rhetoric, technical communication, and/or linguistics, and will often include considerations of other cultures and languages. Readings may vary according to the topic.

Prerequisite(s): ENGL 2410 or ENGL 2420. Not open to non-degree graduate students.

ENGL 3980 TECHNICAL WRITING ACROSS THE DISCIPLINES (3 credits)

This course emphasizes the problem-solving processes of producing effective written documents and visuals in technical professions. Students will study the genres, situations, and audiences related to professional settings, the contexts in which writing occurs, the process involved in individual and collaborative projects, and the production of technical documents.

Prerequisite(s): ENGL 1160 or permission

Distribution: Writing in the Discipline Single Course

ENGL 4020 AMERICAN POETRY TO 1900 (3 credits)

A comprehensive survey of the American poetic tradition from the 17th to the end of the 19th century. (Cross-listed with ENGL 8026).

Prerequisite(s): ENGL 2410 or ENGL 2420, or another writing in the major course recommended.

ENGL 4030 AMERICAN POETRY SINCE 1900 (3 credits)

A survey of the American poetic tradition from the turn of the twentieth-century to the present, focusing on various "schools" such as Imagism, High Modernism, the Harlem Renaissance, Confessional, Beats, and New Formalism. (Cross-listed with ENGL 8036).

Prerequisite(s): ENGL 2410 or ENGL 2420, or other writing in the major course recommended.

ENGL 4060 THE AMERICAN NOVEL (3 credits)

A comprehensive survey of the evolution of the American Novel from the 1780s to the present day. Special emphasis will be placed on how a broad range of authors have responded to changing cultural and historical circumstances, and on how they have expressed widely varying viewpoints depending on their own gender, race, geographic region, and/or ethnicity. (Cross-listed with ENGL 8066).

Prerequisite(s): ENGL 1150 and 1160; ENGL 2410 recommended

ENGL 4140 AMERICAN LITERARY REALISM AND NATURALISM (3 credits)

In the late nineteenth and early twentieth century two major literary genres - Realism and Naturalism - emerged in the United States not only to challenge the primacy of Romanticism and its generally optimistic view of life but also to actively engage with the modern America created after the Civil War. This course examines a wide range of realist and naturalist works, written between 1865 and 1914, by an extremely diverse group of male and female authors from different races, ethnicities, regions, religions, and socioeconomic classes. Emphasis will be placed on how various cultural, economic, political, and social factors influenced the construction and reception of these works. (Cross-listed with ENGL 8146).

Prerequisite(s): ENGL 2410 or ENGL 2420, and ENGL 2450 or ENGL 2460.

ENGL 4160 TOPICS IN AMERICAN REGIONALISM (3 credits)

A study of major topics in American literary regionalism, with special emphasis on particular social, cultural, and geographical contexts. Focus will be determined by instructor, but may include particular historical periods, geographic regions, authors, or literary themes. (Cross-listed with ENGL 8166).

Prerequisite(s): ENGL 1150 and ENGL 1160 or equivalent; ENGL 2410 highly recommended.

ENGL 4190 THE AMERICAN NIGHTMARE (3 credits)

The literature in this course represents and explores major trends that subvert America's fascination with the "American Dream" narrative and even contend its opposite, an "American Nightmare." Over the twentieth century, many writers expressed a disillusionment with the breach that separates experiences in America from the "America" idealized by narratives of the founding roots and the constructed American Dream. Writers who have experienced or witnessed the marginalization or helplessness of large portions of the American population write in a variety of ways about the failures of this American Dream narrative. This course will analyze these expressions in American literature. (Cross-listed with ENGL 8196).

Prerequisite(s): ENGL 1160 or permission.

ENGL 4210 THE HARLEM RENAISSANCE (3 credits)

"The Harlem Renaissance" was the name given to the explosion in cultural, artistic, and social awareness that occurred primarily in Harlem, an area of New York City, between the end of World War I and the middle of the 1930s. This course will familiarize students with the general characteristics of African American literature produced during this period and its relation to African American literature and American literature writ large. The selected texts and writers will provide particular insight into the historical experiences of African Americans in the U.S. primarily between the two world wars and inform the subsequent cultural production of African Americans in later years. (Cross-listed with ENGL 8216, BLST 4210, BLST 8216).

Prerequisite(s): ENGL 1150 or ENGL 1160, ENGL 2410 recommended

ENGL 4230 LATINO LITERATURE (3 credits)

A study of representative works of Mexican-American, Spanish-American, and American writers, along with their cultural and historical antecedents. Formerly ENGL 4180/8186 Chicano Literature and Culture. (Cross-listed with ENGL 8236).

Prerequisite(s): ENGL 2410 or ENGL 2420

ENGL 4240 TEACHING LATINO LITERATURE (3 credits)

This course is designed specifically for current or future teachers of high school students. It introduces pedagogical approaches of contemporary literature by Latinos/as in the United States. The course provides an overview of Mexican American, Chicano/a, and other Latino/a voices in American literature from mid-19th Century to the present and complement that with social, cultural, historical and other approaches to developing teaching strategies. (Cross-listed with ENGL 8246)

Prerequisite(s): ENGL 1160 or permission.

Distribution: U.S. Diversity General Education course

ENGL 4250 WOMEN'S STUDIES IN LITERATURE (3 credits)

A critical study of literature by and/or about women in which students learn about contributions of women to literature, ask what literature reveals about the identity and roles of women in various contexts, and evaluates standard interpretations from the perspectives of current research and individual experience. (Cross-listed with ENGL 8256, WGST 4250).

Prerequisite(s): ENGL 1160; ENGL 2410 or ENGL 2420 recommended.

ENGL 4260 WOMEN OF COLOR WRITERS (3 credits)

Women of Color Writers is designed to introduce students to the multicultural, literary experience and contributions of women of color writers. The course will elucidate the multi-ethnic and feminist/womanist perspectives reflected in literary works by examining the themes, motifs and idioms about a womanist perspective. The course examines critically the implications and conceptual grounds of literary study which have been based almost entirely on white, male literary experiences and criteria. (Cross-listed with ENGL 8266).

Prerequisite(s): English major. ENGL 1150 or ENGL 11160 required; ENGL 2410 highly recommended

ENGL 4270 WOMEN WRITERS OF THE NORTH AMERICAN WEST (3 credits)

A survey of U.S. and Canadian women writers (18th century to the present) enabling students to examine issues of gender and sexuality across a wide thematic range, including settlement, land use, cultural displacement, and survival in western territories, states, and provinces of North America. (Cross-listed with ENGL 8276, WGST 4270).

Prerequisite(s): ENGL 1150 and ENGL 1160 or equivalent; completion of ENGL 2410 or other writing in the major course recommended.

ENGL 4280 QUEER AMERICAN WESTS (3 credits)

A survey of queer literatures about the American West. The course will explore a variety of genres, including poetry, short stories, plays, novels, creative nonfiction, and, depending on time, film/television. "Queer" will be construed as including any "non-normative" sexualities and sexual identities (e.g., genderqueer, winkle, two-spirit, 3rd/4th gender). Non-western writers (e.g., Walt Whitman) imagining the West queerly may also be included. (Cross-listed with ENGL 8286, WGST 3160).

Prerequisite(s): ENGL 1160; completion of writing in the major course recommended.

ENGL 4300 ANGLO-SAXON LITERATURE (3 credits)

From the sixth to the eleventh centuries, a people known collectively as the Anglo-Saxons ruled Britain, giving it a new name and establishing the roots of the modern English language. Anglo-Saxon culture continues to haunt the modern imagination. We study the historic, artistic and intellectual environment that produced this influential literary tradition. We also place these people, their language, and their writings within the context of the broader early medieval world. Finally, we engage with some of the foremost modern scholars of this fascinating culture. (Cross-listed with ENGL 8306).

Prerequisite(s): ENGL 1160 and ENGL 2410 or ENGL 2420; ENGL 2310 recommended; or instructor permission

ENGL 4320 CHAUCER (3 credits)

A literary, linguistic, and historical study of the works of Geoffrey Chaucer: his dream visions, Troilus and Criseyde, and the Canterbury Tales. (Cross-listed with ENGL 8326).

Prerequisite(s): ENGL 2310 or ENGL 2320 or permission.

ENGL 4330 RENAISSANCE SATIRE (3 credits)

Satirical traditions and the literature of critique and invective as inherited from medieval and classical forms. Considerations will include satire as an aesthetic, philosophical, and political mode of expression; topicality as it relates to and portrays cultural history; and self-representation through humanist learning and response. (Cross-listed with ENGL 8336).

Prerequisite(s): ENGL 1160 or equivalent. ENGL 2410 or ENGL 2420 and ENGL 2310 are recommended.

ENGL 4340 SHAKESPEARE (3 credits)

A critical study of selected plays and poetry from Shakespeare's works, in the context of the historical and cultural moment of the English Renaissance and as a set of texts inherited and reinvented by modernity. (Cross-listed with ENGL 8346).

Prerequisite(s): ENGL 1160; ENGL 2410 or ENGL 2420 and ENGL 2310 are recommended.

ENGL 4360 RENAISSANCE LYRIC (3 credits)

A study of the meaning and form of the short poetry of the Renaissance, including the sonnet, epithalamion, elegy, mock epic, pastoral, satire, city poem, ballad, song, sestina, country poem, libel, complaint, psalm, devotional lyric, epistle, and epigram. (Cross-listed with ENGL 8366).

Prerequisite(s): ENGL 1160 required and ENGL 2410 and 2310 recommended.

ENGL 4370 RESTORATION AND EIGHTEENTH CENTURY LITERATURE (3 credits)

Poetry, prose (exclusive of the novel), and drama of England in the Restoration and 18th century (1660-1800), with emphasis on Swift and Johnson. Formerly ENGL 4620/8626. (Cross-listed with ENGL 8376).

Prerequisite(s): ENGL 2310 or ENGL 2320 or permission.

ENGL 4380 THE EIGHTEENTH CENTURY ENGLISH NOVEL (3 credits)

Readings in the English novel from Daniel Defoe to Jane Austen. Formerly ENGL 4640/8646. (Cross-listed with ENGL 8386).

Prerequisite(s): ENGL 2310 or ENGL 2320

ENGL 4390 MEDIEVAL CELTIC LITERATURE (3 credits)

This course examines the literature and culture of the Celtic civilizations. The course examines the archeological record and texts about the Celts by Greek and Roman authors, as well as later medieval tales from the Irish, Welsh, and Breton traditions. All texts are in translation with guided reference to the original languages. (Cross-listed with ENGL 8396).

Prerequisite(s): ENGL 2410 or ENGL 2420 and one ENGL course above 3299; or instructor permission; ENGL 2310 recommended. Not open to non-degree graduate students.

ENGL 4400 KING ARTHUR THROUGH THE AGES (3 credits)

Starting with post-medieval selections from the Arthurian corpus, this course follows Arthur back through his many literary incarnations, until we reach the "historical" Arthur (c.1000). We consider the different aesthetic additions, subtractions, and changes made to this secular king of kings within the social and historical contexts of each reincarnation. We also examine Arthur in other media, such as film, with divergent artistic agendas. These other media, too, will be considered within their social and historical contexts in terms of what they have to say about what modern audiences look for in their versions of Arthur and the stories from the Arthurian corpus. All texts are in translation, with guided reference to the original languages. (Cross-listed with ENGL 8406).

Prerequisite(s): ENGL 1160 and ENGL 2410 or ENGL 2420; ENGL 2320 recommended; or instructor permission

ENGL 4410 LITERATURE OF THE ROMANTIC PERIOD (3 credits)

This course surveys literary works published in the Romantic period (roughly, 1789-1832), focusing specifically on those by British, Irish, and Anglophone authors. It considers what these works signify about literary as well as cultural, political, and historical events, movements, or trends. (Cross-listed with ENGL 8416).

Prerequisite(s): ENGL 1160; ENGL 2320 recommended.

ENGL 4420 NINETEENTH-CENTURY ENGLISH AND ANGLOPHONE LITERATURES (3 credits)

English and Anglophone poetry and prose (excluding the novel) in the nineteenth century. (Cross-listed with ENGL 8426).

Prerequisite(s): ENGL 2320 or permission

ENGL 4430 THE BRITISH AND ANGLOPHONE NOVEL (19TH AND 20TH CENTURY) (3 credits)

Introduction to the British and Anglophone novel in the nineteenth and twentieth century. (Cross-listed with ENGL 8436).

Prerequisite(s): ENGL 2320 or permission of the instructor

ENGL 4440 BRAM STOKER: BEYOND DRACULA (3 credits)

This course examines several major works from Stoker's literary oeuvre: The Snake's Pass (1890), Dracula (1897), The Jewel of Seven Stars (1903), The Lady of the Shroud (1909), and The Lair of the White Worm (1911) and selected short stories. Stoker is one of the more complex figures among the Anglo-Irish literary tradition, so the author and his writing is placed within the social and cultural contexts of late 19th and early 20th century Ireland and England, as well as within broader literary theoretical frameworks - psychoanalytic, gender, and postcolonial criticism among them - for which Stoker's tales continue to provide such rich fodder. (Cross-listed with ENGL 8446).

Prerequisite(s): ENGL 1160 and ENGL 2410 or ENGL 2420; ENGL 2320 recommended; or instructor permission

ENGL 4450 MODERN IRISH DRAMA (3 credits)

A survey of the major movements and significant figures associated with Irish drama from the mid-nineteenth to the twenty-first centuries, with special attention to the socio-cultural and historical contexts in Ireland. (Cross-listed with ENGL 8456).

Prerequisite(s): ENGL 1160 required; ENGL 2410 or ENGL 2420 recommended

ENGL 4460 THE 20TH CENTURY ENGLISH NOVEL (3 credits)

Readings in the English novel from Joseph Conrad to the present. Formerly ENGL 4660/8666. (Cross-listed with ENGL 8466).

Prerequisite(s): ENGL 2410 or ENGL 2420; ENGL 2320 is recommended.

ENGL 4490 GREAT WORKS OF BRITISH LITERATURE (3 credits)

This course pursues a trans-historical approach to literary study while interrogating what makes a literary work "great" within the field of British Literature. It allows students to engage with great works of British literature from across the ages - starting with the foundations of British literary history in the medieval period and extending to the present. Attending to formal, thematic, and historical dimensions of a wide array of literary texts, we will increase our appreciation of the many ways texts make meaning while developing a deep understanding of the British literary tradition. Reading literature with a sense of purpose and comparatively across time will allow us not only to appreciate great works but also to enhance the impact they have on us. Furthermore, we will recognize how culture and politics inform what literary works become deemed "great," thereby developing a critical understanding of the process of canon formation. (Cross-listed with ENGL 8496).

Prerequisite(s): ENGL 1150 or ENGL 1160, ENGL 2410 recommended

ENGL 4620 HISTORY OF ENGLISH (3 credits)

A critical study of both the internal and external histories of English. Includes historical development of English phonology, morphology, graphics, syntax, diction, dialects, and semantics. (Cross-listed with ENGL 8626).

Prerequisite(s): Junior or permission

ENGL 4640 APPLIED LINGUISTICS (3 credits)

This course is designed to develop knowledge and skills for second language instructors and others interested in second language learning and instruction. Content covers relevant second language acquisition (SLA) theory and second language pedagogy. (Cross-listed with ENGL 8646).

Prerequisite(s): ENGL 3610 and Junior standing or with permission from instructor.

ENGL 4650 STRUCTURE OF ENGLISH (3 credits)

A study of grammar as it has been conceived through history, including traditional prescriptive and descriptive approaches as well as transformational-generative grammar. (Cross-listed with ENGL 8656).

Prerequisite(s): ENGL 3610 / ENGL 8615 or permission.

ENGL 4670 SOCIOLINGUISTICS (3 credits)

An exploration of interconnections between language, culture, and communicative meaning, stressing interactional, situational, and social functions of language as they take place and are created within social contexts. (Cross-listed with ENGL 8676).

Prerequisite(s): ENGL 3610/ENGL 8615, or permission.

ENGL 4690 TOPICS IN LINGUISTICS (3 credits)

This course introduces students to a specialized subject matter in the discipline of Linguistics not covered in existing courses. This course may be repeated for different topics. (Cross-listed with ENGL 8696).

ENGL 4730 CONTEMPORARY RHETORIC (3 credits)

A study of contemporary theories and their application with particular attention to invention, form, style, and cultural context. The course will include an overview of ancient rhetoric and address non-Western rhetorics, such as Native-American, Chinese, and Japanese rhetorical theories. Formerly, ENGL 4530/8536. (Cross-listed with ENGL 8736).

Prerequisite(s): Any 2000 or above writing course or permission

ENGL 4750 COMPOSITION THEORY & PEDAGOGY (3 credits)

This course is an overview of composition theories and pedagogies since 1968 and focuses on how historical movements in education and theoretical frameworks (rhetorical, expressivist, socio-cognitivist, collaborative, social constructionist, critical pedagogy, cultural studies, feminist, technological, and linguistic theories) both enrich and complicate the teaching of composition. (Cross-listed with ENGL 8756).

Prerequisite(s): Any 2000 or above writing course or permission

ENGL 4790 ENGLISH CAREER PREPARATION (1 credit)

This course will prepare students for an internship or a career, addressing topics such as finding and applying for internships, workplace and industry, resume and cover letters, interviewing techniques, developing a professional portfolio, and statement of goals. Taking this course prior to an internship is highly recommended. (Cross-listed with ENGL 8796).

Prerequisite(s): Junior or senior level, one 4000-level English course, or permission of instructor.

ENGL 4800 ENGLISH INTERNSHIP (1-3 credits)

Supervised internship in a professional setting with a local employer or nonprofit organization. Hands-on experience. Work hours, activities, and responsibilities must be specified in a written agreement between the employer and the student in consultation with the internship director. Some internships will be paid and some will not. (Cross-listed with ENGL 8806).

Prerequisite(s): ENGL 2410 or ENGL 2420, an ENGL 4000-level writing course, Junior/Senior standing, and permission of internship director.

ENGL 4810 DIGITAL LITERACIES FOR TECHNICAL COMMUNICATORS (3 credits)

This course addresses emerging issues in digital literacies such as the rhetoric of technology, technological competency, technology and information ecologies, critical awareness of technology and human interactions, judicious application of technological knowledge, user-centered design, networking and online communities, ethics and technology, and culture and technology. (Cross-listed with ENGL 8816).

Prerequisite(s): ENGL 1160 or permission of the instructor.

ENGL 4820 AUTOBIOGRAPHY (3 credits)

In this creative nonfiction writing course, students will craft, workshop, and revise original works of autobiographical nonfiction. Students will read, discuss and critically analyze writing techniques found in diverse autobiographical prose by published authors and student peers. A final project will invite students to research and summarize a book-length autobiography of their own. (Cross-listed with ENGL 8826).

Prerequisite(s): ENGL 2110 or ENGL 3150 or ENGL 2410 or ENGL 2420 or Instructor Permission

ENGL 4830 TECHNICAL COMMUNICATION (3 credits)

Technical Communication introduces students to the field of technical communication. Students will study the development of print and electronic genres common to industry settings, the design and production of technical documents, the writing processes and work practices of professional technical communicators, and the roles of technical communicators in organizational contexts. (Cross-listed with ENGL 8836).

Prerequisite(s): ENGL 1160 or permission of instructor.

ENGL 4840 TRAVEL WRITING (3 credits)

Travel Writing is a course in professional writing. Although the course includes critical examinations of texts, the primary focus is on the composition of various kinds of travel essays. (Cross-listed with ENGL 8846).

Prerequisite(s): ENGL 2410, ENGL 2420, or ENGL 3150

ENGL 4850 INFORMATION DESIGN FOR TECHNICAL COMMUNICATORS (3 credits)

This course introduces students to strategies for integrating visual and textual elements of technical documents. Instruction will focus on design theory and application through individual and collaborative projects. Students will develop the professional judgment necessary for making and implementing stylistic choices appropriate for communicating technical information to a lay audience. (Cross-listed with ENGL 8856).

Prerequisite(s): ENGL 1160 or permission of instructor.

ENGL 4860 THE MODERN FAMILIAR ESSAY (3 credits)

Students in this course will read as well as write the Modern Familiar Essay, a sub-genre of Creative Nonfiction, with an emphasis on writing the informal essay. Essays will represent a wide scope of perspectives and issues, including gender, social class, education, politics, culture, sexuality, health, race, and ethnicity, and will range from the the sixteenth century "inventor" of the modern essay to twenty-first century practitioners of the form. This course will also cover a wide range of sub-genres and stylistic forms, such as memoir, autobiography, flash, experimental, and more. (Cross-listed with ENGL 8866).

Prerequisite(s): ENGL 2410 or ENGL 2110 or ENGL 3150 or instructor permission for Arts, 7-12; Secondary English, 7-12; and/or English as a Second Language, 7-12

ENGL 4870 TECHNICAL EDITING (3 credits)

This course introduces students to the roles and responsibilities of technical editors: the editorial decision-making processes for genre, design, style, and production of technical information; the communication with technical experts, writers, and publishers; the collaborative processes of technical editing; and the techniques technical editors use during comprehensive, developmental, copyediting, and proofreading stages. (Cross-listed with ENGL 8876).

Prerequisite(s): ENGL 1160 or permission of the instructor

ENGL 4890 CAPSTONE COURSE IN TECHNICAL COMMUNICATION (3 credits)

In this capstone course, students will extend foundational skills learned in previous technical communication courses. Students will demonstrate their competency in the technical documentation process in organizational environments, the issues important to the technical communication profession, and the practices of writing and creating complex technical documents for specific purpose and audience. (Cross-listed with ENGL 8896).

Prerequisite(s): ENGL 1160 or permission of instructor.

ENGL 4930 NARRATIVE NONFICTION (3 credits)

Students will read, discuss, and write critical analyses of narrative nonfiction by published and student writers. They will craft, workshop, and revise original works of narrative nonfiction. (Cross-listed with ENGL 8936).

Prerequisite(s): One creative nonfiction course or permission from the instructor

ENGL 4940 PUBLISHING THE LINDEN REVIEW (3 credits)

This course will offer students an experiential learning opportunity within the publishing field. Students will work as an editorial team advised by their instructor to publish a biannual, international, online literary journal named The Linden Review. The Linden Review's mission is to publish high-quality creative nonfiction and book reviews that investigate the complexities of the word health. Health will be defined broadly as a deep understanding and appreciation of bodily, emotional, spiritual, social, political, and environmental well-being. (Cross-listed with ENGL 8946, MEDH 4940).

Prerequisite(s): Prerequisite: ENGL 1160 or equivalent

ENGL 4950 BRINGING THE WAR HOME: DEPICTIONS OF WAR VETERANS IN LITERATURE AND FILM (3 credits)

Course explores the impact of war on combatants, their families and communities as represented in literary fiction, film, historical documentation, first-person accounts, and other texts written in or translated to English. (Cross-listed with ENGL 8956, MEDH 4950).

Prerequisite(s): ENGL 1160

ENGL 4960 TOPICS IN LANGUAGE AND LITERATURE (3 credits)

This course introduces students to a specialized subject matter in the discipline of English Studies not covered in existing courses. This course may be repeated for different topics. (Cross-listed with ENGL 8966).

Prerequisite(s): Will vary depending on what the topic is.

ENGL 4970 WRITING ABOUT SICKNESS AND HEALTH (3 credits)

Students will explore many themes of the human experience in healthcare through reading and discussion of selected poems, short stories, excerpts from fiction, and essays and creative nonfiction. To help students generate their own poems, stories, and essays, the class will incorporate the work of community writing programs and projects. (Cross-listed with ENGL 8976).

Prerequisite(s): ENGL 1160 or permission of the instructor.

ENGL 4980 TOPICS: INDEPENDENT STUDY (3 credits)

Specially planned readings in a well-defined field of literature or language, carried out under the supervision of a member of the English faculty.

Designed primarily for the student who has need of work not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated for credit once.

Prerequisite(s): Permission of the instructor, junior or senior, and no incompletes outstanding.

ENGL 4990 SENIOR PAPER OR PROJECT (1 credit)

Attached to an existing 4000-level English course in which a student is currently enrolled and normally added during the first six weeks of the academic semester, the Senior Paper or Project contracts a student to produce a culminating paper or project in an area of the English major. The paper or project produced in conjunction with this course will constitute a student's most dedicated accomplishment at the end of her or his undergraduate career.

Prerequisite(s): Permission of the instructor and senior standing. Not open to non-degree graduate students.

Entrepreneurship (ENTR)

Entrepreneurship Undergraduate Courses

ENTR 2550 AFRICAN AMERICAN ECONOMICS AND CONSUMERISM (3 credits)

This course traces the evolution of African American business and economic development systems in the U.S. and will examine historical economic and political influences which impact African American business communities. Students will be exposed to various aspects of African American business and economics, including Black entrepreneurship and Black owned businesses before, during, and after slavery; an analysis of the role of Black churches in African-American communities; and the impact of modern economic and political systems on African American business communities. (Cross-listed with BLST 2550).

Distribution: U.S. Diversity General Education course

ENTR 2980 SEMINAR IN ENTREPRENEURSHIP (1 credit)

This seminar exposes students to entrepreneurs and innovators from multiple industries and varied backgrounds. This course will explicitly link entrepreneurship theories with the best practice experiences of successful entrepreneurs in the region. Through purposeful interaction with the region's start-up community, this course will strengthen the networks of entrepreneurship students and equip students with the knowledge and tools to make their business ideas a reality.

ENTR 3330 ENTREPRENEURIAL FINANCE (3 credits)

This course focuses on venture capital formation and the financing of entrepreneurial ventures. The course is intended for students interested in entrepreneurship, venture capital markets, investment banking, and other careers related to new venture financing and/or deal structuring. The course applies basic financial theory to the unique environment of incubating and growing new ventures. (Cross-listed with FNBK 3330).

Prerequisite(s): ENTR 3710 with a C or better

ENTR 3710 ENTREPRENEURIAL FOUNDATIONS (3 credits)

A study of the analytical techniques and managerial tasks associated with developing and executing business plans for small firms and start-ups. These skills, including strategic positioning and competitor analysis, marketing, teaming, project and operations management, and cash flow projection will be taught through a combination of contemporary readings, speakers, and hands-on practice problems.

Prerequisite(s): Sophomore standing and 2.0 GPA.

ENTR 4000 SPECIAL TOPICS IN ENTREPRENEURSHIP (3 credits)

This special topics course will address specific topics which will vary by semester and is intended primarily for upper division students who are pursuing an entrepreneurship concentration.

Prerequisite(s): ENTR 3710 plus 6 hours of Entrepreneurship, all with C+ or better; GPA of 2.5 or better; or permission of instructor.

ENTR 4150 GEOGRAPHY, GENDER AND ENTREPRENEURSHIP (3 credits)

An advanced seminar focused on links among geography, gender and work, emphasizing leadership and entrepreneurship. The course considers theory and method in addition to empirical work. The nature of space, of gender, and of work, are examined. Topics include the gendering of work, the geography of entrepreneurship, gender and leadership. (Cross-listed with ENTR 8156, GEOG 4150, GEOG 8156, WGST 4150, WGST 8156)

Prerequisite(s): Junior, senior, or graduate standing, or permission of instructor.

ENTR 4390 MEDIA ENTREPRENEURSHIP (3 credits)

Media Entrepreneurship explores new and emerging media business models from local, national and global perspectives. Students learn about and work within the start-up economy and entrepreneurial approaches. The course offers professional and critical perspectives. (Cross-listed with JMC 4390, COMM 8396).

Prerequisite(s): JMC 3340 and JMC 3350 or permission of instructor

ENTR 4530 ENTREPRENEURSHIP INTERNSHIP (1-3 credits)

Students engage in part time employment in a new or small business to gain relevant business experience and to practice the skills and concepts learned in the classroom. Work assignment must encompass duties related to establishing or growing a small business such as market research, customer development, systems design and implementation, funding activities, etc.

Prerequisite(s): ENTR 3710 with a C+ or better, a 2.5 GPA, and junior level standing, and permission of instructor. Not open to non-degree graduate students.

ENTR 4690 EMERGING TECHNOLOGY AND INNOVATION (3 credits)

This course equips entrepreneurially-minded students with a more complete range and vision of the viability of various startup opportunities (with a specific focus on innovative technologies and innovative business models). Students will become familiarized with the new and emerging technologies and innovations that define modern industries and product categories, as well as the various shifts in the way cutting-edge business gets done, regardless of industry. (Cross-listed with MGMT 4690, BSAD 8696).

Prerequisite(s): Junior standing or higher; 2.75 minimum GPA; or permission of instructor

ENTR 4710 COMPARATIVE INTERNATIONAL DEVELOPMENT AND INNOVATION (3 credits)

Comparative International Development and Innovation will analyze the rise and fall of civilizations from a historical and theoretical perspective in a comparative manner. The course will address issues concerning political, social, economic, and environmental change in national, and international contexts. Among its major emphases are state institutions, economic growth, entrepreneurship, and the transformation of social structure and culture. (Cross-listed with ENTR 8716, PSCI 4710, PSCI 8716).

Prerequisite(s): Junior or senior standing

ENTR 4720 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation. Concepts and techniques in innovation, entrepreneurship, and strategy will be used to aid students in the venture creation process. Important considerations impacting the viability of the venture post formation will also be explored. Practical real-world experimentation is the central component of the course and will help students to conceive, develop, and launch their own innovative ventures. (Cross-listed with BSAD 8726, ACMP 4720, ACMP 8256, MGMT 4720, MKT 4720).

Prerequisite(s): ENTR 3710 and junior standing or above or by instructor permission

ENTR 4730 NEW VENTURE FORMATION (3 credits)

This course is a comprehensive study of the interrelationships between functional business areas in a start-up or small firm. These interrelationships will be taught through the development of a complete business plan for a start-up or small business.

Prerequisite(s): ENTR 3710 with a C (2.00) or better; GPA 2.5

ENTR 4740 TECHNOLOGY AND INNOVATION MANAGEMENT (3 credits)

This course covers the challenges that surround technology and innovation management. Approaching innovation management as a strategic process, this course will focus in on how the innovation process works and what kinds of organizational environments support this process, as well as how innovation affects the competitive dynamics of markets so that firms can better manage their innovation(s).

Prerequisite(s): ENTR 3710. Not open to non-degree graduate students.

ENTR 4750 SOCIAL ENTREPRENEURSHIP (3 credits)

Motivated by the desire for social change and community betterment, social entrepreneurs use innovation to solve society's problems in a variety of settings - nonprofits, for-profit businesses, or government agencies. Guest speakers, case discussion, lecture, and student presentations will be used in this course and students will be expected to develop a detailed business plan for a social enterprise.

Prerequisite(s): Minimum GPA 2.5

ENTR 4760 SELLING IN AN ENTREPRENEURIAL CONTEXT (3 credits)

Successful entrepreneurs are able to identify unmet needs in the marketplace and then design and sell products or services that fulfill those needs. Sales effectiveness is essential for entrepreneurs because they must be able to build sustainable sales pipelines that ensure profitable growth while simultaneously addressing other pressing issues including financing, staffing, and product development. This course will focus on consultative solution-based sales fundamentals that can be applied in an entrepreneurial selling environment. (Cross-listed with MKT 4760, BSAD 8766)

Prerequisite(s): GPA 2.5 or better; MKT 3100 with a "C+" or better; MKT 3310 with a "C+" or better; or permission of instructor. Not open to non-degree graduate students.

ENTR 4770 INTRODUCTORY MAVERICK VENTURE FUND (1 credit)

This course teaches the basics of venture capital, including, the topics of term sheets, due diligence and learning the perspectives of the entrepreneur and investor. Students in this course have the opportunity to observe more advanced students making investments, ranging from 5,000 dollars to 10,000 dollars plus. This course is the first of three, one-credit courses where students gain more advanced venture funding knowledge and application at each level. (Cross-listed with BSAD 8776).

Prerequisite(s): This course requires instructor approval.

ENTR 4780 INTERMEDIATE MAVERICK VENTURE FUND (1 credit)

In this course, students source deals, listen to pitches, and select start-ups to be funded. Investments typically range from 5,000 dollars to 10,000 dollars plus. This course is the second in a set of three courses that increase in difficulty with each course. (Cross-listed with BSAD 8786).

Prerequisite(s): Students must have taken Maverick Venture Fund - 1: Venture Capital Concepts (ENTR 4770/8770).

ENTR 4790 ADVANCED MAVERICK VENTURE FUND (1 credit)

This course applies advanced concepts of venture capital. Students will learn how to monitor and assist start-ups in the scaling process. Students learn how to leverage community partners to amplify investment opportunities. This course is the third in a set of three courses that increase in difficulty with each course. (Cross-listed with BSAD 8796).

Prerequisite(s): Students must have taken MAVERICK VENTURE FUND - 2: APPLICATION, SOURCING DEALS & DUE DILIGENCE

Environmental Engineering (ENVE)

Environmental Engineering Undergraduate Courses

ENVE 101 INTRODUCTION TO ENVIRONMENTAL ENGINEERING (3 credits)

Introduction to engineering design process through hands-on projects supported by instruction of underlying engineering science and fundamentals, model development, and the required tools. Be exposed to environmental engineering to know what it means to be an environmental engineer and an introduction to environmental engineering profession with focus on ethics.

ENVE 210 FUNDAMENTALS OF ENVIRONMENTAL ENGINEERING (3 credits)

Introduction to material and energy balances on environmental systems involving physical, chemical, and biological processes. Primary focus on single phase systems.

Prerequisite(s): CHEM 1180 with a C or better, and MATH 1950 with a C or better

ENVE 322 BIOLOGICAL PRINCIPLES OF ENVIRONMENTAL ENGINEERING (2 credits)

Introduction to the basics of microbes in the environment, including basic microbiological concepts, microbial environment, detection/enumeration/identification of microbes, microbial interactions with environment, microbial remediation of pollutants, waterborne pathogens, and wastewater treatment and disinfection.

Prerequisite(s): CIVE 321

ENVE 401 ENVIRONMENTAL ENGINEERING DESIGN I (3 credits)

Practical application of the engineering design process in a team project focused on an authentic and comprehensive environmental engineering design project.

Prerequisite(s): CIVE 321, ENVE 322, CIVE 352

ENVE 402 ENVIRONMENTAL ENGINEERING DESIGN II (3 credits)

Practical application of the engineering design process in a team project focused on an authentic and comprehensive environmental engineering design project.

Prerequisite(s): ENVE 401

ENVE 410 ENVIRONMENTAL FATE AND TRANSPORT (3 credits)

Covers fate and transport principles, such as interphase chemical equilibrium, the formulation and application of the advection-diffusion equation, and their specific environmental engineering applications.

Prerequisite(s): CIVE 310 or CHME 332; ENVE 210 or CHME 202; and CIVE 321

ENVE 430 SUSTAINABLE DESIGN IN ENVIRONMENTAL ENGINEERING (3 credits)

Introduction to sustainability concepts and sustainable engineering design processes for environmental engineers such as life cycle assessment, multi-criteria decision analysis, and analysis of renewable energy systems.

Prerequisite(s): CIVE 321; Co-requisite STAT 3800

ENVE 898 SPECIAL PROBLEMS IN ENVIRONMENTAL ENGINEERING (1-6 credits)

Special research-oriented problems in current topics in environmental engineering.

Prerequisite(s): Permission.

ENVE 899 MASTER'S THESIS (1-10 credits)

Master's thesis work

ENVE 990 SEMINAR IN ENVIRONMENTAL ENGINEERING (1 credit)

Presentation and discussion of current research topics and projects in environmental engineering and closely allied areas.

Prerequisite(s): Permission. Not open to non-degree graduate students.

ENVE 998 SPECIAL TOPICS IN ENVIRONMENTAL ENGINEERING (1-6 credits)

Independent library and/or experimental research, analysis, evaluation and presentation of current and advanced topics in environmental engineering and closely related areas.

Prerequisite(s): Permission.

Environmental Studies (ENVN)

Environmental Studies Undergraduate Courses

ENVN 2010 ENVIRONMENTAL PROBLEMS AND SOLUTIONS (2 credits)

An overview of current environmental problems and the efforts to solve those problems. Intended for Environmental Studies majors and other students with an interest in conservation, the human environment, and management of natural resources. This course examines current local, regional, and global environmental issues and explores work being done to improve environmental quality. The purpose of the course is to give students a broad, interdisciplinary overview of environmental topics and to provide introductory, hands-on experience working with tools that are used to solve environmental problems that they will also encounter in advanced coursework. Usually offered every semester.

Prerequisite(s): BIOL 1330 or GEOL 1010 or GEOG 1050 (or concurrent enrollment). Not open to non-degree graduate students.

ENVN 2020 STATISTICS FOR LIFE AND ENVIRONMENTAL SCIENCE (3 credits)

The course will train life and environmental science students in 1) searching and accessing public data repositories to address questions in the area of life and environmental science, 2) carrying out quality control of data files and preparing data files for statistical analysis, 3) summarizing data with tables and graphs for reports using the principles of descriptive statistics, and 4) applying basic principles of inferential statistics to test simple life and environmental science models. The students will also practice 1) using spreadsheet software (e.g., Excel) for basic data organization, clean-up, and manipulation and 2) carrying out basic descriptive and inferential statistics with R (the standard statistical software used in life and environmental science). In addition to using the frequentist approach (null hypothesis testing) for inferential statistics, the course will also emphasize effect sizes, because statistically significant, yet small effects, are generally of minor importance in biological and environmental systems. (Cross-listed with BIOL 2020).

Prerequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or MATH 1300 or MATH 1320 or Permission of Instructor.

ENVN 3030 MICROBIAL ECOLOGY (4 credits)

This course will introduce students to the diversity and ecology of microbes in various environments (soils, water, plants, insects, etc.) through an integrated lecture and laboratory course. Emphasis will be placed on molecular approaches to analyzing microbial diversity and evolution, and teacher-directed but student-led investigations. Students will participate in a continuum of course-based research experiences in molecular microbial ecology, from field work to laboratory techniques, and evolutionary analysis of DNA sequence data. The course explores ecological principles as they apply to microorganisms, while emphasizing the molecular, biochemical and evolutionary diversity in the microbial world. (Cross-listed with BIOL 3030).

ENVN 3180 ENVIRONMENTAL ETHICS (3 credits)

This course introduces students to the thinkers and issues that make environmental ethics what it is today. It includes the analysis and evaluation, from ethical viewpoints, of such topics as: intrinsic value of animals, plants and ecosystems; animal rights; climate change; conservation and preservation; environmental law and politics; obligations to future generations; sustainability and new technologies; war, immigration, and the environment; human rights and the environment; nature and the built environment; and environmental activism. (Cross-listed with PHIL 3180).

Prerequisite(s): Junior or 3 hours of philosophy.

ENVN 3310 SUSTAINABILITY AND THE ENVIRONMENT IN THE SPANISH-SPEAKING WORLD (3 credits)

This course presents a broad, interdisciplinary introduction to some of the most pressing environmental and ecological problems in various parts of the Spanish-speaking world, as well as some of the ways in which such problems are being addressed at different levels to promote social and ecological sustainability (locally, nationally, regionally, and globally). The Spanish-speaking world, also known as the Hispanosphere, encompasses the following geographical areas: Spain, Hispanic America, Equatorial Guinea, and portions of the United States. In addition, the course explores some of the ways in which these topics have been represented through a variety of genres, such as documentaries, fiction films, comics, narrative texts, poetry, and essays. Finally, the course also focuses on the continued development of Spanish language skills, such as the acquisition of specialized vocabulary, formal and informal essay writing, presentational speaking skills, advanced reading, and the analysis of film and other media. (Cross-listed with SPAN 3310).

Prerequisite(s): SPAN 3030 or SPAN 3010, SPAN 3040 or SPAN 3020, and SPAN 3060.

ENVN 4090 SPECIAL TOPICS IN ENVIRONMENTAL STUDIES (3 credits)

A lecture and/or laboratory course pertaining to a specific topic in environmental studies or sustainability not available in the regular curriculum. May be repeated as topics change.

Prerequisite(s): Junior or senior standing.

ENVN 4180 FRESHWATER ECOLOGY (4 credits)

A study of the physical, chemical and biological relationships that serve to establish and maintain plant and animal communities in freshwater environments. (Cross-listed with BIOL 8186, BIOL 4180).

Prerequisite(s): BIOL 1450 and BIOL 1750, junior-senior, or permission of instructor. Must enroll in lab. Not open to non-degree graduate students.

ENVN 4270 GLOBAL ENVIRONMENTAL POLITICS (3 credits)

This course introduces students to issues of global environmental politics and policy, including the science behind issues such as climate change, how environmental policy is made at the national and international levels, and what role politics plays in determining environmental resource use. (Cross-listed with PSCI 4270, PSCI 8276)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor.

ENVN 4310 OUR ENERGY FUTURE: SOCIETY, THE ENVIRONMENT AND SUSTAINABILITY (3 credits)

In this course, students will analyze our energy options including the environmental, economic, and ethical connections with a particular emphasis on electrical energy. The course doesn't prescribe a particular energy future but rather emphasizes development of the knowledge and skills to more effectively contribute to the conversation. To understand our future, the course begins with the present energy landscape and its historical underpinnings, then focuses on developing a student's ability to critically assess energy options by examining the associated implications, consequences, intent, origins, and bias. Students' own work, life, and academic experience are used in the course to underscore the individual relevance of these energy choices. The course includes the necessary science, but the greater emphasis is on the associated critical and creative thinking so that ultimately students can make informed, creative, sustainable energy choices. (Cross-listed with ENVN 8316, CACT 8316)

Prerequisite(s): Permission of instructor.

ENVN 4320 ECOLOGICAL SUSTAINABILITY AND HUMAN HEALTH (3 credits)

The course will explore and develop the complex context of the systemic links among ecosystems and human health (and more broadly human well-being) using case studies including climate change, water quality, infectious diseases and agricultural production. Students will develop skills in critical thinking and applied research by studying biological connections between humans and ecosystems and how social, economic and cultural processes and practices mediate these connections. This course supports the Health and the Environment concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8326)

Prerequisite(s): Junior or Senior standing

ENVN 4330 INTRODUCTION TO GREEN INFRASTRUCTURE (3 credits)

This course provides an overview of green infrastructure including issues managed with green infrastructure (storm water quality and quantity, urban habitat value, urban sustainability, etc.); basic design and management parameters for best management practices (BMPs); case study applications of BMPs; treatment train assessment and evaluation; and regulatory and cost considerations. (Cross-listed with ENVN 8336).

Prerequisite(s): Junior/Senior standing or instructor permission

ENVN 4350 GLOBAL CLIMATE CHANGE (3 credits)

The primary objective of this course is for students to form a scientific, evidence-based, stance on current and future changes to the Earth's climate. To this end, this course will be based on scientific inquiry into the current state of knowledge. Particular emphases are placed on evidence and causes of change, and the associated environmental and social impacts, including: water resources, extreme weather, human health, and others of interest to the class. (Cross-listed with GEOG 8356, GEOG 4350, ENVN 8356).

Prerequisite(s): At least 1 of the following: GEOG 1030, GEOG 1050, GEOG 3510, GEOG 4320, or permission of instructor

ENVN 4390 THE NATURE OF THE PAST: AMERICAN ENVIRONMENTAL HISTORY, PRE-HISTORY TO THE PRESENT (3 credits)

This course will introduce students to the field of American Environmental History. Students will engage with literature produced by scholars who, broadly speaking, research and write about the many ways in which humans have shaped nature and, conversely, how nature has shaped humans over time. We will focus on the myriad peoples and cultures that have thrived in what is presently the United States and how these peoples have interacted with their physical environments in a multitude of contexts, from the transformation of ecosystems for economic purposes, to the cultural and scientific ideas that have shaped human notions of the natural world, to the ways in which people have mobilized governments to transform the environment. (Cross-listed with HIST 4390, HIST 8196, SUST 4390).

ENVN 4410 WETLAND ECOLOGY AND MANAGEMENT (3 credits)

This course will examine the principles and theory of wetland ecology with application towards wetland management and regulation. An interdisciplinary overview of physical, biological and regulatory aspects of wetlands will allow students to synthesize information from their backgrounds in geography, geology and ecology. Definitions, classifications, natural processes and functions of wetland environments will be presented. Labs concentrate on field techniques used to assess specific plant, animal, soil, and hydrological characteristics of wetlands. (Cross-listed with BIOL 4410 and BIOL 8416)

Prerequisite(s): BIOL 3340 or instructor permission.

ENVN 4420 RESTORATION ECOLOGY (3 credits)

Restoration Ecology examines how people assist with the recovery of ecosystems that have been degraded. The course will examine the theory and application of restoration ecology through lecture, discussion, field trips, and development of a restoration management plan for a degraded ecosystem near Omaha. The course will provide information and resources used by restoration and land management professionals to plan, implement, and manage restorations. (Cross-listed with BIOL 4420, BIOL 8426)

Prerequisite(s): Junior or Senior standing.

ENVN 4600 GIS APPLICATIONS FOR ENVIRONMENTAL SCIENCE (1 credit)

This course introduces the use of geographic information systems (GIS) and other geospatial tools for work in the fields of environmental science, ecology, and natural resource management. The course will develop a working knowledge of the common software and hardware tools used by ecologists through hands-on projects. (Cross-listed with BIOL 4600, BIOL 8606)

Prerequisite(s): BIOL 3340 or permission of instructor.

ENVN 4610 ENVIRONMENTAL MONITORING AND ASSESSMENT (3 credits)

An interdisciplinary approach to techniques for the design and implementation of environmental inventory and monitoring schemes used to evaluate natural resources. Students work as teams to synthesize information from their backgrounds in geography, geology and ecology to evaluate the impacts of human actions on environmental quality following the framework for environmental assessments provided by the National Environmental Policy Act. Course is organized to accommodate variable needs of students with different backgrounds and career choices. Usually offered every year. (Cross-listed with BIOL 4610, GEOG 4610, GEOG 8616, GEOL 4610, GEOL 8616)

Prerequisite(s): Permission of instructor.

ENVN 4700 SUSTAINABLE SOLUTIONS CAPSTONE (3 credits)

This is a capstone experience for students interested in sustainability and related fields. Students work as part of a multidisciplinary team under the guidance of faculty mentors to develop sustainable solutions to challenges faced by local, regional, or global organizations.

Prerequisite(s): Instructor permission.

ENVN 4800 INTERNSHIP IN ENVIRONMENTAL MANAGEMENT AND PLANNING (1-3 credits)

Internship providing practical experience working with environmental organizations or government agencies for students interested in careers in environmental science and related fields. A proposed internship must be approved by the Environmental Studies Program prior to enrolling. Usually offered Fall, Spring, Summer. (Cross-listed with BIOL 4800)

Prerequisite(s): Permission of the Environmental Studies Program.

ENVN 4820 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

An introduction to environmental law and regulations intended for students pursuing careers in environmental sciences or related fields. The course emphasizes the origins, implementation, and enforcement of U.S. state and federal laws and regulations. Major federal environmental laws, covering air and water quality, solid and hazardous waste, pollution prevention and remediation, and natural resources will be discussed. Usually offered Fall semesters. (Cross-listed with ENVN 8826, BIOL 4820, GEOG 4820, GEOG 8826, PA 8826)

Prerequisite(s): Junior-senior or permission of the instructor.

ENVN 4970 ADVANCED BOTANY (4 credits)

Advanced Botany examines plant structures (cells, tissues, and organs) and their connections with plant functions (growth, reproduction, photosynthesis, respiration, and dispersal). Topics covered include energy metabolism, development and morphogenesis, genetics, ecology, and the latest in plant taxonomy and phylogeny, keeping students on the forefront of cutting-edge botanical research. In lab, students conduct activities such as dissecting plant organs, making microscope slides, and conducting plant-based experiments, using plants from the local area, from native Great Plains collections, and from around the world and grown in the greenhouse. Students compare and contrast both physiological and morphological adaptations to varying environments. (Cross-listed with BIOL 8976, BIOL 4970).

Prerequisite(s): BIOL 1750 and junior or senior student status or above or instructor permission.

Exploratory (EXPL)

Exploratory Undergraduate Courses

EXPL 1000 EXPLORATORY STUDIES (3 credits)

All Exploratory Studies students will take EXPL 1000, a general education course specifically designed for Explorers which: Empowers students to define their passions, talents, and interests to choose a best-fit major/minor; helps students explore different disciplines, Academic Focus Areas, and majors/minors at UNO; draws on happiness and well-being theories to help students better define the meaning of success in college and in life; provides mentorship from faculty, staff, peer mentors, EXPL Ambassadors, and more.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

EXPL 1010 EXPLORATORY STUDIES: COLLEGE EXPLORATION AND SUCCESS SEMINAR (1 credit)

The aim of this course is to set students up for college success. Students will learn about university resources and college level academic success strategies. This course provides students with guided exploration of majors and career pathways. Students will use various methods to identify and reflect on their strengths and passions to direct their search for academic paths. Students will engage with faculty, peer mentors, staff and peers to foster a sense of community and belonging.

Finance and Banking (FNBK)

Finance and Banking Undergraduate Courses

FNBK 2280 PERSONAL FINANCE (3 credits)

This course focuses strengthening the development of sound financial habits through knowledge and application of concepts and activities that enhance personal and family finance.

FNBK 2710 PRINCIPLES OF INSURANCE (3 credits)

This course is intended to introduce students to the basic concepts of risk and insurance. Special emphasis is placed on the insurance coverage needed by the consumer: life, health, homeowner and auto insurance. (Fall, Spring)

Prerequisite(s): Not open to non-degree graduate students.

FNBK 3000 FINANCIAL REPORTING AND ANALYSIS (3 credits)

Seeks to develop students' understanding of the origin and derivation of accounting data, and their skills in employing the data for the purpose of financial analysis, reporting and valuation.

Prerequisite(s): ACCT 2020 with 'C' (2.0) or better.

FNBK 3250 PRINCIPLES OF FINANCIAL MANAGEMENT (3 credits)

As an introduction to financial management, the course will cover a broad area of corporate finance and discuss topics including assessment of financial statement information, time value of money, bond and stock valuation, as well as capital budgeting.

Prerequisite(s): ACCT 2010, ECON 2200, ECON 2220, MATH 1320 or MATH 1370 or MATH 1930, BSAD 2130 or 3160, ENGL 1160/ENGL 1164 or concurrent enrollment in ENGL 1160/1164 each with "C" or better and 2.5 GPA.

FNBK 3300 INTERMEDIATE FINANCIAL MANAGEMENT (3 credits)

This course is intended to develop an intermediate level of understanding of financial analysis and decision making, as well as an understanding of the context within which these skills are used, through an in-depth exploration of the essential mathematical operations that underpin advanced finance courses. Critical thinking and computer literacy will be enhanced using MS Excel for spreadsheet calculations and model building.

Prerequisite(s): FNBK 3250 with a C+ or better and 2.5 overall GPA. Not open to non-degree graduate students.

FNBK 3330 ENTREPRENEURIAL FINANCE (3 credits)

This course focuses on venture capital formation and the financing of entrepreneurial ventures. The course is intended for students interested in entrepreneurship, venture capital markets, investment banking, and other careers related to new venture financing and/or deal structuring. The course applies basic financial theory to the unique environment of incubating and growing new ventures. (Cross-listed with ENTR 3330).

Prerequisite(s): FNBK 3250 with 'C' (2.0) or better.

FNBK 3400 INVESTMENT PRINCIPLES AND PRACTICES (3 credits)

A study of the market for investment securities, an introduction to the field of security analysis, and selection and management of a portfolio of securities. (Fall, Spring)

Prerequisite(s): FNBK 3300, GPA of 2.5 or better or approval of instructor.

FNBK 3500 FINANCIAL MARKETS (3 credits)

An overview of money and banking, monetary policy, and analysis of the operations of financial markets in a global context, as well as the evolving regulatory framework within which these markets operate.

Prerequisite(s): ECON 2200 and ECON 2220 and FNBK 3250 with 'C' or better, or approval of instructor.

FNBK 3550 PUBLIC FINANCE (3 credits)

This course explores the objectives and rationale of government activity in a market economy, including positive and normative analysis of public expenditures and taxes. Topics include Social Security, health insurance, education, food stamps, student aid, unemployment insurance, efficiency and incidence of major revenue sources, and tax reform proposals. (Cross-listed with ECON 3550).

Prerequisite(s): MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better.

FNBK 3650 COMMERCIAL BANK MANAGEMENT (3 credits)

This course focuses on the theory and practice of managing commercial banks. Topics covered include but are not limited to: Bank regulations, bank performance analysis, asset liability management, credit analysis and consumer loans. This course emphasizes the link between theory and practice through readings, guest lecturers from industry experts, and a comprehensive bank research project on a local bank of your choice. At the end of the course, students should have a good understanding of basic banking theories as well as banking practices, and current issues and challenges facing the banking industry.

Prerequisite(s): FNBK 3300, GPA of 2.5 or better or approval of instructor.

FNBK 3700 INTERNATIONAL FINANCIAL MANAGEMENT (3 credits)

This course focuses on the application of basic principles and techniques of international financial management to the decision-making process of the multinational firms. The course covers foreign exchange markets, management of foreign exchange risk, international working capital management, and foreign portfolio and direct investment. Factors bearing on international financing and investment decisions, such as political risk and international taxation issues will be also explored. (Fall, Spring, Summer).

Prerequisite(s): FNBK 3250 with 'C+' (2.3) or better, GPA of 2.5 or better or approval of instructor.

FNBK 4000 SPECIAL TOPICS IN FINANCE AND BANKING (1-5 credits)

The topics addressed in this finance and banking special topics course will vary but are typically an in-depth exploration of a specific topic in the field of finance and banking. Please contact the finance and banking department chairperson for the specific course offering.

FNBK 4150 ADVANCED FINANCIAL MANAGEMENT (3 credits)

This course aims to develop the student's ability to identify, analyze and solve integrative problems in management of business finance, including financial analysis, working capital management, capital budgeting decisions, long term financing, and leasing, through the use of prescribed readings, case studies and computer applications. (Fall, Spring).

Prerequisite(s): FNBK 3300, GPA of 2.5 or better, and senior standing. It is highly recommended that a student have an additional 6 hours of finance instruction beyond the introductory course prior to taking this class.

FNBK 4210 SELLING FINANCIAL SERVICES (3 credits)

Selling Financial Services concentrates on methods to effectively sell services and products in the financial services industry, including the banking, brokerage and insurance sectors. Targeting, initiating, and acquiring client relationships, expanding business opportunities, and maintaining long-term client relationships are the course's focal points. This integrative course is designed to provide students with a basic understanding of the selling profession and sales culture within the financial services industry. (Cross-listed with BSAD 8216, MKT 4210).

Prerequisite(s): MKT 3310 with a C+ or better grade and 2.5 GPA. Not open to non-degree graduate students.

FNBK 4470 BEHAVIORAL FINANCE & INVESTING (3 credits)

This course focuses on how actual investor behaviors and market behaviors differ from traditional theories of finance. This course will examine psychological biases, identify how such biases influence financial markets and settings, and explore methods that can be utilized to recognize and overcome such behavioral pitfalls. (Cross-listed with BSAD 8476).

Prerequisite(s): Junior or senior standing. Not open to non-degree graduate students.

FNBK 4500 SPECIAL PROBLEMS IN FINANCE AND BANKING (2-3 credits)

Individual investigation of specific problems in the fields of finance and banking. (Fall, Spring).

Prerequisite(s): Senior. Note: permission of department chair required prior to registration.

FNBK 4510 FINANCE AND BANKING INTERNSHIP (1-3 credits)

Students will engage in an applied experience in their area of specialization to gain relevant experience and to practice the skills and concepts learned in the classroom. Supplemental reports and/or reading may be required. Note: FNBK4510 may be taken for a maximum of 3 credits.

Prerequisite(s): Permission of internship coordinator; 'C+' or better in FNBK 3250; 2.5 cumulative gpa; junior or senior standing

FNBK 4570 INVESTMENT MANAGEMENT FOR FINANCIAL ANALYSTS (3 credits)

This course provides critical knowledge needed for students pursuing a career in investment management. The topic areas bridge academic theory, current industry practice, and ethical and professional standards and comprehensively address the areas assessed in the Chartered Financial Analyst examinations. (Cross-listed with BSAD 8576).

Prerequisite(s): Senior standing. Not open to non-degree graduate students.

FNBK 4590 RISK MANAGEMENT FOR BUSINESS MANAGERS (3 credits)

An analysis of risk management techniques for handling the risk exposures most businesses face, including insurance, self insurance, risk control and risk avoidance, among others. (Cross-listed with BSAD 8596).

Prerequisite(s): At least junior standing.

FNBK 4600 FINANCIAL RISK MANAGEMENT (3 credits)

The course provides students with an intermediate level analysis of financial derivatives, and the use of these instruments for managing risk in financial institutions. (Cross-listed with BSAD 8606).

Prerequisite(s): FNBK 3400 and FNBK 3500 both with a 'C' (2.0) or better, and senior or graduate standing.

FNBK 4610 PORTFOLIO MANAGEMENT (3 credits)

This course will focus on modern development in portfolio management including efficient markets, stock selection, and hedging procedures. The main objective of this course is to prepare students for the management of financial resources through the development of skills necessary to make prudent investment decisions.

Prerequisite(s): FNBK 3400 with a "C+" (2.33) or above, and a 2.5 GPA.

Fire Service Management (FSMT)

Fire Service Management Undergraduate Courses

FSMT 1600 FUNDAMENTALS OF FIRE SCIENCE (3 credits)

Fundamentals of Fire Science is an applied science which focuses on basic understanding of the chemical and physical nature of fire. Students will learn about common fire hazards, extinguishing agent properties, as well as fire ignition and growth phenomena.

Distribution: Natural/Physical Science General Education course

FSMT 2200 CODES AND INSPECTIONS (3 credits)

Fire protection requirements, including zoning laws and primary access routes for flammable and explosive materials will be discussed. Major considerations and rationales employed in the formulation and creation of zoning and building codes are examined and exploration and understanding of local, state and national codes are also introduced. Safety education program development and implementation, fire inspection techniques and fire investigation procedures are additionally covered.

Prerequisite(s): EMT 1000 or concurrent.

FSMT 2300 FIRE INVESTIGATION (3 credits)

The origin and cause of fire and explosion incidents will be explored. Fire and arson investigation procedures such as on-site investigations and inspections, documentation, and fact gathering, collection of witness statements and canvassing, and procedures for gathering and storage of critical evidence will be presented. Legal and jurisdictional issues affecting fire investigation will also be discussed.

Prerequisite(s): EMGT 1000 or concurrent

FSMT 2310 FIRE PROTECTION SYSTEMS (3 credits)

A study of the procedures necessary to evaluate the firefighting requirements and how these needs drive the design and utilization of various types of fire protection equipment, including design of structural protection systems and associated construction materials, fire detection technology and fire suppression systems.

Prerequisite(s): EMGT 1000 or concurrent

FSMT 2410 STRATEGIES AND TACTICS IN FIRE AND EMERGENCY SERVICES (3 credits)

This course will provide examples of strategic and tactical considerations that members of the emergency services can employ during structure fires to include residential, commercial, high-rise, special hazard structures, and other types of emergencies like hazardous materials incidents, mass casualty emergencies, and technical rescues.

Prerequisite(s): EMGT 1000

FSMT 2510 BUILDING CONSTRUCTION FOR THE FIRE SERVICE (3 credits)

The visible and hidden dangers inherently involved with fighting structural fires are examined in this course. Characteristics of construction materials, construction types, fire protection systems, smoke development, fire containment, high rise construction and many other topics relevant to firefighter life safety as related to building construction issues will be studied and evaluated.

Prerequisite(s): EMGT 1000 or concurrent.

FSMT 3020 FIRE DYNAMICS (3 credits)

This course examines the underlying principles involved in structural fire protection systems, building furnishings, and fire protection systems including water-based fire suppression systems, fire alarm and detection systems, special hazard suppression systems, and smoke management systems.

Prerequisite(s): Students must have completed FSMT 1600.

FSMT 3140 FIRE RELATED HUMAN BEHAVIOR (3 credits)

The goal of Fire Related Human Behavior is to provide students with knowledge about how humans respond to fire and how that knowledge has been integrated into life safety systems design and development.

Prerequisite(s): FSMT 2200

FSMT 3350 FIRE PREVENTION, ORGANIZATION, AND MANAGEMENT (3 credits)

This course examines the factors that shape fire risk and the tools for fire prevention, including risk reduction education, codes and standards, inspection and plans review, fire investigation, research, master planning, various types of influences, and strategies.

Prerequisite(s): FSMT 2200

FSMT 3680 ANALYTICAL APPROACHES TO PUBLIC FIRE PROTECTION (3 credits)

This course examines rational decision making tools and techniques that can be used in Fire and Emergency Services agencies, including data collection, statistics, probability, decision analysis, utility modeling, resource allocation, and cost-benefit analysis.

Prerequisite(s): FSMT 2200.

FSMT 4300 ADVANCED PRINCIPLES OF FIRE AND EMERGENCY SERVICES SAFETY AND SURVIVAL (3 credits)

This course introduces the basic principles and history related to the national firefighter life safety initiatives, focusing on the need for cultural and behavioral change within the emergency services industry relating to safety, incorporating leadership, supervision, accountability, and personal responsibility. Instruction utilizes the lessons learned from case studies and other investigations that support cultural change throughout emergency services administration.

Prerequisite(s): FSMT 2410.

FSMT 4450 FIRE AND EMERGENCY SERVICES ADMINISTRATION (3 credits)

This course provides students with the knowledge to understand how to help the fire and emergency services administrator perform as an effective risk manager by recognizing legal and political issues affecting public safety, finding and applying appropriate legal rules and/or political constructs, and articulating supportable conclusions and recommendations.

Prerequisite(s): FSMT 2410.

FSMT 4800 SPECIAL READINGS IN FIRE SERVICE MANAGEMENT (3 credits)

This course is intended for upper-level Fire Service Management degree students who are pursuing specialized areas of knowledge in Fire Services. The course is conducted under an independent study format, and subject matter will vary based on the interests of the student and learning outcome objectives established by the instructor. Faculty approval is required prior to registration.

Prerequisite(s): Prerequisites will be established by the coordinating instructor to meet the foundational knowledge requirements for the area being studied. Not open to non-degree graduate students. EMGT students will need faculty approval.

FSMT 4860 APPLICATIONS OF FIRE RESEARCH (3 credits)

This course examines the basic principles of research and methodology for analyzing current fire-related research. The student will be able to understand the rationale that fire research organizations use for conducting fire-related research and evaluation.

Prerequisite(s): FSMT 2410.

FSMT 4900 SPECIAL TOPICS IN FIRE SERVICE MANAGEMENT (3 credits)

This course is meant to provide upper-level FSMT students with an in-depth look at current and future issues affecting the Fire Services industry and industry professionals. Possible topics include fire case studies, comparative international studies, issues in federalism, fire education, and fiscal administration. Subject matter will vary by student interest and by faculty preference. Students may repeat the course for additional academic credit as long as the course topic is not duplicated.

Prerequisite(s): Prerequisites will be established by the coordinating instructor to meet the foundational knowledge requirements for the area being studied. Not open to non-degree graduate students. EMGT students will need faculty approval.

French (FREN)

French Undergraduate Courses

FREN 1010 WHY LANGUAGES MATTER: REPRESENTATIONS OF LINGUISTIC DIVERSITY IN THE US MEDIA (3 credits)

Delivered in English, this course introduces students to diversity in the US using language in context as points of departure. In this course, we analyze the intersection between language and ideological constructions (e.g., the objectification of Latino women, discrimination and stereotypes toward Asian peoples) and examine nodes of social meaning through visual and audio representations of language, as consumed in music, tv series, art (e.g., street art, installations) and social media. Departing from a US-centric and an assimilative approach, the course provides a historical and geographic lens through which these languages exist in the United States. (Cross-listed with WLL 1000, GERM 1010, JAPN 1020, SPAN 1010).

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

FREN 1110 ELEMENTARY FRENCH I (5 credits)

Elementary French I emphasizes the mastery of all four language skills: speaking, listening, reading, and writing, as well as introduces cultural issues from the francophone world.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

FREN 1120 ELEMENTARY FRENCH II (5 credits)

French 1120 is the second course in the 16-hour Arts and Sciences Foreign Language requirement. It is communicative in approach and emphasizes the mastery of all language skills including listening, writing, speaking, and reading.

Prerequisite(s): FREN 1110 with a grade of C- or better or placement by diagnostic examination. Department permission is needed for transfer credit.

FREN 2110 INTERMEDIATE FRENCH I (3 credits)

Grammar review, continued oral practice, and introduction to literary readings.

Prerequisite(s): FREN 1120 or placement by Department of Foreign Languages diagnostic examination. Department permission is needed for transfer credit.

FREN 2120 INTERMEDIATE FRENCH II (3 credits)

Grammar review, continued oral practice, and introduction to literary readings.

Prerequisite(s): FREN 2110 or placement by Department of Foreign Languages diagnostic examination. Department permission is needed for transfer credit.

FREN 3020 SPECIAL TOPICS IN FRENCH (3 credits)

Topics for this course will include French grammar review, conversation practice, composition, and structure. This course is a bridge course designed for students who have completed FREN 2120, FREN 3030, or FREN 3040, to prepare them for 3000/4000-level content courses in French.

Prerequisite(s): FREN 2120 or equivalent. Not open to non-degree graduate students.

FREN 3030 FRENCH CONVERSATION (3 credits)

Practice in a variety of conversational situations and levels.

Prerequisite(s): FREN 2120 or placement by Department of Foreign Languages diagnostic examination.

FREN 3040 FRENCH GRAMMAR AND COMPOSITION (3 credits)

Review of grammatical principles, practice in written composition.

Prerequisite(s): FREN 2120 or placement by Department of Foreign Languages diagnostic examination.

FREN 3050 INTRODUCTION TO TRANSLATION (3 credits)

Introduction to the theory and various techniques of translation from French into English. Students will review specific differences between French and English grammar and lexicon. Students will first practice translating sentences, moving to paragraphs to end on translating various genres of literary works. Throughout the course, students will translate a great variety of texts such as news articles, administrative forms, official records, business documents, brochures, operating instructions, and how to translate subtitles.

Prerequisite(s): FREN 3040 or permission

FREN 3060 READINGS IN FRENCH (3 credits)

This course aims to increase students' fluency in reading and to develop comprehension skills that will help them in advanced language studies. The course will also enrich students' vocabulary through the use of a variety of primary sources; many genres will be sampled.

Prerequisite(s): FREN 2120. Not open to non-degree graduate students.

FREN 3160 INTRODUCTION TO FRENCH LITERATURE (3 credits)

Readings in this survey course will include a selection of French authors from the medieval period to the present. This selection will vary depending on the instructor. The main objective of this course is the development of critical reading skills and an understanding of major authors, movements, and themes in French literature. Students will read selections from numerous authors in a variety of genres, including short stories, theater, poetry, and the novel. The course also focuses on continuing to develop French language skills, in particular through reading for comprehension and interpretation of metaphorical meaning. Discussion will help to hone speaking skills.

Prerequisite(s): FREN 3060 or instructor permission.

FREN 3370 FRENCH CIVILIZATION (3 credits)

A historical view of France through its political, artistic, musical, literary, architectural and philosophical development from prehistory to the present.

Prerequisite(s): FREN 2120 or permission

FREN 3580 BUSINESS FRENCH (3 credits)

An introduction to the French business world. Students will acquire the necessary vocabulary, skills and cultural strategies to perform adequately in a French business environment so they can understand the cultural differences between the American and French business worlds.

Prerequisite(s): FREN 2120 or equivalent

FREN 4030 ADVANCED FRENCH CONVERSATION (3 credits)

This course focuses on the development of oral skills in French through the use of complex and sophisticated conversational structures and nuanced lexicon. Students will be involved in expressing or presenting their ideas and opinions, interpersonal speaking activities, and a variety of activities including reading short literary and cultural texts and screening films. (Cross-listed with FREN 8036).

Prerequisite(s): FREN 3030 or departmental permission. Not open to non-degree graduate students.

FREN 4040 ADVANCED FRENCH COMPOSITION AND STYLISTICS (3 credits)

In this capstone course, required for the completion of the major, learners will explore and practice advanced grammatical structures, write compositions in a variety of genres, and familiarize themselves with advanced stylistics.

Prerequisite(s): French majors with Junior or Senior standing. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

FREN 4050 SEMINAR IN THE CULTURE AND CIVILIZATION OF QUEBEC (3 credits)

An introduction to the many facets of Quebec Culture & Civilization, through readings on Quebec's history and contemporary culture and also through films and other media related to Quebec. (Cross-listed with FREN 8056).

Prerequisite(s): FREN 2120 or permission, and ENGL 1160

FREN 4070 FRANCOPHONE WEST AFRICA CULTURES (3 credits)

This course is intended as an introduction and exploration to the history, literary traditions and cinema of Francophone West Africa from 1945 to today. It seeks to familiarize students with the practice of reading literary texts, discussing seminal films and articulating critically informed reaction in writing. The course will focus on a selection of canonical authors and seminal films from Burkina Faso, Guinea, Ivory Coast, Mali, Mauritania and Senegal. The texts and films will provide a point of entry to the study of history, society, and culture. Historical, socio-political and cultural issues covered in the course will include: Ancient rites and oral literature, French colonization and post-colonialism, women and gender issues, childhood, immigration, the "Afropean" literature and West African Francophone countries contemporary challenges (politics and economies) with presentations on Benin, Niger and Togo today. (Cross-listed with FREN 8076).

Prerequisite(s): FREN 2120

FREN 4150 CONTEMPORARY FRENCH NOVEL (3 credits)

Selected contemporary French novels are analyzed and discussed. The main objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the texts under consideration. In addition, students will examine the sociopolitical and cultural contexts of these literary works. (Cross-listed with FREN 8156).

Prerequisite(s): FREN 3060 or permission. Not open to non-degree graduate students.

FREN 4170 CONTEMPORARY FRENCH THEATER (3 credits)

Selected contemporary French plays are analyzed and discussed. The main objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the texts under consideration. (Cross-listed with FREN 8176).

Prerequisite(s): FREN 3060 or permission of instructor. Not open to non-degree graduate students.

FREN 4220 THE STRUCTURE OF FRENCH (3 credits)

A survey of the linguistic structure of modern French, including phonology, morphology, and syntax. (Cross-listed with FREN 8226).

Prerequisite(s): FREN 3040 or departmental permission. Not open to non-degree graduate students.

FREN 4860 MODERN FRENCH WOMEN AUTHORS (3 credits)

Selected contemporary French literary texts written by women are analyzed and discussed. This may include novels, short stories, poetry, and graphic novels. The primary objective of this course is the development of critical reading and analytical skills that will allow students to reflect more productively upon the major social and aesthetic themes manifest in the works under consideration. In addition, students will examine the sociopolitical and cultural contexts of these works. (Cross-listed with FREN 8866).

Prerequisite(s): FREN 3060 or permission. Not open to non-degree graduate students.

FREN 4900 INDEPENDENT STUDY (1-3 credits)

Specially planned assignments in a well-defined field of French Studies, carried out under the supervision of a member of the Foreign Languages and Literature faculty. Designed primarily for the student who has need of work not currently available in the departmental offerings and who has demonstrated the capability of working independently. In general, these independent studies should not be taken as substitutes for scheduled classes of the same nature. May be repeated for credit once. (Cross-listed with FREN 8906).

Prerequisite(s): Junior or Senior standing, no incompletes outstanding, and departmental permission. Not open to non-degree graduate students.

FREN 4950 PRO-SEMINAR: LITERATURE AND/OR FILM (3 credits)

This course is dedicated to the study of a narrow field of the literature and/or cinema of the Francophone world. (Cross-listed with FREN 8956).

Prerequisite(s): FREN 3030, FREN 3040, and FREN 3060

FREN 4960 PRO-SEMINAR: CULTURE AND SOCIETY (3 credits)

This course will address narrow field of study of the civilization, history, film, contemporary culture, art, politics, and or cultural studies of the Francophone world. (Cross-listed with FREN 8966).

Prerequisite(s): FREN 2120; FREN 3030, FREN 3040, and FREN 3060

FREN 4970 PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS (3 credits)

This course will address a narrow field of study of linguistics, translation/interpretation or the professional language of the Francophone world. (Cross-listed with FREN 8976).

Prerequisite(s): FREN 3030, FREN 3040, and FREN 3060

Geography (GEOG)

Geography Undergraduate Courses

GEOG 1000 WORLD REGIONAL GEOGRAPHY (3 credits)

An introductory course designed to study the world and its macro-regions using a combination of physical and human geography. (Offered Fall, Spring)

Distribution: Social Science General Education course and Global Diversity General Education course

GEOG 1020 INTRODUCTION TO HUMAN GEOGRAPHY (3 credits)

An introductory course which studies the geography of human activity through a topic by topic coverage of cultural traits and complexes that characterize different societies in the world. Major cultural topics of focus are the geography of population, agricultural systems, settlement, language, religion, political patterns, and man's ways of occupying urban and industrial space, among others.

Distribution: Social Science General Education course and Global Diversity General Education course

GEOG 1030 OUR DYNAMIC PLANET: INTRODUCTION TO PHYSICAL GEOGRAPHY (4 credits)

This course is designed to acquaint the student with those processes active in shaping the surface of the earth and their relationship to one another. Includes the study of the atmosphere, river systems and hydrology, glaciers, climate, plate tectonics and landforms. Includes weekly laboratory sessions. (Offered Fall, Spring)

Distribution: Natural/Physical Sci General Education lecture&lab

GEOG 1050 HUMAN-ENVIRONMENT GEOGRAPHY (4 credits)

Learn about how sustainability and quality of life depend on human interactions with environmental phenomena such as Climate, Drought, Energy, Water, and Biodiversity. These interactions influence patterns of Urbanization, Technology, Consumption, and Agriculture that can improve or degrade quality of life and sustainability. Lecture emphasizes concepts for understanding and explaining human-environment interaction. Labs focus on fundamentals of physical earth science and how these offer possibilities for sustainable development.

Distribution: Natural/Physical Sci General Education lecture&lab

GEOG 1090 INTRODUCTION TO GEOSPATIAL SCIENCES (4 credits)

An introductory lecture/lab that has students learn and apply the principles of geospatial science within the frameworks of Geographic Information Science (GISc), Remote Sensing, Aerial Photography, Photogrammetry, Global Positioning Systems and Cartography/Visualization. The course focuses on the underlying scientific basis that is shared across all of these frameworks. Students will produce both maps and spatial analysis by the end of the course using all of the above frameworks.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Natural/Physical Sci General Education lecture&lab

GEOG 2620 AERIAL PHOTOGRAPHIC INTERPRETATION (3 credits)

A practical application of various types of air photographs to the interpretation and analysis of both physical and cultural landscapes. Provides a fundamental tool for those interested in geography, geology, ecology and the environment. Recommended: Three hours in geography or geology.

GEOG 3000 TRAVEL STUDY IN GEOGRAPHY (3 credits)

The course examines the development of travel as a human endeavor and the process of planning a trip to a foreign country. A major objective of the course is the use and evaluation of Internet travel resources. This is accomplished by searching for relevant sources and assembling this material for presentation to others through the Internet.

Prerequisite(s): An introductory course in geography is highly recommended along with a basic knowledge of online tools available through the Internet.

GEOG 3020 HEALTH & MEDICAL GEOGRAPHY (3 credits)

What are the relationships between place and health? Why are there health disparities between populations in different parts of the country, and the world? The field of health and medical geography offers methods and perspectives to help us understand these timely and pressing questions. In this class, we will examine the links between societies, geographies, and health and disease, and what the implications are for our interconnected world.

Prerequisite(s): GEOG 1000 or GEOG 1020, junior standing, or permission of the instructor.

GEOG 3030 GEOGRAPHY OF AFRICA (3 credits)

This course is about the human geography of Africa. It offers an overview of the geography, economics, politics, history, oral and written literature, art, anthropology and sociology of the African continent, with particular focus on sub-Saharan Africa. The course attempts to dispel myths and stereotypes about the African continent and facilitates an understanding of the dynamics that shaped and continue to shape African systems and people. Students taking Geography of Africa will engage in a comprehensive and systematic survey of the environments, natural resources, populations, their cultures, and histories of the geographic regions of Africa and their development. (Cross-listed with BLST 3030).

Prerequisite(s): Junior or instructor permission

GEOG 3050 GEOGRAPHY IN FILM (3 credits)

Our views of the world are largely shaped by images that we see through popular media. This course examines contemporary films from around the world and how they depict places, the environment, and the lives of people. Critical and constructive examination of film will enable students to understand how images produce powerful ideological messages and how they shape the representation of entire cultures and people.

Prerequisite(s): Junior standing. Introductory courses in regional, human, physical geography are highly recommended.

GEOG 3070 GEOGRAPHY OF LATIN AMERICA (3 credits)

This course surveys the physical and human environments of Latin America. Emphasis is placed upon cultural factors in the use of land and Latin American development. (Cross-listed with LLS 3070).

Prerequisite(s): Junior

GEOG 3080 EAST & SOUTHEAST ASIA (3 credits)

An introduction to the physical and human landscape of East, and Southeast Asia, encompassing countries from Japan to Myanmar. Emphasis is placed upon the sequence of occupancy of the land, agrarian traditional economies and contemporary development. Dominated by China, the region represents a major area for economic development.

Prerequisite(s): Junior

GEOG 3130 ECONOMIC GEOGRAPHY (3 credits)

An introduction to the basic concepts and approaches in contemporary economic geography, stressing the importance of the spatial perspective for an understanding of how economic processes work at global, national, regional, and local scales. (Offered Fall) (Cross-listed with ECON 3130)

Prerequisite(s): Majoring in Geography. Non-Geography majors: MATH 1310 or MATH 1220, ECON 2200 and ECON 2220, each with a "C" (2.0) or better.

GEOG 3230 GEOGRAPHY OF EUROPE (3 credits)

This course is a comprehensive examination of contemporary Europe from a geographical perspective. The course covers physical, cultural, political, urban, population and economic geography of Europe as well as the recent political and economic transformations in both Western and Eastern Europe.

Prerequisite(s): GEOG 1000, GEOG 1020, GEOG 1030 or GEOG 1050, and junior.

GEOG 3240 GEOGRAPHY OF RUSSIA AND ITS NEIGHBORS (3 credits)

A comprehensive examination of Russia and the former Soviet republics from a geographical perspective. The course is organized topically to cover physical, historical, political, urban, population, economic and environmental geography. Special attention is given to geographical and environmental effects of the collapse of the former Soviet Union and the post-Communist transformation.

Prerequisite(s): GEOG 1000 or GEOG 1020 or GEOG 3130 and junior, or permission of instructor

GEOG 3330 UNITED STATES & CANADA (3 credits)

GEOG 3330: UNITED STATES & CANADA involves the analysis of the natural environment, historical development, economic systems, cultural patterns, and political structures of the Canada geographic region. The course provides a regional geographic perspective on these two countries by examining the expression of culture on the landscape. The course is designed for students wishing to gain regional geographical knowledge, while expanding their understanding of the interconnections among people and place within the United States and Canada.

Prerequisite(s): Junior

GEOG 3440 NEBRASKA NATURAL RESOURCES MANAGEMENT (3 credits)

Method and actual application of managing natural resources in Nebraska, with emphasis on individual stewardship. The course will focus on the most current political, physical and economic developments in resources management.

Prerequisite(s): Junior standing or permission of the instructor.

GEOG 3510 METEOROLOGY (3 credits)

A course designed to acquaint the student with the atmospheric environment. The course deals with atmospheric processes, their relationship and variation in both time and space, and their effect on the overall environment of the earth.

Distribution: Natural/Physical Sci General Education lecture

GEOG 3514 INTRODUCTION TO METEOROLOGY LABORATORY (1 credit)

This lab is designed to give students practice with atmospheric processes using scientific principles techniques, procedures and data associated with meteorology. Offered on-line only.

Prerequisite(s): Concurrent or previous enrollment in GEOG 3510

Distribution: Natural/Physical Sci General Education lab course

GEOG 3530 CARTOGRAPHY AND DATA VISUALIZATION (4 credits)

An introduction to the concepts and techniques of map construction and visual data communication. Topics include map scale, map projections, thematic cartography, history of cartography, computer mapping, and global positioning systems. Particular attention is given to designing both paper and Internet distributed maps. This course is offered in both the Fall and Spring semesters. (Cross-listed with GEOG 8535).

Prerequisite(s): GEOG 1000 or GEOG 1020 and GEOG 1030 or GEOG 1050, a statistics course, and a programming course.

GEOG 3540 CARTOGRAPHY & GIS LAB (2 credits)

An introduction to the methods and techniques of map construction using both graphic design and geographic information system software. Topics include map design for both general reference and thematic maps. Particular attention is given to the processing, compilation, data classification, and symbolization of various types of spatial data. This course is the lab component of GEOG 3530.

Prerequisite(s): Concurrent registration in GEOG 3530.

GEOG 4010 CONSERVATION OF NATURAL RESOURCES (3 credits)

This course provides a diverse overview of the principles and contemporary issues related to ecology and management of wildlife, fisheries, forests, soil, rangeland, minerals, and water. It includes the philosophical, economic and social aspects of resource management. Current local, regional, and global issues are examined. (Cross-listed with GEOG 8016).

Prerequisite(s): Three hours of geography.

GEOG 4020 SPATIAL ANALYSIS IN GEOGRAPHY (3 credits)

An introduction to spatial analysis with a focus on spatial statistics. Emphasis will be placed on the nature of geographic data, spatial data handling, modeling logic, sampling theory, and design. Both descriptive and spatial statistics methods are covered. Students will receive hands-on experience working with statistical data sets, software, and scientific visualization of research results. (Cross-listed with GEOG 8026).

Prerequisite(s): STAT 1530 or equivalent

GEOG 4030 COMPUTER MAPPING AND VISUALIZATION (3 credits)

Computer techniques in the mapping and visualization of spatial data. Various forms of spatial data manipulation and computer graphic output techniques are examined. Particular attention is given to the creation of maps for the internet and the incorporation of interaction and animation in their display. (Cross-listed with GEOG 8036).

Prerequisite(s): GEOG 1090 or permission of instructor. Background in programming, particularly JavaScript, highly recommended.

GEOG 4040 GEOARCHAEOLOGY (3 credits)

An introduction to geoarchaeology: the application of methods and techniques of geography, geology and other earth sciences to solve archaeological problems and reconstruct past environments. (Cross-listed with GEOG 8046, GEOL 4040).

Prerequisite(s): Major in geology or geography; or major in anthropology, philosophy or religion with GEOG 1030, GEOG 1060 or GEOG 1070; or GEOL 1170 or GEOL 1010; or permission

GEOG 4050 GEOGRAPHIC INFORMATION SYSTEMS I (4 credits)

An introduction to the concepts and principles of geographic information systems (GIS). Emphasis will be placed on geographic data inputs, manipulation, analysis, and output functions. Exercises introduce students to GIS software and applications. Usually offered Fall, Spring, Summer. (Cross-listed with GEOG 8056).

Prerequisite(s): GEOG 3530 or 6 credit hours of GEOG course.

GEOG 4100 BIOGEOGRAPHY (3 credits)

This course is intended as an introduction to biogeography, the study of the distribution and evolution of organisms across space and through time. Usually offered every year. (Cross-listed with BIOL 4100, GEOL 4100, BIOL 8106, GEOG 8106, GEOL 8106).

Prerequisite(s): BIOL 1450 and BIOL 1750 or GEOL 3100 or BIOL 3100, junior-senior.

GEOG 4120 URBAN GEOGRAPHY (3 credits)

This course is designed to serve as an introduction to the complex and dynamic urban system, including the physical, economic, political, cultural, social, and environmental forces that shape the form and function of cities, as well as how individuals and groups experience urban life. We make ample use of geographic information systems (GIS) to analyze cities and better understand crucial urban concepts such as urban growth and development, patterns of urban form, segregation and neighborhood change, economic specialization and agglomeration, urban sprawl, and environmental justice. (Offered Fall) (Cross-listed with GEOG 8126).

GEOG 4130 POLITICAL GEOGRAPHY (3 credits)

An introduction to the basic concepts and approaches in contemporary political geography at the global, national and local scales. Core topics to be examined include geopolitics, imperialism, war and peace, global ecopolitics, states, nationalism and electoral geography. (Offered Fall) (Cross-listed with GEOG 8136).

Prerequisite(s): An introductory level human geography course: GEOG 1020 or GEOG 1000, Junior

GEOG 4150 GEOGRAPHY, GENDER AND ENTREPRENEURSHIP (3 credits)

An advanced seminar focused on links among geography, gender and work, emphasizing leadership and entrepreneurship. The course considers theory and method in addition to empirical work. The nature of space, of gender, and of work, are examined. Topics include the gendering of work, the geography of entrepreneurship, gender and leadership. (Cross-listed with WGST 4150, ENTR 4150, ENTR 8156, GEOG 8156 and WGST 8156).

Prerequisite(s): Junior, senior, or graduate standing, or permission of instructor.

GEOG 4160 URBAN SUSTAINABILITY (3 credits)

Using sustainability as a conceptual framework, students in this course will investigate a variety of social, economic, and environmental challenges facing cities of the 21st century. Topics and issues explored include urban growth and expansion, livability, equity & gentrification, energy use & production, urban farming, poverty, automobility & transportation, water security, urban pollution, and the role of cities in climate change. (Cross-listed with GEOG 8166)

Prerequisite(s): Junior

GEOG 4170 ADVANCED CULTURAL GEOGRAPHY (3 credits)

This course examines current theoretical debate and research practice in a select topic in Cultural Geography. Emphasis will be on readings and discussion with students engaging in original research. Specific thematic focus will vary from year to year. This course may be taken multiple times as long as topics differ. (Cross-listed with GEOG 8176).

Prerequisite(s): GEOG 1000 or GEOG 1020, junior standing, or permission of the instructor.

GEOG 4200 WATER QUALITY (3 credits)

This class will apply chemical principles to the aquatic environment to understand how and why water quality varies. Integrated lectures and labs will focus on completing a class-defined, locally-explorable water quality project. Students will also gain basic water sampling and analysis skills. (Cross-listed with GEOG 8206, GEOL 4200).

Prerequisite(s): One of the following: GEOL 2750, GEOL 4540, CHEM 1140, CHEM 1180, or instructor permission.

GEOG 4210 GEOGRAPHIES OF SEXUALITIES (3 credits)

How are geography and sexuality related? What have cities got to do with sexual identities? Can rural spaces foster diverse sexual communities? These and related questions are the focus of this upper-level undergraduate and graduate-level course. Students read scholarly work by and about LGBTQ+ (Lesbian, Gay, Bisexual, Transgender, Queer, and +), and cisgender people, and their lived experiences creating and inhabiting different geographies. Students gain an appreciation for the social construction of diverse sexualized spaces and considers questions about equity and policy through case studies in a variety of countries. Each student also researches a course-relevant topic they choose. (Cross-listed with GEOG 8216, WGST 4210, WGST 8216).

Prerequisite(s): GEOG 1000, GEOG 1020, WGST 2010, or WGST 2020, or junior standing, or permission of the instructor.

GEOG 4230 GREAT PLAINS & NEBRASKA (3 credits)

This course is a comprehensive examination of the Great Plains region from a geographical perspective. It considers both the physical and human geography of the Plains, with particular attention to our home, Nebraska. Topics to be covered include: the Plains' unique ecosystems, its early human inhabitants, its later settlers, its evolving land-use patterns, and current issues. (Cross-listed with GEOG 8236).

GEOG 4260 PROCESS GEOMORPHOLOGY (4 credits)

A lecture and laboratory course focused on understanding Earth surface processes and the evolution of landforms across spatial and temporal scales. The course emphasizes applying unifying concepts in geomorphology, quantitative methodology and modern process-oriented geomorphology to interpret landscape evolution. (Cross-listed with GEOG 8266, GEOL 4260).

Prerequisite(s): One of the following: GEOL 1010, GEOL 1170, GEOG 1030, GEOG 1050 or instructor permission.

GEOG 4320 CLIMATOLOGY (3 credits)

A study of climatic processes and their effect on shaping the physical landscape. Emphasis on physical and applied aspects of the field. (Cross-listed with GEOG 8326).

Prerequisite(s): GEOG 1030, GEOG 1050, GEOG 3510, or permission of instructor.

GEOG 4330 SOIL GENESIS, MORPHOLOGY AND CLASSIFICATION (4 credits)

This course is designed to familiarize students with basic soil chemical, physical and biological properties, soil morphological characteristics, soil classification and soil forming processes. The course focuses on relationships between soils and environmental factors and how such factors alter soil forming processes. The lab will focus on developing basic field skills, including soil morphological descriptions and soil mapping, as well as common laboratory methods used to analyze soils. (Cross-listed with GEOL 4330, GEOG 8336).

Prerequisite(s): One of the following: GEOG 1030, GEOG 1050, GEOL 1010, GEOL 1170 or instructor permission.

GEOG 4340 WATER RESOURCES (3 credits)

This course explores the applied principles of hydrology, water systems modeling, river basin development, and water management issues and practices in the United States and other parts of the world. Two local Saturday field trips will be required. (Cross-listed with GEOG 8346).

Prerequisite(s): GEOG 1060 and Junior standing

GEOG 4350 GLOBAL CLIMATE CHANGE (3 credits)

The primary objective of this course is for students to form a scientific, evidence-based, stance on current and future changes to the Earth's climate. To this end, this course will be based on scientific inquiry into the current state of knowledge. Particular emphases are placed on evidence and causes of change, and the associated environmental and social impacts, including: water resources, extreme weather, human health, and others of interest to the class. (Cross-listed with GEOG 8356, ENVN 8356, ENVN 4350).

Prerequisite(s): At least one of the following: GEOG 1030, GEOG 1050, GEOG 3510, GEOG 4320, or permission from instructor

GEOG 4400 EMERGING TOPICS IN GEOGRAPHY (3 credits)

Emerging Topics in Geography focuses on the latest research areas in the field of geography. The specific topic of each course set will be based on the research trends in geography. This course will be offered on demand. (Cross-listed with GEOG 8406).

GEOG 4530 HISTORICAL GEOGRAPHY OF THE UNITED STATES (3 credits)

This course examines the geography, physical and human, real, perceived, or theoretical, of the United States' historical development. It considers the ways history has and has not been affected by geography. It will also cover the field of historical geography, its theories and practices. (Cross-listed with GEOG 8536).

Prerequisite(s): Junior and HIST 1110 and HIST 1120 or GEOG 1020 or GEOG 3330

GEOG 4550 GEOGRAPHY OF ECONOMIC GLOBALIZATION (3 credits)

A study of the geography of economic globalization and the geography of the world economy. The major topics include the historical development of the world economy and globalization from the geographical perspective, trends in geography of global production, trade and investment, the most important factors and actors in the globalization processes and its geographic effects, geography of transnational corporations, case studies of economic geography of selected industries and service activities, effects of globalization on the developed and developing countries. This course also supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with GEOG 8556, CACT 8116).

Prerequisite(s): An introductory level human geography course: GEOG 1020 or GEOG 1000

GEOG 4600 INDEPENDENT RESEARCH (1-3 credits)

Advanced study in the form of a major paper to give the senior student knowledge of and experience in using government documents, professional, and/or primary materials on a topic. Must be under the supervision of the instructor who is particularly qualified for the topic chosen. (Cross-listed with GEOL 4600).

Prerequisite(s): Permission of department chair.

GEOG 4610 ENVIRONMENTAL MONITORING AND ASSESSMENT (3 credits)

An interdisciplinary approach to techniques for the design and implementation of environmental inventory and monitoring schemes used to evaluate natural resources. Students work as teams to synthesize information from their backgrounds in geography, geology and ecology to evaluate the impacts of human actions on environmental quality following the framework for environmental assessments provided by the National Environmental Policy Act. Course is organized to accommodate variable needs of students with different backgrounds and career choices. Usually offered every year. (Cross-listed with BIOL 4610, ENVN 4610, GEOL 4610, GEOG 8616, GEOL 8616)

Prerequisite(s): Permission of instructor.

GEOG 4620 GEOGRAPHICAL FIELD STUDIES (3 credits)

Field experience course based on variable topics and themes. Students must attend the multiple day field trip that will require overnight stays. (Cross-listed with GEOG 8626).

Prerequisite(s): Instructor Permission. Not open to non-degree graduate students.

GEOG 4630 ENVIRONMENTAL REMOTE SENSING (4 credits)

An introduction to remote sensing science and technology. Emphasis will be placed on multispectral data, matter/energy interactions, sensor system characteristics, photogrammetry, image interpretation, digital image processing, and environmental applications. Formal laboratory instruction will provide students with problem-solving skills and hands-on experience with remote sensing and GIS software. (Cross-listed with GEOG 8636).

Prerequisite(s): GEOG 1060 or GEOG 1070 or GEOL 1170. Introductory statistics highly recommended.

GEOG 4640 CRITICAL ZONE SCIENCE (4 credits)

This course examines the Critical Zone (CZ), Earth's permeable layer that extends from the top of vegetation to the bottom of groundwater. The CZ is a constantly evolving layer where rock, soil, water, air, and living organisms interact to regulate the landscape and natural habitats; it also determines the availability of life-sustaining resources, including our food production and water quality. CZ science is an interdisciplinary and international endeavor focused on cross-disciplinary science. In this course, we will focus on using data available from the existing National Science Foundation (NSF)-funded CZ Observatories (CZOs) along with readings, discussions and activities to explore interactions within the CZ. (Cross-listed with GEOG 8646, GEOL 4640)

Prerequisite(s): One of the following: GEOL 1170, GEOL 1010, GEOG 1030 or GEOG 1050; one chemistry or physics course recommended; or instructor permission.

GEOG 4660 GEOGRAPHIC INFORMATION SYSTEMS II (4 credits)

An introduction to advanced geographic information systems (GIS) topics. Emphasis will be placed on algorithms and analysis for information extraction. Topics include spatial interpolation, remote sensing GIS integration, software development, spatial analysis, GIS modeling, and future advances in GIS. Formal laboratory instruction will provide students with GIS experience to solve application problems. Usually offered in Fall. (Cross-listed with GEOG 8666).

Prerequisite(s): GEOG 4050 / GEOG 8056

GEOG 4800 INTERNSHIP IN ENVIRONMENTAL REGIONAL PLANNING EARTH SCIENCE (1-6 credits)

Internships with local agencies or corporations enable students to gain knowledge and experience and apply their learning in comprehensive regional or environmental planning or environmental science.

Prerequisite(s): Senior, major or area of concentration in geography or environmental science and permission

GEOG 4820 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

An introduction to environmental law and regulations intended for students pursuing careers in environmental sciences or related fields. The course emphasizes the origins, implementation, and enforcement of U.S. state and federal laws and regulations. Major federal environmental laws, covering air and water quality, solid and hazardous waste, pollution prevention and remediation, and natural resources will be discussed. Usually offered Fall semesters. (Cross-listed with ENVN 8826, ENVN 4820, BIOL 4820, GEOG 8826, PA 8826).

Prerequisite(s): Junior-senior or permission of the instructor.

Geology (GEOL)

Geology Undergraduate Courses

GEOL 1010 ENVIRONMENTAL GEOLOGY (3 credits)

This is an introductory course for non-majors designed to make students aware of their physical environment and those factors that should influence where we site our home and communities. Topics will include hazards associated with volcanoes, earthquakes, landslides, floodplains and the problems associated with toxic waste disposal.

Distribution: Natural/Physical Science General Education course

GEOL 1100 EARTH SYSTEM SCIENCE (3 credits)

This course is an introduction to system science as applied to the earth. Students learn about simple earth system models, focusing on the hydrologic, rock and carbon cycles and energy flow through and linkages among them. Students also learn how short and long term global changes result from system interactions.

Distribution: Natural/Physical Sci General Education lecture

GEOL 1104 EARTH SYSTEM SCIENCE LAB (1 credit)

This laboratory course is an optional companion to GEOL 1100, Earth System Science, but can be taken alone. Computer and web based exercises lead students through scientific investigation of Earth components, processes and systems. Topics include: scientific visualization and methodology, energy flow in the earth environment, convection in fluids, population dynamics, plate tectonics, river systems, coastal systems, biodiversity and Earth system history.

Distribution: Natural/Physical Sci General Education lab course

GEOL 1170 INTRODUCTION TO PHYSICAL GEOLOGY (4 credits)

Fundamentals of geology. The study of the internal geologic processes and external and erosional and depositional processes which create the subsurface and surface features of the earth. Fundamentals of contour mapping, topographic map interpretation and identification of common minerals and rocks will be covered in a required laboratory period. One field trip required.

Distribution: Natural/Physical Sci General Education lecture&lab

GEOL 1180 INTRODUCTION TO HISTORICAL GEOLOGY (4 credits)

Basic fundamentals for interpretation of earth history. Deduction of history of earth-moon system through interpretation of geologic phenomena using principles of stratigraphy, sedimentation, structure and fossil content. Global tectonics, encompassing theories of sea-floor spreading and continental drift are presented. Fundamentals and interpretation of geologic environments and geologic maps, coupled with identification of fossils will be covered in a required laboratory period. One Saturday field trip required.

Prerequisite(s): GEOL 1170 or GEOL 1070 or permission of Geography-Geology Department.

GEOL 2014 ENVIRONMENTAL GEOLOGY LAB (1 credit)

Basic topics such as geohydrology, water quality, waste management (including landfill siting and design), flood frequency, slope stability and earthquake hazards are covered via labs and field trips at a detailed introductory level. Local sites and associated data are used where possible to illustrate fundamental principles and commonly used analytic techniques.

Prerequisite(s): GEOL 1010 or GEOG 1170 or GEOG 1030 or permission of instructor.

GEOL 2100 GEOLOGY OF NEBRASKA (3 credits)

An introduction to the geologic features of Nebraska, and how the evidence they provide can be used to scientifically interpret the ancient history of the region. A review of the geologic history of Nebraska as it is currently understood will place the events documented in the larger context of Earth history.

Distribution: Natural/Physical Science General Education course

GEOL 2300 GEOSCIENCE DATA ANALYSIS AND MODELING (3 credits)

Introduction to foundation geoscience analysis and modeling techniques and conceptual frameworks. Topics covered include: describing and comparing populations, geologic map construction, fractals, surface contouring and modeling, non-linear behavior, GIS, graphic representation, photogrammetry, and computer modeling. Examples and exercises work with actual geoscience data. Students also gain experience with data retrieval from geoscience databases.

Prerequisite(s): GEOL 1010 or GEOL 1170, or GEOG 1030 or GEOG 1060 or GEOG 1070, or permission of instructor.

GEOL 2500 SPECIAL TOPICS IN GEOGRAPHY-GEOLOGY (1 credit)

This course will provide for an in-depth study of a geographical or geological subject (as specified in the course subtitle). Various classes will be offered as sections of GEOL 2500, but will be separate from one another. Students may repeat GEOL 2500 as often as they like as long as no specific subject is duplicated.

Distribution: Natural/Physical Science General Education course

GEOL 2750 MINERALOGY (3 credits)

Introduction to crystallography and mineralogy. Crystallography section is a study of crystal structure, symmetry and crystal systems. Mineralogy section is devoted to the description, identification and classification of minerals based on their crystal forms, physical properties, chemical composition and occurrence in nature. Must be taken concurrently with GEOL 2754.

Prerequisite(s): GEOL 1170. Must be taken concurrently with GEOL 2754.

GEOL 2754 MINERALOGY LABORATORY (1 credit)

A systematic investigation of minerals and the techniques of studying minerals to be taken concurrently with GEOL 2750. (Fall)

Prerequisite(s): Concurrent enrollment in GEOL 2750

GEOL 2760 IGNEOUS AND METAMORPHIC PETROLOGY (3 credits)

A study of the nature, origin, and significance of igneous and metamorphic rocks. Topics include genesis and crystallization of magmas, phase equilibria of mineral assemblages, and pressure and temperature conditions of metamorphism. One weekend field trip will be required. Must be taken concurrently with GEOL 2764.

Prerequisite(s): GEOL 2750. Must be taken concurrently with GEOL 2764.

GEOL 2764 IGNEOUS AND METAMORPHIC PETROLOGY LABORATORY (1 credit)

Petrology Laboratory is an introduction to the methods of petrology with emphasis on hand specimen identification and use of the petrographic microscope. Must be taken concurrently with GEOL 2760. (Spring)

Prerequisite(s): Concurrent enrollment in GEOL 2760

GEOL 3100 PALEONTOLOGY (3 credits)

An introduction to the history of life through the study of the fossil assemblages, communities, diversity, evolution, extinction, and how fossils are created. We then explore the history of invertebrates, vertebrates, microfossils, and mass extinctions. (Cross-listed with BIOL 3100).

Prerequisite(s): GEOL 1180 or with instructor permission

GEOL 3104 INVERTEBRATE PALEONTOLOGY LABORATORY (1 credit)

An examination of representative specimens of groups of organisms important in the fossil record and an introduction to analytical techniques in paleontology. Must be taken concurrently with GEOL 3100.

Prerequisite(s): GEOL 1180 or permission; Concurrent enrollment in GEOL 3100

GEOL 3300 STRUCTURAL GEOLOGY (3 credits)

A study of the deformation of rocks in the earth's crust. Recognition of structural features such as types of fractures, folds, faults and foliations. Analysis of stress and strain in rocks under physical conditions occurring in the earth's crust that form structural features. Knowledge of structural associations for crustal shortening, extension and other kinematic regimes.

Prerequisite(s): GEOL 2750

GEOL 3310 STRUCTURAL GEOLOGY FIELD METHODS (1 credit)

A lab course to accompany GEOL 3300. Field trip is included. Emphasis will be on collection, interpretation and presentation of field and lab data. Must be taken concurrently with GEOL 3300.

Prerequisite(s): GEOL 2750, concurrent enrollment in GEOL 3300.

GEOL 3400 INTRODUCTION TO SEDIMENTARY GEOLOGY (3 credits)

An introduction to the basic principles and concepts of sedimentology and stratigraphy. It will include a review of sedimentary processes and depositional environments and principles and techniques of stratigraphy, such as biostratigraphy and radiometric dating.

Prerequisite(s): GEOL 2750 and GEOL 2754

GEOL 3700 PLATE TECTONICS (3 credits)

An introduction to and analysis of the paradigm that has revolutionized the Earth Sciences, the theory of plate tectonics; includes polar wandering and magnetic reversals, structure and life cycle of the oceanic crust, origin of major topographic and structural features of the earth, arc volcanism, continental collisions, mineral deposits, supercontinent cycles and mantle convection.

Prerequisite(s): GEOL 1170, GEOL 1180 and upper division standing.

GEOL 4040 GEOARCHAEOLOGY (3 credits)

An introduction to geoarchaeology: the application of methods and techniques of geography, geology and other earth sciences to solve archaeological problems and reconstruct past environments. (Cross-listed with GEOG 4040, GEOG 8046).

Prerequisite(s): Major in geology or geography; or major in anthropology, philosophy, or religion with GEOG 1030, GEOG 1060 or GEOG 1070; or GEOL 1170 or GEOL 1010; or permission.

GEOL 4100 BIOGEOGRAPHY (3 credits)

This course is intended as an introduction to biogeography, the study of the distribution and evolution of organisms across space and through time. Usually offered every year. (Cross-listed with GEOL 8106, BIOL 4100, BIOL 8106, GEOG 4100, GEOG 8106).

Prerequisite(s): BIOL 1450 and BIOL 1750 or GEOL 3100 or BIOL 3100, junior-senior.

GEOL 4200 WATER QUALITY (3 credits)

This class will apply chemical principles to the aquatic environment to understand how and why water quality varies. Integrated lectures and labs will focus on completing a class-defined, locally-explorable water quality project. Students will also gain basic water sampling and analysis skills. (Cross-listed with GEOG 8206, GEOG 4200).

Prerequisite(s): One of the following: GEOL 2750, GEOL 4540, CHEM 1140, CHEM 1180, or instructor permission.

GEOL 4260 PROCESS GEOMORPHOLOGY (4 credits)

A lecture and laboratory course focused on understanding Earth surface processes and the evolution of landforms across spatial and temporal scales. The course emphasizes applying unifying concepts in geomorphology, quantitative methodology and modern process-oriented geomorphology to interpret landscape evolution. (Cross-listed with GEOG 8266, GEOG 4260).

Prerequisite(s): One of the following: GEOL 1010, GEOL 1170, GEOG 1030, GEOG 1050 or instructor permission.

GEOL 4300 ENGINEERING GEOLOGY (3 credits)

The course provides an overview of the application of geologic principles to engineering projects and applications. These would include geologic investigations for engineering projects related to: geologic hazard assessment, foundation design, slope stability, control of groundwater seepage, underground excavation support, erosion control, and evaluation of geologic materials for engineering purposes.

Prerequisite(s): Physical Geology (GEOL 1170) or Environmental Geology (GEOL 1010), Structural Geology (GEOL 3300) or permission of instructor.

GEOL 4330 SOIL GENESIS, MORPHOLOGY AND CLASSIFICATION (4 credits)

This course is designed to familiarize students with basic soil chemical, physical and biological properties, soil morphological characteristics, soil classification and soil forming processes. The course focuses on relationships between soils and environmental factors and how such factors alter soil forming processes. The lab will focus on developing basic field skills, including soil morphological descriptions and soil mapping, as well as common laboratory methods used to analyze soils. (Cross-listed with GEOG 4330, GEOG 8336)

Prerequisite(s): One of the following: GEOG 1030, GEOG 1050, GEOL 1010, GEOL 1170 or instructor permission.

GEOL 4400 GEOPHYSICS (3 credits)

A study of geophysical techniques used to understand the earth, study environmental problems, and in resource exploration. Seismic, gravity, heat flow, magnetic and other methods will be presented. The insights from these methods into earthquake events, stress distributions, rock rheology and plate tectonics will also be addressed. Interpretive skills will be emphasized. (Cross-listed with PHYS 4400).

Prerequisite(s): GEOL 1170, PHYS 1110 or higher, or permission of instructor

GEOL 4450 GEOHYDROLOGY (3 credits)

A course dealing with geology, chemistry and hydraulics of groundwater. Designed mainly for Geology majors but can be helpful to other disciplines where ground water is involved.

Prerequisite(s): GEOL 1170, MATH 1320 or higher, or permission of instructor

GEOL 4500 PALEOCLIMATOLOGY (3 credits)

Paleoclimatology involves the study of Earth's past climate history to better understand modern climate change. The course explores how we know climate changed in the past using geologic and geochemical proxies and then investigates the Earth's past climates from its birth to modern anthropogenic climate change. The course involves lecture, activities, and critical assessment of scientific literature to better understand Earth's dynamic past.

Prerequisite(s): GEOL 1170 or GEOL 1180

GEOL 4540 GEOCHEMISTRY (3 credits)

This course will cover the application of chemical principles to geologic systems. Specific topics covered will include the origin of elements and their distribution in the earth, geochronology, stable isotope systems, aqueous geochemistry and crystal chemistry. These topics will be integrated to the study of soils, igneous, metamorphic and sedimentary rocks and ore deposits. (Every third semester). (Cross-listed with CHEM 4540).

Prerequisite(s): GEOL 1170, CHEM 1140 or CHEM 1180, and either GEOL 2750 or CHEM 2500, or permission of Instructor

GEOL 4600 INDEPENDENT RESEARCH (1-3 credits)

Advanced study in the form of a major paper to give the senior student knowledge of and experience in using government documents, professional, and/or primary materials on a topic. Must be under the supervision of the instructor who is particularly qualified for the topic chosen. (Cross-listed with GEOG 4600).

Prerequisite(s): Permission of department chair.

GEOL 4610 ENVIRONMENTAL MONITORING AND ASSESSMENT (3 credits)

An interdisciplinary approach to techniques for the design and implementation of environmental inventory and monitoring schemes used to evaluate natural resources. Students work as teams to synthesize information from their backgrounds in geography, geology and ecology to evaluate the impacts of human actions on environmental quality following the framework for environmental assessments provided by the National Environmental Policy Act. Course is organized to accommodate variable needs of students with different backgrounds and career choices. Usually offered every year. (Cross-listed with BIOL 4610, ENVN 4610, GEOG 4610, GEOG 8616, GEOL 8616).

Prerequisite(s): Permission of instructor.

GEOL 4620 ADVANCED FIELD COURSE (6 credits)

Six weeks of advanced study on selected field problems. Conducted in a geologically classic area where all the major rock types and structures may be studied in a variety of geological situations. Reports, which integrate the geology, surface processes and literature of the studied areas, is required. Recommended to follow the junior year.

Prerequisite(s): GEOL 1170, GEOL 1180, GEOL 2750, GEOL 2760, GEOL 3300; GEOL 3450 recommended.

GEOL 4640 CRITICAL ZONE SCIENCE (4 credits)

This course examines the Critical Zone (CZ), Earth's permeable layer that extends from the top of vegetation to the bottom of groundwater. The CZ is a constantly evolving layer where rock, soil, water, air, and living organisms interact to regulate the landscape and natural habitats; it also determines the availability of life-sustaining resources, including our food production and water quality. CZ science is an interdisciplinary and international endeavor focused on cross-disciplinary science. In this course, we will focus on using data available from the existing National Science Foundation (NSF)-funded CZ Observatories (CZOs) along with readings, discussions and activities to explore interactions within the CZ. (Cross-listed with GEOG 4640, GEOG 8646)

Prerequisite(s): One of the following: GEOL 1170, GEOL 1010, GEOG 1030 or GEOG 1050; one chemistry or physics course recommended; or instructor permission.

GEOL 4800 INTERNSHIP IN ENVIRONMENTAL/REGIONAL PLANNING/EARTH SCIENCE (3 credits)

Internship with local agencies or corporations enabling students to gain knowledge and experience in geology, comprehensive regional or environmental planning, or environmental science.

Prerequisite(s): Senior, major or area of concentration in Geology or Environmental Science and permission.

GEOL 4950 SENIOR THESIS (3 credits)

An independent research project undertaken by all geology majors during their final year. Topics will be selected in consultation with appropriate faculty and researched through field work, laboratory work and/or library sources.

Prerequisite(s): Senior, ENGL 1150/ENGL 1154 and ENGL 1160/ENGL 1164

Distribution: Writing in the Discipline Single Course

German (GERM)

German Undergraduate Courses

GERM 1010 WHY LANGUAGES MATTER: REPRESENTATIONS OF LINGUISTIC DIVERSITY IN THE US MEDIA (3 credits)

Delivered in English, this course introduces students to diversity in the US using language in context as points of departure. In this course, we analyze the intersection between language and ideological constructions (e.g., the objectification of Latino women, discrimination and stereotypes toward Asian peoples) and examine nodes of social meaning through visual and audio representations of language, as consumed in music, tv series, art (e.g., street art, installations) and social media. Departing from a US-centric and an assimilative approach, the course provides a historical and geographic lens through which these languages exist in the United States. (Cross-listed with WLL 1000, FREN 1010, JAPN 1020, SPAN 1010).

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

GERM 1110 ELEMENTARY GERMAN I (5 credits)

Elementary German I emphasizes the mastery of all four language skills (speaking, listening, reading, and writing) and introduces cultural issues from the German-speaking world.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

GERM 1120 ELEMENTARY GERMAN II (5 credits)

German 1120 is the second course in the 16-hour Arts and Sciences Foreign Language requirement. It is communicative in approach and emphasizes the mastery of all language skills including speaking, listening, reading, and writing. It also includes a cultural component.

Prerequisite(s): GERM 1110 with a grade of C- or better, or placement by department diagnostic exam. Department permission is needed for transfer credit.

GERM 2110 INTERMEDIATE GERMAN I (3 credits)

German 2110 is the third course in the 16-hour Arts and Sciences Foreign Language requirement. It is communicative in approach and emphasizes the mastery of all language skills including speaking, listening, reading, and writing. It also includes a cultural component.

Prerequisite(s): GERM 1120 with a grade of C- or better, or placement by department diagnostic exam. Department permission is needed for transfer credit.

GERM 2120 INTERMEDIATE GERMAN II (3 credits)

German 2120 is the fourth course in the 16-hour Arts and Sciences Foreign Language requirement. It is communicative in approach and emphasizes the mastery of all language skills including speaking, listening, reading, and writing. It includes a culture component.

Prerequisite(s): GERM 2110 with a grade of C- or better, or placement by department diagnostic exam. Department permission is needed for transfer credit.

GERM 3030 GERMAN CONVERSATION (3 credits)

This course focuses on improving students' oral production of German including improvements to pronunciation, fluidity, and vocabulary.

Prerequisite(s): GERM 2120 or placement by Department of Foreign Languages diagnostic examination, or permission from instructor.

GERM 3040 GERMAN GRAMMAR & COMPOSITION (3 credits)

The course will review previously studied grammar topics in the German language, as well as cover more advanced grammar points that are essential for expressing complex ideas. It will focus on writing strategies for writing in a foreign language, for developing a descriptive essay and a narrative.

Prerequisite(s): GERM 2120, placement by Department of Foreign Languages diagnostic examination, or departmental permission.

GERM 3060 READINGS IN GERMAN (3 credits)

This course aims to increase students' fluency in reading and to develop comprehension skills that will help them in advanced language studies. The course will also enrich students' vocabulary through the use of a variety of primary sources; many genres will be sampled.

Prerequisite(s): GERM 2120; Not open to non-degree graduate students

GERM 3190 LISTENING COMPREHENSION (3 credits)

Students will strengthen their listening comprehension skills in a wide variety of genres.

Prerequisite(s): GERM 2120 or placement into the 3000-level in German or permission from the instructor

GERM 3250 CONTEMPORARY CULTURE IN GERMAN SPEAKING COUNTRIES (3 credits)

In this course students will learn about the political, social, economic, and aesthetic life in German-speaking countries.

Prerequisite(s): GERM 2120 with a grade of C- or better, placement by department diagnostic exam, or instructor permission. Department permission is needed for transfer credit.

GERM 3370 GERMAN HISTORY FROM THE BEGINNINGS UNTIL THE EARLY MODERN PERIOD (3 credits)

This course covers history, art, architecture, customs, and philosophy of central Europe and the German-speaking world from prehistory until the early 18th century.

Prerequisite(s): GERM 2120 or permission.

GERM 3380 GERMAN HISTORY FROM THE ENLIGHTENMENT TO THE PRESENT (3 credits)

This course will cover the history, art, architecture, customs, and philosophy of central Europe and the German-speaking world from the Enlightenment until the present.

Prerequisite(s): GERM 2120 or permission.

GERM 3580 GERMAN FOR PROFESSIONAL LIFE (3 credits)

This course focuses upon the development of German language skills and concomitant cultural awareness that can be utilized to conduct oneself appropriately in professional situations in German-speaking countries.

Prerequisite(s): GERM 2120 or the equivalent.

GERM 3650 INTRODUCTION TO GERMAN FILM (3 credits)

This course introduces students to seminal works in the history of German film.

Prerequisite(s): GERM 2120 or by permission.

GERM 4040 ADVANCED COMPOSITION AND STYLISTICS (3 credits)

In this capstone course, required for the completion of the major, learners will explore and practice advanced grammatical structures, write compositions in a variety of genres, and familiarize themselves with advanced stylistics.

Prerequisite(s): Last two semesters of the major or permission of the department. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

GERM 4150 INTRODUCTION TO GERMAN LITERATURE (3 credits)

Introduction to the history of literature of Germany, Austria, and German-speaking Switzerland. Students will read selections from the 18th, 19th and 20th centuries.

Prerequisite(s): GERM 3060 or instructor permission.

GERM 4160 BLACK GERMANY: PEOPLE AND CULTURE (3 credits)

The course addresses fiction, film, photography, music and journalism to dive into Black people's contribution to German culture. From the formation of a Black community in imperial Germany, to the African American GI's role in postwar democratization process, the artistic output of so-called "occupation babies" born in the wake of WWII, to contemporary artists who continue to expand and refine German culture. The African Diaspora in Germany is a rich field to expand our notion of global connectedness and cultural identity, while taking a deep dive into contemporary German culture and social developments. (Cross-listed with GERM 8166).

GERM 4210 TRANSLATING GERMAN (3 credits)

Students learn basic translation theory and techniques from the German to the English language.

Prerequisite(s): GERM 3030 and GERM 3040 or by permission

GERM 4220 THE STRUCTURE OF GERMAN (3 credits)

A survey of the linguistic structure of modern German, including phonology, morphology, and syntax. (Cross-listed with GERM 8226).

Prerequisite(s): GERM 3040 and GERM 4610, or permission of instructor.

GERM 4900 INDEPENDENT STUDY (1-3 credits)

This is a course in which an individual student or a small group of students complete specially planned readings in a well-defined field of study, carried out under the supervision of a member of the foreign language faculty. Designed primarily for the student who has need of work not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated for credit once.

Prerequisite(s): GERM 2120 or placement by Department of Foreign Languages diagnostic examination, or permission from instructor.

GERM 4950 PRO-SEMINAR: LITERATURE AND/OR FILM (3 credits)

This course is dedicated to the study of a narrow field of the literature and/or cinema of the German-speaking world. (Cross-listed with GERM 8956).

Prerequisite(s): GERM 3030, GERM 3040, and GERM 3060

GERM 4960 PRO-SEMINAR: SOCIETY AND CULTURE (3 credits)

This course will address a narrow field of study of the civilization, history, film, contemporary culture, art, politics, and/or cultural studies of the German-speaking world. (Cross-listed with GERM 8966).

Prerequisite(s): GERM 3030, GERM 3040, and GERM 3060

GERM 4970 PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS (3 credits)

This course will address a narrow field of study of linguistics, translation/interpretation or the professional language of the German-speaking world. (Cross-listed with GERM 8976).

Prerequisite(s): GERM 3030, GERM 3040, and GERM 3060.

Gerontology (GERO)

Gerontology Undergraduate Courses

GERO 2000 INTRODUCTION TO GERONTOLOGY (3 credits)

An introduction to social gerontology and human development in later life; emphasis is on important elements of aging, such as socialization, family interaction, retirement, physical and psychological aging, and perceptions of older persons in contemporary society.

Distribution: Social Science General Education course and U.S. Diversity General Education course

GERO 3000 COMMUNITY RESOURCES FOR OLDER ADULTS (3 credits)

This course is designed to introduce the student to community resources for older adults, to identify the organizations and individuals in the public and private sectors that help support aging in place, and to examine the impact of the efforts on older adults at the national, state and local levels.

Prerequisite(s): Completion of GERO 2000. Not open to non-degree graduate students.

GERO 3070 DEATH AND DYING (3 credits)

An interdisciplinary survey of literature in the field of thanatology, with an emphasis on working with the older patient and his or her family. (Cross-listed with PHHB 3070).

GERO 3250 RESEARCH METHODS IN GERONTOLOGY (3 credits)

This course will introduce undergraduate students to basic methodologies used in social and gerontological research. Students will explore the fundamentals of research methods, including learning how to formulate a research question, discuss and distinguish between multiple methods of data collection, perform various techniques used in quantitative and qualitative data analysis, and identify the ethics involved in social research. This course is intended for students in gerontology and in other fields who are interested in a humanistic approach to understanding significant issues which affect the lives of older people.

GERO 3500 BIOLOGICAL PRINCIPLES OF AGING (3 credits)

The Biological Bases of Aging Course provides a survey of the primary topics in the biology of aging field for undergraduate students. This a required course for the Gerontology major. By the end of the course, students will understand major theories, biological methods, and seminal research studies in the biology of aging field. Furthermore, students will learn how to critically analyze and interpret primary research about biological aging. This course provides preparation for students considering graduate school in gerontology or biology, geriatric nursing and social work, geriatric medicine, neuroscience, psychology, and exercise science. (Cross-listed with BIOL 3500, NEUR 3500)

Prerequisite(s): Sophomore/Junior/Senior Standing. Not open to non-degree graduate students.

GERO 4050 ADVANCED BIOLOGY OF AGING (3 credits)

This course covers biological aging topics at an advanced level, and is designed for undergraduate and graduate students who have some prior knowledge about biology or aging. The course will be interdisciplinary in nature and focus on topics relevant to gerontology, biology, psychology, and exercise science. Students will learn how to think critically about primary research in the biology of aging. Furthermore, they will apply their knowledge of the biology of aging field by creating a handbook of healthy aging for older adults. (Cross-listed with GERO 8056, NEUR 4050).

GERO 4100 EDUCATIONAL GERONTOLOGY (3 credits)

An introduction to the field of education for and about the aging. The institutions and processes of education will be analyzed to determine their relationships and value to persons who are now old and those who are aging. (Cross-listed with GERO 8106).

Prerequisite(s): Students must have a junior, senior or graduate student status.

GERO 4200 VOLUNTEER MANAGEMENT (3 credits)

The purpose of this course is to equip managers of volunteers in aging services to develop, maintain, assess impact and evaluate a sustainable volunteer program that will provide reliable and necessary services to older adults and further to be embraced as a valuable asset by professionals working in the field of aging. (Cross-listed with GERO 8206).

Prerequisite(s): Junior or Senior Standing

GERO 4350 ISSUES IN AGING (3 credits)

This course is intended for students in gerontology and in other fields who are interested in a humanistic approach to understanding significant issues which affect the lives of older people. (Cross-listed with GERO 8356).

GERO 4420 RECREATION FOR THE AGING (3 credits)

Role of leisure services as related to understanding and working with elders. Emphasis on recreation programming as a mode of intervention. Analysis and study of the phases of aging, with reference to psychomotor, affective, and cognitive changes; introduction to the theories of aging and how they relate to the lifestyle of this population; recreational therapy intervention, activity adaptation and program design; leisure education and issues and trends. (Cross-listed with GERO 8426, RLS 4420, RLS 8426).

GERO 4440 SOCIOLOGY OF AGING (3 credits)

This course will introduce students to important theories and concepts in the sociological study of aging and give deeper understanding of the experiences that people encounter as they grow older, including retirement, disease and disability, and long-term care. In addition to exploring the challenges faced by older adults, this course will focus on factors that contribute to successful aging. (Cross-listed with GERO 8446).

GERO 4460 PSYCHOLOGY OF ADULT DEVELOPMENT AND AGING (3 credits)

The focus of this course is on the major social and psychological changes that occur as a function of aging. Both normal and abnormal patterns of developmental change are examined, along with their implications for behavior. (Cross-listed with PSYC 4460, GERO 8466).

Prerequisite(s): Junior or senior.

GERO 4470 MENTAL HEALTH AND AGING (3 credits)

The goal of this courses is to survey the mental health needs of older adults. Consideration is given to identifying both positive mental health and pathological conditions. Treatment interventions effective with older adults and their families are also discussed. (Cross-listed with GERO 8476, PSYC 4470, PSYC 8476).

Prerequisite(s): Junior or Senior

GERO 4480 GLOBAL AGEING (3 credits)

The study of ageing around the world by a comparative method in a cross-cultural and cross-national framework. An explanation of some practical experiences and developments in Europe, Asia and Africa will be examined. (Cross-listed with GERO 8486).

GERO 4500 LEGAL ASPECTS OF AGING (3 credits)

This course centers on the legal concerns likely to arise as people age. We will discuss the American legal system with an emphasis on underlying legal concepts and issues of special importance to older persons. Some of the topics include guardianship, finances in retirement, abuse and neglect, Social Security, and Medicare and Medicaid. Consideration of the legal concerns which are likely to arise as people age. Includes introduction to American legal system, and emphasis on underlying legal concepts and issues of special importance to older persons. (Cross-listed with GERO 8506).

GERO 4510 LONG-TERM CARE ADMINISTRATION (3 credits)

An investigation of the broad range of policy issues, theoretical concerns and practical management strategies influencing the design, organization and delivery of long-term care services. (Cross-listed with GERO 8516, PA 4510, PA 8516).

GERO 4520 SENIOR HOUSING (3 credits)

The senior housing course is designed to provide students with an in-depth understanding of the various housing options available to older adults including aging in place to hospice. At the end of the course students will have a working knowledge of the needs of older adults and how this is used in making decisions about housing. (Cross-listed with GERO 8526).

Prerequisite(s): Junior/Senior Standing

GERO 4550 HEALTH ASPECTS OF AGING (3 credits)

This course emphasizes health promotion for older adults. Special health needs of older Americans are compared and contrasted with health needs for other age groups. Prevention or delaying of chronic diseases and disorders are emphasized. (Cross-listed with GERO 8556, PHHB 4550, PHHB 8556, WGST 4550).

GERO 4560 NUTRITION AND AGING (3 credits)

The goal of this course is to provide an understanding of the relationship between nutrition and successful or usual aging. This course will review the basics of good nutrition and relate them to the usual food intake of older adults. It will identify the impact of poor nutrition. This course will also look at the role nutrition plays in various disease processes that are associated with aging. It will provide information about support services that are available to assure good nutrition into old age for those living independently. (Cross-listed with GERO 8566).

Prerequisite(s): Junior Standing.

GERO 4570 REHABILITATIVE DESIGN (3 credits)

The purpose of this interdisciplinary course is to provide students with a greater appreciation and understanding of impairment as a platform for professional activities. This course will also provide an understanding of how Rehab Engineering, Universal and Inclusive Design and the implementation of Assistive Technology allow for greater levels of independence and quality of life for all members of our community, with an emphasis on the applications in the aging process. (Cross-listed with GERO 8576).

GERO 4600 MANAGEMENT AND ADMINISTRATION OF AGING PROGRAMS (3 credits)

This course is designed to give students a broad overview of theories, models, issues and approaches related to the administration of services and programs for older adults. (Cross-listed with GERO 8606).

Prerequisite(s): Junior/Senior Standing

GERO 4670 PROGRAMS AND SERVICES FOR OLDER ADULTS (3 credits)

This course is provided to give the student an historical overview of programs for older adults; examine the national policy process as it relates to the older American; and review the principles and practices relative to the existing national programs for the aged. (Cross-listed with GERO 8676, PA 8676).

Prerequisite(s): Junior or senior. Not open to non-degree graduate students.

GERO 4690 WORKING WITH MINORITY ELDERLY (3 credits)

This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 8696, SOWK 4040, SOWK 8046).

GERO 4720 BABY BOOMERS AND THE 21ST CENTURY (3 credits)

Marketing decisions and strategies apply to all businesses and are influenced by the target market. The economic realities and the character of America will change due to shifting demographics of baby boomers. Businesses that understand the power of the baby boomers will succeed; failure to understand that power may lead to economic consequences. Students from many disciplines will benefit from this cross-referenced course blending the realities of gerontology with the predictions of baby boomer behavior and the resulting impact to all businesses. (Cross-listed with GERO 8726).

Prerequisite(s): Junior, Senior or Graduate Level Standing.

GERO 4750 MID-LIFE, CAREER CHANGE, PRERETIREMENT PLANNING (3 credits)

This course is designed to involve candidates in the exploration of the developmental tasks of mid-life, myths and realities related to career change as well as the implication of preretirement planning. Factual information, as well as model examination and evaluation are presented to aid the candidate in becoming better equipped to understand some of the forces which affect the well-being of middle aged persons as they prepare for the later years. (Cross-listed with COUN 8756, GERO 8756).

Prerequisite(s): Not open to non-degree graduate students.

GERO 4850 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)

This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 8856, SOWK 4850, SOWK 8856.)

GERO 4920 SPECIAL STUDIES IN GERONTOLOGY (1 credit)

Special studies designed around the interests and needs of the individual student in such areas as the psychology, sociology, economics, biology, or politics of aging, as well as operation of various service systems. This independent study may include a literature review or a field project in which experience is gained in the community, identifying and analyzing needs and services related to older people.

Prerequisite(s): Instructor permission.

GERO 4940 PRACTICUM (3 credits)

This course provides the opportunity to students to share field experiences; to obtain guidance concerning various relationships with agency, staff and clients; and to develop a broadly based perspective of the field of aging.

Prerequisite(s): Nine hours in gerontology and permission. Students must be enrolled in the GERO program and have a minimum GPA of 2.5. Not open to non-degree graduate students.

GERO 4950 PALLIATIVE CARE: MENTORING A HEALTHCARE APPROACH OF PATIENT-CENTERED CARE WITH FOCUS ON WELL-BEING (3 credits)

This course provides a foundation for the recognition of the need to implement palliative medical care. Using current texts and literature, video and podcast lectures by colleagues, and review of cases and topics, a student will understand the definitions, purposes, and benefits of palliative medical care. The student will learn the avenues and ways to implement palliative care to provide care that promotes well-being. (Cross-listed with GERO 8956).

Prerequisite(s): Junior, senior, graduate standing

GERO 4970 SENIOR HONORS PROJECT/THESIS (3 credits)

An independent research project supervised by gerontology department/school faculty. The senior honors project must be approved by the University Honors Program.

Prerequisite(s): Senior in the University Honors Program.

GERO 4980 COUNSELING SKILLS IN GERONTOLOGY (3 credits)

This course is intended to help develop basic counseling skills for application in gerontology. (Cross-listed with COUN 8986, GERO 8986).

Prerequisite(s): Not open to non-degree graduate students.

Goodrich Program (GDRH)

Goodrich Program Undergraduate Courses

GDRH 2110 CORE TOPICS IN THE SOCIAL SCIENCES: LIFESPAN DEVELOPMENT (3 credits)

This course surveys the growth and development of humans from the prenatal stage through the end of life. Emphasis is on physical, cognitive, and socio-emotional processes with special attention given to the cultural contexts of development and the rich diversity that is produced. Key elements of the course include the importance of the scientific methods, socio-cultural comparisons, and critical thinking considerations.

Prerequisite(s): Acceptance into the Goodrich Scholarship Program and typically completion of the freshmen curriculum. Not open to non-degree graduate students.

Distribution: Social Science General Education course

GDRH 2120 CORE TOPICS IN SOCIAL SCIENCES: SOCIAL ISSUES (3 credits)

This course uses the methods of the social sciences to help students understand social issues facing our society such as health care, aging, poverty, crime, the environment, racial and ethnic diversity, the economy, and education. Students are challenged to think critically and imaginatively about social problems and how the issues affect local, national, and global communities.

Prerequisite(s): Students are expected to be accepted into the Goodrich Scholarship Program. Not open to non-degree graduate students.

Distribution: Social Science General Education course

GDRH 3010 SPECIAL TOPICS SEMINAR (1-3 credits)

The content of this topical seminar varies each semester. May be repeated as long as the topic is not the same.

Prerequisite(s): May vary with each offering.

Health & Kinesiology (HEKI)

Health & Kinesiology Undergraduate Courses

HEKI 2000 MEDICAL TERMINOLOGY (1 credit)

This course provides students the foundation for understanding medical language and terminology used in health-related careers. Students will gain an understanding of the basic elements used to build and analyze medical terms used to describe the human body. Utilizing the body systems approach, students will learn correct pronunciation, definitions, and spelling used to describe the human body, pathological processes, procedures, as well as conditions and diseases that affect it.

HEKI 2100 STATISTICS IN HEALTH AND KINESIOLOGY (3 credits)

This class is designed to present an introduction to statistical evaluation of testing and measurement techniques commonly used in health and kinesiology. Appropriate test selection, administration, and the interpretation of results with fundamental statistical methods will be emphasized.

Prerequisite(s): MATH 1220, or ACT Math sub score of at least 23, or Accuplacer score of at least 4, or Math SAT score of at least 540

HEKI 2400 HEALTH ED. & PHYSICAL ED. FOR THE ELEMENTARY SCHOOL TEACHER (3 credits)

This course is designed to aid the classroom teacher in developing and implementing health education and physical education programs in the elementary school curriculum.

Prerequisite(s): TED 2300

HEKI 3090 APPLIED NUTRITION (3 credits)

This foundational nutrition course uses nutritional concepts and scientific inquiry to explore the impact of nutrition on individuals and society as a whole. Students will explore the role of nutrients in food as they relate to human performance and disease. Additionally, they will gain knowledge and skills to evaluate food choices, dietary guidelines, and current diet trends and the implications for both long and short-term health.

Distribution: Natural/Physical Science General Education course

HEKI 4100 ADVANCED MUSCULOSKELETAL ANATOMY (3 credits)

This course is designed for students interested in healthcare careers, specifically in the rehabilitation sciences, wanting to improve their knowledge of the musculoskeletal system. Emphasis will be placed on palpations, range of motion assessment, and strength testing of various muscles and joints throughout the body. This course will consist of largely hands-on activities working in small groups. (Cross-listed with HEKI 8106).

Prerequisite(s): Prerequisites - BMCH 2400 or BIOL 2740, or instructor permission.

History (HIST)

History Undergraduate Courses

HIST 1000 WORLD HISTORY TO 1500 (3 credits)

An examination of selected traditional and pre-industrial civilizations in the context of their regional, cultural and historical roots.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

HIST 1010 WORLD HISTORY SINCE 1500 (3 credits)

An examination of selected societies since the beginning of the modern era.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

HIST 1050 CLASSICAL AFRICAN CIVILIZATIONS (3 credits)

Classical African Civilization is an introductory survey of the civilizations of Africa and African people prior to 1500 C.E., with emphasis on the evolution of the peoples and nations, their civilizations, and the rise and fall of indigenous states. In particular, this course will cover the classical civilizations of Kemet (Ancient Egypt), Nubia, Axum, Carthage, Ghana, Mali, and Songhay. (Cross-listed with BLST 1050).

Distribution: Global Diversity General Education course

HIST 1110 AMERICAN HISTORY TO 1865 (3 credits)

A survey of North American history from the Indigenous and pre-contact era to the end of the Civil War.

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

HIST 1120 AMERICAN HISTORY SINCE 1865 (3 credits)

A general survey of American history since the Civil War, emphasizing social and political change and the emergence of the United States as a global power.

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

HIST 2030 HISTORY OF MEDICINE: FROM ANTIQUITY TO THE PRESENT (3 credits)

This course will cover the history of medicine and medical practices from the earliest civilizations to the present. In addition to this chronological scope, the course will also examine medical practices in cultures from across the world. (Cross-listed with MEDH 2030).

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

HIST 2040 AFRICAN AMERICAN HISTORY I: 1619-1865 (3 credits)

The course examines the history of the earliest Africans in the Americas and briefly examines traditional African societies. It covers the transatlantic slave trade and its effects on Europe, Africa and the Americas, and analyzes the development of Afro-American culture and the struggle for freedom. (Cross-listed with BLST 2410)

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

HIST 2050 AFRICAN-AMERICAN HISTORY II: 1865-1954 (3 credits)

A survey of Afro-American history from the Civil War to the present. Covers Reconstruction and its overthrow, including the new methods of control which replaced slavery. Discusses the development of black ideologies and institutions. Traces urban migration and its impact on black society and culture. Follows black progress through World War II, the 1954 Supreme Court Decision, and rising militancy. (Cross-listed with BLST 2420)

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

HIST 2060 AFRICAN AMERICAN HISTORY III: 1954-PRESENT DAY (3 credits)

This course is divided into three main parts: the Civil Rights Phase (1954-1963), during which the dominant mood was optimism over the possibilities of integration; the Black Power Phase (1963-1974), and the Pragmatist Phase (1972-present), characterized by attempts to preserve and maintain gains already won. (Cross-listed with BLST 2430)

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

HIST 2190 THE MODERN MIDDLE EAST (3 credits)

An interdisciplinary study of the social, religious, and historical dimensions of contemporary issues and events which make the Middle East cultural and geographic region a center of global tensions. After providing a background of how Islam spread in and unified the region, students will study factors which have shaped the Middle East from the late Ottoman period to the present, analyzing the principal sociocultural and political economic developments in the Middle East from the early 19th century to the early 21st century. (Cross-listed with RELI 2190, SOC 2190).

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

HIST 2480 HISTORY OF LATIN AMERICA: PRECONQUEST TO THE PRESENT (3 credits)

A history of the nations of Latin America from the pre-Columbian indigenous cultures to the present time. Among the topics included will be the nature of indigenous cultures, the various European incursions, regional revolutions against European empires, nation-building, and the place of Latin America in global history. (Cross-listed with LLS 2480).

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

HIST 2510 ANCIENT GREECE: BRONZE AGE TO CLASSICAL ERAS (3 credits)

A study of cultures in the Aegean/Eastern Mediterranean, from the Bronze Age through Classical-era Greece, to better appreciate their influence on later cultures, especially those of Rome, Europe, and North America.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

HIST 2520 ANCIENT HISTORY - ROME (3 credits)

A survey of Roman history including Rome's wars of expansion, the rise and fall of the Republican government, the reorganization of the state under the emperors, and the nature of Rome's Empire and its peoples. The course will also examine aspects of Roman society, including living conditions, family organization, religion, and the diversity of Roman culture, including in the visual arts.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Global Diversity General Education course

HIST 2540 INTRODUCTION TO EGYPTIAN HIEROGLYPHS (3 credits)

Introduction to Egyptian Hieroglyphics will provide students with fundamental elements of Kemetic (ancient Egyptian) grammar, vocabulary, transliteration, and translation. Egyptian hieroglyphs, classically referred to as the "medu netcher," is the oldest written language on the African continent. Students will embark on an examination of primary texts which reveal important features of classical Egyptian culture and civilization. By studying this ancient African language, students will gain historical knowledge of the ancient cultures of Kemet and other classical Nile Valley civilizations. (Cross-listed with BLST 2540).

HIST 2620 MODERN BRITAIN (3 credits)

This course will provide an overview of some of the major events in modern British history, considering both national and global perspectives. Topics covered will include empire, war, industrialization, technology, welfare, decolonization, gender, and pop culture along with a myriad of other subjects.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Global Diversity General Education course

HIST 2710 A HISTORY OF RUSSIA FROM KIEVAN RUS' TO THE CRIMEAN WAR (3 credits)

This course will examine Russian history beginning with the medieval Kievan state. The course will examine the consolidation of the Russian state under Ivan IV, the geographical expansion of Russia, the great reforms under Peter the Great, and conclude with the crisis of the Russian state following the Crimean War.

HIST 2720 RUSSIA: FROM THE CRIMEAN WAR TO THE PRESENT (3 credits)

This course examines Russian history from the great reforms ushered in under Alexandr II to the present day. Among the topics covered are the crisis of Imperial Russia, the Bolshevik Revolution, life in the USSR, the USSR in the Second World War, the USSR in the Cold War, the collapse of communism, and the changes in Russian society since 1991.

Distribution: Global Diversity General Education course

HIST 2810 HISTORY OF CHINA: FROM THE MANCHU CONQUEST TO THE PRESENT (3 credits)

This course examines Chinese history from the seventeenth-century Manchu conquests to the present. Topics covered will include the nature of the Manchu-Qing Dynasty, the destabilization which began in the nineteenth century, growing pressure exerted by other powers, and the rise and rule of the Chinese Communist Party.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Global Diversity General Education course

HIST 2820 JAPAN: FROM WARRING STATES TO THE MODERN DAY (3 credits)

This course will examine the course of Japanese history beginning with the Warring States (Sengoku) era of fifteenth and sixteenth centuries. It will then continue by assessing unified Japan under the Tokugawa bakufu, the initial stability of this period, then the growing tensions which led to the collapse of the bakufu state in the 1860s. From there, the course will analyze the emergence of modern Japan during the Meiji Restoration, its evolution to a military state, and then conclude with an assessment of Japan's transformation in the post-World War II era.

Distribution: Global Diversity General Education course

HIST 2920 HISTORY OF MODERN AFRICA (3 credits)

This course covers the era of the beginning, development and decline of European colonialism in Africa. The movement for decolonization, the emergence of independent sovereign nations and the strategic role that Africa plays in the forum of industrialized and developed nations is investigated. It examines the impact of European cultures and forced labor on traditional Africa, and the struggle for a resolution of the conflict between the three major traditions on the continent - Western and Indigenous. Religious indigenous practices are also considered, along with Christian and Islamic cultures. (Cross-listed with BLST 2120).

HIST 2980 HISTORICAL METHODOLOGY (3 credits)

The critical method in collecting, organizing, and presenting historical material. Required for history majors. Students are encouraged to enroll in this course as soon as possible after declaring their major.

Prerequisite(s): ENGL 1160 and permission of department chair or chair's designee. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

HIST 2990 PEOPLE AND ISSUES IN HISTORY (3 credits)

An in-depth investigation of a topic as announced in the course subtitle. Students may enroll for different sections as long as no specific subject is duplicated.

Prerequisite(s): Not open to non-degree graduate students.

HIST 3520 HISTORY OF ROMAN EMPIRE (3 credits)

This course examines the Roman Empire (30 BC to AD 476), also known as the Principate, with the class's main focus on its first three centuries. The course covers the rise of the Imperial government, its development, and the challenges it faced in the reigns of different emperors. Included will be discussion of Rome's relationship with neighboring kingdoms, with the peoples in its own provinces, and with religious minority groups such as the Jews and Christians.

Prerequisite(s): Junior status or permission of instructor. Students must have written permission from the course instructor to apply the course to the requirements of the Ancient Mediterranean Studies Minor.

HIST 4010 RELIGION IN EARLY AMERICA (3 credits)

This course examines the history and nature of religion in North America to c. 1770 with an emphasis on the British colonies. (Cross-listed with HIST 8016, RELI 4050).

Prerequisite(s): Junior or senior standing. Not open to non-degree graduate students.

HIST 4040 HOMESCAPES: THE MATERIAL CULTURE OF EVERYDAY LIFE IN AMERICA, 1600-1860 (3 credits)

This course examines the culture and technologies of house forms and work landscapes in North America, 1600-1860. (Cross-listed with HIST 8046).

Prerequisite(s): 60 hours. Not open to non-degree graduate students.

HIST 4050 HISTORY OF WOMEN IN AMERICA TO 1875 (3 credits)

This course examines the history of women in what is now the United States from the seventeenth century to 1875. Topics include law, work, sexuality and reproduction, slavery, cross-cultural encounters, religion, political activism, and the transformation of gender by the market and industrial revolutions. (Cross-listed with HIST 8056).

Prerequisite(s): Junior standing or permission of the instructor. Not open to non-degree graduate students.

HIST 4060 HISTORY OF WOMEN IN AMERICA FROM 1875 - 1992 (3 credits)

This course examines the history of women in the United States from 1875 to 1992. Topics include law, work, sexuality and reproduction, immigration, civil rights, political participation and party politics, and changes to the American gender system, including family structure and employment. (Cross-listed with WGST 4060, WGST 8066, and HIST 8066).

Prerequisite(s): Junior or permission of instructor; Not open to non-degree graduate students.

HIST 4070 SLAVERY AND RACE RELATIONS IN THE AMERICAS (3 credits)

Slavery and Race Relations in the Americas examines the historical relationship between the trans-Atlantic slave trade and American race relations, connecting the enslavement of Africans in the Americas to race relations in the Caribbean, Latin America, and the United States. (Cross-listed with BLST 4650, BLST 8656, HIST 8076, LLS 4650, LLS 8656).

Prerequisite(s): Junior or senior standing

Distribution: U.S. Diversity General Education course

HIST 4080 THE BLACK ATLANTIC (3 credits)

This course examines the cultural and ethnic history of Black people who comprised "The Black Atlantic." The course is organized historically and begins with a brief overview of the European slave trade on the West African Coast in the 15th century. From there, we look critically at the arrival of Africans to the New World, examine varieties of slavery and freedom in the Americas, and conclude with slave revolts and emancipation activism in the 18th and 19th century. We will use the Haitian Revolution (in which Haiti became the first country to be founded by formerly enslaved people) as a special case study, a conduit for our exploration of this socio-cultural, economic, and Diasporic space. (Cross-listed with BLST 8356, BLST 4350, HIST 8086).

Prerequisite(s): Junior standing or permission of instructor

HIST 4140 COLONIAL AMERICAN HISTORY (3 credits)

This course provides a study of the settlement and development of North America to c. 1763 with an emphasis on the British colonies. (Cross-listed with HIST 8146).

Prerequisite(s): Junior standing or permission of instructor

HIST 4150 THE AMERICAN REVOLUTIONARY ERA, 1763-89 (3 credits)

This course examines the period of the American Revolution beginning with the changed circumstances in the British North American colonies following the end of the French and Indian War and concluding with the ratification of the United States Constitution. The course analyses social, political, and military themes from this period. (Cross-listed with HIST 8156).

Prerequisite(s): junior standing or permission of instructor.

HIST 4160 THE EARLY AMERICAN REPUBLIC: FROM THE CONSTITUTION TO THE SECOND PARTY SYSTEM (3 credits)

This course covers an important period of American history beginning with the first federal government and ending with an analysis of the consolidation of the Second American Party system. Topics to be covered include the earliest debates over the nature of the federal government, foreign relations, the emergence of political parties, and the rise of the Jacksonian democracy. (Cross-listed with HIST 8166).

Prerequisite(s): Junior or permission of instructor.

HIST 4170 HISTORY OF THE AMERICAN WEST (3 credits)

An examination of the unique aspects of the region of the United States known as "the west." Students will learn about the multiple peoples, cultures, and environments which combined to form this region. Content will also include an examination of how the myths of the west were created. (Cross-listed with HIST 8176).

Prerequisite(s): Junior or permission of instructor.

HIST 4180 THE AMERICAN CIVIL WAR PERIOD: FROM THE TEXAS REVOLUTION THROUGH RECONSTRUCTION (3 credits)

This course focuses on the period of the American Civil War. It will begin with the background to, and events of the Texas Revolution. It will then consider the growing national tensions over slavery, particularly as a consequence of the Mexican-American War before examining the immediate causes of the civil war. The course will then examine the war itself before concluding with analysis of Reconstruction. (Cross-listed with HIST 8186).

Prerequisite(s): Junior or permission of instructor.

HIST 4240 EMERGENCE OF MODERN AMERICA (3 credits)

This course examines American history from the end of Reconstruction to the end of World War II. Among the topics covered are western expansion, industrialization, immigration, and the expanding international footprint of the United States. (Cross-listed with HIST 8246).

Prerequisite(s): Junior or permission of instructor.

HIST 4330 U.S. CONSTITUTIONAL HISTORY TO 1860 (3 credits)

This course will examine the history of the United States constitution from its promulgation in 1787 through the end of the Civil War. This will include consideration of both English and colonial precedents. The course will analyze the process of writing and ratifying the document in the late 1780s and will then look at some of the key legal decisions between 1790 and 1860. (Cross-listed with HIST 8336).

Prerequisite(s): Junior or permission of instructor.

HIST 4340 U.S. CONSTITUTIONAL HISTORY SINCE 1860 (3 credits)

This course examine the increasingly important role played by competing interpretations of the United States constitution since the outbreak of the Civil War. This will include the emergence of the idea of a "living constitution," the extension of constitutional guarantees to the states, and examination of critical Supreme Court cases. (Cross-listed with HIST 8346).

Prerequisite(s): Junior or permission of instructor.

HIST 4360 THE U.S. IN THE COLD WAR (3 credits)

This course will examine the impact of the Cold War in modern American history on two levels. First it will seek to understand how the Cold War influenced American foreign policy decisions since the end of World War II and examine the long term consequences of those policies for both the U.S. and the world. Secondly, this course will examine how the Cold War impacted or shaped American culture, domestic politics, and social movements in the postwar period. (Cross-listed with HIST 8366).

Prerequisite(s): Junior standing or permission of the instructor

HIST 4390 THE NATURE OF THE PAST: AMERICAN ENVIRONMENTAL HISTORY, PRE-HISTORY TO THE PRESENT (3 credits)

This course will introduce students to the field of American Environmental History. Students will engage with literature produced by scholars who, broadly speaking, research and write about the many ways in which humans have shaped nature and, conversely, how nature has shaped humans over time. We will focus on the myriad peoples and cultures that have thrived in what is presently the United States and how these peoples have interacted with their physical environments in a multitude of contexts, from the transformation of ecosystems for economic purposes, to the cultural and scientific ideas that have shaped human notions of the natural world, to the ways in which people have mobilized governments to transform the environment. (Cross-listed with ENVN 4390, HIST 8196, SUST 4390).

Prerequisite(s): Undergraduate students must be at least juniors in standing.

HIST 4400 HISTORY OF NATIVE AMERICAN INDIGENOUS PEOPLES (3 credits)

This survey of North American Indigenous peoples provides a historical overview of the peoples and their interactions with settlers, wars, policies, and other events that have shaped modern Tribal and U.S. relations. (Cross-listed with HIST 8406, NAMS 4400).

Prerequisite(s): Junior or permission of instructor.

HIST 4410 HISTORY OF NEBRASKA (3 credits)

An examination of the history of Nebraska from Native American occupation to the present, with emphasis on environmental factors that have shaped the region and its people. (Cross-listed with HIST 8416).

Prerequisite(s): Junior or permission of instructor.

HIST 4420 THE SIOUX TRIBE (3 credits)

A cultural and historical study of the Sioux tribes emphasizing the earliest historic period to the present. (Cross-listed with HIST 8426).

Prerequisite(s): Junior standing or permission of instructor.

HIST 4450 NATIVE AMERICAN ENVIRONMENTALISM (3 credits)

This course studies North American tribal subsistence and natural resource use practices from the early historic period to the present, Native Americans as environmentalists, and modern tribal environmentalism. (Cross-listed with HIST 8456).

Prerequisite(s): Junior standing or permission of instructor.

HIST 4460 AMERICAN IMMIGRATION HISTORY (3 credits)

A study of American immigration from the colonial era to the present. Topics covered include Old World origins of migration, the old immigrants from western Europe, the new immigrants from southern and eastern Europe, non-European immigrants, native-born American responses to immigrants, the periods of immigrant adjustment in the new physical environment, and the contemporary revival of ethnicity. (Cross-listed with HIST 8466).

Prerequisite(s): Junior or permission of instructor.

HIST 4480 THE UNITED STATES IN THE 1960S (3 credits)

This course is a review of the economic, social, cultural, and political changes that marked the United States in the 1960s. (Cross-listed with HIST 8486).

Prerequisite(s): Junior standing or permission of the instructor.

HIST 4530 EUROPE: RENAISSANCE & REFORMATION (3 credits)

This course will examine European history from the fifteenth through the seventeenth centuries. Among the topics which will be covered are the Renaissance, the Protestant Reformation, the Catholic Reformation, Wars of Religion, the beginning of European overseas expansion, and the Scientific Revolution. In addition to examining the religious ideas and revolutions of the period, there will also be analysis of economic, social, and political change. (Cross-listed with HIST 8536).

Prerequisite(s): Junior or permission of instructor.

HIST 4540 MEDIEVAL EUROPE (3 credits)

A dive into the history of medieval Europe through the stories of men and women, their beliefs, struggles, contradictions and achievements. (Cross-listed with HIST 8546).

Prerequisite(s): Junior or permission of instructor.

HIST 4610 TUDOR AND STUART ENGLAND (3 credits)

English history from the end of the Wars of the Roses in 1485 to the death of Queen Anne in 1714. The course will examine the efforts of the Tudors and Stuarts to establish dynasties, the religious upheavals in the sixteenth and seventeenth centuries, changes in the role of Parliament, the Civil Wars, and the beginning of English overseas expansion. (Cross-listed with HIST 8616).

Prerequisite(s): Junior or permission of instructor.

HIST 4720 THE HOLOCAUST (3 credits)

An interdisciplinary approach in a seminar oriented format discussing various aspects of the most notorious genocide in modern times. The course will explore the history of anti-Semitism, the rise of Nazi Germany and the road to the 'final solution.' It will further explore psychological, sociological and intellectual aspects of the dark side of humanity. (Cross-listed with RELI 4160, RELI 8166, HIST 8726).

Prerequisite(s): Junior or instructor permission.

HIST 4730 ISRAEL AND PALESTINE (3 credits)

This course will outline the history of the conflict over Palestine/Israel, examine its present status, and explore its likely unfolding in the future. It seeks to provide a broad and concise understanding of the historical events which have shaped the relations between Israelis and Palestinians, as well as a keen awareness of the challenges and prospects related to their future. (Cross-listed with HIST 8736).

Prerequisite(s): Junior standing or permission of the instructor.

HIST 4740 COMPARATIVE GENOCIDE (3 credits)

This course explores genocide and its many forms throughout history. It begins by considering the varied elements and definitions of the term. Next it looks at what makes people kill before going on to examine many different genocides throughout history. Finally, the course addresses the prosecution and prevention of genocide. (Cross-listed with HIST 8746).

Prerequisite(s): Junior. Not open to non-degree graduate students.

HIST 4800 U.S. AND THE MIDDLE EAST (3 credits)

This course focuses on the evolution of US relations with and Foreign Policy vis-a-vis the Middle East over the last six decades. It seeks to illuminate the constant features in contrast to the changes in direction, examining the agendas of varying administrations as well as the treatment by the media of this region. It follows a chronological framework with particular emphasis on key thematic topics. While emphasizing the political dimensions of international relations, the class will also explore cultural and social aspects of the ties between the US and the peoples of the Middle East. (Cross-listed with HIST 8806).

Prerequisite(s): Junior or permission of instructor.

HIST 4820 MESOPOTAMIA AND PRE-ISLAMIC PERSIA (3 credits)

Examination of the Ancient Near East from the emergence of its earliest civilizations—Sumer, Akkad and Babylonia—through the Bronze and Iron Ages, concluding with Persia in the Common Era (CE) just before the rise of Islam. (Cross-listed with HIST 8826).

Prerequisite(s): Junior standing.

HIST 4830 ANCIENT GREEK MYTH, RELIGION & MAGIC (3 credits)

Students will examine the impact of ancient Greek myth and belief on actual religious practice: e.g., "lived" religion. Areas covered include formal civic sacrifice, wartime religion, family and personal devotions, mystery cults, oracles and seers, plus the popular pursuit of magic. (Cross-listed with HIST 8836, RELI 4830, RELI 8836).

Prerequisite(s): Junior standing

HIST 4840 ALEXANDER THE GREAT AND THE MACEDONIAN ORIGIN (3 credits)

Examination of the conquests of Alexander the Great, as well as controversies in Alexander studies. Includes discussion of both the Macedonian culture that produced him and the career of his father, Philip II. (Cross-listed with HIST 8846).

Prerequisite(s): Junior standing

HIST 4850 ROME AND THE EARLY CHURCH (3 credits)

Students will cover Roman-Christian-Jewish interactions from just before the birth of Jesus of Nazareth to c. 450 CE, with an emphasis on social and political history. We catalogue Christianity's transformation from its origins as a Jewish movement and an illegal "superstition" to the dominant religion of the Roman empire. (Cross-listed with HIST 8856, RELI 4850, RELI 8856).

Prerequisite(s): Junior standing.

HIST 4900 INDEPENDENT STUDIES (1-3 credits)

Project arranged individually with undergraduate students. May be repeated as long as the subject differs, to a maximum of six hours.

Prerequisite(s): Written permission of instructor.

HIST 4910 TOPICS IN HISTORY (3 credits)

This course introduces students to specialized subject matter not available in existing History courses. Course may be repeated as long as the topic is substantially different each time. Course may be cross-listed with other programs e.g. Native American Studies (NAMS), Women's and Gender Studies (WGST) when topics are appropriate. (Cross-listed with HIST 8916).

Prerequisite(s): Junior standing

HIST 4920 INTERNSHIP IN HISTORICAL STUDIES (1-3 credits)

The undergraduate student is supervised by a member of the faculty in a project involving part-time employment or service with a museum, historic site, historical society or other institution. Work hours, activities, reporting requirements, and responsibilities must be specified in written agreement between employer, student, and/or History Intern Program Coordinator. This course is normally taken for 3 hours. If a hosting institution cannot commit to a supervised workload which the departmental advisor believes to be equivalent to 3 hours, course may be taken for fewer hours. In such circumstances, students may repeat the course up to a total of 3 hours.

Prerequisite(s): Student must have completed or enrolled in at least 6 hours of upper-division history courses (3000-4000). Student must have approval of History Intern Program Coordinator before enrolling. Not open to non-degree graduate students.

HIST 4990 SENIOR SEMINAR (3 credits)

Capstone research course for history majors. Students will be required to produce an original research paper. Each section of this course will be offered with a specific subject or theme.

Prerequisite(s): HIST 2980 and permission of department chair or chair's designee. Not open to non-degree graduate students.

Honors Program (HONR)

Honors Program Undergraduate Courses

HONR 1130 HONORS HUMANITIES (3 credits)

This entry level Honors course will provide students with opportunities to explore humanities ideas and possibilities; each iteration of the course will be anchored in humanities but vary by instructor.

Prerequisite(s): Must be a member of the Honors Program. Not open to non-degree graduate students.

Distribution: Humanities and Fine Arts General Education course

HONR 2120 HONORS IDENTITY (1 credit)

Course designed to heighten students' self awareness in University and global contexts.

Prerequisite(s): Must be a current Honors Program student. Not open to non-degree graduate students.

HONR 3000 HONORS COLLOQUIUM (3 credits)

The Honors Colloquium is an interdisciplinary seminar offered each semester under the auspices of one of the University's seven colleges. The content matter changes each semester and includes all disciplines from the fine arts through business.

Prerequisite(s): Member of the University Honors Program or permission of instructor. Not open to non-degree graduate students.

HONR 3010 HONORS TUTORING (0 credits)

Honors Tutoring is available to qualified Honors students in good standing in the program who wish to provide tutoring in a specific course or courses in order to serve the University community throughout the semester.

Prerequisite(s): Active status in the University Honors Program; A or better in and completion of the course for which tutoring will be provided; documentation from professor of student's ability to tutor in the nominated course. Not open to non-degree graduate students.

HONR 3020 HONORS COLLOQUIUM - HUMANITIES (3 credits)

Honors colloquium-Humanities is an interdisciplinary course for University Honors Program students. Drawing from multiple disciplines, it provides students insight into cross-disciplinary study of the humanities, centered around changing themes and/or concepts.

Prerequisite(s): University Honors Program Student status. Not open to non-degree graduate students.

Distribution: Humanities and Fine Arts General Education course

HONR 3030 HONORS COLLOQUIUM-SOCIAL SCIENCES (3 credits)

This course will focus on social science perspectives for the University Honors Program students drawing from multiple disciplines within the social sciences, it provides students with insight into cross-disciplinary study of the theories and methods of the social sciences organized around changing themes and/or concepts.

Prerequisite(s): University Honors Program Students only.

Distribution: Social Science General Education course

HONR 3040 HONORS COLLOQUIUM: NON-LAB SCIENCE (3 credits)

Honors colloquium-non-lab science is an interdisciplinary course for University Honors Program students. Drawing from multiple disciplines, it provides students insight into cross-disciplinary study of science, centered around changing themes and/or concepts.

Prerequisite(s): Students must be members of the University Honors Program to enroll. Not open to non-degree graduate students.

Distribution: Natural/Physical Sci General Education lecture and Natural/Physical Science General Education course

HONR 3970 HONORS INTERNSHIP (3 credits)

The Honors Internship is offered to juniors and seniors in the University Honors Program and combines theoretical knowledge with the practical through placement in community businesses and organizations.

Prerequisite(s): Junior or senior in the University Honors Program and permission of the University Honors Program.

HONR 4980 SENIOR HONORS PROJECT/THESIS (3 credits)

An independent research project supervised by University Faculty. The Senior Honors Project must be approved by the University Honors Program.

Prerequisite(s): Junior or senior in the University Honors Program. Permission number needed from Honors prior to enrollment.

Horticulture (HORT)

Horticulture Undergraduate Courses

HORT 1300 INTRODUCTION TO HORTICULTURAL SCIENCES (3 credits)

An introductory course in horticulture that offers a hands-on perspective to science. Students will discuss the scientific factors affecting the growth of vegetables, bedding plants, cut flowers, and woody plants in greenhouse, laboratory and landscape settings.

Distribution: Natural/Physical Sci General Education lecture

HORT 1310 INTRODUCTION TO HORTICULTURAL SCIENCES LABORATORY (1 credit)

A laboratory designed to enhance basic scientific method skills as applied to propagation of plants using a variety of techniques from seeding and grafting to cloning.

Prerequisite(s): HORT 1300, prior or concurrent. Lab fee \$25.

Distribution: Natural/Physical Sci General Education lab course

Humanities (HUMN)

Humanities Undergraduate Courses

HUMN 1010 INTRODUCTION TO THE HUMANITIES (5 credits)

An attempt to see how art, music, literature and the history of ideas in Western culture contribute to the understanding of human existence. The first semester explores classical Greek, medieval and Renaissance views of the meaning of life.

HUMN 1110 PERSPECTIVES ON USAMERICAN CULTURE (6 credits)

Perspectives on USAmerican Culture explores the the imaginative arts in modern, contemporary, and increasingly complex and diverse USA by focusing inter-culturally (in an inter-relational manner) on such phenomena as race, ethnicity, gender, sex, and socioeconomic class as reflected in certain cultural practices, beliefs and values of USA's citizens and residents of European descent, of African descent, of Asian descent, of Hispanic or Latin American descent, of Australasian descent, of Pacific Islands descent, and of Jewish descent. The course texts, contents, and pedagogic styles may vary from instructor to instructor but they shall not be inconsistent with the kind of (intellectual) rigor and other standards of excellence that Goodrich expects and demands.

Prerequisite(s): ENGL 1150 and HUMN 1200. Not open to non-degree graduate students.

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

HUMN 1200 AUTOBIOGRAPHICAL READING AND WRITING (3 credits)

This course helps students to write effectively by focusing on their own personal experience and by examining a variety of autobiographical writings. Students are exposed to multicultural perspectives throughout the course.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Humanities and Fine Arts General Education course

Information Systems & Quantitative Analysis (ISQA)

Information Systems & Quantitative Analysis Undergraduate Courses

ISQA 2010 SPECIAL TOPICS IN INFORMATION SYSTEMS AND QUANTITATIVE ANALYSIS (1 credit)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 2020 SPECIAL TOPICS IN INFORMATION SYSTEMS AND QUANTITATIVE ANALYSIS (2 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 2030 SPECIAL TOPICS IN INFORMATION SYSTEMS AND QUANTITATIVE ANALYSIS (3 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once.

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 2610 R FOR DATA ANALYTICS (1 credit)

R is a core language and toolkit in data science due to its vast capabilities to facilitate various stages of data analytics activities, from loading and transforming data to building and evaluating different analytics models. The course will enable students to use R to work with and manipulate data, build and evaluate data analytics models, and create visualizations.

ISQA 2620 EVALUATING AND CLEANING DATA (1 credit)

Evaluating and cleaning data sets for analysis is a core skill for professionals in data analytics and other technical fields. The course will enable students to assess the state of existing data sets, identify appropriate remediation strategies to prepare data for analysis, and perform common data cleaning procedures.

Prerequisite(s): ISQA 2610

ISQA 3150 PRINCIPLES OF QUANTITATIVE ANALYSIS (3 credits)

An introduction to structuring real-life situations into mathematical models. The class covers four groups of decision making models: decision trees, inventory, linear programming, network planning, and winning strategy. A number of the existing commercial computer software packages will be used in the course.

Prerequisite(s): CIST 2500

ISQA 3310 MANAGING THE DATABASE ENVIRONMENT (3 credits)

Introduction to business database design and management functions. The focus is on the use of current database management systems (DBMS) to support the data management function of an organization. Topics include data modeling, database design, SQL, data management and database administration. Hands-on experience in database design, creation, and use is provided.

Prerequisite(s): CIST 2100.

ISQA 3330 FUNDAMENTALS OF DATABASE MANAGEMENT (1 credit)

Databases are at the core of modern application development. Their use extends to many other environments including scholarly, scientific information systems. The overall goal of this course is to provide an introduction to the use of database management systems for efficient storing, updating, retrieval and analysis of data.

ISQA 3340 SQL FOR DATA ANALYTICS (1 credit)

Using the Structured Query Language (SQL) to access and manipulate data is a core competency in data management, data analytics, data science, and other data-intensive fields. Starting with an overview of the relational model of database systems, the course will enable students use SQL to create database tables, and store, retrieve, and manipulate data at both basic and advanced levels.

ISQA 3400 INFORMATION TECHNOLOGY INFRASTRUCTURE (3 credits)

This course provides an introduction to IT infrastructure issues. It covers topics related to both computer and systems architecture and communication networks, with an overall focus on the services and capabilities that IT infrastructure solutions enable in an organizational context.

Prerequisite(s): CIST 2100

ISQA 3420 MANAGING IN A DIGITAL WORLD (3 credits)

This course introduces the fundamentals of information systems/technology (IS/T) management. Students are introduced to the various roles, responsibilities, skills, and concepts essential to successful management of IS/T in the context of a dynamic environment of technology workforce diversity, a global economy, and concern for ethics and social responsibility in the development of systems.

Prerequisite(s): CIST 2100

Distribution: Global Diversity General Education course

ISQA 3520 GRAPHICAL USER INTERFACE DESIGN (3 credits)

This course is an introduction to interaction design with a primary emphasis on designing usable and useful computer interfaces. Students will learn the principles of interface design grounded in a fundamental understanding of human cognitive processes. They will learn how end-users develop and use mental models of interaction and will apply this knowledge to the design of interfaces for real-world applications. A design project will challenge students to plan their own designs, to develop interfaces and to integrate them into a working application prototype, to test their application with real users, and to effectively communicate the overall results. (Cross-listed with ISQA 8525)

Prerequisite(s): CIST 1300

ISQA 3900 WEB APPLICATION DEVELOPMENT (3 credits)

This course focuses on contemporary techniques and technologies in the design, development, and integration of web-enabled information systems. Topics include: Multi-tiered systems architecture; agile application development; object-oriented analysis and design; prototyping; testing, verification, and validation; lifecycle models; and component-based development. This is a rapidly moving, hands-on course that mirrors real-world development.

Prerequisite(s): CIST 1300 or CSCI 2850, CIST 1400, ISQA 3310 or CSCI 4850 (or concurrent enrollment)

ISQA 3910 INTRODUCTION TO PROJECT MANAGEMENT (3 credits)

This course will cover the basics of project planning, scheduling and control. Earned value management techniques and project quality will be covered. Risk management will also be covered. The student will be introduced to the IEEE Standards for Project Management. The purpose of the course is to provide students with an introduction to the tools and techniques used to manage projects to achieve successful completion. The project management methods taught are suitable for a wide variety of project types such as software development or engineering projects (e.g. construction).

Prerequisite(s): CIST 2100; or equivalent.

ISQA 4000 SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS (1-5 credits)

This course is designed to acquaint students with issues which are current to the field or harbingers or emerging trends in the information systems area. Topics will vary across terms. This course may be repeated, but no topic may be taken more than once. (Cross-listed with ISQA 8086)

Prerequisite(s): Permission of instructor. Additional prerequisites may be required for particular topic offerings.

ISQA 4010 BUSINESS INTELLIGENCE (3 credits)

The course focuses on the various topics on knowledge management by utilizing both behavioral approaches and information technology tools. It includes data collection and analysis, intelligent agents, business concerns on data warehousing and data mining, customer relationship management. The course will also cover information overload, human expert systems vs. artificial intelligent systems and intelligent decision making.

Prerequisite(s): CIST 1400; CIST 2500

ISQA 4100 INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION (3 credits)

This course examines the frameworks and tools used to develop an organization's information system architecture. It provides the analytical skills and conceptual frameworks with which to make recommendations and decisions regarding the integration of information technology components into an information system architecture. (Cross-listed with ISQA 8106)

Prerequisite(s): CIST 2100 and ISQA 3310

ISQA 4110 INFORMATION SYSTEMS ANALYSIS (3 credits)

This course examines and applies the principles of information systems analysis, following a structured systems development methodology. It surveys project management, feasibility and analysis and systems requirement definition using modern systems analysis techniques and automated tools. Course utilizes a case approach where students initiate the analysis and logical design of a limited-scope information system.

Prerequisite(s): CIST 2100, ISQA 3910, and ISQA 3310; only ISQA 3310 can be taken concurrently.

ISQA 4120 SYSTEM DESIGN AND IMPLEMENTATION (3 credits)

This is the second course in a sequence in computer information systems analysis, design, and implementation. This course extends the basic foundations of systems development started in ISQA 4110 and examines the activities comprising the design, construction and implementation of information systems.

Prerequisite(s): ISQA 3310 and ISQA 4110

ISQA 4130 INFORMATION TECHNOLOGY FOR DEVELOPMENT (3 credits)

Information Technology for Development (ITD) is the implementation and evaluation of information technology infrastructures to stimulate economic, social and human development. In this service-learning course, students will learn and apply ITD concepts for developing and adding value through IT by working with small business entrepreneurs in Omaha or rural Nebraska. Students will evaluate micro-business technology needs, prepare business technology plans, provide training, and implement appropriate solutions, to the extent possible within a semester class. (Cross-listed with ISQA 8136)

Prerequisite(s): Though not required, the following courses or their equivalent would provide the necessary background : CIST 1100, CIST 1300, ISQA 3210, ISQA 3310, ISQA 3400. Not open to non-degree graduate students.

ISQA 4150 ADVANCED STATISTICAL METHODS FOR IS&T (3 credits)

This course emphasizes the application and interpretation of statistical methods including design of experiments, analysis of variance, multiple regression, and nonparametric procedures and the use of statistical computer packages. The intent is to develop quantitative abilities needed for quantitatively intensive jobs and for advanced study in management information systems, computer science and information technology. (Cross-listed with ISQA 8156)

Prerequisite(s): CIST 2500 or equivalent (at least one course in statistics)

ISQA 4160 ENTERPRISE RESOURCE PLANNING SOFTWARE CONSULTING (3 credits)

Enterprise Resource Planning (ERP) consulting is designed to provide students foundational knowledge required to become a consultant working with enterprise systems. ERP systems are used by most organizations to manage and integrate the core functions of a business. Students will be exposed to a broad range of consulting skills that spans package selection to the implementation process. Students will work with a live instance of an ERP system focusing on the cross-functional integration of core business processes primarily in a manufacturing environment including finance, operations/supply chain, procurement, and fulfillment. The goal of the course is to provide students a foundation for careers in the area of ERP systems and consulting. (Cross-listed with ISQA 8166, SCMT 4160)

ISQA 4170 DIGITAL SUPPLY CHAIN & LOGISTICS (3 credits)

Global Supply Chains are being disrupted by digital transformation driven by emerging technologies such as IoT (internet of things) and AI/ML (Artificial Intelligence/Machine Learning). This course will take a closer look at global supply chains and logistics with an emphasis on the impact of digitalization. We will explore the typical global supply chain processes and how state-of-the-art and emerging technologies impact them. Thus, the class views global digital supply chains by integrating business and technological perspectives. The course will start with an overview of technologies relevant to digital supply chains. We will then discuss digitalization strategy and digital supply chains, fundamental GSCM (Global Supply Chain Management) processes and their potential for digitalization, and discussion of IT/software systems, IoT, AI/ML, Data Analytics/Visualization, and related facets that impact digital supply chains. The course will culminate with an integrated case study and/or research paper (graduate). (Cross-listed with ISQA 8176).

Prerequisite(s): It is preferable that students have taken an introductory supply chain class or have some experience in the transportation, logistics and supply chain management sector. Undergraduate students must have Junior standing.

ISQA 4180 ELECTRONIC COMMERCE (3 credits)

Critical examination of the issues, technologies, standards and business and social implications of electronic commerce in Cyberspace.

Prerequisite(s): ISQA 3400 or equivalent.

ISQA 4190 PROCESS REENGINEERING WITH INFORMATION TECHNOLOGY (3 credits)

Business process reengineering issues are examined. Reengineering concepts and methods are introduced. Additional special project(s) are required. SAP will be introduced. (Cross-listed with ISQA 8196.)

Prerequisite(s): CIST 2500; prerequisite/co-requisite ISQA 4110.

ISQA 4200 INFORMATION AND DATA QUALITY MANAGEMENT (3 credits)

The course primarily focuses on developing an in-depth understanding of Data and Information Quality (DQ and IQ) concepts and issues. On completing this course students will be able to understand and use DQ and IQ Concepts in Information Systems projects, be able to recognize various patterns of Data and Design Deficiencies in Systems and be able to suggest appropriate DQ and IQ improvement plans in light of known deficiencies in systems. (Cross-listed with ISQA 8206)

Prerequisite(s): CIST 2500 and CIST 2100.

ISQA 4300 DATABASE ADMINISTRATION (3 credits)

This course is designed to give students an applied, practical introduction to database administration. Students will gain an understanding of the functioning of a database management system and its relationship to the computing environment in which it runs. They will learn the concepts, principles, and techniques necessary to carry out such functions as database object creation, storage management, capacity planning, performance tuning, backup and recovery, and security management. Each semester the course will focus on one commercial database management system (DBMS), such as Oracle. (Cross-listed with ISQA 8306)

Prerequisite(s): ISQA 3310 or CSCI 4850. Not open to non-degree graduate students.

ISQA 4380 DISTRIBUTED TECHNOLOGIES AND SYSTEMS (3 credits)

The course introduces students to concepts, issues and tools needed to develop distributed computing systems. Topics include distributed systems architecture, middleware, Internet-based systems development, security and performance. Hands-on systems development using current technologies is provided.

Prerequisite(s): ISQA 3310 or equivalent and knowledge of database design and SQL.

ISQA 4500 SPECIAL PROBLEMS IN INFORMATION SYSTEMS AND QUANTITATIVE ANALYSIS (2-3 credits)

Individual investigation of specific problems in information systems and quantitative analysis and related areas.

Prerequisite(s): Senior standing and permission of program chair.

ISQA 4510 INFORMATION SYSTEMS INTERNSHIP (1-3 credits)

The purpose of this course is to provide the students with an opportunity for practical application of their academic studies in the business world to help prepare them for their professional career and to provide a view of the challenges they will face.

Prerequisite(s): Junior/senior standing and permission of department.

ISQA 4730 DECISION SUPPORT SYSTEMS (3 credits)

This course examines a set of information systems which specifically support managerial decision makers: Decision Support Systems, Group Decision Support Systems, Executive Information Systems, Data Warehouses, Expert Systems, and Neural Networks. This course explores the development, implementation, and application of these systems, how these systems can be applied to current business problems, as well as how organizational issues impact the implementation and usage of these systems. (Cross-listed with ISQA 8736)

Prerequisite(s): CIST 2100 or equivalent.

ISQA 4880 SYSTEMS SIMULATION AND MODELING (3 credits)

The course provides an introduction to the modeling and simulation with special emphasis on decision-theoretic models and rational decision-making. The ability to make good decisions is key to individuals and organizations and studying, understanding and improving decisions is vital to success. Students are given a background into systematic decision-making processes, and then are introduced to formal methods for decision modeling and analysis. Building on these foundational models, students learn how to perform process modeling and optimization. Finally, the course concludes with a look at psychological biases and traps that may affect decision-makers. (Cross-listed with ACMP 4880)

Prerequisite(s): CIST 1400 and CIST 2500 or equivalent

ISQA 4890 DATA WAREHOUSING AND DATA MINING (3 credits)

This course provides students with a theoretical foundation and practical methods for designing and constructing data warehouse and implementing data mining. After covering the essential concepts, issues, techniques to build an effective data warehouse, this course emphasizes the various techniques of data mining, such as association, classification, clustering and prediction for on-line analyses within the framework of data warehouse architectures. This course gives students an opportunity to undertake a real-life data analysis project. (Cross-listed with CSCI 4890).

Prerequisite(s): ISQA 3310 or CSCI 4850

ISQA 4900 FULL STACK DEVELOPMENT (3 credits)

Full stack development is the development of both client side and server side portions of web applications. Most organizations go beyond simply using HTML web pages with a small amount of JavaScript in applications and have moved to developing modern web applications with backend APIs and frontend JavaScript frameworks such as Vue.js. Students will learn how to build a backend application and REST APIs. Students will take that backend framework knowledge and learn to securely integrate these backend APIs with frontend JavaScript frameworks to build single page apps and hybrid mobile applications.

Prerequisite(s): CIST 1300 - Web Development or CSCI 2850

Programming on the Internet ISQA 3310 Managing the Database Environment or CSCI 4850 Database Management ISQA 3900 Web Application Development or equivalent

Interdisciplinary Studies (INDS)

Interdisciplinary Studies Undergraduate Courses

INDS 1000 INTRODUCTION TO INTERDISCIPLINARY STUDIES (3 credits)

This course introduces students to the differences between disciplinary and interdisciplinary approaches to learning and research, and how to create/critique interdisciplinary arguments, understand interdisciplinary processes, and assess the quality of their own work. Students gain the opportunity to engage in the study of thinking, reading, writing, and problem-solving through an interdisciplinary lens across the natural and physical sciences, social sciences, and humanities. This course fosters intellectual curiosity by examining personal, social, cultural, and scientific challenges, and asking students to consider interdisciplinary solutions. Open to all majors interested in learning how interdisciplinarity can both contextualize and enrich individual disciplines. For those majoring or considering majoring in Interdisciplinary Studies, this course will also offer the opportunity to craft an intentional plan of study by connecting with faculty and peers across various disciplines.

Prerequisite(s): Students majoring in Interdisciplinary Studies should take INDS 1000. Not open to non-degree graduate students.

Distribution: Social Science General Education course

INDS 4950 INTERDISCIPLINARY STUDIES: CAPSTONE COURSE (3 credits)

The course provides students with the opportunity to refine their practice of interdisciplinary thinking and its application to the real world; to demonstrate the knowledge and skills acquired thus far with the production of a senior project; to produce a rationale for their capstone project and specializations legible to potential employers.

Prerequisite(s): INDS 1000; a course satisfying the intensive writing requirement, and a research method course offered in their fields of study.

International Studies (INST)

International Studies Undergraduate Courses

INST 2130 GLOBAL CHALLENGES (3 credits)

An interdisciplinary, team-taught course which examines the seven global challenges - population, resources, technology, information, economies, conflict, governance - facing the world in the 21st century. The class introduces students to a range of interdependent factors and forces that influence international affairs.

Distribution: Social Science General Education course and Global Diversity General Education course

INST 3010 PERSPECTIVES IN INTERNATIONAL STUDIES (1 credit)

Topical and or general analysis of selected countries and regions offered in conjunction with possible study tours in those areas under investigation. Internships and/or study abroad experiences usually form the basis for the course. Can be repeated up to 12 hours. This course may be taken for honors credit.

Prerequisite(s): Permission of instructor.

INST 3020 PERSPECTIVES IN INTERNATIONAL STUDIES (2 credits)

Topical and or general analysis of selected countries and regions offered in conjunction with possible study tours in those areas under investigation. Internships and/or study abroad experiences usually form the basis for the course. Can be repeated up to 12 hours. This course may be taken for honors credit.

Prerequisite(s): Permission of instructor.

INST 3030 PERSPECTIVES IN INTERNATIONAL STUDIES (3 credits)

Topical and or general analysis of selected countries and regions offered in conjunction with possible study tours in those areas under investigation. Internships and/or study abroad experiences usually form the basis for the course. Can be repeated up to 12 hours. This course may be taken for honors credit.

Prerequisite(s): Permission of instructor.

INST 4140 TOPICS IN INTERNATIONAL STUDIES (3 credits)

This course examines a topic involving a wide range of international studies theories, methods, and fields to provide international studies majors a sense of how the elements of international studies fit together to form a coherent interdiscipline. A student may take the course more than once as topics will change each semester.

Prerequisite(s): Junior or above or permission of the instructor

INST 4950 LATIN AMERICAN STUDY ABROAD (3 credits)

This course is designed as an international study abroad course that will introduce undergraduate and graduate students to the dynamism of socio-cultural, economic, and political changes taking place across Latin America. Note: International travel and special fees required. (Cross-listed with LLS 8956, LLS 4950)

Prerequisite(s): Senior standing or Junior standing with permission of the department. LLS 1000 or LLS 1010 or equivalent and departmental permission.

INST 4990 SENIOR E-PORTFOLIO (0 credits)

This E-Portfolio course is part of International Studies' Student Outcomes effort. It is designed to help monitor the success of the program through monitoring students' performance in the program. Graduating seniors must register for and complete INST 4990 - Senior E-Portfolio in the term in which they plan to graduate.

Prerequisite(s): Students must register for INST 4990 in the term in which they plan to graduate. Not open to non-degree graduate students.

Japanese (JAPN)

Japanese Undergraduate Courses

JAPN 1020 WHY LANGUAGES MATTER: REPRESENTATIONS OF LINGUISTIC DIVERSITY IN THE US MEDIA (3 credits)

Delivered in English, this course introduces students to diversity in the US using language in context as points of departure. In this course, we analyze the intersection between language and ideological constructions (e.g., the objectification of Latino women, discrimination and stereotypes toward Asian peoples) and examine nodes of social meaning through visual and audio representations of language, as consumed in music, tv series, art (e.g., street art, installations) and social media. Departing from a US-centric and an assimilative approach, the course provides a historical and geographic lens through which these languages exist in the United States. (Cross-listed with WLL 1000, FREN 1010, GERM 1010, SPAN 1010).

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

JAPN 1110 ELEMENTARY JAPANESE I (5 credits)

Grammar review and oral practice, and introduction of hiragana, katakana and some kanji.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

JAPN 1120 ELEMENTARY JAPANESE II (5 credits)

Grammar review and oral practice, and introduction of kanji.

Prerequisite(s): JAPN 1110 with at least a C-

JAPN 2110 INTERMEDIATE JAPANESE (3 credits)

Grammar review and continued oral practice, and introduction of more kanji.

Prerequisite(s): JAPN 1120 with at least a C-

JAPN 2120 INTERMEDIATE JAPANESE II (3 credits)

Grammar review and continued oral practice, and introduction of more kanji.

Prerequisite(s): JAPN 2110 with at least a C-

JAPN 3020 UNDERSTANDING JAPANESE CULTURE: PRESENT DAY (3 credits)

This course offers an exploration of Japanese culture from multiple angles, including societal, artistic, and linguistic perspectives. Through an interdisciplinary approach, students will delve into current trends, cultural phenomena, and the evolving dynamics shaping modern-day Japan.

Journalism and Media Communication (JMC)

Journalism and Media Communication Undergraduate Courses

JMC 1050 FILM HISTORY AND APPRECIATION (3 credits)

A journey through one of many different possible worlds of film. Students will learn about various dimensions of filmmaking—historical development, cinematography, editing, screenwriting, and so much more. Exposure to critical perspectives on the genre(s) under consideration. Includes regular viewing of excerpts and full-length films. (Cross-listed with THEA 1050).

Distribution: Humanities and Fine Arts General Education course

JMC 1500 INTRODUCTION TO JOURNALISM AND MEDIA COMMUNICATION (3 credits)

A survey of the history, organization and social significance of the mass media, including newspapers, radio, television, books, magazines, advertising, public relations and films.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

JMC 2000 NEWS LITERACY (3 credits)

The digital age has made news and information sources more prevalent than ever before. This course will explore and determine the credibility of news and information and to recognize the standards of fact-based journalism to know what to trust, act on and share.

Prerequisite(s): Not open to non-degree graduate students.

JMC 2100 MEDIA WRITING (3 credits)

This class will teach students to gather information and write for all areas of mass communication, including print, broadcast, online media, public relations and advertising.

Prerequisite(s): ENGL 1150

Distribution: Writing in the Discipline Single Course

JMC 2110 PHOTOGRAPHY (3 credits)

This course provides instruction in photography's technical fundamentals and visual foundations. It covers camera operation, digital image processing, and professional photo presentation. It establishes a strong technical foundation while fostering a greater understanding of photography as a means to enhance the student's visual communication skill.

JMC 2150 NEWS WRITING AND REPORTING (3 credits)

The class addresses the theory and practice of writing and reporting for media audiences, with an emphasis on print and online media. Some of the assignments in the class will focus on covering public affairs and analyzing media coverage of public affairs.

Prerequisite(s): JMC 2100

JMC 2200 MEDIA PRODUCTION PRINCIPLES (3 credits)

This course offers a comprehensive foundation in media production, covering essential theories, technical competencies, and practical skills related to the operation of prevalent hardware and software used in audio and video production. Topics include digital video camera operation, an introduction to non-linear video and non-linear audio editing programs, and audio recording.

Prerequisite(s): JMC 2100 (co-req). Not open to non-degree graduate students.

JMC 2320 VIDEO FIELD PRODUCTION (3 credits)

The class provides in-depth, hands-on theory and practice of field production and editing principles and techniques. It expands from single-camera to multi-camera projects. The goal is for students to leave this course with a strong understanding of aesthetic shooting principles, audio and video equipment, and a solid working knowledge of field production and post-production practices.

Prerequisite(s): JMC 2100 (co-req) and JMC 2200, or instructor consent. Not open to non-degree graduate students.

JMC 2370 ALL ABOUT AUDIO (3 credits)

This course emphasizes the fundamentals of audio production and writing for radio and its online communication venues. On-air delivery, use of video and audio streaming, and broadcast industry issues are also covered.

Prerequisite(s): JMC 2200 (co-req).

JMC 2500 SOCIAL MEDIA COMMUNICATION (3 credits)

Social Media Communication (SMC) introduces and explains social media and social network sites, as these apply to journalism, advertising, public relations and digital marketing communication. Computer-mediated communication within social media cultivates critical thinking about opportunities and challenges, including engagement, privacy, trust and misinformation. Social influence happens within mediated interpersonal, entertainment and sports posts that present identity and cultivate online communities. Contemporary problems and issues are explored, such as justice, politics, romance and health.

JMC 2620 PR AND ADVERTISING DESIGN (3 credits)

This is a course concerned with the principles of print and electronic public relations and advertising design using applied digital methods and skills. Students will learn the principles of design in a variety of print and interactive formats relating to public relations and advertising. Concepts will be taught in a lecture setting, and skills will be demonstrated in a lab setting. An advertising and public relations design campaign will be completed.

Prerequisite(s): JMC 2100

JMC 3030 MULTIMEDIA JOURNALISM (3 credits)

This course is designed to give students the knowledge and skills needed to become multimedia professionals. Before each technology is introduced, students will learn the principles and goals involved in creating interesting, professional stories. This class is not about equipment operation or software but, rather, will focus on the ways journalists can use new technologies. However, it is important that students come to this class already familiarized with the basic tools of Internet publishing and multimedia journalism. Students will continue to develop news judgment and reporting abilities in this class. By the end of the semester, students are expected to develop a multimedia media package.

Prerequisite(s): JMC 2100 and JMC 2200

JMC 3230 PRINCIPLES OF PUBLIC RELATIONS (3 credits)

This course will focus primarily on techniques to garner and sustain public understanding, acceptance and support for an organization. This course will explain the merits of these techniques through theory and application, and will offer constant reminders of the relationship between theory and practice. Understanding theory can result in more efficient and effective use of techniques.

Prerequisite(s): JMC 2100

JMC 3270 PUBLIC AFFAIRS REPORTING (3 credits)

The class is designed to help students build and refine their researching, interviewing, reporting and writing skills through the coverage of a public affairs news beat for print, broadcast and online formats.

Prerequisite(s): JMC 2100

JMC 3320 VIDEO STUDIO PRODUCTION (3 credits)

The class introduces the student to the studio-production environment, equipment, and best practices. It applies multi-camera production concepts to a live switched environment. It provides reinforcement of editing principles by integrating pre-produced elements into a live production. The goal is for students to leave this course with a strong understanding of live-production principles, studio-production equipment, and a solid working knowledge of studio-production practices.

Prerequisite(s): JMC 2320. Not open to non-degree graduate students.

JMC 3340 MEDIA THEORY (3 credits)

How do media work? How do we think they work? How can we study what effect media messages have on our lives? From movies to entertainment to news, and even video games, media contain overt and hidden impacts and convey a variety of messages. Understanding the theories of media communication will make you a better storyteller, and will help you shape your message for its best impact. Explore the theories that are dominant today, those we have discarded (and why), and how this all keeps evolving as new media continue to emerge.

Prerequisite(s): JMC 2100 and JMC 1500

JMC 3350 COMMUNICATION RESEARCH (3 credits)

Research is important to understand communication, messages, audiences, behaviors, and motivations. This course develops students' abilities to conduct communication research focusing on two overarching methodological approaches used by communication scholars and industry professionals - Quantitative and Qualitative. The topics include research design, data management, statistical analysis, and report writing.

Prerequisite(s): JMC 1500 and JMC 2100 or permission of instructor. Not open to non-degree graduate students.

JMC 3370 PODCAST THIS (3 credits)

A survey of trends in audio storytelling including the use of Adobe software and studio engineering equipment. Students will learn various aspects of podcasting from inception to digital distribution. They will also critically engage in analyzing storytellers as well as researching, writing, voicing, and producing their own podcasts.

Prerequisite(s): JMC 2370 or permission of instructor

JMC 3400 FEATURE AND OPINION WRITING (3 credits)

Students will learn the genre of feature and opinion writing including editorials, columns, and reviews. They will enhance their research, writing, and organizational skills necessary for feature story, long-form and magazine writing. They will also enhance their interviewing techniques and develop, write, and market articles.

Prerequisite(s): JMC 2100

JMC 3620 PRINCIPLES OF CREATIVE ADVERTISING (3 credits)

This is a broad examination of advertising principles in all media, including the psychology of advertising; the creative, production and marketing aspects; and practical exercises in print, broadcast and social media. The course is organized in a way to take students through the process of creating relevant solutions to solve client advertising problems/opportunities.

Prerequisite(s): JMC 2100

JMC 3700 VISUAL COMMUNICATION AND CULTURE (3 credits)

This course will introduce students to 'the visual,' both in production and critique. This course provides students the opportunity to further their own understanding of what "visual culture" is and how they both can critically create and consume the various products of that culture. In addition, this course will help students create, develop, and cultivate the knowledge base they will need to successfully complete the Visual Communication and Culture minor.

Prerequisite(s): JMC 3340 (co-req) and JMC 3350 (co-req) or permission by instructor

Distribution: Humanities and Fine Arts General Education course

JMC 3710 DESIGN IN MOTION (3 credits)

This course introduces the fundamental aspects of content creation for television, social media, and web video creation. Focused on the principles of typography, design, and animation, students will have a working knowledge of how to plan, develop, and load content into television graphics software that can be distributed across multiple media platforms. Content may include how to create the following with motion: full screen, lower third, ticker, bug, slab, opening titles, transitions, and statistical graphics.

Prerequisite(s): JMC 2200, JMC 2320

JMC 4010 MEDIA HISTORY (3 credits)

This class covers development of the U.S. media from 1690 to present day, including newspapers, magazines, radio, television, the new media of the Internet, advertising and public relations. A special emphasis is placed on freedom of the press.

Prerequisite(s): JMC 3340 (co-req), JMC 3350 (co-req), or instructor permission

JMC 4040 SOCIAL MEDIA MEASUREMENT AND MANAGEMENT (3 credits)

Social Media Measurement and Management explores the dynamic development of social media platforms within a journalism and media communication context. Students of journalism, broadcasting, public relations, advertising and marketing will examine theories and best practices of social media interaction and engagement. (Cross-listed with COMM 8046)

Prerequisite(s): JMC 3340 (co-req) and JMC 3350 (co-req) or instructor permission

JMC 4250 STRATEGIC WRITING FOR PUBLIC RELATIONS AND ADVERTISING (3 credits)

This is an advanced skills course that combines theory and practical application in writing for public relations and advertising. Students will plan and execute strategy and tactics to craft and deliver a persuasive message to a variety of audiences.

Prerequisite(s): JMC 3230. Not open to non-degree graduate students.

JMC 4260 MEDIA RELATIONS (3 credits)

This course focuses on the communication tools used in media relations, the nuances of working with reporters from press and various media, news writing, news judgment, strategic planning, and the application of communication theories in understanding the relationship between news organizations and media relations representatives for organizations and corporations.

JMC 4300 RISK AND CRISIS COMMUNICATION (3 credits)

Risk/Crisis Communication, both as a discipline and a practice, has been discussed and enacted as long as there has been information to communicate because of an extraordinary event. Governments, businesses, universities, even individuals - all of engaged in one form of risk or crisis communication or another. Whether successful in its intentions or not, the act is there. This class is a theoretically-driven course to inform our practices as both creators of messages and critics of those same messages. (Cross-listed with CMST 4300).

Prerequisite(s): JMC 3340 and JMC 3350 or Permission of Instructor

JMC 4310 MEDIA & POLITICS (3 credits)

An in-depth study of the impact of the media on political communication. This course will explore the symbiotic relationship of media and political communication, including the influence of traditional mass media, digital media, and social media on the political communication process. Students will delve into media theories and critically examine the influence of the media on the political communication process. (Cross-listed with COMM 8316).

Prerequisite(s): Junior standing, ENGL 1160 and JMC 3350, and cumulative GPA 2.25

JMC 4320 TELEVISION COMMERCIAL PRODUCTION (3 credits)

Acquire the knowledge and skill to work with a client in creating commercial television messages designed to motivate viewers. The course will teach students how to plan, storyboard, write, record and edit the elements into a deliverable product to the client's satisfaction.

Prerequisite(s): JMC 2320 or instructor permission

JMC 4340 SPORTS BROADCASTING AND PRODUCTION (3 credits)

Students will learn to distinguish between the differences between sports production and sports performance. Students will also learn to broadcast a variety of sports using multiple platforms. Accuracy and immediacy are vital skills that students will be expected to develop. Students will learn and understand the importance and process of preparing for play-by-play and color commentary.

Prerequisite(s): JMC 3030 or permission of instructor. Not open to non-degree graduate students.

JMC 4370 COMMUNICATION WORKSHOP (3 credits)

A workshop to explore communication theory and processes and to develop skills in their application.

Prerequisite(s): Junior standing, ENGL1160, permission of instructor, and minimum overall GPA of 2.25

JMC 4380 FILM THEORY AND CRITICISM (3 credits)

A broad study of film critique methods, analysis, and interrogation based on current and traditional theoretical approaches to criticism (e.g., semiotic analysis, Postmodernism, genre, auteur theory, apparatus, feminist approaches, discourse analysis). Specific films (both classical and contemporary) may be examined as a form of socio-cultural inquiry.

Prerequisite(s): JMC 3340 (co-requisite); JMC 3350; or instructor permission.

JMC 4390 MEDIA ENTREPRENEURSHIP (3 credits)

Media Entrepreneurship explores new and emerging media business models from local, national and global perspectives. Students learn about and work within the start-up economy and entrepreneurial approaches. The course offers professional and critical perspectives. (Cross-listed with COMM 8396, ENTR 4390).

Prerequisite(s): JMC 3340 and JMC 3350 or permission of instructor

JMC 4400 MEDIA ETHICS (3 credits)

The course examines ethical standards and practices of the media - print, electronic and online media, as well as advertising, public relations and entertainment media. It includes development of ethical decision-making skills.

Prerequisite(s): JMC 3340 (co-req); JMC 3350 (co-req)

JMC 4410 COMMUNICATION LAW AND POLICY (3 credits)

Communication practitioners need to understand legal protections and constraints. This course explores legal concepts, frameworks and principles to understand constitutional, statutory, regulatory and case law and policies. The student must have a basic understanding of government, social studies and human rights principles. The First Amendment and international law provide a framework for exploring current cases and issues.

Prerequisite(s): Junior standing or permission of instructor

JMC 4420 SPORTS WRITING (3 credits)

Students will learn aspects of the specialized field of sports media communication. Areas will include writing, interviewing, storytelling, multiple media platforms, and the ethics of sports reporting. Writing experiences across the media spectrum, from traditional media to the new forms of online journalism, will be practiced.

Prerequisite(s): JMC 2100 or permission of instructor. Not open to non-degree graduate students.

JMC 4430 GLOBAL MEDIA COMMUNICATION (3 credits)

In-depth study of global media communication systems. This course will examine cultural influence of dominant global media, the changing global media climates, information flow, regulation and censorship of media worldwide. Students will look at the various aspects of mass communication including advertising, public relations, broadcasting, movies and social media. There will be an emphasis on global communication theories and on critical examinations of media systems.

Prerequisite(s): JMC 3340 (co-req), JMC 3350 (co-req), or instructor permission

JMC 4440 MEDIA CONTENT AND CREATION (3 credits)

This course is a culmination of skills students acquired in the Emerging Media concentration and prepares them for the Capstone experience and careers in the media industry. In this class, students will produce substantive and original reporting projects on a timely issue showcasing their talents as a prospective journalist and/or media professional. A field component to this course requires time outside of class. Students' work will be publicly available on television, cable, and the internet. This class contributes to a digital portfolio allowing students to showcase their work.

Prerequisite(s): JMC 2320, JMC 2370, JMC 3030 (co-req)

JMC 4450 PR AND ADVERTISING CAPSTONE (3 credits)

This advanced course provides students with professional development opportunities to hone their Public Relations and Advertising skills. Students will apply their knowledge to serve a university or community client by assessing their needs and developing an integrated marketing communication campaign. The final project will contribute to students' portfolios used for the job market.

Prerequisite(s): JMC 3340, JMC 3350 and JMC 4250 (co-req), and Senior standing or permission of instructor. Not open to non-degree graduate students.

JMC 4460 EMERGING MEDIA CAPSTONE (3 credits)

This advanced course provides students with professional development opportunities to polish their skills. Students will continue to create content for the School of Communication's media outlets and will assume mentoring and leadership roles under the supervision of instructors of the capstone classes.

Prerequisite(s): JMC 4440 (may not be taken as a co-requisite); Senior standing. Not open to non-degree graduate students.

JMC 4810 DIGITAL LITERACIES FOR TECHNICAL COMMUNICATORS (3 credits)

This course addresses emerging issues in digital literacies such as the rhetoric of technology, technological competency, technology and information ecologies, critical awareness of technology and human interactions, judicious application of technological knowledge, user-centered design, networking and online communities, ethics and technology, and culture and technology. (Cross-listed with JMC 8816).

Prerequisite(s): ENGL 1160 and CMST 1110 or permission of instructor.

JMC 4820 POLITICS AND FILM (3 credits)

This course introduces students to the analysis of politics and film, focusing on how politics is portrayed in film and the politics of film making.

JMC 4830 TECHNICAL COMMUNICATION (3 credits)

Technical Communication introduces students to the field of technical communication. Students will study the development of print and electronic genres common to industry settings, the design and production of technical documents, the writing processes and work practices of professional technical communicators, and the roles of technical communicators in organizational contexts. (Cross-listed with ENGL 4830, ENGL 8836, JMC 8836).

Prerequisite(s): ENGL1160 and CMST 1110 and minimum overall GPA of 2.25

JMC 4850 INFORMATION DESIGN FOR TECHNICAL COMMUNICATORS (3 credits)

This course introduces students to strategies for integrating visual and textual elements of technical documents. Instruction will focus on design theory and application through individual and collaborative projects. Students will develop the professional judgment necessary for making and implementing stylistic choices appropriate for communicating technical information to a lay audience. (Cross-listed with JMC 8856).

Prerequisite(s): JMC 4810 or JMC 4830 or permission of instructor

JMC 4870 TECHNICAL EDITING (3 credits)

This course introduces students to the roles and responsibilities of technical editors: the editorial decision-making processes for genre, design, style, and production of technical information; the communication with technical experts, writers, and publishers; the collaborative processes of technical editing; and the techniques technical editors use during comprehensive, developmental, copyediting, and proofreading stages. (Cross-listed with JMC 8876).

Prerequisite(s): ENGL 1160 or permission of the instructor

JMC 4890 CAPSTONE COURSE IN TECHNICAL COMMUNICATION (3 credits)

In this capstone course, students will extend foundational skills learned in previous technical communication courses. Students will demonstrate their competency in the technical documentation process in organizational environments, the issues important to the technical communication profession, and the practices of writing and creating complex technical documents for specific purpose and audience. (Cross-listed with JMC 8896).

Prerequisite(s): JMC 4810, JMC 4830, JMC 4870, JMC 4850 or permission of instructor

JMC 4900 SEMINAR MASS COMMUNICATION (3 credits)

A senior seminar applying historical and theoretical perspective to current issues and developments in mass communications. (Cross-listed with JMC 8906).

Prerequisite(s): Junior standing and (Communication Studies or Journalism and Media Communication major) and ENGL 1160 and minimum overall GPA of 2.25

JMC 4920 MEDIA LITERACY (3 credits)

An advanced seminar on the study of media and information literacy through deconstruction of mass communication content, meaning construction, framing analyses and critical/cultural approaches. (Cross-listed with COMM 8926).

Prerequisite(s): JMC 3350 or instructor permission

JMC 4970 INTERNSHIP EXPERIENCE (1-3 credits)

This course will provide students professional communication-related experience in an internship approved and supervised by the School of Communication. 3 credits = 150 hours at site. 2 credits = 100 hours at site. 1 credit = 50 hours at site. Additional coursework completed online will develop career competencies including resume, cover letter, portfolio, and interviewing skills.

Prerequisite(s): Sophomore standing; instructor permission; and minimum cumulative GPA of 2.25.

JMC 4980 INDEPENDENT STUDY IN COMMUNICATION (3 credits)

Specialized studies in communication supplementing regular courses: readings; research; tutorial.

Prerequisite(s): JMC 3340, JMC 3350, permission of department, and minimum GPA of 2.25

Kinesiology (KINS)

Kinesiology Undergraduate Courses

KINS 1010 INTRODUCTION TO SPORTS MEDICINE (1 credit)

The primary purpose of this course is to allow students to explore a variety of professions related to the field of sports medicine and how they work together to ensure safe participation in physical activity. Topics such as basic injury pathology, safe participation in sports, communication, and legal and ethical issues will be reviewed.

KINS 1500 FUNDAMENTALS OF GROUP EXERCISE (1 credit)

This course is designed to provide students with the knowledge and skills to perform fundamental exercises associated with a variety of group exercise formats (e.g. bootcamp, kickboxing, yoga, indoor cycling, step, etc.). Students will also learn proper technique, transitions, progressions/regressions, modification, and sequencing to create a safe and inclusive class environment.

Prerequisite(s): Kinesiology majors, Pre-AT, Exploratory H&K, or PE Teaching majors

KINS 1600 FUNDAMENTALS OF RESISTANCE TRAINING (1 credit)

This class is designed to provide each student with the knowledge needed to understand how to properly perform basic weight training movements for each muscle group. Students will understand and learn the importance of keeping good body positioning, technique, spotting, breathing and safety procedures with free weights and machine weights as well learning to developing basic weight-training programs and understanding basic training principles.

Prerequisite(s): Kinesiology majors, Pre-AT, Exploratory H&K, or PE Teaching majors. Not open to non-degree graduate students.

KINS 1800 FITNESS FOR LIVING (3 credits)

This course is aimed at exploring the values of physical activity, assessing fitness needs and prescribing appropriate activities. The course will be taught as a lecture lab.

KINS 2130 LIFEGUARDING (3 credits)

This course is designed to prepare candidates in assuming the duties and responsibilities of a lifeguard. The main focus will be accident prevention in and around the water. Also stressed will be the recognition of a person in distress and a drowning victim. The development of an emergency plan and the articulation with the emergency rescue service will also be key elements in this course.

KINS 2140 WATER SAFETY INSTRUCTORS COURSE (3 credits)

This is a course in water safety instruction. The purpose of this course is to teach those enrolled how to teach the various swimming skills. This would include teaching beginning swimming through emergency water safety. Candidates who satisfactorily complete the course will be issued a Water Safety Instructor Certificate.

Prerequisite(s): Seventeen years of age and possession of current Advanced Lifesaving or Emergency Water Safety Certificate

KINS 2210 GROUP EXERCISE LEADERSHIP (2 credits)

This course is designed to provide students with competencies in the theory, concepts, and skills related to group exercise instruction and leadership. Students will explore both the dynamics of group participation and instructions across various modalities including; step, hi-low aerobics, cardio kickboxing, water aerobics, dance fitness, sports conditioning, indoor cycling, yoga, Pilates, and barre.

Prerequisite(s): PE 1800 or KINS 1800 with a grade of C- or better, School of H&K majors, Secondary Education majors with endorsements in Health/PE 7-12, and PE Pk-6th and 7-12

KINS 2220 THEORY AND PRACTICE OF TEACHING RESISTANCE TRAINING (2 credits)

This course is designed for the college student majoring in Exercise Science, Physical Education and related degrees to develop leadership skills necessary to teach safe and effective resistance training programs.

Prerequisite(s): PE 1800 or KINS 1800 with a grade of C- or better, School of H&K majors, Secondary Education majors with endorsements in Health/PE 7-12, and PE Pk-6th and 7-12

KINS 2310 TEACHING GAMES 1 (3 credits)

The purpose of this course is to help preservice physical education teachers facilitate enhanced performance, analysis, and tactical understanding of invasion games and field run/score games (e.g. basketball, soccer, team handball, football, speedball, ultimate Frisbee, hockey, softball, cricket, and modified kickball).

Prerequisite(s): Not open to non-degree graduate students.

KINS 2320 TEACHING GAMES 2 (3 credits)

The purpose of this course is to help preservice physical education teachers facilitate enhanced performance, analysis, and tactical understanding of net/wall games and lifetime activities (e.g. volleyball, badminton, tennis, racquetball, golf, archery, pickleball, table tennis).

Prerequisite(s): Not open to non-degree graduate students.

KINS 2330 OUTDOOR/ADVENTURE ACTIVITIES (3 credits)

The course will address the basic requirements for living comfortably and traveling in wilderness areas. Basic orienteering skills, team building activities, identifying and minimizing risks associated with outdoor pursuits, and environmental safety issues will be included.

Prerequisite(s): SED or ELED major, HED 3030 or PHHB 3030. Not open to non-degree graduate students.

KINS 2430 FOUNDATIONS IN KINESIOLOGY (3 credits)

This is an introductory course in kinesiology that includes an orientation to the profession and a consideration of current trends, problems and issues and their implications for the field of kinesiology. The course also examines the relationship of kinesiology to other cultures, general education, and global perspective.

Distribution: Social Science General Education course

KINS 2700 FUNDAMENTALS OF ATHLETIC TRAINING (3 credits)

An introduction to the field of athletic training as well as injury prevention and basic athletic training skills in wound care, taping/bracing, evaluation, and treatment.

Prerequisite(s): PE 1010 or KINS 1010, BMCH 2400, BMCH 2500 and admission into the Athletic Training Program. Not open to non-degree graduate students.

KINS 2800 MOTOR LEARNING (3 credits)

This course is the study of motor development, and the conditions and factors that influence the normal development and the learning of motor skills. Emphasis is placed upon normal developmental patterns and behaviors and learning principles throughout the life-span as it relates to a diverse American culture.

Prerequisite(s): PE 2430/KINS 2430 with a grade of C- or better, or ATHH majors, or permission of instructor

KINS 3000 SPECIAL PROJECTS (1-3 credits)

Conducted as short course, seminar, workshop or special project.

Prerequisite(s): The prerequisite for the special project will be determined by the instructor.

KINS 3010 SCIENTIFIC PRINCIPLES OF COACHING (3 credits)

Designed for coaches and potential coaches who are not physical education majors. Covers basic information to include kinesiology, physiology of exercise and behavioral aspects of coaching.

Prerequisite(s): For non physical education majors.

KINS 3040 PREVENTION AND CARE OF ATHLETIC INJURIES (3 credits)

This course covers selected topics related to the prevention and care of athletic related injuries. Emphasis will be placed on injury prevention through proper training, conditioning, nutrition and hydration strategies. Basic evaluation and treatment of athletic related injuries and legal aspects will also be covered.

Prerequisite(s): PE3010/KINS 3010, or BMCH 2400 or BIOL 2740, and HED3030/PHHB 3030 or current CPR certification and First Aid certification or departmental permission.

KINS 3060 METHODS OF PRESCHOOL AND PRIMARY SCHOOL PHYSICAL EDUCATION (3 credits)

The study of current methodology in developmentally appropriate preschool and primary school physical education. Candidates will use the assessment, planning, implementation and evaluation model in developing physical education programs for this age group.

Prerequisite(s): KINS 2800, EDUC 2510 or EDUC 2520 or TED 2400, 2.75 NU GPA

KINS 3110 INTRODUCTION TO DANCE (3 credits)

This course provides an introduction to dance as a performing art focusing on the choreographer, the dancer, the audience, the different dance genres and dance as a means of communication and expression.

KINS 3120 DANCE SOMATICS: AN INTEGRATED APPROACH TO UNDERSTANDING THE BODY IN MOTION (3 credits)

This course explores the body in motion through the lenses of various dance and movement theories, as well as self-reflection. Students will learn to move in an embodied way and understand the physiological, developmental, and psychological foundation of movement for dance.

Prerequisite(s): Not open to non-degree graduate students.

KINS 3130 CHOREOGRAPHY 1: INTRODUCTION TO CHOREOGRAPHIC TOOLS, ARTISTIC AESTHETICS, & PERFORMANCE ELEMENTS (3 credits)

This course explores the act of choreography as a medium for artist expression through improvisation, choreographic constructs, and content themes. Students will learn how to build ideas into choreographic dances through experimentation, structured frameworks, and feedback. Students will also present their work in a small performance at the conclusion of the semester.

Prerequisite(s): Not open to non-degree graduate students.

KINS 3140 SPORTS OFFICIATING (3 credits)

The general principles, basic guidelines, philosophy, mechanics and rules of officiating several team and individual sports will be covered.

KINS 3300 TEACHING DANCE IN THE SCHOOLS (3 credits)

The course is designed for physical education pedagogy majors, elementary teachers, and recreation leaders who are interested in obtaining the fundamentals of a variety of rhythmic and creative dance activities and their teaching methods for preschool through twelfth grade.

Prerequisite(s): EDUC 2010 or TED 2300 or TED 2380 or permission of instructor

KINS 3350 TEACHING & CURRICULUM DEVELOPMENT IN ELEMENTARY PHYSICAL EDUCATION (3 credits)

The study of teaching methodology and curriculum development in the elementary schools. Particular attention will be given to meeting the motor needs and interests of children aged 9-12. Assessing children's motor performance, prescribing activities, and evaluating the program effectiveness will be addressed.

Prerequisite(s): KINS 3060, KINS 3300, KINS 2310, TED 2400, 2.75 NU GPA

KINS 3480 ORGANIZATION AND ADMINISTRATION OF ATHLETICS (3 credits)

A study of the organization and administration of athletics in the secondary schools.

Prerequisite(s): Sophomore

KINS 3710 SWIMMING COACHING THEORY AND PRACTICE (3 credits)

This course is designed to develop the competencies essential to the successful coaching of swimming at all levels. The focus is on theory, swimming techniques, rules, safety, and coaching methods of competitive swimming.

KINS 3720 SOCCER COACHING THEORY & PRACTICE (3 credits)

A course of study designed to develop the competencies essential to the successful coaching of soccer. The focus is on conditioning training activities, coaching techniques, competition strategies, equipment selection, and modern coaching theories specific to the sport of soccer.

KINS 3730 SOFTBALL COACHING THEORY AND PRACTICE (3 credits)

A course of study designed to develop the competencies essential to the successful coaching of fast pitch softball. The course will encompass the philosophy of coaching, coaching techniques, conditions/training activities and the analysis and correction of skills.

KINS 3740 VOLLEYBALL COACHING THEORY AND PRACTICE (3 credits)

A course of study designed to develop the competencies essential to the successful coaching of volleyball. The focus is on conditioning training activities, coaching techniques, competition strategies, equipment selection and modern coaching theories.

KINS 3750 WRESTLING COACHING THEORY AND PRACTICE (3 credits)

A course of study designed to develop the competencies essential to the successful coaching of wrestling. The focus is on conditioning/training activities, coaching techniques, competition strategies, equipment selection and modern coaching theories specific to the sport of wrestling.

KINS 3760 BASEBALL COACHING THEORY AND PRACTICE (3 credits)

A course of study designed to develop knowledge in all phases of the game. Special focus is on fundamentals, drills, managing and psychology of coaching.

KINS 3770 FOOTBALL COACHING THEORY AND PRACTICE (3 credits)

A course of study designed to develop the competencies essential to the successful coaching of football on all levels. The focus is on theory, history and origin, conditioning, safety techniques, coaching techniques, strategy, equipment selection and modern coaching theories.

KINS 3780 TRACK AND FIELD COACHING THEORY AND PRACTICE (3 credits)

A course of study designed to develop the competencies essential to the successful coaching of track and field. The focus is on conditioning training activities, coaching techniques, competition strategies, equipment selection and modern coaching theories specific to the sport of track and field.

KINS 3790 BASKETBALL COACHING THEORY AND PRACTICE (3 credits)

A course of study designed to develop the competencies essential to the successful coaching of basketball. The focus is on conditioning training activities, coaching techniques, competition strategies, equipment selection and modern coaching theories specific to the sport of basketball.

KINS 3800 HOCKEY COACHING THEORY (3 credits)

An introductory course in the developing the desirable attributes of hockey players, rules of the game, fundamental skills and systems of ice hockey as well as the study of key principles in successful players. Basic offensive and defensive strategies will be discussed. Also discussed will be the evolution of the sport and its equipment.

KINS 3900 MOTIVATION FOR PHYSICAL ACTIVITY (3 credits)

The central purpose of this course is to examine the psychological basis of exercise and physical activity. The majority of the course will focus on traditional theories principles of psychology as they relate to exercise. Emphasis is placed on understanding the motives underlying involvement in exercise and physical activity and the psychological benefits derived from acute and chronic involvement in an exercise program. Throughout the course, consideration will be given to theoretical models, research findings, and practical application of the concepts to a variety of performance settings.

Prerequisite(s): PSYC 1010 with a grade of C- or better.

KINS 4000 TEACHING & CURRICULUM DEVELOPMENT IN SECONDARY PHYSICAL EDUCATION (3 credits)

This course is designed to develop candidates' competencies in physical education instructional methodology and curriculum development. Analysis of teacher behavior and selection of content and materials will be examined. Candidates will be introduced to and will implement various methods of teaching physical education at the secondary level so as to develop the skills to become an effective teacher.

Prerequisite(s): KINS 2310, KINS 2320, KINS 2330, KINS 3300, TED 2400, 2.75 NU GPA

KINS 4010 LABORATORY METHODS IN EXERCISE SCIENCE (6 credits)

This course will provide students an opportunity to achieve competency in operating various pieces of equipment typically used in biomechanics and exercise physiology laboratories. The students will gain experience in interpreting the results of the tests administered, and writing exercise prescriptions based upon those results. Students must have current CPR certification.

Prerequisite(s): BMCH 2500 or BIOL 2840, BMCH 4630, PE 4940 or KINS 4940, CPR certification, department consent; must be School of H&K major or ATHT major. Students cannot complete KINS 4010 and KINS 4800 in the same term.

KINS 4050 EXERCISE AND SPORT NUTRITION (3 credits)

This course presents an overview of the principles of nutrition and the relationship between nutrition and health, fitness, and sports performance. It is designed to provide students with the knowledge and skills necessary to assess nutritional status, improve overall health, and enhance sports performance. (Cross-listed with KINS 8056).

Prerequisite(s): HEKI 3090

KINS 4070 OPTIMIZING SPORTS PERFORMANCE (3 credits)

The course is designed for coaches, athletes and physically active people, and allied health professionals. Course content emphasizes integration of several disciplines in sports medicine aimed at preparing one for optimal sports performance. Topics include peaking, detraining, overuse injury, efficiency, special foods and nutritional requirements, genetics and trainability, and designing of multi-year training schedules. (Cross-listed with KINS 8076).

Prerequisite(s): PE 4940/KINS 4940 with a grade of C- or better.

KINS 4080 CLINICAL EXERCISE PHYSIOLOGY (3 credits)

This course will offer students the knowledge, skills, and abilities to take the American College of Sports Medicine's health fitness instructor certification exam. This course will emphasize health risk assessment, exercise testing, and exercise prescription for healthy and clinical populations. (Cross-listed with KINS 8086).

Prerequisite(s): PE 4940/KINS 4940 with a grade of C- or better.

KINS 4100 APPLIED KINESIOLOGY (3 credits)

This course will introduce students to the use of basic theories and principles of movement analysis from a kinesiological perspective. Students will apply anatomical knowledge to break down movement from a broad spectrum of activities.

Prerequisite(s): BMCH 2400 or PE 2880 or BIOL 2740 or equivalent and sophomore standing

Distribution: Writing in the Discipline Sequenced Course

KINS 4150 ADAPTED PHYSICAL ACTIVITY THEORY AND PRACTICE (3 credits)

A study of problems as they relate to philosophy, procedures and practices, and organization and administration of physical education & physical activity programs for exceptional students. This course surveys societal issues surrounding adaptive sports and recreation along with movement problems associated with specific disabilities. This course also provides the student with an opportunity to work with an individual who has a disability.

Prerequisite(s): PE 2800 or KINS 2800 with a grade of C- or better and Jr Standing and PYED major or TED 2300 and TED 2380 and Special Education or Secondary Education major with endorsement codes: 0802S or 0802C or 1913S

Distribution: U.S. Diversity General Education course

KINS 4200 PLANNING WORKSITE WELLNESS PROGRAMS (3 credits)

This course will focus on the planning of quality worksite wellness programs utilizing standards established by the Association for Worksite Health Promotion. Steps in the planning process such as needs assessment, strategic planning, implementation, and evaluation will be taught with special application to the worksite. Critical issues involving worksite programs also will be addressed such as upper management support, program standards, corporate culture, competencies for worksite health promotion professionals, economic benefits, behavioral theories, legal issues, and the integration of worksite wellness programs and health care. (Cross-listed with KINS 8206).

Prerequisite(s): Junior standing.

KINS 4310 LOWER EXTREMITY EVALUATION (3 credits)

This course is designed to provide the candidate with knowledge and skill in the area of advanced athletic injury assessment. The candidate will be exposed to current methodology in the field of orthopedic assessment, pathophysiology of orthopedic injury, and application of current research in injury evaluation. The candidate will receive practical experience in the management of athletic injuries. This course will focus on the low back, hip, and lower extremities. (Cross-listed with KINS 8316).

Prerequisite(s): PE 2700 or KINS 2700 and PE 4710 or KINS 4710. Not open to non-degree graduate students.

KINS 4320 UPPER EXTREMITY EVALUATION (3 credits)

This course is designed to provide the candidate with knowledge and skill in the area of advanced athletic injury assessment. The candidate will be exposed to current methodology in the field of orthopedic assessment, pathophysiology of orthopedic injury, and application of current research in injury evaluation. The candidate will receive practical experience in the management of athletic injuries. This course will focus on the head, neck, thorax, and upper extremities. (Cross-listed with KINS 8326).

Prerequisite(s): PE 4310/KINS 4310, PE 4330/KINS 4330, and PE 4720/KINS 4720. Not open to non-degree graduate students.

KINS 4330 ATHLETIC THERAPEUTIC MODALITIES (3 credits)

This course will cover the theory, physiology and application of physical agents used in the treatment of injuries and illness. Students will gain practical experience utilizing selected agents to treat injuries and illnesses. (Cross-listed with KINS 8336).

Prerequisite(s): PE 2700 or KINS 2700 and PE 4710 or KINS 4710. Not open to non-degree graduate students.

KINS 4350 ORGANIZATION AND ADMINISTRATION OF ATHLETIC TRAINING (3 credits)

Administration of athletic training programs including the use of records and forms, budgets, facility design and legal concerns. (Cross-listed with KINS 8356).

Prerequisite(s): PE 4340/KINS 4340, PE 4320/KINS 4320

KINS 4360 ORTHOPEDIC AND MEDICAL ASPECTS OF ATHLETIC TRAINING (3 credits)

This course will enhance the candidate's knowledge of orthopedic and medical aspects of athletic training. Involves directed observation, experiential learning, literature review and hands-on experience under the supervision of local medical professionals in various settings. The student will be exposed to advanced evaluation and treatment skills, including imaging techniques and surgical procedures, rehabilitation and athletic training management.

Prerequisite(s): PE 4320/KINS 4320 and PE 4340/KINS 4340

KINS 4500 BEHAVIORAL ASPECTS OF COACHING (3 credits)

This course is designed to provide the physical education teacher and athletic coach with an overview of the behavioral aspects of coaching athletes. The course will provide information which will enable the coach to enhance as well as orchestrate performance of elementary, junior high, senior high, college, and post-college athletes. (Cross-listed with KINS 8506).

KINS 4700 FITNESS MANAGEMENT (3 credits)

This course is an introduction to management concepts for fitness professionals such as human resource management, financial management, marketing, and facility risk management. Assessment, development, prescription, implementation, and evaluation strategies will be presented for each management concept. Students will develop the knowledge and skills necessary to orchestrate and manage high quality programs in various fitness settings.

KINS 4710 CLINICAL PRACTICUM IN ATHLETIC TRAINING I (1 credit)

Clinical Practicum in Athletic Training I is the first course in the Clinical Practica series for students admitted to the Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills. Students will demonstrate skills and proficiencies in emergency procedures and the basic therapeutic modalities.

Prerequisite(s): Formal admission to the Athletic Training Program, instructor permission, & continued compliance w/published Athletic Training Program Technical Standards for Admission. Co-requisite: PE 2700/KINS 2700. Not open to non-degree graduate students.

KINS 4720 CLINICAL PRACTICUM IN ATHLETIC TRAINING II (1 credit)

Clinical Practicum in Athletic Training II is the second course in the Clinical Practica series for students admitted to the Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills. Students will demonstrate advanced proficiencies in emergency procedures and initial proficiencies in lower extremity evaluation and application of therapeutic modalities.

Prerequisite(s): Formal admission to Athletic Training Program, PE 4710/KINS 4710, instructor permission, compliance w/ published Athletic Training Program Technical Standards for Admission. Co-requisite: PE 4310/KINS 4310 & PE 4330/KINS 4330

KINS 4730 CLINICAL PRACTICUM IN ATHLETIC TRAINING III (1 credit)

Clinical Practicum in Athletic Training III is the third course in the Clinical Practica series for students admitted to the Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills. Emphasis on mastery of skills and proficiencies in lower extremity care and initial proficiency in upper extremity evaluation and care.

Prerequisite(s): Formal admission to Athletic Training, PE 4720/KINS 4720, instructor permission, compliance w/published Athletic Training Technical Standards for Admission. Co-requisite: PE 4320/KINS 4320 & PE 4340/KINS 4340. Not open to non-degree graduate students.

KINS 4740 CLINICAL PRACTICUM IN ATHLETIC TRAINING IV (1 credit)

Clinical Practicum in Athletic Training IV is the fourth course in the Clinical Practica series for students admitted to the Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills. Emphasis on mastery of upper extremity evaluation and care and skills in medical exam techniques, pharmacology and interviewing.

Prerequisite(s): Formal admission to Athletic Training Program, PE 4730/KINS 4730, instructor permission, & compliance with published Athletic Training Program Technical Standards for Admission. Co-requisite: PE 4360/KINS 4360. Not open to non-degree graduate students.

KINS 4750 CLINICAL PRACTICUM IN ATHLETIC TRAINING V (1 credit)

Clinical Practicum in Athletic Training V is the fifth course in the Clinical Practica series for students admitted to the Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills. Emphasis on mastery of skills in medical examination techniques and administrative tasks.

Prerequisite(s): Formal admission to the Athletic Training Program, PE 4740/KINS 4740, instructor permission, & compliance w/published Athletic Training Program Technical Standards for Admission. Co-requisite: PE 4350/KINS 4350. Not open to non-degree graduate students.

KINS 4800 KINESIOLOGY PRACTICUM (3 credits)

This practicum places the candidate in the role of an exercise leader in a Fitness for Living class. During this experience the candidate will participate in a seminar which will meet three days a week. Responsibilities in the role of an exercise leader will include: direct contact with students enrolled in this class during all lectures and activities and exercise leadership and supervision, fitness testing, and class presentations. During the seminar sessions the candidates will participate in discussions, group activities, and share experiences relative to their exercise leadership roles. Candidates must have current CPR certification.

Prerequisite(s): PE 2210/KINS 2210, PE 2220/KINS 2220, BMCH 2500 or BIOL 2840, BMCH 4630 or KINS 4100, PE 4940/KINS 4940, CPR certification and department consent. Students cannot complete KINS 4010 and KINS 4800 in the same term.

KINS 4850 CARDIOVASCULAR DISEASE PREVENTION AND REHABILITATION (3 credits)

The purpose of this course is to provide candidates with an introduction to the theories and practices involved in all phases of cardiac rehabilitation. (Cross-listed with KINS 8856).

Prerequisite(s): PE 2500/KINS 2500 with a grade of C- or better or BIOL 2840 with a grade of C- or better, PE 4940/KINS 4940 with a grade of C- or better

KINS 4910 INTERNSHIP IN KINESIOLOGY (3 credits)

This course is a supervised, educational work experience of at least 150 clock hours over at least a ten week period at an approved worksite offering programs and experiences in all areas of kinesiology and health promotion.

Prerequisite(s): PE 4800 or KINS 4800, 2.5 GPA, CPR Certification, and department consent

KINS 4930 MEASUREMENT AND EVALUATION IN KINESIOLOGY (3 credits)

This course is designed to present the theory and application of measurement and evaluation techniques commonly used in physical education, exercise science, physical activity, and health promotion. Appropriate test selection, administration, and the interpretation of results with fundamental statistical methods will be emphasized. Students will participate in selected practical testing and measurement procedures.

Prerequisite(s): PE 4940 or KINS 4940 with a grade of C- or better

KINS 4940 PHYSIOLOGY OF EXERCISE (3 credits)

A study of the major physiological systems of the human body and its acute and chronic responses to exercise. Includes application of physiological concepts to physical training and conditioning.

Prerequisite(s): BMCH 2400 or BIOL 2740 with a grade of C- or better and sophomore standing. School of H&K majors or Human Performance minors only, or with department approval.

Distribution: Writing in the Discipline Sequenced Course

KINS 4960 TOPICS IN SPORTS MEDICINE (3 credits)

This course covers selected topics regarding the science and medicine of sports participation. Some areas to be covered include the medical supervision of the athlete, special populations, conditioning, environmental concerns and sports nutrition.

Prerequisite(s): PE 4340/KINS 4340, PE 4350/KINS 4350, and PE 4730/KINS 4370; or instructor permission

KINS 4970 PROBLEMS OF PHYSICAL EDUCATION (1-3 credits)

This course is designed to provide an opportunity for individuals or groups to study problems in physical education.

Prerequisite(s): Permission of instructor

KINS 4980 COACHING PRACTICUM (1 credit)

This course is designed to give the candidate practical experiences in the coaching of specific sports.

Prerequisite(s): Junior standing and related coaching methods course. Permission of instructor

KINS 4990 INTERNSHIP IN ATHLETIC TRAINING (6 credits)

This course is a supervised, educational work experience of at least 300 clock hours over a minimum of a 10-week period at an approved athletic training worksite.

Prerequisite(s): 90 hours completed, 2.5 GPA and department consent

Latin (LATN)

Latin Undergraduate Courses

LATN 1110 ELEMENTARY LATIN I (5 credits)

This course will provide opportunities for students to develop a basic reading knowledge of Latin.

LATN 1120 ELEMENTARY LATIN II (5 credits)

This is the second semester of a university-oriented two-year Latin course. The course will cover the basics of Latin grammar, which will be instrumental in preparing the student for reading Latin primary sources and making connections between that content and the literatures of Western Europe.

Prerequisite(s): LATN 1110 or placement by instructor's diagnostic examination.

LATN 2110 INTERMEDIATE LATIN I (3 credits)

This is the third semester of a university-oriented two-year sequence of Latin courses. The course will cover the basics of Latin grammar, which will be instrumental in preparing the students for reading Latin primary sources and making connections between their contents and the literatures of Western Europe.

Prerequisite(s): LATN 1120 or placement by instructor's diagnostic examination.

LATN 2120 INTERMEDIATE LATIN II (3 credits)

This is the fourth semester of a university-oriented two-year sequence of Latin courses. The course will cover the basics of Latin grammar, which will be instrumental in preparing the students for reading Latin primary sources and making connections between their contents and the literatures of Western Europe.

Prerequisite(s): LATN 2110 or placement by instructor's diagnostic examination.

Latino/Latin American Studies (LLS)

Latino/Latin American Studies Undergraduate Courses

LLS 1000 LATIN AMERICA: AN INTRODUCTION (3 credits)

The course introduces the students to the study of Latin America. Its main focus is on contemporary Latin American societies and regional dynamics, but historical forces and the impact of globalization are continuously evaluated. Students will learn about the region's dominant forces and trends associated with development policies, political regimes, population changes, urbanization, and a whole host of social problems, challenges and perspectives. Topics for readings, discussions and assignments include social inequality, gender, race, violence, the environment, food, health, education, social media, religion, emigration and international relations. Students will have opportunities to explore in more depth specific topics as well.

Distribution: Social Science General Education course and Global Diversity General Education course

LLS 1020 INTRODUCTION TO CHICANO/LATINO STUDIES (3 credits)

The course introduces students to intellectual, artistic, literary, musical, and other cultural traditions and contributions of Chicanos/Latinos in the U.S. and in their historical crossing of real and imaginary borders. This course focuses on the specific groups that make up the Latino population in the United States (i.e. Chicanos, Puerto Ricans, Cubans, Central Americans and South Americans) and examines each group's settlement, migration, and social integration paths. Topics for readings, discussions, and assignments include the different racial, ethnic, gender, sexual identities, immigration status and other social groups that construct the Latino population.

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

LLS 2480 HISTORY OF LATIN AMERICA: PRECONQUEST TO THE PRESENT (3 credits)

A history of the nations of Latin America from the pre-Columbian indigenous cultures to the present time. Among the topics included will be the nature of indigenous cultures, the various European incursions, regional revolutions against European empires, nation-building, and the place of Latin America in global history. (Cross-listed with HIST 2480).

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

LLS 2810 MUSIC IN LATIN AMERICAN CULTURE (3 credits)

This course surveys musical traditions from countries in Latin America and the Caribbean. Characteristic regional genres, ensembles, instruments, and music rituals will be examined. We will also trace the historical, cultural, and socio-political aspects of Latin American music on a global scale and delve into the developments of some international musical genres. (Cross-listed with MUS 2810).

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

LLS 3050 LATIN AMERICA IN CONTEXT: HEALTH, BUSINESS, ENVIRONMENT, AND SOCIETY THROUGH ORAL PRACTICE (3 credits)

This course focuses on the development and intensive practice of oral expression in Spanish, and is intended for students interested in the fields of business, health, education, environmental sciences, social work, and cultural studies, who are either heritage speakers of Spanish or who are completing a major/minor in Spanish. The class provides a broad context of current relevant issues in Latin America, including politics and society; the state of the economy after decades of neoliberalism; racism; indigenous and Afro-descendent identities; domestic and gender violence; health and disabilities; adult, youth, & child immigration; and ecology and the environment. (Cross-listed with SPAN 3050).

Prerequisite(s): SPAN 3010 or SPAN 3030

LLS 3070 GEOGRAPHY OF LATIN AMERICA (3 credits)

This course surveys the physical and human environments of Latin America. Emphasis is placed upon cultural factors in the use of land and Latin American development. (Cross-listed with GEOG 3070).

Prerequisite(s): LLS 1000 or instructor approval

LLS 3140 LATINO/-A POLITICS (3 credits)

This course introduces students to the dynamism and growth of the role of Latinos, as a group of political actors, in the United States. This course provides students with an exposure to and understanding of various concepts and dimensions of this phenomenon, including historical and contemporary Latino political thought and the efforts to increase political empowerment (representation and participation) and influence through grassroots, social, and political movements. (Cross-listed with PSCI 8145, PSCI 3140, LLS 8145)

Prerequisite(s): PSCI 1100 is recommended.

Distribution: U.S. Diversity General Education course

LLS 3420 LATIN AMERICAN CIVILIZATION (3 credits)

What do we know about Latin American culture, geography, politics and languages? How has Latin America been imagined from the United States? Does it make sense to think of Latin America as one space brought together by a similar history or is it better to imagine it as twenty particular countries with intersecting pasts and futures? This course will attempt to answer these questions by introducing you to a number of key topics and debates common to contemporary Latin American culture, including issues such as democracy, class, race/ethnicity, gender/sexuality, religion, family and globalization. (Cross-listed with SPAN 3420).

Prerequisite(s): SPAN 3030 or SPAN 3010, LLS 1000 or instructor approval.

LLS 3510 IMMIGRATION LAW AND LATINOS (3 credits)

This course provides an overview of the U.S. Immigration laws with an emphasis on Latino migration. In analyzing Latino migration, we will look at the push and pull factors of migration, the channels available for lawful migration, and the impact immigrants have in our society. (Cross-listed with PSCI 3510).

Prerequisite(s): Must have taken at least one social science course as well as a different LLS course, junior standing or above, or permission of the instructor.

LLS 3680 GOVERNMENT AND POLITICS OF LATIN AMERICA (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Latin America. (Cross-listed with LLS 8685, PSCI 3680, PSCI 8685)

Prerequisite(s): PSCI 2500 or junior status or permission of instructor.

Distribution: Global Diversity General Education course

LLS 4140 INTRODUCTION TO LATIN AMERICAN FILM (3 credits)

The course will be a thematic study of significant Latin American films emphasizing and further investigating their relationship to history, culture, society and political issues that have often given rise to social movements. Films from a variety of Spanish-speaking countries including Mexico, Argentina, Chile, Cuba, Bolivia, etc. will be studied in their socio-political context. At the 8146 level, students will be introduced to theoretical approaches such as early film theory, montage theory, feminist theory, race theory, and phenomenological film theory in order to deepen their understanding these themes. (Cross-listed with SPAN 8146, SPAN 4140).

Prerequisite(s): SPAN 3030 or SPAN 3010, SPAN 3040 or SPAN 3020, SPAN 3060

LLS 4170 INTRODUCTION TO LATIN AMERICAN LITERATURES (3 credits)

The course is intended as an introduction to the study of canonical and non-canonical texts in Latin American literatures, from the 16th to 21st centuries. It seeks to acquaint students with the rich literary traditions of a large region, from South America to Central America and Mexico, as well as with the historical challenges posed by the salient heterogeneity of texts included in the Latin American corpus, from the standpoint of ethnicity, gender, social class, and literary genre. The course also focuses on continuing to develop Spanish language skills, specifically reading for comprehension and interpretation of metaphorical meaning, writing, and presentational speaking skills in Spanish. (Cross-listed with SPAN 8176, SPAN 4170).

Prerequisite(s): SPAN 3030, SPAN 3040; or SPAN 3010, SPAN 3020; SPAN 3060.

LLS 4240 SOCIAL TRANSFORMATIONS IN LATIN AMERICA (3 credits)

The course reviews the main social, economic, and political forces that have shaped Latin American societies, and the sociological theories used to understand Latin American development and underdevelopment. Race, ethnicity, gender and class in Latin America, as well as the region's position in the global economy are examined. (Cross-listed with SOC 8246, SOC 4240, LLS 8246).

Prerequisite(s): Must have taken at least one social science course as well as a different LLS course, junior standing or above, or permission of the instructor.

Distribution: Global Diversity General Education course

LLS 4250 CRISSCROSSING THE CONTINENT: LATIN AMERICAN MIGRATIONS (3 credits)

In this course we will use an interdisciplinary lens to study the changes and continuities of migration in the Americas. The course starts with an overview of immigration to the Americas during the first era of mass migration (1850-1920) to explore the relevance of European migrations for national and identity constructions in the Southern Cone of America. Students then will be introduced to the impacts of social and political change on emigration flows, both regionally and beyond the region. They will also explore migration related policies at the national and regional level. We will also study the changes and continuities in the migration system of the Americas. Lastly, we will analyze the new North-South migration, as well as immigration to Latin America from Asia (recent and historical), Europe, and Africa. (Cross-listed with SOC 4250, SOC 8256, LLS 8256).

Prerequisite(s): Must have taken at least one social science course as well as a different LLS course, junior standing or above, or permission of the instructor.

Distribution: Global Diversity General Education course

LLS 4280 INTERNATIONAL RELATIONS OF LATIN AMERICA (3 credits)

Analysis of the role of Latin American states in the international political arena. Emphasis upon developing, applying and testing an explanatory theory of international politics through the study of the inter-American system: the regional, institutional and ideological environment, power relations, policies and contemporary problems. (This course fulfills the department's international politics requirement). (Cross-listed with LLS 8286, PSCI 4280, PSCI 8286)

Prerequisite(s): PSCI 2500 or junior standing or permission of the instructor.

Distribution: Global Diversity General Education course

LLS 4430 INTERNATIONAL MIGRATION, DEVELOPMENT AND CITIZENSHIP (3 credits)

The course examines the forces driving contemporary global migration, the impact of migration in both sending and receiving nations' development, as well as the politics and practices of migration policy development. The course also discusses the current debates on immigrant incorporation and citizenship in the receiving countries. (Cross-listed with LLS 8436, CACT 8436).

Prerequisite(s): Must have taken at least one social science course as well as a different LLS course, junior standing or above, or permission of the instructor.

LLS 4510 ILLNESS AND DISEASE IN SOUTHERN CONE LATIN AMERICAN LITERATURES AND CULTURES (3 credits)

The course will examine representations of illness, disease, and affections in literary and cultural texts from the Latin American Southern Cone, focusing in Argentina, Uruguay, and Chile. It will explore notions of health and disease, as embedded in literary and cultural texts from the late 19th to the 21st centuries. We will examine the ways in which physical ailments, mental health symptoms, and other conditions or disorders have been conceptualized and portrayed, co-relating the individual "disruptions" caused by unwellness with a host of social and cultural factors. The course will also explore current treatments and therapies for the illnesses discussed in the texts, taking into account the integration of western and alternative medicine and practices. (Cross-listed with SPAN 8516, SPAN 4510, LLS 8516).

Prerequisite(s): LLS 1000; SPAN 3030 and SPAN 3040 or SPAN 3010 and SPAN 3020; SPAN 3060; or special permission from instructor.

LLS 4650 SLAVERY AND RACE RELATIONS IN THE AMERICAS (3 credits)

Slavery and Race Relations in the Americas examines the historical relationship between the trans-Atlantic slave trade and American race relations, connecting the enslavement of Africans in the Americas to race relations in the Caribbean, Latin America, and the United States. (Cross-listed with BLST 8656, BLST 4650, HIST 8076, HIST 4070, LLS 8656).

Prerequisite(s): LLS 1000, junior standing, or instructor permission

LLS 4780 URBAN LATIN AMERICA (3 credits)

This course examines the experience of Latin American urbanization, attending to its contributions to urban sociology, social movements, and policymaking. Topics include urban transitions (e.g. pre-Hispanic to colonial, post-colonial to industrial, and the neoliberal turn), socio-spatial configurations (e.g. plazas, squatter settlements), urban marginality debates, urban politics, and planning as well as governance innovations (e.g. bus rapid transit systems, participatory budgeting). Students will compare city case studies across the region and to urban life in the United States. (Cross-listed with SOC 4780, SOC 8786, LLS 8786, CACT 8186).

Prerequisite(s): Must have taken at least one social science course as well as a different LLS course, junior standing or above, or permission of the instructor

Distribution: Global Diversity General Education course

LLS 4900 INDEPENDENT STUDY (3 credits)

This course is designed for those students who are capable of pursuing, independently, an area of Latino/Latin American Studies that is not covered under the existing curriculum. The student will be supervised by a member of the faculty of the LLS department. All course assignments, requirements, and expectations will be clearly indicated in advance. May be repeated for credit, up to six hours, under a different topic.

Prerequisite(s): Permission of LLS faculty member required.

LLS 4950 LATIN AMERICAN STUDY ABROAD (3 credits)

This course is designed as an international study abroad course that will introduce undergraduate and graduate students to the dynamism of socio-cultural, economic, and political changes taking place across Latin America. Note: International travel and special fees required. (Cross-listed with LLS 8956, INST4950)

Prerequisite(s): Senior standing or Junior standing with permission of the department. LLS 1000 or LLS 1010 or equivalent and departmental permission.

Law and Society (LAWS)

Law and Society Undergraduate Courses

LAWS 2000 SPECIAL TOPICS IN LAW AND SOCIETY (3 credits)

This special topics course will address specific topics which will vary by semester and is intended primarily for upper division business students who are pursuing a Legal Studies concentration.

LAWS 3000 INTRODUCTION TO THE LEGAL PROFESSION (1 credit)

This course provides experiences and assignments designed to enhance understanding of the legal system, legal education, law school admissions processes, legal career opportunities, legal analysis, the legal profession, and the law school experience.

LAWS 3170 ETHICS IN BUSINESS (3 credits)

Application of ethical concepts and principles to moral issues in business including corporate responsibility, discrimination, advertising, competition, whistle-blowing, trade secrets, multinationals, environment, workers' rights, government regulation, investment, bribes, product liability, and consumerism.

Prerequisite(s): ECON 2200 and ECON 2220.

LAWS 3460 REAL ESTATE LAW (3 credits)

Upper-level survey course in real estate law, which examines estates in land, conveyances, leases, mortgages, easements, zoning, environmental law, contracts, taxes, foreclosures, landlord-tenant relations, agency, Fair Housing, and Nebraska License Law. (Cross-listed with RELU 3460)

Prerequisite(s): RELU 2410 or RELU 3410.

LAWS 3930 BUSINESS LAW FUNDAMENTALS (3 credits)

LAWS 3930 introduces students to the legal system governing business transactions. This course emphasizes constitutional law, the Common Law, and relevant statutory law. The legal topics covered include litigation and ADR, torts, contracts, Sale of Goods, insurance, international law, and regulation of business.

Prerequisite(s): ENGL 1160, CMST 1110, ECON 2200, & MGMT 3200 or MKT 3200 all with 'C'(2.0) or better, 2.5 GPA.

LAWS 3940 LEGAL AND ETHICAL APPLICATIONS (3 credits)

LAWS 3940 exposes students to business organization law and ethics. Emphasis is on business organizations (e.g., agency, partnerships, corporations), financial transactions (e.g., checks, liens, securities), and property (e.g., environment, intellectual). Ethics is a discrete subject area studied and its analytical tools are applied to all of these areas of law.

Prerequisite(s): LAWS 3930 and ACCT 2020 both with C+ (2.3) or better; 2.5 GPA

LAWS 4220 LEGAL ISSUES IN MANAGEMENT (3 credits)

This course provides an overview of the general nature of legal knowledge in human resources administration. The course is designed to alert students of the legal considerations when an employer-employee relationship is established. Discusses how human resource practices have been impacted by recent legal developments, anti-discrimination laws, affirmative action and labor relations.

Prerequisite(s): MGMT 3490 and MGMT 3510 or MGMT 4030 with a C (2.0) or better, and a 2.5 GPA, or permission of instructor.

LAWS 4410 DIVERSITY, EQUITY, ACCESS AND INCLUSION SOLUTIONS FOR MINIMIZING RISK (3 credits)

This course provides students an opportunity to explore the various aspects of power, access, and equity as it relates to the business environment. Students will explore tensions through the range of dimensions in which diversity is manifested among business leaders, staff, and stakeholders (include anyone impacted by business decisions, such as: employees, contractors, suppliers, customers, and the community) through policies, systems, histories, structures, and legislation. Students will have the opportunity to learn differences that individuals bring to a business environment and how stakeholders can capitalize on those differences by creating long-term inclusive environments. (Cross-listed with BSAD 8416).

Prerequisite(s): Junior standing or permission from the instructor. Not open to non-degree graduate students.

LAWS 4500 SPECIAL PROBLEMS IN LAW AND SOCIETY (1-6 credits)

Individual investigation of specific problems in the field of business law. (Fall, Spring)

Prerequisite(s): Senior and permission of program chair.

LAWS 4510 LAW AND SOCIETY INTERNSHIP (1-3 credits)

Students engage in an applied experience in their concentration area to gain relevant industry experience and to practice the skills and concepts learned in the classroom. Student reports on the internship experience and an employer's evaluation of the student's performance are course requirements. LAWS 4510 may be taken for a maximum of 3 credits. (Fall, Spring, Summer)

Prerequisite(s): Permission of Department Internship Coordinator.

LAWS 4910 SEMINAR ON BUSINESS LAW (3 credits)

Contact the instructor since the content will vary from semester to semester, but will have a strong emphasis on current events. The course will focus on one aspect of relationship between government and business, and its related ethical and international law issues. A major student research project is included.

Prerequisite(s): LAWS 3930, ECON 2200, and ACCT 2020, or permission of department chair.

LAWS 4930 INTERNATIONAL BUSINESS LAW (3 credits)

This course is designed to inform students interested in international business transactions of the major legal principles governing international law, the major legal systems affecting the conduct of international business transactions, the domestic and foreign policies of the United States which affect business overseas, and foreign business inside American borders.

Prerequisite(s): LAWS 3930.

Management (MGMT)

Management Undergraduate Courses

MGMT 1200 INTRODUCTION TO MANAGEMENT (3 credits)

This course will introduce foundational management concepts including management functions, leadership, planning, decision-making, quality improvement, ethics and careers in management.

MGMT 1500 INTRODUCTION TO BUSINESS (3 credits)

This course is for students who are interested in gaining foundational knowledge in many aspects of the business world including economics, finance, marketing, management, and accounting.

Distribution: Social Science General Education course

MGMT 3100 MANAGEMENT INFORMATION SYSTEMS (3 credits)

This course covers a broad spectrum of knowledge and techniques in MIS. Students will be given the opportunity to relate how technology and systems are utilized to support managerial decision making, streamline business processes, and enhance general organizational efficiencies. Topics centering around IT planning, network computing, electronic commerce, and data/knowledge management are all used to instill the importance of leveraging information systems for strategic advantage.

Prerequisite(s): ACCT 2020, MGMT 3200 or MKT 3200, and MGMT 3490, each with a 'C' (2.0) or better, and a 2.5 GPA. Not open to non-degree graduate students.

MGMT 3410 INTRODUCTION TO SUPPLY CHAIN MANAGEMENT (3 credits)

Supply chain management is the design and management of business processes needed to turn raw materials from suppliers into products and services that meet the needs of the final customer. The goals of this course center around providing students with the foundations of supply chain management and effectively managing the flow of goods, information, and services to obtain sustainable competitive advantage within an industry. Students will develop critical thinking skills focused on business process analysis and the use of key performance indicators to determine operational efficiencies for all organization levels. (Cross-listed with SCMT 3410, MKT 3410).

Prerequisite(s): Sophomore standing; GPA of 2.0 or better; or by permission of instructor. Not open to non-degree graduate students.

MGMT 3490 MANAGING PEOPLE AND ORGANIZATIONS (3 credits)

In this course, students will delve into applying management concepts to the real-world and the dynamic interplay between individuals, groups, and broader organizational contexts. The course uses effective management practices and leadership styles mixed with knowledge of organizational structures and intricacies of human behavior to promote individual's confidence in skills areas such as communication, conceptualization, interpersonal problems, and decision-making. Students are exposed to current management trends and the importance of successful management in modern organizations.

Prerequisite(s): ENGL 1160 and MGMT 3200 or MKT 3200 each with a "C" (2.0) or above, and a 2.5 cumulative GPA.

MGMT 3600 BUSINESS ETHICS (3 credits)

Students will learn about the factors, opportunities and pressures that lead to ethical dilemmas, and will develop their understanding of foundations and processes that encourage and reward ethical decision making and behaviors. Lots of examples, sourced from case studies and current events will be provided. (Cross-listed with BSAD 3600, MKT 3600)

Prerequisite(s): Junior classification (minimum of 58 earned credit hours) with a minimum 2.5 cumulative GPA. Completion of MGMT 3200 or MKT 3200 with a minimum grade of "C" (2.0). Not open to non-degree graduate students.

MGMT 3800 CROSS-SECTOR COLLABORATIVE LEADERSHIP (3 credits)

The goal of PA 3800/MGMT 3800 is to prepare students to serve as collaborative leaders of cross-sector initiatives. Specifically, this course will prepare students for success in working collaboratively across private, nonprofit and public sector organizations while also enhancing their overall development as a leader. Examples of successful and unsuccessful cross-sector collaborations will be explored along with discussions of theories related to cross-sector collaboration. (Cross-listed with PA 3800).

Prerequisite(s): Permission from instructor or MGMT 3490 with a grade of C or higher or enrollment in the cross-sector collaborative leadership minor.

MGMT 4000 SPECIAL TOPICS IN MANAGEMENT (3 credits)

This special topic course will address specific topics of management that vary by semester. The course is intended primarily for upper division students who are pursuing a management and leadership, supply chain management, or human resources management concentration.

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA; or permission of instructor.

MGMT 4010 TOTAL REWARDS (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee compensation and benefits programs. Students will gain and utilize effective strategies for managing the single largest controllable expense for organizations; employee pay and benefits. The design of this course is most beneficial for students pursuing future careers in management and human resource professions. (Cross-listed with BSAD 8146).

Prerequisite(s): MGMT 3490 with a C or better and MGMT 4030 with a C+ or better and a 2.5 GPA; or permission of instructor

MGMT 4030 HUMAN RESOURCE MANAGEMENT (3 credits)

This course is a comprehensive review of the field of human resource management and its relevance to employees, managers, and organization stakeholders for goal achievement. The design of this course is structured to educate future managers and leaders on the importance of utilizing effective HR methods that comply with federal laws and the critical role of HR professionals in achieving the organization's positive workplace culture, competitive advantage, and overall success. (Cross-listed with BSAD 8136).

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA; or permission of instructor.

MGMT 4040 MANAGING BEHAVIOR IN ORGANIZATIONS (3 credits)

In this course students will learn the knowledge and skills necessary to effectively manage and lead others. The foundations of Organizational Behavior are explored through discussion, application, and analysis, to build connection to critical aspects of real-world scenarios. Students are equipped with the tools and resources to understand the decision-making process, on both the individual and organizational level, to shape behaviors of topics overweighing attitudes, motivation, leadership, employee engagement, group dynamic, and company culture.

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA; or permission of instructor. Not open to non-degree graduate students.

MGMT 4050 MANAGERIAL DECISION MAKING (3 credits)

This course will provide students with the opportunity to learn, understand, and apply techniques for effective individual and organizational problem solving. The students will interactively participate in generating, prioritizing and organizing their ideas in order to become better managerial decision-makers/problem solvers.

Prerequisite(s): MGMT 3490 with a C, or a 2.5 GPA, or permission of instructor

MGMT 4060 HEALTHCARE ANALYTICS FOR BUSINESS (3 credits)

This course will focus on the mixing of analytics and technology to develop key performance indicators that integrate and evaluate clinical, administrative, and financial performance. Concepts in this course explore the intersection of information management, performance metrics, data visualization, and result communication spanning across the healthcare ecosystem. Topics covering health outcome analysis, financial performance, developing analytic strategies, data quality and governance, and the four stages of actionable intelligence are all used to educate the advantages of leveraging analytics. (Cross-listed with BSAD 8066, SCMT 4060).

Prerequisite(s): MGMT 3490 or SCMT 3410; GPA of 2.5 or better; or by permission of instructor. Not open to non-degree graduate students.

MGMT 4090 MANAGING COLLABORATIVE ENGAGEMENT (3 credits)

This course will provide students with the opportunity to develop knowledge and strategies for leading teams, enhancing collaboration, building consensus, problem solving in teams, facilitating group processes, and designing collaborative workspaces. (Cross-listed with BSAD 8096, ACMP 4090, SCMT 4090)

Prerequisite(s): Junior standing or permission of instructor.

MGMT 4100 MANAGING CHANGE AND INNOVATION (3 credits)

This course is designed to increase students' understanding and knowledge of today's rapidly evolving business landscapes. Navigating through aspects of value creation, obtaining competitive advantage, adaptability, and managing resistance supports individuals' ability in influencing change management and innovating environments in many organizational settings.

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA; or permission of instructor.

MGMT 4110 STAFFING THE ORGANIZATION (3 credits)

This course is a comprehensive review of issues and techniques involved in the acquisition and management of a high quality and diverse workforce for optimal organizational effectiveness. Students pursuing future manager and human resource professions will benefit from practice utilizing effective strategies for recruiting, selecting, placing, and integrating new employees into an organization's workforce. (Cross-listed with BSAD 8166).

Prerequisite(s): MGMT 3490 with a C or better and MGMT 4030 with a C+ or better and a 2.5 GPA; or permission of instructor. Students are encouraged to take MGMT 4220 prior to taking this course.

MGMT 4120 TALENT DEVELOPMENT (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee training and development programs to optimize human capital effectiveness in modern organizations. The course is designed to enable future managers and human resource professionals to utilize effective strategies for assessing employee training needs and developing appropriate solutions to maximize talent utilization. (Cross-listed with BSAD 8156).

Prerequisite(s): MGMT 3490 with a C or better and MGMT 4030 with a C+ or better and a 2.5 GPA; or permission of instructor.

MGMT 4150 GLOBAL BUSINESS MANAGEMENT (3 credits)

The central objective of this course is to explore the unique opportunities and challenges that confront international managers as they navigate the complex and ever-changing global economic, political, legal, technological, and cultural environment. This course will particularly focus on people, values, and culture, better equipping students to both undertake an international career as well as effectively lead organizations with a culturally diverse workforce in any environment. (Cross-listed with BSAD 8236).

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA, or permission of instructor. Not open to non-degree graduate students.

MGMT 4220 EMPLOYMENT LAW (3 credits)

This course is a comprehensive review of the legal framework in human resource management practice. The course is designed to prepare future managers and human resource professionals for the myriad legal issues involved in the employer-employee relationship and what is required for effective compliance. (Spring)

Prerequisite(s): MGMT 3490 and MGMT 3510 or MGMT 4030 with a C (2.0) or better, and a 2.5 GPA; or permission of instructor.

MGMT 4230 LEARNING TO LEAD (3 credits)

The course provides an insight into the introduction of applied leadership concepts, qualities, and practices used to create effective leadership. The background of systemic decision-making processes and examples of actual leaders' problems, strategy approaches, and skill styles are used to challenge students to analyze their own leadership potential and effectiveness. Along with empowering individuals' leadership capabilities, this course explores psychological biases and obstacles that can influence the direction of leaders and their decision-making style.

Prerequisite(s): MGMT 3490 with a C or better, a minimum cumulative GPA of 2.5, or permission of instructor. Not open to non-degree graduate students.

MGMT 4330 PROJECT MANAGEMENT (3 credits)

This course focuses on the systemic exploration of planning and executing complex projects to create organizational success. Using a comprehensive understanding of principles, methodologies, and tools within project management, students will learn how to initiate critical processes, plan objectives and constraints, execute management and leadership, monitor budgets and development, and close outcomes of complex projects. Skills obtained from this course enhance individuals' ability to recognize, identify, and prioritize organizations' culture and structure to lead projects across various industries efficiently. (Cross-listed with SCMT 4330, BSAD 8336)

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA; or permission of the instructor. Not open to non-degree graduate students.

MGMT 4440 MANAGEMENT OF QUALITY AND PROCESS IMPROVEMENT (3 credits)

Major topics in this course include TQM, process reengineering, process improvement, and tools and techniques to formulate, change and implement these concepts in organizations. Students can develop their knowledge and skills to apply these concepts in organizations through the applied orientation of this course. (Cross-listed with SCMT 4440).

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA; or permission of instructor.

MGMT 4450 MANAGERIAL NEGOTIATION STRATEGIES (3 credits)

This course introduces students to the theory and practice of negotiation across various organizational settings. The ability to successfully negotiate an outcome is an important aspect of management and leadership.

Negotiation can be used to determine multiparty relationships, manage conflict resolution, and improve organizational outcomes. Using a combination of conceptual frameworks, roleplaying exercises, and debriefing opportunities, the design of this course is structured to help students understand the power and influence negotiation has over the successful outcomes of managers, leaders, and organizations. (Cross-listed with SCMT 4450, BSAD 8456)

Prerequisite(s): MGMT 3490 with a grade of C or above, at least a cumulative GPA of 2.5, or permission of instructor.

MGMT 4480 CORPORATE AND BUSINESS STRATEGY (3 credits)

This collaborative course is a comprehensive study of the analytical techniques and managerial tasks associated with analyzing, formulating, and implementing strategy in organizations. Connections between the functional business areas and how to create and maintain a competitive advantage, achieve growth, and drive long-term success are explored through contemporary readings, business cases, team projects, and computerized situations.

Prerequisite(s): Must be a graduating senior, have a declared major in BSBA program, 2.5 cumulative GPA, MGMT 3200 or MKT 3200, MGMT 3490, MKT 3310, FNBK 3250 with a "C" (2.0) or better.

MGMT 4500 SPECIAL PROBLEMS IN MANAGEMENT (1-3 credits)

This independent study course gives students an opportunity to complete a focused project in the field of management, human resource management, international business, supply chain management, or entrepreneurship under faculty supervision.

Prerequisite(s): MGMT 3490 with a C or better, 2.5 GPA; permission of program chair; junior/senior standing; must obtain agreement from a faculty member to supervise; submit completed Special Problems contract to MGMT Dept Chair. Forms in CBA advising office.

MGMT 4510 MANAGEMENT INTERNSHIP (1-3 credits)

Students can receive degree credit when engaging in part time employment with a business that is relevant to the management discipline. Work assignments are a valuable opportunity to gain practical experience and insight into various aspects of managerial roles within the workforce. Duties within the part time role must relate to general management (i.e., strategy, production/operations, project management, planning, organizing, leading, or controlling) and provide students with an environment to apply their academic knowledge to a professional setting. Combining both academic and professional atmospheres, students gain interpersonal development of leadership and build understanding of managerial responsibilities within organizations.

Prerequisite(s): MGMT 3490 with a C or better, a 2.5 GPA, and junior level standing; and permission of instructor.

MGMT 4520 HUMAN RESOURCES MANAGEMENT INTERNSHIP (1-3 credits)

Students can receive degree credit when engaging in part time employment with a business that is relevant to the human resources management discipline. Work assignments are a valuable opportunity to gain practical experience and insight into various aspects of HR managerial roles within the workforce. Duties within the part time role must relate to general HR management (i.e., staffing, training, employee relations) and provide students with an environment to apply their academic knowledge to a professional setting. Combining both academic and professional atmospheres, students gain interpersonal development of leadership and build understanding of HR managerial responsibilities within organizations.

Prerequisite(s): MGMT 4030 with a C+ or better, a 2.5 GPA, and junior level standing; and permission of instructor.

MGMT 4690 EMERGING TECHNOLOGY AND INNOVATION (3 credits)

This course equips entrepreneurially-minded students with a more complete range and vision of the viability of various startup opportunities (with a specific focus on innovative technologies and innovative business models). Students will become familiarized with the new and emerging technologies and innovations that define modern industries and product categories, as well as the various shifts in the way cutting-edge business gets done, regardless of industry. (Cross-listed with ENTR 4690, BSAD 8696).

Prerequisite(s): Junior standing or higher; 2.75 minimum GPA; or permission of instructor

MGMT 4720 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation. Concepts and techniques in innovation, entrepreneurship, and strategy will be used to aid students in the venture creation process. Important considerations impacting the viability of the venture post formation will also be explored. Practical real-world experimentation is the central component of the course and will help students to conceive, develop, and launch their own innovative ventures. (Cross-listed with BSAD 8726, ACMP 4720, ACMP 8256, ENTR 4720, MKT 4720).

Prerequisite(s): ENTR 3710 and junior standing or above or by instructor permission

MGMT 4960 CROSS-SECTOR COLLABORATIVE LEADERSHIP CAPSTONE (3 credits)

This is a capstone course that prepares students to be effective leaders in the 21st century. This course is the final leadership course in the Cross-Sector Collaborative Leadership minor. This minor requires a capstone project that encompasses the student's knowledge and training. It is designed to provide an applied service-learning opportunity for students. (Cross-listed with PA 4960).

Prerequisite(s): Must be completing either the Cross-Sector Collaborative Leadership Minor or the Cross-Sector Collaborative Leadership Concentration. Must have completed PA 3800/MGMT 3800. Not open to non-degree graduate students.

Marketing (MKT)

Marketing Undergraduate Courses

MKT 2210 SURVEY OF MARKETING (3 credits)

This course is designed for any student who has an interest in marketing and focuses on basic product and services marketing as well as digital and social media marketing.

MKT 3100 PROFESSIONAL SELLING (3 credits)

This course focuses on professional selling and relationship marketing principles and practices. A variety of personal and direct sales techniques, psychology, and application of personal communication theory will be applied. Role-plays and presentations will be utilized to help students learn and execute the sales process model.

Prerequisite(s): ENGL 1160 with 'C' (2.0) or better and GPA of 2.3 or better; or permission of instructor.

MKT 3200 BUSINESS COMMUNICATIONS (3 credits)

This course develops business communication skills such as selecting and using appropriate technologies for reaching intended audiences. Students will practice effective explanatory, narrative, persuasive, and investigative writing in the context of business communication.

Prerequisite(s): ENGL 1160 and CMST 1110, each with a grade of "C" (2.0) or better; 2.5 GPA.

Distribution: Writing in the Discipline Single Course

MKT 3310 PRINCIPLES OF MARKETING (3 credits)

An examination of marketing functions and the institutions which perform them, choice of criteria for marketing strategy decisions, marketing structural relationships, and the role of marketing in society.

Prerequisite(s): ECON 2200, MATH 1310 or MATH 1220, ENGL 1160, and MGMT 3200 or MKT 3200 all with 'C'(2.0) or better, and 2.5 GPA.

MKT 3320 CONSUMER BEHAVIOR (3 credits)

Consumers purchase, use, experience, and dispose of products and services as part of their consumption process. How and why consumers choose various brand options, form judgments about these brands, and decide which options to buy and/or re-buy are essential knowledge for marketing professionals. The course covers the psychological and social issues that guide consumption decisions. (Cross-listed with BSAD 8345).

Prerequisite(s): MKT 3310 with 'C+' or better; 2.5 GPA or better; or permission of instructor.

MKT 3340 OMNI CHANNEL MARKETING (3 credits)

This course is designed to provide students with an overview of the omnichannel marketing landscape. Omnichannel marketing focuses on creating a seamless shopping experience through the integration of multiple channels. Attention is paid to how modern-day retailers can create a holistic and highly personalized experience for customers.

Prerequisite(s): MKT 3310 with 'C+' or better; and GPA of 2.5 or better; or permission of instructor.

MKT 3350 MARKETING SERVICE PRODUCTS (3 credits)

This elective explores how intangibility forces customers to evaluate service products differently, creating more challenges for marketers. The course is based on the premise that financial benefits reward services that provide value to customers, and develops strategies for creating value.

Prerequisite(s): MKT 3310 with a 'C+' or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 3360 DIGITAL MARKETING COMMUNICATIONS (3 credits)

This course is designed to familiarize students with digital marketing concepts and applications. It provides a detailed understanding of relevant digital channels and platforms that companies use as part of their marketing mix. The course is structured to guide students through paid, earned, and owned digital media as part of a comprehensive digital marketing communications strategy. The course employs a mixture of lecture, discussion, simulation games, and sponsored consulting projects with real-world companies.

Prerequisite(s): MKT 3310 with 'C+' or better and GPA of 2.5 or better; or permission of instructor.

MKT 3370 SOCIAL MEDIA MARKETING (3 credits)

This course is designed to familiarize students with social media marketing concepts and applications. It provides a detailed understanding of relevant social media channels and platforms that companies use as part of their marketing mix. Students will apply their knowledge from class by completing several in-class exercises as well as graded assignments. The course employs a mixture of lecture, discussion, simulation games, and sponsored consulting projects with real-world companies.

Prerequisite(s): Completion of MKT 3310 with a C+ or better.

MKT 3380 INTERNATIONAL MARKETING (3 credits)

A study of the processes, procedures, characteristics and environments for goods and services in foreign market places. Reference is drawn to the theories and concepts of domestic marketing to appraise their applicability to international markets. Considerable attention is given to the features of the foreign market environments which both facilitate the marketing processes, inhibit them, and require strategies and tactics of accommodation.

Prerequisite(s): MKT 3310 with 'C+' or better; GPA of 2.5 or better.

MKT 3390 GRAPHIC DESIGN FOR MARKETERS (3 credits)

The course provides a hands-on introduction to the concepts and tools used in graphic design to create marketing communications. Material and assignments will focus on how design supports marketing communication strategy. Students will learn the principles and vocabulary of design, how to critique graphic design, and how to create basic print materials. Students will learn and practice the skills necessary to communicate with graphic designers and advertising professionals in order to successfully implement marketing strategies.

Prerequisite(s): MKT 3310 with 'C+' or better; 2.5 GPA or better.

MKT 3400 MARKETING INNOVATION (3 credits)

Product, service, and process innovation are essential drivers of firm performance. However, firms face considerable and complex challenges when bringing innovative ideas to life. For example, what marketing research methods should we employ to uncover vital consumer insights? How do these insights influence the development and launch of new products and services? What differentiated value are we delivering to our consumers? How do we successfully bring this new product or service to market? How does a brand's purpose and personality influence consumers' perceptions, purchase decisions, adoption, and engagement? This course will cover key marketing principles involved in the development and launch of new and innovative products and services - from conception to commercialization. Furthermore, we will explore how new-age technologies impact each stage of the development and launch processes. (Cross-listed with BSAD 8435).

Prerequisite(s): MKT 3310 with 'C+' or better; 2.5 GPA or better; or permission of instructor.

MKT 3410 INTRODUCTION TO SUPPLY CHAIN MANAGEMENT (3 credits)

Supply chain management is the design and management of business processes needed to turn raw materials from suppliers into products and services that meet the needs of the final customer. The goals of this course center around providing students with the foundations of supply chain management and effectively managing the flow of goods, information, and services to obtain sustainable competitive advantage within an industry. Students will develop critical thinking skills focused on business process analysis and the use of key performance indicators to determine operational efficiencies for all organization levels. (Cross-listed with SCMT 3410, MGMT 3410).

Prerequisite(s): Sophomore standing; GPA of 2.0 or better; or by permission of instructor. Not open to non-degree graduate students.

MKT 3600 BUSINESS ETHICS (3 credits)

Students will learn about the factors, opportunities and pressures that lead to ethical dilemmas, and will develop their understanding of foundations and processes that encourage and reward ethical decision making and behaviors. Lots of examples, sourced from case studies and current events will be provided. (Cross-listed with BSAD 3600, MGMT 3600).

Prerequisite(s): Junior classification (minimum of 58 earned credit hours) with a minimum 2.5 cumulative GPA. Completion of MGMT 3200 or MKT 3200 with a minimum grade of 'C' (2.0). Not open to non-degree graduate students.

MKT 3610 BUSINESS TO BUSINESS MARKETING (3 credits)

This course examines the decisions involved in marketing goods and services to the industrial buyer as opposed to the consumer buyer. Buyer motivation, promotion decisions, channel decisions, product development and pricing policies involved in the marketing of industrial goods are considered.

Prerequisite(s): MKT 3310 with 'C+' or better; 2.5 GPA or better; or permission of instructor

MKT 4000 SPECIAL TOPICS IN MARKETING (3 credits)

This special topics course will address specific topics which will vary by semester and is intended primarily for upper division students who are pursuing a marketing or sales concentration.

Prerequisite(s): MKT 3310 plus 6 hours of Marketing, all with 'C+' or better; GPA of 2.5 or better; or permission of instructor.

MKT 4200 CONSULTATIVE SELLING PRINCIPLES (3 credits)

The primary focus of the Consultative Selling Principles course is to develop the behaviors, methodologies, principles, and processes required to successfully lead and manage complex selling initiatives to a win-win close. The course examines and applies, through role playing and other activities, the critical relationship building, critical thinking, problem solving, listening and negotiating capabilities which are the foundation skills underlying consultative selling. (Cross-listed with BSAD 8206)

Prerequisite(s): MKT 3310 with 'C+' or better; MKT 3100 with C+ or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4210 SELLING FINANCIAL SERVICES (3 credits)

Selling Financial Services concentrates on methods to effectively sell services and products in the financial services industry, including the banking, brokerage and insurance sectors. Targeting, initiating, and acquiring client relationships, expanding business opportunities, and maintaining long-term client relationships are the course's focal points. This integrative course is designed to provide students with a basic understanding of the selling profession and sales culture within the financial services industry. (Cross-listed with BSAD 8216, FNBK 4210).

Prerequisite(s): MKT 3310 with a C+ or better grade and 2.5 GPA. Not open to non-degree graduate students.

MKT 4220 GLOBAL STRATEGIC ACCOUNT MANAGEMENT (3 credits)

Throughout this course, the management of strategic account programs at national, multi-country, and global levels will be addressed. The primary focus of the curriculum is on the critical success factors for driving revenue, sustainable long term-growth and profitability with a base of core strategic buyers. (Cross-listed with BSAD 8226)

Prerequisite(s): Senior or graduate student standing and permission of the instructor. Not open to non-degree graduate students.

MKT 4300 MARKETING MANAGEMENT (3 credits)

This case study course examines product, price, promotion and channel of distribution policies. Major emphasis is placed on analysis of marketing problems and the facets of making marketing decisions.

Prerequisite(s): MKT 3310 with grade of 'C+' or better plus 6 hours of marketing, all with 'C' (2.0) or better, senior standing; GPA of 2.5 or better; or permission of instructor.

MKT 4320 SALES MANAGEMENT (3 credits)

The student will be exposed to current research findings in sales management and to business cases and simulations where sales management theories and concepts will be applied. This course will prepare students to develop and implement specific compensation, motivation, and evaluation strategies for managing sales professionals across a wide variety of organizations. (Cross-listed with BSAD 8326).

Prerequisite(s): MKT 3310 with 'C+' or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4340 MARKETING RESEARCH (3 credits)

Application of analytical tools to marketing problems including markets, products, distribution channels, sales efforts and advertising. Emphasis on planning, investigation, collection, interpretation of data and presentation of results.

Prerequisite(s): MKT 3310 with 'C+' or better; BSAD 2130 or BSAD 3140 or BSAD 3160 with 'C' (2.0) or better; GPA of 2.5 or better; or permission of instructor.

MKT 4360 E-MARKETING (3 credits)

This course focuses on utilizing the Internet as a marketing platform. Course content includes discussion of how the Internet is used by businesses for designing products, pricing, promotions, distribution, positioning, gathering information, and cultivating relationships with stakeholders. The discussion about the rise of social media, sharing economy, virtual reality devices, and other relevant trends will also be part of the course. (Cross-listed with BSAD 8366).

Prerequisite(s): MKT 3310 with 'C+' or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4370 MARKETING ANALYTICS (3 credits)

This course focuses on the application of data analytics in marketing decision making (e.g., segmentation, sales forecasting, and resource allocation). Students will learn to apply statistics and econometrics to solve marketing problems. Key topics in this course include marketing data visualization, marketing metrics, descriptive and predictive analytics, and digital marketing analytics. This course takes a very hands-on approach with real-world databases and equips students with tools that can be used immediately on the job. (Cross-listed with BSAD 8396).

Prerequisite(s): MKT 3310 with 'C+' or better; BSAD 2130 or BSAD 3140 or BSAD 3160 with 'C' (2.0) or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4380 INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT (3 credits)

This course will focus on the strategic procurement of products and services in order to gain a competitive advantage through integrated supply management. Students will learn about strategic supply management, contract negotiation, and supplier quality management. Students will develop an understanding of supplier performance management through the use of supply chain information systems. (Cross-listed with SCMT 4380, BSAD 8386.)

Prerequisite(s): SCMT 3410; GPA of 2.5 or better; or by permission of instructor. Not open to non-degree graduate students.

MKT 4420 BUSINESS DEMOGRAPHICS (3 credits)

The goal of this course is to develop a demographic perspective in order to assist in understanding the business environment and business policy. How population change impacts consumer markets and all of the functions (for example, accounting, finance and management) that must exist for these markets to perform. Includes a history of population change and policy as well as a view toward international population considerations. (Cross-listed with BSAD 8426).

Prerequisite(s): MKT 3310 with 'C+' or better; GPA 2.5 or better, Junior Standing; or permission of instructor. Not open to non-degree graduate students.

MKT 4500 SPECIAL PROBLEMS IN MARKETING (1-3 credits)

This course consists of an individual investigation of specific marketing topics under the supervision of a faculty member and could include readings, independent research, and a written research paper.

Prerequisite(s): Principles of Marketing (MKT 3310) with minimum C+ or permission of instructor.

MKT 4510 MARKETING INTERNSHIP (1-3 credits)

Students engage in part time employment in the marketing discipline to gain relevant business experience and to practice the skills and concepts learned in the classroom. Work assignment must encompass duties related to general marketing or a specialization within the domain (i.e. selling, social media, advertising, market research).

Prerequisite(s): MKT 3310 with a C+ or better, a 2.5 GPA, and junior level standing; and permission of instructor.

MKT 4540 SUPPLY CHAIN MANAGEMENT INTERNSHIP (1-3 credits)

Students engage in part-time employment in supply chain management to gain relevant business experience and to practice the skills and concepts learned in the classroom. Work assignment must encompass duties related to the field of supply chain management (i.e., purchasing, scheduling, supplier relations, materials management, or logistics). (Cross-listed with SCMT 4540)

Prerequisite(s): MKT-MGMT 3410 Sustainable Supply Chain Management and GPA of 2.5 or better; or by permission of the instructor. Not open to non-degree graduate students.

MKT 4720 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation. Concepts and techniques in innovation, entrepreneurship, and strategy will be used to aid students in the venture creation process. Important considerations impacting the viability of the venture post formation will also be explored. Practical real-world experimentation is the central component of the course and will help students to conceive, develop, and launch their own innovative ventures. (Cross-listed with BSAD 8726, ACMP 4720, ACMP 8256, ENTR 4720, MGMT 4720).

Prerequisite(s): ENTR 3710 and junior standing or above or by instructor permission

MKT 4760 SELLING IN AN ENTREPRENEURIAL CONTEXT (3 credits)

Successful entrepreneurs are able to identify unmet needs in the marketplace and then design and sell products or services that fulfill those needs. Sales effectiveness is essential for entrepreneurs because they must be able to build sustainable sales pipelines that ensure profitable growth while simultaneously addressing other pressing issues including financing, staffing, and product development. This course will focus on consultative solution-based sales fundamentals that can be applied in an entrepreneurial selling environment. (Cross-listed with ENTR 4760, BSAD 8766)

Prerequisite(s): GPA 2.5 or better; MKT 3100 with a "C+" or better; MKT 3310 with a "C+" or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4800 HONORS STUDIES IN MARKETING (3 credits)

A comprehensive examination of marketing as it is practiced among firms representing different industrial sectors. Course objectives include individual inquiry, theoretical applications and limitations, and an increased academic understanding of the discipline of marketing. Only grades 'B' and above will be awarded. Students exhibiting performance below the 'B' level will receive an 'F' for the course. Admission to this course is by invitation only.

Prerequisite(s): Permission of instructor. Senior standing, 3.2 GPA or above, declared business college specialization in MKT or BFIN or MGMT or communications (journalism, PR or broadcasting). Not open to non-degree graduate students.

Mathematics (MATH)

Mathematics Undergraduate Courses

MATH 1100 DATA LITERACY AND VISUALIZATION (3 credits)

Designed to help students become familiar with different types of data that are available in business, non-profit and governmental organizations. Students will learn basic data organization and manipulation as well as appropriate visualization techniques including charts, maps, and dashboards using cutting edge software tools. Students will apply this knowledge and skills to real-world data and develop skills in presentation of research results, strategic decision making and forecasting analysis. (Cross-listed with STAT 1100).

Distribution: Math

MATH 1120 INTRODUCTION TO MATHEMATICAL AND COMPUTATIONAL THINKING (3 credits)

This course embraces the visual arts to introduce students to the foundational elements of mathematical and computational thinking. Visual patterns form the basis for explorations in arithmetic and geometric sequences, from which algebraic functions and corresponding functions in computer programs are reasoned.

Distribution: Math

MATH 1130 QUANTITATIVE LITERACY (3 credits)

Designed to equip students with the mathematical, statistical, and computational skills necessary to explore real-life situations. Students will learn and practice critical-thinking and problem-solving skills needed to use quantitative information to make responsible decisions in a variety of areas such as finance, health, and the environment.

Distribution: Math

MATH 1140 QUANTITATIVE REASONING FOR HEALTHCARE PROFESSIONALS (3 credits)

This course prepares students with the basic mathematical skills required for nursing programs. Topics include: fractions, decimals, percentages, ratios, conversions between measurement systems, dimensional analysis, formulating dosages and flow rates, interpreting drug orders, and nutritional analyses.

Distribution: Math

MATH 1210 INTERMEDIATE ALGEBRA (3 credits)

This course is designed to prepare students to be successful in MATH 1220, MATH 1300, and STAT 1530. Topics include simplifying mathematical expressions, the properties of equality, solving linear equations in one variable, using linear equations to solve problems, fractions, ratios and proportions, graphing and the rectangular coordinate system, relations and functions, systems of linear equations and inequalities in two variables, polynomial expressions and functions, factoring and solving polynomial equations. Credit earned in MATH 1210 will not count toward degree requirements.

MATH 1220 COLLEGE ALGEBRA (3 credits)

This course presents properties of real numbers, linear equations and graphing, systems of equations, linear inequalities, polynomials, algebraic fractions, exponents, logarithms, and an Introduction to Statistics. This course is designed to prepare students to be successful in MATH 1320 or MATH 1370. Students who have passed MATH 1310 with a C- or better should not take this course.

Prerequisite(s): Within the last two years: ALEKS score at least 3, ACT Math at least 19, SAT Math at least 460, SAT2016 Math at least 500, Accuplacer at least 3, MATH 1210 C- or better or MATH 1220. Students who passed MATH 1310 (C- or better) should not take MATH 1220.

Distribution: Math

MATH 1300 COLLEGE ALGEBRA WITH SUPPORT (4 credits)

This course teaches prerequisite material and all College Algebra (MATH 1320) content; it is intended for students who need additional mathematics support. This course will cover polynomial functions, exponential functions, logarithmic functions, and modeling of natural phenomena using these kinds of functions. Discussion of functions will center around four representations: algebraic, graphic, tabular, and verbal. Particular emphasis will be placed on development of covariational reasoning. Support sections will include arithmetic and algebra content necessary to engage with polynomial functions, exponential functions, and logarithmic functions at the College Algebra level, such as properties of real numbers, linear equations, graphing functions, factoring polynomials, and quadratic functions.

Distribution: Math

MATH 1320 PRE-CALCULUS ALGEBRA (3 credits)

An advanced algebra course that teaches the following topics: algebraic operations, functions, graphs, linear and quadratic equations and inequalities, polynomial and rational functions, systems of equations, binomial theorem, complex numbers, exponentials, logarithms, sequences, series, and combinatorics.

Prerequisite(s): One of the following within the last two years: ALEKS score of at least 4, ACT Math at least 22, Math SAT at least 540, Math SAT2016 at least 570, Accuplacer score at least 4, MATH 1220 or MATH 1310 each with C- or better, or MATH 1320

MATH 1330 TRIGONOMETRY (3 credits)

This course introduces elements of plane trigonometry, including trigonometric and circular functions, inverse trigonometric functions, solutions of triangles, identities and conditional equations, vectors, and conic sections.

Prerequisite(s): One of the following within the last two years: ALEKS score at least 5, ACT Math at least 25, Math SAT at least 570, Math SAT2016 at least 590, Accuplacer at least 5, MATH 1320 or MATH 1300 with C- or better, or MATH 1330, or permission of instructor

MATH 1340 ALGEBRA AND TRIGONOMETRY FOR CALCULUS (5 credits)

A combined algebra and trigonometry course for science and engineering students planning to enroll in MATH 1950. Topics include: systems of equations, polynomials and rational functions, exponential and logarithmic functions, trigonometric functions and their inverses, trigonometric identities and applications, conic sections, and complex numbers. Credit for both MATH 1320/MATH 1324 and MATH 1340, or both MATH 1330 and MATH 1340 will not be given.

Prerequisite(s): One of the following within the last two years: ALEKS score of at least 4, ACT Math at least 23, Math SAT at least 540, Math SAT2016 at least 570, Accuplacer at least 5, MATH 1310 or MATH 1220 C- or better, or MATH 1340

MATH 1370 APPLIED ALGEBRA AND OPTIMIZATION WITH DATA ANALYSIS (3 credits)

This is an applied algebra course with optimization, teaching the following topics with an emphasis on data analysis and application: algebraic, exponential, and logarithmic functions; derivatives and applications thereof; and data analysis. The course will emphasize data analysis and applications of covered topics in order to demonstrate the relevance of mathematics to solving real-world problems.

Prerequisite(s): One of the following within the last two years: ALEKS score 4+, ACT Math sub score 23+, SAT Math 540+, SAT2016 Math 570+, Accuplacer 4+, MATH 1220/MATH 1300/MATH 1320 with C- or better, or MATH 1370, or permission of instructor

MATH 1930 CALCULUS FOR THE MANAGERIAL, LIFE, AND SOCIAL SCIENCES (3 credits)

Topics covered include functions, limits, derivatives, integrals, and applications. Trigonometry is not required. May not be used as a prerequisite for MATH 1960. Credit will not be granted for both MATH 1930 and 1950.

Prerequisite(s): One of the following within the last two years: ALEKS score 5+, ACT Math sub score 25+, Math SAT 570+, or Math SAT2016 590+, Accuplacer score 6+, MATH 1320 or MATH 1300 with C- or better, or MATH 1930, or permission of instructor

MATH 1940 CALCULUS FOR BIOMEDICINE (5 credits)

Introductory calculus with an emphasis on dynamical systems analysis applied to biological systems. Topics include differential and integral calculus, elementary chaos theory, discrete modeling, neural networks, and elementary differential equations, population dynamics, and biochemical signal transduction.

Prerequisite(s): One of the following within the last two years: ALEKS score at least 5, ACT Math sub score at least 25, Math SAT at least 570, Math SAT2016 at least 590, Accuplacer score at least 6, MATH 1320/MATH 1300 with C- or better; or permission of instructor

MATH 1950 CALCULUS I (5 credits)

This is a course in plane analytic geometry emphasizing the study of functions, limits, derivatives and applications, and an introduction to integration.

Prerequisite(s): One of the following within last two years: ALEKS score 6+, ACT Math 26+, Math SAT 590+, Math SAT2016 610+, Accuplacer 7+, MATH 1330/MATH 1340 C- or better; or permission of instructor. Prior enrollment in MATH 1950 cannot be used as prerequisite

MATH 1960 CALCULUS II (4 credits)

This course introduces applications of integration, techniques of integration, infinite sequences and series, parametric functions, and polar functions. A mathematical software package is introduced, with required assignments.

Prerequisite(s): MATH 1950 with a grade of C- or better or permission of instructor.

MATH 1970 CALCULUS III (4 credits)

This course presents vector functions, parametric equations, solid analytic geometry, partial differentiation, multiple integration, and an introduction to vector calculus. A mathematical software package is introduced with required assignments.

Prerequisite(s): MATH 1960 with a grade of C- or better, or MATH 1970 with a grade of F or better, or permission of instructor.

MATH 2030 DISCRETE MATHEMATICS (3 credits)

A foundation course in discrete mathematics for applied disciplines including computer science, computer engineering, or biology. Topics include: logic, sets, functions, induction and recursive definitions, elementary combinatorics, discrete probability, elementary chaos theory, elementary cellular automata, graphs, trees, matrices.

Prerequisite(s): MATH 1950 or MATH 1940 or MATH 1930, with a grade of C- or better.

MATH 2050 APPLIED LINEAR ALGEBRA (3 credits)

This course presents Matrix algebra, simultaneous equations, vector spaces, with applications of linear algebra and computational considerations. Mathematical software is utilized, with required assignments.

Prerequisite(s): MATH 1940 or MATH 1950 with a grade of C- or better

MATH 2200 MATHEMATICAL COMPUTING I (3 credits)

This is a first course in mathematical computing. It covers the basic elements of scientific programming in both a computer algebra system and a high-level programming language. Explored are implementation issues, problem description, model building, method development, and solution assessment.

Prerequisite(s): MATH 1950

MATH 2230 INTRODUCTION TO ABSTRACT MATH (3 credits)

This course provides a transition from the calculus to more abstract mathematics. Topics include logic, sets and functions, an introduction to mathematical proof, mathematical induction, relations. Important prerequisite material for a number of more advanced mathematics courses is studied.

Prerequisite(s): MATH 1960 or permission. Credit will not be given for both MATH 2030 and MATH 2230.

MATH 2350 DIFFERENTIAL EQUATIONS (3 credits)

Topics include solutions of linear and first-order nonlinear differential equations with applications, higher-order linear differential equations with applications, power series solutions, and Laplace transform methods.

Prerequisite(s): MATH 1960 with a grade of C- or better or permission of instructor.

MATH 3100 APPLIED COMBINATORICS (3 credits)

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with MATH 8105, CSCI 3100, CSCI 8105).

Prerequisite(s): MATH 2030, MATH 2040, MATH 2230, or CSCI 2030 all with a C- or better. Mathematical logic; Set theory; Relations; Functions; Congruences; Inductive and recursive definitions; Discrete probability; sets, graphs, trees, & matrices

MATH 3200 MATHEMATICAL COMPUTING II (3 credits)

This course is a second course in mathematical computing. It covers the design and development of algorithms and more advanced elements of programming in a mathematical context. The programming language Python will be used. The programming assignments are primarily based on data science and calculus concepts and are designed to reinforce and deepen the understanding of these concepts.

Prerequisite(s): CIST 1400 or MATH 2200, and MATH 1970 (the latter may be taken concurrently) all with a grade of C- or better.

MATH 2230 INTRODUCTION TO ANALYSIS (3 credits)

This course provides a theoretical foundation for the concepts of elementary calculus. Topics include real number system, topology of the real line, limits, functions of one variable, continuity, differentiation. (Cross-listed with MATH 8235).

Prerequisite(s): MATH 1960 and MATH 2230 each with a grade of C- or better.

MATH 3250 INTRODUCTION TO NUMERICAL METHODS (3 credits)

This course emphasizes the implementation of several numerical methods to problems that arise in science and engineering. It involves the application of the computer to solve mathematical problems using the following computational techniques: Taylor Series approximation, numerical differentiation, root-finding methods, interpolation, extrapolation, curve fitting, solution methods for matrix equations, numerical differentiation, numerical integration, and the solution of differential equations. (Cross-listed with MATH 8255).

Prerequisite(s): MATH 1960 with a C or better.

MATH 3400 THEORY OF INTEREST (3 credits)

A study of the measurement of interest, annuities, amortization schedules and other financial mathematics topics.

Prerequisite(s): MATH 1960 with a grade of C- or higher.

MATH 3640 MODERN GEOMETRY (3 credits)

This course will study the modern foundations of Euclidean and Non-Euclidean Geometry. Included will be a study of the principles of axiomatic systems. Euclidean Geometry will be investigated using Hilbert's axioms for Euclidean geometry (or another equivalent Euclidean geometry axiom set). Hyperbolic geometry will be encountered through the models of Klein and Poincare. Neutral geometry with Lambert and Saccheri quadrilaterals will be studied. Finite geometries and projective geometries will also be explored. (Cross-listed with MATH 8645).

Prerequisite(s): MATH 2230 with a grade of C- or better.

MATH 3850 HISTORY OF MATHEMATICS (3 credits)

An overview of the history of mathematics and famous mathematicians via studying and solving famous mathematical problems, exploring famous mathematical theorems, and studying the biographies of famous mathematicians. (Cross-listed with MATH 8855).

Prerequisite(s): MATH 1950 with a grade of C- or higher and one of either MATH 2230 or MTCH 2000 with a grade of C- or higher.

MATH 4010 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with CSCI 4010, CSCI 8016, MATH 8016).

Prerequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

MATH 4030 MODERN ALGEBRA (3 credits)

Algebra is the study of mathematical manipulations that preserve something (like equality - when solving equations). The areas in which Algebra finds application are quite diverse, from Ancient Greek Geometry through to Modern Information Protection and Security (error correcting codes, data compression, and cryptography). This course begins with topics that should be familiar (such as ruler-and-compass constructions, and modular arithmetic) and builds upon this foundation through polynomial rings up to finite fields and basic group theory. (Cross-listed with MATH 8036).

Prerequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better

MATH 4050 LINEAR ALGEBRA (3 credits)

Linear algebra is extensively utilized in the mathematical modeling of many natural phenomena. Many scientific and engineering disciplines, such as data science, chemical engineering and biology, make extensive use of the theory and techniques commonly present in basic to advanced linear algebra courses. The goal of this course is to help students to grasp a solid theoretical understanding of vectors, vector spaces, inner product spaces, linear transformations, eigenvalues, canonical forms, complex vectors, matrices, and orthogonality. By going through the materials in a mathematically rigorous way, students will develop deeper and more accurate intuitions of the basic concepts in linear algebra. Consequently, the applications of linear algebra will become much more transparent. (Cross-listed with MATH 8056).

Prerequisite(s): MATH 2050 with a grade of C- or better; MATH 2030 or MATH 2230 or equivalent with a grade of C- or better; or permission

MATH 4110 ABSTRACT ALGEBRA I (3 credits)

An introduction to group theory. Various classes of group are studied: symmetric groups, abelian, cyclic, and permutation groups. Basic tools are developed and used: subgroups, normal subgroups, cosets, the Lagrange theorem, group homomorphisms, quotient groups, direct products, and group actions on a set. The course culminates with the Sylow theorems in finite group theory. The theory is illustrated with examples from geometry, linear algebra, number theory, crystallography, and combinatorics. (Cross-listed with MATH 8116).

Prerequisite(s): MATH 4050/MATH 8056 with a C- or better or MATH 4560/MATH 8566 with a C- or better or permission of instructor

MATH 4120 ABSTRACT ALGEBRA II (3 credits)

An introduction to ring and field theory. Various classes of commutative rings are considered including polynomial rings, and the Gaussian integers. Examples of fields include finite fields and various extensions of the rational numbers. Concepts such as that of an ideal, integral domain, characteristic and extension field are studied. The course culminates with an introduction to Galois theory. Applications include the resolution of two classical problems: the impossibility of angle-trisection and the general unsolvability of polynomial equations of degree 5 or higher. (Cross-listed with MATH 8126).

Prerequisite(s): MATH 4110/MATH 8116 with a C- or better or permission of instructor

MATH 4150 GRAPH THEORY & APPLICATIONS (3 credits)

Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with MATH 8156, CSCI 4150, CSCI 8156).

Prerequisite(s): CSCI 2030 with a C- or better, or MATH 2030 with a C- or better, or MATH 2230 with a C- or better, or permission of instructor.

MATH 4200 NUMERICAL ANALYSIS (3 credits)

This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with MATH 8206, CSCI 4200, CSCI 8206).

Prerequisite(s): MATH 1970 and MATH 2050 and MATH 2350 with a C- or better or permission of instructor.

MATH 4230 MATHEMATICAL ANALYSIS I (3 credits)

Provides a theoretical foundation for the concepts of classical calculus.

Topics include ordered fields, the real and complex number system, basic metric space topology, numerical sequences and series, limits and continuity in metric spaces, monotonic functions, differentiation, (functions of several variables included). (Cross-listed with MATH 8236).

Prerequisite(s): MATH 3230/MATH 8235 with a grade of C- or better.

MATH 4240 MATHEMATICAL ANALYSIS II (3 credits)

Provides a theoretical foundation for the concepts of classical Calculus (vector calculus included). Topics include sequences and series of functions, uniform convergence, power series, Fourier series, multivariable real differential and integral calculus, the Implicit Function Theorem, integration of different forms, and the important formulas, connecting those integrals, due to: Green, Gauss, Riemann, and Ostrogradski. (Cross-listed with MATH 8246).

Prerequisite(s): MATH 4230/MATH 8236 with a grade of C- or better.

MATH 4270 COMPLEX ANALYSIS (3 credits)

This course is an introduction to the theory of functions of a complex variable, a fundamental area of mathematics with multiple applications to science and engineering. Topics include the field of complex numbers, complex differentiation, the complex contour integral and Cauchy's integral formula, Taylor expansions and analytic functions, conformal mapping and Riemann's conformal equivalence theorem, residue theory and Laurent series, harmonic functions, and applications. (Cross-listed with MATH 8276).

Prerequisite(s): MATH 3230/MATH 8235 with a grade of C- or better or permission of the instructor.

MATH 4300 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, CSCI 8306, MATH 8306).

Prerequisite(s): MATH 2050 with a C- or better or permission of instructor.

MATH 4310 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, CSCI 8316, MATH 8316).

Prerequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

MATH 4320 COMPUTATIONAL OPERATIONS RESEARCH (3 credits)

Survey of computational methods used in the solution of operations research problems. Some topics may include scripting to guide optimization software, constraint programming, heuristics and metaheuristics for optimization, basic machine learning algorithms, and simulation. (Cross-listed with MATH 8326, CSCI 4320, CSCI 8326).

Prerequisite(s): MATH 3200 or CSCI 1620, and MATH 4300 each with a grade of C- or better or permission of instructor.

MATH 4330 INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS (3 credits)

This course introduces the basic methods of PDEs guided by applications in physics and engineering. The main topics to be covered include The Linear First order PDEs, Transport equations, Characteristics, Classification of PDEs, Separation of variables, Heat conduction, vibrating membranes, boundary value problems, Maximum principle, Sturm-Liouville problems, Fourier series, Fourier integrals, Harmonic functions, Legendre polynomials, Distributions, Green's functions. (Cross-listed with MATH 8336).

Prerequisite(s): MATH 1970 with a C- or better and MATH 2350 with a C- or better, or permission of instructor; MATH 2050 recommended, not required.

MATH 4350 ORDINARY DIFFERENTIAL EQUATIONS (3 credits)

This course covers the theory of initial-, boundary-, and eigenvalue problems, existence theorems, real and complex linear systems of differential equations, and stability theory. There will be a strong emphasis on methods for finding solutions of initial and boundary value problems and analyzing properties of these solutions for various ordinary differential equations. (Cross-listed with MATH 8356).

Prerequisite(s): MATH 1970 with a C- or better, MATH 2050 with a C- or better, and MATH 2350 with a C-, or better or instructor's permission.

MATH 4400 THE FINITE ELEMENT METHOD (3 credits)

Introduction to finite elements methods for solving ordinary and partial differential equations. Theoretical foundations of finite element methods for boundary value problems, approximation by piecewise polynomial functions, variation formulation of partial differential equations, basic error estimates. The Rayleigh-Ritz-Galerkin method, convergence of approximations, time-dependent problems, error analysis, discretization and computer implementation, applications to problems in elasticity, heat transfer, and fluid mechanics. (Cross-listed with MATH 8406).

Prerequisite(s): MATH 1970, MATH 2050 and MATH 2350 all with a C- or better or instructor permission. MATH 3300/MATH 8305 and MATH 4330/MATH 8336 recommended. Students should be able to use a programming language (ie MATLAB) to complete computational assignments

MATH 4450 INTRODUCTION TO MACHINE LEARNING AND DATA MINING (3 credits)

This is an introduction to machine learning and data mining which covers the following topics with an emphasis on mathematical and statistical analysis: linear and nonlinear regression models, model selection and regularization methods, resampling methods, classification models, tree-based models, and unsupervised learning topics. If time allows, text mining and deep learning will also be introduced in the course. Statistical software will be used. (Cross-listed with MATH 8456, STAT 4450, STAT 8456)

Prerequisite(s): MATH 4740/8746 with a C- or better or STAT 3800/8805 with a C- or better or permission of instructor.

MATH 4560 NUMBER THEORY & CRYPTOGRAPHY (3 credits)

An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with MATH 8566, CSCI 4560, CSCI 8566).

Prerequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

MATH 4610 INTRODUCTION TO TOPOLOGY (3 credits)

This is a proof-oriented course presenting the foundations of topology. Metric spaces and general topological spaces are introduced. The course explores the properties of connectedness, compactness and completeness, and operations of Tychonoff product and hyperspace. (Cross-listed with MATH 8616).

Prerequisite(s): MATH 3230 with a C- or better or permission of instructor.

MATH 4620 ITERATED FUNCTION SYSTEMS AND FRACTALS (3 credits)

This is a proof-oriented course presenting the foundations of fractal geometry. It introduces students to the beauty, magic, and applications of fractals and iterated function systems, with emphasis on the mathematics behind it all. Topics range from contractions on hyperspaces and their fixed points to fractal dimensions to Julia and Mandelbrot sets. (Cross-listed with MATH 8626).

Prerequisite(s): MATH 4610 with a C- or better or permission of instructor.

MATH 4660 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)

This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, CSCI 8666, MATH 8666)

Prerequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

MATH 4740 INTRODUCTION TO PROBABILITY AND STATISTICS I (3 credits)

A mathematical introduction to probability theory including the properties of probability; probability distributions; expected values and moments; specific discrete and continuous distributions; and transformations of random variables. (Cross-listed with MATH 8746).

Prerequisite(s): MATH 1970 and either MATH 2230 or MATH 2030 all with a grade of C- or better or permission of instructor.

MATH 4750 INTRODUCTION TO PROBABILITY AND STATISTICS II (3 credits)

Theory and methods of statistical inference including sampling distributions, estimators, estimation, and statistical hypotheses. (Cross-listed with MATH 8756).

Prerequisite(s): MATH 4740/MATH 8746 with a grade of C- or better.

MATH 4760 TOPICS IN APPLIED MATHEMATICS (3 credits)

Selection of such topics such as dynamical systems and chaos, Boolean networks, modeling of discrete or continuous systems, matrix theory, difference equations, information theory, discrete events simulation and other approved by Upper Curriculum Committee. (Cross-listed with MATH 8766).

Prerequisite(s): MATH 3100/CSCI 3100 with a grade of C- or better, or permission of instructor.

MATH 4900 INDEPENDENT STUDIES (1-3 credits)

A variable credit course for the junior or senior who will benefit from independent reading assignments and research-type problems. As independent study courses are intended to enrich a student's regular academic program, they may not normally be taken as substitutes for scheduled classroom courses of the same nature. May be repeated for credit, up to six hours, under a different topic.

Prerequisite(s): Permission of the Upper Curriculum Committee of the Mathematics Department via submission of the Undergraduate Independent Study Form available on the Mathematics website.

MATH 4950 TOPICS IN THEORETICAL MATHEMATICS (3 credits)

This course introduces students to a specialized subject matter in the areas of theoretical mathematics not covered in existing courses. The course may be repeated for different topics up to a maximum of six credit hours. The specific topics will vary, depending upon when the course is offered. One example of a course is Axiomatic Set Theory. (Cross-listed with MATH 8956).

Prerequisite(s): Permission of Instructor.

MATH 4970 SEMINAR IN APPLIED MATHEMATICS (3 credits)

A seminar in Applied Mathematics, where the students would read and present research in applied math and write their exposition of those topics.

Prerequisite(s): MATH 3100/CSCI 3100 with a grade of C- or better, or permission of instructor.

MATH 4980 SEMINAR (3 credits)

A seminar in mathematics. This course introduces students to an important form of mathematical activity and culture, where a specialized mathematical subject matter (not covered in typical courses) is studied and discussed in a collaborative setting. The course may be repeated for different topics up to a maximum of six credit hours. The specific topics will vary, depending upon when the course is offered. One example of a seminar topic is Current Trends in Set Theory of the Reals.

Prerequisite(s): Permission of instructor.

Mathematics for Teachers (MTCH)

Mathematics for Teachers Undergraduate Courses

MTCH 2000 MATHEMATICS FOR ELEMENTARY TEACHERS I (3 credits)

This course builds the conceptual underpinnings behind the arithmetical reasoning typically taught in school curriculum. Topics include addition, subtraction, and multiplication of whole numbers and of rational numbers. The course aims to help students understand not just how to solve mathematical problems from a variety of approaches, but to understand the reasoning that make the approaches valid. The course is particularly useful for students who are planning on teaching mathematics at the K-6 level.

Prerequisite(s): Prerequisite(s): At least C in MATH 1120, MATH 1130, MATH 1140, MATH 1220, MATH 1300, STAT 1100 or STAT 1530 (or equivalent, or higher) OR ACT Math Sub-Score of 23+ or SAT 2016 Math of 570+, AND at least a C in either TED 2100 (EDUC 2020) or TED 2200

MTCH 2010 MATHEMATICS FOR ELEMENTARY TEACHERS II (3 credits)

This course builds the conceptual underpinnings behind the arithmetical reasoning and reasoning with data typically taught in school curriculum. Topics include division of whole numbers and of rational numbers, elementary study of number properties, measurement, probability and statistics. The course also teaches students how to use the Habits of Mind framework to improve mathematical problem-solving ability. The course aims to help students understand not just how to solve mathematical problems from a variety of approaches, but to understand the reasoning that make the approaches valid. The course is particularly useful for students who are planning on teaching mathematics at the K-6 level.

Prerequisite(s): MTCH 2000 with a grade of C or better.

MTCH 2020 NUMBER SENSE, ALGEBRA, AND GEOMETRY FOR MIDDLE SCHOOL EDUCATION (3 credits)

The course covers the following major concepts: standard algorithms for Arithmetic with rational numbers, proportional reasoning, number theory topics in K-8, beginning Algebra concepts, and beginning Geometry.

Prerequisite(s): TED 2100 (EDUC 2020) or TED 2200 (EDUC 2030) each with a C or better and College of Education major and MATH 1950 with a C or better. Not open to non-degree graduate students.

Mechanical Engineering (MECH)

Mechanical Engineering Undergraduate Courses

MECH 130 INTRODUCTION TO CAD (3 credits)

Principles and accepted practices of geometric design. Computer generation of 2D and 3D models for mechanical systems. Introduction to engineering design practices such as specifications, dimensioning and tolerancing.

MECH 200 ENGINEERING THERMODYNAMICS (3 credits)

First and Second Laws of Thermodynamics, properties of gases and vapors, and cycles. Sources of energy and its conversion to work.

Prerequisite(s): MECH 223. Not open to non-degree graduate students.

MECH 220 STATICS (3 credits)

Fundamental concepts, equilibrium of force systems, analysis of simple frames and trusses. Centroid and moments of inertia and friction.

Prerequisite(s): MATH 1950

MECH 223 ENGINEERING STATICS (3 credits)

The action of forces on engineering structures and machines. Force systems, static equilibrium of frames and machines. Friction, center of gravity, moment of inertia, vector algebra.

Prerequisite(s): MATH 1960 with grade of C or better and PHYS 2110 with grade of C or better

MECH 324 STRENGTH OF MATERIALS (3 credits)

Stress and strain analysis in elastic materials. Use of properties of materials in the analysis and design of welded and riveted connections, statically determinate and indeterminate flexure members, columns. Combined stresses, axial, eccentric and torsional loading. Observations of laboratory tests for axially loaded specimens. Introduction to shear and moment diagrams.

Prerequisite(s): MECH 220

MECH 325 MECHANICS OF ELASTIC BODIES (3 credits)

Concept of stress and strain considering axial, torsional and bending forces. Shear and moments. Introduction to combined stresses and column theory.

Prerequisite(s): MECH 223 (grade of C or better), and MATH 1970

MECH 373 ENGINEERING DYNAMICS (3 credits)

A study of force action related to displacement, velocity and acceleration of rigid bodies. Kinematics of plane motion, kinetics of translation and rotation. Mass moment of inertia, vibration, work, energy and power, impulse and momentum.

Prerequisite(s): MECH 223 (grade of C or better), and MATH 1970

MECH 399 UNDERGRADUATE RESEARCH AND THESIS (1-5 credits)

Engineering design or laboratory investigation that an undergraduate is qualified to undertake.

Prerequisite(s): Not open to non-degree graduate students.

MECH 491 SPECIAL TOPICS IN ENGINEERING MECHANICS (1-6 credits)

Treatment of special topics in engineering mechanics by experimental, computational and/or theoretical methods. Topics will vary from term to term. (Cross-listed with MECH 891).

MECH 498 RESEARCH (0-6 credits)

Faculty-supervised research. (Cross-listed with MECH 898).

MECH 891 SPECIAL TOPICS IN ENGINEERING MECHANICS (1-6 credits)

Treatment of special topics in engineering mechanics by experimental, computational and/or theoretical methods. Topics will vary from term to term. (Cross-listed with MECH 491).

MECH 898 RESEARCH (0-6 credits)

Faculty-supervised research. (Cross-listed with MECH 498).

MECH 999 DOCTORAL DISSERTATION (1-24 credits)

Doctoral dissertation

Prerequisite(s): Admission to doctoral degree program and permission of supervisory committee chair.

Medical Humanities (MEDH)

Medical Humanities Undergraduate Courses

MEDH 1000 INTRODUCTION TO MEDICAL HUMANITIES (3 credits)

This is an interdisciplinary survey course in Medical Humanities. It focuses on the contributions and perspectives of arts and humanities in providing a broad and culturally diverse understanding of health, illness, healing, and medicine.

Distribution: Humanities and Fine Arts General Education course

MEDH 2010 SYMBOLIC LOGIC (3 credits)

A first course in symbolic logic designed to introduce students to formal systems of sentential logic and predicate logic. The course explores the nature of both syntax (the formal structure of elements of language) and semantics (interpretive relations between language and subject matter including notions such as truth and reference). Students learn how to translate between English and formal languages, how to construct truth-tables and interpretations to test for key semantic properties, and how to construct derivations. In addition, students will consider the nature and relationships between important logical properties and explore foundational issues in logical metatheory. Throughout the course, students will encounter broad philosophical themes such as the purpose of language, constraints on translation, and nature of meaning itself. (The study of logic is also excellent preparation for the LSAT and the reasoning portions of other examinations for graduate study.) (Cross-listed with PHIL 2010).

MEDH 2030 HISTORY OF MEDICINE: FROM ANTIQUITY TO THE PRESENT (3 credits)

This course will cover the history of medicine and medical practices from the earliest civilizations to the present. In addition to this chronological scope, the course will also examine medical practices in cultures from across the world. (Cross-listed with HIST 2030).

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

MEDH 2060 ART AND SCIENCE OF MEDICAL DECISION-MAKING (3 credits)

The course explores multiple facets of medical decision-making, including the perspective of the patient, the family, and the healthcare provider. Topics include basic anatomy and medical terminology, which will be used to understand decision-making in the context of the provider. Students use literature and other records to generate and critically evaluate clinical decisions. The course does not satisfy requirements for degree programs in the Department of Biology minor, BA, BS in Biology; BS in Biotechnology. (Cross-listed with BIOL 2060).

Prerequisite(s): BIOL 1060 or concurrent.

MEDH 2100 EXPLORING MUSIC THERAPY AND ADAPTIVE MUSIC THERAPY (3 credits)

An exploratory introduction to music therapy and adaptive music in the rehabilitation and reorganization of human beings into social life, health, and wellbeing. A survey of the history of music therapy is included and with the processes and principles used by practicing music therapists. (Cross-listed with MUS 2100).

Prerequisite(s): Not open to non-degree graduate students.

MEDH 2300 BIOMEDICAL ETHICS (3 credits)

In the rapidly evolving fields of medicine and healthcare, ethical considerations play an ever-increasing role. This course is designed to equip students with the conceptual tools necessary for ethical reasoning and decision-making in medical contexts. This course investigates critical issues such as informed consent, end-of-life decisions, reproductive ethics, genetic testing, and research ethics. Ideal for students thinking about a career in healthcare, philosophy majors, medical humanities majors, or anyone interested in grappling with the complex ethical questions that accompany advancements in biomedical science and healthcare practice. (Cross-listed with PHIL 2300).

MEDH 3000 MEDICAL HUMANITIES COMMONS (3 credits)

A multidisciplinary study of a health-related topic from the perspective of medical humanities. Each semester the course will focus on a different topic or problem for exploration and inquiry. The course topic or problem is examined using disciplinary perspectives, interdisciplinary intersections, and translational opportunities.

Prerequisite(s): MEDH 1000 or Permission of the instructor.

MEDH 3450 PHILOSOPHY OF MEDICINE (3 credits)

This course considers a range of philosophical questions raised by and within the practice of medicine. The course begins with a conceptual investigation of the meaning of "health" from "illness." Is the classification of individuals as healthy or ill an objective, scientific matter? Or is it instead a matter of social and ethical values? What follows from answering this question one way, versus another? This introduction forms the backdrop against which we move on to investigate a range of further topics.

Examples of some of the topics that may be covered include: medical and social models of disability; the role morality of doctors and other medical providers; abortion, euthanasia, and conscientious objection in the healthcare professions; health measurement and quality of life; "death panels" and health resource rationing; conditions on appropriately voluntary and informed consent to medical procedures; and the ethics of biomedical research. (Cross-listed with PHIL 3450).

Prerequisite(s): 6 hours of Philosophy OR Sophomore status OR permission of the instructor

MEDH 4000 TOPICS IN MEDICAL HUMANITIES (3 credits)

This course introduces students to a specialized subject matter in the disciplines of medical humanities not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours. (Cross-listed with MEDH 8006).

Prerequisite(s): Junior standing or the permission of the instructor.

MEDH 4280 CLINICAL ETHNOGRAPHY (3 credits)

Using ethnographic texts, this course explores the clinical world from an anthropological perspective. Students will use anthropological theories and methods to learn about cultures of medical practices, diverse health professions, the contexts of health care delivery, and the structural, cultural, and historical forces that influence the practice of healthcare in the U.S. and cross-culturally. (Cross-listed with ANTH 8286, ANTH 4280).

Prerequisite(s): ANTH 1050 or MEDH 1000 or permission of the instructor.

MEDH 4900 CAPSTONE IN MEDICAL HUMANITIES (3 credits)

In this capstone course for students majoring in Medical Humanities, students will curate and complete their portfolio of educational experiences in the discipline. To integrate and apply their previous course work and experience, students will participate in a community-focused medical humanities project.

Prerequisite(s): Senior standing (or students in junior standing with permission from the instructor) and MEDH 1000, MEDH 3000 and a writing in the discipline course approved for the major. Not open to non-degree graduate students.

MEDH 4940 PUBLISHING THE LINDEN REVIEW (3 credits)

This course will offer students an experiential learning opportunity within the publishing field. Students will work as an editorial team advised by their instructor to publish a biannual, international, online literary journal named The Linden Review. The Linden Review's mission is to publish high-quality creative nonfiction and book reviews that investigate the complexities of the word health. Health will be defined broadly as a deep understanding and appreciation of bodily, emotional, spiritual, social, political, and environmental well-being. (Cross-listed with ENGL 8946, ENGL 4940).

Prerequisite(s): Prerequisite: ENGL 1160 or equivalent

MEDH 4950 BRINGING THE WAR HOME: DEPICTIONS OF WAR VETERANS IN LITERATURE AND FILM (3 credits)

Course explores the impact of war on combatants, their families and communities as represented in literary fiction, film, historical documentation, first-person accounts, and other texts written in or translated to English. (Cross-listed with ENGL 8956, ENGL 4950).

Prerequisite(s): ENGL 1160 prerequisite

MEDH 4990 INDEPENDENT STUDY IN MEDICAL HUMANITIES (1-3 credits)

This course is guided reading or independent research in special topics in Medical Humanities under the supervision of a member of the Medical Humanities faculty. This course is designed primarily for the student interested in topics not currently available in the program offerings and who has demonstrated ability to work independently. May be repeated once for credit. (Cross-listed with MEDH 8996).

Prerequisite(s): Junior standing or permission of the instructor. Not open to non-degree graduate students.

Military Science (MILS)

Military Science Undergraduate Courses

MILS 1000 LEADERSHIP LABORATORY (0 credits)

Leadership Laboratory provides basic and advanced military leadership experience in military courtesy, drill and ceremonies, and practical application of classroom taught subjects. Functions and responsibilities of leadership positions are developed through cadet staff actions and command positions. Leadership Laboratory meets Mondays through Fridays from 1530-1730 at the Military Science Building or various training locations in the Omaha Metro area. All military science students must register for MILS 1000.

MILS 1010 LEADERSHIP AND PERSONAL DEVELOPMENT (2 credits)

Examines the role of the commissioned officer in the U.S. Army. Discussion focuses on the role and organization of the Army, the military profession, general leadership, role of the non-commissioned officer and officer, customs of the service, military pay and benefits, career opportunities, and personal development.

MILS 1020 INTRODUCTION TO TACTICAL LEADERSHIP (2 credits)

Focuses on the relationship between leadership and personal development. Also introduces basic soldier skills, to include land navigation and map reading.

MILS 2000 LEADERSHIP LABORATORY (0 credits)

Leadership Laboratory provides basic and advanced military leadership experience in military courtesy, drill and ceremonies, and practical application of classroom taught subjects. Functions and responsibilities of leadership positions are developed through cadet staff actions and command positions. Leadership Laboratory meets Mondays through Fridays from 1530-1730 at the Military Science Building or various training locations in the Omaha Metro area. All military science students must register for MILS 1000.

MILS 2010 INNOVATIVE TEAM LEADERSHIP (2 credits)

Develops student leadership and critical individual skills. Training is basic in nature and includes leadership techniques, written and oral communication, rifle marksmanship, fundamentals of land navigation, and physical fitness.

Prerequisite(s): MILS 1010 and MILS 1020.

MILS 2020 UNITED STATES MILITARY HISTORY (3 credits)

This course will introduce students to the history of the American Military establishment and its relationships to American society from colonial times to the present. Students will become acquainted with the evolution of warfare, military theory and the military profession, with particular emphasis on the place of military institutions in society, so as to develop a sense of historical awareness.

MILS 2050 BASIC CAMP (3 credits)

Six weeks of training at Fort Knox, Kentucky. Travel pay and salary stipend provided through the Department of Military Science. The student is not obligated to any military service as a result of attending Training Camp. Camp graduates are eligible to enroll in Advanced Military Science courses and compete for two-year military science scholarships. This course is designed for those entering the ROTC Program with no prior military service and will be Academic Juniors beginning in the Fall after Basic Camp completion.

Prerequisite(s): Graduate of MS 1000-3000 or Army Basic Training

MILS 2120 FOUNDATIONS OF TACTICAL LEADERSHIP (2 credits)

Continues the development of student leadership and critical individual military skills. Training focuses on advanced military skills and includes orienteering, field survival skills, operation and training.

Prerequisite(s): MILS 2010

MILS 2130 INNOVATIVE TEAM LEADERSHIP (2 credits)

Designed to develop leadership and critical individual skills. Training is basic in nature and includes leadership techniques, written and oral communication, rifle marksmanship, fundamentals of land navigation, and physical fitness.

Prerequisite(s): MILS 1030. Not open to non-degree graduate students.

MILS 3000 LEADERSHIP LABORATORY (0 credits)

Leadership Laboratory provides basic and advanced military leadership experience in military courtesy, drill and ceremonies, and practical application of classroom taught subjects. Functions and responsibilities of leadership positions are developed through cadet staff actions and command positions. Leadership Laboratory meets Mondays through Fridays from 1530-1730 at the Military Science Building or various training locations in the Omaha Metro. All military science students must register for MILS 1000.

MILS 3010 ADAPTIVE TACTICAL LEADERSHIP (3 credits)

Students learn the fundamentals of land navigation, the role and functions of a military line and staff organization, the role of the non-commissioned officer, training management, how to prepare military correspondence, how to conduct oral presentations, and how to arrange and conduct meetings and conferences. Includes physical training.

Prerequisite(s): Department approval and enrollment in MILS 3000.

MILS 3020 LEADERSHIP IN A CHANGING ENVIRONMENT (3 credits)

Students learn the fundamentals of small unit leadership skills and tactics, how to conduct personal, performance and discipline counseling, and examine leadership case studies in detail. Includes physical training.

Prerequisite(s): Department approval and enrollment in MILS 1000.

MILS 3070 ADVANCE CAMP (3 credits)

The ROTC cadet attends six weeks of intensive leadership and management training. The training is conducted during the summer months at Fort Knox, KY. The student's ability to lead his unit and to plan and conduct small unit operations is thoroughly evaluated. Travel pay and salary stipend are provided through the Army.

Prerequisite(s): MILS 3010 and MILS 3020

MILS 4000 LEADERSHIP LABORATORY (1 credit)

Leadership Laboratory provides basic and advanced military leadership experience in military courtesy, drill and ceremonies, and practical application of classroom taught subjects. Functions and responsibilities of leadership positions are developed through cadet staff actions and command positions. Leadership Laboratory meets Mondays through Fridays from 1530-1730 at the Military Science Building or various training locations in the Omaha Metro area.

MILS 4010 DEVELOPING ADAPTIVE LEADERS (2 credits)

Leadership seminar on military ethics, ethical reasoning, decision making and value clarification. Contemporary problems and ethical issues are discussed using the case study method. Entering a new organization, communications and human relations skills, the importance of power and influence are learned.

Prerequisite(s): Department approval and enrollment in MILS 4000.

MILS 4020 LEADERSHIP IN A COMPLEX WORLD (2 credits)

Develops military management skills by providing a working knowledge of the Army personnel management system, the military justice system, the Army logistical system and post and installation support agencies. The focus of this course is to provide an understanding of basic leadership and management skills required by newly commissioned officers.

Prerequisite(s): Department approval and enrollment in MILS 4000.

MILS 4030 DIRECTED INDEPENDENT READINGS (1-3 credits)

A variable topic course in Military Science designed to consider an issue or field of interest that relates to the military establishment. Student will read and report on military related books. Student should contact designated faculty member for specific course requirement prior to registration.

Prerequisite(s): Permission of instructor.

MILS 4040 DIRECTED INDEPENDENT STUDIES (1-3 credits)

A variable credit course in Military Science designed to consider an issue or field of interest that relates to the military establishment. Student should contact designated faculty member for specific course requirement prior to registration.

Prerequisite(s): Permission of instructor.

Multidisciplinary Studies (MLTI)

Multidisciplinary Studies Undergraduate Courses

MLTI 3000 MULTIDISCIPLINARY FOUNDATIONS SEMINAR (3 credits)

A foundational course for the Bachelor of Multidisciplinary Studies degree. Students explore the requirements, goals, and objectives of the program as well as gain an understanding of emotional intelligence capabilities.

Prerequisite(s): Not open to non-degree graduate students.

MLTI 4000 MULTIDISCIPLINARY CAPSTONE SEMINAR (3 credits)

This capstone course engages Bachelor of Multidisciplinary Studies (BMS) students with significant themes or topics around a real-world issue or problem. The capstone requires the development of a substantial final project that combines learning from multiple sources and perspectives, including general education courses, BMS degree courses, prior learning in and outside the classroom, as well as co-curricular experiences. As the concluding experience for BMS students, the capstone provides the opportunity for students to reflect, through their Multidisciplinary Learning Portfolio, on how their education informs their future professional, personal, and educational lives.

Prerequisite(s): MLTI 3000 and ENGL 1160. Student must have 102 earned credit hours to enroll. This course should be taken towards the end of the Bachelor of Multidisciplinary Studies degree program as a culminating experience. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

Music (MUS)

Music Undergraduate Courses

MUS 115A APPLIED BASSOON (1-2 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 115B APPLIED CELLO (1-2 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115C APPLIED CLARINET (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 115D APPLIED DOUBLE BASS (1-2 credits)

This course provides individual weekly instruction on bass. Students work with the instructor to schedule lessons for one credit hour (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required. The primary goal of the bass student is to develop the highest level of technical and musical proficiency on his/her instrument. Through weekly applied lessons and personal practice time, it is intended that the student will gain the tools necessary to become a more mature musician.

Prerequisite(s): This course requires an audition performed for & approved by the string or jazz faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115E APPLIED EUPHONIUM (1-2 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115F APPLIED FLUTE (1-2 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): An audition performed for and approved by the woodwind faculty is required. Students enrolled in this course must also enroll in an instrumental ensemble. Music majors must be concurrently enrolled in MUS 1000-001 and MUS 1000-007.

MUS 115G APPLIED FRENCH HORN (1-2 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115H APPLIED GUITAR (1-2 credits)

This course provides individual weekly instruction on guitar. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115I APPLIED HARP (1-2 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115J APPLIED OBOE (1-2 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 115K APPLIED PERCUSSION (1-2 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons for one credit hour (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the percussion faculty. Music majors must attend the weekly masterclass.

MUS 115L APPLIED PIANO (1-2 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credits (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 115M APPLIED PIPE ORGAN (1-2 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 115N APPLIED SAXOPHONE (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 115O APPLIED TROMBONE (1-2 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115P APPLIED TRUMPET (1-2 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115Q APPLIED TUBA (1-2 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115R APPLIED VIOLA (1-2 credits)

This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115S APPLIED VIOLIN (1-2 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (violin majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115T APPLIED VOICE (1-2 credits)

This course provides individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one credit hour (non music majors) or two credit hours (voice music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the voice faculty. Students must also enroll in a choral ensemble MUS 2700/MUS 4100 and attend the weekly masterclass. MUS 115T students are also required to attend Freshman Voice Seminar.

MUS 115U APPLIED CARILLON (1-2 credits)

This course provides individual weekly instruction on carillon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the keyboard faculty.

MUS 167B APPLIED CLASS - PIANO (1 credit)

Basic reading of treble and bass clef are a prerequisite for this course. Beginning with learning correct posture, hand position and technique, a deeper understanding of key musical elements such as key signatures, dynamic markings, time signatures, rhythmic values, and musical terminology will begin the coursework. Reading, coordination, rhythm, scales, improvisation, technology, duet and solo repertoire will be used to strengthen both keyboard and overall musical skills. *This is a sequential course whereby all students must pass the fall semester before enrolling in spring semester.

MUS 167C APPLIED CLASS - VOICE I (1 credit)

This course provides class instruction in the development of elementary basic skills in applied voice.

MUS 169D APPLIED CLASS JAZZ PIANO (1 credit)

This course will consist of class instruction designed to teach students basic jazz piano skills.

Prerequisite(s): MUS 1420 or MUS 2430

MUS 215A APPLIED BASSOON (1-2 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 215B APPLIED CELLO (1-2 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 115B. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of cello and attend the weekly masterclass.

MUS 215C APPLIED CLARINET (1-2 credits)

This course provides individual weekly instruction on clarinet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 215D APPLIED DOUBLE BASS (1-2 credits)

This course provides individual weekly instruction on double bass. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 115D. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of double bass and attend the weekly masterclass.

MUS 215E APPLIED EUPHONIUM (1-2 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215F APPLIED FLUTE (1-2 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition for & approval by the woodwind faculty, OR successful completion of 4 hours of MUS 115F. Students must also enroll in an instrumental ensemble. Music majors must be concurrently enrolled in MUS 1000-001 & 1000-007.

MUS 215G APPLIED FRENCH HORN (1-2 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215H APPLIED GUITAR (1-2 credits)

This course provides individual weekly instruction on guitar. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 215I APPLIED HARP (1-2 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 115I. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of harp and attend the weekly masterclass.

MUS 215J APPLIED OBOE (1-2 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 215K APPLIED PERCUSSION (1-2 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the percussion faculty. Music majors must attend the weekly masterclass.

MUS 215L APPLIED PIANO (1-2 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 215M APPLIED PIPE ORGAN (1-2 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 215N APPLIED SAXOPHONE (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credits (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 215O APPLIED TROMBONE (1-2 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215P APPLIED TRUMPET (1-2 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215Q APPLIED TUBA (1-2 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215R APPLIED VIOLA (1-2 credits)

This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 115R. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of viola and attend the weekly masterclass.

MUS 215S APPLIED VIOLIN (1-2 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 115S. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of violin and attend the weekly masterclass.

MUS 215T APPLIED VOICE (1-2 credits)

This course provides individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one credit hour (non music majors) or two credit hours (voice music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for and approved by the voice faculty. All enrolled students must also enroll in a choral ensemble (MUS 2700, MUS 4100). All students must attend the weekly masterclass.

MUS 315A APPLIED BASSOON (1-2 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 315B APPLIED CELLO (1-2 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 215B. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of cello and attend the weekly masterclass.

MUS 315C APPLIED CLARINET (1-2 credits)

This course provides individual weekly instruction on clarinet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 315D APPLIED DOUBLE BASS (1-2 credits)

This course provides individual weekly instruction on double bass. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 215D. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of double-bass and attend the weekly masterclass.

MUS 315E APPLIED EUPHONIUM (1-2 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315F APPLIED FLUTE (1-2 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Audition for & approval by woodwind faculty OR successful completion of 4 hrs of MUS 215F and a "PASS" in the Sophomore Continuation Jury. Concurrent enrollment in an instrumental ensemble. Music majors: Concurrent enrollment in MUS 1000-001 & 1000-007.

MUS 315G APPLIED FRENCH HORN (1-2 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315H APPLIED GUITAR (1-2 credits)

This course provides individual weekly instruction on guitar. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 215H. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of guitar and attend the weekly masterclass.

MUS 315I APPLIED HARP (1-2 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 215I. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of harp and attend the weekly masterclass.

MUS 315J APPLIED OBOE (1-3 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 315K APPLIED PERCUSSION (1-2 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the percussion faculty. Music majors must attend the weekly masterclass.

MUS 315L APPLIED PIANO (1-2 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 315M APPLIED PIPE ORGAN (1-3 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 315N APPLIED SAXOPHONE (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 315O APPLIED TROMBONE (1-2 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315P APPLIED TRUMPET (1-2 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credits (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315Q APPLIED TUBA (1-2 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315R APPLIED VIOLA (1-2 credits)

This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 215R. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of viola and attend the weekly masterclass.

MUS 315S APPLIED VIOLIN (1-2 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 215S. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of violin and attend the weekly masterclass.

MUS 315T APPLIED VOICE (1-2 credits)

This course provides individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one credit hour or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for and approved by the voice faculty. All enrolled students must also enroll in a choral ensemble (MUS 2700, MUS 4100). All students must attend the weekly masterclass.

MUS 415A APPLIED BASSOON (1-2 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 415B APPLIED CELLO (1-2 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 315B. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of cello and attend the weekly masterclass.

MUS 415C APPLIED CLARINET (1-2 credits)

This course provides individual weekly instruction on clarinet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 415D APPLIED DOUBLE BASS (1-2 credits)

This course provides individual weekly instruction on double bass. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 315D. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of double bass and attend the weekly masterclass.

MUS 415E APPLIED EUPHONIUM (1-2 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. This level of applied study provides instruction on fundamental brass playing concepts. Weekly assignments can include technical studies, scale exercises, tone and articulation studies, breathing exercises, solo and orchestral repertoire, chamber music, etc.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415F APPLIED FLUTE (1-2 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition for & approval by the woodwind faculty, OR successful completion of 4 credit hours of MUS 315F. Students must also enroll in an instrumental ensemble. Music majors must be concurrently enrolled in MUS 1000-001 & 1000-007.

MUS 415G APPLIED FRENCH HORN (1-2 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415H APPLIED GUITAR (1-2 credits)

This course provides individual weekly instruction on the guitar. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 315H. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of guitar and attend the weekly masterclass.

MUS 415I APPLIED HARP (1-2 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 315I. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of harp and attend the weekly masterclass.

MUS 415J APPLIED OBOE (1-2 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 415K APPLIED PERCUSSION (1-2 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the percussion faculty. Music majors must attend the weekly masterclass.

MUS 415L APPLIED PIANO (1-2 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 415M APPLIED PIPE ORGAN (1-3 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 415N APPLIED SAXOPHONE (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 4150 APPLIED TROMBONE (1-2 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415P APPLIED TRUMPET (1-2 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (BM) or two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415Q APPLIED TUBA (1-2 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415R APPLIED VIOLA (1-2 credits)

This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 315R. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of viola and attend the weekly masterclass.

MUS 415S APPLIED VIOLIN (1-2 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 215S. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of violin and attend the weekly masterclass.

MUS 415T APPLIED VOICE (1-2 credits)

This course is a continuation of the applied music sequence of study for music majors. This course provides individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one credit hour or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 315T. This course requires an audition performed for and approved by the voice faculty. All enrolled students must also enroll in a choral ensemble (MUS 2700, MUS 4100) and attend the weekly masterclass.

MUS 1000 CONVOCATION (0 credits)

This course is a weekly meeting of all music majors which provides students with performance opportunities for themselves as well as recitals and lectures by guest artists.

Prerequisite(s): Music majors only.

MUS 1010 MUSIC TECHNOLOGY NOW (0 credits)

This course is a weekly meeting of all music technology majors. The course includes presentations of ongoing student projects, lectures by resident and visiting music technologists, audio engineering training and practicum opportunities, and critical listening experiences.

Prerequisite(s): Not open to non-degree graduate students.

MUS 1050 MUSIC OF THE PEOPLE: THE BEATLES (3 credits)

The Beatles are arguably the most influential and important rock band in history. Their music influenced not only the shape of popular music but youth culture. Course objectives are to learn the history of the music of the Beatles from their early influences and formation to their break-up and legacy; to understand the relationship of this music to larger cultural, political, and economic formations; to become familiar with aspects of the diverse musical structures used in their music; and to become familiar with the advances in sound and recording technology their music spawned and influenced innovation to music today.

Distribution: Humanities and Fine Arts General Education course

MUS 1070 MUSIC OF THE PEOPLE: ROCK AND POP (3 credits)

The objectives of this course are 1) to learn the history of rock music from its beginnings in earlier forms of popular music to the beginning of the 21st century 2) to understand the relationship of this music to larger cultural, political, and economic formations; and 3) to become familiar with aspects of musical structure which have been used in rock music.

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

MUS 1080 MUSIC OF THE PEOPLE: THE WORLD (3 credits)

A study of music of various cultures throughout the world practiced primarily by individuals who produce music as a part of their everyday life. Using music as a window into various cultures the course gives students an insight into cultures that may vary from their own.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

MUS 1090 MUSIC APPRECIATION (3 credits)

A listening course for the non-music major designed to promote a better understanding of noteworthy compositions from various periods and styles. Lab fee required.

Distribution: Humanities and Fine Arts General Education course

MUS 1100 MUSIC OF THE PEOPLE: JAZZ (3 credits)

In this course, the history of jazz will be traced from its origins up to the present. Designed primarily for non-music majors, the course will chronicle the development of various stylistic trends which characterize jazz and discuss the prominent musical artists that influenced each style period within the history of jazz. Lab fee required.

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

MUS 1170 FOUNDATIONS OF MUSIC TECHNOLOGY (3 credits)

This course addresses the foundational people, concepts, and terms of music technology. The course covers a broad spectrum of themes including acoustics, psychoacoustics, microphones, Musical Instrument Digital Instrument (MIDI), synthesis, computer music, notation, and sampling. Intended for students pursuing a Bachelor of Arts with a concentration in Music Technology.

MUS 1390 BASIC MUSICIANSHIP (3 credits)

This course is designed to develop basic music reading skills through experiential learning that promotes music literacy skills of note reading, rhythmic reading, key signatures, and simple meter. It is designed for students interested in music degree tracks who have limited understanding of music theory.

Prerequisite(s): Music major or permission of the instructor. Not open to non-degree graduate students.

MUS 1400 MUSIC FUNDAMENTALS (3 credits)

Introduction to Music Studies will cover the basics of music including music reading in multiple clefs, scales, key signatures, meter signatures, rhythm, triads, seventh chords, and elementary aural and singing skills. The primary purpose of the course is to prepare students for further study in music at the college level.

Prerequisite(s): Music major or permission of instructor. Not open to non-degree graduate students.

MUS 1410 MUSIC CORE CURRICULUM I (4 credits)

The study of basic elements of music and their application to musical performance, education, and analysis.

Prerequisite(s): Music Major or permission from the instructor. Successful completion of 1400 (C or better). Not open to non-degree graduate students.

MUS 1420 MUSIC CORE CURRICULUM II (4 credits)

The study of basic elements of music and their application to musical performance, education, and analysis.

Prerequisite(s): Completion of MUS 1410 with the grade C or better or permission of the instructor. Not open to non-degree graduate students.

MUS 1430 COMMERCIAL MUSIC THEORY I (3 credits)

This course will integrate Roman Numeral, Lead Sheet, and Nashville notations through realization and analysis. It will also combine Common Practice Period music theory with Jazz theory in an effort to promote practical usage of theoretical systems in performance and practice.

Prerequisite(s): Prerequisites include MUS 1390 and MUS 1400.

MUS 1600 INTRODUCTION TO ARTS EDUCATION (1 credit)

This course is designed to provide an overview of the arts education profession. It will focus on the history, philosophy, and fundamentals of arts education in the United States. (Cross-listed with ART 1600).

MUS 1640 DICTION FOR SINGERS I (1 credit)

A study of the International Phonetic Alphabet (IPA) and the rules of pronunciation as applied to vocal literature of the English and Italian languages.

Prerequisite(s): Music major

MUS 1660 DICTION FOR SINGERS II (1 credit)

A study of the rules and guidelines of pronunciation as applied to vocal literature of German and French languages.

Prerequisite(s): Successful completion of MUS 1640

MUS 1690 KEYBOARD SKILLS I (1 credit)

Instruction in this course will prepare students for keyboard skills for continued success as a professional musician, teacher or music educator. An emphasis will be placed on the following skills: scales/chords, sight reading, SATB reading, open score reading, improvisation, basic accompaniment, continued development of technical skills through individual piano selections and exciting project using contemporary music. Arrangements of popular music, chord charts and stylistic awareness in regards to the piano will be developed throughout the course. Beginning skills of ensemble playing will be encouraged throughout the semesters. This is a sequential course whereby all students must enroll in fall semester and pass before enrolling in spring semester.

Prerequisite(s): MUS 167B (Piano) or equivalent. Permission.

MUS 2100 EXPLORING MUSIC THERAPY AND ADAPTIVE MUSIC THERAPY (3 credits)

An exploratory introduction to music therapy and adaptive music in the rehabilitation and reorganization of human beings into social life, health, and wellbeing. A survey of the history of music therapy is included and with the processes and principles used by practicing music therapists. (Cross-listed with MEDH 2100).

Prerequisite(s): Not open to non-degree graduate students.

MUS 2200 AUDIO RECORDING TECHNIQUES I (3 credits)

This course provides students with basic instruction in analog and digital audio recording. Topics include hardware, software, microphones, and basic production. Upon completion of the course students will have the skills and the knowledge to do basic audio recording such as recording live concerts and simple multi-track recording.

Prerequisite(s): MUS 1170 OR permission of the instructor. Not open to non-degree graduate students.

MUS 2300 SOUND DESIGN FOR VIDEO GAMES, FILM, AND SOUND ART (3 credits)

This course provides an overview of sound design theory & techniques. Using various multimedia platforms, students will effectively create compelling audio assets for video games, film, and artistic sound installations.

Prerequisite(s): Music Tech majors or permission of instructor. Not open to non-degree graduate students.

MUS 2410 MUSIC CORE CURRICULUM III (4 credits)

The study of intermediate elements of music and their application to musical performance, education, and analysis.

Prerequisite(s): MUS 1420 or permission. Not open to non-degree graduate students.

MUS 2420 MUSIC CORE CURRICULUM IV (4 credits)

The study of advanced elements of music and their application to musical performance, education, and analysis.

Prerequisite(s): MUS 2410 or permission. Not open to non-degree graduate students.

MUS 2430 COMMERCIAL MUSIC THEORY 2 (3 credits)

As a continuation of MUS 1430, this course will integrate Roman Numeral, Lead Sheet, and Nashville notations through realization and analysis. It will also combine Common Practice Period music theory with Jazz theory in an effort to promote practical usage of theoretical systems in performance and practice.

Prerequisite(s): MUS 1390, MUS 1400, and MUS 1430

MUS 2480 CLASS APPLIED JAZZ IMPROVISATION (2 credits)

This course is intended for the serious music student who wishes to gain basic knowledge and skills in the area of jazz improvisation. The course will emphasize beginning improvisation skills, basic jazz literature, chord scale relationships, melodic concepts, ear training, and analysis of improvised solos.

Prerequisite(s): MUS 1410 or MUS 1430

MUS 2510 MUSIC AND THE BLACK EXPERIENCE (3 credits)

Music and the Black Experience will provide students with historical and cultural knowledge of African Americans in the American music entertainment industry; the cultural influences of West African music traditions in African American music; and the American socio-political experiences that influenced music genres unique to Black people. Students will explore how West African music traditions survived and evolved through American slavery, reconstruction, the Civil Rights era, and into the 21st century; and how Black musical artists challenged racial discrimination in the music industry to create distinct music genres culturally unique to Black people. Overall, students taking this course will gain an understanding of the cultural role of music throughout the Black experience in America, and an appreciation for African American musical artists and composers who influenced all popular American music genres, from Spirituals to Broadway. (Cross-listed with BLST 2510).

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

MUS 2550 MUSIC HISTORY I (3 credits)

This course is intended for music majors who wish to undertake a study of music literature and history of the Ancient, Medieval, Renaissance, and Baroque eras. The objective of the course is to illustrate the musical concepts, styles and performance practices through composers, individual works and scores that typify these eras and the cultural context surrounding them. Outside listening, reading, musical analysis and discussion will supplement lectures.

MUS 2560 MUSIC HISTORY II (3 credits)

This course is intended for music majors who wish to undertake a study of music literature and history of the Pre-Classical, Classical, Romantic, and Modern eras. The objective of the course is to illustrate the musical concepts, styles and performance practices through composers, individual works and scores that typify these eras and the cultural context surrounding them. Outside listening, reading, musical analysis and discussion will supplement lectures.

MUS 2600 FUNDAMENTALS OF CONDUCTING (2 credits)

The purpose of this course is to provide a basic foundation of conducting skills.

Prerequisite(s): This course is limited to music majors. Students must have successfully completed MUS 1410, MUS 1420. Not open to non-degree graduate students.

MUS 2610 ADVANCED PIANO TECHNIQUES I (1 credit)

Instruction in this course will prepare piano majors with advanced keyboard techniques for continued success as a professional musician or private instructor. An emphasis will be placed on the following skills: sight reading, SATB reading, open score reading, improvisation, intermediate/advanced accompaniment, and continued crafting of personal skill sets. Students will arrange contemporary music. Intermediate to advanced skills of ensemble playing will be cultivated throughout the semesters. This is a sequential course whereby all students must enroll in fall semester and pass before enrolling in spring semester.

Prerequisite(s): Piano Major

MUS 2620 ADVANCED PIANO TECHNIQUES II (1 credit)

Instruction in this course will prepare piano majors with advanced keyboard techniques for continued success as a professional musician or private instructor. An emphasis will be placed on the following skills: sight reading, SATB reading, open score reading, improvisation, intermediate/advanced accompaniment, and continued crafting of personal skill sets. Students will arrange contemporary music. Advanced skills of ensemble playing will be cultivated throughout the semester. This is a sequential course whereby all students must enroll in fall semester and pass before enrolling in spring semester.

Prerequisite(s): Piano Major; Successful completion of MUS 2610. Not open to non-degree graduate students.

MUS 2690 KEYBOARD SKILLS II (1 credit)

Continuation of keyboard skills curriculum for continued success and independent thinking allowing students skill level for the following: scales/chords, sight reading, SATB reading, open score reading, improvisation, basic accompaniment, continued development of technical skills through individual piano selections and exciting project using contemporary music. Advanced arrangements of popular music, chord charts and stylistic awareness continue to develop throughout the course. Advanced skills of ensemble playing and experience will be a part of the curriculum. Class instruction in advanced development of keyboard skills including sight reading, harmonization, open score reading, accompaniments and facility.

Prerequisite(s): MUS 1690 or equivalent. Permission.

MUS 2700 UNIVERSITY CHORUS (0-1 credits)

University Chorus is an ensemble open to all University students, faculty and staff. No audition necessary. All styles of music, including popular. Students wanting humanities/fine arts general education credit must register for 1 credit hour.

Prerequisite(s): University Chorus participants need to be aware of the importance of rehearsals and concerts, and commit to those times in their schedule. Student must seek approval from the Director of Choral Activities in order to take this course for 0 credits.

Distribution: Humanities and Fine Arts General Education course

MUS 2730 CHAMBER ORCHESTRA (0-1 credits)

A string orchestra with selected winds performing symphonic repertoire. Public performance. Open to all students and members of the greater metropolitan community.

Prerequisite(s): Audition is required.

MUS 2740 CHAMBER MUSIC (0-1 credits)

Specialized chamber music groups from the string, wind, percussion, jazz, or technology area. Literature will be chosen from the extensive materials available for these combinations of instruments.

Prerequisite(s): Audition and permission.

MUS 2750 MARCHING BAND (0 credits)

Open to all full and part-time UNO students during the fall semester only. No audition is required. K-12 instrumental music education majors are required to enroll in Marching Band for two semesters.

MUS 2760 UNIVERSITY CONCERT BAND (0-1 credits)

University Band is a performing ensemble that is open to all UNO students, staff, and faculty. The band has varied programming of contemporary and classical works. There is no audition necessary.

Prerequisite(s): There are no prerequisites for University Band, but participants need to be aware of the importance of rehearsals and concerts and commit to those times in their schedules.

Distribution: Humanities and Fine Arts General Education course

MUS 2770 JAZZ ENSEMBLE (0-1 credits)

A select ensemble performing jazz literature from all periods. Open to all full- and part-time UNO students. An audition is required with the director.

Prerequisite(s): Acceptance into jazz ensemble is by audition only. Students must demonstrate technical command of their instrument, sightreading skills in multiple jazz styles and ability to demonstrate credible jazz improvisation skills.

MUS 2790 COLLABORATIVE PIANO (1 credit)

This course is designed to develop skills useful for pianists to learn to skills to collaborate with vocalists, instrumentalists and ensembles. Individual class times will also accompany rehearsals with designated collaborative partners. The vast repertoire and stylistic knowledge for areas such as musical theater, voice, choral, strings, brass, orchestra and wind ensemble set the beginning of exciting partnerships throughout a musical career.

Prerequisite(s): Completion of MUS 167B, MUS 1690, MUS 2690.

Permission. Not open to non-degree graduate students.

MUS 2800 SOUND REINFORCEMENT (3 credits)

This course provides students with basic instruction in the fundamental knowledge and techniques of live sound production. Topics include equipment, processes, and systems used in a variety of scenarios with emphasis on practical, hands-on production. Upon completion of the course students will have the skills and the knowledge to provide basic sound reinforcement.

Prerequisite(s): Activities include on-location sound reinforcement, written live sound observations, in-class practicum, and electronics labs. Not open to non-degree graduate students.

MUS 2810 MUSIC IN LATIN AMERICAN CULTURE (3 credits)

This course surveys musical traditions from countries in Latin America and the Caribbean. Characteristic regional genres, ensembles, instruments, and music rituals will be examined. We will also trace the historical, cultural, and socio-political aspects of Latin American music on a global scale and delve into the developments of some international musical genres. (Cross-listed with LLS 2810).

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

MUS 3100 MUSIC INFORMATICS (3 credits)

Surveys the use of digital music data in the study, composition, performance, analysis, storage, and dissemination of music. Various computational approaches and technologies in music informatics including music information retrieval will be explored and implemented by students. (Cross-listed with ACMP 3100)

Prerequisite(s): Successful completion of one of the following three courses satisfies the prerequisite requirement: CIST 1300 or MUS 3170 or MUS 3180. Not open to non-degree graduate students.

MUS 3170 EXPLORING MUSIC TECHNOLOGY (3 credits)

An overview of computers and music. The course will focus on broad themes of people, procedures, data structures, software, hardware, and computer music environments. Intended for students with limited music or computer backgrounds.

MUS 3180 ELECTRONIC MUSIC PRODUCTION (3 credits)

An exploration of the potentials of electronic music. Concepts of electronic music are presented through the use of a computer, software, and appropriate hardware. Students create assignments that demonstrate the application of basic techniques. (Cross-listed with ACMP 3180)

MUS 3190 JUNIOR/NON DEGREE RECITAL (1 credit)

This course is designed for all undergraduate performance music majors performing a junior or any student who wants to perform a non-degree recital.

Prerequisite(s): Applied Music (MUS 1150-3150) and/or permission of applied instructor. Payment of Recital Fee (Conductors' fees are automatically waived). Not open to non-degree graduate students.

MUS 3200 JAZZ PEDAGOGY (1 credit)

Course includes middle school and high school instrumental jazz literature, basic improvisation, rhythm section techniques and laboratory ensemble experiences.

Prerequisite(s): MUS 2410 or MUS 2430

MUS 3210 AUDIO RECORDING TECHNIQUES II (3 credits)

This course provides students with advanced instruction in sound recording and digital audio production. Topics include microphone technique, analog audio hardware, digital audio software, and advanced production techniques.

Prerequisite(s): MUS 2200

MUS 3260 MUSICAL THEATRE AND OPERA WORKSHOP (1 credit)

THEA 3260/MUS 3260 Musical Theatre and Opera Workshop is an ensemble offered during fall semester that integrates singing, movement and acting through rehearsal, private musical coaching and group exercise. It is designed for students in opera and musical theatre and develops the skill sets that are needed for performance. (Cross-listed with THEA 3260).

Prerequisite(s): THEA 1200 or MUS 115 T; PEA 111Q or PEA 111R or PEA 112W; THEA 1300 or THEA 2300. These prerequisites can be waived by the professors.

MUS 3400 FORM AND ANALYSIS (2 credits)

The study of musical forms and their application to musical arranging for choir, band, and orchestra.

Prerequisite(s): MUS 2420

MUS 3440 COMPOSITION I (1 credit)

Individualized applied study of the basic craft of musical composition in small media and various styles.

Prerequisite(s): MUS 2420 and written permission. Not open to non-degree graduate students.

MUS 3480 CLASS APPLIED JAZZ IMPROVISATION II (2 credits)

This course is intended for the serious music student who wishes to gain advanced knowledge and skills in the area of jazz improvisation. This course will emphasize advanced improvisation skills, standard jazz literature, advanced jazz harmony, chord/scale relationships, melodic concepts, ear training, and analysis of improvised solos.

Prerequisite(s): MUS 2480

MUS 3600 MUSIC EDUCATION CORE I - ELEMENTARY (5 credits)

Methods and materials for teaching elementary (K-6) general, instrumental and choral music.

Prerequisite(s): Students must be accepted to the College of Education, Health and Human Sciences (CEHHS) Teacher Preparation Program and have completed MUS 1600 and MUS 1410 with a C or better; Music Education Majors only. Not open to non-degree graduate students.

MUS 3604 MUSIC EDUCATION BEGINNING PRACTICUM (1 credit)

In Beginning Practicum, teacher candidates are observing and practicing instructional strategies for music students in grades K-5 in school settings. Students will spend a minimum of 20 hours in an elementary music classroom.

Prerequisite(s): MUS 3600 - corequisite, 2.75 NU GPA. Not open to non-degree graduate students.

MUS 3610 MUSIC EDUCATION CORE II - MIDDLE SCHOOL/JUNIOR HIGH SCHOOL (5 credits)

Course includes brass and percussion pedagogy, middle school instrumental and choral literature and techniques, general music, conducting, and laboratory ensemble experiences.

Prerequisite(s): MUS 3600 or permission.

MUS 3614 MUSIC EDUCATION INTERMEDIATE PRACTICUM (1 credit)

In Intermediate Practicum, teacher candidates are observing and practicing instructional strategies for middle school students in school settings. Students will spend a minimum of 30 hours in a middle school music classroom.

Prerequisite(s): Prerequisites: MUS 3600, MUS 3604; Corequisite: MUS 3610; 2.75 NU GPA. Not open to non-degree graduate students.

MUS 3630 MUSIC EDUCATION CORE III - HIGH SCHOOL METHODS (5 credits)

This course explores all aspects of administering high school vocal and instrumental music programs as well as prepares the student for clinical teaching and the job search process.

Prerequisite(s): MUS 3600 and MUS 3610 or permission, 2.75 NU GPA.

MUS 3634 MUSIC EDUCATION ADVANCED PRACTICUM (1 credit)

In Advanced Practicum, teacher candidates are observing and practicing instructional strategies for high school students in school settings. Students will spend a minimum of 30 hours in a high school music classroom.

Prerequisite(s): Prerequisites: MUS 3600, MUS 3604, MUS 3610, MUS 3614. Corequisite: MUS 3630; 2.75 NU GPA. Not open to non-degree graduate students.

MUS 3640 MUSIC EDUCATION FINAL PRACTICUM (2 credits)

This course is designed to link theoretical concepts learned in the classroom to the practical application of "real world" situations and to familiarize students with the profession of music education. Hours completed in this course count as the final practicum as specified by the College of Education Teacher Preparation Program and required by the Nebraska Department of Education for teacher certification.

Prerequisite(s): MUS 3630, 2.75 NU GPA. Not open to non-degree graduate students.

MUS 3650 INTERNSHIPS IN MUSIC (0-3 credits)

A course designed to link theoretical concepts learned in the classroom to the practical application of "real world" situations and to familiarize students with attitudes, operations and programs of various musical organizations.

Prerequisite(s): Junior standing or permission of Music Department Chair. Not open to non-degree graduate students.

MUS 3660 ADVANCED CONDUCTING (2 credits)

An advanced course in conducting for music majors. This course will provide a theoretical and practical study of various materials and methods as they relate to conducting score study, gestures, rehearsal strategy and related performance practices.

Prerequisite(s): Successful completion of MUS 2420.

MUS 4000 SPECIAL STUDIES IN MUSIC (1-3 credits)

Seminars or workshops in Theory, History, Performance, and Music Education designed to meet specific interests and needs of students. Topics and number of credits for each specific offering will be announced during the prior semester. (Cross-listed with MUS 8006).

MUS 4100 CONCERT CHOIR (0-1 credits)

A select choral ensemble specializing in outstanding examples of music of all styles and from all periods. Public performance. Open to all University students.

Prerequisite(s): The prerequisite for Concert Choir is an audition. Student must seek approval from the Director of Choral Activities in order to take this course for 0 credit.

MUS 4120 CHAMBER CHOIR (0-1 credits)

A select choral ensemble of 20-32 singers, specializing in outstanding examples of a cappella choral music. Preparation and performance of all styles of music. Appearances in concerts throughout the year, on campus; in the metropolitan area; and occasionally, in various other regions of Nebraska and the world.

Prerequisite(s): Auditions at start of each semester - solo, sight-sing, range check, & group audition to match voice qualities. Must seek approval from Director of Choral Activities to take course for 0 credits. Not open to non-degree graduate students.

MUS 4130 UNIVERSITY ORCHESTRA (0-1 credits)

Heartland Philharmonic Orchestra is a full symphony orchestra performing symphonic repertoire. Public performance. Open to all students and members of the greater metropolitan community. Repertoire is drawn from the four periods of music associated with symphonic literature: Baroque, Classical, Romantic, and Modern.

Prerequisite(s): Audition and permission.

MUS 4160 SYMPHONIC WIND ENSEMBLE (0-1 credits)

The Symphonic Wind Ensemble performs the finest concert band literature at four campus concerts, professional conferences, and tours. Open to all full- and part-time students.

Prerequisite(s): Audition is required for membership in the Symphonic Wind Ensemble.

MUS 4190 RECITAL (1 credit)

This course is designed for all undergraduate students performing a senior recital. All recitals are to be one half hour to one hour depending on the student's degree requirements.

Prerequisite(s): Recital fee payment (conductor's fees waived) & applied instructor's permission. BM-Education & BA Students: 4 semesters of appropriate Applied Music (MUS 1150-3150). BM-Performance: MUS 3190; 7 semesters of appropriate Applied Music (MUS 1150-3150).

MUS 4220 AUDIO RECORDING TECHNIQUES III (3 credits)

This course provides students with advanced instruction in sound mixing, digital audio editing, audio post-production and mastering. Topics include advanced digital audio editing, audio signal processing techniques, analog signal processing hardware, automation, and final product authoring and mastering.

Prerequisite(s): MUS 3170, MUS 4200 & MUS 4210. Not open to non-degree graduate students.

MUS 4240 ADVANCED AUDIO RECORDING TECHNIQUES (3 credits)

This course provides students with advanced instruction in sound mixing, digital audio editing, audio post-production and mastering. Topics include advanced digital audio editing, audio signal processing techniques, analog signal processing hardware, automation, and final product authoring and mastering. (Cross-listed with MUS 8246).

Prerequisite(s): MUS 3170, MUS 4200 & MUS 4210. Not open to non-degree graduate students.

MUS 4280 ADVANCED TOPICS IN MUSIC TECHNOLOGY (3 credits)

A seminar in Music Technology on an advanced or emerging topic in the field. The topic for each offering will be announced the prior semester.

Prerequisite(s): Permission of department.

MUS 4290 MUSIC CAPSTONE PROJECT (1 credit)

This course is to serve as a capstone project for students in the Bachelor of Arts in Music degree. Projects must be approved by the faculty and a member of the faculty will be assigned to advise on the project.

Prerequisite(s): Senior standing and successful completion of MUS 1420 or MUS 1430. Not open to non-degree graduate students.

MUS 4300 BUSINESS OF MUSIC (3 credits)

An overview of the global music industry as practiced in the United States, this course will provide insights into a number of key areas of business related to music. Students will also explore a diversity of music industry career paths in areas such as arts management, music products & merchandizing, public relations, music production & recording, publishing, and online music distribution.

Prerequisite(s): Students must be enrolled as music majors, or by permission of instructor.

MUS 4400 ADVANCED COMPOSITION (1 credit)

Individualized applied study of the craft of musical composition in larger media and various styles.

Prerequisite(s): MUS 3440 and written permission. Not open to non-degree graduate students.

MUS 4430 ARRANGING FOR JAZZ ENSEMBLE (3 credits)

Techniques of writing for jazz ensembles of various combinations of instruments. (Cross-listed with MUS 8436).

Prerequisite(s): MUS 2480 or MUS 2420

MUS 4440 MUSIC SINCE 1945 (3 credits)

This course covers important developments in music in the United States and Europe since 1945. (Cross-listed with MUS 8446).

Prerequisite(s): Completion of MUS 3420 or permission of instructor.

MUS 4450 ORCHESTRATION (2 credits)

Basics of instrumentation and scoring for band and orchestra.

Prerequisite(s): Completion of MUS 2420 with a C or better. Not open to non-degree graduate students.

MUS 4530 HISTORY OF WESTERN OPERA (3 credits)

This course will consist of significant music theater works in the Western world from 1600 to the present. (Cross-listed with MUS 8536).

Prerequisite(s): MUS 2550 and MUS 2560, Junior standing.

MUS 4540 RENAISSANCE MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature c. 1350-1600. (Cross-listed with MUS 8546).

Prerequisite(s): MUS 2550, MUS 2560, and MUS 2570. Not open to non-degree graduate students.

MUS 4550 BAROQUE MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from c. 1600-1750. (Cross-listed with MUS 8556).

Prerequisite(s): MUS 2550 and MUS 2560.

MUS 4560 CLASSICAL MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from c. 1750-1815. (Cross-listed with MUS 8566).

Prerequisite(s): MUS 2550, MUS 2560, and MUS 2570.

MUS 4570 ROMANTIC MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of Music literature from c. 1815-1912. (Cross-listed with MUS 8576).

Prerequisite(s): MUS 2550 and MUS 2560.

MUS 4580 MUSIC FROM 1900 - 1945 (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from the post-romantic period to 1945. The objective will be to provide the student with a broad overview with special attention given to composers and individual works which typify a style or form. (Cross-listed with MUS 8586).

Prerequisite(s): MUS 2560.

MUS 4590 AFRICAN-AMERICAN POPULAR MUSIC FROM BEBOP TO HIP-HOP (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of African-American popular music literature from c. 1900-present. The objective will be to provide the student with a broad overview with special attention given to musicians and individual works which typify a style or form. Listening assignments will be an integral part of the course, and attendance at live performances will supplement the lectures, discussions and readings. (Cross-listed with MUS 8596).

MUS 4600 PIANO PEDAGOGY (3 credits)

This course is a survey of the art of teaching the piano. Course content will include a survey of beginning and intermediate piano methods, literature for the beginning/intermediate piano student, studio business practice, professional organizations, and group piano instruction pedagogy. (Cross-listed with MUS 8606).

Prerequisite(s): Permission of instructor.

MUS 4610 VOICE PEDAGOGY (3 credits)

This course is a study of the physiological and acoustical properties of the vocal mechanism and of the various techniques used in developing the singing voice. Also, it will apply knowledge acquired about the voice through studio teaching and observations of other voice teachers. (Cross-listed with MUS 8616).

Prerequisite(s): Voice Music Major or permission of instructor.

MUS 4620 INSTRUMENTAL PEDAGOGY (3 credits)

This course is a study of the physiological and acoustical properties of various instruments and of techniques used in developing instrumental technique. Also, it will apply knowledge acquired about the instrument through studio teaching and observations of other instrumental teachers.

MUS 4660 HEALTH AND WELLNESS FOR MUSICIANS (3 credits)

Health and Wellness for Musicians gives an overview of the dimensions of wellness and common health/wellness challenges for musicians. The course provides students with a toolbox of ideas and strategies for the development, design, and implementation of a music wellness campaign for non-musicians and individualized wellness plans for specific instruments and voice types. (Cross-listed with MUS 8696).

MUS 4720 CHORAL LITERATURE (3 credits)

A survey course in the study of significant choral genre of the various periods of music from plain song to contemporary music. (Cross-listed with MUS 8726).

Prerequisite(s): MUS 2570 and MUS 3640. Junior music major standing or permission of the instructor.

MUS 4730 KEYBOARD LITERATURE (3 credits)

This course will examine literature written for keyboard (piano) from the 16th century to the present. Emphasis will be placed on solo literature of the Baroque, Classic, Romantic, and Contemporary periods. Included are keyboard concertos with orchestra and works for four hands and two pianos. (Cross-listed with MUS 8736).

Prerequisite(s): Permission of instructor.

MUS 4740 VOICE LITERATURE (3 credits)

This course is a study of the development of art song in Europe and America. Emphasis will be given to German and French song literature and their influence on English and American song. (Cross-listed with MUS 8746)

Prerequisite(s): Junior voice or permission of instructor.

MUS 4750 INSTRUMENTAL LITERATURE (3 credits)

This course is a study of the development of instrumental (brass, winds, strings, percussion) literature in Europe and America.

Prerequisite(s): Not open to non-degree graduate students.

Native American Studies (NAMS)

Native American Studies Undergraduate Courses

NAMS 1100 INTRODUCTION TO NATIVE AMERICAN STUDIES (3 credits)

This course will introduce the diverse cultures of Native Americans. Using both historical and contemporary experiences, students will learn about the cultural, historical, social, economic and/or political factors that have shaped Native experience in North America. Students will also acquire new insights about American history and culture by looking through the lens of contemporary native cultures, nations and individuals.

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

NAMS 4060 FIRST NATIONS: SPIRIT IN ARTS AND CULTURES (3 credits)

First Nations: Spirit in Arts and Cultures explores how contemporary Indigenous/Native (First Nations, Metis and Inuit) artists in the lands now known as Canada express their cultures, especially beliefs, through the fine arts. While we will focus on visual culture (sculpture, painting, film, mixed media), literary works (a novel, poetry) and music will also be included. First Nations, Metis and Inuit artists often simultaneously express traditions, their own experiences, and reflections on the present and past through their work. By doing this, they share valuable perspectives on health and healing as well as the national process of Truth and Reconciliation. Trying, so much as possible, to let the artists speak for themselves, we will explore how spirituality manifests itself in contemporary cultures for these Indigenous artists north of the border. (Cross-listed with RELI 4060, RELI 8066, NAMS 8066).

NAMS 4140 INDIAN GAMING (3 credits)

This course will be an in depth study of the history and development of Indian Gaming law and policy. (Cross-listed with PSCI 4430).

Prerequisite(s): NAMS 1100 or permission of the Instructor.

NAMS 4240 CONTEMPORARY TRIBAL NATION BUILDING (3 credits)

This course applies traditional North American tribal governance and leadership beliefs and practices in a critical examination of contemporary tribal governments, tribal courts and programs, and tribal leaders. This course challenges students to assess present tribal governments and leaders concerning their effectiveness in meeting the needs of tribal people today. (Cross-listed with PSCI 4450).

Prerequisite(s): NAMS 1100

NAMS 4270 DECOLONIZING NATIVE AMERICAN HEALTH (3 credits)

This course will utilize an interdisciplinary lens to interrogate Native American health and wellness grounded in the decolonizing theoretical and methodological tools drawn from Medical Anthropology and Native American Studies. Topics covered will include: Health Disparities, Federal Indian Health Policy, Historical Trauma, Medical Mistrust, Traditional Healing, Food Sovereignty and Research Ethics. (Cross-listed with ANTH 8276, ANTH 4270, NAMS 8276).

Prerequisite(s): NAMS 1100 or Instructor permission

NAMS 4400 HISTORY OF NATIVE AMERICAN INDIGENOUS PEOPLES (3 credits)

This survey of North American Indigenous peoples provides a historical overview of the peoples and their interactions with settlers, wars, policies, and other events that have shaped modern Tribal and U.S. relations. (Cross-listed with HIST 8406, HIST 4400).

Prerequisite(s): NAMS 1100; Junior standing or permission of instructor.

NAMS 4440 FEDERAL INDIAN LAW (3 credits)

This course provides an overview of tribal legal authority as it exists within federal law. It includes traditional North American tribal governance and leadership practices. Key topics include the federal-tribal trust relationship, Indian treaties, federal Indian policies and case law, and 20th Century establishment of modern tribal governments and courts. (Cross-listed with PSCI 4440).

Prerequisite(s): NAMS 1100

NAMS 4900 INDEPENDENT STUDY (1-6 credits)

An individualized course of study with a member of the Native American Studies faculty. Either independent research or advanced readings may be pursued. May be repeated, for credit, up to six hours, under a different topic.

Prerequisite(s): NAMS 1100 and permission of the instructor

NAMS 4920 SPECIAL TOPICS IN NATIVE AMERICAN STUDIES (3 credits)

The content of this course varies from semester to semester, giving instructor and students an opportunity to investigate a variety of topics in Native American Studies. May be repeated for credit as long as the topic differs.

Prerequisite(s): NAMS 1100 and/or permission of instructor.

Natural Sciences (NSCI)

Natural Sciences Undergraduate Courses

NSCI 1050 SCIENCE AND CRITICAL THINKING (3 credits)

Introduction to the fundamental laws and principles of science and practice using the scientific method in everyday life to distinguish between scientific evidence and pseudoscientific thinking. Students will examine the science underlying popular pseudoscientific subjects such as ghosts, psychics, Bigfoot and other monsters, and space aliens. Offered every fall semester.

Distribution: Natural/Physical Science General Education course

NSCI 1060 INTRODUCTION TO URBAN HEALTHCARE (2 credits)

Students will explore current topics such as biological, environmental, sociological, and psychological determinants of health and disease, and health issues as they relate to healthcare in urban environments. This course is designed to prepare students to enter health professions and successfully apply these concepts in an urban underserved healthcare setting.

Prerequisite(s): Instructor permission required.

NSCI 3940 WRITING IN CHEMISTRY (2 credits)

Techniques and practices for writing in chemistry. Fulfills 2 credit hours of the third writing course requirement for students with a major in chemistry. (Spring)

Prerequisite(s): ENGL 1160, and CHEM 2400 or 2500 with a grade of C- or better.

Distribution: Writing in the Discipline Sequenced Course

NSCI 4060 BASIC LABORATORY CONCEPTS (1 credit)

This course introduces basic clinical laboratory practices and techniques, principles of laboratory safety and infection control, professional ethics, specimen collection, handling, and processing, laboratory math concepts, and phlebotomy.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program.

NSCI 4080 CLINICAL IMMUNOLOGY & SEROLOGY (1 credit)

The course introduces the study of the immune system and the laboratory tests used to identify its disorders with practical application of immunologic and serologic principles to aid in the diagnosis of infectious and autoimmune diseases. The theory and application of basic molecular diagnostic tools are also addressed. A laboratory component is included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program.

NSCI 4100 CLINICAL CHEMISTRY I (4 credits)

This is the first semester of a two semester series on clinical chemistry. This course introduces the theory, technical performance, and evaluation of clinical chemistry laboratory procedures. Basic physiology of organ systems and clinically significant analytes are emphasized. Correlation of clinical laboratory data with the diagnosis and treatment endocrine disorders is also introduced. The course will include instrumentation, methodologies and quality control. A laboratory component is included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program.

NSCI 4110 CLINICAL CHEMISTRY II (3 credits)

This is the second semester of a two semester series on clinical chemistry. This course expands on the theory, technical performance, and evaluation of chemistry laboratory procedures introduced in NSCI 4100 Clinical Chemistry I. Practical application and correlation of clinical laboratory data with disease states and treatment is emphasized, with a thorough examination of methodologies and problem-solving concepts. Advanced analytical skills, improved laboratory testing efficiency, workload management, and the resolution of unexpected laboratory results are covered in this course. Quality management which includes quality control, quality assurance, and instrument maintenance will also be included. A laboratory component is included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program; NSCI 4100.

NSCI 4120 CLINICAL HEMATOLOGY I (4 credits)

This is the first semester of a two semester series on clinical hematology and hemostasis. The course involves the study and testing of red blood cells, white blood cells, and blood clotting factors. In addition, the function of blood and the blood-forming organs is taught in this course. The course includes an overview of basic microscopy. Practical application and correlation of clinical laboratory data with disease states is emphasized. A laboratory component is included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program.

NSCI 4130 CLINICAL HEMATOLOGY II (3 credits)

This is the second semester of a two semester series on clinical hematology and hemostasis; the course builds on the material introduced in NSCI 4120 Clinical Hematology I. Theoretical aspects of specialized hematology and coagulation techniques are reviewed, with a thorough examination of testing methodologies and problem-solving concepts. Hematology and coagulation disease states are thoroughly studied and correlated to the clinical laboratory data. Emphasis is placed on advanced analytical skills, improved laboratory testing efficiency, workload management, and the resolution of unexpected laboratory results. Quality management which includes quality control, quality assurance, laboratory techniques, and instrument maintenance will also be included. A laboratory component is included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program; NSCI 4120.

NSCI 4140 CLINICAL IMMUNOHEMATOLOGY I (3 credits)

This is the first semester of a two semester series on immunohematology. This course introduces the study of blood group antigens and antibodies as applied to the transfusion of blood and blood components. The course involves the study of the principles, procedures, and clinical significance of transfusion medicine. Included will be a brief overview of genetics, immunology, and regulations governing blood banks. Recognition of unexpected laboratory results will be emphasized. Quality testing which includes quality control, basic transfusion medicine laboratory techniques and procedures, and safety will also be included.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program

NSCI 4150 CLINICAL IMMUNOHEMATOLOGY II (3 credits)

This is the second semester of a two semester series on immunohematology. The course continues the study of the principles, procedures, and clinical significance of transfusion medicine introduced in NSCI 4140 Clinical Immunohematology I. Advanced immunohematology theory and laboratory techniques are taught, with a thorough examination of methodologies and problem-solving concepts. These include, but are not limited to: compatibility testing, adverse transfusion events, hemolytic anemia, differentiating multiple blood group antibodies, and the resolution of unexpected laboratory results. Emphasis is placed on advanced analytical skills, improved laboratory testing efficiency, and workload management. Quality management which includes quality control, quality assurance, laboratory techniques, and instrument maintenance will also be included.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program; NSCI 4140

NSCI 4160 CLINICAL MICROBIOLOGY I (4 credits)

This is the first semester of a two semester series on clinical microbiology. This course introduces the study and laboratory identification of bacteria of clinical significance using culture, biochemical, molecular, and microscopic methods, as well as, the performance and interpretation of bacterial antibiotic susceptibility testing. The course introduces the study of viruses and their detection and identification. Instrumentation and quality control are also included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program

NSCI 4170 CLINICAL MICROBIOLOGY II (4 credits)

This is the second semester of a two semester series in clinical microbiology; the course builds on the material introduced in NSCI 4160 Clinical Microbiology I and NSCI 4080 Clinical Immunology and Serology. This course advances the study and laboratory identification of bacteria of clinical significance, with a thorough examination of methodologies and problem-solving concepts, including the resolution of unexpected laboratory results. The course includes the study of viruses, parasites, and fungi, and their detection and identification. The course continues the study of serologic principles and methods to aid in the diagnosis of infectious diseases. Emphasis is placed on advanced analytical skills, improved laboratory testing efficiency, and workload management. Quality management which includes quality control, quality assurance, laboratory techniques, and instrument maintenance will also be included.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program; NSCI 4160; NSCI 4080.

NSCI 4180 CLINICAL MICROSCOPY I (1 credit)

This is the first semester of a two semester series on clinical urine and body fluid analysis. Study of urine includes physiology of renal function, as well as, the significance of cellular and chemical constituents of urine. Microscopic evaluation of other significant body fluids and clinical diagnoses are introduced. A laboratory component is included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program

NSCI 4190 CLINICAL MICROSCOPY II (1 credit)

This is the second semester of a two semester series on clinical urine and body fluid analysis. This course expands on the theory, technical performance, and evaluation of laboratory procedures introduced in NSCI 4180 Clinical Microscopy I. The physiology of renal function and the significance of cellular and chemical constituents of urine are reviewed, with a thorough examination of methodologies and problem-solving concepts. Practical application and correlation of clinical laboratory data along with patient diagnosis is emphasized. Students develop multi-tasking and trouble-shooting skills to aid in workload management. Quality management which includes quality control, quality assurance, laboratory techniques, and instrument maintenance will also be included. A laboratory component is included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program; NSCI 4180

NSCI 4200 CLINICAL LABORATORY MANAGEMENT I (1 credit)

This course introduces the study of the basic concepts and principles of the management process with particular emphasis on laboratory operations. Laboratory safety, quality control, professionalism, scope of practice, research applications, and educational methodologies are topics included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program

NSCI 4210 CLINICAL LABORATORY MANAGEMENT II (1 credit)

This course builds on the study of the basic concepts and principles of the management process introduced in NSCI 4200 Clinical Laboratory Management I. Laboratory compliance and regulatory issues, financial resource management, human resource management, method validation, professionalism, and quality management are topics included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program; NSCI 4200.

NSCI 4230 MEDICAL LABORATORY SCIENCE CLINICAL CORRELATION (2 credits)

This is a comprehensive course that uses lecture and case studies as an in-depth review of the theory and laboratory findings in all areas of the clinical laboratory including: immunology & serology, chemistry, hematology, immunohematology, microbiology, and microscopy. Practical application and correlation of clinical laboratory data, disease states, and diagnoses are emphasized.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program; NSCI 4080; NSCI 4100; NSCI 4120; NSCI 4140; NSCI 4160; NSCI 4180

Neuroscience (NEUR)

Neuroscience Undergraduate Courses

NEUR 1000 SUPERHEROES, ZOMBIES, CYBORGS AND DROIDS: COULD THEY LIVE AMONG US? (3 credits)

Neuroscience is constantly pushing the boundaries of what is possible, and concepts once relegated to the realm of science fiction are quickly becoming not only possible, but inevitable. In this course, we will use superheroes, zombies, cyborgs, and droids as vehicles into the wonderful and exciting world of neuroscience and how the brain and nervous system function. Mind control, enhanced strength, artificial brains...these may all seem like pure fantasy, but the reality may surprise you. This course fulfills the General Education: Natural and Physical Sciences requirement.

Prerequisite(s): High School Biology and High School Chemistry recommended. Not open to non-degree graduate students.

Distribution: Natural/Physical Sci General Education lecture

NEUR 1520 INTRODUCTION TO NEUROSCIENCE I (3 credits)

The nervous system is intricate, complex, and is the subject of one of the most exciting fields in the life sciences. This course is part 1 of a 2-semester sequence designed for neuroscience majors or students who are contemplating neuroscience as a major. This course will focus on understanding how the nervous system interacts at the cellular and molecular levels: anatomy and function of neurons, communication within and between neurons, and how neurons interact to perceive and process sensory information.

Prerequisite(s): High school biology and chemistry. Not open to non-degree graduate students.

NEUR 1540 INTRODUCTION TO NEUROSCIENCE II (3 credits)

The nervous system is intricate, complex, and is the subject of one of the most exciting fields in the life sciences. This course is part 2 of a 2-semester sequence designed for neuroscience majors or students who are contemplating neuroscience as a major. This course will focus on understanding how the nervous system interacts at the organismal, behavioral and cognitive levels: how the nervous system develops, how the motor system, hormones, and physiology influences behavior, and how cognition and systems neuroscience leads to understanding of the mind.

Prerequisite(s): NEUR 1520 or permission of instructor. Not open to non-degree graduate students.

NEUR 1560 NEUROSCIENCE PATHWAYS TO DISCOVERY (3 credits)

Experience the tools, strategies, challenges, and joy of discovery in neuroscience in a hands-on, active-learning environment. This laboratory/lecture course will introduce concepts of research exploration, guide students in developing topics for experimentation, and help students build ways to assemble the pieces needed to answer questions in neuroscience.

Prerequisite(s): Recommend concurrent with NEUR 1520 or NEUR 1540. Not open to non-degree graduate students.

NEUR 3500 BIOLOGICAL PRINCIPLES OF AGING (3 credits)

The Biological Bases of Aging Course provides a survey of the primary topics in the biology of aging field for undergraduate students. This a required course for the Gerontology major. By the end of the course, students will understand major theories, biological methods, and seminal research studies in the biology of aging field. Furthermore, students will learn how to critically analyze and interpret primary research about biological aging. This course provides preparation for students considering graduate school in gerontology or biology, geriatric nursing and social work, geriatric medicine, neuroscience, psychology, and exercise science. (Cross-listed with GERO 3500, BIOL 3500)

Prerequisite(s): Sophomore/Junior/Senior Standing. Not open to non-degree graduate students.

NEUR 3600 RESEARCH METHODS IN NEUROSCIENCE (3 credits)

In this course, students will get an introduction to how neuroscientists acquire, interpret, discuss, and share knowledge. Skills covered include study design, reading primary research articles, interpreting statistics, and writing scientific papers.

Prerequisite(s): PSYC 3130 and ENGL 1160 (or permission of Instructor) Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

NEUR 4000 SYSTEMS NEUROSCIENCE (3 credits)

This course is designed to provide a solid understanding of the peripheral and central connections that make the systems of the body function. Data and theories of brain-behavior relationships from current research in neuroscience will be discussed. (Cross-listed with NEUR 8006).

Prerequisite(s): NEUR 1520 and NEUR 1540 or permission. Not open to non-degree graduate students.

NEUR 4050 ADVANCED BIOLOGY OF AGING (3 credits)

This course covers biological aging topics at an advanced level, and is designed for undergraduate and graduate students who have some prior knowledge about biology or aging. The course will be interdisciplinary in nature and focus on topics relevant to gerontology, biology, psychology, and exercise science. Students will learn how to think critically about primary research in the biology of aging. Furthermore, they will apply their knowledge of the biology of aging field by creating a handbook of healthy aging for older adults. (Cross-listed with GERO 4050, GERO 8056).

NEUR 4160 NEUROPHARMACOLOGY (3 credits)

Neuropharmacology will introduce students to ligand-receptor interactions and their effects on behavior, cognition, and development. This course will characterize the molecular structure of ligands and how these small molecules or biologics affect central nervous system receptors and transporters. Students will learn about structure-activity relationships and principles of pharmacology: distribution, metabolism, pharmacokinetics, and elimination) and explore the historical milestones in drug development. We'll also discuss the dynamic actions of drugs of abused drugs and the mechanisms of action. For undergraduate Neuroscience Majors, the course counts as a Neuroscience Block 1. (Cross-listed with NEUR 8166, PSYC 4160, PSYC 8166).

Prerequisite(s): Need at least one: NEUR 1520 or NEUR 1540 or PSYC 1020 or BIOL 1450. And need NEUR 3600 or PSYC 3140. PSYC 4230 recommended for students who have not taken NEUR 1520 or BIOL 1450.

NEUR 4200 ADVANCED NEUROSCIENCE LABORATORY (3 credits)

This course is designed as a capstone laboratory course for Neuroscience majors. The course will provide students with hands-on experience in collecting data in diverse areas of neuroscience, analyzing these data, interpreting the data, and preparing written and verbal presentations of the data.

Prerequisite(s): NEUR 1520, NEUR 1540, PSYC 3130, PSYC 3140 or NEUR 3600, and BIOL 1450. Not open to non-degree graduate students.

NEUR 4230 BEHAVIORAL NEUROSCIENCE (3 credits)

A comprehensive study of the relationship of the nervous and other organ systems to behavior. Research on both human and other animal species is considered. (Cross-listed with PSYC 4230).

Prerequisite(s): BIOL 1450 OR PSYC 1010

NEUR 4290 NEUROETHOLOGY (3 credits)

In the field of Neuroethology a major goal is to understand the neural bases of animal behaviors in a natural context. In this course students will investigate how behaviors are generated and modulated by the nervous system in organisms ranging from insects to mammals. We will explore the neural mechanisms underlying a variety of animal behaviors as they interact with their natural environment ranging from sensory perception of the world (e.g. echolocation, electrolocation), to locomotor movements (e.g. flying, swimming), to more complex behaviors (e.g. learning, memory). (Cross-listed with NEUR 8296, BIOL 4290, BIOL 8296, PSYC 8296).

Prerequisite(s): NEUR 1520, NEUR 1540 and BIOL 1750; or by permission of instructor. Not open to non-degree graduate students.

NEUR 4330 SOCIAL NEUROSCIENCE (3 credits)

This course will evaluate the biological substrates of sociality and social behavior, and explore the impact of social environments on brain function and development. Students in the course will explore the molecular, cellular, neurotransmitter, and endocrine influences on social behavior, including affiliative care, aggression, social bonding, altruism, and social cognition. (Cross-listed with NEUR 8336, PSYC 8336).

Prerequisite(s): NEUR 1520 or NEUR 1540, and BIOL 1450, or permission of Instructor. Not open to non-degree graduate students.

NEUR 4340 ADVANCED BEHAVIORAL NEUROSCIENCE (3 credits)

Building on content from Introductory Neuroscience courses, this course will deeply explore the fundamental link between behavior and biological processes. Prepare to unravel the mysteries of behavior, cognition, emotions, sensory systems, and disorders by exploring cutting-edge neuroscience methods to reveal the specific cells and neurobiological processes that give rise to human and animal behavior. PSYC 4230 should not be taken after the completion of this course. (Cross-listed with NEUR 8346, PSYC 4340).

Prerequisite(s): NEUR 1520 and NEUR 1540, or PSYC 4230

NEUR 4480 NEUROIMMUNOLOGY (3 credits)

The course explores the bi-directional mechanisms by which the brain and the immune system communicate with each other in health and during injury or infection. This course also introduces human immunology as a basis for understanding the advanced content in neuroimmunology. Topics include innate immunity in the central nervous system (CNS), inflammation in neurodegenerative diseases, CNS infections and autoimmune diseases. Reading and evaluating neuroimmunology primary literature, presentation and scientific writing will be emphasized. Counts as a Neuroscience Block 1 course requirement. (Cross-listed with NEUR 8486).

Prerequisite(s): NEUR 1520 and NEUR 1540, or permission of Instructor.

NEUR 4640 NEURAL MECHANISMS OF SUBSTANCE USE DISORDERS (3 credits)

This course details how the brain changes during and after the administration of illicit substances. Illicit drugs 'hijack' the natural reward pathways and brain circuits. Material highlights brain regions, neural circuits, and structural alterations that accompany illicit drug use. Modern neuroscience research techniques that measure and manipulate brain function reveal opportunities for therapeutic interventions. The course will explore how therapeutic interventions repair the brain. (Cross-listed with NEUR 8646).

Prerequisite(s): NEUR 1520 and NEUR 1540 and either NEUR 3600 or PSYC 3140.

NEUR 4650 NEUROMECHANICS OF HUMAN MOVEMENT (3 credits)

A study of basic principles of neural process as they relate to human voluntary movement. Applications of neural and mechanical principles through observations and assessment of movement, from learning to performance, as well as development. (Cross-listed with BMCH 4650).

Prerequisite(s): NEUR 1540 or permission of instructor

NEUR 4810 BEHAVIORAL GENETICS (4 credits)

This lecture and laboratory course will explore the interaction between behavior and genetics. Topics addressed will include research systems used in behavioral genetics research, ways of studying animal behavior, gene function, gene expression, genetic manipulation, genome sequencing, and bioinformatics. Research techniques will include behavioral observations, cognition assays, and traditional and cutting edge genetics research techniques and analyses (DNA/RNA isolation, PCR, gel electrophoresis, transgene generation, quantitative PCR, next generation sequencing). Students will design, conduct, analyze, and present semi-independent research projects over the course of the semester. (Cross-listed with BIOL 4810).

Prerequisite(s): BIOL 2140

NEUR 4840 GLIA IN HEALTH AND DISEASE (3 credits)

While neurons are often highlighted as the primary drivers of brain function, evidence is rapidly growing that a lesser-known class of cells, glia, are intimately involved in virtually all aspects of central nervous system function. This course is designed for students looking for an in-depth discussion on the various glial cells of the central system, with an emphasis on cutting-edge research and the techniques used to study them. Counts as a Block 1 Neuroscience requirement. (Cross-listed with NEUR 8846).

Prerequisite(s): NEUR 1520 or NEUR 1540, or permission of Instructor.

NEUR 4850 NEUROBIOLOGY OF LEARNING AND MEMORY (3 credits)

This course will evaluate the neurobiology of learning and memory. In this course students will explore how learning and memory processes are encoded and stored at the cellular and molecular neurobiology levels. We will examine both classic and cutting edge studies to see how changes in molecular activity, genetics, and cellular physiology can influence learning and memory processes. Counts as a Block 1 course for Neuroscience Majors. (Cross-listed with NEUR 8856).

Prerequisite(s): NEUR 1520 & NEUR 1540 or Instructor Permission. Not open to non-degree graduate students.

NEUR 4870 MOLECULAR AND CELLULAR NEUROBIOLOGY (3 credits)

This course presents foundational topics in molecular and cellular neurobiology in the context of how the nervous system is functionally organized. Topics include: nervous system cell types and their subcellular organization; electrical properties of neurons and glia; energy metabolism and biochemistry of the brain; intra- and intercellular neuronal signaling; the regulation of gene expression in neuronal cells; synaptic plasticity; and how these are altered in disease. (Cross-listed with BIOL 4870, BIOL 8876, NEUR 8876).

Prerequisite(s): NEUR 1500, or both NEUR 1520 and NEUR 1540, or BIOL 3020, or permission of instructor.

NEUR 4890 GENES, BRAIN, AND BEHAVIOR (3 credits)

This course will evaluate the complex interaction between an organism's genome and neural activity pattern in the nervous system as related to behavior. In this course students will explore how changes in gene expression (allelic variants, epigenetics, differential regulation) and gene networks within neural tissue can reciprocally influence behaviors such as communication, foraging, reproduction, and cognition. (Cross-listed with NEUR 8896, BIOL 4890, BIOL 8896, PSYC 8896).

Prerequisite(s): NEUR 1520, NEUR 1540, and BIOL 2140. Or by permission of instructor. Not open to non-degree graduate students.

NEUR 4910 SPECIAL TOPICS IN NEUROSCIENCE - BLOCK 1 (3 credits)

Fulfills Neuroscience BLOCK 1 or Neuroscience Elective requirement. A study of designated special topic in neuroscience. Students may repeat this class as long as the specific topic is not duplicated.

Prerequisite(s): NEUR 1520, junior-senior status (sophomore status by permission), or instructor permission. Not open to non-degree graduate students.

NEUR 4920 SPECIAL TOPICS IN NEUROSCIENCE - BLOCK 2 (3 credits)

This course fulfills Neuroscience BLOCK 2 or Neuroscience Elective requirements. A study of designated special topic in neuroscience. Students may repeat this class as long as the specific topic is not duplicated.

Prerequisite(s): NEUR 1520 or NEUR 1540, junior-senior status (sophomore status by permission), or instructor permission. Not open to non-degree graduate students.

NEUR 4930 SPECIAL TOPICS IN NEUROSCIENCE - NEURO ELECTIVE BLOCK (3 credits)

This course will provide for an in-depth study of a designated topic in neuroscience that is different than the focus of an existing course in the neuroscience curriculum. Students may repeat this class as long as the specific topic is not duplicated. Fulfills a Neuroscience Elective requirement.

Prerequisite(s): NEUR 1520 or NEUR 1540, or Instructor permission.

NEUR 4960 EXPERIENTIAL STUDY IN NEUROSCIENCE (1-6 credits)

Focused research projects, data analysis, and/or directed readings with faculty supervision. Oral and written reports based on empirical research are expected outcomes.

Prerequisite(s): NEUR 1520; PSYC 3130. PSYC 3140 recommended. Instructor permission required.

Pharmacy Sciences (PHSI)

Pharmaceutical Sciences Undergraduate Courses

PHSI 1010 INTRODUCTION TO FOUNDATIONS AND CAREER PATHS IN PHARMACEUTICAL SCIENCES (1 credit)

This course provides an overview to the field of pharmaceutical sciences. It will discuss the roles of a pharmaceutical scientist and the career options one can pursue in pharmaceutical sciences. A description will be given for how a Bachelor of Science in Pharmaceutical Sciences (BSPS) degree prepares one for these options. Lectures will be given by UNMC/ UNO faculty and practitioners in these fields. This course will introduce professional development related to pharmaceutical sciences, including concepts for application preparation for professional and graduate careers.

PHSI 3110 CURRENT RESEARCH TOPICS IN PHARMACEUTICAL SCIENCES (1 credit)

Lectures will be given by faculty members in the UNMC Departments of Pharmaceutical Sciences and Pharmacy Practice, UNO Department of Chemistry or special guests from industry and academia. The goal of this elective course is to provide the student with examples of how pharmaceutical science research is being applied to solve drug therapy challenges in patients. The basic approach for each lecture will be: 1) this is the disease state, 2) this is the current therapy, 3) these are the problems with this therapy and, 4) this is what we are researching to solve the problem. This course will also explain how modern scientific methods such as, atomic force microscopy, microcalorimetry, confocal microscopy, LCMS, and bioimaging are used to better understand disease states and identify new drugs and drug therapies. Offered in Fall and Spring semesters. **Prerequisite(s):** PHSI 1010, concurrent enrollment in PHSI 1010 or permission of instructor.

PHSI 3210 FOUNDATIONS OF MOLECULES TO MEDICINE (3 credits)

The first of a two courses sequence about the processes of drug discovery and how molecules become medicines. Emphasis will be placed on natural products and synthesized drugs, and the aspects involved in bringing drugs to the market (including target identification, validation, lead optimization, ADME phases and studies, IND options, and clinical trials). Offered Fall semesters.

Prerequisite(s): "C" grade or higher in CHEM 2260 & CHEM 2274, and PHSI 1010. Also required: Concurrent enrollment in CHEM 4650 and 4654 or prior completion with minimum "C" grade; OR departmental permission.

PHSI 4010 INTRODUCTION TO PHARMACEUTICAL SCIENCE (4 credits)

Introduction to pharmaceutical terminology, drug discovery and development process, concepts and principles of pharmaceutical formulation and delivery, functional group chemistry, acid/base chemistry of drug molecules, chemical basis of drug action, receptor concepts, basic pharmaceutical calculations, principles of chemical kinetics and stability. Offered in Fall semesters.

Prerequisite(s): MATH 1940 or MATH 1950; and CHEM 4650, CHEM 4654; or permission of instructor. Not open to non-degree graduate students.

PHSI 4410 PHARMACEUTICAL SCIENCES RESEARCH EXPERIENCE (1 credit)

Practical research experience for students in the bachelor of science program in Pharmaceutical Sciences. Students will work with faculty in UNO Chemistry or UNMC Pharmaceutical Sciences or Pharmacy Practice to select a research laboratory where they will carry out an independent investigation for one semester.

Prerequisite(s): PHSI 3110, concurrent enrollment in PHSI 3110, or permission of instructor.

Philosophy (PHIL)

Philosophy Undergraduate Courses

PHIL 1010 INTRODUCTION TO PHILOSOPHY: MEANING OF LIFE (3 credits)

We all find ourselves at one point or another wondering what everything adds up to. This sentiment manifests itself as different questions: 'why are we here?', 'what's my purpose?', 'how can I lead a fulfilling life?', or, perhaps most relevantly, 'what is the meaning of life?'. Now that you're in college, these questions are of the essence. Where will you go from here? Which skills should you develop? Which major should you choose? What should you pursue? Love? Family? Friendship? Education? Career? Fame? Fortune? Religious devotion? Service to others? Fulfillment? Happiness? What does it mean to be happy or fulfilled? In this course, we're going to set all else aside and dedicate real effort to coming to grips with these questions. Our focus will be on developing our ability to think about what we're asking and acquiring the tools necessary to assess the responses on offer.

Distribution: Humanities and Fine Arts General Education course

PHIL 1020 CONTEMPORARY MORAL PROBLEMS (3 credits)

Introduction to the application of basic moral concepts and theories to contemporary moral issues. Discussion topics will vary and may include: distribution of wealth and resources, environmental ethics and sustainability, animal rights, capital punishment, torture, euthanasia, abortion, cloning, genetic engineering, privacy rights, drug laws, marriage and sexuality, gun control, and affirmative action.

Distribution: Humanities and Fine Arts General Education course

PHIL 1030 INTRODUCTION TO PHILOSOPHY: BRAINS, MINDS, AND MACHINES (3 credits)

Introduction to Philosophy: Brains, Minds, and Machines examines central questions in philosophy about the nature of the mind, the self, human rationality, perception/experience, and technology through the lens of work in cognitive science, neuroscience, artificial intelligence, and psychology. Some major topics and questions include: What are minds? Is the human mind a digital computer? Could a machine - e.g., a robot or a computer - be truly intelligent, or have experiences like humans and animals do? How does the brain "represent" its environment? In engaging these questions, the course also introduces students to foundational issues in cognitive science and artificial intelligence including: nativism vs. empiricism, mental representation, classical artificial intelligence vs. neural networks, modularity, evolutionary psychology, embodied cognition, and extended cognition.

Distribution: Humanities and Fine Arts General Education course

PHIL 1040 INTRODUCTION TO PHILOSOPHY: LAW, POLITICS, AND SOCIETY (3 credits)

A first course in philosophy designed to introduce students to the foundational theories and concepts of legal philosophy, ethics, and social/political philosophy. Students engage theories and concepts by exploring how they are relevant to life in contemporary society. Discussion topics may include free speech, immigration, racism, authoritarianism and populism, human rights, and humanitarian intervention.

Distribution: Humanities and Fine Arts General Education course

PHIL 1050 INTRODUCTION TO PHILOSOPHY: PHILOSOPHY, TECHNOLOGY, AND SCIENCE FICTION (3 credits)

This course introduces core philosophical ideas through a selection of accessible science fiction short stories and films. Does a society's technology determine its values and development? Does technology reflect our values or is it neutral? How does the development of new technologies help or harm people? Will ordinary humans be overtaken by artificially intelligent machines? Can an algorithm make ethical decisions? We will be exploring these questions in the philosophy of technology through how technological advances have been presented in science fiction. In addition, we will also be exploring the philosophical issues around how biological systems could be manipulated. What are the prospects and dangers of biohacking? What are the boundaries of what makes us human? How could different life and ecosystems evolve? How would alien life evolve? Finally, the course will ask questions about the boundaries of science. Should scientists refrain from researching certain scientific questions for ethical reasons?

Distribution: Humanities and Fine Arts General Education course

PHIL 1210 CRITICAL REASONING (3 credits)

A study of the principles of correct reasoning: induction, deduction, formal and informal fallacies. Critical reasoning is excellent preparation for the LSAT and the reasoning portions of other examinations for graduate study.

Distribution: Humanities and Fine Arts General Education course

PHIL 1230 LOGICAL REASONING FOR STANDARDIZED GRADUATE EXAMINATIONS (3 credits)

This course offers an intensive, boot-camp training in logical reasoning which emphasizes the specific skills needed to solve the logic problems included on many standardized graduate admissions exams, such as the LSAT (Law School Admission Test), GMAT (Graduate Management Admission Test), and MCAT (Medical College Admission Test). Substantial portions of these exams assess critical reasoning and logical problem solving ability. This course offers a condensed review of logical techniques required to analyze and solve such problems, not only with the goal of improving student performance on exams, but also because examining the underlying structure of these reasoning problems helps to improve logical analysis and evaluation skills across a wide range of other purposes.

PHIL 2010 SYMBOLIC LOGIC (3 credits)

A first course in symbolic logic designed to introduce students to formal systems of sentential logic and predicate logic. The course explores the nature of both syntax (the formal structure of elements of language) and semantics (interpretive relations between language and subject matter including notions such as truth and reference). Students learn how to translate between English and formal languages, how to construct truth-tables and interpretations to test for key semantic properties, and how to construct derivations. In addition, students will consider the nature and relationships between important logical properties and explore foundational issues in logical metatheory. Throughout the course, students will encounter broad philosophical themes such as the purpose of language, constraints on translation, and nature of meaning itself. (The study of logic is also excellent preparation for the LSAT and the reasoning portions of other examinations for graduate study.) (Cross-listed with MEDH 2010).

PHIL 2020 INTRODUCTION TO PHILOSOPHY OF MIND (3 credits)

This course is an introductory overview of fundamental issues in the study of mind, thinking, and consciousness. Students explore these philosophical issues from the perspective of current research in psychology, neuroscience, linguistics and computer science.

PHIL 2030 INTRODUCTION TO ETHICS (3 credits)

A critical study of basic moral concepts and problems contained in ethical theories of important western philosophers: relativism, egoism, happiness, obligation, justice, freedom, conscience, love, religious precepts, moral rules, moral attitudes and moral language.

Distribution: Humanities and Fine Arts General Education course

PHIL 2040 INTRODUCTION TO EAST ASIAN PHILOSOPHY (3 credits)

This course makes a critical and philosophical inquiry into the fundamental questions raised in East Asian Philosophy, typically including a critical evaluation of the traditional theories in Confucianism, Buddhism, and Taoism of China, Korea, and Japan, as well as contemporary responses to those theories, e.g., Kyoto School or Maoism.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

PHIL 2300 BIOMEDICAL ETHICS (3 credits)

In the rapidly evolving fields of medicine and healthcare, ethical considerations play an ever-increasing role. This course is designed to equip students with the conceptual tools necessary for ethical reasoning and decision-making in medical contexts. This course investigates critical issues such as informed consent, end-of-life decisions, reproductive ethics, genetic testing, and research ethics. Ideal for students thinking about a career in healthcare, philosophy majors, medical humanities majors, or anyone interested in grappling with the complex ethical questions that accompany advancements in biomedical science and healthcare practice. (Cross-listed with MEDH 2300).

PHIL 3000 PHILOSOPHY WRITING SEMINAR (3 credits)

This course focuses on writing instruction, with a particular emphasis on logical argument, editing and revision, and research methods in the discipline of philosophy. It is designed for students who are beginning to take upper-level coursework and is suitable for Philosophy majors, minors, and non-majors, particularly those who seek additional preparation in argument-focused writing.

Prerequisite(s): Composition II or the equivalent, and three hours of Philosophy, are required.

Distribution: Writing in the Discipline Single Course

PHIL 3010 PHILOSOPHY OF JUSTICE (3 credits)

An examination of the concept of justice from Greek moral philosophy to modern moral philosophy with focus on the problems of modern moral philosophy and the application of those ideas in government and society.

Prerequisite(s): Junior or 3 credits in philosophy.

PHIL 3020 THE JUSTIFICATION OF PUNISHMENT (3 credits)

The course examines the major philosophical arguments concerning the conditions under which punishment is justifiable, and provides a background of ethical theory in order to make these arguments comprehensible.

Prerequisite(s): Junior, or 3 credits in philosophy, or 1 course in criminology & criminal justice.

PHIL 3040 PHILOSOPHY OF LAW (3 credits)

An overview of central issues in the philosophy of law, including the nature, source, and legitimacy of law, the relationship between law and morality, competing theories of legal reasoning and interpretation, the sources and structure of rights and responsibilities, and theories of punishment.

Prerequisite(s): Junior standing or 6 hours in Philosophy.

PHIL 3050 ETHICAL THEORY (3 credits)

This course surveys issues and controversies in meta-ethics, that is, in the theoretical understanding of ethics. A central organizing question is whether or not there are objective ethical facts that we use ethical language to report and discuss. If there are ethical facts, what kind of facts are they and how could we know them? There seems to be no scientific experiment or mathematical proof which could demonstrate an ethical claim. If there are no ethical facts, is ethics simply a matter of emotional self-expression, arbitrary cultural norms, or the like? If so, can there be significant ethical truth and substantive ethical knowledge? All in all, students will survey a variety of proposals on the fundamental nature of ethics and develop an understanding of their relative strengths and weaknesses.

Prerequisite(s): PHIL 2030 or 6 hours in philosophy or permission of instructor.

PHIL 3060 VALUES AND VIRTUES (3 credits)

This course explores advanced topics in ethics with particular emphasis on value theory and virtue ethics. Topics to be considered include the meaning and status of value claims, sources of value, intrinsic goods, agent-relative goods, practical reason, moral development, happiness, moral ambiguity, moral luck, the identification of virtues, and relationships of care, trust, and responsibility. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8215)

PHIL 3070 LEADERSHIP ETHICS IN PRACTICE (3 credits)

In today's complex and interconnected world, ethical leadership is a necessity. Ethical leaders inspire trust, foster a positive organizational culture, and drive sustainable success. This course aims to equip future leaders with the essential moral knowledge and reasoning skills required to navigate the broad and difficult challenges they will confront. In particular, students will study the philosophical foundations of ethical leadership, examine how these illuminate historical and contemporary cases of leadership success and failure, and apply the lessons to their own experience. In short, this course aims to cultivate the ethical leadership skills that will not only propel careers but will help students meaningfully contribute to a better, more responsible world.

PHIL 3110 HISTORY OF ANCIENT PHILOSOPHY (3 credits)

A survey of the major philosophers and schools of ancient Greece and Rome: pre-Socratics, Plato, Aristotle, Cynics, Epicureans, Stoics, Skeptics, and Neo-Platonists. The original texts examined in this course explore fundamental questions about the purpose of human life and the value of self-examination, the nature of the universe and possibility of knowledge, and the achievement of virtue and human happiness.

PHIL 3130 HISTORY OF MODERN PHILOSOPHY (3 credits)

The Modern Period (roughly 1600 to 1800) was a time of great scientific advancement, political upheaval, and philosophical progress. During this period, philosophers wrestled with fundamental metaphysical questions about the nature of matter, causation, mind, and God, key epistemological questions regarding the nature and grounds of knowledge, and central ethical and political questions about our rights and duties. As such, the philosophical work of this period provides the foundations for contemporary work in epistemology, metaphysics, philosophy of mind, philosophy of science, ethics, and political philosophy. In this course, students will explore the interpretation and implications of work by some of the most influential thinkers of the period such as Descartes, Spinoza, Locke, Leibniz, Berkeley, Hume, Reid, and Kant.

Prerequisite(s): 3 hours in Philosophy or permission of the instructor.

PHIL 3140 NINETEENTH CENTURY PHILOSOPHY (3 credits)

An examination of major views in 19th century philosophy including the development of German idealism, British empiricism, and Marxism. Special attention will be paid to the origins of existentialism, pragmatism, and modern empiricism as reactions to 19th century positions.

Prerequisite(s): Junior or permission of instructor.

PHIL 3150 PHILOSOPHY OF HISTORY (3 credits)

This course is designed to introduce students to the thinkers and issues in the philosophy of history (and historiography). After being coined by Voltaire, the term 'philosophy of history' has taken on different meanings. Prior to the twentieth century, philosophy of history meant speculation over the course and aims of history. It sought to investigate the subject matter of history, that is, the historical process itself. Consequently, philosophers of history aimed at comprehensive views of this process. During the twentieth century, however, philosophy of history became "analytical or critical." The aim of this approach is to question and criticize the ways that historians work, so issues of knowledge and explanation have become very important for the present-day philosopher of history. Although the course takes a thematic approach to the study of the philosophy of history, prominent philosophers who have investigated history will be introduced throughout the course.

Prerequisite(s): Junior or 3 credits in philosophy.

PHIL 3170 ETHICS IN BUSINESS (3 credits)

An application of ethical principles to moral issues arising in business: corporate responsibility and agency, fiduciary duties, discrimination, advertising, whistle-blowing, trade secrets, environmental protection, product safety and liability, employee rights, government regulation, investment and duties to shareholders, commodification and consumerism.

Distribution: Humanities and Fine Arts General Education course

PHIL 3180 ENVIRONMENTAL ETHICS (3 credits)

This course introduces students to the thinkers and issues that make environmental ethics what it is today. It includes the analysis and evaluation, from ethical viewpoints, of such topics as: intrinsic value of animals, plants and ecosystems; animal rights; climate change; conservation and preservation; environmental law and politics; obligations to future generations; sustainability and new technologies; war, immigration, and the environment; human rights and the environment; nature and the built environment; and environmental activism. (Cross-listed with ENVN 3180).

Prerequisite(s): Junior or 3 hours of philosophy.

PHIL 3200 PHILOSOPHY OF RELIGION (3 credits)

What must a being be like to be rightfully called "God"? Why think that such a being exists? Why would such a being allow there to be suffering and evil in the world? Could you ever be justified in believing that a miracle occurred? Are faith and reason compatible? What is the role of religion in morality? Students will consider these BIG questions and the best answers to them.

PHIL 3210 SOCIAL PHILOSOPHY (3 credits)

An examination of the problems and concepts of social and political philosophy.

Prerequisite(s): 3 credits in philosophy or junior or permission of instructor.

PHIL 3220 PHILOSOPHY OF ART (3 credits)

The course is an inquiry into historical and contemporary philosophical perspectives on the making, interpreting and criticizing of works of art, including relations of the arts to other dimensions of cultures. Students will wrestle with foundational questions (e.g., "What is beauty?", "What is art?", "What makes good art good?", "Is there a right way to interpret art?"), consider connections between art and ethics, culture, and politics (e.g., "Can an artwork be both immoral and good?", "Can a particular culture have exclusive rights to an artform?", "How does public art create political communities and divisions?"), explore questions within particular arts (e.g., "Can music represent?", "Why do we respond emotionally to fictions?"), and experience and evaluate art in light of these investigations. (Cross-listed with PHIL 8225)

Prerequisite(s): Junior or 3 credits in philosophy.

PHIL 3230 PHILOSOPHY AND POPULAR MEDIA (3 credits)

This course examines Philosophy in the context of contemporary popular media including graphic novels, interactive art, video games and VR worlds, or other still-emergent formats. The specific forms of popular art or media selected as a focus area during each term may change in successive course offerings, to suit thematic emphases or new developments (e.g. webseries graphic novels, video games and their associated literature, fictional universes shared between comics and film).

PHIL 3260 HISTORY OF AMERICAN PHILOSOPHY: 20TH CENTURY (3 credits)

This course is designed to introduce students to the thinkers and movements in 20th century American thought, particularly pragmatism, idealism, naturalism, new realism, and critical realism. One chief concern is the issue of what constitutes American philosophy. Is there such a thing as "American philosophy"? This course is intended to address this issue. To set the stage for a look at 20th century philosophical thought, students will briefly look at American thought prior to the 20th century: Puritan thought, the American Enlightenment, and Transcendentalism (Emerson and Whitman). Students will then examine the classical American pragmatists (Royce, Peirce, James, and Dewey), as well as contemporary pragmatists (Rorty, Fraser, Putnam, and Hacking). The course will end with a look at naturalism, new and critical realism, and contemporary moral, social, and political philosophy.

Prerequisite(s): Junior or 3 credits in philosophy.

PHIL 3300 EARLY ANALYTIC PHILOSOPHY (3 credits)

This course focuses on the foundations of the Analytic tradition (from 1879 to 1930). During this period, central figures such as Gottlob Frege, Bertrand Russell, G.E. Moore, Ludwig Wittgenstein, and Frank Ramsey aimed to bring clarity and precision to a wide range of philosophical problems by focusing on fundamental issues in the philosophy of logic and the philosophy of language. Understanding the developments of this period is essential to understanding the development of philosophy in the 20th and 21st centuries.

Prerequisite(s): 3 credits in philosophy or permission of instructor.

PHIL 3370 CONCEPTS OF NATURE (3 credits)

An examination of key philosophical conceptions of nature from the Greeks through the 21st century. Topics covered include concepts of time, the cosmos, causation, determinism, natural law, the relationship between God and nature, and the place of humans and animals in nature.

Prerequisite(s): Previous experience in philosophy, especially PHIL 3110, would be helpful.

PHIL 3400 PHILOSOPHY OF NATURAL SCIENCE (3 credits)

An examination of the philosophical problems associated with the methods of the natural sciences, the presuppositions of scientific inquiry, and the nature of scientific laws and theories.

Prerequisite(s): 3 credits in philosophy or permission of instructor.

PHIL 3410 PHILOSOPHY OF SOCIAL SCIENCE (3 credits)

This course introduces students to central philosophical issues that are raised by and within the practice of social science. Some key questions are: In which respects is social science similar to natural science and in which respects is it dissimilar? Does social science aim at forming generalizable explanations, or does it seek to provide humanistic understanding? Can social science be conducted in a purely objective, disinterested way, or does the practice of social science always rely on at least implicit value assumptions? Must responsible researchers interrogate their research for such assumptions, and, if so, what does it take for research to "pass?"

Prerequisite(s): 3 credits in philosophy and junior, or permission of instructor.

PHIL 3430 PHILOSOPHY OF BIOLOGY (3 credits)

Philosophy of Biology will consider foundational conceptual issues in biology like the nature and structure of biological explanation, the possibility of laws in evolutionary theory, the relationship between different causal components of biological processes (genetics and development), the problem of species reality and classification, the explanatory character of ascription of biological function, and the extension of biological explanations to human psychology and culture. It is designed for both the philosopher who can explore central epistemological and metaphysical issues in the context of biological science and for the biologist who wants to explore the conceptual foundations and presuppositions of her science.

Prerequisite(s): 3 hours in philosophy or biology or permission of instructor.

PHIL 3450 PHILOSOPHY OF MEDICINE (3 credits)

This course considers a range of philosophical questions raised by and within the practice of medicine. The course begins with a conceptual investigation of the meaning of "health" from "illness." Is the classification of individuals as healthy or ill an objective, scientific matter? Or is it instead a matter of social and ethical values? What follows from answering this question one way, versus another? This introduction forms the backdrop against which we move on to investigate a range of further topics.

Examples of some of the topics that may be covered include: medical and social models of disability; the role morality of doctors and other medical providers; abortion, euthanasia, and conscientious objection in the healthcare professions; health measurement and quality of life; "death panels" and health resource rationing; conditions on appropriately voluntary and informed consent to medical procedures; and the ethics of biomedical research. (Cross-listed with MEDH 3450).

Prerequisite(s): 6 hours of Philosophy OR Sophomore status OR permission of the instructor

PHIL 3480 PHILOSOPHY OF RACE (3 credits)

Where does the concept of race come from? Where did the racial categories on the US census come from? How has the concept of race influenced scientific theories? Do empirical findings of genetic differences between racial groups show that races are biologically real? Why are racial categories used in medicine? Can all health disparities between races be explained by social factors? Is some particular concept of race necessary for political and social opposition to racism? The course will involve reading original articles and book extracts from a range of disciplines, including history, philosophy, and several sciences. These articles will be explained and discussed in class through a philosophical lens. The course aims to provide students with the philosophical tools and concepts to think about race and racism in a nuanced and reflective way.

Prerequisite(s): Sophomore Status OR 6 credit hours Philosophy OR Permission of the Instructor

Distribution: U.S. Diversity General Education course

PHIL 3490 GENDER AND PHILOSOPHY (3 credits)

This course examines philosophical arguments concerning gender and sexual difference, gender issues and women in the history of philosophy, and major views in feminist theory. Using arguments derived from feminist theory, we will undertake a critical inquiry into the ways in such gender, geography, and power inform political institutions and, in particular, medical research and health disparities. Taking the perspective of women's lives from across the globe through case studies, we will interrogate feminist theory in relation to non-US perspectives on gender and sexuality. (Cross-listed with WGST 3490).

Prerequisite(s): Sophomore status OR 6 hours of PHIL OR 6 hours of WGST.

Distribution: Global Diversity General Education course

PHIL 3500 PROBLEMS IN PHILOSOPHY (3 credits)

Seminar on specialized topic in philosophy. (See "Topic" in class search for specification of particular topic.)

Prerequisite(s): Junior or 6 hours in philosophy.

PHIL 3510 PHENOMENOLOGY AND EXISTENTIALISM (3 credits)

A critical examination of phenomenology and existentialism as historical and philosophical movements. Course focus includes such thinkers as Edmund Husserl, Martin Heidegger, Jean-Paul Sartre, and Simone De Beauvoir.

Prerequisite(s): Junior or 3 credits in philosophy or permission of the instructor.

PHIL 3520 HERMENEUTICS IN PHILOSOPHY (3 credits)

Introduction to hermeneutics or the notion of interpretation in certain thinkers and philosophy movements since the late 19thC. Focus includes Nietzsche, pragmatism, Heidegger, Gadamer, Frankfurt School, and Derrida. Course to exclude topics or things covered in PHIL3510.

Prerequisite(s): 3 hours in philosophy, junior, or permission of instructor.

PHIL 3570 UNDERSTANDING SELF-DECEPTION (3 credits)

What is it to deceive yourself? Why do we do it? Is it necessarily a bad thing? This course is designed to introduce students to a variety of problems associated with the issue of self-deception. Students will investigate the nature of self-deception from both philosophical and psychological perspectives. Students will apply foundational theories to explore the ethical implications of self-deception and the relation of self-deception to issues like imposter syndrome and the project of autobiography.

PHIL 3600 EPISTEMOLOGY (3 credits)

The course covers major theories and debates in Epistemology (i.e., the study of evidence, reasons, justification, warrant, knowledge, explanation, and understanding). The course covers both foundational structural debates (e.g., the structure of justification, the analysis for knowledge, the requirements of explanation, and the nature of understanding) and applied issues (e.g., expertise and testimony, peer disagreement, burden of proof, group deliberation and voting, epistemic bubbles and conspiracy theories, and the value of feelings of confidence, surety, and certainty).

Prerequisite(s): 6 hours of philosophy or permission of instructor.

PHIL 3650 PHILOSOPHY OF MIND (3 credits)

A discussion of various accounts of the nature of minds which focuses upon philosophical problems such as whether the mind is identical with the brain, the extent of similarities between human minds and computers, the nature of personal identity and the relationship of mental activity to behavior. (Cross-listed with PHIL 8655, PSYC 3650).

Prerequisite(s): No Prerequisites. Some prior coursework in Philosophy is recommended, but not required.

PHIL 3700 SPACE, TIME, AND REALITY (3 credits)

What is space? Is there more to space than the arrangement of things in it? What is time? Is time travel possible? What is the relation between space and time? This course introduces students to the study of the fundamental nature of reality with a focus on the elusive nature of space and time. The course places emphasis on the challenge of finding metaphysical truths about the world given the epistemic constraints imposed by our observational limits. Some representative views from the history of philosophy will be covered, though special attention will be given to contemporary debate.

Prerequisite(s): 3 hours of philosophy or permission of instructor.

PHIL 3960 READINGS IN PHILOSOPHY (1-3 credits)

Readings in specialized areas or individual problems in philosophy.

Prerequisite(s): Permission of instructor.

PHIL 4000 ADVANCED PHILOSOPHY WRITING SEMINAR (3 credits)

This is the capstone course of the philosophy major, designed to teach students to write at an advanced level. Students will present their own writing and critique the writing of others, under close guidance of the instructor. By the end of the seminar, each student will have produced a "journal-length" (approximately 20 page) paper on a philosophical topic, and gained extensive experience in revising papers and editing the work of others.

Prerequisite(s): Junior standing and 15 hours in philosophy including 9 hours consisting of 3000-level courses, or instructor permission. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

PHIL 4220 NEUROETHICS (3 credits)

Neuroscience is a burgeoning field that yields new insights into the workings of the human mind and brain. Work in basic neuroscience also yields technological innovations - brain scans, smart pills, brain modification techniques, etc. - that have profound ethical and social implications. In this upper level philosophy course, we will primarily examine the social, legal, medical, and ethical implications of current and emerging neuroscience technologies and research practices. The emerging field of "neuroethics" examines the ethical ramifications of neuroscience using the concepts of normative and applied ethics. The course will discuss the ethics of neuroscientific technologies - e.g., the use of neuroimaging in the clinical and legal contexts - using the major ethical theories (utilitarianism, virtue ethics, deontological ethics) and principles central to biomedical ethics (autonomy, beneficence, justice, non-maleficence, competence, and informed consent).

Prerequisite(s): Prior Philosophy coursework, particularly PHIL 2300, or prior coursework in Neuroscience, is recommended but not required. Sophomore standing or above.

PHIL 4240 PHILOSOPHY OF EMOTION (3 credits)

In this class, we will aim to understand emotions, moods, attitudes, and other affective phenomena from a broad, empirically informed perspective while keeping practical issues in mind. We will ask questions such as: What are emotions, moods, and the rest? How are these various affective phenomena related to one another? How do they provide information about our relationship to the world? Under what conditions are they appropriate or inappropriate? What role do they play in our reasoning and decision-making? What role do they play in our ethical lives? What role do they play in the arts (e.g., music, literature, film)? (Cross-listed with PSYC 4240).

Prerequisite(s): No prerequisites. Some prior philosophical coursework would be useful, but it is not required.

PHIL 4250 LIMITS OF CONSCIOUSNESS (3 credits)

Consciousness is often considered one of the last great mysteries of science. Despite our internal experience of pleasures, sights, sounds, and pains, it is a largely open question why we have these experiences and what makes them happen. This upper level seminar class examines the philosophy, psychology, and neuroscience of consciousness. Topics covered will include neuroscientific theories of consciousness, unconscious perception, the relationship between attention and consciousness, animal consciousness, and detecting consciousness in the persistent vegetative state. (Cross-listed with PHIL 8256, PSYC 8256, PSYC 4250).

Prerequisite(s): PSYC 1010; or 6 hours in Philosophy. Not open to non-degree graduate students.

PHIL 4260 MORAL PSYCHOLOGY (3 credits)

The growing interdisciplinary field of moral psychology studies our moral beliefs and decision-making processes using the tools of anthropology, psychology, philosophy, and neuroscience. Topics in the science of morality will include the moral-conventional distinction (the distinction between moral norms and non-moral norms such as etiquette), the role of reasons vs. emotions in moral judgment, the brain basis of moral decision-making, cultural differences in moral norms, psychopathy, and the development of morality in children. Psychology studies the nature of moral judgment using behavioral tasks. Neuroscience employs techniques such as functional magnetic resonance imaging (fMRI), transcranial magnetic stimulation (TMS), and other tools for monitoring and manipulating brain processes to study "where" in the brain moral decision making occurs and the nature of these decisions. Throughout the course, we will examine how these empirical findings intersect with the ethical choices that we ought to make. (Cross-listed with PSYC 4260).

Prerequisite(s): No prerequisites. Prior Philosophy coursework is recommended but not required.

PHIL 4610 PHILOSOPHY OF LANGUAGE (3 credits)

This course provides an introduction to the central problems and foundational theories in the philosophy of language. We will investigate central semantic issues concerning the nature of reference, meaning, and truth; examine key pragmatic issues concerning the role of context and the ways in which we use language; and explore expressive and figurative uses of language such as metaphor. Such issues lie at heart of many perennial philosophical puzzles, encompass debates in linguistics and psycholinguistics, and pose challenges to work in Computer Science and, especially, Artificial Intelligence.

Prerequisite(s): 6 hours of Philosophy OR Sophomore status OR Permission of Instructor

Physical Education Activities (PEA)

Physical Education Activities Undergraduate Courses

PEA 111A RACQUETBALL (1 credit)

This course is designed to develop the fundamental skills and knowledge of the sport of racquetball.

PEA 111B TENNIS (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of tennis. Included will be the fundamental skills and strategies of playing the game.

PEA 111C GOLF (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of golf.

PEA 111D JUDO (1 credit)

A basic judo course designed primarily for men and women students with limited experience in judo. The course includes techniques of falling, self-balance, body management, disturbing opponent's balance, throwing techniques, techniques of pins, recognition of choking and armlocks, and judo principles for self-defense and individual sport techniques.

PEA 111E SELF-DEFENSE (1 credit)

This is a self defense course designed primarily for men and women students with little experience in self defense.

PEA 111F TAEKWONDO (1 credit)

Originally designed as a means of self-defense. Taekwondo is also excellent for physical conditioning, increasing agility, and building self-confidence. The purpose of the course is to introduce the student to the basic techniques and philosophies of Taekwondo.

PEA 111G BASIC HAPKIDO (1 credit)

In addition to the kicks and strikes normally associated with Oriental martial arts, Hapkido adds throws, take-downs, and restraint and submission holds. Hapkido is also excellent for physical conditioning, increasing agility, and building self-confidence. The purpose of the course is to introduce the student to the basic techniques and philosophies of Hapkido.

PEA 111H WEIGHT TRAINING/BODY CONDITIONING (1 credit)

The course is designed to develop the skills and knowledge necessary to begin and participate in a program of weight lifting as a lifelong activity.

PEA 111I ADVANCED WEIGHT TRAINING (1 credit)

The course is designed to enhance weightlifting and conditioning skills to an advanced level from skills already possessed by the student.

PEA 111N KICKBOXING (1 credit)

The course is a combination of boxing and kicking techniques and total body conditioning. It will focus on low, moderate, and/or high impact movements. The course will concentrate on safe and effective exercises that will develop the aerobic endurance and strength of the student. Students will utilize hand-wraps, gloves, focus mitts, and kicking shields during the course.

PEA 111O MULTICULTURAL DANCE (1 credit)

This course is designed to provide students with an introduction to dances from Europe, Asia, Africa, and North and South America.

PEA 111P MODERN DANCE (1 credit)

This course for men and women students is designed to develop technique in modern dance and acquire a brief knowledge, understanding, appreciation of modern dance, its history, and composition.

PEA 111Q BALLET (1 credit)

The course introduces the student to basic ballet technique and fosters an appreciation for ballet as an art form.

PEA 111R JAZZ I (1 credit)

The course is designed to introduce the student to various fundamental techniques in jazz dance and to incorporate these techniques into dance sequences.

PEA 111S RELAXATION TECHNIQUES (1 credit)

This course involves discussion about stress and its health related aspects. The focus is on demonstration and practice of selected stress management skills.

PEA 111T YOGA I (1 credit)

This course actively covers the scope of hatha yoga through both demonstration and participation as well as historical review of yoga.

PEA 111U YOGA II (1 credit)

This course actively continues to cover the scope of hatha yoga through both demonstration and participation as well as historical review of yoga.

PEA 111V BEGINNING/INTERMEDIATE SWIMMING (1 credit)

This course in Beginning and Intermediate Swimming is designed to expose the student to the basic skills involved in safe and efficient aquatics practices. Skills and information dealing with general water safety will be covered in order to create an awareness of the cause and prevention of water accidents, to develop a desire to be safe and to encourage healthy and safe water recreation.

PEA 111W SCUBA (1 credit)

SCUBA is an exciting, lifetime recreational activity that you can enjoy anywhere in the world and opens the doors to future tracks such as Marine Biology, Engineering, Physical Sciences and more. This course teaches students the basics of open water diving including equipment preparation, pre-dive safety checks, assembly and maintenance, underwater dive safety including ascents, buoyancy, emergency preparation and much more. Included in the course fee are the digital materials, logbook, purchase of snorkel gear and use of the pool and other necessary gear. During the nine sessions at Diventures you will complete the classroom, pool work and open water training to provide you a lifetime Open Water Diver certification from Scuba Schools International (SSI). Classroom and Pool are to be held at Diventures. The training dives are to be held the following weekend, weather dependent.

Prerequisite(s): A Medical Statement & Questionnaire (before the course) and Water Fitness Evaluation (Swim Assessment and Survival Float - during the course) must be completed.

PEA 111X BASKETBALL (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of basketball.

PEA 111Z BACKPACKING & CAMPING (1 credit)

This course is designed to introduce the student to backpacking and orienteering in order to provide the students with an appreciation for the outdoor environment.

PEA 112A SWIM CONDITIONING (1 credit)

This course in Swim Conditioning is designed to expose the participants to the benefits and variety of swimming as a lifetime fitness exercise.

Prerequisite(s): Participants should have the ability to continuously swim 25 yards.

PEA 112C POWER YOGA (1 credit)

This course provides an exercise program based on traditional yoga poses (asanas) in a continuous series of exercises. The course will concentrate on safe, effective, exercise that will develop the cardiovascular fitness, muscular strength, endurance and flexibility of the student.

PEA 112D PILATES MATWORK (1 credit)

This course is based on a method of exercise develop by Joseph H. Pilates. The course will concentrate on safe, effective exercise that will develop the cardiorespiratory fitness, muscular strength, endurance and flexibility of the student.

PEA 112E JAZZ II (1 credit)

The course is designed to build upon the techniques learned in Jazz Dance I. **Prerequisite(s):** PEA 111R or permission of instructor

PEA 112F ROCK CLIMBING (1 credit)

This class focuses on the basic knowledge and skills necessary for the sport of rock climbing. Topics covered will include protecting the climber from falling, movement on the rock, rappelling, and an introduction to anchor setting and ethics. Each topic will emphasize risk management and current accepted technique in the field.

PEA 112G BALLET II (1 credit)

The course builds on the work introduced in Ballet I. While still basic, there is increased complexity as the student begins to demonstrate greater ability.

Prerequisite(s): PEA 111Q or permission of instructor

PEA 112H BALLROOM DANCE I (1 credit)

This course is designed to introduce the student to various fundamental techniques in Ballroom social dance and to incorporate these into basic Ballroom, Latin, and Swing dances.

PEA 112I TAI CHI FOR MOVEMENT IMPROVEMENT (1 credit)

This course is designed to teach students various forms of Tai Chi. There will be emphasis on balance, coordination, flexibility, relaxation, and strength. It is designed for all levels of ability.

PEA 112J MODERN DANCE 2 (1 credit)

The course is designed to further the student's study of modern dance techniques.

Prerequisite(s): PEA 111P or permission of instructor. Not open to non-degree graduate students.

PEA 112K SOCCER (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of soccer.

PEA 112L WALKING/JOGGING (1 credit)

This course is designed to help the students improve personal fitness through walking and jogging.

PEA 112M VOLLEYBALL (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of volleyball.

PEA 112N ZUMBA (1 credit)

Zumba is a fitness program inspired by Latin dance. Zumba combines Latin rhythms (salsa, bachata, merengue, and chachacha.) with cardiovascular exercise to create an aerobic routine that is fun and easy to follow.

PEA 112O BALLROOM DANCE II (1 credit)

The course is designed to further the student's study of Ballroom Dance techniques.

Prerequisite(s): PEA 112H or permission of instructor

PEA 112P INDOOR CYCLING (1 credit)

This activity course is an indoor stationary cycling program. It is a high intensity, cardiovascular fitness program designed to promote lifetime fitness.

PEA 112Q HIP HOP (1 credit)

This course is designed to give students a beginning understanding and appreciation of hip hop dance.

PEA 112R NET GAMES (1 credit)

This course is designed to teach students the fundamental skills and rules of Badminton, Tennis, Pickleball, and Table Tennis.

PEA 112S CROSS-TRAINING (1 credit)

This course is designed to develop the technique, fitness level and knowledge base to effectively participate in cross-training activities. Individuals will be exposed to a variety of methods such as, but not limited to, plyometrics, agility training, kettlebells, and core training.

PEA 112T ADVANCED MARTIAL ARTS (1 credit)

The purpose of this course is to expand upon the basic techniques and philosophies presented in the UNO Martial Arts Introductory classes. The class will review the basic concepts and techniques taught in the intro classes which may be new to the student depending on the introductory class experience of the student.

Prerequisite(s): PEA 111G, PEA 111F, or PEA 111D; or instructor consent.

PEA 112U QI GONG (1 credit)

This course actively covers the scope of Qi Gong through demonstration and participation as well as through a systematic elucidation of the history and theoretical underpinnings of Qi Gong.

PEA 112V MINDFULNESS MEDITATION (1 credit)

This course actively covers the scope of Meditation practices, including Mindfulness, through demonstration, lecture, discussion, and participation. Various methods will be taught, as well as the history, philosophy and practices of meditation. Contemporary research will also be discussed.

PEA 112W TAP I (1 credit)

The course is designed to introduce the student to various fundamental techniques in tap dance and to incorporate these techniques into dance sequences.

PEA 112X BARRE FITNESS (1 credit)

This is a fitness course that utilizes safe barre exercises to develop muscular endurance, flexibility, and neuromotor training. The course will concentrate on integrating the use of the ballet barre, light weights, and various props.

PEA 113A BEGINNING ICE SKATING (1 credit)

This course is designed for beginning ice skaters. Instructional emphasis will be placed on safely learning the life-long activity of ice skating. Students will develop an understanding of the basic principles and terminology of the sport of ice skating, improve on any current ice skating skills, and develop new skills such as forward and backward skating, crossovers, turns, and stops.

PEA 1130 ADAPTED PHYSICAL EDUCATION (1 credit)

This course is designed to provide an opportunity for independent physical education activity for a disabled person.

Prerequisite(s): A disability which does not allow participation in regularly scheduled physical education activity courses.

Physics (PHYS)

Physics Undergraduate Courses

PHYS 1030 PHYSICS OF EVERYDAY LIFE (3 credits)

A conceptual course in the principles of physics and their relationship to man and his environment. Topics included relate the basic laws of physics and recent developments in science to their effects on man. This course is intended for students not majoring in the sciences and may be used in partial fulfillment of the natural science requirement.

Prerequisite(s): High School algebra or equivalent.

Distribution: Natural/Physical Sci General Education lecture

PHYS 1034 PHYSICS OF EVERYDAY LIFE LABORATORY (1 credit)

A physics laboratory consisting of a series of concise experiments which relate man directly to his physical environment.

Prerequisite(s): High school algebra or equivalent; PHYS 1030, prior or concurrent.

Distribution: Natural/Physical Sci General Education lab course

PHYS 1050 INTRODUCTION TO PHYSICS (4 credits)

A terminal one-semester course covering major topics in mechanics, heat, sound, electricity, magnetism, light and modern physics. Designed particularly for non-science liberal arts majors or others for whom such a one-semester coverage might be deemed adequate. (Does not count towards physics requirement for chemistry, physics and engineering majors.)

Prerequisite(s): High school algebra or equivalent.

Distribution: Natural/Physical Sci General Education lecture

PHYS 1054 INTRODUCTION TO PHYSICS LABORATORY (1 credit)

A series of concise experiments on varied topics in physics, such as scientific sampling, optics, elasticity, motion, sound, light and electricity are covered in this one-semester course. Emphasis is placed on data collection and graphing, and error reduction.

Prerequisite(s): High school algebra or equivalent; PHYS 1050, prior or concurrent, or permission of the instructor

Distribution: Natural/Physical Sci General Education lab course

PHYS 1110 GENERAL PHYSICS I WITH ALGEBRA (4 credits)

First part of a two-semester continuing course designed for students with no prior background in physics. Mechanics, heat and sound are covered in this semester.

Prerequisite(s): MATH 1310 or MATH 1220 or equivalent, or MPE score above 2 or permission of instructor

Distribution: Natural/Physical Sci General Education lecture

PHYS 1120 GENERAL PHYSICS (4 credits)

Second part of a two-semester continuing course designed for students with no prior background in physics. Electricity and magnetism, light, and a little modern physics are covered.

Prerequisite(s): PHYS 1110 or permission.

PHYS 1154 GENERAL PHYSICS LABORATORY I (1 credit)

One-semester laboratory course for students enrolled in PHYS 1110 or PHYS 2110. Covers experiments in mechanics, wave motion and heat.

Prerequisite(s): PHYS 1110 or PHYS 2110, prior or concurrent.

Distribution: Natural/Physical Sci General Education lab course

PHYS 1164 GENERAL PHYSICS LABORATORY II (1 credit)

One-semester laboratory course for students enrolled in PHYS 1120 or PHYS 2120. Second semester covers experiments in electricity and magnetism, optics, and modern physics.

Prerequisite(s): PHYS 1120 or PHYS 2120, prior or concurrent.

PHYS 1350 PRINCIPLES OF ASTRONOMY (3 credits)

An introductory course that satisfies divisional requirements in natural science. Topics discussed include the night sky, gravity, telescopes, atoms and radiation, the solar system, the sun and stars; and cosmology.

Prerequisite(s): High school algebra or equivalent.

Distribution: Natural/Physical Sci General Education lecture

PHYS 1354 INTRODUCTORY ASTRONOMY LAB (1 credit)

Laboratory sessions acquaint students with basic phenomena, methods and data acquisition in astronomy. By use of the experiments, students will be able to explore and add to what has been discussed in lecture. Several night observing sessions will also be available for students to use telescopes.

Prerequisite(s): PHYS 1350 prior or concurrent.

Distribution: Natural/Physical Sci General Education lab course

PHYS 1750 FUNDAMENTAL PHYSICS OF SOUND (4 credits)

A course designed for music and communication majors. It covers transmission of sound, wave motion, pitch, quality, sound synthesis, acoustics, resonance, interference, musical scales, string and wind instruments, recording and reproduction of sound. Three lectures and one discussion per week.

Prerequisite(s): High school algebra or equivalent.

PHYS 1754 FUNDAMENTAL PHYSICS OF SOUND LABORATORY (1 credit)

A laboratory that accompanies PHYS 1750. The experiments are coordinated with the music-related portions of lecture course. The laboratory is designed for music majors.

Prerequisite(s): PHYS 1750 prior or concurrent and music major or permission of instructor.

PHYS 1950 PHYSICS GATEWAY COURSE (1 credit)

Designed for first year physics majors, a one-semester introduction to concepts and tools to be encountered and used in earning a physics degree.

Prerequisite(s): High school algebra or equivalent.

PHYS 2030 ENERGY AND FUELS (3 credits)

This one semester course focuses on energy from a macroscopic perspective. Viewpoints based on the law of physics are distinguished from unsupported opinion. Topics include: electricity production and consumption; mineral and fossil fuel resources; nuclear, solar, fossil fuel and biomass energies; pollution, conservation and recycling; extrapolation and interconnections.

Prerequisite(s): MATH 1310 or MATH 1220

PHYS 2040 RADIATION FUNDAMENTALS (3 credits)

This one-semester course examines the ways radiation affects our daily lives. Topics include: structure of matter and types of radiation, half-life and activity, biological effects of radiation, radiation standards and protection, uses of isotopes and radiation, nuclear wastes life-cycle, nature of risk versus benefit, dose calculations and shielding fundamentals.

Prerequisite(s): MATH 1310 or MATH 1220, minimum of PHYS 1050.

PHYS 2110 GENERAL PHYSICS I - CALCULUS LEVEL (4 credits)

First part of a two-semester continuing course for students majoring in some area of science, mathematics or engineering. Mechanics, molecular properties of matter and heat are covered in the first semester.

Prerequisite(s): MATH 1950 (MATH 1930 for Geology majors) or permission of the instructor. High school physics or PHYS 1050 is recommended.

Distribution: Natural/Physical Sci General Education lecture

PHYS 2120 GENERAL PHYSICS-CALCULUS LEVEL (4 credits)

Second part of a two-semester continuing course for students majoring in some area of science, mathematics or engineering. Wave motion, electricity, magnetism and light are considered during the second semester.

Prerequisite(s): PHYS 2110 and MATH 1960 (MATH 1930 for Geology majors) or permission of the instructor.

PHYS 2130 MODERN PHYSICS (4 credits)

The course is composed of introductions to relativity theory and quantum theory with applications to atomic and nuclear structure. Topics include: Planck radiation law; Compton Effect; photoelectric effect; the Rutherford experiments and Bohr model of the atom; the Schrodinger electronic structure of atoms; nuclear reactions, nuclear models, radioactive decay, fission, fusion and elementary particles.

Prerequisite(s): PHYS 2110, PHYS 2120, MATH 1950, & MATH 1960; or permission.

PHYS 2350 SPECIAL TOPICS IN ASTRONOMY: OBSERVATIONAL ASTRONOMY (2-3 credits)

This one semester course emphasizes personal study of the sky, including observing, measuring and recording celestial positions. Students will be shown how to observe and measure the Sun, the Moon, visible planets, and stars, and how to document astronomical observations. Students will be required to study outdoors on their own and will also use the department's observing facilities.

Prerequisite(s): PHYS 1350 or instructor permission.

PHYS 3250 MATHEMATICAL METHODS OF PHYSICS (3 credits)

Training in the use of mathematical techniques applicable to physics problems encountered in upper-level physics courses. Vector operators, Fourier analysis, frequently used differential equations (ordinary and partial), orthogonal functions, and matrix methods of coordinate transformation are included. Emphasis is given to solving problems from mechanics such as vectorial mechanics, oscillatory systems, wave motion, potential theory, etc.

Prerequisite(s): MATH 1950, MATH 1960, MATH 1970 and PHYS 2160 or 2120 or permission.

PHYS 3260 COMPUTER TOOLS FOR PHYSICISTS (2 credits)

This course will introduce a wide selection of computer-powered mathematical tools for doing physics or any upper level science courses. It will introduce software packages in real and complex algebra, trigonometry, calculus I & II, linear algebra, statistics, differential equations, special functions, graphics, document preparation, and programming in the manner of a research scientist.

Prerequisite(s): PHYS 1120 or PHYS 2120 and MATH 1960.

PHYS 3300 INTRODUCTION TO BIOMEDICAL PHYSICS (3 credits)

This course is designed primarily for students desiring to specialize in Biomedical Physics. The course emphasizes an understanding of the fundamental principles of physics and the use of these principles in a variety of biological and medical applications with the major goal to merge physics, biology, and medicine in a unified perspective. PHYS 3300 covers various topics relating basic physics to living systems, including mechanics, fluid mechanics, thermodynamics, sound, electricity, optics, atomic physics, nuclear physics, and nanotechnology. It also describes various technologies widely used in modern medicine such as laser surgery, ultrasound imaging, X-ray, computed tomography, and magnetic resonance imaging. Each topic briefly introduces related background of physics principles as well as comprehensive overview of biological/medical application, thus (although highly recommended) very little background in physics or biology is required. This course will benefit students with interests in medicine, biology, biophysics, or medical physics.

Prerequisite(s): PHYS 1110 is required. PHYS 2110 and PHYS 1120 or PHYS 2120 are recommended.

PHYS 3450 CLASSICAL MECHANICS (3 credits)

Statics and dynamics of particles and rigid bodies including the equations of Lagrange and Hamilton.

Prerequisite(s): MATH 1970, PHYS 3250 or permission.

PHYS 3500 ELEMENTS OF ELECTRONICS (3 credits)

The topics covered will include basic circuit theory, principles and operation of electronic devices such as diodes, transistors and integrated circuits. Application of these devices in various electronic circuits. Both analog and digital circuitry will be studied. (Cross-listed with PHYS 8505)

Prerequisite(s): PHYS 1120 or PHYS 2120 and MATH 1970

PHYS 3504 EXPERIMENTAL PHYSICS I (1 credit)

A set of experiments designed to complement PHYS 3750 and PHYS 4200.

Prerequisite(s): PHYS 2120

PHYS 3524 EXPERIMENTAL PHYSICS II (1 credit)

A set of experiments designed to complement PHYS 3760 and PHYS 4210.

Prerequisite(s): PHYS 2120

PHYS 3544 EXPERIMENTAL PHYSICS III (1 credit)

A set of experiments designed to complement PHYS 3450, PHYS 3850, and PHYS 4200.

Prerequisite(s): PHYS 2120

PHYS 3564 EXPERIMENTAL PHYSICS IV (1 credit)

A set of experiments designed to complement PHYS 3020 and PHYS 4220.

Prerequisite(s): PHYS 2120

PHYS 3600 THERMODYNAMICS AND STATISTICAL PHYSICS (3 credits)

Topics include: empirical and absolute temperature, equations of state, work, heat, entropy, the four laws of thermodynamics, phase changes, thermodynamic potentials, classical and quantum statistics of an ideal gas. Applications to be included: Einstein theory of a solid, paramagnetism, blackbody radiation, and conduction electrons. (Cross-listed with PHYS 8605)

Prerequisite(s): PHYS 2120 and MATH 1970.

PHYS 3750 ELECTRICITY AND MAGNETISM I (3 credits)

An advanced study of electrostatics and magnetostatics, including Coulomb's law, Gauss' law, the scalar potential, conductors and dielectrics, electrostatic energy, special methods, electric current, Ampere's law, the magnetic induction, Faraday's law, and the electromagnetic wave equation as obtained from Maxwell's equations, with simple examples such as transmission lines and antennas. (Cross-listed with PHYS 8755)

Prerequisite(s): MATH 1950, MATH 1960, MATH 1970, PHYS 3250, or permission.

PHYS 3760 ELECTRICITY AND MAGNETISM II (3 credits)

A selection of more advanced topics from electromagnetic theory, including a deeper treatment of the electromagnetic wave equations derived from Maxwell's equations, extending to propagation, reflection and refraction of plane waves, waves in wave guides, and radiation. Other topics covered might be magnetism and magnetic energy, plasmas and special relativity. (Cross-listed with PHYS 8765)

Prerequisite(s): PHYS 3750

PHYS 3800 OPTICS (3 credits)

The behavior of electromagnetic radiation as formulated in the ray, wave, and quantum models. Topics will include: reflection and refraction, vergence, matrix method, optical instruments, scalar waves, electromagnetic waves, blackbody radiation, interference, diffraction, and lasers; if time permits, fiber optics and holography will also be included. (Cross-listed with PHYS 8805)

Prerequisite(s): PHYS 1120 or PHYS 2120 and MATH 1970

PHYS 4200 INTRODUCTION TO QUANTUM MECHANICS (3 credits)

This course provides an introduction to the historical development of modern physics and to the Schroedinger formulation of quantum mechanics. Specific topics will include square wells potential barriers, the simple harmonic oscillator potential and the hydrogen atom. Characteristics of multi-electron atoms, including angular momentum coupling schemes, spectra and transition rules will also be included. (Cross-listed with PHYS 8206)

Prerequisite(s): PHYS 3250 or permission.

PHYS 4210 QUANTUM THEORY (3 credits)

The matrix operator formalism is covered along with philosophical implications of this approach. The methods developed will be applied to simple harmonic oscillator and hydrogen atom potentials. Raising and lowering operators, creation-annihilation operators, and first and second order perturbation theory will be discussed. (Cross-listed with PHYS 8216)

Prerequisite(s): PHYS 4200 or permission.

PHYS 4220 PHYSICS OF MOLECULES AND SOLIDS (3 credits)

This course covers the various types of atomic bonding found in molecules and solids. Electronic energy levels and spectra of molecules will be discussed. Topics in solid state physics will include mechanics and thermodynamics of crystals, the scattering of waves, including x-ray and neutron scattering, electron scattering and phonon and photon interactions. (Cross-listed with PHYS 8226)

Prerequisite(s): PHYS 4200 or permission.

PHYS 4230 SPECIAL RELATIVITY AND NUCLEAR PHYSICS (3 credits)

This course includes a brief historical background of the development of relativity theory and the importance of the experiments performed in conjunction with it. Lorentz transformations and covariant formalism will be developed and applied to certain problems in mechanics and electricity and magnetism. The nuclear physics portion of the course will include the historical development of the concept of the nuclear atom. Theoretical models of nuclear structure will be discussed, along with the theory of alpha, beta and gamma decay. Fission and fusion discussed as time permits. (Cross-listed with PHYS 8236)

Prerequisite(s): PHYS 4200 or permission.

PHYS 4300 GENERAL RELATIVITY (3 credits)

A study of general relativity theory and its leading applications. Physical motivations and conceptual foundations will be explored. Students will be guided step-by-step to mastery of the tensor analysis required by this theory. Topics covered will include the equivalence principle, recap of special relativity, tensors, curvature and geodesics, Einstein field equations, black holes, cosmology, and gravitational waves. (Cross-listed with PHYS 8306)

Prerequisite(s): PHYS 3750 and PHYS 4230, or permission of instructor.

PHYS 4350 ASTROPHYSICS (3 credits)

This course introduces the fundamentals of astrophysics to students with a prior knowledge of physics and mathematics. A review will be given of light and telescopes, classical and quantum mechanics and special relativity. Basic laws of physics will be applied to various topics such as: the sun, nuclear fusion and particle physics, evolution and end state of stars, interstellar medium, galaxies and cosmology. (Cross-listed with PHYS 8356)

Prerequisite(s): PHYS 2130 or 4200 and MATH 1970. Recommended: PHYS 1350.

PHYS 4400 GEOPHYSICS (3 credits)

A study of geophysical techniques used to understand the earth, study environmental problems, and in resource exploration. Seismic, gravity, heat flow, magnetic and other methods will be presented. The insights from these methods into earthquake events, stress distributions, rock rheology and plate tectonics will also be addressed. Interpretive skills will be emphasized. (Cross-listed with GEOL 4400).

Prerequisite(s): GEOL 1170, PHYS 1110 or higher, or permission of instructor

PHYS 4500 BIOLOGICAL PHYSICS (3 credits)

This course is designed primarily for students specializing in Biomedical Physics. As a part of Biomedical Physics program at the Department of Physics, the course introduces the fundamental principles of physics and the use of these principles for various biological applications. PHYS 4500/8506 covers various topics including cells, polymers, polyelectrolytes, membranes, mesoscopic forces, self-assembly, photonics, fluid mechanics, motility, chemical kinetics, enzyme kinetics, modern experimental techniques of biophysics. Each topic connects biomolecules with their functions and relevant biological phenomena from a physics perspective. This course will benefit students with interests in biological and medical physics, as well as chemistry, biology. (Cross-listed with PHYS 8506).

Prerequisite(s): PHYS 2110 is required. PHYS 2120 and PHYS 3300 are recommended.

PHYS 4550 PHYSICS IN MEDICINE (3 credits)

This course is designed primarily for students desiring to specialize in Biomedical Physics. The course introduces principles and applications of various medical imaging modalities and medical physics based therapies. Topics include such imaging techniques as ultrasound, X-ray imaging, Computed Tomography (CT), MRI imaging, and positron emission tomography. The course discusses physical principles behind medical imaging and therapeutic applications and covers interaction of different kinds of radiation with biological matter. (Cross-listed with PHYS 8556).

Prerequisite(s): PHYS 2110; PHYS 2120, and PHYS 2130 for Physics majors or permission of the instructor. PHYS 3300 and PHYS 4500 are recommended.

PHYS 4800 INTERNSHIP (1-6 credits)

Internship with agencies or corporations enabling students to gain knowledge and experience in practical applications of physics and/or environmental principles.

Prerequisite(s): Junior or senior standing. Permission.

PHYS 4950 PROBLEMS IN PHYSICS (1-3 credits)

Individual laboratory and/or library work, or reading course in some field of physics. (Cross-listed with PHYS 4960, PHYS 8956, PHYS 8966)

Prerequisite(s): PHYS 2120 and permission of instructor.

PHYS 4960 PROBLEMS IN PHYSICS (1-3 credits)

Individual laboratory and/or library work, or reading course in some field of physics. (Cross-listed with PHYS 4950, PHYS 8956, PHYS 8966)

Prerequisite(s): PHYS 2120 and permission of instructor.

Political Science (PSCI)

Political Science Undergraduate Courses

PSCI 1000 INTRODUCTION TO POLITICAL SCIENCE (3 credits)

This course introduces students to political ideas, behaviors, processes, institutions, and issues on a national and global level.

Distribution: Global Diversity General Education course and Social Science General Education course

PSCI 1100 INTRODUCTION TO AMERICAN NATIONAL GOVERNMENT (3 credits)

This course introduces students to the foundational principles, institutions, processes, and policies of national government in the United States.

Distribution: Social Science General Education course and U.S. Diversity General Education course

PSCI 2000 INTRODUCTION TO POLITICAL INQUIRY AND WRITING (3 credits)

This course introduces students to how political scientists conduct inquiry into political questions and how they write about the results of their investigations for various kinds of audiences. Students will learn the basics of quantitative and qualitative research methods in political science, will learn how to use the library and other available sources of information, and will produce the various kinds of writings by which political scientists communicate their findings to the public, to other scholars, and to political and governmental actors.

Prerequisite(s): PSCI 1100 or PSCI 1000 preferred. ENGL 1150 required and ENGL 1160 recommended.

Distribution: Writing in the Discipline Single Course

PSCI 2110 INTRODUCTION TO PUBLIC POLICY (3 credits)

An introduction to the formation and evaluation of public policy, with particular focus on the stages of public policy development.

Distribution: Social Science General Education course

PSCI 2120 INTRODUCTION TO LEADERSHIP (3 credits)

This course introduces students to civic leadership in a public setting, including theories of leadership, models of leadership, cases of success and failure, and the inherent tensions among democracy, leadership, and administration.

Distribution: Social Science General Education course

PSCI 2130 AFRICAN POLITICS (3 credits)

African Politics examines the socio-cultural and economic environments which characterize political life in contemporary Africa. This course examines contemporary African politics and government in post-independence Africa, and the pre-colonial political and economic systems which influence contemporary African politics. The course assesses the various approaches used to study the political development of the African continent; examines the processes, features, and institutions of the African states; addresses key and persistent issues about African politics; and examines dimensions of social change and political reform. (Cross-listed with BLST 2130).

Distribution: Global Diversity General Education course

PSCI 2150 CAREERS IN LAW AND POLITICS (3 credits)

This course introduces students to a diversity of career paths in both the public and private sector that are available in the fields of law and politics, and the motivations, qualifications, and expertise necessary for each.

Prerequisite(s): PSCI 1000 or PSCI 1100 is recommended. Not open to non-degree graduate students.

PSCI 2180 INTRODUCTION TO LAW (3 credits)

This course introduces students to the foundations, principles, functions, institutions, processes, issues, and fields of law with a special emphasis on the American political and legal systems.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

PSCI 2210 INTRODUCTION TO INTERNATIONAL RELATIONS (3 credits)

This course introduces students to historical and contemporary questions and major theoretical approaches to world affairs through examination of the international system in terms of the economic, military, and political forces between states, international organizations, and transnational actors.

Distribution: Global Diversity General Education course and Social Science General Education course

PSCI 2310 INTRODUCTION TO POLITICAL THOUGHT (3 credits)

This course introduces students to the nature and scope of politics, the foundations of political thought, and competing traditions of political theory through the ideas of major political philosophers, the interpretation of their ideas, and the possible application of their ideas today.

Distribution: Humanities and Fine Arts General Education course

PSCI 2500 INTRODUCTION TO COMPARATIVE POLITICS (3 credits)

This course introduces students to the fundamental concepts and theoretical approaches used to study political institutions, processes, and public policies in different country settings. This course also illustrates the rich diversity of political life and the importance of global political and economic change.

Distribution: Global Diversity General Education course and Social Science General Education course

PSCI 3000 QUANTITATIVE ANALYSIS IN POLITICAL SCIENCE (3 credits)

This course introduces students to the techniques that political scientists use to answer research questions with quantitative data, as well as issues of research design, hypothesis formation, and causation. The course emphasizes the methods used to collect, analyze, and extract information from data using statistical computer software. (Cross-listed with PSCI 8005)

Prerequisite(s): MATH 1120, MATH 1130, MATH 1530, MATH 1220 or MATH 1310 or permission of department.

PSCI 3010 URBAN POLITICS (3 credits)

This course introduces students to the development, powers, forms of government, and functions of cities and their suburbs as well as the problems faced by elected officials, business and community leaders, and citizens in the urban setting. (Cross-listed with PSCI 8015)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 3040 GOVERNMENT AND POLITICS OF NEBRASKA (3 credits)

This course introduces students to the development, structures, functions and public policies of the government of the state of Nebraska. (Cross-listed with PSCI 8045)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor. .

PSCI 3050 STATE GOVERNMENT AND POLITICS (3 credits)

This course introduces students to the development, structures, functions and public policies of states. (Cross-listed with PSCI 8055)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 3100 LGBT POLITICS (3 credits)

This course introduces students to the political struggle for Lesbian, Gay, Bisexual, and Transgender (LGBT) equal rights in the United States using a model of political empowerment, which may be applied for all minority or identity groups and social movements, generating operationalized measures of progress toward the loci of political power. (Cross-listed with PSCI 8105, WGST 3100, WGST 8105)

Prerequisite(s): PSCI 1100 is recommended.

Distribution: U.S. Diversity General Education course

PSCI 3120 THE AFRICAN AMERICAN EXPERIENCE IN POLITICS (3 credits)

This course will provide a historical and contemporary survey of the African American political experience in the United States, from the passage of the 15th Amendment in the late 1800s, to the 1965 Voting Rights Act, and continuing into the 21st century. Students will examine the evolution of the Black political experience, with emphasis on the fight against enslavement, segregation, lynchings and mass incarceration, and the long struggle of African Americans against institutional and structural racism in the American political system. (Cross-listed with BLST 3120)

Prerequisite(s): PSCI 1000 or PSCI 1100

Distribution: U.S. Diversity General Education course

PSCI 3130 WOMEN AND POLITICS (3 credits)

This course introduces students to women's political participation, including holding elective office, socialization, the feminist movement and its opposition, and public policies with particular impact on women. The focus is on contemporary perspectives on women in American political ideas and behavior. (Cross-listed with PSCI 8135, WGST 3130, WGST 8135)

Prerequisite(s): PSCI 1100 is recommended.

Distribution: U.S. Diversity General Education course

PSCI 3140 LATINO/-A POLITICS (3 credits)

This course introduces students to the dynamism and growth of the role of Latinos, as a group of political actors, in the United States. This course provides students with an exposure to and understanding of various concepts and dimensions of this phenomenon, including historical and contemporary Latino political thought and the efforts to increase political empowerment (representation and participation) and influence through grassroots, social, and political movements. (Cross-listed with PSCI 8145, LLS 3140, LLS 8145)

Prerequisite(s): PSCI 1100 is recommended.

Distribution: U.S. Diversity General Education course

PSCI 3150 ASIAN PACIFIC AMERICANS AND THE NEW MINORITY POLITICS (3 credits)

This course will be devoted to a broad discussion about the emergence of Asian Pacific Americans by birth and immigration, the fastest growing minority in the U.S., as a significant factor in American politics. (This course fulfills the department's American politics requirement).

Prerequisite(s): Junior standing or by professor's permission.

PSCI 3160 POLITICAL PARTIES (3 credits)

This course introduces students to the origin, development, structure, and functions of political parties in the United States as political organizations, coalitions of voters, and governing coalitions that seek to hold office and influence public policy. (Cross-listed with PSCI 8165)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 3170 INTEREST GROUPS (3 credits)

This course introduces students to the theories, formation, organization, and activities of interest groups and their impact on public policy, particularly through their role in campaigns and elections and lobbying. (Cross-listed with PSCI 8175)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 3180 CAMPAIGNS AND ELECTIONS (3 credits)

This course introduces students to the evolution and modern application of campaigns and elections in the United States through examination of campaign management and campaign strategy in congressional and presidential elections. (Cross-listed with PSCI 8185)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 3210 GEOPOLITICS OF CENTRAL ASIA AND SOUTH ASIA (3 credits)

This course will focus on the geographic area of Central Asia-South Asia (CASA) and provide students with opportunity to understand the dynamics that made this region a traditional contest area between regional and global powers for centuries. Central Asia-South Asia region is home to successful democracies, a monarchy, and dictatorships. This course is designed to help students analytically assess the geopolitical variables concerning the CASA region and the players involved. Post 9/11 developments in Afghanistan have brought the whole region once again to the forefront of geopolitical struggle between global and regional players, thus reigniting the struggle of the New Great Game in the region. These multiple elements of regional, development, stability and instability will be discussed in this course.

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor. Recommended: INST 2130: Introduction to International Studies.

PSCI 3220 INTERNATIONAL ORGANIZATIONS (3 credits)

This course introduces students to the history, principles, structures, and processes developed to organize and legitimize peaceful reconciliation of the differences of nation-states and to advance their mutual interests in the contemporary global political and economic system. (Cross-listed with PSCI 8225)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor.

PSCI 3230 GENDER AND GLOBAL POLITICS (3 credits)

This seminar introduces students to gender politics in comparative and international politics. (Cross-listed with PSCI 8235, WGST 3230, WGST 8235)

Prerequisite(s): PSCI 2500 is recommended.

Distribution: Global Diversity General Education course

PSCI 3240 THE POLITICS AND PRACTICE OF HUMAN RIGHTS (3 credits)

This course introduces students to human rights issues across the globe and explores the theoretical foundations of human rights as well as human rights institutions and transitional justice. (Cross-listed with PSCI 8245)

Prerequisite(s): PSCI 2210 or junior standing or permission of the instructor.

PSCI 3250 GLOBAL SECURITY ISSUES (3 credits)

This course introduces students to issues of national and international security that cross boundaries and threaten all countries including issues such as climate change, environmental deterioration, population and demographics, gender issues, disease and public health, the media, asymmetrical warfare, drugs/organized crime, and cyberthreats. (Cross-listed with PSCI 8255)

Prerequisite(s): PSCI 2210 or junior status or permission of instructor.

PSCI 3260 UNITED STATES FOREIGN POLICY (3 credits)

This course introduces students to the analysis of foreign and defense policy processes in the United States, including the role of the President, Congress, Departments of State and Defense, the intelligence community, and other actors/factors affecting policy formulation and implementation. (Cross-listed with PSCI 8265)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor.

PSCI 3340 AMERICAN POLITICAL THOUGHT (3 credits)

This course introduces students to the ideals, ideologies, identities, and institutions of American political thought from the country's origins to the present. Topics to be covered may include the political thought of the early American settlers and of the founding generation, the debates over the creation and implementation of the Constitution, the 19th century arguments over slavery, the rise of progressivism, the New Deal and its critics, and contemporary American conservatism and liberalism. (Cross-listed with PSCI 8345)

Prerequisite(s): PSCI 1100 or PSCI 2310 or junior standing or permission of instructor.

PSCI 3410 LAW AND THE BLACK COMMUNITY (3 credits)

Law and the Black Community provides an in-depth examination of the racialized American legal process as it pertains to and affects African Americans in the U.S. From the formation of the U.S. Constitution to present day, this course analyzes intersections of race, law, politics and culture, and explores the administration of justice and Black experiences through a critical legal perspective. (Cross-listed with BLST 3410, CRCJ 3410).

Prerequisite(s): BLST 1000 or CRCJ 1010 or Junior standing or instructor permission

Distribution: U.S. Diversity General Education course

PSCI 3450 AFRICAN ECONOMIC DEVELOPMENT (3 credits)

African Economic Development critically examines historical, political, and socioeconomic forces that have shaped African economies. Students taking this course will learn about the evolution of the modern economic systems, methods of production, distribution and exchange which affect African economies. The course examines the historical impact of colonialism, capitalism, and imperialism on the displacement of ancient trade routes and markets throughout the African continent; the historical impact of these foreign colonial states and tools on the development of contemporary African private sectors, economic institutions, and global competition; and contemporary strategies of economic development, regional cooperation, and international trade, particularly as they affect Sub-Saharan Africa. (Cross-listed with BLST 3450).

PSCI 3500 EUROPEAN POLITICS (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Europe, including the European Union. (Cross-listed with PSCI 8505)

Prerequisite(s): PSCI 2500 or junior status or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 3510 IMMIGRATION LAW AND LATINOS (3 credits)

This course provides an overview of the U.S. Immigration laws with an emphasis on Latino migration. In analyzing Latino migration, we will look at the push and pull factors of migration, the channels available for lawful migration, and the impact immigrants have in our society. (Cross-listed with LLS 3510).

PSCI 3580 GOVERNMENT AND POLITICS OF RUSSIA AND THE POST-SOVIET STATES (3 credits)

This course introduces students to the political cultures, institutions, processes, and public policies of Russia and the states of the former Soviet Union. (Cross-listed with PSCI 8585)

Prerequisite(s): PSCI 2500 or junior status or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 3640 GOVERNMENT AND POLITICS OF CHINA AND EAST ASIA (3 credits)

This course introduces students to the political cultures, institutions, processes, policies, and other characteristics of China and neighboring states, with reference to other major powers engaged in the region. (Cross-listed with PSCI 8645)

Prerequisite(s): PSCI 2500 or junior standing or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 3660 GOVERNMENT AND POLITICS OF JAPAN AND EAST ASIA (3 credits)

This course introduces students to the political cultures, institutions, processes, policies and other characteristics of Japan and neighboring states, with reference to other major powers engaged in the region. (Cross-listed with PSCI 8665)

Prerequisite(s): PSCI 2500 or junior standing or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 3680 GOVERNMENT AND POLITICS OF LATIN AMERICA (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Latin America. (Cross-listed with PSCI 8685, LLS 3680, LLS 8685)

Prerequisite(s): PSCI 2500 or junior status or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 3700 GOVERNMENT AND POLITICS OF THE MIDDLE EAST (3 credits)

This course introduces students to government and politics in the contemporary Middle East, including considerations of state formation, authoritarianism and democratization, state-society relations, religion, culture, gender, and economy. (Cross-listed with PSCI 8705)

Prerequisite(s): PSCI 2500 or junior standing or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 3910 SPECIAL TOPICS IN POLITICAL SCIENCE (1 credit)

This course introduces students to a specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours.

PSCI 3920 SPECIAL TOPICS IN POLITICAL SCIENCE (2 credits)

This course introduces students to a specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours.

PSCI 3930 SPECIAL TOPICS IN POLITICAL SCIENCE (3 credits)

This course introduces students to a specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours.

PSCI 4030 THE PRESIDENCY (3 credits)

This course introduces students to the development and modern application of presidential leadership through examination of presidential selection, presidential decision-making, the relationship of the presidency with other governmental and non-governmental actors, and the role of the presidency in making public policy. (Cross-listed with PSCI 8036)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 4040 CONGRESS AND THE LEGISLATIVE PROCESS (3 credits)

This course introduces students to the development of the Congress and modern application of the legislative process through examination of congressional elections, congressional leadership, congressional decision-making, legislative rules and procedures, the relationship of the Congress with other governmental and non-governmental actors, and the role of the Congress in making public policy. (Cross-listed with PSCI 8046)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 4050 THE JUDICIAL PROCESS (3 credits)

This course introduces students to the administration of law in federal and state courts with respect to the organization of the courts, judicial selection, judicial powers, judicial decision-making, judicial policy-making, the bar, and reform movements in the pursuit of justice. (Cross-listed with PSCI 8056)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 4100 MONEY IN AMERICAN POLITICS (3 credits)

This course surveys facts and scholarship about two types of money in American politics: money as a political resource and money as policy. As a political resource, money is critically important for candidates to win elections, for interest groups to exert influence on government, and for policy expertise from civil society to inform government policy. As policy itself, in history or in modern times money has lain at the heart of policy debates like the creation of a national bank, gold and silver as legal tender, and financial regulations, as well as perennial governmental processes like federal budgeting and appropriations and the selection of congressional party leaders. This course trains students to comprehend, analyze, critically evaluate, and build on key research on these topics. (Cross-listed with PSCI 8106).

Prerequisite(s): PSCI 1100 is a strongly recommended prerequisite.

PSCI 4110 POLITICAL PSYCHOLOGY (3 credits)

This course introduces students to the role of human thought, emotion, and behavior in politics through examination of the psychological factors that motivate political elites and the mass public. (Cross-listed with PSCI 8116, PSYC 4110, PSYC 8116)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 4120 PUBLIC OPINION AND POLLING (3 credits)

This course introduces students to the origins, nature, measurement, and consequences of public opinion on policymaking. (Cross-listed with PSCI 8126)

Prerequisite(s): PSCI 1100 or junior standing or permission of the instructor.

PSCI 4130 BROWN V. BOARD OF EDUCATION (3 credits)

Brown v. Board of Education traces the educational history of African Americans from segregation to desegregation to re-segregation. This course will review the legal cases before and after the Supreme Court's Brown decision, their aftermath, and the effects on educational policies and practices. (Cross-listed with BLST 8716, BLST 4710, PSCI 8136).

Prerequisite(s): Junior standing OR senior standing or permission of instructor.

Distribution: U.S. Diversity General Education course

PSCI 4140 CONSTITUTIONAL LAW: CIVIL RIGHTS (3 credits)

This course introduces students to the history, principles, and judicial interpretation of key constitutional provisions and federal statutes regarding civil rights in the United States. (Cross-listed with PSCI 8146)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 4150 LAW AND THE COURTS: MOCK TRIAL (3 credits)

This course introduces students to the American legal system, including its courtroom aspects, through preparation of and participation in a mock trial case.

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor. Not open to non-degree graduate students.

PSCI 4160 LAW AND THE COURTS: MOCK TRIAL PRACTICUM (1-3 credits)

This course introduces students to the American legal system through participation in mock trial competition.

Prerequisite(s): PSCI 4150 or junior standing or permission of instructor. Not open to non-degree graduate students.

PSCI 4170 CONSTITUTIONAL LAW: FOUNDATIONS (3 credits)

This course introduces students to the principles, design and operation of the American constitutional system with emphasis on analysis of the Declaration of Independence, the Articles of Confederation, the proceedings of the Constitutional Convention, and the Federalist Papers. (Cross-listed with PSCI 8176)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor

PSCI 4180 CONSTITUTIONAL LAW: THE FEDERAL SYSTEM (3 credits)

This course introduces students to American constitutional law as it relates to issues of federalism, the relation of the nation and the states, and separation of powers, the relation of the three branches of the national government. (Cross-listed with PSCI 8186)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 4190 CONSTITUTIONAL LAW: CIVIL LIBERTIES (3 credits)

This course introduces students to the philosophy, history, and development of the personal liberties guaranteed by the Constitution including freedom of speech, religion, assembly, petition, and the right of privacy, primarily through examination of Supreme Court decisions. (Cross-listed with PSCI 8196)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 4200 INTERNATIONAL RELATIONS OF EAST ASIA (3 credits)

This course introduces students to the international politics of East Asia with an emphasis on the contemporary relations among major East Asian states (China, Japan, the Korean peninsula) and the United States. (Cross-listed with PSCI 8206)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 4210 INTERNATIONAL RELATIONS OF THE MIDDLE EAST (3 credits)

This course focuses on the international politics of the Middle East region, specifically looking at conditions for peace and causes of war. It examines how the international system, domestic politics, ideologies, and leaders influence international politics in the Middle East. (Cross-listed with PSCI 8216)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 4240 INTERNATIONAL CONFLICT RESOLUTION (3 credits)

This course introduces students to different approaches to peace, their basic assumptions, and their application to current conflicts. (Cross-listed with PSCI 8246)

Prerequisite(s): PSCI 2210 or junior status or permission of instructor.

PSCI 4250 INTELLIGENCE AND NATIONAL SECURITY (3 credits)

This course introduces students to the United States intelligence services, and their relation to broader U.S. national security policy. (Cross-listed with PSCI 8256)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor

PSCI 4260 INTERNATIONAL LAW (3 credits)

The course introduces students to the general principles of international law, including the key actors, the creation and sources of international law, the interpretation of international law by courts and tribunals, and its enforcement. (Cross-listed with PSCI 8266)

Prerequisite(s): PSCI 2210 or junior status or permission of instructor.

PSCI 4270 GLOBAL ENVIRONMENTAL POLITICS (3 credits)

This course introduces students to issues of global environmental politics and policy, including the science behind issues such as climate change, how environmental policy is made at the national and international levels, and what role politics plays in determining environmental resource use. (Cross-listed with ENVN 4270, PSCI 8276)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor.

PSCI 4280 INTERNATIONAL RELATIONS OF LATIN AMERICA (3 credits)

Analysis of the role of Latin American states in the international political arena. Emphasis upon developing, applying and testing an explanatory theory of international politics through the study of the inter-American system: the regional, institutional and ideological environment, power relations, policies and contemporary problems. (This course fulfills the department's international politics requirement). (Cross-listed with PSCI 8286, LLS 4280, LLS 8286)

Prerequisite(s): PSCI 2500 or junior standing or permission of the instructor.

Distribution: Global Diversity General Education course

PSCI 4290 INTERNATIONAL DEVELOPMENT & SUSTAINABILITY (3 credits)

This course introduces students to different concepts of international development through the lens of sustainability. The course explores a broad range of activities related to international development, including international aid, trade, philanthropy, interventions in conflict, peacebuilding, public health, human rights, social justice, and the environment. (Cross-listed with PSCI 8296, CACT 8306)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor.

PSCI 4310 CLASSICAL POLITICAL THOUGHT (3 credits)

This course introduces students to key works representative of premodern political thought. Authors examined may include Plato, Aristotle, Xenophon, Cicero, Augustine, and Aquinas. (Cross-listed with PSCI 8316)

Prerequisite(s): PSCI 2310 or junior standing or permission of instructor.

PSCI 4320 EARLY MODERN POLITICAL THOUGHT (3 credits)

This course introduces students to key works of the 16th through mid-18th centuries. Authors examined may include Machiavelli, Hobbes, Hume, Smith and Montesquieu. (Cross-listed with PSCI 8326)

Prerequisite(s): PSCI 2310 or junior standing or permission of instructor

PSCI 4330 LATE MODERN POLITICAL THOUGHT (3 credits)

This course introduces students to key texts of the mid-18th through 19th centuries. Authors to be examined may include Rousseau, Burke, Mill, Tocqueville, Marx, and Nietzsche. (Cross-listed with PSCI 8336)

Prerequisite(s): PSCI 2310 or junior standing or permission of instructor.

PSCI 4340 CONTEMPORARY POLITICAL THOUGHT (3 credits)

This course introduces students to leading works of contemporary political thought, including Marx, Spencer, Dahl, Rawls, feminism, and rational choice. The theories, their interrelationships, the theorists, and the manifestations of these works will be discussed and analyzed. (Cross-listed with PSCI 8346)

Prerequisite(s): PSCI 2310 or junior standing or permission of instructor.

PSCI 4350 DEMOCRACY (3 credits)

A basic study of theory, practice and practitioners of political democracy, its roots, development, present application and problems and future. (Cross-listed with PSCI 8356)

Prerequisite(s): PSCI 2500 or junior standing or permission of instructor is required.

PSCI 4360 AUTHORITARIAN REGIMES (3 credits)

An analysis of various types of authoritarian regimes, their differences from democratic governments, and the causes of their establishment, maintenance, and failure. (Cross-listed with PSCI 8366).

Prerequisite(s): PSCI 2500 or equivalent is recommended.

PSCI 4370 GENERALS AND POLITICIANS: CIVIL-MILITARY RELATIONS (3 credits)

This course introduces students to civil-military relations and military politics across the globe. (Cross-listed with PSCI 8376).

Prerequisite(s): PSCI 2500 or junior standing or permission of the instructor.

Distribution: Global Diversity General Education course

PSCI 4380 TOPICS IN POLITICAL THEORY (3 credits)

This course will conduct an in-depth exploration of an important issue, movement, thinker, or work in political theory. The particular subject matter will vary and will be chosen by the instructor.

Prerequisite(s): Junior, or permission of instructor. Junior, or permission of instructor. Not open to non-degree graduate students.

PSCI 4430 INDIAN GAMING (3 credits)

This course will be an in depth study of the history and development of Indian Gaming law and policy. (Cross-listed with NAMS 4140).

Prerequisite(s): PSCI 1100, or junior standing, or permission of instructor.

PSCI 4440 FEDERAL INDIAN LAW (3 credits)

This course provides an overview of tribal legal authority as it exists within federal law. It includes traditional North American tribal governance and leadership practices. Key topics include the federal-tribal trust relationship, Indian treaties, federal Indian policies and case law, and 20th Century establishment of modern tribal governments and courts. (Cross-listed with NAMS 4440).

Prerequisite(s): PSCI 1100, or junior standing, or permission of instructor.

PSCI 4450 CONTEMPORARY TRIBAL NATION BUILDING (3 credits)

This course applies traditional North American tribal governance and leadership beliefs and practices in a critical examination of contemporary tribal governments, tribal courts and programs, and tribal leaders. This course challenges students to assess present tribal governments and leaders concerning their effectiveness in meeting the needs of tribal people today. (Cross-listed with NAMS 4240).

Prerequisite(s): PSCI 1100, or junior standing, or permission of instructor.

PSCI 4470 SOUTH AFRICA & THE SOCIO POLITICS OF APARTHEID (3 credits)

South Africa and the Socio Politics of Apartheid examines the lived experiences of South African people under the Apartheid system, and their long struggle against European colonial oppression and racial segregation throughout the 20th century. Students will examine the laws, tools, and strategies that developed and sustained Apartheid, and the anti-Apartheid movements and international pressure that led to its repeal and South African democratic elections. (Cross-listed with BLST 8476, BLST 4470, PSCI 8476, SOC 8476, SOC 4470).

Prerequisite(s): Junior standing or permission of instructor

Distribution: Global Diversity General Education course

PSCI 4500 GOVERNMENT AND POLITICS OF GREAT BRITAIN (3 credits)

A comprehensive study of contemporary British politics and government. Emphasis will be focused on the formal institutions and informal customs and practices of the British political system. (Cross-listed with PSCI 8506).

Prerequisite(s): Junior

PSCI 4520 POLITICS OF FRANCE (3 credits)

This course introduces students to the political heritage of France, contemporary political institutions and problems, and political and policy responses to these problems. (Cross-listed with PSCI 8526)

Prerequisite(s): PSCI 2500 or junior standing or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 4550 POLITICAL VIOLENCE, INSURGENCY, AND TERRORISM (3 credits)

This course is a survey on the types of violence used within a political context, focusing on its causes, forms and consequences. Specifically, this course details why and how violence occurs, and its impact on institutions and the people operating within that system. (Cross-listed with PSCI 8556).

Prerequisite(s): PSCI 2210 or PSCI 2500

PSCI 4620 ISLAM AND POLITICS (3 credits)

This course introduces students to the interaction between religion and politics in the Muslim world, covering various political ideologies in the Muslim world and different experiences of Muslim-majority countries such as Saudi Arabia, Pakistan, Iran, Turkey, Indonesia, and Egypt. It will also analyze mainstream and radical transnational Islamic movements. (Cross-listed with PSCI 8626)

Prerequisite(s): PSCI 2210 or 2500 is recommended.

Distribution: Global Diversity General Education course

PSCI 4630 ASIAN POLITICS (3 credits)

This course provides students with a broad understanding of Asian Politics with a focus on Northeast Asia (Mainland China, Japan, South Korea, North Korea, and Taiwan) and some emphasis on Southeast Asia (Singapore, Philippines, Thailand, and Vietnam). Students in this course will investigate these Asian societies and discuss their shared history as well as their common political themes, patterns, and connections. Students will explore state institutions, political parties, and state-society relations through the overarching themes of development, democracy, and nationalism. Specific themes include the economic rise of East Asian states, the emergence and development of democracy in the region, and the persistence of authoritarianism. By the end of the course, students will be able to describe, explain, and critically evaluate from a social science perspective the principal political features and processes of these Asian societies and develop their own research projects based on a topic discussed in the course. (Cross-listed with PSCI 8646).

Prerequisite(s): PSCI 2500 or equivalent is recommended.

PSCI 4710 COMPARATIVE INTERNATIONAL DEVELOPMENT AND INNOVATION (3 credits)

Comparative International Development and Innovation will analyze the rise and fall of civilizations from a historical and theoretical perspective in a comparative manner. The course will address issues concerning political, social, economic, and environmental change in national, and international contexts. Among its major emphases are state institutions, economic growth, entrepreneurship, and the transformation of social structure and culture. (Cross-listed with PSCI 8716, ENTR 4710, ENTR 8716).

PSCI 4770 POLITICAL SOCIOLOGY (3 credits)

This course explores political sociology, focusing on political processes and power. Political sociologists investigate relationships between political institutions and various other institutions, including but not limited to the economy, education, media, and religion, and the impacts that these relationships have on society and the individuals that comprise the society. This course will explore the concepts, theories, and knowledge that comprise this field such as power, legitimacy, the state, networks, stratification, and collective action. (Cross-listed with PSCI 8776, SOC 4770, SOC 8776).

Prerequisite(s): SOC 1010, junior standing or permission of instructor

PSCI 4820 POLITICS AND FILM (3 credits)

This course introduces students to the analysis of politics and film, focusing on how politics is portrayed in film and the politics of film making. (Cross-listed with PSCI 8826)

PSCI 4900 READINGS IN POLITICAL SCIENCE (1-3 credits)

This course provides students an opportunity to study an advanced and specialized subject matter in the field of political science not covered in existing courses. The student must be capable of pursuing a highly independent course of study, which must be approved in consultation with the instructor in advance. This course may be repeated for different topics up to a maximum of six credit hours.

Prerequisite(s): Permission of instructor.

PSCI 4910 POLITICAL SCIENCE INTERNSHIP (1-6 credits)

This course offers students an opportunity to experience the resolution of public issues through direct involvement in career-oriented policy organizations. The host organization must be approved in advance in consultation with the internship coordinator. This course may be repeated for a maximum of six credit hours.

Prerequisite(s): Permission of instructor.

PSCI 4920 ADVANCED SPECIAL TOPICS IN POLITICAL SCIENCE (1-3 credits)

This course introduces students to an advanced and specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours. (Cross-listed with PSCI 8926)

Prerequisite(s): Junior standing or permission of instructor.

PSCI 4950 SENIOR ASSESSMENT IN POLITICAL SCIENCE (0 credits)

This zero-credit-hour course is used to assess the knowledge and skills that are imparted by the Political Science program to its students. Seniors must enroll in the class, take the major field test, and submit a writing assignment from one of their upper level political science courses. Because this is a 0 credit course, these items will not be graded, but they will be scored for purposes of program assessment.

Prerequisite(s): Senior standing. Permission of Department Chair required.

Distribution: Writing in the Discipline Single Course

Psychology (PSYC)

Psychology Undergraduate Courses

PSYC 1010 INTRODUCTION TO PSYCHOLOGY I (3 credits)

An overview of scientific understanding of the human mind and behavior. Theories and empirical tests of explanations for how we think, feel, and act. This course is a prerequisite to all subsequent, more specialized courses in Psychology.

Distribution: Social Science General Education course

PSYC 1020 INTRODUCTION TO PSYCHOLOGY II (3 credits)

Provides students who have completed a course in introductory psychology with an opportunity for in-depth study of selected areas of psychology along with related laboratory experiences. Research methodology is emphasized.

Prerequisite(s): PSYC 1010. The proposed course is designed to build upon the content knowledge gained in a first introductory psychology course.

PSYC 2000 CAREER PATHS IN PSYCHOLOGY (1 credit)

A course that introduces the student to the different career paths available to psychology majors, both within and outside of the psychology field and those including graduate or professional school as well as career paths for those with bachelor's degrees. Required of psychology majors. This is a one (1) hour credit course.

Prerequisite(s): PSYC 1010.

PSYC 2040 EXPLORATIONS IN THE SCIENCE OF PSYCHOLOGY (3 credits)

This course explores the scientific foundation of psychology representing several topic areas such as Learning, Developmental, Cognitive, and Physiological Psychology. Basic application of statistics and APA manuscript writing will build a solid background for upper-level courses in Psychology.

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 2100 LEARNING ASSISTANT SEMINAR (0 credits)

This course focuses on effective methods of college teaching and instructional strategies. Students participate in activities designed to increase their understanding of the role of a Learning Assistant.

Prerequisite(s): PSYC 1010 and permission of instructor. Not open to non-degree graduate students.

PSYC 2500 LIFESPAN PSYCHOLOGY (3 credits)

A life span approach to development focusing on the biological, cognitive, and social emotional changes in development occurring from infancy through old age. The impact of these changes on the individual's behavior and interactions with society will be emphasized.

Prerequisite(s): PSYC 1010.

PSYC 3130 STATISTICS FOR THE BEHAVIORAL SCIENCES (3 credits)

An introduction to statistics with particular emphasis on models and hypothesis testing covering analysis of variance, chi-square, F and t-tests, first-order regression and correlation.

Prerequisite(s): One from this list: MATH 1120, MATH 1300, MATH 1320, STAT 1530, MATH 1310 or MATH 1220. Psychology Majors Only: PSYC 2024 (prior to, or concurrent with).

PSYC 3140 RESEARCH METHODS IN PSYCHOLOGY (4 credits)

An introduction to the methods by which psychologists attempt to create, disseminate and integrate knowledge about behavior. PSYC 3140 fulfills the Writing in the Discipline Requirement for Psychology and Neuroscience majors.

Prerequisite(s): Psychology majors require PSYC 2000, PSYC 3130 and ENGL 1160. Neuroscience majors require PSYC 3130 and ENGL 1160

Distribution: Writing in the Discipline Single Course

PSYC 3150 SMALL-N RESEARCH METHODS (4 credits)

This course provides an introduction to small-n research methods including design, implementation, analysis, dissemination, and integration knowledge about behavior. Students also learn to use of small-n designs to identify evidence-based practices to address clinical problems experienced by individuals across a variety of settings and how to critically evaluate research in psychology. The course differs from other research methods courses (e.g., those involving qualitative methods or group designs) with its focus on objective, repeated measurement and analysis of performance at the level of the individual. This course fulfills the Writing in the Discipline Requirement for Psychology.

Prerequisite(s): PSYC 3130 or Junior Status. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

PSYC 3250 RACE, PSYCHOLOGY & CULTURAL DIFFERENCE (3 credits)

Race, Psychology & Cultural Difference is an introductory course that teaches students the psychology behind prejudice, stereotyping, and implicit bias when encountering racial and cultural difference, with particular focus on African Americans. In this course, students will explore concepts of racial and cultural difference, examine fundamental psychological concepts relative to racial and cultural prejudice and stigmas, and discuss cognitive processes of categorization and stereotyping that shape perceptions of racial and cultural difference. Overall, students will explore a conceptual framework for understanding race, psychology, and cultural difference and will learn psychological well-being strategies and approaches for mindfulness, self-regulation, and self-affirmation as challenges to racial and cultural prejudice, stereotyping, and implicit bias. (Cross-listed with BLST 3250).

Prerequisite(s): Sophomore standing or permission of instructor

PSYC 3410 CLINICAL PSYCHOLOGY (3 credits)

A broad survey of problems and practices in the diagnosis and treatment of emotional and behavioral disorders.

Prerequisite(s): PSYC 1010.

PSYC 3430 PERSONALITY AND ADJUSTMENT (3 credits)

The study of persons in a social context and their resultant effective and ineffective behavior, with emphasis on types of adjustment.

Prerequisite(s): PSYC 1010.

PSYC 3450 SOCIAL PSYCHOLOGY (3 credits)

Social interaction studied in situations of (1) social influences on individuals, (2) dyads or face-to-face groups, and (3) larger social systems. The concepts, theories, data, research methods and applications of varied substantive topics are examined. (Cross-listed with SOC 3450)

Prerequisite(s): SOC 1010 or PSYC 1010

PSYC 3510 EDUCATIONAL PSYCHOLOGY (3 credits)

A study of the capacities and interests of children and their individual differences. Factors that influence learning and an evaluation of learning and classroom procedures are included.

Prerequisite(s): PSYC 1010.

PSYC 3520 CHILD PSYCHOLOGY (3 credits)

A study of the biological, social, emotional and cognitive development of the child emphasizing infancy and childhood.

Prerequisite(s): PSYC 1010.

PSYC 3540 ADOLESCENT PSYCHOLOGY (3 credits)

A review of theory and available evidence useful in understanding changes and problems in the physical, intellectual, social and emotional adjustment of individuals in adolescence.

Prerequisite(s): PSYC 1010.

PSYC 3650 PHILOSOPHY OF MIND (3 credits)

A discussion of various accounts of the nature of minds which focuses upon philosophical problems such as whether the mind is identical with the brain, the extent of similarities between human minds and computers, the nature of personal identity and the relationship of mental activity to behavior. (Cross-listed with PHIL 3650, PHIL 8655).

Prerequisite(s): No Prerequisites. Some prior coursework in Philosophy is recommended but not required.

PSYC 4010 HISTORY OF PSYCHOLOGY (3 credits)

A study of the origins, development and nature of psychology and its relation to external events; emphasis on the period since 1875. (Cross-listed with PSYC 8016)

Prerequisite(s): at least 15 hours of Psychology credits including PSYC 1010 or approval of instructor. Not open to non-degree students or students in other departments or programs.

PSYC 4020 LEARNING (3 credits)

A comprehensive coverage of the experimental literature and theories on human and animal learning.

Prerequisite(s): PSYC 1020

PSYC 4024 LABORATORY IN PSYCHOLOGY: LEARNING (3 credits)

Classical experiments and a service-learning research project designed to apply general learning principles. Systematic techniques used to assess behavior changes associated with the learning process, research design, and scientific report writing will be emphasized.

Prerequisite(s): PSYC 3140 and PSYC 4020. Not open to nondegree students.

PSYC 4030 CONCEPTUAL ANALYSIS OF BEHAVIOR (3 credits)

This course will provide students with an introduction to the theory and philosophy of behavior. Students will explore the history and foundations of behaviorism, alternative and contrasting perspectives of behavior, the shift from Behavior Modification to Behavior Analysis, the analysis of behavior within, and contemporary applications of Behavior Analysis. This course will emphasize and revisit how the theory and philosophy of behavior translate to real-world applications.

Prerequisite(s): At least 15 hours of Psychology including PSYC 1010. Not open to non-degree graduate students.

PSYC 4070 COGNITIVE PSYCHOLOGY (3 credits)

An exploration of historical and contemporary research and theory concerned with cognitive processes including attention, memory, problem solving and concept formation.

Prerequisite(s): PSYC 1020.

PSYC 4074 LABORATORY IN PSYCHOLOGY: COGNITION, SENSATION AND PERCEPTION (3 credits)

Laboratory work coordinated with PSYC 4070, emphasizing a presentation of methods of research assessing human attention, memory and problem-solving processes. Research design, data analysis and research report writing are also emphasized.

Prerequisite(s): PSYC 3140 and PSYC 4070 or PSYC 4090 or PSYC 4210.

PSYC 4090 COGNITIVE NEUROSCIENCE (3 credits)

This course is concerned with the relationship between cognition and the brain. Special attention will be devoted to the techniques used to study specific relationships and the theoretical perspectives that have guided research in the area. Topics for the course include history, neural mechanisms, methods, lateralization of function, sensation and perception, memory, language, action and movement, executive processes, computer models, and the social brain.

Prerequisite(s): PSYC 1020 or NEUR 1520 or NEUR 1540. Not open to non-degree graduate students.

PSYC 4110 POLITICAL PSYCHOLOGY (3 credits)

This course introduces students to the role of human thought, emotion, and behavior in politics through examination of the psychological factors that motivate political elites and the mass public. (Cross-listed with PSCI 4110, PSCI 8116, PSYC 8116)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSYC 4130 ADVANCED UNDERGRADUATE STATISTICS FOR THE BEHAVIORAL SCIENCES (3 credits)

Traditional undergraduate statistics courses cover a range of inferential approaches allowing students to begin engaging in social science research. Nevertheless, those pursuing a senior thesis, participating in a research lab and/or considering going to graduate school would benefit from additional statistical training. This course aims to expand on the material covered in traditional behavioral statistics classes and offers students the opportunity to develop expertise in additional approaches usually reserved for graduate students. Combining examples from developmental psychology, cross-cultural comparisons, adolescent peer relations and psycho-physiology, we will cover advanced statistical approaches with the goal of tackling questions that apply in the real world. This course focuses on learning both the mechanics of correlation and regression as well as an understanding of the statistical concepts underlying correlations and regression, the use of these statistics and interpretation of the results.

Prerequisite(s): PSYC 3130, MATH 1120, STAT 1530, MATH 1310 or MATH 1220.

PSYC 4150 AFRICAN AMERICAN PSYCHOLOGY (3 credits)

African American Psychology traces the psychological history of Africans and African Americans from self-attributes and identity, through race and racism, to cognition, learning, and language. This course will review concepts relevant to understanding the psychology of African Americans, methodological and research issues, and best practices. (Cross-listed with PSYC 8156, BLST 4150, BLST 8156).

Prerequisite(s): PSYC 1010 and Junior standing or Instructor permission
Distribution: U.S. Diversity General Education course

PSYC 4160 NEUROPHARMACOLOGY (3 credits)

Neuropharmacology will introduce students to ligand-receptor interactions and their effects on behavior, cognition, and development. This course will characterize the molecular structure of ligands and how these small molecules or biologics affect central nervous system receptors and transporters. Students will learn about structure-activity relationships and principles of pharmacology: distribution, metabolism, pharmacokinetics, and elimination) and explore the historical milestones in drug development. We'll also discuss the dynamic actions of drugs of abused drugs and the mechanisms of action. For undergraduate Neuroscience Majors, the course counts as a Neuroscience Block 1. (Cross-listed with PSYC 8166, NEUR 4160, NEUR 8166).

Prerequisite(s): Need at least one: NEUR 1520 or NEUR 1540 or PSYC 1020 or BIOL 1450. And need NEUR 3600 or PSYC 3140. PSYC 4230 recommended for students who have not taken NEUR 1520 or BIOL 1450.

PSYC 4210 SENSATION AND PERCEPTION (3 credits)

Reading and discussion concerning psychophysical methods, sensory physiology, phenomenology of various sensory systems and theories of the perceptual process.

Prerequisite(s): PSYC 1020 or NEUR 1520 or NEUR 1540.

PSYC 4230 BEHAVIORAL NEUROSCIENCE (3 credits)

A comprehensive study of the relationship of the nervous and other organ systems to behavior. Research on both human and other animal species is considered. (Cross-listed with NEUR 4230).

Prerequisite(s): PSYC 1010 OR BIOL 1450

PSYC 4234 LABORATORY IN PSYCHOLOGY: BEHAVIORAL NEUROSCIENCE (3 credits)

Laboratory course designed to introduce the students to the techniques and procedures of physiological psychology. Scientific report writing, problems of research design and data analysis also will be emphasized.

Prerequisite(s): PSYC 3140. Psych majors PSYC 4230; Neuroscience majors NEUR 1520 or NEUR 1540.

PSYC 4240 PHILOSOPHY OF EMOTION (3 credits)

In this class, we will aim to understand emotions, moods, attitudes, and other affective phenomena from a broad, empirically informed perspective while keeping practical issues in mind. We will ask questions such as: What are emotions, moods, and the rest? How are these various affective phenomena related to one another? How do they provide information about our relationship to the world? Under what conditions are they appropriate or inappropriate? What role do they play in our reasoning and decision-making? What role do they play in our ethical lives? What role do they play in the arts (e.g., music, literature, film)? (Cross-listed with PHIL 4240).

Prerequisite(s): No prerequisites. Some prior philosophical coursework would be useful, but it is not required.

PSYC 4250 LIMITS OF CONSCIOUSNESS (3 credits)

Consciousness is often considered one of the last great mysteries of science. Despite our internal experience of pleasures, sights, sounds, and pains, it is a largely open question why we have these experiences and what makes them happen. This upper level seminar class examines the philosophy, psychology, and neuroscience of consciousness. Topics covered will include neuroscientific theories of consciousness, unconscious perception, the relationship between attention and consciousness, animal consciousness, and detecting consciousness in the persistent vegetative state. (Cross-listed with PSYC 8256, PHIL 4250, PHIL 8256)

Prerequisite(s): PSYC 1010; or 6 hours in Philosophy. Not open to non-degree graduate students.

PSYC 4260 MORAL PSYCHOLOGY (3 credits)

The growing interdisciplinary field of moral psychology studies our moral beliefs and decision-making processes using the tools of anthropology, psychology, philosophy, and neuroscience. Topics in the science of morality will include the moral-conventional distinction (the distinction between moral norms and non-moral norms such as etiquette), the role of reasons vs. emotions in moral judgment, the brain basis of moral decision-making, cultural differences in moral norms, psychopathy, and the development of morality in children. Psychology studies the nature of moral judgment using behavioral tasks. Neuroscience employs techniques such as functional magnetic resonance imaging (fMRI), transcranial magnetic stimulation (TMS), and other tools for monitoring and manipulating brain processes to study "where" in the brain moral decision making occurs and the nature of these decisions. Throughout the course, we will examine how these empirical findings intersect with the ethical choices that we ought to make. (Cross-listed with PHIL 4260).

Prerequisite(s): No prerequisites. Some prior course work in Philosophy is recommended, but not required.

PSYC 4270 ANIMAL BEHAVIOR (3 credits)

Behavior of diverse animals for the understanding of the relationships between nervous integration and the behavior manifested by the organism, as well as the evolution and adaptive significance of behavior as a functional unit. (Cross-listed with PSYC 8276, BIOL 4270, BIOL 8276)

Prerequisite(s): BIOL 1750 and PSYC 1010 or permission of instructor, junior-senior.

PSYC 4280 ANIMAL BEHAVIOR LABORATORY (3 credits)

Laboratory and field studies of animal behavior with an ethological emphasis. Classical laboratory experiences and independent studies will be conducted. (Cross-listed with PSYC 8286, BIOL 4280, BIOL 8286)

Prerequisite(s): PSYC 4270 or BIOL 4270 or PSYC 8276 or BIOL 8273. Not open to non-degree graduate students.

PSYC 4310 PSYCHOLOGICAL AND EDUCATIONAL TESTING (3 credits)

The use of standardized tests in psychology and education is considered with special regard to their construction, reliability and validity. (Cross-listed with PSYC 8316)

Prerequisite(s): PSYC 1010 and junior/senior. Not open to non-degree graduate students.

PSYC 4320 HORMONES & BEHAVIOR (3 credits)

In this course, students will examine the interaction between hormones, chemical messengers released from endocrine glands, and behavior in both human and animal systems. Methods for studying hormonal issues on behavior will be addressed. This course will provided students in psychology, biology, and related disciplines an understanding of how hormones affect sensory processing, motor activities, and processing of information in the central nervous system. (Cross-listed with PSYC 8326, BIOL 4320, BIOL 8326)

Prerequisite(s): PSYC 1010 and either BIOL 1020 or 1750. Not open to non-degree graduate students.

PSYC 4340 ADVANCED BEHAVIORAL NEUROSCIENCE (3 credits)

Building on content from Introductory Neuroscience courses, this course will deeply explore the fundamental link between behavior and biological processes. Prepare to unravel the mysteries of behavior, cognition, emotions, sensory systems, and disorders by exploring cutting-edge neuroscience methods to reveal the specific cells and neurobiological processes that give rise to human and animal behavior. PSYC 4230 should not be taken after the completion of this course. (Cross-listed with NEUR 8346, NEUR 4340).

Prerequisite(s): NEUR 1520 and NEUR 1540, or PSYC 4230

PSYC 4350 BASIC/EXPERIMENTAL BEHAVIOR ANALYSIS (3 credits)

This course provides an overview of essential concepts on basic and experimental behavior analysis. Students will learn to apply a theoretical framework of behavior change concepts to socially important behaviors.

Prerequisite(s): PSYC 1010; PSYC 4020. Not open to non-degree graduate students.

PSYC 4414 LABORATORY IN APPLIED BEHAVIOR ANALYSIS (3 credits)

Laboratory and field experience emphasizing practice and research used in behavior analysis. Emphasis will be placed on application of behavioral principles and tactics in community settings (e.g., clinic, home, school).

Prerequisite(s): PSYC 3140 or PSYC 3150; PSYC 4020; PSYC 4570 or instructor approval. Not open to non-degree graduate students.

PSYC 4440 ABNORMAL PSYCHOLOGY (3 credits)

A course designed to examine the aberrant behavior of individuals. Symptoms, dynamics, therapy and prognosis of syndromes are considered. (Cross-listed with PSYC 8446)

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 4444 CAPSTONE IN PSYCHOLOGY: MENTAL HEALTH (3 credits)

PSYC 4444 is a capstone course to apply and expand concepts learned in mental health coursework. Students will experience exposure to and practice utilizing mental health skills such as interviewing, screening, assessment, service coordination, family-centered care, report-writing, group intervention, basic observation and data collection, mental health documentation, and other skills needed in applied mental health settings within a multicultural perspective.

Prerequisite(s): PSYC 3130 and ONE of the following classes: PSYC 4440, PSYC 4470, PSYC 4510, PSYC 4570, PSYC 4590. PSYC 3140 or PSYC 3150 recommended but not required. Open to Juniors and Seniors. Not open to non-degree graduate students.

PSYC 4450 PERSONALITY THEORIES (3 credits)

A comparative approach to the understanding and appreciation of personality theories considering history, assertions, applications, validations and prospects. (Cross-listed with PSYC 8456)

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 4460 PSYCHOLOGY OF ADULT DEVELOPMENT AND AGING (3 credits)

The focus of this course is on the major social and psychological changes that occur as a function of aging. Both normal and abnormal patterns of developmental change are examined, along with their implications for behavior. (Cross-listed with GERO 4460, GERO 8466).

Prerequisite(s): Junior or Senior.

PSYC 4470 MENTAL HEALTH AND AGING (3 credits)

The goal of this courses is to survey the mental health needs of older adults. Consideration is given to identifying both positive mental health and pathological conditions. Treatment interventions effective with older adults and their families are also discussed. (Cross-listed with PSYC 8476, GERO 4470, GERO 8476)

Prerequisite(s): Junior or Senior

PSYC 4510 PSYCHOLOGY IN THE SCHOOLS (3 credits)

This course introduces students to the academic and mental health needs of children and youth in schools, as well as how those needs are addressed individually and systemically. A service learning experience enables students to work directly with school-age children.

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 4520 PSYCHOLOGY OF LANGUAGE (3 credits)

Language is what makes us human. It influences our thoughts and affects our lives in many ways. In this class, topics include the distinctive features of human language as a system of communication, the understanding and production of speech, reading and spelling, language development, bilingualism, language disorders, and how our social and cultural environment can influence how language is used. (Cross-listed with PSYC 8526)

Prerequisite(s): Senior or graduate or permission of instructor. Not open to non-degree graduate students.

PSYC 4530 CULTURAL PSYCHOLOGY (3 credits)

This course will provide an overview of the cultural, community and ecological factors that play a role in how people perceive their environments. The goal is to investigate the ways in which culture affects individual behaviors, attitudes and cognitions. It may be easy to tell that two cultures are different, but identifying exactly what is meant - and all that is encompassed - when speaking about "culture" can be much more difficult. Culture can include everything from gender constructs and race/ethnicity to the effects of new technologies. All of these aspects of culture affect individuals' psychological make-up and behavior. Although psychology has largely developed from a Western tradition, attention to research from non-Western perspectives will also be emphasized. This course supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 8536, CACT 8106).

Prerequisite(s): PSYC 1010.

PSYC 4544 LABORATORY IN DEVELOPMENTAL PSYCHOLOGY (3 credits)

Laboratory work coordinated with PSYC 3520 and PSYC 3540 emphasizing the methods of research and statistical analyses used in the study of human development. Emphasis will be placed on the development of skills involved in the design of experiments, data collection, data analysis, reasoning about results, and scientific report writing.

Prerequisite(s): PSYC 3140, PSYC 3520, and PSYC 3540 or permission of instructor. Not open to non-degree graduate students.

PSYC 4560 FORENSIC PSYCHOLOGY (3 credits)

The roles and functions of forensic psychologists, as participants in the legal system, are studied, with special emphasis on the relevance of theories and principles from social psychology. Psychological concepts, theories, data, research methods and applications to varied substantive topics are examined (e.g., forensic careers, police psychology, violence, criminal profiling, sociopathy and psychopathy, risk assessment, expert testimony, and corrections).

Prerequisite(s): PSYC 1010 or SOC 1010 and PSYC 3450 or SOC 3450.

PSYC 4570 BEHAVIOR ANALYSIS AND INTERVENTIONS (3 credits)

Introduction to experimental methodology, rationale and research literature of changing behavior through behavior modification techniques. Particular attention will be paid to methodological concerns regarding single subject design, ethical considerations and ramifications of behavior intervention with children and youth. (Cross-listed with PSYC 8576)

Prerequisite(s): PSYC 1010 and permission of instructor. Not open to non-degree graduate students.

PSYC 4590 PSYCHOLOGY OF EXCEPTIONAL CHILDREN (3 credits)

A study of exceptional children and adolescents with sensory or motor impairments, intellectual retardations or superiorities, talented or gifted abilities, language or speech discrepancies, emotional or behavioral maladjustments, social or cultural differences, or major specific learning disabilities.

Prerequisite(s): PSYC 1010 and junior/senior.

PSYC 4630 ORGANIZATIONAL PSYCHOLOGY (3 credits)

This is a survey course which will cover the major concepts, theories and empirical research related to organizational psychology. Specific topics will include: work motivation, leadership, decision making and job satisfaction as well as more recent trends such as cultural diversity, work teams, work-family and quality issues. (Cross-listed with PSYC 8636)

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 4640 PERSONNEL PSYCHOLOGY (3 credits)

A survey of psychological principles, theories and research related to personnel issues. Course includes discussion of personnel selection, performance appraisal, recruitment, training and health and safety. (Cross-listed with PSYC 8646)

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 4644 LABORATORY IN PSYCHOLOGY: SOCIAL/INDUSTRIAL-ORGANIZATIONAL (3 credits)

Laboratory work coordinated with PSYC 3450 and PSYC 4630 or PSYC 4640, emphasizing a presentation of methods of research assessing human social behavior and applied psychological processes. Research design, data analysis and research report writing are also emphasized.

Prerequisite(s): PSYC 3140, PSYC 3450 and PSYC 4630 or PSYC 4640.

PSYC 4650 CREATIVITY AND INNOVATION IN ORGANIZATIONS (3 credits)

To provide a discussion of the antecedents of individual and organizational creativity, including measurement, models, characteristics of the individual and the environment that facilitate creativity and innovation in an organizational setting. Students in this course will be able to understand the research literature related to creativity and innovation and apply the findings to improve critical and creative thinking, implementation of creative ideas, and development of creative teams and organizations. This course supports the Organizational Science and Leadership concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 8656, CACT 8506)

PSYC 4680 POSITIVE PSYCHOLOGY, HEALTH, & WELL-BEING (3 credits)

Positive psychology is the scientific study of the "good life", or the positive aspects of the human experience that make life worth living. The discipline of positive psychology focuses on both individual and societal well-being. Students will learn the tenets of positive psychology and well-being research findings, including the various definitions and operationalizations of happiness and well-being.

Prerequisite(s): PSYC 1010

PSYC 4800 LAW & PSYCHOLOGY: ETHICS, RESEARCH & SERVICE (3 credits)

This course presents legal principles relevant to all psychological specialties, with special reference to mental health services. Ethical reasoning and the APA ethics code are considered. (Cross-listed with PSYC 8806)

Prerequisite(s): 15 hours of Psychology credits including PSYC 1010 or approval of the instructor. Not open to non-degree graduate students.

PSYC 4810 PRACTICE AND ETHICS IN BEHAVIOR ANALYSIS (3 credits)

This course presents ethical and legal issues relevant to research and practice in behavior analysis. This class will provide undergraduate students with knowledge of ethic codes and legal statutes that guide the field of applied behavior analysis and psychology more broadly. The primary emphasis will be the practical application of ethics to clinic, school, and community settings where children and adolescents are the recipients of services. Class topics related to ethics will be: principles, decision making, assessment and practice, supervision, research, responsibilities to the field of applied behavior analysis, and responsibility in public statements.

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 4890 SENIOR ASSESSMENT IN PSYCHOLOGY (0 credits)

This assessment tool is part of the Department's Student Outcomes effort. It is designed to monitor the Department's performance and to identify changes needed. Graduating seniors must register for and complete this course in the term in which they plan to graduate.

Prerequisite(s): Students must register for PSYC 4890 in the term in which they plan to graduate. Not open to non-degree graduate students.

PSYC 4910 SPECIAL TOPICS IN PSYCHOLOGY (1 credit)

One credit hour Special Topics courses allow for in-depth study of psychology topics not offered in our regular curriculum. When enrolling, see notes section on course listing for specific topic. May be repeated as topics change, but six hours of Special Topics courses (PSYC 4910, PSYC 4920, and PSYC 4930) is the maximum that may be applied toward a psychology major.

PSYC 4920 SPECIAL TOPICS IN PSYCHOLOGY (2 credits)

Two credit hour Special Topics courses allow for in-depth study of psychology topics not offered in our regular curriculum. When enrolling, see notes section on course listing for specific topic. May be repeated as topics change, but six hours of Special Topics courses (PSYC 4910, PSYC 4920, and PSYC 4930) is the maximum that may be applied toward a psychology major.

Prerequisite(s): Variable according to topic.

PSYC 4930 SPECIAL TOPICS IN PSYCHOLOGY (3 credits)

Three credit hour Special Topics courses allow for in-depth study of psychology topics not offered in our regular curriculum. When enrolling, see notes section on course listing for specific topic. May be repeated as topics change, but six hours of Special Topics courses (PSYC 4910, PSYC 4920, and PSYC 4930) is the maximum that may be applied toward a psychology major.

PSYC 4960 INDEPENDENT STUDY IN PSYCHOLOGY (1-6 credits)

A faculty-supervised special research project and/or directed readings involving empirical research and appropriate oral and written reports arranged individually with students on topics not explored in other offerings. If students do not complete the work during the semester they enroll in the course, they must complete all the work within an academic year of their enrollment.

Prerequisite(s): A minimum of 10 hours of Psychology including PSYC 1010 & PSYC 1020 and 1 additional course. Completion of the Independent Study Form and permission from the Undergraduate Program Committee (UPC).

PSYC 4970 PRACTICUM IN PSYCHOLOGY (3 credits)

This course provides an opportunity for practical application and further development of knowledge and skills acquired in the undergraduate psychology major. The practicum will provide a practical and career-building placement in a work setting. Students will develop skills and knowledge important for new steps in careers and graduate programs.

Prerequisite(s): PSYC 1020; PSYC 3140; GPA requirement: 2.8; Permission of instructor, and Letter of agreement from industry mentor. Not open to non-degree graduate students.

PSYC 4980 FIELDWORK PRACTICUM IN BEHAVIOR ANALYSIS (3 credits)

This course provides an opportunity for practical application and further development of knowledge and skills acquired in the Applied Behavior Analysis concentration within the undergraduate psychology major. The practicum will provide a practical and career-building placement in a work setting. Students will develop knowledge and skills important for new steps in careers within behavior analysis and graduate programs. The experience will be consistent with the supervised fieldwork requirements for individuals pursuing certification as a Board Certified Assistant Behavior Analyst.

Prerequisite(s): PSYC 1020; PSYC 4570; GPA requirement: 2.8; OR Permission of instructor

PSYC 4990 SENIOR THESIS (3-6 credits)

The course is designed to provide the student with the opportunity to initiate, design, analyze, and write-up an original experimental study in an area of interest to the student. Although the course is intended primarily for students who need to satisfy the requirement of a second experimental/laboratory course in the Bachelor of Science degree program, all students interested in this course will be considered on an individual basis.

Prerequisite(s): PSYC 3140 ('B' or better), 'B' average in major; signed statement from faculty member of Psychology Department who is willing to serve as adviser; written approval from chair of undergraduate program committee. Must be a 2nd semester junior or later.

Public Administration (PA)

Public Administration Undergraduate Courses

PA 1010 INTRODUCTION TO URBAN STUDIES (3 credits)

Introduction to history, concepts, development and literature of urbanism. An interdisciplinary examination of issues confronting contemporary urban society and how various academic disciplines relate to those issues. (Cross-listed with UBNS 1010).

PA 2000 LEADERSHIP & ADMINISTRATION (3 credits)

This course is designed to offer students the opportunity to increase their leadership skills by providing them with a series of competency-based seminars/workshops on the characteristics and tasks in which leaders are engaged.

Distribution: Social Science General Education course

PA 2170 INTRODUCTION TO PUBLIC ADMINISTRATION (3 credits)

A study of governmental administration and its involvement in the social and economic problems of American democracy. It includes but is not limited to the organizational, financial, personnel and planning problems and administrative relations with legislatures, political parties, chief executives and the courts.

Distribution: Social Science General Education course

PA 3000 APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR (3 credits)

A course on the use of data and statistical methods to explore and make inferences about society, while critically considering the influence of context and the powers and limitations of quantitative evidence. (Cross-listed with CRCJ 3000, SOWK 3000).

Prerequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or MATH 1300 or MATH 1320 or an ACT of 19, or above or permission from the department.

PA 3200 PROGRAM PLANNING AND EVALUATION (3 credits)

Research, program design, and evaluation are critical functions in the non-profit sector. Leaders and managers of non-profit organizations are continually challenged to monitor community needs, select and develop services and programs that respond to those needs, and to evaluate and modify the services they provide. This recurrent process is the foundation of quality non-profit programs. This course prepares students to undertake the research, program design and evaluation process employed in non-profit organizations.

Prerequisite(s): PA 3000. Not open to non-degree graduate students.

PA 3500 NONPROFIT ORGANIZATIONS AND MANAGEMENT (3 credits)

Introduces students to the nonprofit sector, including several aspects of nonprofit management. Intended for any student who wishes to understand nonprofit organizations and/or who may wish to work in the nonprofit sector. Service learning in a nonprofit agency is an important aspect of the class.

Prerequisite(s): Junior standing or permission of instructor.

PA 3600 PERSONNEL AND VOLUNTEER MANAGEMENT IN NONPROFITS (3 credits)

This course examines the managerial practices and problems in recruiting, hiring and other staffing issues within nonprofit organizations. It also addresses issues of personnel leadership, accountability, and performance associated with working with volunteers.

Prerequisite(s): PA 2170 & PA 3500 or permission from the school. Not open to non-degree graduate students.

PA 3700 FINANCIAL MANAGEMENT FOR NONPROFITS (3 credits)

This course will prepare students to oversee the financial management of nonprofit organizations by focusing on four areas: key financial concepts, financial statements presentation, accounting and reporting, and operational issues - emphasizing the links between accounting staff, program staff, fundraising staff and board of directors.

Prerequisite(s): PA 2170 and PA 3500. Not open to non-degree graduate students.

PA 3800 CROSS-SECTOR COLLABORATIVE LEADERSHIP (3 credits)

The goal of PA 3800/MGMT 3800 is to prepare students to serve as collaborative leaders of cross-sector initiatives. Specifically, this course will prepare students for success in working collaboratively across private, nonprofit and public sector organizations while also enhancing their overall development as a leader. Examples of successful and unsuccessful cross-sector collaborations will be explored along with discussions of theories related to cross-sector collaboration. (Cross-listed with MGMT 3800).

Prerequisite(s): Permission from instructor or MGMT 3490 with a grade of C or higher or enrollment in the cross-sector collaborative leadership minor.

PA 3900 INTRODUCTION TO INTEGRATED LEADERSHIP (3 credits)

This seminar course provides a cornerstone to understanding and developing an integrative leadership practice by focusing on yourself, your life, and your leadership. Current challenges demand leadership that can integrate perspectives from a personal and collective level. The goal of the course is to identify concepts of integrated leadership, to develop frameworks for understanding the contexts of applying integrated leadership and help develop skills for practicing integrated leadership. This course will explore leading well by understanding and integrating meaning, purpose, and values within the organizations and communities you serve. Through both theory and practice, this course will cultivate self-awareness and introspection through questioning and reflective practice and applying practical leadership skills to solving problems.

Prerequisite(s): ENGL 1150 (C- or better) or equivalency.

PA 4100 MARKETING IN PUBLIC, NON-PROFIT AND AVIATION ORGANIZATIONS (3 credits)

This course will focus on developing a working knowledge of marketing and its component parts as they may be applied to non-profit organizations.

Emphasis will be placed on understanding the marketing process and applying marketing principles to real organizational settings. (Cross-listed with PA 8106).

PA 4210 INTRODUCTION TO HEALTH CARE SYSTEMS (3 credits)

This course is designed to familiarize students with the structure of the health services system in the United States. It addresses quality, access and cost of health services delivery, personnel and funding resources for providing health care, financing health care, traditional and alternative health services delivery settings, and forces that shape the current and future health care sector.

PA 4300 SEMINAR IN PUBLIC POLICY (3 credits)

A study of the economic, social and political determinants of public policy in terms of administration and decision-making and of measuring and evaluating policy impact. The course includes both study of general policy processes, and, to a lesser extent, particular policy topics.

Prerequisite(s): PA 2170

PA 4390 PUBLIC BUDGETING (3 credits)

A study of the processes, procedures and politics of public sector budgeting.

PA 4410 PUBLIC PERSONNEL MANAGEMENT (3 credits)

A study of the personnel process in American governmental administration. The processes and problems of recruiting, structuring and operating public bureaucracies are examined as well as problems in personnel leadership, neutrality, accountability and performance.

Prerequisite(s): PA 2170, junior.

PA 4430 MUNICIPAL ADMINISTRATION (3 credits)

The administrative structure and administrative practices of American cities covering such areas as finance, personnel, public works, public safety, health, utilities and planning. (Cross-listed with PA 8436).

Prerequisite(s): Junior. Not open to non-degree graduate students.

PA 4440 ORGANIZATIONAL DEVELOPMENT AND CHANGE (3 credits)

The ability to lead and manage organizational change is a required competency for individuals working public sector related fields. Civic leaders, public administrators and non-profit managers must diagnose and respond to the dynamic and interconnected environment in which they work. This course prepares students to conduct the forms of analysis that organizational development and change requires.

PA 4500 NONPROFIT FUNDRAISING (3 credits)

Introduces students to issues and techniques for resource development within nonprofit organizations, including fundraising, program planning and budgeting, and marketing. Intended for students who wish to understand resource development within nonprofit organizations. Service learning with a nonprofit agency is an important aspect of the class.

Prerequisite(s): PA 2170 and PA 3500

PA 4510 LONG-TERM CARE ADMINISTRATION (3 credits)

An investigation of the broad range of policy issues, theoretical concerns and practical management strategies influencing the design, organization and delivery of long-term care services. (Cross-listed with GERO 4510, GERO 8516 and PA 8516).

Prerequisite(s): PA 2170

PA 4530 STRATEGIC PLANNING (3 credits)

The ability to lead and manage a strategic planning process is a required competency for individuals working public sector related fields. Civic leaders, public administrators and non-profit managers must diagnose and respond to the dynamic and interconnected environment in which they work. This course prepares students to conduct the forms of analysis that strategic planning requires.

Prerequisite(s): Not open to non-degree graduate students.

PA 4560 INTERGOVERNMENTAL MANAGEMENT (3 credits)

This course is for students wanting to improve their knowledge and understanding of intergovernmental relations as they impact policy and administration in the United States. (Cross-listed with PA 8566).

PA 4590 TECHNIQUES TOPICS IN NONPROFIT MANAGEMENT (1-3 credits)

A variable content course emphasizing nonprofit management techniques and topics. Topics include nonprofit leadership, board executive staff roles and relationships, personnel and volunteer management, financial management, proposal and grant writing community resources, special events planning and administration, needs assessments and legal ethical aspects. (Cross-listed with PA 8596).

Prerequisite(s): Permission of instructor. Not open to non-degree graduate students.

PA 4820 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

Seminar on environmental law and regulations. Addresses federal regulations, implementing instructions, legal principles, and requirements. The major federal environmental laws, air and water quality, solid and hazardous waste, and pollution prevention and remediation are discussed. Usually offered Fall semesters.

Prerequisite(s): Junior-senior and permission.

PA 4890 SPECIAL TOPICS PUBLIC ADMIN (3 credits)

A course with the purpose of acquainting the student with key issues and topics of special concern to public and non-profit management that they otherwise would not receive elsewhere. (Cross-listed with PA 8896).

PA 4900 SPECIAL TOPICS IN PUBLIC ADMINISTRATION (3 credits)

A variable content course with public administration and urban studies topics selected in accordance with student and faculty interests. Possible topics include urban homesteading, administrative federalism and economic development and the public sector.

Prerequisite(s): PA 2170 and permission of instructor.

PA 4950 INTERNSHIP (3 credits)

A course designed to link theoretical concepts learned in the classroom to the practical application of "real world" situations and to familiarize students with attitudes, operations and programs of governmental units.

Prerequisite(s): PA 2170 and permission of the School.

PA 4960 CROSS-SECTOR COLLABORATIVE LEADERSHIP CAPSTONE (3 credits)

This is a capstone course that prepares students to be effective leaders in the 21st century. This course is the final leadership course in the Cross-Sector Collaborative Leadership minor. This minor requires a capstone project that encompasses the student's knowledge and training. It is designed to provide an applied service-learning opportunity for students. (Cross-listed with MGMT 4960).

Prerequisite(s): Must be completing either the Cross-Sector Collaborative Leadership Minor or the Cross-Sector Collaborative Leadership Concentration. Must have completed PA 3800/MGMT 3800. Not open to non-degree graduate students.

Public Health & Behavior (PHHB)

Public Health & Behavior Undergraduate Courses

PHHB 1500 FOUNDATIONS IN PUBLIC HEALTH (3 credits)

An introductory course for public health majors and other interested students, that examines the foundations of public health. The course includes an orientation to the process and the professions of public health and a consideration of current trends, problems and issues and their implications for public health professionals. The course will help candidates develop the knowledge, skills, competencies, and attitudes necessary to orchestrate an environment for positive public health.

Distribution: Social Science General Education course

PHHB 2070 SUBSTANCE ABUSE AND MISUSE: PREVENTION AND MANAGEMENT (3 credits)

An introduction to the effects and rationales of drug use, misuse, and abuse. Included are the physiological, psychological, sociological, pharmacological, and legal aspects of drugs in a culturally diverse United States and abroad.

PHHB 2310 HEALTHFUL LIVING (3 credits)

A study of selected health problems and issues in our society as related to knowledge, attitudes, and behaviors necessary for healthful living in a culturally diverse society.

PHHB 2850 STRESS MANAGEMENT (3 credits)

The health-related aspects of stress will be the focus of this course. Selected techniques for the self-regulation of stress will be demonstrated, practiced, and analyzed. Pressures from the culturally diverse United States and implications of a global society will be analyzed. Students will develop skills and competencies necessary to create a learning environment conducive to reducing stress.

PHHB 3000 SPECIAL PROJECTS (1-3 credits)

This course is designed to provide an opportunity to study a topic in public health through short course, seminar, workshop, or special project.

Prerequisite(s): The prerequisite for the special project will be determined by the instructor.

PHHB 3030 FIRST AID (3 credits)

Designed to give students knowledge and skill in implementing immediate, temporary treatment in case of injury or sudden illness before the services of a physician. Upon successful completion of the course, a student will receive a standard first aid and cardiopulmonary resuscitation certificate.

PHHB 3060 PROMOTING POSITIVE HEALTH (3 credits)

The focus of this team taught, experiential course will be assisting individual students: a) determine what wellness and mindfulness changes they wish to make in their lives; b) assisting them in acquiring the skills and learning about theories of how to effectuate change, and c) assisting them in making the change.

Prerequisite(s): HPER 3090/HEKI 3090, HPER 2850/HEKI 2850, and Holistic Health - Eastern Perspectives. At least two of the following: PEA 111T, PEA 112I, PEA 112U, or PEA 112V One additional PEA course (may not be from the previous category or basketball or volleyball)

PHHB 3070 DEATH AND DYING (3 credits)

An interdisciplinary survey of literature in the field of thanatology, with an emphasis on working with the older patient and his or her family. (Cross-listed with GERO 3070).

PHHB 3080 HUMAN SEXUALITY (3 credits)

An examination of factors influencing sexual development. Emphasis is given to topics pertinent to healthful living in today's culturally diverse, global society. (Cross-listed with WGST 3080).

PHHB 3310 INJURY PREVENTION IN PUBLIC HEALTH (3 credits)

This course is designed to explore public health strategies for the development and maintenance of safe physical environments with a focus on prevention of intentional and unintentional injuries. It explores a multitude of safety programs for school, business, recreation, transportation, and the home.

PHHB 4000 METHODS AND MATERIALS IN HEALTH EDUCATION (3 credits)

This course will provide an opportunity to study, develop and use different materials and equipment in public health. Various methods of teaching health will be practiced and evaluated. Candidates will be able to gain classroom and field experience (service-learning) in planning lessons and presentations.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4040 EPIDEMIOLOGY & PREVENTION OF DISEASE (3 credits)

The course is designed for public health students and others who are interested in public health. The cause, prevention, treatment and control of prevalent communicable and non-communicable disease in a culturally diverse and global society will be emphasized. Special emphasis will be given to diseases and health problems that can be prevented or controlled through public health initiatives.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4050 INTRODUCTION TO RESEARCH IN PUBLIC HEALTH (3 credits)

This course will assist students to develop the basic skills to read and evaluate applied research to address contemporary problems in public health. The course will provide an introduction to proposal writing, data collection, research design, statistical analysis, and computer application. Unique problems associated with data collection in public health settings such as public health departments, neighborhood health centers, and community based organizations will be addressed.

PHHB 4060 SCHOOL HEALTH PROGRAMS (3 credits)

The purpose of this course is to provide information and strategies for planning, implementing, and evaluating Coordinated School Health Programs (CSHP) for diverse cultural groups. Content includes an overview of school health programs, the essential functions of each of the eight components, the role of national and state organizations in working with local agencies and school districts in promoting the development of comprehensive school health programs.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4130 COMMUNITY HEALTH (3 credits)

A survey course of community health issues. The basics of epidemiology/statistical sciences, environmental health, managerial/administrative sciences, and behavioral/social sciences for community health are examined. Public health candidates will gain skills needed to develop and manage community health programs.

PHHB 4200 A PUBLIC HEALTH APPROACH TO MENTAL HEALTH (3 credits)

This public health course will help students think critically about the prevention, identification, and treatment of mental illness in the United States. Students will be introduced to concepts from the disciplines of public health, psychology and sociology to understand mental health disorders and their impact on population health. Students will explore health disparities through the lens of cultural, social, behavioral, psychological, and economic factors. Students will recognize that mental health exists on a continuum and develop skills to address environmental influences on behavior. (Cross-listed with PHHB 8206).

PHHB 4280 SOCIAL MARKETING FOR PUBLIC HEALTH (3 credits)

This course will introduce students to current theory, practices and resources in the field of social marketing as it relates to public health. Students will analyze and implement social marketing techniques.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4400 HEALTH LITERACY (3 credits)

This course is designed to provide students with the competencies to reduce problems associated with low health literacy. The two primary foci will be strategies to help patients and other health consumers improve their health literacy, and strategies to help health providers and health educators communicate in a manner that can be understood by all persons regardless of their health literacy

PHHB 4420 PUBLIC HEALTH INFORMATICS (3 credits)

Students will learn the implementation, operation, and application of health information systems. Students will explore the legal and ethical issues surrounding health informatics and patient records, management and communication in health informatics, and social and organizational issues pertaining to health informatics.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4550 HEALTH ASPECTS OF AGING (3 credits)

This course emphasizes health promotion for older adults. Special health needs of older Americans are compared and contrasted with health needs for other age groups. Prevention or delaying of chronic diseases and disorders are emphasized. (Cross-listed with GERO 4550 and GERO 8556 and PHHB 8556 and WGST 4550).

PHHB 4650 GLOBAL HEALTH (3 credits)

This course will explore contemporary health problems around the world with particular emphasis being placed on problems experienced by developing countries. The political, economic, social, geographical, biological aspects of the problems and possible solutions will be addressed.

Distribution: Global Diversity General Education course

PHHB 4700 WOMEN'S HEALTH AND ISSUES OF DIVERSITY (3 credits)

This course provides a critical understanding of the inter-relationship between socio-cultural, economic, and political factors and women's physical and mental health. The aim is to provide an overview of the experience with the health care system. Emphasis will be on critically examining recent scholarship from a sociological, behavioral, health policy perspective. (Cross-listed with PHHB 8706, SOC 4700, SOC 8706).

Distribution: U.S. Diversity General Education course

PHHB 4880 PUBLIC HEALTH POLICY (3 credits)

This course provides an overview of the U.S. health system, and an introduction to the skills necessary to address health policy issues. Students will develop a working knowledge of health services terminology, recognize basic health care concepts, distinguish between various components of the health care delivery system and be able to apply concepts learned in the analysis of a public health problem.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4950 PUBLIC HEALTH LEADERSHIP AND ADVOCACY (3 credits)

This course reviews public health leadership concepts and practices that prepare candidates to fulfill professional roles as advocates and leaders in the health field. Politics and power structure in communities and organizations are addressed. The processes through which changes in the political, economic, organizational, and physical environment related to health status and health behavior are brought about will be addressed. Media advocacy, the legislative process, community organization, and coalition development will be explored as means of environmental change.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4960 PUBLIC HEALTH - PLANNING AND ORGANIZATION (3 credits)

The course is designed to provide public health students an understanding of planning and organization in public health. The use of planning tools including social assessment methods, epidemiological methods, behavioral methods, organizational methods, administrative methods and evaluation procedures for public health initiatives will be included. Grant writing components will be emphasized.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4970 PROBLEMS OF HEALTH EDUCATION (1-3 credits)

This course is designed to provide an opportunity for individuals or groups to study problems in health education.

Prerequisite(s): Permission of instructor.

PHHB 4990 INTERNSHIP IN PUBLIC HEALTH (3 credits)

This internship provides on-the-job training for public health students in a cooperative program with state and local health departments or other appropriate community and public health agencies. Direct field experience is completed by the student under the supervision of an experienced practitioner in an approved public health agency.

Prerequisite(s): Completion of or current enrollment in core courses, GPA of 2.5 or above in required courses, and no grade below a C in required courses, and permission of instructor.

Real Estate & Land Use Economics (RELU)

Real Estate & Land Use Economics Undergraduate Courses

RELU 2410 REAL ESTATE PRINCIPLES AND PRACTICES (3 credits)

An introductory survey of real estate principles and practices which introduces the terminology, concepts and basic practices in the fields of real estate law, real estate finance, real estate appraisal, real estate property taxation and miscellaneous topic areas. Note: Students cannot receive credit for both RELU 2410 and RELU 3410. (Fall, Spring)

RELU 2700 REAL PROPERTY RIGHTS AND OWNERSHIP: OVERCOMING BARRIERS (3 credits)

Real estate is ubiquitous and the ownership of property - and accompanying property rights - have shaped US history and enabled millions to build wealth. At the same time, property ownership has eluded many, especially those from underrepresented groups. This class will expose students to historical and current barriers to property ownership, assess efforts to address these disparities, explore remedies, and give students the practical tools they'll need to plan for, and eventually acquire, their first home or other real estate.

RELU 3410 REAL ESTATE PRINCIPLES AND PRACTICES (3 credits)

This is a survey course in real estate principles and practices, which is designed to familiarize students with industry terminology, current practices, and cover the following topics: Licensure, property rights, legal descriptions, real estate law and contracts, appraisal, financing, investments, Fair Housing, and related topic areas. This course provides foundational knowledge of the real estate field and will prepare students to successfully complete more advanced real estate coursework. NOTE: Students cannot receive credit for both RELU 2410 and RELU 3410. (Cross-listed with BSAD 8605).

RELU 3430 REAL ESTATE BROKERAGE AND SALES (3 credits)

Overview of real estate brokerage and sales principles, to include buying and selling, leasing, brokerage business operations, contracts, closings, legal requirements, Fair Housing, advertising, and career opportunities.

Prerequisite(s): RELU 2410 or RELU 3410.

RELU 3450 PROPERTY MANAGEMENT (3 credits)

This course focuses on commercial and residential property management concepts and their application to the operation, control, and oversight of real property. The course will study leasing, tenant selection and relations, maintenance, marketing, contract management, asset management principles, as well as Fair Housing Laws and the Americans With Disabilities Act as they pertain to property management. (Cross-listed with BSAD 8625).

Prerequisite(s): RELU 2410 or RELU 3410.

RELU 3460 REAL ESTATE LAW (3 credits)

Upper-level survey course in real estate law, which examines estates in land, conveyances, leases, mortgages, easements, zoning, environmental law, contracts, taxes, foreclosures, landlord-tenant relations, agency, Fair Housing, and Nebraska License Law. (Cross-listed with LAWS 3460)

Prerequisite(s): RELU 2410 or RELU 3410.

RELU 4390 REAL ESTATE INVESTMENTS (3 credits)

This course focuses on methods used to analyze existing and proposed commercial and residential real estate investments through dynamic programming models, and explores strategies to finance commercial real estate. The class ultimately prepares students to understand the risks and rewards associated with financing and investing in real estate. (Cross-listed with BSAD 8616).

Prerequisite(s): RELU 2410 or RELU 3410 or FNBK 3250

RELU 4400 RESIDENTIAL REAL ESTATE FINANCE (3 credits)

This course focuses on the methods of financing residential real estate through the examination of various mortgage instruments, mortgage lenders, and the risks associated with leveraging real property. Industry terminology, concepts, best practices, and financial calculations are also presented, as are the influences of governmental policies on the industry. (Fall)

Prerequisite(s): RELU 2410 or RELU 3410

RELU 4410 BASIC APPRAISAL PROCEDURES (3 credits)

Fundamentals of real estate valuation and appraising; factors affecting value; valuing land, valuing improvements and the valuation of special classes of residential property; appraisal practice, depreciation and obsolescence, appraising rules, the mathematics of appraising; an appraisal of a single family residence is required.

Prerequisite(s): RELU 2410 or RELU 3410 AND FNBK 3250 with a C or better

RELU 4420 INCOME PROPERTY APPRAISAL (3 credits)

Introduction to the theory and concepts of income capitalization approaches, methods and techniques to valuation of real estate income property. Characteristics of yield on investment real estate; future income projections; mortgage coefficients; purchase and leaseback reversions; Ellwood Tables; capitalization rates and investment yields; types of annuities; and condemnation appraisal. (Spring)

Prerequisite(s): RELU 2410 or RELU 3410; and FNBK 3250

RELU 4440 REAL ESTATE DEVELOPMENT (3 credits)

This course focuses on the procedures and complexities in developing and redeveloping various commercial property types and mixed-use real estate. Topics include an overview of the real estate development process, assembling a team, identifying project stakeholders, financial analysis, site selection, market analysis, and the regulatory environment. (Cross-listed with BSAD 8626).

Prerequisite(s): RELU 2410 or RELU 3410 with a grade of B or above, and a cumulative GPA of 3.0 or better, or permission of Real Estate Program Director.

RELU 4460 COMMERCIAL REAL ESTATE FINANCE (3 credits)

A foundation course in commercial real estate finance including legal, analytical, institutional and governmental aspects.

Prerequisite(s): RELU 2410 and FNBK 3250

RELU 4500 REAL ESTATE INDEPENDENT STUDY (1-3 credits)

Individual investigation of specific issues or problems in real estate.

Prerequisite(s): Permission of Real Estate Program Director.

RELU 4510 REAL ESTATE INTERNSHIP (1-3 credits)

Students will engage in an applied experience in their area of specialization to gain relevant industry experience and to practice the skills and concepts learned in the classroom. Student reports on the internship experience and an employer's evaluation of the student's performance are course requirements. RELU 4510 may be taken for a maximum of 3 credits. (Fall, Spring, Summer)

Prerequisite(s): Permission of Department Internship Coordinator.

Recreation-Leisure Study (RLS)

Recreation-Leisure Study Undergraduate Courses

RLS 2440 FOUNDATIONS OF RECREATION AND LEISURE (3 credits)

A survey approach to the recreation, leisure services, parks professional field to include the historical philosophical bases of the overall profession. Provides the necessary foundational knowledge for majors as well as candidates within other areas of study.

RLS 2500 OUTDOOR RECREATION (3 credits)

A survey of the dynamics of outdoor recreation in American life. Designed to guide candidates through a learning experience that results in an introduction to and a broad-based understanding and appreciation of outdoor recreation.

RLS 3100 SOCIAL ASPECTS OF SPORT AND LEISURE (3 credits)

A critical examination of the function and significance of sports within the overall leisure behavior patterns of Western society. Recreational sport, sport spectatorship, and competitive athletics are considered from the dominant theoretical perspectives within sociology.

Prerequisite(s): Six hours of social science or permission.

RLS 3500 FOUNDATIONS OF RECREATION THERAPY (3 credits)

An introduction to therapeutic recreation services as a specialized field within recreation. Course content touches on the majority of the special populations recognized within American society. An in-depth survey approach is utilized.

RLS 4070 CAMPUS RECREATION MANAGEMENT (3 credits)

A review of the knowledge, skills, and abilities required for the management of typical campus recreation programs and facilities. This course will prepare students for entry level positions managing campus recreation employees, programs, facilities and services. (Cross-listed with RLS 8076)

RLS 4100 FACILITY DESIGN AND MANAGEMENT (3 credits)

This course is designed to acquaint the recreation major or practitioner with the knowledge and certifications necessary to maintain and operate a recreation building including all major activity areas using the latest standards and technology. Attention will be devoted to the design and management process, including terminology, court specifications, handicapped accessibility, and swimming pool operation.

RLS 4240 RECREATION ADMINISTRATION (3 credits)

Designed to provide a background of information on public, private, and commercial recreation with special attention to organization, promotion, and development from the administrative aspect. (Cross-listed with RLS 8246)

Prerequisite(s): RLS Major and Senior status

RLS 4300 RECREATION PROGRAMMING AND LEADERSHIP (3 credits)

An advanced study of recreational programming and leadership through practical applications. Emphasis is placed upon understanding proven programming and leadership knowledge and skills; understanding participant leisure behavior; understanding participant leisure needs; and skill development in ways through which organization, agencies and businesses create services to respond to the leisure needs of the consumer. (Cross-listed with RLS 8306)

Prerequisite(s): Junior, Senior or Graduate Standing

RLS 4400 TRAVEL AND TOURISM (3 credits)

This course is designed to provide the recreation major or practitioner, and other interested candidates, with an awareness of the major components of the travel and tourism industry, including its costs and benefits to a resident community. (Cross-listed with RLS 8406)

Prerequisite(s): Junior Standing.

RLS 4420 RECREATION FOR THE AGING (3 credits)

Role of leisure services as related to understanding and working with elders. Emphasis on recreation programming as a mode of intervention. Analysis and study of the phases of aging, with reference to psychomotor, affective, and cognitive changes; introduction to the theories of aging and how they relate to the lifestyle of this population; recreational therapy intervention, activity adaptation and program design; leisure education and issues and trends. (Cross-listed with RLS 8426, GERO 4420, GERO 8426)

RLS 4550 PRACTICUM I (6 credits)

Practical learning experience in leisure service delivery under close University and agency supervision.

Prerequisite(s): Senior, 2.5 GPA and department consent.

RLS 4560 PRACTICUM II (6 credits)

Practical learning experience in leisure service delivery under close University and agency supervision.

Prerequisite(s): Senior, 2.5 GPA and department consent.

RLS 4970 PROBLEMS OF RECREATION (1-3 credits)

The purpose of this course is to provide an opportunity for candidates to participate in special conferences on problems in the field of recreation and to further professional improvement and growth beyond the normal four-year undergraduate program.

Prerequisite(s): Permission of instructor.

Religion (RELI)

Religion Undergraduate Courses

RELI 1000 TOPICS IN RELIGION AND SPIRITUALITY (1 credit)

As a first year topics course, the main purpose is to introduce students to some aspect of the academic study of religion and spirituality. The specific topics will vary considerably; however, the objectives include training students in study methods generally and how to study religion as a scholarly subject in particular.

RELI 1010 INTRODUCTION TO WORLD RELIGIONS (3 credits)

A introductory course in religious studies, designed both to introduce students to ways of understanding religion as a phenomenon in human culture and history and also to survey a wide variety of the religions of the world.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

RELI 1050 FIRST YEAR SEMINAR IN RELIGION (3 credits)

The purpose of this course is to introduce students to a particular topic in the study of religion. Although the topic for this course will vary from semester to semester, students will be expected to read, to write, and to discuss the assigned texts and the ideas they contain. Students will learn basic skills in reading academic literature, writing about significant issues, and speaking articulately about the questions and issues. These skills will be helpful in other university and professional work.

RELI 2000 ARCHAEOLOGY OF BIBLICAL LANDS (3 credits)

This course introduces students to the purpose and methods of biblical archaeology and includes a survey of the material culture of the land of the Bible from the Chalcolithic (5th - 4th millennia BCE) to the Persian periods (4th century BCE). Special emphasis will be placed on the relationship between biblical narratives and the archaeological reconstruction of ancient social and natural environments.

RELI 2010 RELIGION AND CRITICAL THOUGHT (3 credits)

This class introduces students to critical approaches to the study of religion. Students are exposed to a variety of social scientific, scientific, philosophical, indigenous, and critical literary approaches to the study of wide-ranging religious beliefs and practices. The course is required for majors and recommended for minors in Religion as well as others with high interest in the field of Religious Studies.

Prerequisite(s): 3 hours in Religion or permission of instructor.

RELI 2020 RELIGION AND HUMAN RIGHTS (3 credits)

This course introduces students to the intersection of religion and human rights. It takes human rights as a moral tradition and asks how it impacts and is impacted by religious moral thought.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

RELI 2060 THE RELIGION OF ANCIENT EGYPT AND MESOPOTAMIA (3 credits)

This course is designed to familiarize the student with the religions of ancient Egypt and Mesopotamia. The course will use archaeological discoveries together with ancient Egyptian and Mesopotamian texts to explore the religions of these two civilizations. It will deal with Mesopotamian and Egyptian beliefs surrounding issues such as creation, afterlife, ethics, morality and rituals.

Prerequisite(s): Intro to World Religion is recommended but not necessary.

RELI 2120 HINDU SCRIPTURES (3 credits)

An introduction to some of the foundational scriptures of Hinduism (Sanatana Dharma) from traditional and modern perspectives, including the Vedas, the Upanishads, and the Bhagavad-Gita.

Prerequisite(s): Not open to non-degree graduate students.

RELI 2150 HEBREW SCRIPTURES (3 credits)

A historical introduction to the study of the Hebrew Scriptures from the Biblical to Talmudic period in the light of recent scholarship.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

RELI 2160 NEW TESTAMENT: HISTORY, LITERATURE, AND SOCIETY (3 credits)

Who were Jesus, Peter, Mary, and Paul in the Roman empire of the early first century? How did these Jews of the Second Temple Period become the earliest generation of a 2,000 year history of Christianity? How did early Christian understandings of God and humanity shape or constrain their interpretations of and responses to affliction, healing, and death, both conceptually and in practice? Finding answers to these questions requires students to study the literature of the New Testament and other early Christian literature, along with scholarly analyses of key issues related to authorship, dating, textual analysis, literary genres, historical contexts, and varying interpretations. The purpose of the course is to train students in the content of the texts as well as critical tools related to documentary analysis, archaeological methods, and various literary and social scientific approaches, interdisciplinary tools which also enhance one's skills in a variety of careers and professions.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

RELI 2170 QUR'AN (3 credits)

This course provides an introduction to the academic study of the Qur'an, its uses, interpretations, and applications in society from its earliest appearance up to the present.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

RELI 2190 THE MODERN MIDDLE EAST (3 credits)

An interdisciplinary study of the social, religious, and historical dimensions of contemporary issues and events which make the Middle East cultural and geographic region a center of global tensions. After providing a background of how Islam spread in and unified the region, students will study factors which have shaped the Middle East from the late Ottoman period to the present, analyzing the principal sociocultural and political economic developments in the Middle East from the early 19th century to the early 21st century. (Cross-listed with HIST 2190, SOC 2190).

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

RELI 2200 GLOBAL RELIGIOUS ETHICS: THE BASICS (3 credits)

An introduction to the main types of ethical thought in religious traditions worldwide. The course will consider both historical and contemporary approaches and will relate ideas and practices of religious ethics to contemporary moral problems.

RELI 2400 RELIGION IN AMERICA (3 credits)

The role of religion in American culture, seen in the interaction between the inherited religious traditions and the crucial events in American experience and how this affects American identity - past and present.

Prerequisite(s): Sophomore or permission of instructor.

RELI 2500 SPIRITUALITY AND WELLNESS (3 credits)

This course provides an introduction to the emerging field of spirituality and wellness. Utilizing perspectives from multiple disciplines and incorporating both third-person (research, theory) and first-person (experiential, reflective) approaches, students will explore topics such as: the nature of spirituality; mindfulness, meditation and wellness; spirituality and public health; spiritual wellness on campuses; and ecospirituality.

Prerequisite(s): Not open to non-degree graduate students.

RELI 2730 THE BLACK SPIRITUAL EXPERIENCE (3 credits)

The Black Spiritual Experience course examines the trajectory of early African religions and philosophies, and their syncretization with European settler religions in America that have been practiced and embraced by Blacks in the U.S. since slavery. Students will survey the historical development of the Black church in America, and the emergence of liberation and Black theologies to combat white supremacy, oppression, and exploitation. This course will explore the cultural importance of music, dance, and art in worship and Black spiritual expressions; the role of religion and theology in empowering and uplifting African Americans, particularly during the Black Power and Civil Rights movements; the political impact of Black religious institutions in the long fight against systemic racism, racial violence, police brutality, and voter suppression in America; and the challenges of inclusion, equity, and intersectionality within the Black church around issues of gender, class, and sexual orientation. (Cross-listed with BLST 2730).

Distribution: U.S. Diversity General Education course

RELI 3020 NATIVE AMERICAN RELIGIONS (3 credits)

This course examines the life-ways, oral narratives, ceremonies, and philosophies of selected Native American tribal nations and communities from the major cultural regions of North America, utilizing historical, anthropological, and literary approaches. No single Native spiritual tradition or culture represents all Native North American beliefs and customs. Thus, attention will be given both to similarities among different tribal groups, and also the great diversity among the hundreds of indigenous ways of life on the North American continent, both ancient and modern. Particular topics addressed include the following: healing traditions and maintaining personal and communal balance, pilgrimages to sacred sites, and, critically, Native American creation stories inform the manner in which Native communities approach the natural world, including plants and animals as "other-than-human" persons.

RELI 3030 SHAMANISM (3 credits)

Study of the forms and techniques of shamanic experience from its Paleolithic and Neolithic origins to its contemporary practice among Indigenous peoples worldwide, including its role in the development of human religious traditions and systems of healing.

RELI 3050 RELIGIONS OF THE EAST (3 credits)

A study of the major religions that originate in South, Southeast, and East Asia, considering their origins, foundational doctrines, practices, beliefs, rituals and contemporary expressions. Included are the religions of Hinduism, Buddhism, Jainism, Sikhism, Daoism, Confucianism and Shintoism. Knowledge of the religious and spiritual traditions of South, Southeast, and East Asia will help students who intend to travel or work in those regions or who may have friends and colleagues from those regions of the world. A broad grasp of these critical cultural traditions will enhance international, cross-cultural understanding for any career or professional track.

RELI 3060 RELIGIONS OF THE WEST (3 credits)

The stories and histories, practices, communities, and interactions among Jews, Christians, and Muslims are part of a larger history of inter-religious encounters and development. In addition to learning about the ideas and scriptures, the ritual and ethical practices, and the forms of social organization of these religious communities, students will analyze how each one of these major religious traditions not only impacts each other, but also play significant roles in the emerging global community. With this additional perspective, students will be able to understand and discuss Judaism, Christianity, and Islam as dynamic forces historically and in the twenty-first century.

RELI 3130 WOMEN AND THE BIBLE (3 credits)

This course explores the characterization of women in Hebrew and Christian scriptures as well as what we can learn about the lives of women in the ancient world from these and other sources. Attention is also given to the reception and use of these texts in later historical periods including contemporary religious contexts. (Cross-listed with WGST 3120).

RELI 3200 ISLAM AND MUSLIMS (3 credits)

What do Muslims believe? How do they practice their faith? What role does Islam and what roles do Muslims play in the 21st century? This course provides an introduction to the history, beliefs, and practices of Islam and Muslim communities, including both Sunni and Shi'i traditions, Sufis and Salafis, from the time of Muhammad ibn Abdullah to the 21st century. Students will examine the ways in which we come to 'know' about Islam and how to approach mediated sources with a critical lens. Thus, in addition to highlighting the many important cultural, scientific, medical, artistic, and architectural contributions of Muslim societies throughout the past millennium, critical contemporary issues will also be addressed, including the role of women in Islam, the meaning of jihad, the legal traditions (shari'a and fiqh), the relationship between religion and politics in Islam, and issues of law, gender, myth, violence, colonialism, modernity, and Islamophobia.

RELI 3330 ROMAN CATHOLIC THOUGHT AND PRACTICE (3 credits)

What does the Roman Catholic Church teach today? What are the major official documents outlining the theological concerns of the Holy See since the time of Vatican II? How do Roman Catholics themselves think about the official teachings? This course is an investigation of developments and differences in Roman Catholic thought and practice over the past century. Students will examine prominent official statements (e.g., papal encyclicals and episcopal pronouncements) and commentary about different points of view. Special consideration will be given to the theological ethical bases in the tradition for various progressive and conservative theological trends. Students will analyze documents and issues and articulate their own perspectives both orally and in writing. Topics to be examined include both moral issues (e.g., ends of life decisions, poverty and justice, climate and human responsibility) and questions about the priesthood and the diaconate, interfaith dialogue, and inter-religious relations.

RELI 3400 RELIGION AND FILM (3 credits)

This course will examine the various ways in which religion and film connect, including the representations of religious groups in films, ways in which films replicate or alter religious concepts, and ways in which film as an aspect of popular culture functions analogously to religions in society. Methods used will include the analysis of film technique, auteur criticism, and audience reception analysis.

Prerequisite(s): Not open to non-degree graduate students.

RELI 3500 TOPICS IN RELIGIOUS STUDIES (3 credits)

The content of this course varies from semester to semester, giving instructor and students an opportunity to investigate various subjects of interest in religious studies. Typically, students will learn through reading, viewing, discussing, and writing about the topic under study. Some sections may include service learning and other forms of experiential learning. (May be repeated for credit as long as the topic is different, up to 18 hours of credit.)

RELI 3960 READINGS IN RELIGION (1-6 credits)

Individual research in selected areas or particular questions in religious studies, which are not covered in other courses. Typically, a student proposes a topic to an instructor, and they agree upon a list of readings (or other resources) to read, analyze, and evaluate, as well as expectations for writing papers and presenting ideas orally. Students are welcome to propose topics of study!

Prerequisite(s): Permission of instructor.

RELI 4000 RELIGIOUS STUDIES INTERNSHIP (1-6 credits)

A supervised internship enabling students to develop and apply knowledge and gain expertise related to the field of Religious Studies while working at a non-profit, educational, non-governmental or related organization.

The host organization for the student must be approved in advance in consultation with the internship coordinator and the Chair of Religious Studies. This course may be repeated for a maximum of six credit hours.

Prerequisite(s): Junior or senior. Religious Studies major or minor. Permission of internship coordinator. Not open to non-degree graduate students.

RELI 4010 SENIOR SEMINAR IN RELIGION (3 credits)

This course provides a capstone experience in religious studies. It serves as the third writing course and is required for Religious Studies majors. The readings will deepen students' understanding of the field of Religious Studies and how it relates to social concerns, as well as guide students through developing a research project. Students will present research both in writing and verbally, in ways that address scholarship in Religious Studies and that are accessible to a general audience. Student will also have opportunities to reflect on experiential learning and career goals.

Prerequisite(s): Five courses in Religion, or permission of instructor.

RELI 4020 BUDDHIST TRADITIONS (3 credits)

This course is an exploration of Buddhist history, thought and practices. It begins with the origins, cultural context, and development of Buddhism in South Asia and then traces the path of Buddhism through Southeast Asia, Tibet, China, Korea, Japan and North America.

Prerequisite(s): Junior or permission of instructor.

RELI 4030 AFRICANA RELIGIONS (3 credits)

An introduction to religions in Africa and the diaspora, including African Traditional Religions, Christianity, Islam, and Afro-Caribbean religious traditions, using anthropological, historical, and other academic approaches to the study of religious and spiritual traditions. In particular, students will learn about the role of spirits, ancestors, witches, and other invisible agents in ideas and practices regarding health and healing. Finally, the class will examine the complex inter-relationships between religious ideas and practices and contemporary post-colonial political-economic realities, including the consequences of genocide and other human rights violations and the role of religious communities in social and economic development. (Cross-listed with RELI 8036, BLST 8036, BLST 4030).

RELI 4050 RELIGION IN EARLY AMERICA (3 credits)

This course examines the history and nature of religion in North America to c. 1770 with an emphasis on the British colonies. (Cross-listed with HIST 4010; HIST 8016).

Prerequisite(s): Junior or senior standing. Not open to non-degree graduate students.

RELI 4060 FIRST NATIONS: SPIRIT IN ARTS AND CULTURES (3 credits)

First Nations: Spirit in Arts and Cultures explores how contemporary Indigenous/Native (First Nations, Metis and Inuit) artists in the lands now known as Canada express their cultures, especially beliefs, through the fine arts. While we will focus on visual culture (sculpture, painting, film, mixed media), literary works (a novel, poetry) and music will also be included. First Nations, Metis and Inuit artists often simultaneously express traditions, their own experiences, and reflections on the present and past through their work. By doing this, they share valuable perspectives on health and healing as well as the national process of Truth and Reconciliation. Trying, so much as possible, to let the artists speak for themselves, we will explore how spirituality manifests itself in contemporary cultures for these Indigenous artists north of the border. (Cross-listed with RELI 8066, NAMS 4060, NAMS 8066).

RELI 4150 JUDAISM IN THE MODERN AGE (3 credits)

A study of Jewish communities and movements since the Enlightenment emphasizing historical, intellectual, religious-legal, and socio-cultural developments. Pivotal movements (e.g., Hassidism, Reform, Historical Conservative Judaism, Modern Orthodoxy, Zionism) and major historical events (e.g., the American and French Revolutions, Tsarist oppression, the Holocaust/Shoah and the establishment of the State of Israel) will be analyzed for their ongoing impact on Jewish thought, practice, and social organization. (Cross-listed with RELI 8156)

Prerequisite(s): Junior, three hours in religion, or permission of instructor.

RELI 4160 THE HOLOCAUST (3 credits)

An interdisciplinary approach in a seminar oriented format discussing various aspects of the most notorious genocide in modern times. The course will explore the history of anti-Semitism, the rise of Nazi Germany and the road to the 'final solution.' It will further explore psychological, sociological and intellectual aspects of the dark side of humanity. (Cross-listed with RELI 8166, HIST 4720, HIST 8726)

Prerequisite(s): Junior or instructor permission.

RELI 4170 HISTORY OF CHRISTIANITY I (3 credits)

The development of Christian theological, ritual, and social practice from the beginnings of Christianity through the Reformation. History of Christianity from its origins in the first century through the sixteenth century movements for reform. (Cross-listed with RELI 8176).

RELI 4180 HISTORY OF CHRISTIANITY II (3 credits)

This course will focus on the historical development of Christian ideas, practices, and institutions from the reformations of the sixteenth century CE through the early twenty-first century CE. In addition to the theological claims, students will examine the history of ritual practice and organizational development of the principal varieties of Christianity - Roman Catholic, Eastern Orthodox and other eastern churches, Protestant, and Pentecostal. (Cross-listed with RELI 8186).

RELI 4200 COMPARATIVE RELIGIOUS ETHICS (3 credits)

An introduction to historical and contemporary approaches to comparative religious ethics, with special focus on specific case studies as encountered in societies and religious communities across the globe. In addition to reading authors from a variety of perspectives (Aristotelians, natural law theorists, philosophers of law, pragmatists, theologians, and historians of religion), students will be introduced to special topics in the field, e.g., religion and public life, religion and law, syncretism, the secular/non-secular divide, etc. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 8206, CACT 8206)

RELI 4210 PUBLIC HEALTH, RELIGION, AND HUMAN RIGHTS (3 credits)

This course examines the intersections among public health, religion, and human rights. It considers how human rights impact public health and vice versa; how human rights and religious thought impact each other; how religious communities approach issues of public health; and how religious thought and practice affects people's health. Topics include infectious diseases such as HIV and COVID-19; issues of stigma and discrimination in public health; social determinants of health such as poverty and environmental quality; and women's and LGBTQ+ health. Students will gain skills of textual analysis, dialogue, and argumentative reasoning in both written and verbal form. (Cross-listed with RELI 8216, CACT 8216)

Prerequisite(s): Prerequisites: junior standing OR prior completion of either RELI 1010 or MEDH 1000.

RELI 4220 VIOLENT CONFLICTS, PEACEBUILDING, AND THE ETHICS OF INTERVENTION (3 credits)

This course is designed to familiarize the student with the nature of violent conflict, including terrorism, and a variety of the mechanisms for peacebuilding. The course will also explore human rights and the ethics of intervention. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 8226, CACT 8226)

RELI 4250 WAR, RELIGION, AND HUMAN RIGHTS (3 credits)

What is the connection between human rights, religion, conflict, and peacebuilding? Does religion cause war or help to stop it? How can human rights violations be prevented or stopped, and can religious actors be engaged in this work? Is the use of force ever appropriate to protect human rights? This course engages all of these questions by examining the ethical thought of multiple religious traditions; the work of human rights organizations; the just war tradition; and questions about sovereignty, peacebuilding, and the use of force worldwide. It includes discussion of historical issues and contemporary case studies. (Cross-listed with RELI 8256).

RELI 4260 THE END OF THE WORLD: RELIGION AND APOCALYPSE (3 credits)

This course introduces students to sacred texts and their interpretation by "end of the world" groups across world history. Several ancient, medieval, and contemporary groups are discussed. Special attention is paid to the connections between apocalyptic and political movements, as well as religion and violence. (Cross-listed with RELI 8266).

RELI 4400 WOMEN IN ISLAM (3 credits)

This course examines the religious, political and cultural assignments ascribed to Muslim women. Starting with the Qur'an, social, legal, and scriptural norms will be explored through the voices of Muslim women around the world. Passages of the Qur'an, hadiths and the commentaries that lead to the elevation and/or demise of Muslim women and their rights are studied. Examining the role of the female body, sexuality and seclusion within a historical context will lead to an understanding of the gendering of women in Islam. (Cross-listed with RELI 8406)

Prerequisite(s): RELI 3200

RELI 4420 MUSLIMS IN AMERICA (3 credits)

This course is designed to familiarize the student with the multiplicity of Muslim voices in the United States and to examine the myths created through stereotyping and orienting. The course will also investigate how Muslims in America form identities as hybrids and transnationals and follows the chronological development of American Muslims including their identity construction, religious issues, and politics. (Cross-listed with RELI 8426)

Prerequisite(s): RELI 3200 or permission.

RELI 4450 HOLY TERROR: RELIGION AND HORROR (3 credits)

Examining the genre of horror in books, films, and television, students will explore the ways in which horror in its many forms illuminates upon an array of religious ideas. Some of the major subjects and themes examined in this class include: various cultural interpretations of sleep paralysis, the fear of death and dying badly, Hell and Satan, nature horror, body horror, and the breakdown of the established order of reality and its replacement with one that is alien and hostile to it. In addition to these themes, we will also explore horror in Native American and Eastern social and cultural contexts. Emphasis is placed on the genre's ability to portray complex religious, philosophical, sociological, and anthropological subject matter. (Cross-listed with RELI 8456).

RELI 4500 ANCIENT ISRAEL (3 credits)

Who were the Israelites? Where did they come from? This is one of the most debated topics in biblical studies. This course examines biblical texts, historical documents, archaeological discoveries, and sociological studies.

RELI 4520 JESUS AND ARCHAEOLOGY (3 credits)

Jesus and Archaeology is a course surveying the material culture of Judea and Galilee in the time of Jesus. Studying materials is a new approach to the long study of the Historical Jesus Quest. By providing a large amount of archaeological data, this method contributes a critical mass on old debated questions such as the society in Judea and Galilee, rural versus urban, Hellenism versus Judaism, size, population and language of Galilee in the time of Jesus and much more. (Cross-listed with RELI 8526).

RELI 4550 JESUS IN FILM (3 credits)

This course is a study of how the life of Jesus of Nazareth has been portrayed in cinema over the past century. Emphasis will be placed upon the ways in which the biblical sources are adapted for films, how Jesus films reflected and influenced the values and beliefs of the times in which they were made, and the reception by audiences of the diverse film representations of Jesus. (Cross-listed with RELI 8556).

RELI 4600 WOMEN AND RELIGION (3 credits)

This course on women and religion will focus on the intersections of power and oppression that women experience in four of the major world religions - Judaism, Christianity, Buddhism, and Islam. Students will examine the historical, cultural and religious contexts that highlight women's involvement or exclusion from activity and power within each religion. Students will research case studies from around the world to examine tensions within and between religious and secular societies through the lens of gender. (Cross-listed with RELI 8606).

RELI 4700 RELIGION, FILM, AND VIOLENCE (3 credits)

A study of the ways in which films represent violence and how these representations intersect with religious concepts. Topics will include how films express the justification or "sanctification" of violence as legitimate, redemptive violence, notions of sacrifice, and the nonviolent critique of violence. We will examine a variety of genres including action films, crime stories, horror, and religious films, noting their societal influence and how they express diverse values regarding violence and its legitimization. (Cross-listed with RELI 8756).

RELI 4830 ANCIENT GREEK MYTH, RELIGION & MAGIC (3 credits)

Students will examine the impact of ancient Greek myth and belief on actual religious practice: e.g., "lived" religion. Areas covered include formal civic sacrifice, wartime religion, family and personal devotions, mystery cults, oracles and seers, plus the popular pursuit of magic. (Cross-listed with HIST 8836, HIST 4830, RELI 8836).

RELI 4850 ROME AND THE EARLY CHURCH (3 credits)

Students will cover Roman-Christian-Jewish interactions from just before the birth of Jesus of Nazareth to c. 450 CE, with an emphasis on social and political history. We catalogue Christianity's transformation from its origins as a Jewish movement and an illegal "superstition" to the dominant religion of the Roman empire. (Cross-listed with HIST 8856, HIST 4850, RELI 8856).

Prerequisite(s): Junior standing.

Science, Tech, Engr, and Math (STEM)

Science, Technology, Engineering, and Mathematics Undergraduate Courses

STEM 1120 INTRODUCTION TO MATHEMATICAL AND COMPUTATIONAL THINKING (3 credits)

This course embraces the visual arts to introduce students to the foundational elements of mathematical and computational thinking. Visual patterns form the basis for explorations in arithmetic and geometric sequences, from which algebraic functions and corresponding functions in computer programs are reasoned.

Distribution: Math

STEM 2800 SCIENCE EXPERIMENTATION AND ENGINEERING DESIGN (4 credits)

Scientific Experimentation & Engineering Design (SEED) is a general education science course that introduces integrative STEM (Science, Technology, Engineering, and Mathematics) concepts and their applications. The course fosters 21st Century Learning through study and work in active, team-based experiential learning environments through all phases of near-space experiments using high-altitude balloon platforms. Near-space experiments require research question development, experiment hardware fabrication, experiment software integration, payload launch and recovery, data analysis, and formal experiments' results reporting. Science and Engineering Practices are central to students' experiences and work in this course, as the course models the interdisciplinary connectedness of academic fields, industry, and the community to encourage collaboration and discovery to effectively implement STEM concepts, practices, and innovation. (Cross-listed with TED 2800).

Distribution: Natural/Physical Sci General Education lecture&lab

Social Sciences (SSCI)

Social Sciences Undergraduate Courses

SSCI 2000 SOCIAL SCIENCE ISSUES I (3-5 credits)

An interdisciplinary course which explores the nature and scope of social science, and seeks an integrated understanding of selected social science topics within the context of contemporary issues. Course topics will vary, but will typically include a multidisciplinary approach.

Social Work (SOWK)

Social Work Undergraduate Courses

SOWK 1000 SOCIAL WORK AND SOCIAL WELFARE (3 credits)

This course is designed for the student who wants to learn about social welfare and to explore a possible major in social work. The student examines historical and current issues in social welfare, social services, and the social work profession. The course focuses on values, beliefs, and goals of social services and social work, and provides a historical perspective for present activities.

Distribution: Social Science General Education course and U.S. Diversity General Education course

SOWK 1500 SOCIAL WORK AND CIVIC ENGAGEMENT (3 credits)

This course is designed to acquaint the student with the social work profession, professional roles and functions, and social services delivery systems. Students will have an opportunity to observe and participate in social services activities within Nebraska and Iowa communities incorporated with didactic experiences. Students will also have an opportunity to explore their vocational aptitude for social work practice via interactive encounters with clients and helping professionals.

Prerequisite(s): Not open to non-degree graduate students.

SOWK 2120 RACE, CLASS AND GENDER IN THE UNITED STATES (3 credits)

This course examines the effects of race, class, and gender on social policy and social injustice. The focus is on how institutional oppression of racism, classism, and sexism are interconnected and are mutually reinforcing. The consequences of institutionalized oppression are examined at the individual, family, group, organization, community, and societal levels.

Distribution: U.S. Diversity General Education course

SOWK 3000 APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR (3 credits)

A course on the use of data and statistical methods to explore and make inferences about society, while critically considering the influence of context and the powers and limitations of quantitative evidence. (Cross-listed with CRCJ 3000, PA 3000).

Prerequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or MATH 1300 or MATH 1320 or an ACT of 19, or above or permission from the department.

SOWK 3010 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT I (3 credits)

This course is the first part of a two-semester sequence within the MSW required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan, within the social environment at the micro- and macro-level (e.g., individuals, families, groups, organizations, institutions, and communities), as they relate to effective social work generalist practice.

Prerequisite(s): Admission to BSSW Program. Not open to non-degree graduate students.

SOWK 3020 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT II (3 credits)

This course is the second part of a two-semester sequence within the BSSW required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan, emphasizing functioning at the mezzo and macro levels of practice. This class is designed to build upon the theories of lifespan development presented in the initial course of the sequence.

Prerequisite(s): SOWK 3010, SOWK 3320, SOWK 3890. Not open to non-degree graduate students.

SOWK 3110 SOCIAL WELFARE POLICY (3 credits)

This course is an introduction to social welfare policy analysis. It informs the BSSW student about the history of professional social work, the development of social services in the United States, and the values, beliefs, ethics and social welfare theories that frame professional policy practice. The course examines U.S. social welfare policy, taking into account historical social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy.

Prerequisite(s): SOWK 3010, SOWK 3320, SOWK 3890. Not open to non-degree graduate students.

SOWK 3320 GENERALIST PRACTICE WITH INDIVIDUALS AND FAMILIES (3 credits)

This course introduces students to the values, ethics, knowledge, and skills of generalist social work practice. Using constructs from the Generalist Intervention Model, systems theory, and the strengths-based perspective, students learn about engagement, assessment, planning and contracting, intervention, evaluation, and termination. Diversity and case management are emphasized as part of bringing planned change to client systems, including individuals, families, and groups.

Prerequisite(s): Admission to BSSW Program. Not open to non-degree graduate students.

SOWK 3350 GENERALIST PRACTICE WITH GROUPS, ORGANIZATIONS, AND COMMUNITIES (3 credits)

This course reinforces the values, ethics, knowledge, and skills of generalist social work practice with groups. Students gain specific knowledge and skills in group assessment, intervention, and termination. Students will learn about the process of group development and facilitation. This course looks at the various types of groups social workers may facilitate.

Prerequisite(s): SOWK 3010, SOWK 3320, SOWK 3890. Not open to non-degree graduate students.

SOWK 3890 WRITING FOR SOCIAL WORK (3 credits)

This course emphasizes the process of critical thinking and analysis and the process of effective professional writing as required for generalist social work practice. Students will apply selected generalist social work concepts to prepare writing samples such as research/term papers, client progress/psychosocial reports, analytical reviews, professional development papers, business communications, and grant proposals. Research and writing skills emphasized are: conducting electronic literature searches, outlining, paragraph and sentence structure, revising, using APA format, and proofreading for correct grammar, word usage, and punctuation.

Prerequisite(s): Admission to BSSW Program. Not open to non-degree graduate students.

SOWK 4010 SOCIAL WORK WITH AMERICAN INDIANS (3 credits)

This course provides the student with a broad study of the historical origins, influences and issues of American Indians in relation to social work practice. The application of generalist social work methods are explored, including anti-racism, diversity, equity, and inclusion (ADEI) framework. The student will learn and understand the political identities of American Indians, which are unique to this population. Methods of intervention applicable to American Indian populations and communities are reviewed, giving special attention to practice across the lifespan. (Cross-listed with SOWK 8016).

Prerequisite(s): Admission to the BSSW Program. Not open to non-degree graduate students.

SOWK 4020 SOCIAL WORK WITHIN THE AFRICAN AMERICAN COMMUNITY (3 credits)

This course seeks to develop in students an awareness and understanding of some of the social and psychological/cognitive realities influencing the behavior of African American youth and families across the lifespan. The content draws upon theories, research and social work practice skills relevant to African American youth and families, as well as the cognitive process and social systems which impact African youth and families. (Cross-listed with SOWK 8026)

Prerequisite(s): Admission to the BSSW program

SOWK 4030 SOCIAL WORK WITH LATINOS (3 credits)

The purpose of this course is to study and analyze cross-cultural social work practice with Latino populations. Students will learn what factors impact Latino communities and what skill sets are essential for diverse social work practice. (Cross-listed with SOWK 8036).

Prerequisite(s): Admission to the BSSW Program

SOWK 4040 WORKING WITH MINORITY ELDERLY (3 credits)

This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 4690, GERO 8696, SOWK 8046).

Prerequisite(s): Admitted to the BSSW program or [SOWK 1000, junior or senior standing, and permission of the School]

SOWK 4050 ETHNIC DIVERSITY AND SOCIAL WORK PRACTICE (3 credits)

This course focuses on effective social work practice with ethnic diversity. Students critically examine different theoretical frameworks to understand ethnic diversity. Current major ethnic groups in American society are explored regarding demographics, history, worldviews, cultural traditions, and social welfare. The goal is to deepen student's basic knowledge, skills, and values of ethnic diversity in relation to family structure, gender roles, care giving, and help-seeking behaviors. In addition, attention is given to immigrants, refugees, and persons who identify as multi-ethnic. (Cross-listed with SOWK 8056)

Prerequisite(s): Admission to the BSSW Program

SOWK 4060 MEDICAL SOCIAL WORK (3 credits)

This course is an introduction to medical social work. BSSW and MSW students will focus on the knowledge base and practice skills needed to assess the holistic care of patients and their families. This course prepares students to 1) understand healthcare disparities and needs of individuals and their family, 2) apply theory and models of patient-centered care delivery, 3) develop skills for working on interprofessional teams, 4) formulate ideas for addressing barriers and improving health care access. (Cross-listed with SOWK 8066).

Prerequisite(s): SOWK 3320 prior to or concurrent

SOWK 4360 SOCIAL WORK PRACTICE III (3 credits)

This course is an introduction to a goal-oriented planned change process with an emphasis on task groups, organizations, and communities.

Prerequisite(s): SOWK 3320, SOWK 3110, SOWK 3020

SOWK 4400 RESEARCH METHODS IN SOCIAL WORK PRACTICE (3 credits)

The focus of the course will be to define research methods as they are applied in social work, using ethical, culturally informed, anti-racist, and anti-oppressive approaches. Students will use research to inform their practice decision-making. Values and ethical issues are infused throughout the content of the course as they relate to research processes and methods.

Prerequisite(s): Prior or concurrent STAT 1530, CRCJ 3000, PA 3000, PSYC 3130, SOWK 3000, or STAT 3000

SOWK 4410 GENERALIST SOCIAL WORK PRACTICUM I (5 credits)

This course is designed to provide supervised, individual, and experiential learning offered within the setting of a selected social service agency. The student is introduced to a variety of social work practice roles, develop professional relationships with client systems and learn to apply different interventions to effect change across the life span. In order to facilitate integration of classroom theory with practice, students will attend a seven-week field practicum lab/seminar (2 hours every other week in spring/fall; every week in summer).

Prerequisite(s): SOWK 4360 prior or concurrent

SOWK 4420 GENERALIST SOCIAL WORK PRACTICUM II (5 credits)

This course is designed to provide supervised, individual, and experiential learning offered within the setting of a social service agency, typically the same agency as in SOWK 4410. This course builds upon opportunities provided and competence achieved in Generalist Social Work Practicum I.

Prerequisite(s): SOWK 4410 prior or concurrent

SOWK 4450 SOCIAL WORK CAREER PREP (1 credit)

This course is an integrative senior seminar designed to be taken concurrently with practicum. This course facilitates the transition from BSSW student to professional social worker. To achieve this, students will reflect on the following: how to prepare for a job interview, personal financial planning, continuing education, licensure, and social work competencies.

Prerequisite(s): SOWK 4410 prior or concurrent

SOWK 4510 TREATMENT ISSUES IN CHEMICAL DEPENDENCY (3 credits)

This course addresses chemical dependency treatment issues including denial, minimization, relapse and its prevention, resistance, family dynamics, poly-substance abuse, co-occurring disorders, spirituality and the influence of self-help groups. The education will include the clinical treatment needs of individuals suffering from chemical dependency, taking into consideration diversity, gender, culture and lifestyle. (Cross-listed with COUN 4510, COUN 8516, SOWK 8516).

Prerequisite(s): Admission to counseling program or social work programs or permission of instructor. Not open to non-degree graduate students.

SOWK 4530 SCHOOL SOCIAL WORK (3 credits)

This course explores the field of social work practice in school settings. Major topics include: history of social work practice in schools; the school environment; roles of school social workers; mandated foundations for school social work services; eligibility for special education and 504 plans; theories of practice that include school and community based models; and interventions for target populations in schools. (Cross-listed with SOWK 8536).

Prerequisite(s): Admission to the BSSW Program

SOWK 4620 TRAUMA AND RESILIENCE (3 credits)

This course provides an overview of issues related to trauma including: the factors related to development of trauma, definitions of trauma, the impact of trauma on individuals, families and communities, and the programs and practices that are most effective and appropriate regarding the social work role in responding to trauma. (Cross-listed with SOWK 8626)

Prerequisite(s): Admission to the BSSW Program

SOWK 4640 PERMANENCE FOR CHILDREN (3 credits)

This course examines the history, challenges, and issues of governmental intervention in families to protect at-risk children. The course concentrates on the effects of social policies, like the 1980 federal legislation (PL 96-272) on child welfare delivery systems and practices. It provides a comprehensive overview of child welfare services, including child protective services, in-home services, foster care, group care, intergenerational childcare, and adoption. It also provides an overview of the juvenile justice system and its impact on children and their families. (Cross-listed with SOWK 8646).

Prerequisite(s): Admission to the BSSW Program

SOWK 4650 SOCIAL WORK IN MENTAL HEALTH (3 credits)

This is an undergraduate introductory social work course on mental health. The aim of the course is to acquire basic knowledge and skills for effective and culturally appropriate interventions. Students examine the history of psychiatric care to inform a social work perspective on mental health/illness, human rights, social justice, stigma, ethical/legal issues, and a continuum of care for families, communities, and service providers. Mental health/illness is taught from a distinct social work perspective using historical-critical analysis and case studies.

Prerequisite(s): Admission to the BSSW Program

SOWK 4660 SOCIAL WORK WITH INDIVIDUALS WITH DISABILITIES (3 credits)

This is an introductory course to explore contemporary social work practices pertaining to the experiences of individuals with intellectual and developmental disability (I/DD) across the lifespan. Law and policy trends will be examined through the lens of disability rights, advocacy, and ethics. The course will assess the impact of intersectionality and diversity on the health and well-being of individuals with I/DD.

Prerequisite(s): Admission to the BSSW Program

SOWK 4680 MEDICAL AND PSYCHOSOCIAL ASPECTS OF SUBSTANCE USE DISORDERS (3 credits)

This course introduces students to substance use disorders and their impact on the individual, family, and society. It covers psychopharmacology, alcohol and drug interactions, drug classifications, theories of substance use disorders, various models of treatment, vulnerable populations, and ethical and legal issues. (Cross-listed with SOWK 8686, COUN 4680, COUN 8686).

SOWK 4690 ASSESSMENT AND CASE MANAGEMENT IN SUBSTANCE USE DISORDERS (3 credits)

This course focuses on assessment of clients and their environment, and diagnosis and referral for substance use disorder treatment. Emphasis is given to assessment instruments, treatment levels, treatment planning, case management, and social justice. (Cross-listed with COUN 4690, COUN 8696, SOWK 8696).

Prerequisite(s): Admission to the BSSW Program

SOWK 4800 SOCIAL WORK AND THE LAW (3 credits)

This course presents the fundamental principles of criminal and civil law that have relevance to the practice of social work. Topics include the legal system; legal research methods; professional ethical/legal responsibilities and liabilities; family law; elder law; criminal law; juvenile law; personal injury law; employment discrimination law; capacity to make contracts and wills; rights of institutionalized patients; and rights of children with disabilities to an education. (Cross-listed with SOWK 8806).

Prerequisite(s): Admission to BSSW Program

SOWK 4810 SPIRITUALITY AND SOCIAL WORK PRACTICE (3 credits)

This course examines major issues and basic concepts pertaining to spirituality and social work practice. This course applies critical thinking to deepen understanding of spirituality in relation to clients of diverse religious and secular perspectives. The goal is to develop students' professional use of self and spirituality as the human striving for meaning, purpose, and wellbeing. Classroom time is organized around lectures, field trips, and reflective assignments. (Cross-listed with SOWK 8816)

Prerequisite(s): Admission to the BSSW Program

SOWK 4820 GLOBAL ENGAGEMENT: A SOCIAL WORK PERSPECTIVE (3 credits)

This course prepares students to work in a global setting. Students examine theories, concepts, and skills related to social development, cross-cultural engagement, and issues related to particular countries. The course is designed with two elements: 1) On-campus classroom learning focused on global social work knowledge, and, 2) Field-based labs that involve direct engagement with an international population. Students select one lab: i) faculty-led trip to China for two-weeks, ii) refugee resettlement service-learning project in Omaha. (Cross-listed with SOWK 8826).

Prerequisite(s): Admission to the BSSW Program

SOWK 4830 CRISIS INTERVENTION (3 credits)

Students will study Robert's 7-Stage Model of Crisis Intervention and how to ethically practice with diverse and vulnerable populations. Students will apply crisis intervention theory and models of intervention to various concern areas including but not limited to suicide, sexual assault, domestic violence, substance abuse, grief and loss, and violence. A systems, strengths, and cultural emphasis will be applied to the various crisis situations covered. (Cross-listed with SOWK 8836)

Prerequisite(s): Admission to the BSSW Program

SOWK 4850 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)

This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 4850, GERO 8856, SOWK 8856.)

Prerequisite(s): Admission to BSSW or permission of the school

SOWK 4880 TOPICAL SEMINAR IN SOCIAL WORK (3 credits)

Specific seminar topics will focus on advanced content in social work theory and practice. The course description will be announced when a specific topical seminar is proposed. The topics selected will be consistent with the Grace Abbott School of Social Work program objectives, faculty expertise, and student needs. (Cross-listed with SOWK 8886)

Prerequisite(s): Admission to the BSSW Program

SOWK 4890 SPECIAL STUDIES IN SOCIAL WORK (1-4 credits)

This independent study course allows students to pursue a special selected area or topic within social welfare in order to deepen knowledge and/or skills in that particular area.

Prerequisite(s): Admission to the BSSW Program

SOWK 4980 SENIOR HONORS PROJECT/THESIS (3-6 credits)

An independent research project supervised by an approved faculty member. The senior honors project must be approved by the CPACS Honors Coordinator.

Prerequisite(s): Senior in Honors Program and permission of the School.

Sociology (SOC)

Sociology Undergraduate Courses

SOC 1010 INTRODUCTORY SOCIOLOGY (3 credits)

An introduction to the study of human societies. The course presents the fundamental concepts and theories that make up the sociological perspective. These serve as tools for the analysis of social inequality, social institutions and social change.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

SOC 2100 SOCIAL PROBLEMS (3 credits)

An analysis of the origins of social problems in American society. Attention is given to the nature, consequences and solutions of selected social problems.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

SOC 2120 SOCIOLOGICAL THEORY (3 credits)

SOC 2120 is an intellectual history of sociology as an academic discipline surveying outstanding contributions to its body of theory. The social contexts in which a variety of classical and contemporary theoretical traditions have arisen will be considered. Stress is placed on understanding and applying different approaches to sociological analysis through detailed textual interpretation of theoretical writings.

Prerequisite(s): SOC 1010 and Sociology major or permission of instructor. Not open to non-degree graduate students.

SOC 2130 SOCIAL STATISTICS (3 credits)

An introduction to the fundamental statistical techniques used in the analysis of social data, including descriptive and inferential statistics. The focus is on the production and interpretation of statistical information in the study of social life.

Prerequisite(s): MATH 1120, MATH 1130, MATH 1220, MATH 1310, or MATH 1530 or permission of instructor.

SOC 2134 SOCIAL STATISTICS LAB (1 credit)

A computer-based laboratory course to be taken in conjunction with SOC 2130. The focus is on using computer software to produce and interpret statistical information in the study of social life.

Prerequisite(s): MATH 1120, MATH 1130, MATH 1220, MATH 1310, or MATH 1530 and SOC 2130 (taken previously or concurrently) or permission of instructor. Not open to non-degree graduate students.

SOC 2150 SOCIOLOGY OF FAMILIES (3 credits)

This course provides a description and analysis of contemporary families from a sociological perspective. A life course perspective traces the development of family life, with special attention to change, choice, and diversity. Topics such as family structure, the functions of the family as an institution, family comparisons across culture and time, and difficulties faced by families in contemporary society will also be explored.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course and U.S. Diversity General Education course

SOC 2190 THE MODERN MIDDLE EAST (3 credits)

An interdisciplinary study of the social, religious, and historical dimensions of contemporary issues and events which make the Middle East cultural and geographic region a center of global tensions. After providing a background of how Islam spread in and unified the region, students will study factors which have shaped the Middle East from the late Ottoman period to the present, analyzing the principal sociocultural and political economic developments in the Middle East from the early 19th century to the early 21st century. (Cross-listed with RELI 2190, HIST 2190).

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

SOC 2300 SPORT & SOCIETY (3 credits)

This course provides a sociological examination of the contemporary sports world and the ways that the institution of sport both reflects and shapes society. The importance of sports to culture and socialization, the interaction between sports and other social institutions, and the unique role that sports plays in both perpetuating and contesting inequalities of race, gender, class, identity, and ability will be explored.

Distribution: Social Science General Education course

SOC 2400 SOCIOLOGY ON FILM (3 credits)
