

GLOBAL RELIGIOUS STUDIES CONCENTRATION

Global Religious Studies introduces students to the academic study of religion and spirituality as well as the variety of religious traditions around the world (e.g., Hinduism, Buddhism, and Sikhism; Judaism, Christianity, and Islam; Chinese religious traditions; Indigenous religious traditions in North America and in Africa; atheism and agnosticism, pagan and other nature-based traditions). Because religion is deeply implicated in history, culture, politics, literature, and medicine, the *study* of religion is critical to understanding and explaining complex global issues in both the past and the present. One does not have to be “religious” or “spiritual” to study religion, nor is the study of religion directed toward establishing the truth of one religion over another. We pursue the academic study of religion and spirituality from a variety of theoretical and methodological perspectives, including anthropology, archaeology, cognitive sciences, fine arts, history, philosophy, psychology, sociology, and textual analysis. The basic intellectual purpose of religious studies is to develop an understanding of, and a critical insight into, the rich variety of the world's religious and spiritual traditions in the complex global realities (cultural, social, economic, political, and environmental) of the twenty-first century
