MATHEMATICS MINOR

Requirements

All coursework must be completed with a grade of C- or better. At least one MATH course 3000-level or higher or STAT course 3800 level or higher must be completed at UNO to establish residency. Three tracks are available.

The Traditional Track Mathematics Minor allows for the most flexibility in Upper Division courses. Several programs including Engineering, Computer Science, and Secondary Education: Math Endorsement can complete a Traditional Track Mathematics Minor with few or no additional courses.

The Discrete Mathematics Track Mathematics Minor bypasses MATH 1960 Calculus II and instead guides students towards courses that are relevant to their specific fields. These include Biology, Neuroscience, Philosophy, Political Science, Physics, Economics, Finance, Social Sciences, Network Sciences, Computer Science, and Engineering.

The Cybersecurity Track Mathematics Minor bypasses MATH 1960 Calculus II and instead guides students towards courses that are relevant to work in Cybersecurity.

Traditional Track

The Traditional Track minor in mathematics may be obtained by successful completion of 18-19 credits in mathematics courses consisting of:

1  STAT 3000 does not count towards the Mathematics Minor.

If planned correctly, some disciplines require few, if any, additional math courses beyond what is required for the major. Please see suggested coursework for such majors below.

Courses marked with an asterisk* are not normally required for these programs, and are added here to achieve the Mathematics Minor.

College of Education, Health, and Human Sciences Majors

Secondary Education with Math 6-12 Endorsement

These students automatically fulfill the 20 credits required for a math minor with required coursework for the major.

### Information Science and Technology Majors

#### Computer Science

Computer Science majors can earn a Mathematics Minor without taking any extra courses, simply by choosing cross-listed MATH/CSCI courses as part of their Computer Science Core Extension requirement. In addition to MATH 1950 and MATH 1960, all MATH/CSCI cross-listed courses qualify, but credit will not be given for both MATH 2230 and MATH 2030/CSCI 2030.
